REPORT

OF THE

SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT,

December 4, 1871.

SIR: The country has been prosperous during the year now closing, and the public finances have shared in the general prosperity.

During the fiscal year ending June 30, 1871, the reduction of the public debt was \$94,327,764 84. The total decrease in the public debt from March 1, 1869, to December 1, 1871, was \$277,211,892 16; and during the same period the annual interest charge has been reduced \$16,741,436 04.

The revenues for the year 1871, and the receipts since the first of July last, show that the time has arrived when a considerable further reduction in taxes can be made, and yet leave the Government in a position to pay at least fifty millions of dollars annually of the principal of the public debt, including the amount pledged through the sinking fund. In my annual report to Congress for 1870, I expressed the opinion that the settled policy of the country should contemplate a revenue sufficient to meet the ordinary expenses of the Government, pay the interest on the public debt, and from twenty-five to fifty millions of dollars of the principal annually. To that opinion I adhere, with even a stronger conviction that the payment annually upon the principal of the public debt should not be less than fifty millions of dollars.

Large as the revenues of the country have been during the last three years, our system of taxation has not been oppressive to individuals, nor has it in any sensible degree embarrassed the business of the country; and while relief from taxation is desirable it is yet more desirable to maintain the public credit in its present elevated position, not only as an example to other nations, but for its historical value in enabling the Government to make loans for large amounts.

upon favorable terms if, unhappily, in the future an exigency should require such loans to be made.

The power to negotiate a large loan at five per cent. interest, and to enter upon negotiations for the sale of bonds bearing five, four-and-a-half, and four per cent. interest, is derived entirely from the exhibition of an honest purpose on the part of the people to maintain the public faith, and the consequent ability on the part of the Government to answer that expectation by large and frequent payments upon the public debt.

The revenue from customs for the fiscal year 1871 was greatly in excess of the estimates, amounting to \$206,270,408 05, against \$194,538,374 44, for the preceding year. The cost of collecting this revenue was \$6,560,672 61, for 1871, being three and eleven hundredths per cent., while the cost for the year 1870 was \$6,237,137 25, or three and twenty hundredths per cent.

The appropriation for the collection of the customs, with the additions derived from fines, penalties, and forfeitures, exceeded the expenditures by the sum of more than eight hundred thousand dollars, and there is no doubt that the permanent appropriation will be ample for the present year, and for the next fiscal year.

The reduction of the rates of duty on the 1st of January, 1871, under the act of July 14, 1870, diminished the importation of many articles during the last six months of the year 1870, but there was consequently a large addition to the revenues for the first six months of the year 1871.

A comparison of the first six months of the calendar year 1871 with the first six months of the calendar year 1870, shows an increase of fifty-five per cent. in the quantity of tea imported, twenty per cent. in the quantity of coffee, fifty-three per cent. in the quantity of brown sugar, one hundred and twenty per cent. in the quantity of pig iron, one hundred and eighty-six per cent. in the quantity of melado, one hundred and thirty-nine per cent. in the quantity of spices, and a large increase in many other articles.

The probability is that the customs revenue for the current year will exceed that for the year 1870-71.

The receipts from internal revenue were \$143,098,153 63, being \$4,048,984 29 less than the estimates presented to Congress in December last for the fiscal year ending June 30, 1871. The estimates for the current fiscal year were \$126,418,000, and it is probable that the receipts will be equal to the estimates.

The net receipts for the fiscal year ending June 30, 1871, were as follows:

From customs.....	\$206, 270, 408 05
From internal revenue.....	143, 098, 153 63
From sales of public lands.....	2, 388, 646 68
From miscellaneous sources.....	31, 566, 736 53
	<hr/>
	383, 323, 944 89
	<hr/>

The expenditures for the same period were:

For civil and miscellaneous purposes.....	\$69, 498, 710 97
For War Department.....	*35, 799, 991 82
For Navy Department.....	19, 431, 027 21
For Indians.....	7, 426, 997 44
For Pensions.....	34, 443, 894 88
For interest on the public debt.....	125, 576, 565 93
	<hr/>
	292, 177, 188 25
	<hr/>

The miscellaneous revenues for the fiscal year ending June 30, 1871, were derived from the following sources:

Premium on sales of coin.....	\$8, 892, 839 95
Fees from United States consuls.....	565, 563 24
Storage, rent, labor, &c., at custom-houses.....	414, 310 61
Fines, penalties, and forfeitures for violations of customs laws.....	952, 579 86
Fees on letters patent.....	620, 319 11
Tax on circulation, deposits, &c., of national banks..	6, 003, 584 32
Repayment of interest by Pacific railway companies..	813, 284 75
Homestead and other land fees.....	645, 923 17
Steamboat fees and marine-hospital tax.....	385, 535 16
Proceeds of sale of coin-interest on sinking and special funds.....	7, 701, 662 73
Judiciary—fines, penalties, and forfeitures.....	75, 836 30
Tax on seal-skins.....	101, 080 00
Reimbursement to the United States for salaries of storekeepers in internal revenue bonded warehouses..	557, 235 41
Direct tax.....	580, 355 37
Emolument fees.....	585, 887 69
Parting charges—refining gold and silver bullion....	211, 721 14
Proceeds of Indian trust lands.....	1, 140, 120 28

*This is the net amount after deducting \$3,280,093 13 repaid into the Treasury as proceeds of sales of ordnance, etc. The true expenditures were \$44,080,084 95.

VI REPORT OF THE SECRETARY OF THE TREASURY.

Accrued interest on, and proceeds of sale of, Indian trust-fund stocks, and interest on deferred payments on Indian-trust lands.....	\$387, 921 01
Reimbursements to the United States for moneys advanced to meet matured interest on non-paying stocks held in trust for various Indian tribes.....	35, 535 00
One, two, three, and five-cent coinage.....	150, 000 00
Unenumerated	745, 441 43
	<hr/>
	31, 566, 736 53
	<hr/>

The receipts for the first quarter of the present fiscal year were:

From customs.....	\$62, 289, 329 37
From internal revenue.....	35, 553, 175 01
From sales of public lands.....	602, 680 61
From miscellaneous sources.....	8, 753, 189 61
	<hr/>
	107, 198, 374 60
	<hr/>

The expenditures for the same period, excluding payments on account of the sinking fund, were:

For civil and miscellaneous purposes.....	\$16, 579, 732 46
For War Department.....	12, 590, 653 05
For Navy Department.....	6, 513, 040 93
For Indians.....	3, 404, 133 42
For Pensions	8, 090, 698 69
For interest on the public debt	36, 725, 124 37
	<hr/>
	83, 903, 382 92
	<hr/>

The estimated receipts for the remaining three quarters of the present year, are as follows:

From customs.....	\$148, 000, 000 00
From internal revenue.....	90, 000, 000 00
From sales of public lands.....	2, 000, 000 00
From miscellaneous sources	18, 000, 000 00
	<hr/>
	258, 000, 000 00
	<hr/>

The estimated expenditures for the same period, excluding payments on account of the sinking fund, are:

For civil and miscellaneous purposes.....	\$50, 000, 000 00
For War Department.....	31, 000, 000 00

For Navy Department.....	\$13,500,000 00
For Indians.....	6,000,000 00
For Pensions.....	24,000,000 00
For interest on the public debt.....	85,000,000 00
	<hr/>
	209,500,000 00
	<hr/>

These estimates show a balance applicable to the payment of the principal of the public debt for the fiscal year ending June 30, 1872, \$71,794,991 68.

The receipts and expenditures for the fiscal year ending June 30, 1873, are estimated as follows:

RECEIPTS.

From customs.....	\$212,000,000
From internal revenue.....	126,000,000
From sales of public lands.....	3,000,000
From miscellaneous sources.....	18,000,000
	<hr/>
	359,000,000
	<hr/>

EXPENDITURES.

Legislative establishment.....	\$3,421,812 40
Executive establishment.....	17,443,531 38
Judicial establishment.....	3,383,350 00
Military establishment.....	31,422,509 88
Naval establishment.....	18,946,088 95
Indian affairs.....	5,445,617 97
Pensions.....	30,480,000 00
Public works under Treasury Dep't..	\$3,104,500 00
Public works under Interior Dep't...	244,800 00
Public works under War Dep't.....	14,609,662 97
Public works under Navy Dep't.....	1,483,100 00
Public works under Agricultural Dep't,	26,500 00
	<hr/>
	19,468,562 97
Postal service.....	5,474,001 00
Miscellaneous.....	11,258,325 44
Permanent appropriations.....	126,281,974 00
Sinking fund.....	22,895,930 00
Interest upon the capital of the sinking fund.....	5,783,333 00
	<hr/>
	301,705,036 99
	<hr/>

These estimates show a balance of \$57,294,963 01 applicable to the payment of the principal of the debt, in addition to the sum of \$28,679,263 due on account of the sinking fund, or the sum of \$85,974,226 01 in all.

In the estimates for the next fiscal year I have not included in the receipts the premium on gold which may be sold, nor in the expenditures the premium which may be paid on bonds to be purchased in currency.

In the suggestions I have the honor to make in reference to the reduction of taxes, I keep in view two important facts: first, that the ability of the nation to pay at least fifty millions annually of the principal of the public debt shall not be impaired; and, secondly, that in the change of the revenue system no violence shall be done to the business interests of the country. While I do not undertake to state precisely the causes which have contributed to the public prosperity, there is no substantial reason for questioning the truth of the statement that the last few years have been the most prosperous in the history of the country; years without example in our own affairs, and without parallel in the affairs of any other Government.

It is practicable to dispense with all revenue from internal sources except that derived from stamps, spirits, tobacco, and malt liquors. These sources should furnish for the year 1872-'73 a revenue of about one hundred and ten millions of dollars, making a reduction of taxes of sixteen millions of dollars. The revenue from customs under existing laws, and from lands and miscellaneous sources, would amount to about two hundred and thirty-three millions more, making a total revenue for that year of three hundred and forty-three millions of dollars.

The expenses of the Government, not including the amount payable on account of the sinking fund, are estimated at \$273,025,773 99.

If to this sum be added fifty millions of dollars for payments on account of the public debt, including the amount due on the sinking fund, there remains a balance of about twenty millions, within which reductions may be made in the revenue from customs. This amount, added to the reductions proposed under the internal revenue laws, gives a total reduction of thirty-six millions.

In this view, I respectfully recommend to the consideration of Congress the reduction of the duties on salt to the extent of fifty per cent.; the duty on bituminous coal to fifty cents per ton; the reduction of the duty on raw hides and skins; and the removal of all duties from a large class of articles produced in other countries, which enter into the arts and manufactures of this country, and which are

not produced in the United States, and the revenue from which is inconsiderable. Such a list, with the revenue derived from each article, is in course of preparation, and will be submitted to Congress.

The removal of duties from a large class of articles used in manufactures, and the reduction of the duties upon coal, furnish an opportunity for a moderate decrease in the rates of duties upon those products whose cost will be diminished by these changes.

While nothing, as the consequence of legislation, could be more disastrous to the public prosperity than a policy which should destroy or seriously disturb the manufacturing interest of the country, it is still possible, by wise and moderate changes adapted to the condition of business and labor, to reduce the rates of duties with benefit to every class of people.

The average premium on gold for the year 1868 was 39.54 per cent. ; for the year 1869 it was 32.56 per cent. premium ; for the year 1870 it was 14.83 per cent. premium ; and for the first eleven months of the year 1871 it was 12.1 per cent. premium. The value of the paper currency of the country during the years 1869 and 1870 was apparently appreciated by the increased use of paper money in the South, but chiefly by the establishment of the credit of the United States upon a firm basis. On the first of January, 1871, the last-named fact was fully accomplished, and since that time the appreciation of the paper currency has been due wholly to the increased demand for it in the business affairs of the country. The difference between the value of paper money at the present moment and its value on the first of December, 1870, may be attributed to the latter cause, and furnishes the best means which the country has yet had for ascertaining the quantity of paper currency which can be used and its value kept at par with gold.

The result of this test concurs with what seems to me to be the best opinion upon the subject, that the amount of paper money in circulation is still so great that it cannot be maintained in value at par with coin. There are two modes of relief : One is to reduce the volume of currency, as was recommended by me in my annual report submitted to Congress in December, 1869 ; the other mode is to await the growth of the country, and the increasing demands of business, which in time will produce the desired result.

The chief means of securing the end sought, without a reduction in the volume of currency, would be the use of paper money upon the Pacific coast. With this object in view, steps have already been taken by this Department for the purpose of ascertaining whether it is practicable to substitute paper for coin, and I have reason to anticipate that a change

may be made in the laws relating to National Banks tending to that result, which will not affect unfavorably the general character of the system.

It is my duty to call the attention of Congress to the importance of abolishing the system of shares in moieties, as far as the benefits inure to revenue officers, and other persons officially connected with the Government. This measure was recommended in my last annual report, and a statement was submitted to Congress showing the amount received by officers of customs, together with a bill increasing their salaries without any increase of appropriations from the Treasury; the sum now paid from moieties being quite sufficient to place the entire force upon a satisfactory footing in regard to pay.

During the last fiscal year the office of collector and surveyor of the port of New York each received from moieties the sum of \$49,215 69, and the naval office the sum of \$48,195 59.

In most of the cases the officers do not perform special services entitling them to the amounts granted, and importers and others whose acts are made the subject of investigation, complain, and, I think, with just reason, that the agents of the Government have a pecuniary interest in pursuing those charged with violations of the law. The Government ought to pay fair salaries, and rely upon the good faith of its officers for the performance of their duty. One of the difficulties which the Department has to meet, frequently is, that customs officers have an interest in proceedings for the discovery of fraud, the settlement of cases, or the prosecution of them, which is different from the real interest of the Government; and, as a necessary result, the conduct of such officers is open to suspicion, both on the part of those who are pursued by them, and the Government that they ostensibly represent.

It may be deemed expedient to leave the law as it now stands in regard to informers who are not officers, making it a penal offense for any officer to enter into an arrangement with an informer for any share of the proceeds of the information, and giving to the informer perpetual right of action for the recovery of any money or other valuable thing paid or given to an officer engaged in the discovery or prosecution of a fraud or legal wrong against the Government.

The report of the Comptroller of the Currency shows that one hundred and forty-five banks have been organized under the act approved July 12, 1871, providing for the issue of fifty-four millions of dollars of additional bank circulation, and that the sum of \$22,333,900 has been issued.

By virtue of the same act, the Treasury has redeemed \$22,230,000

of the three per cent. certificates then in circulation, leaving the sum of \$23,490,000 now outstanding. I take the liberty of suggesting, that it appears to me to be wise to leave the distribution of the circulation authorized by said act as it now stands.

Should the States that have already received their proportion of circulation be authorized to take what may remain, only a brief period will elapse before a demand will be made from States with limited circulation for an increase. It seems prudent, therefore, to retain the balance of the fifty-four millions for distribution in those States now having a claim to it, on the basis of equality of apportionment.

The details of the subscription to the Loan show that the National Banks, have, upon the whole, acted liberally—more than a hundred millions of dollars having been subscribed for by them on their own account.

It is not unreasonable to tender to these institutions the opportunity to subscribe for bonds under the act of July 14, 1870, to an amount equal to the deposits required of them as security for circulation, and to couple that offer with a provision that, after ninety days, to the extent that the offer may be declined, other banking associations may be formed in the several States where the existing banks shall have failed to make the required subscription, and the circulation transferred from such banks to the new associations.

The banks now organized cannot justly complain, if, having an opportunity to pursue the business upon the new bonds, and declining it, other associations shall succeed to their franchises and rights.

The business of the Bureau of Engraving and Printing has been carried on with diligence during the year, and with satisfactory results.

Although some efforts have been made at counterfeiting the special papers used by the Department, they have not been successful, and the specimens captured are so crude as not to excite serious apprehensions as to ultimate success.

Since the first of July, 1869, seventy million sheets of paper have been manufactured, all of which have been accounted for on the books of the Department.

I respectfully recommend that an appropriation be made for a new issue of national bank notes. Those now in use are much worn and very successful counterfeits of several denominations have appeared.

The public building used as a custom-house, court-house, and post office, at Chicago, was destroyed by the great fire on the 8th of October last. The exterior walls remain, and the building could be repaired, but, anticipating the growth of Chicago and the magnitude of its

public business, I advise the erection of a building suited to the wants of a first-class city.

It is important that a much larger piece of land should be obtained, either by addition to the present lot or by the purchase of another site. On the 18th of October last, I wrote a letter to Governor Palmer, asking him to recommend to the Legislature the passage of an act granting authority to the courts of the State of Illinois to condemn such land as might be required, in case the Government should be unable to obtain it by purchase at a reasonable price, payment to be made upon an appraisal. In every case, the site for a building erected by the Government for public uses should be large enough to separate it from all other structures, thus furnishing sufficient light for the prosecution of business, and adequate security also against fire and the depredations of lawless persons. It is hardly necessary to say, that in the existing condition of affairs at Chicago, it is important that an appropriation, available during the present fiscal year, should be made without unnecessary delay.

Since my last annual report, the Supervising Architect has completed the custom-house, court-house, and post office, at Portland, Maine; the court-house and post office at Des Moines, Iowa; the court-house and post office at Madison, Wisconsin; the appraisers' stores at Philadelphia; and the assay office at Boise City, Idaho.

It is now expected that the custom-house and post office at St. Paul, Minnesota; the marine hospital at Chicago, Illinois; the court-house and post office at Astoria, Oregon; the custom-house at Machias, Maine; the branch mint at San Francisco, California; and the custom-house at Cairo, Illinois, will be finished and ready for use by the first day of July next. At that time there will remain, in an unfinished condition, the court-house and post office at Columbia, South Carolina; the custom-house at New Orleans, Louisiana; the custom-house at Charleston, South Carolina; the court-house and post office at Knoxville, Tennessee; the custom-house and post office at Portland, Oregon; the court-house and post office at New York; the post office and independent treasury at Boston, and the custom-house and post office at Omaha, Nebraska.

The prosecution of these works—four of which are of great importance—in connection with public buildings to be erected at Chicago, and the erection of marine hospitals at Pittsburg, San Francisco, and New York, will, in my opinion, sufficiently occupy the Supervising Architect of the Treasury and the force at his command. I cannot, therefore, advise appropriations for other public buildings until some of those in process of construction shall have been completed. The points at

which the erection or repair of public buildings is most needed are Hartford, Indianapolis, Cincinnati, and St. Louis.

Under an act passed at the last session of Congress, appropriating two hundred thousand dollars for the purpose of more effectually securing life and property on the coasts of New Jersey and Long Island, a careful examination of the coast and of the life-saving stations has been made by experienced officers of the revenue service. In accordance with their report, proposals were invited and accepted for the erection of fourteen new houses on the coast of New Jersey and six upon the coast of Long Island. Repairs are also making upon the old houses on the Long Island coast.

The operations of the coast survey, which are under the administrative direction of this Department, have been prosecuted with the usual energy, as will be seen from the brief report of progress made by the Superintendent, in advance of the usual detailed report, with maps, annually submitted to Congress.

The survey of the Atlantic coast is now rapidly approaching completion, that of the Gulf coast is more than half finished, and the work on the Pacific coast is being pressed forward vigorously.

The estimates submitted substantially conform to the appropriations for the present year. An increase is asked for the item of extending the triangulation across the country to the Pacific ocean, great interest having been manifested by the authorities of the States traversed in the prosecution of the work.

The business entrusted to the Light-House Board is one of the most important branches of the public service in the control of this Department, and I am able to state that it is conducted with fidelity and with reference solely to the maritime interests of the country.

The estimates made by the Light-House Board exceed the appropriations for the present year but they appear to be necessary, and I respectfully recommend them to the consideration of Congress.

Under an act of Congress, approved July 30, 1870, Dr. John M. Woodworth has been appointed Supervising Surgeon of the Marine Hospital Service. His administration is satisfactory to the Department.

The average number of hospital patients for the fiscal year ending June 30, 1870, was one thousand and sixteen, and for the year ending June 30, 1871, one thousand one hundred and ninety-eight. The total cost of the service for the first-named year was \$405,624, being an average, for each patient, of \$1 09 per day; and for the latter year \$453,082 42, or an average of \$1 04 per day.

In the first-named year the hospital tax was \$168,153 70, and in the latter year it amounted to \$293,592 14.

The Supervising Surgeon is of opinion that pavilion hospitals are better adapted to the successful treatment of the sick than the ordinary buildings of brick and stone, while the expenses are only one-fourth as great.

In accordance with his suggestion, I recommend an appropriation of fifty thousand dollars for the purchase of land and the construction of a pavilion hospital at Pittsburg, Pennsylvania. The present hospital is situated in the vicinity of iron mills and railways, and as it can be sold for about seventy thousand dollars, the Government will be fully reimbursed for the cost of a new hospital, while the comfort of the patients will be promoted.

An estimate has been made that the sum of fifty thousand dollars will be sufficient for the construction of a pavilion hospital on Angel Island, in the Bay of San Francisco, sufficient to accommodate one hundred and fifty patients, and I also recommend an appropriation of that amount for that purpose.

I also respectfully renew the recommendation, made heretofore, for a pavilion hospital near the city of New York sufficient for the accommodation of two hundred patients.

The Revenue Marine Service employs twenty-five steam-vessels and eight sailing vessels. In addition to these, there are two large steamers upon the Lakes, not in commission, and two schooners upon the coast condemned as not fit for duty.

Of the six large steamers upon the Lakes, four only are in commission, and as the others are not needed, I have the honor to recommend that authority be given for their sale.

During the last year four iron steamers have been built—three of two hundred and fifty, and one of three hundred and fifty tons burden. Under the existing appropriation of two hundred thousand dollars, the Department is about to issue proposals for four small iron propellers, two for the Pacific and two for the Atlantic coast.

A further appropriation of two hundred thousand dollars is needed to enable the Department to carry into effect the recommendation of the Commission, whose report was approved by the Department and submitted to Congress May 26, 1870.

The plan recommended by the Commission, when fully adopted, will effect a reduction in the expenses of this branch of the service of about five hundred thousand dollars, or about thirty-four per cent. of the whole cost. The changes proposed contemplate the use of vessels of less tonnage, and a consequent reduction in the number of men employed.

The expenses of the Revenue Marine Service for the year ending

June 30, 1871, were \$1,251,984 52, against \$1,138,393 31 for the preceding year. The first quarter of the present fiscal year shows a reduction in expenses of \$83,201 42, as compared with the corresponding period of the preceding year.

At the date of my last report, a board of officers was in session charged with the duty of examining the officers then in active service. The report showed that five captains, ten first lieutenants, nine second lieutenants, and ten third lieutenants, were not qualified for duty. The persons found to be incompetent have been discharged, and their places have been filled by promotion and by the appointment of additional officers, after a competitive examination.

There are several officers in the service who, on account of age, are unfit for active duty. For the supply of officers in their places, and for the increase of the number of engineers, rendered necessary by the substitution of steam for sailing vessels, additional appropriations are required for the next fiscal year. This branch of the public service is, upon the whole, in a satisfactory condition.

During the third session of the 41st Congress a bill was submitted for the organization of a Mint Bureau. The bill passed the Senate but failed in the House of Representatives; though not, as I am informed, from any objection to the principles on which it was framed. I urgently recommend the passage of a similar bill at the present session of Congress. All the Mints and Assay Offices are nominally in charge of the Treasury Department; but there is not, by authority of law, any person in the Department who, by virtue of his office, is supposed to be informed upon the subject; and no one on whom the Secretary of the Treasury can officially rely for information or advice in the management of this important branch of the public business.

It is estimated that the internal commerce of the country is fifteen times as great as our external commerce, but the statistics are not trustworthy or complete; and I respectfully recommend that provision be made for obtaining such returns as will show fully the trade of the country upon the rivers, canals, lakes, and railways.

The report of Mr. Charles Bryant, Special Agent, who has had charge of the fur seal-fishery at the Islands of St. Paul and St. George, shows that the business has been conducted by the Alaska Commercial Company in substantial conformity to the terms of the contract. Mr. Bryant suggests an appropriation for the construction of a house upon each island, for the accommodation of the agents of the Government, who at present are dependent upon the company for board and shelter; and, although I am not aware that any evil has resulted from the

arrangement, it is manifest that it ought not to be continued. It is estimated that an appropriation of five thousand dollars will be sufficient for a suitable building on each island.

The agents charged with the management of the seal fishery have been detailed from the customs service. As the full number of agents authorized by law is needed upon customs business, I respectfully recommend that authority be given for the appointment of two agents and two assistant agents, and that a suitable appropriation be made for their salaries and expenses. The necessity of two agents at each island is apparent. The agents will desire to return to the States as often as once in two years; and, moreover, it is wise for the Government to have not less than four persons in its employment connected with the care of the people and the business of the islands.

Mr. Bryant also makes suggestions as to further provision for the care of the natives, which appear to me to deserve consideration.

I again call the attention of Congress to the importance of increasing the salaries of the Bureau Officers and Heads of Division in the Treasury Department.

At present there is great inequality and injustice existing. The First Comptroller receives a salary of five thousand dollars a year, while the Second Comptroller and other Bureau Officers, whose duties are hardly less important, receive only three thousand dollars. The Solicitor of the Treasury is upon a salary of three thousand five hundred dollars, while the Solicitor of Internal Revenue, whose duties are less important, receives a salary of four thousand dollars.

The Heads of Division, in the Internal Revenue, receive salaries of twenty-five hundred dollars per annum, while in every other branch of the Treasury they are selected from fourth class clerks, whose salaries are fixed by law at eighteen hundred dollars a year; although, for several years an appropriation has been made from which the Secretary of the Treasury, in his discretion, has increased the salaries in his own office to twenty-eight hundred dollars per annum.

It is not an exaggeration to say that the head of a division in charge of the loans, of the warrants, or of the sub-treasury accounts, occupies a position in which the country and the world are more concerned than in that of the Collector of Customs at New York; yet the latter officer receives more than fifty thousand dollars a year, while it is with difficulty that the former is able to secure the inadequate sum of twenty-eight hundred dollars.

The same remark might with truth be made of several Bureau Officers, and of persons in the office of the Treasurer of the United States.

In this connection, I also recommend an increase of the salary of the Supervising Surgeon of the Marine Hospitals.

I think it my duty to speak of the provisions of the act creating the Department of Justice, by which the Solicitor of the Treasury and the Solicitor of the Internal Revenue Office are made officers of that Department. The proper and essential duty of the Solicitors is to give advice to the Secretary and Bureau officers upon questions which arise in the daily business of the Department. Under the existing system, the Attorney General is made nominally responsible, while, in fact, he ought to be exempt from all responsibility for the advice given by these officers, that, upon a reference to him of questions which may have been previously considered by them, he may be free to revise or reverse their action. These officers should receive their appointments through the Treasury Department, and be responsible to its head. It is a fundamental error in administration, to place in one of the Departments officers deriving their appointment from another Department.

Should the Attorney General transfer these officers to the Department of Justice, as appears to have been contemplated by the act, this Department would be deprived substantially of their services. I earnestly recommend the restoration of these officers to their former positions in the Treasury.

The examination of persons designated for clerical service, and for promotion in the Treasury Department, has been continued, with beneficial results; and the examination is even more exacting in its requirements than at the date of my last annual report. Means will be taken to extend the system, with such modifications as the difference of duties may suggest, but with equal efficiency, if possible, to the principal custom-houses, and to other branches of the public service under the control of this Department.

On the 28th of February last public notice was given that on the 6th of the following March books would be opened in this country and in Europe for subscriptions to the National Loan, under the act approved July 14, 1870, and the conditions on which the subscriptions would be received were also made known. All the national banks, and a large number of bankers both in this country and in Europe, were authorized to receive subscriptions. The first preference was given to subscribers to the five per cent. bonds, within the limit of two hundred millions of dollars. On the 1st of August the subscriptions amounted to sixty-five millions seven hundred and seventy-five thousand five hundred and fifty dollars, chiefly by the national banks.

Under date of July 14, 1871, a despatch was received from Hon. William A. Richardson, Assistant Secretary of the Treasury, then in London, stating that certain bankers in Europe proposed to take the remainder of the two hundred millions of five per cents. upon certain conditions. This proposition was considered and modified, and early in August an agreement was made with Messrs. Jay Cooke & Co., representing bankers in Europe and in the United States. By the terms of the agreement, the parties represented by Messrs. Jay Cooke & Co. had the right to subscribe for the remainder of the two hundred millions of said bonds, by giving notice thereof, at any time previous to the first of April next, and by subscribing for ten millions at once and for an average of at least five millions of dollars of bonds per month during the intervening time, subject to the right of the national banks to subscribe for fifty millions of dollars within sixty days from the 25th day of August.

It was also agreed that the subscriptions should all be made through national banks, and certificates of deposit therefor issued by said banks to the Secretary of the Treasury, bonds to be lodged with the Treasurer of the United States for the amount of the deposit. By a printed circular issued on the 10th of August, 1871, it was announced that national banks making or obtaining subscriptions, payable in coin, would be designated by the Secretary of the Treasury as depositaries of public money, on the usual condition of placing in the hands of the Treasurer of the United States bonds of the United States for the security of such deposits; and that, at the commencement of each month, notice would be given of the redemption of an amount of bonds equal to the amount of subscriptions in coin for the preceding month, interest to cease in ninety days from the date of such notice.

It was also stated in the circular that, as the bonds called should mature, the deposits would be drawn from the several banks proportionately.

It was further agreed that the subscribers to the loan should receive as commissions whatever might remain of the half of one per cent. allowed by law upon the two hundred millions, after paying the cost of paper for the bonds, for engraving, printing, advertising, delivery, and all other expenses of the same.

Under this agreement the books were opened in this country and in Europe, and by the last of August subscriptions were obtained for the entire amount offered.

On the first of September public notice was given that certain five-twenty bonds, to the amount of one hundred millions of dollars,

of the issue of 1862, specified by number as nearly as was practicable, according to the provisions of the act of July 14, 1870, would be paid on the first of December, and that the interest would cease on that date. Of the bonds so called, more than eighty millions of dollars are now in the possession of the Department; of which amount, seventeen millions of dollars have been paid in coin, and the remainder have been received or deposited in exchange for the five per cent. bonds.

Previous to September five per cent. bonds to the amount of \$62,139,550, had been issued and payment made therefor. The work of delivering the bonds subscribed for at that date is now going on, and under such circumstances as to leave no doubt that the whole business will be concluded in a brief period of time.

By the act establishing the national banking system, the Secretary of the Treasury was authorized to make them depositaries of any public money, except receipts from customs; and the act authorizing the refunding of the national debt directed the Secretary of the Treasury to give three months' notice of the payment of any bonds which, in such notice, might be specified and called for payment. In the same act it was provided that the money received for the new bonds should be used only in payment of bonds outstanding known as five-twenty bonds. The statute proceeded upon the idea that the holders of five-twenty bonds should receive three-months' interest upon their bonds after notice should be given by the Government.

As this notice could be given safely only upon subscriptions already made or secured, the general necessary result, even in case the money were paid into and held in the Treasury of the United States, would be a loss of interest for three months.

On the 1st of August last the demand for the new bonds had nearly ceased; but, by the agreement referred to, the necessary loss to the Government incident to the refunding of the public debt was made the means of securing subscriptions to the amount of about one hundred and thirty millions of dollars.

The banks, or those represented by the banks, derived an advantage in the use of the amount of their subscriptions for three months, but this without other loss to the Government than what was incident to the negotiation of the loan under the law.

I am informed by Judge Richardson, and such is my own opinion, that the most serious obstacle in the way of negotiating the four and four-and-a-half per cent. bonds in Europe is the inadequacy of the commissions allowed. When the circular of the 28th of February last was issued, one or two leading European bankers declined to act as agents,

and I am persuaded that others who accepted the agency failed to give that attention to the business which would have been bestowed upon it had the commissions corresponded more nearly to those usually received by them for the negotiation of public loans. The credit of the country is fully established in every financial centre of Europe, and the bonds of the United States can be negotiated at their market value in a larger number of cities than the bonds of any other country in the world. Under these circumstances, I think it my duty to advise such an allowance for commissions upon the four and four-and-a-half per cent. bonds as will secure the negotiation of them with the least possible delay. It needs no analysis of the subject to show that the interests of the country will be greatly promoted by the proceeding, even though the commissions should seem to be unnecessarily large. I also recommend that authority be given for the payment of interest in London. This can be done without the least cost or risk to the Government.

Returns for the fiscal year 1870-'71 show that the ocean commerce of the United States is passing rapidly into the hands of foreign merchants and shipbuilders. In the year 1860, nearly seventy-one per cent. of the foreign commerce of this country was in American ships; in 1864, it had fallen to forty-six per cent.; in 1868, to forty-four per cent.; and in 1871, it is reported at less than thirty-eight per cent.

The loss of the shipping of the United States is due chiefly to two causes—first, the destruction of American vessels by rebel cruisers during the war; and, secondly, the substitution of iron steamships for the transportation of freight and passengers upon the ocean, in place of sailing vessels and steamships built of wood.

When the war opened English builders of iron steamships had acquired considerable proficiency, and since that period the art has been carried to higher perfection in Great Britain than in any other part of the world. It is stated that the superiority of British machinery and knowledge of the business by British mechanics give an advantage over American shipbuilders equal at least to ten per cent. upon the cost of construction. They possess additional advantages in the cost of labor, the cost of iron, coal, and other materials, and in the rate of interest upon the capital employed, equal in all to about twenty per cent. more, so that the difference in favor of British shipbuilders is at least thirty per cent.

In considering the means for the restoration of our ocean commerce, two facts must be accepted: First, that it is useless to attempt to revive it with wooden ships; and, secondly, that iron ships moved by sails

cannot compete with iron ships propelled by steam. Hence, the only practical questions for consideration are these: Can the construction of iron steamships be established in this country, and, if so, by what means?

The trans-ocean commerce of the United States would employ about six million tons of shipping, if each vessel made but one round voyage in a year. The value of our exports and imports has already reached the sum of nearly eleven hundred millions of dollars, and during the present decade it will exceed fifteen hundred millions of dollars annually. The annual returns for freight and passengers are about one hundred millions of dollars.

The history of the loss of our commerce, as shown in the statistics already given, renders it certain that without some efficient action on the part of the Government, the entire foreign trade of the country will soon pass into the hands of our rivals.

The monopoly of the trade between the United States and Europe by foreign merchants and shipbuilders carries with it the monopoly of shipbuilding for the entire world, and, as a consequence, the Atlantic trade, the trade of the Pacific, and the seas adjacent thereto, will be carried on in English-built steamers.

An alteration of the law by which foreign-built vessels may be admitted to American registry will furnish no adequate relief. On the contrary, the change would stimulate shipbuilding in England, while the prospect of establishing it on this continent would diminish in proportion to the prosperity of the business in the ship-yards of our rivals.

In view of the facts of our extensive coast upon the Atlantic and Pacific oceans, and our position with reference to Europe and Asia, the country ought not to be satisfied with any policy which does not look to the establishment and continuance of shipbuilding in the United States, the encouragement of our own seamen and merchants, and the control of so much, at least, of the commerce of the world as is derived from the export of our products and the importation of articles required for domestic consumption.

The removal of duties upon foreign articles used in the construction of iron steamships, or the allowance of a drawback equal to the amount of duties paid, will not, in the existing condition of things, secure the reestablishment of the business. But were it otherwise, the removal of duties or the allowance of drawback raises practical questions of great difficulty, while any concession by an indirect process is likely in the end to prove unnecessarily expensive to the country. Several of the

existing lines of European steamers were established by the aid of Government subsidies. They are still encouraged by the same means; and it is unreasonable to expect that our merchants and ship-builders can successfully compete with this formidable combination, unless they are supported by the power of their own Government.

After careful consideration of the whole subject, I am prepared to advise the passage of a law guaranteeing to persons who may employ in the foreign trade American-built first-class iron steamships of not less than two thousand tons burden each, an annual payment, for the period of five years, of the sum of thirteen dollars per ton. The subsidy should be proportionately less to vessels of lower classification.

In making this recommendation, I do not assume that there is no other practicable method of restoring our commerce, but I present it as the method which appears to me to be the most efficient and economical.

Connected with this plan, it will be wise to consider whether the ships may not be so constructed as to be available for naval purposes, and, in case of war, subject to the right of the United States to take them upon payment of their appraised value. A similar suggestion was made by the Secretary of the Navy in his report for the year 1869. They should also be required to carry the mails upon moderate terms, or in consideration of the subsidy.

The use of sailing vessels and steamers built of wood may be continued successfully in the coasting trade, the trade with the British possessions, and upon the rivers and lakes of the country; but any effort to regain our former position upon the ocean by their agency must end disastrously.

I entertain the opinion that the policy suggested will be effectual, and that in a comparatively short period our mechanics and artisans will acquire equal skill with those of England, and that we shall not only have the aid of the best machinery now in use elsewhere, but that important improvements will be made, calculated to place the country in a position of superiority.

We shall also be able to test practically the quality of American iron, which, for the purpose of shipbuilding, is represented as better than that used in Great Britain.

If it shall appear, as is claimed, that American iron is about ten per cent. better than the iron used in England, an advantage will be secured, not only in the diminished cost of the vessels, but also in the increased tonnage capacity of American ships of equal dimensions over those constructed with inferior materials.

Accepting as a truth, established by experience, that the ocean com-

merce of the world is to be carried on in iron steamships, we must consider and decide whether the United States shall disappear from the list of maritime nations, or whether, by a determined and practical effort, we can regain the position which we occupied previous to the late rebellion.

GEO. S. BOUTWELL,
Secretary of the Treasury.

Hon. JAMES G. BLAINE,
Speaker of the House of Representatives.

* Conversion of compound interest notes.

† Conversion of seven-thirties of 1864 and 1865.

‡ Conversion of five-twenties and consols of 1865, 1867, and 1868.

In comparing the foregoing table with the issues and redemptions, as shown by a comparison of the debt statements of July 1, 1870, and July 1, 1871, numerous differences will be discovered. The following notes will serve to explain them:

The actual net redemption of the temporary loan during the year was \$101,000, and of three per cent. certificates, \$13,660,000. To correct an error in former accounts of receipts and expenditures, \$5,000 was credited as an issue in the former account, and charged as a redemption in the latter; thus making this statement vary in both these accounts from the public debt statement, into which this error was not brought.

In covering into the Treasury the receipts on account of certificates of indebtedness in former years, \$18,241.75 was covered as on account of principal, when it should have been covered as on account of interest; and \$3,183.75 was covered as premium, when it should have been covered as principal; thus making an actual difference in this loan account of \$15,058.02 between the public debt statement and the loan account, as by the receipts and expenditures.

In the quarter ending September 30, 1868, \$150.22 was covered to the credit of the *principal* of the loan of 1863, which should have been covered as *premium*; a counter entry was made in this year to correct the error, which therefore makes a difference in the account.

On the 31st of December, 1864, \$12,000 was covered into the Treasury as legal tenders, and \$8,000 as fractional currency. It should have been the reverse; and in order to correct this error, a counter entry was made, leaving the difference of \$4,000 in this account to offset the same error in former years. The remaining difference between these two accounts, of six cents, is explained by the fact that the Treasurer of the United States was reimbursed for six cents more fractional currency than he redeemed in one quarter, and in this quarter made a deposit of this amount to correct the error.

In covering into the Treasury receipts from the loan authorized on account of the Oregon war, \$54,900 was erroneously credited to the account of five-twenties of 1862. In order to correct this error, a warrant and counter warrant were issued, charging this amount to the five-twenty account and crediting it to the Oregon war account.

The amount of the Treasury notes of 1857 outstanding, as shown by the debt statement, on the 1st of July, 1870, was \$2,000. During the year it was discovered that this account was erroneous by the amount of certain Treasury notes which had been twice charged as redeemed, though of course not twice paid. To correct this error the Treasury notes redeemed within the year were not deducted from the debt statement, and therefore appear in the account of receipts and expenditures as that much redemption in excess of the amount as shown by the debt statement.

In the examination of the account of the Texan indemnity loan, it was discovered that \$30.62 had been covered as principal, when it should have been covered as interest; also, that \$17,080 was covered as principal, which should have been covered as premium. Counter entries to correct this error have been made in this year's accounts, and therefore show a difference when compared with the debt-statement accounts, into which these counter entries do not enter.

In the examination of the account of the loans of 1847 and 1848, it was discovered that \$5,500 had been charged as a redemption to the loan of 1847, which should have been charged to the loan of 1848. A counter entry was made during the year to correct this error.

In the debt statement an error of \$500 was discovered, being an amount redeemed and twice deducted.

The following items have been added to the public debt statement since the 1st of July, 1870, being the amount of debt outstanding, but unascertained until subsequent to that date: Old debt, \$57,665; Mexican indemnity stock, \$1,104.91; bounty-land scrip, \$3,975.

In October, 1868, Congress passed an act for the relief of Ober, Nanson & Co., to indemnify them for \$60,000 compound-interest notes lost at sea in the steamship "Republic." This amount was paid under the relief act, but the Treasury-note account was not charged with them until recently, when, in making the examination, an error was discovered of \$500 in the Loan-Branch numerical registers, (from which the public debt statement was formerly made,) by checking off two notes as redeemed against one actually paid, and the correction of which left the amount to be charged but \$39,500.

December 22, 1870, a warrant was drawn charging the account of seven-thirties of 1865 with the redemption of \$1,000. It was discovered, on examination of the accounts, that this warrant was for the redemption of a bond of the loan of five-twenties of 1865, and a warrant and counter warrant were issued to correct the error.

The following table exhibits the redemptions of five-twenty bonds, as shown by the public debt statement, during the fiscal year, compared with the receipts and expenditures, and the differences:

	By Public Debt Statement.	By Warrant.	Difference.
5 20's, 1862.....	\$51,038,100	\$36,362,750	\$14,675,350
5-20's, March, 1864.....	1,262,900	525,500	737,400
5-20's, June, 1864.....	39,595,050	23,510,550	16,084,500
5-20's, 1865.....	35,676,450	25,768,050	9,908,400
Consols, 1865.....	90,415,800	44,804,200	45,611,600
Consols, 1867.....	51,355,400	23,286,750	28,068,650
Consols, 1868.....	3,120,400	412,490	2,708,000
			\$117,793,900

Prior to the 1st of July, 1870, the bonds purchased on account of the sinking and special funds were neither deducted from the debt statement nor charged as redeemed in the loan accounts, for want of authority of law. After the passage of the act of July 14, 1870, which conferred the authority, these purchased bonds were charged to the proper loan account and deducted from the debt statement, and the amounts were credited by counter warrant to the funds from which the purchases had been made. The amount of this transfer was \$117,740,000, leaving a difference of \$53,900, which is explained by the paragraph in relation to Oregon war bonds, and the paragraph next above this one.

The bonds representing the difference between \$117,740,000 (explained above) and the \$121,429,100, amount of bonds purchased to July 1, 1870, not having been received and paid for prior to the act of July 14, 1870, and not having entered into the accounts, were treated as an actual redemption in the subsequent quarter, and therefore form a part of the redemptions by warrants, as shown in the preceding table.

TABLE D.—Statement of net expenditures (by warrants) under direction of the customs service, for the fiscal year ended June 30, 1871.

Expenses of collecting revenue from customs.....	\$6,560,672 61	
Repayments to importers for excess of deposits.....	1,787,266 59	
Debentures, drawbacks, and bounties.....	945,441 52	
Expenses revenue-cutter service.....	1,121,026 43	
Construction of revenue cutters.....	130,973 88	
Repairs, &c., of custom-houses, marine hospitals, and other public buildings.....	224,669 15

NOTE.—This statement is from warrants, except the additions noted, viz:

* Being estimated amount of debt outstanding at this time.

† \$233,075 war-bounty stock. The issue of this stock does not enter into the account of receipts and expenditures, because no money came into the Treasury by reason of the issue. They were issued in satisfaction of claims.

‡ \$5,000,000 Texan indemnity bonds; \$303,573 92 fourth and fifth instalments Mexican bonds, issue. Explanation same as in above note.

§ Including \$9,900 war-bounty stock, a repayment; no expenditures the same year. \$51 67 interest on old funded debt, a repayment; no expenditures the same year.

|| \$2,019,776 10 discount on bonds of February 8, 1861, not charged to the loan; waiting action of Congress to make proper entry.

¶ \$1,000,000 should be charged to Navy Pension fund and credited to the Navy Pension fund three per cent. certificates.

** \$1,000 to be added to redemption of loan of 5-20s; June 30, 1864, being a donation of Peters.

†† \$3,274,051 69 being differences between the Loan accounts, as shown by the Receipts and Expenditures and the Public Debt Statement from 1837 to 1871, awaiting action of Congress before the proper entries can be made to correct the differences which are all in the Receipts and Expenditures.

* For the half year from January 1, 1843, to June 30, 1843.

† Outstanding warrants.

Note.—This statement is made from warrants paid by the Treasurer up to June 30, 1866. The outstanding warrants are then added, and the statement is by warrants issued from that date. The balance in the treasury June 30, 1871, by this statement, is \$138,019,122 15, from which should be deducted the amount deposited with the States, \$28,101,644 91, leaving the net available balance, June 30, 1871, \$109,917,477 24.

The statement of the Receipts and Expenditures, on account of the principal of the public debt, as per Tables M and N, shows the net receipts from the organization of the Government to June 30, 1871, to have been..... \$7,094,541,041 38
 The expenditures for the same period were..... 4,857,434,540 51

Leaving..... 2,237,106,500 87
 as the amount of the principal of the public debt outstanding and unpaid on June 30, 1871.

The amount of the principal of the public debt, outstanding and unpaid, as shown by the monthly Debt Statement for July 1, 1871, and Tables I and L, is \$2,353,211,332 32, showing a difference of \$116,104,831 45 more outstanding by Debt Statement than by the Statement of Receipts and Expenditures. This difference is thus explained: The following stocks were issued in payment of various old debts and claims, but in the transactions no money ever came into the Treasury. On the maturity of the stock it was paid off, showing an expenditure where there had been no corresponding receipt:

Revolutionary debt of the several States, estimated.....	\$76,000,000 00
Mississippi stock, exact.....	4,282,151 12
Louisiana purchase, exact.....	11,250,000 00
Washington and Georgetown debt to Holland, exact.....	1,500,000 00
United States Bank stock, ".....	7,000,000 00
Six per cent. Navy stock, ".....	711,700 00
Texas purchase, ".....	5,000,000 00
Mexican indemnity, fourth and fifth instalments, exact.....	303,573 92

In addition to the foregoing, the following amount is to be added, being composed of discount suffered in placing loans, interest paid and erroneously charged as principal, and various errors in settling and stating loan accounts. All of these latter and the Revolutionary debt are now being investigated, and will be explained in a future report in detail.....

10,057,406 41

116,104,831 45

It must be borne in mind, in reading this explanation, that the errors alluded to are not such as in any manner affect the cash account of the Government, or reflect upon the integrity of former officers of the Treasury. A part of the differences has arisen from a want of knowledge and care on the part of subordinate clerks in stating loan accounts, but much the larger proportion has occurred from a want of unity, *system, and proper method* in the accounts as heretofore kept in the department. And these latter defects are partly owing to a want of sufficient legislation to enable the accounts to be properly kept. A bill was presented to Congress at its last session which was intended to supply this deficiency. It passed the House, but was not reached in the Senate. Until there is legislation, these errors and defects in the accounts must be perpetuated, and others must be made.

As an illustration of the class of differences which require legislation before they can be corrected, the two following are given: In 1850 there were \$5,000,000 in bonds issued to pay Texan Indemnity. For these bonds no money was ever received, and therefore there is no entry representing them on the credit side of the account, as in ordinary loan transactions. When the stock matured it was paid out of the Treasury and charged in the loan accounts, thus erroneously reducing this account by just the amount paid. The loan of February, 1861, was sold at a discount of \$2,019,776 10. Only the difference between the amount of this loan and of this discount was received into the Treasury. The loan appears in the Debt Statement at the par of the issue, but in the Receipts and Expenditures it can only appear (for want of a premium and discount account) at the actual amount of money received for the loan.

TABLE O.—Statement of purchases of bonds from May, 1869, to September, 1869, in currency and gold, the average cost in currency and gold of each purchase, and the average cost of all purchases to the end of each month.

Date of purchase.		Opening price of gold.	Principal.	Amount paid.	Currency value of interest accrued on bonds bought "flat."	Net cost.	Net cost estimated in gold.	Average rate of premium on each purchase.	Average cost in gold of each purchase.	Average rate of premium on total purchases to date.	Average cost in gold of total purchases to date.

The public bonded debt has been reduced by the amount of these bonds, which have ceased to bear interest, and have been cancelled and destroyed. The six per cent. bonded debt has also been reduced by the amount of five per cents. issued to take their place. There have also been paid in coin, and cancelled and destroyed, other bonds to the amount of \$7,009,000, which matured January 1, 1871.

NOTE.—The purchases marked (*) are "interest purchases," being the bonds bought with the proceeds of the interest collected on the bonds previously purchased.

Purchases with "accrued interest on bonds previously purchased" were discontinued July 14, 1870, date of the act authorizing the refunding of the National debt, and directing the cancellation and destruction of the bonds purchased. All purchased bonds, whether bought before or since that date, have ceased to bear interest, and the annual interest charge has been reduced by the amount of interest that would have been payable on these if they had not been redeemed.

TABLE P.—Statement of the public debt of the United States June 30, 1871.

	Length of loan.	When redeemable.	Rate of interest.	Price at which sold.	Amount authorized.	Amount issued.	Amount outstanding.

TREASURY NOTES OF 1846.							
The act of July 22, 1846, (9 Statutes, 39,) authorized the issue of Treasury notes in such sums as the exigencies of the Government might require; the amount outstanding at any one time not to exceed \$10,000,000, to bear interest at not exceeding 6 per centum per annum, redeemable one year from date. These notes were receivable in payment of all debts due the United States, including customs duties.	1 year.....	1 year from date...	6 per cent.....	Par.....	10,000,000 00	6,000 00

MEXICAN INDEMNITY.

A proviso in the civil and diplomatic appropriation act of August 10, 1846, (9 Statutes, 94,) authorized the payment of the principal and interest of the fourth and fifth instalments of the Mexican indemnities due April and July, 1844, by the issue of stock, with interest at 5 per centum, payable in five years.

TREASURY NOTES OF 1847.

The act of January 28, 1847, (9 Statutes, 118,) authorized the issue of \$23,000,000 Treasury notes, with interest at not exceeding 6 per centum per annum, or the issue of stock for any portion of the amount, with interest at 6 per centum per annum. The Treasury notes under this act were redeemable at the expiration of one or two years; and the interest was to cease at the expiration of sixty days' notice. These notes were receivable in payment of all debts due the United States, including customs duties.

LOAN OF 1847.

The act of January 28, 1847, (9 Statutes, 118,) authorized the issue of \$23,000,000 Treasury notes, with interest at not exceeding 6 per centum per annum, or the issue of stock for any portion of the amount, with interest at 6 per centum per annum, reimbursable after December 31, 1867. Section 14 authorized the conversion of Treasury notes under this or any preceding act into like stock, which accounts for the apparent over issue.

TEXAN INDEMNITY STOCK.

The act of September 9, 1850, (9 Statutes, 447,) authorized the issue of \$10,000,000 stock, with interest at 5 per centum per annum, to the State of Texas, in satisfaction of all claims against the United States arising out of the annexation of the said State. This stock was to be redeemable at the end of fourteen years.

LOAN OF 1848.

The act of March 31, 1848, (9 Statutes, 217,) authorized a loan of \$16,000,000, with interest at not exceeding 6 per centum per annum, reimbursable after July 1, 1868. The Secretary of the Treasury was authorized to purchase this stock at any time,

TREASURY NOTES OF 1861.

The act of March 2, 1861, (12 Statutes, 178,) authorized a loan of \$10,000,000, with interest at not exceeding 6 per centum per annum, redeemable on three months' notice after July 1, 1871, and payable July 1, 1881. If proposals for the loan were not satisfactory, authority was given to issue the whole amount in Treasury notes, with interest at not exceeding 6 per centum per annum. The same act gave authority to substitute Treasury notes for the whole or any part of loans authorized at the time of the passage of this act. These notes were to be received in payment of all debts due the United States, including customs duties, and were redeemable at any time within two years from the date of the act.

LOAN OF JULY AND AUGUST 1861, (1881's.)

The act of July 17, 1861, (12 Statutes, 259,) authorized the issue of \$250,000,000 bonds, with interest at not exceeding 7 per centum per annum, redeemable after twenty years. The act of August 5, 1861, (12 Statutes, 313,) authorized the issue of bonds with interest at 6 per centum per annum, payable after twenty years from date, in exchange for 7-30 notes issued under the act of July 17, 1861. None of such bonds were to be issued for a sum less than \$500, and the whole amount of them was not to exceed the whole amount of 7-30 notes issued under the above act of July 17. The amount issued in exchange for 7-30's was \$139,318,100.

FIVE-TWENTIES OF 1862.							
The act of February 25, 1862, (12 Statutes, 345,) authorized a loan of \$500,000,000, for the purpose of funding the treasury notes and floating debt of the United States, and the issue of bonds therefor, with interest at 6 per centum per annum. These bonds were redeemable after five and payable twenty years from date. The act of March 3, 1864, (13 Statutes, 13,) authorized an additional issue of \$11,000,000 of bonds to persons who subscribed for the loan on or before January 21, 1864. The act of January 28, 1865, (13 Statutes, 425,) authorized an additional issue of \$4,000,000 of these bonds and their sale in the United States or Europe.	5 or 20 years... LEGAL TENDER NOTES.							
The act of February 25, 1862, (12 Statutes, 345,) authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denominations as the Secretary of the Treasury might deem expedient, not less than five dollars; \$50,000,000 to be in lieu of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender. The act of July 11, 1862, (12 Statutes, 532,) authorized an additional issue of \$150,000,000 United States treasury notes, of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and	Par.....	450,000,000 00	356,000,000 00

not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender. The act of March 3, 1863, (12 Statutes, 710,) authorized an additional issue of \$150,000,000 United States notes, payable to bearer, of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender. The same act limited the time at which Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863, (12 Statutes, 822.)

TEMPORARY LOAN.

The act of February 25, 1862, (12 Statutes, 346,) authorized temporary loan deposits of \$25,000,000, for not less than thirty days, with interest at 5 per centum per annum, payable after ten days' notice. The act of March 17, 1862, (12 Statutes, 370,) authorized the increase of temporary loan deposits \$50,000,000. The act of July 11, 1862, (12 Statutes, 532,) authorized a further increase of temporary loan deposits to \$100,000,000. The act of June 30, 1864, (13 Statutes, 218,) authorized a further increase of temporary loan deposits to not exceeding \$150,000,000, and an increase of the rate of interest to not exceeding 6 per centum per annum, or a decrease of the rate of interest on ten days' notice, as the public interest might require.

CERTIFICATES OF INDEBTEDNESS.

The act of March 1, 1862, (12 Statutes, 352,) authorized the issue of certificates of indebtedness to public creditors who might elect to receive them, to bear interest at the rate of 6 per centum per annum, and payable one year from date, or earlier, at the option of the Government. The act of May 17, 1862, (12 Statutes, 370,) authorized the issue of these certificates in payment of disbursing officers' checks. The act of March 3, 1863, (12 Statutes, 710,) made the interest payable in lawful money.

FRACTIONAL CURRENCY.

The act of July 17, 1862, (12 Statutes, 592,) authorized the use of postal and other stamps as currency, and made them receivable in payment of all dues to the United States less than five dollars. The 4th section of the act of March 3, 1863, (12 Statutes, 711,)

semi-annually, at not exceeding 6 per centum per annum, when in coin, or 7 3-10 per centum per annum, when in currency. In addition to the amount of bonds authorized by this act, authority was also given to convert Treasury notes or other interest-bearing obligations into bonds authorized by it. The act of April 12, 1866, (14 Statutes, 31,) construed the above act to authorize the Secretary of the Treasury to receive any obligation of the United States, whether bearing interest or not, in exchange for any bonds authorized by it, or to sell any of such bonds, provided the public debt is not increased thereby.

CONSOLS OF 1865.

The act of March 3, 1865, (13 Statutes, 468,) authorized the issue of \$600,000,000 of bonds or Treasury notes in addition to amounts previously authorized; the bonds to be for not less than \$50, payable not more than forty years from date of issue, or after any period not less than five years; interest payable semi-annually, at not exceeding 6 per centum per annum, when in coin, or 7 3-10 per centum per annum, when in currency. In addition to the amount of bonds authorized by this act, authority was also given to convert Treasury notes or other interest-bearing obligations into bonds authorized by it. The act of April 12, 1866, (14 Statutes, 31,) construed the above act to authorize the Secretary of the Treasury to receive any obligations of the United States, whether bearing interest or not, in exchange for any bonds authorized by it, or to sell any of such bonds, provided the public debt is not increased thereby.

CONSOLS OF 1867.

The act of March 3, 1865, (13 Statutes, 468,) authorized the issue of \$600,000,000 of bonds or Treasury notes in addition to amounts previously authorized; the bonds to be for not less than \$50, payable not more than forty years from date of issue, or after any period not less than five years; interest payable semi-annually, at not exceeding 6 per centum per annum, when in coin, or 7 3-10 per centum per annum, when in currency. In addition to the amount of bonds authorized by this act, authority was also given to convert Treasury notes or other interest-bearing obligations into bonds authorized by it. The act of April 12, 1866, (14 Statutes, 31,) construed the above act to authorize the Secretary of the

This amount exceeds by \$14,788 12 the accounts in Register's office, owing to the fact that the warrant crediting this amount passed the Secretary's office on the 30th June, 1871, and was included in the accounts of that year in that office. This warrant did not reach the Register until the July following, and therefore does not appear in the accounts of the latter office until the next year.

TABLE R.—Returns, by award of the United States Court of Claims, of proceeds of property seized as captured or abandoned under the act of March 12, 1863, paid from July 1, 1870, to June 30, 1871.

REPORT OF COMMISSIONER OF INTERNAL REVENUE.

REPORT

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, November 21, 1871.

SIR: During the fiscal year covered by the following report Hon. C. Delano was Commissioner from July 1 to November 1, 1870, and Hon. A. Pleasonton from January 3 to its close. During November and December, 1870, and until January 3, 1871, I was Acting Commissioner by reason of the vacancy caused by the resignation of Mr. Delano.

I have the honor to transmit herewith the tabular statements made up from the accounts of this office, which the Secretary of the Treasury is required to lay before Congress, as follows:

Table A, showing the receipts from each specific source of revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1871.

Table B, showing the number and value of internal revenue stamps ordered monthly by the Commissioner, the receipts from the sale of stamps and the commissions allowed on the same; also the number and value of stamps for tobacco, cigars, snuff, distilled spirits, and fermented liquors, issued monthly to collectors during the fiscal year ended June 30, 1871.

Table C, showing the territorial distribution of internal revenue from various sources in the United States for the fiscal years ended June 30, 1864, 1865, 1866, 1867, 1868, 1869, 1870, and 1871.

Table D, showing the aggregate receipts from each collection district, State, and Territory for the fiscal years ended June 30, 1863, 1864, 1865, 1866, 1867, 1868, 1869, 1870, and 1871.

Table E, showing the total collections from each specific source of revenue for the fiscal years ended June 30, 1863, 1864, 1865, 1866, 1867, 1868, 1869, 1870, and 1871.

Table F, showing the ratio of receipts from specific sources to the aggregate of all collections for the fiscal years ended June 30, 1864, 1865, 1866, 1867, 1868, 1869, 1870, and 1871.

Table G, an abstract of reports of district attorneys concerning suits and prosecutions under the internal revenue laws during the fiscal year ended June 30, 1871.

Table H, an abstract of seizures of property for violation of internal revenue laws during the fiscal year ended June 30, 1871.

Table I, showing the number of proof-gallons of spirits in each collection district, State, and Territory in the United States, exclusive of the quantity in internal revenue warehouses, May 1, 1871.

These tables exhibit the full result of the operations of this Bureau from its organization to the present time.

The aggregate receipts from all sources, exclusive of the direct tax

upon lands, and the duty upon the circulation and deposits of national banks, were, for the fiscal year 1871, \$144,011,176 24. This sum includes the amounts refunded and allowed on drawbacks.

Drawbacks have been allowed on general merchandise, under section 171, act of June 30, 1864, limited by the act of March 31, 1868, amounting to \$22,887 97. This amount is larger than that allowed for the fiscal year 1870, on account of the adjudication of old claims for drawback on cotton goods rendered admissible by joint resolution No. 78, approved July 14, 1870.

There was refunded during the past fiscal year, for taxes illegally assessed and collected, the sum of \$617,581 07. This large increase over the year preceding was due to the adjustment of claims that had been suspended during former years, for more complete consideration; for instance, the claim of one of the States which was embraced in the above aggregate, and amounting to \$45,866, for taxes collected on dividends declared upon stock owned by the State. This was the largest claim ever allowed by the Bureau, and was referred to the Attorney General for his advice.

My estimate of the receipts for the current fiscal year under the present law is \$125,000,000.

SPIRITS.

The number of distilleries (other than fruit) registered during the last fiscal year was.....	1, 043
Number of fruit-distilleries registered.....	7, 149
Total	<u>8, 192</u>

Of the distilleries (other than fruit) 517 were operated during the year, and of the fruit-distilleries, 4,007.

The returns to this office for the last fiscal year show a total production in taxable gallons, from material other than fruit, of.....	54, 576, 446
From fruit.....	2, 199, 733
Total yearly production.....	<u>56, 776, 179</u>

The following tabular statement shows the distribution of distilleries in the various States and Territories:

Statement showing the number of distilleries registered and operated during the fiscal year ended June 30, 1871.

States and Territories.	Grain.		Molasses.		Fruit.		Total number registered.	Total number operated.

Gallons.

The quantity of spirits in bond July 1, 1870, was 11,671,886
The quantity entered in bond for the year ended June 30, 1871, was 54,576,446
The quantity withdrawn from bond during last period, was 59,503,972
The quantity remaining in bond June 30, 1871, was 6,744,360
The quantity remaining in bond July 1, 1870, as per present report, less than quantity stated in the report for 1870, shown by corrected reports of collectors received subsequent to the publication of the report for 1870 was. 10,572

The total quantity of spirits in the United States, not in internal revenue warehouses, on the 1st of May, 1871, was 41,185,713 proof-gallons, showing a decrease in the quantity on the market since November 15, 1870, of 4,452,580 gallons.

The receipts from spirits for the fiscal year ended June 30, 1871, were as follows:

Spirits distilled from apples, grapes, and peaches.....	\$1,236,005 67
Spirits distilled from materials other than apples, grapes, and peaches.....	29,921,308 48
Distillers, per diem tax on.....	1,901,602 98
Distillers' special and barrel tax.....	5,683,077 31
Rectifiers.....	959,800 18
Dealers, retail liquor.....	3,651,484 73
Dealers, wholesale liquor.....	2,151,281 06

Manufacturers of stills, (special tax)	\$1,927 49
Stills or worms, manufactured	3,240 00
Stamps, warehouse, rectifiers' and wholesale liquor dealers'	758,427 00
Excess of gaugers' fees	13,693 20
Total	<u>46,281,848 10</u>

SURVEYS OF DISTILLERIES.

Uniformity in estimating the spirit-producing capacity of distilleries being indispensable to a just and equal assessment of the tax, a classification of distilleries has been arrived at, based upon the different kinds of material used and the modes of operating; and rules have been given for estimating the capacity of each class, which experience has shown to be equally just to the Government and the distillers.

The local surveyors having been thoroughly instructed in their duties, the expense of making surveys will be materially lessened in the future.

SPIRIT-METERS.

By the annual report for 1870, page 7, it will be seen that Tice's Sample Meters, theretofore adopted and prescribed for use in distilleries, were then being tested for the purpose of determining their utility. The period within which distillers were required to procure meters was extended from time to time until the 8th day of June, 1871, when Circular No. 96 was issued discontinuing their use.

GAUGING INSTRUMENTS.

Correctness and uniformity in the weighing and gauging of spirits are necessary to a just collection of the tax and to avoid unnecessary detention of spirits in transit. These objects can only be attained by the use of instruments of the same standard.

To accomplish these objects, in addition to the hydrometer prescribed for use in 1867, there has been adopted what is known as the "Prime and McKear's Combination Gauging Rod," which is required to be used for determining the capacity of casks.

To secure accuracy in these instruments, arrangements have been made by which all hydrometers and gauging rods are inspected and tested in this office before being sent out for use.

Internal revenue gaugers are furnished with hydrometers at the expense of the Government, but are required to supply themselves with the combination rod at their own expense.

These instruments, distributed under the present system of inspection, seem to give general satisfaction, and their accuracy and uniformity have relieved the trade of the embarrassments resulting from errors in gauging.

FERMENTED LIQUORS.

The amount of tax received on fermented liquors at \$1 per barrel was, for the years—

1866	\$5,115,140 49	1869	\$5,866,400 98
1867	5,819,345 49	1870	6,081,520 54
1868	5,685,663 70	1871	7,159,740 20

The increase for the year 1871, as shown in the above statement, is believed to be due, in part at least, to the greater attention given to

that subject by internal revenue officers during that year. This attention has revealed some defects in the law, which call for early remedial legislation.

TOBACCO.

The total receipts from tobacco for the fiscal year ended June 30, 1871, were \$33,578,907 18. As compared with the receipts from the same source for the preceding fiscal year, the accompanying tables show the following results:

Year ended June 30, 1871, tobacco, chewing, &c., and snuff.....	\$20,677,717 84
Year ended June 30, 1870, tobacco, chewing, &c., and snuff.....	19,708,780 61
Showing an increase in class 32-cents of	968,937 23
Year ended June 30, 1871, tobacco, smoking, scraps, shorts, &c	\$4,882,821 83
Year ended June 30, 1870, tobacco, smoking, scraps, shorts, &c	4,591,702 81
Showing an increase in class 16-cents of	291,119 02
Year ended June 30, 1871, cigars, cheroots, &c	\$6,598,173 24
Year ended June 30, 1870, cigars, cheroots, &c	5,718,780 04
Showing an increase on cigars, &c., of.....	879,393 20
Year ended June 30, 1871, received from sale of export stamps.....	\$66,147 00
Year ended June 30, 1870, received from sale of export stamps.....	48,097 50
Increase from sale of export stamps.....	18,049 50
Year ended June 30, 1871, received from dealers in leaf-tobacco	\$221,661 98
Year ended June 30, 1870, received from dealers in leaf-tobacco	200,205 54
Increased collection from dealers in leaf-tobacco.....	21,456 44
Year ended June 30, 1871, from dealers in manufactured tobacco	\$970,017 96
Year ended June 30, 1870, from dealers in manufactured tobacco	929,892 64
Increased collection from dealers in manufactured tobacco.....	40,125 32
Year ended June 30, 1871, from special taxes of tobacco and cigar manufacturers.....	\$162,367 33
Year ended June 30, 1870, from special taxes of tobacco and cigar manufacturers.....	153,248 74
Increased collection from special taxes of tobacco and cigar manufacturers.....	9,118 59

Showing a total increase of \$2,228,199 30 over the total amount of receipts from the same sources for the preceding fiscal year.

ANNUAL PRODUCTION.

The total amount of manufactured tobacco, represented by the amount of collections for the fiscal year ended June 30, 1871, was as follows:

	Pounds.
Chewing-tobacco, snuff, &c., class 32-cents	64,617,868
Smoking-tobacco, scraps, shorts, &c., class 16-cents	30,517,636
Add to this the quantity exported	10,621,082
And excess remaining in warehouses June 30, 1871, over June 30, 1870.	72,377
Giving a total product for the year, of.....	105,828,963

The total number of cigars, cheroots, &c., on which taxes were collected, was 1,332,844,357.

The steady and uniform increase, from month to month, in the revenues derived from manufactured tobacco, cigars, &c., since the present law went into operation, by which the mode of collecting taxes on these articles was changed from an assessment after removal from the manufactory and sale, to a prepayment, by means of suitable stamps, before the goods are removed from the place of manufacture, has fully demonstrated the superiority of the present system over the former. Fewer frauds are possible where the taxes are required to be paid at the manufactory, and before the goods are allowed to go upon the market, and where every package is required to bear upon it the evidence that the tax has been paid. But, notwithstanding the encouraging progress that has been made toward a thorough and complete collection of the revenues from this source, I am forced to the conclusion that, during the last fiscal year, much tobacco has escaped taxation through the refilling of empty stamped packages, the second use of stamps, the use of counterfeit stamps, the removal of small quantities from the place of manufacture without stamps, and stamping as class 16-cents, tobacco which, under the law, should have been stamped at the rate of 32 cents per pound.

UNIFORM RATE OF TAX.

The present law imposes on all chewing-tobacco a tax of 32 cents per pound, and the same rate on all smoking-tobacco from which any portion of the stems has been removed. But practically *all* smoking-tobacco, with slight exceptions, is claimed to be taxable only at the rate of 16 cents, and no one except the manufacturer knows or can know whether it contains all the stems which are natural to the leaf, or a less quantity. The natural leaf, cut with all the stems in, is, previous to being so cut, put through a process of sweetening, to fit it for chewing purposes, thus making it actually chewing-tobacco, though sold under the name of smoking-tobacco and stamped class 16-cents. By the manipulations of some manufacturers the fine-cut shorts, "which have passed through a riddle of 36 meshes to the square inch by process of sifting," constitute the bulk of their products and are used as chewing-tobacco, though paying a tax of only 16 cents per pound, while sweetened scraps, a product of plug manufacturers, are put up in large quantities and sold under the 16-cent tax for chewing purposes. A uniform rate of tax, while it would allow every manufacturer to manipulate his products in his own way without restrictions being placed upon his modes of manufacturing, would effectually close the door to the perpetration of fraud or the evasion of taxes by their improper classifications.

RESULTS OF A UNIFORM TAX AT DIFFERENT RATES.

From the tables presented in this report it will be seen that more than two-thirds of the manufactured tobacco which reached taxation during the last fiscal year paid the tax of 32 cents per pound, yielding four-fifths of the revenue which was collected directly from the article by stamps. Had a tax been collected at a uniform rate of 32 cents per pound on the entire product of manufactured tobacco which reached taxation during the last fiscal year, the receipts therefrom would have been \$30,443,361 28. Adding to this sum the taxes collected on cigars, the special taxes of manufacturers of tobacco and cigars, of dealers in leaf, and dealers in manufactured tobacco, &c., the total receipts would

have been \$38,461,728 79. Similar calculations show that a uniform tax of 24 cents per pound on the same quantity would have realized the sum of \$30,850,888 47, and that a uniform rate of 16 cents per pound would have realized the sum of \$23,240,048 15. Thus, it will be seen that on the assumption that the same number of pounds would have reached taxation had the rate of tax been uniform, either at 16, 24, or 32 cents per pound, a uniform rate of 32 cents would have increased the revenue by the sum of \$4,882,821 61, while a uniform rate of 24 or 16 cents would have diminished those receipts in the sums respectively of \$2,728,018 71 and \$10,338,859 03. I am aware that it is contended by those who advocate a reduction of the tax to a uniform rate of 16 cents per pound that the increased consumption which would result from such a reduction, and the greater number of pounds which would reach taxation, would nearly, if not quite, compensate for the reduction in the rate. I am unable, however, to see any well-grounded reason for such a conclusion—first, because such a reduction would have little, if any, tendency to increase the consumption of smoking tobacco, as nearly all smoking-tobacco now pays but 16 cents tax; secondly, such a reduction alone would not tend to diminish the quantity of raw or leaf tobacco consumed, for most of the leaf-tobacco sold directly to consumers is used for smoking purposes, and the motive to smoke untaxed leaf would not be removed or lessened by diminishing the tax on chewing-tobacco; thirdly, because whatever increase in consumption there might be from such a reduction in the rate must necessarily be of chewing-tobacco, of plug, twist, fine-cut, &c., and of these the consumption would have to be doubled, making it one hundred and twenty-eight millions of pounds, where it is now only sixty-four millions of pounds, in order to obtain the same amount of revenue as was collected the last fiscal year. Such an increase in the consumption of chewing tobacco is not to be expected.

My own opinion is, that with the tax at 24 cents, taking into account the natural increase of the revenue as shown between the collections of succeeding years, and with the advantage of some legislation hereinafter recommended, we shall be able to keep the collections on tobacco up to those under the present rates.

This recommendation, however, is made without regard to its relation to future total revenue results. If it should be the opinion of Congress that the yield of revenue from internal taxes should not be materially decreased, then, to accomplish the desirable results expected from a consolidation of the tax on tobacco, and to compensate in part to the revenue the expected large loss from the expiration of the income-tax during the current fiscal year, and the further material loss from "Articles and occupations formerly taxed but now exempt," (a rapidly decreasing item, of course,) I would advise a consolidation of the tobacco tax at 32 cents per pound.

PEDDLERS OF TOBACCO.

I am satisfied, from the evidence which has accumulated at this office, that much of the fraud above-referred-to is effected through the instrumentality of peddlers.

In order to put an end to this illicit traffic some additional legislation is required. I would, therefore, recommend that every person who sells or offers to sell manufactured tobacco, snuff, or cigars from wagons in the manner of peddlers traveling from place to place, be required to pay a special tax of fifteen, twenty-five, or fifty dollars, according as they travel with one, two, or more horses or mules, and to comply with

such regulations as may be prescribed by the Commissioner of Internal Revenue.

SALE OF LEAF-TOBACCO TO CONSUMERS.

For the last three years this office has been in possession of information that a large and increasing amount of raw or leaf tobacco, in portions of the country, was being sold at retail directly to consumers without the payment of tax. Evidences of this traffic have, from time to time, been furnished by assessors and collectors, and more especially by supervisors, who, in taking transcripts from the books required by law to be kept by leaf-dealers, have reported that they find scores of pages of these books where entries were made of sales from one-half pound to four pounds each; and I am constantly in receipt of letters from manufacturers of tobacco, complaining of the injury to their business arising from such sales, and informing me that in some localities where they formerly received frequent and large orders for manufactured tobacco they now make no sales, the same parties who used to make these orders now ordering instead supplies of natural leaf from the wholesale leaf-dealers. Against this traffic, grown to such large proportions, so injurious to their business as manufacturers, and prejudicial to the interest of the Government revenue, they ask to be protected.

To this end, I would recommend that section 59 of the act of July 20, 1868, be so amended as to impose a special tax of five hundred dollars on every person who shall make a business of selling raw or leaf-tobacco to persons other than those who have paid special tax as leaf-dealers, or as manufacturers of tobacco, snuff, or cigars, or who shall sell leaf-tobacco in quantities less than twenty-five pounds, or who shall sell such tobacco directly to consumers, or for consumption without its being manufactured. And if this is not deemed sufficient, I would further recommend such a tax on the sales of such dealers in excess of \$5,000 annually as would be equivalent to the tax on the same amount and value of manufactured tobacco. Such a provision of law will not only give the required protection to the manufacturer who now pays a special tax for carrying on his business, in addition to a specific tax on all his products, but it will also, I am persuaded, tend largely to increase the Government revenue from this source.

EXPORT BONDED WAREHOUSES.

In the absence of any provision of law providing for drawback on manufactured tobacco and snuff when exported, the law has provided for a system of export bonded warehouses to be established at any port of entry in the United States for the storage of manufactured tobacco and snuff intended for exportation.

Under this provision of law there are now in operation sixteen export bonded warehouses, two having been established during the last fiscal year, viz, one at the port of Mobile, Alabama, and one at Portland, Oregon, while one of those previously established at Philadelphia has been discontinued.

The quantity of tobacco, &c., stored in the several export bonded warehouses during the fiscal year ended June 30, 1871, was as follows:

	Pounds.
Fourth district, Massachusetts.....	1,503,867
Thirty-second district, New York.....	12,799,611
Second district, Pennsylvania.....	2,606,556
Third district, Maryland.....	3,060,556

	Pounds.
Third district, Virginia.....	2, 638, 529
First district, Louisiana.....	1, 547, 095
First district, California.....	2, 158, 883
First district, Oregon.....	64, 167
Total amount.....	<u>26, 379, 264</u>

The quantity withdrawn for exportation from the several export bonded warehouses during the fiscal year ended June 30, 1871, was as follows:

	Pounds.
Fourth district, Massachusetts.....	853, 724
Thirty-second district, New York.....	6, 699, 688
Second district, Pennsylvania.....	40, 838
Third district, Maryland.....	218, 916
Third district, Virginia.....	2, 630, 175
First district, Louisiana.....	10, 355
First district, California.....	167, 387
Total quantity exported.....	<u>10, 621, 083</u>

WITHDRAWN FOR CONSUMPTION.

The quantity withdrawn for consumption on payment of the tax, from the several bonded warehouses, for the fiscal year ended June 30, 1871, was as follows:

	Pounds.
Fourth district, Massachusetts.....	521, 237
Thirty-second district, New York.....	2, 464, 979
Second district, Pennsylvania.....	2, 658, 736
Third district, Maryland.....	2, 435, 503
Third district, Virginia.....	32, 784
First district, Louisiana.....	1, 431, 287
First district, California.....	1, 930, 164
First district, Oregon.....	24, 969
Total for consumption.....	<u>11, 499, 659</u>

These figures show that less than half of the tobacco, &c., removed in bond from the manufactories, is actually exported. From the eight bonded warehouses established at the several ports of Philadelphia, Baltimore, New Orleans, San Francisco, and Portland, Oregon, in which were stored during the fiscal year ended June 30, 1871, 9,437,257 pounds of manufactured tobacco, only 437,495 pounds during this period were withdrawn for exportation, while 8,480,656 pounds were withdrawn for consumption on payment of the tax.

Nearly nine-tenths of all the tobacco exported from the country is shipped through the bonded warehouses at New York and Richmond, Virginia; and of this a large portion is never stored in the bonded warehouses. The shipments are made directly from the factories, the goods being carted by the warehouses, and only constructively entered therein, though the owners thereof are charged with a month's storage.

The practical operation of this system of bonded warehouses hitherto has been to give to a few individuals and firms, more particularly to the proprietors of the warehouses, the same facilities for storing tobacco without the prepayment of the tax as were given by the former system of Class B, bonded warehouses, abolished by the act of July 20, 1868.

It is my own opinion, and, so far as I have been able to ascertain, it is the opinion of manufacturers of tobacco generally, that the present system of export bonded warehouses can be entirely abolished to the interest both of the Government and of the manufacturers.

Under the present system all the tobacco bonded at the warehouse in Richmond, Virginia, is exported without ever entering the warehouse, and the same is true of much of the tobacco bonded in New York.

By abolishing the present system of export bonded warehouses, and providing for the exportation of manufactured tobacco, snuff, and cigars, as other merchandise is exported, allowing a drawback of the tax paid upon proof of landing abroad, requiring the tobacco to be loaded under the supervision of an inspector, and the tax-paid stamps to be destroyed by said officer to prevent relanding, it is believed a large portion of the expenses now incurred by the manufacturers in exporting their goods would be saved, the Government would receive the taxes on all goods when removed from the place of manufacture, all jobbers and dealers in manufactured tobacco would be placed on the same footing with regard to the traffick in tax paid goods, and the special privileges and advantages enjoyed by a few individuals and firms would be removed.

I would recommend that Congress provide that evidence of the loss at sea satisfactory to the Commissioner of Internal Revenue shall have all the force of a landing certificate for the purposes of drawback.

Other systems of exportation designed to remedy the evils of the present bonded warehouse system have been suggested; but they involve the multiplying of bonds to be taken in lieu of tax. A multiplication of such bonds would result in an increase of losses to the Government. The records of the United States courts in many sections of the country are largely occupied by suits on bonds taken for spirits and refined petroleum, under similar systems to those proposed. In a large majority of the cases, the principals being insolvent generally before suit was brought, the sureties have either not been found on original process; or, if found, a return of no goods on final process has realized to the Government a total loss of its supposed security.

STAMPS.

Since the last annual report of the Commissioner, contracts have been made for printing revenue stamps as follows, viz: With Mr. Joseph R. Carpenter, of Philadelphia, for documentary and proprietary stamps; with the Continental Bank Note Company of New York, for printing tints for distilled spirits and tobacco stamps; with the National Bank Note Company of New York, for printing tints for beer stamps. These contracts were awarded to the lowest bidders possessing the facilities for doing the work, after due publication of advertisements for proposals in the newspapers of the various leading cities in the United States.

Important changes have been made in the materials and manner of preparing stamps in order to prevent fraudulent issues, counterfeiting, and re-use. Heretofore nearly all the issues of revenue stamps have been printed in a single color upon ordinary commercial paper furnished by the parties doing the printing. By the changes referred to, the Government provides a distinctive paper, and permits the printing of stamps upon no other, and requires that all stamps shall be printed in two or more colors.

It is well known that the revenue derived from stamps has seriously suffered through the fraudulent re-use of stamps. It has been found no difficult matter on the part of evil-disposed persons, by the use of chemicals carefully manipulated, to remove the cancellation-marks entirely without injuring the appearance of the stamps, thus enabling dishonest parties to re-use them, or to sell the same for re-use, and defraud the Government to that extent.

It is believed that the stamps now being furnished under the contracts

alluded to, cannot be tampered with. Especially is this thought to be the case with the adhesive, and tobacco, snuff, and cigar stamps printed upon chameleon paper. This paper so effectually changes its color upon the application of chemical agents employed for the restoring of stamps for re-use, as to render restoration to its original state impossible. In addition to the protection afforded by this paper, a soluble ink is used in the preparation of adhesive stamps. This ink contains the ingredients of ordinary writing ink; any acid or alkali of sufficient strength to remove the cancellation made would destroy also that portion of the stamp which is printed in the soluble ink.

By printing the stamps in two or more colors, counterfeiting, which has been largely practiced by photography, becomes impossible.

Another feature in the present issue is, that with the exception of the documentary and proprietary stamps, none are allowed to be entirely prepared by any single establishment.

The New York Bank Note Company print the tints only of certain stamps, while the Bureau of Engraving and Printing finishes and delivers them to this office, from whence they are issued to collectors.

The paper used for printing these stamps was adopted especially for that purpose by the Secretary of the Treasury, upon the recommendation of this office, and is manufactured by Messrs. Jas. M. Willcox & Co., of Glenn Mills, Pennsylvania, under Government supervision. It is not lawful for any one to manufacture this paper, or to sell or have it in possession, except by authority of the Department.

It may be added that the average cost of the present series of stamps is considerably less per thousand than that of the previous issue.

ABSTRACT OF CASES COMPROMISED.

The whole number of cases compromised, as provided under section 102, act of July 20, 1868, during the fiscal year ended June 30, 1871, was 730.

Amount of tax accepted.....	\$349,795 12
Assessed penalty fixed by law.....	20,076 36
Specific penalty in lieu of fines, penalties, and forfeitures.....	248,626 50
Total amount received by compromises.....	<u>618,497 98</u>

ABSTRACT OF REPORTS OF DISTRICT ATTORNEYS FOR THE FISCAL YEAR 1871.

Number of indictments.....	4,217
Number of proceedings <i>in rem</i>	1,048
Number of other suits <i>in personam</i>	1,712
Whole number commenced.....	<u>6,977</u>
Number of convictions on indictments.....	1,232
Number of judgments recovered in other suits <i>in personam</i>	1,106
Number of judgments recovered in proceedings <i>in rem</i>	844
Total number of suits decided in favor of United States.....	<u>3,182</u>
Number of acquittals.....	258
Number of other suits <i>in personam</i> or <i>in rem</i> decided against the United States.....	<u>198</u>
Total number of suits decided against the United States.....	<u>456</u>

Number of suits settled, not prosecuted, or dismissed.....	2,306
Number of suits pending July 1, 1871	5,676
Amount of judgments recovered in suits <i>in personam</i> , including fines, &c. \$1,419,064 48	
Amount collected and paid into court in suits <i>in personam</i> (including indictments) on account of judgments, fines, &c	594,339 97
Amount collected and paid into court as proceeds of forfeiture.....	145,238 51

ABSTRACT OF SEIZURES.

Seizures of property for violation of internal revenue law during the fiscal year ended June 30, 1871, were as follows:

273,757 gallons of distilled spirits, valued at	\$339,395 70
1,366 barrels of fermented liquors, valued at	9,569 00
2,907 pounds of snuff, valued at	887 10
281,283 pounds of tobacco, valued at	109,234 44
2,094,376 cigars, valued at	58,820 54
Miscellaneous property, valued at	397,333 36
Total value of seizures	915,240 14

Statement showing the gross proceeds realized from sales, during the fiscal year 1871, under section 63, act of July 13, 1866, together with expenses and amount deposited; also the per cent. of expenses to gross proceeds.

States.	Gross proceeds.	Expenses and stamps.	Amount deposited.	Per cent.
California.....	\$971 75	\$241 45	\$730 30	24.8
Connecticut.....	115 86	57 95	57 91	50.0
Georgia.....	504 57	344 28	160 29	68.2
Illinois.....	41 58	37 76	3 82	90.8
Indiana.....	159 15	16 00	143 15	10.0
Iowa.....	43 99	43 99	100.0
Kentucky.....	332 08	202 18	129 90	60.8
Maine.....	7 50	7 50	100.0
Missouri.....	1,031 55	516 94	514 61	50.1
New Jersey.....	46 90	6 20	40 70	13.2
New York.....	593 67	255 18	338 49	42.9
North Carolina.....	1,272 50	669 40	603 10	52.6
Ohio.....	154 30	48 81	105 49	31.6

Wisconsin.....	87 20	77 36	9 84	88.7
Total.....	7,799 23	3,891 44	3,907 84	49.9

ADDITIONAL RECOMMENDATIONS.

I fully approve, and would here renew, the following recommendation made in last year's report by the then Commissioner, Mr. Delano:

The act of July 14, 1870, exempted from taxation, under schedule C, canned and preserved fish, leaving prepared mustard, sauces, sirups, jams, and jellies still liable to the stamp tax. These articles being either condiments or conserves, and generally of home or culinary production, never having been a fruitful source of revenue, and the collection of the tax thereon always attended with no inconsiderable amount of trouble and vexation, I would recommend that they hereafter be relieved from the stamp tax now imposed upon them under the clause in schedule C relating to "canned meats," &c.

There are now in the hands of collectors and United States marshals, stored in bonded warehouses and elsewhere, considerable quantities of condemned, forfeited, and abandoned tobacco, so depreciated in value that it cannot be sold for enough to pay charges and for the necessary

stamps. This tobacco was manufactured under the old law; consequently it is unstamped. Under the present law it cannot be sold or offered for sale without first being properly stamped, and there is no provision of law under which the Commissioner of Internal Revenue can furnish stamps for it. The want of authority to furnish stamps for such tobacco, which is constantly accumulating in the hands of Government officers, has caused much embarrassment. I would therefore earnestly recommend that Congress authorize the Commissioner, upon the requisition of the officers having the custody and control of such tobacco, to furnish suitable revenue stamps to be attached and cancelled before the same is offered for sale.

It frequently happens that tax-paid stamps are lost from packages of spirits by unavoidable accident, without fault on the part of the persons interested, the spirits being thus exposed to seizure and detention. The present law makes no provision for re-stamping such packages, except on the re-payment of the tax. Inasmuch as the stamp is a device to protect alike the interests of the Government and the tax-payer, it is considered that authority should be given to complete that protection by re-stamping.

It was recommended last year by Mr. Commissioner Delano that Congress provide, by joint resolution or otherwise, for the remission of all taxes assessed on ship-builders under the fourth section of the act of March 31, 1868, as had not been collected. No action, however, was taken upon the subject, and not feeling at liberty to allow further delay, I have ordered their collection.

Section 44 of the act of June 30, 1864, gives to the Commissioner, "subject to regulations prescribed by the Secretary of the Treasury," authority to abate and refund taxes and penalties in certain classes of cases. One of these regulations (Circular 79) provides in effect that no claim or application for the refunding of taxes will be entitled to consideration by the Commissioner, unless it shall be filed with him either prior to August 4, 1871, (Circular 79 having been issued August 3, 1869,) or within two years from the date of the payment of the tax.

It will be observed that this simply affects the question of the consideration by the Commissioner of claims thus barred, but does not, it is claimed, limit any right of action upon them.

One of my predecessors, Mr. Rollins, in his report for 1868, remarks upon this subject as follows:

The authority vested in the Commissioner of Internal Revenue to refund taxes erroneously collected has been the means of preventing much expensive litigation, and has afforded speedy and inexpensive relief to many persons, who have been compelled to pay more than was legally due. While a withdrawal of this authority would be productive of great hardship in many cases, I am satisfied that a statutory limitation of the time within which such claims must be presented would tend to prevent much abuse. When the legality of an assessment is not seriously questioned at the time it is made, the evidence in its support is very apt to disappear with a change in the officers of the district; and it is not then difficult for a skillful attorney to present reasons in support of a claim for refunding such as are hard to be set aside.

I would recommend that the Commissioner be prohibited from considering or allowing any claim not presented within two years from the time the tax was paid; and that all claims be barred in the courts after six years from the date of payment of the tax.

Section 44 of the act of July 20, 1868, should, in my opinion, be amended by making the minimum penalty smaller, such penalty being now a fine of not less than \$1,000, with not less than six months imprisonment. The undue severity of this punishment would seem to be obvious as applied to the offenses of carrying on the business of a retail

or wholesale liquor dealer, rectifier, or manufacturer of stills, "without having paid the special tax," in cases wherein no intent to defraud exists, the omission arising from ignorance of the law, or other circumstances not fraudulent, yet constituting no legal excuse under the terms of the section. The practical effect of providing so disproportionate a punishment for these offenses is to discourage complaints, defeat convictions, and induce suspensions of sentence, in many cases in which some reasonable punishment should be enforced, as well to vindicate the law as to secure future compliance with its requirements.

Section 63 of the act of July 13, 1866, (p. 31, of Compilation of 1867,) should be amended to make it apply to cases arising under any internal revenue act. As it is now, it applies only to offenses under that act of 1866, and previous act, to which it was an amendment. I would also recommend that the limitation of amount should be extended from \$300 to \$500, as contained in the parallel provision of the customs laws, (section 11 of act of July 18, 1866, 14 Stat. at Large, p. 180.)

I would call attention to the report of last year in relation to the subject of "direct taxes," and would renew the recommendation of early legislation for the final disposition of all lands which have been acquired and are now owned by the United States under the direct-tax laws.

COLLECTORS' ACCOUNTS.

The complaint which has heretofore existed of delay in the settlement of ex-collectors' accounts has been, it is believed, entirely removed by the operation of the regulations of this office now in force.

Prior to April, 1870, it appeared that the accounts of 61 ex-collectors had been closed, which number, however, has since been increased to 434, leaving at the present time 230 accounts still open. Of this number 115 have been placed in the hands of United States attorneys for suit on the bonds of the delinquent collectors, the residue being in course of adjustment at this office.

Respectfully,

J. W. DOUGLASS,
Commissioner.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE COMPTROLLER OF CURRENCY.

REPORT

OF

THE COMPTROLLER OF THE CURRENCY.

OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, November 10, 1871.

SIR: In compliance with the provisions of section 61 of the National Currency Act, I have the honor to present through you to the Congress of the United States the following report for the year ending September 30, 1871:

Since my last annual report, one hundred and fifty-five National Banks have been organized, making the total number to October 1, eighteen hundred and eighty-six. Of this number, ten banks, to-wit:

The Central National Bank of Baltimore, Maryland,
The First National Bank of Hightstown, New Jersey;
The National Security Bank of Philadelphia, Pennsylvania;
The Keeseville National Bank, New York;
The Central National Bank of Hightstown, New Jersey;
The East Chester National Bank of Mount Vernon, New York;
The Merchant's National Bank of Newark, New Jersey;
The National Bank of the Commonwealth of Boston, Massachusetts;
The National Bank of Kutztown, Pennsylvania;
The Littleton National Bank, New Hampshire,

with an aggregate capital of \$1,960,000, were organized by the surrender and transfer of circulating notes for that purpose by existing National Banks, and did not increase the aggregate of bank circulation.

One hundred and forty-five banks have been organized during the year under the act approved July 12, 1870, providing for the issue of fifty-four millions of additional national bank circulation.

The names of the banks are as follows, to-wit,

	Capital.
The Second National Bank of Lawrence, Kansas	\$100,000
The State National Bank of Springfield, Illinois	150,000
The German National Bank of Chicago, Illinois	250,000
The First National Bank of Palmyra, Missouri	100,000
The City National Bank of Selma, Alabama	100,000
The Loudoun National Bank of Leesburgh, Virginia	50,000
The South Bend National Bank, Indiana	100,000
The First National Bank of Lake City, Minnesota	50,000
The First National Gold Bank of San Francisco, California	1,000,000
The Citizen's National Bank of Charlottesville, Virginia	100,000
The Merchants' National Bank of Burlington, Iowa	100,000
The Hastings National Bank, Michigan	50,000
The City National Bank of Chattanooga, Tennessee	100,000
The Teutonia National Bank of New Orleans, Louisiana	200,000
The National Bank of Somerset, Kentucky	60,000

	Capital.
The First National Bank of Appleton, Wisconsin.....	\$50,000
The First National Bank of Santa Fé, New Mexico.....	150,000
The First National Bank of Pleasant Hill, Missouri.....	100,000
The First National Bank of Holly, Michigan.....	50,000
The Merchant's National Bank of Richmond, Virginia.....	200,000
The First National Bank of Lanark, Illinois.....	50,000
The Fayetteville National Bank, North Carolina.....	50,000
The First National Bank of Sioux City, Iowa.....	100,000
The First National Bank of Charlotte, Michigan.....	50,000
The First National Bank of Franklin, Kentucky.....	100,000
The First National Bank of Niles, Michigan.....	100,000
The Washington National Bank, Iowa.....	50,000
The First National Bank of Fort Scott, Kansas.....	50,000
The First National Bank of Mason, Michigan.....	80,000
The Central National Bank of Columbia, South Carolina...	100,000
The Citizen's National Bank of Raleigh, North Carolina...	100,000
The First National Bank of Springfield, Kentucky.....	150,000
The First National Bank of Saginaw, Michigan.....	100,000
The Commercial National Bank of Petersburg, Virginia...	120,000
The Boone County National Bank of Columbia, Missouri...	100,000
The First National Bank of Boscobel, Wisconsin.....	50,000
The First National Bank of Seneca, Illinois.....	50,000
The State National Bank of New Orleans, Louisiana.....	500,000
The Gallatin National Bank of Shawneetown, Illinois.....	250,000
The First National Bank of Osceola, Iowa.....	50,000
The National Bank of Jefferson, Texas.....	100,000

Wyoming Territory, 1 bank.....	100,000
Wisconsin, 6 banks.....	450,000

The total amount of currency issued under the act of July 12, 1870, to October 1, 1871, is \$22,333,990, some \$20,000,000 of which has been furnished to new banks, and the remainder to existing banks which had

not received their full quota, or which had increased their capital to meet the growing demands of business.

The condition of the Southern States since the passage of the act has been such as to preclude the possibility of their taking any considerable portion of the circulation provided, and consequently the number of banks organized in the South is small. This fact made it possible, after the expiration of the year specified in section one of the act of July 12, 1870, to organize additional banks in the Western States, and accordingly nearly all of the really meritorious applications in those States were granted. I estimate that the Western and Northwestern States can be fully supplied and still leave from \$20,000,000 to \$25,000,000 for the Southern States when they are in condition to take it.

In New Orleans a disposition has been manifested to adopt the national banking system generally, and while but two new banks have been organized there, three of the old banks have reorganized as national banks, and it is understood that several others are contemplating a similar change. One obstacle in the way of such changes is the limitation fixed by the act to the amount of circulation that can be furnished to any one bank, to wit, \$500,000. Quite a number of the New Orleans State banks employ a very much larger capital, and could advantageously employ a much larger circulation. The propriety of removing this restriction in certain cases is respectfully suggested.

Since my last report but one bank has been established on a gold basis—the First National Gold Bank of San Francisco—with a capital of \$1,000,000. It is presumed that the success of this institution is not so flattering as to induce the organization of others of a similar character, though, in view of the obstacles and the opposition which it meets, it holds its own and is gradually winning its way into public confidence.

The tenacity with which the Pacific States adhere to a gold currency is quite notable. Whether it is equally praiseworthy, is another thing. It is not clear that those States derive any substantial benefit from the course they have pursued, and it is beginning to be manifest that the United States are not at all benefited by it. The substitution of a paper currency in California and the other gold-producing States for their present hard money would probably set free for the use of the Government and the whole country some thirty or forty millions of gold, and at the same time provide those communities with a more economical, active, and accommodating circulating medium.

I recommend that provision be made for the establishment of national banks in California and the other Pacific States upon a legal-tender basis, and that the law be so modified as to enable them to cope successfully with other banking institutions at present doing business in those States.

There is nothing especial to note in the history or management of the banks during the year. A few cases of dishonesty have occurred, but none of any magnitude. The examinations made under the provisions of section 54 of the currency act have been instrumental in developing irregular and dishonest practices in time to prevent loss to the bank in quite a number of cases, and there is no doubt of their efficacy in securing judicious management and general compliance with all the important requirements of the act.

Occasional complaint is made that national banks are in the habit of charging higher rates of interest than the laws of the several States authorize, but as the law itself provides a remedy or a penalty for usury, and places it at the disposal of the complainant, I have not felt called upon to take any official action on the subject. While nothing

will justify a bank for violating any provision of law, I desire, nevertheless, to call the attention of Congress again to the very high rates of taxation that are imposed on national banks in most of the States. It is asserted by bank officers, and admitted to be true, that local taxation is so high in some of the States as to make it impossible to lend money at legal rates without loss to the bank. It is probably true that, in some instances, the object of the legislature in imposing these burdens is a hostile one, intended to drive national banks out of existence, while, in other cases, onerous taxes are imposed under the impression that the banks are making enormous profits, and can afford to divide them with the State. I am of opinion that the public good would justify some limitation to the power of the States to tax the shares of national banks.

The average tax paid to the United States is $2\frac{1}{2}$ per cent. on the capital of the banks, and it seems to me that the equivalent of this tax ought to be sufficient for the States in which the banks are located.

I recommend that the Comptroller of the Currency be clothed with power to act in cases where the capital of a bank has been seriously impaired by losses or otherwise, either by requiring the capital to be made whole by assessment of the shareholders, or by requiring the bank to wind up its affairs within a reasonable time if its capital is not made good. Also to wind up the affairs of any bank which is not engaged in the transaction of a legitimate and reputable business, or which has obtained an organization through false or fraudulent representations.

I think it would have a tendency to check the circulation of counterfeit notes, if national banks were required to stamp all such notes, when presented at the counter of the bank, with the word "counterfeit," and I suggest the expediency of legislative provision for that purpose.

The circulation furnished to national banks has now been outstanding for an average period of about five years, and it is being returned in constantly increasing amounts for new notes. Since the organization of the Bureau to September 30, the total amount returned for destruction is \$54,546,345, of which \$23,948,827 were returned during the last year. The handling of these notes involves much care and labor, and requires an addition to the present available force of the office.

Carefully prepared tables will be found in the appendix, as follows:

1st. The number of banks, amount of capital, bonds, and circulation in each State and Territory.

2d. The number and amount of each denomination of bank-notes issued, redeemed, and outstanding.

3d. The number and amount of each denomination of gold bank-notes issued and outstanding.

4th. Statement of amount and different kinds of bonds held to secure circulation.

5th. Banks in the hands of receivers.

6th. National banks in liquidation which have deposited lawful money to redeem their circulation, and taken up their bonds.

7th. National banks in liquidation for the purpose of consolidating with other banks.

8th. Reserve tables.

9th. List of clerks employed during the fiscal year ending June 30, 1871.

10th. Expenditures for the fiscal year ending June 30, 1871.

SPECIE PAYMENTS.

The time when, and the means by which, specie payments may be resumed have for some years been the subject of much anxious consideration and of earnest public discussion. The problem is one of general and pervading interest, closely connected with the public welfare, and, like all questions of public importance, has called forth a great variety of opinions. Writers who have made a study of this and kindred branches of political economy, with few exceptions, agree that when in time of suspension of specie payments there has been a very considerable increase of paper money, there must be a corresponding decrease before specie payments can be safely resumed.

Assuming the paper currency to be redundant, or in excess of the normal demands of trade, the excess must be retired in order to bring the currency up to a specie standard. This redundancy has been attributed to the currency of the United States by a majority of those who have written and spoken on the subject since the year 1864, and the remedy prescribed has been "contraction."

So prevalent was this view of the case at one time that, in 1866, Congress, in obedience to what was regarded as a sound and correct principle of political economy, provided by law for a gradual withdrawal and cancellation of United States notes to the extent of four millions a month; but, owing to the funding operations of the Treasury, this provision was not carried into effect until the latter part of the year 1867, when the process of contraction was commenced. Just at this time, also, commenced a stringency in the money market, which increased in severity as contraction went on. To the people the stringency seemed to be produced by the contraction, though it is now evident that other causes conspired to aid in producing the result. The hard times, however, were generally attributed to the depletion of the money markets by the actual withdrawal of ten millions of currency in six months, and its continued reduction at the rate of four millions per month thereafter.

This opinion had all the force of conviction in the public mind, and found its appropriate expression in an act of Congress, which became a law, in February, 1868, prohibiting any further reduction of the currency, and so the matter now stands. If there is a superabundance of currency, which must be retired before a specie basis can be reached, the first step toward specie payments must be the repeal of the act of February, 1868. If public sentiment will not permit or sanction such action by Congress, it will be because the people do not wish for resumption at the expense of contraction. If this is the only road to specie payments, it remains closed by the mandate of the people.

In direct antagonism to the demand for specie payments at all hazards, and without regard to consequences, is the doctrine of a currency permanently divorced from a specie basis. It is argued, and with some degree of plausibility, that the convertibility of paper money into coin on demand, has always been an unsound element of currency, because it has never been practicable when actually required. Under any system of currency of which credit forms a part, convertibility is but little more than a name, satisfactory enough as long as the times are easy and confidence prevails, but exceedingly dangerous and mischievous when the money market is deranged, and distrust has taken the place of confidence. The conversion of paper is seldom demanded in any considerable amounts until credit is wavering, and everything is looked

upon with suspicion. Then, the demand is not limited to the 25 or 30 per cent. which the banks may have in reserve. Loss of confidence, and the knowledge that provision for payment is only partial, are precursors of panics, suspensions, failures, and all the disasters incident to such a state of affairs. It is a maxim in military science that a line of fortifications is just as strong as the weakest place in it, and no stronger. So, in finance, a system is never safe that is vulnerable at any point, or under any circumstances. Panics are the weak places in all theories or systems of convertible currencies, of which credit forms a constituent element.

Absolute convertibility can be secured only by locking up the specie; and for each dollar under lock and key, issuing a paper promise to pay a dollar on demand. In this case the note is only the title to the thing, and there should not be more titles than there are things; in other words, there must not be more paper dollars than there are specie dollars. The convertibility hobby has been ridden to death. The uniform failure of all attempts to secure it should admonish bankers and financiers that there may be such a thing as progress and improvement even in banking and currency. The Bank of England may be regarded as furnishing the conditions most favorable to the convertibility theory, yet in every time of real need its charter has been disregarded, and the bank has been obliged to suspend. The history of the banks in the United States is but a series of suspensions, occurring as often as conversion was demanded.

Ultimate solvency is of far greater importance to the community than convertibility, and the liberal and judicious use of credit is of far more value in the commercial world than the instant command of gold and silver. Credit is the great element of modern progress. Notwithstanding the abuses to which it has been subjected, it has rejuvenated the world. The prosperity of the United States is, in great measure, due to this life-giving power. Currency based on actual deposits of coin would have given no opportunity for enterprise, no room for growth. Heterogeneous as the currency of this country has been, false and delusive as its promises have proved, yet the element of credit which has entered so largely into its composition has proved an inestimable benefit. Specie has not been at the bottom of this prosperity, for we have had but little of it, comparatively, and whenever the demand has been made for the redemption of currency, the banks have been obliged to suspend. We owe our welfare and progress to the liberal, and not always judicious, use of credit, more than to anything else. And particularly is this true of the last six or eight years. During that period we have had a currency based exclusively upon credit. It has held out no false promise; and, as a consequence, we have been exempt from all currency panics or disturbances.

Those who favor the views herein expressed, maintain and believe that our currency system, as at present established, is the best and safest we have ever had. They believe that the premium on gold may be gradually reduced in the next few years, as it has been in the past, until it shall become practicable to obtain coin for paper, in such reasonable amounts as may be required in trade *by exchange* at rates merely nominal. They make a distinction between "convertibility by redemption," which is the generally accepted idea, and convertibility by exchange, which is their idea. This, they affirm, would bring all the benefits of resumption, without any of its attendant dangers. The plan involves the recognition of bullion dealers, who shall be entitled to regular and legitimate commissions, premiums, or profits. The assent of the

public to this proposition relieves the banks and the Government from the necessity and the burden of furnishing coin for nothing. Trade would soon adapt itself to this basis, would calculate and allow these premiums or commissions, and would take out of our system a dangerous, unnecessary, and delusive element.

A theory which has found much favor in the last few years, is embodied in the proposition that "the currency should be maintained at its present volume until the industrial and commercial interests of the country shall recover from the effects of the war, and until the natural growth in population and wealth, the revival of enterprise, the increased facilities of trade, and the expansion of our borders, shall create a legitimate use for the whole amount of currency now outstanding." Just how long this will take has not been stated, and probably is not susceptible of demonstration; but the idea is a plausible one, and commends itself to popular favor, as affording an easy and gradual transition to specie payments without any of the inconveniences and hardships associated in the public mind with contraction.

The fundamental idea underlying this theory is that the conditions necessary to growth exist already. It presupposes that the country may prosper; that trade, industry, and enterprise may flourish; that labor may have a bountiful reward; that individuals and communities may grow rich and increase in wealth and substance, notwithstanding a superabundant, irredeemable, depreciated currency. If this assumption is correct, it is hardly necessary to look forward to the time when natural growth shall absorb the surplus currency, and specie payments shall come in the course of nature.

If the currency, in its present condition, is so far conducive to prosperity as to make it probable that, at no distant day, the country will actually need all the paper currency now in circulation, the inference would go far toward destroying the force of the usual arguments in favor of early resumption, as it would establish the fact that specie payments are not essential to the growth and prosperity of the country. If the assumption is not correct, the whole proposition fails; for without growth and increase in resources and trade, the currency would forever remain in excess.

Granting, however, that the business of the country is likely to attain such dimensions as to require the entire present volume of currency for its accommodation, there is another aspect of the case to be considered. When the point is reached at which the currency ceases to be redundant, the supposition is that it will rapidly appreciate to par with gold, and that gold will then resume its functions as currency. When this takes place, one of two things is likely to occur: There must be a very considerable inflation, in consequence of the addition of gold and silver to the currency, or there must be a reduction in the volume of paper money. In other words, if there shall not be inflation, there must be contraction; but it will be contraction as a consequence, not as a cause; contraction brought about by natural and self-acting causes, not by act of Congress, nor by the exercise of arbitrary power in any quarter. This would be a legitimate result, and, if it should take place, would not be liable to the same objections that are urged against contraction now.

But whether the coin shall be added to the paper, and so swell the volume of currency and produce inflation, or whether a proportion of the paper shall be retired, as the coin comes forth to take its place as a constituent part of the currency, the probabilities seem to be that, with

a wise administration of the finances, paper and specie will gradually and surely, though perhaps slowly, approximate to an equality in value.

If it were possible, in considering the practicability of resumption, to distinguish between circulation and deposits, making the former payable in specie, while the latter should be payable in kind, much of the difficulty and danger attendant on a return to specie payments would be removed.

Although the legal obligation to pay coin or lawful money for deposits, in the absence of any stipulation on the subject, is not disputed, yet it is probable that the banks, by concerted action, would have no difficulty in arranging with their customers to receive for their deposits the same kind of money deposited. This understanding is quite general between the banks and their customers, outside of two or three of the large eastern cities. If the banks in those cities would agree to settle their balances, through their clearing houses, in current funds, much of the difficulty of making deposits likewise payable in current funds would be obviated. Ordinarily those very banks pay all deposits in miscellaneous funds, and the obligation to pay specie or lawful money only recurs to plague them when they are least able to meet the demand.

It would be practicable to place the currency on a specie basis long before it would be possible to place the entire demand liabilities of the banks on a similar footing. In New York, provision could easily be made for thirty-four millions of bank notes; but, according to established usage there, specie payments would involve provision for over \$200,000,000 deposits. It is this practice which renders the finances of the country so unsteady and unreliable, to wit, the false principles which underlie the financial management of the great centers of money and trade.

If New York cannot maintain specie payments according to her own standard, they cannot be maintained successfully elsewhere for any length of time under any circumstances, and hence it is a matter of vital importance to the country at large to scrutinize carefully, not only the grounds upon which this assumed obligation is based, but also the ability of the parties to carry it into practical effect. During the last five years there have been no apprehensions in any quarter of a currency panic. That element of disaster has happily been wanting in the disturbances which have characterized the money market from time to time; and yet it is an admitted fact that we have more than once been upon the verge of a panic which threatened the most disastrous consequences. There have been not less than three occasions during the last five years in which, if the New York banks had been paying specie, according to their interpretation of specie payments, they would have been obliged to suspend from inability to pay, not their circulating notes, but their deposits; and this at a time when specie payments, if they had prevailed throughout the country, could have been maintained at every other point, as far as the currency was concerned.

To the people the establishment of the currency on a sound and solvent basis is the one important thing. It makes but little difference to them whether depositors in the large cities are entitled to receive specie for deposits made in currency. This is not a vital point in public estimation, and it may safely be left to private contract, as many other equally important questions are. The inquiry recurs, then, conceding the desirability of resuming specie payments, must all efforts in that direction be retarded and imperiled by the undertaking of a few banks, few in number, but powerful by virtue of their central position, to place

deposits upon the same basis? If any substantial interest were sacrificed, or any valuable principle violated, by the abandonment of this dogma, there might be some reason for taking the risk; but if deposits could be made payable in kind, that is, in current funds, lawful money, or gold, as the case might be, the depositor could have no just ground of complaint, while one great obstacle to the resumption and maintenance of specie payments would be removed.

In the solution of these questions lies one of the most important problems of the day; but, in view of the various theories advanced, it seems probable that the true solution will come only with time.

The doctrine of contraction as a means to an end for the purpose of hastening a return to specie payments, has been condemned by the people. It has been tried and rejected, and may be considered as abandoned.

The proposition to wait until the business of the country shall expand to such an extent as to require the whole volume of paper money in circulation, involves no immediate action, meets the views of the public more fully than any other plan, and is probably safer than any scheme which requires legislative interference.

It is also very evident that the undertaking, heretofore considered, to place the entire currency debt of the country on a specie basis, by the payment of deposits in coin, would be an unwise and mischievous thing, a vain and futile attempt, which would lead to panics and failures in the future as in the past. If specie payments are to be resumed, let the effort be concentrated upon the currency, and leave deposits and all other currency debts to be adjusted by private contract. As the first step in this direction, the associated banks in all cities should be required to settle balances, through their clearing-houses, in current funds.

The discrediting of national-bank currency, which is the consequence of their present regulations in this respect, is unwise and injurious, and creates a distinction between bank currency and lawful money which is unnecessary and which ought not to exist.

It would be a wise measure to provide for the extension of the national banking system wherever capital and trade may invite, withdrawing, if it should seem desirable, United States notes, as fast as bank-notes are issued.

A well-managed national bank, with a *bona fide* paid-up capital, is not a dangerous institution in any community. A deliberate, legitimate investment of capital in banking by men who, in a majority of cases, have had the sagacity, the enterprise, and the prudence to make their own money, men who are usually the most reliable members of society, can hardly be considered unwise, certainly not injurious to the interests of the people in whose midst it is made.

A national bank affords a safe place for the deposit of all the little hoards and savings which otherwise would be unemployed. It aggregates these into a fund which becomes useful and powerful in stimulating trade and enterprise.

There is reason to believe that the national banks organized during the last year in places previously without banking facilities have had no little instrumentality in helping to bear the strain that comes with every autumn. They have paid out in their several localities the currency furnished to them, while they have called out and utilized for the public good large sums of money previously distributed among and held by the people in small amounts; and in this they have

contributed to the annual supply of money required in the West, and which otherwise would have been drawn from the eastern cities.

I therefore do not hesitate to recommend that provision be made for the organization of national banks wherever they may be needed.

If, with each million of bank-notes issued, a million of legal-tenders is withdrawn, the time will come when the circulation to be redeemed will be so much larger in proportion than the funds for its redemption, that the latter must appreciate in value, while the enhanced cost of redemption will be a wholesome check upon bank issues.

If free banking is made practicable upon the basis suggested, any further increase or inflation of the currency will be rendered impossible, and every hundred thousand dollars of bank-notes so issued will have a tendency to accelerate the resumption of specie payments, while, at the same time, it will make the process gradual, and throw the responsibility and the burden upon the banks and the capital of the country where they legitimately belong. These are agencies which can tell with unerring certainty when and how to act, and the precise moment when it will be safe and wise to re-establish the business and finance, of the country on a specie basis.

Respectfully submitted.

HILAND R. HULBURD,
Comptroller of the Currency.

Hon. GEO. S. BOUTWELL,
Secretary of the Treasury.

APPENDIX.

Statement showing the number of banks, amount of capital, amount of bonds deposited, and circulation, in each State and Territory, on the 30th day of September, 1871.

DEPUTY COMPTROLLER.			
John Jay Knox		2,500	12 months.
CLERKS.			
Linus M. Price	Fourth class.	1,800	12 months.
J. Franklin Bates	do	1,800	Do.
Edward Wolcott	do	1,800	Do.
John D. Patten, jr.	do	1,800	Do.
George W. Martin	do	1,800	Do.
John W. Magruder	do	1,800	Do.
John W. Griffin	do	1,800	Do.
John Burroughs	do	1,800	Do.
John S. Langworthy	do	1,800	Do.
Charles A. Jewett	do	1,800	Do.
Aaron Johns	do	1,800	3 months.
Edward S. Peck	do	1,800	7 months.
Charles H. Norton	Third class.	1,600	12 months.
Gurden Perkins	do	1,600	7 months 9 days.
Edward Myers	do	1,600	12 months.
C. D. F. Kasson	do	1,600	11 months.
Edward S. Peck	do	1,600	5 months.
George H. Wood	do	1,600	12 months.
Aaron Johns	do	1,600	1 month.
Fernando C. Cate	do	1,600	12 months.
Edwin C. Denig	do	1,600	4 months.
William H. Milstead	do	1,600	12 months.
Frank A. Miller	do	1,600	Do.
Henry H. Smith	do	1,600	1 month.
William A. Page	do	1,600	7 months.
John A. Kayser	do	1,600	8 months.
Albert A. Miller	do	1,600	3 months.
George McCullough	do	1,600	Do.
Dayton S. Ward	do	1,600	Do.
C. Burr Vickery	do	1,600	Do.
William A. Page	Second class.	1,400	5 months.
John Joy Edson	do	1,400	12 months.
Charles H. Cherry	do	1,400	Do.
Charles Scott	do	1,400	Do.
William Cruikshank	do	1,400	Do.
George McCullough	do	1,400	9 months.
Albert A. Miller	do	1,400	Do.
John A. Kayser	do	1,400	4 months.
R. T. J. Falconer	do	1,400	11 months.
William D. Swan	do	1,400	8 months.
Fisher A. Simkins	do	1,400	Do.
Dayton S. Ward	do	1,400	4 months.
T. Elwood Major	do	1,400	Do.
George Wallace, jr.	do	1,400	Do.
W. W. Eldridge	do	1,400	Do.
Leonard Whitney	do	1,400	Do.
C. D. F. Kasson	First class.	1,200	1 month.
Horatio Nater	do	1,200	12 months.
John A. Corwin	do	1,200	20 days.
Augustus F. McKay	do	1,200	12 months.
John J. Patton	do	1,200	Do.
T. Elwood Major	do	1,200	8 months.
William D. Swan	do	1,200	4 months.
Phillip T. Snowden	do	1,200	12 months.
Renben Smith	do	1,200	5 months.
Fisher A. Simkins	do	1,200	3 months 11 days.
Charles Bradshaw	do	1,200	1 month 29 days.
Dayton S. Ward	do	1,200	2 months 15 days.
George Wallace, jr.	do	1,200	4 months 24 days.
Watson W. Eldridge	do	1,200	4 months 18 days.
Leonard Whitney	do	1,200	3 months 15 days.
J. C. Jansen	do	1,200	5 months 25 days.
William Sinclair	do	1,200	5 months 8 days.
Isaac C. Miller	do	1,200	5 months 4 days.
Miss Frances R. Sprague	do	1,200	4 months 20 days.
Walter Taylor	do	1,200	3 months 21 days.
William B. Greene	do	1,200	3 months 9 days.

Names and compensation of officers, &c., in the office of the Comptroller, &c.—Continued.

Name.	Class.	Salary.	Period of service.
Alanson T. Kinney	First class	\$1,200	3 months.

Expenditures of the office of the Comptroller of the Currency for the fiscal year ending June 30, 1871.

For special dies, plates, paper, printing, &c	\$160,551 52
For salaries	101,400 00
Total	<u>261,951 52</u>

The contingent expenses of the office were paid out of the general appropriation for contingent expenses of the Treasury Department, and as separate accounts are not kept for the different Bureaus, the amount cannot be stated.

REPORT OF FIRST COMPTROLLER.

REPORT

OF THE

FIRST COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT,
First Comptroller's Office, October 27, 1871.

SIR: I have the honor to submit the following report of the operations of this office during the fiscal year ending June 30, 1871.

Number of warrants countersigned, entered upon blotters, and posted in ledgers, viz:

Treasury, proper	1, 691
Public debt	245
Quarterly salary	1, 398
Diplomatic	2, 296
Customs	3, 876
Internal revenue	5, 941
Judiciary	1, 703
War, civil	42
War, pay	3, 642
War, repay	1, 143
Navy, pay	1, 390
Navy, repay	233
Interior, civil	1, 797
Interior, pay	1, 680
Interior, repay	54
Appropriation	148
Internal revenue, (covering)	3, 086
Customs, (covering)	1, 549
Land, (covering)	591
Miscellaneous, (covering)	4, 504

Number of accounts received from the First and Fifth Auditors of the Treasury, and Commissioner of the General Land Office, revised and certified, viz:

<i>Judiciary</i> , embracing the accounts of United States marshals for their fees, and for the expenses of the United States courts, of the United States district attorneys, and of the commissioners and clerks of United States courts.....	1, 718
<i>Diplomatic and consular</i> , embracing the accounts arising from our intercourse with foreign nations, expenses of consuls for sick and disabled seamen, and of our commercial agents in foreign countries	1, 910
<i>Public lands</i> , embracing the accounts of the registers and receivers of land offices, and surveyors general and their deputies, and of lands erroneously sold	2, 589
<i>Steamboats</i> , embracing the accounts for the expenses of the inspection of steamboats, and salaries of inspectors	575
<i>Mint and its branches</i> , embracing accounts of gold, silver, and cent coinage, of bullion, of salaries of the officers and of the expenses.....	125
<i>Public Debt</i> , embracing accounts of the United States Treasurer, and the Assistant Treasurer's accounts, for the redemption of United States stocks and notes, and for payment of interest on the public debt.....	781

<i>Public printing</i> , embracing accounts for printing, for binding, and for paper	72
<i>Territorial printing</i> , embracing accounts for printing, binding, and paper for the legislatures of the several Territories	14
<i>Territorial</i> , embracing accounts for the legislative expenses of the several Territories, and the incidental expenses of their government	354
<i>Congressional</i> , embracing accounts for contingent expenses, &c., of the United States Senate and House of Representatives	110
<i>Collectors of internal revenue</i> , embracing their accounts of the revenue collected, accounts for expenses of collecting the same, and accounts for their salaries and commissions, and the expenses of their offices	3,952
<i>Assessors of internal revenue</i> , embracing accounts for their commissions and the expenses of levying the taxes	1,212
<i>Miscellaneous, internal revenue</i> , embracing accounts for salaries and expenses of supervisors, drawbacks, informers, &c.	2,081
<i>Stamp agents</i> , embracing accounts for the sale of internal revenue stamps	1,646
<i>Miscellaneous</i> , embracing accounts for the contingent expenses of the executive departments at Washington, salaries of judges, marshals, district attorneys, &c.	1,834
Number of letters written on official business	9,385
Number of receipts of collectors of internal revenue for tax-lists examined, registered, and filed	2,863
Number of official bonds examined, registered, and filed	1,169
Number of requisitions examined, entered, and reported, viz:	
Diplomatic and consular	776
United States marshals	210
Collectors of internal revenue	2,897

The Comptroller deems it unnecessary to give in this report a statement of the revenues received and the disbursements made, inasmuch as the records of the Secretary's office correspond with those of the Comptroller's, and the financial report will present the same figures and results as would be presented by this office.

The foregoing statement of the labor performed in the office shows that there has not been any reduction in its amount, and that it remains as large as in former years, and requires that the force should be continued.

I am, sir, very respectfully, your obedient servant,

R. W. TAYLER,
Comptroller.

HON. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE SECOND COMPTROLLER

REPORT OF THE SECOND COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT,
Second Comptroller's Office, September 30, 1871.

SIR: I have the honor to submit the following detailed statement of the business operations of this office for the fiscal year ending June 30, 1871:

The aggregate number of accounts of disbursing officers and agents which have been received, as well as those which have been finally adjusted, is as follows:

	Received.	Revised.	Amount.
From the Second Auditor.....	3, 639	4, 066	\$198, 446, 896
From the Third Auditor.....	3, 748	3, 829	205, 953, 053
From the Fourth Auditor.....	672	684	27, 446, 171
Total.....	8, 059	8, 579	431, 846, 120

The above accounts have been duly entered, revised, and the balance found thereon certified to the Secretary of the Department in which the expenditure has been incurred, viz: those from the Second and Third Auditors to the Secretary of War, (excepting the accounts of Indian agents, which are certified to the Secretary of the Interior,) and those from the Fourth Auditor to the Secretary of the Navy.

Character of accounts.	Received.	Revised.	Amount.
FROM THE SECOND AUDITOR.			
Embracing accounts of disbursing officers of the War Department for collecting, organizing, and drilling volunteers.	17	17	\$655, 886

Official bonds filed.....	201
Pensioners recorded.....	<u>22,793</u>

Respectfully submitted,

J. M. BRODHEAD,
Comptroller.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE COMMISSIONER OF CUSTOMS.

REPORT

OF

THE COMMISSIONER OF CUSTOMS.

TREASURY DEPARTMENT,
Office of Commissioner of Customs, September 2, 1871.

SIR: I submit herewith, for your information, a statement of the work performed in this office during the fiscal year ending June 30, 1871.

The number of accounts on hand July 1, 1870, was	135
The number of accounts received from First Auditor during year....	6, 013
	<hr/> 6, 148
The number of accounts passed during the year	5, 905
The number of accounts returned during the year	44
	<hr/> 5, 949
The number of accounts on hand June 30, 1871	199

There was paid into the Treasury of the United States, from sources the accounts of which are settled in this office:

On account of customs	\$206, 270, 408 05
On account of fines, penalties, and forfeitures	952, 579 86
On account of steamboat inspections	223, 823 70
On account of drayage, storage, &c	414, 310 61
On account of marine hospital money, (from January 1, 1871) ..	161, 711 46
On account of emolument fees	585, 887 69
	<hr/> 208, 608, 721 37

And there was paid out of the Treasury:

On account of expenses of collecting the revenue from customs	\$6, 560, 672 61
On account of excess of deposits	2, 276, 169 16
On account of debentures	945, 441 52
On account of revenue-cutters, construction and maintenance	1, 252, 000 31
On account of public buildings	1, 350, 133 87
On account of light-houses, construction and maintenance	2, 674, 928 08
On account of marine hospital, care of sick seamen	437, 493 86
On account of distributive shares of fines	488, 135 55
On account of life-saving stations, Long Island and New Jersey	37, 740 17
On account of miscellaneous accounts	73, 128 00
	<hr/> 16, 095, 843 13

The number of estimates received was	2, 157
The number of requisitions issued	2, 129
The amount involved in said requisitions	\$9, 648, 285, 81
The number of letters received was	11, 814
The number of letters written was	11, 862
The number of letters recorded was	11, 539
The amount involved in this statement	\$234, 352, 850 31
The average number of clerks employed	26

CAPTURED AND ABANDONED PROPERTY.

During the past year the business in this division has been very small, having been confined principally to the settlement of accounts for legal services, under act of April 20, 1870, and to the review of work already done, the latter necessitated by the adverse claims of cotton agents in settling their accounts.

I append tabular statement of the expenditures out of appropriations, the accounts of which are settled in this office, marked A.

Statement of receipts from fines, penalties, and forfeitures, by districts, as shown by the accounts, so far as they have been received at this office, marked B.

Statement showing the transactions in bonded merchandise, marked C.

Very respectfully, your obedient servant,

W. T. HAINES,
Commissioner of Customs.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

A.—Statement of expenditures out of appropriations, the accounts for which are adjusted in the office of the Commissioner of Customs.

OFFICE OF COMMISSIONER OF CUSTOMS, *September 2, 1871.*

REPORT OF THE FIRST AUDITOR.

REPORT

OF

THE FIRST AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT,
First Auditor's Office, September 18, 1871.

SIR: I have the honor to submit the following statement of the business transactions of this office for the fiscal year ended June 30, 1871:

Accounts adjusted.	Number of accounts.	Amounts.
RECEIPTS.		
Collectors of customs	1, 546	\$187, 356, 571 31
Collectors under steamboat act.....	526	204, 619 92
Internal and coastwise intercourse.....	1	26, 093 74
Mints and assay offices.....	23	50, 765, 660 22
Fines, penalties, and forfeitures	489	924, 623 27
Marine hospital money collected.....	24	2, 701 68
Miscellaneous receipts.....	255	57, 897 99
	2, 864	239, 338, 078 13
DISBURSEMENTS.		
Collectors as disbursing agents of the Treasury	1, 194	\$6, 029, 273 63
Official emoluments of collectors, naval officers, and surveyors	857	1, 633, 091 62
Excess of deposits for unascertained duties.....	122	1, 665, 653 02
Debentures, drawbacks, bounties, and allowances	90	984, 215 21
Special examiner of drugs.....	1	417 58
Superintendents of lights.....	446	978, 036 87
Agents of marine hospitals.....	507	366, 373 01
Accounts for duties illegally exacted, fines remitted, judgments satisfied, and net proceeds of unclaimed merchandise paid.....	1, 470	874, 927 61
Judiciary accounts.....	1, 895	2, 624, 379 11
Disbursements for revenue-cutters.....	421	1, 058, 177 64
Redemption of the public debt and the payment of interest thereon	643	602, 129, 163 51
California land claims.....	3	524 75
Inspectors of steam vessels for traveling expenses.....	292	31, 307 21
Public printing.....	24	1, 112, 207 67
Insane Asylum, District of Columbia.....	6	59, 350 34
Providence Hospital.....	12	12, 000 00
Construction and repair of public buildings.....	800	1, 581, 182 07
Life-saving stations.....	12	10, 976 68
Compensation and mileage of the members of the Senate and House of Representatives.....	1	425, 303 59
Contingent expenses of the Senate and House of Representatives and of the several Departments of Government.....	438	3, 214, 039 04
Mints and assay offices.....	101	50, 655, 226 92
Territorial accounts.....	80	152, 064 13
Captured and abandoned property	68	347, 383 98
Salaries of the civil list paid directly from the Treasury.....	1, 427	612, 056 10
Coast Survey.....	19	595, 514 23
Disbursing clerks for paying salaries.....	335	5, 231, 340 03
Fuel, lights &c., for public buildings.....	266	295, 201 89
Additional compensation to collectors, &c.....	2	478 49
Treasurer of the United States for general receipts and expenditures.....	6	1, 080, 837, 351 25
Distribution of fines, penalties, and forfeitures.....	154	195, 143 82
Commissioner of Public Buildings.....	118	296, 409 83
Commissioner of Agriculture.....	30	145, 221 05
Warehouse and bond accounts.....	828	
Miscellaneous.....	1, 433	9, 123, 470 20
	14, 101	1, 773, 277, 492 08

Reports and certificates recorded.....	11,426
Letters written	2,239
Letters recorded	2,239
Powers of attorney registered and filed.....	6,856
Acknowledgments of accounts written.....	8,581
Requisitions answered.....	365
Judiciary emolument accounts registered and filed.....	456
Total.....	<u>32,162</u>

As the character of the business of this office has undergone no essential change since my last annual report, I am induced to adopt, in part, the language and form of that report, as applicable to this.

The preceding condensed statement of the business of this office gives so imperfect an idea of the amount of work performed, and the large responsibilities involved, that for the better understanding of the diversified character of the business, and its practical working in detail, I submit the following dissection and exhibit, as the most appropriate means of comprehending its importance and measuring its magnitude.

CUSTOMS DIVISION.

Returns are now received from 139 districts and ports. These returns are distributed as nearly equal as practicable to thirteen different desks. For the proper examination and adjustment of these accounts clerks are required who have a knowledge of the tariff laws, and are also good practical accountants. The accounts of customs are received and adjusted monthly. These accounts include the duties on imports, and duties on tonnage.

The abstracts of duties on imports in New York, Boston, Philadelphia, and San Francisco, New Orleans, Baltimore, and Portland, are very large, requiring a great amount of patient labor in comparing the entries with the tariff schedules, made up as those schedules are from the various acts of 1861, 1862, and 1864, and the several amendatory acts. In all the smaller districts, which have no naval officer to certify the abstracts, the manifest is forwarded by the collector for each and every entry of merchandise, amounting, in districts like Portland, Vermont, Oswego, Detroit, &c., to hundreds and even thousands in a single month. These must all be examined as to the rate of duty, oath, stamp, &c., and compared with the abstract. After the abstracts are examined and the differences noted, a statement of account is made, and the collector charged with the aggregates and credited by his deposits as shown by the covering warrants.

Marine hospital duties are reported by the collectors, in separate accounts monthly, and adjusted quarterly.

The collectors of customs also render monthly accounts for expenses of collecting the revenue, which are adjusted quarterly. In these accounts are included all payments to inspectors, weighers and gaugers, appraisers, revenue boatmen, contingent expenses, salary of collectors, commissions, &c. Vouchers for all these payments must be compared with the lists of appointment for the authority for payment, and examined as to correct computation, oath, &c.

Next comes the account of official emoluments, in which the collector accounts for his fees, &c., and charges his payment for clerk-hire, stationery, office-rent, &c. This account in large ports is rendered monthly, and in small ones quarterly, and adjusted yearly. Separate accounts have also to be stated in many of the districts for excess of deposits refunded, debentures paid, and expenses of the revenue-cutter service.

These are received monthly and stated quarterly. In some cases these are very large.

Monthly accounts are also received from nearly all the districts for steamboat fees and fines, penalties, and forfeitures, which are usually adjusted quarterly, and in some cases oftener.

The collectors of customs also act as disbursing agents for expenses of Marine Hospital Establishment and the Light-House Establishment, accounts for which are received monthly and quarterly and stated quarterly.

There are also many special accounts, such as payments for the salaries of janitors, and the distribution of fines and penalties. Also the cases for the refunded duties exacted in excess, tonnage duty refunded, judgment satisfied, &c.

JUDICIARY.

This division is highly important, embracing the adjustment of all judiciary accounts.

First. Accounts of United States marshals for expenses of United States courts, and for their fees for service of process, &c., in all United States cases under the fee bill of February 26, 1853, and amendments thereto. The fee bill of 1853 is general in its application to all States and Territories, but the practice of the courts in the different jurisdictions is not uniform, and hence almost every marshal has his own construction of the fee bill in making charges in his account. To adjust these accounts the closest scrutiny and thorough acquaintance with the usages and decisions of the accounting officers, a familiar acquaintance with their interpretations of the fee bill, as also the practice in the several districts, is essentially necessary. The business in the United States courts has more than doubled since the passage of the internal revenue law, the civil rights bill, and the enforcement act, and as a consequence the accounts of all officers connected with the Federal courts have assumed largely increased proportions in comparison with what they were prior to the rebellion.

Second. Accounts of district attorneys for attendance upon United States courts, and upon commissioners' examinations, for their travel and fees in all United States cases.

Third. Accounts of clerks of United States courts for their attendance, and for fees in all United States cases.

Fourth. Accounts of United States Commissioners for fees, &c.

In the examination and adjustment of all these accounts, it is necessary not only to hold the fee bill in memory, but also to be acquainted with all of the many decisions of the Attorneys General, and of the Secretary of the Interior, and to be able readily to apply the same to any charge that may be presented.

REDEMPTION AND INTEREST DIVISION.

The settlement of the accounts of the Treasurer of the United States, Assistant Treasurers, United States depositaries, and fiscal agents of the Treasury Department, for the payment of interest on the public debt and the redemption of Government obligations, funded or otherwise, is assigned to this division, and may be designated, in brief, as follows:

Registered bonds—Interest.—At the close of the present fiscal year, the amount outstanding of this class of securities, the interest of which is payable in *coin*, was \$725,772,350, and in *currency*, being for bonds issued to the Pacific Railroad Companies, \$64,618,832. These accounts,

payments of which are made semi-annually upon schedules prepared by the Register of the Treasury, for fiscal agents, are closed and transmitted to this office for settlement within ninety days from the date of payment. In the examination of schedules, the stock being held principally by banking and other corporations, executors, administrators, and trustees of estates, and non-residents of the country, the interest of which is, in most cases, receipted by attorneys, requires careful scrutiny into the authority presented as vouchers for the receipt of dividends, and is often attended with considerable correspondence and consequent delay in the adjustment of these accounts. During the year there were seventy-six coin and twenty-six currency accounts settled, involving, in the aggregate, the sum of \$48,063,987 79, to which may be included as part of the clerical labors of the division, but which does not enter into the statistics of this report, schedules examined, embracing \$14,487,140 35. The number of powers of attorney and testamentary evidence of the administration of estates, received as vouchers for the receipt of interest, and which have been approved, filed, and registered, and listed for the use of fiscal agents, was six thousand eight hundred and fifty-six.

Coupon bonds—Interest. Of this class of securities outstanding at the close of the fiscal year, the interest being payable in coin, and the coupons redeemable semi-annually, amounts to \$1,162,361,400. The rendition of these accounts *weekly* by the principal depositaries, and *monthly* by others, and the fact that the several issues and loans have to be kept distinct for entry upon the Register's books, with the amount of interest chargeable to each loan, imposes much additional labor upon the office, the result of which, however, is of material advantage to the Department in keeping the business of its redemptions properly posted for inspection and information. The number of this class of accounts stated was one hundred and fifty-one, amounting to \$77,353,964 69, and containing four million nine hundred and eleven thousand five hundred and sixty-eight vouchers counted and canceled.

Navy pension fund.—The amount of this fund upon which the annual interest of three per cent. is paid, amounts to \$14,000,000.

There have been two accounts stated during the year, amounting to \$400,000.

Redemption of United States stock.—The amount of certificates of the loans of 1847, 1848, 1860, Texan indemnity, and the loans of 1862, 1864, and 1865, redeemed and canceled, of which accounts have been stated, amounts, including premium and interest, to \$242,253,981 01. Accounts stated, forty-five; vouchers examined, one hundred and one thousand two hundred and seventy-eight.

Floating debt.—Currency obligations, consisting of Treasury notes of various issues, certificates of indebtedness, certificates of temporary loan and interest thereon, amount to \$14,657,331 89, embraced in one hundred and thirty-seven accounts, and containing twenty-two thousand six hundred and twenty vouchers.

United States obligations destroyed.—consisting of old demand notes, legal-tender notes, fractional and postal currency, and gold certificates—amount to \$219,379,898 18, and the number of vouchers examined, eight hundred and fifty-seven, embraced in two hundred and six accounts.

MINT ACCOUNTS AND OTHERS.

This division adjusts the accounts of the Mint of the United States, its branches, (four in number,) and assay office, New York; accounts of

the governors and secretaries of the Territories; accounts for defense of suits in the Court of Claims; accounts in relation to captured and abandoned property; and salary accounts of the civil list.

The accounts of the mints and assay office are designated as bullion, ordinary, and medal accounts, and are adjusted quarterly.

The bullion accounts are voluminous, and the examination of the various accounts tedious. The abstracts of deposits, in connection with the warrants of the director or superintendent for payment, are first examined and checked, then the various accounts of the treasurer, melter and refiner, and coiner, under the following heads: "Deposit account," "gold bullion," "silver bullion," "cent bullion," "cent deposit account," "gold coinage," "silver coinage," "cent coinage," "melter and refiner's gold," "melter and refiner's silver," "melter and refiner's cent bullion," "coiner's gold," "coiner's silver," "coiner's five-cent account," "coiner's three-cent account," "coiner's bronze or one and two-cent account," "unpaid depositors," "gold coins for assay," "silver coins for assay," "unparted bar account," "silver profit and loss," "cent profit and loss," "bullion deposit profit and loss," "profit and loss," "bullion fund," "balances," and, finally, all of the above are blended in the summary statement. During the last fiscal year there were twenty-one of these accounts adjusted.

The ordinary accounts are for the incidental and contingent expenses, wages of workmen, and salaries of officers and clerks. The medal accounts are for medals manufactured for various institutions throughout the country. The accounts of the governors and secretaries of the Territories are for the contingent expenses of the executive offices, and for compensation and mileage of members, and incidental expenses of the legislative assemblies.

The accounts in relation to captured and abandoned property: These accounts are for moneys received from and disbursements for and on account of captured and abandoned property. This branch of business is drawing to a close, only three accounts received and stated during the year. The accounts for defense of suits in the Court of Claims are for expenses incurred in the defense of suits in relation to captured and abandoned property.

Salary accounts.—These are salary certificates for salaries of the Vice-President of the United States, judges of the Supreme Court, United States district judges, United States attorneys and marshals, governors and secretaries of the Territories, commissioners of claims and employes, and the officers and clerks of the United States steamboat inspection service. Some of the above are stated monthly, and others quarterly.

The whole number of accounts adjusted by this division during the year was 1,676.

WAREHOUSE AND BOND ACCOUNTS.

The act of March 28, 1854, gives to importers the privilege of storing imported goods in public or private bonded warehouses, under the supervision of customs officers, without payment of duties, for a period not exceeding three years. During this period these goods may be withdrawn at the option of the importer for consumption, on payment of duties, for transportation to other districts and ports, or for exportation out of the country.

Under the title of warehouse and bond accounts, collectors of customs are required to render accounts of all goods so stored in their respective districts, upon which the duties remain due and unpaid, with the same

particularity of detail as they account for duties on goods entered for consumption.

These accounts comprise statements and vouchers, not only of all goods entered at any port, and actually placed in bonded warehouses, but also of all goods entered at such port for immediate transportation to other ports in the country, or for immediate exportation to foreign countries; such goods being considered as constructively warehoused. In these accounts are abstracts of all goods withdrawn from warehouse for consumption, transportation to other ports, or exportation to foreign countries. They contain also statements of salt withdrawn from warehouse pursuant to the provisions of the fourth section act July 28, 1866, to be taken on board vessels licensed for the fisheries, under bond, to be used in curing fish. Separate accounts are rendered of all transportation, exportation, and salt bonds taken to cover such withdrawals. Forfeited bonds delivered for prosecution are credited in these accounts to the collector, and charged to the various district attorneys. Rather more than half of the collection districts have transactions and render accounts. The rest are required to send monthly certified statements that there have been no transactions under either of these heads.

ACCOUNTS OF THE TREASURER OF THE UNITED STATES.

The magnitude of the statement will convey some idea of the labor performed in the adjustment of the accounts. The accounts of the Treasurer of the United States for the general receipts and expenditures of the Government are made up and rendered quarterly. The account current (a volume of some three hundred pages) has to be carefully compared with a certified account received from the Register, of all warrants drawn on him or in his favor during the quarter, the amount remaining unpaid and outstanding of previous quarters, and the amount of such warrants for which he claims credit as being paid, the amount of balances in the various depositories, &c. All warrants drawn on the Treasurer are paid by drafts, and he cannot receive credit for the payment of a single warrant, unless it is accompanied by its appropriate draft, properly indorsed by the payee. The examination and comparison of these drafts are intricate and laborious.

The internal revenue warrants at this time fully equal one-half of the yearly issue of warrants prior to the rebellion, many of which require the critical examination of from one to over six hundred drafts.

During the fiscal year ending June 30, 1871, six accounts of the Treasurer of the United States have been adjusted, requiring the careful examination of over 80,000 warrants and drafts; the amounts embraced in the settlement of these accounts are, for actual receipts, \$1,094,073,856 29; and, for expenditures, \$1,080,828,090 44.

The mileage and compensation of members of the House of Representatives are paid by the Treasurer on certificates of the Speaker of the House, which are the Treasurer's vouchers, and upon which he receives credit in the adjustment of his account as agent. This account has to be carefully compared with the journal of the Sergeant-at-Arms, who keeps the individual accounts of the members, &c.

The accounts of the Secretary of the Senate as agent for paying the compensation and mileage of Senators, and the contingent expenses of the Senate, are very intricate, owing to the irregular sessions of that body. The amount involved in the accounts adjusted during the fiscal year is \$657,799 39.

SALARY ACCOUNTS.

Under this head is embraced the adjustment of the accounts (with two or three exceptions) of disbursing officers for payment of salaries to all persons in the Departments at Washington who receive a regular compensation, with some accounts also for additional clerk hire. These accounts include the pay-rolls of the Treasury, State, War, Navy, Interior, Justice, and Post Office Departments; also the accounts of the Superintendent of Weights and Measures, Clerk of the House of Representatives, Librarian of Congress, Congressional Printer, private secretaries of the President of the United States, salaries, &c., of Metropolitan police, and all the accounts of United States Coast Survey. Under this division of the work of the office is also embraced the settlement of the accounts for salaries in their offices of all United States Assistant Treasurers and United States depositaries.

CONTINGENT ACCOUNTS, ETC.,

includes the contingencies of all the Executive Departments—Treasury, War, Navy, and Interior; contingencies of the House of Representatives under different appropriations; all the accounts of the Department of Agriculture, salaries, distribution of seeds, &c., under different appropriations; all the accounts of the Commissioner of Public Buildings and Grounds, embracing repairs and preservation of all the public works in the city of Washington—about one hundred different appropriations; all the accounts of the disbursing agent for new dome, Capitol extension, enlargement of the Congressional Library, grading the public grounds around the Capitol, &c.; all the accounts of the agent, &c., for the Library of Congress, Botanic Garden, &c.—fourteen appropriations; expense of the national loan; contingent expenses of the Assistant Treasurers of the United States at New York, Boston, New Orleans, Charleston, Denver City, San Francisco, &c.; contingent expenses of the Executive Mansion; contingent expenses of Congressional Printer; accounts for repairs, &c., and for furniture for Treasury Department.

SEPARATE CLASSIFICATION OF ACCOUNTS.

The accounts settled by this division are various, and preclude any general classification. During the last fiscal year the whole number of accounts settled in this office in this branch of its business was 1,846, involving an expenditure of \$4,068,262 73. The number of accounts will not diminish during the present fiscal year.

The following classification embraces the several accounts examined and settled: Construction and repairs of public buildings, furniture for public buildings, public printing, Government asylum, deaf and dumb asylum, steamboat inspectors, life-saving station, contingent expenses of United States depositories, Columbia Hospital, timber agents. Many other accounts of not less importance, that cannot well be classified, are settled.

In the recording division of the office there are employed five clerks, whose duties consist in recording the reports and certificates of the Auditor to the Comptroller of the Treasury and Commissioner of Customs, on the accounts accruing in the office and the correspondence incident thereto.

There is a large amount of miscellaneous business, much of it of great

importance, requiring the highest clerical qualifications, which has no appropriate classification with any of the divisions previously described. It has its proper place in the routine of business, and is dispatched with scrupulous care.

When the Treasury Department was organized this office was created as a part of the original frame-work. Its duties were then specifically defined as the auditing branch of the Department. Its important original duties have been continued, greatly amplified, to which new and diversified duties of great importance have been added, in the long progress of legislation, as the exigencies of Government required. All of these functions are so inseparably connected with the operations of the Department proper, that they rest upon the foundation of permanency and the assurance of expansion. This connection must inevitably increase its business with the growth of the country, and the enlarged sphere of the Government precluding any expectation that the clerical force of the office can be reduced.

The clerks of the office deserve the highest commendation for their fidelity and efficiency in the performance of their respective duties, and for the scrupulous care with which they protect the interests of the Government.

I know of no higher merit of those engaged in the service of Government, and more deserving of commendation and recompense, than the faithful and efficient performance of the entire range of duty in all its delicate and responsible relations. Justice and expediency may bring this appropriately within the province of legislation as worthy of the appreciation that honors fidelity, rewards merit, and imparts moral strength to Government.

The present salaries of the clerks bear a disproportionate relation (to their prejudice) to the grade and amount of labor they perform, and the incidental responsibilities they have to assume. Beyond this, and of much greater importance in its consequences, is the total insufficiency of their salaries for the comfortable support of their families, under the most stringent economy; and the cheerless effect that it has upon their official duties, from the perplexing expedients to which they are driven by embarrassments.

I most respectfully and earnestly recommend that their condition, which is marked by humiliation and want, may be meliorated by a liberal recompense commensurate with the claims of justice and sound policy.

Most respectfully, your obedient servant,

T. L. SMITH,
First Auditor.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE SECOND AUDITOR.

REPORT

OF

THE SECOND AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT,
Second Auditor's Office, November 18, 1871.

SIR: I have the honor to submit herewith the annual report of this office, for the fiscal year ending June 30, 1871, showing in detail the condition of business, in each division, at the commencement of the year, its progress during the year, and its condition at the end thereof.

BOOK-KEEPERS' DIVISION.

The following statement shows the amount and nature of the work performed by this division during the year:

Requisitions registered, journalized, and posted.

On what account drawn.	Number.	Amount.
DEBIT REQUISITIONS.		
<i>Pay.</i>		
Advances in favor of Pay Department	71	\$16,213,000 00
Advances in favor of Adjutant General's Department	48	218,360 15
Advances in favor of Ordnance Department	129	1,630,246 87
Advances in favor of Medical Department	9	128,000 00
Advances under direction of the Secretary of War	10	47,132 50
Advances in favor of Indian Department	329	4,513,429 89
Advances under direction of the General of the Army	3	4,000 00
Claims paid under appropriations of Pay Department	64	19,800 96
Claims paid under appropriations of Adjutant General's Department	22	1,796 94
Claims paid under appropriations of Ordnance Department	7	20,809 41
Claims paid under appropriations of Medical Department	176	54,626 44
Claims paid under appropriations in charge of Secretary of War	66	71,724 97
Claims paid under appropriations of Quartermasters' Department	1	15 66
Claims paid under appropriations of Indian Department	985	3,321,280 69
Claims paid under special acts of relief by Congress	12	19,552 55
Payments to Treasurer United States—internal revenue fund	35	47,907 92
Payments to National Asylum for Disabled Volunteer Soldiers	12	296,287 32
Payments to Soldiers' Home	23	93,920 47
Total payments	2,002	26,701,892 74
TRANSFER.		
Requisitions issued for the purpose of adjusting appropriations:		
Transferring amounts from appropriations found to be chargeable to such as are entitled to credit on the books of the Second Auditor's Office	18	10,497,991 34
Transferring amounts as above to the books of the Third Auditor's Office	353	639,826 44
Transferring amounts as above to the books of the Register's Office	14	8,147 95
Total transfers	385	11,145,965 73
Aggregate debits	2,387	37,847,858 47
CREDIT REQUISITIONS.		
<i>Deposit.</i>		
In favor of Pay Department	24	188,566 90
In favor of Ordnance Department	32	9,130,555 70
In favor of Adjutant General's Department	10	38 27
In favor of Medical Department		14,117 66
In favor of Quartermaster's Department		14 45
In favor of Indian Department		426,006 66
Total deposit	87	9,759,299 64

REPORT ON THE FINANCES.

Requisitions registered, journalized, and posted—Continued.

On what account drawn.	Number.	Amount.
<i>Counter.</i>		
Requisitions issued for the purpose of adjusting appropriations:		
Transferring amounts to appropriations entitled to credit from appropriations found to be chargeable on the books of the Second Auditor's Office	17	\$10,519,370 35
Transferring amounts as above from appropriations on the books of the Third Auditor's Office to the books of the Second Auditor's Office	22	94,078 72
Transferring amounts as above from the books of the Fourth Auditor's Office to those of the Second Auditor's Office	1	21,606 09
Transferring amounts as above from the books of the First Auditor's Office to those of the Second Auditor's Office	5	8,852 97
Total counter	45	10,643,908 04
Aggregate credits	132	20,403,207 68
Aggregate debits and credits	2,519	58,251,066 15
Deducting the credits from the debits shows the net amount drawn out to be		17,444,650 79
APPROPRIATION WARRANTS.		
<i>Credits.</i>		
In favor of appropriations of Pay Department		26,073,526 26

May	1, 136	1, 022	1, 537	2, 569	148, 298 25	10, 399	1, 221
June	971	824	1, 399	2, 223	116, 769 69	10, 533	1, 084
Total	25, 811	17, 123	22, 955	40, 078	2, 348, 164 42	148, 437	18, 571

In addition to the above there have been made in this division seventeen settlements on account of fines, forfeitures, &c., against soldiers of the regular Army, amounting to \$28,957 43, paid to the treasurer of the Soldiers' Home in accordance with the act of Congress of March 3, 1859, making the total number of settlements 17,140, and the total disbursements \$2,377,121 85.

Number of claims under act July 28, 1866, (white,) on hand June 30, 1870 10,040
 Number of claims for arrears of pay and original bounty on hand June 30, 1870. 29,835
 Number of colored claims on hand June 30, 1870 13,887

Total number of claims on hand June 30, 1870 53,762

Number of claims under act July 28, 1866, (white,) on hand June 30, 1871 7,364
 Number of claims for arrears of pay and bounty (white) on hand June 30, 1871. 23,960
 Number of colored claims on hand June 30, 1871 8,171

Total number of claims on hand June 30, 1871 39,495

The following statement shows the condition of the claims on hand :

Number of claims suspended, awaiting evidence to be filed by claimants or their attorneys	29,542
Number of claims under the decision of the Supreme Court in the case of United States, appellants, vs. Hosmer, awaiting further action of Congress	7,874
Number of claims ready for settlement	1,851
Number of claims unexamined June 30, 1871	228
Total	<u>39,495</u>

PROPERTY DIVISION.

The following statement shows the condition of business in this division :

Property returns of officers on hand June 30, 1870	63,775
Property returns of officers received during the year	9,954
Total	<u>73,729</u>
Property returns of officers examined during the year	39,171
Property returns of officers on hand June 30, 1871	<u>34,558</u>
Certificates of non-indebtedness issued to officers	<u>1,005</u>
Amount stopped from pay of officers for property not accounted for	<u>\$766.14</u>
Number of letters written during the year	12,685
Number of letters recorded	8,164
Number of property returns registered	9,954

DIVISION OF INQUIRIES AND REPLIES.

The work performed in the division of inquiries and replies during the year ending June 30, 1871, is as follows:

Number of inquiries on hand unanswered June 30, 1870	769
--	-----

Officers making inquiry.	No. received.	No. answered.
Adjutant General	2,850	2,852
Paymaster General	4,945	4,965
Quartermaster General	260	260
Commissary General of Subsistence	50	51
Third Auditor	912	916
Fourth Auditor	23	27
Commissioner of Pensions	4,106	4,187
Other sources	7,889	4,880
Total	<u>21,035</u>	<u>18,138</u>

Inquiries on hand unanswered June 30, 1871	3,666
Corrections of records made by request of the Adjutant General	649
Rolls and vouchers copied for Adjutant General, Paymaster General, and Attorney General	923
Rolls and vouchers copied for preservation in this office	733
Rolls and vouchers partially copied and traced, for preservation in this office	1,556
Number of letters written	3,503
Number of pages of foolscap paper used in copying	<u>2,166</u>

The nature and importance of the work performed by this division is indicated by the following summary of the kind of information furnished to the officers making inquiry:

To the Adjutant General.—Statements of the pay and clothing of sol-

diers who claim that they never received any discharge. Miscellaneous information from the muster and pay-rolls to enable the Adjutant General to perfect the records of his office.

To the Paymaster General.—Dates of enlistment, muster, and first payment of Pennsylvania volunteers, to whom that State claims to have paid advance pay. Sundry information in cases pending in the Paymaster General's Office. (The information furnished in the Pennsylvania cases has been used by the Third Auditor in adjusting claims, amounting to \$648,000.)

To the Quartermaster General and Commissary General of Subsistence.—Verification of officers' signatures to receipts for Army stores to enable those Bureaus to settle claims for payment for such stores.

To the Third Auditor.—Data necessary to enable him to settle claims for horses lost in the Army. Statements as to whether the money value of stores purchased from the United States by officers has been deducted from the pay of such officers. To obtain this information the entire pay accounts of the officers concerned have to be examined.

To the Fourth Auditor.—Amount of bounty due soldiers transferred from the Army to the Navy.

To the Commissioner of Pensions.—Data necessary to enable the Pension Bureau to settle claims for pension, including copies of any evidence of marriage, relationship, &c., that may have been filed in this office.

Other sources.—Replies to miscellaneous inquiries from adjutant generals of States and other persons.

DIVISION FOR THE INVESTIGATION OF FRAUDS.

During the year 4,490 cases have been under examination, investigation, and prosecution, by this division. Briefs have been prepared in 562 cases; 454 have been finally disposed of, and 140 cases have been prepared for suit and prosecution through the various United States district courts.

The amounts recovered by suit and otherwise are as follows:

Money recovered by draft, certificate of deposit and current funds, and turned into the Treasury to be credited to the proper appropriations.....	\$7,557 02
Amount directed to be turned over by the Freedmens' Bureau to United States paymasters to be credited to the proper appropriations, said amount having been paid to that Bureau upon claims subsequently discovered by this division to be fraudulent or erroneous.....	9,128 51
Amount wrongfully withheld by claim agents and secured to the proper claimants by interposition of this office and United States district courts.	4,884 73
Amount of Treasury certificates and checks, issued in fraudulent cases, recovered before payment.....	575 65
Amount recovered on forged checks and turned over to Paymasters William B. Rochester and H. B. Reese to be credited to the proper appropriations.	250 00
Amount paid by the national banks of Indiana upon forged indorsements to checks drawn upon the assistant treasurer at New York, recovered from them by the joint action of the Secretary's office and this office.	15,562 79
Amount of overpayments recovered and turned over to United States paymasters for appropriate credit.....	2,087 29
Amount of interest recovered	326 16
Total.....	<u>40,372 15</u>

There is also on hand a bond for \$1,700, payable to the United States in case certain money drawn upon forged receipts and powers of attorney is not paid over to the rightful claimants.

There are now under examination and investigation 4,036 cases involving fraud, forgery, unlawful withholding, overpayments, &c., as follows:

Fraudulent and contested claims in cases of white soldiers, in which settlements had been made prior to notice of fraud or receipt of adverse claim.....	1, 194
Fraudulent and contested unsettled claims in cases of white soldiers.....	389
Fraudulent and contested claims in cases of colored soldiers, in which settlements had been made prior to notice of fraud or receipt of adverse claims....	557
Unsettled claims of widows of colored soldiers, involving fraud in the marriage evidence.....	234
Unsettled contested claims in cases of colored soldiers.....	265
Unsettled claims executed in Shelby County, Tennessee, in behalf of heirs of colored soldiers, all believed to be tainted with fraud.....	1, 125
Cases alleged to have been paid upon fraudulent papers, and now awaiting the action of the Court of Claims.....	72
Cases involving overpayments to United States Army officers, and in which civil actions are to be instituted.....	161
Miscellaneous claims suspected of being fraudulent.....	39
Total.....	4, 036
Number of claims on hand June 30, 1870.....	3, 370
Number of claims received during the year.....	1, 120
Total.....	4, 490
Number of claims finally disposed of during the year.....	454
Number of claims on hand June 30, 1871.....	4, 036
Number of letters written.....	5, 059

The following is a summary of the work performed by the division since its organization:

Date.	Cases under examination.	Cases disposed of.	Amount recovered.
1869.....	3, 143	540	\$23, 105 17
1870.....	3, 044	490	24, 010 28
1871.....	4, 490	454	40, 372 15

It will be observed that the exhibit of this division indicates a largely increased amount of labor and responsibility over that of any previous year. This fact may be accounted for by the careful and rigid scrutiny, exercised by the entire office, in the examination and comparison of claims, vouchers, receipts, and paymasters' returns, and the discovery of new and bold operations of certain claim agents.

Parties implicated in pay and bounty frauds have been tried and convicted in most of the United States district courts, and great credit is due the Solicitor of the Treasury and the different United States district attorneys and marshals, for their zealous and effective co-operation in prosecuting criminal and civil suits, securing the return of money and bringing to light the schemes and practices of swindlers. Perhaps the greater benefits resulting from this action will be the repression of fraud and the prevention of future attempts to defraud the Treasury.

Obstacles are encountered in prosecuting the various frauds committed and attempted in the collection of claims adjusted by this office, owing to the absence of law regulating the fees and duties of claim agents, the doubtful construction of the thirteenth section of the act of July 4, 1864, regarding the wrongful withholding of money, the actual construction given by the courts of the act of March 2, 1863, and the bar to criminal prosecution created by the limitation act of April 30, 1790;

and I respectfully renew my request that the attention of Congress be invited to the necessity of supplying a remedy, especially by extending the time within which persons guilty of frauds may be criminally prosecuted, and by affording greater facilities and powers for the investigation and discovery of frauds, and authorizing the reimbursement of money expended by United States officers in the discharge of extra official services.

ARCHIVES DIVISION.

The work performed by this division is shown by the following statement:

Number of accounts filed in rooms of temporary deposit awaiting settlement..	3,071
Number of confirmed settlements received from the Second Comptroller, verified, briefed, and transferred to permanent files:	
Paymasters	467
Indian	928
Miscellaneous	1,544
	<hr/> 2,939
Number of paymasters' accounts received from Paymaster General	605
Number of medical property accounts received from Surgeon General	1,626
Number of paymasters', Indian, and miscellaneous accounts verified, arranged and filed	3,544
Number of paymasters' accounts re-examined, boarded, and marked	4,032
Number of settlements withdrawn and returned to files	6,568
Number of vouchers withdrawn and returned to accounts	78,755
Number of abstracts of accounts put in book form	409
Number of duplicate vouchers examined and attached to originals	150,772
Number of mutilated rolls repaired with tracing muslin	47,418

This division is charged with the care of all the office furniture, blanks, &c., and keeps the record of payments to regiments, of which an entirely new register has been transcribed during the year.

Number of letters written	602
---------------------------------	-----

REGISTRY AND CORRESPONDENCE DIVISION.

Statement of work performed by the registry and correspondence division for the year ending June 30, 1871.

Number of letters received	41,517
Number of letters written	45,846
Number of letters recorded	6,078
Number of letters referred to other Bureaus	2,184
Number of dead letters received and registered	4,552
Number of licenses received and registered	566
Number of claims received, briefed, and registered	37,192
Number of miscellaneous accounts received from other offices and distributed	3,060
Number of miscellaneous vouchers received, briefed, and registered	133,998
Number of pay and bounty certificates examined, registered, and mailed	18,561
Number of pay and bounty certificates examined, registered, briefed, and forwarded to the Paymaster General, in accordance with joint resolution of April 10, 1869	9,763
Number of letters with additional evidence in the case of suspended claims, received, briefed, and registered	16,869
Number of reports calling for requisitions sent to War Department	591
Number of discharges sent to claimants and returned uncalled for	777

In addition to the above, 1,233 claims for additional bounty under act of July 28, 1866, were received after January 13, 1871, the limit fixed by the act of July 13, 1870, for filing such claims. These cannot be adjusted without further legislation by Congress.

For convenience of reference, I annex the following consolidated statement showing the various classes of accounts settled in the office, the number of each class on hand at the beginning of the year, the number

received and disposed of during the year, and the number on hand at the end of the year; also the amount involved in settlements:

	On hand June 30, 1870.	Received dur- ing year.	Disposed of during year.	On hand June 30, 1871.	Amount in- volved in set- tlements.	No. of letters written.
Paymasters.....	3,279	665	843	3,101	\$124,565,414 51	12,621
Indian agents.....	368	673	520	521	5,220,928 91	1,417
Indian agents, (property).....	523	552	203	577		
Indian claims.....		969	962	7	2,973,703 72	148,437
Bounty, arrears of pay, &c.....	53,762	25,811	40,078	39,495	2,348,164 42	
Ordnance, medical, and miscellaneous.....	633				2,023,703 96	2,286
Regular recruiting.....	655	2,368	2,394	1,573	202,215 01	
Volunteer recruiting.....	102				754,795 34	12,685
Claims for return of local bounty.....	219				3,930 92	
Ordnance and Quartermaster's Depart- ment, (property).....	63,775	9,954	39,171	34,558		
Soldiers' Home.....		24	24		81,282 08	
National Asylum.....		12	12		303,216 99	
Total.....	123,311	40,728	84,207	79,882	138,477,357 16	177,446

Besides the number of letters stated in the above table, there have been written 55,683 relating to the miscellaneous business of the office, making a total of 233,129.

Average number of clerks employed during the year, 265.

In addition to the foregoing, various statements and reports have been prepared and transmitted from this office, as follows:

Annual report to the Secretary of the Treasury of the transactions of the office during the fiscal year.

Annual statement of the recruiting fund, prepared for the Adjutant General of the Army.

Annual statement of the contingencies of the Army, prepared for the Secretary of War.

Annual report of balances on the books of this office remaining unaccounted for more than one year, transmitted to the First Comptroller.

Annual report of the balances on the books of this office remaining unaccounted for more than three years, transmitted to the First Comptroller.

Annual statement of the clerks and other persons employed in this office during the year 1870, or any part thereof, showing the amount paid to each on account of salary, with place of residence, &c., in pursuance of the eleventh section of the act of August 26, 1842, and resolution of the House of Representatives of January 13, 1846, transmitted to the Secretary of the Treasury.

Monthly tabular statement showing the amount of business transacted in the office during the month, and the number of accounts remaining unsettled at the close of the month, transmitted to the Secretary of the Treasury.

Monthly report of absence from duties of employes of this office with reasons therefor, transmitted to the Secretary of the Treasury.

Pay-rolls, upon which payment was made to the employes of this office, prepared semi-monthly, in duplicate.

During the past year the work of the office has been seriously delayed by reason of the reduction of its clerical force, and I earnestly recommend that it be temporarily increased to three hundred clerks, as it stood prior to July 1, 1870. In making estimates for the next fiscal year, I have felt constrained to follow the law making appropriations for the office, while convinced that the sum allowed is not sufficient.

I have believed it to be the soundest policy to employ an experienced force sufficient to close up the settlement of disbursement and other accounts growing out of the war, as rapidly as possible, until the current business of the office can be reached, and then to reduce it to such a number of clerks as may be necessary to perform the current work. An earlier reduction delays settlements and postpones the time when nothing but the current work will remain to be done.

In the annual reports of this office for the years 1864, 1865, and 1866, the subject of the early settlement of paymasters' accounts was alluded to and particularly urged, but there has been no opportunity, up to the present time, to specially facilitate their settlement.

In 1865, when such accounts, covering a disbursement of \$400,000,000 were in the office unsettled, I stated that, with all the force that could then be employed, it would take *five years to settle the accounts then on hand*, and urged that a sufficient number of skilled clerks be employed to settle them in *one year*, using the following language:

"The difference in the expense between settling these accounts in five years with the present force, and settling the same in the manner proposed, is sixty-four thousand dollars. It is a large sum, but is only about one-sixth of one per cent. on the disbursements to be examined and settled, and is small compared with the probable loss to the Government through long delayed settlement, or the employment of inexperienced clerks."

The accounts referred to above, were largely increased by the heavy disbursements of 1865 and 1866, when the armies were mustered out. All the clerks possessing the requisite qualifications that could be spared from other branches of work, have been employed in the settlement of these accounts, but many of these have been from time to time necessarily withdrawn to attend to special work required by new legislation, and where the services of skilled and careful clerks were needed. During the last two years a portion of this force has been detailed to make the necessary examination of paymasters' accounts, to ascertain the amount of fines, forfeitures, stoppages, &c., and make settlements in favor of the "National Asylum for Disabled Volunteer Soldiers," and nearly one-third of the entire force has been employed in revising previous settlements and removing suspensions therein, to comply with new provisions of law in relation to the settlement of disbursing officers' accounts, and the rulings of the Comptroller.

Notwithstanding these embarrassments, the accounts of volunteer paymasters have been examined and settled, with the exception of a few who were retained in the service to pay Treasury certificates, or who have failed to close their accounts when notified of the balance due. The accounts of this latter class generally involve but small amounts, and are being prepared for suit as rapidly as possible.

But few of the accounts now remaining unsettled are either so large, or so difficult as those that have been settled, and it is believed that by an early temporary increase of the clerical force, as asked for, all paymasters' accounts on hand can be settled within a year.

It affords me great pleasure to commend the general ability, industry, and faithfulness of the gentlemen connected with this office.

In the hope that the recommendation for a temporary increase of the clerical force of the office may meet your approval, I have the honor to be, very respectfully,

E. B. FRENCH,
Auditor.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE THIRD AUDITOR.

REPORT

OF

THE THIRD AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT,
Third Auditor's Office, August 23, 1871.

SIR: In compliance with instructions from your office, and the requirements of law, I have the honor to transmit herewith the following report of the business operations of this office for the fiscal year ending June 30, 1871:

BOOKKEEPER'S DIVISION.

The duties devolving upon this division are, in general, to keep the appropriation and money accounts of the office.

The annexed statement of the financial operations of the office during the fiscal year ending June 30, 1871, exhibits the amounts drawn on specific appropriations except those under direction of the Chief of Engineers of the Army, which are aggregated and entered under the general heading "Engineer Department." It also shows the repayments into the Treasury for the same period.

The average number of clerks engaged in this division during the period embraced in this report has been eight, and that number now constitutes the active force of the division.

The amount of requisitions drawn on the Secretary of the Treasury by the Secretaries of War and of the Interior for the fiscal year ending June 30, 1871, was \$63,501,843 58, as follows:

On account of Quartermaster's Department.....	\$4,856,992 01
Incidental expenses, Quartermaster's Department.....	1,088,007 81
Barracks and quarters.....	1,184,768 12
Army transportation.....	6,347,509 59
Officers' transportation.....	32,182 87
Cavalry and artillery horses.....	263,448 00
Purchase of stoves.....	1,358 14
Clothing of the Army.....	923,158 25
National cemeteries.....	327,369 55

QUARTERMASTER'S DIVISION.

The accounts of quartermasters cover a wide and varied range of disbursement and property accountability, embracing disbursements for barracks, quarters, hospitals, store-houses, offices, stables, forage and transportation of all army supplies, army clothing, camp and garrison

equipment, the purchase of cavalry and artillery horses, fuel, forage, straw material for bedding, stationery, hired men, per diem to extra-duty men, of the pursuit and apprehension of deserters, of the burial of officers and soldiers, of hired escorts, of expresses, interpreters, spies, and guides, of veterinary surgeons and medicines for horses, of supplying posts with water, and generally the proper and authorized expenses for the movements and operations of an army not expressly assigned to any other department. The "returns" are an account of the disposition made of all property paid for by the Quartermaster's Department, (except clothing, camp and garrison equipment, which are accounted for by the Second Auditor.)

The tabular statement herewith exhibits in a condensed form the results of the labors of the force employed in this division:

Number of letters sent out from the division during the year, 50,320; average number of clerks employed, 129 $\frac{1}{2}$.

SUBSISTENCE DIVISION.

This division audits the accounts of all commissaries and acting commissaries of subsistence in the Army, whose duties are to purchase the provisions and stores necessary for the feeding of the Army and see to their proper distribution. These commissaries render monthly money accounts, with proper vouchers, for disbursements of the funds intrusted to them, together with a provision return, and vouchers showing the disposition of provisions and stores purchased and received during each month. These accounts are received monthly through the office of the Commissary General of Subsistence, and are, every six months, (or oftener if the officer ceases to disburse,) examined and audited in this division, and the money accounts and vouchers, together with a certified

statement of their condition, referred to the Second Comptroller of the Treasury for his decision thereon. Upon their receipt back from the Comptroller, with the statement approved, the officers are then officially notified of the result of said examinations, and are called upon by this office to adjust or explain any omissions or errors that may have been discovered. The money and provision accounts, together with vouchers and papers belonging thereto, are, after examination, placed in the settled files of this division for future reference, and remain permanently in the custody of this office.

There have been received and registered during the year 2,765 money accounts of officers disbursing in the Subsistence Department, involving the expenditure of \$5,957,310 68. During the same period 3,213 accounts (containing 52,132 vouchers) were audited and reported to the Second Comptroller of the Treasury, involving the expenditure of \$5,904,744 26.

In connection with the above, there were received and registered during the year 1,935 provision returns, and within the same period 2,931 provision returns (containing 50,744 vouchers) were examined and adjusted.

The number of vouchers contained in the accounts examined was 102,876.

During the year 970 official letters have been written, 576 pages of differences written and copied, and 2,913 queries received and answered.

Average number of clerks engaged upon the division during the year, eight.

ENGINEER DIVISION.

This division is employed in the examination of the accounts of the officers and agents of the Engineer Department, who, under direction of the Chief of Engineers of the Army, (except the Superintendent of the Military Academy at West Point, whose disbursements are directed by the Inspector General,) disburse moneys out of various appropriations—now two hundred and forty-eight in number—made from time to time by Congress for works of a public nature, which may be classed under the following general heads, viz:

The purchase of sites and materials for, and construction and repairs of, the various fortifications throughout the United States;

Construction and repairs of roads, bridges, bridge trains, &c., for armies in the field;

Surveys on the Atlantic and Pacific coasts;

Examination and surveys of the northern and western lakes and rivers;

Construction and repairs of breakwaters;

Repairs and improvement of harbors, both on sea and lake coasts;

Improvement of rivers and purchase of snag and dredge boats for the same; and,

The expenses of the Military Academy at West Point.

The average number of clerks employed on the division for the year ending June 30, 1871, was four; and the transactions of the division for the same period are shown by the following statement, viz:

STATE WAR CLAIMS DIVISION.

The duties of this division embrace the settlement, under the various acts and resolutions of Congress, of all claims of the several States for costs, charges, and expenses properly incurred by them for enrolling, subsisting, clothing, supplying, arming, equipping, paying, and transporting their troops employed by the United States in aiding to suppress the recent insurrection against the United States. Also claims on account of Indian and other border invasions.

* Reported to Second Comptroller June 27, 1871.

CLAIMS DIVISION.

The duties of this division embrace the settlement of claims of a miscellaneous character, arising in the various branches of service in the War Department, growing out of the purchase or appropriation of supplies and stores for the Army; the purchase, hire, or appropriation of water-craft, railroad stock, horses, wagons, and other means of transportation; the transportation contracts of the Army; the occupation of real estate for camps, barracks, hospitals, fortifications, &c.; the hire of employes, mileage, court-martial fees, traveling expenses, communications, &c.; claims for compensation for vessels, railroad cars, and engines, &c., lost in the military service; claims growing out of the Oregon and Washington war of 1855 and 1856, and other Indian war claims; claims of various descriptions under special acts of Congress, and claims not otherwise assigned.

The following statements show the business transacted by this division during the fiscal year ending June 30, 1871, and the condition of the business at the commencement and at the end thereof:

1.—*Miscellaneous claims.*

On hand June 30, 1871.....	70	604,682 11	

1,530 letters have been written and 3,510 received.

HORSE CLAIMS DIVISION.

This division is engaged in settling claims for compensation for losses, sustained by officers and enlisted men, of horses and equipage while in the military service of the United States, and for the loss of horses, mules, oxen, wagons, sleighs, and harness, while in said service, by impressment or contract.

The number of claims received and docketed during the year is 330, in which the aggregate amount claimed is \$75,153 48. The number settled and finally disposed of during the same period (including those received prior to as well as during the year) was 540, in which the aggregate amount claimed was \$104,347 11, and on which the aggregate amount allowed was \$62,193 19. There have been during the year 6,771 letters written, and 2,206 received and docketed; 3,835 claims have been examined and suspended, and 647 briefs made.

The following table presents the condition of the business of this division at the commencement and close of the year, as well as its progress through the year.

	No.	Amount.	No.	Amount.
Claims on hand July 1, 1870.....			5,531	\$965,205 32
Claims received during the year.....			330	75,153 48

Claims disallowed during the year.....	145	33,262 90		
Deduct as finally disposed of during the year.....			540	104,347 11
Claims on hand unsettled July 1, 1871.....			5,331	938,364 69

PENSION DIVISION.

The duties devolving upon this division are keeping an account with each Army pensioner of the United States, recording the name, rate, date of commencement, noting every increase, reduction, transfer, remarriage, death, and expiration, whether by limitation under existing laws, or on account of the disability having ceased. Also, keeping an account with each pension agent, (of whom there are 59,) charging him with all moneys advanced by the Government, under the several appropriations to pay pensions, receive and register the accounts as sent each month direct to this office by the agents who have disbursed the money and properly file them for settlement; examine each voucher,

and enter the payment made by the agent on the roll-book opposite the pensioner's name. In addition, the act June 17, 1870, provides that every soldier who lost a limb in the service of the United States may be furnished with the artificial limb every five years, or, if he elect, may receive money commutation in lieu thereof. The bills for limbs furnished, or commutation orders in lieu thereof, as also all bills for transportation of the soldier to and from the place of fitting the limb, are paid by the several agents, and rendered in the same manner as the vouchers for payments to pensioners.

Congress, under act July 8, 1870, changed the mode of paying pensions, and authorized payments to be made quarterly instead of semi-annually, as heretofore. This necessitates nearly double the amount of labor during the year, because twice as many vouchers (about 800,000) are received, examined, noted, filed, audited, and reported by settlement to the Second Comptroller for revision. The act February 14, 1871, grants pensions to the survivors of the war of 1812. Not many payments were made to this class, and reported in the accounts received during the fiscal year just closed.

The number of pensioners on the rolls at present is about 205,000; number of soldiers who receive commutation in lieu of artificial limbs, 7,707; number who receive limbs, 917; number of transportation orders approved and paid by agents, 1,116.

Amount drawn from the Treasury to pay pensions during the year ending June 30, 1871.

Invalids	\$12, 340, 544 11
Widows and others	21, 793, 380 83
War of 1812, act of February 14, 1871	234, 000 00
Total	<u>34, 367, 924 94</u>

Amount refunded and credited by deposit requisition.

Invalid	\$416, 630 54
Widows and others	472, 879 17
Total	<u>889, 509 71</u>

The difference of \$4,965,152 79 between the amounts charged and the amount reported as disbursed, is in the agents' hands, to be returned and placed to the credit of the appropriation.

The following tabular statement shows the amount of business disposed of by the pension division during the year ending June 30, 1871:

	Number.	Amount involved.
Accounts on hand July 1, 1870	720	\$36, 958, 536 73
Accounts received during the year	930	28, 313, 262 44
Total	1, 650	<u>65, 471, 799 17</u>
Accounts reported during the year	789	\$32, 213, 334 28
Accounts remaining unsettled June 30, 1871	861	32, 658, 464 69
Total	1, 650	<u>65, 471, 799 17</u>

The accounts on file unsettled are divided as follows:

Accounts of 1869.....	20
Accounts of 1870.....	542
Accounts of 1871.....	299
Total.....	861

Pensions recorded, increased, changes made, including additional for children of \$2 per month.....	53,794
Pensions transferred.....	8,281
Pension vouchers examined.....	523,835
Payments entered on roll-books.....	464,569
Pages of difference and miscellaneous copied.....	3,382
Copies of surgeons' certificates furnished Commissioner.....	1,179
Letters received and registered.....	3,441
Letters written.....	3,816

The following tabular statement exhibits the amount paid at the several agencies to pensioners, the accounts of which were received during the year ending June 30, 1871:

State.	Agency.	Agent.	INVALIDS.		Widows and others.

The force employed in this division during the year consisted of twenty-two clerks and two copyists.

The business of this division has increased more than double, and as many of the accounts are behind in settlement, it will necessitate the addition of quite a force in order to dispatch business as promptly as it should be; this addition, however, will be made by transfer from other divisions in this office.

BOUNTY LAND DIVISION.

During the year ending 30th June, 1871, two thousand six hundred and thirty-four (2,634) bounty land claims have been examined and returned to the Commissioner of Pensions, properly certified.

Three hundred and thirty-nine (339) letters have been written on subjects connected with the division.

Nine (9) invalided pension claims, war of 1812, have been properly certified to the Commissioner of Pensions for his action.

Two thousand and ninety-nine (2,099) pension claims, war of 1812, act of Congress of February 14, 1871, have been examined and properly certified to the Commissioner of Pensions, for his action.

REFUGEES, FREEDMEN AND ABANDONED LANDS DIVISION.

The duties of this division embrace the settlement of the accounts of the agents and officers of the Bureau of Refugees, Freedmen and Abandoned Lands, for moneys expended by said agents and officers for stationery and printing, quarters and fuel, commissary stores and medical supplies, transportation, rents, repairs and building of schools and asylums, pay of superintendents of schools, clerks, agents, and officers of the bureau, telegraphing, and postage. Also incidental expenses, such as the necessary employment of colored laborers with a view to ameliorate their condition.

	MONEY ACCOUNTS.		No. of property accounts.
	No.	Amount.	
On hand June 30, 1870	64	\$1, 879, 071 47	32
Received during the year	42	700, 366 26	178
Total	96	2, 579, 437 73	210
Reported during the year	61	1, 245, 280 90	173
On hand June 30, 1871	45	1, 334, 156 83	37

Number of letters written, 35 ; number of clerks employed, 2.

REGISTRY DIVISION.

To provide for the correct and prompt settlement of accounts and for the certification of the indebtedness to the United States of disbursing officers, whose accounts are audited in this office, and of persons having claims upon the Government, all such officers are required, by order of the Second Comptroller, dated March 30, 1867, to transmit direct to this office copies of their monthly accounts current, abstract of funds transferred, and return of revenue tax deducted in making payments to Government employes, within ten days after the expiration of each successive month; and further, to guard the Treasury, it is made the duty of this division to report quarterly all officers of the United States Army who have received, by transfer, funds pertaining to the Quartermaster's and Subsistence Departments and failed to account for the same within three months from the date of their receipt to the Second Comptroller, in conformity with instructions from him, dated July 21, 1869, based on the law of January 25, 1828, (4 Stat., p. 246,) which provides "that no money hereafter appropriated shall be paid to any person for his compensation who is in arrears to the United States until such person shall have accounted for and paid into the Treasury all sums for which he may be liable."

In conformity with the foregoing there have been received, acknowledged, indorsed, registered, and filed 8,306 accounts current, to wit: Commissary, 3,556; Quartermasters', 2,829; Engineer, 1,439; Pension, 648; Bureau of Refugees, Freedmen and Abandoned Lands, 53; returns of revenue tax, abstracts of money transferred to disbursing officers, and other miscellaneous papers received, acknowledged, indorsed, recorded, and filed, 1,368; letters received, 168; letters written to officers, 255; receipts for money transferred, recorded, 3,911; queries relative to the indebtedness of officers, answered, 2,853; disbursing officers reported to the Second Comptroller as delinquent in the rendition of their accounts, 298.

COPYISTS' SECTION.

During the fiscal year ending June 30, 1871, the female copyists of this office, eight in number, have copied and compared 42,254 pages of manuscript, copied 4,758 and compared 7,690 letters, registered 827 money differences, 4,000 property differences, and 1,278 miscellaneous papers.

THE FILES.

Your attention is again respectfully invited to the urgent and constantly increasing demand for more file room in this office. The addi-

tional room referred to in my previous report as being fitted up for file purposes has been completed, and all the available space in it already filled with accounts examined during the past fiscal year. There now remains only about six hundred lineal feet of shelving available in the large file rooms of the office, which space will probably be filled before the 1st of January, 1872. These rooms, which contain the great bulk of the files of the office, are very unsuitable for the purpose, being located directly under the roof, without side windows or other proper means of ventilation. In summer they are intensely hot, while in winter they are extremely cold and uncomfortable, as they cannot be properly heated, being disconnected from the arrangements for heating other portions of the building. The rooms now occupied by part of the clerical force of this office, in the oldest portion of the eastern front of the building, are more suitable for file rooms than for clerical duty, and could be converted into file rooms as occasion and the necessities of the office require, provided other rooms be furnished for the clerks now occupying them. I have, therefore, to request that rooms capable of accommodating at least twenty clerks be assigned to this Bureau at as early a day as possible, to enable the clerks to vacate some of the rooms referred to and have them converted into file rooms. Otherwise, room for the constantly increasing files of the Bureau must be furnished in some other portion of the Department building, which would be less accessible and consequently inconvenient, and be the cause of great delay and confusion in the transaction of business.

It will be seen from the foregoing statements that the amount drawn from the Treasury through this office during the last fiscal year was \$63,501,843 58, most of which (\$34,367,924 94) was for pensions. The amount drawn during the previous fiscal year was \$91,107,151 58. The number of money accounts of disbursing officers settled was 4,940, involving the sum of \$59,897,880 03, and claims adjusted was 2,128, involving \$10,319,792 15, making a total of \$70,217,672 18 adjusted during the fiscal year, excluding 12,865 property and provision returns, which were adjusted, and in which were involved large disbursements made for the Army during the war. During the year the accounts of many Army officers have been closed under the provisions of the act approved June 23, 1870, to authorize the settlement of the accounts of officers of the Army and Navy for losses of funds, vouchers, and property during the war of the rebellion. It will be seen that the number of money accounts unadjusted on the 30th June, 1871, was 2,582, involving \$54,218,875 16, and the number of property and provision returns was 4,049. The number of unsettled claims was 11,254, involving \$6,033,437 52, though this latter sum does not embrace all the demands against the Treasury on file, as, in a large number of claims filed, the amount claimed is not stated.

Having worked off so much of the old business of the office, and in the expectation that the business remaining on hand at the close of the fiscal year can be still further reduced, if not entirely disposed of, with the force now engaged upon the work during the present fiscal year, I believe I can safely recommend a reduction in the clerical force of this Bureau for the next fiscal year of thirty-five clerks of class one, thus effecting a saving of \$42,000. But in connection with this proposed reduction I would again most earnestly call attention to recommendation in my report of last year for an increase in the salaries of the chiefs of

divisions in this Bureau, and respectfully submit that the salary of the chief clerk of this office should be increased to \$2,800 per annum, and that the salaries of the chiefs of the following-named divisions be increased to \$2,400 each, viz: quartermasters', subsistence, pension, claims, horse claims, engineers', war of 1812 and bounty land, book-keepers', State war claims.

Seven of the above-named chiefs of division are now fourth-class clerks; the other two are third-class clerks. The proposed increase would, therefore, amount to \$6,600, leaving a net saving of \$35,400 on clerk-hire. The gentlemen filling these positions are necessarily called upon to perform more work than falls to the share of other clerks. I hold them to a strict accountability for the conduct and business of their respective divisions, and I respectfully submit that as the success of my proposed reduction in the force depends largely upon the ability and hearty coöperation of these gentlemen, and in view of the responsibility and importance of their duties, as well as of the fact that they will be compelled to perform much additional labor, that the interests of economy will be advanced by making the increase asked for.

In conclusion I feel it my pleasant duty to bear testimony to the general good character of the employes of this Bureau, both ladies and gentlemen, and also to the earnest and faithful manner in which they have performed their respective duties during the past fiscal year.

Respectfully submitted.

ALLAN RUTHERFORD, *Auditor.*

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE FOURTH AUDITOR.

REPORT OF THE FOURTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT,
Fourth Auditor's Office, September 30, 1871.

SIR: In accordance with your request, and for your observation, I herewith give you a concise statement of the business which has been transacted in this office during the fiscal year ending June 30, 1871.

In making this synopsis I shall pursue the same course which I followed when submitting my last annual report, and shall exhibit the work of the office by a series of tabular statements, one for each of the divisions. These I shall present consecutively, as follows:

I.—PAYMASTER'S DIVISION, WILLIAM CONARD, CHIEF.

Statement of accounts received and settled in the Paymaster's Division from July 1, 1870, to June 30, 1871, with the amount of cash disbursed in those settled, and the number of letters received and written in relation to the same, including marine and pension accounts.

PAYMASTER'S AND MARINE ACCOUNTS.

Date.	Accounts received.	Accounts settled.	Letters received.	Letters written.	Cash disbursements.
1870:					
July	50	43	185	209	\$2, 428, 947 92
August	32	36	276	299	1, 554, 045 55
September	13	14	222	226	465, 499 85
October	39	29	208	215	406, 295 50

VII.—DISBURSEMENT AND MISCELLANEOUS DIVISION—B. P. DAVIS IN CHARGE.

Statement of work performed during the fiscal year ending June 30, 1871.

Number of letters written	946
Number of dead letters registered	181
Number of licenses registered	58
Number of checks against accounts ordered	211

In addition to the above, Mr. Davis has made up various tabular statements and miscellaneous reports called for by Congress and the Secretary of the Treasury; kept the record of appointments, resignations, removals, and absences; received and distributed the stationery used by the office, and discharged the duties of disbursing clerk.

An inspection of these tables will show that a commendable amount of work has been performed during the last fiscal year, and the experience and facility of the clerks have insured that correctness and promptitude which result from familiarity with the operations required. The various chiefs of divisions are perfectly conversant with the work respectively committed to their supervision, and they have transacted it in the most satisfactory manner. I can say, as I did in my previous report, that it gives me pleasure to speak in terms of just and cordial commendation of the competent and gentlemanly clerks who compose this office. Their accord with each other, their courtesy of deportment, and the amount of work they have performed, are worthy of praise. As heretofore,

William B. Moore, esq., my chief clerk, by his constant attention to his duties, and his knowledge of them, has been of great assistance to me in the affairs of the office.

In the Paymaster's Division there have been a large number of old accounts of disbursing officers resettled, requiring unusual trouble and care, owing to the fact that in many cases their period of service was prior to the rebellion, when the laws regulating such accounts were different from those now existing. A thorough examination of all old accounts which have accumulated on the books of the office has been prosecuted, and wherever balances are found due the Government, correspondence has been entered into with the parties or their sureties, and where possible the amounts have been collected. Where this has not been done, the accounts have been prepared for suit and transmitted to the Solicitor of the Treasury.

The work of the Paymaster's Division has assumed such a shape that current accounts are settled *almost immediately* upon their reception, thereby speedily detecting any errors or discrepancies, and resulting in a benefit not only to the Government, but to the disbursing officer.

The allotment business has been transferred from the Paymaster's Division to the Navy Agent's Division, and an entirely new system of checks devised to insure the proper deduction being made from the allottees' pay on board the vessels of the Navy, to offset the amounts paid on shore for the support of their families. This plan will greatly simplify the adjustment of the accounts of the paymasters and navy agents, and prevent the complications which have heretofore made them so difficult of settlement. The new system will also insure the prompt correction of an error at the time of its commission, and obviate the necessity of waiting, as heretofore, until the cruise is ended and the account of the paymaster registering the allotment is settled.

The experience of the last fiscal year has demonstrated the great value of the "adjustment appropriation account," referred to in my last annual report. Disbursements on account of the Navy necessarily assume a character different from those of any other branch of the Government, from the fact that a large portion of them are made beyond the limits of the United States, and at points remote from the Treasury. It is the practice of paymasters doing duty abroad to draw such funds as may be needed, from a single appropriation only, and to disburse them partly for the benefit of various other appropriations. That is, they borrow from one appropriation to loan to others, as the necessities of the service may require. The adjustment of these transactions devolves upon this office in the settlement of the paymaster's final account, and since his term of service is about three years, it is evident that a considerable time must elapse between the expenditure and the refunding of the amount to the proper appropriation. It has therefore frequently happened that when it was desired to thus refund the amounts involved between appropriations, transfers could not be made, because the appropriation to be drawn from was exhausted. Hence have arisen a large number of unadjusted balances. At the last settlement these transactions had reached the enormous sum of \$8,948,930 04, from accounts settled mostly during the past year. Of this sum upwards of \$2,500,000 cannot be returned to the appropriations from which it was borrowed, for the reason above stated. Of the remainder, upward of \$2,000,000 should be adjusted upon the statement of the last appropriation adjustment account, but it may safely be said that a large portion of this cannot be transferred, on account of the

present demands on the appropriation being equal to the balance on hand. Inasmuch as these balances will stand perpetually upon the ledgers of this office, unless authority by law is afforded for closing them, and since this will involve no draft of money from the Treasury, I would earnestly recommend that Congress be asked to make such provision as will authorize their final adjustment. In the future there will be no cause for this difficulty. The transactions above referred to not appearing upon the appropriation ledgers, nor upon those either of the Navy or Treasury Departments, and in order to remedy a recurrence of such a condition of accounts, I have instituted the plan of requiring a monthly detailed statement from every paymaster having funds to account for. This statement exhibits fully the source from which all funds are derived, how they were disbursed, and the exact balance on hand at the end of the month. Through it the transfers between appropriations will be effected in the same quarter of the fiscal year in which the expenditure occurs, and thus the overdraw of any appropriation prevented.

The adoption of the plan of a full cash statement, each month, from every paymaster having public money on hand, serves to accomplish another useful purpose. Most, if not all, the defalcations which have occurred in the naval service, were accomplished through the ability of the paymaster to obtain a larger amount of funds than his rate of expenditure required. Knowing that he would not be called upon for his surplus until after the expiration of his three years' cruise and the further time necessary to pass his accounts through the accounting offices, he was tempted to use the public money for private speculation, with the hope that he could make a successful operation and return the money thus used before the day of accountability. Under the present arrangement the amount of money each paymaster has on hand is known monthly. Should his requisitions upon the Treasury appear to exceed his requirements, payment can be suspended; and upon rendering his final return the balance he should have on hand, and which he will be required to turn back into the Treasury without delay, will be definitely known.

But there is no absolute safeguard against dishonesty. Although it gives me pleasure to testify from personal acquaintance, and through official connection for a number of years, to the high character of those composing the pay corps of the Navy; and although the amount that has been lost to the Government through Navy paymasters is insignificant compared with the vast number of millions disbursed by them during and since the war, yet it is my opinion that the chances of loss to the Government should be reduced to the last possible degree by the introduction of such methods as will tend to prevent the misuse of its money by its agents.

As an important step in this direction, I would earnestly recommend that Congress enact a law authorizing the employment of not less than three persons, experts in Navy accounts, to be styled accounting agents. These persons should be attached to, and under the direction of, this Bureau. Their duties should be similar to those of the bank examiners now employed in connection with the national banks, and they should have authority to call upon any paymaster, whether on shore or upon any naval vessel, without previous notice, to exhibit his books and cash for examination. They should be paid a reasonable salary, and allowed actual traveling expenses. There is no doubt but that the small outlay thus incurred would save the Government many fold, by presenting a

constant check upon any officers disposed to use its funds unlawfully, especially in those positions where remoteness from executive authority lessens the sense of direct accountability.

With the highest esteem, I have the honor to be, very respectfully,
your obedient servant,

STEPHEN J. W. TABOR,
Auditor.

HON. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE FIFTH AUDITOR.

REPORT

OF

THE FIFTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT,
Fifth Auditor's Office, Washington, November 16, 1871.

SIR: I have the honor to submit herewith the tabular statements of the operations of this office for the fiscal year ending June 30, 1871, per schedules from A to S inclusive, and also the statements of expenses of assessing and collecting internal revenue for the fiscal year ending June 30, 1870, which were not ready at the date of the last annual report.

The number of accounts adjusted during the fiscal year is eighteen thousand four hundred and four, involving the sum of \$820,208,679 60, and the number of letters written is eighteen thousand four hundred and thirty-six. The number of accounts adjusted for the previous fiscal year was eleven thousand nine hundred and eighty-six, and the number of letters written seven thousand two hundred and fifty-six. I take pleasure in commending the several clerks and employés of the office for uniform good deportment and general faithfulness in the discharge of their important and responsible duties.

I have the honor to be, very respectfully, your obedient servant,
J. B. MANN,
Acting Auditor.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

Add amount of taxes												16,824 77
												4,059,372 83

* Including items belonging to previous fiscal years not before adjusted.

NOTE.—The districts marked "old" and "new" are those that have been consolidated, and show the amount of expenses previous and subsequent to consolidation.

NOTE.—There was refunded by distillers during the fiscal year, as pay of store-keepers, the sum of \$557,235 41, which was covered into the Treasury as miscellaneous receipts. This, if not accounted for as receipts, could be deducted from the expenses, it being by law a reimbursement in form of the pay of store-keepers.

H.—Statement showing the expenses of collecting the internal revenue taxes in the several collection districts, including the commissions, salaries, and extra allowances of the collectors; the office expenses which are paid out of the commissions and extra allowances; and the assessments and collections from July 1, 1870, to June 30, 1871.

District.	Gross compensation.	Tax.	Net compensation.	Stationery and blank-books.	Postage.	Express and dep. money.	Advertising.	Total expense of collecting.	Expenses of administering office.	Assessments.	Collections.

REPORT OF THE SIXTH AUDITOR.

REPORT OF THE SIXTH AUDITOR OF THE TREASURY.

OFFICE OF THE AUDITOR OF THE TREASURY
FOR THE POST-OFFICE DEPARTMENT,
October 13, 1871.

SIR: I have the honor to submit the following report of the business operations of this office for the fiscal year ending June 30, 1871. My forthcoming report to the Postmaster General will exhibit in detail all that pertains to the financial transactions of the Post-Office Department for the past fiscal year.

The work performed by the clerical force of this office can be most clearly and satisfactorily shown by divisions, and I have therefore caused each chief of division to carefully prepare a synopsis of the work performed quarterly, so far as practicable, with a view to exhibit the steady increase of the business of this Bureau, an increase which must continue with the growth of the country, and the consequent extension of mail facilities.

EXAMINING DIVISION.—DR. BENJAMIN LIPPINCOTT, PRINCIPAL CLERK.

This division receives and audits the quarterly accounts current of all post-offices in the United States. It is divided into four subdivisions, viz: the opening-room, the stamp-rooms, the examining corps proper, and the error-rooms.

1. *The opening-room.*—All returns as soon as received are opened, and, if found in order according to regulations, are entered on the register, carefully folded and tied, and then forwarded to the stamp-rooms.

The number of quarterly accounts current received each quarter of the fiscal year ending June 30, 1871, was as follows:

Third quarter, 1870.....	27, 738
Fourth quarter, 1870.....	28, 092
First quarter, 1871.....	28, 111
Second quarter, 1871.....	28, 615
Total.....	<u>112, 556</u>

2. *The stamp-rooms.*—The quarterly returns received from the opening-room are divided alphabetically among eight stamp clerks, whose duties consist in comparing the stamp statements of the postmasters in the accounts current with their own books, and the returns made to them from the stamp division of the finance office, whence stamp orders are issued and receipts for the same received and forwarded to the stamp clerks. The returns thus approved or corrected are passed to the exam-

iners. All accounts from offices of the first and second class are passed through the various subdivisions of the office in advance of other returns, so that they may reach the chief examiner and his assistant with as little delay as possible.

The number of accounts examined and settled by the stamp clerks for each quarter of the fiscal year ending June 30, 1871, was as follows:

Third quarter, 1870.....	27, 356
Fourth quarter, 1870.....	27, 835
First quarter, 1871.....	27, 756
Second quarter, 1871.....	28, 378
Total	<u>111, 325</u>

3. The examining corps proper is composed of 17 clerks, among whom the returns received from the stamp-rooms are divided by sections, each comprising several States or parts of States. The average number to each section is about 1,700. After the examination of the accounts current and the stamp account, reviewing and refooting the transcript of mails received, and examining all vouchers belonging to that portion of the work, the balance is drawn on all accounts of the 3d, 4th, and 5th classes. The returns thus examined and completed are forwarded to the registering division, to be entered upon its books.

The number of accounts examined and sent to the registering division for the fiscal year ending June 30, 1871, was as follows:

Third quarter, 1870.....	27, 356
Fourth quarter, 1870.....	27, 835
First quarter, 1871.....	27, 756
Second quarter, 1871.....	28, 378
Total	<u>111, 325</u>

4. The error-rooms contain 6 clerks, who review and re-examine the error accounts received from the registering division, and forward to each postmaster a copy of his account, as stated by him, and as audited and corrected in this office.

The number of accounts so corrected and copied for the fiscal year ending June 30, 1871, was as follows:

Third quarter, 1870.....	6, 308
Fourth quarter, 1870.....	7, 736
First quarter, 1871.....	10, 116
Second quarter, 1871.....	7, 166
Total	<u>31, 326</u>

Each subdivision reports weekly to the chief examiner, and monthly through that officer to the chief clerk, the progress of the work, so that the exact amount of work done by each clerk is clearly ascertained.

All vouchers relative to allowances made by the Post-Office Department for clerk hire, lights, fuel, rent, stationery, &c., at post offices of the 1st and 2d classes, are forwarded at the beginning of each quarter to the chief-examiner and his assistant for examination. A statement is then prepared showing the vouchers received, the amount allowed, and the amount suspended when found to be in excess of the allowance

On receipt of the returns from the examiners these accounts are reviewed, and the amount allowable added, and the balance drawn by the chief examiner.

The number of post-offices of the 1st and 2d classes which have received allowances for clerk hire, rent, &c., was 335.

The number of offices of the 2d class having an allowance for clerk hire only was 159.

The number of offices having an allowance for clerk hire to assist in separating the mails (independent of the number above named) was 348.

Total number of offices of all classes receiving allowances, and approved by the chief examiner, was 842.

The expense accounts of the 335 offices of the 1st and 2d classes were regularly entered by the chief examiner and his assistant on the expense register, and show quarterly the amount of vouchers received, amount allowed, and amount suspended, copies of which were forwarded to each postmaster.

Attached to the examining division is a corresponding clerk, whose duty consists in corresponding with postmasters relative to errors in their accounts current, and in making day-book entries, &c.

The amount involved in the settlement of the quarterly accounts current of postmasters during the fiscal year was as follows:

Third quarter, 1870	\$4,723,683 99
Fourth quarter, 1870.....	5,013,104 98
First quarter, 1871.....	5,300,715 05
Second quarter, 1871.....	5,080,948 59
Total.....	<u>20,118,452 61</u>

The labors of the examining division for the fiscal year ending June 30, 1871, have been fully completed. All accounts received in proper form have been examined and passed to the registering division. At no period has the work been more perfect in all its details. Not only has there been a decided improvement in the preparation of returns by postmasters, particularly those of the 1st and 2d classes, but by judicious changes in the office the efficiency of the examining corps has been greatly increased.

REGISTERING DIVISION—F. I. SEYBOLT, PRINCIPAL CLERK.

This division receives from the examining division the quarterly accounts current of postmasters, and re-examines and registers them in books prepared for that purpose, placing each item of revenue and expenditure under its appropriate head.

Upon this division 11 clerks are employed, and during the fiscal year the following number of accounts current was received, re-examined, and registered, viz:

Third quarter, 1870	27,342, involving	\$4,723,683 99
Fourth quarter, 1870.....	27,800, do.	5,013,104 98
First quarter, 1871.....	27,992, do.	5,300,715 05
Second quarter, 1871.....	28,412, do.	5,080,948 59
Total.....	<u>111,546, do.</u>	<u>20,118,452 61</u>

During this fiscal year, 5,287 circulars were sent to postmasters who had failed to render their quarterly returns.

The number of changes of postmasters, establishment, re-establishment, discontinuance, and change of name of post-offices reported from the appointment office during the fiscal year and noted by the registers, was as follows :

Third quarter, 1870.....	1, 814
Fourth quarter, 1870.....	1, 907
First quarter, 1871.....	2, 530
Second quarter, 1871.....	2, 443
Total.....	<u>8, 694</u>

The work of this division is fully up to the requirements of the office, the quarterly accounts current received from every office having been registered to the 30th day of June, 1871, the footings and recapitulations made, and the books prepared for the registration of the accounts of the quarter closing September 30, 1871.

BOOK-KEEPER'S DIVISION—JAMES F. MAGUIRE, ACTING PRINCIPAL CLERK.

This division has in charge the ledger accounts of postmasters, late postmasters, contractors, and late contractors.

The work of this division is performed by 14 clerks, viz : One principal book-keeper, in charge of ledger of general accounts; one assistant principal in charge of ledger of warrants and deposits, cash-book, register of deposits, and all day-book entries on reports approved by the Auditor; and twelve book-keepers. The number of ledgers is 51, averaging over 575 pages each.

The number of auxiliary books posted every quarter is as follows: 11 registers of postmasters' returns, 35 pay-books, 8 journals, 3 registers of Postmaster General's drafts, 1 register of warrants, 1 stamp-journal, 1 cash-book, 1 deposit-book, 1 Auditor's draft-book, 1 money-order transfer-cash, 6 mail-messenger's registers, 6 registers of special mail service, 1 route agent's book, 1 letter-carrier's book.

Ledgers of postmasters' accounts.

Total.....	35	29, 689	6 159

Ledgers of mail-contractors' accounts.

Section.	No. of ledger.	Current accounts.	Day-book entries journalized.	Accounts journalized from transfer sheets.
1	3	1, 412	1, 024	8, 440
2	3	1, 630	1, 418	8, 828
3	3	1, 080	1, 679	7, 482
4	3	1, 153	1, 735	7, 841
Total	12	5, 275	5, 856	32, 591

The work of this division is in excellent condition, and fully up to the regulations of the office. All postings required to be done during the fiscal year were completed in advance of the time allowed.

STATING DIVISION—WM. H. GUNNISON, PRINCIPAL CLERK.

This division has charge of the general accounts of all the postmasters in the United States, each of which is stated and balanced quarterly.

The items of the accounts of postmasters at offices of the first, second, and third classes, (from which nineteen-twentieths of the revenue of the Post Office Department is derived,) and at draft and deposit offices of the fourth and fifth classes, are obtained from the earliest records made in the office, the accounts stated and balanced within the ninety days succeeding the quarter to which the items pertain, and are handed over to the collecting division "for copy."

The remaining accounts are stated as soon as the items can be taken from the ledgers of the book-keepers, and those which show debit balances are reported to the collecting division. During the past year, all accounts showing credit balances of \$10 or more to June 30, 1870, were also reported.

Accounts of late postmasters are stated during the fourth month after the quarter in which the change is reported to this office, and those showing debit balances of \$1, or more, are reported to the collecting division "for copy." They are again revised before the close of the *sixth* month, and those which then show such balances are handed to the collecting division "for draft." At the close of the *eighth* month, all, except those "suspended" for special reasons, are fully stated and transferred "finally" to the collecting division.

Statement showing the number of changes, and the condition of the general accounts of late postmasters, for and during the fiscal year ending June 30, 1871.

Number of changes, reported to this office weekly, during the fiscal year ending June 30, 1871.		Quarters prior to third quarter, 1870.	Third quarter, 1870.	Fourth quarter, 1870.	First quarter, 1871.	Second quarter, 1871.	Total.

Circulars sent in answer to letters received—special cases.....	443	528	471	262	1,704
Reports of failures to pay indebtedness, render returns, and to qualify.	162	131	149	151	593

The foregoing description indicates partially the amount of work done by the clerks of this division. The general accounts of present and late postmasters, in charge of each of the thirteen sections thereof, are in a very satisfactory condition, and fully up to the requirements of the routine of business in this office.

COLLECTING DIVISION—E. J. EVANS, PRINCIPAL CLERK.

The duties of the collecting division are to collect all balances due from late and present postmasters and contractors throughout the United States. The average number of clerks employed is about eighteen, whose business it is to issue drafts on late postmasters and contractors, and keep a register thereof, to report to the Post-Office Department for payment all balances due to late postmasters, and keep a record of the same, to record all changes reported by the appointment office of the Post-Office Department, to record the names of postmasters becoming "late" during the fiscal year in a book kept for that purpose, to record and file away all drafts paid, to correspond with postmasters and contractors with a view to the collection of balances due the United States, to record and transmit such correspondence, to copy all postmasters' and contractors' accounts, and inclose the same in their appropriate circulars, to submit for suit the accounts of defaulting postmasters and contractors, to receive, open, and dispose of all mails arriving at the office, to prepare matter for the Biennial Register, &c.

It is proper to state, in justice to some of the gentlemen employed in this division, that their business involves a thorough knowledge of the machinery of the entire office, and much of that of the Post-Office Department, with which it is intimately associated, and that it necessitates a constant watchfulness and careful scrutiny of the various books and files from which the accounts coming before them for adjustment are made up. This is especially true of the gentlemen employed in correspondence. The number of letters written, for example, cannot adequately convey to you the amount of labor performed by them, as, in some instances, hours of investigation are required, and day-book entries made, before an intelligible letter can be written in the case. Issuing drafts, reporting balances for payment, recording changes, also require and receive great care and close application on the part of the gentlemen intrusted with these duties.

I have the satisfaction to state that the work of the division is fully up to the requirements of the Department.

MONEY-ORDER DIVISION—JOHN LYNCH, PRINCIPAL CLERK.

This division was organized less than seven years ago, with but three clerks assigned thereto to perform its duties. At this time the work requires forty-seven clerks and assorters, which force, in consequence of the large increase anticipated during the current fiscal year, contingent upon an international money-order system with the United Kingdom of Great Britain and Ireland, will be entirely inadequate to perform the work. Some idea of the multifarious and responsible duties connected with this division may be formed by taking into consideration the fact that the past year shows money orders issued amounting in the aggregate to over forty-two millions of dollars, at an average of a little over nineteen dollars per order.

The division is sub-divided into five sections: the registers, examiners, deposit drafts and transfers, checkers and assorters, the work being divided as equitably as possible between the clerks.

To this division belongs the auditing of postmasters' money-order accounts, and the collection of balances due from late postmasters; and in this connection it affords me much pleasure to state that, up to this time, there has not been a failure to collect such balances.

The money-order accounts of all postmasters at money-order offices have been audited to June 30, 1871.

Number of money-order statements received, examined, and registered during the fiscal year ending June 30, 1871.

Having thus, with as much brevity as is consistent with the complex nature of the subject, explained the organization and practical working of my Bureau, I cannot close this report without expressing my high sense of the efficiency of the chief clerk, Mr. McGrew, the heads of divisions; and, indeed, of the employes generally under my charge.

I have the honor to be, very respectfully,

J. J. MARTIN, Auditor.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF TREASURER OF THE UNITED STATES.

REPORT

OF

THE TREASURER OF THE UNITED STATES

TREASURY OF THE UNITED STATES,
Washington, October 31, 1871.

SIR: Another year has made its round, and has brought with it the obligation, on my part, to make a statement to you of the condition of the Treasury of the United States, as it was at the close of the fiscal year which ended with the 30th day of June, 1871. Full tables are appended hereto, that will exhibit to you more readily and clearly than could be done through mere verbal statements, the money transactions and the general movement of the office during said fiscal year.

In addition, I desire to make a statement in regard to my own action during the past season, and some suggestions bearing upon the interest of the public service in the future.

NEGOTIATION OF NEW LOAN ABROAD.

Under authority of your commission I have visited, during the past season, the principal cities of Great Britain, and of Belgium, Holland, Prussia, Saxony, Baden, Bavaria, Württemberg, Austria, Bohemia, Switzerland, and France, "for the purpose of aiding in the negotiation of the new loan." In compliance with your written instructions, I called "upon the agents appointed by the Government, with a view to ascertain the steps already taken by them," in regard to the negotiation of the loan, and made to them "such suggestions as seemed expedient to place the subject in a favorable light before the European public." With the same object in view, I called upon our ambassadors and ministers, and upon our consuls and commercial agents, and upon many bankers and financial men, in the countries named. Through this intercourse with all kinds of persons, who were well informed upon such subjects; I learned that the time for placing our new loan was an unfavorable one for its success in the European money markets. It was too late, and too soon.

Had Congress given you the authority to negotiate this loan before the breaking out of the late war that France made upon Germany, it would have been all taken at once at that time. But later the bonds of several other governments were in these markets, and were offered at rates much more favorable to the purchaser than those authorized by Congress for the negotiation of our loan. Prominent among these was the new French five per cent. loan. This loan of the French Republic was finally disposed of at a rate that netted the borrower less than eighty cents on the dollar. The singular feature in its negotiation was, that it was largely taken by the late enemies of the French, the Germans. Germany had theretofore, next to our own country, been our principal reliance for the disposal of our stocks; and

there was every hope that but for this French interference, that country would have alone absorbed all our stocks that were offered for sale. Under these existing circumstances, it was hardly to be supposed that the German people could then be induced to take our loan, when they could, at the same time, purchase *five thousand dollars*, face value, of the French bonds, bearing the same rate of interest as ours, for *less money* than would purchase *four thousand dollars*, face value, of the bonds of the United States. But notwithstanding this disparity between the prices of the two stocks, in consequence of the credit of our Government standing so high in the money markets of Europe, and especially in those of Germany, our loan, although netting the holder more than one-fifth less in interest, would have been taken in preference to the French, but for the fact that it was generally understood by the German people that, inasmuch as the proceeds of the French loan were to be paid to their governments, their rulers would consider the subscription to such loan, by their subjects, an act of patriotism. It was, moreover, generally understood that the German Empire would, if need be, enforce, in favor of its subjects, the punctual payment of the interest, and the repayment of the principal of the loan at the maturity of the bonds. Another circumstance unfavorable to us was, that the French government allowed to its agents, for negotiating its loan, at least two per cent. on the net proceeds realized from it, while you were authorized to allow to your agents an amount that would yield to them only one-quarter of one per cent. In addition to these advantages in favor of the French, they had in circulation five per cent. treasury-notes that had not matured; these the government agreed to take in payment for subscriptions to its loan, allowing the purchasers' unaccrued interest on these notes to their maturity.

An almost insuperable difficulty in the way of the negotiation of our loan was this low rate of commissions that it was provided to allow your agents for the disposing of the stock. With a single exception, and in that case he disagreed with the other members of his firm, every banker and business man with whom I conversed on the subject gave it as his opinion that one-quarter of one per cent. was altogether too small a compensation for the services to be rendered and the risks to be incurred. It was generally insisted that, inasmuch as other governments allowed at least two per cent. for like services, ours would, under any circumstances, be compelled to allow the same rate of compensation, before any considerable amount of the stock could be negotiated. It is known to you that the house of Hope & Co. of Amsterdam—a house that has loaned much money to our Government, commencing with our revolutionary war—refused to act as your agent on that account. A member of the firm said to me that their house had never worked for such a pitiful compensation. It was frequently intimated that many who had accepted agencies had done so for the honor it conferred on them, and not because they had hoped to succeed in disposing of any considerable part of the loan. These facts, and others as discouraging, I reported to you by letters at various times and places. Luckily, you were not disheartened by my reports, but you sent your able assistant, Judge Richardson, to Europe, with several million dollars' worth of the bonds. On his arrival in London, I, then being at Frankfort-on-the-Main, immediately put myself in communication with him, and suggested to him a plan by which the whole amount of the five per cent. loan could probably be placed. He advised me of another plan that he had devised, which, with alterations suggested by you, has succeeded, and which, I am now

satisfied, was the very best thing to be done. It is certainly a source of gratulation that, by your own and Judge Richardson's adroit management, all obstacles were removed, and the loan was disposed of at a day much earlier than I, who had been and looked over the whole ground, had supposed it possible. It is, therefore, not to be wondered at that even our friends at home should have disbelieved in what is now known to be an accomplished fact.

The enemies of the Government are not even now satisfied, and would perhaps be equally dissatisfied, whether the loan was or was not taken. While yet in Europe, and after the loan had been taken, I noticed that American newspapers very unfairly criticised your action in regard to this loan; some insisting that you had "not placed the loan, or any part of the loan;" that you had "spent a round million in fruitless advertisements, in fees to useless agents, and in sending superannuated Treasury clerks on junketing tours to Europe;" and that the whole had ended in "a disastrous failure." Others conceded that the loan might perhaps be taken; but if it was, it had been hawked about Europe in a manner disgraceful to the American people "for six months;" while "the finance minister of the French Republic, emerging bruised, bleeding, and dismembered from one of the most calamitous wars in history, succeeded in placing a loan of equal amount in hardly more than the same number of hours."

The first cavilers are now silenced by the fact known to all well-informed persons, that all the five per cent. stocks offered by you have been taken, and that the Government has now none for sale. The other grumblers will probably never have the fairness to inform the readers of their papers that while you realized the face value of one hundred cents on the dollar on your new five per cent. loan, the French government received less than eighty cents on such value; and that for the eighty cents that government will be obliged to pay, at the maturity of its bonds, more than a quarter more money than it received, and in the mean time pay for the eighty cents the same rate of interest that our Government will pay on the par value that it received for its bonds of one hundred cents to the dollar. It was to me a most gratifying fact that the credit of our Government wherever I heard it spoken of, in all parts of Europe, stood unchallenged. Everybody conceded that we had both the ability and the disposition to pay all our debts. The rapidity with which you have been enabled to pay and reduce our national indebtedness is the controlling cause of this unbounded confidence that our Government will always remain faithful to its promises.

Other governments that have a financial standing have supplied their needs, and, like our own, are now out of the way, and surplus capital has again aggregated in the money markets of Europe. Under these changed circumstances, it is believed that if Congress will vest you with larger discretionary powers in regard to the compensation to be allowed to agents and other expenses attending the negotiation, and if it will authorize the interest to be paid in the country, and in the coin of the country, where the bonds may be purchased and held, the remaining loans of four and a half per cent. and four per cent., already authorized by Congress, can soon, unless untoward circumstances again intervene, be disposed of in Europe at par. I found that the most serious objection that Europeans made to our stocks was that the holder of *them* could not calculate exactly what dividend he would receive when the interest fell due. The rate of exchange of Europe with this country fluctuates so much, from time to time, that the amount the holder of our bonds will receive for the periodical interest due thereon will be sometimes more

and sometimes less than he expected, and rarely the amount specified in the bond. This creates ill-feeling, and a jealousy on the part of the holder of our stock that his banker does not deal fairly by him; and the banker who, perhaps, bought and sold this very stock, becomes disgusted with the explanation he is constantly called upon to make in regard to the discrepancies in the amount of interest that he pays or carries to the credit of his customers. Rather than be thus annoyed, he makes up his mind in future to have nothing more to do with our stocks.

Who of our people can borrow money at home of our banks on his paper, having the interest and principal payable at his own distant home? Would a New York capitalist loan money to the Mexican Republic, were its credit ever so good, at the same rate of interest, if the interest and principal were made payable in the city of Mexico, that he would were both these payments to be made in the city of New York? The difference in the *amount* of interest to be paid on our bonds held in Europe would be comparatively *small*, whether paid at home or abroad. The saving in the *rate* of interest to be paid on moneys borrowed abroad would be *great*. The annoyance to the foreign bondholder would cease. Our stock would become the favorite one in the European money markets, and then there would be little or no danger that it would be thrown back upon our own markets in seasons of commercial revulsions. This last consideration our merchants and business men, who have innocently suffered by such return of our stocks from Europe, will understand and appreciate.

Many of our people object to making the interest on our loans payable in a foreign country, alleging as a reason that it lowers the dignity of the nation. Were it not true that, if there is any loss of dignity in money transactions, it occurs at the borrowing of the money, and not with the payment of the interest thereon, it might be worth the while for our legislators to go into the calculation of the commercial value of national dignity. In the present financial condition of our country, it can ill afford to pay an extra percentage to save itself from an imaginary loss of national dignity. While upon this subject, it just occurs to me that those of our people who are so very sensitive on this subject, and who are so anxious to sustain the dignity of the nation abroad, could find a much surer way to carry out their views and accomplish their end if they would insist that the representatives of the nation in foreign countries, who are commissioned to look after its interest and sustain its honor, should be paid a compensation on which they could subsist their families, and live decently, if not respectably. Most of our ambassadors in Europe are obliged to draw largely upon their private resources, in order to sustain our national dignity abroad. With the consuls it is much worse. I found them without a habitation, "browsing around," having their offices in garrets, with stairs leading to them so steep that it was difficult to ascend them. On expostulating with one of these officers, in the capital of a highly commercial country, he informed me that he was not able to do otherwise. In order that he might keep out of debt, he was obliged to leave his family in America, and himself live in the most economical way; that he was determined to avoid the faults of his unfortunate predecessors, for whose unpaid debts he was yet being constantly dunned. What was worse, the creditors believed that the debts were the debts of the nation, and not of the individual consuls. I do not know how this strikes others, but I must confess that, as an American citizen, I felt ashamed. And yet I am sure I should not entertain such a feeling if the interest of our debt owned in Europe were made payable there. I must be excused for urging these views, for I

feel a conviction that if they are carried out there will, for some time to come, be saved millions of dollars annually.

A LIBEL REFUTED.

On my return from Europe I was shown, in a New York newspaper, an infamous libel upon the Treasury Department generally, and upon me in particular. It was headed in double-led lines and large capital letters, "Leak in the Treasury—Millions of dollars abstracted—Mysteries brought to light—List of warrants drawn and not accounted for—Wholesale destruction of ledgers—Prodigious disclosures of fraud." It then goes on to state that "it is now positively known that every Department of the Government is reeking with corruption, and that millions of the public money have been abstracted from the Treasury." "In order to take out this money, it was entered as against the Treasurer, under the pretense that it was needed for disbursements, but it has never been accounted for." It alleges that "certain officers in the Bureaus of the First Comptroller and First Auditor were long privy to these transactions, but such was Spinner's influence with Congress, and such his power with the party leaders, whom he supplied liberally with funds, that they feared to expose the facts. The officers of the Treasury have made every effort to prevent this information from reaching the public, and upon being questioned upon the subject stoutly deny the truth of it. But the number, date, and amount of every warrant drawn for the money are known, and this bold front of partisan and office-holding brass will not avail. The facts are but too plain and irrefutable, and it is only to be feared that they are only the beginning of numerous and greater peculations, particularly in the Navy and War Departments of the Government, and that a large portion of the whole FOUR HUNDRED AND TWENTY MILLIONS OF DOLLARS EXPENDED annually by the Government, will turn out to have been expended for the benefit of the gigantic ring of radical swindlers which centers in Washington City." And then asks, "What was done with the \$3,000,000 which were drawn from the Treasury? No record of this vast amount appears on the books." Then, after preaching a homily to the Secretary of the Treasury for not reporting the facts, and quoting from laws that make it his duty "to lay before Congress an accurate statement and account of the receipts and expenditures of all the public moneys," it proceeds with a "STARTLING ARRAY OF DAMNING FIGURES, being a list of warrants for money drawn by Francis E. Spinner, and not accounted for." Here follows a list of sixty-one warrants, fifty-six of which are tolerably accurately described, except that the name of the payee is forged in every instance. The list is in the following form; the items are taken promiscuously:

Number of warrant.	Date.	In whose favor drawn.	Amount.
3455.....	Sept., 1867	F. E. Spinner	\$2,932 37
1153.....	Aug., 1867	F. E. Spinner	12,235 00
4451.....	Aug., 1867	E. E. Spinner	78,014 60
4679.....	Nov., 1867	F. E. Spinner	20,000 00
841.....	July, 1868	F. E. Spinner	300,000 00
1517.....	July, 1868	F. E. Spinner	127,679 28

There are described in the same table fifty-five other warrants, that are each specified by *number, date and amount*, with the name of "F. E. SPINNER" repeated in every one of them, under the head of "In whose favor

drawn," as above. An examination has been made in the various Bureaus of the Department of the books and records, and of the warrants themselves, fifty-six of which have been found, with dates and amounts tolerably correct, except a few typographical errors, and that in making up the table the numbers in twenty consecutive items were slid up one line. But they were so accurately described that they were easily found. In every one of these the name of the payee has been knowingly and maliciously falsified and forged. Five of the pretended warrants are fictitious. None such exist. The first warrant in the table, and as stated in the copy, is No. 3455 for \$2,932.37, and is payable to "*Treasurer U. S. on ac. Internal Rev., as a receipt from Tax on Salaries,*" and not to "*F. E. Spinner.*" There are thirty-three others in this list, in amounts varying from \$126 72, No. 33, to \$105,594 22, No. 951, and all made payable in like manner. All these thirty-four warrants, being more than half the number specified in the whole list, have the same history.

It was the invariable practice of the War Department, when an income tax on the salaries was retained from the pay of its officers and employés, to make requisitions quarterly on the Treasury Department for the amount of the aggregate salaries, *less the income tax*, in favor of a disbursing officer, who drew the money and paid the salaries less the tax; and then to make another requisition for the gross amount of the tax that was withheld. On these last-named requisitions warrants were issued in form like the one first above described. All the thirty-four above mentioned were of this precise character and tenor. Certificates of deposit in triplicate were issued immediately on the receipt of each warrant for the amounts specified in each warrant respectively, one copy for the War Department, one for the Commissioner of Internal Revenue, and one for the Secretary of the Treasury. On the receipt of each of these certificates, the Secretary of the Treasury caused covering warrants to be issued for the respective amounts claimed, by which the money was carried into the Treasury of the United States, to the account of internal revenue receipts of tax on salaries. Every one of the thirty-four amounts named in the list as having been paid to "*F. E. Spinner,*" was so treated, and so placed in the Treasury, as appears upon all the books; and each amount had been accounted for to, and passed upon as correct, by the First Auditor, and the audit had been confirmed and finally settled in my account by the First Comptroller of the Treasury, and his letters verifying the fact of such settlement, except for a single item hereinafter mentioned, embracing the whole list of fifty-six warrants described in the list, and which were found, had been in my possession, some of them for over one year, and all the others for over two years, before these infamous charges were published by the falsifier, who, from his evident access to the books and papers of the Department, must have known all these facts when he invented his wholesale lies. But all that has been said in regard to these thirty-four tax warrants is a simple statement of the routine of the business of the Department when moneys are transferred from one account or appropriation to another. In reality, no money was handled or passed into or out of the Treasury on any one of these thirty-four warrants and their complementary covering warrants. They simply accomplished the transfer of the several amounts specified in each from accounts of appropriations for the War Department to the credit of internal revenue for receipts from tax on salaries. The money either still remains in the Treasury, or it has been drawn out on other money warrants, to satisfy the creditors and pay the debts of the United States.

Eleven other of the warrants specified in this libelous article, instead

of being payable to the order of "*F. E. Spinner*," as is charged, are made payable to the order of the "*Treasurer U. S., to the credit of C. C. Jackson, Paymaster U. S. Navy*." No. 1153, for \$12,835, the second one in the foregoing table, is one of these. Every one of these eleven warrants was credited for the full amount on the day on which the proper drafts that were issued on them came back from the office of the Register of the Treasury. All these moneys have since been drawn out on Paymaster Jackson's checks. No money passed out of the Treasury on any one of these eleven warrants; they simply effected transfers on the books, from appropriations made for the Navy, to the agency account of a naval disbursing officer, to be used for payments on account of the Navy, and to be accounted for to the proper accounting officer by the *paymaster who disbursed the money, and not by me*. I showed to the satisfaction of the proper Auditor and Comptroller that the transfer had been made; and it being found that the paymaster had received the money, my charges were necessarily allowed in the settlement of my accounts.

Four other warrants, specified in the list as being payable to the order of "*F. E. Spinner*," read, "Pay to Treasurer U. S. to the credit of Brvt. Brig. Genl. G. W. Balloch, Chief D. O. Bureau of Refugees, &c.," and state that their amounts are from an "appropriation" for "Support of Bureau Refugees, Freedmen, and Abandoned Lands." All that was said in regard to the eleven warrants for credit of Paymaster Jackson is equally applicable to these four, that were, in accordance with the directions contained therein, placed to the credit of General Balloch.

Seven other warrants specified in the list as being payable to "*F. E. Spinner*," are made payable severally as follows: No. 4679, for \$20,000, reads, "Pay to Treasurer U. S., to the credit of Lieut. L. B. Norton, 30th Inf'ty, and Disbursing Officer Signal Dptm't." This is the fourth in the above list.

No. 841, for \$300,000, is a war warrant that reads, "Pay to Brvt. Brig. Genl. Charles H. Tompkins, Deputy Quartermaster General, New Orleans, La.," and the draft for the amount is drawn on the "Ass't Treasurer U. S., New Orleans, La." The draft bears the indorsement, "To be deposited to my official credit with Ass't Treas'r U. S., at N. Orleans, Charles H. Tompkins, Brvt Br'g. Gen'l & Dep. Q. M. Gen'l." This is the fifth in the list. Neither my own name, private or official, nor that of my office, appears anywhere in or on this warrant, or in or on the draft that was issued on it. The date, number, and amount are correctly stated; all else is a deliberate forgery and lie.

No. 3113, for \$30,000, reads, "Pay to Treasurer United States, to the credit of B't Lt Col. F. W. Taggard, U. S. A., Must'g and Disb'g Off'r." The direction on this warrant is to place with United States Treasurer at Washington \$20,000, and \$5,000 with each of the assistant treasurers at New York and at St. Louis, to the credit of Colonel Taggard. It was so placed, as appears by the indorsements upon the three drafts that were issued upon the warrant upon the three offices named.

No. 5183, for \$20,000, reads: "Pay to Assistant Treasurer New York City \$10,000, Treasurer U. S. \$10,000; both to the credit of Bt. Lt. Col. Geo. McGown, Disb'g Officer Adj't Gen'l's Office, Washington, D. C." Both the amounts were so placed, as appears by the indorsements on the draft attached to the warrant.

No. 4451, for \$78,044 60, reads: "Pay to Treasurer U. S., to be deposited to the credit of Honl. O. H. Browning, Secretary of the Interior, in trust for various Indian tribes, as principal and interest on certain heretofore unpaid Missouri State bonds," "being part of the

amount found due to State of Missouri, on settlement of her ac. for militia expenses during the rebellion." The amount was so credited. This is the third described in the table.

No. 5088, for \$3,500, is a prize case, with which the Treasurer has nothing whatever to do. The custody of all prize money belongs to the Assistant Treasurer by law of Congress. The warrant reads, "Pay to Assistant Treasurer U. S., Washington, D. C., to be held subject to such order as may be made in relation thereto by the Dist. Court of U. S. for the Dist. of Columbia;" and states that it is "Due Prize Steamer Gov'r A. Morton." The draft bears the indorsement, "Credited as within directed, L. R. Tuttle, Ass't Treasurer U. S.," dated December 19, 1867.

No. 4553, for \$635, reads, "Pay to Treasurer U. S., to be deposited to the credit of Griesenz Smither, Altheim, county of Oberamth, Kingdom of Würtemberg, Germany." On June 11, 1868, the First Comptroller, by an order in writing upon the face of the warrant, directed the amount to be paid to "Leopold V. Bierwith, consul general of Würtemberg, at New York, as attorney in fact of the heirs of Griesenz Smither," and on the next day it was so paid, as appears from Mr. Bierwith's receipt on the draft that is attached to the warrant on file.

Fifty-five warrants of the sixty-one described in the charge that the money payable thereon had not been accounted for are now explained. Besides the five alleged ones that exist only in the fertile imagination of the willful falsifier, but one, No. 1517, the last in the foregoing list, remains. This, instead of being payable to "F. E. Spinner," as is falsely stated, reads, "Pay to the Treasurer of the United States, as a special deposit, subject to the direction of the Secretary of the Treasury, by letter, one hundred and twenty-seven thousand six hundred and seventy-nine dollars and twenty-eight cents, due the State of West Virginia on settlement." The statement is made on the warrant that it is for "reimbursing West Virginia for militia expenses during the rebellion." Payment was for a time withheld on this warrant, on the request of the Secretary of the Interior, until the question of the State's liability for non-payment of interest on Old Virginia stocks held by him in trust for various Indian tribes should be settled. The legal officer of the Government gave an opinion against the State's liability, whereupon the Secretary of the Treasury directed me by letter "to send draft for the amount of \$127,679 28 in favor of William E. Stevenson, governor of West Virginia, at Wheeling, W. Va." The draft for the whole amount was paid to Governor Stevenson on the 13th of July, 1869, as appears by his official indorsement upon the draft attached to the original warrant, on file in the office of the Register of the Treasury. My charge for the payment of this warrant was audited, passed to my credit, and settled in the second quarter of 1869, as appears by the letter of the First Comptroller in this office, dated March 7, 1871.

The name of "*F. E. Spinner*" is repeated sixty-one times in the descriptive table of warrants, published in the newspaper article, as the payee in that number of described warrants; when, in truth and in fact, as is herein shown, he is not the payee in any one of them. And I will add, that no warrant was ever issued payable to "F. E. Spinner" at any time, either before or since I came into this office, for any amount or for any purpose whatever.

It is further charged, in the same article, that "the books are not kept by double entry, and that a number of the account-books have been allowed to be destroyed." When I came into the office, more than ten years ago, I had the manner of keeping the books changed from single to

double entry, and increased the number, so as to make them checks on each other. The books have been so kept up to this time.

Again, it is charged that "a large number of ledgers are missing." This is equally, with all the other charges, false. Every book of accounts that I found in the office in 1861, and every one that has been opened since, is now in the office. The whole series, by years, in every division, is complete and in perfect order, of which fact any one wishing to know may satisfy himself by personal inspection. Again, it is charged that "six cart-loads of account-books were permitted to be mutilated and then taken out of the Treasury building to be sold for paper stock; and that nothing now remains of them but the two boxes full of the red leather labels, which were torn off of them with the intention of destroying them by fire." This charge, like all the others, has just enough truth in it to give plausibility to a deliberate lie. The *immaterial* facts stated are *true*, and all the *material ones* are *utterly false*. There was a number of books of printed forms, procured by a former administration of the Department, and needlessly bound, being principally "Steamboat inspectors' certificates" and "Western river pilots' licenses"—the latter long since obsolete, and the former soon to become so. Neither could be used bound up in a book, but must be cut out for use. It was ordered, for economy's sake, that the covers be taken off from all these books, the blanks that could be used for their designed purpose to be so used, and the remainder for other office purposes; and the covers to be used for other needed books. A few other books of forms, that are now obsolete and useless for the purposes for which they were prepared, have been treated in a like manner. A few small books of naval paymasters' returns, that were in duplicate in the office of the Fourth Auditor, and of no earthly use to the Department or any one else, have also been taken to pieces and the material used for needed purposes. The labels were saved for use. Now, this wholesale falsifier must have known, from the labels and from the paper that he saw, that neither had ever belonged to "ledgers" or to any other "books of accounts," and he knew that, with the exception of the *duplicate* "paymasters' returns," not one of them had ever been used for any purpose whatever, and that not a written word or figure, nor a stroke of a pen, had ever been made in any one of the books that he speaks of as "books of accounts."

This charge of the destruction of "six cart-loads of account-books," like the one that I had taken on warrants made payable to "F. E. Spinner" moneys amounting to \$3,103,057 63, and for which I have not accounted, is, I hope, sufficiently disproved by the foregoing simple statement of facts, the truth of which can be verified by any one who may choose to examine the records and papers that are accessible in the various offices of the Department to which they properly belong. The charge that I "arrived in England on the 20th of May, and proceeded to Baden, where he [I] parted with his [my] companions and disappeared," is in perfect keeping with all the rest. The whole article from the beginning all the way through to the ending, so far as any material fact is concerned, is an unmitigated lie, and was so known to be by its getters-up when it was invented, penned, and published.

These statements have been made particularly full and much in detail, because it was the only way that a negative could be proved. Each item has therefore been taken up separately and by itself, the warrants by their numbers and the amounts of money payable thereon, and the books by their kinds and titles; so that any one so disposed may be able to look up all the books and papers referred to, and thus satisfy

himself that each and every distinct charge made has not only been disproved, but that it was made by the libeler with the full knowledge, at the time of making it, that it was a deliberate and atrocious falsehood.

General charges against my official conduct, or against the management of the office given me in charge, I have never noticed. *These* charges were, however, made so maliciously specific, that even fair-minded men who did not know me nor the facts, nor the characters of those who published them, might be led to believe that there might be some foundation of truth in them.

It had been said of municipal officials of a northern city, that "they do not deny the charges of robbery of the public money made against them." There is reason to believe that, taking advantage of my absence in a foreign land, these false charges against the Treasury Department that originated in the organ of the "Ring" in that city, whose editor is one of its members in the senate of the State, were "back-fire" and "stop-thief" dodges, and made with a view to draw attention from themselves and their "stealings," and that they might say, "Why should we deny general charges of official dishonesty, when an official of the National Government, who is charged more specifically with greater wrong-doing, makes no denial?"

These were motives that induced me to swerve from the general rule, to give no heed to slanders and libels.

Another reason was, because I hold that the people have a right not only to *believe*, but to *know*, that their servants who administer their public affairs, or who have the custody and disposition of their money, are faithful and honest.

When I first entered public life, more than forty years ago, I made it a law to myself never to do an official act that I was not willing everybody should see me do. This rule I have never broken in a single instance, and so long as God continues to give me the strength to adhere, I never will break it. I have now held this office for more than ten years, and in that time have perhaps had such opportunities, and what would to some have been such temptations, for making money, as have rarely been put within the reach of any man. I might easily have become rich by speculations in stocks by my knowledge of the Government's intentions in advance of others. I have never used this knowledge for my own or the interest of any other person. Since I have been in the office I have never engaged in any speculations nor in any business whatever. I have given my whole time and attention, night and day, to the utter neglect of my own, to the care of the public's business and interest; and in consequence thereof am now, at that age that is the time allotted to man in this world, as poor in pecuniary things as I was on the day I came into this office. I have but little to leave to my children, save an honest reputation, and that it is my purpose to keep and protect, and, if necessary, to defend, even to the extent of appealing to the criminal courts of the country, for the conviction of its libelers. I have never taken, nor permitted others to take, from the Treasury a single cent, nor any greater amount, except by authority of law. If there are wrongs in this office, or here in the Department, or if there have been any since I have been in it, I am in entire ignorance of them, and feel quite sure that none other except such as have been officially reported, and whereon the parties implicated have been pursued, and when caught were convicted and punished, have existed, or do now exist.

It may be doubted which does the most to undermine confidence in our republican institutions—permitting thieving officials to escape pun-

ishment, or the apathy with which the public mind receives infamous charges against trusted public officers.

SECURITIES DEPOSITED BY INSURANCE COMPANIES.

The laws of the State of New York require (2 Revised Statutes, page 771) that before any foreign life insurance company can do business in that State, there shall be filed in the insurance department of the State the certificate of "the chief financial officer" of the State by whose laws such company is incorporated, that there is deposited with him in trust, for the benefit of the policy-holders of the company, one hundred thousand dollars in stocks or securities.

In order to avail itself of the privileges of this act and of similar enactments in other States, the National Life Insurance Company of the United States of America, incorporated by the Congress of the United States, and having its office in this District, deposited in this office one hundred thousand dollars in United States bonds, for which the Treasurer issued the certificate required by the laws of the State of New York, which certificate was accepted as sufficient by the insurance department of that State. The form of the certificate thus given is in words and figures as follows, to wit:

TREASURY OF THE UNITED STATES, *Washington, D. C.:*

I, F. E. Spinner, do hereby certify that I am Treasurer of the United States, and that the National Life Insurance Company of the United States of America, a corporation chartered by Congress, located at Washington, in the District of Columbia, has heretofore deposited in this office stocks of the United States, amounting in par value to not less than the sum of one hundred thousand dollars. And I do hereby further certify that such securities are now held by me in this office, as such Treasurer aforesaid, in my official capacity, on deposit and in trust for the benefit of all the policy-holders of said company, and to enable said company to comply with the laws of the various States in order to do business therein. And I further certify that I am satisfied that the said stocks and securities are worth one hundred thousand dollars and upwards. Said deposit was made in this office on the 12th day of August, A. D. 1868, and has ever since that period remained at all times intact for the full amount of one hundred thousand dollars in the stocks and securities above specified.

In witness whereof I have hereunto set my hand and caused my official seal to be affixed at the Treasury Department on this 31st day of December, A. D. 1870.

F. E. SPINNER, *Treasr. U. S.*

Certificates of similar purport have been given by the Treasurer for use in other States. Some time in April last the \$100,000 in United States bonds were withdrawn and one hundred and ten thousand dollars, par value, in United States four per cent. coupon certificates of indebtedness of 1870, issued to the State of Maine for advances made during the war of 1812, were substituted therefor. These certificates are payable to bearer, and are not assigned to the Treasurer, the evidence of the purposes for which they are held being the letter that accompanied and which is on file with them.

After this deposit had been made, the National Capitol Life Insurance Company, another corporation in this District incorporated by Congress, deposited for the same purpose promissory notes amounting to \$102,000, secured by deeds of trust on unincumbered real estate, valued, by appraisers appointed by the insurance department of the State of New York, at \$247,000. This real estate has been conveyed to the Treasurer of the United States, in his official capacity, and to his successors in office, in trust for the policy-holders of said company, by a deed of trust, executed by the trustee and grantors of the above-mentioned deeds of trust. Policies of insurance amounting to \$26,000, on the improvements on this property, have been assigned to the Treasurer as trustee,

and filed with the other papers in his office. For these deposits a certificate in accordance with the facts stated was given by the Treasurer, to be filed in the insurance department of the State of New York.

It is proper that the facts should be stated that payment of the above-mentioned notes is promised, as appears from their tenor, when and as the same may be required by a vote of the directors of the company, the notes being payable to the order of the company. The deeds being merely collateral to the notes, it would seem that the Treasurer cannot dispose of the property for the benefit of the policy-holders until there shall have been default in the payment of the notes. As payment of the notes can be demanded only by the directors, the Treasurer would seem to be unable to make any sale for the benefit of the policy-holders in case of a failure of the company to meet its engagements, without the co-operation of the board of directors.

In addition to the difficulties already enumerated, the taking of these trusts by the Treasurer was extra-official, there being no law of the United States requiring him to take or hold securities for the purposes as above stated. It is therefore doubted whether the securities held by the Treasurer, in trust for the two before-mentioned insurance companies, could be made available in the manner that was contemplated by the legislatures of the States that enacted the laws for the protection of its policy-holding citizens.

Strongly impressed with the conviction that all corporations that by their charters are authorized to have money transactions should be compelled to give ample security for the faithful performance of all their obligations, I would most respectfully suggest that Congress be asked to so amend the acts of incorporation under which the two above-named insurance companies were created as to compel each of them to deposit, in lieu of their present unauthorized securities, at least one hundred thousand dollars in the new five per cent. bonds of the Government, with the Treasurer of the United States, and assigned to him in trust for the benefit of the policy-holders of said companies respectively, in case default should be made by them in paying their legal liabilities to said policy-holders.

In this connection it may perhaps not be inopportune to suggest the propriety of having established by law of Congress a governmental bureau to have charge of the affairs of all kinds of insurance companies and associations, in the same manner as the Comptroller of the Currency now has charge of the affairs of all the banks that issue paper money in the United States.

At the meeting of the national insurance convention, held in the city of New York, in May last, N. D. Morgan, esq., president of one of the largest insurance companies in that city, said:

The reasons why I would prefer a national bureau to the present State supervision are patent to every officer of our present companies.

Life insurance, to be successful, should not be confined to one locality. The business of a company should be extended over as great an extent of territory as possible, in order to equalize, as far as may be, the rate of mortality among its members in seasons of epidemics. A company doing an extended business in the city of New York, and in all the large cities of the United States, would hardly be affected in case of a plague raging in one of those cities, while the others are exempt; the income from the exempt district compensating for any excessive claims from the infected one. It is therefore important that the largest liberty to transact business throughout the whole country should be accorded to our life insurance companies.

Under the present system of State legislation it is very difficult for our companies to so extend their business. Restriction after restriction is thrown up against the work of the insurance agent throughout the length and breadth of the land, as though the business involved some terrible harm to the public, instead of the life-giving stream of joy and gladness that it is to the widow and the orphan.

This, to enable the work to go on as it should and would were matters different, should be remedied by the creation by Congress of an insurance bureau, to which every company in the country should report, to enable it to transact business outside of the State where located. The filing of such report, and with such deposit in the bureau as is now demanded by our own State laws, and with satisfactory evidence of solvency as the laws of Congress might demand, should secure to such reporting companies certificates of authority to transact business within any State of the Union, without regard to any State or municipal laws whatever.

Mr. Morgan's views in regard to life insurance companies are equally applicable to fire, and, to some degree, to marine insurance companies. From personal intercourse, and through written communications with other officers of leading insurance companies, I have become satisfied that the better class of these companies would favor a law creating a bureau of national insurance companies, and that would provide for a deposit in stocks of the General Government, with the Treasurer of the United States, pledged for the security of the policy-holders of such companies.

The president of one of the leading and largest life insurance companies in the United States has written me the information that the assets of all the fire, marine, and life insurance companies, doing business in the United States, amount to four hundred and twenty million dollars; and that the amounts at risk in these companies amount to twenty-five hundred million dollars; being greater in amount than the whole national debt. He says, in view of the hope that a national bureau will be created, that "it is impossible to contemplate these stupendous aggregates and their vast annual accumulations, laden, as they all are, with the trusted elements of material welfare and human happiness, without anxious desire to anticipate future developments."

The establishment of such a national bureau would bring confidence to the insured, and would add large numbers to the millions of our people who now have a pecuniary interest in the stability of these useful and benevolent institutions. In addition, the creation of such a bureau would create a home market for a large amount of our new stocks bearing a less rate of interest than is now paid on the old United States stocks; thus conferring the double benefit of assurance from loss to many and partial exemption from taxation to all our citizens.

NATIONAL BANKS.

The delays of banks in making their semi-annual returns, and in the payment of duty referred to in my last annual report, have increased during the last fiscal year. Most of the national banks pay the tax due from them promptly, within the time specified by law, and treat this requirement as they do other obligations against their respective institutions. But there are other banks that have been carelessly, if not willfully, habitually negligent in making their returns and paying the duty due from them to the Government. A number of the banks did not pay the duty due on the 1st day of July until some time during the months of September and October. The following banks, at the date hereof, have made no reports of the amounts of duty due from them on the 1st of July last, nor have they made any payment of the duty: First National Bank of Kansas City, Missouri; Miners' National Bank of Utah, Salt Lake City, Utah; First National Bank of Utah, Salt Lake City, Utah. The two last-named banks have recently been merged into one institution.

For the protection of the Treasury against the growing evil, I would most respectfully renew the recommendation made in my last annual

report, that a percentage upon such duty be added to it for every ten days' delay in payment after the expiration of the one month's time now allowed by law. Legal enactments, giving authority to this Office to add one per cent. to the duty due from banks for every ten days' delay after the time fixed by law for its payment, would seem to be the most effective measure to insure prompt payments of the duty.

"GOLDEN RULE" LOSS.

My attention has been called to a New York newspaper article, extending through five solid columns of *The Sun* of August 23, 1871. The authors have displayed much ingenuity in the relation of the story to weave such a fabric of fiction that it should seem to be truth.

The false theory attempted to be proved by this article is, that the steamer "Golden Rule," with *six hundred and eighty souls on board*, and carrying money belonging to the Treasury of the United States, *in transitu* from the Treasury at Washington to the assistant treasurer at San Francisco, was, on June 30, 1865, *at 3.40 in the night, during thick weather*, purposely run on the Roncador Reef, with a view to the robbery of the money, and that a million dollars in amount was actually stolen by the captain of the steamer and another party named; that the safe was recovered broken open; that it was forwarded by one of the parties in charge of the money to Washington, but that it never reached its destination, being thrown overboard on the way.

Without discussing the probability of two men conspiring, for the purpose of a possible gain, to run the vessel on a reef in the open Caribbean Sea, in the night-time, thereby endangering their own lives and those of nearly seven hundred other persons, many of whom were women and children; and without going into the testimony presented soon after the loss to the Department, that made it appear pretty clearly that the running of the vessel on the reef was purely accidental, and that the money was lost in the ocean, I hope now, in a simple statement, to overthrow every false inference drawn from the long circumstantial statements that are presented to prove that the amount of a million of dollars was stolen, and that it was not lost and totally destroyed in and by the action of the ocean.

First, then, the crushed safe did come to the Treasury and was repeatedly examined by myself and others, in company with old sea-captains and other experts, and it was the opinion of nearly all that the safe was broken by being jammed between the steamer and the rocks. Then, again, nearly all the money that was in the safe, except the million dollars in question, floated on shore, and, except a few bills, has been recovered by the Treasury. The million dollars was not in "greenbacks," as is alleged, but consisted of one thousand time-notes of one thousand dollars each, payable three years after date, with compound interest. These notes bore date May 15; were received by the Treasurer May 16; and left this office May 18. The "Golden Rule" left New York May 20, and was wrecked May 30, 1865. These notes were in regular and unbroken sequence of numbers, being from No. 5001, letter A, to 5500; and from No. 5001, letter B, to 5500; both numbers, in each case, inclusive. Both the numbers and letters appear on this kind of notes both on the upper and on the lower half of every note. Compound interest notes were issued from Nos. 1 to Nos. 9850, repeated on each of the letters A, B, C, and D, aggregating \$39,400,000.

All this immense amount, except the one thousand notes in question, and seventeen other notes scattered promiscuously through the whole

series, have been presented at the Treasury, and have been paid. Not a single note of the one thousand notes of the numbers and letters above mentioned, that left this office for transportation to San Francisco, has ever been presented for payment. Of the thirty-eight thousand four hundred other notes of the same kind, that were issued at the same time, and before and after the time that the one thousand notes in question were issued, *all but seventeen notes have been redeemed*. The part of the story that this million of dollars was used by the alleged thieves, who, it is stated, were poor at the time of the wreck, are rich now, and in possession of valuable farms and stocks in the State of Maryland, is simply absurd. Had this property been bought with these notes, they would long since have been presented for payment.

A suggestion is thrown out that the numbers of the notes were changed, or rather that other notes, with other numbers, were exchanged for the notes in question by the collusion of the then Register of the Treasury with the thieves. Such a course would have been impracticable, if not impossible, and could have been of no earthly use to the supposed conspirators if it could have been done. The first note presented would have been detected, and that, too, whether the numbers were altered or not, or whether other notes with other numbers were put in their stead. If altered to or exchanged for a note of another number under 9850, the highest number issued, it would, of course, have been a *duplicate*, and there would have been no place for its register on the books. If changed to or for a higher number than the one named, it would have shown an *over-issue*, which it is now known does not exist. As no duplicate nor any number higher than 9850 has ever been presented, this false theory falls with the others. To show the utter impossibility of either being done, or that the notes in question were redeemed in any other way, it is only necessary to state that all money, these notes included, is received from the Bureau of Engraving and Printing by the Treasurer, is receipted for by him, and is then covered into the Treasury by warrant. They can only be paid out on warrants. When redeemed by the Treasurer they are carefully counted, and then cut in two parts longitudinally, thus showing both the letters and numbers of the notes on each half. The lower halves are then sent to the office of the Secretary of the Treasury, and the upper halves to the office of the Register of the Treasury. In each of these offices they are counted; and if found to be correct and agreeing in all the offices, the Treasurer is then reimbursed for the amount by warrant in his favor.

In the offices of the Secretary and of the Register, books of registry for the entire issue of these compound-interest notes were prepared, having the letters and the numbers printed in regular sequence from the first to the last number that was ever issued. These half-notes, after being so counted in these two offices, are then registered respectively in these two separate books of registry. Neither of these offices knows of the other's action unless they disagree with the Treasurer's count. In such case each reports to the Treasurer separately. These two books of registry are now found to agree, and they both show that all the notes of this kind that have ever been issued, amounting to thirty-nine million four hundred thousand dollars, have been presented and paid, except the one thousand notes in question, and the seventeen other notes before mentioned, that have, as yet, not been presented for redemption. All the blanks opposite their appropriate letters and numbers respectively are filled up with the date on which each individual note was redeemed. The one thousand numbers representing the notes sent by the "Golden Rule" to San Francisco, running in their sequence

through quite a number of pages in the books, remain a blank on all the registers. After waiting over six years and not a single one of these known notes appearing, the Comptroller of the Treasury has, after a thorough and searching investigation, wisely directed to treat them like notes certified to have been destroyed, and has thus had them taken out of the cash account; and thus has most undoubtedly correctly settled this vexed matter forever, or until that time at least when one of these notes shall be resurrected from the grave where it has been buried for over six years.

OUTSTANDING LIABILITIES.

Governments, like individuals, should follow the golden rule, and do as they would be done by. Ours, of all others, being of the citizens, should set an example of honesty to the citizens. The withholding of an honest debt is morally but little, if any, better than outright stealing.

There is due from the Government money, in various amounts, to individuals, principally for unclaimed interest on United States stocks, that has been accumulating from year to year, until, in the aggregate, it amounts to quite a considerable sum. Formerly no employé of the Treasury Department was allowed to give any information that would lead to a demand for the payment of these debts. The consequence was that sharpers would, by some means, at times succeed in ascertaining some of the amounts, and the names of the persons to whom the money was due. If through city directories, or by any other means, they succeeded in ascertaining their post-office address, they would write to the parties direct; if not, then they would insert an advertisement in the "personal" of a New York newspaper, stating that "if the following-named persons will address C. A. B., box 6857, New York post-office, stating where they may be found, they will learn something greatly to their pecuniary advantage;" after which follows a long list of names. These will be recognized in this office as creditors of the Government. If the creditor gets half the money due him from the Government he is lucky. Through these means the indebtedness of the Government for these unclaimed amounts has gradually decreased, but, instead of going to the persons to whom it belonged, half at least has gone into the pockets of sneaks, who obtained the information of the indebtedness surreptitiously.

Some three years since, with the consent of the then Secretary of the Treasury, I directed letters to be written to all persons having amounts standing to their credit on the books of this office, whose address could be ascertained, informing them of such fact, and the amount of money subject to their order. Comparatively but few were reached in this way, and very many of these amounts still remain unpaid. It is therefore recommended that Congress be asked to pass a law directing the Treasurer, or other proper officer of the Treasury Department, to advertise in newspapers published in the cities of New York and Washington, at the end of each year, a list of the names of all persons to whom the Government has been indebted for more than six months next preceding the making of such list, stating the amount of said indebtedness; and that lists of the same shall be posted in conspicuous places in the offices of the Treasurer and the Assistant Treasurers of the United States for public inspection. Provision should be made in the law for the retention of a percentage from the amount, when paid, to defray the expenses of advertising.

AUDIT OF ACCOUNTS.

The lack, need, and want of a proper officer in the Treasury Department to review, adjust, and finally settle the agency accounts of the Treasurer and the Assistant Treasurers, and Designated Depositaries, and of the Post-Office accounts that are now finally passed upon by the Auditor of the Post-Office Department, are seriously felt.

All other accounts, civil or military, or of whatever branch of the public service, are finally passed upon, adjusted, and settled by either the First or the Second Comptroller of the Treasury. Neither of the Comptrollers has any legal authority to review, decide upon, or in any manner control in the two kinds of accounts above named. The final settlement and the correct payment of these accounts should be under the supervision of a Comptroller, or other proper officer designated for that purpose. As matters now stand, in regard to the two classes of accounts named, this office is not only inconvenient and imperiled, but it has great responsibilities thrown upon it that do not attach in other cases, and ought not in those named.

It is feared that through the loose, irregular, and anomalous manner in which these accounts are settled and paid, sooner or later, the Government will suffer serious losses. A loss to the Post-Office Department some years since, supposed to have been caused by the collusion of the then postmaster in the city of New York and an officer of the Treasury Department, and the recent loss to the Government through an agency account, would probably have been avoided had there been a proper officer of the Treasury Department to review the adjustment and the settlement of these classes of accounts, and decide upon the sufficiency of the receipts given in payment therefor.

It is suggested that the office of a Third Comptroller be created, to take all these accounts and their final settlement in charge; or that they be given, like all other accounts, for adjustment, settlement, and evidence of correct payment of the draft or check issued thereon, in charge of one of the present Comptrollers of the Treasury.

SALARIES OF EMPLOYÉES.

Attention is most respectfully called to what was said in the report from this office of the last and of former years, in regard to the inadequacy of the compensation allowed by law to the employés of the office. But for the temporary relief granted by the kindness of Congress, for the last two years, to the officers, it would not have been possible to have secured the services of persons competent to the proper discharge of required duties.

But in my opinion many of the clerks employed in this office deserve, and in justice should receive, like consideration as the officers. I would especially call attention to the tables that appear in the report of the last year relative to the more perfect organization of the *personnel* of the Treasury of the United States.

CONCLUSION.

Without the least intention or desire to throw blame upon any other officer, it is due to the officers of the Treasury that the emphatic declaration should be made, that for the defalcation of an officer belonging to another Department of the Government, neither this office, nor any one employed in it, is in any way responsible, as will be clearly made to

appear, should a legal investigation of the whole matter, which is desired on my part, ever be made.

The fiscal year has ended without the loss of a single cent to the Treasury by the act, or by the negligence, of any employé in this office. For this and for other escapes from loss, I hope that I am truly thankful and grateful to that Power that has now again, as in the past, shielded me from personal harm, and the nation from consequent pecuniary loss.

I have the honor to be, very respectfully,

F. E. SPINNER,

Treasurer of the United States.

Hon. GEORGE S. BOUTWELL,

Secretary of the Treasury.

APPENDIX.

A.—GENERAL TREASURY.

I.—RECEIPTS AND EXPENDITURES.

1.—Receipts and expenditures by warrants.

The books of the office were closed June 30, 1871, after the entry of all moneys received and disbursed on authorized warrants within the fiscal year, as follows:

Cash, Dr.

Balance in Treasury from last year	\$149,502,471 60
Received, formerly credited as unavailable	3,396 18
Received from Loans	\$420,020,626 90
Received from Customs	206,270,408 05
Received from Internal Revenue	143,098,153 63
Received from Lands	2,388,646 68
Received from War	22,837,092 04
Received from Navy	3,203,648 42
Received from Interior	814,678 91
Received from Miscellaneous	32,765,226 89
Total receipts for fiscal year	831,398,481 52
	<u>980,904,349 30</u>

Cash, Cr.

Paid on account of Public Debt	\$684,919,114 51
Paid on account of the Army	58,637,083 86
Paid on account of the Navy	22,634,675 63
Paid on account of Interior	42,685,571 23
Paid on account of Treasury proper	24,259,851 98
Paid on account of Customs	17,037,452 40
Paid on account of Treasury, Interior	5,479,247 54
Paid on account of Internal Revenue	9,128,164 23
Paid on account of Diplomatic	1,661,068 22
Paid on account of Quarterly Salaries	708,748 84
Paid on account of War, (civil branch)	924,386 11
Paid on account of Judiciary	2,911,507 51
Total expenditures for fiscal year	870,986,872 06
Balance in Treasury at close of fiscal year	109,917,477 24
	<u>980,904,349 30</u>

NOTE.—The above includes transfers between appropriations and repayments.

2.—Warrants.

The receipts, as stated in the foregoing table, were carried into the Treasury by 11,323 covering warrants, which is 477 less than were issued during the preceding year, but an increase of 331 over the year previous to that.

The payments were made on 25,711 authorized warrants, for the payment of which there were issued 31,759 drafts on the Treasury and the various branches thereof. In these two last-mentioned items there was an increase over the number issued during the preceding year of 407 warrants and of 5,805 drafts.

3.—Counter-warrants and Repayments.

The counter-warrants were issued on account of the—

Army.....	\$12,287,957 39	
Navy.....	1,886,757 26	
Interior.....	104,874 99	
Loans.....	150,537,362 99	
Civil and Miscellaneous.....	222,803 85	\$165,039,756 48
Public Debt Revenue counter-warrants.....	6,872,108 71	
Diplomatic Revenue counter-warrants.....	426,680 80	
		7,298,789 51
Total of counter and Revenue counter-warrants.....		<u>172,338,545 99</u>

The repay covering warrants, representing repayments of unused moneys and proceeds of sales of stores, amounted to \$14,266,256 68.

NOTE.—Repay covering warrants represent repayments of money advanced to disbursing officers, and proceeds of sales of stores, both of which are credited to the appropriations from which the moneys were advanced.

Transfer and counter-warrants represent moneys which have been advanced from one appropriation and expended on account of another. The moneys are afterwards charged to the proper appropriations on transfer-warrants, and credited back on counter-warrants to the appropriations from which they were advanced. These warrants are now issued only in the settlement of old accounts arising during the war.

Revenue counter-warrants represent revenues expended before being covered into the Treasury. Such moneys are afterwards covered into the Treasury by Revenue counter-warrants, and charged on regular pay-warrants to the officers by whom they have been expended. As shown above, warrants of this kind were issued during the last fiscal year on account of the Public Debt and Diplomatic Expenses only. The Public Debt Revenue counter-warrants represent interest which accrued on the Sinking Fund, and which was expended in the purchase of United States Stocks for that fund by the Treasurer as custodian of the fund, without being first covered into the Treasury. The amounts were afterwards carried into the Treasury by Revenue counter-warrants, and charged to the Treasurer on Public Debt pay warrants. The Diplomatic Revenue counter-warrants represent moneys received by consular officers for fees, &c., and expended for expense authorized by law. This course is necessitated by the distance of those officers from the Treasury.

4.—Receipts and Expenditures by warrants, less counter and transfer warrants.

Receipts:

On account of Loans.....	\$269,619,897 09
On account of Internal Revenue.....	143,098,153 63
On account of Miscellaneous.....	25,107,000 35
On account of Lands.....	2,388,646 68
On account of Army.....	10,549,134 65
On account of Navy.....	1,316,891 16
On account of Customs.....	206,270,408 05
On account of Interior.....	709,803 92
Total cash receipts for which certificates of deposit were issued.....	659,059,935 53
Add Revenue counter-warrants.....	7,298,789 51
	666,358,725 04
Deduct repayments of moneys.....	14,266,256 68
Receipts, agreeing with Secretary and Register.....	652,092,468 36
Add amount received from unavailable:	
From Depositary, St. Croix.....	\$2,199 73
From Depositary, Tallahassee.....	679 66
From Depositary, Olympia.....	516 79
	3,396 18
Add counter-warrants and repayments.....	179,306,013 16
Balance held from last year.....	149,502,471 60
Total as before.....	<u>980,904,349 30</u>

Expenditures:

On account of Public Debt	\$527, 509, 642 81
On account of Army	46, 404, 856 88
On account of Navy	20, 739, 342 73
On account of Interior	42, 555, 316 48
On account of Treasury	24, 199, 432 31
On account of Customs	16, 914, 749 97
On account of Treasury, Interior	5, 478, 408 38
On account of Internal Revenue	9, 100, 987 34
On account of Diplomatic	1, 205, 338 20
On account of Quarterly Salaries	706, 257, 35
On account of War, (civil branch)	924, 326 11
On account of Judiciary	2, 909, 607 51
Total payments by drafts	698, 648, 326 07
Add Revenue counter-warrants	7, 298, 789 51
	<hr/>
	705, 947, 115 58
Deduct repayments of moneys	14, 266, 256 68
	<hr/>
Expenditures, agreeing with Secretary and Register	691, 680, 858 90
Add transfer-warrants and repayments	179, 306, 013 16
Cash Balance in Treasury at close of the year	109, 917, 477 24
	<hr/>
Total as before	980, 904, 349 30

	915, 133 74
Total amount for fiscal year	581, 500, 243 64

Cash Account, Dr.

Balance from last year	1, 035, 064 51
Amount received during the year	224, 086, 194 65
	225, 121, 259 16

Contra, Cr.

Amount destroyed during the year	224, 206, 125 42
Balance on hand July 1, 1871	915, 133 74
Discounts on same	45, 333 76
Notes of National Banks, broken and in liquidation	1, 361, 815 00
	226, 528, 407 92
Statistical matter destroyed during the year	354, 971, 835 72
	581, 500, 243 64

Destroyed as money during the fiscal year	\$224, 251, 459 18
As per last Report	1, 430, 956, 658 49
	1, 655, 208, 117 67
Destroyed statistically during the year	354, 971, 835 72
As per last Report	2, 383, 285, 109 52
	2, 738, 256, 945 24
Total	4, 393, 465, 062 91
Certificate of indebtedness as per last Report, (nothing during the year)	592, 905, 350 26
National Bank Notes destroyed during the year	\$1, 361, 815 00
As per last Report	1, 302, 180 00
	2, 663, 995 00

Total amount destroyed to July 1, 1871	4, 989, 034, 408 17
Total of all destroyed during the year	\$580, 585, 109 90
Before	4, 408, 449, 298 27
	4, 989, 034, 408 17

II.—DISCOUNTS, ON MUTILATED CURRENCY.

1.—Discounts for missing parts of mutilated currency destroyed to July 1, 1871.

On Old Demand Notes	\$2, 118 00
On Legal-Tender Notes, new issue	88, 906 50
On Legal-Tender Notes, series of 1869	374 00
On One-Year Notes of 1863	237 00
On Two-Year Notes of 1863	152 50
On Two-Year Coupon Notes of 1863	2 50
On Compound-Interest Notes	480 00
On Fractional Currency, first issue	13, 849 54

On Fractional Currency, third issue	87, 100 87
On Fractional Currency, fourth issue, first series	2, 728 80
On Fractional Currency, fourth issue, second series	134 75
	205, 439 28
On moneys redeemed, but not destroyed	10, 092 11
Total discounts from the beginning	215, 531 39

2.—Discounts by years.

These discounts were made for the amounts and in the years as follows:

In the year 1863.....	\$615 27
In the year 1864.....	11,393 93
In the year 1865.....	13,108 09
In the year 1866.....	17,813 36
In the year 1867.....	24,767 69
In the year 1868.....	31,671 54
In the year 1869.....	38,543 56
In the year 1870.....	44,622 43
In the year 1871.....	32,995 52
	<u>215,531 39</u>

3.—Discount Account.

On moneys destroyed to July 1, 1871.....	\$205,439 28
On moneys destroyed to July 1, 1870.....	160,105 52
Discounts for last fiscal year.....	45,333 76
Discounts on moneys redeemed but not destroyed up to July 1, 1870.....	\$22,430 35
On moneys on hand July 1, 1871.....	10,092 11
	<u>12,338 24</u>
Total amount of discounts for fiscal year.....	<u>32,995 52</u>
Amount discounted before July 1, 1870.....	182,535 87
Amount of discounts for last fiscal year.....	32,995 52
Total of all discounts up to July 1, 1871, as above.....	<u>215,531 39</u>

III.—DESTRUCTION OF PAPER MONEY.

1.—Number of notes destroyed.

There have been destroyed, since the commencement of the rebellion, papers representing moneys as follows:

Old Demand Notes:

Five Dollars.....	4,352,817½
Ten Dollars.....	1,999,618½
Twenty Dollars.....	908,767
Total number of notes destroyed.....	<u>7,261,203</u>

Legal-Tender Notes:

One Dollar.....	22,827,894½
Two Dollars.....	13,218,406
Five Dollars.....	12,791,843½
Ten Dollars.....	6,848,534
Twenty Dollars.....	2,769,195
Fifty Dollars.....	469,608
One Hundred Dollars.....	289,275
Five Hundred Dollars.....	102,518
One Thousand Dollars.....	146,844
Total number of notes destroyed.....	<u>59,464,118</u>

Legal-Tender Notes, series of 1869:

One Dollar.....	709,379
Two Dollars.....	505,632
Five Dollars.....	7,224
Ten Dollars.....	21,181
Twenty Dollars.....	2,716
Fifty Dollars.....	1,179
One Hundred Dollars.....	286
Five Hundred Dollars.....	300
One Thousand Dollars.....	45
Total number of notes destroyed.....	<u>1,247,942</u>

One-Year Notes of 1863:

Ten Dollars	617, 635
Twenty Dollars	818, 938
Fifty Dollars	164, 382
One Hundred Dollars	136, 179

Total number of notes destroyed 1, 737, 134

Two-Year Notes of 1863:

Fifty Dollars	135, 503
One Hundred Dollars	96, 605

Total number of notes destroyed 232, 108

Two-Year Coupon-Notes of 1863:

Fifty Dollars	117, 995
One Hundred Dollars	144, 733
Five Hundred Dollars	80, 596
One Thousand Dollars	89, 285

Total number of notes destroyed 432, 609

Compound-Interest Notes:

Ten Dollars	2, 315, 348
Twenty Dollars	1, 496, 295½
Fifty Dollars	1, 211, 199
One Hundred Dollars	449, 418
Five Hundred Dollars	135, 595
One Thousand Dollars	39, 403

Total number of notes destroyed 5, 647, 258½

Fractional Currency, First Issue:

Five Cents	24, 057, 855
Ten Cents	28, 410, 510
Twenty-Five Cents	16, 637, 853
Fifty Cents	15, 224, 105

Total number of notes destroyed 84, 330, 323

Fractional Currency, Second Issue:

Five Cents	41, 660, 463
Ten Cents	52, 341, 827
Twenty-Five Cents	27, 512, 513
Fifty Cents	11, 520, 696

Total number of notes destroyed 133, 035, 499

Fractional Currency, Third Issue:

Three Cents	16, 846, 964
Five Cents	10, 348, 118
Ten Cents	153, 802, 547
Fifteen Cents	11
Twenty-Five Cents	117, 751, 880
Fifty Cents	69, 487, 106

Total number of notes destroyed 368, 236, 626

Fractional Currency, Fourth Issue, First Series:

Ten Cents	79, 291, 993
Fifteen Cents	12, 322, 049
Twenty-Five Cents	45, 278, 342
Fifty Cents	15, 170, 982

Total number of notes destroyed 152, 063, 366

Fractional Currency, Fourth Issue, Second Series:	
Fifty Cents, (all during fiscal year).....	12, 601, 478
Total number of notes destroyed.....	12, 601, 478
Coin Certificates:	
Twenty Dollars.....	44, 015
One Hundred Dollars.....	110, 096
Five Hundred Dollars.....	17, 542
One Thousand Dollars.....	59, 793
Five Thousand Dollars.....	64, 552
Ten Thousand Dollars.....	2, 500
Total number of notes destroyed.....	298, 498
Coin Certificates, series of 1870:	
Five Hundred Dollars.....	3, 116
One Thousand Dollars.....	7, 606
Five Thousand Dollars.....	3, 272
Ten Thousand Dollars.....	2, 371
Total number of notes destroyed.....	16, 365
Notes of National Banks in liquidation:	
One Dollar.....	46, 636
Two Dollars.....	15, 502
Five Dollars.....	283, 639
Ten Dollars.....	63, 085
Twenty Dollars.....	16, 438
Fifty Dollars.....	1, 823
One Hundred Dollars.....	1, 174
Total number of notes destroyed.....	428, 297
2.—Number of notes of each kind destroyed during the fiscal year.	
Old Demand Notes.....	1, 184
Legal-Tender Notes, new issue.....	12, 807, 607
Legal Tender Notes, series of 1869.....	1, 201, 081
One-Year Notes of 1863.....	1, 640
Two-Year Notes of 1863.....	183
Two-Year Coupon-Notes of 1863.....	31
Compound-Interest Notes.....	12, 651½
Fractional Currency, first issue.....	407, 039
Fractional Currency, second issue.....	410, 940
Fractional Currency, third issue.....	21, 339, 840
Fractional Currency, fourth issue, first series.....	105, 257, 622
Fractional Currency, fourth issue, second series.....	12, 601, 478
Coin Certificates.....	13, 548
Coin Certificates, series of 1870.....	15, 116
Total.....	154, 069, 960½
National Bank Notes.....	219, 840
Total.....	154, 289, 800½
Number as per last report.....	672, 743, 022
Total number to July 1, 1871.....	827, 032, 822½

IV.—DESTRUCTION ACCOUNT.

Statement of face-value of money destroyed since 1861.

Old Demand Notes.....	\$59, 935, 612 50
Legal-Tender Notes.....	487, 604, 064 50
Legal-Tender Notes, series of 1869.....	2, 305, 443 00
One-Year Notes of 1863.....	44, 392, 200 00
Two-Year Notes of 1863.....	16, 435, 650 00
Two-Year Coupon-Notes of 1863.....	149, 966, 550 00
Compound-Interest Notes.....	265, 781, 640 00
Fractional Currency, first issue.....	15, 815, 459 50

Fractional Currency, second issue.....	\$19,955,682 10
Fractional Currency, third issue.....	80,584,593 92
Fractional Currency, fourth issue, first series	28,682,583 15
Fractional Currency, fourth issue, second series	6,300,739 00
Coin Certificates	428,213,900 00
Coin Certificates, series of 1870	49,234,000 00
Total destroyed, as money.....	1,655,208,117 67
Total destroyed, statistically	2,738,256,945 24
National Bank Notes	2,663,995 00
Certificates of Indebtedness canceled and destroyed	592,905,350 26
Total amount destroyed to July 1, 1871.....	4,989,034,408 17

V.—REDEMPTION ACCOUNT.

Statement of redemptions of moneys since the beginning.

Moneys destroyed before July 1, 1870.....	\$1,430,956,658 49
Moneys destroyed within the fiscal year.....	224,206,125 42
Discounts on same.....	45,333 76
Total	1,655,208,117 67
Broken National-Bank Notes before July 1, 1870..	\$1,302,180 00
During fiscal year.....	1,361,815 00
	2,663,995 00
Certificates of Indebtedness before July 1, 1870, (nothing since).....	592,905,350 26
Statistical matter before July 1, 1870.....	2,383,285,109 52
During fiscal year	354,971,835 72
	2,738,256,945 24
Total amount destroyed to July 1, 1871.....	4,989,034,408 17
Balance on hand, but not destroyed.....	915,133 74
Total amount redeemed to July 1, 1871.....	4,989,949,541 91

Total amount redeemed	299, 864, 650
Outstanding July 1, 1871	127, 850

Total original issue	299, 992, 500
----------------------------	---------------

Second series, June 15, 1865 :

172 Fifties	\$8, 600
176 One Hundreds	17, 600
24 Five Hundreds	12, 000
9 One Thousands	9, 000

Redeemed during the fiscal year	47, 200
Redeemed previous to July 1, 1870	330, 817, 250

Total amount redeemed	330, 864, 450
Outstanding July 1, 1871	135, 550

Total original issue	331, 000, 000
----------------------------	---------------

Third series, July 15, 1865 :

548 Fifties	\$27, 400
412 One Hundreds	41, 200
45 Five Hundreds	22, 500
3 One Thousands	3, 000

Redeemed during fiscal year	94, 100
Redeemed previous to July 1, 1870	198, 716, 500

Total amount redeemed	198, 810, 600
Outstanding July 1, 1871	189, 400

Total original issue	199, 000, 000
----------------------------	---------------

2.—Recapitulation of all the issues converted and redeemed.

992 Fifties	\$49,600
780 One Hundreds	78,000
87 Five Hundreds	43,500
14 One Thousands	14,000
Redeemed during the fiscal year	185,100
Redeemed previous to July 1, 1870	969,426,250
Total amount redeemed	969,611,350
Outstanding July 1, 1871	475,900
Total	<u>970,087,250</u>

II.—OUTSTANDING.

1.—Statement by series and denominations of Seven-Thirties of 1861 and of 1864 and 1865 outstanding June 30, 1871.

Seven-Thirties of 1861 :

70 Fifties	\$3,500
66 One Hundreds	6,600
6 Five Hundreds	3,000
10 One Thousands	10,000
Total	<u>23,100</u>

First series, August 15, 1864 :

753 Fifties	\$37,650
517 One Hundreds	51,700
53 Five Hundreds	26,500
12 One Thousands	12,000
Total	<u>127,850</u>

Second series, June 15, 1865 :

252 Fifties	\$12,600
359½ One Hundreds	38,950
96 Five Hundreds	48,000
36 One Thousands	36,000
Total	<u>135,550</u>

Third series, July 15, 1865 :

1,023 Fifties	\$51,150
852½ One Hundreds	85,250
54 Five Hundreds	27,000
26 One Thousands	26,000
Total	<u>189,400</u>

2.—Recapitulation of the four series combined outstanding.

2,098 Fifties	104,900
1,825 One Hundreds	182,500
209 Five Hundreds	104,500
84 One Thousands	84,000
Total	<u>475,900</u>

REPORT OF THE REGISTER OF THE TREASURY.

REPORT

OF

THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT,
Register's Office, October 30, 1871.

SIR: I have the honor to submit herewith my annual report of business transacted in this Bureau during the fiscal year ending June 30, 1871.

It will be observed that the amount of work performed in the various divisions does not differ widely from the amount performed in the previous year, and the clerical force will average about the same throughout the year.

The refunding of a part of the public debt has added to the labor of the loan branch, and should success continue to attend your efforts to accomplish that purpose, I shall be under the necessity of asking for an increase of clerks in that division of this office.

It affords me pleasure to bear testimony to the general good conduct and efficiency of those who are employed in the public service in this Bureau.

The chiefs of division, and the general organization of the office, remain the same as at the date of my last annual report.

The report of business transacted is submitted under the different divisions into which the office is divided.

DIVISION OF RECEIPTS AND EXPENDITURES.

The work of this division has been materially increased by the act of July 12, 1870, which provides that unexpended balances of annual appropriations shall only be applied to the payment of expenses properly made within the year, as it necessitates a duplication of accounts on both the personal and appropriation ledgers in all cases, except the appropriation be permanent or indefinite.

The following statement exhibits the work of the division for the year:

The number of warrants issued during the year for civil, diplomatic, miscellaneous, internal revenue, and public debt expenditures, was	19,032
In the preceding year	17,679
Increase	1,353
The number of warrants issued for receipts from customs, lands, direct tax, internal revenue, and miscellaneous sources, was	10,024
In the preceding year	9,561
Increase	463
The number of warrants issued for payments and repayments in the War, Navy, and Interior (Pension and Indian) Departments, was	7,977
In the preceding year	9,927
Decrease	1,950

The number of journal pages required for the entry of accounts relating to the civil, diplomatic, internal revenue, miscellaneous, and public debt receipts and expenditures, was.....	4,027
In the preceding year.....	4,017
Increase	10
The number of drafts registered was	29,186
In the preceding year.....	29,735
Decrease	549
The number of certificates furnished for the settlements of accounts was.....	9,537
In the preceding year.....	6,814
Increase	2,723
The number of accounts received from the offices of the First and Fifth Auditors, and Commissioner of the General Land Office, was	20,984
In the preceding year.....	20,775
Increase	209

The work of compiling the receipts and expenditures of the Government is being kept up as far as the settlement of the public accounts will permit. The manuscript for the fiscal year ending June 30, 1869, will be ready for the printer by the 1st of December next.

A large proportion of the duties of this division consists in furnishing information, and preparing statements and reports on calls made from your office and the several Bureaus of the Departments, and from Congress.

LOAN DIVISION.

The total amount of coupon and registered bonds issued during the year was \$213,842,586 41. The number of bonds was 61,233.

The amount of bonds redeemed, as shown by the books of this office, was.....	\$216,520,312 41
Including amount which, in process of auditing and settling the accounts, had not reached this office at the close of the fiscal year....	63,179,450 00
Exchanges.....	49,807,300 00
Transfers	96,572,362 00
Making total amount canceled.....	426,079,424 41

The following statement shows the number of cases, number and amount of registered and coupon bonds issued and canceled during the fiscal year:

Act March 3, 1863	185	11,900
Two-year 5 per cent. "coupon" Treasury notes :		
Act March 3, 1863	30	3,750
Total number 5 per cent. Treasury notes	1,855	47,960
Coupons attached	27	
Three-year compound-interest notes :		
Act March 3, 1863	311	13,000
Act June 30, 1864	11,140	1,304,380
Total compound-interest notes	11,451	1,317,380
Gold certificates :		
Act March 3, 1863, 29,913 certificates		\$74,512,000

The whole number of notes and certificates received during the year was 43,219, amounting to \$75,877,340.

The whole number of five and six per cent. interest notes (whole) received from the Comptroller, counted, verified, and delivered to the United States Treasurer, was 12,305, amounting to \$365,350.

Of United States seven-thirty coupon Treasury notes there were received, counted, assorted, arranged, registered, examined, and compared, as follows, viz :

	Coupons.	Notes.	Value.
Act July 17, 1861		49	\$6,500
Act June 30, 1864, and March 3, 1865 :			
First series, August 15, 1864		464	43,100
Coupons attached	312		
Second series, June 15, 1865		373	44,450
Coupons attached	195		
Third series, July 15, 1865		1,003	95,500
Coupons attached	564		
Total seven-thirty notes	1,071	1,889	189,550

The whole number of seven-thirty coupon Treasury notes received during the year was 1,889, amounting to \$189,550, with 1,071 coupons attached, the same having been arranged, registered, examined, and compared with the records of the division, properly filed, and deposited in a files-room.

The total number of coupons of the various loans counted, assorted, and arranged numerically, was 4,283,704.

The total number of coupons registered was 5,087,608.

The total number of coupons examined and compared was 10,597,947.

All the redeemed coupons are received in this division, requiring a large portion of the clerical force to complete the necessary arrangements for their final disposition. After being registered and carefully compared, they are packed in boxes, which are labeled, designating the number, denomination, and kind of coupons. A schedule of the con-

pons, by report, is prepared, designating the number of each denomination, loan, when due, the amount of each, and the aggregate of the whole.

The number of exchanged and redeemed bonds received, scheduled, entered in blotters, and registered upon the numerical records, was as follows, viz:

Of the loan of July 17 and August 5, 1861, 9,809 bonds, amounting to \$6,081,150, with 219,948 coupons attached, amounting to \$4,097,511.

Of the loan of June 30, 1864, 21,229 bonds, amounting to \$15,329,750, with 636,796 coupons attached, amounting to \$13,818,184 50.

Of the loan of March 3, 1865, 5,964 bonds, amounting to \$3,578,300, with 187,667 coupons attached, amounting to \$3,374,368 50.

Of the consols of 1865, 109,481 bonds, amounting to \$60,787,350, with 3,283,808 coupons attached, amounting to \$54,869,040.

Of the consols of 1867, 45,589 bonds, amounting to \$7,304,450, with 1,551,123 coupons attached, amounting to \$7,452,072.

These bonds, after a careful examination and comparison with the records, are delivered to a committee authorized to receive them for destruction.

NOTE AND FRACTIONAL CURRENCY DIVISION.

The work of this division has materially increased during the last year, as will appear from the following statement showing the number of notes and amount of fractional currency, Treasury notes, and national-bank notes (of such national banks as are broken or gone into voluntary liquidation) counted, examined, canceled, and destroyed, by burning, during the year, viz:

Denomination.	No. of notes.	Amount.
Postal currency.....	400,000	\$62,000 00
Fractional currency, second issue.....	800,000	91,300 00
Fractional currency, third issue.....	20,824,000	5,072,100 00
Fractional currency, fourth issue.....	116,810,000	24,598,000 00
Legal-tender notes.....	12,677,376	114,137,200 00
Legal-tender notes, series 1869.....	1,103,408	2,076,170 00
Demand notes.....	998	8,360 00
National-bank notes.....	231,819	1,299,229 40
Total.....	152,837,601	147,334,359 40

Discounted money record kept, but not counted, in this division.

Postal currency.....	\$974 83
Fractional currency, second issue.....	934 76
Fractional currency, third issue.....	88,720 77
Fractional currency, fourth issue.....	10,253 76
Legal-tender notes.....	190,948 35
Legal-tender notes, series 1869.....	17,608 15
Total.....	309,440 62

The number of notes counted this year was..... 152,837,601
The number of notes counted last year was..... 115,277,138

Showing an increase of..... 37,560,463

The amount of the notes counted this year was..... \$147,334,359 40
The amount of the notes counted last year was..... 118,116,960 50

Showing an increase of..... 29,217,398 90

TONNAGE DIVISION.

The tonnage of the country, as compared with that of 1870, is as follows:

	1870.		1871.	
	Vessels.	Tons.	Vessels.	Tons.
Registered, (foreign trade)	2,942	1,516,800	2,721	1,425,142
Enrolled and licensed, (home trade)	26,056	2,729,708	26,930	2,857,465
Total	28,998	4,246,508	29,651	4,282,607

The tonnage in "home trade" has increased 126,622 tons, and the tonnage in "foreign trade" has fallen off 91,822 tons. Stated according to the various classes of vessels, the comparison is as follows:

	1870.		1871.	
	Vessels.	Tons.	Vessels.	Tons.
Sailing-vessels	17,534	2,363,086	17,298	2,236,155
Steam-vessels	3,524	1,075,095	3,567	1,087,637
Barges	1,530	240,411	1,472	260,343
Canal-boats	6,410	567,915	7,314	648,472
Total	28,998	4,246,507	29,651	4,282,607

Of the total steam tonnage of the country, amounting to 1,087,637 tons, only 5 per centum is regularly employed in foreign trade.

There appears to have been a total increase during the year ending June 30, 1871, of 604 vessels—34,800 tons.

The sailing tonnage has decreased 78,231 tons; the steam tonnage has increased 12,442 tons; the barge tonnage has increased 19,932 tons; and the canal tonnage has increased 80,557 tons.

SHIP-BUILDING.

The ship-building of the country, for 1870 and 1871, is as follows:

	1870.		1871.	
	Vessels.	Tons.	Vessels.	Tons.
Sailing-vessels	816	146,340	756	97,176
Steam-vessels	290	70,020	302	87,842
Barges	162	29,736	229	46,822
Canal-boats	350	30,256	468	41,386
Total	1,618	276,953	1,755	273,226

The total ship-building, during the year ending June 30, 1871, appears to have been 3,727 tons less than during the preceding year, but there have been 137 more vessels built. This is due to the falling off in the building of large vessels for the foreign trade, and to the increase in the building of barges and canal-boats.

There has been a great falling off in the building of sailing-vessels, and an increase in the building of steam-vessels. The steam tonnage built has been designed almost exclusively for "home trade."

The tonnage built within the limits of the various grand divisions into which the country is divided is as follows :

	TONNAGE BUILT.	
	1870.	1871.
Atlantic and Gulf Coast	170, 116	150, 883
Pacific Coast.....	12, 720	3, 923
Northern lakes	37, 258	44, 377
Western rivers	56, 859	72, 139

The iron ship-building of the country during the past year has been very small in comparison with the iron ship-building of England, which amounted to 256,824 tons in the year 1870. Yet there has been a larger tonnage built in this country than during any previous year, since the termination of the war, as shown by the following table :

Iron vessels built in the United States from 1867 to 1871 inclusive.

	TONNAGE BUILT.				
	1867.	1868.	1869.	1870.	1871.
Sailing-vessels.....	None	None	1, 039	679	2, 067
Steam-vessels.....	None	2, 801	3, 545	7, 602	13, 412
Total.....	None	2, 801	4, 584	8, 281	15, 479

The iron vessels built have been designed almost exclusively for home trade. There have been two iron steamers built on the lakes and four on the western rivers.

The superiority of iron over wood as a building material for steam-vessels seems to have been well established.

THE FISHERIES.

The number of vessels and tonnage engaged in the "cod and mackerel" and "whale fisheries" during the years 1868, 1869, 1870, and 1871 is as follows :

	1868.		1869.		1870.		1871.	
	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.
Cod and mackerel fisheries.....	2, 220	83, 886	1, 714	62, 704	2, 292	91, 460	2, 426	92, 865
Whale fisheries	328	71, 343	311	70, 202	299	67, 954	249	61, 480

Our cod and mackerel fisheries exhibit a fair degree of prosperity, the tonnage thus employed being larger than during any year since the repeal of the bounty on the cod-fishery act of July 28, 1866, and in lieu thereof the substitution of a drawback on imported salt used in curing both mackerel and cod-fish.

The following statement exhibits the tonnage employed in the cod and mackerel fisheries belonging in each State:

State.	Tons.	Per cent.
Massachusetts	63,399	67.8
Maine	22,758	25
Connecticut	3,537	3.8
New York	1,830	2
New Hampshire	934	1
Rhode Island	408	0.4
Total	92,866	100

The district of Gloucester is most extensively engaged in this occupation; her cod and mackerel fleet amounting to 548 vessels, 28,569 tons, showing an increase of 97 vessels, 5,093 tons, since June 30, 1870.

There appears to be a gradual decline in our tonnage employed in the whale-fishery. The entire whaling tonnage of the country is owned at the following ports:

Ports.	Vessels.	Tons.
New Bedford	187	51,442
New London	22	3,877
Barnstable	20	1,939
Edgarton	5	1,854
Salem and Beverly	5	785
Nantucket	5	720
San Francisco	3	602
Sag Harbor, N. Y.	2	261
Total	249	61,469

It appears that 84 per cent. of the total tonnage employed in whale-fishery hails from New Bedford.

REVISION, OF THE LAWS RELATING TO THE REGISTRATION, ENROLLMENT, AND LICENSING OF VESSELS.

Our registration and enrollment laws now in force are substantially the enactments of December 31, 1792, and February 28, 1793. It seems to be very desirable that certain changes should be introduced, both in regard to the method of documenting vessels and in the forms of our records of title. Great improvements can also be made in the manner of keeping marine accounts and transmitting returns of the same to this Department, thus enabling us to preserve more accurately the distinctions as to customs districts, and also as to the home and foreign trade.

BOOKS AND BLANKS.

During the year ending June 30, 1871, there were issued from this office to collectors of customs, upon requisitions, 1,404 blank-books and 118,159 blank forms. There were received from the Congressional Printer 1,130 books and 78,000 blank forms.

The plan of furnishing these supplies to the custom-houses of the country from this office has proved to be highly successful both as a measure of economy and as a means of securing uniformity in the work at the custom-house and in the returns made to the office.

During the past year complete lists have been made of all the docu-

mented vessels of the United States, referring to the records of this Bureau. This has been found to be a practical necessity of the current work.

An alphabetical list of the ports of entry, ports of delivery, and hailing ports of vessels has also been prepared, showing the State and customs district in which each port is situated, together with a full geographical description of the limits of each port and district.

I remain, with great respect, yours, &c.,

JOHN ALLISON,

Register.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

Statement of the number of persons employed in each district of the United States for the collection of customs, during the fiscal year ending June 30, 1871, with their occupation and compensation, per act of March 3, 1849.

TREASURY DEPARTMENT, REGISTER'S OFFICE,
October 30, 1871.

JOHN ALLISON, *Register.*

REPORT OF THE SOLICITOR OF THE TREASURY.

REPORT

OF

THE SOLICITOR OF THE TREASURY.

DEPARTMENT OF JUSTICE,
OFFICE OF THE SOLICITOR OF THE TREASURY,
Washington, D. C., November 23, 1871.

SIR: I have the honor to transmit herewith seven tabular statements, exhibiting the amount, character, and results of the litigation under the direction of this office for the fiscal year ending June 30, 1871, so far as the same are shown by the reports received from the United States attorneys for the several districts. These tables embrace, respectively:

1. Suits on custom-house bonds.
2. Suits on transcripts of accounts of defaulting public officers, excepting those of the Post-Office Department, adjusted by the accounting officers of the Treasury Department.
3. Post-Office suits, embracing those against officers of the Post-Office Department, and cases of fines, penalties, and forfeitures for violation of the postal laws.
4. Suits for the recovery of fines, penalties, and forfeitures under the customs revenue and navigation laws.
5. Suits in which the United States is interested, not embraced in the other classes.
6. Suits against collectors of customs and other agents of the Government, for refund of duties and acts done in the line of their official duty.
7. A general summary or abstract of all the other tables.

An examination of this summary will show that the whole number of suits commenced within the year was 2,116, of which

276 were of class 1, for the recovery of	\$1, 014, 824 09
94 were of class 2, for the recovery of	3, 606, 661 06
193 were of class 3, for the recovery of	69, 950 09
518 were of class 4, for the recovery of	7, 452, 209 98
610 were of class 5, for the recovery of	460, 955 79
425 were of class 6.	

Making a total sued for, as reported, of.....	12, 604, 601 01
---	-----------------

Of the whole number of suits brought, 493 were decided in favor of the United States; 24 were adversely decided; 387 were settled and dismissed; in 9, penalties were remitted by the Secretary of the Treasury; leaving 1,203 still pending. Of those pending at the commencement of the year, 566 were decided for the United States, 183 were decided adversely, and 1,142 were settled and dismissed. The entire number of suits decided or otherwise disposed of during the year was 2,804; the whole amount for which judgments were obtained, exclusive of decrees *in rem*, was \$1,188,469 17, and the entire amount collected from all sources was \$1,289,929 06.

The following tables exhibit a comparative view of the litigation of the last year and the next preceding one:

Date.	In suits commenced during the fiscal years ending June 30, 1870, and June 30, 1871.							
	Aggregate sued for.	Aggregate in judgment for the United States.	Collected.	Decided for the United States.	Decided against the United States.	Settled and dismissed.	Remitted.	Total number of suits brought.
June 30, 1870	\$5,367,007 44	\$73,388 24	\$231,884 71	388	11	261	32	1368
June 30, 1871	12,604,601 01	280,410 97	586,271 76	493	24	387	9	2116

Date.	In suits commenced prior to the fiscal years ending June 30, 1870, and June 30, 1871.					Proceedings in all suits.			
	Aggregate of judgments in old suits.	Decided for the United States.	Decided against the United States.	Settled and dismissed.	Collections in old suits.	Total number of suits disposed of.	Whole number of judgments in favor of the United States.	Whole amount of judgments.	Whole amount collected.
June 30, 1870	\$109,004 92	123	83	422	\$245,140 66	1320	511	\$279,393 16	\$477,025 37
June 30, 1871	908,058 20	566	183	1142	703,657 30	2804	1059	1,158,469 17	1,289,929 06

I have to remark that the suit of the United States against the Nashville and Chattanooga Railroad Company, brought in the middle district of Tennessee prior to the fiscal year, was during the year compromised by the Secretary of War, under the act of Congress approved March 3, 1871, the United States receiving bonds of the said company to the amount of \$1,000,000, secured by mortgage on the road, &c., in settlement of the suit. This amount is, however, not included in this report as a collection.

I am, very respectfully,

E. C. BANFIELD,
Solicitor of the Treasury.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

No. 1.—*Report of suits on custom-house bonds instituted during the fiscal year ending June 30, 1871, in the several United States courts, and of proceedings had during said period in suits which were instituted prior thereto.*

REPORT OF THE SUPERVISING ARCHITECT.

REPORT

OF

THE SUPERVISING ARCHITECT OF THE TREASURY.

TREASURY DEPARTMENT,
OFFICE OF THE SUPERVISING ARCHITECT,
November 17, 1871.

SIR: I have the honor to submit the following report of the progress of the various works, with the construction, repair, or improvement of which this office has been charged, and also of the condition of the public property under its supervision, together with some recommendations in regard thereto.

Since the date of my last report, the only new buildings that have been commenced are the court-house and post-office at Columbia, South Carolina, and the custom-house and post-office at Machias, Maine. Work has been resumed on the custom-house at New Orleans, Louisiana, St. Paul, Minnesota, and the marine hospital at Chicago, Illinois, and has been continued on the custom-houses at Charleston, South Carolina; Knoxville, Tennessee; Cairo, Illinois; Omaha, Nebraska; Portland and Astoria, Oregon; the branch mint at San Francisco, California; the court-house and post-office at New York, and the post-office and treasury building at Boston, Massachusetts.

The custom-house at Portland, Maine; the court-houses and post-offices at Des Moines, Iowa; Portland, Maine; and Madison, Wisconsin; appraiser's stores at Philadelphia, Pennsylvania; and the assay office at Boise City, Idaho, have been completed, furnished, and are now occupied. The custom-houses at Alexandria, Virginia; Detroit, Michigan; New Bedford and Newburyport, Massachusetts; Newark, New Jersey; Portsmouth, New Hampshire; and the court-houses and post-offices at Windsor and Rutland, Vermont; and the marine hospital at Chelsea, Massachusetts, have been thoroughly repaired and remodeled, and are now in good condition. The old custom-house at Charleston, South Carolina, for the repair of which a special appropriation was made, has been refitted, and is now occupied. The addition to, and the remodeling of the custom-house and post-office at Baltimore, Maryland, is now in progress. Repairs, more or less, have been made on the following buildings, viz: Marine hospitals at Key West, Florida, and St. Louis, Missouri; and the custom-houses at Bath and Bangor, Maine; Boston and Barnstable, Massachusetts; Buffalo, New York; Cleveland, Ohio; Eastport, Maine; San Francisco, California; Cincinnati, Ohio; Erie, Pennsylvania; Galveston, Texas; Mobile, Alabama; New York, New York; Norfolk, Virginia; Oswego, New York; Pensacola, Florida; Pittsburgh, Pennsylvania; Philadelphia, Pennsylvania; Providence, Rhode Island; St. Louis, Missouri; Wilmington, North Carolina; the court-houses and post-offices at Boston, Massachusetts; Indianapolis, Indiana; New York, New York; and the marine hospitals at Cleveland, Ohio; Detroit, Michigan; and Portland, Maine.

The following appropriation was made at the last session of Congress, viz:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be constructed a suitable building, fire-proof, at Trenton, New Jersey, for the accommodation of the post-office, United States circuit and district courts, pension, and internal revenue offices; and for this purpose there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, one hundred thousand dollars, to be expended under the direction of the Secretary of the Treasury, who shall cause proper plans and estimates to be made, so that no expenditure shall be made or authorized for the full completion of said building beyond the amount herein appropriated.

Under the authority conferred by this act, offers of sites for the building were solicited by advertisement. After a full examination, it was found that a suitable lot could not be obtained for less than \$45,000. As the appropriation expressly stipulated that no expenditure should be made or authorized for the full completion of the building beyond the sum of \$100,000, and as it was so manifestly impossible to erect such a building as the act required for \$55,000, (the balance that would remain after paying for the site,) no further action could be taken by the Department, even payment of the bills for advertising being estopped by the provisions of the act itself, they are still unpaid. This result was anticipated by this office, and vindicates the opinions uniformly expressed by me, that the building could not be erected for the sum it was proposed to appropriate. In this connection I desire to again call attention to the fact that it is impossible to reduce the cost of work below its intrinsic value by limitations on appropriations. Such limitations operate, as in the present instance, as a practical repeal of the appropriation, if respected, or in applications for deficiencies if ignored or evaded. No other result ever has been or ever can be obtained. If it were possible to reduce the market value of labor and materials by legislation, the object sought for could undoubtedly be attained, but not otherwise.

I would also, in this connection, call attention to the appropriation for the construction of the court-house and post-office at Columbia, South Carolina. An appropriation of \$75,000 was made on the 3d of March, 1869, for the commencement of work without any other limitation than that a suitable site should be given by the citizens. Under this authority plans were prepared and approved by the Secretary of the Treasury, Secretary of the Interior, and Postmaster General, as required by law, for a building, the estimated cost of which was \$285,161. This appropriation was afterward carried to the surplus fund under the operation of the act of July 5, 1870, in regard to unexpended balances. The following appropriation was subsequently made, viz:

That the appropriation made March 3, 1869, having been covered into the Treasury, the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be constructed upon the site already given to and owned by the United States, a suitable building, fire-proof, at Columbia, South Carolina, for the accommodation of the post-office and United States circuit and district courts; and for this purpose there is hereby appropriated out of any money in the Treasury, not otherwise appropriated, seventy-five thousand dollars, to be expended under the direction of the Secretary of the Treasury, who shall cause proper plans and estimates to be made, so that no expenditure shall be made or authorized for the full completion of said building beyond the amount herein appropriated.

The original plans contemplated a first-class granite building, three stories in height. These plans have been necessarily abandoned, and the foundation laid for a plain brick building of the same general ground-plan and dimensions, though but two stories in height, and which will be entirely inadequate for the accommodation of the officers for whose use it is intended, for the proper transaction of the public business, and

unsatisfactory to the citizens of Columbia, who gave the property under the assurance that a suitable edifice would be erected; and it will be not only discreditable in itself as a Government building, but conspicuously so, in comparison with the magnificent though unfinished State-house in its immediate vicinity. I cannot too strongly recommend the repeal of the limitation on the cost of this building before the completion of the foundation.

The custom-house at Machias, Maine, will be completed within the amount of the appropriation, but by diminishing the durability of the structure, a light galvanized iron cornice and tin roof having been substituted for the granite cornice and slate roof contemplated by the original design. This saving has been made at the expense of true economy, and with the certainty that both roof and cornice will need renewal within a comparatively short time.

No action has been taken in regard to the new custom-house, court-house, and post-office at St. Louis, Missouri, for which an appropriation of \$300,000 was made July 15, 1870, and renewed on April 20, 1871, that sum being entirely insufficient for the purpose. The building now occupied was erected at a time when labor and material were much cheaper than at present, and cost \$321,987 08; it is entirely too small, is cheaply and poorly constructed, and is in every way unsuitable for the wants of the Government, as I have reported heretofore. To erect a building within the limit of the present appropriation would be but a waste of money. A new building is undoubtedly needed at St. Louis, but should not be commenced unless the Government can afford to spend the amount necessary to produce the proper result.

The work on the custom-house at St. Paul, Minnesota, which was suspended by the limitations placed on the cost of the building in the act of April 20, 1870, has been resumed, (the limitation having been repealed by the act of March 3, 1871,) and is now well advanced. The progress has been, on the whole, satisfactory; the work is of superior quality; and the cost has been less than the amount of any responsible proposal that could be obtained under advertisement. It is expected that the building will be inclosed during the present season, and be completed at an early date, and within the amount of the appropriation. This building would have been finished and occupied during the present year but for the legislation referred to. Charges were made by one Thomas M. Newson, who alleged that the contract for granite had been awarded without competition, and at extravagant rates, and that he, Newson, was both able and willing to furnish granite of equal quality, at much lower prices than were paid the contractor, viz, 65 cents per cubic foot, delivered at the site of the building without any allowances whatever. Although these charges were fully investigated by a committee of Congress, of which Hon. J. C. Churchill was chairman, and although their report entirely vindicated the action of this office, it is gratifying to be able to state that the report is also fully sustained, under oath, by no less a person than Mr. Newson himself, who, since that date, entered into a contract for granite with the Light-House Board, giving bond for the faithful performance thereof, which he subsequently declared, under oath, he was unable to fulfill, though awarded to him at much higher rates than those paid by this office. In his affidavit he states that he had no quarry, but owned land on which granite existed in large quantities and from which he expected to obtain it with very little expense of stripping or cost of opening; that, upon trial and working, the rock on the outside of the quarry proved fractious, and that every piece was spoiled by splitting; that after the quarry was fully opened he found it

impossible to quarry stone for less than one dollar per foot; that he had entered into a contract to furnish and deliver at \$1 25 per foot; but that, so delivered, its net cost to him would be \$2 10 per foot; that to comply with his contract would involve a loss of \$23,000, which would be ruinous to himself and others, and that he based his bid on the opinion of other persons, having himself no knowledge of the business.

This case is worthy of record as a specimen of the kind of evidence on which the charges against the management of this office have been based, and as an illustration of the correctness of the statement made in my last report, "That bonds are unnecessary in contracting with honorable and responsible men, and utterly worthless as a protection against rogues and shysters; thus placing the honest, *bona fide* bidder at the mercy of the dishonest and irresponsible one."

Work on the marine hospital at Chicago, Illinois, which was suspended at the same time and under the same conditions as at St. Paul, was resumed early last spring. It has been pushed forward with great energy, and will be finished at an early day, and would have been completed within the amount of the original estimates and the limitations of law but for the damage done to the building during the suspension of the work and the loss of material and increase in prices caused by the late fire, which the superintendent estimates at \$14,060 50. The only result attained by the suspension of work on these buildings has been the complete vindication of this office against the charges made, a demonstration that its estimates were correct and its prices low, and a direct increase in cost to the Government.

In my last report I expressed the opinion that no expenditure on the custom-house at New Orleans, Louisiana, could make it a suitable, convenient, or creditable building. Since then much labor and time have been expended in the preparation of plans for its completion. It gives me great pleasure to report that the work of completing it is progressing in a satisfactory manner, and that alterations and improvements have been made that, while materially reducing the cost of finishing the building, have at the same time greatly increased its convenience, and they certainly do not detract from, if they do not improve, its external appearance. The first or basement story is now nearly completed. As the business of the port is steadily increasing, I would strongly recommend that an appropriation for the completion of the building be made without any further delay. It will, when finished, though devoid of beauty, be a permanent and substantial structure, and will accommodate all the branches of the public service.

The progress of work on the court-house and post-office in New York City has been not only gratifying but its cost has been kept within the amount of the estimates. The first story is now nearly completed. An idea of the immense amount of work that has been done may be formed from the following statement of materials used, and labor expended, to the present time, viz: 2,476,960 bricks; 15,701 barrels cement; 144,087 feet cube granite; 2,689 yards rubble masonry; 5,206,443 pounds of wrought and cast iron. And the magnitude of the undertaking, from the fact that there are now engaged at Dix Island 1,002 persons in the preparation of the granite alone, of whom 704 are employed in cutting the granite for the Government, and 298 in quarrying the stock and otherwise for the contractors. Three hundred and twenty-seven thousand one hundred and sixty-nine and one-half days' labor have already been expended in cutting and boxing the granite after it has been quarried; and it is estimated that three hundred thousand days' labor will

be required to complete that branch of the work alone. The fidelity and capacity that have been exhibited by the superintendent, the Hon. Calvin T. Hulburd, cannot be overestimated or too highly praised. I see no reason whatever to doubt that the building will be completed within the limit fixed by law.

The nature of the soil required that the foundations for the New York post-office should be laid at a depth of 33 feet below the level of the sidewalk, and that sheet-piling should be used to the entire depth, while at Boston the same result was attained at a depth of 19 feet, and without any unusual precautions. The latter building is therefore much further advanced than the former, the second story being nearly completed. The progress of this work is highly gratifying to the Department, and in the highest degree creditable to the superintendent, Gridley J. F. Bryant, esq., though he has been considerably delayed by the legal proceedings referred to in my last report, which were found necessary to procure the additional property required, the lot originally purchased being inadequate for the site of the building. These questions have, however, been satisfactorily adjusted by the condemnation of the property at its appraised value, under a special act of the State of Massachusetts, all other attempts to procure the property at a fair price having failed. For this result the Government is mainly indebted to the untiring energy and perseverance of the postmaster, Gen. W. L. Burt. No further delay in the prosecution of the work is anticipated; and should the expectations of this office be realized, the building will be ready for occupancy by the Post-Office Department during the summer of 1872.

The progress of the work on the branch mint at San Francisco, California, has been satisfactory, and it will, unless any unforeseen obstacle should occur, be completed during the ensuing season. The estimates for this building, as for all others on the Pacific coast, were prepared on the basis of disbursements in coin. The Department having, however, decided that all payments must be made in currency, the amount of the appropriation must be increased accordingly. With this addition, the estimates will, it is believed, be found correct, and the work be finished at an early day, and as soon as the necessary machinery for the building can be completed, for which an appropriation must be obtained. This building has been designed as an earthquake-proof as well as fire-proof structure, and no pains spared to make it as permanent and substantial as possible. It is believed that success has been attained. The management of the superintendent, W. P. C. Stebbins, esq., has been highly creditable to him, and satisfactory to the Department.

The management and progress of the work on the custom-house at Astoria, Oregon, have been satisfactory; and had a sufficient appropriation been made, the building could have been inclosed during the past season. The cost of the work has been materially reduced, and, should no unforeseen difficulty occur, it will be finished for \$10,000 less than originally estimated.

The progress of the work on the custom-house at Portland, Oregon, has been unsatisfactory, great trouble having been experienced in obtaining stone, the contractor being unable to fulfill his contract within the time specified, being neither conversant with the business nor possessed of the necessary capital to prosecute the work in a proper manner. The result is a fair illustration of the results of awarding contracts to the lowest bidder, irrespective of their ability. These difficulties have been in part, at least, overcome, and there is no good reason why the building should not be completed at an early day.

Great difficulty has been experienced in obtaining the services of competent mechanics at Knoxville, Tennessee, and considerable annoyance and embarrassment has been thereby caused to the Department. The marble of which the exterior of the building is erected justifies the expectations formed in regard to it, both as regards quality and cost. The building will be, when completed, one of the most substantial and permanent owned by the Government.

Work on the custom-house at Omaha, Nebraska, is progressing as rapidly as the limited appropriation permits, the first story being nearly completed. In this connection I desire to call attention to the impossibility of completing the building within the amount of appropriation, according to the original plans, which contemplated a three-story building, with an attic, and which were prepared under the direction of, and approved by, the Secretary of the Treasury, Secretary of the Interior, and Postmaster General, in accordance with law. The restrictions subsequently imposed will compel the completion of the building as a two-story structure. This will not furnish sufficient room for the proper transaction of the public business, and will necessitate an extension at no distant day, and at a greatly increased cost. It is not probable that another public building will be needed in the State of Nebraska for many years to come; and I cannot too urgently recommend that the present building should be constructed of sufficient capacity to meet the wants of the public service.

The resumption of work on the custom-house at Charleston, South Carolina, has proved an undertaking of unusual difficulty, many of the plans having been destroyed during the war, as well as a large portion of the valuable material that was intended for its construction. A large amount of marble work, some completed, and the remainder in various stages of completion, was stored on the premises and at the quarry at Hastings, New York. Much of it was seriously damaged and has required great care and judgment to utilize it, for which the superintendent is entitled to great credit. The quarry from which it was taken was abandoned some years since and subsequently filled up. The cost of reopening it being considered too great to warrant the expenditure, the building will be completed with marble from the quarries at Tuckahoe, New Jersey, the material being of the same character, and so nearly identical that it is believed that the change cannot be detected. The former contract for the supply of marble being unsatisfactory to the Department, it gives me great pleasure to report that the contractor, Edward Learned, jr., esq., has surrendered the same, and is now furnishing the material upon conditions that are entirely satisfactory to the Government. The plans under which the building is now being constructed will, it is estimated, reduce the cost of completion \$470,274 99, without detriment to its appearance, capacity, or convenience. The expenditures on this building prior to the war can be fitly characterized by the epithet of reckless extravagance, the workmanship, though fine, being apparently designed as a mere excuse for the expenditure of money. It may be worthy of remark that the management of this building, like the Boston and New Orleans custom-houses, was under a special commission.

The extension of the custom-house at Baltimore, Maryland, in order to provide accommodation for the post-office in that city, was authorized by the act of July 15, 1870, which appropriated \$20,000 for the purpose. This extension is now nearly completed and will be a great improvement to the building and a relief to the over-crowded employes. The great increase of the Government business in this city demanded

still further relief; it was therefore determined to utilize the large and beautiful rotunda of the building, heretofore vacant, by fitting it for customs purposes. Offices for the use of the assistant treasurer are now in course of preparation, and fire and burglar-proof vaults are now being constructed. Plans for the permanent improvement of the building have been prepared, which, if carried out, will, it is believed, provide all the accommodation that will ever be required by the Government in that city, as well as a handsome and convenient building. I strongly recommend that the necessary appropriation be obtained and the work completed as soon as practicable. I also renew the recommendation contained in my last report in regard to the purchase of the Merchants' Bank property, if it can be obtained at a fair price.

I desire you to renew the recommendations contained in former reports in regard to the unfinished marine hospital at New Orleans, Louisiana. It is situated in one of the most unsuitable and unhealthy localities that could have been selected. It was, when purchased, a palmetto swamp, and, though it has been since partially drained, is much more suitable for cemetery than hospital purposes. The building is an immense structure of cast iron, and has already cost \$528,134 34. The lowest estimate of the cost of completion that can fairly be made is \$200,000. A fine and convenient pavilion hospital of ample size could be erected for a sum not to exceed \$75,000, exclusive of the site, which should be situated on the banks of the river, either immediately above or below the city. In my last report I recommended the transfer of Sedgwick Hospital to the marine hospital establishment, it being no longer needed for military purposes. No action having been taken by Congress, this fine and admirably arranged establishment, which cost the Government upward of \$800,000, and which was in good condition, was sold at public auction and realized but the nominal sum of \$9,305 75, the land on which it was erected being held on a lease, and not owned by the Government. The material in the present hospital building is valuable, and though it is yearly depreciating from neglect and decay, could undoubtedly be sold for enough to erect a suitable and commodious pavilion hospital, thereby effecting a direct saving of not less than \$200,000. I strongly recommend that authority be obtained to dispose of the building and land, either together or separately, and to purchase a new site and erect a suitable building with the proceeds.

Sealed proposals for the wreck of the marine hospital at San Francisco, which has been vacant since the earthquake of October, 1868, were invited by public advertisement. The highest offer that was obtained was but \$1,560 coin. This result being unsatisfactory, all the bids were rejected, and the superintendent of the new mint in that city directed a careful examination of the building, and an estimate of the value of the material it contained, with a view to wrecking the building and disposing of the material. The result of his investigation being unsatisfactory, no further action has been taken. Considerable and unfavorable comment has been elicited at the low prices offered for the old material contained in this wreck. It was not, however, entirely unexpected to me, though considerably below my estimate of its value, the bricks of which it was constructed being, as I have previously reported, of little or no value, being made with salt water, and imperfectly burned. The result fully vindicates the opinion expressed of the worthless character of the structure and the inexpediency of making any further repairs upon it. I desire to renew my recommendations in regard to the erection of a pavilion hospital on one of the Government reservations near the city, to be selected hereafter.

Plans have been prepared that will afford ample and excellent accommodation at a total cost of \$58,789 56, to which sum the expenditure may be safely restricted.

The marine hospital building at Pittsburgh is in bad condition, and needs a much larger expenditure for repairs and improvements than is, in my opinion, justified by the value of the building. Since it was erected the property immediately adjoining has been occupied by iron-works, which, while increasing the intrinsic value of the property, have injured it materially for hospital purposes. The supervising surgeon recommends the sale of the property, the purchase of a more eligible site, and the erection thereon of a hospital on the pavilion system. I fully concur in this opinion, for economical as well as sanitary reasons, and feel confident that a suitable site and a convenient and satisfactory building can be purchased and erected for the value of the present property, thus saving the entire cost of the necessary repairs, which are estimated at upwards of \$25,000. I also desire to renew my recommendation that the smaller marine hospitals be disposed of, and that hospitals be maintained by the Government at the principal ports only. Most of the buildings now owned by the Government were constructed at a time when little knowledge existed, and less attention was paid to sanitary construction. They were also, as a rule, cheaply constructed, and badly planned. As a consequence they are in constant need of repairs, and are, at the best, unsatisfactory and unsuitable structures. The practice of leasing is not satisfactory in the results to the buildings, and greatly increases the amount of cost for repairs. I believe the interests of the Government will be better subserved by the sale of those that are not of sufficient importance to warrant their management by the Department.

The opinions expressed in the following extract from my report of September 30, 1866, viz, "I regret to report that the custom-house building at Portland, Maine, which has been considered strictly fire-proof, was irreparably injured by the disastrous conflagration in that city, and must be rebuilt from the foundation-walls. The total destruction of its contents was only prevented by the strenuous efforts of some persons who were overtaken by the fire, and were unable to leave the building, where they barely escaped with their lives. The experience in this case has proved conclusively that stone and iron structures, however carefully constructed, offer no successful resistance to a large conflagration, and that all Government buildings should be isolated by wide streets or open spaces," have been fully sustained by the results of the late disastrous fire in Chicago. The custom-house in that city was situated on the southwest corner of Dearborn and Monroe streets, the former of which is eighty and the latter sixty-six feet in width. Its west façade, however, faced Lombard block, which was a fine structure, five stories in height, rising from fifteen to twenty feet above the top of the custom-house, from which it was separated by a narrow street only twenty-seven feet wide. The immediate cause of the destruction of the custom-house was the burning of this block, the flames from which, driven, by the fierce southwest gale prevailing at the time, against the walls of the building, soon destroyed the stonework, warped the iron-work and shutters of the windows from their fastenings, and gave the flames free access to the interior.

The requirements of the Post-Office Department, for whose use the first story of the building was designed, made it necessary to carry the entire interior on cast-iron columns, which, of course, soon yielded to the heat and precipitated the upper floors into the cellar. It has

been supposed that the destruction of the column was caused by the heat evolved from the burning furniture in the post-office. This, I am am satisfied, from a personal examination, was not the case. The columns at the south end of the building, which were not exposed to the fiery blast from the Lombard block, though in immediate contact with the wood-partitions forming the office of the postmaster, assistant postmaster and cashier, remain intact, while those at other points not directly in contact with any wood-work were entirely destroyed. The destruction of the building was, in my opinion, attributable entirely to the intense heat which was forced through the open windows like hot blasts from a smelting-furnace, and which thoroughly fused metal and glass. I feel confident that, had the iron columns been rendered fire-proof, which could readily have been done, the interior construction of the building, as well as the contents of the rooms on the east front, including the vaults of the depository, would have been saved; and had the exterior of the building been protected by fire-proof shutters its contents would have been preserved. Indeed, the contents of one room, at the south end of the building, which was the only one in the second story supported by brick walls instead of iron columns, were uninjured. Had the custom-house been isolated on all sides by streets of equal width with those first mentioned, I do not believe that it would have been seriously damaged. The property on which the building was erected was purchased in 1855 and 1857 for \$60,200, and the building erected within 15 feet of the line of the Government property. In 1865 an arrangement was made with Mr. Lombard, at a cost of \$8,400, by which this space was increased, as above stated, to 27 feet. At the time the building was erected there was no difficulty in obtaining all the land that was desired at a low price; and I believe that for an additional sum, not to exceed \$30,000, an ample lot could have been secured and the destruction of the building in all probability averted. If this was an exceptional case some excuse might be offered for the selection of so small a lot; but it has been the rule instead of the exception: One entire side of many of the most important buildings erected prior to 1860 is practically worthless, from the absence of light, due to the smallness of the lot and the proximity of lofty buildings which entirely overshadow them and cut off the light; and under the same circumstances as at Chicago they will share a similar fate.

In this connection I would call the attention of the Department to the necessity for such legislation as will enable the Government to condemn any land that is absolutely needed for the preservation of the buildings now owned by the Government, or for the acquisition of suitable lots for those hereafter to be erected. The experience at Boston has shown that the Department is at present at the mercy of any property-owner, should he desire to use the necessities of the Government for speculative purposes, and that condemnation is the only remedy. In my last report I called attention to the fact, that although the entire space within the custom-house building at Chicago, including the cellar, had been occupied, it was still entirely inadequate for the transaction of the public business, the postal business alone in that city having increased over 80 per cent. during the past three years. The fire has been productive of a still further increase, and it would now be impossible to accommodate that department in the building, even were it desirable to attempt its reconstruction. The increase of the customs business, by reason of direct importations of dutiable merchandise from foreign countries under the provisions of the act of July 14, 1870, has been even greater, with every prospect that it will continue to augment for years to come.

Under all the circumstances I believe that the necessities of the Government require the purchase of the remainder of the block on which the custom-house building is located, and the erection thereon without delay of a building of sufficient capacity to accommodate all the branches of the Government service in that city.

The completion of the granite dock on the Battery in New York City renders a decision in regard to a new barge office imperative, as it will be of little or no practical value to the revenue department, for whose use it was principally intended, until a suitable building is erected thereon. In this connection I again call attention to the importance of securing the whole or a portion of the Battery as a site for the erection of a new custom-house, and other buildings for the use of the revenue department in that city. The present buildings are overcrowded and unsuitable, and with the increasing of business of that port cannot much longer be used. The Battery is the natural and only suitable location for such structures, and should be secured before it is too late. I respectfully suggest that authority be obtained from Congress for a full and thorough investigation of this subject.

I also desire to call attention to the importance of erecting appraisers' stores in that city. The building now occupied is not only unsuitable for the examination and appraisal of goods, or for their safety while in the custody of the Government, but for the accommodation of its officers and the public. The enormous increase in that branch of the public business can be well illustrated by a comparison of the receipts of the months of August and September, of the present year, with the corresponding period in 1869 and 1870. The number of packages received is as follows, viz:

Receipts in August, 1869, were	15,592
Receipts in September, 1869, were	14,875
	<u>30,467</u>
Receipts in August, 1870, were	16,873
Receipts in September, 1870, were	19,293
	<u>36,166</u>
Receipts in August, 1871, were	23,790
Receipts in September, 1871, were	23,427
	<u>47,217</u>
The total receipts for 1869	161,866
The total receipts for 1870	200,461
The total receipts for nine months of 1871	173,916

which shows an increase, during the present year, of $30\frac{1}{2}$ per cent. Unless some definite action is taken soon, the rent, which amounts at present to \$66,003 25 per annum, must be increased, and additional accommodations procured elsewhere. If the present system of renting is continued for the next ten years, the Government will pay more than the value of a suitable building and site, without even then obtaining facilities for the transaction of its business or any adequate security for the goods in its custody. I believe few expenditures are more urgently demanded by the necessities of the Government than this. I also desire to call special attention to the great importance of providing similar stores at the ports of Boston, Chicago, Cincinnati, and St. Louis, all of which should be fire-proof—not only in name, but in fact—which can readily be accomplished in buildings of that character, and at a moderate cost. The appraisers' stores at Philadelphia and Baltimore are located in

well-constructed buildings of brick and iron, the former being, in my opinion, absolutely fire-proof, and the latter requiring nothing but the addition of fire-proof doors and shutters to make them equally so. This branch of the public service is well provided for in the custom-houses at New Orleans, Charleston, Savannah, Portland, and many minor ports.

I would again recommend the sale of the United States Mint buildings at New Orleans, Louisiana, and Charlotte, South Carolina, neither of which are required for the use of the Government. And I would again urge the passage of an act authorizing the Department in its discretion to dispose of such public property under its charge as may no longer be required for government purposes. Such a law would greatly facilitate the business of the Department, and obviate the necessity of obtaining special legislation in each case.

I also desire to call special attention to the necessity for a decision in regard to the quarantine buildings and property now owned by the Government. It appears to me that an effective quarantine by State authorities is, in the present condition of inter-communication, impossible, and that if a quarantine is to be maintained, it should be under the direction of the General Government. It needs no argument to prove that a quarantine at the port of New York, however strict, without a quarantine at the adjoining ports, would be of no avail, as infected passengers and merchandise could be landed in the adjoining States, and transported by rail to that city almost as quickly as they could pass the ordinary examination and be landed at the wharf in that city. Should it be deemed expedient to place the matter under charge of the General Government, the quarantine property should be placed in good condition, to do which will require the expenditure of a considerable sum of money. If, on the other hand, it should be deemed desirable to leave the enforcement of quarantine in the hands of the State authorities, it appears to me that they should provide proper facilities for carrying into effect their own laws, and that the Government should not be expected to bear the expense of a quarantine over which it has no control.

The change in the grade on the east front of the Treasury building necessitated the reconstruction of the sidewalks and approaches on that front, as well as the underpinning of a large portion of the building. This work is now nearly finished, and will be completed at a cost considerably within the amount of the estimate and the appropriation. I cannot refrain from expressing my regret that so much money was expended on the only portion of the building that cannot be considered permanent, convenient, or suitable. I would respectfully renew my recommendation for the condemnation of the property on the opposite side of the street, as explained in my report for the year 1868, and feel sure that the plan must ultimately be adopted, and that each year's delay but increases the value of the property that must eventually be purchased. In addition to the architectural reasons that necessitate this change, the enormous value to the Government of the Treasury building and its contents, and the irreparable loss to the country that its destruction would involve, no possible precaution for its preservation should be omitted; and, though I do not believe it probable that it will ever be subjected to the ordeal, I am by no means certain that it would escape unscathed from the effects of a conflagration on the east side of Fifteenth Street, under similar conditions as existed at Chicago, the windows and sash of the old portion of the building being of ordinary wooden construction, and the entire building without shutters.

I also desire to renew my recommendation that an appropriation be obtained for additional coal-vaults, and a sub-way for the receipt of fuel

and the removal of ashes on the west front; also, the abandoning of the inclined cartway and the narrowing of the area on that front, which disfigures its magnificent façade and suggests the combination of a palace and a manufactory. These improvements would complete the north, south, and west wings in a permanent and creditable manner, and involve the expenditure of but \$30,000.

I desire to call attention to the fact that it is impossible to comply with the requirements of the fifth, sixth, and seventh sections of the act of July 12, 1870, in regard to unexpended balances, as interpreted by the First Comptroller of the Treasury, who is vested by law with authority to determine the effect of its provisions. It needs no argument to prove that each suspension of work during the progress of a building costs the Government a sum of money, greater or less, in proportion to the magnitude of the undertaking. No saving can result from the application of this law to public works of any kind or description; on the contrary, it is a constant and fruitful source of embarrassment and annoyance; it multiplies the labors and responsibilities of every officer in charge of the construction or repair of public works; increases the clerical labors; complicates the accounts; and results only in an increase of cost to the Government, and a delay in the performance of the duties assigned to such officer. I fail to see any possible benefit to be derived from the application of this law to the class of expenditures to which I have alluded.

The progress and cost of the works under the supervision of this office have during the past year been satisfactory, save in a few instances. Contracts for the supplies of material have been generally made below current market rates, and the cost of the work, as a rule, kept within the estimates. The liberal appropriation made at the last session of Congress for repairs and furniture has enabled the Department to make many necessary repairs, and improve the condition of the public buildings. Expenditures have been judiciously made, and with a view to permanency as well as immediate convenience. The large number of buildings and the pressing necessity that existed for this appropriation has, however, rendered it necessary to make nothing more than temporary repairs on a considerable number, and I earnestly hope that the additional appropriation asked for will be granted. It is undoubtedly far cheaper to keep the buildings in good repair than to restore them from the condition of dilapidation, which has been too generally the case. The appropriation for the pay of janitors and custodians of public buildings has enabled the Department to protect much valuable property from injury; and by keeping its buildings in a creditable condition has greatly added to the convenience and comfort of the public as well as the officers of the Government. It is believed that the direct saving to the Government is more than the amount of the appropriation for this purpose.

I desire once more to enter my protest against the inadequate compensation of the officers, clerks, and employés of this office. The salaries are either too large or too small. If the mere object is to secure the services of persons who desire positions under the Government, they are certainly too high, as occupants for every place can be obtained at much lower rates, who will willingly draw their salary with zeal and regularity. But if the object is to obtain and retain persons who are competent to perform their duties, and whose services are valuable to the Government, they are far too low. The talents and integrity required for the proper transaction of the public business will and do command much higher rates from private individuals and corporations.

Many Government employes holding responsible positions involving large expenditures receive less pay than journeymen mechanics whose responsibilities end with each day's work. This office has, perhaps, been more embarrassed from this cause than any other, many of its employes being men of technical education, whose places cannot readily be filled. I feel it but justice to call special attention to the services rendered by the assistant supervising architect, James C. Rankin, esq., whose capacity, fidelity, and integrity cannot be too highly praised. Mr. Rankin has retained his position thus far at my personal solicitation, with the hope that justice would be done him. I cannot longer hope to retain him, unless his compensation is increased to a degree that approximates the value of the services rendered and the responsibilities of his position.

I also take great pleasure in testifying to the fidelity and industry of the clerks and draughtsmen employed in this office, and my indebtedness to them for the success that has attended my labors during the past year.

In conclusion, I desire to tender you my thanks for the cordial support and assistance, and the uniform courtesy which I have experienced at your hands, and remain,

Yours, very respectfully,

A. B. MULLETT,
Supervising Architect.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

Tabular statement of custom-houses, court-houses, post-offices, mints, &c., under the charge of this office, exhibiting the cost of site, date of purchase, contract price of construction, actual cost of construction, and the total cost of the work, including site, alterations, and repairs, to June 30, 1871.

Nature and location of work.	Date of purchase.	Cost of site.	Contract price of construction.	Actual cost of construction.	Total cost to June 30, 1871.	Remarks.

REPORT OF THE CHIEF OF THE BUREAU OF STATISTICS.

REPORT

OF THE

CHIEF OF THE BUREAU OF STATISTICS.

TREASURY DEPARTMENT,
Bureau of Statistics, October 31, 1871.

SIR: I have the honor to submit the following report of the operations of this Bureau during the fiscal year ended June 30, 1871 :

CLERICAL FORCE.

At the close of the year the clerical force of the Bureau consisted of thirty males and eight females, who were employed as follows :

Division.	Name of chief.	Number of clerks.		
		Males.	Females.	Total.
Examination	J. N. Whitney	4	1	5
Compilation	Thomas Clear	14	3	17
Tonnage and immigration	L. F. Ward	3	1	4
Registry of merchant marine	J. B. Parker	3	1	4
Revision, translation, and miscellaneous	A. W. Angerer	2	1	3
Publication and miscellaneous	James Ryan	1	1	2
Library and files	E. T. Peters	1		1
Stationery, pay, and property	J. D. O'Connell	1		1

In addition to the female clerks above designated, one has charge of the correspondence.

At the present time the clerical force consists of one chief clerk, Mr. E. B. Elliott, (who is, moreover, a member of the permanent board of civil service examiners for the Treasury Department, and also a member of the commission for improving the efficiency of the civil service of the United States,) thirty-one male and nine female clerks, one of the latter being assigned from another Bureau.

WORK OF THE BUREAU.

Owing to the peculiar and varied character of the work performed in the Bureau, it is impossible to furnish a tabular exhibit which shall indicate its nature and extent.

Examination.—In the division of examination, for example, the following work was performed :

Number of pages of letters written	5,259
Letters acknowledged	2,031
Acknowledgments of statements written	5,387
Statements examined	18,940
Statements called for	741
Statements corrected by correspondence	1,360

The above figures give, however, a very inadequate conception of the critical and elaborate examination of the various monthly and quarterly

returns from the various custom-houses, or of the variety of work of a miscellaneous character performed in that division.

Compilation.—The same remark is applicable to the division in which the clerks are employed in the compilation of statistics of commerce. This division is subdivided into sections, embracing statistics of home consumption, indirect and intransitu trade, and warehouse statistics, of which sections Charles H. Evans, J. D. O'Connell, and Miss M. A. Spencer are the respective chiefs.

Immigration and navigation.—The statistics of navigation are now published monthly, instead of quarterly, as heretofore, involving additional labor in this division, to which is also assigned the collection and digest of the statistics of immigration. Extraordinary, and to some extent successful, efforts have been made during the past year to obtain and publish accurate statements of the nationality and occupation, as well as the sex, age, &c., of each immigrant. Special efforts have also been made to secure accurate statistics of the departure of emigrants from this country, a task rendered the more difficult, owing to the absence of compulsory legislation on this subject.

Numbering of vessels, tonnage, &c.—The compiling, copying, proof-reading, and distribution of the last annual list of merchant vessels occupied a large portion of the force in this division during the year. Official numbers were assigned to about 3,000 vessels, involving a considerable amount of careful labor in searching the previous records to avoid duplication of numbers, in filling up and forwarding notices to the applicants, entering the awards upon a manuscript list, and the permanent register of the office. Compilations for the monthly and annual reports of the Bureau, the preparation of various statements for Members of Congress and others, with a variety of miscellaneous work, formed part of the operations of this division.

A table exhibiting the number of vessels and amount of tonnage belonging to the several customs districts of the United States on the 30th of June, 1871, geographically classified, is appended to this report. From this it will be seen that the tonnage of the country was, in the aggregate, 4,111,412, a net increase over that at the close of the preceding fiscal year of 165,262 tons.

Revision and translation.—The vast amount of statistics compiled in the Bureau for publication, and in response to requests for information, involves a corresponding amount of labor in revision. As the statistical publications of various countries in continental Europe possess information of great value, the labor of translation previous to publication is not inconsiderable.

Publication, library, and miscellaneous.—The work performed by the chiefs of these divisions and their assistants is of too varied a character for detailed notice. It is sufficient to say that the duties of these officers are responsible and onerous.

PUBLICATIONS OF THE BUREAU.

Monthly reports of commerce and navigation.—The monthly reports of this Bureau have, during the year, been regularly published. Compiled at the earliest date possible after the receipt of the returns, they have been printed as soon thereafter as the arrangements of the Congressional Printing Office would permit. Although it is impossible to obtain and publish the returns as early as is done in England, yet it is satisfactory to know that the necessary delay in publication is compensated by the increased accuracy of these monthly reports. Widely distrib-

uted, as they are, throughout the country, and, to some extent, in Europe, it is unnecessary to append to this report the statements they contain. To render these reports increasingly valuable new features are from time to time introduced, which have hitherto met with general approval.

Annual report of commerce, immigration, and navigation.—Notwithstanding the necessary delay in obtaining, correcting, and compiling the various statements for the annual report—the delay increased by the great amount of labor required at the printing office in the composition and printing of 800 octavo pages of rule and figure work—the volume for the fiscal year 1870 was bound and distributed three months earlier than in previous years; and had it not been for the hindrance which occurred in binding, owing to the pressure of other work, this indispensable collection of commerce and navigation statistics would have been submitted to Congress in December. In consequence of extra exertions, which have again been made, the data for 1871 have been compiled and sent to the Congressional Printing Office at a period sufficiently early to justify the belief that “said report, embracing the returns of the commerce and navigation, the exports and imports of the United States, to the close of the fiscal year, shall be submitted to Congress in a printed form on or before the first day of December,” in accordance with the provisions of the act under which the Bureau was established.

List of merchant-vessels of the United States.—Agreeably to the requirements of the act of July 28, 1866, the third annual statement of “vessels registered, enrolled, and licensed under the laws of the United States, designating the class, name, tonnage, and place of registry,” as well as the official number and signal letters awarded to each vessel, was prepared, and 3,000 copies published. The officers of customs, the commanders of United States war-vessels, and the largest merchant-vessels engaged in the foreign trade, as well as the principal ship-owners, have been supplied with it.

Special Report on Immigration.

This report, including information for immigrants and tables showing the cost of labor and subsistence in the United States, having been compiled during the year, was submitted to the House of Representatives at the session in March last. Congress having adjourned without taking action upon the subject the report was stereotyped, and 3,000 copies printed for distribution in Europe and in this country, at the expense of the Treasury Department.

Comparative tariff tables.—To supply a want long felt, “a comparative statement of the rates of duties and imposts under the several tariff acts from 1789 to 1870,” was prepared and 1,000 extra copies printed for distribution. After the great labor involved in its preparation, it is gratifying to know that its accuracy is almost if not quite absolute, and that it is highly appreciated by those who are best qualified to judge of its value. It forms Appendix A of a “Special Report on the Customs-tariff Legislation of the United States,” which will soon be submitted to you.

USEFULNESS OF THE BUREAU FOR LEGISLATIVE AND OTHER PURPOSES.

During the last two years the services of the Bureau were called into requisition to an unusual extent, and its usefulness recognized by members of both Houses of the national legislature.

While the periodical statements of the trade of the country given in the published monthly reports of the Bureau afforded reliable data for

legislative purposes, those of a miscellaneous character have also furnished a variety of important foreign statistics. The constant calls for statistical information by members of Congress and for commercial and other purposes have been responded to so far as the ability of the Bureau permitted; moreover, it has been the aim of the undersigned to anticipate and provide for the demands for such data.

INDUSTRIAL STATISTICS.

In my last annual report reference was made to the obstacles which prevented the collection and digest of statistics of the manufactures of the United States, which obstacles still exist. Statistics of the manufactures of the United States, giving their localities, sources of raw material, markets, exchanges with the producing regions of the country, transportation of products, wages, and the number of persons indirectly as well as directly supported by the various industries, would be of great practical utility to legislators and to the people at large. While the other great interests, agriculture and commerce, have obtained their due, but not undue, share of attention, manufacturing industry has not received from the Government the consideration to which its importance entitled it.

As the publication of the census returns of the products of industry may soon be expected, it is not deemed advisable at the present time to make extraordinary efforts to obtain information similar in character but necessarily incomplete.

TRANSPORTATION OF PRODUCTS AND MERCHANDISE.

The movement of the crops toward the sea-board and of merchandise into the interior, whether by rail or by canal, lake or river, would, if ascertained and published, afford information of great value. The officers of some of the great lines of railway are convinced of the public utility of such statistics, but in the absence of compulsory legislation on the subject do not feel it compatible with their duty to stockholders to incur the expense which the employment of clerical services for this purpose would necessarily involve.

Additional legislation will probably be necessary before full and satisfactory information in regard to the two subjects above indicated can be obtained.

IMMIGRATION.

The statistics of immigration for the past fifty-one years were given and the value thereof to the country discussed, in the special report on the subject which I had the honor to submit to you in March last. The fact has already been stated that in consequence of the failure of Congress to authorize the printing of extra copies, upward of three thousand have been ordered at the expense of the Treasury Department, for distribution at home and abroad. Although the number supplied to United States consuls and others in Europe was necessarily limited, yet material benefits have already resulted, as evidenced by the increased interest aroused, not only in Ireland and Germany, whence the largest portion of our immigration has been derived, but also in England, France, Belgium, the Scandinavian countries, and to some extent in Italy. The increase in immigration from England within the past two or three years has been decided, reaching to 55,046 in 1869, and 59,488 in 1870, while for the quarter ended June 31, 1871, the arrivals were 21,659.

These embraced more than the usual proportion of professional men, skilled laborers, farmers, and others, bringing with them some capital. From communications received by the undersigned, as well as from information obtained from various other sources, the fact is patent that there is among these classes an eager desire to learn what are the inducements offered by different sections of the country.

In France, owing largely to the distress occasioned by the late war, the desire to emigrate has been greatly stimulated, and many inquiries as to the advantages offered by our country have been made at our consulates. Similar interest has been awakened, and earnest inquiries made, not only in Germany, but in Belgium, Norway, Switzerland, and Italy. The demand for the translation of the report into the spoken languages of Continental Europe, more particularly into the German, Danish-Norwegian, and French, has been of the most pressing nature, not only from those who desire to emigrate, but from a number of diplomatic and consular officers of the United States, who are impressed with the conviction that great benefit would result if each person wishing to emigrate could read in his own language the information which the report embodies.

If the economical value of the immigrant to our country be even approximately so great as is indicated in the report, the expenditure necessary for printing for European distribution an adequate number of copies in the English, German, French, and Norwegian languages, would be more than compensated by the benefits resulting from the increased immigration which such a distribution would necessarily occasion.

It has been represented by the public press, and mentioned in correspondence from Europe, that the fact of the report having emanated from an officer of the National Government inspires a degree of confidence in it which is not reposed in the representations of any State officer, or of an agent of any company having lands to dispose of. This is undoubtedly true; for however honest and truthful these representations may be in regard to the advantages possessed by the particular State or locality in which such officer or agent is interested, he has no motive, and perhaps does not possess the requisite information, to make known to inquirers the advantages of other localities.

BUREAU OF IMMIGRATION.

In the special report already alluded to, at the close of a review of the advantages conferred by immigration, the question was asked, "What are the duties of the Government toward the immigrant?" In reply, it was asserted that among these duties were those of furnishing him with trustworthy information, and affording adequate protection, such services being alike called for by considerations of humanity and the dictates of sound policy. The act to encourage immigration, approved July 4, 1864, having expired by limitation, no such officer as commissioner of immigration now exists, and various duties which seemed to pertain to such an office have devolved upon the chief of this Bureau. The preparation of the information for immigrants, obtained and compiled by the undersigned, and published in the special report already referred to, furnishes a case in point; the statistics of immigration have also been regularly compiled and published by the Bureau of Statistics for a number of years past. Owing to such facts, the officer in charge of this Bureau has apparently been regarded as discharging the functions of commissioner of immigration; and correspondence from Europe, as well as from various parts of our own country, has been

addressed to him in such capacity. Yielding to earnest requests, he attended, in November 1870, the National Immigration Convention at Indianapolis, and more recently, the National Commercial Convention in Baltimore, at which immigration formed a subject of careful consideration. In view of these circumstances, and of the familiarity with various important branches of the subject already acquired by the officers of this Bureau, it is pertinent to inquire whether, by an extension of its powers, it might not be made more useful in this direction; and also, whether the functions for the discharge of which the creation of a bureau of immigration has been proposed, cannot be far more economically performed by utilizing the facilities which this bureau already possesses.

SALARIES OF OFFICERS.

In bearing testimony to the industry and efficiency of the clerks, both male and female, as well as of other employes of this Bureau, I cannot close this report without directing your attention to the low salaries paid to the officers. The chiefs of division and other officers are men of ability and great industry. The duties of some of them require talents of a high order, and involve exhaustive labor. Giving, as they do, the best years of their lives to the public service, and contributing to establish the reputation of the Bureau, in furnishing to the public accurate and trustworthy information, they receive very inadequate remuneration. Some of the clerks of the fourth class, while performing their duties satisfactorily, are exempt from the cares and responsibilities which attach to chiefs of division, and yet the latter receive no greater salary than the former.

It is respectfully urged, therefore, that several of these officers receive the salary of head of division, as provided by law for the office of internal revenue.

It is not, perhaps, improper to remark that the work of the Bureau, although neither smaller in amount nor less reliable in character than in former years, is now performed by fewer clerks and at considerably less aggregate expense, as the following figures will show:

Period.	Average number of officers, clerks, and other employes.	Average monthly salaries.
Year ended March 31, 1869	60	\$6, 531 62
Year ended March 31, 1870	53	5, 824 08
Nineteen months ended October 31, 1870	45	5, 171 38

From the above statement it appears, that for the past nineteen months, as compared with the year ended March 31, 1869, there has been a reduction of the expenditure of the Bureau for salaries at the rate of \$16,323 per annum; less than one-third of which sum, if applied to the increase of the existing salaries, would afford adequate remuneration, not only to the officers indicated, but also to those upon whom the chief responsibilities of the Bureau rests.

I have the honor to be, very respectfully, your obedient servant,

EDWARD YOUNG,

Chief of Bureau.

Hon. GEORGE S. BOUTWELL,

Secretary of the Treasury.

REPORT OF THE DIRECTOR OF THE MINT.

REPORT OF THE DIRECTOR OF THE MINT.

MINT OF THE UNITED STATES,
Philadelphia, September 28, 1871.

SIR: I have the honor to submit the following report of the operations of the Mint and branches for the fiscal year ending June 30, 1871:

DEPOSITS AND COINAGE.

The deposits of bullion at the Mint and branches during the fiscal year were as follows: Gold, \$37,054,202 26; silver, \$5,975,982 54; total deposits, \$43,030,184 80. Deducting from this total the re-deposits, or bars made at one branch of the Mint and re-deposited in another for coinage, the amount will be \$39,137,404 13.

For the same period the coinage was as follows: Gold coin, number of pieces, 1,120,916; value, \$21,302,473; unparted and fine-gold bars, \$13,101,089 42. Silver coin, pieces, 3,664,792; value, \$1,955,905 25; silver bars, \$3,544,180 13; nickel-copper and bronze, pieces, 11,672,750; value, \$283,760; total number of pieces struck, 16,458,458; total value of coinage, \$40,187,409 80.

The distribution of the bullion received and coined at the Mint and branches was as follows:

Philadelphia.—At Philadelphia, gold deposited, \$3,064,733 31; gold coined, \$3,206,760; fine-gold bars, \$129,184 88; silver deposited and purchased, \$1,557,892 50; silver coined, \$1,156,255 25; silver bars, \$143,647 75; nickel-copper and bronze coinage, value, \$283,760; total deposits of gold and silver, \$4,622,625 81; total coinage, \$4,919,607 88; total number of pieces, 13,670,015.

San Francisco.—At the branch mint, San Francisco, the gold deposits were \$25,521,650 56; gold coined, \$24,241,006 23; silver deposited and purchased, \$937,577 89; silver coined, \$908,015 27; total deposits and purchases, \$26,459,228 45; total coinage, \$25,149,021 50; total number of pieces, 2,649,900.

New York.—The assay office in New York received during the year in gold bullion, \$6,345,338 88; in silver bullion, including purchases, \$2,171,120 36; total value received, \$8,516,459 24; number of fine-gold bars stamped, 9,769; value, \$5,461,801 10; silver bars, 10,763; value, \$1,269,501 75; total value gold and silver bars stamped, \$6,731,302 85.

Denver.—At the assay office, late branch mint, Denver, Colorado, the deposits for unparted bars were, gold, \$1,104,147 10; silver, \$18,561 63; total deposits, \$1,122,708 73; an increase of deposits over the last year of \$116,658 47. This is a very gratifying fact, and encourages the belief that, as the mineral resources of the district are developed, the business of this office will be correspondingly increased. It is now

engaged, as last year, in melting, assaying, and stamping gold and silver bullion in unparted bars, bearing the Government stamp of weight and fineness. The assay office, in the performance of its appropriate functions, fully meets all the demands of the mining interests of Colorado.

Charlotte.—The deposits at the branch mint at Charlotte, North Carolina, have not been large, and, I regret to say, are not increasing. The deposits, as heretofore, are assayed and returned to depositors in the form of unparted bars. The deposits for bars during the year were, gold, \$14,522 81; silver parted from gold, \$145 31; total deposits, \$14,668 12; a decrease from last year of \$1,440 48.

Dahlonga and New Orleans.—The branch mints at these places are still closed. As stated in my last report, no necessity exists for their being opened again as assay offices or branch mints.

Carson City.—This branch mint has been in successful operation during the past fiscal year, and the prospects for the future are most encouraging. The deposits during the year were, gold, \$1,003,809 60; gold coined, \$230,715; unparted gold bars, \$731,320 79; silver deposits and purchases, \$1,290,684 85; silver coined, \$52,875; unparted and fine bars, \$1,969,645 05; total deposits and purchases, \$2,294,494 45; total number of pieces, 138,543.

This statement exhibits the gratifying fact that the amount in value of the gold and silver deposits during the year has exceeded that of the past year more than \$2,000,000. The superintendent, in his report, expresses full confidence in the future of that branch. A bullion fund adequate to the exigencies of the business of the Mint has been provided, and full authority has been given to melt, assay, and stamp gold and silver bullion, and return the same to depositors in unparted bars, bearing the Government stamp of weight and fineness. This has largely increased its business and added to its usefulness. The clerical force of this branch is inadequate, and should be increased. The salaries of all the officers and clerks are too small for that locality, and I earnestly recommend an increase of salary and clerical force. The policy of the Government toward this and similar institutions, in their relation to the development of the mineral wealth of our country, should be liberal and generous.

In addition to the increase of business from the assaying and stamping of unparted gold and silver bars, the superintendent in his report says: "To the increased product of the mines throughout the State may also be attributed the enlarged business of the past year. The late rich discoveries of ore at the lowest levels of the Comstock Lode, and the constantly increasing product of the country to the south and east of this city, have materially aided in adding to our business; while on the other hand a reciprocal benefit, both to produce and to the State, has been derived by the location of this institution near the mining centers, and the accuracy and promptitude of its returns."

The suggestions of the report on other subjects connected with the prosperity of this branch are worthy of consideration, and only a want of power prevents their adoption. The report is highly encouraging, and its facts and statements attest the efficiency of its management.

I again refer to the importance of the early completion of the new branch mint at San Francisco, and it is gratifying to know that the work is being prosecuted with energy.

Boise City.—The assay office at Boise City, Idaho, will soon be prepared for active operations. The building is erected, and the apparatus and appliances necessary for such an institution nearly ready. It is

hoped that this office, in its appropriate work, will greatly aid and encourage the efforts made to discover and increase the production of the precious metals.

REDEMPTION OF COPPER AND NICKEL-BRONZE COINS.

The redemption of the nickel copper cents in exchange for the five-cent nickel coin, was continued, as authorized by law, until the 25th day of March, A. D. 1871, at which time the law for the general redemption of all the base or token coinage went into operation. The amount thus redeemed to the 25th day of March, 1871, was, pounds, 39,527 ; value, \$38,736 46.

The amount of base coins redeemed under the act of March 3, 1871, to June 30, 1871, was, in tale or nominal value, \$178,133 75. The different kinds redeemed under that law to same date are as follows, viz :

Denomination and kind.	Number of pieces.	Value.
Copper one-cent pieces.....	1, 005, 215	\$10, 052 15
Nickel one-cent pieces.....	3, 645, 921	36, 459 21
Bronze one-cent pieces.....	3, 101, 810	31, 018 10
Bronze two-cent pieces.....	1, 272, 016	25, 440 32
Nickel three-cent pieces.....	219, 144	6, 574 32
Nickel five-cent pieces.....	1, 371, 793	68, 589 65
Total redemption to June 30, 1871.....	10, 615, 899	178, 133 75

It is worthy of remark that while the sum of \$178,133 75 was redeemed during that period, orders were received during the same time for a large amount of the bronze one and two and the nickel-copper three and five cent pieces.

PROFITS.

The profits of the nickel-copper and bronze coinage paid into the Treasury of the United States during the fiscal year were \$100,000.

The alloy of the minor coinage has been regularly assayed and reported by the assayer of the Mint ; and the legal proportion of the constituent metals been properly maintained.

The continued suspension of specie payments restricts the work of the Mint and the amount of the coinage. The capacity of the Mint and branch mints now in operation is more than sufficient to meet every demand for the conversion of the gold and silver deposits into coin, and consequently there is no legitimate necessity for increasing the number of branch mints. My views on this subject in connection with assay offices remain as expressed in former reports. From the discoveries and developments constantly making of the deposits of the precious metals in our western States and Territories, it is not beyond the practical and real to say that before another decade the annual production of gold and silver in the United States will be more than doubled. The reports are full of encouragement ; but at the same time care must be taken by the prudent to distinguish between the true statement and the exaggeration of the mere speculator.

DEVICES ON COINS.

This subject was referred to in my last annual report. The legends and devices on our national coinage should not be too frequently changed ; but change, when it rises to the dignity of an improvement, should be encouraged. It should not be so great as to destroy the iden-

tity of the new with the previous coinage of the country, or remove those peculiar national characteristics that have ever been recognized by the people as the stamp and certificate of the Government. Art and science are progressive. Why should not the influence of this progress be seen and marked upon the coins of the United States? Aesthetics, or the science of the beautiful in nature and art, in its cultivation not only adorns but adds strength and dignity to national greatness. Let the coinage of our country, in its devices and artistic execution, meet the improved taste and higher cultivation of our advancing civilization. I propose to have prepared such devices as may improve the general appearance of our coins, retaining their general characteristics; to be used, if approved, in the event of a change, by legislation, in our national coinage.

ABRADED COINS AS A LEGAL TENDER.

Having, as Director of the Mint, advantages of observing the defects of existing mint laws, or of such as are anticipated and pending, I beg leave respectfully to mention some points that occur to me as proper to place in an annual report:

1st. It seems a remarkable omission in our laws that there is no limit at which our coins shall cease to be a legal tender on account of *wear*. In England, the sovereign, or pound sterling, is not legally current when it has lost more than half a grain; although, by a recent examination of the state of the currency there, it appears that a large amount of coin is much lighter, especially in the countries remote from the capital. When the gold coin is offered at banking-houses, if not new, it is weighed, and received at a deduction proportionate to the loss. However, there was a time (nearly a century past) when the light gold was called in and re-coined, the loss being made good by government, to the amount of over a half million of pounds sterling. And at this day the worn silver coin is kept up to legal weight in the same way without loss to private holders.

It has not been a serious trouble in this country, from the fact that our coin is so apt to be exported. And yet it makes difficulty at the custom-houses and national treasuries, as we have had occasion to know. The collectors and treasurers hardly know what they are to do when coins much abraded are offered to them. In some sections, where gold is much used, as on the Pacific coast and in the extreme Southwest, the wear is very marked. Quarter-eagles may be met with not really worth more than \$2 40; and gold dollars still more deficient in proportion. It would be well to declare, by law, that gold coin shall be a legal tender at their stamped value, so long as they weigh within one per cent. for the smaller denominations, and one-half per cent. for the larger. But then the question arises, Who shall lose the difference when the coin becomes uncurrent?

2d. This brings us to a second point of discussion—a provision for keeping up the coins to legal weight, without laying the burden upon the last holder.

Whether it is positively right that the whole country should maintain the integrity of the country's coin, is a fair question for debate. That this should be the rule in regard to fractional silver coin, on which the Government makes a small gain, is a plain case enough. In regard to the gold, that could also be undertaken without great loss to the Treasury, if the plan which has been spoken of in England be adopted, to make a small diminution of weight, and consequently a small profit in the first

issue. That is to say, suppose the Mint value of standard gold continue to be \$1,000 for 53 $\frac{3}{4}$ ounces, at which rate any person bringing gold bullion or foreign coin would be paid in fine or standard bars or coin; but the Mint would make it into \$1,010, lawful coin, by a reduction of (say) 1 per cent. The difference could be reserved as a fund to enable the Mint in all future time to give out new pieces in exchange for worn and uncurrent prices, at even tale. The English idea, however, was merely to pay expense of coinage in this way. The difference would not suffice to avoid all loss, but it would materially reduce the burden.

It is to be assumed that only the loss by *abrasion* should thus be made good; not the fraudulent lightening by boring, filing, clipping, filling, or sweating. Persons who take such pieces must do so at their own cost.

There is some reason why the gross material should be of less value, weight for weight, than the articles which are made from it. But, on the other hand, it is a prolific source of confusion and misunderstanding to have a difference in the value of an ounce of gold, according as it is found in a bar or in a coin. Still, the question of loss by wear should be met, and if ever there is to be an *international* coinage, there should be a joint engagement that each nation will keep up its own coins to the standard, or within reasonable bounds.

Here it may be allowable to say that the international system should aim chiefly at a uniform *money of account*. Our coinage laws have carefully provided for "emblems of liberty," and the explanatory word "liberty" besides; and it is not likely that such coins would be welcome among peoples who are thus reminded of subjection. With us, public opinion is generally against the glorification of any man by placing his titles and effigy on the coin; and if our President, and even our Washington, is excluded, we hardly wish to have emperors and kings thus complimented among us. Still, no man will object to the occasional receipt of a gold coin of known value, be the portrait what it may, or the legend in what language soever.

This *money of account* should be based upon refined gold in bar; that is, upon a definite weight of fine gold, without reference to a standard for coin. Old names could be retained, but five dollars of account, twenty-five francs of account, and one pound sterling of account, should express the same amount. After this basis, if each country should make its coins nine-tenths fine, and in weight less than the bar rate, say, by 1 per cent., with a mutual guarantee to keep up the weight by recoinage, the coins would be passable for small sums beyond the lines; while for large transactions commercial houses would expect to pay and be paid in bar-gold. But within each country its own gold coin would be an unlimited legal tender at the stamped value; and this would tend to keep such coins at home, and secure a specie circulation as far as is desirable.

Some may think that to issue gold bars at one rate, and gold coin at a slightly different rate, would tend to check coinage. But this is not likely. The depositor of bullion would know no difference as to the tale value of his returns. The only difference would be that, if he wanted to hold specie for shipment, he would take bars; if he wanted it for home use or deposit in bank, he would take coin.

What has been said must not be taken as recommending such a system, but merely as a statement of the matter in its various bearings for further consideration. As already remarked, it does not originate here.

In general, the country's currency must always be, as it has been, chiefly in paper redeemable in gold. A perfect domestic money system,

would seem to be, bank or Government notes for large payments; gold coin for occasional use in large or small; silver coins for the fraction of a dollar down to the tenth part; and an inferior alloy for smaller denominations.

Concurrently with this an issue of Treasury paper notes of one dollar, and a half dollar, always redeemable at the Treasury in silver coin, would be a great convenience for the transmission of small dues by mail, and for other purposes.

A currency of paper only, cheap and easily made, is a baseless fabric. It derives all its value from its being redeemable in the precious metals. The national scarcity of gold and silver, the difficulty of mining, and the cost of extracting and refining them, their noble qualities and their uses in various ways, give them a positive and high intrinsic value, and fit them to perform the office of money. On this point the wisdom of ages can never become foolish or obsolete.

TOKEN SILVER COINAGE.

3. A third point in which our monetary laws evidently require amendment is a reduction in weight of our silver coins, with competent guards as to the amount of issue and extent of legal tender, so as to insure us a metallic fractional currency, even if gold should ascend to a premium. This has been enlarged upon in a previous report, and need only be noticed here.

COUNTERFEIT AND IMITATION COINS.

Here it may be mentioned that an act passed June 8, 1864, supplied a real omission in the penal code, as regards the protection of the metallic currency. It provides (in brief) for the punishment of any who make or pass counterfeit coins in any metal or alloy, in the resemblance of those of the United States or of foreign countries; or who make or pass coins of "original design" for the purpose of money. This last provision might seem to be useless, on the supposition that nobody would take a coin which was not an imitation. But the fact is quite otherwise, not only in respect to the baser coin, of which great quantities of *original design* were issued more than thirty years ago, and in later times; but also in regard to the precious metals, as recent facts have proved. I refer to small pieces designated as "half dollars" and "quarter dollars," with some claim to be considered gold coins, as they really contain as much of that metal as is to be found in common jewelry. The pieces which began to be issued in San Francisco, in 1859, and perhaps have been coined more recently, may not have been actually pushed into circulation, but may rather have served as play-pieces or curiosities. However, they were sold at their pretended value, while in fact the half dollar, weighing six grains on an average, and about 425-thousandths fine, was worth eleven cents; the quarter dollar nearly in the same proportion, some pieces being actually worth six cents. No doubt they have been imposed upon ignorant persons as real money. Their shapes were various, some octagonal, some circular.

A similar case has recently occurred of a large issue of "half dollars" from a private mint in Leavenworth, Kansas. On the obverse is a female head with thirteen stars, and the date 1871; on the reverse is a wreath inclosing the words, "Half dollar, Cal." The weight of a specimen tried here was 7.6 grains, and the fineness 520 thousandths, making a value of just seventeen cents. The case has been properly taken in hand by the judicial authorities of that district.

I may next speak of another fraud upon the gold currency, into which we have lately been making minute and extended examination. I refer to filing away the reeding on the edge or periphery, and then restoring it by a hand-tool; by which operation there is a gain of about fifty cents' worth, more or less, of gold-dust from each double eagle so dealt with. This has been done extensively on the Pacific coast, and has been punished by the courts. It requires some delicacy of touch to discover the difference; but the Treasury officers, custom-houses, and banks are very apt to check the circulation of such depreciated pieces.

The best preventive of this, probably, would be to abandon the ribbing or reeding, and substitute some other impression on the edge. This reeding was made use of from the very first on our gold coins, being heretofore considered a good safeguard against filing or clipping. It has also been impressed upon our silver coins for about thirty-five years past. Before that, the larger pieces had a periphery legend in sunken letters. Briefly to advert to the practice of some other nations, we find in England, as early as the reign of Charles the Second, the appropriate motto *Decus et Tutamen* running around the edge of the piece of five guineas, in raised letters. This was renewed in the double pound of George the Fourth. In the succeeding reign the edge of the gold coin was smooth, and during the reign of Victoria it has been uniformly reeded. In France, under the first Napoleon, the motto *Dieu Protège la France* was impressed in sunken letters. In the reign of Louis Philippe, and since, the same legend has appeared in relief. The gold coins of Prussia also have a periphery motto, incuse. In Belgium the legend is in raised letters.

A modification of the steam-press, so as to adapt it to the segment-collar, would enable us to substitute letters for reeding, and evidently with much greater protection against the fraudulent reduction by filing, as well as against the practice of filling with a cheaper metal. The only difference would be that the press could not move so rapidly, which, in the coinage of gold, is a matter of no moment.

REFINING BY CHLORINE.

The processes of refining and separating gold and silver have received an unusual share of attention and experiment during the past year, both at the Mint and the assay office at New York. At the latter, the sulphuric acid process has been fully and successfully established, and the noxious fumes neutralized. This is a very economical operation, although it does not always leave the gold and silver in the highest state of ductility. A method of refining silver has also been originated there, by which the work is done in the ordinary melting-pot, with the aid of bone-ash as an absorbent. This is a well-contrived and economical mode, and gives very good results.

At the Mint, the reverberatory furnace, or bone-ash test, formerly in use, has been restored to meet cases of refinance growing out of the peculiar character of some of our western bullion. The presence of sulphur, antimony, lead, and arsenic, one or all, frequently makes the Nevada silver brittle and refractory.

We have also been experimenting upon a pretty large scale with the chlorine-refining of gold, recently invented and perfected in Australia, and largely employed there and in New Zealand, and also coming into use in England. It answers the double purpose of parting out the silver and of removing the last traces of base metals which prevent the perfect malleability of gold. We had the advantage of the presence and management of the inventor, F. Boyer Miller, esq., assayer of the Sydney mint.

As the invention is a very remarkable one, and the process is likely to displace all others within the scope of its adaptation, I may briefly state that it is founded upon the eager affinity of chlorine for almost every metal, but generally less for gold than the others. The gas is generated by the action of muriatic acid on the black oxide of manganese, both very cheap materials. A current of this gas is conveyed by tubes into and down to the bottom of the melting-pot, while the mixed metals are in a state of fluidity. It seizes upon the baser metals, if any are present, and disperses them as volatile chlorides, copper forming the only exception. But in addition to that, the chlorine combines with the silver alloy, forming chloride of silver, which rises to the surface, the gold remaining in a purified condition beneath. The silver, holding the copper, if there is any, is protected from evaporation by a coating of borax on top of the melt. Absorption into the pot is also prevented by a previous coating of the same agent. The silver (argentic chloride) is taken off after the cooling in solid cakes, brought to the metallic state in a galvanic battery by an ingenious arrangement due to Mr. Leibius, also of the Sydney mint.

The chlorine acts somewhat upon the gold, so that about 2 per cent. of that metal is converted into a chloride, and rises with the silver. But this difficulty is overcome by the subsequent addition of a small quantity of metallic silver, on which the chlorine fastens, by a greater affinity, and liberates the gold.

The peculiar merits of this process are, that it is cheap, rapid, and makes the most ductile gold. Its economy and quickness will be better understood when it is observed that in other processes, say the sulphuric or nitric, it is necessary to add to the gold, by a preliminary melting, nearly twice its weight, or four times its bulk, of silver, and to granulate the mixture so as to enable the acid to have any action; and then, what with the parting and the subsequent recovery of the two metals, several days are consumed in the whole operation. But in the chlorine process no such addition of silver is required, the application being direct and simple, and a few hours will finish the work. The cost of materials and labor is much less than by any other method. The fine gold resulting from it, as shown by the experiments here, assayed from 994 to 997½ thousandths, which is as high as is needed for commercial bars, and nearly as high as the results from sulphuric acid.

On the other hand, this process (chlorine) is not applicable to silver containing a small proportion of gold. So that when two kinds of bullion are presented, as is frequently the case at our mints and assay offices, namely, gold containing silver and silver containing gold, it is highly advantageous and a great saving to combine the two. In this case the sulphuric acid process is greatly to be preferred to any other. It seems desirable that we should have the benefit of both this and the chlorine; but the latter is a patented process, and, perhaps, cannot be obtained without legislative aid.

HUMID ASSAY.

The humid assay of silver, hitherto thought to be complete, has been still further perfected at the New York office, and here, by an admirable change in the mode of drawing and measuring the normal liquor. But we see no reason to take up with certain other suggestions for using the hydrobromic precipitant instead of the hydrochloric, or for working through the medium of yellow light. It is a mere affectation to carry the assay beyond the attainable degree of homogeneity in melting or nicety in weighing at the assay balance.

It is a satisfaction to find that we can now have our delicate apparatus made in this country, and partly in our own house, so that we need no longer resort to London or Paris.

TABLE OF FOREIGN COINS.

The statement of the weight, fineness, and value of foreign coins, required by law to be made annually, will be found appended to this report. We have no alterations to report in this annual statement.

Mexican silver dollars of 1871, new devices, somewhat exceed the fineness reported in our tables, but it would not be safe to assess them at a higher value than therein stated.

We are expecting specimens of new European coins, which will illustrate the great changes of government that have recently occurred there; but as yet we have only some silver pieces of France, which conform to the style formerly issued under the republic. Germany, France, Spain, and Italy will all have a new coinage to show, at least in respect to devices.

MEDAL DEPARTMENT.

This department, organized a number of years ago, under the direction and by the authority of the Secretary of the Treasury, still continues in successful operation. A large number of medals have been made for the Government in the Indian Department, and many others have been made and sold. This department is not only profitable but a credit to the Government. It should be encouraged.

THE MINT CABINET.

This cabinet of coins and medals has been visited during the past year by more than fifty thousand persons from our own and other countries. It is a place of great attraction, and well repays the visitor. The annual appropriation for this cabinet should not only be continued but increased.

STATISTICAL TABLES.

The statistics relating to the deposits of bullion and coinage at the Mint of the United States and branches will be found in the tabular statement hereto annexed. These tables have been prepared with great care, and every effort made to correct and avoid mistakes. They are believed to be trustworthy and accurate.

Very respectfully, your obedient servant,

JAS. POLLOCK, *Director.*

Hon. GEO. S. BOUTWELL,

Secretary of the Treasury, Washington, D. C.

LIST OF TABLES IN APPENDIX.

- A.—Statement of bullion deposited at the Mint of the United States and branches during the fiscal year ending June 30, 1871.
- B.—Statement of gold and silver of domestic production deposited at the Mint of the United States and branches during the fiscal year ending June 30, 1871.
- C.—Statement of coinage at the Mint of the United States and branches during the fiscal year ending June 30, 1871.
- D.—Coinage at the Mint of the United States from organization to close of fiscal year, ending June 30, 1871.
- E.—Coinage at branch mint, San Francisco, from organization to June 30, 1871.

- F.—Coinage at branch mint, New Orleans, from organization to January, 1861.
- G.—Coinage at branch mint at Dahlonega, Georgia, from organization to February 28, 1861.
- H.—Coinage at branch mint, Charlotte, North Carolina, from organization to March 31, 1861.
- I.—Coinage at assay office, New York, from organization to June 30, 1871.
- K.—Coinage at branch mint, Denver, Colorado, from organization to June 30, 1871.
- K'.—Coinage at branch mint, Carson City, Nevada, from organization to June 30, 1871.
- L.—Summary exhibit of coinage at Mint and branches to close of year ending June 30, 1871.
- M.—Gold of domestic production deposited at the Mint of the United States to close of year ending June 30, 1871.
- N.—Same at branch mint, San Francisco, to June 30, 1871.
- O.—Same at branch mint, New Orleans, to January 31, 1861.
- P.—Same at branch mint, Dahlonega, Georgia, to February 28, 1861.
- Q.—Same at branch mint, Charlotte, North Carolina, to June 30, 1871.
- R.—Same at assay office, New York, to June 30, 1871.
- S.—Same at branch mint, Denver, to June 30, 1871.
- T.—Summary exhibit of gold deposits at the Mint of the United States and branches to June 30, 1871.
- U.—Statement of amount of silver coined at the Mint of the United States and branches at San Francisco, New Orleans, and Carson City, under act of February 21, 1853.
- V.—Statement of amount of silver of domestic production deposited at the Mint of the United States and branches from January, 1841, to June 30, 1871.
- W.—Statement of domestic gold and silver deposited at Mint of the United States and branches, for coinage, to June 30, 1871.
- X.—Statement of weight, fineness, and value of foreign gold coins.
- Y.—Statement of weight, fineness, and value of foreign silver coins.

APPENDIX.

A.—Statement of deposits at the Mint of the United States; the branch mint, San Francisco; assay office, New York; and branch mint, Denver; branch mint, Charlotte; and branch mint, Carson City, during the fiscal year ending June 30, 1871.

A statement of foreign gold and silver coins, prepared by the Director of the Mint, to accompany his annual report, in pursuance of the act of February 21, 1857.

EXPLANATORY REMARKS.—The first column embraces the names of the countries where the coins are issued; the second contains the name of the coin, only the principal denominations being given. The other sizes are proportional; and when this is not the case the deviation is stated.

The third column expresses the weight of a single piece in fractions of the troy ounce, carried to the thousandth and in a few cases to the ten thousandth of an ounce. The method is preferable to expressing the weight in grains for commercial purposes, and corresponds better with the terms of the Mint. It may be readily transferred to weight in grains by the following rules: Remove the decimal point; from one-half deduct four per cent. of that half, and the remainder will be grains.

The fourth column expresses the fineness in thousandths, *i. e.*, the number of parts of pure gold or silver in 1,000 parts of the coin.

The fifth and sixth columns of the first table express the valuation of gold. In the fifth is shown the value as compared with the legal contents or amount of fine gold in our coin. In the sixth is shown the value as paid in the Mint, after the uniform deduction of one-half of one per cent. The former is the value for any other purposes than recoinage, and especially for the purpose of comparison; the latter is the value in exchange for our coins at the Mint.

For the silver there is no fixed legal valuation, the law providing for shifting the price according to the condition of demand and supply. The present price of standard silver is 122½ cents per ounce, at which rate the values in the fifth column of the second table are calculated. In a few cases, where the coins could not be procured, the data are *assumed* from the legal rates, and so stated.

X.—Gold coins.

REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS.

REPORT
OF
THE COMMISSIONER OF INDIAN AFFAIRS.

DEPARTMENT OF THE INTERIOR,
Washington, D. C., October 26, 1871.

SIR: I have the honor to transmit herewith, for your information, a letter dated the 25th instant from the Acting Commissioner of Indian Affairs, and the accompanying "statement" showing the present liabilities of the United States to the Indian tribes.

Very respectfully, your obedient servant,
W. H. SMITH,
Acting Secretary.

The Honorable SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, D. C., October 25, 1871.

SIR: I have the honor to transmit herewith a statement showing the present liabilities of the United States to Indian tribes under stipulations of treaties, &c., to be forwarded to the Secretary of the Treasury, to accompany his report on the state of finances.

Very respectfully, your obedient servant,
H. R. CLUM,
Acting Commissioner.

Hon. C. DELANO,
Secretary of the Interior.

Statement showing the present liabilities of the United States to Indian tribes under stipulations of treaties, &c.—Continued.

Names of tribes.	Description of annuities, stipulations, &c.	Reference to laws: Statutes at Large.	Number of installments yet unappropriated, explanations, remarks, &c.	Annual amount necessary to meet stipulations indefinite as to time, now allowed, but liable to be discontinued.	Aggregate of future appropriations that will be required during a limited number of years to pay limited annuities incidentally necessary to effect the payment.	Amount of annual liabilities of a permanent character.	Amount held in trust by the United States on which five per cent. is annually paid, and amounts which, invested at five per cent., would produce permanent annuities.

**REPORT OF THE SUPERINTENDENT OF THE UNITED
STATES COAST SURVEY.**

REPORT
OF THE
SUPERINTENDENT OF THE UNITED STATES COAST SURVEY.

COAST SURVEY OFFICE,
Washington, D. C., September 22, 1871.

SIR: I have the honor to present, as usual, in advance of the detailed report, a synopsis showing the distribution of surveying parties on the coasts of the United States during the year which will end with the month of October. Two working seasons are included in that period, one at the North, and the other on southern sections of the coast, work generally closing on the coast of New England early in November.

My previous detailed report includes mention of the work done in the autumn of the year 1870. The abstract now submitted will include the subsequent operations. Of these, nearly all that concern places on the Atlantic coast north of Chesapeake entrance are now in progress, and field-work in those sites will continue, as before stated, until the month of November.

Following with notices in the usual geographical order, a topographical and a hydrographic party are now at work in Southwest Harbor, (Mount Desert Island,) on the coast of Maine; and if practicable, Mooseabec Reach and Goldsborough Bay will be sounded this season. The plane-table survey is in progress on the western shore of Penobscot Bay, and on the adjacent islands, including Isleborough, Isle au Haut, and the Fox Islands, three parties are engaged. Another is sounding Isle au Haut Bay. Tidal observations have recorded each rise and fall during the year at North Haven. Farther westward the work now in hand includes topography and hydrography of the Kennebec and Androscoggin Rivers; triangulation near the primary station, Sebattis; coast topography between Saco entrance and Richmond's Island; and additional soundings at several places between Portland and Plymouth Harbor. The tides of the year have been recorded regularly at Charlestown navy yard, near Boston. Special observations have been made at Edgartown Harbor, Massachusetts, with reference to the development of the laws which bring about physical changes at port entrances along the coast of New England. Plane-table work, continued during the winter, has completed the survey of Narragansett Bay, and the same party is now on the coast westward of Point Judith; another is at work near New Haven, Connecticut, points for the plane-table survey having been determined near midsummer. The survey of Lake Champlain is in progress northward of the limits reached last year, and also the connection of that survey by triangulation with adjacent geodetic stations of the Atlantic coast. The work here referred to incidentally determines points for the State surveys of New Hampshire and Vermont, as authorized in the appropriation bill for the present fiscal year, and a party is now engaged in that service. Another is employed in reconnaissance for stations to connect the triangulation of the lake with that of Hudson River. In

the vicinity of New York a party has inspected and secured the triangulation marks on the shores of Long Island Sound; another has extended soundings in Newark Bay; and observations will be continued for determining the nature of the physical changes which affect New York Harbor. Daily tidal observations have been recorded during the year at that port.

On the coast of New Jersey a topographical and a hydrographic party are engaged in the survey of Little Egg Harbor; another party is in the field for triangulation between Mount Holly and Barnegat Light-house. The special survey at the confluence of the Delaware and Schuylkill Rivers will be completed by the end of the present working season. Latitude and azimuth have been determined at Calvert Station, at Tangier Island; and at Wolf Trap, on Chesapeake Bay; and a party is assigned to select stations for connecting the bay triangulation with that of the Atlantic coast across the peninsula of Virginia. The survey of the estuaries of the Chesapeake has been continued, and the Broad Water north of Cape Charles has been developed. All the tides of the year at Old Point Comfort have been recorded. Magnetic observations have been repeated at the station in Washington City. Triangulation has been extended on the James River, Virginia, and the primary work passing southward of Washington, along the Blue Ridge, is in progress.

In the lower sections of the Atlantic coast the operations of the year include triangulation over Pamlico Sound, North Carolina, and the determination of latitude and azimuth at the Ocracoke base line; the topography and hydrography of Pamlico River; survey of the coast above and below Bogue Inlet, North Carolina; off-shore hydrography south of Cape Hatteras; plane-table survey and soundings, embracing parts of the Chechesse, Colleton, Maskey's, May, Cooper, Bull, and Combahee Rivers, in South Carolina; the hydrography of St. Mary's River, Georgia, and of the coast approaches southward to the mouth of St. John's River, Florida, with the inland sea channels between St. Mary's and Nassau Sound; the topography of Nassau Sound and of the coast adjacent; triangulation of the eastern side of Florida south of Matanzas Inlet; hydrography of the western end of the Florida Reef north of the Tortugas and Quicksands, including the development of a large bank in that vicinity.

In the Gulf of Mexico soundings have been made near Apalachicola entrance; the triangulation and topography are complete in St. Andrew's Bay; determinations have been made there for latitude and azimuth; Santa Rosa Sound has been developed eastward from Pensacola entrance, the surveys being now continuous. To the westward the work of the year embraces the extension of the survey of Isle au Breton Sound, and of the Mississippi River above the head of the passes; soundings in Lake Pontchartrain and in the Gulf approaches to the South Pass and Southwest Pass of the Mississippi. Trinity Shoal, in the Gulf, to the westward of the Delta, has been surveyed for light-house purposes. On the coast of Texas the hydrography of Matagorda Bay and its branches has been completed.

In the vicinity of St. Louis, and in Illinois, Ohio, and Kentucky, points have been determined in the triangulation which has been authorized for connecting the survey of the Atlantic coast with that of the Pacific. This work is yet in progress.

On the western coast most of the field operations are yet in hand. The steamer under construction for service in the western sections not being yet completed, only partial observations have been practicable in

the hydrographic reconnaissance between Panama and San Diego. The plans of the year, under which parties are now in the field, include the determination of latitude and longitude at Cape San Lucas; the longitude of San Diego; topography near San Pedro, California; the latitude and longitude of Santa Barbara; topography of the coast of California, near Point Conception; San Luis Obispo and San Simeon; and of the Santa Barbara Islands; reconnaissance for extending the triangulation south of Monterey; the hydrographic development of Falmouth Shoal, and of the vicinity of a rock off the Farallones, and additional soundings in San Francisco entrance; the tracing of wharf lines at Oakland; topography near Point Arena, and of the coast south of Cape Mendocino, California; the longitude of Eureka; topography near Crescent City; the latitude and longitude of Yaquina, on the coast of Oregon; topography north and south of Columbia River entrance, and of the river shores above Three-Tree Point.

In Washington Territory the survey is in progress on the west side of Whidby Island, and on the shores of Admiralty Inlet. The hydrography in that quarter will develop, in the course of the season, Lawson Shoal and the vicinity of Belle Rock in Rosario Strait. At Seattle the longitude will be determined by the telegraphic method.

When the appropriation for the present fiscal year became available, a party, previously organized, was sent from San Francisco without delay, to make such development in hydrography and such other observations of interest and value as may be practicable in the vicinity of the Aleutian Islands, off the coast of Alaska. The party sailed in August, but time has not yet elapsed for advice of the arrival of the vessel at her destination.

Within the year laborious computations have been completed, giving final values for the longitude of points intermediate between the Atlantic and the Pacific coast. Of these the principal ones are Omaha, Salt Lake City, and San Francisco. Computations are in progress for determining the transatlantic longitude, which depends upon the observations made last year at Brest and Duxbury.

The discussion is continued of full series of tidal observations, with reference to the construction of tables of prediction.

In the Coast Survey Office the operations of the several divisions have kept pace with the field-work. Twenty new charts have been published, including three new editions of charts made needful by extensive changes. Fifty-eight charts have been in hand in the drawing division, of which nine were commenced within the year. Of the various engraved charts about ten thousand copies have been printed, and an equal number of copies distributed from the office. Of the manuscript maps on file in the archives sixty-six have been copied or traced within the year, to meet calls for information from various branches of the public service.

Tide-tables for the ports of the United States for the year 1872 have been computed and issued from the office.

In the hydrographic division special care has been taken in regard to the marked places of buoys on the published charts. Most of the sea-marks liable to shift have been carefully determined in position, and marked on the charts which admitted of such changes without detriment to the sailing directions.

In conformity with the act of Congress approved July 15, 1870, for observing the solar eclipse of December 22, 1870, in Europe, several parties were organized under my direction, and occupied stations in Sicily and in Spain. As the weather was unfavorable, generally, along

the line on which the eclipse was total, it is gratifying that the sky was least obscured at the stations selected for the several observers. Full reports have been received from the leading members of the expedition, and results of much interest are expected from the discussion of the observations.

This recapitulation of the operations of the year in part explains the object of the estimates which have been submitted for continuing the survey of the coast.

Respectfully submitted.

BENJAMIN PEIRCE,

Superintendent United States Coast Survey.

Hon. GEO. S. BOUTWELL,

Secretary of the Treasury.

REPORT OF THE LIGHT-HOUSE BOARD.

OFFICERS OF THE LIGHT-HOUSE BOARD.

[Light-House Board of the United States, organized in conformity to the act of Congress approved August 31, 1852.]

LIGHT-HOUSE BOARD.

HON. GEORGE S. BOUTWELL, Secretary of the Treasury, *ex-officio* President.

REAR-ADMIRAL W. B. SHUBRICK, United States Navy.	REAR-ADMIRAL C. K. STRIBLING, United States Navy.
PROF. JOSEPH HENRY, LL. D., Secretary Smithsonian Institution.	PROF. BENJ. PEIRCE, LL. D., Superintendent Coast Survey.
BREVET MAJOR GENERAL A. A. HUMPHREYS, Chief of Engineers, United States Army.	REAR-ADMIRAL THORNTON A. JENKINS, United States Navy.
BREVET MAJOR GENERAL J. G. BARNARD, Colonel of Engineers, United States Army.	MAJOR GEORGE H. ELLIOT, Corps of Engineers, United States Army.

CHAIRMEN OF COMMITTEES.

Finance.—GENERAL HUMPHREYS.
Engineering.—GENERAL BARNARD.
Experiments.—PROF. HENRY.

Lighting.—PROF. PEIRCE.
Floating Aids.—REAR-ADMIRAL STRIBLING.

The Chairman and Secretaries are *ex-officio* members of all committees.

MEMBERS OF THE BOARD EMPLOYED IN THE OFFICE

REAR-ADMIRAL W. B. SHUBRICK, United States Navy, Chairman.
REAR-ADMIRAL THORNTON A. JENKINS, United States Navy, Naval Secretary.
MAJOR GEORGE H. ELLIOT, Corps of Engineers, United States Army, Engineer Secretary.

CLERKS.

ARNOLD B. JOHNSON, chief clerk.
WILLIAM D. O'CONNOR, corresponding clerk.
FRANK BAKER, accountant.
BRUCE SMALL, examining clerk.

A. H. SAWYER, records clerk.
SAMUEL STONE, recording clerk.
MRS. E. J. BEARE, register clerk.
JOSEPH McMAKIN, draughtsman.

REPORT

OF

THE UNITED STATES LIGHT-HOUSE BOARD.

TREASURY DEPARTMENT,
Office Light-House Board, September 25, 1871.

SIR: By your direction the following report of the operations of this Board, during the last year, is respectfully submitted:

The detailed statements under the heads of the respective districts, based mainly upon the annual reports of the Engineers and Inspectors, embrace the work which has been done; that which has been laid out for the current year; and the present condition of all the aids to navigation, with such remarks and recommendations in regard to improvement of existing and the establishment of such new aids as seem to require the attention of Congress at this time.

The Light-houses and Light-vessels (so far as the exhibition of efficient Lights is concerned) are, it is believed, equal to any in the world, and those beacons and buoys actually in position are efficient day-marks to guide clear of the obstructions for which they were established. For those Light-stations at which extensive repairs and renovations are needed, special appropriations are recommended.

The aggregate estimates for the fiscal year ending June 30, 1873, are \$45,000 in excess of the appropriations for the fiscal year ending June 30, 1872, and \$358 less than the estimates of last year.

The special items in excess, in the estimates of general expenses, over the actual appropriation for the current fiscal year, are for buoyage and for expenses of Fog-signals. The sum estimated for the buoy service is the same that has been submitted for several years past, owing to the great increase in the numbers of those aids to navigation, especially on the Southern, Gulf, and Pacific coasts, and the failure to make the increased appropriation (\$25,000) asked for two years since, made it necessary to apply for a deficiency appropriation, part of which was made.

The other item of increase (\$20,000) "for expenses of Fog-signals," arises from the large number of those aids to navigation authorized within the last two years.

Of the large number of Lights and other aids to navigation for which appropriations have been made, such as are established on sites belonging to the Government, and those where valid titles, according to law, in cases in which land had to be purchased, have been obtained, the works have been commenced or completed. Great difficulty is experienced in perfecting titles to sites for Light-houses, and building them within the limited time appropriations are available. It not unfrequently happens that the title-papers of a site for a Light-house, costing only a few hundred dollars, remain in the hands of the law officers for many months before the validity of the title is reported upon, and then, very often,

in consequence of some legal omission or informality, the papers have to be returned to the United States attorney for further investigation.

The two small sailing-vessels which have been employed for many years in delivering oil and other Light-house supplies on the Atlantic and Gulf coasts are too much decayed to be economically repaired after the present year, and an estimate for building two new vessels for that service has been submitted in the estimates for next year.

FIRST DISTRICT.

The First District extends from the northeastern boundary of the United States, (Maine,) to and including Hampton Harbor, New Hampshire.

Inspector.—Commander A. E. K. Benham, United States Navy.

Engineer.—Brevet Brigadier General J. C. Duane, Lieutenant Colonel of Engineers, United States Army.

In this district there are:

Light-houses and lighted beacons	48
Day, or unlighted beacons	50
Buoys actually in position	339
Spare buoys for relief, and to supply losses	177
Tender, steamer <i>Iris</i>	1
Tender, steam launch, <i>Mary</i>	1
Tender, (sail), schooner <i>Wave</i>	1

The following numbers, which precede the names of stations, correspond with those of the "Light-house List of the Atlantic, Gulf, and Pacific Coasts of the United States," issued January 1, 1871.

LIGHT-HOUSES AND LIGHTED BEACONS.

Burnt-Coat Harbor, Swan's Island, coast of Maine.—In consequence of difficulty in obtaining title to the land, it will probably be impossible to complete the Light-house before the 1st of July next, and it is therefore recommended that the money may be re-appropriated.

21. *White Head*.—Repairs are being made to the main part of the keeper's dwelling; a road has been graded from the landing to the Fog-signal house; a coal-shed erected, and a wharf is being built.

Halfway Rock, Casco Bay, Maine.—On the 30th of June, 1870, the balance on hand for the construction of this work having reverted to the Treasury, the construction of the work was discontinued, and the machinery and material removed and stored. As soon as the new appropriation became available the work was resumed. The tower has been completed, and all that now remains to be done is the roofing of the lantern and the introduction of the apparatus. The station will be lighted on the 15th of August. It is proposed, during the present season, to build a substantial masonry boat-house and establish a Fog-signal.

40. *Cape Elizabeth*, coast of Maine.—The westerly tower of the two, at this Light-station, was built in 1828 of *rubble stone*, and is now in such a state as to render it necessary to rebuild it in a better manner, for which an estimate has been submitted in the annual estimates. The station is one of the most important on the eastern coast, serving the double purpose of a sea-coast Light-station, and as a mark for the entrance into Casco Bay and to Portland Harbor.

43. *Whale's Back*.—The masonry of the new tower has reached the height of twenty feet above low-water mark. The position is one of the most difficult to work upon on the coast, as the rock is covered by the

waves, except at low water, and is exposed to the full force of the Atlantic. The new structure will be a masonry tower, solid to the height of twenty feet above low-water mark, and the blocks of granite which will form a facing for the interior mass of concrete will be tied together by dove-tail joints, as is usual in similar sea structures. The diameter of the tower at the base will be twenty-seven feet, and height of focal plane above the sea will be sixty-eight feet.

4. *Portsmouth Harbor*.—A new keeper's dwelling is being erected.

At each of the following-named Light-stations there have been repairs and renovations, more or less extensive, during the year, viz:

1. *St. Croix*, on Dochet's Island, St. Croix River, Maine.
2. *West Quoddy Head*, west entrance to Passamaquoddy Bay.
3. *Little River*, west side of entrance to harbor.
4. *Libby Island*, entrance to Machias Bay.
5. *Moose Peak*, on Moosepeak Head.
6. *Nash's Island*, west end of Moosepeak Reach.
7. *Narraguagus*, entrance to Narraguagus Bay.
8. *Petit Menan*, on Petit Menan Island.
9. *Prospect Harbor*, east side of entrance to Prospect Harbor.
10. *Winter Harbor*, west side of entrance to Winter Harbor.
11. *Mount Desert*, on Mount Desert Rock.
12. *Baker's Island*, southwest side entrance to Frenchman's Bay.
13. *Bear Island*, east side entrance to northeast harbor.
14. *Bass Harbor Head*, east side entrance to Bass Harbor.
15. *Edgemoggin*, near east end of Edgemoggin Reach.
16. *Saddleback*, in Isle au Haute Bay.
17. *Heron Neck*, west entrance to Carver's Harbor.
18. *Deer Isle*, west entrance to Thoroughfare.
19. *Eagle Isle*, west side of Isle au Haute Bay.
20. *Pumpkin Isle*, west entrance to Edgemoggin Reach.
21. *Matinicus*, off Penobscot Bay.
22. *Owl's Head*, west side of Muscle Ridge Channel, Penobscot Bay.
23. *Brown's Head*, south side of west entrance to Fox Islands Thoroughfare.
24. *Negro Island*, south side of entrance to Camden Harbor.
25. *Grindale's Point*, north side of entrance to Gilkey's Harbor.
26. *Dice's Head*, north side of entrance to Castine Harbor.
27. *Fort Point*, west side of entrance to Penobscot River.
28. *Tenant's Harbor*, south side of entrance to Tenant's Harbor.
29. *Marshall's Point*, east entrance to Herring Gut.
30. *Manheigan*, off George's Islands.
31. *Franklin Island*, on east side of west entrance to George's River.
32. *Pemaquid*, on Pemaquid Point.
33. *Burnt Island*, west side of entrance to Townsend Harbor.
34. *Hendrick's Head*, east side of entrance to Sheepscot River.
35. *Pond Island*, west side of entrance to Kennebec River.
36. *Seguin*, off Kennebec River.
37. *Cape Elizabeth*, on southwest side of Casco Bay.
38. *Portland Head*, on southwest side of entrance to Portland Harbor.
39. *Portland Breakwater*, on outer end of Breakwater, Portland Harbor.
40. *Wood's Island*, west side of entrance to Saco River.
41. *Goat Island*, east side of entrance to Cape Porpoise Harbor.
42. *Boone Island*, off York Harbor.
43. *Isle of Shoals*, on White Island, off Portsmouth.

The following-named Light-stations require repairs to be made during the current and ensuing year :

1. *St. Croix.*
2. *West Quoddy Head.*
4. *Libby Island.*
6. *Nash's Island.*
7. *Narraguagus.*
8. *Petit Menan.*
Prospect Harbor.
9. *Winter Harbor.*
10. *Mount Desert.*
11. *Baker's Island.*
12. *Bear Island.*
13. *Bass Harbor Head.*
14. *Edgemoggin.*

DAY OR UNLIGHTED BEACONS.

Names and positions of the day or unlighted beacons in the first district :

No. 1. *Jerry's Point*, Portsmouth Harbor.—Iron beacon. In good condition.

No. 2. *South Beacon*, Portsmouth Harbor.—Stone beacon. In good condition.

No. 3. *North Beacon*, Portsmouth Harbor.—Wooden mast. In good condition.

No. 4. *Willey's Ledge*, Portsmouth Harbor.—Iron spindle. In good condition.

No. 5. *York Ledge*, off York River.—Iron spindle. In good condition.
No. 6. *Fishing Rocks*, Kennebunkport.—Iron spindle. Broken off. Spar-buoy substituted.

No. 7. *Stage Island Monument*, entrance to Saco River.—Stone tower forty feet high. In good condition.

No. 8. *Sharp's Rocks*, entrance to Saco River.—Iron socket and wooden shaft. Socket broken off. Spar-buoy placed to mark the danger.

No. 9. *Back Cove Beacon*, Portland Harbor.—Pile beacon. In good condition.

No. 10. *White Head Ledge*, in White Head passage to Portland Harbor.—Iron spindle slightly bent under the cage, in good condition otherwise.

No. 11. *Trott's Rock* in the above passage.—Iron spindle broken off within a few feet of the ledge.

No. 12. *Mark Island Monument*, Casco Bay.—Stone tower fifty feet high. In good condition.

No. 13. *Black Jack Rock*, Kennebec River.—Iron socket, wooden shaft; broken off.

No. 14. *Seal Rock*, Kennebec River.—Iron spindle with copper cylinder, painted black. In good condition.

No. 15. *Lee's Rock*, Kennebec River.—Iron and wood broken; a spar-buoy is placed to mark the danger.

No. 16. *Ram Island Ledge*, Kennebec River.—Iron socket and wooden shaft. In good condition.

No. 17. *Winslow's Rocks*, Kennebec River.—Iron socket, wooden shaft; broken off. Spar-buoy substituted.

No. 18. *Ame's Ledge*, Kennebec River.—Iron socket, wooden shaft. In good condition.

No. 19. *Beef Rock*, Kennebec River.—Iron socket, wooden shaft. In good condition.

No. 20. *Lime Rock*, Back River.—Iron socket, wooden shaft. In good condition.

No. 21. *Carleton's Ledge*, Back River.—Iron socket, wooden shaft. In good condition.

No. 22. *Clough's Rock*, Sheepscot River.—Iron socket, wooden shaft. In good condition.

No. 23. *Merrill's Ledge*, Sheepscot River.—Iron socket, wooden shaft. In good condition.

No. 24. *Yellow Ledges*, Penobscot Bay.—Iron shaft, copper cylinder. In good condition.

No. 25. *Garden Island Ledge*, Penobscot Bay.—Iron shaft, copper cylinder and one ball. Shaft good, cylinder partially broken away and ball gone.

No. 26. *Otter Island Ledge*, Penobscot Bay.—Iron shaft, copper cylinder and two balls. Shaft bent, cylinder partially broken away, and one ball gone.

No. 27. *Ash Island Point*, Penobscot Bay.—Iron socket, wooden shaft. In good condition.

No. 28. *Dodge's Point Ledge*, Penobscot Bay.—Wooden mast twelve feet long. In good condition.

No. 29. *Potters-field Ledge*, Penobscot Bay.—Stone beacon. In good condition.

No. 30. *Lowell's Rock*, Penobscot Bay.—Iron spindle and cage. In good condition.

No. 31. *Seal's Ledge*, Penobscot Bay.—Iron spindle and cage. In good condition.

No. 32. *Harbor Ledge*, Penobscot Bay.—Stone beacon. In good condition.

No. 33. *Shipyard Ledge*, Penobscot Bay.—Iron spindle; broken off. Not necessary.

No. 34. *Fiddler's Ledge*, Penobscot Bay, near west entrance to Fox Island Thoroughfare.—Stone beacon. Two or three stones of the upper course are out of place; otherwise, in good condition.

No. 35. *North Point of Northeast Ledge*, Camden Harbor.—Iron spindle. In good condition.

No. 36. *Morse's Point Ledge*, Camden Harbor.—Iron spindle. In good condition.

No. 37. *Hosmer's Ledge*, Castine Harbor.—Stone monument. In good condition.

No. 38. *Steel's Ledge*, Belfast Harbor.—Stone beacon. In good condition.

No. 39. *Fort Point Ledge*, Penobscot River.—Stone beacon. In good condition.

No. 40. *Odom's Ledge*, Penobscot River.—Stone beacon. In good condition.

No. 41. *Buck's Ledge*, Penobscot River.—Iron beacon. In good condition.

Centre Harbor Ledge, in Centre Harbor, near east end of Edgemoggin Reach, three feet out at low water.—Iron socket with wooden shaft, twenty-five feet high, and cask at top painted black, (new.) In good condition.

No. 42. *Ship and Barges*, Blue Hill Bay.—Iron socket, wooden shaft thirty feet, and cask. In good condition.

No. 43. *Bunker's Ledge*, Mount Desert.—Stone beacon. In good condition.

No. 44. *Half-tide Ledge*, Narraguagas Harbor.—Iron socket, wooden shaft and cask. In good condition.

No. 45. *Norton's Reef*, Pleasant River.—Iron tripod and shaft, ball at top. In good condition.

No. 46. *Snow's Rock*, Moosepeak Reach.—Iron socket, wooden shaft. In good condition.

No. 47. *Gilchrist Rock*, Moosepeak Reach.—Iron shaft. In good condition.

No. 48. *Moose Rock*, Moosepeak Reach.—Iron tripod. In good condition.

No. 49. *Western Bar*, Lubec Narrows.—Wooden crib filled with stone. Being rebuilt.

No. 50. *The Ledge*, St. Croix River.—Wooden crib filled with stone. In good condition.

The beacons on *Fishing Rocks*, Kennebunkport; *Sharp's Rocks*, Saco River; *Lee's Rock* and *Winslow's Rocks*, Kennebec River, were broken off by ice and other casualties, and their places supplied with spar-buoys.

The steam-whistles in this district are in good working order, and are highly spoken of by persons navigating this coast.

SECOND DISTRICT.

The Second District extends from Hampton Harbor, New Hampshire, to include Gooseberry Point, Massachusetts.

Inspector.—Commander John J. Walker, United States Navy.

Engineer.—Brevet Brigadier General J. C. Duane, Lieutenant Colonel of Engineers, United States Army.

In this district there are—

Light-houses and lighted beacons	58
Day or unlighted beacons	49
Light-vessels, (including one for relief).....	9
Buoys actually in position	500
Spare buoys for relief and to supply losses.....	273
Tender (steam) <i>Verbena</i>	1

The numbers preceding the names of stations correspond with those of the "Light-house List of the Atlantic, Gulf, and Pacific Coasts of the United States," issued January 1, 1871.

LIGHT-HOUSES AND LIGHTED BEACONS.

46. *Newburyport Harbor*, Massachusetts.—The fifth-order lens has been removed and a fourth-order substituted. A new keeper's dwelling is being erected. This Light-station was first established in 1790, and the beacon-light, designed to serve as a range for entering the harbor, (or for reaching a safe anchorage at night,) was erected in 1816. The tower of the main Light is a low, octagonal wooden structure, and the beacon must necessarily be so constructed as to allow it to be moved from one side to another in front of the main Light, as changes take place on the bar and in the outer channel.

Newburyport is a place of sufficient importance to justify the establishment of a more powerful light than the present one, and the erection of buildings of better materials than wood.

It is recommended that the temporary wooden structure on which the main Light is situated be replaced by a permanent cast-iron tower, supported on a concrete base, extending below the low-water line.

Should any future change in the formation of the site require the removal of the tower, this may be effected with little more expense than that of making a new concrete base.

The citizens of Newburyport have for several years maintained by subscription two range lights to guide vessels in the inner harbor, and they have lately petitioned the Government to take charge of them. Should this petition be granted it will be necessary to erect two small structures near the sites of the present lights. As a further aid to navigation entering this difficult harbor, it is recommended that a day beacon be erected on Black Rock, near the entrance. This point is at present marked by a spindle, which will probably sooner or later be carried off by the ice; moreover it does not sufficiently mark the rock in the night.

Estimated cost of main Light-house.....	\$50, 000
Estimated cost of two range-lights.....	10, 000
Estimated cost of day-beacon	6, 000
Total	<u>66, 000</u>

52 *Cape Ann*, Massachusetts.—A steam Fog-signal has been placed at this station. The towers are being repointed and buildings repaired.

Hospital Point, Salem Harbor, Massachusetts.—This new Light was exhibited from a temporary building on May 1, 1871. Permanent buildings are now being erected.

Fort Pickering, Salem Harbor, Massachusetts.—This new Light was exhibited on January 17, 1871.

Derby Wharf, Salem Harbor, Massachusetts.—This new Light was exhibited on January 17, 1871.

59. *Boston, Massachusetts.*—Two frame buildings for Fog-signals have been erected. The floor of the room for the storage of oil has been relaid.

60. *Narrows, entrance to Boston Harbor, Massachusetts.*—The tower-platform, railing and posts, and window-shutters and doors have been thoroughly repaired and all the iron-work has been scraped and painted. The ice-breaker has also been thoroughly repaired. A fifth-order lens will be substituted for the present sixth-order.

62. *Plymouth, "The Gurnet," entrance to Plymouth Harbor, Massachusetts.*—These Lights are of the sixth order and are entirely too small; they may readily be mistaken for the lights in a dwelling-house, when they can be seen at all, and the distance apart, thirty-one feet, is altogether too short to afford an efficient range. It is recommended to replace them by two fourth-order Lights, separated by a proper distance for an effective range. The estimated cost is \$25,000.

Duxbury Pier, entrance to Plymouth, Duxbury, and Kingston Harbors, Massachusetts.—Four sections of the tower have been erected, bringing it to a height of thirty-six feet, and the base filled with concrete to a height of twenty feet. The structure will be a tower twenty-five feet in diameter at the base, with a height of fifty feet focal plane. It is founded in two feet of water at low tide, and is of concrete, faced with iron. The run of ice is very severe from Plymouth Harbor, and to resist it, and the heavy seas by which it will be assailed, the tower will be built in one solid mass to a height of fifteen feet above the water. It is expected that the entire work will be completed by the end of the current fiscal year.

72. *Monomoy Point.*—The Light at this station, which is of the fourth order, on a tower about forty feet high, was originally intended as a guide to *Old Stage Harbor*. The harbor has been filled with sand, and cannot now be entered, and the Light is therefore of no further use for that purpose. But inasmuch as nearly all vessels (both steamers and sailing) plying between New York and the eastern ports pass this point, and have now no other guide than the Light-ships, which cannot be seen a sufficient distance, it is considered a matter of the greatest importance that this Light should be replaced by one of sufficient power to guide vessels safely through this intricate passage. For this purpose there is recommended a second-order Fixed Light, varied by red flashes, for which an estimate is submitted.

80. *Nantucket Beacon.*—Land has been purchased for a site for a keeper's dwelling, and the dwelling is now being erected. The beacon will also be removed to this lot.

At each of the following-named stations there have been repairs more or less extensive during the last year:

47. *Newburyport Beacon, Merrimack River.*
48. *Ipswich, entrance to Ipswich Harbor.*
49. *Ipswich, beacon, Ipswich Harbor.*
50. *Annisquam, Annisquam Harbor.*
51. *Straitsmouth, Straitsmouth Island.*
53. *Eastern Point, Gloucester Harbor.*
54. *Ten Pound Island, Gloucester Harbor.*
55. *Baker's Island, Salem Harbor.*
56. *Marblehead, Marblehead Harbor.*
57. *Egg Rock, off Nahant.*
58. *Minot's Ledge, in Boston Bay.*
61. *Long Island Head, Boston Harbor.*

62. *Plymouth*, entrance to Plymouth Harbor.
63. *Race Point*, Cape Cod.
64. *Long Point*, Cape Cod.
65. *Mayo's Beach*, Wellfleet Bay.
66. *Billingsgate*, entrance Wellfleet Harbor.
67. *Sandy Neck*, Barnstable Bay.
68. *Cape Cod*.
69. *Nanset Beach Beacon*, Cape Cod.
70. *Chatham*, Chatham Harbor, Cape Cod.
71. *Pollock Rip Light-vessel*.
72. *Monomoy Point*, Cape Cod.
73. *Shovelful Light-vessel*.
74. *Handkerchief Light-vessel*.
75. *Nantucket*, (Great Point.)
76. *Sankaty Head*, Nantucket.
77. *South Shoal Light-vessel*.
78. *Gay Head*, Martha's Vineyard.
79. *Brant Point*, Nantucket.
81. *Nantucket Cliff Beacons*.
82. *Bass River*, Vineyard Sound.
83. *Bishop & Clerk's*, Vineyard Sound.
84. *Hyannis*, Vineyard Sound.
85. *Cross Rip Light-vessel*.
86. *Cape Poge*, Martha's Vineyard.
87. *Succonnessett Light-vessel*.
88. *Edgartown*, Martha's Vineyard.
89. *Holmes' Hole*, Martha's Vineyard.
91. *Nobsque*, Wood's Hole.
92. *Tarpaulin Cove*, Naushon Island.
93. *Vineyard Sound Light-vessel*.
94. *Hen and Chickens Light-vessel*.
95. *Cuttyhunk*, Buzzard's Bay.
97. *Clark's Point*, New Bedford Harbor.
98. *Palmer's Island*, New Bedford Harbor.
99. *Ned's Point*, Mattapoissett Harbor.
100. *Bird Island*, Sippican Harbor.
101. *Wing's Neck*, Buzzard's Bay.

The following named Light-stations require repairs to be made during the ensuing year:

48. *Ipswich*.
52. *Cape Ann*.
61. *Long Island Head*.
72. *Monomoy Point*.
83. *Bishop & Clerk's*.
98. *Palmer's Island*.
51. *Straitsmouth*.
57. *Egg Rock*.
63. *Race Point*.
81. *Cliff Beacons*.
96. *Dumpling Rock*.

DAY OR UNLIGHTED BEACONS.

Names and positions of the day or unlighted beacons in the Second District:

No. 1. *Old Cock*, Buzzard's Bay, iron spindle, thirty-six feet high, with cage at top.

No. 2. *Egg Island*, Buzzard's Bay.—Granite cone with iron spindle, vane at top.

No. 3. *Range Beacon*, Fairhaven Fort Point.—Boiler-iron triangular pyramid, forty feet high.

No. 4. *Cormorant Rocks*, south side of entrance to Mattapoisett Harbor, Buzzard's Bay.—Iron spindle, twenty-six feet high, with cage at top.

No. 5. *Lone Rocks*, northeast entrance to Wood's Hole.—Iron spindle, cage at top.

No. 6. *Collier's Ledge*, entrance Centreville Harbor, Vineyard Sound.—Granite base, iron spindle, ball and vane.

No. 7. *Great Rock*, west of Point Gammon, Vineyard Sound.—Iron spindle, twenty-six feet high, cage at top.

No. 8. *Hyannis Breakwater*, east end.—Wooden spindle, four arms and cask at top.

No. 9. *Sunken Pier*.—Wooden spindle, cask at top, on northeast part of Bass River Bar.

No. 10. *Spindle Rock*, entrance to Edgartown Harbor.—Iron spindle, cask at top.

No. 11. *Billingsgate Shoal*, old site.—Timber beacon, fifteen feet high, with fifteen feet masts and slats across.

No. 12. *Egg Island Rock*, entrance to Wellfleet Harbor.—Wooden spindle, cask at top.

No. 13. *Duxbury Beacon*, square, granite, with four-foot granite post on top.

No. 14. *Breakwater Beacon*.—Square open-work granite, with wooden spindle.

No. 15. *Hogshead Beacon*.—Iron spindle with arm, cask and cage at top.

No. 16. *North Beacon*, entrance Scituate Harbor.—Iron spindle with two rounds.

No. 17. *South Beacon*, entrance Scituate Harbor.—Iron spindle with two lozenges.

No. 18. *Londoner*, off Thatcher's Island, Cape Ann.—Iron spindle forty-five feet high, with cage at top.

No. 19. *Point Alderton*.—Square granite pyramid with cone at top.

No. 20. *False-Spit*.—Granite base with iron spindle and cage.

No. 21. *Spit Beacon*.—Square granite pyramid.

No. 22. *Nix's Mate*.—Square granite base with octagonal pyramid.

No. 23. *Great Farm Bar*.—Square granite base and granite cone with iron spindle and cage at top.

No. 24. *Deer Island Point*.—Square granite pyramid.

No. 25. *Bird Island Beacon*, southeast point of Bird Island.—Iron spindle with cage at top.

No. 26. *Sunken Island*.—Open-work granite base, with wooden spindle and cage at top.

No. 27. *Pig Rocks*.—Granite pyramid, ten feet square at base, twenty feet high, with wooden mast and square cage at top. (Rebuilt this season.)

No. 28. *Halftide Rock*.—Wooden shaft forty feet high, with cask at top.

No. 29. *Cat Island Beacon*.—Wooden spindle.

No. 30. *Marblehead Rock*.—Conical, granite, with wooden spindle.

No. 31. *Little Aquavita*, entrance Salem Harbor.—Granite, with wooden spindle and cage at top.

No. 32. *Great Aquavita*, entrance to Salem Harbor.—Granite, with wooden spindle and cage at top.

- No. 33. *Hardy's Rock*.—Wooden spindle, with two triangles at top.
- No. 34. *Bowditch Beacon*.—Triangular pyramid of granite, with wooden spindle and cage at top.
- No. 35. *Halfway Rock*.—Granite beacon in ruins.
- No. 36. *Little Haste*.—Wooden mast thirty-five feet high, with cask at top.
- No. 37. *Abbott's Monument*.—Square, granite, with wooden mast and cage at top.
- No. 38. *Monument Bar*.—Square wooden crib filled with stone, mast and cage at top.
- No. 39. *Ram's Horn*.—Square wooden crib filled with stone, wooden shaft at top.
- No. 40. *Lobster Rocks*, Beverly Harbor.—Stone, with wooden spindle.
- No. 41. *Black Rock*, Gloucester Harbor.—Iron spindle with oblong cage at top.
- No. 42. *Harbor Rock*, Gloucester Harbor.—Iron spindle, with ball cage at top.
- No. 43. *Five-Pound Island*, Gloucester Harbor.—Granite base, with iron spindle and ball at top.
- No. 44. *Lobster Rock*, Annisquam.—Square open-work granite beacon.
- No. 45. *Lane's Point*.—Square wooden beacon.
- No. 46. *Point Neck Rock*.—Iron spindle, with ball at top.
- Black Rocks* on starboard hand entering Merrimack River, Newburyport Harbor, rocks out at half tide.—Iron spindle twenty-three feet high, with cask at top. Erected this season.
- No. 47. *North Pier*.—Newburyport harbor.—Wooden crib filled with stone.
- No. 48. *South Pier*, Newburyport harbor.—Wooden crib filled with stone.

LIGHT-VESSELS.

- No. 87. *Shovelful Light-vessel* No. 3.—Good order. This vessel has been taken into Hyannis, her metal repaired, &c.
- No. 88. *Handkerchief Light-vessel* No. 4.—Good order. This vessel has been taken into Hyannis to have her metal and stern repaired, &c.
- No. 100. *Cross Rip Light-vessel* No. 5.—This vessel has been taken into New Bedford placed on the marine railway, her metal repaired, partially recalked, her boats repaired, &c.
- No. 102. *Succonnessett Light-vessel* No. 6.—This vessel is in very bad condition, and another vessel (No. 24) has been sent to the district to supply her place, but she will require some repairs before being put on the station.
- No. 107. *Vineyard Sound Light-vessel* No. 7.—This vessel was taken to New Bedford last November, her upper works newly calked, decks sheathed, supplied with new foresail, new windlass, new running rigging, fifteen fathoms new chain cable, and put in thorough order.
- No. 108. *Hen and Chickens Light-vessel* No. 8.—This vessel has been taken to New Bedford, placed upon the marine railway, her bottom partially refastened, recalked, remetaled, a new set of plain sails supplied, and the vessel put in thorough order generally.

RELIEF LIGHT-VESSELS.

- Relief Light-vessel* No. 9.—This vessel has been entirely retopped the past year, supplied with a new suit of plain sails, her water-tanks rebottomed, furnished with new day-marks, and such new rigging as she

required, and is now a most excellent vessel, suitable for occupying any station in the district.

Relief Light-vessel No. 38.—The upper works of this vessel have been recalced and painted, and the vessel is now in excellent condition, and in readiness to go to any station in the district at a moment's notice. Has been recently sent for temporary service to the Sixth District.

BUOYS.

Buoys actually in position.—All the buoys in the district (five hundred in number) have been shifted since the opening of the spring, and are now in excellent order.

TENDERS.

° The steam tender *Verbena* is an efficient vessel, and in good condition, but one tender is insufficient for a district having so many buoys, Light-vessels and Light-houses to visit and look after.

LIGHT-VESSEL AND BUOY-DEPOTS.

The *Buoy Depot at Gulf Island*, the place of residence of the Minot's Ledge Light-keepers, is difficult of access, as it can only be reached at high water, and it is proposed to have the buoys kept higher up in Boston Bay if a proper place can be obtained.

At the *Light-vessel and Buoy-depot* at Wood's Hole some repairs of the wharf required will soon be made under the direction of the Engineer of the district.

TENDER.

The tender authorized by the last session of Congress, designed for the use of the Engineer of the First and Second Districts, is being built under contract.

THIRD DISTRICT.

The Third District embraces all aids to navigation from Gooseberry Point, Massachusetts, to include Squam Inlet, New Jersey, as well as the Hudson River, Whitehall Narrows, and Lake Champlain.

Inspector.—Commodore James H. Strong, United States Navy.

Engineer.—Brevet Brigadier General I. C. Woodruff, Lieutenant Colonel of Engineers, United States Army.

In this district there are—

Light-house and lighted beacons.....	107
Day or unlighted beacons.....	48
Light-vessels.....	9
Buoys actually in position.....	432
Spare buoys for relief and to supply losses.....	458
Tenders (steam) <i>Cactus</i> and <i>Putnam</i>	2

The numbers preceding the names of stations correspond with the "Light-house Lists of the Atlantic, Gulf, and Pacific Coasts, and the Northern and Northwestern Lakes of the United States," issued January 1, 1871.

LIGHT-HOUSES AND LIGHTED BEACONS.

Castle Hill, east side of entrance to Newport Harbor, Narragansett Bay, Rhode Island.—The application of former years for a Fog-signal on *Castle Hill* is not renewed, in view of the proposed erection of a

steam syren signal at *Beaver Tail* Light-station, distant only about two miles.

118. *Beaver Tail*, Rhode Island.—A steam syren will be erected at this station during this season, and it is believed that there will be no necessity for the Fog-signal at *Castle Hill* on the opposite side of entrance to Newport Harbor, which has frequently been petitioned for.

119. *Lime Rock*, Rhode Island.—The rock on which this Light-house stands is full of crevices, through which the water, during heavy rains, enters the cellar. It is proposed either to cover the rock with concrete made of Portland cement, gravel, and sand, or to endeavor to remedy it by drains. The latter has been directed to be done, (experimentally,) being less expensive.

120. *Newport Harbor*, (Goat Island,) Rhode Island.—It is recommended that a Fog-bell, operated by Stevens's striking apparatus, may be placed at this station, as an essential aid in entering the harbor. Estimated cost, \$800.

123. *Poplar Point*, Narragansett Bay, Rhode Island.—The repairs and renovations which were authorized for this station have been completed, and a new lantern substituted for one of the oldest construction.

Muscle Bed Beacon, Narragansett Bay, Rhode Island.—The construction of a Light-house on *Hog Island Reef* has been petitioned for for several years, but hitherto Congress has not granted an appropriation therefor. The erection of a portable Light and a Fog-bell on the existing stone tower on the *Muscle Bed*, one-half mile distant, on the opposite side of the channel, at a cost of \$3,000, will, it is believed, obviate the necessity for this Light-house, which would be a very expensive construction.

127. *Conimicut Point*, Rhode Island, entrance to Providence River, Narragansett Bay.—When the Light on the shoal off *Conimicut Point* was lighted as a substitute for the Light on the main land, at *Nayat Point*, (distant about one mile,) the only available means of attending upon it were to allow the keepers to retain the dwelling at the old Light-station, and for them to visit the new Light by boat. The land constituting the site of the old Light-station at *Nayat Point* is valuable, and would bring at public sale a good price. The old tower is not worth the cost of tearing it down, and the dwelling not having been repaired, in expectation of an appropriation for completing the buildings at *Conimicut Point*, to include a proper dwelling for the keeper, it now becomes necessary either to make considerable expenditure upon the *Nayat Point* dwelling, or ask for a special appropriation for the necessary protection pier against running ice, and for a dwelling at that Light-house. The estimated cost of the work is \$30,000.

Sabine's Point, Providence River, Rhode Island.—By an act of Congress, approved March 3, 1871, an appropriation was made for the erection of a Light-house on this point. Plans and specifications have been prepared, and proposals for the construction of the work are invited by public advertisements, to be received until July 31, 1871.

128. *Pumham Rock*.

129. *Fuller's Rock*.

Sassafras Point.

The construction of these three permanent Lights in Providence River, above *Sabine's Point*, Rhode Island, authorized by an appropriation made July 15, 1870, is progressing under contracts, and will be completed this season.

130. *Point Judith*, Rhode Island.—The present Fog-signal, operated by a caloric engine, has been found insufficient for this important sta-

tion on the water-route from New York to New England. Frequently the sound of the signal is lost in the noise of the surf, so that steamers and vessels are left without a reliable guide off this dangerous point. It is recommended to replace the present signal by a first-class steam Fog-signal *whistle*, and a duplicate at a cost of \$5,000, including the housing. To distinguish it from the *Beaver Tail Syren*, a whistle should be placed at *Point Judith*.

131. *Block Island*.—To arrest the drifting sands which created some apprehension for the safety of the buildings, a wattling of small stakes, driven into the sand and interlaced with brush, was recommended in a special report to the Light-House Board, and by it approved. It is believed that willow-slips, in addition to the above wattling, will be efficient in arresting the drifts. For this object an estimate of \$1,800 is presented.

132. *Watch Hill, Connecticut*.—The repairs and renovations provided for in the appropriation of July 15, 1870, were completed during this season, with the exception of placing the lantern-deck and parapet, which is now ready for shipping to the station.

133. *Montauk Point, Long Island, New York*.—The keeper's dwelling requires a new roof, and ceilings in the attic require replastering. This, with other incidental repairs of the tower, &c., will cost \$1,500. It is recommended that a Fog-signal be placed at this important station, for which, with a duplicate, \$8,000 is estimated.

137. *North Dumpling, Fisher's Island Sound*.—The repairs and renovations provided for in the appropriation of July 15, 1870, are completed. The roof on the keeper's dwelling was replaced by a Mansard roof, and a new tower, with lantern, erected upon the dwelling. The bell-tower was thoroughly repaired, the roof over the striking apparatus tinned, and the whole repainted. A barn was built, and the banks of the sluice leading into the pond, which is used as a basin for the keeper's boat, have been protected by rough granite blocks.

140. *Race Rock, Fisher's Island Sound, New York*.—The construction of the foundation for a new Light-house on *Race Rock*, commenced in April last, is progressing satisfactorily, about 3,000 tons of granite having been placed in riprap foundation, in addition to which 7,000 tons will be delivered under a contract now in operation. The entire foundation, together with a portion of the supporting pier and landing wharf, will be put under contract and completed by the close of this fiscal year. The original estimate of the cost for this structure is \$200,000. The amounts provided by special acts of Congress are as follows, viz:

By act approved July 15, 1870.....	\$10, 000
By act approved March 3, 1871.....	150, 000
Total.....	<u>160, 000</u>

The amount of \$40,000 is embraced in the estimates for continuing this work.

141. *Little Gull Island, Long Island Sound*.—A horizontal steam-boiler to operate a syren Fog-signal has been placed at this important point, and is found to be very efficient in guiding vessels through "the Race" in foggy weather. A duplicate signal, for which an appropriation was made March 3, 1871, is in process of construction, and will be put up as soon as completed. The bell, which had been retained for cases of emergency, will then be removed. A suitable building for the reception

of the duplicate signal is just being completed. Cisterns have been built, and the entire pier, on which the tower and dwelling stand, was covered with concrete flagging for the purpose of collecting all the rainfall which is required for the steam Fog-signals. To complete the landing the sum of \$5,000 is estimated.

142. *Gardiner's Island*, Long Island Sound.—The necessary alterations in the lantern, and the painting of the tower and keeper's dwelling, inside and out, are completed.

143. *Plum Island*, Long Island Sound.—The rebuilding of this station is completed, and a Fog-bell, operated by a Stevens's striking apparatus, placed at this station.

Oyster Pond Point, Plum Gut, Long Island Sound.—An estimate is again submitted for the erection of a stone beacon on *Oyster Pond Point Reef*, to guide vessels to and from Long Island Sound to Gardiner's Bay, New York.

144. *Long Beach Bar*, Long Island Sound.—The erection of a lighted beacon at this station was provided for by special appropriation of July 15, 1870, the plan adopted being a light on the keeper's dwelling, which is founded on screw-piles. These are protected by an ice-breaker of granite blocks placed in riprap. The entire iron and wood-work for this structure is completed, and contracts are now in operation for the erection of the Light-house, and building the ice-breaker. It is expected that the Light can be exhibited at this station by the close of this season.

148. *Brockway's Reach*, Connecticut River.—A portion of the stones which protect the foundation of this beacon having been washed away by the spring freshets, has been replaced.

149. *Devil's Wharf*, Connecticut River.—The stones, which were washed away by freshets, have been replaced.

151. *Horton's Point*, Long Island.—The repairs and renovations provided for by the appropriation of July 15, 1870, are completed. The rooms for the accommodation of the assistant keeper were added to the keeper's dwelling, and a room provided for the Light-house supplies; the keeper's dwelling was thoroughly repaired and repainted. A cast-iron lantern-deck was substituted for the stone one, which leaked. The third-order lens, which originally formed a part of a revolving apparatus, has been replaced by a third-order fixed lens; the focal plane was raised and the illuminating apparatus rendered more efficient. The entire outside brick-work of the tower and dwelling, which was found in a state of rapid decay, caused by the action of the atmosphere and frost, was covered with a coating of Portland cement-mortar. The barn has been thoroughly repaired, and the fences to a great extent renewed and repaired.

152. *Falkner's Island*, Long Island Sound.—The repairs and renovations—including rebuilding of keeper's dwelling, and substituting an iron stairway for a wooden one—authorized by the appropriation of July 15, 1870, are progressing, and will be completed during this season. A powerful steam Fog-signal is recommended for this station to prevent the frequent losses of vessels which occur in its vicinity during fogs and snow-storms. For this object an appropriation of \$8,000 is asked. The bank to the eastward is slowly wearing away, the loss having been about twelve feet in the course of twenty years. It may be necessary at a day not far distant to protect the foot of the slope, near the Light-house, by riprap along a distance of about two hundred feet or more.

153. *New Haven Harbor*.—The repairs and renovations provided for by the appropriation of July 15, 1870, are completed. The caloric

engine which operated the Fog-bell being worn out, was replaced by a Stevens's striking apparatus.

155. *Stratford Point*, Long Island.—The condition of this station is very bad. The rebuilding of the tower and keeper's dwelling has been recommended for the last three years. It is now recommended that a frame building be erected, on which the lantern-tower will be placed. For this and the necessary out-buildings, an estimate of \$15,000 is respectfully submitted.

157. *Bridgeport Harbor*, Connecticut.—The rebuilding of this beacon was authorized by the appropriation of July 15, 1870. The plan adopted is similar to that for *Long Beach Bar*, viz, a Light on keeper's dwelling, which is founded on screw-piles: these being protected by an ice-breaker of granite blocks placed in riprap. The entire iron and wood-work for this structure is completed, and contracts are now in operation for the erection of the Light-house, and building the ice-breaker. The Light will probably be exhibited by October next.

158. *Black Rock*, Connecticut.—The buoy-wharf and shed for storage of buoys at this station, authorized by the appropriation of \$8,000, on March 3, 1871, will be built during this season, the plans being in readiness to invite proposals for its construction.

160. *Penfield Reef*, Long Island Sound.—The construction of a Light-house on *Penfield Reef*, near Bridgeport, Connecticut, authorized by appropriations made July 15, 1870, and March 3, 1871, has been commenced under contracts now in operation, and will be prosecuted with a view to its completion during the next working season.

161. *Eaton's Neck*, Long Island.—A powerful steam Fog-signal, authorized under appropriation made July 20, 1868, has been put up at this station. It is a syren, and a building for a duplicate now in process of construction, and a building for the caloric engine for pumping water for the use of the Fog-signal, have been erected.

162. *Lloyd's Harbor*, Long Island.—The damage caused to the Light-house at this station by the gale of November 22, 1870, has been repaired and a granite wall built to protect the station, at a cost of about \$3,000.

Stamford Harbor, Connecticut.—An examination of the "Ledge" in this harbor was made under instructions from the Light-House Board, by the Inspector and Engineer of the district, in accordance with petition of a large number of persons interested in the trade of this port for a Light to mark the "Ledge." The report of the Inspector and Engineer recommends a day-beacon on the "Ledge" and a lighted beacon on the opposite side of the channel. The cost of the two structures will be \$8,000, which amount is included in the estimates.

165. *Execution Rocks*, Long Island Sound.—The work of protecting this station against the ice and sea, authorized by the appropriation made July 15, 1870, has been completed. The damage caused by the ice during the winter has also been repaired, and the keeper's dwelling is now being repainted. The tower needs extensive repairs, pointing on the exterior, and alterations in the interior.

166. *Sand's Point*, Long Island.—The damage caused by gales during the winter to the jetties and sea-wall which protect this station, been repaired at a cost of about \$3,000. The buildings require repairs, and for this purpose an estimate is submitted of \$3,000.

Hart Island, Long Island Sound.—An appropriation was made in 1866 for the erection of a Light at this point. The owner of the island being unwilling to sell the requisite quantity of land for this Light-tation for such a sum as the Board would have been authorized to

give, proceedings were instituted, in conformity to law, for condemning the land. The award of the appraisers for five acres of land was \$25,000, a sum far exceeding the entire appropriation, and, in the opinion of the board, far beyond its intrinsic money value. Having made further examinations, it is found that the south end of the island, upon which the Light would necessarily be placed, if placed on the island at all, is continually washing away, and unless it is protected by an expensive sea-wall, a Light-house could not remain there very long. The end of the reef, (in six feet water,) which runs out from the southern end of the island, would afford a good foundation and proper site for the erection of a stone structure similar to those already erected at points on the Hudson River. The estimated cost of the proposed structure and apparatus, complete in all respects, is \$50,000, and is included in the annual estimates this year.

169. *Great West Bay*, Long Island.—The tower requires repointing and coating with Portland cement; the dwelling also requires repairing and painting; speaking-tubes and an alarm-bell are needed to communicate from the watch-room in the tower with the keeper's dwelling. An estimate of \$500 is submitted herewith.

170. *Fire Island*, Long Island.—The outside painting on the tower is very defective, and does not appear in the color represented in the Light-house list. Many bricks are crumbled, and require to be replaced by sound ones, and the tower covered with Portland cement-wash. Speaking-tubes and an alarm-bell are also needed to communicate from the watch-room with the keeper's dwelling. An estimate of \$500 is submitted herewith.

175. *East Beacon*, Sandy Hook.—A new first class steam (syren) Fog-signal, with horizontal boiler, has been substituted for the old one with vertical boiler, the tubes of which were destroyed by corrosion. A duplicate steam Fog-signal, authorized by the appropriation of March 3, 1871, is in course of construction, and will be put up as soon as completed.

A new frame building has been erected for the new Fog-signal. The old building has been moved to the vicinity of the new one, and has been renovated to receive the duplicate signal.

A well has been dug and walled, which furnishes fresh water for the boilers of the signal. The keeper's dwelling requires repainting inside and outside, which will be done at an early period.

In the previous annual report reference was made to the abrasion of the beach, which rendered it necessary to remove the beacon building five hundred feet to the southward. The abrasion does not seem to be of a threatening character at this time, but no doubt is entertained that upon the completion of the jetties, recently commenced by the Engineer Department for the protection of the beach in front of the fort from abrasion, the accumulation of sand will be arrested, and abrasion will most likely result in the vicinity of the beacon and the new Fog-signal structures. It is hence deemed imperative to guard against such a contingency by the construction of two jetties similar to those adopted by the Engineer Department. The cost of such protection is estimated at \$20,000.

It may be well to state that a further removal of the beacon and the Fog-signal to the southward is impossible, as they would, if so removed, be masked by the works of defense seaward or in the direction the sound from the signal is especially needed.

Flynn's Knoll, Lower Bay of New York.—The erection of a Light-house on *Flynn's Knoll*, in nine feet water, to form a range with *Princess Bay Light*, for the deepest water in *Gedney's Channel*, was recom-

mended in last year's report and in those of former years. The great importance of a reliable guide to navigation on this dangerous shoal seems to justify the attempt to bring the subject again to the attention of Congress. The amount of \$100,000 for commencing the work is embraced in the estimates.

177. *Conover Beacon*, Sandy Hook Bay.—Repairs at this station are much needed and will be made as soon as the more urgent necessities of the district admit.

178. *Chapel Hill Beacon*, New Jersey.—The out-buildings at this station, blown down during a gale, have been rebuilt, and the fences have been repaired.

181. *Elm Tree Beacon*, Staten Island.—The extension of the jetty, for which funds have been provided by the appropriation of March 3, 1871, will be built during this season.

183. *Princess Bay*, Staten Island.—The protecting wall authorized by the appropriation of July 15, 1870, is in course of construction under contract, and, it is expected, will be completed during the present season. The wood-work of the keeper's dwelling and the iron-work of the tower have been repainted.

184. *Fort Tompkins*, Staten Island.—The Light-house at this station must be removed shortly to the interior of the works of defense. Its present site is required for the purposes of a battery now in course of construction. Experimental firings are of frequent occurrence at this fort, during which the glass of the lantern is broken. As a temporary expedient a wooden frame has been made, and a light will be exhibited therefrom near to the present Light-house, at a point designated by the Engineer officer in charge of the fort. For a dwelling surmounted by a tower, at the new site of the Light-house, the sum of \$8,000 is asked.

192. *Esopus Meadow*, Hudson River.—The rebuilding of this station under the appropriation of July 15, 1870, is in progress under contract, and will be completed during the present fiscal year.

194. *Saugerties*, Hudson River.—The Engineer of the district was authorized to draw up a contract for signature of the persons desiring to occupy the old Light-house pier at this station for a public wharf, in such a manner as to secure the interests of the United States. He sent the contract so prepared, but up to this time the contract has not been returned to him. One of the conditions was to remove the old dwelling-house, also requested by the petitioners for use as a store-house, to such a distance as not to endanger the new structure by fire. In case the parties do not comply with the terms of the contract the old buildings will be taken down, being of no further use to the station.

197. *Stuyvesant Light-house*, Hudson River.—The old dwelling at this station will be retained as a depot for keeping portable beacons of Hudson River during the close of navigation.

198. *New Baltimore.*

199. *Five Hook Island.*

200. *Coeysman's Bar.*

201. *Roha Hook.*

202. *Schodack Channel.*

203. *Nine-mile Tree.*

204. *Cow Island.*

205. *Parada Hook.*

206. *Van Weiss Point.*

207. *Cuyler's Dyke.*

These ten beacon-lights in the Hudson River, which were destroyed

by ice and freshets, will be restored during this season, under the appropriation of March 3, 1871, for this purpose.

White Hall Narrows, 416, 417, and 420-431 inclusive.—The portable beacons in *White Hall Narrows* are in good order. The customary removal for the winter was unnecessary, during the last winter the ice in the Narrows having melted to such a degree before it moved that no damage to the beacons was anticipated. Two stake-lights require to be replaced by portable beacons, viz:

418. *Opposite Chapman's Dock*; and

419. *South of Snoddy's Dock*.

Estimated cost \$800 each.

432. *Crown Point*, Lake Champlain.—The keeper's dwelling needs repairs and repainting. A stable is much needed at this station, and has been recommended in previous reports. The recommendation is renewed. Estimated cost for repairs and for stable, \$1,500.

433. *Barber's Point*, Lake Champlain.—A contract has been made for the construction of a Light-house on this point, as provided by the appropriation of July 15, 1870. The work will be commenced as soon as a certain judgment debt is removed and a valid title to the United States can be secured.

434. *Split Rock*, Lake Champlain.—Boatways and capstan authorized by the appropriation of March 3, 1871, will be supplied during this season.

435. *Juniper Island*, Lake Champlain.—The construction of a wharf and boat-house, under the appropriation of March 3, 1871, will be carried into effect during the present season.

436, 437. *Burlington Breakwater*, Lake Champlain.—Funds have been provided, under the appropriation of March 3, 1871, for the construction of a Light on keeper's dwelling upon the north end of the breakwater. The work will be commenced as soon as the extension of the breakwater is completed.

438. *Colchester Reef*, Lake Champlain.—By an act of Congress approved July 15, 1870, the amount of \$20,000 was provided for building a Light-house at *Colchester Point*, or in its vicinity, Lake Champlain. It was reported last year as follows: "After a careful examination and survey of the locality, it was found that the rock called 'Middle Bunch' was the proper place for the new Light-house. This rock is in the middle of the channel, with seven feet water over it at low water, and deep water on either side. With a Light thereon a vessel can pass on either side close to the rock. The work has been commenced and will be carried above water (and further, if possible) this fall, and will be completed next season."

The crib for the foundation was made in Burlington, and was towed to, placed on the reef, and filled in with concrete and rough stone. Two courses of the cut stone were also laid, and thereby the pier was brought above water. Before the work was abandoned for the season, it was ballasted with heavy blocks of stone to prevent its being moved by the ice. When the ice moved in the spring the ballast on the pier, with a part of the second course of cut stone, were shoved into the lake; the first course was found undisturbed. A few of the cut stone were found and replaced; but four hundred and eighty-one feet had to be rebuilt. After the damage had been repaired, the work on the pier was resumed and completed by the end of June.

The appropriation of \$20,000 was made for a Light-house on *Colchester Point*, or its vicinity, which amount would have been ample for a structure on land. The necessary change in the locality for the Light

from *Colchester Point* to a reef in seven feet water, required also a change in the plans of the structure. The new plans were prepared with the intention to keep the expenses within the amount of the appropriation. This, however, was frustrated by the various causes enumerated. The amount required for the completion of the Light-house on the *Middle Bunch*, (*Colchester Reef*), Lake Champlain, in addition to the former appropriation, is \$4,500. A Fog-bell will be erected at this station.

439. *Bluff Point*, Valcour Island, Lake Champlain.—The appropriation of July 15, 1870, provides for the construction of a Light-house on this point. A contract for its construction has been entered into, and work will be commenced as soon as a valid title to land is secured to the United States.

442. *Cumberland Head*, Lake Champlain.—The appropriation of March 3, 1871, provides the means for the purchase of additional land at this station for the object of removing certain trees which now obstruct the Light. The purchase will be made and the obstructions removed during this season.

444. *Isle La Motte*, Lake Champlain.—It has been recommended in previous reports to replace the present beacon-light by a Light on keeper's dwelling, and is renewed. The distance between the residence of the keeper and the beacon is too great to secure proper attendance. The estimated cost of the dwelling, surmounted by a tower, is \$8,000.

At each of the following Light-stations there have been repairs and renovations more or less extensive during the year, and not alluded to in this report:

- 126. *Warwick Neck*, Narragansett Bay.
- 136. *Morgan's Point*, (Mystic,) Fishers' Island Sound.
- 138. *New London Harbor*, Connecticut.
- 145. *Cedar Island*, Gardiner's Bay.
- 154. *New Haven Long Wharf*, Long Island Sound.
- 167. *Throgg's Neck*, Long Island Sound.
- 174. *Sandy Hook*, entrance to New York Bay.
- 189. *Elbow Beacon*, Newark Bay.
- 440, 441. *Plattsburgh Beacons*, Lake Champlain.
- 443. *Point au Roche*, Lake Champlain.
- 445. *Windmill Point*, Lake Champlain.

The following-named stations have not been mentioned elsewhere:

- 121. *Rose Island*, Narragansett Bay, Rhode Island.
- 122. *Dutch Island*, Narragansett Bay, Rhode Island.
- 124. *Prudence Island*, Narragansett Bay, Rhode Island.
- 125. *Bristol Ferry*, entrance to Mount Hope Bay, Rhode Island.
- 134. *Stonington Harbor*, Connecticut.
- 146. *Saybrook*, mouth of Connecticut River.
- 147. *Calves' Island*, Connecticut River.
- 159. *Old Field Point*, Long Island Sound.
- 163. *Norwalk Island*, Long Island Sound.
- 164. *Great Captain's Island*, Long Island Sound.
- 168. *North Brother Island*, East River, New York.
- 172, 173. *Highlands of Navesink*, New Jersey, New York Bay.
- 176. *West Beacon*, Sandy Hook, New York Bay.
- 179. *Point Comfort Beacon*, entrance to New York Bay.
- 180. *Waackauck Beacon*, entrance to New York Bay.
- 182. *New Dorp Beacon*, Staten Island, New York Bay.
- 185. *Robbin's Reef*, New York Harbor.
- 186. *Bergen Point*, Newark Bay, New Jersey.

- 187. *Corner Stake*, opposite Elizabethport, New Jersey.
- 188. *Passaic Light*, near mouth of Passaic River, New Jersey.
- 190. *Stony Point*, Hudson River.
- 191. *West Point*, Hudson River.
- 193. *Rondout*, Hudson River.
- 195. *Four-mile Point*, Hudson River.
- 196. *Coxsackie*, Hudson River.

UNLIGHTED BEACONS, INCLUDING SPINDLES.

All the beacons and spindles in the following list are in good condition, unless otherwise stated.

- 1. *East Lime Rock*, near Newport.—A granite structure, surmounted by an iron spindle and cage.
- 2. *South Point*, Rose Island, Narragansett Bay.—Granite structure, surmounted by a spindle and cage.
- 3. *Halfway Rock*, three-fourths of a mile southward of Prudence Island Point, Narragansett Bay.—Spindle, with square cage.
- 4. *Bullock's Point*, Narragansett Bay.—Stone beacon, with iron spindle and day-mark.
- 5. *Pawtuxet Beacon*, Narragansett Bay.—Of stone.
- 6. *Pumham Beacon*, Providence River.—A stone beacon, with vane and ball.
- 7. *Muscle Bed*, east side of the channel below Bristol Ferry, Rhode Island.—A stone beacon, with iron spindle and day-mark.
- 8. *Borden's Flats*, opposite to Fall River.—A stone beacon, with iron column and day-mark.
- 9. *Castle Island*, near north end of Hog Island, Bristol Harbor.—A stone beacon, surmounted by a red ball. The foundation requires repairing and protection.
- 10. *Allen's Rock*, Warren River.—Stone beacon, one-eighth mile north of Adam's Point.
- 11. *Warwick, or Spindle Rock*, west channel of Narragansett Bay, and entrance to Greenwich Harbor, between Warwick Neck and Pojack Point.—Iron spindle, with square wooden cage.
- 12. *White Rock Beacon*, at the entrance of Wickford Harbor, Narragansett Bay.—Stone beacon, with iron column and day-mark.
- 13. *Watch Hill Spindle*, entrance to Fisher's Island Sound from Lighthouse southwest by south three-fourths of a mile.—Stands on a rock, which is bare at low water, and is surmounted by a cage.
- 14. *Sugar Reef Beacon*, Fisher's Island Sound.—Iron-pile beacon with cage-work day-mark in the form of a cone.
- 15. *East or Catumb Reef Spindle*, entrance to Fisher's Island Sound by Lord's Channel, one and one-fourth miles east of east point of Fisher's Island.—An iron-pile beacon, with square cage-work.
- 16. *West or Wiccopesset Spindle Rock*, entrance to Fisher's Island Sound by Lord's Channel.—Northwest of East Spindle two-thirds of a mile.
- 17. *Latimer's Reef*, Fisher's Island Sound, one mile northwest of east point of Fisher's Island, and three-fourths of a mile southeast of Eel Grass Shoal Light-vessel.—An iron spindle, bearing a square cage-work.
- 18. *Ellis's Reef*, Fisher's Island Sound, three-fourths of a mile northwest of Eel Grass Shoal Light-vessel.—An iron spindle, with a square cage-work.
- 19. *Ram Island Reef*, Fisher's Island Sound. One-half of a mile southeast of Ram Island.

20. *Spindle on the Whale*, entrance to the Mystic River.—As reported last year, this spindle was carried away by ice. It is proposed to build a beacon of stone, bearing a day-mark, at the estimated cost of \$5,000.

21. *Crook's Spindle*, Mystic River.—Is an iron spindle, with a keg on top.

22. *Groton Long Point*, Fisher's Island Sound.—An iron spindle, bearing a cage-work in the form of an inverted cone.

23. *Sea-flower, or Potter's Reef Beacon*, Fisher's Island Sound, northwest of *North Dumping Light* one mile.—Remains as reported last year. It is a very important mark in Fisher's Island Sound, and recommended for immediate reconstruction. It is proposed to build a granite structure for the purpose of upholding the spindle and cage of the old beacon. Estimated cost, \$4,200.

24. *Black Ledge*, entrance to New London Harbor.—An iron shaft, bearing a cage-work day-mark, formed by two cones connected at the vertices.

25. *Saybrook Beacon*, Connecticut River.—Stone beacon, with globe on Saybrook Bar.

26. *Hen and Chickens*, Long Island Sound.—Iron spindle bearing a square cage, painted black.

27. *Branford Reef Beacon*, Long Island Sound.—Granite beacon, surmounted by an iron shaft, bearing a black day-mark.

28. *Quix's Ledge*, entrance to New Haven Harbor, Connecticut.—An iron spindle, with a cask on top; stands on a rock which is dry at half tide.

29. *Southwest Ledge Spindle*, entrance to New Haven Harbor, Connecticut.—Marked by a second-class buoy.

30. *Stratford River Beacon*, entrance to Stratford River.—Granite beacon, with iron column and day-mark.

31. *Inner Beacon*, Bridgeport Harbor, Connecticut.—A frustum of a square pyramid of wood, surmounted by a wooden mast, with a cask, painted black.

32. *Outer Beacon*, Bridgeport Harbor, Connecticut.—The same as the inner beacon.

33. *Black Rock Beacon*, Long Island Sound.—An iron-pile beacon, with a cage on top.

34. *Southport Beacon*.—Granite beacon, with iron column and day-mark.

35. *Southport Breakwater Beacon*.—Granite beacon, with iron column and day-mark.

36. *Norwalk Beacon*, southwest of Norwalk Island, Connecticut.—A granite structure, supporting a shaft and day-mark of iron.

37. *Great Reef*, off Norwalk Island, entrance to Norwalk Harbor.—A wooden spindle, with cage day-mark, is in course of construction.

38. *Sand Spit*, on the south point of Sand Spit, Sag Harbor.—This beacon, having been destroyed by ice, is being replaced by a stone beacon, surmounted by a wooden tower.

39. *Oyster Pond Point*, Plum Gut, entrance to Gardiner's Bay.—As reported last year. A reef runs out into Plum Gut, which is bare at low water. It is proposed to erect a stone beacon upon it to guide vessels running into Gardiner's Bay clear of this danger. Estimated cost, \$5,000.

40. *Success Rock*, Long Island Sound.—An iron shaft, with conical cage-work.

41. *Romer Beacon*, on the west side of Romer Shoal, entrance to the Bay of New York.—A granite structure in the form of a frustum of a cone, surmounted by a wooden mast and square cage day-mark. The

repairs authorized by the appropriation of March 3, 1871, will be made during this season.

42. *Mill Reef Beacon*, Kill Van Kull, opposite New Brighton.—This is a sheet-iron beacon, filled in with concrete, and secured to a granite base. It is conical in shape, and supports an iron shaft with an iron cage on top.

STATEN ISLAND LIGHT-HOUSE DEPOT.

Building for offices.—The work on this building, having been suspended more than one year for want of funds, has been resumed, and the structure will be completed and ready for occupation by November.

Shed and Wharf.—The work authorized by the appropriation of July 15, 1870, has been completed. The basin in front of the depot has been dredged to a depth of ten feet at low-water, and is now a safe harbor for the vessels connected with the Light-house service. Adjacent to the basin a coal bin of 800 tons capacity has been built. The depot being situated at the foot of a slope, which is full of springs, requires a system of drainage and grading. The estimated cost for this work, in addition to the expenses of keeping the depot and buildings in order, is \$20,000.

LEGISLATION CEDING JURISDICTION OVER LIGHT-HOUSE SITES.

A circular letter from the Light-House Board of July 11, 1870, called for the names of such States in this district as had not passed, first, a general law ceding jurisdiction over land purchased by the United States from time to time for public uses; and, second, a general law providing for the acquirement of land by the United States in cases of disagreement with the owners. Letters were addressed to the secretaries of state of New Jersey, Vermont, Connecticut, Rhode Island, and New York, inquiring if these laws had been passed, and it was subsequently learned that none of these States had passed such general laws, the custom being uniform to pass special acts for each case, where land was required. Subsequently letters were addressed to the governors of Rhode Island, Connecticut, New Jersey, and New York asking the passage of these general laws, and the Engineer of the district personally urged their passage at the capitals of the States named. Rhode Island passed the general law, and in addition a special act, ceding the State's right over certain points in the navigable waters of the State. New York adhered to its former custom, and only passed a special act to cover certain sites named in the acts, and limiting the quantity of land. It is not known if the other States in the districts have passed any acts. The passage of these acts by the States of New York and Rhode Island was delayed until late in the session of their legislatures, and the works appropriated for in the act of Congress of July 15, 1870, dependent upon the passage of these laws ceding jurisdiction, were consequently delayed until very near the close of the last fiscal year.

Number of boxes, packages, and barrels received at and shipped from Light-house depot, Staten Island, from October 1, 1870, to June 30, 1871.

	Boxes.	Packages, cans, &c.	Barrels.	Total.	Same period of time last year.	Increase.
Received	1,840	3,775	2,809	8,424	4,996	3,428

FOURTH DISTRICT.

The Fourth Light-house District extends from Squam Inlet, New Jersey, to and including Metomkin Inlet, Virginia. It also includes Delaware Bay, River, and tributaries.

Inspector.—Commodore William H. Macomb, United States Navy.

Engineer.—Brevet Brigadier General I. C. Woodruff, Lieutenant Colonel of Engineers, United States Army.

In this district there are—

Light-houses and lighted beacons	18
Light-vessels	3
Buoys actually in position	104
Spare buoys for relief and to supply losses	83
Tender (steam) <i>Violet</i>	1

The numbers preceding the names of stations correspond with those of the "Light-house List of the Atlantic, Gulf, and Pacific Coast of the United States," issued January 1, 1871.

208. *Barnegat, New Jersey*.—The semi-monthly measurements along the beach near the Light-house have been continued throughout the year. During the winter a portion of the works of protection was damaged to some extent, though not seriously, part of the riprapping having slidden into deep water, allowing the sea to pass over and wash out the sand. Three stone jetties, for the protection of the former works, have been built, requiring 993 tons of stone, which will, it is believed, prove satisfactory. The fence around the building has been rebuilt.

210. *Absecum, New Jersey*.—The semi-monthly measurements along the beach in the vicinity of the Light-house have been made throughout the year. Favorable changes have taken place, and no apprehension for the safety of the station need be entertained. A store-house is now being built, and repairs to the keeper's dwelling made, which will be completed during the next month. The authorities of Atlantic City have not yet furnished the grant from the property owners, for the occupation of the land required for sites for the works of protection heretofore appropriated for by Congress, and the money still remains in the Treasury.

Hereford Inlet, on the coast of New Jersey, ten and three-fourths nautical miles north of *Cape May Light-house*.—A small light, say a fourth order, is respectfully recommended for this place, as it would be of importance to the coal trade, and to steamers navigating Delaware Bay and River, and to mark the entrance to the inlet, where there is a good harbor of refuge for small coasting vessels. Estimated cost \$25,000.

Cross Ledge Light Station, Delaware Bay.—An estimate has been submitted for the erection of an iron screw-pile Light-house to take the place of the Light-vessel now occupying that station. An appropriation was made many years since for this Light-house, but it was found impracticable at that time to erect it, and the appropriation reverted to the surplus fund. Congress ordered subsequently (in 1867) a survey of this shoal. An estimate is submitted.

219. *Upper Middle or Cross Ledge Light-vessel*.—No repairs have been made to this vessel since the last report. This vessel was compelled to leave her station in the Delaware Bay January 10, on account of heavy ice; was returned to it again on the 25th, and remained until the 27th, when the ice again coming down the bay very heavily she was driven from her station, and was picked up by the city ice-boat and towed to New Castle, Delaware, where she remained until March 4, when she was returned to her station. Such absences of light is a great injury to commerce, but it may be remedied by building a Light-house on the shoal.

220. *Mahon's River*, Delaware, Delaware Bay.—The abrasion of the marsh at this station has been so great as to compel a change in the site of the Light-house. There is a good location about a quarter of a mile north of the present site, which will serve equally well the purposes of navigation. The estimate for a screw-pile building is \$15,000.

223. *Reedy Island*, Delaware Bay.—Extensive repairs have been made to the bank inclosing the buildings, as follows: The earth bank has been thoroughly repaired and raised fifteen inches along the eastern side for a distance of four hundred feet, the outer slope protected with quarry stone imbedded in fresh mud, the top of the bank roughly paved with stone, a new sluice for draining, and the ditches cleaned out. A new roof has been put on the dwelling, and the plank platform repaired.

224. *Christiana*, Delaware, Delaware Bay.—Extensive operations have been going on to fit this station as a buoy depot and winter harbor for light-vessels. The upper wharf has been completed; it is thirty-two feet wide and extends into the Christiana River one hundred and sixty-

four feet to eight feet water at ordinary low tide; the piling, grillage, stone piers, and stone-work of the cistern are completed for the first or upper building. The frame and other materials are so far advanced, it is believed, that it will be ready for occupation by the 1st of next September. This building will be fifty by one hundred and forty feet in plan, two stories of eight feet each in height, the first or lower floor divided into one room fifty by sixty-three feet, the balance arranged for storing iron and spar buoys, chains, ballast balls, and sinkers. The second story, fifty by one hundred and forty feet, for storing sails, rigging, small boats, &c. The piles for the foundation of the second building are all driven, the building to be fifty by one hundred and fifty feet in plan, one story of ten feet, to admit first-class iron buoys. The piles for the second wharf are also driven; the wharf is thirty-two feet wide and extends one hundred and forty feet into the river, to eight feet water at ordinary low tide. A new sluice has been placed in the bank for draining the inclosure.

Near Chester, Pennsylvania, Delaware River.—In conformity with the instructions of the Light-House Board, accompanied by a petition from citizens of Chester for a light at that harbor, an examination has been made by the Light-house Inspector and Engineer of the district, who report that a light upon the south end of Little Tinicum Island would subserve the wants of the trade at Chester as well as the general wants of commerce of the port of Philadelphia. It would also be serviceable in marking the channel to the quarantine grounds. The structure recommended by the Inspector and Engineer is a screw-pile Light-house with a lens of the sixth order, the estimated cost of which is \$17,000.

225. *Port Mifflin, Delaware River.*—The foundation pier has been entirely rebuilt from line of low water, and the dwelling has been removed back from the southeastern front. Riprap stone has been placed around the front of the pier to prevent abrasion.

The stations not named heretofore are as follows:

- 209. *Tucker's Beach*, New Jersey, near Little Egg Harbor.
- 214. *Cape Henlopen Beacon*, entrance to Delaware Bay.
- 216. *Brandywine Shoal, screw-pile Light-house*, Delaware Bay.
- 221. *Cohansey*, New Jersey, Delaware Bay.
- 222. *Bombay Hook*, Delaware, Delaware Bay.
- 226. *Fenwick's Island*, sea-coast of Delaware.
- 227. *Assateague*, sea-coast of Virginia.

FIFTH DISTRICT.

The Fifth District extends from Metomkin Inlet, Virginia, to include New River Inlet, North Carolina, as well as Chesapeake Bay and its tributaries, and Albemarle and Pamlico Sounds.

Inspector.—Commodore F. Stanly, United States Navy.

Engineer.—Brevet Brigadier General James H. Simpson, Colonel of Engineers, United States Army, to December 10, 1870; Brevet Lieutenant Colonel Peter C. Hains, Captain of Engineers, United States Army, present Engineer.

In this district there are—

Light-houses and lighted beacons.....	67
Light-vessels.....	2
Day or unlighted beacons and stakes.....	72
Buoys actually in position.....	509
Spare buoys for relief and to supply losses.....	529
Tenders (steam) <i>Heliotrope</i> and <i>Tulip</i>	2
Tenders (sail) <i>Maggie</i> and <i>Spray</i>	2

The numbers preceding the names of stations correspond with the "Light-house List of the Atlantic, Gulf, and Pacific Coasts of the United States," issued January 1, 1871.

231. *The Light-house on "The Thimble,"* entrance to Hampton Roads, Virginia.—The want of a good screw-pile Light-house on the Horseshoe Bar, a shoal extending out from the main-land at Fortress Monroe, about five or six miles in a direction east by north from that place, has long been felt. This large bar is a source of danger to all vessels coming into Hampton Roads. The shoalest point of the bar has on it eleven feet of water at mean low tide, at a point called "*The Thimble*," about two and a half miles east of the main-land. South of Horseshoe Bar, and only a little more than half a mile from it, is another long bar, running in a direction almost parallel to it, called *Willoughby's Spit*. Between these two bars there is ample water for the largest vessels afloat. A Light-vessel has been used to mark the channel between these bars and guide them clear of the dangers on either side. It is believed, however, that the same end may be attained at much less annual expense by the erection of an iron screw-pile Light-house on "*The Thimble*" of Horseshoe Bar, under the general law on the subject and out of the general appropriation, as a substitute for the Light-vessel, to be visible from the sea, at the entrance to Chesapeake Bay. The substructure will consist of seven wrought-iron screw-piles; one in the center, the other six ranged about it in the form of a hexagon and screwed into the shoal a depth of fifteen feet. The superstructure will be a frame building, hexagonal in plan, surmounted by a lantern, and will exhibit a fixed white light of the fourth order. In order to distinguish it from the light at Fortress Monroe, the latter will be changed to a red light. The position of this Light-house being very exposed, particularly to strong easterly winds, it is required to be of more than ordinary strength. It will be advisable, also, to protect the site and give more stability to the foundation by throwing in about it loose stones to a depth of about three feet. Borings, with an artesian well-boring apparatus, were made on the proposed site, when it was found that the shoal consisted of a fine light-colored sand with black specks on top and extending to a depth of ten feet. It then gradually becomes darker and finer to a depth of twenty-four feet, at which point the borings ceased. The construction will be commenced without delay, and it is hoped to have it finished by the last of December. This will render it unnecessary to retain the Light-vessel at *Willoughby Spit*, and she will be withdrawn. She is now in need of extensive repairs, the cost of which alone would almost suffice to build the Light-house, besides being very much less expensive to maintain. The completion of this Light-house and that off *Benoni's Point*, Choptank River, will complete the changes of all existing Light-vessels authorized in this district, to screw-pile Light-houses.

Lambert's Point.—In the last annual report of the Light-House Board, the attention of Congress was drawn to the fact that a Light-house had been strongly urged for the shoal off this point, and an appropriation for this purpose was made. The plans are now being prepared for a small substantial structure on six piles, similar to those at *Point of Shoals* and *White Shoals*, James River, omitting the ice-fending piles, which will not be required at this station.

235. *White Shoals*, James River, Virginia.

236. *Point of Shoals*, James River, Virginia.

The two screw-pile Light-houses authorized for *White Shoals* and *Point of Shoals* were built during the past year.

241. *York Spit Light-house*.—At the date of the last annual report the

iron-work of this structure was set up, properly coupled together and braced, staging removed, and the frame of the house in position. During the month of November the joiner's work was completed, painting finished, and the lens set up. The Light was exhibited for the first time November 15, 1870, and the Light-vessel which formerly marked this dangerous shoal was permanently withdrawn. This Light-house is built on fourteen wooden piles, incased in cast-iron sleeves, and stands in twelve feet water, near the end of the shoal at the mouth of York River, from which it derives its name.

256. *Choptank River Light-house*, Maryland.—It is designed, under the general law, to replace the Light-vessel at this place, which serves to mark the entrance to the Choptank River, by an iron screw-pile Light-house, similar in construction to those at York Spit and Wolf Trap, on the Chesapeake Bay, omitting four of the fender piles. The Light-house will stand in eleven feet water, mean tide, on a bar at the mouth of the river, distant about one and a half mile in a southwest direction from *Benoni's Point*, and marking three channels. After due public notice a contract was made in March with the lowest bidder, for the construction of this Light-house. The iron-work has been prepared and the superstructure framed. It is expected that this Light-house will be completed by the last of October, and enable the Light-vessel to be permanently withdrawn.

260. *Love Point Shoal Light-house*, mouth of Chester River, Maryland.—An appropriation of \$15,000 was made by Congress for a Light-house on the shoal at the mouth of the Chester River, near the north end of Kent Island, the exact location of which was fixed at a point on the shoal in ten feet water, mean tide, distant from *Love Point* about one mile, in a northeasterly direction. The Light-house will be a duplicate of the one constructing for Choptank River. A contract was made for the construction of this work (after publicly advertising for proposals) with the lowest bidder. The contract requires the work to be finished by October 1, 1871.

Craighill Channel, in the Chesapeake Bay, at the entrance to the Patapsco River.—This channel extends from a point about one mile north-east of *Seven-foot Knoll*, where it intersects the Brewerton Channel, leading into the Patapsco River in a direction almost due south about five miles, or just beyond the Belvidere Shoals. It is now about two hundred and sixty feet wide, and, with the exception of a few places where there are lumps, is twenty-one feet deep. Congress made an appropriation last year of \$50,000 for the improvement of this, together with the Brewerton Channel. It is understood that a sufficient amount of this sum is to be applied to widening the Craighill Channel to five hundred feet and deepening it to twenty-two feet, mean tide. Large vessels coming up the bay to enter the Patapsco will follow this channel until the range beacons at *Hawkins* and *Leading Points* are in line. They can then follow the Brewerton Channel without difficulty into the harbor of Baltimore. The latter channel is acknowledged to be of great benefit to navigation. It can be followed at night, by means of the range beacons above referred to, as well as by day. There seems to be no doubt but that the new channel will be of equal importance to navigation, and the urgency of making it available at night for the large commerce of the city of Baltimore is manifest. This can be done by the establishment of range beacons near the north end of the channel. This channel has the advantage of saving about five miles in distance to large vessels bound to Baltimore from the lower bay; avoids much, if not all, of the dangers usually experienced from the accumulation of

ice in the lower part of the Brewerton Channel during the winter; is much easier navigated, or rather would be if range beacons were established, and, being a direct prolongation of the resultant of the united currents of the Patapsco and Chesapeake Bay, is more permanent in its character. It is an established fact that the current produced by the outflow of water from the river and bay tends to deepen the channel by washing out the material on the bottom, and there is no doubt but that this channel, once improved to a depth of twenty-two and width of five hundred feet, will always maintain at least those dimensions. There is, therefore, no doubt but that this channel will always be used for navigation purposes, and the range beacons now so much needed will always be required.

An appropriation of \$40,000 for the purpose of establishing these beacons was asked during last session of Congress. It was then proposed to locate the beacons, one on the north, the other on the south side of Miller's Island, some five miles north of the upper end of the channel. This location has the advantage of being more protected from the heavy ice from the Susquehanna than any other position that could be selected, but the distance from the southern entrance to the channel is so great, being about twelve miles, that it would be necessary to use very strong lights and to place the rear one at a considerable elevation. Their value would be much enhanced by locating them some four or five miles nearer. This can readily be done by building artificial islands and protecting the banks with a riprap wall of loose stone. The material excavated by the dredges in deepening the channel can be used for the purpose of forming these islands. It is understood that the Engineer Officer in charge of this improvement has been authorized to deposit this material for that purpose at such places as may be selected. The establishment of these beacons need not increase the number of Lights in this vicinity for the reason that they will render the use of those at *North Point* unnecessary, and they can be discontinued. The estimated cost of the range beacons for this channel is \$45,000, for which an appropriation is asked.

280. *Body's Island Light-house.*—An appropriation was made by Congress to re-establish this very important coast Light, the old Light house having been destroyed during the war. A careful study of the topography of the country, and the action of the water-flow in and out of Pamlico Sound through Oregon Inlet, resulted in the abandonment of the old site on the south side of the inlet and the selection of another on the north side. This will be one of the most important Lights on the coast, and the necessity of placing it in a safe position, free from the danger of destruction by the encroachments of the sea, could not be over-estimated. The old site was subject to this danger. Previous to 1846, there was no inlet at this place, but during the early part of September of that year, heavy southerly winds banked up the waters of Albemarle and Pamlico Sounds several feet above their ordinary level. Then came northerly winds driving the water back, overflowing the narrow sand-bank which separated the waters of the ocean from those of Pamlico Sound. By this outflow of water Oregon Inlet was opened in one night. Since that time it has maintained a character of instability, sometimes widening and deepening in places, filling up in others, all the time gradually working to the south. This inlet is not now used for navigation purposes, there being only a depth of four feet of water over the bulkhead or inside bar. During the rebellion, however, the rebels built on the south side a fort called Fort Oregon. The site of

this fort can no longer be seen. It has been washed away in the gradual movement of the inlet to the south.

The site of the old Light, which at one time was a considerable distance from the inlet, is now only about four hundred yards. The testimony of residents in the vicinity confirms the fact that the inlet is working to the south, and that its progress is not slow. The old site could doubtless have been made use of by protecting it with jetties, but only at great expense. In view of these facts it was not deemed advisable to erect this important Light-house on a site so insecure. Another site, about one and a half mile farther north and on the north side of the inlet, protected on the west by Roanoke Island from the action of storms tending to drive the waters of Pamlico Sound toward the sea, was accordingly selected. The land at this place being held at a merely nominal sum, the purchase of fifteen acres was made, the perfection of a title in the United States being delayed, however, in getting the necessary act of the State of North Carolina ceding jurisdiction, and in complying with certain other legal forms. The site and plan of the Light-house having been determined on, contracts were made, after due public notice inviting proposals, with the lowest bidders for furnishing the material to be used in the structure. The tower will be one hundred and fifty feet high, exhibiting a first-class sea-coast Light, focal plane one hundred and fifty-three feet above the level of the sea, and will be visible at a distance of more than eighteen nautical miles. About the middle of June a working party was dispatched to this station with orders to erect the necessary temporary buildings for storage and quartering the workmen, build a narrow tramway over which the material can be easily transported from the water to the site, and a temporary wharf, on which to land it. It is expected that these preparations will be completed in about two months, when the work on the foundation of the tower itself will be begun. The completion of this tower will supply a want long felt by the commerce of the country. Every effort will be made to finish the Light-house the present year, but the frequency of storms in this latitude generally causes delay in the prosecution of works of this nature, and it is scarcely propable that the entire work will be completed within that time. An appropriation of \$15,000 for the fiscal year 1872-'73 is asked to complete the work.

A First-class Light-house between Cape Henry and Body's Island, North Carolina.—With the completion of the Light-house at *Body's Island* there will remain only one important interval of unlighted coast on the Atlantic from the St. Croix, Maine, to about Mosquito Inlet, on the coast of Florida. That dark space will be embraced between *Cape Henry* and *Body's Island*, a distance of eighty miles and an unlighted space of forty miles, at the center of which there should be a first-order Light, so that from *Cape Henry* to *Cape Hatteras* the broad side of that long stretch of low land and dangers could not be approached within eighteen or twenty miles without seeing a warning of danger. In order to avoid the strong current of the Gulf Stream, vessels bound round *Cape Hatteras* from the northern and eastern ports run inside of the cold wall of water of that stream, within which they have a favorable current of one mile per hour on an average, and a smoother sea in bad weather; but in the absence of powerful sea-coast Lights sufficiently near each other to give warning of approach to danger, many vessels laden with valuable lives and cargoes have been lost between these points. It is now believed that the construction of this tower should be no longer delayed. A glance at the chart of the coast will show its importance. An appropriation therefor of \$60,000 is accordingly sub-

mitted. An appropriation was made about ten years ago for this Light, but the money reverted to the Treasury. The Light-house should be similar to that being built at *Bodys Island*, with a focal plane one hundred and fifty feet above the sea, and visible at a distance of eighteen nautical miles.

281. *Cape Hatteras*, North Carolina.—This important Light-house was well advanced toward completion at the date of last annual report. During the month of December the new lens was received and set up, and on the 16th of the same month the light from the new tower was exhibited. The lens on the old tower was then removed and sent to the Light-house depot at Staten Island, New York. The new tower has been covered with a cement wash to protect it from the effects of the weather, the upper part (projected against the sky) colored red, the lower part (projected against the foliage in the rear) colored white; all the iron-work of stairs, lantern, &c., painted, and the tower inclosed in a neat iron fence. During the month of February the old tower, being no longer of any use and in danger of falling during some heavy storm, was blown up and totally destroyed. In addition to the finishing of the new tower, a brick dwelling for the principal keeper of the Light-station was built and inclosed in a neat picket-fence. The above completed the work at this station.

Hatteras Inlet, North Carolina.—A Light was authorized March 3, 1859, to be established at the Hatteras Inlet, the entrance to the sounds of North Carolina, but it was not commenced before the breaking out of the rebellion, and afterward it could not be built. This is at present the best inlet leading to and from the sounds of North Carolina, with which there is a very large trade. This inlet is fourteen miles southwest from Cape Hatteras, within the range of the influence of that cape upon the weather, and as the channel is narrow and only marked by buoys, it is dangerous to attempt to enter or pass out at night for want of a small Light. The estimated cost of this Light-house is \$18,000, for which an appropriation is asked.

296. *Cape Lookout*, North Carolina.—The tower at this station has had some repairs made to it during the present year, but the keeper's dwelling is in a very dilapidated condition, and, though improved somewhat, is too old to be susceptible of the repairs it requires. There is positive danger of the building being destroyed in stormy weather. This would leave the keepers on a desolate coast without any shelter near their station. A new building is very essential to the health and comfort of the keepers, independent of the danger to which their lives are exposed in the present dwelling. An estimate of \$10,000 is respectfully submitted to supply this defect.

During the year repairs and renovations, more or less extensive, have been made at each of the following-named Light-stations:

233. *Craney Island screw-pile Light-house*, Virginia, mouth of Elizabeth River.

234. *Naval Hospital Light*, on wharf at the Naval Hospital, Virginia, Elizabeth River.

237. *Deep Water Shoals screw-pile Light-house*, Virginia, James River.

238. *Jordan's Point Light*, Virginia, James River.

264. *Fort Carroll*, Maryland, Patapsco River.

266. *Hawkins' Point*, Maryland, Patapsco River, lower range beacon for the Brewerton Channel.

268. *Lazaretto Point*, Maryland, Patapsco River.

283. *Ocracoke*, North Carolina, entrance to Ocracoke Inlet.

284. *Southwest Point Royal Shoal screw-pile Light-house*, North Carolina, Pamlico Sound.

285. *Northwest Point Royal Shoal screw-pile Light-house*, North Carolina, Pamlico Sound.

286. *Harbor Island screw-pile Light-house*, between Pamlico and Core Sounds, North Carolina.

287. *Brant Island Shoal screw-pile Light-house*, North Carolina, Pamlico Sound.

288. *Neuse River Light*, North Carolina, west side of entrance to Neuse River.

289. *Pamlico Point*, North Carolina, south side of entrance to Pamlico River, Pamlico Sound.

290. *Long Shoal screw-pile Light-house*, North Carolina, east end of Long Shoal, Pamlico Sound.

291. *Roanoke Marshes screw-pile Light-house*, North Carolina, east side of channel connecting Pamlico and Croatan Sounds.

293. *North River screw-pile Light-house*, North Carolina, on bar at entrance to North River.

294. *Wade's Point screw-pile Light-house*, North Carolina, west side of Pasquotank River, Albemarle Sound.

295. *Roanoke River screw-pile Light-house*, North Carolina, near mouth of Roanoke River, Albemarle Sound.

The following are the names of the Light-stations in this district not mentioned elsewhere, some of which are now in need of repairs:

228. *Hog Island*, Virginia, west point of Hog Island, Great Matchepungo Inlet.

229. *Cape Charles*, Virginia, entrance to Chesapeake Roads.

230. *Cape Henry*, Virginia, entrance to Chesapeake Bay.

232. *Old Point Comfort*, Virginia, entrance to Hampton Roads.

239. *Cherrystone*, Virginia, mouth of Cherrystone Inlet, Chesapeake Bay.

240. *Back River*, Virginia, entrance to Back River.

242. *New Point Comfort*, Virginia, entrance to Mobjack Bay, Chesapeake Bay.

243. *Wolf Trap screw-pile Light-house*, Virginia, Wolf Trap Shoal, Chesapeake Bay.

244. *Stingray Point*, Virginia, mouth of Rappahannock River, Chesapeake Bay.

245. *Windmill Point screw-pile Light-house*, Virginia, Windmill Point Shoals, Chesapeake Bay.

246. *Watt's Island*, Virginia, Tangier Sound, Chesapeake Bay.

247. *James' Island screw-pile Light-house*, Maryland, Tangier Sound, Chesapeake Bay.

248. *Somers' Cove screw-pile Light-house*, Maryland, Tangier Sound, Chesapeake Bay.

249. *Smith's Point screw-pile Light-house*, Virginia, mouth of Potomac River, Chesapeake Bay.

250. *Frog Point*, Maryland, Smith's Island, Chesapeake Bay.

251. *Clay Island*, Maryland, Tangier Sound, Chesapeake Bay.

252. *Point Lookout*, Maryland, entrance to Potomac River, Chesapeake Bay.

253. *Hooper's Straits screw-pile Light-house*, Maryland, off mouth of Honga River, Chesapeake Bay.

254. *Cove Point*, Maryland, mouth of Patuxent River, Chesapeake Bay.

255. *Sharp's Island screw-pile Light-house*, Maryland, mouth of Choptank River, Chesapeake Bay.

256. *Thomas's Point*, north side of mouth of South River, Maryland, Chesapeake Bay.

258. *Greenbury Point*, Maryland, mouth of Severn River, Chesapeake Bay.

259. *Sandy Point*, Maryland, Chesapeake Bay.

261. *Seven-foot Knoll screw-pile Light-house*, Maryland, mouth of Patapsco River, Chesapeake Bay.

262. *North Point*, (lower,) Maryland, entrance to Patapsco River, Chesapeake Bay.

263. *North Point*, (upper,) Maryland, Patapsco River, Chesapeake Bay.

265. *Hawkins' Point*, (upper,) Maryland, Patapsco River.

267. *Landing Point screw-pile Light-house*, Maryland, Patapsco River.

269. *Pool's Island*, Maryland, off mouth of Gunpowder River, Chesapeake Bay.

270. *Turkey Point*, Maryland, mouth of Elk River, head of Chesapeake Bay.

271. *Fishing Battery*, Maryland, mouth of Susquehanna River, Chesapeake Bay.

272. *Havre de Grace*, Maryland, Concord Point, mouth of Susquehanna River, Chesapeake Bay.

273. *Piney Point*, Maryland, Potomac River.

274. *Blackstone's Island*, Maryland, entrance to Clement's Bay, Potomac River.

275. *Lower Cedar Point screw-pile Light-house*, Virginia, Yates Shoal, Potomac River.

276. *Upper Cedar Point screw-pile Light-house*, Maryland, off mouth of Tobacco River, Potomac River.

277. *Fort Washington*, Maryland, Potomac River.

278. *Jones' Point*, Virginia, Potomac River, near Alexandria.

279. *Bowler's Rock screw-pile Light-house*, Virginia, Rappahannock River.

292. *Oroatan screw-pile Light-House*, North Carolina, Pamlico Sound.

DEPOTS.

The depot at *Lazaretto Point*, which was in a very dilapidated condition, has been placed in thorough repair. The work-shop has been painted inside, brick-work covered with cement wash, new slate-roof put on, and lightning-rods repaired. The wharf at the landing has also been repaired, and a contract made to have the stone wall around the front of the lot rebuilt. This work is now almost completed; the depot will then be in excellent order. A quantity of old, unserviceable material was gathered together and sold at auction, and the proceeds turned into the Treasury.

At the depot at *Portsmouth*, Virginia, the site for which was selected about a year ago, there has been a good wharf built, the lot inclosed in a board fence, and skids made on which to lay iron buoys and have them repaired.

The Engineer steam-tender *Tulip* was, at the date of the last annual report, very much in need of extensive repairs. A contract was made, after public advertisement in the daily papers, to have her hauled out on the ways and the necessary repairs made. This work was accomplished on the 10th of June. She is now in excellent condition for service. Previous to making the repairs, and since they were completed,

she has been continually employed in transporting materials, &c., to new Light-stations, and to such old ones as required repairs, and in inspecting Light-houses in the district.

LIGHT-VESSELS.

Upon the completion of the two screw-pile Light-houses in this district, as substitutes for Light-vessels, there will be no Light-vessels in the district.

SIXTH DISTRICT.

The Sixth District extends from New River, North Carolina, to include Cape Canaveral Light-house, Florida.

Inspector.—Captain Richard T. Renshaw, United States Navy.

Engineer.—Brevet Major William J. Twining, Captain of Engineers, United States Army, until June 21, 1871; Brevet Lieutenant Colonel Peter C. Hains, Captain, Corps of Engineers, United States Army, present engineer.

In this district there are—

Light-houses and lighted beacons.....	27
Light-houses and lighted beacons destroyed during the rebellion and not rebuilt.....	14
Day or unlighted beacons and stakes.....	52

Tender (sail) <i>Narragansett</i>	1

According to previous reports there were fifty-two unlighted beacons in this district. This number includes the staked channels of the St. John's River, Florida, and the inside coast passages. Of these day-marks the greater number were destroyed or have otherwise disappeared, and are being replaced as rapidly as they are required by navigation. Of the seven beacons in the Savannah River, the two on *Oyster Rocks* are serviceable and in good condition; of the remaining five, two have been destroyed by fire and will be rebuilt. There is at present an appropriation for two beacons on *Oyster Rocks*, which will be built at an early day.

The following numbers preceding the names of stations correspond with those of the "Light-house Lists of the Atlantic, Gulf, and Pacific Coast of the United States," published January 1, 1871.

308. *Sullivan's Island Beacon*, Charleston Harbor, South Carolina.—The present beacon-light at this place is a temporary open frame-work, wooden structure, erected upon the roof of a private residence. This light was established in its present position immediately after the surrender of Charleston in the spring of 1865, to enable the vessels of the Navy and those of commerce to navigate safely at night the channel leading from the inside of the outer bar of the main channel to the turning point near Fort Moultrie. An appropriation was made by Congress, March 3, 1859, for rebuilding the two beacon range-lights on *Sullivan's Island*, (which were destroyed during the rebellion,) and on July 20, 1868, an appropriation of \$15,000 was made for rebuilding these lights; but failing to obtain valid title to the necessary land upon which to place them, and the required cession of jurisdiction by the State, the appropriation reverted to the Treasury under the operation of the fifth and sixth sections of the act approved July 12, 1870. Another appropriation of \$10,000 for these beacons was made by Congress, approved March 3, 1871. The State passed a general act ceding jurisdiction to sites pur-

chased by the United States for Light-house purposes, but it is understood that only a title of questionable validity can be given by any citizen claiming to own land on this island. This question is now being investigated. As soon as the title to the necessary land on which to locate the keeper's dwelling is obtained, there will be no unnecessary delay in establishing these important range-lights. Their establishment will render the *Weehauken Light-vessel* now placed in the channel unnecessary, and she can be permanently withdrawn. It is understood that there is now twelve feet water over the old wreck which this Light-vessel marks, and the work of removing the same is still being carried on.

The beacons proposed for this range are detached from the keeper's dwelling. Their heights are respectively thirty-five and fifty feet from sill to focal plane. The illuminating apparatus is to be of the fifth order.

313. *Tybee Light-station*, entrance to the Savannah River, Georgia.—The recent gales, which have caused great damage along the southern coast, have so greatly damaged the Light-house tower at this important Light-station as to render it unsafe and to require the speedy erection of a new tower. The tower, which was built in 1793, is badly cracked, and may fall at any time. Its great age, (seventy-eight years,) the frequent necessary repairs to it during the time it has been standing, and its total neglect during the war of the rebellion, render it impossible to properly repair the present tower. An estimate is submitted for commencing the erection of a new tower near the present one.

Danfuskie Island, Calibogue Sound, South Carolina.—The appropriation asked for the range beacons on this island, to mark the entrance to Calibogue Sound, and to facilitate the passage from Port Royal Harbor to Savannah River, was made by act of Congress approved March 3, 1871. The plans and specifications have been made for the structures, and it only remains to secure a proper site before commencing work.

315. *Tybee Knoll*, Savannah River, Georgia.—An appropriation for erecting a screw-pile Light-house, to take the place of the Light-vessel stationed to mark this dangerous shoal, reverted to the Treasury under the act approved July 12, 1870. A screw-pile Light-house can be built at this place, which will better serve the purpose of navigation and at the same time be much less expensive to maintain than the Light-vessel. Borings show that below a thin stratum of clear, sharp sand, there is a layer of soft mud to a depth of nineteen feet at least, and perhaps considerably farther. This, though it will somewhat increase the expense, will not do so to an unwarrantable extent. The Light-house can be located in from two to five feet water, should stand on six piles, and be built somewhat similar to those in the Chesapeake Bay and sounds of North Carolina. The erection of this Light-house will insure the permanent removal of the Light-vessel now stationed at this place. An estimate is submitted.

Light on the Obstructions in Savannah River.—An ordinary steamboat-lantern is still retained to mark the obstructions in the Savannah River below the city. It is understood that an appropriation by Congress has been made for removing these obstructions. As soon as this work is completed the Light will be no longer required and will be discontinued. Until then, the present arrangement is very economical, and answers every purpose of navigation.

318. *Fig Island*, Savannah River, Georgia.—Such repairs as were necessary for the neatness and preservation of this station were made during the spring. More extensive repairs to the platforms and foundation of the dwelling are now being made.

323. *St. Simon's*, entrance to St. Simon's Sound, Georgia.—This Light-house has been under contract since the fall of 1869, and the time for completion has been extended on several occasions, but the tower is still unfinished, and has only been carried to a height of fifty-one feet above the ground. The death of the contractor, and one of his bondsmen—both of whom died at the work—has recently caused further delay. On account of the climate, work cannot be recommenced till the 1st of November, when it will be taken in hand by the surviving bondsman, and, it is hoped, will be finished early next spring.

325. *Amelia Island, North Range*, St. Mary's Bar, Florida.—Plans and estimates have been prepared for a keeper's dwelling, and beacons for this range. As the site is on Government land, near Fort Clinch, there will probably be no delay in regard to the sites, and the work may be done during the present winter.

Dame's Point, St. John's River, Florida.—An examination of the site for this Light-house was made by the Engineer of the district. On sinking an artesian well, the underlying strata were found to consist of soft mud to a depth of sixteen feet. The borings were not carried below this depth. It is believed that a screw-pile Light-house can be built here, but before it is commenced further examination of the foundation will be made.

328. *St. Augustine*, north end of Anastasia Island, Florida.—An examination was made by the Engineer of the district of Anastasia Island, with reference to the selection of a site for the new Light-house provided for by appropriation approved March 3, 1871. Reports have been received from time to time in regard to the cutting away of the shore line near the old Light. On the 1st of July, 1870, the distance from the angle of the dwelling to high-water mark was seventy feet, and on the 1st of November the distance had been reduced to forty-eight feet; since that time no cutting has taken place. The channel over the bar continues to shift rapidly toward the north; as a result, the inner shoal covers for the present the site, and the force of the ebb-tide is expended along the shore-line to the west,

The opening, or partial closing, of Matanzas Inlet diminishes or increases the amount of water discharged by the Matanzas River at St. Augustine. The channel will probably continue to shift to the north, until, by the action of heavy and continued northeast winds, the accumulated waters are driven to seek a new outlet toward the southeast. Such changes are of constant occurrence at all the inlets on the coast of East Florida.

Much difficulty has been experienced in procuring a site for the new Light-house. The old Spanish grants and the claims of settlers are in much confusion, but it is to be hoped that the question may be settled by the law officers of the Government at an early day, and that a good title may be obtained to a site which will be safe from encroachments of the sea. The construction of the tower, which will be of the first order, one hundred and fifty feet above the sea, will be commenced as soon as title can be secured.

Mosquito Inlet, east coast of Florida.—The Engineer of the district has visited *Mosquito Inlet* for the purpose of reporting on the necessity and practicability of a Light at that point. In common with all the inlets and harbors on the east coast of Florida, this bar shifts constantly, so that no soundings can be relied on. The general effect of westerly winds is to reduce the depth of water, and that of northeasterly gales to increase it; thus the inlet may be opened or closed one or more times each year. The wrecks lying on or near the bar give a practical illus-

tration of the uncertainty of the channel. For all practical purposes of construction of a Light-house, it may, however, be safely assumed that the material can be delivered without any very serious difficulty or delay, although additional expense would be incurred by reason of the remoteness of the station, and the small-sized vessels that would be required for transportation. As regards the necessity of a Light at this point, it is manifest that the commerce passing through the inlet would not justify an expenditure by the United States for a Light for merely local purposes, or at least that there are other points that may justly take precedence of it. But a Light-house between St. Augustine and Cape Canaveral Lights is necessary as one of a system of coast-lights, and *Mosquito Inlet* is undoubtedly the proper site, as, in the first place, the Light there would answer the double purpose of a harbor and coast guide, and in the second for a landing place, both for the original construction and subsequent supply and inspection, which could be made with more safety and certainty there than at any other point along the open sea-beach. A tower one hundred and fifty feet high, lighted by a first-order Fresnel lens, is recommended for this position, and for the commencement of its construction an estimate of \$60,000 is submitted.

At each of the following-named Light-stations there have been repairs and renovations, more or less extensive, during the last year, viz:

297. *Federal Point*, North Carolina, New Inlet, Cape Fear River.

299, 300. *Oak Island*, (Range-lights,) North Carolina, mouth of Cape Fear River.

301. *Georgetown*, South Carolina, entrance to Winyaw Bay.

308. *Sullivan's Island*, Charleston Harbor, South Carolina.

309. *Fort Sumter*, Charleston Harbor, South Carolina.

310. *Castle Pinckney*, Charleston Harbor, South Carolina.

311. *Combahee Bank*, entrance to St. Helena Sound, South Carolina.

314. *Tybee Beacon*, Georgia, Tybee Island.

316. *Cockspur*, Georgia, Savannah River.

317. *Oyster Beds*, Georgia, Savannah River.

318. *Fig Island*, Georgia, Savannah River.

319. *Sapelo*, Georgia, entrance to Doboy Sound.

320. *Sapelo Beacon*, in front of main light.

321, 322. *Wolf Island*, Georgia, entrance to Doboy Sound.

323, 326. *Amelia Island*, Florida, St. Mary's Bar, Fernandina.

327. *St. John's River*, Florida.

The following are the names of Light-stations in this district not mentioned elsewhere:

302. *Cape Romain*, South Carolina.

303. *Bull's Bay*, South Carolina.

305, 306. *Morris Island Range-lights*, South Carolina, entrance to Charleston Harbor.

313. *Tybee*, Georgia, entrance to Savannah River.

324. *Little Cumberland Island*, entrance to St. Andrew's Sound, Georgia.

LIGHT-VESSELS.

The Light-vessel belonging to the *Frying-Pan Shoals Station* was driven from her station during the winter by heavy weather, rendering it necessary to send the relief vessel which now occupies that station.

The *Frying-Pan Shoals Light-vessel* has been repaired at Charleston and sent to take the place of the *Martin's Industry Light-vessel* which was driven from her station during a recent heavy gale. This latter

vessel is now at Savannah undergoing repairs, which will be very extensive and expensive.

The *Rattlesnake Shoals Light-vessel*, off Charleston Bar, having been reported leaking very badly and unsafe, has been withdrawn, and Light-vessel No. 38 (Relief) has been towed to Charleston for that station until the former is repaired.

TENDERS.

The Engineer of the district has had the schooner *Narragansett* to attend to all the repairs, and carry supplies, &c., for works of construction. The steam-tender *Dandelion* is now there, being fitted out, and will soon be ready for service.

SEVENTH LIGHT-HOUSE DISTRICT.

This Light-house District extends from south of Cape Canaveral to, and including, Cedar Keys, Florida.

Inspector.—Commander C. A. Babcock, United States Navy.

Engineer.—Brevet Colonel C. E. Blunt, Lieutenant Colonel of the Corps of Engineers, United States Army.

In this district there are—

Light-houses.....	11
Day or unlighted beacons.....	35
Stakes.....	18
Buoys actually in position.....	98
Spare buoys for reliefs.....	61
Tender, (tug,) <i>Ivy</i> (employed by Engineer in constructions and repairs).....	1
Tender (sailing schooner) <i>Florida</i>	1

The numbers preceding the names of the Light-stations correspond with those of the Light-house List for 1871.

At each of the following-named Light-stations there have been repairs and renovations during the last year:

334. *Dry Bank*, iron-pile Light-house, Florida Reefs, off coast of Florida.

335. *Sand Key*, iron-pile Light-house, Florida Reefs, off coast of Florida.

336. *Key West*, Key West Island, Florida.

337. *Northwest Passage*, iron-pile Light-house, near Key West, Florida.

338. *Dry Tortugas*, Loggerhead Key, Florida.

339. *Dry Tortugas Harbor*, Fort Jefferson, Florida.

During the ensuing year repairs and renovations will probably be needed at the remaining stations in the district, which are—

330. *Jupiter Inlet*, east coast of Florida.

331. *Cape Florida*.

332. *Carysfort Reef*, iron-pile Light-house, Florida Reefs, off coast of Florida.

340. *Egmont*, entrance to Tampa Bay, Florida.

341. *Cedar Keys*, entrance to Cedar Keys, Florida.

Principal repairs at *Dry Bank Light-house*, scraping, painting, and coal-tarring of iron-work, lower section, &c.

At *Sand Key*, the same, (with a new boat-house.)

At *Northwest Passage*, the same.

At *Dry Tortugas*, new boat-house.

At *Dry Tortugas Harbor*, some slight repairs on keeper's dwelling and out-buildings, and on lantern.

Besides these repairs and renovations one more of the iron day-bea-

cons, marking the line of the Florida Reefs, has been erected, viz: *Beacon D*, at Crocker's Reef.

Preparations for the erection of the iron-pile Light-house on Alligator Reef have been commenced. Indian Key, the nearest land (four miles) from the proposed site, has been selected as a depot, and the temporary buildings and wharf have been well advanced. It is expected that the work of erection will commence early next winter, (by which time the contractors will have delivered the materials at the depot,) and will be prosecuted as rapidly as the unfavorable circumstances attending all engineering operations along the Florida reefs will permit.

The erection of the day-beacons on the reefs will also be prosecuted as rapidly as possible. An additional number of beacons, which will be needed to complete the line, have been ordered at the North.

BUOYAGE.

The buoyage in this district is in excellent condition. There are at present ninety-eight buoys actually in position. It has been found necessary to put down several buoys in *Hawk Channel*, (inside the Florida reefs,) leading into *Key West Harbor*, *Tortugas Harbor*, *Calvose Entrance*, and *Cedar Keys*, Florida. To effectually mark the entrance to, and channel leading into *Cedar Keys Harbor*, extra buoys have been put down, and fifteen palmetto stakes, marked, painted, and numbered according to instructions, driven on either side of the channel.

TENDERS.

The steam-tug *Ivy* has been employed in the Engineer's Department during the past year.

The sailing schooner *Florida* has been in this district for many years, employed in looking after buoys, delivering supplies, other than annual, and for visiting the Light-stations periodically. These Lights are all at remote and isolated points, and can only be reached by a vessel.

The great extent of this sparsely populated coast, embracing the dangerous Florida coast reefs, and the great increase in the number of aids to navigation to be looked after, renders it necessary to have the use of a small steam-tender in place of the small sailing schooner, now over twenty years in service in that district, and an estimate is submitted.

EIGHTH DISTRICT.

This District extends from Cedar Keys, Florida, to the Rio Grande, Texas.

Inspector.—Commander William P. McCann, United States Navy.

Engineer.—Brevet Major A. N. Durrell, Captain of Engineers, United States Army, (east of Pearl River,) to December 4, 1870; M. F. Bonzano, esquire, (west of Pearl River,) to July 1, 1871; Brevet Brigadier General James H. Simpson, Colonel of Engineers, United States Army, present Engineer.

In this district there are—

Light-houses and lighted beacons	47
Day or unlighted beacons	15
Buoys actually in position	97
Spare buoys for relief and to supply losses	139

Light-vessels.....	1
Tender (steamer) <i>Geranium</i>	1
Tender (steam-tug) <i>General Poe</i>	1
Freight schooner <i>Magnolia</i>	1

The numbers preceding the names of the stations correspond with those of the Light-house list of January, 1871.

342. *St. Mark's, Florida*.—Repairs have been made to the tower, and the new dwelling for the keeper has been completed.

346, 347. *Pensacola, Florida*.—The main and beacon lights have been repaired during the year.

348. *Sand Island, Alabama*, entrance to Mobile Bay.—The new masonry tower, with focal plane one hundred and twenty feet above the sea, is in progress at this station.

350. *Mobile Harbor, Alabama*, to mark the entrance to Mobile Harbor.—The screw-pile Light-house for this station is now being prepared at the work-shops at the North under contract.

355. *Cat Island Light-station, Mississippi Sound*.—The iron screw-pile Light-house at this place is nearly completed, and the Light will be exhibited at an early day.

357. *Merrill's Shell Bank Light-station, Mississippi Sound*.—Repairs have been made at this Light-station during the year.

359. *East Rigolet*.—The brick tower is in good order, exhibiting a Light of the fourth order, capable of affording all desirable facilities to navigation. The dwelling-house is old and not worth the extensive repairs necessary to put it in good condition. A new frame dwelling, and new cypress cistern of three thousand gallons' capacity, should be built at this station, and an estimate is submitted.

360. *Proctorville Beacon*.—The available appropriation (\$5,000) for a building on the plan of the Light-house at *Head of the Passes*, placed on a pile foundation, is insufficient, and if, on further examination, it is found best to place the Light at this point, the appropriation should be increased to \$7,500.

Since the last annual report a canal has been made by a company called the "Mississippi and Mexican Gulf Canal Company," with the intention of affording a passage to vessels of ten feet draught, from the Mississippi River into Lake Borgne. The northern terminus of this canal adjoins Tower Dupré, on which the Light destined for the old site at Proctorville, the former terminus of the abandoned Mexican Gulf Railway, might be placed with much greater advantage to commerce and navigation. There would probably be made no military objection to the placing of a Light on the tower itself.

The canal, though finished the entire distance, has not yet been connected by locks with the Mississippi River, nor has it attained, at its entrance into Lake Borgne, the projected depth of ten feet. The canal is, however, useful, for light-draught vessels, from Lake Borgne, and thus furnishes a harbor of refuge, which Proctorville is not. The appropriation, though insufficient for the structure contemplated on the original site, is sufficient for establishing a serviceable Light on Tower Dupré, and it is therefore recommended that a re-appropriation should be made of the amount now available, and that the Board be empowered to place the Light at Tower Dupré or at Proctorville, as may be found advisable.

361. *West Rigolets*.—The repairs recommended in former annual reports, *i. e.*, the putting a slate roof on the house, rebuilding the wharf, plank-walk, and breakwater, should be made at an early date. The building has sustained some additional damage in the late high water.

The foundation of the cistern has settled and should be rebuilt on a larger area, as the ground is very soft; a timber platform, sunk about two feet below the surface, covered with a layer of concrete, and upon that a brick foundation rising four feet above the ground, is probably the best foundation for this locality; an estimate is submitted.

362. *Port Pontchartrain*.—A new dwelling, on a substantial pile foundation, with kitchen fifteen by thirty feet, cistern of three thousand gallons, and a plank-walk, connecting with the wharf of the Pontchartrain Railroad, was contracted for during the last season. The house was nearly completed at the expiration of the fiscal year, and but for the extensive inundation, caused by an extraordinary rise of the waters of the lake, which interrupted the progress of the work, would have been finished before that time. All the work contracted for will be finished about the 1st of August.

363. *Bayou St. John*.—The difficulty of exhibiting this Light in bad weather, by reason of the unsuitable form of the structure and the great distance of the keeper's dwelling from it, the hazardous approach to it, over an embankment and rotten wharf of the canal company, which, in heavy weather, are washed by the sea, has been brought to the notice of the Board.

The most economical, suitable, and lasting structure would be a screw-pile structure, on the plan of those recently ordered for Matagorda Bay. The rise of Lake Pontchartrain, in hurricanes, may be estimated at fully *five feet* above ordinary high water. On this assumption the floor of the new Light-house should not be less than nine feet above ordinary high water, for the reason that the sea, backed up, first, by the easterly and northeasterly hurricane winds, and then acted upon by the free sweep of the norther, or northwester, over a space of twenty-two miles, will rise in waves of prodigious height, to which severe gales, in ordinary stages of the water, afford no comparison. During the inundation of June last the water rose within a couple of inches of the storm level of 1860, the effect of gales from the eastward, which did not reach the lake itself. But for this fortunate circumstance, the destruction of the Pontchartrain Railway wharf would have been imminent, and the embankments of the new and old canal would have received severe damage. It is deemed of great importance to provide against these extraordinary storms, which, though rare, are nevertheless to be expected from time to time, by establishing structures of such strength and elevation as to render them capable of resisting the force of wind and waves, and giving the requisite security to the inmates.

364. *New Canal*.—Some slight repairs to roof, plastering and cistern, are required, as also painting inside and outside.

365. *Tchejuncti*.—During the high water in June last the sheet-planking on the edge of the water was damaged, the outside steps of the dwelling swept away. They will be repaired during the coming season.

366. *Pass Manchac*.—The breakwater appropriated for will be built during the coming winter.

367. *Chandeleur Island*.—The repairs, consisting of strengthening the screw-piles by connecting them with each other by diagonal braces, new cistern, new roof, new floors, new steps, plastering, and painting, are required. They will be executed during the coming season.

Errol Island, Louisiana.—The proximity of this outlying island to the dangerous shoals of Grande Gosier, to the northward of *Pass à Loutre* Light-house, distant twenty-three miles, and midway between the *Pass à Loutre* and *Chandeleur* Lights, marks it as the proper location for a Light to fill up the dark space in the approaches to the northern mouth

of the Mississippi River. The only structure offering a reasonable prospect of stability in a locality so exposed to wind and sea, is an iron screw-pile tower, for the erection of which an estimate of \$30,000 has been submitted in the annual estimate for the next fiscal year.

368. *Pass à Loutré*.—Station is in very good order. The steam Fog-signal recommended in the annual report of last year is now under construction.

369. *South Pass*, mouth of the Mississippi, Louisiana.—The Light-house at this, the most seaward point of the delta of the Mississippi, and therefore of the importance of a first-class sea-coast Light, was built in 1831, and is only a low wooden tower on the top of the keeper's dwelling. The grave objections to a wooden structure at so distant a point from succor in the case of fire, and one occupying so important a position, (being only of the third-class,) have been mentioned in the several annual reports from this Board since 1867. The remarks previously made have acquired additional force from the fact that the natural decay of so perishable a material, and the age of the structure, render a new tower at no distant day indispensable, even in an economical point of view alone. An estimate of \$75,000 for commencing the work is submitted.

370. *Head of the Passes*.—Slight repairs were made during the year to the breakwater, and the house was thoroughly painted. The station is now in excellent condition. The space inclosed by the breakwater is still filling up with solid ground; a dense growth of young willows is now spreading over it.

371. *Southwest Pass*.—The foundation for the new iron Light-house was finished by the end of the month of May last, and is now ready for the superstructure which is now being constructed under contract in Ohio.

A steam Fog-signal has been authorized. This may be placed in the southeast or southwest corner of the coffer-dam, where it will be very conveniently accessible at all times. It is now being constructed at the North.

The pile foundation for a keeper's dwelling is also in readiness to receive the superstructure.

The old Light-house remains in the same condition as last reported. It will last, dilapidated as it is, until the new Light is ready, and no repairs of any kind are needed. In the event of its complete destruction, which, however, is hardly to be apprehended, a temporary Light may be established on the wharf of the new work in a few days.

373. *Ship Shoal*.—The tower requires coating with coal-tar. The depth of water under the tower has sensibly decreased since the screw-piles were surrounded with a layer of stone concrete. The tower was then thoroughly cleansed with a solution of caustic potash and coal-tarred. The tanks, rain-leaders, pipes, &c., were coated with hot coal-tar inside.

Timbalier Island, intermediate between Nos. 342 and 343 of the Light-house List of 1871.—An iron screw-pile Light-house, with focal plane one hundred and twenty-five feet above the sea, will be erected at this place. The land of the Government, upon which the old brick tower stood, has been entirely washed away. The island being uninhabited and subject to dangerous overflows, in fact a low, barren sand-reef, unfit for cultivation, no difficulty in obtaining a new site is apprehended. The new Light-house will be placed in a convenient depth of water inside the island, which, in this case, will be an effectual breakwater. The location will also be at some distance from the eastern point of West Timbalier Island, (toward the west,) because the point is subject to abrasion. The bay affords

secure shelter for the vessels used in construction. The plans for this Light-house are completed, and it will be soon under contract.

Trinity Shoal, intermediate between Nos. 364 and 365.—A survey of this shoal was commenced by the United States Coast Survey in April and May, but not finished. An iron screw-pile Light-house, one hundred and twenty-five feet above the sea, will be contracted for at an early day for this shoal; the plans are completed.

Calcasieu Pass, intermediate between Trinity Shoal and Sabine Pass.—Inquiries have been made with a view to obtain possession of a suitable piece of land for the new Light-house. There seems to be much confusion in the claims of various parties, so that the only certain mode to acquire possession is by the operation of the laws passed at the last session of the legislature of Louisiana. The new Light-house authorized at this point will be erected during the next working season.

375. *Sabine Pass*.—The tower is in good order. The keeper's dwelling requires a new roof, new floors, and general repairs, which will be executed during the next season.

377. *Bolivar Point*.—An attempt was made to purchase a new site for the Light-house at such a point that the establishment of two Range Lights would have given perfect ranges over the bar and through the channel of the harbor. The negotiations failed. In consequence of the failure to obtain a new site, the Board ordered the foundation for the new tower to be placed on the old site, which was accordingly done. The foundation is complete. A dwelling for the light-keeper, on the plan of that at *Pass à l'outre*, has been finished. The iron Light-house for this place is now under construction at the North.

381. *Matagorda*.—The new Light-house authorized at this place will be constructed during the fiscal year.

383. *Swash*.—The screw-pile Light-house for this point is under construction at the North.

Decrow's Point.—The refusal of the owner to sell any land to the Government made it necessary to abandon the first plan of placing a couple of Range Lights on the land, and to substitute therefor a screw-pile Light-house, which is now under contract at the North.

385. *Brazos Island Beacon*.—A new iron structure is recommended for this point, on account of the rotten condition of the present temporary tower being subject to destruction in heavy gales. Estimates submitted.

Atchafalaya Bay.—The beacons marking the entrance to this bay are in good order.

Depot, at head of the Passes.—The buildings authorized were finished by the end of the year.

TENTH DISTRICT.

This District extends from the mouth of St. Regis River, New York, to include *Grassy Island Light-house*, Detroit River, Michigan.

Inspector.—Commodore Gustavus H. Scott, United States Navy.

Engineer.—Brevet Lieutenant Colonel George L. Gillespie, Captain of Engineers, United States Army.

In this district there are—

Light-houses and lighted beacons	55
Day or unlighted beacons	0
Buoys actually in position	72
Spare buoys for relief to supply losses	90
Tender (steamer) <i>Haze</i> , common to Tenth and Eleventh Districts	1

The numbers preceding the names of stations correspond with those

of the "Light-house List of the Northern and Northwestern Lakes of the United States," issued January 1, 1871.

446. *Ogdensburg*, New York, St. Lawrence River.—The renovation of this station commenced August 23, 1870, as mentioned in the last annual report, was continued during the working season and finally completed June 9, 1871. The sea-wall protecting the lot has been raised throughout its whole length; the space inclosed filled with loam and rich earth, graded and sown with grass, and shade-trees planted on the land front. The station is now in excellent condition.

453. *Sackett's Harbor*, New York, Lake Ontario.—The renovation of this station, commenced in August, 1870, and mentioned in the last annual report, was continued during the working season and finally completed April, 1871. A neat picket-fence incloses the dwelling and a small garden; shade-trees have been set out on the land side, and the old house and débris have been removed. The grounds are now in excellent condition.

456. *Pier-Head*, Oswego, New York, Lake Ontario.—The pier-head of the west pier has been marked by a Light exhibited from a small glazed box fitted to the top of a mast, framed into the pier. The west pier is very much exposed to high seas, and at times it is impossible for the keeper to reach the pier-head. To insure the maintenance of the Light at the pier-head, two $\frac{3}{4}$ -inch galvanized wire ropes connect the top of the mast with iron bars, fastened inside the stone tower at the second window, and serve to support a lantern six inches in diameter, showing a fixed white Light, that is run upon them from the tower to the mast. The working of the device has, so far, been entirely satisfactory.

Fair Haven, New York, Little Sodus Bay.—An appropriation was made March 3, 1871, for the erection of a pier, Light-house, and dwelling for the keeper at this station. The station was visited May 26, 1871, when it was decided to mark the approach to the harbor by a frame beacon to be established on the pier on the west side of the channel, and a suitable site for the keeper's dwelling was accordingly purchased. As soon as the necessary papers vesting title in the United States shall have been submitted and approved by the Attorney General, proposals will be publicly invited for the construction of a frame dwelling for the keeper. The Light will be of the fourth order, fixed, white, in a frame tower, provided with hauling apparatus for pier-head Light. The focal plane of the Light will be forty feet above the pier.

459. *Big Sodus Bay*, Lake Ontario.—The renovation of this station commenced in August, 1870, and, as mentioned in the last annual report, was continued during the working season, and finally completed June 30, 1871. The old tower and house have been removed from the lot, and the stone and débris formed into a rough jetty extending into the lake at the west end of lot, to prevent a threatened wear of the bank. The jetty is seventy feet long, with a twenty-foot base, and extends to nine feet of water. The station is in fine order.

462. *Oak Orchard*, New York, Lake Ontario.—An appropriation was made July 15, 1870, for a Light-house at or near the mouth of Oak Orchard Creek, New York. After a careful examination of Oak Orchard Harbor, and the shore-line in the vicinity, it was deemed best to mark the approach to the harbor by a frame beacon placed upon the west pier. In accordance with this decision, one-half acre of land on the west bank of the creek, near its mouth, was purchased as a site for the keeper's dwelling. During the winter the title-papers of the lot were received and forwarded to the Attorney General, and by him examined and approved. For the supply of the necessary material for the

dwelling and beacon sealed proposals were publicly invited and contracts made. Work was commenced March 30, 1871. The dwelling is a one-story and attic frame structure, with a room especially arranged for the accommodation of the beacon supplies. The beacon was finished June 10, and the Light, which is of the fourth order, fixed, white, was exhibited for the first time on the evening of June 17, 1871. The dwelling was finished and the keeper installed June 22, 1871.

463. *Fort Niagara*, New York, mouth Niagara River.—An appropriation was made March 3, 1871, for rebuilding the Light-house at this station. Plans have been prepared for a stone tower with oil-room attached, to be placed on the extreme eastern end of the Light-house lot. Proposals are now invited for the necessary material for tower and oil-room. As soon as the material can be delivered under contract, the work will be commenced and pushed to completion. The tower will be of coursed rubble-stone, eighteen feet diameter at the base, and eleven feet at the top of the cornice. The height of the focal plane above the surface of the ground will be forty-five feet. The order of the Light will not be changed.

465. *Buffalo Breakwater*, (north end,) Buffalo, New York.—It was stated in last annual report that "an appropriation was made July 15, 1870, for a Beacon-light on each end of the breakwater in this harbor." As the breakwater is not finished, it was only possible to make arrangements for the construction of the beacon to occupy the north end. The appropriation would not admit of a very elaborate structure, and as it is difficult, if not impossible, to reach the breakwater at certain seasons of the year, in any way short of a steam-tug, it was found necessary to arrange a structure that should contain quarters for the keeper. These considerations, taken in connection with the depth of water at the site, made it imperative to use timber in the construction, on account of its cheapness. Proposals were publicly invited for the supply of the necessary material, and contracts have been made for the iron, stone, and timber, and for the framing of dwelling. On May 18, a crib forty feet square was sunk twenty feet *behind*, and twenty-three feet *from* the north end of the breakwater, and the framing carried to the surface of the water. To allow settlement to take place, work was suspended till June 15, when six more courses were added. Work was again suspended till June 24, when it was resumed. The pier of protection is twelve feet above the level of the lake, and the beacon, which will be elevated eight feet above it, will be supported by heavy upright oak timbers securely framed into the pier, the oak timber being firmly held by adjustable wrought-iron rods. On the west side of the beacon, twenty-four feet above the water, a Fog-bell will be arranged, striking three times in quick succession, at intervals of thirty seconds. The striking apparatus will occupy one of the rooms of the beacon. It is expected that this work will be completed by September 15, 1871. The Light will be of the fourth order, fixed, red, the focal plane thirty-seven feet above the level of the lake.

466. *Buffalo Breakwater*, (south end,) Buffalo, New York.—It is proposed to mark the unfinished south end of breakwater by a temporary frame beacon, with the focal plane twenty-eight feet above the lake level. For a height of ten feet above base it will be of open framework, strongly braced, to give the waves, as nearly as possible, uninterrupted passage over the breakwater. The Fog-bell for this station, which is to strike continuously at intervals of ten seconds, has been delivered.

The Light will be of the fourth order, fixed, white. The proposed

length of breakwater is four thousand feet; at present only seventeen hundred and fifty feet have been built. If the usual annual appropriations are made, the residue should be built in three to four years. In view of this distant date of completion of work, no appropriation is asked at present for the construction of the beacon to mark the south end.

467. *Buffalo*, New York, Lake Erie.—An appropriation was made March 3, 1871, for the reconstruction and improvement of the wharf in front of Light-house depot. Sealed proposals for the supply of the necessary material and for the labor were publicly invited, and contracts for the supply of the timber, stone, iron, and framing were made. Work was commenced June 10. The old crib-work has been entirely removed, and the contractor is now dredging along the front of the lot preparatory to sinking the cribs of the new pier. The pier will be two hundred and sixty-four feet long by twelve feet wide, and sunk six feet below water-level. It is expected that it will be completed by September 1, 1871.

A *Lake-coast Light on the northern side of Presqu'isle*, Lake Erie, has been petitioned for. An estimate has been submitted, accordingly, of \$15,000.

475. *Conneaut*, Ohio; Lake Erie.—An appropriation was made March 3, 1871, for building a light-keeper's dwelling at this station. Plans and specifications of the dwelling have been prepared, and proposals will be invited for the construction under contract, when the title papers of the lot purchased for the site have been examined and approved by the Attorney General of the United States.

476. *Ashtabula*, Ohio, Lake Erie.—An appropriation was made March 3, 1871, for building a light-keeper's dwelling at this station. Plans and specifications of the dwelling have been prepared, and sealed proposals will be publicly invited for the construction under contract, when the title-papers of the lot purchased for the site have been examined and approved by the Attorney-General of the United States.

477. *Grand River*, Fairport, Ohio, Lake Erie.—An appropriation was made March 3, 1871, for completing the tower upon which work had been stopped by act of July 12, 1870, and for the reconstruction of the keeper's dwelling. The new dwelling will be a one-story and attic brick structure, placed upon the site of the old one, and connected with the tower by a brick covered-way. Sealed proposals for the supply of the necessary material were publicly invited, and contracts were made for the lumber, rubble-stone, and brick. The stone for the tower being already on hand and dressed ready for laying, work was resumed on the 20th of May. The tower is now nearly finished, and it is expected that the Light can be exhibited by the 15th of August. The order of the Light will not be changed. A great part of the material for the dwelling has been delivered, and the construction has advanced above the water-table. The station will be in complete order by the 20th of September.

479. *Cleveland*, Ohio, Lake Erie.—An appropriation was made March 3, 1871, for rebuilding the Light-house at this station. Sealed proposals were publicly invited for the supply of the material necessary for the construction of a stone wall to inclose the grounds on the north and east sides, and for a third-order lantern complete, with stairs for the tower, and contracts have been made. The stone and cement were delivered early in June, and work was commenced on the 24th of June. It is recommended that the appropriation for this station be extended to June 30, 1873.

482. *Black River*, Ohio, Lake Erie.—This station has no keeper's dwelling. An appropriation of \$4,000 is recommended for the construc-

tion of a dwelling similar to the one to be constructed at Ashtabula, Ohio.

483. *Vermillion*, Ohio, Lake Erie.—An appropriation was made March 3, 1871, for building a light-keeper's dwelling at this station. The station was visited May 18 for the purpose of selecting and purchasing a suitable site. No suitable vacant lot could be purchased that was easily accessible from the piers, and from which the beacon could be seen, and in consequence a purchase was made of a lot with a new house upon it, containing every convenience for a keeper's dwelling. Occupation will take place when the papers necessary for vesting title in the United States have been examined and approved by the Attorney General.

484. *Huron*, Ohio, Lake Erie.—An appropriation was made March 3, 1871, for building a light-keeper's dwelling at this station. The station was visited May 17, for the purpose of selecting and purchasing a suitable site. A purchase was made, but the owner of the lot has since refused to give a title. Further efforts will be made to obtain a suitable lot.

485. *Cedar Point*, Lake Erie, near Sandusky, Ohio.—It is proposed to establish a Fog-bell at this station before the close of the season.

490. *Turtle Island*, Lake Erie, near Toledo, Ohio.—It is proposed to establish a Fog-bell at this station before the close of the season.

491. *Maumee Outer Range*, Toledo, Ohio.—An appropriation was made March 3, 1871, to build a light-keeper's dwelling at this station. Sealed proposals were publicly invited to June 3, for the construction of the dwelling, and a contract has been made. It will be a frame dwelling, one-story and attic, placed on the west end of the range, and behind the inner range tower. It is expected that the dwelling will be ready for occupation by the 20th of September.

498. *Gibraltar*, Lake Erie, mouth of Detroit River, Michigan. An appropriation of \$10,000 is recommended to rebuild the tower and keeper's dwelling at this station. The present buildings are very old, and not worth repairing.

At each of the following-named stations there have been repairs and renovations more or less during the last year:

449. *Sunken Rock*, St. Lawrence River.

450. *Rock Island*, St. Lawrence River.

452. *Galloo Island*, Lake Ontario, entrance to St. Lawrence River.

455. *Oswego*, New York, Lake Ontario.

460. *Genesee*, Charlotte, New York, Lake Ontario.

464. *Horseshoe Reef*, Buffalo, New York, Lake Ontario.

471. *Presqu'isle Beacon*, Range No. 1, Erie, Pennsylvania.

472. *Presqu'isle Beacon*, Range No. 2, Erie, Pennsylvania.

485. *Cedar Point*, Sandusky, Ohio, Lake Erie.

497. *Monroe*, Monroe, Michigan, Lake Erie.

The following-named Light-stations require repairs to be made during the ensuing year:

461. *Genesee Beacon*, Charlotte, New York, Lake Ontario.

464. *Horseshoe Reef*, Buffalo, New York.

468. *Dunkirk*, Dunkirk, New York, Lake Erie.

473. *Peninsula Beacon Range*, No. 1, Erie, Pennsylvania.

478. *Grand River*, Fairport Beacon, Fairport, Ohio, Lake Erie.

488. *Green Island*, Green Island, Lake Erie.

489. *West Sister Island*, Lake Erie.

493, 494. *Maumee Middle Range*, Toledo, Ohio.

497. *Monroe*, Monroe, Michigan, Lake Erie.

499. *Mamajuda*, Detroit River.

500. *Grassy Island*, Detroit River.

The following are the names of the Light-stations in this district not mentioned elsewhere:

- 447. *Cross-over Island*, St. Lawrence River.
- 448. *Sister Islands*, St. Lawrence River.
- 451. *Tibbett's Point*, entrance to St. Lawrence River.
- 454. *Stony Point*, Lake Ontario.
- 457, 458. *Big Sodus Range Beacons*, Lake Ontario.
- 469. *Dunkirk Beacon*, Dunkirk, New York, Lake Erie.
- 470. *Erie Harbor*, Erie, Pennsylvania.
- 471, 472. *Presqu'isle Beacon Ranges*, Nos. 1 and 2, Erie, Pennsylvania.
- 480. *Cleveland Beacon*, No. 1, Cleveland, Ohio.
- 481. *Cleveland Beacon*, No. 2, Cleveland, Ohio.
- 486. *Cedar Point Range*, Sandusky, Ohio.
- 487. *Marblehead*, Sandusky, Ohio.
- 495, 496. *Maumee Inner Range*, Toledo, Ohio.

An estimate is submitted for a steam-tender for the Inspector and Engineer of the Tenth Light-house District, rendered necessary by the large increase in the number of Lights requiring repairs and supplies, buoys and other aids to navigation in the Northern and Northwestern lakes since 1865, which it is found cannot be effectually attended to by the tender stationed at Detroit for Lakes St. Clair, Huron, Michigan, and Superior. The buoy service, which has heretofore, and is now, mainly performed under contract with private individuals, is not satisfactory, and can only be properly performed by a small steam-vessel.

ELEVENTH DISTRICT.

The Eleventh District embraces all aids to navigation on the Northern and Northwestern Lakes above Grassy Island Light-house, Detroit River.

Inspector.—Commodore Alexander Murray, United States Navy.

Engineers.—Brevet Brigadier General O. M. Poe, Major of Engineers, United States Army.

There are in this district—

Light-houses and lighted beacons	91.
Day or unlighted beacons	2
Buoys actually in position	144
Spare buoys for relief and to supply losses	60
Tenders (steam) <i>Warrington</i> and <i>Haze</i>	2
Tender (sail) <i>Belle</i>	1

The numbers preceding the names of stations correspond with the "Light-house List of the Northern and Northwestern Lakes of the United States," issued January 1, 1871.

504, 505. *Saint Clair Flats*, new channel.—By the act of July 12, 1870, returning to the Treasury the available funds, work on these Light-houses was suspended while in full progress, and it was not until the appropriation of March 3, 1871, became available that operations could be resumed. An adequate working force is now upon the ground, and the two stations will be ready for occupancy before the close of the season. Meanwhile, temporary structures have been erected, and everything is in readiness to exhibit lights, as soon as the announcement is made that the channel is open to navigation.

506. *Fort Gratiot*, Lake Huron.—Under the provisions of the appropriation of March 3, 1871, for a Fog-signal at this station, one is now under construction, and will be in operation before the close of the season.

A Light-house between Fort Gratiot and Point Aux Barques, Lake

Huron.—The last annual report contained the following, which is again submitted, in the hope that the necessary appropriation may be made :

An additional coast Light, between *Fort Gratiot* and *Point Aux Barques*, Lake Huron, and recommended in last year's report, is very much needed.

The distance between the two places is seventy-five miles, for the whole of which vessels keep the shore well aboard while going in either direction.

The amount required for such a Light-house, including the purchase of the land, will be about \$30,000.

Range-lights at the mouth of Saginaw River, Saginaw Bay, Lake Huron.—An appropriation of \$12,000 for these ranges was made by act of Congress approved July 15, 1870. The title to the small portion of marsh required for these lights was so much involved that there was but little hope of its being cleared up in time to save the appropriation from reversion to the Treasury, under the provisions of the act of Congress of July 12, 1870. Moreover, the price (\$2,500) asked for the few acres of swamp, impassable on foot in the summer time, was so much above its real value that application was made to the governor of Michigan for a commission to condemn the property under the State laws. The commission fixed the sum of \$17,496 84 as a fair and just compensation for the site required. This amount being largely in excess of the entire appropriation, as well as greatly beyond its value, the award of the commission was promptly declined by the Board, and on the 30th June, 1871, the appropriation reverted to the Treasury. It is not recommended that any further steps be taken at present.

514. *Thunder Bay Island*.—Under the act appropriating for a Fog-signal at this station, one is now under construction. It consists of a 10-inch whistle, actuated by steam from a horizontal tubular boiler, and will be completed during the present season.

517. *Presqu'isle, Lake Huron*.—This important coast Light, which was under construction at the date of the last annual report, was unexpectedly completed, and was lighted for the first time upon the opening of navigation this season. It is of great benefit to navigation. After the new Light was exhibited the old tower at the entrance to the harbor was dismantled; and the lantern and lens are ready for use elsewhere.

Spectacle Reef, Lake Huron.—After the date of the last annual report work upon the crib-pier of protection was prosecuted at Scammon's Harbor (where a sufficient depot with dockage has been established) until the close of the season, and resumed on the opening of navigation about the 1st of April. It is expected that the entire crib, ninety-two feet square, will be ready to be placed on the reef early in July.

During the winter the coffer-dam was framed at Detroit, and after the opening of navigation it was taken to Scammon's Harbor, in readiness for use as soon as the crib shall have been completed and placed in position.

A contract for the stone required for the Light-house was made, and it was agreed to deliver granite at Scammon's Harbor, beds and builds cut, for the sum of \$1 25 per cubic foot. The contractor utterly failed to furnish the stone, and, owing to the rapid advance of the season, there was not time to again advertise for proposals with any hope of completing the contracts and securing the delivery of a sufficient quantity of stone to bring the work above water before the close of the season.

In this emergency application was made for authority to purchase limestone from Marblehead, Ohio, in sufficient quantity to secure the object. The honorable the Secretary of the Treasury authorized this purchase, and it was accordingly made at a rate of \$1 75 per cubic foot stone, with beds and builds cut, and \$1 50 for stone in the rough.

At the time the proposals were opened under the advertisement these same persons offered to furnish the same stone for \$2 25 per cubic foot, beds and builds cut, or 50 cents per cubic foot higher. While these stones are not as good or durable as granite, it is still believed that they will answer the purpose and endure for ages.

The wreck of the schooner *Nightingale*, reported last year as occupying the site selected for the Light-house, was removed during the month of June.

Every preparation looking to the successful placing of the crib on the reef has been completed. The requisite tugs, among the most powerful on the lakes, have been chartered to tow the crib, as well as barges and scows of capacity sufficient to float 250 cords of stone, all of which will go out with the crib, and it is hoped and expected that, taking advantage of suitable weather, the crib will be placed on the reef and secured within twelve hours after leaving the harbor.

The requisite derricks and shears for handling the stone at the depot have been erected, and two platforms of masonry upon which to fit together the several courses of stone and drill the holes for the iron domes are under construction.

A derrick has also been ordered for use in handling the stone upon the crib and setting them in the tower.

The failure of the contractor for granite involves the loss of the balance (about \$70,000) of the appropriation approved July 15, 1870, for this work, which, under the act of July 12, 1870, reverted to the Treasury on the 30th of June. It will therefore be necessary to reappropriate this amount for the fiscal year 1872-'73.

Straits of Mackinac.—The necessity for a Light to mark the passage between Round Island and the Island of Mackinac, known as the North Channel, is as great as ever, and the recommendation contained in the annual reports for the last two years, that the sum of \$12,000 be appropriated for this purpose, is respectfully repeated.

522. *Detour, Lake Huron.*—The proposition contained in the last annual report to substitute a third-order lens for the fourth order then in use at this station, was carried into effect upon the opening of navigation this season, and gives great satisfaction.

Saint Helena Island, Lake Michigan.—For reasons given in the annual reports for 1868-'69 and 1870, a Light to mark the anchorage at this island is deemed important. It is again recommended that the sum of \$14,000 be appropriated for this work.

Passage north of the Beaver Islands, Lake Michigan.—This passage is now much used, and the navigation through it will rapidly increase, since with certain winds it is possible to sail through it when the south passage is impracticable. Lights to mark it will soon be required, but it is proposed to defer for another year the estimates of their cost.

Little Traverse, Lake Michigan.—Attention was directed to the necessity of a Light-house to make this fine harbor of refuge available at all times, by an inquiry from the Senate Committee on Commerce.

By reference to the tracing of the lake survey detail chart of Little Traverse, and the engraved lake survey chart of the northeast end of Lake Michigan, including Big and Little Traverse Bays and the Fox and Manitou Islands, the relation of the harbor of Little Traverse to the navigation of Lake Michigan can be readily seen and appreciated. The harbor itself is excellent in every respect, easy of access, affording good anchorage and a complete shelter from all winds.

A Light-house of the fifth order, together with a Fog-bell of 600 pounds with Stevens's striking apparatus, will make the harbor available. In

addition to its relation to the general commerce of Lake Michigan, the harbor has some local importance. This is increasing, and, doubtless, will continue to do so.

530. *South Manitou*, Lake Michigan.—The work of improving this station is in progress, though the working party has been temporarily withdrawn for service elsewhere. All the materials are on the ground, and by the 20th July the entire working force will be again at the station, when it is expected the work will go on uninterruptedly until its completion before the close of the season. The improvements will consist of a third-order tower founded on piles, having its focal plane one hundred feet above the surface of the lake, and a covered passage-way connecting the tower and keeper's dwelling. This improvement will be of great value to the commerce between Lake Michigan and the other lakes.

Frankfort, Lake Michigan.—As soon as the harbor piers at this place are completed a Pier-light will be required, and is estimated for under the head of "Pier Lights."

534. *Pere Marquette*, Lake Michigan.—Before the close of last season a Light was established on the head of the pier at this place, under an appropriation of \$6,000, approved July 15, 1870. It was also intended to erect a keeper's dwelling on shore, but it having been found impossible to perfect the title before the 30th June, the balance of the appropriation on that day reverted to the Treasury. It is respectfully recommended that the sum of \$4,000 be reappropriated for the purpose in question.

Little Point Au Sable, Lake Michigan.—A Lake-coast Light of the third order is much needed at this point, as a simple inspection of the chart of Lake Michigan will show. Last year an appropriation of \$35,000 for this purpose was recommended, but not made, and the recommendation is now respectfully repeated.

White River, Lake Michigan.—The appropriation of \$10,000 formerly existing for a Light at this point, reverted to the Treasury June 30, 1870, under the act of July 12, 1870. It is respectfully recommended that this amount be reappropriated for the purpose indicated.

535. *Muskegon*, Lake Michigan.—The rebuilding of the main Light at this station, in progress at the date of the last annual report, was duly completed, and the Light exhibited from the new structure before the close of the season.

Muskegon Beacon.—This is to be a Pier-head Light, on the outer end of the south pier, with an elevated walk connecting it with the shore. Its erection is now in progress, and will be completed within a couple of weeks. The exhibition of the Light will be somewhat delayed for want of the required illuminating apparatus.

537. *Grand Haven*, Lake Michigan.—After the completion of the Pier-head Light at *Muskegon*, the working party will be transferred to *Grand Haven* for the purpose of erecting a beacon on the pier-head. An elevated walk starting from a point on the pier, which can be safely reached in any weather, will connect the beacon with the shore. The whole will be completed, and the Light shown early in September.

It was intended to move the Fog-signal which is located on the pier, but the performance of the machinery is quite satisfactory, and when the larger bell proposed for the station is duly hung, it is supposed it will answer all purposes.

538. *Holland*, Lake Michigan.—A Pier-head Light has been established on the outer end of the south harbor pier at this place, and was exhibited before the close of last season. The appropriation under which the work was done was intended to cover the cost of a keeper's dwelling also,

but it was not possible for the owner of the site required to make a clear title thereto in time to prevent the balance of the appropriation reverting to the Treasury on the 30th of June last, under the act of July 12, 1870. The sum of \$4,000 should be reappropriated for a keeper's dwelling, and a new effort be made to obtain title.

South Haven, Lake Michigan.—An appropriation of \$6,000 is available for a Beacon-light at this place, under which it is proposed to establish a Light during the present season.

Beacon at Michigan City, Lake Michigan.—The working party engaged in erecting Pier-head Lights will be transferred from *Grand Haven*, upon the completion of the work at that point, to *Michigan City*, and will complete the proposed beacon and elevated walk at this place before the close of the season.

Calumet, Lake Michigan.—After a conference by the Engineer of the district with the president of the Improvement Company, which owns the old Light-station at this point, he promised to put the title in proper shape to be submitted for the approval of the Attorney General of the United States, but he has not yet informed him of what progress is being made. As soon as the transfer to the United States is made, the work of renovating the old station will be taken in hand, under the appropriation now available, and can be completed in a very short time.

Grosse Point, Lake Michigan.—An appropriation for the removal of *Chicago* Light-house to this point is now available, and the title-papers to the land required are in course of preparation. As soon as they have been approved, the work will be taken in hand.

A Light-house at Racine Point.—The last annual report contained the following remarks :

This is a prominent point on the west coast of Lake Michigan, about three and a half miles north of Racine, and eighteen miles south of the north-cut beacon at Milwaukee. The point shuts out to the northward the *Racine* Light, which lies in a bay and is not seen by vessels coming from the north, and keeping the shore well aboard as they mostly do, until nearly abreast of it.

Frequent shipwrecks have occurred at this point for the want of a Light. For vessels coming from the south it would also be a good guide for steering clear off Racine Reef.

A Fog-signal should also be provided. For these two objects an estimate of \$40,000 is submitted.

A Coast-light at Twin River Point, Lake Michigan.—The following remarks are copied from the report of last year, and are repeated as presenting a fair statement of the necessity for this Light :

This point is seven miles north of *Manitowoc*, and occupies a position on the west coast of Lake Michigan similar to *Grand Point au Sable* on the east. It is the prominent landmark for vessels navigating Lake Michigan, and should be marked by a tower one hundred feet high with an apparatus of the third order. There is an old discontinued station at the village of Twin River, but the site is too far south of the Point to answer the purposes of a coast Light.

An estimate for a proper Light at this station is submitted of \$40,000.

North Bay, Lake Michigan.—By act of Congress approved July 15, 1870, an appropriation of \$7,500 was made for the purpose of establishing a Light or Lights to enable vessels to enter this harbor, and a price for the land required was agreed upon. But the owner found it impracticable to clear the title before the 30th of June, when the appropriation reverted to the Treasury. Submitted for reappropriation.

A Light-house on Poverty Island, at the entrance to Green Bay.—Attention is respectfully invited to the following remarks, copied from the annual reports for the last two years. The necessity for this Light is daily increasing, the shipments of iron ore from Escanaba alone being sufficient to justify the erection of the Light :

The already large and rapidly-increasing commerce to and from the northern end of

Green Bay and lower lake ports now takes, in daylight, the northern passage from Lake Michigan into Green Bay, because of its being much shorter and more direct. To enable vessels to use the same passage in the night, a Light-house on Poverty Island is necessary.

Estimates submitted of \$18,000.

A Coast-light between White Fish Point and Grand Island, Lake Superior.—In the last four annual reports this Light has been recommended. It is more needed than any other Light in the district not already provided for. The sum of \$40,000 will be required to build it, and an estimate submitted.

A Light-house on Stannard's Rock, Lake Superior.—The rapid increase of the commerce between Du Luth, the eastern terminus of the Northern Pacific Railroad, and the lower lakes, will demand, at no distant day, the erection of a Light-house on this danger, so much dreaded by all vessels bound to or from points above Keweenaw Point and ports below. The case will be similar to that of Spectacle Reef, and all the costly apparatus and machinery purchased for the latter can be made available for the former, thereby greatly reducing the cost of construction.

It is not proposed, however, to do anything further at this time than to make the preliminary examinations and mature plans for the work, for which purpose an estimate of \$20,000 is submitted.

L'Anse, Lake Superior.—The railroad from Escanaba and Marquette to Ontonagon passes the head of L'Anse Bay, and will, for the present, terminate there. Efforts, which will probably prove successful, are now being made to complete the road to L'Anse before the close of this season, when the place will at once become an important point for the shipment of iron ore. A good harbor is found at the head of the bay, and it should be lighted.

To establish such a Light as is needed will require an appropriation of \$12,000, which amount is submitted, with estimate.

Mendota, Lake Superior.—This Light-station having been discontinued by the order of the honorable the Secretary of the Treasury, it will be dismantled when visited by the steamer Haze upon her present cruise, and the apparatus, &c., used elsewhere.

585. *Eagle Harbor, Lake Superior.*—Under an appropriation approved July 15, 1870, this station has been entirely rebuilt, and is now in excellent order.

Outer Island, Lake Superior.—The through commerce to and from the western end of Lake Superior, increasing so rapidly as the railroads having their termini at Du Luth are extended to the westward, all passes outside of the Apostle Islands, and is greatly in need of a Light-house on the northern end of Outer Island. This should be a Light of the third order, and will cost \$40,000, which sum is respectfully recommended to be appropriated.

Sand Island, Lake Superior.—For reasons given in the preceding case, a Light (of a lower order, however) is demanded on the northern end of Sand Island, the most westerly of the group, for which purpose an appropriation of \$18,000 is recommended.

Du Luth, Lake Superior.—The act of Congress appropriating for this Light-house provides that it shall be located at the terminus of the Northern Pacific Railway. Consequently, the Chief Engineer of that road was written to, informing him of the provision of the appropriation, and asking him to designate a site for the Light-house; also, in case the proposed site were not the property of the United States, to take the requisite steps to ascertain the owner, and, if practicable, initiate negotiations for the purchase of the site. After some delay, he replied that he

had referred the communication to the president of the road, but no further answer has been received.

Passage Island.—The discovery of the silver mines on Lake Superior, and consequent sudden and remarkable increase of travel and traffic to that region, renders it desirable that a Light-house should be built on Passage Island, to mark the channel between it and Isle Royale. The island is difficult of access, and therefore any structure put there will cost more than if erected at some more accessible point.

It is respectfully recommended that an appropriation of \$18,000 be made for the purpose indicated.

Pier-head Lights.—These are being erected as fast as illuminating apparatus can be supplied. That at *Muskegon* will be completed early in July, but the apparatus is not yet received. That at *Grand Haven*, as well as the one at *Michigan City*, will be completed before the close of the season, and the others provided for by the act of the 3d of March, 1871, will all be completed before the appropriations for 1871-'72 become available.

As the extension of this system of pier Lights must depend upon that of harbor improvements, it is somewhat difficult to estimate in detail until it is known just where these improvements are to be made. Therefore the estimate for Pier-head Lights is submitted in one amount, and place it at \$20,000, which will be sufficient for this district for the fiscal year.

Light-house depot at Detroit.—Work on this has progressed, though not so rapidly as was desired. A bulk-head has been built across the entire front of the lot, and the basin has been dredged out to a uniform depth of ten feet, thus giving sufficient room to accommodate all the Light-house vessels. Enough of the dredged material was deposited behind the bulk-head to fill up the low ground to the height of the bulk-head, thus forming an excellent yard for the storage of buoys and other heavy material.

The depot building, forty by sixty feet in plan, and entirely fire-proof, has been carried up to a sufficient height to admit of the completion of the second floor. The cellar for the storage of the supply of oil forms the basement of the building. It is very desirable to complete this building, so much needed. The dark room in which to test the oils delivered under contract is to be located in the story above that now completed, and the work should go on. Wherever the work is stopped now, a temporary roof must be thrown over it to protect it from the weather, which will add considerably to the cost of the building.

When the building was designed it appeared to be of ample size, but it is now plainly seen that there will be no room to spare. An estimate is submitted:

REPAIRS.

Repairs more or less extensive have been made at the following-named stations, and they are now in good order. The repairing parties are in the field, at work, and, before the close of the season, all pressing repairs will have been made.

501. *Windmill Point.*

506. *Fort Gratiot.*

508. *Tarvas.*

509. *Charity Island.*

522. *Detour.*

523. *Waugoshance.*

525. *Beaver Island Harbor.*

- 526. *Beaver Island.*
- 536. *Grand Haven.*
- 530. *Kalamazoo.*
- 543. *Chicago.*
- 545. *Waukegan.*
- 549. *Milwaukee.*
- 550. *Milwaukee, (North Cut beacon.)*
- 551. *Port Washington.*
- 561. *Point Peninsula.*
- 564. *Chamber's Island.*
- 580. *Manitou Island.*
- 581. *Gull Rock.*

FOG-SIGNALS.

Four steam Fog-signals (boilers with whistles attached) have been ordered. They are to be established as follows:

1st. Upright tubular boiler, with 10-inch whistle, at *Fort Gratiot* Light-station, Lake Huron.

2d. Horizontal (locomotive) boiler, with 10-inch whistle, at *Thunder Bay Island.*

3d. Upright tubular boiler, with 10-inch whistle, at *Detour* Light-station, Lake Huron.

4th. Horizontal (locomotive) boiler, with 10-inch whistle, at *White Fish Point*, Lake Superior.

Bells, with Stevens's striking apparatus, are to be placed at *Waugoshance*, *Granite Island*, and *Pottawatomie Island*.

TENDERS.

The steam-barge *Warrington* has been principally used this season in connection with the work on *Spectacle Reef*. During last winter she was strengthened by arches and additional bilge kelsons, and her deck-beams supported by stanchions, thus preparing her for carrying on her deck the heavy stones to be used in building the tower. She has also been fitted with a steam-derrick with which to handle the stone. This derrick has proved of the very greatest service already.

The hard work of the season developed such defects in her boiler that a new one was deemed necessary. Hence, in August last the tender was laid up, and a new boiler eight feet in diameter and eighteen feet long was put in, when the vessel returned to her work. As the new boiler has a larger steam capacity, it will require less coal to run it when towing in heavy weather than was required for the old one, as it will no longer be necessary to force the fires as before.

The schooner *Belle* has been, and will continue to be, used as quarters for the workmen at *Spectacle Reef*. Because of her light draught she can be moored directly on the reef, and she thus answers a purpose which very few vessels would, and indeed is of the greatest value. She is now getting old, and will need extensive repairs before long, but nothing is proposed before the close of the season.

The steam-tender *Haze* has been employed in delivering the light-house supplies on all the lakes, and in transporting freight and looking after the buoys.

TWELFTH DISTRICT.

This district embraces all aids to navigation on the Pacific coast of the United States, from the Mexican frontier to the boundary of Oregon.

Inspector.—Commodore Alfred Taylor, United States Navy.

Engineer.—Brevet Lieutenant Colonel R. S. Williamson, Major of Engineers, United States Army.

There are in this district—

Light-houses.....	14
Buoys actually in position.....	33
Spare buoys, for relief and to supply losses.....	33
Tender (steam) <i>Shubrick</i>	1

The following numbers, which precede the names of stations, correspond with those of the "Light-house List of the Atlantic, Gulf, and Pacific Coasts of the United States," issued January 1, 1871.

Point Fermin, sea-coast of California, near entrance to San Pedro Harbor.—An appropriation of \$25,000 is recommended to establish a fourth-order Light-house and a steam Fog-signal at this point to mark the approaches of San Pedro Harbor. The appropriation should, if possible, be made so as not to revert to the Treasury at the end of the fiscal year, for the reason that it is impossible to obtain a suitable site except by condemnation under the laws of California, which is a long and tedious process.

The number of vessels navigating near the southern coast of California, between there and San Diego, and passing through the Santa Barbara Channel, has been greatly increased within the last two years. All coast steamers stop at San Pedro, near Wilmington, the port of Los Angeles, and a Light-house and Fog-signal, as guides to the entrance of the harbor, are of great importance.

Anacapa Island, west side of southern entrance to the Santa Barbara Channel, California.—An appropriation of \$70,000 is recommended for the establishment of a first-order Light-station at the eastern end of this island. The island is a barren rock about one hundred and fifty feet above the sea, destitute of verdure, and all the water and other materials necessary to prosecute the work will have to be brought from the main land.

The same reasons which make it advisable to establish a light at Point Fermin, are in still greater force with reference to *Anacapa*, which is at the south entrance of the Santa Barbara Channel, there but ten miles in width. A Fog-signal is not recommended on the island, as the coast steamers usually pass nearer the main land, and because of the high and very precipitous sides of the island, against which the waves are constantly dashing and producing a deafening noise.

Point Hueneme, sea-coast of California, east side of southern entrance to Santa Barbara Channel.—An appropriation of \$10,000 is recommended for the erection of a first-class steam Fog-signal at this point, which is directly opposite *Anacapa Island*. With a first-order Light on the eastern end of *Anacapa Island*, and a steam Fog-signal on the western extremity of Point Hueneme, the southern approaches to Santa Barbara Channel will be well marked, and the navigation of the waters of that portion of California coast rendered less dangerous.

392. *Point Conception*, sea-coast of California.—An appropriation for establishing a first-class steam Fog-signal at this station was made March 3, 1871. A thorough examination and survey of this point is to be made, with a view to ascertaining the best location for the proposed signal, the supply of water, and of obtaining all other necessary information. The engine and boiler for this signal have been contracted for.

Piedras Blancas, sea-coast of California.—This point is about midway between Point Conception and Point Pinos Light-houses, distant one hundred and fifty miles from each other. But Point Pinos is only a harbor Light, and the coasting steamers take their departure from Pie-

dras Blancas, and keep so far out that *Point Pinos Light* is not seen, and it may be considered that there is no sea-coast Light between Point Conception and Pigeon Point, which are nearly two hundred miles distant. An appropriation of \$75,000 is submitted for the erection of a first-order Light and Fog-signal at Piedras Blancas.

393. *Point Pinos*, sea-coast of California, entrance to Monterey Bay.—The suit for condemnation of land, and right of way thereto, at this station, which was tried in the October term of the district court of the third judicial district of the State of California, resulted in a verdict by which the jury awarded to the owners of the land the sum of \$1,280 as the value of the land, and the damage resulting by reason of taking of the same. The owners sought to obtain the value of the Light-house building and improvements, and the cost of fencing the Light-house tract and roadway. The former was denied by the court, and the latter disallowed by the jury. The owners have appealed the case to the supreme court of California, and the suit is now pending before that body.

Pigeon Point, sea-coast of California.—An appropriation of \$90,000 was made March 3, 1871, for the erection of a first-class Light-house and Fog-signal at this point. The structures are to consist of a masonry tower, which is to be one hundred feet high, from base to focal plane. The elevation of the Light above mean sea-level will be one hundred and fifty-eight feet. The keeper's dwelling is to be a double two-story house, built of wood. Work on the above structures was commenced on the 9th of June. A first-class steam Fog-signal will be established at this point, and also on *Año Nuevo Island*, six miles southeast of *Pigeon Point*. It is expected that the steam Fog-signal at *Pigeon Point* will be ready for operation about the 31st of August. The steam Fog-signal for *Año Nuevo Island* may not be ready for operations until after the first rains of the coming winter, for the reason that it may be necessary to construct a water-shed and build a large cistern to collect water.

396. *Point Bonita*, entrance to San Francisco Harbor, California.—An appropriation for the establishment of a first-class steam Fog-signal at this station was made on the 3d of March last. In June of this year a thorough examination of the point was made, with a view of determining the best location for the signal, the means of supplying it with water, and the best way to get materials to this difficult site selected. A syren with its engine has been constructed for this station, and will be forwarded in a few days.

Point San Pablo, between the bays of San Francisco and San Pablo, California. An appropriation was made March 3, 1871, for the erection of a Light-house and Fog-signal at this point, as a guide through the straits of San Pablo. As it was found impossible to obtain a suitable piece of land at this point by purchase, a survey was made of the point, showing the metes and bounds of the land required, and a suit for the condemnation of the land thus surveyed has been commenced in the fifteenth judicial district of California. The court to try this case meets on the 5th of December next. The commencement of work on the proposed structures will therefore be delayed until the opening of next spring. The structures will be completed and the Light-house and Fog-signal in operation before the end of the present fiscal year.

Mare Island, entrance to the straits of Carquines, California.—An appropriation of \$10,000 is recommended for the erection of a fifth-order Light at this point, to mark the approaches to Carquines Straits. The erection of a Light-house at this point has been strongly urged for many years.

399. *Point Reyes*, sea-coast of California.—The iron tower for this sta-

tion was shipped to Drake's Bay, landed there, and hauled to the top of the bluff, near the keeper's dwelling, on October 9, 1870. The work of taking the tower, lantern, and lens apparatus from the top of the bluff down to the site proposed for the tower was successfully completed shortly afterward, and its erection was commenced by the contractor. The work was completed in November, and the Light was exhibited for the first time on the night of December 1, 1870. On February 1 the work of preparing a site for the steam Fog-signal at this station was commenced. A large cistern was constructed, which, with a basin around it, will hold 100,000 gallons. A water-shed, ten thousand square feet in area, was made, from which water enough will be collected in a year to fill the cistern, even in a season in which the rain-fall will be much below the average.

The water from the cistern is conducted to the Fog-signal by means of a galvanized iron pipe, which is securely fastened to the sides of the cliff. A chute has been built from the site of the tower to the Fog-signal. This chute is constructed in the most substantial manner, and is for the purpose of conveying fuel to the Fog-signal. A winding roadway has been constructed from the cliff to the signal site. Much blasting was done before it was completed. The work of preparing the site for the signal-house, coal-shed, &c., was very slow, difficult, and dangerous. Huge masses of rocks overhanging the signal site had to be blasted off, so that at the rear of the signal is a vertical wall of rock, one hundred feet high. An iron railing was put around the edges of the plot prepared for the signal, to keep any one from rolling off into the sea, as on all seaward sides of the signal the cliff is very steep and jagged.

On June 12 the work of taking the boiler and signal apparatus from the top of the cliff down to its position was successfully accomplished. The boiler was put in position, the apparatus fitted to it, and on June 14 the signal was tried, and found to work satisfactorily. On June 30 the work of housing the boiler and signal-apparatus was completed. The signal is now ready for operation, and can be started as soon as the rains of next winter shall have sufficiently filled the cistern with water. The work of establishing this Fog-signal has been, from the nature of the location, very expensive and dangerous.

400. *Point Arena*, sea-coast of California.—An appropriation for the establishment of a first-class steam Fog-signal at this station was made March 3, 1871. An examination of the point, with a view of determining the location for the signal and the supply of fuel and water, has been made. It is expected to complete the work and have the signal in readiness for operation November 1 next.

401. *Cape Mendocino*, sea-coast of California.—The brick dwelling-house at this station was so badly injured by an earthquake on March 2, that it was deemed necessary to pull it down, and erect in its stead a double house of wood. The place selected for the site of the new dwelling is on the spur of the cape on which the Light-house tower stands, and some distance above it. The spur is a rocky ledge, and has the appearance of being very permanent. The work of tearing down the old structure commenced on the 23d of June; the keepers having removed to a shanty near by that was fitted up as a temporary residence for them. It is expected that the new house will be finished by November next. This structure is of the same plan as the *Cape Blanco* dwelling, which was built last year.

The claimants of the land at this Light-station have appealed from the decision of the judge of the eighth judicial district to the supreme court of the State, and the case is now pending before that body.

Trinidad Head, sea-coast of California.—An appropriation for the erection of a Light-house at *Trinidad Head* was approved June 20, 1860, but nothing was done toward building the structures until February of this year. The materials were purchased and the work commenced in June, and the work is now progressing favorably. The Light will be of the fourth order, fixed, varied by red flashes, and will be shown from a low, square, brick tower.

Fauntleroy Rock, Crescent City Harbor, California.—An appropriation for erecting a day-beacon on this rock was made March 3, 1871. It is to be of wrought iron, will be thirty feet high from the base of the rock, and is to be surmounted by a circular cage composed of wrought-iron rings. The work was completed on the 20th of September.

At each of the following-named stations there have been repairs and renovations, more or less extensive, made since the date of the last annual report:

391. *Santa Barbara*, coast of California, near Santa Barbara landing.
392. *Point Conception*, coast of California, west side of northern entrance to Santa Barbara Channel.

393. *Point Pinos*, coast of California, south side of entrance to Monterey Harbor.

394. *Santa Cruz*, on Point Santa Cruz, at the entrance of Santa Cruz Harbor, California.

395. *Farralones*, on the largest or southeast Farralon islet.

396. *Point Boneta*, California coast.

397. *Fort Point*, California.

398. *Alcatraz*, on Alcatraz Island, in the harbor of San Francisco, California.

399. *Point Reyes*, California.

The following are the names of the Light-stations in these districts not mentioned elsewhere:

390. *Point Loma*, California, west side of entrance to San Diego Bay.

402. *Humboldt*, California, north side of entrance to Humboldt Bay.

404. *Crescent City*, California, entrance to Crescent City Harbor.

THIRTEENTH DISTRICT.

This district embraces all aids to navigation on the Pacific coast of the United States north of the boundary between California and Oregon.

Inspector.—Commodore Alfred Taylor, United States Navy.

Engineer.—Major H. M. Robert, Corps of Engineers, United States Army.

There are in this district—

Light-houses	10
Buoys actually in position	10
Spare buoys for relief, and to supply losses	10
Tender (steam) <i>Shubrick</i> , common to Twelfth and Thirteenth Districts	1

The numbers preceding the names of the stations correspond with those of the Light-house List of January, 1871.

407. *Yaquina Bay*, Oregon.—The Light-house at this point was commenced May 1, 1871, and will be completed about September 30, 1871.

408. *Cape Foulweather*, sea-coast of Oregon.—For the erection of a first-class sea-coast Light at or near this point there was appropriated at the last session of Congress \$90,000. It is proposed to erect a brick tower eighty feet from the ground to the focal plane, giving the focal plane a height of about one hundred and fifty feet above the sea level. The plans have been completed; work was commenced about September 1, and will be completed during the present fiscal year.

409. *Cape Disappointment*, mouth of Columbia River, Washington Territory.—A new dwelling for light-keepers has been commenced, and will be completed during the present season.

411. *Cape Flattery*, entrance to Puget Sound, Washington Territory.—A first-class steam Fog-signal has been commenced, and will be completed at this station before December next.

The following are the names of Light-stations in this district not mentioned elsewhere:

405. *Cape Blanco*, sea-coast of Oregon.

406. *Cape Arago*, (*Gregory*), sea-coast of Oregon.

410. *Shoalwater Bay*, Washington Territory.

412. *Ediz Hook*.

413. *New Dungeness*.

414. *Smith's (or Blunt's) Island*.

415. *Admiralty Head*.

All of which is very respectfully submitted.

W. B. SHUBRICK,

Rear-Admiral U. S. Navy, Chairman.

THORNTON A. JENKINS,

Rear-Admiral, U. S. Navy, Naval Secretary.

GEORGE H. ELLIOT,

Major Corps of Engineers, U. S. A., Engineer Secretary.

Hon. GEORGE S. BOUTWELL,

Secretary of the Treasury.

TABLES ACCOMPANYING THE REPORT.

A.—Statement of the net receipts (by warrants) for the fiscal year ending June 30, 1871.....	3
B.—Statement of the net expenditures (by warrants) for the fiscal year ending June 30, 1871.....	4, 5
C.—Statement of the redemption and issue of loans and treasury notes (by warrants) for the fiscal year ending June 30, 1871.....	6, 7
D.—Statement of net expenditures (by warrants) under direction of the customs service, for the fiscal year ending June 30, 1871.....	8
E.—Statement of net expenditures (by warrants) on account of internal revenue, for the fiscal year ending June 30, 1871.....	9
F.—Statement of the net receipts (by warrants) for the quarter ending September 30, 1871.....	9
G.—Statement of the net expenditures (by warrants) for the quarter ending September 30, 1871.....	9
H.—Statement of the redemption and issue of loans and treasury notes (by warrants) for the quarter ending September 30, 1871.....	10
I.—Statement of the principal of the public debt (balances) on the 1st of January for each year from 1837 to 1843, and on the first day of July of each year from 1843 to 1871.....	11
K.—Statement of outstanding principal of the public debt of the United States on the 1st of January of each year from 1791 to 1842, inclusive..	12
L.—Statement of outstanding principal of the public debt of the United States on the 1st of July of each year from 1843 to 1871, inclusive.....	13
M.—Statement of the receipts of the United States from March 4, 1789, to June 30, 1871, by calendar years to 1843, and by fiscal years (ending June 30) from that time.....	14, 15, 16, 17
N.—Statement of the expenditures of the United States from March 4, 1789, to June 30, 1871, by calendar years to 1843, and by fiscal years (ending June 30) from that time.....	18, 19
O.—Statement of purchases of bonds from May, 1869, to September 30, 1871, showing the cost of currency and gold, the average cost in currency and gold of each purchase, and the average cost of all purchases made prior to the end of each month.....	21, 22, 23, 24, 25
P.—Statement of the public debt of the United States June 30, 1871.....	26-37
Q.—Statement of 30-year 6 per cent. bonds (interest payable January and July) issued to the several Pacific Railway companies, under the acts of July 1, 1862, (12 Statutes, 492), and July 2, 1864, (13 Statutes, 359).....	38, 39, 40, 41
R.—Returns, by award of the United States Court of Claims, of proceeds of property seized as captured or abandoned, under the act of March 12, 1863, paid from July 1, 1870, to June 30, 1871.....	42
S.—Awards of the United States Court of Claims of proceeds of property seized as captured or abandoned, under act of March 12, 1863, decreed but not paid during the fiscal year ending June 30, 1871.....	43

II. REPORTS OF TREASURY OFFICERS:

COMMISSIONER OF INTERNAL REVENUE.

Amendment of section 44, act of July 20, 1868, recommended	59
Amendment of section 63, act of July 13, 1866, recommended	60
Cigars, cheroots, &c., total number of, returned for tax during year	52
Collectors, late, number of accounts of, closed prior and subsequent to April, 1870	60
Collectors, late, number of accounts of, in hands of U. S. attorneys for suit	60
Delano, Hon. C., how long Commissioner during fiscal year 1871	47
Distilleries, distribution of, among States and Territories	49
Distilleries, number of, operated during year	48
Distilleries, number of, registered during year	48
Distilleries, surveys of	50
Douglass, Hon. J. W., how long acting Commissioner during fiscal year 1871	47
Drawback allowed, amount of, during fiscal year 1871	48
Drawback allowed, why more than during previous fiscal year	48
Exportation, disadvantages of other systems of	56
Export bonded warehouses, abolition of present system of, recommended	55
Export bonded warehouses, advantages gained by abolishing present sys- tem of	56
Export bonded warehouses, in United States, number of	54
Export bonded warehouses, practical operation of present system of	55
Fermented liquors, amount of revenue derived from, from 1866 to 1871	50
Fermented liquors, increase in revenue from, for 1871, reasons for	50, 51
Gauging-instruments, accuracy of, how secured	50
Gauging-instruments adopted for determining capacity of casks	50
Legislation as to disposition of lands owned by United States under direct tax laws, recommended	60
Legislation as to tobacco lost at sea, recommended	56
Legislation as to sale of leaf-tobacco to consumers, recommended	54
Legislation for re-stamping spirits in certain cases without additional expense to tax-payer, recommended	59
Legislation for stamping condemned, forfeited, and abandoned tobacco, recommended	58, 59
Legislation to exempt from tax certain articles under Schedule C, recom- mended	58
Limitation of time to six years during which action may be brought for recovery of refunding claims, recommended	59
Limitation of time to two years during which claims for refunding may be considered, recommended	59
Peddlers, instrumental in evading tax on tobacco	53
Peddlers, legislation as to, recommended	53, 54
Pleasanton, Hon. A., how long Commissioner during fiscal year 1871	47
Receipts, aggregate, estimate of, for fiscal year 1872	48
Receipts, aggregate, statement of, for fiscal year 1871	48
Refunding, amount of, during year	48
Refunding, amount of, why more than during previous fiscal year	48
Refunding claims, legislation relating to, recommended	59
Sales under section 63, act of July 13, 1866, statement of proceeds from	58
Ship-builders, taxes assessed on, under section 4, act of March 31, 1868, order issued for collecting	59
Spirit-meters, Tice's, order for discontinuing, when issued	50
Spirits, amount of revenue derived from, during year	49, 50
Spirits, bonded and withdrawn from bond, quantity of, during year	49
