REPORT.

TREASURY DEPARTMENT,

Washington, D. C., December 5, 1881.

SIR: I have the honor to submit the following report:

The ordinary revenues from all sources for the f	iscal year	ended
June 30, 1881, were—		
From customs	\$198, 159, 6	676 02
From internal revenue	135, 264, 3	$385 \ 51$
From sales of public lands	2, 201, 8	363 17
From tax on circulation and deposits of national		
banks	8, 116, 1	115 72
From repayment of interest by Pacific Railway Com-	0100	22 00
panies		833 80
From customs' fees, fines, penalties, &c	1,225,5	.80 54
From fees—consular, letters-patent, and lands	2,244,9	183 98
From proceeds of sales of Government property	262 1	74 00
From profits on coinage	3,468,4	
From revenues of the District of Columbia	2, 016, 1	99 23
From miscellaneous sources	6, 206, 8	80 13
Total ordinary receipts	360, 782, 2	292 57
The ordinary expenditures for the same period wer	e— .	,
For civil expenses	\$17,941,1	77 19
For foreign intercourse	1,093,9	54 92
For Indians	6,514,1	
For pensions	50, 059, 2	$279 \ 62$
For the military establishment, including river and	,	
harbor improvements, and arsenals	40, 466, 4	60 55
For the naval establishment, including vessels, ma-		
chinery, and improvements at navy-yards	15, 686, 6	671 66
For miscellaneous expenditures, including public		
buildings, light-houses, and collecting the revenue	41 , 837, 2	80 57
For expenditures on account of the District of Co-	0.740.0	
lumbia	3,543,9	112 03
For interest on the public debt,	82, 508, 7	41 18
For premium on bonds purchased	1,061,2	48 (8
Total ordinary expenditures	260, 712, 8	887 59
Leaving a surplus revenue of	\$100,069.4	04 98
* Which was applied as follows:	*,, -	
-		
To the redemption of—		
Bonds for the sinking-fund	74,371,2	00 00
Fractional currency for the sinking-fund	109,0	$01 \ 05$
Loan of February, 1861	7,418,0	00 00

Ten-forties of 1864	\$2,016,150 00
Five-twenties of 1862	18,300 00
Five-twenties of 1864	3,400 00
Five-twenties of 1865	37, 300 00
Consols of 1865	143, 150 00
Consols of 1867	959, 150, 00
Consols of 1868	
Texan indemnity stock	
Old demand, compound-interest, and other notes	18,330 00
And to the increase of cash in the Treasury	14, 637, 023 93
-	
	100, 069, 404 98

The requirements of the sinking-fund for the last fiscal year, including a balance of \$49,817,128.78, not provided for up to the close of the previous year, amounted to \$90,786,064.02. There was applied thereto from the redemption of bonds and fractional currency, as shown in the above statement, the sum of \$74,480,201.05, leaving a deficit of \$16,305,873.47. It is estimated that the requirements of the fund for the present fiscal year, including the balance from last year, will amount to \$59,634,856.50. The amount of bonds redeemed during the months of July, August, September, and October of the present year is in excess of the requirements of the sinking-fund for the entire year by the sum of \$6,176,593.50. The surplus revenues, however, which may hereafter accrue during the year, will be applied to the purchase or redemption of the public debt, as contemplated in section 2 of the act approved March 3, 1881, (21 Stats., p. 457.)

Compared with the previous fiscal year, the receipts for 1881 have increased \$29,352,901.10, in the following items: In customs revenue, \$11,637,611.42; in internal revenue, \$11,255,011.59; in sales of public lands, \$1,185,356.57; in tax on circulation and deposits of national banks, \$1,101,144.28; in proceeds of sales of Indian lands, \$1,055,202.40; in deposits by individuals for surveying public lands, \$1,329,588.85; in fees on letters-patent, \$50,415.84; in profits on coinage, \$676,298.83; in revenues of the District of Columbia, \$206,729.53; and in miscellaneous items, \$855,541.79. There was a decrease of \$2,097,219.51, as follows: In repayment of interest by Pacific Railway Companies, \$896,533.38; in interest and premium on Indian trust-fund stocks, \$631,595.76; in registers' and receivers' fees, \$154,798.29; and in unenumerated items, \$414,292.08; making a net increase in the receipts, from all sources, of \$27,255,681.59.

The expenditures show a decrease over the previous year of \$21,700,800.39, as follows: In the Interior Department, (pensions,) \$6,717,894.82; in premium on bonds purchased, \$1,734,071.64; and in

the interest on public debt, \$13,248,833.93. There was an increase of \$14,770,730.20, as follows: In the War Department, \$2,349,544.33; in the Navy Department, \$2,149,686.92; in the Interior Department, (Indians,) \$568,704; and in the civil and miscellaneous, \$9,702,794.95—making a net decrease in the expenditures of \$6,930,070.19.

FISCAL YEAR 1882.

For the present fiscal year the revenue, actual and estimated, is as follows:

The estimates of this Department are submitted as made up by the officers in charge of the public duties to which they respectively pertain, and while exceeding those of last year by the sum of \$1,699,332.69, they are in excess of the appropriations made for the Department at the last session of Congress only to the extent of \$608.55.

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the offices of the United States Treasurer, nine assistant treasurers, one depositary, and one hundred and thirty-two nationalbank depositaries. The receipts of the Government, amounting during the fiscal year as shown by warrants, to \$474,532,826.57, were deposited as follows:

The quarterly examinations of independent treasury offices required by law have been duly made, and in addition thereto the offices have been subjected to special examinations by officers of this Department. As far as known there have been no losses to the Government by public officers engaged either in the receipt, safe-keeping, or disburse ment of the public moneys.

By act of Congress, approved March 3, 1857, public disbursing officers were required to place all funds intrusted to them for disbursement, on deposit with a public depositary, and to draw for them only in favor of the persons to whom payment was to be made. The provisions of this law remained unchanged until the act of June 14, 1866, reproduced as section 3620, Revised Statutes, was passed, removing the restrictions as to the method of drawing checks. By an act approved February 27, 1877, that section was so amended as to reenact the provisions of the act of March 3, 1857, concerning disbursing officers' checks, which the Department had found impracticable to enforce. The attention of Congress has been called to this matter in the annual reports of the Secretary for years 1857, 1858, and 1878, fully explaining the impracticability of enforcing the law according to the letter as it now stands, and it is recommended that it be so amended - that payment may be made and checks drawn under regulations prescribed by the Secretary of the Treasury.

NATIONAL BANKS.

The report of the Comptroller of the Currency contains full information in reference to the affairs of the national banks. It shows that on October 1 of the present year there were a greater number of banks in operation than at any previous time, the number being 2,132. Their returns show that they had on that day an aggregate capital of \$463,821,985; surplus, \$128,140,617; individual deposits, \$1,070,997,531; loans, \$1,169,022,303; and specie, \$114,334,736. The aggregate circulation, \$360,344,250, as well as the amount of loans and individual deposits, was much larger than at any time since the organization of the system.

The corporate existence of 396 banks will expire previously to February 25, 1883. The Comptroller recommends that an act be passed authorizing any national bank, at any time within two years prior to the

expiration of its corporate existence, to extend its period of succession by amending its articles of association by the votes of shareholders owning two-thirds of the capital of the association, if such association, upon an examination of its affairs, shall be found to be in a satisfactory condition. The law provides that the Comptroller shall issue his certificate authorizing any banking association to commence business, if it shall conform in all respects to the legal requirements. The banks may, therefore, under the present law, continue their existence, and, in the absence of prohibitory legislation, many of them undoubtedly will, on the expiration of their corporate existence, organize new associations, and obtain from the Comptroller authority to continue business. The passage, however, of an act directly authorizing an extension of the corporate existence of the banks, would in many instances save much labor, and avoid the distribution of the present large surplus fund among the shareholders, which would result from liquidation. The passage of a bill authorizing such a renewal of their charters is recommended.

The Comptroller gives official information in tabulated form of the proportion of coin, paper money, and checks used by the national banks, in their business, in each State and principal city. Returns have been obtained from the banks showing their total receipts upon two different The total receipts of 1,966 banks on June 30, last, were \$284,714,016, and of 2,132 banks on September 17, \$295,233,779. Upon this latter date the receipts were composed of \$4,078,044 in gold coin, \$500,302 in silver coin, and \$13,026,571 in paper money, the remainder, amounting to \$277,628,862, being in checks and drafts, including \$6,593,337 of clearing-house certificates. The proportion of papermoney and coin was 5.9 per cent., and of checks and drafts 94.1 per The receipts of 48 banks in the city of New York were \$165,000,000, and the total percentage of coin and paper money was 1.2 per cent. only, and of checks and drafts 98.8 per cent. The receipts of 237 banks in sixteen reserve cities, including New York, were \$243,115,594, and the proportion of checks and drafts was 96.7 per cent. The banks elsewhere reported receipts amounting to \$52,118,185, in which the proportion of checks and drafts was 81.7 per cent. These returns show how small an amount of money actually enters into large transactions, and how much its use has been superseded by the machinery of banking, with its modern system of checks, bills of exchange, and clearing-houses.

Full statistics are given in regard to the taxation of the banks, from which it seems that the amount of taxes paid, both by the National and State banks, to the Federal Government during the last year, has been greater than in any previous year, the total amount collected being \$8,493,552 from the former, and \$3,762,208 from the latter. The taxes collected by the States have also increased, and the amounts assessed are alleged to be disproportioned to the amount collected upon other moneyed capital. In another part of this report suggestion is made as to a reduction of the taxes upon these institutions. United States five and six per cent. bonds, amounting to \$245,601,050, held by the national banks, have been extended with interest at 3½ per cent., and it is estimated that the net interest at the current market value, upon all the bonds held by them, does not exceed that rate.

RESERVE.

Previously to the resumption of specie-payments, a reserve was accumulated in the Treasury by the sale of \$95,500,000 of bonds, and by the retention of an additional amount of about \$40,000,000 from surplus revenues. The policy pursued by this Department, as repeatedly announced to Congress, has been to retain as reserve for the redemption of United States notes, about 40 per cent. of the notes outstanding, and in addition thereto to have sufficient money in the Treasury to meet all other demand obligations outstanding. policy has been adhered to as rigidly as practicable. The reserve has never fallen below 36 per cent., nor been above 45 per cent. of outstanding notes. The silver certificates issued are payable only in silver coin, and the gold received for these certificates is now available for resumption purposes. There is now in the Treasurer's cash about \$25,000,000 of fractional silver coin having only a limited legal-tender value, and not available for resumption purposes. The remainder of this reserve consists chiefly of gold coin. It is generally conceded that, for safe banking, a reserve of 40 per cent. to meet current obligations is necessary. The Government, by the issue of its notes, payable on demand, and its obligation to meet them when presented, is in a position analogous to that of banking, and should therefore act upon principles found to be sound and safe in that business.

SILVER CERTIFICATES.

The Department has issued silver certificates at the several subtreasury offices, upon a deposit of gold coin in like amount with the assistant treasurer at New York, and through this means certificates have been issued for nearly all the silver held by the Treasury. These certificates amount to about \$66,000,000, and are now outstanding.

About \$34,000,000 of silver dollars are now in circulation. The total result of this silver coinage is to increase the currency of the country to the extent of about \$100,000,000, and to require the Treasurer of the United States to hold the silver coin in which the certificates are payable. On November 1, 1881, the Department held in its cash about \$7,000,000 of the certificates, and about \$250,000 of the coin for which certificates had not been issued.

The act of February 28, 1878, requiring the issue of silver certificates upon the deposit of standard silver dollars was a part of the policy of the Government to maintain the standard of the silver dollar at or near the value of the standard gold dollar. The same act provided that such certificates should be receivable "for customs, taxes, and all public dues."

The liberal purchase of bullion and coinage of silver dollars by this Government, and the receipt of them by it for public dues, has failed to raise the price of silver bullion to any great extent in the markets of the world.

As is said elsewhere herein, the circulation of some sixty-six millions of silver certificates seems an inexpedient addition to the paper currency. They are made a legal tender for the purposes named, yet have for their basis about eighty-eight per cent. only of their nominal value. There is no promise from the Government to make good the difference between their actual and nominal value.

There need be no apprehension of a too limited paper circulation. The national banks are ready to issue their notes in such quantity as the laws of trade demand, and as security therefor the Government will hold an equivalent in its own bonds.

The embarrassments which are certain to follow from the endeavor to maintain several standards of value, in the form of paper currency, are too obvious to need discussion.

It is recommended, therefore, that measures be taken for a repeal of the act requiring the issue of such certificates, and the early retirement of them from circulation.

GOLD CERTIFICATES.

Immediately preceding resumption, the issue of certificates upon deposits of gold was discontinued. It was feared that parties might present legal-tender notes based upon a 40 per cent. reserve, obtain the gold therefor, and immediately deposit it for the certificates for which, by law, the Department was required to hold 100 per cent. Though often requested, the Department has ever since refused to

make any further issue of these certificates. By consent of the Comptroller of the Currency, these certificates are allowed to form a part of the lawful reserve of national banks, much of which reserve is now in gold coin. Should the certificates be issued, they would at once take the place of this coin, and the Treasury would hold the coin instead of the banks. In view of any possible demand for the redemption in coin of legal-tender notes, the issue of these certificates is very objectionable.

RETIREMENT OF NATIONAL BANK NOTES.

Under existing law, any national bank can at any time, upon a deposit of legal-tender notes or coin with the Treasurer of the United States, withdraw the bonds held as security therefor, and leave the Treasury to redeem an equal amount of its notes. This privilege was given to the banks, evidently for the purpose of securing a proper elasticity of the currency; and in view of the rapid payment of the public debt, it would seem that this privilege is necessary for the purpose of facilitating the redemption of bonds held by the banks; but should many of the banks, through apprehension of adverse legislation, or from any other cause, desire to retire their circulation, the deposit of such an amount of money with the Treasurer might cause a serious and sudden contraction of the currency and grave embarrassments in business. That the apprehension of such action is not groundless is shown by what took place on the passage of the three per cent. refunding bill by Congress at its last session. If it is thought advisable Congress can enact that national banks be prohibited from retiring their currency, except on a previous notice of intention so to do; the length of that notice to be fixed by law.

LEGAL-TENDER NOTES.

This Department has little to add to what has been said in former reports from it on the subject of the notes known as legal-tender notes. That they are convenient and safe for the community is without doubt. That it is for the profit of the Government to continue them is also without doubt. Yet there is one consideration that should have notice, and that is, whether the Government can continue to claim for them the quality of being a legal-tender for debts. This Department understands that the constitutionality of making them a solvent of contracts was found in the exigencies of the Government raised by the civil war. Whether now, that that war has sometime since ceased, and the Government has resumed payment of its debts in gold and silver coin, notes of the United States shall be maintained as currency with the legal-tender quality, is a question worthy of attention.

FRACTIONAL PAPER CURRENCY.

Of the \$15,000,000 of fractional paper currency outstanding, only about \$80,000 has been redeemed this year, and this amount is likely to grow less each succeeding year. It is suggested that Congress authorize the Department to drop this amount from any statement of public debt hereafter issued, and make a permanent appropriation for the redemption of such small amount of notes as may hereafter be presented. In this connection, attention is called to the fact that of the public debt that matured before the year 1860, there remains outstanding and unpaid the sum of about \$100,000. It is suggested that authority may well be given to treat this amount in the same manner.

PAYMENT OF UNITED STATES BONDS IN GOLD.

The gold dollar at the standard weight of 25.8 grains is by law the unit of value, while the standard silver dollar by this standard is now worth about eighty-eight cents.

Although the act of July 14, 1870, provides for the issue of United States bonds, "redeemable in coin of the present standard value," whereby were included both gold and silver coin of that value, yet as by the act of February 12, 1873, the further coinage of silver dollars was prohibited, and the Revised Statutes declared gold coin only to be legal tender for sums exceeding five dollars, equity, if not strict construction of law, requires that the holders of such bonds should receive payment thereof in gold or its equivalent.

By act of February 28, 1878, silver dollars of the standard weight and fineness were again made a legal tender at the nominal value for all debts and dues, public and private, except where otherwise expressly stipulated in the contract.

Between the adoption of the Revised Statutes, June 22, 1874, and 1878, silver coin was not a tender in payment of United States bonds, and it might fairly be regarded, especially by foreign holders who had acquired bonds during this interval, as a breach of faith, if bond-creditors were compelled to receive payment in a coin worth in the markets of the world but eighty-eight per cent. of our own standard of value.

This Government is abundantly able to discharge all its obligations at home and abroad in money which is everywhere accepted as a true standard of value.

STANDARD SILVER DOLLARS.

As required by the act of February 28, 1878, the Department has caused to be coined into standard silver dollars each month, at least \$2,000,000 in value of bullion of that metal.

Constant efforts have been made to give circulation to this coin, the expense of transferring it to all points where it was called for having been paid by the Government.

Only about thirty-four millions are now in circulation, leaving more than sixty-six millions in the vaults, and there is no apparent reason why its circulation should rapidly increase.

The silver question is involved in some embarrassments. tary conference, to which a commission was sent the past year, after elaborate discussion, reached no conclusion, except to adjourn to meet again for a further discussion next April. Whether a renewal at the present time of the consideration of the subject by it is likely to lead to any practical or acceptable results, seems doubtful. That most of the European nations have a deep interest in a proper adjustment of the ratio between gold and silver coinage, if not deeper than the United States, admits of no doubt. We furnish the world with the largest portion of both gold and silver, and our exports command the best money of the world, as they ever should do and will, unless we bind ourselves to accept of a poorer. We need not appear anywhere as supplicants when we clearly may be the controllers. the European nations, whose concurrent action is necessary to any result that is sought, do not yet appear ready to accept bi-metalism, and when ready they may ask for a ratio that it will be inconvenient for us to adopt, and reduce the ratio of silver below the standard of our coinage, while the market or intrinsic value of silver indicates the propriety of a considerably increased ratio. That an agreement of the principal nations of Europe with us, for the larger use of silver coinage would furnish a larger market for silver, and to that extent increase its value, is certain, but the excess of it over the supply for that purpose would only command the price of a commodity on the market. Therefore, the fixing of any ratio is a matter of extreme delicacy to be fully considered.

The most potential means of bringing about any concert of action among different nations, would appear to be for the United States to suspend, for the present, the further coinage of silver dollars. This is the decided opinion, in both France and America, of the highest authorities on bi-metalism, and of those who wish to bring silver into general use and raise its value; and it is believed that a cessation of coinage would, at a very early day, bring about a satisfactory consideration of the whole subject among the chief commercial nations.

The silver question, obviously, is one that demands the early attention of our law-makers, or the subject may drift beyond our control

unless control is retained at a great sacrifice. A continuance of the monthly addition to our silver coinage will soon leave us no choice but that of an exclusive silver coinage, and tend to reduce us to a place in the commercial world among the minor and less civilized nations.

It may be assumed that a people as enterprising and progressive as that of the United States, holding a leading position among nations, will not consent to the total abandonment of the use of gold as one of the metals to be employed as money, and we cannot consent to be placed in the very awkward position of paying for all that we buy abroad upon a gold standard, and selling all that we have to sell on a silver standard.

It is, therefore, recommended that the provision for the coinage of a fixed amount each month be repealed, and the Secretary be authorized to coin only so much as will be necessary to supply the demand.

The effect of storing large amounts of silver coin in the Treasury vaults, with the present law requiring the issue of silver certificates, is to furnish a paper currency not payable in gold or its equivalent. This policy is open to most of the objections that can be urged against the increase of United States notes or of gold certificates, and to the additional objection that it furnishes a currency depreciated, from the very nature of the basis on which it rests—that is, silver coin of a debased value as compared with gold coin.

There is no objection to supplying fully a demand for silver dollars for actual use at home and in some few foreign markets, but so long as generally, in the markets of the world, they are of less value than the gold dollar, which is our legal standard of value, they must be regarded as subsidiary coin. It is believed that the amount in circulation will be steadily increased, but not so fast as to require, for some months, or perhaps years, any addition to the amount already coined.

In answer to inquiry, it is well to say that what are the profits on the coinage is shown from year to year by the report of the Register of the Treasury. The receipt of them into the Treasury is acknowledged in the item of miscellaneous receipts, and they are put to the same uses as any other receipts into the Treasury, that is, to the payment of the expenses or debts of Government.

CUSTOMS.

The revenue from customs for the past fiscal year was \$198,159,676.02, an increase of \$11,637,611.42 over that of the preceding year.

Of the amount collected, \$138,908,562.39 was collected at the port of New York, leaving \$59,251,113.63 as the amount collected at all the other ports of the country.

Of the total amount, \$47,977,137.63 was collected on sugar, melado, and molasses; \$27,285,624.78 on wool and its manufactures; \$21,462,534.34 on iron and steel, and manufactures thereof; \$19,038,665.81 on manufactures of silk; \$10,825,115.21 on manufactures of cotton; and \$6,469,643.04 on wines and spirits; making a total revenue from the articles specified, of \$133,058,720.81.

The expenses of collection for the past year were \$6,419,345.20, an increase over the preceding year of \$387,410.04. While there was an increase in the revenue from customs over the preceding year of over eleven and a half millions of dollars, the gross value of the imports, including free goods, decreased over twenty-five millions of dollars. The most marked decrease was in the value of unmanufactured wool, \$14,023,682, and in that of scrap and pig-iron, \$12,810,671. There was, on the other hand, an increase in the value of sugar imported, of \$7,427,474; on steel-rails, of \$4,345,521; on barley, \$2,154,204; and on steel in ingots, bars, &c., \$1,620,046.

The exports, as contrasted with the imports during the last fiscal year, (1881,) are as follows:

Exports of domestic merchandise	\$883, 925, 947 18, 451, 399
Total Imports of merchandise	902, 377, 346 642, 664, 628
Excess of exports over imports of merchandise Aggregate of exports and imports	259, 712, 718 1, 545, 041, 974

Compared with the previous year, there was an increase of \$66,738,688 in the value of exports of merchandise, and a decrease of \$25,290,118 in the value of imports. The annual average of the excess of imports of merchandise over exports thereof, for ten years previous to June 30, 1873, was \$104,706,922; but for the last six years there has been an excess of exports over imports of merchandise amounting to \$1,180,668,105—an annual average of \$196,778,017. The specie value of the exports of domestic merchandise has increased from \$376,616,473 in 1870, to \$883,925,947 in 1881, an increase of \$507,309,474, or 135 per cent. The imports of merchandise have increased from \$435,958,408 in 1870, to \$642,664,628 in 1881, an increase of \$206,706,220, or 47 per cent.

During each year from 1862 to 1879, inclusive, the exports of specie exceeded the imports thereof. The largest excess of such exports over imports was reached during the year 1864, when it amounted to \$92,280,929. But during the year ended June 30, 1880, the imports of coin and bul-

lion exceeded the exports thereof by \$75,891,391; and during the last fiscal year the excess of imports over exports was \$91,168,650.

A revision of the tariff seems necessary to meet the condition of many branches of trade. That condition has materially changed since the enactment of the tariff of 1864, which formed the basis of the present tariff as to most of the articles imported. The specific duties imposed by that act, for instance, on iron and steel in their various forms, had then a proper relation to the ad valorem duties imposed on the articles manufactured from those metals; but by a large reduction in the values, especially of the cruder forms of iron and steel, the specific duty imposed thereon now amounts, in many cases, to an ad valorem duty of over 100 per cent.; while the ad valorem duties on manufactured articles have not been changed. The growing demands of trade have led, also, to the importation of iron and steel in forms and under designations not enumerated in the tariff, and the great disproportion between the specific and ad valorem duties is a constant stimulus to importers to try to bring the merchandise under the ad valorem rate. This produces uncertainty, appeals from the action of collectors, and litigation, which prove embarrassing to business interests as well as to the Government; and what is instanced as the case with iron and steel will be found to be the case with other articles. An equalization of the tariff, and a simplification of some of its details, are needed. How far such revision shall involve a reduction of the tariff is a question for Congress to decide.

In what manner that revision shall be initiated is also within the province of Congress to determine. The method of a commission which has been proposed has some features that commend it. A commission made up of leading representatives of the manufactures, agriculture, and commerce of the country-experts in the subject matters dealt with by a tariff—sitting as a board without hampering formalities, and intent upon one subject to the consideration of which the members would bring requisite and ready knowledge and experience, should be able to frame a tariff law that would equalize its burdens and its benefits, and give a reasonable degree of satisfaction to the varied interests affected by it. It is sometimes objected that to wait, for the passage of a law creating a commission, and for the organization of it, and for the result of its deliberations, would delay the action of Congress too long. It is to be considered whether there might not be such limitations of time put upon the life of the commission as would preclude such a result. It is conceded that the interests that a tariff affects are so numerous and so diverse that extensive and

minute knowledge is needed to treat the subject fairly and comprehensively. Is it not, therefore, worthy of consideration whether the country cannot afford the proper length of time for a skilful, judicious, and complete framing of a bill? Should exigencies exist or arise calling for immediate legislation upon particular matters, they could be treated specifically for the time, while awaiting the complete and comprehensive system.

Attention is invited to the report of this Department for 1880, in regard to a repeal of the discriminating duties imposed by section 2501 of the Revised Statutes, especially on tea and coffee produced in the possessions of the Netherlands, and the recommendation therein contained is renewed.

REDUCTION OF TAXES.

It is a matter of gratulation that the business of the country so thrives as to endure the onerous taxation that is upon it, and yet grow in volume, and apparently in profits, and yield to the Government a surplus over its needs. The result upon the public revenue is to embarrass this Department in disposing of the surplus in lawful way, and with regard to economy. While it is asserted that there is stringency in the money market, and that the business community is in straits, the call of this Department for millions of bonds is slowly heeded, and its offer to purchase bonds is not in full accepted. another way in which to dispose of the surplus, namely, to enter the markets and buy bonds at the current rates. Calculations of experts show that, at the premium that now rules upon the four and four-anda half per cent. bonds, this could not be done without a loss to the Treasury, which it is of doubtful propriety to make. And it is almost certain that an announcement of a purpose so to do would enhance the market value of those bonds. Meanwhile the daily receipts from the community by the Treasury continue, the surplus over its needs increases, and money lies idle. It seems that the plan most just, for giving relief, is to reduce taxation, and thereby diminish receipts and surplus.

The rapid reduction of the public debt and the increase of the surplus in the Treasury present the question to Congress whether there should not be a reduction in the taxation now put upon the people. It is estimated that, if the present ratio of receipt and expenditure is kept up, the public debt, now existing, may be paid in the next ten years. In view of the large sum that has been paid by the present generation upon that debt, and of the heavy taxation that now bears upon the industries and business of the country, it seems just and proper that another generation

should meet a portion of the debt, and that the burdens now laid upon the country should be lightened. It is to be considered, too, whether the seeming affluence of the Treasury does not provoke to expenditure larger in amount than a wise economy would permit, and upon objects that would not meet with favor in a pinched or moderate condition of the Federal Exchequer. In some quarters there is already talk of an overflowing Treasury, and projects are put forth for lavish expenditure, not only to the furtherance of public works of doubtful legitimacy and expediency, but in aid of enterprises no more than quasi public in character. Can a Government be justly said to have an overflowing Treasury when there is an outstanding debt against it greater than it could pay if lawfully presented, and when its means of payment in the future must be taken from its denizens by burdensome taxation? is it a beneficial exercise of governmental power to raise money by taxation in greater sums than the lawful demands upon the Government require, when those demands are of themselves a heavy burden upon the industry and business of the country?

Other considerations have been presented; such as that if the public debt be fully paid and all Government bonds retired, the best and safest basis for the national-bank system will be gone, and that a desirable mode of investment for savings banks, trust companies, and fiduciary representatives will be taken away, and that the return of the large sums paid to the holders of bonds, to seek reinvestment through other channels, will disturb the business of the country. It is doubtful whether, in a government like ours, not designed for a paternal one, these will be held as sufficient reasons for keeping on foot a large public debt, requiring for the management of it, and for the collection of the revenue to meet the interest upon it, many officials and large expense.

It is proper to say that there is a formidable matter to be weighed on the other hand. The Commissioner of Pensions, it is understood, makes known the need of large sums to meet the arrearages of pensions on claims allowed and likely to be allowed by him. He puts the figures at \$235,000,000. Besides this, he has furnished to this Department an estimate, based upon the facts found in the records of his office, which gives these data:

Number of	claims	filed to November 1, 1881	789, 063
Number of	claims	admitted to November 1, 1881	265, 575

789,063

Number of claims pending entitled to beneats of arrea		
Number of claims pending NOT entitled to benefits of	f arrears	
acts		35, 596
Number of old war claims (not entitled) pending		1,631
Number of 1812 war claims (not entitled) pending.		
71		

265, 575

He estimates that the average value on the first day of January, 1884, of each claimed allowed out of the class of 227,040, above shown, will be \$1,350, and that the probable allowances out of that class will be 193,000.

This Department is not aware of any other matter that will materially increase the needful expenditures of the Government.

It is, then, for Congress to determine whether there shall be a reduction of the revenues derived from taxation. If it shall, it will be important to know how it may be effected. A statement of the receipts from internal revenue shows them to be \$135,264,385.51 for the year that ended June 30, 1881, and that was in excess of the preceding year by \$11,255,011.59; a large part of this was from spirits, tobacco, and fermented liquors. The tax on those articles is a tax on appetite or indulgences, legitimate subjects of taxation when taxation is need-A reduction of that tax is not recommended. Other objects from which internal revenue is derived are the stamps on bank-checks and matches. The former is a tax on business, somewhat irritating and hampering in its nature. The latter is a tax on an article of hourly and necessary consumption by all classes. It is urged by some that the abolition of the stamp-tax on matches would not reduce the price of the article to the consumer. That contention does not seem well founded, when the cost of the stamp is in so large a ratio to the cost of the article stamped, and when the economy of purchasing stamps in large quantities gives to capital an advantage in the manufacture of the article. There is also the duty derived from proprietary stamps. An abolition of the revenue from these three sources would be an equal lessening of burdens. The tax on the deposits in national banks and upon their capital, in the judgment of the Department, may, with propriety and justice, be lessened, if not entirely removed, whenever it is determined that the public revenue exceeds the public needs The tax on circulation is different in its nature. It is a tax on a franchise of profit to the favored grantee, and upon a subject, in the furnishing of which to the national banks, the Government is at an There seems to be a reason that, while taxation is the means of meeting governmental expenses, this tax should not be among the

first to be taken off. There are other minor sources of internal revenue that might be given up, keeping that from spirits, fermented liquors, and tobacco.

The other source of revenue where a reduction may be made is the customs. It already appears that the revenue from customs for the year ended June 30, 1881, was \$198,159,676.02, being an increase of \$11,637,611.42 over the preceding year.

While it is a principle that taxation for the expenses of Government, to be just, should bear on all alike and equally, it must also be one that when the aggregate of taxation is to be lessened, the reduction should be made in such ways that all will be relieved alike and equally. Hence, it is assumed that if Congress does determine on a decrease of the revenue, it will seek that end, as well through a revision of the existing tariff laws as through an abolition or abatement of the internal revenue. This Department does not venture, at this time, to point out wherein the wisdom of Congress may find places in the tariff laws for its exercise in revision and reduction. In another part of this report somewhat is said upon the mode of making a revision of those laws. If the mode of a commission to experts should be adopted, and delay in the final adoption of a revised tariff law should be anticipated, it may be well for Congress to consider what is to be done in the meantime with the surplus revenue that is likely to accrue unless prevented by the payment of arrearages of pensions.

TRIAL OF CUSTOMS CASES.

On the 1st of July, 1881, 2,376 suits against collectors of customs, nearly all for the refund of customs duties, were pending in the United States courts of New York. The delay in the trial of these cases heightens the expense of the litigation, and puts off the final determination of the rights in controversy, and also increases the number of the suits that are brought. It sometimes happens that before a test case can be brought to trial and decided in the Supreme Court, importers are compelled to commence hundreds of suits in order to preserve their rights. If these cases are put up on the calendar, it is done at the expense and inconvenience of private litigants. The only remedy appears to be the establishment of a new tribunal for the trial of customs cases, or their transfer to some existing tribunal like the Court of Claims. The Department has issued a circular to experts, asking their views as to the best mode of meeting this difficulty, and it may submit, in a special communication to Congress, some more definite views upon the subject.

CLAIMS.

The claims against the Government, presented to this Department, often involve important disputed questions of law or fact, which require for their correct decision the taking of depositions and the cross-examination of witnesses, and sometimes of the parties themselves. For this no provision is made by law. Authority from Congress to refer any such claims as the Secretary may think proper to the Court of Claims, would give to the claimants and to the Government a proper judicial trial and judgment; which would not only do justice to the parties but prevent re-examinations which are now urged upon every change of Departmental officers.

It is believed that a proper statute of limitations upon claims would promote the substantial ends of justice. The reasons for such a statute in the case of claims against the Government, such as the death of witnesses, and the loss of paper evidence, and the policy of putting an end to controversies, are obvious and too familiar to need more than a suggestion. On the other hand, in the prosecution of demands by the United States, great hardships to private parties are often occasioned. This is especially the case where those sued are sureties and there has been neglect and delay on the part of the governmental agents in adjusting accounts and making demand for alleged balances.

SUGAR.

The duties collected upon sugar, molasses, and melado during the past fiscal year amount to \$47,977,137, or nearly one-quarter of the whole amount of our revenues from customs. The difficulties attending the collection of these duties have largely occupied the attention of committees of Congress during several past sessions. The Dutch standard of color, as applied to the apparent color of imported sugars, is no longer a test of their saccharine strength or value for refining Imputing this fact to artificial coloring used for the purpose purposes. of affecting the rate of duties, this Department has claimed the right to look beyond the apparent color, and to classify the invoices according to the true color which they would show without that artificial The importers, claiming sometimes that their sugars are not in any sense artificially colored, and sometimes that they have the right to have them classified by their color, according to the Dutch standard, whether artificially colored before being imported or not, have brought many suits to recover duties alleged to have been illegally exacted. A test suit, recently tried in New York, is pending in the Supreme Court, and is expected to give some aid in the true construction of the, law upon the point whether the Department has a right to regard anything but the apparent color of the sugar at the time of importation. Whatever may be the decision of this question, the fact remains that, either by artificially coloring or by changes in the process of manufacturing, sugars of the highest saccharine strength and value have been for some years imported, which appear to be of the lowest grade of color, and are, therefore, claimed to be entitled to entry at the lowest rate of duties.

The amount in controversy in the suits referred to, claimed by the importers to have been overpaid upon sugars imported during the last fiscal year, by reason of classification above their apparent color, is \$708,810.99, while the amount of duties collected by the classification of sugars at the increased rate during the same year is \$1,857,324.10; so that the Government has gained during that time, by the higher classification of sugar, \$1,148,513.11, as to which there is no controversy.

The Dutch standard was adopted undoubtedly upon the theory that color substantially represented value, and the intention, no doubt, was to impose duties upon sugar substantially ad valorem. The attention of Congress is earnestly invited to the subject, so that while the producers of sugar in this country are fairly treated, importers may be relieved from the embarrassments attending the present method of classification.

INTERNAL REVENUE.

From the various sources of taxation under the internal-revenue laws, the receipts for the fiscal year ended June 30, 1881, were as follows:

From spirits From tobacco From fermented liquors From banks and bankers From adhesive stamps From penalties From collections not otherwise provided for	42, 854, 991 31 13, 700, 241 21 3, 762, 208 07 7, 375, 255 72
Total	135, 229, 912 30

The increase of the revenue from spirits during the last fiscal year was \$5,968,466.09; the increase from tobacco in its various forms of manufacture for the same period, \$3,984,851.23; the increase from fermented liquors was \$870,438.37; the increase of revenue from taxes on banks and bankers was \$411,222.79; the total increase of internal revenue from all sources was \$11,019,454.50.

CONTINUANCE OF SIX PER CENT. AND FIVE PER CENT. BONDS AT 34 PER CENT.

In the last annual report the attention of Congress was invited to a portion of the interest-bearing debt becoming redeemable on or before July 1, 1881, as follows:

Title of loan.	Rate.	Redeemable.	Amount.
Loan July and August, 1861	6 per cent.	June 30, 1881	\$145,786,500 57,787,250 469,651,050

Recommendation was made for authority to refund into Treasury notes or bonds bearing a lower rate of interest such portion of these bonds as should remain unredeemed at maturity.

Congress adjourned on the 3d of March, the bill for refunding these amounts having failed to become a law. On March 1 there remained outstanding of these bonds the following amounts:

Title of loan.	Rate.	Redeemable.	Amount.
Loan of July and August, 1861 Loan of 1863 Funded Loan of 1881	6 per cent.	June 30, 1881	\$144, 339, 900
	6 per cent.	June 30, 1881	57, 216, 100
	5 per cent.	May 1, 1881	469, 320, 650

Included in these amounts were \$29,479,300 of five per cent. bonds which had been purchased, or called for redemption but not matured, and \$5,887,950 of six per cent. bonds in process of redemption for the sinking-fund, leaving to be provided for, of the five per cent. bonds, \$439,841,350, and of the six per cent. bonds, \$196,378,600.

The financial condition of the Government at that time, and the policy pursued by my immediate predecessor in dealing with these bonds, are set forth in his letter of August 8, 1881, to the American Bankers' Association, as follows:

"It may be stated, however, that when I entered upon the duties of my present position, in March last, I found that of the bonded indebtedness of the Government there were of five per cent. bonds, redeemable at the option of the Government after May 1, 1881, the amount of \$469,320,650, of which the amount of \$146,101,900 was represented by coupon bonds; and of six per cent. bonds redeemable at the option of the Government after July 1, 1881, the amount of \$202,266,550, of which \$45,391,000 were represented by coupon bonds.

"Only the coupons for the quarterly interest falling due on May 1,

1881, remained upon the coupon five per cents, and none upon the coupon six per cents, the next semi-annual interest on which would fall

due on July 1, 1881.

"The refunding act, by which it was proposed to retire all of these bonds, and to issue therefor bonds bearing a lower rate of interest, with several years to run before the Government had the option of payment, after having received much consideration by Congress during the last session, had failed to become a law; and the only resources of the Government to meet the maturing obligations were the surplus revenues, and the amount of \$104,652,200 four per cent. bonds, being a part of those authorized by the acts of July 14, 1870, and January 20, 1871, and remaining unissued.

"These resources were not sufficient to provide for all the maturing bonds, and, owing to the length of time which such four per cent bonds had to run before maturity, it was not deemed advisable to issue more

of the loan, if such issue could well be avoided.

"While there was no imperative necessity for providing for the registered bonds of the maturing loans, some plan was needed to meet the interest payments on the coupon bonds, and there seemed to be no practicable method of meeting these payments without considerable expense to the Government, as well as to the holders of the bonds.

"Finally, to meet the demands of public creditors, and at the same time to avoid the calling of an extra session of Congress, which seemed to be the only other alternative, the plan was matured which has been

put into operation, and has proved successful.

"Under this plan, on April 11, there was called for absolute payment on July 1, 1881, the small loan of \$688,200, bearing 6 per cent. interest, and known as the Oregon-War Debt, and at the same time, for payment on the same date, the six per cent. loans, acts of July 17 and August 5, 1861, amounting to \$140,544,650, and act of March 3, 1863, amounting to \$55,145,750; but to the holders of the bonds of the two latter loans permission was given to have their bonds continued at the pleasure of the Government, with interest at the rate of 3½ per centum per annum, provided they should so request, and the bonds should be received by the Treasury for that purpose on or before the 10th day of May, 1881; and in case of coupon bonds, registered stock of the same loan should be issued therefor.

"The six per cent. bonds to be continued were promptly received in a large amount, and new registered ones issued therefor, with the fact of their continuance stamped upon their face; but it was subsequently deemed advisable to extend the time for the receipt of the old bonds

to May 20, 1881.

"It was also found that foreign holders of the six per cent. bonds were inclined to dispose of their investments rather than to send them to the Treasury for exchange; and the immediate payment of so many bonds abroad being likely to cause a drain of coin from this country, and to disturb business, an agency for the exchange of the bonds in London was established.

"This plan for continuing the sixes has proved entirely satisfactory, there having been presented in due time for continuance, at 3½ per cent. interest, the amount of \$178,055,150, leaving to be paid off from the surplus revenues \$24,211,400, for which the Treasury had ample

resources.

"Having succeeded in disposing of the six per cents, on May 12,

the Department gave notice that the coupon five per cent. bonds of the loan of July 14, 1870, and January 20, 1871, would be paid on August 12, 1881, with a like privilege of continuing the bonds at 3½ per cent. to such of the holders as might present them for that purpose on or before July 1, 1881; and at the same time the Treasury offered to receive, for continuance, in like manner, any of the uncalled registered bonds of that loan to an amount not exceeding \$250,000,000, the remainder of the loan being reserved with a view of its payment from the surplus revenues.

"The continued three-and a half per cent bonds having a market price slightly above par, the five per cents in question were rapidly presented, and it became necessary to extend somewhat the limit fixed for the amount of registered bonds to be accepted for continuance.

"On July 1, a notice for the payment, on October 1, 1881, of the registered fives not continued was given, and the resources of the Treasury will be ample to meet their payment.

"By this plan the Department has been not only relieved from the embarrassment of providing for the payment of the coupon interest, but has reduced all the six and five per cent. loans of the Government to a loan payable at the option of the Government, and bearing interest at only $3\frac{1}{2}$ per cent. per annum; and this, with the trifling expense to the Government of preparing the new registered bonds, and of paying the actual expenses of the London agency, at which only three persons have been employed for a few weeks, issuing about \$44,500,000 of the continued bonds."

It will be observed that at no time were calls made for bonds in excess of the ability of the Department to meet the payments therefor had the bonds called been presented for redemption instead of for continuance.

In conducting these operations, expenses were incurred for paper and for printing the new bonds to an amount estimated not to exceed \$6,000, and there was paid for all other expenses, including those of the London agency, \$4,499.08.

Under this arrangement, in addition to the six per cent. bonds continued, as stated in the letter, there were continued of the five per cent. bonds \$401,504,900; of which amount \$108,494,500 were coupon bonds, leaving to be paid from the surplus revenue \$10,151,950 of coupon bonds, with interest to August 12, 1881, and \$28,184,500 of registered bonds, with interest to October 1, 1881, which transactions were not completed when the above letter was written.

The annual saving in interest through the continuance of these bonds is as follows:

On the 6 per cent. bon	ds, continued at 3½ per cent:	 \$4,451,378	75
	ds, continued at 3½ per cent	6,022,573	
	, = =		

Total 10,473,952 25

REDEMPTIONS.

It was also stated in the last annual report that there would become payable on December 31, 1880, the loan of February 8, 1861, amounting to \$13,414,000, and on July 1, 1881, the Oregon-War Debt, amounting to \$711,800, both of which loans bore interest at the rate of 6 per cent. Previous to the maturity of these loans public notice was given to the holders that the bonds would be paid at the respective dates of maturity, and that interest would cease thereafter. All the bonds presented have been paid from the surplus revenues of the Gov ernment.

In addition to these amounts there have been purchased or called for redemption, and interest has ceased upon, during the year ending November 1, 1880, bonds in the following amounts:

Bonds bearing interest at 6 per cent	$\$25,518,600 \\ 68,146,150 \\ 16,179,100$
Total	109,843,850

making a total of bonds redeemed, or on which interest ceased during the year, of \$123,969,650.

The following statement shows the changes in the interest bearing debt, and the saving of interest thereon, by the continuance and payment of bonds during the year ending November 1, 1881:

Amount.	Rate.	Disposition.	Yearly saving.
\$178, 055, 150 401, 504, 900 39, 644, 400 68, 146, 150 16, 179, 100	5 per cent. 6 per cent. 5 per cent.	Continued at 3½ per cent Continued at 3½ per cent Redeemed or interest ceased Redeemed or interest ceased Redeemed or interest ceased	2, 378, 664 00
Total an	nual saving i	n interest	16, 826, 192 25

making the annual interest-charge on the debt, November 1, 1881, \$60,962,245.25.

On the 1st of November there remained outstanding of bonds bearing 3½ per cent. interest, payable at the pleasure of the Government after proper notice, \$563,380,950, included in which were \$12,035,500 called bonds not matured. If the excess of revenues over expenditures should continue as during the past year, its application to the payment of these bonds can be made at the discretion of the Secretary, and to

that extent the Government will be relieved from the necessity of paying any premium in the consequent redemption of its bonded debt.

It is not improbable that the subject of the funding of the public debt in bonds bearing a rate of interest less than that of any yet issued will be considered by Congress during the present session. When that subject is taken up, it is respectfully suggested that it should be borne in mind that the bonds now outstanding, known as the extended sixes and fives, on interest at the rate of 31 per cent., possess a quality seldom found in a debt against a Government. That quality is in the power that the Government has to call them in for payment at any time, or to postpone payment of them for years. This is a valuable privilege to the Government, and it is to be considered whether it will be wise to give it up. The possession of it enables the Government to accommodate the payment of that portion of the public debt to the varying state of the public means. It would be difficult, probably, to market a loan at a low rate of interest which should be redeemable at the pleasure of the Government. Indeed, one of the requisites of a loan proposed at a low rate is, that it be issued for a long term, and made irredeemable until the expiration thereof. The reason is on the surface. A debt at a low rate is not likely to be sought for, save by those wishing permanent investments, as public institutions, trustees, guardians, and other fiduciary holders of funds, or wealthy persons with whom safety, stability, permanence, and regularity of income are of more importance than a high rate of return. It is also to be considered that the gain that would accrue to the Government from a small ' reduction of the rate of interest is, to some extent, lost in the expenses necessarily attendant on the making of a new loan. It is a part of the information that the Department has from men engaged in financial operations that a new loan at 3 per cent. would be taken up if it was by its condition irredeemable save at a long term. Emphasis is put by them on this condition. None have placed the term at less than ten Most have put it at twenty. Some have suggested a term of forty years, with an option in the Government to pay at the end of ten.

For these reasons this Department makes no recommendation of legislation for the refunding of the bonds now outstanding bearing interest at 3½ per centum. It does recommend that if a new loan at a lower rate is offered, there be given to the bonds a long term of payment.

PACIFIC-RAILROAD SINKING-FUND.

The third section of the act approved May 7, 1878, provides—

"That there shall be established in the Treasury of the United States a sinking-fund, which shall be invested by the Secretary of the Treasury in bonds of the United States; and the semi-annual income. thereof shall be in like manner from time to time invested, and the same shall accumulate and be disposed of as hereinafter mentioned And in making such investments the Secretary shall prefer the five per centum bonds of the United States, unless, for good reason appearing to him, and which he shall report to Congress, he shall at any time deem it advisable to invest in other bonds of the United States. All the bonds belonging to said fund shall, as fast as they shall be obtained, be so stamped as to show that they belong to said fund, and that they are not good in the hands of other holders than the Secretary of the Treasury until they shall have been endorsed by him, and publicly disposed of pursuant to this act."

The Secretary of the Treasury has, upon several occasions, recommended to Congress a modification of the terms of this act, so as to permit the investment of the fund in the first-mortgage thirty-year bonds of the Union Pacific Railroad Company, and of the Central Pacific Railroad Company, authorized by section 10 of the act of Congress of July 2, 1864, chapter 216, and section 1 of the act of Congress of March 3, 1865, chapter 88, or in any interest-bearing bonds of the United States.

The ninth section of the sinking-fund act referred to provides that all sums required to be paid into the fund are made a lien upon all the property and franchises of the roads, "subject to any lawfully prior and permanent mortgage, lien, or claim thereon." These bonds being thus payable from the sinking-fund, they would seem to be the best investment which now offers, and especially so in view of the low rate of interest now realized from investment in United States bonds. Should Congress, however, not deem it desirable to authorize such investment, the Secretary would suggest that the amounts withheld from the respective railroad companies on account of the fund, should be credited semi-annually on the books of the Treasury Department, with interest at the rate of 5 per centum per annum. This method of treating the matter will obviate the necessity of purchasing bonds, which frequently cannot be done without the payment of a large premium, and will realize to the companies a rate corresponding more nearly with that which they would receive were the amounts invested in first-mortgage bonds of their respective roads.

CONTINUED TRUST-FUND BONDS.

Included in the amount of five per cent. bonds, continued at 3½ per cent., are \$451,350 held by the Secretary of the Treasury as part of the sinking-fund for the Pacific Railroads, under the act of May 7, 1878, and \$52,000 held in trust for the South Carolina school-fund, act of March 3,

The continuance of these bonds at $3\frac{1}{2}$ per cent. was deemed a 1873. better investment than their sale and reinvestment in other United States bonds.

BUREAU OF ENGRAVING AND PRINTING.

During the year the Bureau of Engraving and Printing has added to its valuable stock of machinery five new steam-power plate-printing presses. These presses have now been in operation several months, with satisfactory results, and it is confidently expected that the slow and laborious process of plate-printing on hand-presses will, to a great extent, be superseded by the use of the more rapid and economical power-press.

DISTINCTIVE PAPER.

The use of the silk-threaded, fibre paper for the printing of notes, certificates, checks, and other obligations, including registered bonds, has been continued during the year with results such as warrant the further use of it. Since July 1, 1881, all pension-checks for the Department of the Interior have been printed upon this paper. Tables accompanying the report will show the disposition made of the 22,231,000 sheets manufactured for the Department since its adoption in 1879.

The distinctive features of the paper, combined with its superior quality, have afforded complete protection to the securities of the Government, the paper not having been successfully counterfeited.

There have also been received since July 1, 1880, 37,880,518 sheets of distinctive paper for printing United States internal-revenue stamps.

COUNT, EXAMINATION, AND DESTRUCTION OF REDEEMED SECURITIES.

During the fiscal year there have been received by this office for final count and destruction redeemed United States legal-tender notes, national currency, and miscellaneous securities amounting to \$310,139,416.14. The United States legal-tender notes, national currency, United States bonds, and other obligations mutilated in process of printing, and over-due coupons and unissued notes received for destruction, amounted to \$49,412,119.82-making an aggregate of securities counted, cancelled, and destroyed during the fiscal year of \$359,551,535.96, the details of which are set forth in the tables accompanying the report.

EXPORTS AND IMPORTS OF CATTLE.

The number of living horned cattle exported, chiefly to England, in the year ended June 30, 1881, was 185,707, valued at \$14,304,103, being an excess over the previous year of 2,951 in number, and \$959,908 in value, and almost \$6,000,000 in value above the year 1879.

These shipments to England might be vastly increased, should the order of the Privy Council of Great Britain be rescinded, which requires that all American cattle be slaughtered within ten days after arrival at the port of entry. This order was made to prevent the introduction into that country, from this, of the disease known as pleuro-pneumonia. The demand in England for imported meat is so imperative that it is not doubted that this order will be rescinded whenever the British government is satisfied that our cattle may be sold, driven through, and fattened in that country without danger from the disease mentioned.

The rescission of the order would allow the exportation from this country of store-cattle in great numbers to be fed and fattened on English soil, while at present only animals fitted for immediate slaughter can be exported there.

At the last session of Congress a small appropriation was made to be expended under the direction of the Secretary of the Treasury to investigate the question as to the existence of the disease in this country, preparatory to the protection of the great routes of transportation of eattle from the West to the sea-coast for exportation. A commission of three persons has been appointed to make the investigation, and a report to the Secretary will be submitted to Congress early in the session.

It may be assumed that this report will show that contagious pleuropneumonia has never existed in this country west of the Allegheny
Mountains, while it undoubtedly does exist in certain portions of New
York, Pennsylvania, Connecticut, Delaware, and Maryland. It is
believed that its introduction into the great cattle-ranches of the West
would be a national calamity, and the attention of Congress is earnestly called to the subject, so that proper measures máy be adopted
to prevent its introduction into healthy districts, and to cause its extirpation in such as are infected. The attention of Congress is also called
to the necessity of more direct legislation authorizing quarantining of
imported cattle and for providing places for the quarantine thereof,
and for the expenses attendant thereon.

LIFE-SAVING SERVICE.

The annual report of the Life-Saving Service shows excellent results of the operations of this beneficent institution.

The number of stations in commission during the year was one hundred and eighty-three. The reports of the district officers show that two hundred and fifty disasters to vessels occurred within the field of station operations. There were eighteen hundred and eighty persons on board these vessels, of whom eighteen hundred and fifty-four were

saved, twenty-six only being lost. Four hundred and seven ship-wrecked persons were succored at the stations, to whom one thousand and sixty days' relief in the aggregate was afforded. The estimated value of property involved in these disasters was \$4,054,752, of which \$2,828,680 was saved, and \$1,226,072 lost. The number of vessels totally lost was sixty-six.

Of the new stations authorized by law, three on Lake Huron have been completed, and are now in commission, and two others at Cape Fear, North Carolina, and one at Bolinas Bay, California, will be in operation during the winter.

The service has been greatly embarrassed by the resignation of a number of keepers of stations on account of insufficient pay. Others have only been induced to remain in the hope of an increase in their compensation by Congress at its present session. The professional experience of these men makes their services valuable. In many cases men of equal qualification could not be found to fill their places, and some vacancies have occurred which it has been impossible to fill at all. The district officers represent that the resignations next season will be general unless the rate of pay, which is now only \$400 per annum, is raised. It is obvious that this service should not be allowed to retrograde, and the attention of Congress is earnestly invited to the necessity of making such provision as will retain the requisite professional capacity in these important positions.

It is also necessary to make provision for increasing the compensation of the district superintendents, which is too low, being but \$1,000 per annum, except in the two largest districts, where it is only \$1,500. These officers give large bonds, ranging from \$20,000 to \$50,000 in amount, and are charged with grave duties which occupy all their time, and the proper discharge of which involves the efficient conduct of the service in their respective districts.

The general superintendent, in his annual report, urges other measures for the improvement of the service which merit attention.

PUBLIC BUILDINGS.

The appropriations for the construction of public buildings during the past fiscal year were such as to permit the prosecution of work during the year without interruption, and the Supervising Architect reports the progress on the various works as generally satisfactory.

REVENUE MARINE.

The vessels of this service now number 36, comprising 5 sailing-vessels and 31 propelled wholly or in part by steam. There are employed, at the present time, to man this fleet 198 officers and 794 men.

The Revenue Marine has been actively employed, during the past year, in protecting the customs revenue and assisting distressed vessels, as will appear by the following exhibit:

Aggregate number of miles cruised	282,027
Number of vessels boarded and examined	29, 101
Number of vessels seized or reported for violating the law.	3, 163
Number of vessels wrecked or in distress assisted	148
Number of persons rescued from drowning	141
Estimated value of vessels and their cargoes imperilled	
assisted	\$2,766,882 00
Expenses of the service for the year	\$846,791 99

The Revenue Marine has rendered important aid to other branches of the public service, especially to the Light-House Establishment, the Commission of Fish and Fisheries, and the Life-Saving Service. The revenue-steamer "Perry," in September, performed valuable and timely service in conveying supplies to the sufferers by forest fires in Michigan.

Under the law providing for the use of revenue-vessels for protecting the interests of the Government on the seal islands and seaotter hunting grounds, and enforcing the provisions of law in Alaska generally, the revenue-steamers "Corwin" and "Rush," under competent commanders, have cruised extensively during the past season in the waters washing our most northerly possessions. The "Corwin," under Captain Hooper, has plied principally in the extreme north, following the illicit traffickers in breech-loading arms and liquors into their retreats in the Arctic Ocean, while continuing the search begun last year for the missing whalers, "Mount Wollaston" and "Vigilant" and the Arcticexploring steamer "Jeannette." In pursuing this search, Captain Hooper landed upon and thoroughly explored Herald Island in July, and in Augustlanded with an exploring party upon the southeast coast of Wrangel Land. Captain Hooper expresses the conclusion, based upon his cruising of the past two seasons, that the missing whalers referred to are hopelessly lost, and that the "Jeannette," in 1879, passed to the northward without stopping at any place in the Arctic Ocean, and that her movements in the extreme polar regions have been subsequently largely controlled by the movements of the ice; that this vessel is not likely to return by the way of Behring Sea; and that, if any action is taken for her relief, it should be done promptly, and a vessel dispatched to the Arctic waters, on the eastern coast of this continent, carrying sledge parties to prosecute the search for the people of the exploring I commend the subject to the attention of Congress.

The cruising of the "Rush" has been effectual in guarding the waters of Southern Alaska and the Aleutian chain from the incursions of

vessels unlawfully engaged in the killing of seals and other fur-bearing animals.

The presence of one or more vessels in Alaskan waters named is deemed necessary for the protection of the Government interests there, but the revenue-cutters now available are not adapted for the long voyages required in the work. It is accordingly recommended that provision be made for the construction of a revenue-vessel specially adapted for Alaskan service.

In the last annual report recommendation was made for an appropriation for two new vessels, at a cost of \$75,000 each, to take the place of two upon the Atlantic coast that were in need of extensive repairs. Congress, however, provided for one only. The reasons then existing for the appropriation apply with still stronger force at the present time, the vessel to be replaced having become almost entirely unseaworthy. The recommendation is therefore renewed. It is also recommended that an appropriation be made for the construction of a new hull and the alteration of the steam-machinery of the revenue-steamer "Perry," now stationed on Lake Erie, a board of survey having reported the vessel as unfit for duty in her present condition. To make these repairs and construct the new vessel, the sum of \$150,000 has been included in the estimates.

The service is seriously embarrassed by the large and constantly increasing number of officers who, through old age or physical disability, have become unequal to the performance of duty. The number of officers in the Revenue Marine is limited by law to one of each grade for a vessel, and the active list is reduced by so many as are unfit for duty, there being no provision for retiring the disabled. list is still further reduced by details made for duty in connection with the Life-Saving Service, under the act of June 18, 1878. The work of the service consequently devolves on a smaller number of officers than the law contemplates, or safety and efficient management justify. Besides, the retention of the permanently incapacitated bars the way to promotion of the junior officers, thus removing from the service a valuable incentive to improvement. To remedy these evils a system for the retirement of officers, who have in the line of duty become permanently disabled, is desirable. It has also been urged that provision be made for extending the benefits of the pension laws to the officers and seamen of the Revenue Marine. Under existing statutes they are entitled to a pension only when they have been wounded or otherwise disabled in the line of duty while co-operating with the Navy. view of the constant activity required of them, in time of peace as well as of war, and of the hazard involved in their service, their cruising

being mostly upon the shallow waters and dangerous courses near the coast, subjecting them during the inclement winter season to extreme hardships and dangers, their claim to pensions seems to be well founded.

Upon these grounds the attention of Congress is invited to the recommendations heretofore made by my predecessors in office, for the establishment of a retired list, and the extension of the pension laws to the Revenue-Marine Service.

ALASKA.

The experience of the past year has shown more strongly than ever the necessity of establishing some simple form of government for the protection of persons and property in the Territory of Alaska; and it is recommended that Congress, at the approaching session, take action on the subject.

The Alaska Commercial Company has taken, during the past year, the full number of seals allowed under its lease, namely, one hundred thousand.

MARINE-HOSPITAL SERVICE.

The Supervising Surgeon-General reports that during the past year 32,613 patients received relief from the Marine-Hospital Service, of whom 12,449 were treated in the hospitals, and 20,164 at the different dispensaries; that 309,596 days' relief in hospital were furnished, and a considerable amount expended for surgical appliances for out-patients. Seventeen incurable patients have been furnished transportation to their own homes. The officers of the service have examined 4,384 pilots for color-blindness, and have made physical examinations of 57 seamen of the Light-House and Merchant Services, and 44 officers, cadets, and applicants for appointment as cadets, and 305 seamen of the Revenue-Marine Service.

Section 4569 of the Revised Statutes requires certain vessels to carry a medicine-chest, but as it does not specify what should be contained therein, a book prepared by the Supervising Surgeon-General, giving the necessary information, has been published by the Department, and is now issued to those concerned.

The receipts from all sources were \$386,059.81, and the net expenditures \$400,404.46. It is believed that the receipts will be largely increased during the present fiscal year, as a result of the special investigations now in progress.

Notwithstanding the great increase in the number of patients, the expenditures are not greater than last year, and the *per capita* cost has been reduced from \$16.18, as stated in the last report, to \$12.27.

The hospitals are generally in better condition now than at any pre-

XXXVI REPORT'OF THE SECRETARY OF THE TREASURY.

vious time. The temporary hospital at Bedloe's Island, at the port of New York, has received such furniture and appliances as were necessary, but little has been done in the way of repairing the buildings, or enlarging them to meet the needs of the service, Congress having as yet given no authority for their transfer from the War to the Treasury Department. It seems that the city of New York, with its extensive commerce, and large numbers of men engaged in the merchant-marine service, should have a more permanent arrangement for the care of sick and disabled seamen than that which is now provided.

The attention of Congress is again invited to the necessity for some legislation concerning the unclaimed effects of seamen dying in marine hospitals. There is now in the Treasury as a special deposit, to the credit of the Secretary, \$2,125.51 from this source. It is recommended that Congress authorize the sale of such unclaimed effects, and that the proceeds, together with the unclaimed money now on hand, be placed to the credit of the marine-hospital fund.

The recommendations of my predecessors, and of the Supervising Surgeon-General, concerning statutory provision for the appointment of medical officers, for the compulsory physical examination of seamen, as preliminary to shipment, the establishment of a "Snug Harbor," and a re-enactment of the law providing for the investment of surplus funds, are concurred in, and respectfully commended to the favorable consideration of Congress.

STEAMBOAT INSPECTION.

The following table shows the operations of this office during the past year:

Table showing the number of steam-vessels inspected, their aggregate tonnage, and the officers licensed for the several divisions of navigation, during the fiscal year ended June 30, 1881.

Divisions.	Steamers.	Tonnage.	Officers licensed.
Pacific coast Atlantic coast Western rivers Northern lakes Gulf coast	2,154	102, 712, 60 552, 393, 76 190, 033, 36 269, 086, 67 89, 776, 71	1, 081 7, 065 4, 334 3, 437 1, 881
Total	4,779	1, 204, 003. 10	17,798

Recapitulation.

Total number of vessels inspected	4,779
Total tonnage of vessels inspected	1,204,003.10
Total number of officers licensed	17, 798

REPORT OF THE SECRETARY OF THE TREASURY. XXXVII

Showing an increase over the preceding year as follows Increase in number of vessels		
$\it Receipts.$		÷

Balance of receipts unexpended	88, 971	<u></u> 95
The total number of accidents to steam-vessels during	ng the yea	tr,
resulting in loss of life, was:		′
Explosions Fire. Collisions Snags, wrecks, and sinking	•••••	19 3 7 8
Total		$\frac{-}{37}$
Total number of lives lost by accidents from various causes du year ended June 30, 1881.	ring the fisc	al
Explosions		43
Fire		11
Collisions		30
Snags, wrecks, and sinking		50
Accidental drowning		29
Miscellaneous casualties		5
Total lives lost	20	68

Under the head of "snags, wrecks, and sinking" are included the disasters to the steamers "City of Very Cruz" and "Alpena," wrecked by hurricanes, whereby 128 lives were lost. These vessels were fully equipped according to law, and the accidents were from causes wholly beyond any precautions that could have been taken by the Steamboat-Inspection Service.

The Supervising Inspector-General, in his annual report, suggests several amendments to the steamboat laws, and calls special attention to the increasing accumulation of funds exacted by way of tax upon licensed officers for the support of this service, showing a surplus in

XXXVIII REPORT OF THE SECRETARY OF THE TREASURY.

the past year of \$88,971.95, and an aggregate surplus now in the Treasury of \$649,320.35.

These subjects are commended to the consideration of Congress.

COMMERCE AND NAVIGATION.

The total tonnage of vessels of the United States at the close of the fiscal year 1881, as shown by the records of the Register of the Treasury, was 4,057,734 tons; of this amount 1,335,586 tons were comprised in 2,326 vessels registered for the foreign trade, and 2,722,148 tons in 21,739 vessels enrolled and licensed for the coasting trade and fisheries. There has been a decrease of 17,224 tons in vessels employed in the foreign trade, and an increase of 6,924 tons in such as were engaged in the domestic trade.

The following table exhibits the number of vessels built and documented during the last fiscal year, with their tonnage:

	Number.	Tons.
Sailing-vessels	493	81, 209
Canal-boats	57	118, 070 10, 189
Barges		280, 456

As the larger part of the canal-boats and barges now built in the country are not documented, it is presumed that the above numbers represent but a small proportion of the vessels of those classes which were built.

TRADE IN AMERICAN AND FOREIGN BOTTOMS.

The total tonnage of vessels entered from foreign countries was 15,251,329 tons during 1880, and 15,630,541 tons during the year ended June 30, 1881, showing an increase of 379,212 tons, or about two and one-half per cent. The American tonnage entered in the foreign trade exhibits a decrease of 221,020 tons, or seven per cent, while the foreign tonnage shows an increase of 600,232 tons, or about five per cent. The tonnage in these cases is computed on the basis of the number of entries of vessels and not on the number of vessels, and is limited to the seaboard ports.

Of the merchandise brought in at seaboard, lake, and river ports during the year, an amount of the value of \$133,631,146 was imported in American vessels, and \$491,840,269 in foreign. Of the exports of merchandise, an amount of the value of \$116,955,324 was shipped in American, and \$777,162,714 in foreign vessels. Of the combined imports and exports of merchandise, 16 per cent. only of the total value

47

was conveyed in American vessels; and the amount of transportation to and from our ports in our own vessels has fallen off one per cent. in the fiscal year 1881 as compared with that of 1880.

COAST AND GEODETIC SURVEY.

The work of the survey of the coast, and the geodetic operations in the interior, have been advanced during the year as effectively as the means appropriated would permit.

On the Atlantic slope, or Eastern Division, the work has been in progress on the coasts of Maine, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, Florida, Louisiana, and Mississippi, including the Mississippi river to Memphis; the coast of Texas; and in the interior of the States of New Hampshire, Vermont, New York, Pennsylvania, New Jersey, Ohio, Kentucky, Tennessee, Indiana, Illinois, Missouri, and Wisconsin. On the Pacific slope, or Western Division, the detailed survey has been in progress in important parts of the coasts of California, Oregon, and Washington Territory. The extension of the triangulation of the interior has been in progress in California, Nevada, and Colorado. Surveys and examinations of important localities have also been made in Alaska Territory.

The publication of maps and charts, the Coast Pilot, and tide-tables has kept pace with the progress of field operations.

The officer in charge of the survey asks attention to the increasing demands for information which that work is intended to supply, corresponding with the steady development of the country. With a view to the most advantageous employment of the parties engaged in the widely separated localities in which the work is now in progress, he recommends an increase of appropriations over the amounts granted for the past few years. This recommendation only proposes to raise the appropriation to an amount from which it was reduced at a time of great commercial depression. It is for Congress to determine whether the importance of the work calls for the increase in appropriation.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1881 were \$3,543,912.03. The revenues deposited in the Treasury for the same period were \$2,016,199.23.

From July 1, 1880, to July 1, 1881, the bonded indebtedness has been reduced by operation of the sinking-fund \$254,573.33, and the annual interest-charge upon the District debt has been reduced \$12,816.66. Since the offices of the commissioners of the sinking-fund of the District of Columbia were abolished and their duties and powers transferred to the Treasurer of the United States by the act Congress of June 11, 1878,

the principal of the funded debt has been reduced \$938,900, and the annual interest-charge has been reduced \$55,792.62.

NATIONAL BOARD OF HEALTH.

During the past year the board has continued its investigations into matters affecting the public health, and has collected much valuable information bearing upon sanitary questions. Under the provisions of the act approved June 2, 1879, entitled "An act to prevent the introduction of contagious and infectious diseases into the United States," the board has completed a temporary refuge station at Ship Island, Mississippi, maintained a service of inspection on the Mississippi river, a temporary refuge station on Blackbeard Island, off the coast of Georgia, and a hospital boat at Norfolk, Virginia, in readiness for use in case of emergency. Happily no epidemic of yellow-fever has invaded the country during the past year; and that the board has rendered efficient service in compassing this result, and established the utility of its refuge stations, is abundantly shown in the number of infected vessels effectually treated during the past summer. vessels with yellow-fever patients on board have been sent by local health authorities to its stations-four to the station on Ship Island and four to the station on Blackbeard Island; and it is a matter of congratulation that no cases of fever occurred on board either of the vessels after they were released, or in any of the ports at which they subsequently touched. But for this timely assistance on the part of the Government a serious epidemic might have occurred, involving far greater loss to the country than the expenses incurred by the board.

The total expenditures of the board during the past year were \$164,989.46. As required by law, the expenditures have been made upon estimates submitted by the board and approved by the Secretary of the Treasury; and while a liberal construction has been placed upon the laws in providing the board with funds for carrying out the purposes of the several acts defining its duties, a strict accountability has been maintained by the accounting officers of the Department in relation to its disbursements.

In view of the want of proper facilities on the part of local health authorities on the South Atlantic and Gulf coasts for effectually protecting the country against the introduction of contagious or infectious diseases, the attention of Congress is respectfully called to the subject of providing the additional temporary refuge stations suggested by the board in its annual report.

The several reports of the heads of offices and bureaus are herewith respectfully transmitted.

CHAS. J. FOLGER.

Secretary.

To the Speaker of the House of Representatives.

TABLES ACCOMPANYING THE REPORT.

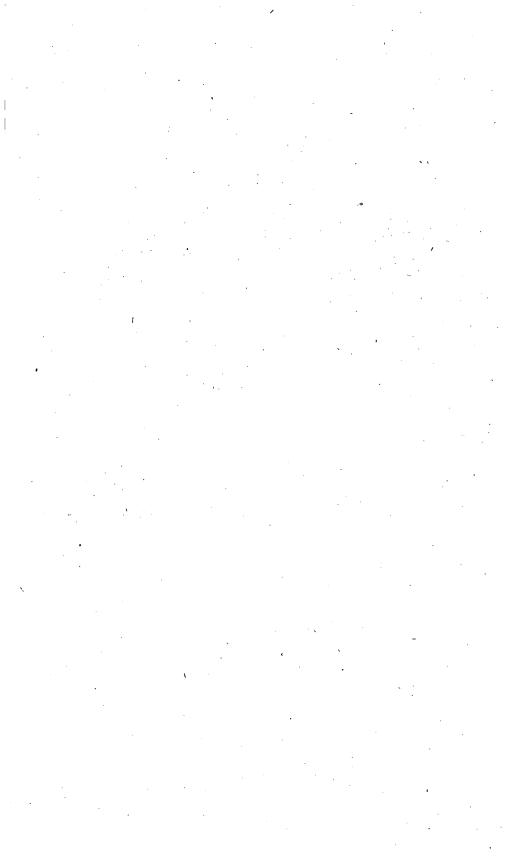

TABLE A.—STATEMENT of the NET RECEIPTS (by warrants) during the fiscal year ended June 30, 1881.

TABLE E.—STATEMENT of OUTSTANDING PRINCIPAL of the PUBLIC DEBT, &c.—Continued.

Year.		Amount.	
1870			2, 353, 211, 332 32 2, 253, 251, 328 78 *2, 253, 482, 993 20 *2, 251, 690, 468 43 *2, 232, 284, 531 95 *2, 180, 395, 667 15 *2, 205, 301, 392 10 *2, 256, 205, 892 53 *2, 349, 567, 482 04

^{*}In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but, being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

STATEMENT of the PUBLIC DEBT, including ACCRUED INTEREST thereon, less cash in the Treasury on the 1st day of July of each year, from July 1, 1869, to July 1, 1881, compiled from the published monthly debt-statements of those dates.

Years.	Outstanding principal.	Accrued interest.	Cash in the Treasury.	Debt less cash in the Treasury.
July 1, 1869 1870 1871 1872 1873 1874 1875 1876 1877 1878 1879 1880 1881	*2, 601, 675, 127 83 2, 553, 211, 332 32 2, 253, 251, 328 78 2, 234, 482, 993 20 2, 251, 690, 468 43 2, 232, 284, 531 95 2, 180, 395, 067 15 2, 205, 301, 392 10 2, 256, 205, 892 53 2, 349, 567, 482 04	\$47, 447, 310 79 50, 607, 556 52 45, 036, 766 23 41, 705, 813 27 42, 356, 652 82 38, 939, 087 47 38, 647, 556 19 38, 514, 004 54 40, 882, 791 89 36, 404, 551 37 30, 792, 351 34 22, 845, 547 59 20, 948, 657 75	\$156, 167, 813 58 265, 924, 084 61 106, 217, 263 65 103, 470, 798 43 129, 020, 932 45 147, 541, 314 74 142, 243, 361 82 119, 469, 726 70 186, 025, 960 73 256, 823, 612 08 353, 152, 577 01 201, 088, 622 88 249, 363, 415 35	2, 191, 486, 343 62 2, 147, 818, 713 57

^{*}It will be noticed that there is a difference in the amounts represented by these two statements as the principal of the debt July 1, 1869, and July 1, 1870. This difference is explained thus: In the principal of the debt as shown by the monthly debt-statements of these dates, the bonds purchased for the sinking fund and paid for from money in the Treasury, were included as a part of the outstanding debt and were also treated in the cash as a cash item, or asset, for the reason that at that time there was no authority or law for deducting them from the outstanding debt. Congress, by the sixth section of the act of July 14, 1870, directed that these bonds should be canceled and destroyed and deducted from the amount of each class of the outstanding debt to which they respectively belonged, and such deductions were accordingly made on the books of the department and in the table of the debt in the annual report.

Note 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

Note 2.—The figures for July 1, 1879, were made up, assuming pending funding operations to have been completed.

Note 3.—The temporary loan, per act of July 11, 1862, is included in the 4 per cents. from 1862 to 1868, inclusive, with the exception of the amount outstanding for August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average

for the year.

NOTE 4.—In the recent monthly statements of the public debt, the interest accrued has been added to the principal, making the net debt larger in that amount than the amount herein stated for each year.

LEGAL-TENDER NOTES.							
The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer, at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for six per cent. United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$55,000.000 of a lower denomination 'han five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822). The act of February 28, 1878 (29 Statutes, 26, sec. 3), provides that any holder of the coin authorized by this act may deposit the same with the Treasurer or any assistant treasurer of the United States, in sums not less than ten dollars each, corresponding with the denominations of the United States notes. The coin deposited for or representing the certificates shall be retained in the Treasury for the payment of the same on demand. Said certificates shall be receivable for customs, taxes, and all public dues, and, when so received, may be reissued.	Indefinite	On demand	None	Par	No limit		- 51, 166, 530 00	REPORT OF THE

Note 1.—The amount of State and national bank circulation is compiled from the reports of the Comptroller of the Currency at the nearest dates obtainable to the end of each fiscal year; the other amounts are taken from the official printed reports of the Secretary of the Treasury.

*Note 2.—Exclusive of \$8,375,934, amount estimated as lost or destroyed, act June 21, 1879.

Note 3.—The one and two year notes of 1863, and the compound interest notes, though having a legal-tender quality for their face-values, were in fact interest-bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and since maturity, those presented have been converted into other interest-bearing bonds, or paid for in cash, interest included.

Note 4.—The amount of fractional silver in circulation in 1860, 1861, and 1862, cannot be stated. The amounts stated for 1876, and subsequent years, are the amounts coined and issued since January, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation.

TABLE Q.—STATEMENT of UNITED STATES BONDS and other ORLIGATIONS RECEIVED and ISSUED by the OFFICE of the SECRETARY of the TREASURY, from July 1, 1880, to October 31, 1881.

REPORT OF COMMISSIONER OF INT. RNAL REVENUE.

REPORT

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, November 25, 1881.

SIR: The receipts of internal revenue for the fiscal year 1879 were \$113,449,621.38; for the fiscal year 1880, \$123,981,916.10; for the fiscal year ended June 30, 1881, \$135,229,912.30, and the receipts for the first four months of the present fiscal year have been \$50,876,970.11, being \$7,061,722.85 in excess of the receipts for the corresponding months of the last fiscal year. If this increase should be maintained during the remaining eight months of the fiscal year, the receipts for 1882 will be fully \$157,000,000.

Following is a statement of the receipts of internal revenue taxes from the various objects of taxation during the past two fiscal years:

Number of cigarettes, 1880—408,708,366; 1881—567,395,983; increase, 158,687,617.

Pounds of snuff, 1880—3,966,308; 1881—4,307,394; increase, 341,086.

Pounds of tobacco, 1880—132,309,526; 1881—42,706,011; increase, 10,396,485.

Barrels of ale, beer, &c., 1880—13,347,110; 1881—14,311,028; increase, 963,918.

REDUCTION OF INTERNAL TAXES.

The large increase in the receipts of the government and the great reduction in the interest and principal of the public debt are causing discussion as to the propriety of reducing the income of the government by lowering some of the taxes and dropping others altogether.

Attention is called to the recent action of the National Distillers' Association, in favor of applying to Congress for a reduction of the tax on distilled spirits. These tax-payers seem to think that the time has come when a portion of the tax from their productions can be taken off, that tax now amounting to 300 per cent. upon fine whiskies and 600 per cent. upon ordinary spirits.

Whenever the wants of the government will allow a reduction of internal taxation, my opinion is that it will be wise to confine these taxes to distilled spirits, malt liquors, tobacco and its products, and to special taxes upon manufacturers and dealers in these articles, and to fix the taxes at such rates as will yield the amount of revenue necessary to be raised from these sources.

AMOUNTS COLLECTED, BY DISTRICTS, AND COST OF COLLECTION.

Immediately after the close of the past fiscal year an examination was made of the accounts of the collectors of internal revenue, and it was found that they had accounted for all the public moneys which came to their hands. I am gratified to be able to state that during the past five fiscal years \$602,310,797.30 have been collected, and that the entire amount has been paid into the Treasury without any loss to the government by defalcation.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was as follows:

For salaries and expenses of collectors, including pay of deputy collect-		
ors, clerks, &c	\$1,898,103	43
For salaries and expenses of revenue agents, surveyors of distilleries,		
gaugers, storekeepers, and miscellaneous expenses	2, 365, 000	0.0
For stamps, paper, and dies	473, 803	07
For expenses of detecting and punishing violations of internal revenue	-	
laws	63, 789	98
For salaries of officers, clerks, and employés in the office of Commis-	. ,	
sioner of Internal Revenue	253, 330	00
Total	5, 054, 026	48

The entire expense for the past five years has been \$21,979,002, being three and sixty-four one hundredths per cent. upon the amount collected; and in the disbursement of this money there has been no loss to the government. This satisfactory result is due to the intelligence, capacity, and fidelity of the officers and employés of the Internal Revenue Service, to whom I desire to convey my appreciation of their laudable efforts to reach and maintain the highest standard of excellence.

Following is a statement showing the aggregate collections in each collection district during the fiscal year 1881, with the names of the several collectors:

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal Revenue Service for the fiscal year ending June 30, 1883, as follows:

For salaries and expenses of collectors	\$2,100,000
For salaries and expenses of thirty-five revenue agents, for surveyors, for	
fees and expenses of gaugers, for salaries of storekeepers, and for miscel-	
_ laneous expenses	2,400,000
For dies, paper, and stamps	500,000
For detecting and bringing to trial and punishment persons guilty of vio-	
For detecting and bringing to trial and punishment persons guilty of vio- lating the internal revenue laws, including payment for information and	
detection	75,000
For salaries of officers, clerks, and employes in the office of the Commis-	
sioner of Internal Revenue	255,080
	·
Total	5, 330, 080

ENFORCEMENT OF THE LAWS.

I am glad to be able to report that there is a commendable disposition on the part of the great body of tax-payers to yield a ready obedience to the laws, and that the taxes are collected with the least possible friction. In the collection districts where frauds in the manufacture and sale of spirits and tobacco have been rife, and where resistance to authority has prevailed, there has been a manifest improvement in public senti-While it is shown by a table on page 82 that during the past sixteen months 859 illicit distilleries have been seized, and 1,510 illicit distillers arrested, I am enabled to report that illicit distilling has, by the active operations of the past five years, been reduced to a minimum, and the illicit manufacture of tobacco has for the most part been aban-The business of "blockading," so called, that is, the sale of illicit whisky and tobacco from peddlers' wagons, has almost been sup-Bands of illicit distillers combined together in defiance of law have been broken up, and forcible resistance to the officers of the government, though it has not entirely ceased, is of much less frequent occurrence than heretofore. The practice so long in vogue of law breakers resorting to the processes of the State courts as a means of revenging themselves upon the officers of the government for the enforcement of the laws of the United States has been to a great extent discontinued. Cordial relations now exist in most cases between the officers of the United States charged with the enforcement of the internal revenue This satisfactory conlaws, and the officers of the State governments. dition of things has been brought about by a just, firm, and conciliatory enforcement of the laws. As a result, a strong public sentiment has set in against frauds upon the revenues of the government and in favor of sustaining its authority. Respectable citizens who in times past, though opposed to these frauds, were not disposed to give information and aid in their suppression, for fear of injury to their persons or property, now take a bold stand against them, and in some districts good citizens have formed committees to co-operate with the officers of the government in the suppression of the illicit manufacture and traffic in whisky. maintaining a careful supervision over those districts where frauds have hitherto prevailed, and having them regularly policed by deputy collectors, I believe that a relapse into the former condition of fraud, lawlessness, and bloodshed will be prevented.

The extraordinary expenses incident to the suppression of frauds upon the revenue in the illicit manufacture and sale of whisky and tobacco during the past five years, in the districts of second Alabama, Arkansas, second Georgia, third Georgia, fourth North Carolina, fifth North Carolina, sixth North Carolina, South Carolina, second Tennessee, fifth Tennessee, eighth Tennessee, and fifth Virginia, where frauds on the revenue have most prevailed, have been about \$285,000. The net gains are the establishment of the supremacy of the laws, and their comparatively peaceful observance and enforcement, and an increase in the collection of internal revenue taxes in the districts named, as follows:

1879 over 1878, an increase of	\$628, 283
1880 over 1878, an increase of	
1881 over 1878, an increase of	1, 220, 285

PROTECTION OF REVENUE OFFICERS.

I again recommend additional legislation for the protection of the lives and persons of officers of the United States from the unlawful assaults of those who resist their authority. There should be a law for the trial and punishment in the courts of the United States of persons who kill or make assaults with intent to kill officers of the United States while engaged in the performance of their lawful duties. At this time the only offenses cognizable in the courts of the United States for acts of this character are obstructing and conspiring to obstruct the enforcement of the law, the punishment for which is entirely inadequate to the many heinous crimes against the lives and persons of officers of the government which have been committed within the past few years.

PENSIONS TO WIDOWS AND ORPHANS OF OFFICERS KILLED.

The struggle maintained for the past five years for the suppression of illicit distilling has resulted in the killing of 28 and the wounding of 64

officers and employés.

Amongst the number who lost their lives while enforcing the laws of the United States against illicit distillers was Lieutenant McIntire, of the Second United States Infantry, who was killed in Georgia February 9, 1877. By reason of his being an officer of the United States Army his widow has been awarded a pension of \$15 a month (the highest rate allowed by law) and \$2 a month for each of her five children. This is

eminently just and proper.

On the 9th of August, 1878, Deputy Collector Cooper, of Knoxville, Tenn., whilst co-operating with other officers in putting down armed resistance to the law, was shot and instantly killed, and on the 20th of July last Deputy Collector Thomas L. Brayton, of South Carolina, was killed by an illicit distiller, under circumstances of peculiar atrocity. Each of these officers left a wife and children bereft of their natural means of Deputy Collectors Cooper and Brayton, equally with Lieutenant McIntire, lost their lives in the service of the government and in the effort to enforce its laws against armed resistance, but being in the civil instead of in the military service of the government, the law makes no provision for the relief of their widows and orphans. This distinction is not just, and I respectfully suggest the propriety of legislation authorizing suitable pensions to be awarded to the widows and dependent families of officers and employes killed in the enforcement of the law, and directing proper provisions to be made for officers and employes wounded or disabled in the service.

FIXED SALARIES FOR U. S. MARSHALS AND DISTRICT ATTORNEYS.

Wherever the rights of a citizen in person or property are involved it is better that an officer shall err by doing too little than by doing too much. The best and most satisfactory work of an officer is performed from a sense of duty. Where the pecuniary interests of the officer are promoted by the oppression of the citizen there is great danger of abuse, and a system of laws which makes it the interest of an officer to thus misuse his authority is wrong in principle, and will, by the permanent temptation to evil, breed abuses even in long established and well ordered communities under the most careful system of administration. In new and remote settlements this practice, at times, will be little better than brigandage.

I regard the system of fees and allowances to marshals and district attorneys as open to this objection. Their maximum compensation is fixed by law and the orders of the Attorney-General, but the amount actually received depends almost wholly upon the institution and prosecution of cases in court. While these officers are paid out of the Treasury in respect to cases in which the United States is a party, the compensation thus paid is for fees made, expenses incurred, and services rendered in connection with criminal and civil cases instituted in behalf of the United States. The district attorney is made the judge of the propriety of commencing a criminal prosecution against a citizen on account of which he and the marshal will receive pay from the government whether the party be guilty or innocent. These officers may prefer complaints against citizens, cause United States commissioners to issue warrants, may arrest and examine the parties before the commissioner and the district attorney, marshal, guard, witnesses, and the commissioner will all get their fees from the government even though the party arrested be discharged.

Instances have been brought to my attention where numerous prosecutions have been instituted for the most trivial violations of law, and the arrested parties taken long distances and subjected to great inconvenience and expense, not in the interest of the government, but apparently for no other reason than to make costs. I have consulted with a number of prominent district attorneys and marshals, and they all concurred with me in condemning the system under which they are compensated for their services as one calculated to encourage abuses. It is not to be wondered at that abuses have grown up under such a system. The wonder is that the abuses are not greater. A remedy will be found by fixing by law the salaries of district attorneys and marshals, and paying them as other officers from the Treasury, and authorizing the Attorney-General to fix the salaries and traveling expenses of deputy marshals in the same manner that the salaries and traveling expenses of deputy collectors of internal revenue are now fixed. This plan would relieve these officers from all temptation to institute prosecutions for petty and trivial violations of the revenue laws where no frauds were committed or intended.

THE CIVIL SERVICE.

The improvement of the civil service is a subject which has received much public attention, and will probably be considered by Congress during the coming session. I venture to offer a few suggestions which, I trust, will not be regarded as out of place in this report.

There is unquestionably on every hand an earnest desire to have the

offices filled by persons who are honest, capable, and diligent, and to have the business between the government and the people transacted promptly, acceptably, and in a thorough, business-like manner. The chief point of discussion seems to be in respect to the manner of making appointments to and removals from office. It is insisted by some that the best civil service will be found in making it absolutely non-partisan; that is to say, that political considerations shall not enter into the question of applications for appointment to office, nor into the exercise of the powers of appointment and removal.

It would seem axiomatic that the tenure of office and the powers of appointment and removal should agree with the genius of the government and the spirit of the people from whom all powers emanate.

Our governments, State and National, are founded upon the elective Originally, the constitutions of many of the States made provision for the legislatures to choose the judiciary. The growth of the spirit of self-government in process of time changed most of these constitutions, so that to day, in nearly all the States of the Union, the judges are elected by the people for a fixed term of years. The wide diffusion of education and knowledge amongst the people, the ease of obtaining information of public affairs through the press, the constant participation in the affairs of government at the ballot-box and otherwise, and the important and stirring political events of the past twenty years have so wrought upon the people of this country that they now take more interest in public affairs than ever before, and the great mass of educated and intelligent men competent to hold office are identified with one or the other of the political parties of the country. In fact, it has come to be expected that every citizen of standing, and worthy of consideration, will have definite political opinions and affiliations. This being the case, it is obvious that there are not existing in the country men suitable for holding the public offices who are free from political convictions; so that, in point of fact, in selecting officers it is necessary to choose from one or the other of the political parties of the country.

To give the country a government of the people, the principles influencing the exercise of the power of appointment should be in harmony with the principles controlling the people in making choice of officers

through the elective franchise.

If this proposition be sound, it remains to be ascertained by what rule the people are governed when they come to cast their ballots for elective officers. In respect to the great majority of people, the rule may be safely stated thus: The elector demands that the candidate shall be honest and capable, and that he shall agree with him in his political opinions. We give expression to our political convictions at the polls by electing men to make and to enforce the laws who agree with us politically. The principle of agreement in political opinions is the great test of voting for candidates from President to constable.

It is argued that the inferior officers and clerks employed by the government at the capital and throughout the country can perform their duties satisfactorily, notwithstanding their opinions differ from the dominant political party, and the conclusion is drawn that therefore changes should not be made in these positions where the persons are found to be honest, capable, and diligent. To me it seems entirely improbable that such a rule will be adopted with the concurrence of the people, considering the fact that the political complexion of the country will be changed only after a great struggle and elaborate discussion. Such a change necessarily implies a deliberate opinion on the part of the people that the party proclaimed as dominant is better fitted to ad-

minister the government than the party it is to supersede. The electors who bring the party into power and the chief men who take office as the result of the election will no doubt entertain the opinion that men equally honest and capable can be selected from their own party to fill the various offices of the government, and they will no doubt insist that to insure a successful administration it is absolutely necessary to make many changes. In fact the struggle at the polls was to change the

policy of the government by changing its officers.

Between the position on the one hand that no changes shall be made, and on the other hand that all shall be changed, there would seem to be a ground, at once reasonable and just, upon which all might stand. It occurs to me that if the leading and confidential positions in each department and bureau were subject to change at any time, for reasons satisfactory to the head of the department, and all the clerkships and other employments were for terms of four years, greater stability would be given to the service, sudden and sweeping changes would be avoided, and as these terms would be constantly expiring, the entire body of the public service would be within the easy reach of public opinion.

FIXITY OF TENURE.

Fixity of tenure is recognized as a wise limitation upon the power of choosing officers by ballot. So, upon principle, the same limitation may be applied to the appointing power, with acceptability to the people, but it is inconsistent with the genius of our government, and contrary to the public sentiment of the people to have the great body of the officers and employés of the executive branch of the government to hold their positions by a life tenure, or during good behavior. Such a system would create a privileged class removed from the influences of popular sentiment, which in this country is a constantly operating force favorable to honest, efficient administration. It would repress the laudable and honorable ambition of other citizens to serve the government in official positions and would manifestly tend to weaken the hold that our system of popular government has upon the minds of the people.

I am of opinion that the highest type of civil administration can be found by giving increased certainty to the official tenure by which offices are now held, but leaving them within the easy control of public sentiment, so that the whole official body can be kept abreast with the

progressive opinions of the people.

One of the most important changes to be made in the present system is to provide by law for a fixed tenure for subordinate officers and clerks appointed by the various heads of departments. Where an applicant for appointment, whose indorsements as to character, standing, and habits are satisfactory, has passed a suitable examination, as now provided for by law, the appointment should be on trial, say, for a period of twelve months. At the end of this time if the appointee has been diligent in the performance of duty and has shown an aptitude for the service, he should be appointed for a term of three years, and be eligible for reappointment.

PROMOTIONS, REMOVALS, AND RETIREMENTS.

The promotions from grade to grade are necessarily slow. With the great majority of clerks, therefore, in all the departments the hope of promotion does not constitute a very powerful motive to excel. It would greatly tend to secure efficiency in the service to provide that the reg-

ular pay of 10 per cent. of the clerks in each bureau might be increased at the beginning of each fiscal year, say, 5 per cent for marked capacity, fidelity, and zeal in the discharge of duty, this increase to be made upon the certificate of the head of division, the chief clerk, and the head of the bureau. Promotions should be made strictly upon merit, after a suitable examination, and upon the recommendation of the head of the proper bureau.

The removals of clerks and employés should be for dishonesty, incapacity, neglect of duty, insubordination, intemperance, immorality, or inability, such disqualifications to be ascertained under suitable regula-

tions prescribed by the head of the proper department.

Heads of divisions and persons occupying confidential relations to the heads of departments and bureaus should be subject to change for rea-

sons satisfactory to the head of the department.

Persons retiring from the service upon resignation or expiration of term, without fault, should be given an honorable discharge. moval from the service of persons rendered unfit by the infirmities of years, or from other causes disconnected from misconduct, is at all times an unpleasant duty to perform, especially when such officers or clerks have rendered valuable services through a number of years and from their meager salaries have been unable to lay by a competency for old To mitigate the hardship of such cases and to insure a proper recognition of faithful service I would suggest the propriety of providing by law that all subordinate officers, clerks, and employés retired, without fault, by resignation, expiration of term, or inability after a service of four years, shall be entitled to receive one month's pay for each year and pro rata for each fraction of a year of service rendered, such retiring pay to be computed at the rate of pay the person has received from time to time.

RECAPITULATION.

The adoption of this system would embody the following ideas:

1. The establishment of a term of office of four years for subordinate officers, clerks, and employés.

2. Requiring all applicants for appointment to be well indorsed as to

character, and to stand a proper examination as to attainments.

3. A temporary appointment for one year, on trial.

4. If found worthy, the temporary officer or clerk to be appointed for three years, the balance of a regular term of four years.

5. The officer or clerk to be eligible for reappointment.

6. As a stimulus to the exercise of marked capacity, fidelity, and zeal in the service, the pay of 10 per cent of the clerks of each bureau to be increased 5 per cent. upon proper certificates at the commencement of each fiscal year.

7. Promotions to be upon merit, ascertained by examination and certi-

fied to by the head of the bureau.

8. Causes for removal to be dishonesty, incapacity, neglect of duty, insubordination, intemperance, immorality, or inability.

9. Persons retiring, without fault, to receive an honorable discharge. 10. Subordinate officers, clerks, and employés, retired, without fault, after a service of four years, to receive retiring pay, equal to one month's pay for each year and pro rata for each fraction of a year of service.

The principles suggested could readily be applied to the entire civil

service of the country.

In respect to the question of retiring pay, I am satisfied that the great majority of the persons to whom it would apply are solely dependent

upon their salaries for the support of themselves and families. in the Internal Revenue Office shows the fact that the average number of persons dependent upon the salaries of clerks and employés is as follows: Salaries of \$1,800, \$1,600, \$1,400, \$1,200, and \$720, the average is four persons to each salary; salaries of \$1,000, three persons; salaries of \$900, two persons; and salaries of \$660, five persons to each salary. It is obvious from this statement that persons drawing salaries of \$1,800 and less, will have but little left at the end of the year after supporting their families. It will be readily understood that, with a knowledge of such facts, the head of a bureau will be disposed to hesitate to recommend the discharge of persons who, after serving the government a number of years with fidelity, have become incapacitated for a proper performance of duty by old age. They thus become pensioners on the government and are retained to the injury of the service. The proposed provision for retiring pay, if adopted, would, as before stated, mitigate the hardship of discharging such persons from the service, and would, in my opinion, be a satisfactory solution of a difficult and delicate problem.

TERM OF OFFICE OF COLLECTORS.

In my annual report for the year ended June 30, 1877, I used the following language on the subject of tenure of office of collectors:

I call your attention to the fact that the law creating the office of collector of internal revenue fixes no tenure to the office. In my opinion it is altogether desirable that the term of this office should be fixed at four years. It often occurs that when a collector has served for a longer period than four years, constant efforts are being made for his removal; and many officers, however well they may have discharged their duties, feel, after a four years' service, uncertain as to the length of time they will be retained in office. Where an officer is appointed for a term of four years he has a right to expect that if he performs his duty diligently and faithfully he will not be disturbed until his term expires, and this feeling of security I regard as an important element in maintaining a good public service. From my limited observation in public life, I have come to the conclusion that when it can reasonably be done there should be a fixed tenure of all officers of the government. I have the honor to recommend that a law be passed fixing the tenure of office of all collectors of internal revenue hereafter appointed at a term of four years.

I now renew my recommendation in the hope that this subject will receive the early and earnest attention which it demands. It is an anomaly in the creation of important executive offices to omit fixing four years as the official term. By sections 769, 779, 2613, and 3830, United States Revised Statutes, the term of office of district attorneys, marshals, collectors of customs, naval officers, surveyors, and postmasters is fixed at four years. The original act, from which some of these sections are taken, was approved September 24, 1789, and the rule thus early adopted has, I believe, been maintained by subsequent legislation, with the exception of the act of July 1, 1862, creating the office of collector of internal revenue.

ADDITIONAL TAXES DUE FROM BANKS.

Last March certain facts came to the knowledge of the collector of internal revenue at Chicago which led him to believe that one of the banks of that city had failed to make full returns of its capital and deposits for taxation. At the collector's request I sent a competent revenue agent to make an examination of the books of the bank, which was done under the supervision of the collector, and it was found that a large amount of taxes was due the government. The books of all the banks in the city of Chicago making returns to this office were also examined, and in most cases it was found that errors had been made in rendering their returns, though in a number of instances the amounts involved were not large. In the case of certain foreign banks doing

business in that city, large amounts of taxes were found due on capital brought into the United States and actually employed in the business

of banking.

The result of the examination in Chicago seemed to make it necessary to scrutinize the returns of the bankers of other cities. I therefore detailed a number of revenue agents to report to the collectors of internal revenue in the cities of Baltimore, Philadelphia, New York, and Boston, and the books of many of the banks were examined. A number of new and interesting questions of law arose upon the application of the statute to the varied and intricate business operations of bankers. It was found that while the returns of some banks had been accurate to the last cent the returns of others had been made with deductions as to both capital and deposits which in the opinion of this office were not admissible under the law.

Many bankers have submitted their books for examination without the necessity of invoking legal proceedings, and have shown a willingness that their entire liability for taxation shall be ascertained. other bankers have agreed to carefully examine their books and make full statements under the decisions recently rendered by this office of such additional taxes as they may be liable for, such statements to be subject to the verification of officers of internal revenue. Other bankers. questioning the right of internal-revenue officers to examine their books, have refused to either produce them or to answer interrogatories in regard to their liability for additional taxes. There has been already ascertained to be due the sum of \$722,705 from seventy banks in the cities of Chicago, New York, Baltimore, Boston, and Philadelphia, a considerable portion of which has been collected and paid into the Treasury. The other collectors have been instructed to examine the banks of their respective districts in regard to their liability for additional taxes. am satisfied that large additional sums are due the government from

Considerable irritation has been felt by many of the bankers in respect to the enforcement of the one hundred per cent. penalty imposed for rendering a "false or fraudulent return," it being contended that the penalty was intended to be enforced only when the return made was wilfully false. A case in which this question was involved was recently tried before the United States circuit court for the southern district of New York, "The German Savings Bank vs. Joseph Archbold, collector," and the court decided that it is not a prerequisite to the addition of the penalty that the return shall be wilfully false, but that if the return is not in fact true the Commissioner is authorized to affix the penalty. The exact language of the statute (R. S., section 3182) is "authorized and required."

This case has been appealed to the United States Supreme Court, and at my request the Attorney General has had it advanced on the docket, and it is set down for argument on the 20th of January next. Pending the decision of the Supreme Court upon this point I have consented in several important cases that the collection of the one hundred per cent. penalty already assessed shall be held in abeyance to await the decision of the court.

INDIVIDUAL STAMP FOR CIGARS.

The collecting the tax on cigars by placing the stamp on each cigar, instead of on the boxes as now provided by law, would afford the highest proof of the payment of the tax, and would prevent the fraudulent refilling of stamped boxes which is believed to be a great means of loss

to the government. Various patented stamps and devices have received the consideration of this office, the use of which at present seemed to be impracticable by reason of the great expense of some, and the difficulty in the preparation and handling of all of them. The frequent consideration of this subject, however, has brought me to the conclusion that the system of stamping each cigar with a stamp prepared for general use, without reference to the number packed in the box, can be introduced at an increase of nearly double the cost for paper and printing. To compensate the cigar manufacturer for the expense of putting the stamp on each cigar, a deduction of 5 per cent. might be made upon the stamps purchased which would cover the cost of applying the stamps to the cigars. The material objection to the adoption of this plan would be the repacking of imported cigars. Such a system would in my opinion materially add to the revenue of the government, and I recommend that the subject receive the careful consideration of Congress.

FRAUDS IN THE MANUFACTURE OF VINEGAR.

I again recommend the passage of a law either to prohibit the manufacture of vinegar by the alcoholic vaporizing process, provided for in section 5 of the act of March 1, 1879, or requiring the supervision of a storekeeper at each vinegar factory using the vaporizing process, the compensation of such storekeeper to be repaid to the government by the vinegar manufacturer. Experience has shown that the act above referred to opens the door to great frauds, and I am clearly of the opinion that early legislation should be had upon this subject.

APPARENT OVERPRODUCTION OF SPIRITS.

In my last; annual report under this heading I made the following statement:

I take the liberty of calling especial attention of distillers and the trade to the fact that on the 1st July, 1879, there were on hand in distillery warehouses 19,212,000 gallons of spirits, which was an increase of about 5,000,000 of gallons over the stock on hand at the same period of the previous year, and that on the 1st day of November, 1880, the amount of spirits on hand was 32,640,000, being an increase of 13,400,000 gallons over the amount on hand on the 1st of July, 1879. The steady increase in the number and capacity of distilleries in operation, suggests the probability of the continued enlargement of the stock on hand. It has occurred to me that this business was on the eve of being overdone, and that in the event of a recurrence of the agitation for a reduction of the tax, the holders of these spirits would be in danger of loss.

The amount of distilled spirits in distillery warehouses on the 1st day of November, 1881, was 67,442,186 gallons, an increase of 34,330,150 gallons over last year. On page 158 will be found a table showing the stock on hand by districts. The great bulk of these spirits is held in the State of Kentucky, and they are chiefly what are known as "sour mash" whiskies. The amount in warehouses on July 1, 1881, produced in the year 1879, was 3,138,360 gallons, the tax upon which will fall due during the year 1882. It would seem probable that the high price of grain and this immense stock on hand will cause a reduction in the product during the ensuing year, and the probability of the distillers and owners of this stock having serious trouble in meeting their obligations to the government for the taxes as they fall due, will thereby be greatly diminished.

DISTILLERIES OF 100 BUSHELS AND UNDER.

Prior to January, 1881, all distilleries of the capacity of sixty bushels a day and under were in charge of but one officer, who performed the

joint duties of storekeeper and gauger, and all distilleries above the capacity of sixty bushels were in charge of storekeepers and gaugers as distinct officers. After consideration, I came to the conclusion that it was desirable, as an economic measure, to raise the rate of capacity of distilleries at which a storekeeper and gauger combined in one officer could be employed from 60 to 100 bushels per day. On my recommendation to the honorable Secretary it was accordingly ordered that in all distilleries of the capacity of 100 bushels per day and under, a combined storekeeper and gauger should be employed. The saving thus effected cannot be exactly computed, but is believed to be in the neighborhood of \$22,000 per annum.

REDUCTION OF PAY OF STOREKEEPER AND GAUGERS.

In April last I directed that the daily compensation of officers holding the combined office of storekeeper and gauger, and assigned to duty at distilleries having a daily capacity of not exceeding twenty bushels of grain, should be reduced from \$4 dollars to \$3 dollars per diem. change seemed to be demanded by reason of the disparity between the amount of labor required of these officers and the pay received.

Accordingly notice of the change in rate of pay, to take effect on the first of the month succeeding, was sent out to 634 officers assigned to the same number of distilleries having the daily capacity above stated, and situated in 46 collection districts, resulting in an immediate saving of \$634 daily, and a total saving during the remainder of the fiscal year

of nearly \$26,000.

Notwithstanding these measures of economy there was a deficiency in the appropriation for the pay of storekeepers and gaugers and miscellaneous expenses for the last fiscal year, of \$65,000. I have the honor to recommend that this sum be appropriated at the earliest day practicable, so that these officers shall receive pay for their services.

APPOINTMENTS OF STOREKEEPERS, GAUGERS, &C.

On the 16th of July last the system of appointing storekeepers, gaugers and other subordinate officers of the Internal Revenue Service, established by circular of date of June 30, 1880, was changed by the following order:

> TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., July 16, 1881.

To Collectors of Internal Revenue:

Hereafter, in recommending persons for appointment to the office of storekeeper, gauger, storekeeper and gauger, or inspector of tobacco, snuff, and cigars, collectors of internal revenue will require each person recommended to make an application in writing, addressed to the Secretary of the Treasury, stating his age, legal residence, place of nativity, service in the Army or Navy, if any, names of relatives, if any, in the government service, and in what capacity employed; experience in the duties of the office for which he applies; business in which engaged at date of application, and interest which he proposes to retain therein should he be appointed.

The application must be accompanied by testimonials as to character for sobriety, industry, and business habits of the applicant, and will be inclosed in a letter addressed by the collector of the district to the Secretary of the Treasury, and forwarded to the Commissioner of Internal Revenue, stating the necessity for the appointment,

and his personal knowledge as to the fitness of the applicant for the position.

If the appointment will involve the dismissal of any person in the service, that fact should be stated by the collector, as well as the reasons why, in his opinion, the dismissal should be made.

Correspondence relative to the removals and resignations of incumbents should be addressed to the Secretary of the Treasury through the Commissioner of Internal Revenue.

All papers relating to the appointment and removal of such officers (including copies of reports of revenue agents) will be forwarded by the Commissioner of Internal Revenue, with his recommendation in each case indorsed thereon, to the Secretary of the Treasury for action.

WILLIAM WINDOM, Secretary.

The system established by this circular works admirably. A beneficial effect upon the service was felt immediately after its adoption, and it is now found quite practicable to hold these officers to a proper accountability, and to establish amongst them a spirit of emulation similar to that which prevails in other branches of the service.

GENERAL CONDITION OF THE SERVICE.

The condition of the service continues to improve, and the spirit of emulation engendered by frequent inspections of officers, and reports upon the various districts is unabated. Thorough discipline is enforced in every branch, and every officer is held responsible for the faithful performance of his duties.

EXAMINATION OF COLLECTORS' OFFICES.

The frequent examination of the accounts of collectors has been continued during the past year with most gratifying results. Increased pride in the service is everywhere manifest, and complete uniformity in the method of keeping accounts prevails throughout the country. The standard of excellence reached is very commendable and reflects great credit upon the collectors and their subordinates.

Experience has shown that the most trusted persons having custody of public or private funds may yield to the temptation of converting those funds to their individual use. The sense of wrong doing prevents the perpetration of such acts by the majority of persons, but the constant danger of detection and exposure by careful examinations of accounts, made at irregular intervals, doubtless exerts a wholesome check over those who might otherwise, perhaps, prove derelict.

MISCELLANEOUS EXPENSES.

In compliance with the provisions of the act of March 3, 1881, making appropriation for internal revenue, I submit the following detailed statement of the miscellaneous expenses for the service:

Express on public money to depositories	\$6,655	37
Stationery for internal-revenue officers	13,925	36
Internal-revenue Record for internal-revenue officers	2,409	35
Telegraphing	1,312	93
Compensation of United States attorneys in internal-revenue cases under	, .	
sections 827 and 838, Revised Statutes	7,948	50
Locks for distilleries	4,509	
Hydrometers for use in gauging spirits	10,200	95
Gauging-rods for standard-test gauging, &c	217	
Expenses of seizures and sales by collectors	709	05
Steel dies for numbering stills for fruit spirits	18	15
Traveling expenses of clerk's under special orders of the department	930	
Rent; of offices leased by the Secretary of the Treasury in New York City for	•••	
the collector of the second district	5,291	67
Total	54 197	87

EXPENSES OF COLLECTORS' OFFICES.

The expenses for compensation of collectors, deputy collectors, &c., per diem of storekeepers, and fees and expenses of gaugers in each collection district are shown in the following statement:

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors for the fiscal year ending June 30, 1882, are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	
\$25, 000 or less	\$2,000
25, 000 to \$37, 500—\$12, 500	2,125
37,500 to 50,000— 12,500	2,250
50,000 to 75,000— 25,000	2,375
75, 000 to 100, 000— 25, 000	2,500
100, 000 to 125, 000— 25, 000	2,625
125, 000 to 175, 000— 50, 000	2,750
175, 000 to 225, 000— 50, 000	2,875
225, 000 to 275, 000— 50, 000	3,000
275, 000 to 325, 000— 50, 000	3, 125
325, 000 to 375, 000— 50, 000	3, 350
375, 000 to 425, 000— 50, 000	3,375
425, 000 to 475, 000— 50, 000.	3,500
475, 000 to 550, 000— 75, 000	3,625
550, 000 to 625, 000— 75, 000	3,750
625, 000 to 700, 000— 75, 000	3,875
700, 000 to 775, 000— 75, 000	4,000

WORK OF REVENUE AGENTS.

Thirty-five revenue agents have been employed during the past year, 1 as chief of division in the office, 22 in charge of divisions, 5 employed in examining collectors' accounts, 4 assistant agents in charge of divisions, and 1 on special duty. One thousand three hundred and seventeen violations of law have been reported by revenue agents during the year, five hundred and three persons have been arrested on their information, property to the value of \$73,365.36 has been reported by them for seizure, and unpaid taxes and penalties amounting to \$495,035.43 have been reported by them.

There has been expended from the appropriation for salaries and expenses of revenue agents during the year as follows:

•	
Aggregate salary of agents	\$82,830 65
Aggregate salary of agents	. 41,619 08
Stationery furnished agents	229 20
Stationery furnished agents Transportation over Pacific Railroads under orders from Treasury Depar	t-
ment	1,757 88
•	
Totál	126, 486 81

EXPENDITURES FOR THE DISCOVERY AND PUNISHMENT OF FRAUD.

In accordance with the provisions of the act making the appropriation, the following detailed statement of expenditures from the appropriation for detecting and bringing to trial and punishment persons guilty of violating the internal revenue laws is submitted.

Amount expended through collectors of internal revenue in the employment of persons for the detection of frauds, and for information

leading to the discovery of frauds, and punishment of guilty persons, as follows:

Three	750	Three	150
One	720	Three	120
Eleven		Three	100
Thirteen	600	One	60
Two	550		

Also, one hundred and ninety-one clerks, messengers, and janitors, who receive salaries as follows:

One clerk One clerk Five clerks Seven clerks Two clerks Four clerks Twenty-six clerks Eighteen clerks Twenty clerks Eighteen clerks Twenty clerks Trenty-seven clerks Eighteen clerks Tour clerks Tour clerks Tour clerks Tour clerks Three clerks	1,100 1,000 900 800 750 720 700	Twelve clerks Eight clerks Three clerks One clerk Seven clerks Two clerks Three janitors One janitor One janitor One janitor Three messengers One messenger Two messenger Two morters	\$600 500 400 350 300 200 120 100 75 600 450 300
Two clerks Two clerks	670.	Two porters	300 100
		-	

There are also employed 706 gaugers who receive fees not to exceed \$5 per diem; 1,074 storekeepers and gaugers who receive not to exceed \$4 per diem; 644 storekeepers who receive not to exceed \$4 per diem (all of the foregoing officers are paid only when actually employed), and 30 tobacco inspectors who receive fees to be paid by the manufacturers.

Storekeepers and gaugers assigned to distilleries of a capacity not

exceeding twenty bushels receive but \$3 per diem.

CONDITION OF THE OFFICE.

The work of this office has been kept thoroughly in hand, the ambition of the employés being to make a record entitling them to the commendation of their superiors. Nothing has been left undone by the several heads of divisions and their subordinates to bring the service up to that high standard of excellence which challenges commendation.

I desire to thank the officers, clerks, and employés of this bureau for the cheerful alacrity with which they respond to every duty, and the pride shown by them in their efforts to bring the service in this office to

highest perfection.

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1883, the sum of \$257,600, as salaries for the following officers, clerks, and employés in this bureau:

One commissioner, at	\$6,000
One deputy commissioner, at	3,500
Seven heads of division, at	
One stenographer, at	
Twenty-three clerks, class four, at	
Twenty-six clerks, class three, at	1,600
Thirty-six clerks, class two, at	1,400°
Twenty-one clerks, class one, at	
Thirteen clerks, at	1,000
Fifty clerks, at	900
Three messengers, at	840
Four assistant messengers, at	720
Ten laborers, at	660
2 32 200 02 92 97 97 97 97 97 97 97 97 97 97 97 97 97	

An aggregate of one hundred and ninety-six persons.

An increase in the salary of the deputy commissioner, and of the five heads of division, is recommended for the following reasons:

The law creating the office of deputy commissioner fixed his salary at \$3,500. The duties of the office are of great importance, and their faith-

ful performance fully entitles the officer to that pay.

The law creating the office of head of division states that there shall be seven heads of division, who shall receive each a salary of \$2,500. The appropriations for the years ending June 30, 1878, June 30, 1879, June 30, 1880, and June 30, 1881, allowed two heads of division at a salary of \$2,500 each, and five heads of division at a salary of \$2,250

each. There is no just ground for this discrimination; the officers fully earn \$2,500 each, and in my judgment should receive that amount.

An increase in the salary of the stenographer is recommended for the reason that the law authorizing the appointment fixes the compensation at \$2,000, which is no more than a just remuneration for the duties performed.

The force of messengers and laborers in this office is entirely inadequate for the increased work to be done. I therefore make a special

request that three messengers be added to the force.

An increase of \$4,270 over the appropriation for the present year will give the above named officers the salaries to which they are entitled under the law, and will provide for the necessary increase in the messenger force.

MANUFACTURE OF PAPER.

During the fiscal year there has been manufactured by Messrs. S. D. Warren & Co., of Boston, under the contract entered into May 24, 1880, 600,000 pounds of paper for internal-revenue stamps. The prices paid were for vegetable-sized paper 11½ cents per pound, and for animal-sized paper 12½ cents per pound. An additional order has been given to the above-named parties for 261,000 pounds under the same contract and at same rates for the year ending June 30, 1882. The paper furnished has been satisfactory as to quality, and orders have been promptly executed.

PRODUCTION OF STAMPS.

During the last fiscal year all internal-revenue stamps have been produced by the Bureau of Engraving and Printing, except stamps imprinted upon bank checks, which are supplied by the Graphic Company of New York City, and stamps upon foil wrappers for tobacco, which are printed by John J. Crooke & Co., of the aforesaid city, both under the superintendence of this office.

NUMBER AND VALUE OF STAMPS ISSUED.

During the fiscal year stamps were received by this office from the printers, and issued to collectors, agents, and purchasers as follows, viz:

Kind.	Number.	Value.
Stamps for distilled spirits, tax-paid	1, 367, 400 4, 798, 800	\$71, 084, 790 00 20, 600 00
Stamps for distilled spirits, aggregate Stamps for tobacco and suuff Stamps for oigars and cigarettes Stamps for fermented liquors and brewers' permits Stamps for special taxes Stamps for documents and proprietary articles	78, 070, 733 49, 618, 420	71, 105, 390 00 28, 993, 066 12 17, 033, 956 50 14, 63C, 225 00 9, 606, 850 00 4, 165, 206 75
Total	712, 460, 323	145, 534, 694 37

All stamps delivered to this office by the Bureau of Engraving and Printing were, on their receipt, counted, and their issue, as above, involved the preparation of 45,340 packages, 42,774 of which were forwarded to their destination by registered mail and 2,566 were forwarded by express. The handling of this large number of stamps has been accomplished without loss, either while in the hands of the printers, in the custody

of this office, or in the course of transmission. The officers of the Washington City post-office are entitled to the thanks of this office for the prompt and faithful manner in which this large amount of registered matter has been handled.

REDEMPTION OF STAMPS.

I renew the recommendation made in my last report, that that portion of section 17 of the act of March 1, 1879, which prohibits the redemption of stamps unless the same are presented within three years after their purchase from the government or a government agent for the sale of stamps, be repealed.

MATCH STAMPS SOLD.

Amount of stamps sold to match manufacturers during the following fiscal years, commissions not deducted:

SUITS ON MATCH BONDS.

Of the thirteen suits referred to in my last annual report as pending against stamp agents and match manufacturers, on bonds, for the recovery of \$117,413.01 due on the sale of stamps for the past five years, there are ten remaining undisposed of, amounting to \$107,877.20.

There have been 24 persons, principals and sureties on match manufacturers' bonds, proceeded against criminally for attempting to defraud the government, five of whom have been convicted and are now in the penitentiary.

ABSTRACT OF SEIZURES.

Seizures of property for violation of internal revenue laws during the fiscal year ended June 30, 1881, were as follows:

isom your chaca bane by, 1001, were as fortows.		
30,714 gallons of distilled spirits, valued at	\$25,624	37
30,299 pounds of tobacco, valued at	6,288	69
.902, 377 cigars, valued at	9, 127	58
Miscellaneous property, valued at	118,534	69
		·
Total	159 575	33

ABSTRACT OF REPORTS OF DISTRICT ATTORNEYS.

The reports of district attorneys for the fiscal year 1881 of internalrevenue suits commenced, pending, and disposed of show that there were pending July 1, 1880, 7,417 suits, of which 6,053 were criminal actions, 1,064 civil actions, and 300 proceedings in rem. During the fiscal year 1881, there were commenced 3,859 suits, 3,519 of which were criminal suits, 279 civil suits, and 61 actions in rem. Of the total of 3,859 suits thus pending, 862 have been decided in favor of the United States, with all costs paid, and 1,378 are reported as decided in favor of the government but neither judgment nor costs paid; 158 suits were settled by compromise; 540 suits were decided against the United States; 1,371 suits were dismissed, and 6,623 suits were pending July 1, 1881. Sentence has been suspended during good behavior in 331 criminal cases.

OFFERS IN COMPROMISE.

The following statement shows the number of offers received and accepted in compromise cases, for the fiscal year ended June 30, 1881, with amount of tax, assessed penalty, and specific penalty accepted, as provided under section 3229 Revised Statutes:

	Comproffe:		tax.	t of aspendity.	specific ty.

JUDGMENTS ON BONDS OF EX-COLLECTORS.

The following list of suits against late collectors of internal revenue or their sureties, in which judgments have been rendered during the last fiscal year, has been furnished through the courtesy of the Solicitor of the Treasury:

United States vs. John T. Foster, late collector of internal revenue for the first collection district of Alabama, et al.; judgment for \$9,372.98.

United States vs. Oscar A. Rice, late collector of internal revenue for the second collection district of Louisiana, et al.; judgment for \$10,304.42.

United States vs. Orten S. Hayes, surety on the second bond of George P. Peck, late collector of internal revenue for the second collection district of North Carolina; judgment for \$8,067.

United States vs. Charles W. Woollen, late collector of internal revenue for the third collection district of North Carolina, et al.; judgment for \$20,514.53.

United States vs. William P. Richardson, late collector of internal revenue for the fifteenth collection district of Ohio, et al.; judgment for \$296.

United States vs. Peter A. Wilkinson, late collector of internal revenue for the third collection district of Tennessee, et al.; judgment for \$421.91.

United States vs. John N. Camp, late collector of internal revenue for the first collection district of Texas, et al.; judgment for \$11,226.24.

COMPROMISES AFTER JUDGMENT.

The records of the Solicitor of the Treasury show that upon offers of compromise after judgment in internal-revenue cases during the fiscal year ended June 30, 1881, eleven offers were accepted, involving \$2,977.96; twenty offers were rejected, involving \$4,729 and costs, and thirteen offers are pending, involving \$7,829.28 and costs.

COLLECTIONS FROM RAILROADS.

The sum of \$91,669.66, unpaid taxes accrued under former laws, has been collected during the year from ten different railroad companies, making an aggregate amount collected from this source in five years of \$585,810.77.

CO-OPERATION OF OFFICERS OF JUSTICE.

I take great pleasure in tendering the thanks of this office to the district attorneys and marshals, and their assistants and deputies, for the promptness and regularity with which their reports have been made and the correspondence with this office has been attended to, and especially for their valuable aid in securing the enforcement of the laws. The clerks of courts are also entitled to thanks for the promptness with which they have made their reports.

RECEIPTS FROM TOBACCO.

The total amount of collections from tobacco for the fiscal year ended June 30, 1881, was \$42,854,991.31. This amount includes the collections of internal-revenue taxes imposed upon imported manufactured tobacco, snuff, and cigars, and the special taxes paid by manufacturers of tobacco, snuff, and cigars, and by dealers in leaf and manufactured tobacco, and is more than the receipts from the same source for the fiscal year ended June 30, 1880, by \$3,984,851.23.

TOBACCO AND SNUFF.

Manufactured tobacco, at 16 cents per pound. Manufactured tobacco at 24 cents per pound. Snuff, taxed at 16 cents per pound	977 47

Leaving to be withdrawn for consumption	541, 251
Allowing 13½ pounds to the thousand as the weight of imported cigars, the	

Decrease during fiscal year 1881 was 5, 172, 000

COMPARATIVE STATEMENT OF COLLECTIONS FROM TOBACCO.

The largest collection of revenue from manufactured tobacco and snuff made in any one fiscal year was made during the fiscal year ended June 30, 1877, to wit, \$28,148,767.90. The rates of tax then were, for all kinds of manufactured chewing and smoking tobacco, 24 cents per pound, and for snuff, 32 cents per pound. Of the former, 112,722,055 pounds were removed for consumption, and of the latter, 3,424,048 pounds.

During the last fiscal year the total quantity of manufactured tobacco, including snuff, removed for consumption was 147,013,405 pounds, being 34,291,350 pounds more than for the year 1877. By reason of the reduced and uniform rate of tax, the collections upon tobacco and snuff for the last fiscal year fell below those of 1877 by the sum of \$4,626,297.27.

The collections from cigars, cheroots, and cigarettes for the fiscal year ended June 30, 1877, were \$11,061,278.15, whilst for the last fiscal year they aggregated \$17,088,706, showing an increase of \$6,027,427.85.

The total receipts from tobacco in all its sources for the fiscal year ended June 30, 1877, were \$41,106,546.92. This is the largest amount collected on tobacco in any one year prior to the last, which shows an increase over the year 1877 of \$1,748,444.39.

It is easy to see from the foregoing statement and figures that the large and increased collections for the last fiscal year are due mainly to the remarkable increase in the production and consumption of cigars and cigarettes, the rates of tax on which have remained undisturbed since March, 1875.

COMPARATIVE PERCENTAGE OF INCREASE.

The increase in the quantity of tobacco and snuff removed for consumption during the last fiscal year over that of the fiscal year ended June 30, 1877, is found to be $26\frac{3}{5}$ per cent., while the increase of cigars has been over 49 per cent., and of cigarettes over 280 per cent.

TOBACCO PRODUCT FOR THE LAST FIVE YEARS.

The following shows the annual product of manufactured tobacco, snuff, and cigars, for the last five fiscal years:

	Tobacco—including snuff.	
		Pounds.
1877		127, 481, 149

LEAF TOBACCO.

The annexed tables show that during the calendar year 1880, the number of pounds of leaf tobacco consumed in the manufacture of tobacco, snuff, cigars, cheroots, and cigarettes, was as follows:

Manufactured into tobacco and snuff	145, 911, 394
Made into cigars, cheroots, and cigarettes	207, 094, 752
Deduct imported leaf used	

The tabular statements made in the report of the Bureau of Statistics for the fiscal year ended June 30, 1881, show that the number of pounds of leaf tobacco exported during that year was 227,026,605.

STOCK FED AT DISTILLERIES.

A growing industry in connection with the distilling interests of the country is the feeding of cattle and hogs. The following statistics, which have been collected for the first time, show the number of cattle, &c., fed in connection with grain distilleries during the past winter:

STATEMENT showing the number of CATTLE and HOGS fed at REGISTERED GRAIN DISTILLERIES, with their AVERAGE and TOTAL INCREASE in WEIGHT, during the fiscal year ended June 30, 1881, by COLLECTION DISTRICTS.

·	

The quantity of spirits, 64,648,111 gallons, actually remaining in warehouse June 30, 1881, is the quantity as shown by the original gauge of each package.

The quantity of spirits withdrawn from distillery warehouses for

exportation during the year was 15,921,482 gallons.

Of the twenty one tables immediately following, eight furnish detailed statements of items given in aggregate in the preceding table, three afford information as to production and movements of distilled spirits during the first four months of the year ending June 30, 1882, the others being chiefly comparative statements as to spirits in distillery warehouses, also those held by wholesale liquor dealers, and rectifiers, &c., as follows:

The quantity, by districts, taxable gallons, and months of production of the spirits (31,363,869 gallons) actually in warehouse July 1, 1880, page 118.

The same quantity, by districts and by the different kinds, as known

to the trade, page 126.

The quantity of the different kinds of spirits as known to the trade (by districts and in aggregate for the fiscal year 1881, and in aggregate only for the fiscal year 1880) produced, page 128.

The quantity of the different kinds, &c. (as in case of the spirits produced), of spirits withdrawn, upon payment of the tax, for export, for

scientific purposes, for the use of the United States, and for transfer to manufacturing warehouses, and the quantity lost by casualty, page 130.

The quantity of the different kinds of spirits withdrawn for export from each district and in aggregate, for the years 1880 and 1881, pages 134,

Increase and decrease of different kinds of spirits exported in 1881 as compared with 1880, page 135.

Increase and decrease of different kinds of spirits tax-paid in 1881 as compared with 1880, page 133.

Spirits lost by leakage in warehouse in 1880, page 142. Spirits lost by leakage in warehouse in 1881, page 133.

Spirits lost by casualty during the year, with percentage on production, page 133.

The quantity of spirits withdrawn for export, by the different kinds, by ports from which exported and by ports to which exported, for the fiscal year 1880, page 136.

The quantity of spirits withdrawn for export, by the different kinds, by ports from which exported and by ports to which exported, for the

fiscal year 1881, page 138.

The quantity, by districts, taxable gallons, and months of production of the spirits (64,648,111 gallons) actually in warehouse June 30, 1881. page 144.

The same quantity, by districts, and by the different kinds known to

the trade, page 152.

The stock on hand, production, and movement of spirits for the fiscal years 1877, 1878, 1879, 1880, and 1881, page 155.

The production and movement of spirits during the first four months

of the fiscal year 1881, page 157.

The production and withdrawal of spirits during the first four months of the fiscal year 1882, page 156.

Spirits withdrawn for export during the first four months of fiscal

year 1882, page 159.

Spirits withdrawn for export during first four months of last four fiscal years, page 160.

Spirits in hands of wholesale liquor dealers and rectifiers October 1, 1880, and October 1, 1881, page 164.

Spirits and tobacco removed in bond for export during the past nine fiscal years, page 154.

The quantity of each month's product in warehouse July 1, 1880, with-

drawn during the year ended June 30, 1881, page 141.

Spirits remaining in warehouse at close of each last thirteen fiscal years, page 142.

Increase in different kinds of spirits in warehouse at end of the fiscal year 1881, as compared with 1880, page 143.

PRODUCTION OF SPIRITS DURING THE YEAR.

The quantity of spirits (117,728,150 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1881, exceeded the production of the previous year (90,355,270 gallons) by 27,372,880 gallons.

The increase in production for the fiscal year 1881 over the production for the fiscal year 1880 is distributed among the different varieties

known to the trade as follows:

Increase in production of—

MENT OF TAX.

# SPIRITS WITHDRAWN FROM DISTILLERY WAREHOUSES UPON PAY-

m	Gallons.
The quantity of spirits withdrawn from distillery warehouses upon payment of tax was, in 1881	67, 372, 575
And was in 1880	61, 100, 362
Increase	6, 272, 213

This increase is distributed, except as to the kind known as high wines, as follows:

wines, as follows:	
Bourbon whisky.  Rye whisky. Alcohol.  Rum Gin Pure, neutral, or cologne spirits Miscellaneous	1,788,825 35,158 71,888 2,846,819
Total increase Decrease in withdrawals of high wines	
Net increase in withdrawals, tax-paid	6, 272, 213

#### LOSS OF SPIRITS BY LEAKAGE IN WAREHOUSE.

The quantity of spirits, \$11,466 gallons, reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of the actual leakage in warehouse which has occurred during the year and which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880. It is noted that in most cases the quantity allowed by the law has covered the entire loss, so that the above quantity is believed to indicate almost the entire loss in warehouse on the spirits withdrawn during the year, except in cases of casualty, and may be safely used as a factor in computing probable losses on spirits in distillery warehouses.

### LOSS OF SPIRITS BY CASUALTIES.

During the fiscal year 1881 there were reported as lost by fire and other casualties, while stored in warehouse, 108,008 taxable gallons of spirits, or about seventy-three thousandths of one per cent. of the entire quantity of spirits (149,092,019 gallons) handled in the several distillery warehouses in the United States during that period. The loss so reported is distributed among the several kinds of spirits as follows:

Rye whisky		. 83,642 . 86 . 208
	······································	

Of the 83,642 gallons of rye whisky above reported, 73,785 gallons were reported destroyed by one fire in the twenty-second district of Pennsylvania; and of the 23,655 gallons miscellaneous spirits, 23,612 gallons were reported as lost in Southern districts, and mainly in warehouses located in remote parts of the districts where the supervision of revenue officers is necessarily limited.

## SPIRITS EXPORTED DURING FISCAL YEAR 1880.

STATEMENT by DISTRICTS, and in TAXABLE GALLONS, of the QUANTITY of the DIFFERENT KINDS of SPIRITS as KNOWN to the TRADE, and of the TOTAL QUANTITY WITHDRAWN for EXPORT during the fiscal year ended June 30, 1880.

1 Wisconsin	13, 186	4, 702	860, 934		488, 302	33, 580	33, 580 15, 921, 482

The following figures show the increase or decrease as to the various kinds of spirits exported in the year 1881, as compared with the year 1880:

		Gallons.
Decrease in alcohol		335, 723
Decrease in rum		413, 184
Decrease in pure, neutral, or cologne spirits		101,515
Decrease in high wines		2,948
Total decrease		853 370
	Gallons.	000, 0.0
Increase in bourbon whisky		•
Increase in rye whisky	4,660	
Total increase		
77 / 7	-	044 104
Net decrease		. 544, 184

The decrease in the quantity of spirits exported during the fiscal year 1881, as compared with the previous year, is owing to the high price of grain, and occurred during the latter part of the year. This cause is likely to produce a still greater reduction during the year ending June 30, 1882. During the four months ended November 1, 1880, the exportations exceeded those of the four months ended November 1, 1879, by 815,148 gallons, while during the four months ended November 1, 1881, the quantity exported fell short of the quantity exported during the four months ended November 1, 1880, by 2,044,787 gallons.

#### PORTS FROM WHICH AND PORTS TO WHICH SPIRITS WERE EXPORTED DURING THE FISCAL YEAR 1880.

Section 15 of the act of May 28, 1880, also makes provision, in case of transfers of spirits to manufacturing warehouses, for an allowance for loss by unavoidable accident, without fraud or negligence, as in the

case of spirits shipped in bond for exportation.

The transfers during the fiscal year 1879 were 13,213 gallons, during the fiscal year 1880, 218,212 gallons, and during the fiscal year 1881, 205,828 gallons. Attention, however, is called to the fact, that inasmuch as the original act was passed March 1, 1879, and the amendatory act May 28, 1880, the transactions of the fiscal years prior to 1881 do not cover a full year's operations under the law as it now exists.

# SPIRITS WITHDRAWN FROM WAREHOUSE FOR SCIENTIFIC PURPOSES, AND FOR USE OF THE UNITED STATES.

The quantity of alcohol withdrawn free of tax from distillery warehouses for the use of colleges and other institutions of learning in the preservation of specimens of natural history in their several museums, or for use in their chemical laboratories, and of spirits of various kinds for use of the United States, amounted during the year to 24,902 gallons, an increase of 353 gallons over the quantity withdrawn during the previous year.

#### DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORA-TION IN WAREHOUSES.

The quantity of distilled spirits allowed under the provisions of section 17 of the act of May 28, 1880, for loss by leakages or evaporation in warehouses during June, 1880 (the only month of the fiscal year in which the act was in force), was 75,834 gallons.

The quantity allowed during the fiscal year 1881 was \$11,466 gallons.

#### SPIRITS REMAINING IN WAREHOUSES AT THE CLOSE OF THE YEAR.

In my report for the year ended June 30, 1879, it was shown that the quantity (19,212,470 gallons) in warehouses June 30, 1879, exceeded the quantity in warehouse at the close of any preceding fiscal year. This quantity, however, was much exceeded by the quantity (31,363,869 gallons) remaining in warehouse June 30, 1880, which latter quantity is more than doubled by the quantity (64,646,111 gallons) in warehouse June 30, 1881.

The following table shows the quantity remaining in distillery warehouses at the close of each of the thirteen fiscal years during which

spirits have been stored in such warehouses:

	Gallons.
Quantity remaining June 30, 1869	:16,685,166
Quantity remaining June 30, 1870	
Quantity remaining June 30, 1871	6,744,360
Quantity remaining June 30, 1872	10, 103, 392
Quantity remaining June 30, 1873	14, 650, 148
Quantity remaining June 30, 1874.	15, 575, 224
Quantity remaining June 30, 1875.	13, 179, 596
Quantity remaining June 30, 1876	12, 595, 850
Quantity remaining June 30, 1877	13,091,773
Quantity remaining June 30, 1878.	14,088,773
Quantity remaining June 30, 1879	19, 212, 470
Quantity remaining June 30, 1880	31, 363, 869
Quantity remaining June 30, 1881	64, 648, 111

It is understood from leading distillers that since the extension of the bonded period the business of selling spirits in bond has largely increased, and that the greater portion of goods now in bond is owned by dealers in various parts of the country who have assumed to the distiller the payment of the taxes as they fall due.

It is evident that the causes adverted to in my last year's report as leading to this great increase in the stock of spirits remaining in distillery warehouses, and as indicating the growing ability on the part of distillers to discharge their obligations to the government, have been

in full operation the past fiscal year.

The case of the sixth district of North Carolina was then cited as illustrating the great increase in the number of the legally authorized distilleries in sections of the country recently infested by illicit distillers. The same district can be again used as illustrating this fact, the number of distillery warehouses in that district having increased from

229 July 1, 1880, to 253 June 30, 1881.

In my last year's report reference was made to the building and successful operation of the largest distillery in the United States. I have now to report that this distillery has been enlarged and continued in successful operation during the year, that another having a capacity greater than the original capacity of the largest distillery has been built and operated during this year, and that others of its class have been greatly enlarged and fitted up with the latest improvements, thus enabling them to materially reduce the cost of production and to improve the character of their products. By the use of the latest improved purifying, refining, and redistilling apparatus, and the employment of experts, fine grades of alcohol, and pure, neutral, or cologne spirits are produced in distilleries ready for use in the arts and sciences without additional manipulation.

The decrease in the production and withdrawal of high wines, and the increase in the production and withdrawal of all other and finer kinds of spirits, are facts satisfactorily showing continued improvement

in the methods of producing distilled spirits.

Nearly nine-tenths of the spirits remaining in warehouse June 30, 1881 (58,102,094 gallons out of 64,648,111 gallons), were bourbon and rye whiskies, and the increase in the quantity in warehouse that day over that in warehouse June 30, 1880, was mainly the increase in these two varieties.

There was an increase in all varieties, as follows:

Increased quantity in warehouse, of—	
increased quantity in wateriouse, of—	Ganons.
Bourbon whisky	24, 751, 479
Rye whisky	6,039,477
Alcohol	256, 919
Rum	105,083
Gin	53,351
High wines	208, 016
Pure, neutral, or cologne spirits	1, 122
Miscellaneous	1,868,795
Total increase	33 984 949

#### TRANSFER OF SRIRITS TO MANUFACTURING WAREHOUSES.

In my report for the fiscal year ended June 30, 1880, attention was called to the law then recently enacted (May 28, 1880, section 14) enlarging the provisions of the internal revenue act of March 1, 1879, as to transfers of spirits from distillery warehouses to warehouses known as manufacturing warehouses, and established at ports of entry for the manufacture of medicines, preparations, compositions, perfumeries, cosmetics, cordials, and other liquors for export.

As stated in my previous report the act of May 28, 1880, enlarged the scope of the act of March 1, 1879, so as to provide for the withdrawal of every kind of spirits from distillery warehouses, the article thereto-

fore withdrawn having been limited to alcohol.

The following varieties of spirits appear to have been withdrawn under this new provision of the law, viz:

Bourbon whisky	Gallons. 966
Rve whisky	913
Pure, neutral, or cologne spirits	13, 468
Total	
Total all kinds withdrawn	205,828

This quantity is 13,384 gallons less than the quantity withdrawn for transfer to manufacturing warehouses during the year ended June 30, 1880.

#### SPIRITS AND TOBACCO REMOVED IN BOND FOR EXPORT.

The following statement shows the quantity and percentage of production of distilled spirits and manufactured tobacco (including snuff) removed in bond for export during each fiscal year since the passage of the act of June 6, 1872:

	Distilled ap	pirits.		Manufactured	tobacco.
Year.	Taxable (proof) gallons ex- ported.		Year. o	Pounds of to- bacco ex- ported.	Percentage of production.

#### PRODUCTION AND MOVEMENT OF SPIRITS DURING THE FIRST FOUR MONTHS OF THE PRESENT FISCAL YEAR.

The preceding tables show the production and movement of distilled

spirits during the first four months of the present fiscal year.

They show that the production is 1,889,623 gallons greater than for the corresponding period last year, the withdrawals for exportation are 2,044,787 gallons less, the withdrawals upon payment of the tax 2,314,957 gallons greater, and that the increased receipts from the gallon tax amount to \$2,083,461.30.

The quantity removed from manufactories for exportation during the fiscal year ended June 30, 1881, is 879,421.25 pounds greater than that removed during the fiscal year ended June 30, 1880, while the quantity unaccounted for at the close of the year 1881 is 3,931,231.375 pounds less than at the close of the year 1880.

The great diminution in the balance unaccounted for is clearly due to the operation of the act of June 9, 1880, amendatory of section 3385 of the Revised Statutes, to which attention was called in my last annual The increase in exportations may also, it is believed, be fairly attributed to the same cause.

In this connection I would call attention to the following paragraph which appeared in my last year's report, and renew the recommendation contained therein:

It, however, appears that in striking out a portion of section 3385, Revised Statutes, and substituting for the portion stricken out the amendatory provisions of

the new law, the language of that part of section 3385 relied upon as authorizing the exportation of tobacco, snuff, and cigars by railroad cars and other land conveyances was, through inadvertence, not restored. I see no good reasons why the exportation of these articles under section 3385, as amended, should be confined to vessels, and I would therefore recommend that as early as possible in the next session of Congress the law be amended so as to clearly provide for the exportation of tobacco, snuff, and cigars by railroad or other land conveyances.

#### EXPORTATION OF CIGARS AND CIGARETTES IN BOND.

1. Removed and unaccounted for July 1, 1880.

Cigars, at \$6 per M tax	Number. 1, 123, 600	Number.

# OPERATIONS AT SPECIAL BONDED WAREHOUSES FOR STORAGE OF GRAPE BRANDY.

The following statement shows the quantity of grape brandy placed in special bonded warehouses, withdrawn therefrom, and remaining therein at the beginning and close of the fiscal year ended June 30,1881, in taxable gallons:

and ganons.	Gallons.	Gallons.	Gallons
Remaining in warehouse July 1, 1880: First district of California. Fourth district of California.	63, 157 60, 456	123, 613	· ·
Removed for exportation and unaccounted for July 1, 1880: First district of California		439	124, 052
Produced and bonded during the year: First district of California	114,603	240, 124	1.64, 000
Received in first district from fourth district of California	-	20, 345	260, 469
		-	384, 521
Exported and accounted for during the year:  § First district of California	•	689	
First district of California	72, 231	141, 469	• •
Loss by regauge act of May 28, 1880: First district of California Fourth district of California	2,686	,	
Loss allowed for casualty:  Fourth district of California	,	4, 647 47	
acomoved from forther district to first district of commontain.		20, 345	167, 197
Removed for exportation and unaccounted for June 30, 1881:  First district of California  Remaining in warehouse June 30, 1881:	100 194	6 <b>7</b> 5	•
First district of California	80,475	216, 649	
	~		217, 324
		٤	384, 521

The amount produced and bonded during the fiscal year ended June 30, 1881, was 111,038 gallons more than in the previous year, while the amount removed tax-paid was 29,749 gallons larger than in 1880.

Of the quantity in warehouse June 30, 1881, 136,174 gallons were in the following named warehouses in the first district of California:

the following-named warehouses in the first district of Camornia	•
	Gallons.
No. 1. Bode & Danforth, at San Francisco	.104, 264
No. 2. Juan Bernard, at Los Angeles.	19, 179
No. 3. G. C. Carlon, at Stockton	12,731
	,
and 80,475 gallons were in the following-named warehouses in the	fourth

 district of California:
 Gallons

 No. 1. George Lichthardt, at Sacramento
 37,766

 No. 2. J. F. Boyce, at Santa Rosa
 13,894

 No. 3. H. J. Lewelling, at Saint Helena
 23,885

 No. 4. John Tivnen, at Sonoma
 4,930

STATEMENT of DRAWBACK of INTERNAL REVENUE TAXES allowed on EX-PORTED MERCHANDISE during the fiscal year 1881.

^{*} Machinery exported, 1868.

In connection with the foregoing statement I have to renew the recommendation made in my last annual report, that section 3244 Revised Statutes be so amended as to include distilling-worms belonging to stills manufactured for export, which, like stills, are subject to a tax of \$20 each. Also that an appropriation be made for the payment of drawback on articles exported under said section 3244 Revised Statutes, as also on distilled spirits exported under section 3329 Revised Statutes.

While a number of claims covering both stills and distilled spirits have been allowed by this office during the preceding two years, the claimants in these cases are unable to recover the amounts due them, in consequence of a failure on the part of Congress to make the necessary appropriation.

Secretary, and unassessable taxes recovered;					
also, amount of penalties and interest received			l		
for validating unstamped instruments (Form			ŀ		
58)	555, 315 50	275, 524 93		279, 790 57	
Special taxes (licenses)		60, 411 59			
Tax on income and dividends	40, 614 60	14, 903 33		25, 711 27	
Total	4, 814, 394 56	4, 669, 343 64		145, 050 92	

The foregoing table shows that a decrease has occurred in the assessments of the following taxes, as compared with the year ended June 30, 1880, viz:

On deficiencies in the production of distilled spirits.

On the circulation of banks.

On distilled spirits fraudulently removed or seized.

On fermented liquors removed from breweries unstamped.

On tobacco, snuff, and cigars sold or removed.

On legacies and successions.

On specific penalties, interest, taxes collected through suits. On incomes and dividends.

The decrease on all the items named, except those relating to legacies and successions, incomes, and dividends, which are due under repealed laws, indicates a better observance and a clearer understanding of the requirements of the laws. The reduction of the assessed taxes on deficiencies in the production of distilled spirits, especially, indicates that the distillers are conducting their operations in a more business like manner.

The reduction in the amount assessed on circulation, which has been principally the 10 per cent. tax on notes issued by manufactúring establishments and used in circulation in their vicinities, indicates that a rigid enforcement of the law levying such a tax has practically driven out of circulation all currency and money other than the standard coin or notes issued by the United States or secured by United States bonds.

The following statement shows the amount of assessments in each of the several States and Territories of the United States during the fiscal

year ended June 30, 1881:

*			
Alabama	\$41,758 97	Montana	\$6,682 15

#### TABULAR STATEMENTS FOR THE APPENDIX.*

I submit herewith, to accompany the bound volume, tabular statenents, as follows:

TABLE A .- Showing the receipts from each specific source of revenue, and the mounts refunded in each collection district, State, and Territory of the United States,

or the fiscal year enped June 30, 1881.

TABLE B.—A statement of the number and value of special-tax stamps, of stamps or distilled spirits, fermented liquors, tobacco, snuff, cigars, and cigarettes issued; of he number and value of internal-revenue stamps ordered monthly from the American Bank Note Company and the New York Graphic Company; and the monthly receipts rom the sale of stamps, and the commissions allowed thereon, for the fiscal year nded June 30, 1881.

TABLE C.—Comparative statement showing the percentages of receipts from the everal general sources of revenue in each State and Territory of the United States to he aggregate receipts from the same sources, by fiscal years, from July 1, 1863, to June

70, 1851.

TABLE D.—Comparative statement showing the aggregate receipts from all sources, n each collection district, State, and Territory of the United States, by fiscal years, rom September 1, 1862, to June 30, 1881, with appendix showing differences between

eported and true collections.

TABLE E.—Showing the receipts from each specific source of internal revenue, by

iscal years, from September 1, 1862, to June 30, 1881.

Table F.—Exhibiting the ratio of receipts in the United States from specific sources f revenue to the aggregate receipts from all sources, by fiscal years, from July 1, 1863, o June 30, 1881.

Table G.—Statement of the returns of distilled spirits, manufactured tobacco, snuff, igars, and cigarettes, under the several acts of legislation, and under the various rates

f taxation, by fiscal years, from September 1, 1862, to June 30, 1881.

TABLE H.—Statement of the receipts from special taxes in each collection district,

tate, and Territory for the special-tax year ended April 30, 1881.

TABLE I.—Abstract of reports of district attorneys concerning suits and prosecutions inder the internal-revenue laws during the fiscal year ended June 30, 1881.

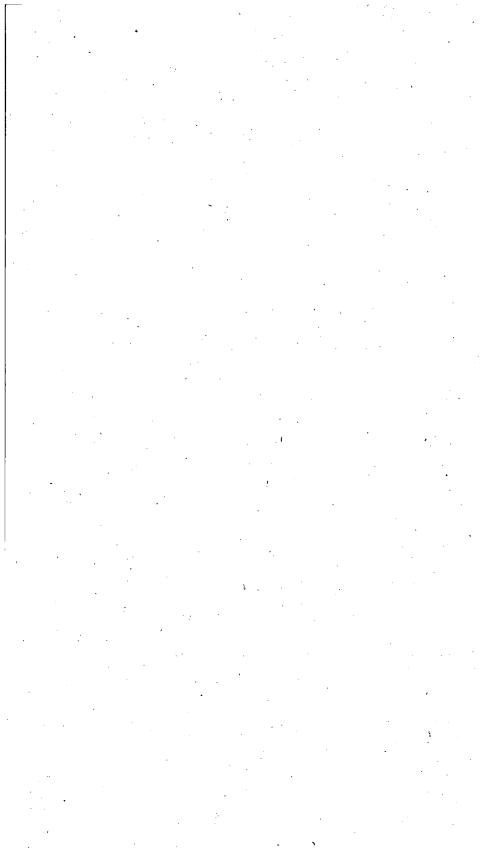

Table K.—Abstract of seizures of property for violation of internal-revenue laws uring the fiscal year ended June 30, 1881.

Very respectfully,

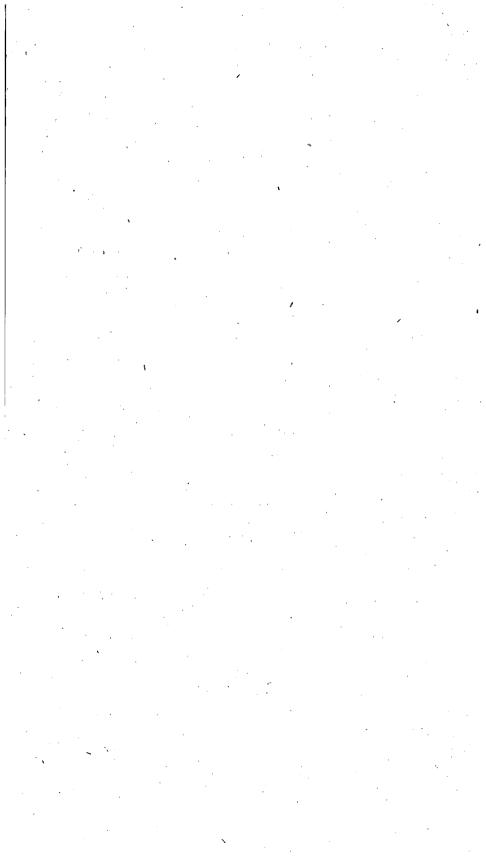

GREEN B. RAUM, Commissioner.

Hon. CHAS. J. FOLGER, Secretary of Treasury.

^{*} These statements are omitted for want of space, but they are printed in the bound, olumes of the Commissioner's report.

# REPORT OF THE COMPTROLLER OF THE CURRENCY.

## REPORT

OF

# THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, December 3, 1881.

I have the honor to submit for the consideration of Congress the nineteenth annual report of the Comptroller of the Currency, in compliance

with section 333 of the Revised Statutes of the United States.

Eighty-six national banks were organized during the year ending November 1 last, with an aggregate authorized capital of \$9,651,050, to which \$5,233,580 in circulating notes have been issued. This is the largest number of banks organized in any year since 1872. Twenty-six banks with an aggregate capital of \$2,020,000, and circulation of \$1,245,530, have voluntarily discontinued business during the year. National banks are located in every State of the Union except Mississippi and in every Territory except Arizona, the total number in operation on October 1 last being 2,132. This is the greatest number of banks that has ever been in operation at any one time. The total number of national banks organized from the establishment of the national banking system, February 25, 1863, to November 1 of the present year is 2,581.

From the establishment of the system to November 1 last, 340 banks have gone into voluntary liquidation by the vote of shareholders owning two-thirds of their respective capitals, and 86 have been placed in the hands of receivers for the purpose of closing up their affairs. The total amount of claims proved by the creditors of these insolvent banks is \$25,966,602, and the amount of dividends paid to creditors is \$18,561,698.

The estimated losses to creditors from the failures of national banks, during the eighteen years since the passage of the act, is \$6,240,000, and the average annual loss has therefore been about \$346,000, in the business of corporations having an average capital of about \$450,000,000, and deposits averaging about \$800,000,000. Twenty one of these insolvent banks have paid their creditors in full, and forty of them have paid more than 75 per cent. each. The individual liabilities of shareholders of insolvent banks has been enforced in fifty-three instances, and about \$2,700,000 has been collected from this source. During the

past year dividends have been declared in favor of the creditors of insolvent national banks, amounting to \$929,059, and the affairs of twelve such banks have been finally closed, nine of which have paid their creditors in full.

There were no failures of national banks during the period from June 19, 1880, to November 1 of the present year. Since that date the Mechanics' National Bank of Newark, and the Pacific National Bank of Boston, to which reference will be made hereafter, have suspended, and the former bank has been placed in the hands of a receiver.

The following table exhibits the resources and liabilities of the national banks, at the close of business on the 1st day of October, 1881, the returns from New York City, from Boston, Philadelphia and Baltimore, from the other reserve cities, and from the remaining banks of the country, being tabulated separately:

· ·					<del></del>

Similar tables in reference to a number of the States in different sections of the country are given in the Appendix.

EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS.

Section 11 of the National Bank Act of February 25, 1863, provided that—

Every association formed pursuant to the provisions of this act may make and use a common seal, and shall have succession by the name designated in its articles of association and for the period limited therein, not, however, exceeding twenty years from the passage of this act.

Section 8 of the act of June 3, 1864, provides that each association—

Shall have power to adopt a corporate seal, and shall have succession by the name designated in its organization certificate, for the period of twenty years from its organization, unless sooner dissolved according to the provisions of its articles of association, or by the act of its shareholders owning two-thirds of its stock, or unless the franchise shall be forfeited by a violation of this act.

The act last named, as well as that which preceded it, contains the following provision:

Copies of such [organization] certificate, duly certified by the Comptroller, and authenticated by his seal of office, shall be legal and sufficient evidence in all courts and places within the United States, or the jurisdiction of the government thereof, of the existence of such association, and of every other matter or thing which could be proved by the production of the original certificate.

Section 5136 of the Revised Statutes of the United States provides that—

Upon duly making and filing articles of association and an organization certificate the association shall become, as from the date of the execution of its organization certificate, a body corporate, and as such and in the name designated in the organization certificate, it shall have power, first, to adopt and use a corporate seal; second, to have succession for the period of twenty years from its organization, unless it is sooner dissolved according to the provisions of its articles of association, or by the act of its shareholders owning two-thirds of its stock, or unless its franchise becomes forfeited by some violation of law.

From these sections it appears that the period of existence of an association, as a body corporate, commences from the date of its organization certificate, and not from that of the certificate of the Comptroller, authorizing the association to commence business, as provided for in section 5169 of the Revised Statutes. The corporate existence of the national bank first organized will, under this limitation of law, expire on January 1, 1882, and that of the second bank on April 11 following. From the date last named to February 25, 1883, the number of banks whose corporate existence will terminate is 393, having a capital of nearly 92 millions, and circulation of nearly 68 millions, as follows:

. · · ·	Date.	No. of banks.	Capital.	Circulation.
In July In August In September In October In November	1882.	11 16 24 10 11 5 5	\$3, 900, 000 4,205, 000 4, 385, 000 1, 205, 000 3,532, 500 550, 000 850, 000 570, 000	1, 577, 50 494, 10

Bills will undoubtedly be brought before Congress during its present session for the extension of the charters of those banks whose corpo-

rate existence is soon to expire.

The principal reason urged by those who favor a discontinuance of the national banking system is, that money can be saved by authorizing the government to furnish circulation to the country; in other words, that the profit to the banks upon their circulation is excessive. years ago the banks had on deposit, as security for circulation, 276 millions of dollars in United States bonds, of which amount nearly 200 millions was in six per cents and 76 millions in five per cents. banks now hold 32 millions of four and a half per cents; 92 millions of four per cents; 241 millions of three and a half per cents, converted from five and six per cents; and also 3½ millions of Pacific railroad The remaining five per cent. bonds held by them, amounting in all to \$758,900, have ceased to bear interest. The average premium borne by the four per cent. bonds during the last six months has been about sixteen per cent., and at this price they net to the holders less than three and a half per cent. interest. During the same period the three and a half per cents also have, for a considerable portion of the time, been worth a premium in the market of from one to two per cent., so that the banks do not at the present time, and it is probable that they will not, for a long time to come, receive an annual average rate of interest as great as three and a half per cent upon the United States bonds deposited by them as security for their circulating notes. Until the year 1877 the banks continued to receive interest upon the par value of their bonds at the rate of either five or six per cent., while the net interest now received, as already stated, does not exceed three and onehalf per cent. On ten per cent. of the amount of bonds thus deposited by the banks, amounting to 39 millions, they receive no circulation; and from this portion of their bond deposit they derive no benefit or advantage not possessed by any other class of bondholders. They pay a tax of one per cent, upon the amount of their circulating notes outstanding; keep on deposit with the Treasurer an amount of lawful money equal to five per cent. of their issues, as a permanent redemption fund; and also reimburse to the United States the expense of redeeming their notes at the Treasury. The actual net profit upon circulation, based upon a 4 and a 3½ per cent. bond, and with rates of interest on bank loans varying from five to ten per cent., is estimated to be as shown in the following table:

Class of bends deposited.	5 per	6 per	7 per	8 per	9 per	10 per
	cent.	cent.	cent.	cent.	cent.	cent.
4 per cent. bonds, at 16 per cent. premium	1.49	Per ct. 1. 19 1. 59	Per ct. . 88 1, 43	Per ct. 58 1, 28	Per ct. 27 1. 12	Per ct. . 03 . 96

The profit upon circulation is seen to be greatest where the rate of interest for the loan of money is least; and this arises from the fact, already stated, that the bank receives in circulating notes ten per cent. less in amount than it deposits in bonds. Thus, if the bonds deposited are three and one-half per cents, and the commercial rate of interest is ten per cent., there is a loss to the bank of six and one-half per cent. upon the ten per cent. margin of bonds deposited. If the commercial value is six per cent. only, then the loss upon the margin mentioned is two and one-half per cent., instead of six and one-half per cent., as in the previous case

The profit on circulation varies, therefore, from one and one-eighth per cent., where the interest on loans is nine per cent., to one and one-half

per cent. where the rate of interest is six per cent.

The proportion of taxation, National and State, imposed upon the banks has been shown to be much greater than that upon any other moneyed capital, being in the aggregate equal to an average rate of four per cent. upon the amount of their issues. The amount of interest received by the banks upon the United States bonds held by them has in late years gradually decreased, and the profit upon circulation has thereby been reduced almost to the minimum. Such profit cannot now, at least, be said to be excessive.

But if the National Bank Act has conferred upon the associations organized thereunder the right to issue circulating notes, it has placed them all under the operation of a uniform system, and has surrounded them with numerous restrictions, among which are the following:

The capital stock must be fully paid in, and a portion of this capital, not less in any case than \$50,000, must be invested in United States bonds and deposited with the Treasurer. If the capital stock of an association becomes impaired at any time, it must be promptly restored. Their circulating notes must be redeemed at par, not only at the place

of issue, but at the Treasury of the United States.

The banks must lend on personal security only, and not upon that of real estate, and only ten per cent. of their capital may be loaned upon accommodation notes, or other than actual business paper, to any one person, company, firm or corporation. They cannot lend money on their own circulating notes, or upon shares of their own stock, and must take the notes of every other national bank in payment of debts due to them. The rate of interest charged must not be greater than the rate provided by the laws of the several States in which they are located. They must pay taxes or duties to the government upon their capital stock, deposits and circulation, and to the States they must pay such taxes as are imposed on other moneyed capital. They are required to keep on hand as a reserve, in coin or other lawful money, a certain proportion of their deposits. There must be no preference of creditors in cases of insolvency.

Shareholders are held individually responsible for all contracts, debts and engagements of the association, to the extent of the par value of their stock, in addition to the amount invested in such shares. banks are required, before the declaration of any dividend, semi-annually to increase their surplus fund by an amount equal to one tenth of their net earnings for the preceding six months, until it shall equal twenty per cent. of their capital. Losses and bad debts must be charged to profit and loss account before dividends are paid. In other words, dividends must be earned before they are declared. Full statements, accompanied by schedules, of their resources and liabilities must be made to the Comptroller several times in each year, and must also be published at the expense of the association making the same. Other statements, showing their semi-annual profits, losses, and dividends, must also be returned, and statements in reference to the business of any association making the same may be required at any time, a penalty of \$100 per day being prescribed for each day's delay to comply with the call therefor. The banks are subject to personal examinations, and if a bank becomes insolvent a receiver may be at once appointed. If the directors knowingly violate, or permit to be violated, any of the provisions of the act, all the rights and privileges of the bank are thereby forfeited; and the directors are held personally and individually responsible for all damages sustained by any person in consequence of such violation.

It is recommended that an act be passed during the present session, authorizing any national bank, with the approval of the Comptroller, at any time within two years prior to the date of the expiration of its corporate existence, to extend its period of succession for twenty years, by amending its articles of association. The bill may provide that such amendments must be authorized by the votes of shareholders owning not less than two-thirds of the capital of the association, the amendment to be certified to the Comptroller of the Currency, by the president or cashier, verified by the seal of the association, and not to be valid until the Comptroller's approval thereof shall have been obtained, and he shall have given to the association a certificate authorizing it to continue its business under such extension. Responsibility for the extension of the corporate existence of the banks will thus, in a measure, rest with the Comptroller; and he can require such an examination of its affairs to be made, prior to granting the extension, as may seem to him proper, in order to ascertain if the capital stock is intact, and all the assets of the bank in a satisfactory condition.

It is unquestionably true that many national banks would greatly prefer the abolishment of the national system, if it were accompanied by a repeal of the provision of law imposing a tax of ten per cent. upon State bank circulation; and there is little reason to doubt that such repeal would speedily follow the abrogation of the National Bank Act. The laws in many of the States authorize the issue of State bank notes, based upon the deposit of State bonds as security therefor. The repeal of the tax law referred to would result in re-establishing the State bank systems in many parts of the country, the issues of which would be far more profitable to the banks themselves than is the circulation now issued under the national system; while in other sections circulating notes, put forth without any security whatever, would prevail as formerly. The notes of these various systems would be redeemable, not at any common center, as at present, but at the chief city of each State or section of country issuing the same; and the price of exchange would thereby be enhanced to rates certainly not less than the cost of transporting gold from the places of redemption to the commercial center of the country. In many parts of the country these rates would necessarily be oppressive, resulting in great loss to the people, which loss would steadily increase with the growth of business.

As another consequence of the abolition of the present system, the large surplus which the national banks have now accumulated, amounting to \$128,140,618, and which adds greatly to their strength and safety, would doubtless be divided among their shareholders; while many of the safeguards and restrictions of the present law, which experience has shown to be valuable, will be either abolished or so changed by the varying legislation of the several States, as to be practically of little value in comparison with the present homogeneous system.

If, on the other hand, the corporate existence of the national banks shall be extended, all the advantages of the existing system will be preserved, subject to such amendments as may be hereafter found necessary; while the circulation of the banks, which is the principal objection urged against the system, will, under existing laws, diminish in volume as the public debt shall be reduced.

The whole number of national banks in operation on October 1 last was 2,148. Of this number 393 were associations having a capital of \$50,000 each; 164 had a capital of over \$50,000 and less than \$100,000, and the capital of 829 banks ranged from \$100,000 to \$150,000 each. The mini-

mum amount of bonds required to be deposited by banks of the capital named is one-third of their capital, but not less in any case than \$30,000. The minimum amount required by all other banks is \$50,000, and the least amount of bonds which, under existing laws, may be deposited by the 2,148 banks now in operation, is about \$82,400,000. It is probable that from 100 to 150 millions of United States bonds would be sufficient to supply the minimum amount necessary to be deposited with the Treasurer by all the banks which may be established during the next twenty years. It is therefore evident that the national banking system may be continued without change in this respect for many years, even if the bonded debt of the United States shall, during that time, continue to be reduced as rapidly as it has in the past year. The discussion of the question as to the kind of circulating notes which will be substituted for the national bank notes, if the latter are retired, is postponed for the present, as it is impossible to forsee the events which may occur to affect that question within the next few years.

If, for any reason, the legislation herein proposed shall not be favorably considered by Congress, the banks can still, under the present laws, renew their existence if they so desire; and in the absence of prohibitory legislation many of them undoubtedly will, on the expiration of their present charters, organize new associations, with nearly the same stockholders as before, and will then apply for and obtain from the Comptroller certificates authorizing them to continue business for twenty years from the respective dates of their new organization certificates. Such a course of procedure will be perfectly legal, and, indeed, under the existing laws, the Comptroller has no discretionary power in the matter, but must necessarily sanction the organization, or reorganization, of such associations as shall have conformed in all respects to the

legal requirements.

The passage, however, of a general act directly authorizing an extension of the corporate existence of associations whose charters are about to expire would, in many instances, relieve the banks from embarrassment. As the law now stands, if the shareholders of an association are all agreed, the process of reorganization is simple; but if any of the shareholders object to such reorganization, they are entitled to a complete liquidation of the bank's affairs, and to a pro rata distribution of all its assets, including its surplus fund. In many instances executors and administrators of estates hold national-bank stock in trust; and while they might prefer to retain their interests in the associations which issued the stock, they would perhaps have no authority to subscribe for stock in the new organizations. While, therefore, the legislation asked for is not absolutely essential, yet its passage at an early day would be a great convenience to many of the national banks, and especially so to the class last referred to.

#### SUBSTITUTES FOR MONEY.

For a long period in their early history, bills of exchange were in fact what their name implied—namely, bills drawn in one country to be haid in another. The common law of England, which inflexibly for hade the assignment of debt, was a bar to their early introduction into hat country; but they eventually forced themselves into use there, brough the facilities which they afforded in the conduct of trade with ther nations. It was long before the transfer of inland debts was anctioned in England; but the practice at length prevailed, being first dopted in the intercourse between London and York, and London and ristol. By the gradual striking off of one limitation after another, bills

of exchange,* after the lapse of several centuries, became what they now are, simply an order from one person to another to pay a definite sum of money. The convenience of trade gradually overpowered the narrow restrictions of the common law, until it became lawful to transfer an obligation from one person to another, in the form of a bill of exchange, while at the same time it remained unlawful to do so in other forms, such as by a simple acknowledgment of the debt by the debtor.

About the end of the sixteenth century the merchants of Amsterdam and Hamburg, and of some other places, began to use instruments of credit among themselves; and, as their intercourse increased, these instruments naturally assumed the form of an acknowledgment of the debt by the debtor, with a promise to pay to the bearer, on demand, or at a specified time. Such instruments are now called promissory notes. They first began to be used by the goldsmiths, who originated the modern system of banking soon after 1640. They were then called goldsmiths' notes, but they were not recognized by law. The first promissory notes issued in England, under the sanction of law, were those of the Bank of England, in 1694, and which were technically bills obligatory, or bills of credit. By the act founding the bank its notes were declared to be assignable by indorsement, although this privilege was not then extended to other promissory notes. But by an act passed in 1704, promissory notes of every kind, including those of private bankers and merchants, as well as of the Bank of England, were all placed on the same footing as inland bills of exchange; that is to say, they were all made transferable, by indorsement on each separately. With respect, however, to the Bank of England notes, as these were always payable on demand, the practice of indorsing soon fell into disuse, and they passed from hand to hand like money. In the case also of the notes of private bankers of great repute, the indorsement was often omitted.

Until near the year 1772, this method of making exchanges by the issue of promissory notes, made payable to bearer on demand, was generally adhered to by bankers. But about that time the practice in this respect became changed. When the bankers made discounts for their customers, or received deposits from them, instead of giving as before promissory notes or deposit receipts, they wrote down the amount to the credit of their customers on their looks. They then gave them books containing a number of printed forms. These forms were called checks, and were really bills of exchange drawn upon the banker,

payable to the bearer on demand.

Prior to the period when checks were introduced, the issue of promissory notes by the London bankers was very extensive; but the method of doing business by the use of checks was found by them to be so convenient, and it possessed so many practical advantages over that by way of notes, that issues of the latter were soon generally discontinued; and that of checks adopted in their stead. The bankers, however, were never forbidden to issue such notes until the bank act of 1844.

For many years the English courts held that a check is binding on the banker, having assets of the drawer, without acceptance; but more recently these earlier decisions have been overruled, and it is now the established doctrine of the highest English tribunals that a check is not binding upon a bank until accepted, notwithstanding the fact that the bank has assets of the drawer. In a case in which the First National Bank of New Orleans was defendant, where certain holders of its drafts on a Liverpool bank attempted to recover from the latter bank the amount of the drafts out of an ample balance to the credit of the New

^{*}Much of the information regarding bills of exchange is gleaned from Macleod' Theory and Practice of Banking.

Orleans bank after its failure, the House of Lords affirmed the decision of the Lord Chancellor, and held that the drafts were not even equitable assignments of any part of the drawer's funds.*

PROPORTION OF BANK CHECKS, BANK NOTES, AND COIN USED IN LONDON, FROM DATA PREPARED BY SIR JOHN LUBBOCK.

The first information given to the public as to the amount and proportion of checks, bank notes, and coin used in the business of banking, was by Sir John Lubbock, an eminent scientist and banker, and president of the London Institute of Bankers, and was based upon the business of his own bank during the last few days of 1864. His statement, given below, is copied from a paper read by him before the London Statistical Society, in June, 1865, entitled "Country Clearing," and published in the journal of that society for September, 1865, to whose tables I have added the proportions of checks, bank notes, and coin:

In order to give the proportion of the transactions of bankers which passes through the clearing house to that which does not, I took the amount of £23,000,000, which passed through our hands during the last few days of last year, and found that it was made up as follows:

Clearing	£16, 346, 000	· 70.8 pe	r cen
Cheques and bills, which did not pass through the clear-		-	
ing	5, 394, 000	23.4	"
Bank notes	1, 137, 000	4.9	"
Coin		0.6	"
Country notes	79,000	0.3	"
Total	23, 095, 000	100.0	"

It would appear from this that out of each £1,000,000, rather more than £700,000 passes through the clearing. The second amount given above, £5,394,000, includes, of course, the transfers made in our own books from the account of one customer to that of another. These amounted to £3,603,000, the remainder, £1,791,000, representing the cheques and bills on banks which did not clear.

In order to ascertain the proportion of payments made in bank notes and coin, in town, I have taken an amount, £17,000,000, paid in by our London customers. This

was made up as follows:

Cheques and bills on clearing bankers				
Cheques and bills on other bankers			"	٠
Bank of England notes	674, 470	4.0		
Country bank notes	9,570	0.1	"	
Coin	117, 960	0.7	46	
Total	16, 802, 000	100.0	"	

The above amount of bank notes, small as it is, must, I think, be still farther reduced. All the clearing bankers have accounts at the Bank of England, and, as we require notes to supply our till, we draw them from the Bank of Eugland, crediting the bank in our books. Out of the above amount of £674,470, £266,000 were notes thus drawn by us from the bank to replenish our till, and did not represent an amount paid in by our customers to their credit. This amount must, therefore, I think, be deducted from both sides of the account. On the other hand we must add the amount of notes paid in for collection and discount, and loans on security, which pass through a different set of books and which represented a sum of £2,460,686.

Making these alterations we find that out of £19,000,000 credited to our town customers, £408,000 consisted of bank notes, £79,000 of country bank notes, and £118,000

of coin:

	•	
8, 395, 000	96.8 pe	r cent.
79,000	0.4	"
118,000	0.6	"
		,
9,000,000	100.0	• • •
	408, 000 79, 000 118, 000	8, 395, 000 96. 8 pe 408, 000 2. 2 79, 000 0. 4 118, 000 0. 6 0, 000, 000 100. 0

^{*} House of Lords, p. 352, June 17-19, 1873.

In an article on bank notes, published in the Journal of the Institute of Bankers, London, for March, 1880, Mr. John B. Martin gives a table showing the percentage of bank notes, coin and checks used in banking transactions, which was compiled by him from several sources. This table is given below:

	Robarts,	Lubbock Co.	Morrison & C			ester and and anotl			t Co.
	Received 1864, London.	Received 1864, general.	Received.	Paid.	1859.	1864.	1872.	Received 1878-'79.	Paid 1878- '79.
Bills and cheques Notes	Per cent. 96. 8 2. 6 . 6	Per cent. 94. 1 5. 3 . 6	Per cent. 90 7 3	Per ct. 97 2 1	Per ct. 47 53	Per ct. 58 38 4	Per ct. 68 27 5	Per cent. 96. 5 2. 6 . 9	P. ct. 96. 9 2. 1 1. 0
	100	. 100	100	100	100	100	100	100	100

The first two columns of percentages are obtained from the data contained in the table previously given, and show the ratio of checks, notes, and coin received by the firm of Robarts, Lubbock & Co., in payments made to them during the last few days of 1864; the first column showing the percentages of the items named above, in the receipts from London bankers alone, and the second, the percentages in the receipts from all The next two columns are derived from an analysis of the receipts and payments of the firm of Messrs. Morrison, Dillon & Co. The next three columns show, for the years 1859, 1864, and 1872, respectively, the percentages of checks and cash derived from an estimate made of the total transactions of the Manchester and Salford Bank, and published in the Journal of the Statistical Society for March, 1873, at page 86. In reference to these transactions of the Manchester banks, it is stated that the amount of cash shown is very remarkable, and that it is believed the proportion of coin in it very largely exceeds that of England, taken as a whole, because the statement proceeds from a great wage-paying The last two columns of the table show the results of an analvsis of the receipts and payments of Martin & Co. To obtain these percentages, the transactions of Mr. Martin's own firm were observed for six working days in each month, from the 20th to the 26th, for a period of several months, covering the latter part of 1878 and the first part of 1879.

In each instance in this table, it is to be observed, the transactions are those of one bank or firm only, and in making up the aggregate, from which the percentages are calculated, the business for several days has been taken; differing in these respects from the returns hereafter given from the national banks in this country, which are results obtained from combining the transactions upon one day, and for the most part of the same day, of a large number of banks doing business in widely different sections of the country.

PROPORTION OF BANK CHECKS USED, FROM DATA PRESENTED BY PRESIDENT GARFIELD.

The first information ever given upon this subject in this country was compiled by the late President Garfield, who was well known as a careful investigator of economic subjects.

In his speech on resumption, delivered in the House of Representatives

on November 16, 1877, he said:

In 1871, when I was chairman of the Committee on Banking and Currency, I asked the Comptroller of the Currency to issue an order, naming fifty-two banks which were to make an analysis of their receipts. I selected three groups. The first was the city banks. The second consisted of banks in cities of the size of Toledo and Dayton, in the State of Ohio. In the third group, if I may coin a word, I selected the "countriest" banks, the smallest that could be found, at points away from railroads and telegraphs. The order was that those banks should analyze all their receipts for six consecutive days, putting into one list all that can be called cash—either coin, greenbacks, bank notes or coupons, and into the other list all drafts, checks, or commercial bills. What was the result? During those six days \$157,000,000 were received over the counters of the fifty-two banks; and of that amount, \$19,370,000—12 per cent. only—in cash, and eighty-eight per cent., that vast amount representing every grade of business, was in checks, drafts, and commercial bills.

#### RECEIPTS IN MONEY AND CHECKS OF ALL THE NATIONAL BANKS.

In order to obtain the fullest possible information on this subject the Comptroller recently issued two circular letters to the national banks, asking for classified returns of their receipts and payments at different The first circular requested a return to be made for June 30. which date marked the close of the fiscal year; and the second one asked for a return on September 17, which was the middle of the third month It was believed that a comparison of returns made for dates so dissimilar would be a substantial test of their accuracy, and would present a fair average of their operations for the current year. for June 30, were received from 1,966 of the 2,106 national banks then in operation, and in response to the request for statements for the date of September 17, returns were received from 2,132 banks, being all of the banks in operation at that date. A few of these later returns, about fifty in number, were for a day subsequent to September 17, but their relative number being small they have been tabulated as being of that date

The total receipts of the 1,966 banks, on June 30 last, were 284 millions of dollars (\$284,714,017). Of this amount there was less than two millions (\$1,864,105) in gold coin, about half a million (\$440,997) in silver coin, and eleven and one-half millions (\$11,554,747) in paper money; the remainder, amounting to 270 millions (\$270,854,165), being in checks and drafts, including nine millions (\$9,582,500) of clearing-house certificates. The gold coin equaled 0.65 of one per cent. of the total receipts; the silver coin was 0.16 of one per cent.; the paper money 4.6 per cent.; while the checks and drafts constituted 91.77 per cent. of the whole amount; or, including the clearing-house certificates, they were equal to 95.13 per cent. In other words, the total percentage of coin and paper money received was 4.87 per cent. only, while that of checks and drafts was 95.13.

The receipts of all of the national banks, 2,132 in number, on September 17, were \$295,233,779. Of this sum \$4,078,044 consisted of gold coin, \$500,301 of silver coin, and \$13,026,570 of paper money. The remainder, amounting to \$277,628,862, consisted of checks and drafts, and \$6,592,337 of clearing-house certificates. The gold coin equaled 1.38 per cent. of the total receipts; the silver coin 0.17 of one per cent.; the paper money 4.36 per cent., and the checks and drafts 91.85 per cent., while the checks, drafts and clearing-house certificates, together, were equal to 94.09 per cent. of the whole. On September 17, therefore, the total percentage of cash was 5.91 per cent. only.

TOTAL RECEIPTS OF MONEY AND CHECKS BY THE BANKS IN NEW YORK CITY AND
IN FIFTEEN OTHER PRINCIPAL CITIES, AND BY THE REMAINING BANKS.

The receipts of the forty eight national banks in New York City, on June 30, were 167 millions (\$167,437,759), of which less than one-

half million (\$460,993.67) was in gold coin, \$15,996.95 in silver coin, and \$1.706,604.06 in paper money; the remaining 165 millions (\$165,254,164) being in checks and drafts, including nearly four millions (\$3,835,500) of clearing-house certificates.

The banks in New York City, on September 17, reported receipts amounting to \$165,193,347, of which \$805,588 was in gold coin, \$7,857 in silver coin, and \$1,071,315 in paper money, the remainder, \$163,-308,587, being in checks and drafts, including \$3,792,000 of clearing-house certificates.

The receipts of the 187 banks in the fifteen reserve cities, exclusive of New York, on June 30, were seventy-seven millions (\$77,100,705), of which \$581,070 was in gold, \$114,485 in silver, \$3,631,710 in paper money, and seventy-two millions (\$72,773,450) in checks and drafts, including \$5,747,000 of gold clearing-house certificates.

On September 17 the receipts of 189 banks in fifteen reserve cities, exclusive of New York, were \$77,922,246, of which \$1,448,415 was in gold, \$138,248 in silver, \$4,486,045 in paper money, and \$71,849,538 in checks and drafts, including \$2,734,378 in clearing-house certificates.

The total receipts of the banks outside of the cities, 1,731 in number, on June 30, were forty millions (\$40,175,542), of which \$822,041 was in gold coin, \$310,516 in ,silver coin, six millions (\$6,216,433) in paper money, and nearly thirty-three millions (\$32,826,552) in checks and drafts.

On September 17 these banks, 1,895 in number, received \$52,118,185, of which \$1,724,040 was in gold coin, \$354,197 in silver coin, \$7,469,210 in paper currency, and \$42,570,738 in checks and drafts.

TOTAL RECEIPTS AND PROPORTIONS OF GOLD COIN, SILVER COIN, PAPER MONEY, AND CHECKS AND DRAFTS.

In the following tables are shown, both for June 30 and for September 17, the proportions of gold coin, silver coin, paper money, and checks and drafts, including clearing house certificates, to the total receipts, in New York City, in the other reserve cities, and in banks elsewhere, separately, and also the same proportions for the United States:

JUNE 30, 1881.

#### SEPTEMBER 17, 1881.

New York City	189	\$165, 193, 347 77, 922, 247 52, 118, 185	0. 54 1. 86 3. 31	0. 01 0: 18 0. 08	0. 65 5. 61 14. 27	98. 80 92. 35 81. 74
Taited States	2, 132	295, 233, 779	1.38	0. 17	4. 36	94. 09

On June 30 the proportion of gold coin to the whole receipts in New York City was 0.27 of one per cent.; of silver coin, 0.01 of one per cent.; of paper money, 1.02 per cent.; and of checks and drafts, including

clearing house certificates, 98.7 per cent.

The percentage of gold coin received in the fifteen other cities was 0.76; of silver coin, 0.15; of paper currency, 4.71; and of checks and drafts, 94.38. The percentage of gold coin received by the banks not included in these cities was 2.05; of silver coin, 0.77; of paper currency, 15.47; and of checks and drafts, 81.71.

Taking all the banks together, the relative proportion of gold coin received was 0.65, of silver coin 0.16, of paper currency 4.06, and of cheeks

and drafts 95.13 per cent.

On September 17 the proportion of gold coin to the whole receipts in New York City was 0.545 of one per cent., and of silver coin, 0.005 of one per cent.; of paper money, 0.65 of one per cent., and of checks and

drafts, including clearing-house certificates, 98.8 per cent.

The percentage of gold coin received in 15 other cities was 1.86; of silver coin, 0.18; of paper currency, 5.61; and of checks and drafts, 92.35. The percentage of gold coin by the remaining banks in the country was 3.31; of silver coin, 0.68; of paper currency, 14.27; and of checks and drafts, 81.74. The receipts of the 2,132 banks together show a relative proportion of gold coin, 1.38; of silver coin, 0.17; of paper currency, 4.36; and of checks and drafts, 94.09.

#### CHECKS AND DRAFTS IN THE PRINCIPAL CITIES.

The following table shows, for June 30 and September 17, the number of banks, the total receipts, and the ratio to such total of the checks and drafts received, in New York City and in fifteen of the other principal cities:

		June 30, 1881	l	September 17, 1881.

PROPORTION OF THE RECEIPTS IN THE FOUR PRINCIPAL CITIES.

The table below exhibits the total receipts, on June 30 and September 17, of the 48 banks in New York City, the 54 in Boston, the 32 in Philadelphia, and the 9 in Chicago, and the proportion which the receipts in each city, and the aggregate of all of them, bear to the receipts of all the banks in the United States on the same dates. It also shows the receipts, and proportion to the whole, of the banks in twelve other cities, and the same as to the remaining banks of the country:

		June 30, 1881	• .	September 17, 1881.			
Banks in four principal cities, and elsewhere.	Number of banks.	Amount.	Per cent- age to total receipts.	Number of banks.	Amount.	Percentage to total receipts.	
New York City Boston Philadelphia Chiçago	54	\$167, 437, 759 33, 088, 080 18, 061, 565 8, 141, 189	58. 81 11. 62 6. 34 2. 86	48 54 32 9	\$165, 193, 347 24, 094, 061 17, 830, 648 13, 026, 835	55. 95 8. 16 6. 04 4. 41	
Totals Twelve other cities	143 92	226, 728, 593 17, 809, 881	79. 63 6. 26	143 94	220, 144, 891 22, 970, 703	74. 56 7. 78	
Totals of cities	235 1, 731	244, 538, 474 40, 175, 542	85. 89 14. 11	237 1, 895	243, 115, 594 52, 118, 185	82. 34 17. 66	
United States	1, 966	284, 714, 016	100	2, 132	295, 233, 779	100	

From an examination of this table it will be seen that the receipts of the 48 banks in New York City on June 30 were nearly three-fifths (58.81 per cent.) of the whole, and on September 17 about 56 per cent. This fact shows how closely connected is the business of all the national banks with the great commercial center of the country, nearly every bank and banker in the Union having deposits, subject to sight-drafts, at that point. The receipts of the Boston banks on June 30 were nearly 12 per cent. of the whole, and were 8 per cent. on September 17; while those of Philadelphia were about 6 per cent. at the latter date, and of the banks in Chicago about 4.5 per cent. The receipts in these four great cities comprised nearly four-fifths of the total receipts on June 30, and nearly three-fourths of the total on September 17; while the receipts of the sixteen reserve cities on June 30 were more than 85 per cent., and on September 17 more than 82 per cent., of the whole amount. The receipts of 1,731 banks located in the districts outside of these cities on June 30 were but 14.11 per cent., and of the 1,895 banks on September 17 but 17.66 per cent., of the whole.

TOTAL RECEIPTS AND PROPORTIONS OF CHECKS AND DRAFTS IN STATES AND TERRITORIES.

The table next given shows, for the same dates, the receipts of the banks in each State and Territory, exclusive of those located in the cities named in the previous table, with similar percentages. Attention is called to the remarkable coincidence shown in this table, in the percentage of checks and drafts for the two dates named, it being 81.7 per cent. in each instance. The percentages of the cities for the same dates, as given in the next preceding table, also correspond very nearly, the small difference between them being principally due to the change in the city of Boston from 96.5, on June 30, to 93.7 per cent.

on September 17. The slight variation in the average ratios for the two dates is evidence of the general accuracy of the returns:

		June 30, 1883	L.	September 17, 1881.

PROPORTION OF RECEIPTS WHICH REPRESENT LEGITIMATE BUSINESS.

If all of these receipts represented legitimate business, the means for merchandising and for manufacturing would be most abundant. It would be an interesting subject for investigation to determine what proportion of the checks received by the banks in New York City, on any given day, represent operations at the Stock Exchange, and what proportions of these operations represent legitimate and what speculative transactions. In taking as a basis for such an estimate the posted sales of the Stock Exchange, a difficulty arises from the fact that these sales on any one day do not by any means include all the transactions at the board. In the opinion of the most experienced brokers, not more than one-third of the purchases and sales are recorded in the printed list. Even in the case of those recorded, the number of shares bought or sold, assumedly at par, is not an indication of the money value of the transactions as they appear in the bank clearings, on account of the different

par value of the various shares dealt in. The par is usually one hundred dollars per share, but the average price of sales would not probably exceed sixty dollars per share.

The checks received by the banks in New York City, including both State and National, on the 30th of June, 1881, and which were cleared on the following day, amounted to 141 millions. Of this amount, 113 millions were cleared by twenty three banks, all of which have relations to a greater or less extent with brokers. From an examination of the clearings of each of these twenty-three banks, it was found that the total of certified checks on that day amounted to about 80 millions, of which it is probable that at least 90 per cent., or 72 millions, represented stock transactions. About ten per cent. of this amount should be allowed for the daily payment and reborrowing of loans by brokers, which is accomplished by means of certified checks. It is therefore estimated by those who are conversant with these subjects, that of the 141 millions of exchanges, about 65 millions represent stock exchange transactions.

There are really no data upon which a conclusion can be obtained as to what proportion of these large stock transactions are speculative, and what legitimate, or for investment. It is estimated, however, by those who have had long experience in the business, that not more than five per cent. of all purchases and sales at the stock board are for investment account. Assuming that these estimates are reasonable, it would follow that about 60 millions of the 141 millions of clearings upon June 30, or about three-sevenths of the whole, represent the speculative transactions of the stock board, and that 81 millions, or four-sevenths, repre-

sent legitimate business transactions.

PROPORTION OF CHECKS WHICH PASS THROUGH THE CLEARING HOUSE.

The checks, drafts and certificates received by the national banks in New York City on June 30 amounted, as has been seen, to \$165,233,164. The gold clearing house certificates amounted to \$3,814,500, which were received by the banks in payment of balances due them on the morning of June 30. The remainder consisted of checks and drafts alone. The clearing house statement shows that on the morning of July 1 \$126,937,110 of the before mentioned checks and drafts were paid through the clearing-The remaining \$34,381,554, which did not pass through the clearing house, consisted probably of checks, which had been used in payments made by one depositor to another, in the same bank, and were consequently settled by simple transfers of accounts on the books of On Saturday, September 17, the total amount received such banks. by the banks in checks, drafts, and certificates was \$163,208,586; of which \$3,792,000 were in gold clearing house certificates, received by the banks in payment of the balances due them at the clearing-house on the same day, leaving \$159,416,586 of checks and drafts received. Of this latter sum, \$139,881,760 consisted of checks, &c., which were paid through the clearing house on the morning of Monday, September 19 (the next business day), by the same banks, as shown by the clearing-house statements of that day. Of the checks and drafts received by the national banks of New York City on September 17, about 20 millions were settled without passing through the clearing-house; and, as was remarked in reference to similar checks and drafts shown by the statement of June 30, they were probably settled by transfers of accounts on the books of the banks on which they were drawn.

It was about eighty years after the first issue of promissory notes by

the Bank of England that the London clearing-house was established, and the organization of the New York clearing-house dates eighty years still later, in 1853; so that it may be said that the clearing arrangement now in use in this country, and so familiar to all bankers, has been in operation but twenty-eight years. The assistant treasurer in New York has been a member of the clearing-house but three years, and the large payments to the clearing-house banks, averaging two and a quarter tons of gold coin daily during the past year, which would be about thirty-six tons daily if paid in silver, are transferred in bags, or upon drays from the Treasury to the banks. If these balances could be paid in gold certificates instead of coin, the system of bank machinery in New York would be complete.

Checks, certificates of deposit, and drafts, or bills of exchange, which are now used so largely as substitutes for money, are the most important and useful parts of the machinery of the bank. The issue of circulating notes is not an essential feature of banking, for there are many banks in this country, chiefly incorporated under State laws, which do not issue such notes. But checks and drafts are almost as indispensable to the successful conduct of the business of banking as capital or deposits.

USE OF CHECKS IN FRANCE, ENGLAND, SCOTLAND, AND IRELAND, AND IN THE UNITED STATES.

In England, banks and bankers are numerous, and large numbers of such instruments of exchange are used, particularly in the principal cities. In France, on the other hand, their use is much more infrequent, for except the Bank of France, with its 90 branches, there are no incorporated banks in that country, and thirteen of these branches were conducted in 1880 at a loss of more than \$30,000.

Victor Bonnet, a well-known French writer, says:

They are very little used, even in the great cities, while in the rest of France they are completely unknown. It is, however, to be hoped that they will be more employed hereafter, and that here, as in England and the United States, payments will be more generally made through the medium of bankers, and by transfers in accounts current. If this should be the case, we shall economize both in the use of specie and of bank notes; for it is to be observed that the use of bank notes does not reach its fullest development, except in countries where the keeping of bank accounts is unusual, as is evident by comparing France in this respect with England: M. Pinard, manager of the Comptoir d'Escompte, testified before the commission of inquiry, that the greatest efforts had been made by that institution to induce French merchants and shopkeepers to adopt English habits in respect to the use of checks and the keeping of bank accounts, but in vain; their prejudices were invincible; it was no use reasoning with them, they would not do it, because they would not.

It would seem, however, from the following extract from the report of the Bank of France for 1880, that an effort is being made to overcome this prejudice:

Since the end of the operations of 1879, we have endeavored to give new advantages to those who had current accounts with us, and we have granted them facilities for transfer from one place to another, free of cost, for all sums proceeding from discount operations, or the encashment of documents on demand. We have desired to proceed further with this plan, and we have just completed this first arrangement by giving to all those who had current accounts with us, without exception, the means of disposing by open cheques of the whole of the sums which stand to their credit. These cheques, which are subject to a commission when they represent a simple deposit of funds, will, on the contrary, be delivered gratuitously when they are drawn against the proceeds of discounts or drafts on demand encashed by the bank, and they will be made payable in all our establishments indifferently. The cheques will thus become a powerful and very convenient means of exchange, which will simplify all transac-

tions, and which will probably reduce, in considerable proportion, the need for the note circulation. In addition to this we have authorized the use of cheques within the town itself for the withdrawal of funds which do not require the displacement of capital. We are certain that when the use of cheques is thoroughly understood it will be of great service to commerce.

There are now in this country 6,796 banks and bankers located in all its principal cities and villages, and the number of checks and drafts in daily use by our own people is consequently larger, in fact, far greater, than anywhere else in the world. In some countries a charge is made to the depositor for keeping his account. In others, bank accounts are refused unless the depositor comes well introduced and it is believed that his account will be of considerable pecuniary benefit to the bank. In this country the bank is in many instances a convenience to the depositor, rather than the depositor of benefit to the bank; for the latter keeps the cash account of the depositor, and pays out amounts upon his order, and at his request returns to him his checks properly indorsed, which are then held by the

depositor as vouchers or receipts for the payment of his debts.

It is evident that the amount of coin and paper currency used in any country depends largely upon the number of banks and bankers it contains, and upon the method of doing business; and no theory is more absurd than that which has been so frequently urged during the currency discussions of the past few years, that the amount of money required is in proportion to population. Tables showing the per capita of coin and currency in use in any country are curious and interesting, but almost valueless in determining the amount of paper money required. Through the machinery of the bank, with its system of checks, bills of exchange and clearing houses, large amounts of business may be settled without the use of coin or circulating notes. Coin and currency are but the small change used in trade. Checks and drafts are substitutes for money, and in every case, if these were not used, the latter would be required. Yet, notwithstanding the almost exclusive use of these substitutes for money in large business transactions, all payments, great and small, depend for their integrity upon a true measure of value, and that measure is a piece of gold coin of standard weight and fineness. All other coins, not subsidiary and intrinsically worth less than the general standard recognized at commercial centers, and all kinds of paper money which are not immediately redeemable in gold coin, are not only not needed, but are worse than useless, for they disturb values.

The London Bankers' Magazine for November, which has just been received, contains an abstract of a paper recently read by Mr. Pownall before the London Bankers' Institute, from which the following table has been compiled. The percentages of the receipts in the city of New York

on September 17 have also been added to the table:

Localities.	Coin.	Notes.	Checks.
New York London Edinburgh Dublin Country banks in 261 places	. 55 . 73 . 55	Per cent. . 65 2. 04 12. 67 8. 53 11. 94	

It will be seen that the proportion of checks and drafts used in London does not vary greatly from that of the same items shown in the receipts of the banks in New York City. The proportions used in the banking business of the country districts is less, as in the United States it is less in the banks outside the cities; but the use of checks and drafts in the country districts in the United States is nearly nine per cent. greater than in the corresponding districts in England.

Through the courtesy of Mr. E. Dayrell Reed, secretary of the Institute of Bankers, London, the Comptroller acknowledges the receipt of a "rough proof" of an important paper read by Mr. George H. Pownall before the Institute, on October 19 last, on "The proportional use of credit documents and metallic money in English banks," and regrets that it was received too late for use in the preparation of this part of the report. The paper is elaborate, and gives, in addition to the table already quoted, many others; among which are tables showing the proportion of gold coin, silver coin, bank notes and checks used by banks located in agricultural places, in the metropolitan area, and in the cotton, woolen, iron, pottery, and silk manufacturing districts. The entire paper will greatly interest the economic student; but under the circumstances the Comptroller is compelled to content himself with the following extracts:

There is a certain grim satire in these figures, when one thinks of the libraries filled with blue books full of weighty arguments, all curiously wrought out, to help in the settlement of the great note question. It is clear that the cheque and the clearing system are the main lines upon which banking is destined to run. Dead theories respecting notes and the right of issue belong to the generation to which they were living verities. To us the living fact is the substitution of a new instrument of credit. For the present generation the improvement of the cheque and the clearing system, the mechanical details of office organization, those details of bookkeeping which save time, are, from the enormous number of documents passing through the hands of bankers, of more weight than the most learned treatise on notes and note makers.

Banking statistics, gathered with due patience, would play a great part in industrial statistics. They represent trading totals, they rise and fall with prices, they expand with commercial prosperity, they contract in the day of bad trade. Systematically collected, they would furnish constant lessons. From no other source could we gain so much and so valuable information as to trading currents as from bankers. In their books the trading world is photographed. It has been calculated that 97 per cent of the transactions of British wholesale commerce pass through the hands of the cent. of the transactions of British wholesale commerce pass through the hands of the bankers of the United Kingdom. The sources of that commerce and its distribution must in the broadest way be marked in the totals of the banking world. The cottons of Lancashire, the woolens of Yorkshire, the shipping of Liverpool, the commerce and The cottons: finance of London, are all represented there.

The tendency of this generation is to seek to place its theories upon an exact basis.

How much would the social and trading life of England be illustrated if we could mark out, though only at intervals, or even for a single day, the magnitude of our great industries as they are represented in the books of bankers.

The conversion of the mode of settlement of claims from payment by coin and notes into payment by cheque and clearing is not merely a local, or even a national, movement. The American statistics, so opportunely published, demonstrate the wide-reaching influence of the causes working in that direction.

Wherever the English race has planted itself and founded a community, there the

tendency towards a common financial organization has shown itself. We see this at home, we see this in America, it is repeated in Australia. There is, therefore, in despite of much diversity, much that is common to all these systems.

In the Appendix will be found tables giving the amounts and ratios of gold and silver coin and paper money, as well as that of checks and drafts, in each of the cities, States, and Territories of the Union.

TRANSACTIONS OF THE NEW YORK CLEARING HOUSE.

The New York Clearing House Association is composed of forty-five national and twelve State banks, and the assistant treasurer of the United States at New York.

Through the courtesy of Mr. W. A. Camp, its manager, a statement of the transactions during the year ending October 1, 1881, has been obtained, which shows that the total exchanges were more than \$48,000,000,000, while the balances paid in money were less than \$1,800,000,000. The daily average balances paid were nearly \$6,000,000, or about 3.5 per cent. of the amount of the settlements. The balances paid in money during the year consisted of \$1,394,966,000 in clearing house certificates of the Bank of America, legal tenders amounting to over \$8,633,161, and \$372,419,000 in gold coin, weighing 686½ tons. If,

instead of gold coin, silver had been used, the weight would have been nearly 11,000 tons. The largest transactions for any one day were on the 28th of November, and amounted to \$295,821,422.37. The total transactions for the year exceed that of any previous year, by \$11,643,-269,121.43. The following table shows the yearly transactions of the New York clearing house for the twenty eight years since its organization in 1853, and the amounts and ratios of currency required for the payment of daily balances:

	1	l	l				1

The total amount of transactions for the twenty eight years given in the table is \$584,440,115,759, and the annual average is \$20,872,861,277.

The clearing house transactions of the assistant treasurer of the United States at New York, for the year ending November 1, 1881, were as follows: Exchanges received from clearing-house ......

Exchanges delivered to clearing-house	,	92,748,620
•		
Balances paid to clearing-house		270, 966, 495

5, 521, 341

Showing that the amount paid by the assistant treasurer to the clearinghouse was in excess of the amount received by him ...... 265, 445, 154

A table compiled from statements made by the New York clearinghouse, giving the clearings and balances weekly for the months of September, October, and November, of the year from 1872 to 1880, will be found in the appendix, and may be valuable for purposes of comparison.

DISTRIBUTION OF COIN AND PAPER CURRENCY.

The reports for 1879 and 1880 gave valuable tables of the amount of coin and paper money in the country on January 1, 1879 (the date of resumption), and on November 1 in 1879 and 1880.

Balances received from clearing-house ......

^{*}The capital is for various dates, the amount at a uniform date in each year not being † Totals for twenty-eight years.

[†]Yearly averages for twenty-eight years.

The imports of gold in excess of exports, from the date of resumption to November 1, 1881, have been \$197,434,114, and the estimated gold production of the mines is \$104,150,000. The amount received from these two sources during the year ending November 1, 1881, has been \$114.749.390.

The stock of standard silver dollars is also increasing at the rate of about two millions three hundred thousand monthly, the amount coined during the year having been \$27,824,955. Tables are again given herewith showing the amount of coin and currency in the country on January 1, 1879, and on November 1, 1879, 1880 and 1881:

	January 1,	November 1,	November 1,	November 1,
	1879.	1879.	1880.	1881.
Gold coin*. Silver coin* Legal-tender notes. National bank notes	\$278, 310, 126	\$355, 681, 532	\$453, 882, 692	\$562, 568, 971
	106, 573, 803	126, 609, 537	158, 320, 911	186, 037, 365
	346, 681, 016	346, 681, 016	346, 681, 016	346, 681, 016
	323, 791, 674	337, 181, 418	343, 834, 107	360, 344, 250
Totals	1, 055, 356, 619	1, 165, 553, 503	1, 302, 718, 726	1, 455, 631, 602

The amount of legal-tender notes has remained the same since May 31, 1878, in accordance with law. The increase of national bank notes during the year ending November 1 last was \$16,510,143. This, together with the increase of the gold coin, \$108,686,279, and of silver coin, \$27,716,454, makes a total increase of coin and bank notes of \$152,912,876. The statement below gives the amount of coin and currency in the Treasury at the same dates as in the previous tables, and the amount in the national banks on the dates of their returns nearest thereto—viz, January 1 and October 2, 1879, and October 1, 1880 and 1881, respectively. The amounts given for the State, banks, trust companies and savings banks, are for the nearest comparative dates of their official reports:

	January 1, 1879.	November 1, 1879	November 1, 1880.	November 1, - 1881.

^{*}Estimate of Director of the Mint, which includes bullion in process of coinage.

If the amount of coin and currency in the Treasury and in the banks be deducted from the total amount estimated to be in the country, the remainder will be the amount then in the hands of the people outside of these depositories, as follows:

2				January 1, 1879.	November 1, 1879.	November 1, 1880.	November 1, 1881.
Gold Silver Currency			• • • • • • • • • • • • • • • • • • • •	\$119, 629, 771 67, 693, 895 459, 097, 051	\$149, 415, 016 67, 228, 714 502, 168, 488	\$200, 250, 181 73, 848, 285 542, 951, 898	\$267, 663, 402 82, 939, 158 567, 445, 959
Totals .	•••••	•••	••••	646, 420, 717	718, 812, 218	817, 050, 364	918, 048, 519

The gold in the Treasury, including bullion in process of coinage, has increased during the year \$34,102,560, and in the banks \$7,170,498. The paper currency in the Treasury has increased \$4,553,004, and in the banks it has decreased \$13,727,914. The increase of gold, outside of the Treasury and the banks, is \$67,413,221, and of paper currency \$241,494,061.

In the foregoing tables the silver certificates issued by the Treasury have not been included, but the standard silver dollars kept to redeem them on presentation form a portion of the silver coin in the Treasury. The silver certificates in the hands of the people and the banks, at dates corresponding with those given in the preceding tables, were as follows:

January 1, 1879. November 1, 1879. November 1, 1880. November 1, 1881. \$413,360. \$1,604,370. \$19,780,240. \$58,838,770.

It will be seen that the amount of these certificates in circulation has increased \$39,058,530 during the past year. Of the \$58,838,770 circulating on November 1, 1881, a large portion are constantly in the hands of the people, being paid out by the banks in preference to gold coin or legal-tender notes.

The total amount of silver dollars coined up to November 1, 1881, was \$100,672,705, of which, as stated in one of the foregoing tables, \$66,576,378 was then in the Treasury, although an amount equal to \$58,838,769 was represented by certificates in the hands of the people and the banks, leaving only \$7,737,609 actually belonging to the Treasury. Of the \$100,672,705 coined, \$34,096,327 were therefore circulating in the form of coin and \$58,838,769 in the form of certificates. The remainder of the silver, \$85,364,660, is in subsidiary and trade dollars and bullion, of which \$29,409,262 is in the Treasury, and \$55,955,398 is in use in place of the previous fractional paper currency, which, on March 23, 1874, was at its highest point, and amounted to \$49,566,760. The increase since the date of resumption of gold and silver coin and paper currency outside of the Treasury and the banks, is thus estimated to be \$271,627,802, and the increase during the year ending November 1, \$100,998,254. Or, if the amount of silver certificates in circulation be added, the total increase in the circulating medium since resumption would be \$330,053,217, and during the past year, \$140,056,782.

AMOUNT OF INTEREST-BEARING FUNDED DEBT OF THE UNITED STATES
AND THE AMOUNT HELD BY THE NATIONAL BANKS.

The report for 1880 contained tables exhibiting a classification of the interest-bearing bonded debt of the United States, and of the bonds held by the national banks, for a series of years. These tables are again presented, and now exhibit also the amount of the outstanding bonds of the government, and the amount held by the banks, on November 1 of the present year.

The operations of the Secretary of the Treasury, in continuing the 5 and 6 per cent, bonds which matured during the year 1881, give them increasing interest. On March 1, 1881, 5 per cent. bonds amounting to \$469,320,650 were outstanding, redeemable at the option of the government after May 1, 1881, and 6 per cent. bonds amounting to \$202,266,550 were then outstanding similarly redeemable after July 1, 1881. The refunding bill, authorizing the sale of 3 per cent. bonds, with the proceeds of which, if sold, the maturing bonds would have been paid, did not receive the signature of the President, and failed to become a law. On April 11, the whole amount of 6 per cent. bonds were called for payment on July 1, 1881; but to the holders of all the 6 per cent. loans (except the Oregon war debt, amounting to \$688,200) permission was given to have their bonds continued, at the pleasure of the government, with interest at 3½ per cent. per annum, provided they should so request and the bonds should be received by the Treasury for that purpose on or before May 10, 1881, which time was afterwards extended to May 20. Of these bonds there were presented for continuance the amount of \$178,055,150, and the remainder, amounting to \$24,211,400, has, since March 1, 1881, been either paid from the surplus revenues or has ceased to bear interest.

On May 12, a like privilege (for continuance at 3½ per cent.) was given to the holders of the five per cent. bonds, if presented on or before July 1, 1881; and on the latter date notice was given for the payment on October 1, 1881, of the registered fives not continued. The total amount of five per cent. bonds continued under this arrangement was \$401,504,900, and of 6 per cent. bonds \$178,055,150. The remaining 5 and 6 per cent. bonds outstanding March 1, 1881, amounting to \$92,027,150, were paid upon presentation, or now remain outstanding without interest. There has also been paid during the year ending November 1, \$123,969,650 of interest bearing bonds, making a saving in interest of \$6,352,240. The total interest saved during the year, by continuance and payment of the bonds, was \$16,826,192.

The following table exhibits the classification of the unmatured, interest bearing, bonded debt of the United States* on August 31, 1865, when the public debt reached its maximum, and on the 1st day of July in each year thereafter, together with the amount outstanding on No-

vember 1 of the present year:

Date.	6 per cent. bonds.	5 per cent. bonds.	4½ per cent. bonds.	4 per cent. bonds.	Total.
August 31, 1865.  July 1, 1866.  July 1, 1867.  July 1, 1868.  July 1, 1869.  July 1, 1870.  July 1, 1871.  July 1, 1872.  July 1, 1872.  July 1, 1873.  July 1, 1874.  July 1, 1875.  July 1, 1876.  July 1, 1877.  July 1, 1878.  July 1, 1878.  July 1, 1878.  July 1, 1878.  July 1, 1878.  July 1, 1879.  July 1, 1880.  July 1, 1880.  July 1, 1881.	1, 008, 388, 469 1, 421, 110, 719 1, 841, 521, 800 1, 886, 341, 300 1, 764, 982, 300 1, 613, 897, 300 1, 374, 883, 800 1, 213, 624, 700 1, 100, 865, 550 984, 999, 650 854, 621, 850 738, 619, 000 310, 932, 500	607, 132, 750		\$98, 850, 000 679, 878, 110 739, 347, 800 739, 347, 800	2, 107, 930, 600 1, 986, 521, 600 1, 888, 133, 750 1, 789, 451, 100

^{*}The Navy pension fund, amounting to \$14,000,000 in 3 per cents., the interest upon which is applied to the payment of naval pensions exclusively, is not included in the table.

These operations of the Secretary during the present year have largely reduced the amount of interest receivable by the national banks

upon the bonds held by them.

During the year 1871, and previous thereto, a large portion of the bonds bore interest at the rate of 6 per cent.; and until the year 1877 all of the bonds bore interest at either five or six per cent. At the present time, more than 65 per cent. of the amount pledged for circulation consists of bonds bearing interest at the low rate of 3½ per cent., and nearly 35 per cent. of them bear interest at the rate of 4 and 4½ per cent. This will be seen from the following table, which exhibits the amounts and classes of United States bonds owned by the banks, including those pledged as security for circulation and for public deposits, on the first day of July in each year since 1865, and upon Novmeber 1 of the present year:

· · · · · ·	United	States bonds	U. S. bonds held for other pur- Grand				
Date.	6 per cent. bonds.	5 per cent. bonds.	4½ per cent. bonds.	4 per cent. bonds.	Total.	poses at nearest date.

July 1, 1877 July 1, 1878 July 1, 1878 July 1, 1879 July 1, 1880 July 1, 1881 Nov. 1, 1881	87, 690, 300 82, 421, 200 56, 042, 800	206, 651, 050 199, 514, 550 144, 616, 300 139, 758, 650 172, 348, 350 Continued at 3½ per cent.	\$44, 372, 250 48, 448, 650 35, 056, 550 37, 760, 950 32, 600, 500	\$19, 162, 000 118, 538, 950 126, 076, 300 93, 637, 700	338, 713, 600 349, 546, 400 354, 254, 600 361, 652, 050	47, 315, 050 68, 850, 900 76, 603, 520 42, 831, 300 63, 849, 950	386, 028, 650 418, 397, 300 430, 858, 120 404, 483, 350

The banks also held \$3,486,000 of Pacific Railroad 6 per cents., and \$738,900 of 5-per cents., upon which interest had ceased, which latter amount has since been reduced to \$229,000.

AMOUNT OF UNITED STATES BONDS HELD BY COMMERCIAL BANKS, TRUST COMPANIES, AND SAVINGS BANKS ORGANIZED UNDER STATE LAWS.

The amount of United States bonds held by banks organized under State laws is ascertained from such reports as have been received by the Comptroller, through the courtesy of State officers who have responded to his request for copies of their official returns at the latest dates. From such returns it is found that these institutions held, at different dates during the year 1881, the following amount of United States bonds:

Held by State banks in twenty-one States	 \$12,048,452
Held by trust companies in five States	 15, 631, 573
Held by savings banks in fifteen States	 210, 845, 514

The amount held by geographical divisions in 1880 and 1881 was as follows:

	Geographic	al divisions.	,	1880.	1881.
Eastern States Middle States Southern States Western States Pacific States				 \$45, 230, 098 157, 563, 757 958, 470 2, 672, 242 7, 240, 835	\$40, 468, 340 176, 573, 889 1, 073, 460 5, 735, 518 14, 874, 332

This amount is \$3,201,340 less than that returned to the Commissioner of Internal Revenue, who receives semi-annual reports, for purposes of taxation, not only from banks organized under State laws, but also from private bankers, giving their average capital and deposits, and the amount of such capital invested in United States bonds. From these returns the following table has been compiled, showing, by geographical divisions, the average amount of capital invested in United States bonds for the six months ending May 31, in the years 1879, 1880, and 1881:

	Capital invested in United States bonds.			
Geographical divisions.	By State banks, private bank- ers, and trust companies.	By savings banks.	Total.

The above table gives the average amount of capital invested in United States bonds, from which should be deducted the amount of premium paid at the time of purchase, which cannot be ascertained.

premium paid at the time of purchase, which cannot be ascertained.

The amount of United States bonds held by the national banks on October 1, 1881, was \$426,120,950, and the average amount held by the other banks and bankers of the country, during the six months ending May 31 last, was \$253,201,340. The total amount held by all the banks and bankers during the last two years is thus shown to be considerably

more than one-third of the whole interest-bearing funded debt of the United States, as follows:

	1880.	1881.

The following table exhibits the amount of loans, capital, surplus, net deposits, specie and paper money in the banks in New York City, in the other reserve cities, in the States and Territories, and in the Union, on October 1, 1881:

Assets and liabilities.	New York City.	Other reserve cities.	States and Ter- ritories.	United States.
	48 banks.	189 banks.	1,895 banks.	2,132 banks.
Loans Capital Surplus Net deposits Specie Legal tender notes and United States' certificates	\$246, 757, 659 51, 150, 000 19, 947, 316 268, 769, 373 50, 627, 368 10, 898, 371	\$346, 221, 151 119, 799, 830 34, 162, 895 335, 669, 226 34, 535, 367 21, 899, 231	\$576, 043, 494 292, 872, 155 74, 030, 407 507, 200, 770 27, 509, 821 27, 093, 002	\$1, 169, 022, 304 463, 821, 985 128, 140, 618 1, 111, 639, 369 112, 672, 556 59, 890, 604

The loans of the banks on October 1 were \$1,169,022,304, which is an increase of \$132,000,000 over the corresponding date in last year. The total individual and bank deposits, not deducting the amount due from banks and the clearing-house exchanges, have increased \$225,725,496, and amount to the unprecedented sum of \$1,381,852,887. The ratio of the total loans to capital, surplus, and net deposits was then 68.9 per cent.; in 1880 it was 67.3 per cent.; in 1879 65.3 per cent. The proportion of cash to net deposits was 15.5 per cent. on October 1, 1881, and for the corresponding dates in 1880 and 1879 it was 17.9 and 18.0.

In his report for last year the Comptroller gave tables showing the ratios of loans to capital, surplus and net deposits, and of cash to net deposits, of the banks in New York City, in other reserve cities, and of those elsewhere, on or near October 1 of each year, from 1870 to 1880, inclusive, and he then remarked as follows in reference thereto:

If the ratios of the loans of the banks in New York City to their capital, surplus, and net deposits be examined, it will be found that in October of 1879 and 1880, they were 70.8 per cent., in 1878 but 65.4 per cent., in 1877 but 68 per cent., and in 1876, 65.1 per cent.; and that the loans are now proportionately higher than at any time since 1873. The means of the banks in Boston and the other reserve cities were more fully employed in October than they were at the corresponding dates for the two previous years, though the business of the banks was not as much extended as it was during the four years following the crisis of 1873.

The ratios of the loans of the banks in the country districts were, on October 1, last,

7.3 per cent. less than at the corresponding dates in 1875, and 5.2 per cent. less than The opportunities for using money in this group of banks are not in proportion to the increase of deposits, and their balances in other banks have by no means

It will surprise those whose attention has not heretofore been called to the subject to find how closely the means of the banks in the commercial cities have been employed during the last eleven years, notwithstanding the variations in rates of interest, and particularly during the last two years, when money has been so abundant and the deposits have so rapidly increased. It will be seen that prior to 1876, with the exception of a single year, the loans in New York exceeded the net deposits, while since that time, though there has been considerable variation, the net deposits have been somewhat in excess of the loans at the dates given. In the other principal cities, which continually keep large amounts of money in New York subject to demand, and thus diminish their own net deposits, as given in the above table, the loans have always largely exceeded their deposits. The same remark is true of the banks in the country districts which have in New York, as well as in other cities, large amounts of money on deposits subject to call. The capital of this class of banks is also much larger as compared with their deposits than is that of the banks in the large cities, and their loans therefore relatively greater.

The same comments apply with equal force to the ratios shown by the returns for October 1 of the present year, as may be seen from the following table:

Dates.	New York City.	Other reserve cities.	States and Territories.	United States.
October 1, 1881	70.8	70. 8 67. 7	Per cent. 66. 4 65. 7 63. 9	Per cent. 68. 9 67. 3 65. 7

The ratios of cash to net deposits for the same dates were as follows:

	·			
Dates.	New York City.	Other re- serve cities.	States and Territories.	United States.
October 1, 1881	26.4	Per cent. 16. 8 18. 5 19. 4	Per cent. 10. 8 12. 1 12. 7	Per cent. 15. 5 17. 9 18. 0

In reference to reserves the Comptroller last year remarked as follows:

The amount of legal cash reserve required of the banks in New York City is 25 per cent. of their deposits, of the banks in the other reserve cities one-half of this ratio, and of the banks in the country districts 6 per cent. of their deposits.

The banks in the interior, if we consider their large deposits elsewhere, are as a rule found to be much stronger in available means than the banks in New York City; while the reverse of this should always be true when such large balances, amounting to more than 100 millions of the funds of other banks, are constantly on deposit in the latter

city subject to demand.

The amount of legal reserve required to be held by the banks was largely reduced by the act of June 20, 1874, the provision requiring reserve on circulation having been repealed, and the percentage held in the larger cities has been greatly diminished during the past few years. The sudden and enormous increase of individual and bank deposits in the commercial centers should be accompanied, not only by the reserve required by law, but by a much greater percentage of coin and a much smaller expansion of loans, if the banks would check unhealthy speculation, and keep themselves in condition for an adverse balance of trade and for the legitimate demands of the depositors and correspondents who confide in them.

On October 1 of the present year the aggregate reserve held by the New York City banks, including the five per cent. redemption fund,

was 23.3 per cent. only, falling below the amount required by law, and similar deficiencies were shown by previous statements of the clearing-house; but the returns of the banks to the clearing-house for the weeks ending October 27 and 29 following, show a contraction of loans and reduction of liabilities, and a slight excess of reserve over the amount required by law. The reserves in the other reserve cities, which include the amount held by agents in New York, were considerably less than at the corresponding date last year, although still in excess of the amount required by law, being 30 per cent. of deposits; while the total reserves of the banks in other localities were, as usual, very strong,

amounting to 31.2 per cent. of the net deposits.

The loans and deposits for each year since resumption day, on January 1, 1879, have increased largely in each group of banks, while the cash reserves in each are being gradually reduced. It is evident that these deposits consist, to a much greater extent than usual, of the avails of loans placed to the credit of dealers. This exhibit shows that the banks are rapidly expanding; and there are many indications that this rapid increase is not the result of legitimate business, but of venturesome speculation, largely consequent upon the importation of coin and increased issues of silver certificates and bank notes. The increase in the amount of United States bonds held by the banks has been 13 millions during the last year, but it is 15 millions less than at a corresponding date in 1879. This is somewhat surprising, when it is considered that  $3\frac{1}{2}$  per cent. bonds can be purchased at about par, and that the rate of interest paid on deposits in New York City is from two to three per cent. only.

The attention of Congress has previously been called to section 5200 of the Revised Statutes, which places restrictions upon loans, and to the difficulty of enforcing its provisions. In cities where large amounts of produce are received and stored, it is represented that it is impossible for the banks to transact this class of business, if restricted to loans for an amount not exceeding in any instance one tenth of their capital. is true that the limitation does not apply to loans upon produce in transit, where the drafts are drawn on existing values; but if produce is stored instead of being shipped, large loans cannot be made except in violation In such case the Comptroller has no means of enforcing the law, except by bringing a suit for forfeiture of charter, and this course might result in great embarrassment to business, as well as loss to many innocent stockholders of the banks. It is evident that the law should be so amended as to exclude from the limitation mentioned legitimate loans upon produce or warehouse receipts, as well as loans upon United States bonds.

Large loans are also continually being made upon other stocks and bonds, and these loans are largely made to stock brokers, the result being to assist and promote speculative operations upon the stock board. The provision of law mentioned is valuable, so far as it affects banks outside of the large commercial centers, as it provides for a just distribution of loans; but it is recommended that the limit be increased to ten per cent. upon the combined capital and surplus, and that loans upon United States bonds be not limited in amount. It is also recommended that the limit for loans upon stocks and bonds be increased to fifteen per cent. upon capital and surplus, and that such penalty be then imposed for exceeding this limit as would make a violation of the provision unprofitable if the penalty were collected. It is important that some amendment of this kind be enacted, or that means be provided for enforcing the provisions of the section as it now stands.

RATES OF INTEREST IN NEW YORK CITY, AND IN THE BANK OF ENGLAND AND THE BANK OF FRANCE.

The average rate of interest in New York City for each of the fiscal years from 1874 to 1881, as ascertained from data derived from the Journal of Commerce and The Commercial and Financial Chronicle, was as follows:

1874, call loans, 3.8 per cent.; commercial paper, 6.4 per cent. 1875, call loans, 3.0 per cent.; commercial paper, 5.6 per cent. 1876, call loans, 3.3 per cent.; commercial paper, 5.3 per cent. 1877, call loans, 3.0 per cent.; commercial paper, 5.2 per cent. 1878, call loans, 4.4 per cent.; commercial paper, 5.1 per cent. 1879, call loans, 4.4 per cent.; commercial paper, 4.4 per cent. 1880, call loans, 4.9 per cent.; commercial paper, 5.3 per cent. 1881, call loans, 3.8 per cent.; commercial paper, 5.0 per cent.

The average rate of discount of the Bank of England for the same years was as follows:

During the calendar year ending December 31, 1874, 3.69 per cent. During the calendar year ending December 31, 1875, 3.23 per cent. During the calendar year ending December 31, 1876, 2.61 per cent. During the calendar year ending December 31, 1877, 2.91 per cent. During the calendar year ending December 31, 1878, 3.78 per cent. During the calendar year ending December 31, 1879, 2.50 per cent. During the calendar year ending December 31, 1880, 2.76 per cent. During the fiscal year ending June 30, 1881, 2.74 per cent.

The rate of interest in the city of New York on December 2, as derived from the Daily Bulletin, was, on call loans, from 4 to 6 per cent., and on

commercial paper from 6 to 7 per cent.

During the present year the rate of discount of the Bank of England has been changed six times, as follows: On January 13, increased from 3 to  $3\frac{1}{2}$  per cent.; February 17 reduced to 3 per cent., and on April 28 further reduced to  $2\frac{1}{2}$  per cent.; on August 18 increased to  $3\frac{1}{2}$  per cent.; August 25 to 4 per cent.; and again increased on October 6 to 5 per cent.

The rate of the Bank of France has been changed but twice during the present year, and in each instance there was an increase, as follows: On August 25 from 3½ to 4 per cent., and on October 20 from 4 to 5 per cent., which is the rate at the present time. The bank rates of discount for the week ending November 12 were, in Berlin, 5½ per cent., Amsterdam, 4 per cent., Brussels, 5½ per cent., Vienna, 4 per cent., and St. Petersburg 6 per cent.*

#### DUTIES OF DIRECTORS AND EXAMINERS.

The recent failure of The Mechanics' National Bank of Newark has called the attention of the public directly to the duties of bank directors and of examiners of national banks.

Section 5147 of the Revised Statutes provides that each director, when appointed or elected, shall take an oath that he will, so far as the duty devolves on him, diligently and honestly administer the affairs of such association, and will not knowingly violate or permit to be violated any of the provisions of this act. Section 5136 also provides that the association shall have power to prescribe, by its board of directors, by-laws not inconsistent with law, regulating the manner in which its stock shall be transferred, its directors elected or appointed, its officers appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

^{*} The Economist, London, November 12, 1881.

In accordance with the provisions of this last named section, by-laws are generally adopted by national banks soon after their organization, which usually contain, among other provisions, sections similar to the following:

There shall be a standing committee, to be known as the "Exchange Committee," appointed by the board, every six months, to continue to act until succeeded, who shall have power to discount and purchase notes and bills and other evidence of debts, and to buy and sell bills of exchange, and who shall, at each regular meeting, make a report of the notes and bills discounted and purchased by them since their last previous report.

There shall be appointed by the board every three months a committee, whose duty it shall be to examine into the affairs of the bank, to count its cash, and to compare its assets and liabilities with the balances on the general ledger for the purpose of ascertaining that the books are correctly kept and the condition of the bank corresponds therewith, and that the bank is in a sound and solvent condition; the result of which examination shall be reported to the board at its next regular meeting.

The object of these by laws is, first, to keep the board of directors continuously informed what notes and bills are discounted, and to furnish them with a detailed account thereof; and secondly to establish a check by the directors upon the cashier, teller and bookkeeper of the bank, to whose immediate custody and control the assets and accounts of the bank are committed. A method is thus provided by which the diligent and continuous administration of the directors, which is required by their oaths, shall be performed.

It is thus seen that both the laws of the United States and the by-laws adopted by the directors themselves, under the law, in clear terms define their duties. The men employed by them in the banks are under their supervision, the law providing—

That the bank shall have power to elect or appoint directors, and by this board of directors to appoint a president, vice-president, cashier, and other officers, define their duties, require bonds of them and fix the penalty thereof, dismiss such officers or any of them at pleasure, and appoint others to fill their places.

The duties of the board of directors are plainly defined, and however innocent they may be of any intention of wrong, they are responsible for the safety of funds committed to their care. If it can be shown that any of them had notice of illegal transactions, it is a serious question whether they are not legally bound to make good the loss which may occur; and it is a question whether they are not also liable for losses which may occur from neglect of duty, even without notice. If this is not the just and proper construction of the present law, then it becomes a subject for the consideration of Congress, whether additional legislation upon this point is not required. The National Bank Act is full of restrictions, to which reference has already been made in another portion of this report, such as those requiring an adequate reserve; the enforced accumulation of the surplus; the method of increasing and reducing the capital stock and its prompt restoration if impaired; the prohibition against making loans on real estate and on the security of their own shares of stock, or of accommodation or other loans than business paper in excess of one-tenth of the capital of the bank; the prohibition against the declaration of dividends unless earned: against certifying checks without the necessary deposit; and many other similar provisions. These restrictions are intended to protect these institutions, by imposing upon them general rules, which experience has shown may be properly done by the government without its thereby becoming the guardian of the bank, or of the moneys of its depositors or stockholders, or being in any way responsible for the management of its funds. It is the duty of the examiner to ascertain whether the officers of the bank and its directors are complying with the requirements of the law

and whether they are in any way violating any of its provisions, to the end that in such case they may be enforced by the proper

authority.

The stockholders elect the directors, who are usually men not only of high character and well known in the community where the bank is located, but are generally also large stockholders in the bank, and having therefore each a personal interest in its prosperity and good management. The depositors confide in the bank because they believe the directors will manage its affairs honestly and diligently, and will employ honest and faithful servants for that purpose. They know that the bank is organized under laws which contain, wholesome restrictions, and that it is the duty of the Comptroller, so far as he can through his corps of examiners, to inform himself of the condition of the bank, and to require that its business shall be conducted in conformity with law.

The examiner can have but a limited knowledge of the habits and character of those employed in the bank. If the teller is making false entries, and daily abstracting the funds of the bank; if the bookkeeper is keeping false accounts and rendering untrue statements; if the cashier is placing forged paper among the bills receivable and upon the register book, and transmitting such paper to distant places where it is purported to be payable, it is not possible for an examiner, in a day or two, to unravel this evil work, which may have continued for months, and obtain a correct balance sheet. A full and complete examination of the bank necessitates not only counting the cash, proving the bills receivable and stock ledger, comparing the individual deposit accounts with the general ledger, and ascertaining if the business of the bank is conducted in accordance with law; but, also, the thorough examination of all accounts, the verifying of accountscurrent, and ascertaining by telegraph or letter the correctness of such verification, the calling in of every depositor's book, and correspondence with every bank or banker doing business with the bank.

Examinations should be periodically made by a competent committee, selected from the board. The directors have abundant means at their command, and if they have any reason to suspect dishonesty or fraud, it is their business to investigate thoroughly, and they should employ experts to assist them in so doing. The national bank examiners have, in fact, been frequently called upon by the directors of both national and State banks for this purpose; and if it is the intent of the law that the national banks shall be thus searchingly examined, it should be so amended as to make this intent clear, and should also make provision for the necessary compensation for such service. The small compensation now provided does not contemplate a yearly auditing of all the accounts of a bank by the examiner, as the pay is entirely inadequate for such a work—the amount allowed for the examination of banks of like capital being the same, without reference to the difference in the volume of their The inspection by an examiner of a small bank is usually completèd in a day: of larger banks, through the aid of an assistant, in two or three days. But a thorough analyzing and scrutiny of everything would require one or two weeks; and if fraud were suspected it might

continue for months without entirely satisfactory results.

The reports of the bank, as made to the Comptroller five times in each year, are each published in a newspaper where the bank is located, and every stockholder has, therefore, an opportunity to scrutinize these statements, and to make inquiry of the directors in reference to the affairs of the association.

The detection of embezzlement may occur as an incident, but it is not

the principal object, of the system of bank examinations. It is peculiarly the business of the directors, who are daily or weekly in session, to keep themselves informed of the habits and characters of their employés, to see that their time is given to the service of the bank, and that they are not engaged in speculations, and thus, by continuous watchfulness, to prevent defalcations on the part of their servants; while it is the business of the examiner to detect frauds so far as in his power, and in his occasional visits to see that the directors are loaning the funds, and, with the other officers, managing the affairs of the bank strictly according to the provisions of the law. The examiner's visits are usually made about once a year, while the directors are at hand at all times. Faithful performance of the duties of each gives assurance of almost absolute safety. Lax performance of duty on the part of either invites disaster. The directory must continuously look after its own servants. The examiner looks after the acts of the directors.

The report of the examiner is confidential. It is for the use of the Comptroller's office only, and is in no sense a certificate of the good condition of the bank. In many instances the capital stock of a bank has thus been found to be impaired, and the deficiency has been made good without the knowledge of the general public. In other instances banks have been obliged to pass their usual dividends, using their earnings to liquidate all bad and doubtful debts—the number of banks passing dividends during the present year being 175; in 1880, 230; in 1879,

304; and in 1878, 343.

Hundreds of instances have occurred annually, and many are occurring daily, wherein the banks, under the reports of the examiner, are notified of violations of the act and are brought under the discipline of the law. The betterment of the condition of the banks, and the enforcement of the requirements of the law, are part of the continual and ordinary supervision exercised by this Office. It is a supervision and labor not seen or known of by the general public, whose attention is only arrested when some sudden or unexpected failure occurs; and this simply illustrates the fact that, with the best endeavors, and the most careful supervision by this Office, such disasters may happen in the many contingencies of administering difficult and extensive duties, if directors neglect to exercise that continuous vigilance for which they

were elected, and which they have sworn to perform.

The Mechanics' National Bank of Newark was placed in the hands of the receiver on November 2 last. It had a capital of \$500,000, a surplus of \$400,000, and deposits of over \$2,500,000. The capital and surplus are lost, through the criminal conduct of the cashier, and the stockholders are personally liable for an amount equal to the capital The depositors will, it is estimated, receive at the outcome from 60 to 80 per cent. of their claims, depending upon the amount collected from the stockholders and that received from the estate for whose benefit the funds of the bank are alleged to have been abstracted, which estate is also now in the hands of a receiver appointed by the This bank was many times examined by skilled accountants of great experience, but it cannot be denied that some of them were misled by the criminal cashier, who, through his apparently high character and standing, so long deceived not only the directors, but every one with whom he had business relations. The examination of August 14, 1879, was conducted by two experienced experts, but was, as I am informed, rendered useless by a forged telegram purporting to be from the correspondent of the bank in New York. The examiner, on August 16, 1880, verified the accounts of correspondents, as he was specially instructed to

do in a letter from the Comptroller in June previous; but he also was deceived by a forged letter from the New York correspondent, skillfully planned for this purpose, addressed to the examiner, received through the mail, and bearing the New York post-mark. Either of these examinations would have disclosed the robbery of the cashier, if the examiners had not been deceived by forgeries which would have been likely to

mislead the most thorough expert.

It is, however, far from correct to represent that similar defalcations in national banks have not been previously discovered. The greatest defalcation in the history of the government, of eleven hundred thousand dollars, in the office of the assistant treasurer of New Orleans. which had certainly existed, in whole or in part, for more than a year, was discovered nearly fifteen years ago by an officer of this bureau, which discovery also resulted in the disclosure of a large deficiency in the First National Bank of New Orleans, and the placing of that bank in the hands of a receiver. Since that time many of the other banks which have failed have been placed in the hands of receivers through the vigilance of bank examiners; and in many other instances officers of solvent and insolvent banks have, through the same means, been indicted and convicted for criminal acts. The bank examiners in New York City and Boston are nominated by the clearing houses of those cities, and many other examiners now employed are men of the highest character, who have for years rendered excellent service. It is of the greatest importance that all men employed in this branch of the public service shall be well-trained and fitted for their work. It is not claimed that every examiner employed is a first-class expert—the compensation authorized is not sufficient for that purpose in many small districts. If State lines can be disregarded in the appointment of examiners, and men be selected for these positions upon merit alone, and kept well employed, a corps of skilled examiners would soon be engaged in this work, who would reflect the highest credit upon this branch of the public The records of this office show, however, that only one among all the examiners ever appointed has been found guilty of wrongdoing, while in no branch of the government service have men performed more faithful duty than those who have been engaged in the examinations of the national banks.

Such disasters do not exhibit the weakness of the banking system, but rather the weakness and wickedness of human nature. The system is strong, and carefully and elaborately guarded. Private companies and individuals are continuously suffering from embezzlements and forgeries. It is scarcely to be expected, if a robber or a forger is placed in control of all of its assets, that a national bank can be saved from disaster by the occasional visits of an examiner. Some additional legislation will be required; but there is not so much necessity for additional restrictions as there is for increased care upon the part of examiners, and increased diligence and sagacity on the part of directors who are in charge of great trusts.

The Pacific National Bank of Boston suspended on November 18 ultimo. The last report of the examination of this bank gave what seemed to be a thorough exhibit of its affairs. A long communication was addressed by the Comptroller to the directors of the bank on February 19 last informing them of such irregularities as then existed in the conduct of its business. They were specially informed that the irregular and illegal practice of loaning the credit of the bank by the issue of certificates must be discontinued. In reply to this communication a letter from the president of the association was received on February 28, explaining the irregulari-

ties referred to. In regard to the issuing of the certificates he said that "never in a single instance has any stipulation been made by us in regard to any certificate issued to any party. They are issued in regular form, and are payable at any moment upon presentation." To this it was replied by the Comptroller on March 3 that—

The examiner distinctly stated in his recent report that "loans are sometimes made by the issuing of demand certificates, and parties obtaining loans in this way indorse the certificates and pledge them as collateral, or stipulating the time of payment for them, have them regularly discounted, and thus raise money indirectly from other parties and banks." If this statement be correct, the bank is lending its credit, which it is not authorized by law to do, and the practice must, as stated in my letter of the 19th ultimo, be discontinued.

That this information was brought to the attention of the directors is evident from a letter received since the date of suspension, on the 25th instant, from the person who made the examination, which says:

Had your letter, which you wrote after my last examination, which was read by Mr. Benyon, the president, to the board, as you requested, been heeded, the present condition of things would have been avoided.

Such a letter, in any properly-conducted bank, addressed by the Comptroller to a board of directors composed, as was the case in this instance, of prominent merchants and business men, should have been sufficient to correct the abuse and save the bank from the disaster which has occurred.

The examiner also informs me that during the examination, and subsequent thereto, he called special attention of the directors to the hazardous manner of doing business, and urged them to follow closely the president and examine loans made by him and the way in which his business was conducted, and was promised by more than one director that close attention would be given to the whole matter. The directors thus had full information in reference to the irregular and illegal methods of the bank which have since caused its ruin.

The law should certainly be so amended as to make it a criminal offense for an officer of a bank clandestinely to make loans, either by the use of certificates, as in this case, or otherwise.

RETIREMENT OF NATIONAL BANK NOTES AND WITHDRAWAL OF BONDS HELD AS SECURITY THEREFOR.

The only legislation in reference to the national banks during the last session of Congress was contained in section 5 of "the funding act of 1881," which was as follows:

SEC. 5. From and after the first day of July, eighteen hundred and eighty-one, the three per centum bonds authorized by the first section of this act shall be the only bonds receivable as security for national-bank circulation, or as security for the safe-keeping and prompt payment of the public money deposited with such banks; but when any such bonds deposited for the purposes aforesaid shall be designated for purchase or redemption by the Secretary of the Treasury, the banking association depositing the same shall have the right to substitute other issues of the bonds of the United States in lieu thereof: Provided, That no bond upon which interest has ceased shall be accepted or shall be continued on deposit as security for circulation or for the safe-keeping of the public money; and in case bonds so deposited shall not be withdrawn, as provided by law, within thirty days after interest has ceased thereon, the banking association depositing the same shall be subject to the liabilities and proceedings on the part of the Comptroller provided for in section 5234 of the Revised Statutes of the United States: And provided further, That section four of the act of June twentieth, eighteen hundred and seventy four, entitled "An act fixing the amount of United States notes, providing for a redistribution of the national-bank currency, and for other purposes," be, and the same is hereby, repealed; and sections 5159 and 5160 of the Revised Statutes of the United States be, and the same are hereby, re-enacted.

This act was vetoed by the President.

The number of national banks, which deposited legal tender notes for

the purpose of obtaining possession of their bonds, in anticipation of the passage of this bill, was 141. These banks were located in twenty four States, and the amount of legal tender notes deposited by them was \$18,764,434, as follows:

States and cities.	No. of banks.	Amount.	States and cities.	No. of banks.	Amount.
Philadelphia Pennsylvania Boston Massachusetts Connecticut Montana District of Columbia Rhode Island Nebraska Kansas Ellinois Maine North Carolina	10 1 1 2	2, 083, 300 1, 034, 100 81, 000 1, 675, 400 36, 000 72, 000 385, 200 171, 900 81, 000 845, 900 135, 000	New York City New York New Jersey Indiana Missouri Virginia Ohio Minnesota Kentucky Michigan Lowa Vermont Wisconsin	23 5 10 3 1 19 3 1 4	\$2, 843, 848 1, 934, 606 1, 987, 006 1, 080, 006 164, 743 45, 000 1, 402, 636 135, 006 310, 906 27, 006 100, 406 463, 536 211, 156
Maryland	1	72, 000	Totals	141	18, 764, 43

Only about one-third of the bonds which were thus released were subsequently redeposited, and for some months thereafter the total amount of bonds redeposited by the 141 banks which reduced their circulation was less than 7 millions. The Third National Bank of New York, which withdrew \$840,000 of bonds, soon thereafter disposed of the same to the Government, and has not since made any deposit whatever. The same statement may be made in reference to eight other large banks, which withdrew bonds amounting to over two millions of dollars, and also to many other smaller banks—thus showing that they withdrew their bonds because they desired control of them, and not for the purpose of arbitrarily reducing circulation. The Comptroller has been unable to obtain any evidence that there was a combination on the part of the banks to deposit legal tender notes and withdraw bonds for the

purpose of deranging the money market.

Since the adjournment of Congress, only \$2,394,545 of legal-tender notes have been deposited under the act of June 20, 1874, for the purpose of retiring circulation, and these notes have been redeemed without any expense whatever to the Government of the United States—the cost thereof having been paid from the five per cent. redemption fund. bonds now held are chiefly 3½ and 4 per cents, there being 241 millions of the former and 92 millions of the latter. The amount of interest received from an investment in either class of these bonds is nearly the same, and there is but little disposition to deposit legal-tender notes for the purpose of withdrawing them. Some banks take occasion to withdraw their 4 per cents, for the purpose of realizing the large premium of 16 per cent., which they now bear, as this premium can be used for the purpose of liquidating any losses which may occur in their busi-The 3½ per cent. bonds are being frequently called by the Secretary, and the banks may therefore have occasion to withdraw them after interest has ceased, and it is important that they continue to have this privilege, upon a deposit of lawful money as now provided by law.

The amount of loans of the national banks in New York City on October 1, 1881, was 246 millions, and 97 millions of this amount was payable on demand; the total amount of loans of all the banks was 1,169 millions, of which 196 millions was demand loans. It is probable that the proportion of demand loans held by the State banks is fully as great. Any proceeding which would tend to bring on a panic, or erange the money market in New York, would, first of all, affect the

value of the stocks and bonds held by the banks as securities for these loans. It would be directly against the interest of the bank to pursue such a course, and it is a new principle in banking to assume that banking institutions will so conduct their business as to depress the value of securities which they themselves hold. If the banks, however, either National or State, or private bankers, should at any time desire to derange the market, they could do so, independently of any legislation by Congress, by calling in their demand loans. Such a course would be much more simple and easy of accomplishment than the depositing of legal tender notes in the Treasury, and it would be much more effective. If, however, Congress shall consider it advisable to prevent the banks from depositing in the Treasury for this purpose large amounts of coin or other lawful money, then section 4 of the act of June 20, 1874, may be so amended as to require those desiring to withdraw bonds to give a reasonable notice of their intention to do so, before completing the transaction.

When bonds deposited to secure the circulation of the national banks are called for payment by the government, it is necessary that the banks should withdraw them for redemption. This they can do, either by substituting other bonds or by depositing, under section 4 of the act of June 20, 1874, lawful money, to retire the circulation secured by the bonds which they desire to withdraw. The most convenient method for the banks is to avail themselves of the provision of section 4 referred to, as in many cases they desire permanently to withdraw bonds, without substitution. Prior to May 23 last, the Treasurer of the United States, and his predecessors in office, had, as a matter of convenience both to the banks and the government, permitted the redemption of called bonds by the following method: The banks sent a power of attorney, authorizing the Comptroller to withdraw the bonds, and the Treasurer of the United States to assign them to the Secretary of the Treasury for redemption on account of the bank, as much of the proceeds as might be necessary being used to retire the circulation secured by the The bonds were never out of the hands of the officers of the Treasury Department. The banks were thus relieved from the necessity of first sending in the money to retire their circulation, and the Government was enabled to get in its called bonds with more promptitude. May 23, however, the Treasurer declined longer to allow this method of withdrawal and redemption, alleging that the proceeds of these bonds were coin, and not legal-tender notes, and that section 4 of the act of June 20 requires deposits for the retirement of circulation to be made in legal-tender notes only.

On June 1 the Comptroller addressed a letter to the Secretary of the Treasury, in which he stated the position taken by the Treasurer, and "that he declined to receive gold coin, which is a legal tender in payment of all debts, and insisted upon a deposit of United States notes, which are but promises to pay coin on demand." The Comptroller dissented from this ruling of the Treasurer, and held that the act, properly construed, authorized the receipt of "lawful money," which includes gold and silver coin as well as United States notes, and requested that the question be referred to the Attorney-General for his construction of

section 4 of the act of June 20, 1874.

On the 6th of June the Secretary referred the matter to the Attorney-General, and on the 14th of the same month the latter officer decided that "the banks may withdraw their bonds upon the deposit of the requisite amount of any kind of lawful money." He said, further, that—

The language of section 4 is almost too unambiguous for construction, as it expressly confers upon national banking associations the right to deposit sums of not less than

\$9,000 in lawful money, and to take up the bonds deposited for security of circulating notes; and that these words, as here used, possess their ordinary signification is apparent from the phraseology of concomitant and other provisions of law, and from considerations touching the general subject.

He also quoted a decision of his predecessor on a similar point, in confirmation thereof. On the same date that this decision was rendered by the Attorney General, the Secretary of the Treasury addressed another letter to him, in which two additional questions in reference to this matter were asked: First, whether, under section 3 of the act approved June 20, 1874, chapter 343, a national banking association may deposit any lawful money other than United States notes for redemption of its circulating notes; and, second, whether the holders of the notes of any solvent national banking association may demand of the Treasurer, under the provision of sections 3 and 4 of that act, redemption of such notes in United States notes?

On June 30, 1881, the Attorney-General replied, and, as to the first question, decided that a bank may deposit coin for the purpose mentioned in the 3d section as above quoted. In answer to the second question, he said:

I think the Treasurer, while having the privilege, under sections 3 and 4 of said act, to redeem bank circulation in United States notes, has the right to pay them in coin. The government notes are promises to pay dollars, and for such promises the thing promised may properly be substituted by the promiser, and that the act of June 20, 1874, chapter 343, was not intended to repeal or affect the general provisions of the law (Revised Statutes, section 3585, et seq.) making the coin of the United States legal tenders in all payments.

This decision removed all the distinctions which had been previously insisted upon by the Treasurer of the United States, as to the kind of lawful money that might be received or paid in these transactions.

# NUMBER, CAPITAL AND DEPOSITS OF NATIONAL BANKS, STATE AND SAVINGS-BANKS, AND PRIVATE BANKERS.

The capital of the 2,115 national banks in operation on June 30, 1881, as will be seen by a table in the Appendix, was \$460,227,835, not including surplus, which fund at that date amounted to more than 126 millions of dollars; while the average capital of all the State banks, private bankers and savings banks, for the six months ending May 31, 1880, was but \$210,738,203. The latter amount is but little more than one-third of the combined capital and surplus of the national banks,

The following table exhibits in a concise form, by geographical divisions, the total average capital and deposits of all State and savingsbanks and private bankers in the country, for the six months ending May 31, 1881:

G		State banks and trust companies.			Private bankers.			Savings banks with capital.			Savings banks with- out capital.	
Geographical divisions.	No.	Capital.	Deposits.	No.	Capital.	Deposits.	No.	Capital.	Deposits.	No.	Deposits.

From this table it will be seen that the total number of banks and bankers in the country at the date named was 6,796, with a total banking capital of \$670,966,043, and total deposits of \$2,667,343,595.

In the Appendix will be found similar tables for various periods, from 1875 to 1881, where will also be found other tables giving the assets and liabilities of State institutions during the past year, so far as they could be obtained from the official reports of the several State officers.

A table arranged by States and principal cities, giving the number, capital and deposits, and the tax thereon, of all banking institutions other than national, for the six months ending May 31, 1881, and for previous years, will also be found in the Appendix.

The following table exhibits, for corresponding dates nearest to May 31 in each of the last six years, the aggregate amounts of the capital and deposits of each of the classes of banks given in the foregoing table:

Years.	National banks.			State banks, private bankers, &c.				Savings banks with capital.			wings kswith- capital.		Total.

# PRIVATE BANKERS.

In the Appendix will be found a table giving by geographical divisions, and by States, Territories and principal cities, the number of State banks, savings banks, trust and loan companies and private bankers of the country, together with the amount of their capital and deposits, and the amount invested by them in United States bonds. The first official information of this character ever published in regard to the private bankers of the country was contained in a table in the Comptroller's report for 1880. From the table in the Appendix, mentioned above, the following information in reference to the private bankers in

sixteen of the principal cities has been separated, it being thought that it will prove of special interest:

Cities.	Number of banks.	Capital.	Deposits.	Invested in U. S. bonds.
Boston New York City Albany Philadelphia Pittsburgh Baltimore Washington New Orleans Louisville Cincinnati Cleveland Chicago	508 3 52 7 19 6 5 3 8 4 24	\$4. 065, 097 45, 482, 515 550, 000 1, 890, 614 663, 910 773, 657 364, 000 32, 000 178, 000 812, 167 55, 000 2, 004, 197	\$2, 570, 068 45, 414, 376 1, 611, 470 6, 174, 785 2, 025, 77 2, 389, 032 3, 747, 703  728, 464 3, 863, 817 963, 938 10, 455, 063	287, 029 280, 205 8, 967 172, 589
Detroit Milwaukee Saint Louis San Francisce	. 4	161, 256 64, 667 261, 302 1, 275, 918	945, 669 530, 047 304, 976 8, 271, 660	7, 333 350 44, 405 104, 074
Totals	717	58, 534, 300	89, 996, 545	12, 370, 012

The following table gives similar information for the thirty-one States and Territories, exclusive of the cities in the above table, having an amount of capital in excess of \$100,000. In this table the number of private bankers is 2,255; the aggregate amount of capital, \$34,169,435; and of deposits, \$148,178,652, the average capital being \$15,152, and the average deposits \$65,711:

States and Territories.	Number of banks.	Capital.	Deposits.	Invested in U. S. bonds.

Totals	2, 255	34, 169, 435	148, 178, 652	4, 227, 815

The remaining fifteen States and Territories, not enumerated in the above table, contain 66 private bankers, with an aggregate capital of \$620,120, and aggregate deposits of \$3,670,357. Massachusetts has only three private bankers, outside the city of Boston, with an aggregate capital of \$50,000, and aggregate deposits of \$539,028. Maryland has but two private bankers, outside of the city of Baltimore. The State

of Maine has but seven private bankers, North Carolina four, New Hampshire four, New Jersey five, Delaware and Vermont only one each, Florida six, and Arizona five. The average amount of capital held by each of these 66 private bankers is \$9,244, and of deposits \$57,127.

The total number of private bankers in the foregoing cities is 717, with an aggregate capital of \$58,534,300, and aggregate deposits of \$89,996,545—the average capital being \$81,637, and the average deposits \$125,518. About 70 per cent. of these private banks are located in New York City, representing nearly four-fifths of the aggregate capital and more than one-half of the aggregate deposits. The average amount of capital and deposits of each private banker in the city of New York is about \$89,000; and the bankers in that city also held \$9,670,751 of United States bonds, which is more than one-half of the amount of such bonds held by all of the private bankers of the country.

The following table shows, by geographical divisions, the number of private bankers in the United States, with the aggregate amount of their capital, deposits, and investments in United States bonds, for the

six months ended May 31, 1881:

Geographical divisions.	Number of banks.	Capital.	Deposits.	Invested in U.S. bonds.
New England States Middle States Southern States Western States and Territories	938 258	\$4, 698, 782 55, 397, 130 5, 588, 828 27, 639, 115	\$5, 162, 708 94, 104, 980 17, 323, 504 125, 254, 362	\$1, 067, 652 11, 401, 808 263, 780 v 3, 937, 254
United States	3, 038	93, 323, 855	241, 845, 554	16, 670, 494

The table below is a recapitulation of the foregoing, showing by groups the aggregates for the bankers in the sixteen principal cities, in the thirty-one States and Territories having a private banking capital in excess of \$100,000, and in the fifteen remaining States and Territories:

## RECAPITULATION.

## STATE BANKS, SAVINGS BANKS, AND TRUST COMPANIES.

The act of Congress of February 19, 1873, section 333 of the Revised Statutes, requires the Comptroller to obtain from authentic sources, and to report to Congress, statements exhibiting under appropriate heads the resources and liabilities of such banks and savings banks as are organized under the laws of the several States and Territories. In compliance with this act he has presented annually in the appendices to his reports the resources and liabilities of these corporations, so far as it has been possible to obtain them.

Through the courtesy of State officers, returns of State banks, savings banks, and trust and loan companies have during the past year been received from twenty-three States. Many of the States and Territories, including Illinois, Nebraska, Dakota, Oregon, Virginia, and Tennessee, do not require periodical returns of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the difference of the condition of the condition of the condition of the difference of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the cond

ferent classes of banks organized under their laws.

#### STATE BANKS AND TRUST COMPANIES.

From these returns the following abstract has been compiled, showing the resources and liabilities of State banks and trust companies for the last two years, the number reporting in 1880 being 650, and in 1881 683:

	1880.	1881.
resources.	,	
Loans and discounts Overdrafts United States bonds Other stocks, bonds, &c Due from banks Real estate Other assets Expenses Cash items Specie Legal tenders, bank-notes, &c  Total. The foregoing table was prepared from returns from five New Eng land States, exclusive of Maine, which has but one State bank in operation; from four Middle States, not including Delaware; and from all the Western States excepting Illinois, Kansas, and Nebraska. The only Southern States represented therein are South Carolina, Georgia, Louisiana, Texas, and Kentucky. The only Pacific State is California. There is but one State bank in New Hampshire, six in Vermont, and none in Massachusetts. There are, however, five trust and loan companies in the latter State, and ten in Connecticut.

## SAVINGS BANKS.

The following table exhibits the aggregate resources and liabilities of 629 savings banks in 1880 and in 1881:

	, ,	
	1880.	1881.
RESOURCES.  Loans on real estate Loans on personal and collateral security United States bonds State, municipal, and other bonds and stocks Railroad bonds and stocks Bank stock Real estate Other assets Expenses Due from banks Cash	187, 413, 220 150, 440, 359 20, 705, 378 32, 225, 923 39, 038, 502 27, 053, 452 216, 423 22, 063, 091	\$307, 096, 158 95, 817, 641 210, 845, 514 159, 819, 942 27, 069, 048 33, 249, 203 41, 987, 674 37, 408, 168 135, 567 40, 603, 641 13, 758, 106
Total		967, 790, 662
Deposits	4,740,861	891, 961, 142 60, 289, 905 10, 325, 800 5, 213, 815 967, 790, 662

The foregoing table includes the returns from the six New England States, from four Middle States, not including Delaware, from the State of California, and from three other States and the District of Columbia. The aggregate of loans in the New England States is \$230,239,027, and of deposits \$403,304,135. In the Middle States the aggregate of loans is \$130,204,828, and of deposits \$424,212,944.

Some of the largest savings banks in the city of Philadelphia, organized under old charters, are not required to make reports to any State officer. Returns received directly from four of these banks, having deposits amounting to \$26,895,295, are included in the returns for the State

of Pennsylvania.

The savings bank deposits given in the foregoing table for 1881, based on reports made to the State authorities, are \$891,961,142, and the deposits of the State banks and trust companies were \$373,032,632. These deposits do not include bank deposits. The deposits of the national banks on October 1, 1881, exclusive of those due to banks, were \$1,086,942,470. These deposits of the national banks bear to those of the savings banks the proportion, nearly, of 55 to 45, to those of the State banks and trust companies the proportion of 74 to 26, and to the combined deposits of both the proportion of 46 to 54.

The total population of New England, according to the census of 1880, is 4,010,529, and the number of open deposit accounts in the savings banks is 1,227,899; which is equal to 30.6 accounts to each one hundred of the entire population. The average amount of each account is \$328.45; and if the total deposits were divided among the entire population, the average sum of \$100.56 could be given to each individual.

The deposits of the savings banks in the State of New York were \$353,629,657, while the population is 5,082,871; showing that an equal distribution of the savings bank deposits among the entire population

of the State would give \$69.57 to each individual.

Tables showing the aggregate resources and liabilities of State banks, trust companies and savings banks, in each State from which returns turns have been received from the State authorities, appear in the adpendix.

# SECURITY FOR CIRCULATING NOTES.

During the past year there has been much change in the classes of United States bonds which the national banks have on deposit to secure their circulation, owing to the redemption or continuation of the five and six per cent. bonds of 1881. The classes and amount of these bonds held by the Treasurer on the 1st day of November, 1881, are exhibited in the following table:

Class of bonds.	Authorizing act.	Rate of interest.	Amount.
	July 14, 1870, and January 20, 1871 dodododo	4½ . do	\$50, 000 708, 900 31, 981, 650 92, 005, 800 36, 040, 650 17, 700, 950' 187, 634, 550 3, 486, 000
Total			369, 608, 500

The total amount of bonds held for the purpose of securing circulation on October 1, 1865, was \$276,260,550, of which \$199,397,950 was in 6 per cent. and \$76,852,600 in 5 per cent. bonds. On November 1, 1880, the banks held \$56,605,150 of six per cents, and \$147,079,750 of 5 per cents

On November 1, 1881, all of these bonds had been called, and, with the exception of \$758,900, on which interest had ceased, had been redeemed, or extended at the rate of 3½ per cent. The banks now hold \$31,981,650 of 4½ per cents, and \$92,05,800 of 4 per cent. bonds. They hold also \$3,486,000 of Pacific Railroad bonds, and \$758,900 called bonds on which interest has ceased. The remainder, \$245,601,050, consists of bonds bearing interest at the rate of 3½ per cent. The average rate of interest now paid by the United States upon the bonds deposited as security for circulating notes is about 3.7 per cent. upon their par value. The amount of interest paid is equal to about 3½ per cent. only of the current market value of the bonds.

SPECIE IN BANK AND IN THE TREASURY OF THE UNITED STATES, AND ESTIMATED AMOUNT IN THE COUNTRY—SPECIE IN THE BANK OF ENGLAND, AND IN THE BANK OF FRANCE.

The following table exhibits the amounts of specie held by the national banks at the dates of their reports for the last eight years, the coin and coin certificates held by the New York City banks being stated separately:

The issue of gold certificates was authorized by the fifth section of the act March 3, 1863, and they were used for clearing house purposes soon after the passage of the National Bank Act. The first issue was made on November 13, 1865. On June 30, 1875, there were outstanding \$21,796,300, of which the national banks in New York City held \$12,642,180. The issue of these certificates was discontinued on December 1, 1878, and the amount outstanding had decreased on June 30, 1879, to \$15,413,700, and on October 1, 1880, to \$7,480,100. issue of these certificates having been discontinued by the government, and the amount of gold coin having rapidly increased, the banks in New York found it necessary to establish a depository of gold coin, for the convenience of the clearing house. This depository, at the present time, is the Bank of America, by which bank certificates of deposit were first issued on October 14, 1879. The amount of such certificates outstanding on November 1, 1879, was \$9,155,000, on January 1, 1880, \$25,610,000, and on June 1 following, \$39,550,000. The amount held by the national banks in New York City on June 30, 1881, was \$41,858,000; and on October 1, \$31,721,000.

The clearing-houses of Boston, Philadelphia and Baltimore have organized similar depositories, in order to utilize their gold coin, and to save the risk and inconvenience of handling and transporting it. The total amount of such certificates held by the national banks in New York on October 1 was \$31,721,000; by those in Philadelphia, \$5,325,000; in Boston, \$4,949,000; and in Baltimore, \$1,095,000; total,

\$43,090,000.

The national banks held silver coin amounting, on October 1, 1877, to \$3,700,703, and on October 1, 1878, to \$5,392,628. On October 2, 1879, the amount held was \$4,986,493, and on October 1, 1880, it was \$6,495,477, including \$1,165,120 in silver treasury certificates. On October 1, of the present year, the official reports of the State banks in New-England, New York, New Jersey, Pennsylvania, Maryland, Louisiana, Ohio, Indiana, Iowa, Wisconsin, Missouri, and Minnesota, show that these banks then held specie amounting to \$9.019,500, of which the banks in New York City held \$4,985,820. The official returns from the State banks of California do not give separately the amount of coin held by them; but the bank commissioners of that State estimate that of the total cash reported, amounting to \$11,276,000, \$10,846,672 consisted of coin. The amount of coin held by State banks in the States before mentioned, including California, was, therefore, \$19,866,172.

The Director of the Mint, in his report for 1880, estimates the amount of coin in the country on June 30, 1880, at \$501,555,711, of which \$358,958,691 was gold and \$142,597,020 was silver. His estimate for

the fiscal year ending June 30, 1881, is as follows:

Amount of coin in the country June 30, 1880	\$501, 555, 711
Net gold coinage for the year	78, 293, 087
Net silver coinage for the year	
Net importation of gold for the year	
Net importation of silver for the year	1, 295, 086
2.00 2mg	

Of this amount the Director estimates that there was used in the arts \$3,300,000 of gold, and \$75,000 of silver, making a total of \$3,375,000. If this be deducted from the total given above, it will make the amount in circulation on July 1, 1881, \$611,236,519, of which \$439,776,753 was in gold, and \$171,459,766 in silver. From July 1, 1881, to November 1, the Director estimates that there was added to the coin \$28,716,474 of gold

and \$9,610,858 of silver, making the stock of coin in the country at the latter date \$649,563,851, of which \$468,493,227 was gold and \$181,070,624

The amount of bullion in the mint and in the New York assay office on November 1 is stated to have been \$94,075,744 of gold and \$4,966,741 of silver, making in all \$99,042,485; which, added to the estimated amount of coin stated above, gives \$748,606,336, of which amount \$562,568,971

was gold and \$186,037,365 was silver.

The following table shows the amount of gold and silver, including the amount held to protect gold and silver certificates, and the percentage of each, in the Treasury of the United States, on September 30 of each year from 1876 to 1881, and on November 1, 1881:

,		Silver.		, , , .		Per cent. of-		
Period.	Standard dollars.	Other coin and bullion.	Total silver.	Gold coin and bullion.	Total coin and bullion.	Silver.	Gold.

‡The Bulletin de Statistique, as quoted in the Bankers' Magazine, New York, vol. xiii, page 740; except the items for 1879,'80 and '81, which were obtained from the London Banker's Magazine for August, 1880, page 661, and September, 1881, page 716, and the last item from The London Economist, November 12, 1881.

## NATIONAL BANK FAILURES AND DIVIDENDS TO CREDITORS.

During the year ending November 1, 1881, no national banks have failed; but since that date, the Mechanic's National Bank of Newark, N. J., and the Pacific National Bank of Boston, Mass., have suspended, and the former bank has been placed in the hands of a receiver.

The affairs of twelve banks which failed prior to November 1, 1880, have, during the year, been finally closed, and final dividends have been paid to creditors. These banks with the total dividends paid, are given

below:

Total dividends.

Bethel, Conn., First National Bank	100 per cent. and interest.
Brattleboro', Vt., First National Bank	
Delphi, Ind., First National Bank	100 per cent. and interest in full.
Duluth, Minn., First National Bank	100 per cent. and interest in full.
Fort Scott, Kans., Merchant's National Bank	
Franklin, Ind., First National Bank	100 per cent. and interest in full.
Kansas City, Me., First National Bank	
New Orleans, La., Crescent City National Bank	
Poultney, Vt., National Bank	100 per cent. and interest in full.
Saratoga, N. Y., Commercial National Bank	100 per cent. and interest in full.
Warrensburg, Mo., First National Bank	100 per cent. and interest in full.
Winchester, Ill., First National Bank	

Attention is called to the fact that nine of the twelve foregoing insolvent national banks, whose affairs have been closed during the past year, have paid in full the principal of the claims proved against them, and that eight of the nine have paid principal and interest, seven of them paying interest in full.

The following banks whose affairs are still in the hands of receivers paid dividends during the past year, as follows, the total dividends paid

by them up to November 1 being also given:

Bozeman, Mont., First National Bank, 15 per cent.; total, 85 per cent. Butler, Pa., First National Bank, 10 per cent.; total, 40 per cent. Charlottesville, Va., Charlottesville National Bank, 5 per cent.; total, 55 per cent. Chicago, Ill., City National Bank, 7 per cent.; total, 77 per cent. Chicago, Ill., Third National Bank, 10 per cent.; total, 100 per cent. Chicago, Ill., German National Bank, 25 per cent.; total, 80 per cent. Fishkill, N. Y., National Bank, 15 per cent.; total, 90 per cent. Georgetown, Colo., Miners' National Bank, 30 per cent.; total, 65 per cent. Helena, Mont., Peoples' National Bank, 15 per cent.; total, 30 per cent. Lock Haven, Pa., Lock Haven National Bank, 15 per cent.; total, 90 per cent. Meadville, Pa., First National Bank, 35 per cent.; total, 100 per cent. Newark, N. J., First National Bank, 10 per cent.; total, 90 per cent. Norfolk, Va., First National Bank, 4 per cent.; total, 49 per cent. Saint Louis, Mo., National Bank, 4 per cent.; total, 25 per cent.; total 95 per cent. Scranton, Pa., Second National Bank, 25 per cent.; total, 25 per cent.; total, 40 per cent.

It will be noticed that two of the above banks have already paid the principal of their claims to creditors, and it is believed that they will also pay interest, either in part or in full. Of the banks given which have not paid 100 per cent., it is expected that many will do so, and they

will perhaps pay interest, in addition.

The total amount of dividends paid by the Comptroller to the creditors of insolvent national banks during the year ending November 1, 1881, was \$929,059.16. The total dividends paid to creditors of the 86 banks placed in the hands of receivers prior to November 1 amount to \$18,561,698, upon approved claims amounting to \$25,966,602. The dividends paid equal about 70 per cent. of the proved claims. Assessments amounting to \$7,601,750 have been made upon the shareholders of insolvent national banks, for the purpose of enforcing their individual liability, of which

about \$3,000,000 has been collected, and nearly \$400,000 of it within

the past year.

A table showing the national banks which have been placed in the hands of receivers, the amount of their capital, of claims proved, and the rates of dividends paid, and, also, one showing the amount of circulation of such banks issued, redeemed, and outstanding, will be found in the Appendix.

# TAXATION OF NATIONAL BANKS.

The Comptroller again respectfully repeats his recommendation for the repeal of the law imposing a tax upon bank capital and deposits,

and the two-cent stamp upon bank checks.

The receipts of internal revenue show an increase of \$10,447,763 for the fiscal year 1880, and a still further increase of \$11,447,996 for 1881, the total increase during the whole period being more than twenty-one and a half millions. The increase of the receipts of the government from customs, internal revenue, and other sources during the year 1880 was \$59,699,426, and for the two years named it was nearly 87 millions (\$86,955,108). The expenditures of the government during the last fiscal year were less than for either of the two previous years, and the surplus revenue during the same period was more than 100 millions. The receipts for the four months ending November 1 last show a still further increase, and it is probable that the surplus revenue for the present year will be much greater than for any one that has preceded The whole amount of internal revenue collected by the Commissioner during the last fiscal year was \$135,229,912, all of which, with the exception of \$11,520,704, was derived from the tax on spirits, beer, and tobacco.

The amount paid by the national banks to the Treasurer of the United States, for taxes on capital and deposits, during the year ending June 30, 1881, was \$5,372,178.22, and the amount paid by banks, other than national, to the Commissioner of Internal Revenue, under the law taxing bank capital and deposits, was \$3,757,912. The value of the twocent check stamps issued during the fiscal year was \$2,366,081. The total amount of bank taxes which it is recommended should be abated is \$11,496,171, which amount is much less than the annual increase of The receipts from the internal revenue during the past two years. taxes are largely increasing, while the expenditures of the government are largely decreasing, through the reduction of the public debt and ot The reason that has heretofore been urged against the interest thereon. the abrogation of these laws-namely, that the amount produced was necessary for the support of the government and for the payment of the public debt—has long since lost its force. Their repeal has already been recommended, both by the Secretary of the Treasury and the Commissioner of Internal Revenue.

While in many of the States there may be a necessity for taxing banking capital and deposits, for purposes of revenue, this reason for retaining a war tax, in the case of the United States Government, has passed away. The rates of interest for money are gradually lessening, and the State taxes which the banks are compelled to pay are as much as should be imposed upon these great agencies for developing the manufacturing and commercial interests of the country. The Comptroller herewith presents tables which give, as far as can be ascertained, the amount of the banking capital of the country, the amount of United States and State taxes, and the rate of taxation paid by the national banks in every State and principal city in the Union for the year 1880.

The following table shows the amount of United States and State

taxes, and the rate of taxation paid by the national banks, in every State and principal city of the Union for the year 1880:

Maine		-			_

^{*}The capital of the banks that reported State, county, and municipal taxes on stock and real estate is \$444,773,085.
† California banks pay no State taxes on capital, except on such as is invested in real estate.

Like tables for the years 1867 and 1869, and for the years 1874 to

1879, inclusive, may be found in the Appendix.

In order that the great inequality of the percentage of the United States and State taxes to the capital of national banks in the different geographical divisions of the country may be seen, tables have been prepared for the years 1879 and 1880, in which the capital stock invested and the percentage thereto of taxes paid is given, as follows:

1879.

	,	Aı	nount of tax	es.	Rati	os to cap	ital.

The inequality in the percentages in United States taxes, which appears in the foregoing tables, arises from the fact that, while the United States tax is imposed on the three items of circulation, deposits, and capital, the percentages given in the tables are those of the total tax, derived from these three sources, to capital only. Where deposits and circulation are large in proportion to capital, the percentage of United States tax in the table is therefore greater; where the deposits and circulation are proportionately smaller, the percentage is less. The inequality in State taxes originates in an actual difference in the rates. The table below shows for the years 1878, 1879, and 1880 the great inequality in the rates in State taxation paid in the principal States in the country.

1		1878.	,	1879.			1880.

The national banks, under present law, pay to the United States a tax of one per cent. upon the amount of their notes in circulation, one-half of one per cent. upon the amount of their deposits, and the same rate upon the average amount of capital invested in United States bonds. These taxes are paid semi-annually by the national banks to Treasurer the of the United States.

The following table shows the amount annually paid under this law, from the commencement of the national banking system to July 1, 1881, showing an aggregate of taxes paid to the United States, by national banks, of \$108,855,021.90:

Years.	On circulation.	On deposits.	On capital.	Total.
1864 1865 1866 1867 1868 1870 1871 1872 1873 1874 1875 1876 1877 1877 1878 1879 1879 1879	733, 247 59 2, 106, 785 30 2, 868, 636 78 2, 946, 343 07 2, 957, 416 73 2, 949, 744 13 2, 957, 021 60 3, 193, 570 03 3, 353, 186 13 3, 293, 450 89 3, 091, 795 75 2, 948, 047 08 3, 109, 647 16 3, 153, 635 63	\$95, 911 87 1, 087, 530 86 2, 633, 102 77 2, 650, 180 09 2, 564, 143 44 2, 614, 553 58 2, 614, 676 61 2, 802, 840 85 3, 120, 984 37 3, 196, 569 29 3, 209, 967 29 3, 514, 265 39 3, 551, 129 64 3, 451, 965 38 3, 273, 111 74 3, 309, 668 30 4, 058, 710 61	\$18, 432 07 133, 251 15 446, 947 74 221, 881 36 306, 781 67 312, 918 63 375, 962 26 385, 292 13 389, 325 13 389, 326 27 454, 891 51 469, 048 02 507, 417 76 632, 296 16 660, 784 90 560, 296 38 401, 920 61 379, 424 10	\$167, 537 26 1, 954, 029 60 5, 146, 835 81 5, 840, 688 23 5, 817, 268 18 5, 884, 888 95, 940, 474 00 6, 175, 154 67 7, 004, 646 93 7, 083, 498 37 7, 305, 134 04 7, 229, 221 56 6, 721, 236 6, 721, 236 7, 591, 770 43
Aggregates	3, 121, 374 33 49, 062, 536 26	4, 940, 945 12 52, 644, 349 23	7, 148, 136 41	8, 493, 552 55 108, 855, 021 90

The amount of tax paid upon circulation alone is \$49,062,536, while the whole cost to the government of the national system, since its establishment in 1863, has been but \$5,148,649.01.

The banks, other than national, pay taxes to the United States on account of their circulation, deposits and capital, at the same rates as are paid by the national banks; but these taxes, instead of being paid to the Treasurer, are collected by the Commissioner of Internal Revenue.

The table below exhibits the taxes which have been paid by these banks for the years from 1864 to 1881, inclusive. The amounts given

under the head of tax on circulation have, for a number of years, been principally derived from the tax of ten per cent. upon State bank circulation paid out. The whole amount of tax paid by these banks is \$61,540,471.63:

Years.	On circulation.	On deposits.	On capital.	Totals.

These statistics show that during the fifteen years covered by the table the average amount annually paid by the national banks to the States and to the United States was \$16,589,199, or more than  $3\frac{1}{2}$  per cent. upon their capital stock; during the last year given, the total amount paid was \$15,994,925, or more than 4 per cent. upon the amount of the average circulation of the banks then in operation.

#### STATE TAXATION OF NATIONAL BANKS.

The United States Supreme Court, in the case of The People ex rel. Williams vs. Weaver, at the October term in 1879, decided that the States have no right to assess the shares of national banks located within their borders, for purposes or taxation, at a greater rate or valuation than other moneyed capital in the hands of individuals is assessed; and that an individual in New York, holding bank shares, has the same right to deduct his just debts from the amount of his bank shares as he would have to deduct them from his personal property, including his

moneyed capital. The Supreme Court also pointed out the method of relief for national banks to pursue when taxes are assessed upon them at a greater rate than is assessed upon other moneyed capital in the same State, such method being to enjoin the collection of excessive taxes.

In November, 1880, it was decided by the United States circuit court of the northern district of the State of New York, in the case of the Albany Exchange Bank vs. Charles A. Hills et al., that the law of the State of New York, under authority of which taxes had been assessed for fourteen years upon bank shares, was void and invalid, for the reason that this act did not permit the owners of bank shares to reduce their assessment by the amount of their debts, while owners of other moneyed capital possessed that privilege under the general statutes of the State. As soon as this decision was known, injunctions were obtained by nearly every bank in New York City, restraining the collection of taxes imposed by State authority upon the shareholders of those banks. The collection of over \$1,700,000 was thus enjoined. The question involved was appealed to the Supreme Court of the United States.

Since my last annual report, two acts have been passed by the New York State legislature, to establish a system of taxation. One of them expressly permitted the deduction of debts, in the assessment of shares of banks organized under the authority of the State or of the United States. In the second act the taxation of corporations generally was

provided for, excluding banks and some other corporations.

Although the first act apparently removed the objection which existed to the former State law taxing National and State banks, yet it did not provide against the unjust and discriminating valuation of the shares of banks, as compared with the valuation of real estate and of other personal property. After considerable discussion the majority of the banks in the Clearing-House Association of New York have decided to pay the tax imposed under this law for the year 1881, notwithstanding this

objection to it.

During the year there have been two important decisions in reference to taxation of national bank shares rendered in the United States circuit court for the northern district of the State of New York. The first was in the case of the New York State National Bank of Albany vs. W. J. Maher, where the court held that the assessments against the shareholders of the bank were absolutely void, for the reason that the assessors did not place the names of the shareholders, with the number of their shares and the assessable value of the same, upon the regular assessment-roll, but upon a list separate therefrom.

The second decision was in a suit brought by the First National Bank of Utica against the State tax-collector, to test the effect of the acts

which provided for the taxation of corporations generally.

The amount of the tax imposed by the law mentioned, in all cases other than those of banks and certain specified corporations, was at a rate much less than the rates of local taxation in many parts of the State, and less than that imposed upon the shares of banks. In this suit it was decided that Congress did not intend to prohibit the State from taxing its own corporations more lightly than shares in national banks, provided that the latter class of property was not assessed more heavily than other moneyed capital in the hands of individuals.

A suit was brought by the Evansville National Bank, in the United States circuit court of the State of Indiana, in order to test the validity of the statutes of that State, directing the assessment of bank shares. It was held by the bank that these statutes are void, because they do not grant to the owners of bank shares the privilege of deducting their

just debts from the assessed valuation of such shares, while under the general statutes of the State that right was granted to the owners of other moneyed capital. Justice Harlan, of the United States Supreme Court, recently decided in this suit that the law of Indiana "enforces in certain cases a rule of taxation inconsistent with the principle of equality underlying the legislation of Congress, and conformity to which is essential to the validity of State taxation of national bank shares." He decides that every shareholder of a national bank, who, at the time of assessment, had debts, and no credits from which he could deduct the same, except national bank shares, from which the State laws did not permit him to make such deduction, is entitled, through the bank, to an injunction against the tax assessed upon the shares.

As it is in the power of the States, under the present law of Congress, so to legislate that through unequal valuations bank shares may be discriminated against as compared with other moneyed capital in the hands of corporations or individuals, a necessity appears to exist that, in order to avoid protracted and expensive litigation, Congress shall so amend the present law that there can be no doubt as to the precise amount of taxation which may be imposed by the States on national

bank shares.

In my last annual report a suggestion was made in reference to the amendment of section 5219, Revised Statutes of the United States. It is now again recommended that the section named shall be amended to read as follows:

But the legislature of each State may determine and direct the manner and place of taxing the shares of national banking associations located within the State, subject to the following restrictions, namely: That the maximum rate of tax shall not exceed—per cent.; that the rate, and the valuation upon which such rate is calculated shall not exceed the least rate and valuation to which other moneyed capital, in the hands of individuals, or of corporations of any class, in such State is subjected, and that the shares of any national banking association, owned by a non-resident of any State, shall be taxed in the State or town in which the bank is located, and not elsewhere

If such an amendment becomes a law it will, in a great measure, prevent the various forms of discrimination which have been exercised in the imposition and collection of taxes upon national bank shares, under State authority. The Supreme Court of the United States has decided that, without the permission of Congress, the States would have no right to impose any taxes whatever upon national banks, and that in enacting the law under which the States now exercise this right, Congress was conferring a power on the States which they would not otherwise have This court also decided that it was the evident intention of Congress to protect the banks from anything beyond their equal share of the public burdens. Congress has therefore the power wholly to rescind the right granted to the States to tax national banking associations. This, however, is not asked or desired. But, inasmuch as it has been the tendency of legislation in different States to disregard, or render inoperative, the provisions of the act of Congress permitting and restricting State taxation of national bank shares, it is certainly not too much to expect that Congress will regard it as due to themselves to pass such amendments as will carry out the intention of their original act, clearly defined and sustained as it has been by the decisions of the Supreme Court of the United States.

LOSSES, SURPLUS, EARNINGS AND DIVIDENDS OF THE NATIONAL BANKS.

During the year ending September 1, 1881, the national banks charged off losses amounting to \$12,691,349.75. Of this, \$5,889,761.19 was charged

off during the six months ending March 1, 1881, and \$6,801,588.56 during the similar period ending September 1, 1881. The following table shows the number of banks that charged off these losses, and the amount so charged off by them, in each State and reserve city throughout the United States, for the two semi-annual periods ending March 1 and September 1, 1881, respectively. The total losses charged off in each of the four preceding years have been added to the table. Full tables for the five previous years may be found in the Appendix:

Of the losses given in the foregoing tables, a portion is on account of the depreciation in the premium on United States bonds held by the banks. The amount of premium thus charged off during the past year was \$2,271,339.50; and, during the last four and a half years, it amounted to \$13,107,099. The total losses, shown in the above table, extending over a period of five years, are equal to 24.5 per cent. of the entire capital of the banks, and 19.1 per cent. of their combined capital and surplus.

In order further to illustrate this subject, several of the principal cities of the United States have been selected, and the losses sustained during the past five years by the national banks located in each are given in the following table:

Cities.	1877.	1878.	1879.	1880.	1881.	Total.
New York Boston Philadelphia Pittsburgh Baltimore New Orleans	2, 192, 053 81 333, 248 47 289, 466 59 200, 597 74		2, 655, 390 58	1, 110, 831 72	\$2, 321, 002 62 701, 054 73 406, 249 16 258, 088 09 99, 179 76 74, 920 25	\$16, 906, 203 15 9, 149, 528 30 2, 192, 676 03 1, 557, 742 33 1, 174, 529 50 1, 090, 646 87

The losses charged off by the banks during the last year are about \$2,000,000 less than those experienced during the previous year. A part of the losses charged off, as shown by the preceding tables, consisted of bad debts as defined in the law—viz, debts on which interest was due and unpaid for a period of six months, and which were neither secured nor in process of collection. The bad debts so charged off consisted of other stocks and bonds on which interest had ceased, as well as of bills receivable. Since the resumption of specie payments, the value of a

portion of these bad assets has been realized; and it is estimated that in this way about 25 per cent. of these losses has since been recovered.

DIVIDENDS AND EARNINGS.

From the semi-annual returns made by the banks to this Office, tables have been prepared, showing the dividends and profits, and the ratios of each to capital, and to capital and surplus combined. The following table shows the capital, surplus, dividends, and total earnings of all the national banks, for each half year, from March 1, 1869, to September 1, 1881, with the ratios, as before specified:

	1			_			RATIOS.

SURPLUS.

Under the law requiring the national banks to carry to surplus fund, before declaring dividends, a certain proportion of their earnings, the national banks of the country have accumulated a fund, in addition to their capital, which now amounts to \$128,140,618. This surplus is not infringed upon, except in case of extraordinary losses, such as cannot be paid from the current earnings of the banks, and consequently forms, with the capital, the working fund of the banks. In the following table the gradual accumulation of this fund, from the commencement of the system to the present time, is shown, as nearly as possible, by semi-annual periods. The increase or decrease for each period is also given:

Dates.	Amount.	Semi-annual increase or decrease.	Dates.	Amount.	Semi-annual increase or decrease.
July 4, 1864 January 2, 1865 July 3, 1865 Jauuary 1, 1866 July 2, 1866 July 2, 1866 January 7, 1867 January 6, 1868 January 2, 1869 June 12, 1869 January 22, 1870 June 19, 1870 December 28, 1870 June 10, 1871 December 16, 1871 June 10, 1872 December 27, 1872	\$1, 129, 910 8, 663, 311 31, 303, 566 43, 000, 371 50, 151, 992 59, 992, 875 63, 232, 811 70, 586, 126 75, 84c, 119 81, 169, 937 82, 218, 576 90, 174, 281 91, 689, 834 94, 705, 740 98, 322, 204 101, 573, 154 105, 181, 943 111, 410, 249	#7, 533, 401 22, 640, 255 11, 696, 805 7, 151, 621 9, 840, 883 3, 239, 986 7, 253, 315 5, 258, 993 5, 329, 818 1, 048, 339 7, 955, 76 1, 515, 553 3, 015, 906 3, 016, 406 3, 250, 950 3, 608, 789 6, 228, 306	June 13, 1873. January 1, 1879 June 14, 1879 June 11, 1880 December 31, 1880 June 30, 1881	120, 961, 268 126, 239, 308 130, 485, 641 133, 169, 095 133, 085, 422 131, 897, 197 131, 390, 665 124, 714, 073 121, 568, 455 118, 178, 531 116, 200, 864 114, 321, 376 115, 429, 032 118, 102, 014	Increase. \$5, 487, 206 4, 113, 813 5, 278, 040 4, 246, 333 2, 683, 485 Decrease. \$83, 673 1, 188, 225 6, 676, 532 6, 676, 532 6, 145, 618 3, 389, 244 1, 977, 667 1, 879, 488 Increase. \$1, 107, 666 2, 672, 982 3, 722, 615 4, 854, 889

From December, 1875, to June, 1879 there was a constant decrease in this fund. In all other cases a gradual increase is to be noted.

UNITED STATES LEGAL-TENDER NOTES AND NATIONAL-BANK CIRCULATION.

The acts of February 25, 1862, July 11, 1862, and March 3, 1863, each authorized the issue of 150 millions of dollars of legal tender notes, making an aggregate of 450 millions of dollars. On January 30, 1864, the amount of such notes outstanding was \$449,338,902, which was the highest amount outstanding at any one time. The act of June 30, 1864,

provided that the total amount of United States notes issued or to be issued should not exceed 400 millons of dollars, and such additional sum, not exceeding 50 millions, as may be temporarily required for the redemption of temporary loans. By the act of June 20, 1874, the maximum amount was fixed at \$382,000,000.

Section 3 of the act of January 14, 1875, authorized an increase of the circulation of national banks in accordance with existing law, without respect to the limit previously existing, and required the Secretary of the Treasury to retire legal-tender notes to an amount equal to 80 per cent. of the national bank notes thereafter issued, until the amount of such legal-tender notes outstanding should be 300 millions, and no more. Under the operation of this act \$35,318,984 of legal-tender notes were retired, leaving the amount in circulation on May 31, 1878, the date of the repeal of the act, \$346,681,016, which is the amount now outstanding.

The act of July 12, 1870, provided that no national banking association organized after that date should have circulation in excess of As this restriction was enacted at a time when a limit existed **\$**500,000. as to the aggregate amount of circulation which could be issued to national banking associations, the necessity for it ceased after the passage of the act of January 14, 1875, which, as stated, removed all limit upon the aggregate amount of circulating notes, and a repeal of the restriction is recommended by the Comptroller. A bill was, at the last session of Congress, reported from the finance committee, authorizing all banks to receive circulation equal to the full amount of their capital, as was the case in the original bank act. The passage of this bill would give the banks the privilege of increasing their circulation up to the limit of their capital, if at certain seasons of the year such an increase should be desirable. This increase would not probably be great, for the amount of circulation outstanding is now much less than that authorized by law.

Since the passage of the act of June 20, 1874, \$127,923,596 of legaltender notes have been deposited in the Treasury by the national banks, for the purpose of reducing their circulation, and \$101,034,675 of bank notes have been redeemed, destroyed, and retired. In the following table are given the amounts and kinds of the outstanding currency of the United States and of the national banks, on January 1 of each year, from 1866 to 1880, and on November 1, 1881; to which is added the amount on August 31, 1865, when the public debt reached its maximum:

Date.	United States issues.			Notes of na-		Currency	Gold

The amount of circulation issued to national banks for the year ending November 1, 1881, was \$30,979,630, including \$5,233,580 issued to banks organized during the year. The amount retired during the year was \$14,075,054, and the actual increase for the same period was therefore \$16,904,576, making the total on November 1, \$359,422,738, which is the largest amount outstanding at any one time.

During the year ending November 1, 1881, lawful money to the amount of \$23,847,844 was deposited with the Treasurer to retire circulation, of which amount \$1,554,790 was deposited by banks in liquidation. The amount previously deposited under the act of June 20, 1874, was \$85,684,998; by banks in liquidation, \$18,390,555, to which is to be added a balance of \$3,813,675, remaining from deposits made by liquidating

banks prior to the passage of that act. Deducting from the total the amount of circulating notes redeemed and destroyed without reissue, \$101,034,675, there remained in the hands of the Treasurer on November 1, 1881, \$30,702,596 of lawful money for the redemption and retirement of bank circulation.

CIRCULATING NOTES OF THE BANK OF FRANCE AND IMPERIAL BANK OF GERMANY, BY DENOMINATIONS—NATIONAL BANK AND LEGAL-TENDER NOTES, BY DENOMINATIONS.

The following table* exhibits by denominations the circulation of the Imperial Bank of Germany, on January 1, 1881, in thalers and marks, which are here converted into our currency:

Thalers.			Marks.				
Number of pieces.	Denomina- tions.	Value of each piece in dellars.	Amount in dollars. (Thaler=75 cents.)	Number of pieces.	Denomina- tions.	Value of each piece in dollars.	Amount in dollars. (Marks= 25 cent.)
81 2, 246 1, 690½ 8, 726 9, 026½	500 thalers. 100 thaiers. 50 thaiers. 25 thalers. 10 thalers.	75 00 37 50	30, 375 168, 450 63, 394 163, 612 67, 699	260, 582 217, 449 4, 348, 382½	1,000 marks. 500 marks. 109 marks.	250 125 25	65, 145, 500 27, 181, 125 108, 709, 562
21,770			493, 530	4, 826, 413 2			201, 036, 187

The circulation of the Imperial Bank of Germany, on January 1, 1879, was \$165,933,942; its circulation on January 1, 1880, was \$198,201,144; showing an increase of \$32,267,202 during that year.

The following table gives the circulation of the Bank of France and its branches, with the number of pieces, and the denominations in francs and in dollars, on January 27, 1881:

Number of pieces.	Denominations.	Value of each piece in dollars.	Amount in francs.	Amount in dollars. (Franc = 20 cents.)
5 1, 370, 596	5, 000 francs. 1, 000 francs.	1, 000 200	25, 000 1, 370, 596, 000	5, 000 274, 119, 200

1, 224	Forms out of date.		945, 475 425, 900	85, 180
10, 811, 102			2, 524, 081, 780	504, 816, 356

The amount of circulation of the Bank of France on January 29, 1880, was 2,321,474,365 francs, or, say, \$464,294,873, showing an increase between that time and January 27, 1881, the date of the foregoing table, of 202,607,415 francs, or \$40,521,483.

^{*} London Bankers' Magazine for September, 1881, page 706. † Ibid., page 719.

It will be seen that the Imperial Bank of Germany issues no notes of a less denomination than \$7.50, and that the Bank of France issues less than two millions of dollars in notes of a less denomination than five dollars. The Bank of England issues no notes of less than twenty-five dollars, and the Banks of Ireland and Scotland none of less than five dollars.

The amount of circulation in this country in denominations of five dollars and under, on November 1, 1880, was \$214,326,838. In the foreign countries named a large amount of silver and gold coin of the lower denominations enters into general circulation. It will be impossible to keep in circulation here any large amount of small gold coins or silver dollars, unless the coinage of the latter is restricted and the small notes withdrawn.

In accordance with law, no national bank notes of denominations less than five dollars have been issued since the 1st of January, 1879. Since that date the amount of ones and twos has been reduced \$5,867,465, and during the same period the amount of legal-tender notes of these denominations has been increased \$7,903,621. During the last year the amount of national bank notes of these denominations has decreased \$1,648,440. The total increase, therefore, of the amount of one and two dollar bills outstanding, in national bank and legal-tender notes, is \$6,255,181.

The following table shows, by denominations, the amount of national-bank and legal-tender notes outstanding on November 1, 1881, and the aggregate amounts of both kinds of notes at the same date in 1879 and 1880:

·		1881.	1880.	1879.	
Denominations.	National- bank notes.	Legal-tender notes.	Aggregate.	Aggregate.	Aggregate.
Ones. Twos. Fives. Tens. Twenties. Fitties One hundreds. Five hundreds. One thousands. Five thousands. Ten thousands. Ten thousands. Ten thousands. The written signatures of the officers of the banks are necessary as an additional precaution against counterfeiting. It is recommended that a bill for preventing the lithographing or printing of the signatures of officers of banks, now required by law to be written on the notes, be passed by Congress, imposing a penalty of twenty dollars for a violation thereof.

#### REDEMPTIONS.

Section 3 of the act of June 20, 1874, provides that every national bank "shall at all times keep and have on deposit in the Treasury of the

United States, in lawful money of the United States, a sum equal to five per centum of its circulation, to be held and used for the redemption of such circulation." Since the passage of this act the banks have, as a rule, maintained their redemption fund, and their circulating notes have been promptly redeemed at the Treasury, without expense to the government.

The following table exhibits the amount of national-bank notes received for redemption monthly, by the Comptroller of the Currency, for the year ending October 31, 1881, and the amount received for the same period at the redemption agency of the Treasury, together with the total amount received since the passage of the act of June 20, 1874:

Months.	From national banks for re- issue or sur- render.	From redemp- tion agency for reissue.	Notes of na- tional banks in liquida- tion.		Total.	Received at redemption agency.

From the passage of the act of June 20, 1874, to October 31, 1881, there was received at the redemption agency of the Treasury \$1,100,523,269 of national bank currency. During the year ending October 31, 1881, there was received \$62,510,225; of which amount \$23,923,000, or about 38 per cent., was received from banks in New York City, and \$5,679,000, or about 9 per cent., was received from banks in the city of Boston. The amount received from Philadelphia was \$5,169,000; from Baltimore, \$723,000; Pittsburgh, \$624,000; Cincinnati, \$1,023,000; Chicago, \$2,777,000; Saint Louis, \$732,000; Providence, \$1,415,000. The amount of circulating notes fit for circulation returned by the redemption agency to the banks of issue during the year was \$4,536,200.

The total amount received by the Comptroller of the Currency for destruction, from the redemption agency and from the national banks direct, was \$56,727,417. Of this amount, \$5,836,203 were issues of banks in the city of New York, \$5,819,519 of Boston, \$2,275,055 of Philadelphia, \$912,700 of Baltimore, \$971,483 of Pittsburgh, \$409,300 of Cincinnati, \$138,330 of Chicago, \$105,800 of Saint Louis, \$1,786,791 of Providence, and of each of the other principal cities less than \$400,000.

The following table exhibits the number and amount of national bank notes, of each denomination, which have been issued and redeemed since

the organization of the system, and the number and amount outstanding on November 1, 1881:

•		Number.		Amount.

A table showing the numbers and denominations of national-bank notes issued and redeemed, and the number of each denomination outstanding on November 1 for the last thirteen years, will be found in the Appendix.

The following table shows the amount of national bank notes received at this office and destroyed yearly since the establishment of the system:

Prior to November 1, 1865  During the year ending October 31, 1866  During the year ending October 31, 1867  During the year ending October 31, 1868  During the year ending October 31, 1869  During the year ending October 31, 1870  During the year ending October 31, 1871  During the year ending October 31, 1872  During the year ending October 31, 1873  During the year ending October 31, 1873  During the year ending October 31, 1874  During the year ending October 31, 1875  During the year ending October 31, 1875	1,050,382 3,401,423 4,602,825 8,603,729 14,305,689 24,344,047 30,211,720 36,433,171 49,939,741 137,697,696
During the year ending October 31, 1877  During the year ending October 31, 1878  During the year ending October 31, 1879  During the year ending October 31, 1880  During the year ending October 31, 1881	76, 918, 963 57, 381, 249 41, 101, 830 35, 539, 660 54, 941, 130
Additional amount of notes of national banks in liquidation	

The amount of one and two dollar notes outstanding is but one half of one per cent. of the whole circulation of the banks, the fives constitute 28 per cent., the tens 33.8 per cent., the twenties 22.6 per cent., while the fifties and over are only 15.1 per cent. of the entire circulation. While the amount of ones and twos of the national bank circulation is steadily diminishing, the legal tender notes of these denominations are as steadily increasing. Of the entire amount of nationalbank and legal-tender notes outstanding, nearly 7.1 per cent. consists of one and two dollar notes, more than 30.9 per cent of ones, twos, and fives, more than 58.8 per cent. is in notes of a less denomination than

twenty dollars, while about 80.4 per cent. is in notes of a lower denomination than fifty dollars. Of the entire issue, about 19.4 per cent. is in denominations of fifties, one hundreds, five hundreds, and one thousands. There are also outstanding 486 legal-tender notes of the denomination of five thousand, and 26 notes of the denomination of ten thousand.

#### RESERVE.

The following table exhibits the amount of net deposits, and the reserve required thereon by the act of June 20, 1874, together with the amount and classification of reserve held by the national banks in New York City, in the other reserve cities, and by the remaining banks, at the dates of their reports in October of each year from 1875 to 1881:

The following table, compiled from returns made to the clearing-house by the national banks in New York City, exhibits the movement of their reserve, weekly, during October, for the last eight years:

#### APPENDIX.

Tables will be found in the appendix, exhibiting the reserve of the national banks as shown by their reports, from October 2, 1874, to October 1, 1881; the reserve by States and principal cities for October 1, 1881; and in the States and Territories, in New York City, and in the other reserve cities, separately, at three dates in each year, from 1878 to 1881.

Special attention is called to the synopsis of judicial decisions contained in the appendix, to the numerous and carefully prepared tables in both report and appendix, and to the index of subjects and list of tables to be found at the close of the appendix. At the end of the full volume of more than seven hundred pages is an alphabetical list of the cities and villages in which the national banks are situated.

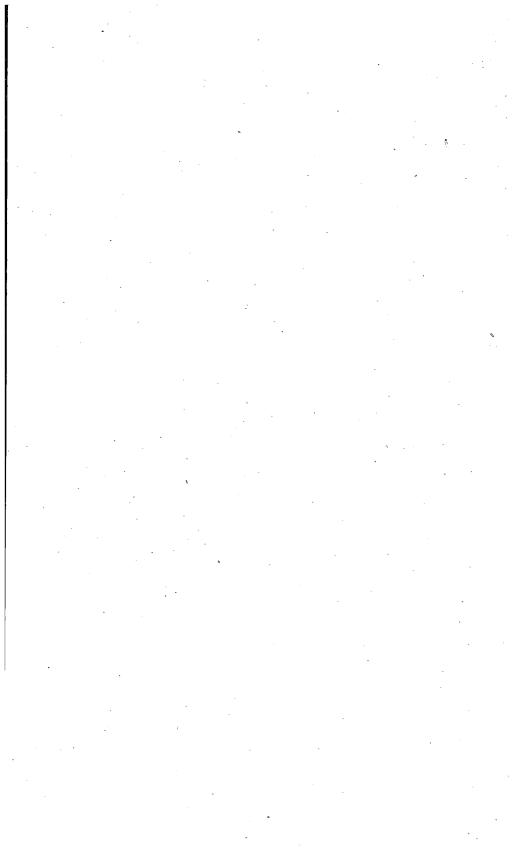

In concluding this report the Comptroller gratefully acknowledges the zeal and efficiency of the officers and clerks associated with him in the discharge of official duties.

JOHN JAY KNOX, Comptroller of the Currency.

Hon. Joseph Warren Keifer, Speaker of the House of Representatives.

^{*}The appendix, which is omitted for want of space, may be found in 'the bound volumes of the Comptroller's report.

# REPORT OF THE DIRECTOR OF THE MINT.

## REPORT

## THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT, BUREAU OF THE MINT, November 1, 1881.

SIR: I have the honor to present my third and the ninth annual report from this bureau, showing the operations of the mints and assay offices of the United States for the fiscal year ending June 30, 1881.

The influx of gold from foreign countries, noticed in my last report, continued during the year, giving a net import of \$5,836,058, American gold coin, and of \$91,715,012 foreign coin and bullion.

This has not only largely increased the work of this bureau but the business and operations of the New York assay office, where \$91,499,168.61 of foreign gold was received, and of the Philadelphia mint, to which it was sent for coinage. Besides this heavy import, the American mines have maintained [within a few thousand dollars], a gold production equaling that of the preceding year.

#### DEPOSITS AND PURCHASES.

The bullion and coin received and operated upon during the year, at all the mints and assay offices, including redeposits, contained \$193,-371,101.01 of gold and \$32,854,421.45 of silver, a total of \$226,225,522.46, exceeding in value the receipts of any previous year by more than \$50,000,000.

The reports and accounts submitted to this bureau show, during the year, deposits of gold of domestic production, \$35,815,036.55; of plate, jewelry, and worn coin, \$1,784,207.90; and of foreign coin and bullion, \$93,233,858; being a total of \$130,833,102.45, and thirty-two millions

in excess of the gold deposits of last year.

The silver bullion deposits and purchases, including partings from gold, amounted at the coining value to \$30,791,146.66, of which \$28,477,059.21 consisted of domestic bullion, \$2,046,576.80 of foreign coin and bullion, and \$267,510.65 of plate, jewelry, and American coin. following table shows the amount and character of the deposits:

·	Gold.	Silver.	Total.
Domestic production	440, 776 97 37, 771, 472 26 55, 462, 385 74	7, 307 40 1, 312, 144 58	\$64, 292, 095 76 448, 084 37 39, 083, 616 84 56, 196, 817 96 1, 603, 634 18
Total	130, 833, 102 45	30, 791, 146 66	161, 624, 249 11

A portion of these deposits were manufactured at the institutions receiving them into bars, which were again deposited or transferred to other institutions for treatment or coinage. The redeposits for this purpose amounted to \$62,537,998.56 in gold, and to \$2,063,274.79 in silver.

#### COINAGE.

At the commencement of the fiscal year the coinage mints and assay offices held \$40,724,337.91 of uncoined gold bullion. The deposits of the year, amounting to \$130,833,102.45, increased the stock of bullion available for coinage to \$171,557,440.36.

The value of the total gold coinage of the year was \$78,733,864, and of the gold bullion uncoined at its close, \$86,548,696.96, a portion of the deposits having been paid in fine bars.

The silver coinage amounted to \$27,649,966.75, of which \$27,637,955 were silver dollars, and \$12,011.75 proof silver coins of other denomina-

The coinage of gold into smaller denominations than heretofore executed was continued, only \$15,345,520 in double eagles having been struck, while the eagles and half eagles amounted to \$63,371,230.

Nearly all of the gold produced on the Pacific coast was deposited and coined at the San Francisco Mint, while the principal part of the gold coined at the Philadelphia Mint consisted of New York Assay Office bars manufactured from imported bullion and coin.

The number of pieces and the value of the total coinage were as fol-

	Pieces.	Value.
Gold	10, 111, 115 27, 698, 820 38, 335, 665	
Total	76, 145, 600	106, 788, 940 70

The comparative values of the coinage of gold, silver, and minor coins executed during the fiscal year and the calendar year 1880 are as follows:

	Calendar year 1880.	Fiscal year 1881.
Gold	\$62, 308, 279 00 27, 409, 706 75	\$78, 733, 864 00 27, 649, 966 75
Total	89, 717, 985 75 891, 395 95	106, 383, 830 75 405, 109 95
Total coinage	90, 109, 381 70	106, 788, 940 70

The gold coinage of the mints prior to the year 1873 has been grouped and tabulated into three divisions. The first embracing the forty years from the commencement of coinage at the Philadelphia Mint in 1834 to the time of the change in the ratio of gold and silver and the reduced valuation of the gold dollar to correspond therewith, during which period \$11,915,890 of gold were coined.

The second from 1834 to 1849, when gold from California first began

to arrive at the mints, adding \$64,425,550 to the gold coinage.

The third from 1849 to 1873, during which time \$740,564,438.50 were coined.

The coinage of silver before 1873 is separated into two periods: The first containing the coinage prior to 1853, during which time all the silver coins, amounting in value to \$79,213,371.90, were full weight and unlimited legal tender.

The second from 1853 to 1873, when fractional silver of reduced weight and limited tender to the amount of \$60,389,564.70 was coined on government account; but, although the mints were open to individuals for the coinage of full-weight silver dollars, only \$5,538,948 of the latter were coined.

#### BARS.

Fine, standard, sterling, and unparted bars were manufactured during the year to the value of \$100,750,649.94 in gold and \$6,542,232.35 in silver.

At the New York Assay Office \$89,643,135.29 of gold deposits were made into bars for conversion into coin at the mint at Philadelphia.

The value of fine gold bars manufactured at the mints and assay offices was \$10,041,482.78 and of the unparted bars \$1,066,031.87. Of the silver bars \$5,857,276.98 were fine, \$77,611.39 were standard and sterling, \$88,296.45 unparted, and \$519,047.53 were made at the New York Assay Office and transmitted to Philadelphia for coinage.

#### PARTING AND REFINING.

During the year, 11.449.704.19 gross ounces of bullion, containing both gold and silver or base metals, were sent to the acid refineries of the coinage mints and assay office at New York for parting or refining, from which were separated or refined 1,295,443.259 ounces of standard gold and 9,774,730.86 ounces of standard silver.

The following table exhibits in detail the gross ounces of bullion sent to the respective refineries and the ounces of standard gold and silver received therefrom:

#### OUNCES.

Mint or assay office.	Gross.	Standard gold.	Standard silver.	
Philadelphia San Francisco Carson New Orleans New York	6, 507, 762, 50 525, 785, 05	125, 700, 460 612, 429, 779 27, 819, 475 2, 793, 545 526, 700, 000	389, 617. 83 5, 591, 629. 12 507, 723. 00 11, 860. 91 3, 273, 900. 00	
Total	11, 449, 704. 19	1, 295, 443. 259	9, 774, 730. 86	

## VALUE.

Mint or assay office:	Gold.	Silver.	Total.
Philadelphia San Francisco Carson New Orleans New York Total	11, 394, 042 40 517, 571 62 51, 972 93 9, 799, 069 76		\$2, 791, 986 68 17, 900, 665 38 1, 108, 376 56 65, 774 71 13, 608, 698 85 35, 476, 502 18

#### DIES AND MEDALS.

During the year the engraver of the mint at Philadelphia prepared 1,229 dies for coinage, and 13 for medals and experimental pieces, a total of 1,242.

The mints at San Francisco, Carson, and New Orleans are supplied with coinage dies by the Philadelphia Mint, the latter being the only one provided with an engraving department.

The number of medals made was 1,682, of which 112 were struck in

fine gold, 1,196 in fine silver, and 374 in bronze copper.

#### SILVER PURCHASES.

At the commencement of the last fiscal year there were on hand in the coinage mints and New York Assay Office 5,403,980 ounces of standard silver bullion, worth, at its coining value, \$6,283,613. This bullion in part consisted of 1,750,000 standard ounces procured prior to the passage of the resumption act, under the provisions of section 3545 of the Revised Statutes, and held as part of the bullion fund for the immediate payment of silver deposits in silver bars. A further portion, amounting to 2,500,000 standard ounces, had been purchased subsequent to January 14, 1875, the date of the resumption act, for the coinage of subsidiary silver, under the provisions of that act, or had been parted from gold or received in payment of charges on silver bullion, under sections 3520 and 3506. The remainder, about 1,400,000 standard ounces, was obtained by direct purchase for the coinage of the standard dollar, or in settlement for silver parted from gold, and in payment of charges on silver deposits.

Notwithstanding the regular monthly coinage of 2,300,000 and upwards of silver dollars, the purchases and deposits had increased the silver bullion on hand January 1, 1881, to 6,553,350 standard ounces, the cost of which was \$7,145,487, and its coinage value \$7,625,717. Of this amount,

2,928,752.49 standard ounces were at the Philadelphia Mint.

The limit of subsidiary coinage having been reached, no necessity existed for keeping on hand any silver for such coinage. It was, therefore, considered advisable by the Secretary of the Treasury to use in the silver dollar coinage the balance of silver that had been procured for the subsidiary coinage, and to reduce the amount of monthly purchases, especially at the Philadelphia Mint, where, in view of the heavy amount of gold coinage required, it was thought that sufficient silver bullion had already been accumulated for the probable silver coinage of that mint during the remainder of the fiscal year.

By including the 2,250,000 ounces of standard silver as belonging to the

By including the 2,250,000 ounces of standard silver as belonging to the account of purchased silver, to be used in the coinage of the standard dollar, it became necessary to reduce the amount on hand, so that not more than \$5,000,000 above the resulting coinage should be invested in such purchases. The weekly purchases of the department were, therefore, much lighter during February and the succeeding months of the

year.

In the month of May, owing to the higher prices asked and the small amounts offered for delivery at the Pacific coast mints, the weekly purchases of silver bullion were reduced for San Francisco and resumed

at the Philadelphia Mint.

To enable the Philadelphia Mint to employ as much of its force as possible in the coinage of gold, the monthly allotment of silver coinage for the New Orleans Mint was increased and that for the Philadelphia

Mint lessened, and to procure sufficient bullion to execute the required coinage at the New Orleans Mint, the owners of silver bullion were so-

licited to bid and send their bullion for delivery at that mint.

The prices for delivery in lots of less than ten thousand ounces at the New Orleans Mint were also fixed from time to time by the Director of the Mint, slightly below the equivalent of the London price, and notices of the rates and changes were given to the smelting and refining works in the Western States nearest to the mint, with the hope of inducing them to deliver their silver bullion at New Orleans. Two of these refineries have availed themselves of the advantages of direct shipment, saving the previous expense of double transportation to and from the Atlantic sea-board and benefiting the Government as well as themselves.

The purchases during the year, of silver bullion, were 21,904,351.54 standard ounces, at a cost of \$22,339,728.67. The silver received for charges and parted from gold and paid for as provided by sections 3520 and 3506 of the Revised Statutes, costing \$239,183.05, was 232,568.85 standard ounces, making the total amount purchased 22,136,920.39

standard ounces, at the cost of \$22,578,911.72.

From the silver purchases of the year and the 2,250,000 standard ounces, directed to be used and carried into the silver purchase account, 23,751,368 standard ounces, exclusive of silver bullion wasted and sold in sweeps, were consumed in the coinage of 27,633,955 standard dollars, being an average monthly coinage of \$2,303,166.

The London price of silver, during the year, averaged  $51\frac{15}{15}$  pence, which with exchange at par (\$4.8665) equals \$1.13852 per ounce, and at the New York average monthly price of sight exchange on London (\$4.847) equals \$1.13508 per ounce fine. The New York average price of silver during the year was \$1.12957 per ounce fine.

The following statement shows the purchases at the coining mints

and the New York Assay Office.

#### SILVER PURCHASES, 1881.

### DISTRIBUTION OF SILVER.

Including the amounts paid out at the mints and exchanged for gold as provided by law, \$17,706,924 of the \$27,637,955 silver dollar coinage of the year, have been transmitted and distributed under the regula-

tions mentioned in my last report.

The amount of standard dollars in the mints at the close of the fiscal year, including \$2,000,000 received at the New Orleans Mint, and \$1,000,000 at the Philadelphia Mint from assistant treasurers, was \$23,341,000.60, of which nearly \$16,000,000 was in the San Francisco Mint.

The coinage and distribution at each mint, as shown by their statements to this bureau, appear in the following table:

AMOUNT of SILVER DOLLARS REPORTED by the COINAGE MINTS on HAND June 30, 1880, COINED during and on HAND at CLOSE of the FISCAL YEAR ended June 30, 1881.

	Philadel- phia.	San Fran- cisco.	Carson.	New Or- leans.	Total.

Besides the standard dollars remaining in the mints at the close of the year, considerable amounts had been deposited in the Treasury for the

payment of outstanding silver certificates.

The following table, compiled from the Treasurer's monthly statements of assets and liabilities, shows in six months' periods from the commencement until the close of the last fiscal year and up to November 1, 1881, the amount (including that in the mints) in the Treasury, held for the payment of silver certificates and for other purposes and the amount in general circulation:

COMPARATIVE STATEMENT of the COINAGE MOVEMENT and CIRCULATION of STANDARD SILVER DOLLARS at the end of each six months from July 1, 1880, to July 1, 1881, and for the four months ending November 1, 1881.

		Iı			
Period.	Total coinage.	Held for payment of certificates out- standing.	For distribution.	Total.	In circulation.

## APPROPRIATIONS, EARNINGS, AND EXPENDITURES.

The total appropriations for the support of the mints and assay offices during the fiscal year ended June 30, 1881, amounted to \$1,178,250, out of which the sum of \$1,160,347.71 was expended. In addition \$97,311.60 was expended on account of the mints and \$7,440.14 at the Treasury Department, a total of \$104,751.74 from the appropriation contained in the act of February 28, 1878, authorizing the coinage of the standard silver dollar.

The appropriations for and expenditures at the several mints and assay offices are shown in the following table:

#### APPROPRIATIONS, 1881.

#### REFINERY EARNINGS AND EXPENDITURES.

753, 565 05 247, 017 64

97, 311 60

1, 257, 659 31,

159, 765 02

During the year \$255,939.78 was collected from depositors, and \$274,784.64 paid on account of parting and refining bullion.

The following statement shows the amount collected for parting and refining, and the payments for expenditures in those operations, including that portion of the operative officers' wastages and the loss on sale of sweeps properly chargeable to that fund.

A much larger amount, consisting of undeposited refinery earnings of previous years, was deposited in the Treasury to the credit of the appropriation.

Included in the payments are expenses for railroad freight incurred in prior years, the bills for which were not rendered until the last fiscal vear.

Institution.	Charges col- lected.	Expenditures.
Philadelphia Mint San Francisco Mint Carson Mint New York Assay Office	161, 441 22 9, 008 33	\$9, 753 05 170, 276 94 10, 397 79 84, 356 86
Total	255, 939 78	274, 784 64

^{*} Includes \$5,000 for repairs and machinery. † Includes \$4,999.58 for repairs and machinery.

The net excess of the earnings of the refineries over the expenses, from the 1st of July, 1876, to June 30, 1881, as shown by the books of the Treasury Department, amounted to \$121,238.90.

#### ANNUAL ASSAY.

The commission appointed by the President to test the weight and fineness of the coins reserved for the annual assay, performed the duty at the time designated by law, and the records of their proceedings show that all the coins tested by them were found to be within the limits of exactness required by law, as to weight, and that very few varied from the standard by one-half the tolerance.

As to fineness, the record states that in all cases, both in mass and single pieces, the coins from Philadelphia, San Francisco, and New Orleans were found to be correct, and safely within the limits of tolerance. But the committee on assaying reported that, in the case of the Carson Mint, they found the assay of mass melt of silver to be very low, but within tolerance, and that one single piece showed a fineness below the limits of tolerance. This fact was reported to the President,

as required by law.

The assayer of the Mint Bureau, in October, 1880, in his assay of the coins required monthly to be forwarded to the Director for test, had discovered that a silver coin of the Carson Mint, from the coiner's July delivery of that year, was below the legal limit of tolerance. superintendent of that mint was immediately directed not to pay out, but to retain in his possession all of the coins of that delivery, and to seal up, until further orders, all packages which might contain any of such coins, after selecting and forwarding to the Director sample coins from each package for further test. Ninety-six packages, each containing one thousand dollars, were thus sealed up and reserved for further assays at the bureau, and a special examination made by Andrew Mason, melter and refiner of the New York Assay Office, in conformity with the order of the President to investigate the matter, confirmed the previous assays, and demonstrated that the fineness of a certain bar of bullion, about to be melted for coinage, had been incorrectly stated to the melter and refiner of the Carson Mint, and that ingots of defective fineness made therefrom had afterward passed the assay department of that mint without It did not appear that the error had occurred through the neglect of the assayer's subordinates, and as the assayer himself had died shortly after the first discovery of the defective coinage, it became unnecessary to take any further action, except to order all the coins contained in the 96 packages to be remelted for coinage, which was done.

## ESTIMATION OF THE VALUES OF FOREIGN COINS.

The values of foreign coins were estimated by the Director of the Mint, and proclaimed by the Secretary of the Treasury on the first of January of the current year, as required by law. The computation of their values was made in the same manner as that of the previous year. No change in the value of the gold coins will be found, excepting that resulting from more accurate information or recent modifications of the law prescribing their weight and fineness.

The commercial value of silver bullion for the time the estimation was made having fallen about 1.56 per cent. from its value for a like period of the preceding year, the value of silver coins based on the market rate

of silver were correspondingly reduced.

By reason of this decline in the value of silver, and the more recent and reliable information, the values of foreign gold and silver coins were

modified from those proclaimed in 1880, as follows:

The florin of Austria was reduced from 41.3 cents to 40.7; the boliviano of Bolivia from 83.6 to 82.3; the milreis of Brazil increased from 54.5 to 54.6; the peso of Ecuador reduced from 83.6 to 82.3; the rupee of India from 39.7 to 39. Japan having adopted the free-coinage system for silver, the yen, which was formerly given as 99.7 in gold, is now 88.8 in silver. The Mexican dollar from 90.9 to 89.4; the sol of Peru from 83.6 to 82.3; the rouble of Russia from 66.9 to 65.8; the mahbub of Tripoli from 74.8 to 74.3; the peso of Colombia from 83.6 to 82.3; the peso of Cuba was given at 93.2, and the bolivar of Venezuela at 19.3. The monetary unit of Egypt, which formerly was stated as the pound at \$4.974, is now fixed as the piaster, .049.

#### EXAMINATIONS AND ANNUAL SETTLEMENTS.

The usual examinations and settlements were made at the close of the fiscal year at all the mints and at the New York Assay Office. The director personally superintended the closing of the settlements at Philadelphia and New York, and representatives of the bureau were detailed to take charge of the settlements at New Orleans, Carson, and San Francisco.

The magnitude and importance of these settlements are evident when it is known that they covered for the last year transactions and actual transfers between the superintendent and operative officers of gold and silver bullion to the value of \$603,230,121, and that bullion and funds amounting at the time of settlement to \$128,318,274 were examined, counted, or weighed, and their value ascertained.

At each institution the superintendent, after the delivery to him of the bullion in the hands of the operative officers, was, upon taking account of the coin, bullion, and other moneys in his possession, found to

hold the amount required by his accounts with the Treasury.

The wastage of each of the operative officers was found to be within the legal limit, and the total wastage during the year was, considering the amount received and worked, much less than that of the preceding

vear.

The total amount operated upon in the melter and refiner's department of the mints and the New York Assay Office was, of gold bullion, 16,319,460 standard ounces, on which the legal limit of wastage was 16,319 standard ounces and the actual wastage 1,608 standard ounces, and, of silver bullion, 54,798,707 standard ounces, on which the legal limit of wastage was 82,198, and the actual wastage only 4,453 standard ounces.

The amount operated upon in the coining department of the mints was, of gold bullion, 10,514,159 standard ounces, upon which the legal limit of wastage was 5,257 standard ounces, and the actual wastage 367 standard ounces; and of silver bullion, 48,182,982, upon which the legal limit of wastage was 48,183 standard ounces, while the actual wastage was only 4,021 standard ounces, being heavier in gold and less in silver than that of last year.

The total wastage during the year was \$36,767.14 gold and \$8,576.83 silver, a total of \$45,343.97, which was no greater than that of the previous year, although three times as much gold was melted. Bullion, however, of the value of \$8,406.12 was recovered during the year, from the deposit melting rooms, and the melter and refiner of the New York

Assay Office returned, on settlement, surplus bullion of the value of \$24,733,24, making a total of \$33,139.36 bullion gained. The net actual loss to the government on the immense amount received, redeposited,

and reworked, during the year, was only \$12,204.16.

Loss and wastage in the handling, melting, separating, refining, and coinage of the precious metals is unavoidable. It is contemplated and provided for by law, which limits and authorizes an allowance to be made in favor of the melter and refiner's accounts, to the extent of one thousandth of gold and one and a half thousandths of the silver, and, of the coiner's accounts, one-half thousandth of the gold and one thousandth of the silver delivered to them, respectively, during the year, if the superintendent is satisfied there has been bona fide waste of the precious metals.

At the last, as well as the preceding settlement, the melter and refiner's gold wastages at the Philadelphia and San Francisco Mints, although far within the legal limits, were heavier than the usual loss of

those officers.

During the last two years large amounts, aggregating \$90,000,000 of foreign coin and bullion, received and melted at the New York Assay Office, were transmitted to the Philadelphia Mint in the form of gold mint-bars alloyed with copper. The melter and refiner of that mint attributed his wastage, in part, to insufficient deductions on these bars for oxide of copper and other adhering impurities, the weight of which would occasion a loss in his accounts, but increase, to a corresponding extent, the surplus at the New York Assay Office, and, therefore, cause

no real loss to the government.

The melter and refiner's wastage at the San Francisco Mint can, in part, be accounted for by greater deposits during the year of brittle, fine gold bars and unrefined gold bullion, containing refractory and volatile base metals, in the elimination of which loss of gold is a frequent, if not a necessary, consequence. How far this cause has operated to produce the wastage of that mint is under consideration; but, as yet, sufficient examination and analysis have not been made of the records and transcripts obtained for a comparison of the character of the deposits and the methods of weighing, assaying, and reporting the fineness of gold bullion, with those of previous years and of other mints and assay offices.

#### REVIEW OF THE MINT SERVICE.

During the year the regulations governing the mints and assay offices have been carefully revised so as to bring their directions in harmony with later provisions of the statutes, and the charges collected of depositors have been reviewed and modified in order that the rates at each institution may equal, but not exceed, the expenses of the operations

for which they are imposed.

The mints and New York Assay Office have been required to make, as far as practicable, their purchases of supplies after public advertisement for bids and submission of the awards to this office, and to forward for examination original records of deposits and monthly statements showing the silver bullion purchased and the character and amount of the various classes of gold and silver bullion sent to and received from the refineries, and the charges collected and expenditures paid for parting and refining.

The data in regard to the annual production of precious metals in the United States, too imperfect at the time of submitting my last annual

report for a reliable estimate of the production by States, after subsequent careful examination and comparison, were presented in both a summary form and detail as to localities, and the report has been pub-

lished by order of Congress.

The collection and compilation of these monetary statistics, the more thorough inspection of the operations, reports, and accounts of the mints and assay offices, and a closer supervision of their expenditures, have largely increased the work, and, as is believed, the usefulness of this bureau.

#### PHILADELPHIA MINT.

On account of the continued heavy import of foreign gold coin and the payment of its value immediately upon assay in American coin it became necessary to increase the monthly gold coinage at the Philadelphia Mint to supply the Treasury with coin thus paid out. Its gold coinage had averaged previous to the heavy gold import of 1880 less than \$10,000,000, but in 1881, besides coining \$9,125,966.75 silver and \$405,109.95 minor coins, its gold coinage amounted to \$49,809,274, and at the close of the fiscal year the mint held \$23,023,206.62 of uncoined gold bullion.

This increased coinage necessitated the employment of a larger working force and extra hours of labor, and also much heavier purchases of

copper and other supplies.

By reason of these greater expenditures and in order to execute the monthly silver coinage required by law, it became necessary to make advances to the mint and use during the year \$78,712.48 from the appropriation contained in the act authorizing the coinage of the standard silver dollar.

The following presents a comparison of the operations of the last and the preceding fiscal year:

<u> </u>		
	1880.	1881.

On the large amount operated upon during the last year the wastage of the melter and refiner was, on gold, 4.5 per cent. of the legal limit of his allowance and 4.2 per cent. on silver, and of the coiner on gold 5.4 per cent. and on silver 11.4 per cent.

#### SAN FRANCISCO MINT.

A much larger amount of work was executed at this mint, both in coinage and in the refinery, during the past fiscal year than in 1880, the number of pieces of gold coined being nearly half a million more, and of silver about three and a half millions more.

The comparative values of the deposits, number of pieces coined, and bullion operated on in the refinery during the last and preceding years, are:

	1880.	1881.

At the annual settlement, the melter and refiner's wastage in gold was 40 per cent. of the legal limit of allowance, and his silver wastage 7 per cent. His silver wastage was much less, but the gold wastage heavier than that of the preceding year. The coiner's gold wastage was  $13\frac{3}{4}$  per cent. and his silver wastage  $4\frac{1}{2}$  per cent. of the amount allowed by law.

Improvements have been made at this mint in refining bullion by the use of the sulphuric acid process. The charges for parting and refining the higher grades of bullion were, near the beginning of the year, reduced, yet, as a greater amount of bullion requiring to be parted or refined was deposited during the year, the charges collected for these operations exceeded those of the preceding year. The expenses of the refinery, however, owing to the larger amount of work performed, were slightly increased. Besides this heavier expenditure, the sum of \$6,000 was expended in procuring apparatus and fixtures and making the necessary arrangements for operating the sulphuric acid refinery, and nearly \$4,000 was paid on account of freight bills of the previous year.

These necessary, but unusual expenditures made the payments during the year for expenses on account of partin and refining some \$8,000 more than the charges collected.

#### CARSON MINT.

Coinage at the Carson Mint, which had been suspended in May, 1880, was resumed July 1, 1880, and was continued from that date until April

1, 1881, during which period \$883,590 were coined, when, for lack of sufficient bullion, it was again discontinued, and so remained until the close of the year. The mint, however, was kept open for the reception and purchase of bullion, and payment was made, as usual, on deposits and purchases as soon as the value could be ascertained. No inconvenience or delay was therefore occasioned to depositors or to the mining interests of that portion of the country.

The work at this mint during the year compares with that of the pre-

vious year as follows:

	1880.	1881.
Depositsvalue	\$990, 466 39	\$1, 108, 376 65

At the annual settlement the wastages of the operative officers were as follows: of the melter and refiner, on gold 49.3 per cent. of the legal limit, and on silver 14.7 per cent.; of the coiner, 15.7 per cent. on gold and 14.7 per cent. on silver. The assayer of the mint, William P. Prescott, died December 5, 1880, and Josiah M. Hetrich was appointed to the position December 21, 1880, and entered upon duty January 4, 1881.

#### NEW ORLEANS MINT.

The work of this mint has been principally confined to the manufacture of standard silver dollars, for which the demand through the South continued heavy during the year and nearly equaled the coinage. The monthly allotment of silver coinage was raised to 500,000, and occasionally to 600,000 standard dollars, and executed with dispatch and little additional expense under the efficient management of the officers of the mint.

The following table exhibits the deposits and purchases of bullion and the coinage of the year compared with the fiscal year 1880:

	1880.	1881.
Depositsvalue	\$4, 599, 895 64	\$6, 439, 652 39

Gold wastage of melter and refiner do. Silver wastage of melter and refiner do Gold wastage of coiner do Silver wastage of coiner do do.		4 656 1, 062

The wastage during the year of the melter and refiner was, on gold, 31.5 per cent. of the legal limit, and on silver 4.3; and of the coiner, nothing on gold, and on silver 10.6 of the legal limit.

Notwithstanding the amount of work performed at this mint during the year many necessary repairs were made in the rolling and coining rooms, and to the machinery; and it is expected that other repairs will be completed during the present fiscal year.

The deficiency of 1,000 silver dollars, to which reference was made in

my report of last year, has been made good.

#### NEW YORK ASSAY OFFICE.

The business of the New York Assay Office assumed immense proportions during the year, owing to the continued and increased importation of foreign gold. The gold deposits were the largest in the history of the institution, \$91,497,168.61 of the amount being foreign coin and bullion. The following table exhibits the value of deposits and of bars manufactured at the New York Assay Office during the fiscal years ended June 30, 1880, and June 30, 1881:

Deposits and bars.	1880.	1881.	
Gold deposits	\$68, 273, 628 4, 491, 416	\$99, 635, 644 46 5, 285, 715 57	
Total deposits		104, 921, 360 03	
Gold, fine bars, manufactured Gold, mint bars, manufactured Silver, fine bars, manufactured Silver, sterling bars, manufactured Silver, mint bars, manufactured	57, 368, 761 4, 372, 705 24, 347	9, 805, 028 07 89, 643, 135 29 4, 763, 189 08 1, 418 03 519, 047 53	
Total bars manufactured	73, 144, 795	104, 731, 818 00	

There were paid during the year to depositors \$99,603,605.42 in gold coin and bars and \$4,976,641.10 in silver coin and bars, making the aggregate payments \$104,580,246.52, and gold bullion of the value of \$61,560,816.10 was transferred to the mint at Philadelphia for conversion into coin.

I was present at the close of the annual settlement, when the bullion and coin on hand, which had been carefully weighed and counted by representatives of this bureau, were found to agree with the balance, \$65,194,122.56, as shown by the books to be on hand June 30, 1881.

On the annual settlement of his accounts the melter and refiner returned 1,329.100 standard ounces of gold bullion of the value of \$24,727.44, and 4.98 standard ounces of silver bullion, valued at \$5.80,

in excess of the amounts with which he was charged, having recovered the same in his operations.

The aggregate of these sums, \$24,733.24, has been deposited in the

Treasury of the United States.

But, although the amount appears as an earning of the assay office, it is not available for payment of expenses, and was not credited to the appropriation for parting and refining, as, by law, only the charges collected from depositors for parting and refining bullion are authorized to be used for defraying the expenses of those operations.

# DENVER MINT, AND ASSAY OFFICES AT CHARLOTTE, HELENA, BOISE CITY, AND SAINT LOUIS.

The assay offices were established for the local convenience and development of the mining interests in their vicinity and to afford miners and those owning, operating, and prospecting for mines facilities for ascertaining the value of ores and bullion, and for the exchange of their gold bullion for coin.

The work done by each during the year, including the Denver Mint (which, by law, can only be operated as an assay office), was—

	Denver.	Charlotte.	Helena.	Boise.	Total.
Gold deposits	\$235, 137 15 3, 805 77 238, 942 92	\$86, 919 59 626 80 87, 546 39	\$568, 525 13, 84, 314 97 652, 840 10	\$163, 469 86 2, 828 50 166, 298 36	\$1, 054, 051 73 91, 576 04 1, 145, 527 77
On deposits	1, 643 21	133 94 260 35 995 37 3,750 00	666 05 1,718 00 2,551 71 25,163 31	185 10 186 00 441 69 7, 940 15	1, 224 26 3, 085 35 5, 631 98 61, 821 83

Besides the work enumerated, the assayers in charge of the offices have rendered valuable assistance in collecting statistics of production in their respective States and Territories.

I have heretofore called attention to the necessity of the Denver Mint being put in better repair, and an appropriation should be made for

that purpose.

The Saint Louis Assay Office was established so near the close of the fiscal year that nothing could be done except to have suitable rooms set apart in the United States building at Saint Louis, and to commence fitting them up and procuring the necessary fixtures and apparatus for the use of the office. Mr. E. C. Jewett was appointed assayer July 1, 1881, and has been placed in charge. The appointment of melter was delayed until his services should be required, and the office ready for the reception of bullion.

#### INTERNATIONAL MONETARY CONFERENCE.

The monetary conference called by France and the United States to consider propositions for an international agreement to coin gold and silver at a common fixed ratio, met at the city of Paris in April of the present year.

Although much instructive discussion occurred, and valuable facts were presented, no practical conclusions were reached, and, finally, on the 8th of July the conference was adjourned to meet in April, 1882,

at the same place.

Delegate from several European countries gave little encouragement for the expectation of any effective aid from their governments in the effort to restore silver to its former place in the monetary circula-The hope, however, seems to have been entertained that further deliberation, and a consideration of the inevitable complications and disturbances to commercial exchanges between Asiatic countries and the western world to be feared from the exclusion of silver from coinage, will enlist the co-operation of those nations in this, possibly the final, effort to retain silver conjointly with gold as a measure of values. view, however, of the failure of the Conference to agree upon any practical measure, and while awaiting its future action, it is a question for our serious and early consideration, whether it is not desirable to suspend the further coinage of silver until, by international agreement and effective legislation, the unlimited coinage of silver and gold at a common fixed ratio shall have been authorized by the principal commercial nations of Europe and America.

The silver circulation of this country, before the close of this fiscal year, will amount to \$200,000,000, and will suffice for the needs of our

people, for coins of the denomination of one dollar and less.

The United States has done its part toward retaining silver as a monetary agent for measuring and exchanging values. For three years it has appropriated to coinage purposes one-third of the world's production of silver, and maintained its average bullion price nearly to the average of 1878. As was said in my first report, "should the \$650,000,000 of silver coin now full legal tender in Europe be demonetized, the United States could not, single-handed among commercial nations, with no European co-operation or allies, sustain the value of silver from the inevitable fall."

With that danger menacing us, we cannot, without serious embarrassment, continue such coinage, unless other commercial nations will

agree upon the general use of silver as well as gold.

But should such international agreement be secured, neither our ratio of comparative valuation nor even one based upon the present exchangeable value of gold and silver will probably be adopted. The ratio of fifteen and a half to one, already approved and in use among the nations composing the Latin Union, would doubtless be chosen. This would, if the coinage of silver as well as gold at all the mints of the world were made free, as bimetallism implies, cause the voluntary withdrawal from circulation of the standard dollars, and their recoinage. In such case the further coinage of silver dollars of the present weight, unless needed for circulation, is a useless expenditure.

#### MONETARY STATISTICS OF THE UNITED STATES.

The statistics of the production, consumption, and circulation of the precious metals in the United States during the fiscal year ended June 30, 1881, have been sought, and inquiries prosecuted, in the manner and through the agencies employed in the previous year.

The results have been very satisfactory, both as to the extent and

character of the information obtained.

It will suffice to present here in a summary form the conclusions deduced from the detailed statements and reports received at the bureau.

PRODUCTION OF THE PRECIOUS METALS IN THE UNITED STATES IN 1881.

For the calendar year 1880, embracing the first half of the last fiscal year, a special report on the annual production of the United States was

submitted to the Secretary of the Treasury, in March last, and ordered

to be published by Congress.

Further investigation has not materially changed the estimate I then made of the total production of the United States, and of each State and Territory, during the preceding fiscal year and the calendar year 1880.

From the data received at the Mint Bureau, I estimate the production for the fiscal year ended June 30, 1881, to have been, of gold \$36,500,000, and of silver, at its coining value, \$42,100,000, or, at its commercial bullion value, about \$37,000,000.

The estimated production of each State and Territory for the fiscal

years 1880 and 1881 are as follows:

	Fiscal year 1880.			Fiscal year 1881.			
State or Territory.	Gold.	Śilver.	Total.	Gold.	Silver.	Total.	
Alaska	\$6,000 400,000	\$2,000,000	\$6,000 2,400,000	\$7,000 770,000	\$7, 800, 000	\$7,000 8,570,000

#### CONSUMPTION OF THE PRECIOUS METALS.

It is a pleasure to report that the continuance of the inquiries heretofore instituted in regard to the annual consumption of gold and silver in the United States has resulted in the accumulation of very complete

and satisfactory information.

Circular letters were again addressed, to the number of 6,417, to persons and firms reported to be using and consuming gold and silver in manufactures and the arts. At the date of this report, of the persons replying, 1,300 used no gold or silver in their business. It is believed that nearly all the principal manufacturers have responded to the request of this bureau.

The character of the gold and silver used was reported at-

Material used.	Gold.	Silver.	Total.
United States coins Fine bars used Foreign coin, jewelry, plate, &c	6, 171, 317 599, 524	\$72, 190 3, 127, 432 188, 799 3, 388, 421	788, 323

From the information obtained it appears that 1,143 persons or firms use in the manufacture or repair of instruments, chemicals, leaf and foil,

pens, plates, spectacles, watch cases, watches and jewelry, over ten millions of dollars gold and over three millions of dollars silver, a total of thirteen millions of dollars, of which three and a quarter millions is gold coin and seventy thousand dollars silver coin of the United States.

The usual report was obtained from the New York Assay Office, which gives a full statement of the amount and character of the gold and

silver supplied to manufacturers by that office:

Bars furnished to manufacturers.	Gold.	Silver.	Total.
Of foreign coin Of foreign bullion Of domestic bullion Of plate, &c	1, 380, 416 00 3, 653, 136 00 522, 918 00	\$120, 791 00 250, 207 00 4, 579, 994 00 177, 940 00 5, 128, 932 00	\$288, 159 00 1, 630, 623 00 8, 233, 130 00 700, 858 00 10, 852, 770 00

A discrepancy similar to that of the preceding year appears between the amounts returned by manufacturers and those reported by the New York Assay Office. Taken together they indicate that last year's estimate of the consumption of silver in the United States should be in-

creased to \$6,000,000, and of gold to \$11,000,000.

The estimate of last year, that, of the bullion produced in the United States, \$4,000,000 of silver and \$5,500,000 of gold were appropriated for use in manufactures and the arts, is not changed as to gold by the information thus far received, but must be increased \$1,000,000 as to silver, and the consumption, therefore, of domestic bullion in the United States for the fiscal year may be estimated to be, of gold, \$5,500,000, silver, \$5,000,000.

## COIN CIRCULATION OF THE UNITED STATES.

In the last annual report the circulation of United States coin was estimated from the amount previously on hand, and the annual coinage and import of United States coin to have been on the 30th of June, 1880, \$358,958,691 of gold and \$142,597,020 of silver. The net gain during last year from coinage and import was, in gold coin, \$84,118,062, and in silver coin, \$28,937,746. This would make the total circulation of United States coin on the 30th of June, 1881, \$443,077,023 gold, and \$171,534,766 silver.

Heretofore no deduction has been made tor comused in manufactures and the arts, as it was believed that it should be offset by the excess of United States coin brought by immigrants upon their persons above the sums in like manner taken out of the country by travelers; but the circulation of United States gold coin, and its consequent abrasion and use in the arts, have largely increased, while the amount held abroad has, as shown by its diminished import, become depleted, so that much less American coin than heretofore is obtained and brought into the country by immigrants.

It seems proper, therefore, that allowance should be made for use in the arts to the extent of the sum reported to this bureau to have been used by manufacturers, which was, for the last fiscal year, in round numbers, \$3,300,000 gold, and \$75,000 silver. This would reduce the circulation of United States gold coin at the close of the fiscal year to about

\$440,000,000, and of silver coin to \$171,500,000.

During the first four months of the current fiscal year there has been a further coinage of \$26,544,000 and a net import of \$2,172,474 gold,

and a coinage of \$9,300,000 and net import of \$310,858 United States silver coin, making a total gain to the first of November, 1881, in the circulation, of \$28,609,000 gold and \$9,600,000 silver. This, added to the amount estimated to be in circulation June 30, 1881, makes the coin circulation of the country, November 1, about \$469,000,000 gold and \$181,000,000 silver, a total of \$650,000,000. At the latter date the mints and assay office at New York held of bullion \$94,075,744 gold and \$4,966,741 silver, swelling the stock of coin and bullion available for coinage to \$563,000,000 gold and \$186,000,000 silver, a total of \$749,000,000, being a per capita of \$14.93.

The following table shows the gain in the coin circulation of the United States from June 30, 1880, to June 30, 1881, and to October 31, 1881:

			·
United States coin.	Gold.	Silver.	Total.
Circulation June 30, 1880 Coinage, less deposits for recoinage Net import	78,-293, 087	\$142, 597, 020 27, 642, 660 1, 295, 086	\$501, 555, 711 105, 935, 747 7, 130, 061
TotalLess amount used in the arts	443, 076, 753 3, 300, 000	171, 534, 766 75, 000	614, 611, 519 3, 375, 000
Circulation July 1, 1881 Coinage to November 1, 1881 Net imports to November 1, 1881	26, 544, 000	171, 459, 766- 9, 300, 000 310, 858	611, 236, 519 35, 844, 000 2, 483, 332
Circulation November 1, 1881	468, 493, 227	181, 070, 624	649, 563, 851

^{*}Imports for October at the port of New York only.

The coin circulation of the country, according to the reports of the Treasurer for the amount of coin in the Treasury on the 1st of November, and of the Comptroller of the Currency for the amount held by National banks on the 1st of October, 1881, estimated for other banks, appears to have been held by the banks, Treasury, and private parties as follows:

:		Silv	ver.	
Held in—	Gold.	Legal tender.	Subsidiary.	Total.
Treasury National banks Other banks Private hands	\$76, 036, 377 102, 000, 369 20, 000, 000 270, 963, 254	*\$7, 737, 608 3, 000, 000 } †89, 862, 392	\$25, 984, 687 2, 450, 387 51, 964, 926	\$109, 758, 672 107, 450, 756 432, 790, 572
Total	469, 000, 000	100, 600, 000	‡80, 400, 000	650, 000, 000

^{*}Excess above amount held for payment of outstanding silver certificates. †Including amount for which silver certificates are outstanding.

#### MONETARY STATISTICS OF FOREIGN COUNTRIES.

The comprehensive reports obtained from our national representatives in foreign countries, and presented in my last annual report, contain so much valuable and recent monetary information that it will hardly be expected that additional statistics of equal importance can be gathered in the same fields during the year immediately succeeding. Through the agencies heretofore successfully employed, reliable information has been obtained for later periods, enabling me to continue the statistical summaries of previous years. To the replies received from

Lucludes \$7,000,000 trade dollars.

foreign countries have been added, under the heading of the appropriate country, extracts from other official publications or reliable authorities, which form a part of the data upon which are based the conclusions submitted in the text and tables of this report. Again I desire to express my acknowledgements to the United States ministers, consuls, and official representatives of foreign countries, who have so -courteously responded and heartily seconded these efforts to obtain the latest and fullest monetary statistics from all the countries of the world.

While the appended tabulated statements * conveniently group these statistics for comparison and use, a condensed statement of the facts *communicated in the dispatches and accompanying papers may be found useful and convenient.

Great Britain.—The papers forwarded by Minister Lowell contain the

following information:

The coinage of gold during the calendar year 1880 was £4,150,052, and of silver £761,508, which was largely in excess of that of the previous year. The exportation of gold coin and bullion exceeded the amount imported by about £3,500,000. The silver exported exceeded the amount imported by about £750,000. The specie circulation at the close of 1880 is estimated to be as follows:

Gold coin, £123,771,000 \$602,331,571Silver coin, £18,959,000..... 92,263,973

These amounts include the bank reserves. The amount of gold in -circulation is about £1,500,000 larger, and of silver a trifle less, than at the close of 1879. The paper circulation is stated at £42,536,000, of which £26,006,000 were notes of the Bank of England.

Australia.—The dispatches of J. H. Williams, United States consul at Sydney, furnish very complete financial statistics of New South Wales. The production of gold from the mines of the colony from 1851 to 1879, inclusive, is estimated at £33,042,362, and for 1879 the production was valued at £264,018. The value of the silver produced in this colony up to the close of 1879 is estimated to be between £300,000 and £400,000. The importation and exportation of gold and silver were as follows:

Gold imported, £1,262,371; exported, £718,617. Silver imported, £136,433; exported, £106,615.

Canada.—The imports and exports of gold and silver, as given in the statement of the finance department of Canada, were for the calendar year 1880:

Imports..... 

Small quantities of gold and silver are produced from the mines, valued for the year at about \$900,000, being principally gold. The circulation is reported on the 31st day of December, 1880, to have been as follows:

 Gold...
 \$9,026,000

 Silver...
 1,020,000

Nearly all the gold was held by the banks and treasury, together with about one-half of the silver.

Germany.—The production of gold and silver in Germany during the year 1880 was about as follows:

Gold, \$280,693; silver, \$4,893,061, a considerable portion of which was from ores mined in other countries, sent to Germany to be smelted.

^{*}The documents here referred to are omitted for want of space, but they may be found in the volumes of the Director's report.

The imports and exports of silver coin and bullion were as folllows: Imports, \$4,987,200 silver; exports, \$5,685,408 silver, showing a loss of silver of only about \$700,000.

About \$100,000,000 of old thaler pieces, partly of German and partly

of Austrian coinage, are estimated to remain in circulation.

France.—A very interesting paper will be found in the Appendix, from Benjamin F. Peixotto, United States consul at Lyons, in which he treats upon the influences affecting the variation in the relative value of gold and silver.

Austria.—Minister Kasson transmits, under date of March 18, 1881, a copy of the new law of Austria in relation to the deviation allowed

in the fineness of the minting of Austrian gold coin.

The Netherlands.—The papers transmitted by Hon. James Birney, United States minister at the Hague, furnish the following information:

There was coined at the mint during the year 1880, 501,000 florins in ten-guilder pieces, and 25,372 golden ducats, and in silver 100,000 florins in ten-cent. pieces.

The imports and exports of gold and silver coin and bullion were as

follows:

	Florins.
Imports, gold	301, 193
Exports, gold	236, 450
Imports, silver	438 458
Exports, silver	753 940

It is estimated that there was in circulation on the 31st of December, 1880, in standard gold coins, 72,897,320 florins, of which over 40,000,000 florins was in the Bank of the Netherlands, and of silver coin 140,518,785 florins, of which about 84,000,000 florins were held by the same bank. The paper currency issued for the State amounted to 10,000,000 florins,

and by the Bank of Netherlands 198,549,505 florins.

Switzerland.—The reply of Minister Fish, transmitting from the Swiss Government the desired information in regard to the financial condition of Switzerland, contains statistics as to the imports and exports of gold and silver into and from the confederation and the amount in the treasury; also copies of two recent enactments of the Swiss Government, one concerning the emission of bank notes, the other concerning the new coinage of 20 centime pieces. The paper money circulation amounts to about 86,000,000 of francs.

Greece.—The dispatch of B. O. Duncan, United States consul at Smyrna, shows that the entire debt of Greece amounted, December 31, 1880, to 317,276,572 dr.=\$61,234,378, the annual interest of which amounts to \$2,895,000, and that in addition to this the Chambers have voted a further loan of \$23,160,000 (120,000,000 dr.) to cover the deficit

of 1881 and to support the army on a war-footing.

Peru.—Minister Christiancy reports, under date of November last, that an attempt was made to introduce a forced paper currency in Peru called the "inca"; and, under date February of this year, that the attempt had failed, and that the paper soles are the only circulating medium of the country, gold and silver being commodities not circulating as money.

The value of a paper sole just prior to the taking of Lima by the Chilians was about five cents (twenty-one paper soles being about equal to one dollar United States coin); since the conquest of Peru by Chili the minister states that they have appreciated to seventeen paper soles for one dollar United States gold coin. The mountains of Peru, rich in

the precious metals, owing to the unsettled condition, are not mined to

any considerable extent.

Venezuela.—Mr. Jehu Baker, United States minister, furnishes very satisfactory information respecting the monetary condition of Venezuela. He transmits a resolution adopted by the government of that country fixing a tariff of prices for various foreign silver coins. The importation of all foreign silver money, except those coined by the States of the Latin Union, is strictly prohibited. The principal foreign moneys in circulation are United States gold coins and Spanish-American doubloons. The paper money in circulation consists of notes issued by the Bank of Caracas, amounting to about \$250,000 (1,300,000 bolivars), which circulate freely at their face value. The coinage of 5,000,000 bolivars, nearly \$1,000,000, executed in Belgium, has been recently imported into Venezuela. With this exception, the importation of gold and silver has been insignificant. During the fiscal year 1880 there was exported in bullion nearly \$1,500,000.

Hayti.—Minister Langston reports that the importation of American and Spanish gold during the year amounted to about \$40,000, and of silver to \$500,000; the export of the latter amounting to about \$250,000 more. He estimates the money in circulation to be about \$5,000,000, principally American and Mexican silver. He states that a law has been

passed providing for the establishment of a national bank.

African States.—There was imported into Algeria during the year, in gold coin and bullion, 3,089,577 francs, and of silver 6,052,699 francs. No exports of gold or silver are reported. The coin in circulation amounts to about 50,000,000 francs, of which 30,000,000 are gold. The paper circulation is about 50,000,000 francs, in notes of the Bank of Algeria. Owing to the secrecy with which the affairs of the government are conducted, and the lack of official accounts, very little information in regard to the finances of Morocco can be obtained, but such as has been possible to secure has been furnished by Mr. Matthews, the consul.

Liberia.—The United States minister to Liberia furnishes the following information in regard to the finances of that country: Mining operations do not exist, nor is any coinage executed. The principal circulating medium is United States gold and silver coin, and those of Great

Britain. It has a paper circulation amounting to \$150,000.

Bulgaria.—Hon. Eugene Schuyler, consul general at Bucharest, reports that the Russian silver ruble has been demonetized, and its place is to be supplied by 5-franc pieces, of which 7,000,000 francs are now ready for issue.

## THE WORLD'S PRODUCTION.

My last report contained tables giving by countries the total productions of gold and silver for the years 1877, 1878, and 1879, based principally upon official statements or estimates communicated to this bureau.

The table is continued to embrace the year 1880, with such modifications of the former years as official intelligence since received required to be made. Troy ounces are reduced to or from kilograms at the valuation given by the United States statute: one gram = 15.432 grains, one kilogram therefore equals 15,432 grains.

In the reports for the years 1877, 1878, and 1879, the production as estimated for the rest of South America was correctly stated in kilograms, but an unnoticed clerical error misplaced one column to the right, the figures for the equivalent dollar valuation of 250,000 kilograms of silver. The amounts are correctly stated in this report.

The total product for the calendar year 1880 was, of gold, \$107,037,697, and of silver, \$87,543,072. The production of the United States is given for the fiscal year, which does not materially vary from the production of the calendar year.

## THE WORLD'S CONSUMPTION OF THE PRECIOUS METALS.

The estimates and discussions contained in previous reports regarding the annual appropriation of the precious metals for manufactures, in the arts, &c., seem to have awakened the interest and attracted the attention of European statisticians, and a better appreciation is had of the propriety and necessity of subtracting largely from the world's apparent accumulated stock, for annual waste and consumption.

The total production since the discovery of America, and even since the discovery of gold in California, has, of late years, been frequently presented as an evidence of the mass of metal money in use or in stock for coinage. But few writers or statisticians have presented, in the

same connection, estimates or statistics of the consumption.

From a review of the information published in this and preceding reports and other authorities, I estimate that, including the annual consumption in the United States of \$11,000,000 gold and \$6,000,000 silver, the annual consumption of the world in ornamentation manufactures and the arts is at least \$75,000,000 of gold and \$35,000,000 of silver.

### COINAGE OF FOREIGN COUNTRIES.

The continued import of gold into the United States, with the retention of the domestic production, increased, as in the preceding year, the coinage of gold in the United States, and as largely diminished that of other countries.

In the year 1880, two thirds of the gold and one-third of the silver coinage reported for nine of the principal countries of the world was

executed by the mints of the United States.

A tabulated statement is appended giving the value in United States money of the coinage executed by a number of countries, for the years 1878, 1879, and 1880. It shows that, for the years and by the number of countries stated, the following amounts of gold and silver were coined:

Years.	Countries.	Gold.	Silver.	Total.
1878. 1879. 1880.	18 13 9	90, 714, 493	\$161, 191, 913 104, 888, 813 81, 951, 354	

#### CIRCULATION OF THE PRINCIPAL COUNTRIES OF THE WORLD.

The tables presented in the last annual report showing the paper and specie circulation of thirty one of the leading countries of the world, and the amounts of coin and bullion held by banks and national treasuries, have been corrected to the latest date possible.

Further replies to the circular of the Secretary of the Treasury from our ministers and consuls will, it is believed, contain additional informa-

tion, which will be published in subsequent reports.

The estimated amount of gold circulation is \$3,221,000,000; silver, full legal tender, \$2,115,000,000; limited tender, \$423,000,000; total specie,

\$5,759,000,000; of paper, \$3,644,000,000; and the total circulation, including the amounts held in government treasuries, banks, and in active circulation, is \$9,403,000,000.

## COURSE OF PRICES.

The table of the prices of exports, ascertained by dividing declared values by quantity, has been continued for the fiscal year 1881. It shows an advance of 5 per cent. on the previous year's export prices, but a decline on the gold prices of the same articles compared with other prices in 1870.

Tables have been prepared, under my direction, with great care and labor, by the computer of the bureau, Mr. Frederick Eckfeldt, which exhibit the average annual prices in the New York market from 1825 to 1880, inclusive, of leading staple commodities, the leading prices of each of the articles for 1856, and the percentage of each annual price compared with the mean price.

The prices quoted were obtained for the years 1825 to 1874, inclusive, from the tables of their average prices in New York, found in the Finance Reports of 1863, 1873, and 1874. For the succeeding six years, they were compiled in this office from the published semi-weekly quotations in the New York Shipping and Commercial List, from which paper it is understood the quotations were taken in compiling the tables found in the Finance Reports.

The comparative percentages for each year on all the articles taken will measure, as far as the varying prices of those commodities can do so, the varying purchasing power of money for the year.

The prices during the suspension of specie payments in the years 1837 and 1838 and from 1862 to 1878, during which there was a premium on gold, have been reduced to a gold basis.

The table of final averages, therefore, presents, for the years named, the purchasing power of gold in the United States, as shown by the

prices of leading commodities in the New York market.

For instructive comparison, the circulation, paper and metallic, for the same years, as far as ascertainable, is given in additional columns, as well as the per capita circulation and estimated wealth. They show (as similar tables published in my last annual report showed as to France) that prices are less affected by circulation, paper or metallic, than by other potent agencies. They are worthy of special consideration at this time, and should tend to allay the prevalent fear of impending commercial disaster as a consequence of abundant and increasing monetary circulation, expanding with the growth of business and accompanied by enlarged production and substantial prosperity.

In closing this report it is a pleasure to again commend the zealous co-operation of the clerks in the Mint Bureau, and to acknowledge their efficient aid in preparing, tabulating, and verifying the statistics relating to those branches of the mint service assigned to them, as well as

in the performance of their official duties.

I am, very respectfully,

HORATIO C. BURCH'ARD,

Director.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

APPENDIX.

## 1.-DEPOSITS and PURCHASES of GOLD and SILVER BULLION during the fiscal year ended June 30, 1881.

XVIII.—CIRCULAR, ESTIMATING AND PROCLAIMING, IN UNITED STATES MONEY OF ACCOUNT, THE VALUES OF THE STANDARD COINS IN CIRCULATION OF THE VARIOUS NATIONS OF THE WORLD.

DEPARTMENT No. 1. SECRETARY'S OFFICE.

TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., January 1, 1881.

Hon. John Sherman, Secretary of the Treasury:

SIR: In pursuance of the provisions of section 3564 of the Revised Statutes of the United States, I have estimated the values of the standard coins in circulation of the various nations of the world, and submit the same in the accompanying table.

Very respectfully,

HORATIO C. BURCHARD,

Director of the Mint.

#### UNITED STATES ASSAY OFFICE AT NEW YORK, September 14, 1881.

SIR: Deposits of gold and silver bullion, for bars which have probably been issued in the arts and manufactures during the fiscal year from July 1, 1880, to June 30, 1881, appears as tollows, viz:

	Gold.	Silver.
Of foreign coin. Of foreign bullion Of domestic bullion. Of plate, &c		

Very respectfully,

THOS. C. ACTON, Superintendent.

R. E. PRESTON, Esq.,

Acting Director Mint, Washington, D. C.

#### XXIII.

[From the "Watchmaker and Metal Worker," for October, 1881.] HOROLOGICAL PRODUCTIONS OF VARIOUS COUNTRIES.

Watches to the value of \$2,135,000 were imported into Great Britain in 1880. From a Swiss journal we learn that in 1880 there were produced at Besançon, France, 146,047 gold and 267,783 silver watches, being 3,860 gold and 26,618 silver watches less than during the preceding year. The total value of this trade for 1880 is estimated at 19,108,170 francs. The falling off in the product is attributed to increased importations of watches from Switzerland into France, the Swiss having been able to reduce the wages of mechanics considerably, owing to the falling off of the American demand for Swiss watches. In 1872 there were imported into the United States 366,000 watches; in 1876 only 75,000. In these four years the industry had been so developed, and its products so cheapened, that we had become large exporters of watches, and could beat the Swiss watchmakers on their own ground. This led the Swiss manufacturers to change their tactics. As the Americans could surpass them in the finer grades of watches, they began to cheapen their productions, and were thus able again to bring up their export trade quite largely, until in 1880 that country excelled her best previous record, her exportations of watches having reached a total value of \$2,000,000.

There were imported into France in 1880, 32,082 gold and 51,592 silver watches, exceeding by 20 per cent. the importations of 1879. The total number of watches represented in the Geneva trade of 1880 was:

TOTAL CALL CALLET A CALLET OF FORCE	
Watches from Besançon	413,832
Watches from other French towns	800
Foreign	

Formerly; Switzerland sent to France watches to the value of over 4,000,000 francs; but France now sends a large number of watches into Switzerland. The value of the entire clock and watch trade of France in 1880 is estimated at 57,000,000 francs, and something like 60,000 workmen are engaged in this industry, of which the greater part are employed at Besançon. In Paris there are 6,000 watchmakers.

According to M. Saunier, England contributes to this art in money value about one-fifteenth of the production of the world. The following table, showing the total annual manufacture of horological instruments in the various nations, does not give the year covered by the estimate:

France, clocks and watches	<b>\$13,000,000</b>
Switzerland, watches	12,000,000
America, clocks and watches	6, 400, 000
Germany, clocks	5,000,000
England, chronometers and watches	
Austria, clocks	2,000,000

The foregoing statement omits mention of a large amount of official work which does not admit of systematic classification and detailed report, and yet has occupied much time and care; such as, e. g., examination of, and decision upon, applications for the issuing of duplicate bonds and other securities in place of securities lost and destroyed; examination of powers of attorney for collection of money due to creditors of the United States; decisions upon the rights of persons claiming to be executors, administrators, or heirs of deceased claimants, to receive money due from the United States; examination, registry, and filing of official bonds; copying of letters forwarded; answering calls for information made by Congress, the departments, and private persons; receiving and examining emolument returns of officers of courts; investigation of legal points arising in the adjustment of accounts; and other work of a miscellaneous character.

#### LAW CLERK AND STENOGRAPHER.

In addition to the regular daily work, which is onerous and steadily increasing, the Comptroller is frequently required to decide upon the validity of claims for large amounts of public money. Many of these claims involve difficult questions of law, and the claimants have, in most cases, the best legal assistance they can procure.

As to claims coming before the Comptroller, this office is not only in some sense a court of claims, but also a court from whose decisions there is no appeal as such—though subject to revision by Congress, and in certain cases by the judiciary. The head of the office discharges not only the duties of sole presiding judge, but also those of a solicitor for the government in the investigation of the claims; and he must be prepared to answer arguments of counsel for claimants. For these and other reasons stated in my last annual report, it is essential to the interests of the government that authority should be given to the Secretary of the Treasury to appoint a competent law clerk, and also a stenographer, for this office. It is physically impossible for any one man, in the position of Comptroller, to give to the multitude of important questions constantly arising before him such investigation and sustained attention, unaided by law clerk or stenographer, as they should receive before de-There is no office under the government in which so many important decisions on questions involving immense demands against the National Treasury are made as in that of the First Comptroller. The officer who is daily called upon to make such decisions should, in justice alike to the government, to those preferring the demands, and to himself be furnished with all the assistance and facilities which are reasonably necessary in order to the prompt and efficient discharge of so momentous a duty; and it is respectfully urged that for these reasons the services of an able law clerk, and also of an experienced stenographer, are absolutely requisite. The salary of the law clerk should be such as not merely to secure for a brief interval, but to retain permanently, the services of an industrious, painstaking, well-trained, and trustworthy lawyer. I would suggest that the salary of the law clerk be not less than three thousand five hundred dollars; and of the stenographer, not less than eighteen hundred dollars.

### DIVISION OF CLAIMS.

Claims involving difficult questions of law, which require not only much time, but special legal ability, for their proper investigation are constantly coming before this office for adjudication. If Congress were to establish in this office a Division of Claims, and authorize the appointment as its chief of a person possessing the requisite legal qualifications, and also of two additional clerks of class four, the work of the office would be more speedily and efficiently performed, and the public service be greatly benefited.

It is indispensable to the prompt adjustment of claims against the United States, and the settlement of the accounts of disbursing officers and of the Commissioners of the District of Columbia, that additional clerical assistance be furnished to this office. The accounts of the Commissioners of the District for the fiscal year 1879 are not yet all settled, and most of those for 1880 and 1881, as well as for the current year, remain unexamined. The accounts of the collector of taxes for the District have been subject to the revision of this office since July 1, 1878; but for want of sufficient clerical force they remain untouched. Division of Internal Revenue Accounts has been so pressed with current business that the work of preparing statements for suits against delinquent collectors has been unavoidably delayed. The work of the Miscellaneous Division was largely increased last year by the accounts relating to the Tenth Census, all of which remain to be examined. business of the office in most of its divisions increases relatively with the ordinary growth of the population and business of the country; and this increase necessitates an addition to its clerical force.

I respectfully invite and urge your attention to this subject as one which is of great importance as well to the interests of the government as to those of claimants having valid demands upon the United States Treasury.

## ACCOUNTS IN ARREARS.

The First Comptroller is required by section 272 of the Revised Statutes to "make an annual report to Congress of such officers as shall have failed to make settlement of their accounts for the preceding fiscal year, within the year, or within such further time for settlement as may have been prescribed by the Secretary of the Treasury." This requirement is taken from section 13 of the act of March 3, 1817, providing for the prompt settlement of public accounts. I cannot find that it has ever been complied with, and I presume that the non-compliance has been caused by the impracticable nature of the requirement. No disbursing officer can, within the year, make settlement of his accounts for such fiscal year, and no time for settlement is prescribed by the Secretary of the Treasury. Besides the consideration that a strict compliance with the act of 1817 was impracticable, it was probably thought that the reports made in conformity to section 3 of the act approved March 3, 1809 '2 Stats, 536), contained substantially the information called for by the

act of 1817. Said reports showed the accounts which had remained more than three years unsettled. They were discontinued in the year 1860; for what reason I am not advised. The law which required them is not contained in the Revised Statutes.

There must have been some doubt as to the meaning of section 13 of the act of March 3, 1817. (3 Stats., 366.) At the time of its passage the annual appropriations were made in and for the current calendar year, e.g., the "Act making appropriations for the support of the government for the year one thousand eight hundred and seventeen" (3 Stats., 352), was passed March 3, 1817. The reports of the Comptroller required by section 13 of the "Act providing for the prompt settlement of public accounts" (3 Stats., 368), were to be laid "before Congress annually, during the first week of their session." From this it is clear that the reports could not have been intended to cover the calendar year in which they were made; and it might be inferred from the terms of section 6 of this act, that the reports required were intended to cover accountability accruing in the preceding calendar year, which was not settled during the year in which the report was to be made. did not limit absolutely the settlement of accounts within each calendar year to which they pertained. The Secretary of the Treasury might extend the time; and if settlements were made within the following year, and before the time of reporting to Congress, such settlements would not have been considered cases of delinquency.

On the 9th of February, 1876, the Senate, by resolution, called for a special report of all delinquent public officers. This shows that the attention of Congress has been directed to the fact that the Comptroller had

ceased to make the annual reports above mentioned.

It is my wish, no less than my duty, to observe strictly all the requirements of law relating to this office; and I should endeavor to make the reports mentioned in section 272, Revised Statutes, if it could be done satisfactorily; but this seems to be impracticable; and the facts that they were not made by my predecessors, and that those which were made under the act of 1809 were discontinued twenty years ago without objection from Congress or any member thereof, lead me to believe that they are not wanted.

## FORMER RECOMMENDATIONS.

Your attention is again invited to the suggestions made in my last annual report (Ex. Doc. No. 46, Forty-sixth Congress, Third Session) on

the following points:

1. That the heads of the other executive departments of the government be authorized by law to direct, pursuant to the request of the Secretary of the Treasury, any officer or agent of their respective departments to investigate any of the official transactions or accounts of officers or agents of the Treasury Department which, in the opinion of the Secretary of the Treasury, it may be of advantage to the government to have so investigated, and to make report of such investigation to the Treasury Department; and that the necessary expenses incurred in such investigation be made payable out of the appropriation which would be available if the investigation were made by an officer or agent of the Treasury Department.

2. That in cases of application for duplicates or for payment of lost or destroyed interest bearing bonds of the United States, the Secretary of the Treasury be empowered to require an examination by the proper officers, with evidence under oath, into the financial status of parties

to the bonds of indemnity offered by applicants. Also, that regulations be prescribed by statute in relation to the payment of lost bonds.

3. That existing laws defining perjury be so amended as to include in explicit terms all cases of false and corrupt swearing in affidavits pre-

sented to, filed, or used in the Treasury Department.

4. That an indefinite appropriation be made for the settlement of accounts of receivers of public moneys and other collecting officers to whom balances are due, or may hereafter be found to be due, because of erroneous overpayments by them into the Treasury.

#### COMPENSATION TO AGENTS UNDER APPROPRIATION ACTS.

Some of the acts passed by Congress appropriate money in gross sums for specific objects, to be expended under the direction of various officers. Under these acts there is generally an implied authority to the officers to appoint agents to make investigations or do some other acts necessary to effect the objects of the respective appropriations, and to pay therefrom compensation to these agents, the amount of which is determined at the discretion of the officer charged with the duty of executing the statute (ex. gr., act March 3, 1881; 21 Stats., 440). Such appropriation acts executed by different officers do not by any fixed rule secure uniformity in the compensation for the services of such agents, even when employed in the same kind of service. It may sometimes be difficult to determine, when agents are so appointed, whether appropriation acts give discretionary authority exclusively to the officers charged with the duty of executing them to fix the rate of compensation, or whether by force of other statutes the accounting officers of the Treasury Department can determine the amount to be paid. Questions arising out of such appointments and rates of compensation should be settled by explicit provisions in the appropriation acts.

## ACCOUNTS OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

In settling the accounts of the Commissioners of the District of Columbia, it has been found that some vouchers were for payments which were not technically and strictly authorized by law, but which would, upon an examination by Congress, probably be approved because of

the manifest propriety and justice of the payments.

In some cases expenditures have been made in the improvement of streets and avenues not mentioned in estimates, and so, by reason of the phraseology of the statute, not authorized (act of March 3, 1879, 20 Stats., 417). The public having received the benefit of the improvements, which were made, doubtless, because the Commissioners deemed them necessary, it may be proper that the attention of Congress be called to the subject, in order to determine whether the vouchers of payment should be allowed.

## ACCOUNTABILITY OF DISBURSING OFFICERS FOR PUBLIC PROPERTY.

There are some disbursing officers who are also custodians of public property, whose accounts are revised in this office. There is no law or regulation requiring them, either at their annual settlements or upon final settlements, or at any time, to file a return or schedule of property In such cases it is difficult for this office to know with certainty whether the settlements made secure full accountability. is especially the case when the disbursing officer is, during his term, authorized by law or regulation to sell public property for cash, to be deposited by such officer in the Treasury and reported to the Secretary, or to the accounting officers for statement of an account. It is respectfully suggested that it would contribute to secure more reliable accountability if these officers were required to make reports substantially as in the Quartermaster's Department of the Army. (Rev. Stats., 1221.) It would seem proper that, before making the final adjustment of the accounts of a disbursing officer having the custody of public property, he should be required to show its delivery to his successor in office or other custodian. The Public Printer, for example, who is a disbursing officer of the class referred to, receives money from at least five sources: by warrant on the Treasury; from various officers and departments for work done; from sales of extra copies of documents, paper-shavings, and imperfections; from sales of waste-paper; and from sales of old material. For each transaction he is required by law to settle his account of re-

ceipts. (Rev. Stats., 3817.)

Money's are paid out of the Treasury to the Public Printer, from the several appropriations to which the same are chargeable, for work done for various offices and departments, and the money so paid is by that officer deposited to the credit of the appropriation for "the public printing and binding." The statement made by the Public Printer of moneys received from offices or departments can only be verified by the First Auditor or Comptroller by a personal examination of the books of such offices or departments, or by an extensive correspondence; and, if omissions should be inadvertently made in the reports, the difficulty of correcting the errors would be very great. This difficulty would be lessened if the accounts rendered by the Public Printer for work done for offices or departments, properly authenticated by them, were transmitted to the Secretary of the Treasury and referred to the proper accounting officer, for statement of an account in favor of the Public Printer, the balance thereof to be charged to the proper appropriation, and, when paid, to be carried by counter warrant to the credit of the appropriation for "the public printing and binding." Under the system suggested the records would show proper charges against the several appropriations for payment for doing such work, and corresponding credits to the appropriation for "the public printing and binding." This would, to a large extent at least, avoid the necessity of a verification of the amounts to be transferred, as each account would be verified by the head of the office, bureau, or department for which the work was done. spectfully suggested that this matter is worthy of consideration with a view to proper regulations, or legislation if necessary, on the subject.

Difficulties are frequently occurring in connection with the accounts rendered for the sale of movable public property. If the custody and disposal of such property in the hands of civil officers were subject to regulations similar to those applicable to the like property in the custody of officers in the military or naval service, and the property itself were subject to frequent inspection by properly designated officers, a stricter accountability for, and a more satisfactory disposition of, such property

would be secured.

In connection with this subject your attention is respectfully directed to the fact that no provision is made by law for the payment of expenses incurred by public officers in the sale of old material and other property, in cases where the proceeds of the sales are required to be deposited and covered into the Treasury. Such expenses are usually paid out of the proceeds, but there is doubt whether this usage is in accordance with the requirement that all proceeds shall be deposited. (Rev. Stats., 3617, 3618.) The question should be settled by legislation.

PER CENTUM OF PROCEEDS OF SALES OF PUBLIC LANDS DUE TO. AND DIRECT TAX DUE FROM, KANSAS AND OTHER STATES.

The deficiency appropriation act of March 3, 1881, appropriates for the State of Kansas for amount due of the five, three, and two per centum fund to States, \$190,268.27. The State of Kansas having been previously charged by the proper officer of the Treasury Department with \$71,743.33 on account of direct taxes stated to be due to the United States from the State of Kansas, under the direct-tax act of Congress of August 5, 1861, and only a portion of this having been paid, the residue, \$62,382.51, was retained by the Treasury Department out of the appropriation made by the act of March 3, 1881, and credited to the State on account of the charge for direct taxes. The State of Kansas, by its attorneys, insisted that the whole sum appropriated should be paid to the State without applying any part as a credit on account of the charge for direct taxes.

Some, if not all, of the questions which arose in relation to this claim are liable to arise as to charges against other States for direct taxes. A copy of the decision of the First Comptroller in relation to the subject is therefore herewith transmitted for information, in case Congress

should deem it advisable to legislate on the subject.

## ACTING SECRETARIES OF TERRITORIES.

By section 1843 of the Revised Statutes it is provided as to each Territory that "in case of the death, removal, resignation, or absence of the governor from the Territory, the secretary shall execute all the powers and perform all the duties of governor during such vacancy or absence or until another governor is appointed and qualified."

It is respectfully suggested that provision should be made authorizing some one to act as a deputy or substitute of the Territorial secretary, as to his office, under similar circumstances. Experience has shown the

necessity for some provision on this subject.

## LIMITATION OF CLAIMS.

There are statutes limiting the time within which some claims may be presented against the government, while as to others there is no limit prescribed by statute, and hence only such as may arise on common law principles from presumption of payment.* The existence of many old claims against the government, some of them often rejected but frequently renewed, would seem to suggest the propriety of considering the justice and necessity of providing a limitation generally applicable to claims.

I deem it due to those with whom I have been officially connected in this office, and to the employés therein, to express my appreciation of the intelligence, ability, and fidelity with which they have performed

their respective duties.

I have the honor to be, very respectfully,

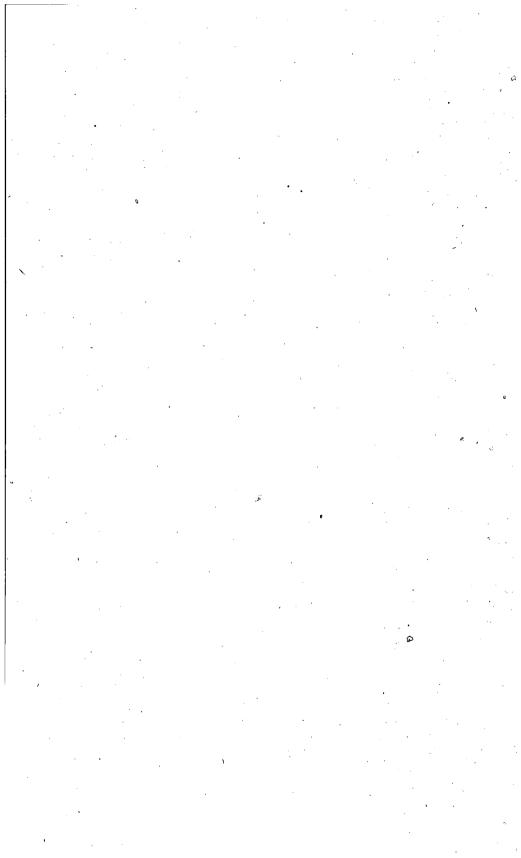

ŴILLIĂM LAWRENCE, First Comptroller.

Hon. WILLIAM WINDOM, Secretary of the Treasury.

^{*} I have had occasion, whilst a member of the House of Representatives, to consider the justice and necessity of prescribing a limitation applicable to claims generally (House Rep. No. 134, second session Forty-third Congress, pp. 18, 242).

# REPORT OF THE SECOND COMPTROLLER.

335

## REPORT

OF

# THE SECOND COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT,
SECOND COMPTROLLER'S OFFICE,
Washington, October 17, 1881.

SIR: In compliance with your direction, by letter of the 30th ultimo, I submit a report, in two tabular statements, of the transactions of this office during the fiscal year which ended on the 30th day of June, 1881.

The first tabular statement shows the total number of accounts, claims, and cases of every kind settled and adjusted, and the amounts allowed thereon.

The second table furnishes a more detailed statement of the same accounts, claims, and cases, showing the character of the accounts, the source from which received, the number of each kind, and the amounts allowed. A still more detailed statement is prepared and filed for preservation in this office, but it is deemed too voluminous for publication.

From—	Number revised.	Amounts.
Second Auditor Third Auditor Fourth Auditor	8, 396 4, 740 1, 804	\$22, 805, 520 73, 390, 700 16, 203, 818
Various sources not involving present expenditure	14, 940 2, 995	112, 400, 038 2, 076, 516
Total number accounts and claims and amounts settled	17, 935	114, 476, 554

### ACCOUNTS REVISED DURING THE YEAR.

All the public business intrusted to my charge is, I believe, promptly and properly attended to by the officers and clerks of the office, and has progressed with reasonable dispatch.

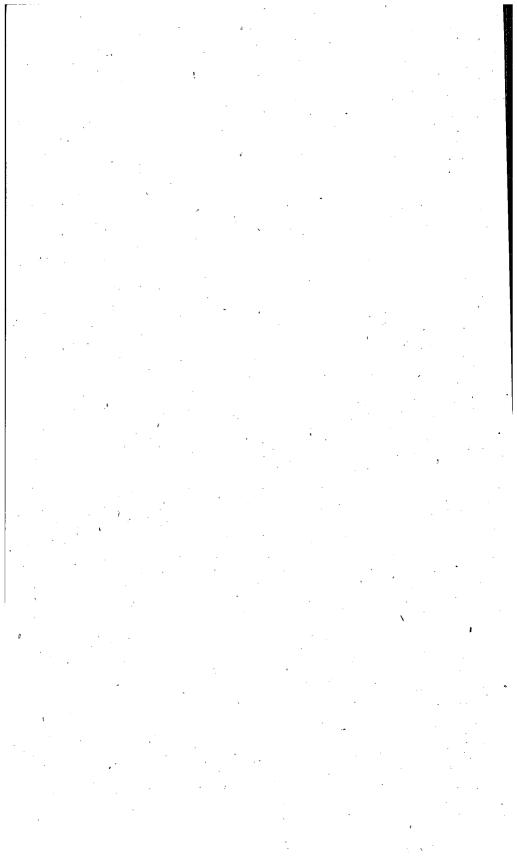

Very respectfully,

W. W. UPTON, Comptroller.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

REPORT OF THE COMMISSIONER OF CUSTOMS.

## REPORT

OF THE

# COMMISSIONER OF CUSTOMS.

# OFFICE OF COMMISSIONER OF CUSTOMS, Washington, D. C., October 29, 1881.

SIR: I have the honor to submit herewith for your information a statement of the work performed in this office during the fiscal year ending June 30, 1881:

Number of accounts on hand July 1, 1880
Number of accounts on hand June 30, 1881
There was paid into the Treasury from sources the accounts relating to which are settled in this office:
On account of customs
On account of marine-hospital tax
On account of steamboat fees
On account of fines, penalties, and forfeitures
On account of deceased passengers
On account of emolument fees
On account of mileage of examiners. 1, 197 90
On account of interest on debts due. 1,236 00
On account of rent of public/buildings
On account of relief of sick and disabled seamen 5,541 52
On account of proceeds of government property
On account of miscellaneous items
Aggregate

And there was paid out of the Treasury on the following accounts, viz:

	,	
Expenses of collection		
Excess of deposits	3, 663, 254 24	
Debentures	1,722,184 35	
Public buildings	2,284,053 13	
Construction and maintenance of lights	2,642,668 99	
Construction and maintenance of revenue cutters		
Marine-hospital service	400, 404, 47	
Life-saving stations	469,018 60	
Compensation in lieu of moieties		
Seal fisheries in Alaska		
Metric standard weights and measures		
Debentures and other charges		
Detection and prevention of frauds upon the customs revenue	36,057 10	
Unclaimed merchandise		
Refunding moneys erroneously received and covered into the Tr	reasury. 365 00	
	343	

Protection of sea-otter hunting-grounds and seal fisheries in Alaska.  Extra pay to officers and men in Mexican war—revenue marine  Relief of N. & G. Taylor.  Relief of E. S. Sherman.  Relief of keepers of Timbalier light station.  Relief of E. E. Sanders.  Relief of widows and children of surfmen who perished at Point Aux Barques, Lake Huron  Burial of surfmen who perished in rendering assistance to distressed vessels.  Removal of remains of R. H. Carter, late inspector of customs, from	\$619 12 1, 362 00 11, 017 06 1, 130 79 100 00 40 00 1,000 00 150 00	•
Removal of remains of R. H. Carter, late inspector of customs, from Panama to Virginia	500 00	
Aggregate	18, 499, 412 09	
The number of estimates received and examined. The number of requisitions issued The amount involved in requisitions. The number of letters received The number of letters written. The number of letters received the number of stubs of receipts for duties and fees returned by collectors. The number of stubs examined The number of stubs of certificates of payment of tonnage dues received and entered The number of returns received and examined The number of oaths examined and registered The number of appointments registered. The number of appointments registered. The average number of clerks employed.	3, 103 3, 103 \$15, 196, 725 36 10, 842 10, 848 9, 056 206, 145 236, 025 10, 020 82, 898 2, 508 4, 539 30	

I inclose herewith a statement of the transactions in bonded goods during the year ending June 30, 1881, as shown by the adjusted accounts.

I am, very respectfully, your obedient servant,
H. C. JOHNSON,

Commissioner of Customs.

The SECRETARY OF THE TREASURY.

		<u>!</u>

The foregoing exhibits and enumeration of balances stated in this office, during the year just closed, show an increase of labor performed by the clerical force; and the accumulation of accounts presented for examination and settlement admonishes me that an additional number of clerks will be required to perform the official work of this bureau.

The changes made by statute in payment of interest upon the public debt, requiring quarterly instead of semi-annual settlements, have greatly increased the work of the Public Debt Division; and this division is in arrears from necessity, growing out of the additional requirements pressed upon it.

The changes made in the appropriations for expenses of the judiciary

have largely increased the work of that division of the office.

The growth of population and extended territory, as indicated by legislation relating to the Department of Justice, together with the change from general to specific appropriations, will compel an increase

in the clerical force of the Judiciary Division.

The large amount of work, imposed by statute upon this bureau, by the transfer of all accounts relating to the receipts and disbursements of public moneys made by the honorable Commissioners of the District of Columbia, cannot be performed by the additional clerk granted by Congress; and one moment's examination of the work required in the examination and settlement of these accounts will satisfy the most exacting legislator that at least an additional clerk will be found absolutely necessary to dispatch work required. A temporary assignment of a clerk has been made to aid in this work, yet this has proved unsatisfactory, from the fact that he could remain only for a short time; while the work requires the most careful examination, by a clerk of good ability, after a patient and critical examination of statutes relating to the receipts and disbursements of the public moneys by the District of Columbia, as per accounts rendered.

While, in my judgment, an additional clerk beyond the necessities of a bureau, or office, is an injury to such office and a detriment to the public service, as well as a needless expenditure of the public money, I am constrained to make application for necessary clerical force, growing out of the increased work, which demands prompt attention, as well as careful investigation, before settlement of accounts can be prop-

erly made by this bureau.

The recommendation made in my last report relating to the organization of a new division in this office, is restated for consideration:

Attention is called to the number of accounts and the amounts involved in the settlement of what are known as "miscellaneous accounts," under the designation of "miscellaneous desks," from No. 1 to 7 inclusive. These embrace the largest part of the disbursements from the United States Treasury during the year, yet their examination is not under the supervision of a chief of division, as they do not belong to any class pertaining to divisions of the First Auditor's Office as now organized.

I would respectfully recommend that a new division be organized, to be known as the Division of Miscellaneous Accounts, to which should be referred all accounts not

now assignable to existing divisions in this office.

While the accounts settled upon these desks are now carefully and critically examined by clerks in charge who would be a credit and honor to any office, for I except none, as to diligence, efficiency, and integrity, this will secure a supervision of the accounts stated by them, which will be an additional guarantee of their correct adjustment. In cases of enforced absence of clerks from duty-on account of sickness or otherwise, the work of the new division will proceed with less embarrassment if under the charge of an efficient chief.

After a careful examination of the condition of the work required of this office, it was found entirely impracticable to make a temporary assignment of an "acting chief of division" to have charge of the miscellaneous desks, from the fact that the services of a competent clerk could not be spared from the pressing work specially assigned to him for his examination and report.

I am clearly of opinion that, after the examination of accounts, all reports, made in the first instance by clerks in an accounting office, should be carefully supervised before receiving the signature of the

chief of the bureau.

It is a physical impossibility for any head of a bureau to carefully examine, or revise, all reports presented to him for approval and signature, and, of necessity, he must rely upon the clerical examination made

and supervision had by some competent chief of division, who must share the responsibility of official action taken by the office, in any case.

Where a doubt arises in examination of accounts, or claims, as to the proper construction of the statute, the classification under existing appropriations, or the sufficiency of proof, &c., &c., the chief of bureau alone should make decision and direct official action; while the routine business of the office, when no doubt exists, is necessarily performed by the clerical force prescribed by law.

The deputy auditor and chiefs of division are specially commended for untiring diligence and kindly aid in the dispatch of the public

business.

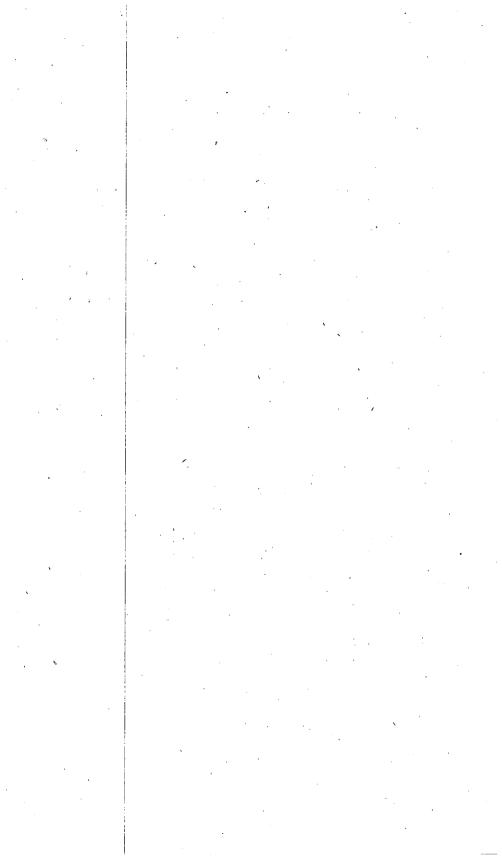

I desire to renew to them, and to the clerks and employés of the office, sincere expression of esteem and confidence.

I am, sir, respectfully, &c., your obedient servant,

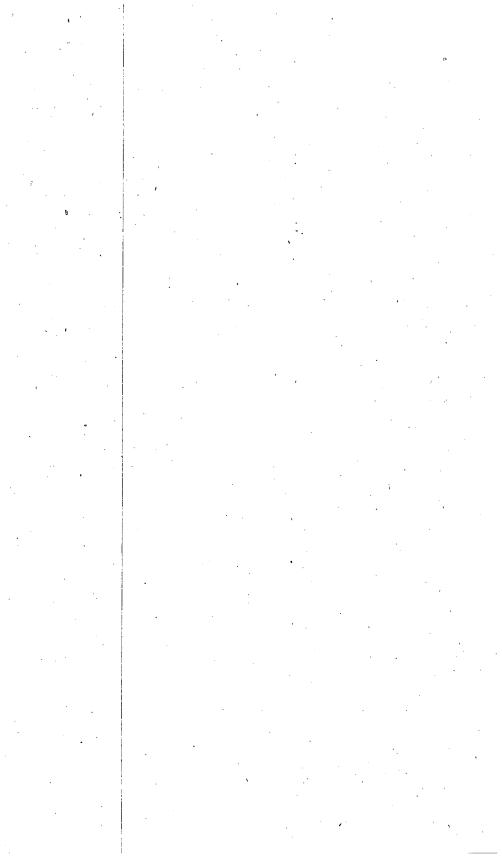

R. M. REYNOLDS,

First Auditor.

The Hon. SECRETARY OF THE TREASURY.

# REPORT OF THE SECOND AUDITOR.

## REPORT

OF

# THE SECOND AUDITOR OF THE TREASURY.

## TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, Washington, October 26, 1881.

SIR: In compliance with section 283 of the Revised Statutes, and your request of the 30th ultimo, I have the honor to submit my report of the business assigned to this office for the fiscal year ending June 30, 1881.

### BOOKKEEPERS' DIVISION.

The application of money appropriated for those bureaus of the War Department whose accounts are adjusted in this office, and for the Indian service, cannot be shown in detail within reasonable limits, but its disposition is sufficiently indicated by the following condensed balance sheet of appropriations:

<b>Y</b>	War.	Indian.
CREDITS.		
Balance remaining to the credit of all appropriations on the books of this office July I, 1880 Amount of repayments during the year. Amount repaid through the Third Anditor's office to the appropriation for "clothing, camp and garrison equipage". section 5, act March 3, 1875, and by other counter-warrants	7, 940 03	18, 175 44
Amount of annual, permanent, specific, and indefinite appropriations made by law	16, 884, 308 52	11, 211, 104 83
Total credits		16, 994, 739 17
DEBITS.		
Amount paid out on requisitions issued by the Secretary of War and		
charged as follows:  To Pay Department appropriations To Ordnance Department appropriations To Medical Department appropriations To Adjutant General's Department appropriations To Quartermaster's Department appropriations To Quartermaster's Department appropriations, under section 5, act March 3, 1875 To appropriations under the immediate control of the Secretary of War To appropriations for the Commanding General's office. To the Soldiers' Home. To the National Home for Disabled Volunteer Soldiers To special acts of relief Amount drawn through the Third Auditor's office from the appropriation for "clothing, camp and garrison equipage"* Amount paid out on requisitions issued by the Secretary of the Interior	1, 627, 717 26 713, 851 76 80, 631 97 33 10 127, 118 89 2, 500 00 87, 814 03 1, 033, 560 83 7, 850 93	
Amount charged by warrants issued to adjust appropriations under section 5, act March 3, 1875, and by other transfer warrants	6, 592 47	6, 823, 316 83 9, 842 <b>79</b>
Amount carried to the surplus fund under section 3691, Revised Statutes	963, 189 65	453, 685 79
Total debits	18, 086, 994 03	7, 286, 845 41
Balance remaining to the credit of all appropriations on the books of this office June 30, 1881	1, 155, 295 24	9, 707, 893 76

^{*}Of the amounts drawn and repaid through the Third Auditor's office under "clothing, camp and garrison equipage." only so much is taken up in the above balance sheet as will close that appropriation on the books of this office, and hereafter the Third Auditor's drafts and repayments will not enter into the Second Auditor's statement of balances.

The aggregate amount appropriated for the Indian service, as reported in the foregoing balance sheet, \$11,211,104.83, includes all sums that have been passed to the credit of Indian appropriations, by warrant, during the fiscal year, and is composed of the following items:

Amount appropriated for the service of the fiscal year 1881, per act of May 11, 1880. \$4,657,262 72 Expenses of Board of Indian Commissioners, act June 16, 1880. 15,000 00 Expenses of Ute Commission, act June 15, 1880. 15,000 00 Removal, subsistence, &c., of Ute Indians, act June 15, 1880. 401,000 00 Ute four per cent. fund, act June 15, 1880. 1,250,000 00 Payment to the Miamies of Indiana, act March 3, 1881. 221,257 86 Indemnity to the Ponca Indians, act March 3, 1881. 165,000 00 Amount credited to the Osage Indians under the act of June 16, 1880. 1,384,449 64 Amount received from sales of Indian lands. 1,593,632 41 Interest on investments and on net proceeds of lands. 553, 437 85 Indian trust funds deposited in the Treasury in lieu of investment, act April 1, 1880. 1,081,784 89 Special acts of relief 61,912 60 Amount appropriated to supply deficiencies, act March 3, 1881. 107, 379 23 Amount expended in connection with the purchase of Indian supplies in May and June, 1881, being part of the appropriation for 1882, which, being immediately available, was used during the fiscal year 1881. 8, 987 54
Total
The balance of \$9,707,893.76, remaining to the credit of Indian appropriations June 30, 1881, includes items not subject to draft, as well as all moneys applicable to the current requirements of the Indian service, and may be divided as follows:
Balances subject to draft: Annuities, interest on investments and proceeds of lands, appropriations for beneficial objects, removal, subsistence, education and civilization of Indians, pay of officers and employés, incidental and contingent expenses, &c. \$2,518,385 59  Balances not subject to draft: Trust funds \$3,022,906 53 Proceeds of lands \$4,166,601 64  7,189,508 17
Total 9,707,893 76
The number of requisitions registered, journalized, posted, and indexed was 4,914, namely: War, 1,333 debit and 577 credit; Interior, 2,705 debit and 299 credit. One hundred and eighty-two miscellaneous settlements were made, involving \$849,612.88; 1,289 certificates of deposit were listed; 621 repay or deposit requisitions were prepared for the War and Interior Departments; 55 appropriation warrants were recorded and
posted; 61 official bonds of disbursing officers were registered and 342 certificates of non-indebtedness were issued, chiefly to officers having claims against the United States. The following settlements, confirmed by the Second Comptroller, were registered, journalized, and posted:  Disbursing accounts: War. 224: Indian. 333
posted; 61 official bonds of disbursing officers were registered and 342 certificates of non-indebtedness were issued, chiefly to officers having claims against the United States. Total	· · · · · · · · · · · · · · · · · ·	9,593,555	39

The accounts of five paymasters, of whom two were volunteers (additional paymasters), have been finally adjusted and the balance found due the United States, \$10,271.20, collected and covered into the Treasury.

The record of deposits by enlisted men (act May 15, 1872), shows that 9,521 deposits, amounting to \$559,841.90, were made with paymasters whose accounts were audited during the year, and that there were 5,611 withdrawals, amounting to \$314,598.14.

The longevity records of 103 officers have been revised in order to determine and fix their pay status under the acts of June 13, 1878, and February 24, 1881. The adjustment of this class of cases would be much simplified by the passage of an act declaratory of the intent and meaning of existing laws. Doubtful construction of these laws has already caused litigation, which is still pending.

#### MISCELLANEOUS DIVISION.

Unsettled accounts on hand July 1, 1880	446 1,732
Total'	2,178
Remaining on hand June 30, 1881	<u> </u>

The amount of disbursements allowed in the settlement of accounts was \$3.883.560.04, chargeable to the following appropriations:

was \$5,000,500.0±, chargeable to the following appropriation	.113 •
Ordnance, ordnance stores and supplies, ordnance service, armament of fortifications, arming and equipping the militia, repairs of arse-	
nals, &c	\$1,450,372 25
Medical and hospital department, artificial limbs, Medical and Surgical	. , ,
History and statistics, Army Medical Museum and library, &c	528,814 $50$
Recruiting service (regular and volunteer)	173,557 20
Contingencies of the Army, expenses of military convicts, secret service, publication of Official Records of the War of the Rebellion, contingencies of the Adjutant-General's Department, special acts of relief, Artillery school at Fort Monroe, expenses of the Commanding General's	, ,
office, &c	102,228.88
Support of National Home for Disabled Volunteer Soldiers	1,623 587 21
Total	3, 883, 560 04

The compilation of a complete record of payments to officers, both regular and volunteer, is progressing as rapidly as circumstances will allow. The work is of sufficient importance to demand an early completion, but as it is not current work, strictly speaking, it has been made to give way whenever the services of the clerks engaged upon it were required for more pressing business. The record, when finished, will give the amounts paid to every commissioned officer who has served in the armies of the United States at any time since January 1, 1841, the periods for which payments were made, and references by numbers to the vouchers and settlements in which the evidence of payment can be found; so that the actual document upon which payment was made to any officer, for any given period within the last forty years, can be produced at a few minutes notice. The record commences in 1812, but prior to 1841 the mere fact of payment was entered. The payments to volunteer officers of the late war will fill forty five large volumes of 450 pages each, thirtyfive of which are completed, or nearly so. The entire record from 1812 to 1881 will fill one hundred and fifty volumes of various sizes. A comprehensive index to the volunteer record is in course of preparation. Last year 100,759 vouchers were examined for dates, &c., of payments, twenty cases of double payments being brought to light and reported.

#### INDIAN DIVISION.

The work of this division has been pushed forward so diligently that there were fewer disbursing accounts unsettled on June 30 than at any time during the last twenty five years. It is very important that the property accounts of Indian agents, which constitute nearly eighty per cent. of the four hundred and fifteen accounts on hand, be brought up to date with as little delay as possible, in order that agents may be held to a prompt accountability for Indian goods and supplies, as well as public property, intrusted to them for issue or use; but with the small number of clerks available only slow progress can be made. The labor of examining property accounts has at least quadrupled within the last few years, in consequence of the additional evidence, in the shape of vouchers and returns, that agents are now required to furnish in support of Although there are so many property accounts unsettheir accounts. tled, it is gratifying to be able to report a continuous reduction in the number on hand, as evidenced by the following figures:

On hand June 30, 1876, 1,004; June 30, 1877, 822; June 30, 1878, 482; June 30, 1879, 352; June 30, 1880, 349; June 30, 1881, 331.

The general business of the division is briefly shown by the following tabular statement:

	Cash accounts.	Property accounts.	Claims.
On hand July 1, 1880	343 847	349 354	148 3, 052
Total	1, 190 1, 166	703 372	3, 200 2, 970 170-
On hand June 30, 1881		331	, 60

#### The disbursements were as follows:

Expended by Indian agents and allowed on settlement of their accounts. \$2,775,166 80 Paid by the Treasury Department in liquidation of 2,970 claims of contractors and others..... . 4,087,805 51 6,862,972 31.

Fifty-nine transcripts of accounts have been forwarded to the Second Comptroller in order that suits may be entered against agents and their sureties to recover balances declared to be due the United States, amounting to \$580,726.08; but it is only just to say that in none of the cases thus reported for suit is there any actual default, in the ordinary acceptation of the term. The balances consist mainly of sums that the accounting officers have been compelled to disallow under existing laws and regulations, although the moneys may have been expended in good faith for the benefit of the Indians or of the United States.

The claims returned to the Indian Office, as above reported, were forwarded to this office in the early part of 1879, indorsed by the Commissioner of Indian Affairs "Not approved." In some instances the lack of authority on the part of agents to incur the expense was assigned as the reason for non-approval. In others, no reason was given, nor was any apparent. All the claims were chargeable to appropriations that had been exhausted. Although the approval of the Commissioner is not a legal prerequisite to the auditing of claims, it was deemed proper to return those that bore the stamp of his disapproval, inasmuch as he, being the administrative officer to whose bureau the claims pertained, should have better facilities than the accounting officers for determining whether or not the services were rendered as stated, and whether

the claims were correct and just.

In this connection I would invite special attention to a class of claims in regard to which inquiries and complaints are constantly made. claims in question are for services rendered and supplies furnished for the Indian service during the fiscal year 1873, and subsequent years, and will probably amount to \$500,000. The liabilities were contracted in disregard of the act of 1870, which prohibits any department of the government from exceeding its appropriations (section 3679 Revised Stat-The Second Auditor, as the records of the office show, persistently declined to entertain any claim of the class referred to until 1878, in which year Congress made it the duty of the accounting officers of the Treasury Department to continue to receive, examine, and consider the justice and validity of all claims under appropriations the balances of which have been exhausted or carried to the surplus fund, that may be brought before them within a period of five years. (Sec. 4, act June 14, 1878.)

The act of 1878, above alluded to, does not suspend or repeal the prohibitory law of 1870, and it may be questioned whether it confers upon the accounting officers any authority that they did not already possess; but, in the belief that Congress intended to open the way to a settlement of outstanding deficiency claims, the Auditor decided to examine and report to the Second Comptroller, for certification, all such claims as accrued while there was any balance in the Treasury to the credit of the appropriation from which they were payable, no matter whether the appropriation had been subsequently exhausted or not.

Accordingly 168 deficiency claims have been reported to the Second Comptroller, who has certified 25, retained 100, and returned 23 not certified on the ground that there are no funds applicable to their payment. In view of these facts it is suggested that section 4 of the act of June 14, 1878, should be so amended as to require the Commissioner of Indian Affairs to transmit all accounts and vouchers connected with the outstanding indebtedness of the Indian service to the proper accounting officers of the Treasury Department, who shall be authorized and directed to examine and adjust said accounts, and report the same to Congress in the manner prescribed by law.

#### PAY AND BOUNTY DIVISION.

The subjoined tabular statements show the work performed in the two branches of this division:

#### Examining branch.

	Jùly 1,	the	not ad.	Clair	ms dispo	sed of.	e 30,
Class of claims.	Claims pending Ju 1880.	Received during year.	Claims revived or not previously reported.	Sent to settling branch.	Disallowed.	Referred to other divisions and to Third and Fourth Auditors.	Claims pending June 30, 1881.

Arrears of pay, original bounty, and bounty under act of April 22, 1872	1, 124 308	1, 489 158 107 51	1, 741 313 107 51	20 55	852 98	\$186, 627 29 85, 649 08 4, 336 24 803 37
Colored soldiers.				İ		- 1
Arrears of pay and all bounties	1, 425	693	1, 988	13	117	184, 509 75
Total	2, 857	2, 498	4, 200	88	1, 067	461, 925 73

The number of claims on hand June 30, 1880, was stated in last year's report to be 29,470. The actual number was 29,650, namely, 26,793 in the examining branch and 2,857 in the settling branch. The discrepancy arose from the omission to count 180 old claims which are now classed under the heads of "claims prior to April, 1861," and "claims of laundresses," &c.

With regard to the receipt of 570 claims for additional bounty, although the time for filing such claims expired on June 30, 1880, it should be explained that some of these are old claims revived and reopened, the claimants being justly entitled to bounty that was withheld on the settlement of their claims by the Pay Department; others were filed within

the limit allowed by law, but being included in applications for arrears of pay, with which they were classed and reported, it required a formal examination to develop the fact that the same claim embraced both

arrears of pay and additional bounty.

In addition to the 26,935 classified claims on hand June 30, 1881, there are 5,812 cases in which settlements have already been made, but the claimants, in the hope that something additional may be due them, have presented new applications. These drag-net claims have to be received, recorded, and examined at an expenditure of time and clerical labor that should be devoted to more important matters. I am of opinion that in all cases where claims against the United States have been settled by the accounting officers, and the claimants, by accepting the amount awarded without demur, have tacitly acquiesced in the settlement, all further demands upon the government should be absolutely barred.

During the past year the sum of \$2,145.58 was paid to the Soldiers' Home under section 4818 Revised Statutes, which provides that all moneys due the estates of deceased soldiers, remaining unclaimed for three years subsequent to the death of the soldiers, shall be appropriated for the support of said Home. If this law could have been strictly complied with, the Home would now be in possession of the unclaimed pay due all soldiers who died prior to June 30, 1878, but payments on this account are largely in arrear. They were entirely suspended for several years in consequence of the pressure of other business, and only two settlements have been made since July 1, 1879, the clerks engaged on that work being required to aid in the examination of claims of soldiers who served in the Mexican War for three months' extra pay under the act of February 17, 1879.

#### DIVISION FOR THE INVESTIGATION OF FRAUD.

This division is charged with the examination and investigation of such claims on account of military services as involve apparent, alleged, or suspected fraud; criminal personation of soldiers or their heirs; difficult identification; unlawful withholding of moneys from claimants by their agents or attorneys; contested heirship, &c.; also such cases of overpayments and double payments as it is deemed advisable to present to the Department of Justice for suit, after failure to collect the money by other means.

On July 1, 1880, 8,390 cases remained on hand; 608 new cases were received during the year, making a total of 8,998 before the division. Of these, 5,903 were examined and partially investigated; 1,175 were finally disposed of, and 7,823 remain for further consideration, namely:

Settled claims: white soldiers, 1,068	29; colored soldiers, 1,795 8; colored soldiers, 3,648	4,716
Total		7,823
The sum of \$24,014.28 has	been recovered by suit and othe	rwise, as

The sum of \$24,014.28 has been recovered by suit and otherwise, as follows:

Recovered by suit, &c., and deposited in the Treasury	\$5,318	91
Judgments recovered, but not yet satisfied	2,022	10
Pay and bounty due colored soldiers who have died since the settlement of		
their claims, or who have failed to demand their money for seven years after		
settlement, returned to the Treasury by the paymaster charged with the		
duty of making payments to colored soldiers and their heirs	15,904	21
Secured to claimants from persons unlawfully withholding moneys belong-	,	
ing to soldiers.	. 769	06

By reference to the Second Auditor's reports for 1875, 1877, 1878, 1879, and 1880, it will be seen that special attention has been repeatedly invited to the cases of colored soldiers who claim to have been defrauded of their arrears of pay and bounty by the agents of the late Freedmen's Those people who have not received their money are still clamorous for a resettlement of their claims, but under the joint resolution of Congress approved March 29, 1867, (15 Statutes, 26), directing payment to be made to the Commissioner of said bureau, and charging him with the faithful disbursement of the funds, the accounting officers of the Treasury Department hold that they are functus officio, and that no claim can be resettled and paid without specific authority from Congress, accompanied by the requisite appropriation. The necessity of some action on the part of Congress, looking to an adjustment of these claims, is still urgent, and I respectfully suggest that a bill be prepared authorizing the proper accounting officers to reopen and resettle the claims of such colored soldiers as may present conclusive evidence that they have not received, in whole or in part, the pay and bounty to which they are entitled by law, the amounts found due such soldiers to be paid from any money in the Treasury not otherwise appropriated.

In this connection, and in simple justice to the late Commissioner of the Freedmen's Bureau, it is proper to recall the fact that certain charges against him, growing out of the irregularities above referred to, have been investigated by a military court and tried before a civil court. The special court of inquiry, convened by authority of a resolution of Congress approved February 13, 1874, not only exonerated General Oliver O. Howard from all blame, but also found that he did his whole duty, and expressed the belief that he deserved well of his country. The Supreme Court of the District of Columbia, before which suits were brought at the instance of this office to recover \$153,173.57, rendered judgments in

his favor on March 11 and 12, 1878.

### PROPERTY DIVISION.

Property returns (clothing, camp and garrison equipage) on hand July 1, 1880.  Received during the year	7,561 3,649
Total	11.210
Settled during the year	4, 969
On hand unexamined July 1, 1881	6, 241

The sum of \$12,657.35 has been charged to officers for property lost and otherwise not accounted for; \$1,948.75 has been collected, and 328 certificates of non-indebtedness have been issued to officers out of service.

#### DIVISION OF INQUIRIES AND REPLIES.

The greater portion of the demands upon this division originated in the Pension Office and were received either directly from the Commissioner of Pensions or indirectly through the Adjutant-General of the Army in cases where the records of the War Department did not furnish the desired information.

On July 1, 1880, there were 4,772 inquiries unanswered, namely: From the Adjutant-General, 4,166; Quartermaster-General, 23; Commissary-General, 231; Chief of Ordnance, 1; Commissioner of Pensions, 278; Third Auditor, 70; Fourth Auditor, 3. Since that date 8,640 inquiries have been received and 9,442 replied to, leaving 3,970 to be answered—802 less than on June 30, 1880. In addition and incidental to the answering of inquiries 5,200 letters have been written asking for information;

2,419 signatures have been compared, and 3,146 pages of foolscap have been used in copying 3,385 documents, to wit: 466 rolls and vouchers for the Adjutant General; 146 letters; 1,510 affidavits; 957 final statements; 70 certificates of disability; 51 general and special orders; 16 furloughs, and 169 miscellaneous papers.

Overpayments and double payments amounting to \$11,428.17 have been discovered, and the sum of \$3,137.37 has been collected, of which \$2,338 was deducted by the Third Auditor from amounts certified to be due the payees for horses lost in the military service, and for commu-

tation of rations while prisoners of war.

#### DIVISION OF CORRESPONDENCE AND RECORDS.

Letters received, 26,452; written, 25,277; referred to other offices, having been addressed to the Second Auditor in error, 1,408; recorded and indexed, 1,802; dead letters received and registered, 792; claims received, briefed, and registered, 18,175; miscellaneous vouchers received, stamped, and distributed, 60,934; letters containing additional evidence to perfect suspended claims briefed and registered, 16,786; pay and bounty certificates examined, registered, and mailed, 4,937; pay and bounty certificates examined, registered, and sent to the Pay Department, 5,317; reports calling for requisitions sent to the Secretary of War, 371; miscellaneous cases disposed of, 3,157.

#### ARCHIVES' DIVISION.

Paymasters' accounts received from the Pay Department to be audited Confirmed settlements received from the Second Comptroller, entered, indexed,	574
aud placed in permanent files: Paymasters'; 129; Indian, 2,313; miscella-	0.400
neous, 1,027	
Miscellaneous accounts withdrawn for reference and returned to files	1,372
Vouchers withdrawn from files for reference in the settlement of accounts and	
claims	13,548
Vouchers withdrawn for repairs	
Vouchers returned to files	22,051
Vouchers briefed	94,901
Mutilated and worn vouchers repaired and returned to files	26,557
Number of pages copied	2,253

A fire-proof roof, for which an appropriation of \$25,178.14 was made by the act of June 16, 1880, on the earnest recommendation of this office, has been placed on Winder's Building under the direction of the War Department. In preparing the building for the new roof, considerable space, which can be utilized whenever necessary, was added to the rooms

of the upper story by increasing their height.

The building on the corner of New York avenue and Seventeenth street, known as the McKean building and occupied by the Property Division of this office since 1864, has been relinquished, and in lieu thereof the fourth and fifth stories of the new fire-proof building on Seventeenth street adjoining this office have been secured and fitted up with shelving and file-holders. Twenty thousand bundles of accounts, containing several million vouchers, have already been placed in the new rooms; 14,000 of the bundles, consisting of settled property returns (clothing, camp and garrison equipage), were removed from the McKean building, which is not fire-proof, and the remaining 6,000 bundles, consisting of old paymasters', Indian, and miscellaneous settlements, were taken from the corridors of Winder's Building which they had encumbered for many years.

Experience having demonstrated that bundles of muster rolls and vouchers, unprotected by file-cases of some kind, cannot be handled

without wear and tear, no matter how much care is exercised, an appropriation of \$10,000 was obtained last year for the purchase of shelving and file-holders, and those accounts to which reference is most frequently made are being properly protected. All the unbound records of the office should be placed in durable file-holders at as early a date as practicable, not only to preserve them from dust and injury, but to render them easier of access by dispensing with the cord and leather straps with which they are now imperfectly secured.

#### RECAPITULATION.

Number of accounts and claims of all kinds on hand July 1, 1880, as report.  To which add old claims not heretofore reported	38, 447
Total	57, 544
Number of accounts and claims on hand June 30, 1881	
Amount drawn out of the Treasury in payment of claims and in advances to disbursing officers	\$23, 940, 486 15 874, 133 25
Net amount paid out	23, 066, 352 90
Total number of letters written  Average number of clerks employed	136, 319

The detailed report of the Paymasters' and Miscellaneous Divisions show that the number of accounts settled last year was 322 less than in 1880, and that there are 250 unsettled accounts on hand in excess of last year's balance. This is accounted for by the fact that several clerks belonging to these divisions have been detached for temporary duty in other bureaus of the department, sixteen clerks being at one time absent from the office. It should also be stated, in regard to the Paymasters' Division, that the examination of accounts is much more rigid and exhaustive than at any former period. The liberality and latitude that were permissible in the adjustment of Army paymasters' accounts rendered during the haste and turmoil of a great war is no longer allowed, but those officers are now held to a strict observance of law and regulation.

#### CLAIMS FOR ARREARS OF PAY AND BOUNTY.

On referring to the reports of this office for the last eleven years, it will be found that the number of claims for arrears of pay and bounty rejected and disallowed is more than double the number allowed and paid. The figures are as follows:

· · · · · · · · · · · · · · · · · · ·	1
Claims allowed and noid 1971 to 1991 inclusive	00 466
Claims allowed and paid, 1871 to 1881, inclusive	
Claims disallowed and rejected during same period	. 100 100
Ciaims disanowed and rejected during same period	

The amount paid out was \$10,287,989.05. The amount of the rejected claims is not given, but, in the absence of evidence to the contrary, it is fair to assume that claims disallowed averaged about the same as those allowed, namely: \$127.83, or \$20,891,512.56 in the aggregate. A large proportion of the discarded claims are cases in which the claimants had been paid in full, but, after the lapse of a few years, had filed new claims, with affidavits that they had never been paid and had never made any previous application. The investigation of some of these cases has developed very remarkable instances of forgetfulness. These

facts and figures would seem to indicate with sufficient significance that the time has now arrived when all claims for pay and bounty on account of service during the war of the rebellion, and prior thereto, may, with out injustice, be barred by a statute of limitation. A precedent for this course will be found in the act of February 12, 1793, which required that all claims upon the United States for services, &c., prior to March 4,1789, should be presented before May 1, 1794, or be forever barred and precluded from settlement or allowance. (1 Statutes, 301.) The necessity of a statute of limitation was so forcibly and clearly presented by Hon. E. W. Keightley, Third Auditor, in his annual report for 1879, that I cannot refrain from quoting and indorsing his remarks, which are as follows:

I respectfully renew the suggestion often made by my predecessors as to the necessity of some limitation to the time within which claims against the United States may be presented to the executive departments. In the absence of such a check the danger of frauds upon the government increases with every passing year. * * * As the danger of detection grows less, through the lapse of time, the temptation to present and the facilities for establishing fraudulent claims increase. Statutes of limitation are no longer looked upon with disfavor by courts or legislative bodies, and provisions of this kind respecting suits between individuals are, I believe, nearly universal. That which is everywhere conceded to be wise and just as between citizens of a State can but be considered fair and just as between the citizens and the State. Few claims that are fair and honest fail of presentation within six years from their origin, and the claimant who waits longer, if laboring under no legal disability, should be barred, in my opinion. One thing is certain, no one can be familiar with the business of this office for any period, however brief, without being thoroughly convinced that such a limitation would be of great value as a protection to the public Treasury, would remove a great temptation from the viciously inclined, and would give much needed relief to the executive departments.

#### OVERPAYMENTS.

During the last fifteen years a very large number of officers and men of the late volunteer forces have been charged with overpayments and double payments, ranging from forty cents to several hundred dollars. In the comparatively few instances where the payees have been found, attempts have been made to collect the amounts due the United States, recourse to law being had through the Department of Justice, when deemed advisable; but only a small proportion of the overpayments has been or ever will be recovered. The law of 1828 which prohibits payments to persons in arrears to the United States not being applicable to pensioners (sections 1766 and 4733, Revised Statutes), many persons are how in the receipt of liberal pensions who are indebted to the United States on the books of this office. There does not seem to be any valid reason for this discrimination.

In view of all the circumstances connected with overpayments, it has become a question whether the government would not really lose less by ignoring overpayments made during the war of the rebellion than by attempting to collect them; but, in the absence of legal authority to ignore them, it is the custom of this office to take action on all cases brought to its knowledge in which the Treasury has suffered by erroneous payments. I would suggest, however, that as, in my opinion, thetime has arrived when all claims against the United States, growing out of the late war, should be barred by a statute of limitation, so, also, should claims by the United States against individuals be barred, with the exception, perhaps, of cases of double payment. It would doubtless be a measure of economy if Congress were to authorize the Second Auditor and Second Comptroller to make no further charges on account of overpayments prior to March 16, 1868, in cases where it is evident that payees did not knowingly and willfully obtain more than their just dues. This would cover all ordinary cases of overpayments,

but, on the principle that no man should be permitted to take advantage of his own wrong, would except those cases in which officers drew their pay twice, or oftener, for the same period, or were otherwise overpaid on their own certificates. It should be mentioned that the paymasters who made the erroneous payments which have since been charged to the payees have been relieved of all responsibility by the act of March 16, 1868.

#### BONDS OF DISBURSING OFFICERS.

Numerous applications are made to this office for the surrender of the official bonds of disbursing officers whose accounts have been balanced and closed. These bonds are filed in the office of the Second Comptroller, who has no authority to relinquish them. "No provision having been made by law for canceling or discharging official bonds to the government, the uniform practice has been for the government to retain the custody of the bonds, although the office of the principal may have expired and his accounts may have been satisfactorily settled." 138, Comptroller's Digest, 1869.) Practically, therefore, the sureties of a public disbursing officer are never released, and a law seems to be needed making it obligatory upon the accounting officers to prepare and transmit to the Department of Justice, within a reasonable time, transcripts of the accounts of delinquent disbursing officers and all other persons who are in arrears to the United States; suit to be entered within ten years after the officer or other person became in arrears; otherwise, the United States to be estopped as regards the sureties—the principals, however, to be held.

#### CLERICAL FORCE.

The clerks of this office are entitled to commendation for diligence and efficiency. A change in the classification of the higher grade clerkships is desirable, in order that faithful and competent men may be more adequately remunerated, and has been made the subject of a special communication accompanying the annual estimates, to which your favorable attention is respectfully invited.

Very respectfully,

O. FERRISS, Auditor.

The Hon. SECRETARY OF THE TREASURY.

# REPORT OF THE THIRD AUDITOR.

# REPORT

OF

# THE THIRD AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, Washington, D. C., October 13, 1881.

SIR: I have the honor to transmit herewith report of the operations of this office, for the fiscal year ended June 30, 1881. The following statement shows, in tabular form, the number and amount of accounts and claims remaining on hand unsettled at the close of the last fiscal year, the number received and audited, and the number and amount of accounts and claims remaining unsettled June 30, 1881, viz:

		1				•

#### THE QUARTERMASTERS' DIVISION.

The accounts of quartermasters cover a wide range of money and property responsibility. The former embraces disbursements for barracks and quarters, hospitals, storehouses, offices, stables, and transportation of Army supplies, the purchase of Army clothing, camp and garrison equipage, cavalry and artillery horses, fuel, forage, straw, material for bedding, and stationery; payments of hired men and of "per diem" to extra duty men; expenses incurred in the pursuit and apprehension of deserters; for the burial of officers and soldiers, for hired escorts, expresses, interpreters, spies, and guides; for veterinary surgeons and medicines for horses, for supplying posts with water, and for all other proper and authorized outlays connected with the movements and operations of the Army not expressly assigned to any other depart-Property purchased with the funds of the Quartermaster's Department is accounted for upon "returns" transmitted through the Quartermaster-General to this office (with the exception of "returns of clothing, camp and garrison equipage," which come under the supervision of the Second Auditor), showing that the disposition made of it is in accordance with law and Army regulations.

#### SUBSISTENCE DIVISION.

The subsistence division examines the accounts of all commissaries and acting commissaries in the Army, whose duties are to purchase the provisions and stores necessary for its subsistence, and see to their proper These commissaries render monthly money accounts, with proper vouchers for disbursements of the funds intrusted to them, together with a provision-return, showing the disposition of provisions and stores purchased or derived from other sources. These accounts are received through the Commissary-General of Subsistence, and are examined and audited in this division. The money accounts and vouchers, together with a certified statement of the result of said examinations, are then referred to the Second Comptroller of the Treasury for revision. Upon their return from the Comptroller, with the settlement approved, the officers are notified of the result, and called upon to adjust or explain any omissions or errors that may have been discovered. The money and provision accounts, together with the papers belonging thereto, are then placed in the settled files for future reference, and remain permanently in the custody of this office. The engineer branch is engaged in the examination of the accounts of officers and agents of the Engineer Department, who, under the direction of the Chief of Engineers of the Army (except the Superintendent of the Military Academy at West Point, whose disbursements are directed by the Inspector-General), disburse moneys out of the various appropriations, now 248 in number, made from time to time by Congress for works of a public nature, which may be classed under

the following heads, viz: The purchase of sites and materials for, and construction and repairs of the various fortifications throughout the United States; construction and repairs of roads, bridges, bridge trains, &c., for armies in the field; surveys on the Atlantic and Pacific coasts; examination and surveys of the northern and western lakes and rivers; construction and repairs of breakwaters; repairs and improvement of harbors, both on sea and lake coasts; improvement of rivers and purchase of snag and dredge boats for the same; and the expenses of the Military Academy at West Point.

The transactions of the subsistence and engineer branches for the fis-

cal year are shown by the following statement, viz:

The current work of this divisien has steadily increased during the fiscal year and additional clerical force is required to keep it up. Work has been continued in abstracting the names of soldiers of the war of 1812, for the purpose of arrangement in alphabetical registers, with all the clerical force available. During the year, one hundred and sixty-three thousand two hundred and thirty-two payments have been abstracted, making a total, up to the end of the present fiscal year, of five hundred and nine thousand six hundred and sixty-four payments. In order to complete these registers within a period of time that will be available to the old soldiers and their widows, whose applications for pension are now pending in the office of the Commissioner of Pensions, but whose service cannot be traced for lack of data to base a search upon, and for historical purposes, an increase in the clerical force in this division is necessary.

In many cases (of widows especially, who know the fact by tradition that their former husbands served in the war of 1812) the claimants do not know the names of the officers under whom they (or their husbands) served. Until these alphabetical registers are completed, this office is unable to trace the service of any soldier without the name of the captain or colonel under whom the soldier served. When these registers shall be completed, a knowledge of the name of the soldier will be a sufficient clue to trace his military service. After the abstract slips shall have been entered upon registers, they may be sent to the respective States from which the soldiers enlisted, to become a part of the records of the State, and I recommend proper action looking to a distribution of these slips among the several States to which the service pertains.

#### ARMY PENSION DIVISION.

The duties of this division embrace the settlement of all accounts which pertain to the payment of army pensions throughout the United States. An account is kept with each pension agent, charging him with

Army pensions 1878 and prior years:

Amount appropriated, acts January 29 and March 3, 1879.

Amount disbursed by pension agents, 1879, "Army Amount disbursed by pension agents, 1880, "Army Amount disbursed by pension agents, 1881, "Army

Amount appropriated, act May 31, 1880.

my nensions 1879 :

all moneys advanced for payment to pensioners, under the proper bond and fiscal year. At the end of each month the agent forwards his vouchers, abstracts, and money statement direct to this office, where a preliminary examination is made to see if the money advanced is properly accounted for. The receipt of the account is then acknowledged, and the account filed for audit. Each voucher is subsequently examined, and the payment entered on the roll-book opposite the pensioner's name. The agent's account, when audited, is reported to the Second Comptroller for his revision, and a copy of the statement of errors, if any, sent to the agent for his information and explanation. The account when revised, is returned by the Second Comptroller to this office and placed in the settled files, where it permanently remains. The following tables show the operations of this division during the fiscal year:

Balance on hand June 30, 1881	253	37, 808, 670 52				

The consolidation of agencies and the passage of various acts granting increase of pension, including arrears, have caused the accumulation of work now on hand, and if the work increases in future as it has in the past, the present force will be insufficient. A large amount of matter, such as verification of records before payment, requires immediate attention. Thirty-seven clerks and two copyists have been employed during the past year.

The records of this office have been augmented during the year by the addition of new settlements as follows: Money accounts of disbursing officers of the Army, 1,603; accounts of pension agents, 140; miscellaneous claims, 3,457, and property returns of Army officers, 3,648; making a total for the year of 8,848. The papers are in a good state of preservation, with the exception of some of the abstracts of pension accounts, which, being unbound, have been injured by long use. Within the last few months the new apartment assigned to this office has been occupied, and in it all the money settlements made since February, 1878, are filed. Meanwhile, in the other rooms several thousand old settlements have been rearranged and placed as far as possible in consecutive order. These file-rooms are now entirely filled.

There were nine lady copyists employed in this office during the year. The number of pages copied and compared was as follows: Miscellaneous papers, 18,995 pages; difference sheets, 1,443 pages; letters, 5,575 pages; total, 26,013. The papers received for copying and registered.

were: Miscellaneous, 2,220; difference sheets, 539; total, 2,759.

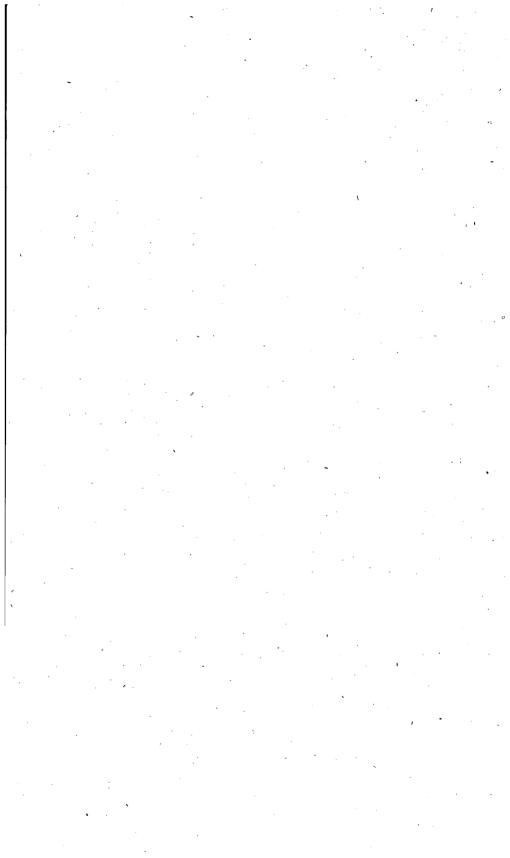

The necessity for a statute of limitations fixing the time within which claims against the United States may be presented to the Executive Departments, becomes more and more apparent every year. In many cases it is now practically impossible to determine the merits of claims growing out of the operations of the Army during the late rebellion, or in other wars of still earlier date. Most of the old claims pressed upon this office are of this class. Through the lapse of time the ascertainment of the truth grows difficult, but the temptation to present fraudulent claims is increased. The fair and honest claims that up to this date have failed of presentation must be so few in number as to be unworthy of consideration against the adoption of so wise a check upon the prosecution of fraudulent claims. By section 297 of the Revised Statutes the several auditors "are empowered to administer oaths to witnesses in any case in which they may deem it necessary;" but, without the power to compel the attendance of witnesses or the production of papers, and without any funds for the special investigation of claims, this section is practically a dead letter. At present the only provision of that character is in section 3488 of the Revised Statutes. It is limited to a class of claims now almost, if not quite, extinct. In the examination of all other claims, if the accounting officers desire to look beyond the case the claimant chooses to present, they are entirely dependent upon voluntary assistance from the officers and agents of other departments. Every special investigation must be limited to such as can be made without expense by aid of the files, records, and accounts. Hampered by these conditions, it is self-evident that such investigations must often be attended with great delay, and more often be found unsatisfactory in results. The accounting officers are required to act as judges between the government and its creditors, without those powers which have been always found most necessary for the safe, speedy, and efficient administration of justice. Dishonest claimants can look upon this situation with satisfaction and 'content; but the best interests of the government and of its honest creditors alike"demand that these defects should be remedied by appropriate legislation.

Very respectfully submitted,

E. W. KEIGHTLEY, Third Auditor.

Hon. WILLIAM WINDOM,
Secretary of the Treasury.

# REPORT OF THE FOURTH AUDITOR.

# REPORT

OF

# THE FOURTH AUDITOR OF THE TREASURY.

# TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, Washington, November 5, 1881.

SIR: I have the honor to submit the following detailed report of the operations of this bureau for the fiscal year ending June 30, 1881, and of the expenditures of moneys appropriated for the support of the Navy for the same period:

# APPROPRIATIONS AND EXPENDITURES.

Title of appropriation.	Year.	Amount appro- priated.	Amount ex- pended by warrants.
Pay of the Navy		\$6, 965, 075 62	\$6, 614, 820 09
Pay, miscellaneous	1881	475,000 00	275, 578 52
Pay, miscellaneous	1881	111, 664 00	. 111,061 11
Pay of Marine Corps		741, 025 89	585, 610 64
Provisions, Marine Corps	1881	67, 780 50	47, 047 91
Clothing, Marine Corps	1881	69, 579 50	65,000 00
Fuel, Marine Corps	1881	18,496 50	12,507 50
Military stores, Marine Corps	1881	11, 286 50	11, 286 50
Transportation and recruiting, Marine Corps	1881	7,000 00	7,000 00
Repairs of barracks, Marine Corps	1881	10,000 00	10,000 00
Forage for horses Marine Corns	1881	500 00	500 00
Marine barracks at Washington, Norfolk, and Annapolis Contingent, Marine Corps Destruction of clothing and bedding for sanitary reasons		22, 336 69	21, 187 09
Contingent, Marine Corps	1881	20,000 00	20,000 00
Destruction of clothing and bedding for sanitary reasons		2, 919 41	959 66
Pay professors and others, Naval Academy	1881	54, 376 00	54, 100 00
Pay watchmen and others, Naval Academy	1881	24, 455 00	24, 455 00
Pay mechanics and others, Naval Academy	1881	. 16,835 95	16, 835 95
Pay steam employés, Naval Academy	1881	8, 577 50	8, 577 50
Repairs, Naval Academy	1881	21,000 00	21,000 00
Repairs, Naval Academy Heating and lighting, Naval Academy	1881	17,000 00	17,000 00
Library, Naval Academy	1881	2,000 00	2,000 00
Stationery, Naval Academy	1881	2,000 00	2,000 00

# TABLE OF PERMANENT AND MISCELLANEOUS APPROPRIATIONS AND RELIEF ACTS.

- Title of appropriation.	Amount appropriated.	Amount expended by warrants.
Completing torpedo-boat experiments United States steamer Alarm	15,000 00	\$15,000 00
Payment to T. C. Basshor & Co., for ship-knees. Relief of widows and orphans of officers, &c., of the Levant, act June 16, 1880. Naval stations and coaling depots Isthmus of Panama	22,692 00 240 00	12, 957 29
Relief of widows, &c., United States steamers Cumberland and Congress Relief of John H. W. Riley	216 00 300 00	216 00
Medals of honor  Search for steamer Jeannette of the Arctic exploring expedition  New propeller for United States steamer Alarm	175, 000 00 8, 383 03	6 00 166, 536 92 2, 600 00
Relief of Absalom Kirby Relief of John Scott Cunningham Relief Pay Director C. W. Abbot and Passed Ass't Paymaster W. W. Barry	2, 269 53 1, 284 19	2, 269 53 1, 284 19
Payment to Jenkins & Lee for marine governor  Payment to Dr. Emil Bessels  Transporting contributions for the relief of the suffering poor of Ireland	825 00 10, 233 70	2, 605 54 825 00 10, 233 70
Prize-money	l	1, 596 47 9, 916 48 42 75
Indemnity for lost clothing Gratuity to machinists in lieu of re-enlistment Extra pay to officers and men who served in the Mexican war Relief of persons impressed into the United States naval service	9,964 00	30, 000 00 9, 964 00 16, 309 80
Relief of sufferers by wreck of United States steamer Huron  Observation of solar eclipse.	318 00 1, 206 68	318 00 941 92
Ordnance materials, proceeds of sales Sales of small-arms Naval asylum, Philadelphia, 1881	59, 309 00	21, 801 21 19, 968 83 47, 427 78
Construction and repair, act June 14, 1878		72, 263 40 138, 617 76
Small stores	236 25	236 25

The amount appropriated for officers of the active list was \$3,913,600; for the retired list, \$661,400; total, \$4,575,000. The amount due and unpaid June 30, 1881, was \$116,636.22. Net amount paid to officers, \$4,458,363.78.

The amount appropriated for petty officers and men was \$2,390,000. The amount due and unpaid June 30, 1881, was \$615,643.80. Net amount paid petty officers and men, \$1,774,356.20. The whole amount due and unpaid to officers and men at the close of the fiscal year was \$732,280.02. This balance in hand at the close of the fiscal year, in amount

\$732,280.02, represents the sum earned during the year, and subject to draft, when officers are finally settled with, when men are paid off upon discharge, and when claims are presented for payment to this office by the heirs of deceased officers and men who died in the naval service.

The balances in hand under the remaining appropriations, as shown in the foregoing table, may be applied still to the payment of reservations on public bills and the liquidation of other unpaid liabilities which

were incurred during the fiscal year 1881.

The exigencies incident to the naval service require that disbursing officers doing duty upon vessels in distant waters and at stations in foreign lands shall anticipate their wants and draw money in advance

to meet expenses which must inevitably be incurred.

It is impossible to foresee what the precise nature of the future expenses may be, or under what heads of appropriation the various expenditures may be required. In order to overcome difficulties arising from this condition of things, Congress passed an act in 1878 authorizing the issue of requisitions for advances in any amount not exceeding the total appropriation for the Navy, under a "general account of advances." Under this head all moneys for disbursement upon shipboard or at foreign stations are drawn. Summary statements are rendered monthly, showing the bills paid, the sums expended, and the appropriations to which these sums should be charged, respectively. The appropriations are adjusted in this office upon the officers' returns.

This explanation will account for any differences which may be observed between the expenditures as shown in the table given above and as they appear in the following statement made up from the books of

this office:

#### EXCHANGE.

In the Auditor's last annual report some space was given to the subject of foreign exchange, and it was shown that quite heavy losses had been sustained by the government from this source. Efforts have been made during the past year to prevent as far as possible these losses; notwithstanding which, discount on bills sold amounts to \$27,799.38, while the premium amounts to only \$994.47, leaving a net loss to the department of \$26,804.91.

The following statement will show in detail the gains and losses upon bills sold at the different ports in which it became necessary to procure

money for disbursement:

	Amoun	t.	Amount		Amount 1 ceived.		Loss.	Gain.

This division is charged also with the preparation of all reports and tabular statements called for by Congress and the Secretary of the Treasury; keeping a record of appointments, resignations, removals and absences; the care and issuing of stationery used in the office, and the payment of salaries to employés.

# BOUNTY, ARREARS OF PAY, AND GENERAL CLAIMS.

STATEMENT of the WORK PERFORMED by the GENERAL CLAIMS DIVISION for the fiscal year ending June 30, 1881.

Date.	Reports on application for pension.	Reports on admission to Naval Asylum.	Letters received.	Letters written.	Claims received.	Claims adjusted.	, Amount involved.
1880. On hand June 30	88 105	1 1	718 737 446 394 372 425	649 620 544 427 464 504	266 171 105 75 71 81 72	169 120 94 144 87 158	\$15, 606 62 10, 039 55 5, 542 59 9, 206 43 9, 964 08 13, 648 12
January 1881. Pebruary March April May June	67	2 3 3 1 1 13	452 452 522 512 460 452 5, 942	538 541 550 597 599 542 6, 575	107 92 83 71 94 77 1, 365	88 103 83 80 84 79 1, 289	6, 765 74 6, 733 91 18, 871 22 23, 140 74 8, 874 75 6, 676 06

Of the above mentioned settled claims, 224 were for the three months' extra pay authorized by the act of February 19, 1879, for service in the war with Mexico, and amount to \$8,701.35, and 51 for the gratuity to machinists, granted by the act of June 16, 1880, amounting to \$27,540

in the aggregate.

This division is also charged with the duty of furnishing the Commissioner of Pensions a complete naval history of all persons who file in his office claims for pensions, or for bounty land on account of service performed by themselves or by certain relatives in the United States Navy. As a rule, the service extends over a period of from one to three years, and in some instances much longer. It requires therefore a considerable length of time to properly examine the records in each case. and it often occurs that a clerk is obliged to consume in the examination an entire day in order to obtain the information required in a single The result of this was, that at the commencement of the last fiscal year the letters from the Commissioner had accumulated to such an extent that it would have required between four and five months to dispose of the number then on hand. The settlement of the claims in the Pension Office was therefore necessarily delayed, and with the view of affording every facility in the adjustment of this meritorious class of claims, an additional force was employed in the examination of the records during a portion of the year, and it is very gratifying to be able to say that the work has been brought up to date, and that the inquiries from the Commissioner are now answered within a day or two after they reach the office.

# NAVY PENSION ACCOUNTS.

Number of accounts on hand June 30, 1881, 32; vouchers examined, 15,326.

The business of the bureau has been transacted with promptness and accuracy, and the chiefs of divisions, clerks, and other employés are deserving of high commendation for the faithfulness manifested in the discharge of their respective duties.

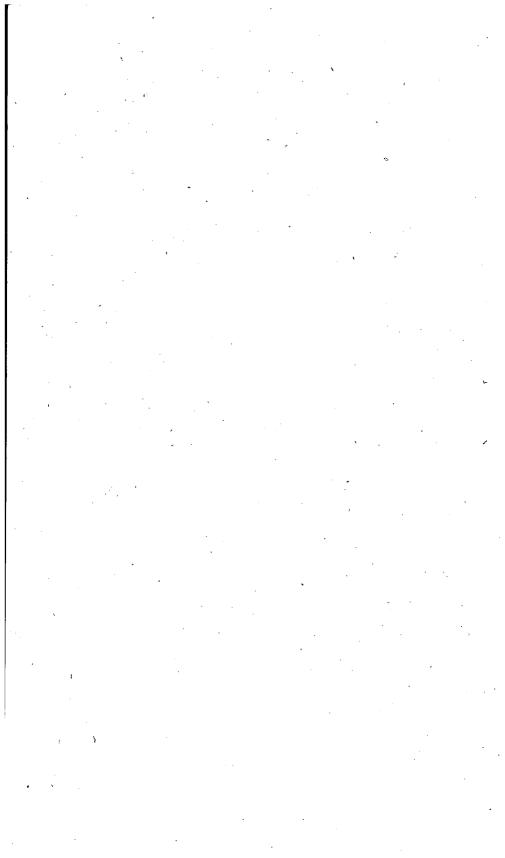

I have the honor to be, very respectfully, your obedient servant BENJ. P. DAVIS,

Acting Auditor.

Hon. WILLIAM WINDOM,

Secretary of the Treasury.

# REPORT OF THE FIFTH AUDITOR.

# REPORT

OF THE

# FIFTH AUDITOR OF THE TREASURY.

# TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, Washington, D. C., October 28, 1881.

SIR: I have the honor to submit herewith an exhibit of the business transacted in this office during the fiscal year ending June 30, 1881.

The accounts audited include the expenses and receipts of the foreign service, the internal revenue, disbursements by the disbursing officers of the Department of State, the Post-Office Department, and the Interior Department, besides numerous accounts under miscellaneous appropriations. These adjustments have required the examination of 192,098 vouchers, aggregating \$837,891,644.94; and the fact that less than thirty clerks have been employed attests their fidelity and industry.

# THE DIPLOMATIC SERVICE.

The accounts of ministers, set forth in the table marked Exhibit A,* show that \$324,550.74 were paid for salaries, \$53,196.59 for contingent expenses, and \$1,574.98 for loss by exchange, making a total of \$379,322.31. Official and passport fees were received to the amount of \$5,132.14, which deducted from the total expense shows the actual cost of this branch of the foreign service to have been \$374,190.17. It should be noted in this connection, however, as the table shows, that this does not include the accounts of the minister to Paraguay and Uruguay, nor have any accounts been received from the secretary of legation at Mexico.

# THE CONSULAR SERVICE.

The tabular statement of consular salaries, fees, and expenditures is not complete, as a glance at the accompanying table, marked Exhibit B,* will show. But all vouchers received by this office through the Department of State or otherwise have been adjusted and are included. The accounts audited may be recapitulated as follows:

Fees received for official services	,	30, 163	31	\$873, 229	67
Paid consular salaries  Loss by exchange on same  Fee emoluments.	\$386,079 50 2,275 52			<b>⊕010, 229</b>	07
Relief of seamen Loss by exchange on same Passage of seamen	337 33	42,510	67	:	
Contingent expenses of consulates			79		

• .	Rescuing shipwrecked American seamen \$3,355 46 Shipping and discharging seamen 4,384 42 Bringing home criminals 1,035 64 Rent of prison, American convicts in China 1,488 88 Rent of prison, American convicts in Japan 600 00 Wages of keepers, &c., American convicts in China 7,825 97 Wages of keepers, &c., American convicts in Japan 3,055 67	
,	Rent of prison, wages of keepers, &c., American convicts in Siam and Turkey	
	Siam       11,534 36         Salaries of marshals for consular courts       6,940 90         Expenses for interpreters, guards, &c., in Turkish dominions       3,000 00         \$847,986 00	0
	Excess of receipts over expenditures 25, 243 60	-
	It will be observed from the above that the consular service is no only self-sustaining, but contributes in a measure to the support of the diplomatic service.  Several other accounts pertaining to the foreign service have also been adjusted as follows, specific appropriations being made therefor	t e
	Salaries of the United States and Spanish claims commission, 1881 \$4,200 00	
	Contingent expenses of the United States and Spanish claims commission, 1881  Contingent expenses of the United States and Spanish claims commission,

Christopher Schmidt, citizen, estate	417	13
F. W. Clark, seaman, estate	.9	00
	<u> </u>	
Total	6.424	84

# INTERNAL REVENUE.

The table marked Exhibit C* shows the amount collected and deposited in each internal revenue district, and the salary and expenses of each collector, together with the amount paid storekeepers in each district. The total amount of cash deposited was \$127,866,755.16, exclusive of a deposit of \$7,397,468.21 derived from sales of adhesive stamps, and collected by stamp agents.

The following sums constituting the expenses of collecting were dis-

bursed, viz:

For salaries of collectors.  For salaries of deputy collectors, clerks, rent, fuel, and lights  For stationery, postage, expressage, and advertising  For compensation of storekeepers	16,58673 $1,423,78600$
For fees and expenses of gaugers	

To arrive at the actual expenses of collecting the internal revenue, the following expenditures must be considered as incident to the system, although not included in the collectors' accounts, viz:

	•
Cost of stamps, paper, and dies	\$443, 234 34
Salaries and expenses of internal-revenue agents	126, 486 81
Salaries and expenses of surveyors of distilleries	5,651 56
Salaries of the office of the Commissioner of Internal Revenue	253, 258 00
Incidental expenses of the Office of Internal Revenue, including	
sel fees and rewards	210, 029 10
Total	1,038,659 81

These expenses added to the collectors' accounts amount to \$5,137,883 51, the whole cost of collecting the internal revenue, or 4 per cent. on the amount collected. For the year ending June 30, 1880, \$116,877,753.77 were collected at a cost of \$4,463,558.95.

During the year there were paid for the manufacture of paper, printing, and imprinting of stamps, &c., the following sums:

To Bureau of Engraving and Printing	\$348,636	62
S. D. Warren & Co		
American Bank Note Company	20,762	12
John J. Crooke	3,731	69
The Graphic Company	50	00
Total	443,234	34

The accounts of the Commissioner of Internal Revenue for stamps, as set forth in the table marked Exhibit D,* may be recapitulated as follows:

Distilled spirit stamps	\$92,953,661 00
Special tax stamps	12,665,110 00
Beer stamps	14, 978, 051 42
Documentary and proprietary stamps	9, 150, 636 57
Stamps for tobacco, snuff, and cigars	51, 321, 612 92
Stamped foil wrappers	268, 680 40
Stamped paper labels for tobacco	4,760 00
	181, 342, 512 31

The table marked Exhibit E* gives a list of forty-two revenue agents, to whom were paid for salaries \$82,880.65, for expenses, \$41,619.08; to which should be added \$229.20 for stationey, and \$1,757.88 for transportation over Pacific railroads, making a total of \$126,486.81. To gaugers for fees, \$711,231.86; expenses, \$47,113.89; total \$758,345.75. To surveyors for salaries, \$1,020; expenses, \$4,631.56; total, \$5,651.56. For salaries in the office of Commissioner of Internal Revenue, \$253,258.

In the adjustment of accounts of three hundred and thirty one stamp agents, the amount involved was \$4,905,524.19, and of 602 claims for the redemption of stamps, amounting to \$24,957.93, there was discounted \$183.82, leaving an amount actually paid of \$24,774.11.

Accounts were adjusted for expenses incurred in the detection of fraud, for counting and issuing stamps, and for other purposes incident to the internal-revenue service, as follows:

Salary	\$124 076	30
Traveling expenses		
Expenses		
Telegrams		
Rent	5, 416	67
Stationery		
Expressage		96
Counsel fees and expenses	10,320	
Rewards	13,861	67
		<del></del>

By the last report the Secretary of the Treasury had on deposit to his credit, on account of "fines, penalties, and forfeitures," a balance of \$219,261.66. During the year deposits have been made to the amount of \$151,894.63, and disbursements made to the amount of \$308,247.74, leaving a balance to his credit January 1, 1881, of \$62,908.55. An account has also been rendered by him on account of "offers in compromise," from December 1, 1879, to December 31, 1880, showing an amount deposited to his credit of \$184,975.74, and disbursements amounting to \$146,102.07, leaving a balance on deposit to his credit January 1, 1881, of \$38,873.67.

The following sums were refunded: Taxes erroneously assessed and collected, \$34,559.07; drawbacks on merchandise exported, \$39,511.93; and moneys refunded under private acts of Congress, \$21,324.12.

The disbursements by George Waterhouse, chairman of the South Carolina Free School Fund Commissioners, amounted to \$3,937.50.

# DISBURSING CLERKS' ACCOUNTS.

Accounts rendered by Col. R. C. Morgan, disbursing clerk of the State Department, have been adjusted as follows:

Contingent expenses of	United States consulate	s, 1881	\$28,497 10
Contingent expenses of	United States consulate	s, 1880	12,514 44

·	
Contingent expenses of United States consulates, 1879	\$168 35
Contingent expenses of United States consulates, 1878	197 21
Contingent expenses of foreign missions, 1881	8,355 48
Contingent expenses of foreign missions, 1880.	1,560 61
Contingent expenses of foreign missions, 1879	1,740 50
Rescuing shipwrecked American seamen, 1881	2,752 46
Rescuing shipwrecked American seamen, 1880	387 00
Rescuing shipwrecked American seamen, 1879	54 00
Return of criminals, 1880	547 91
Relief and protection of American seamen, 1881	84 00
Relief and protection of American seamen, 1880	139 00
International exhibitions at Sidney and Melbourne, Australia (1879 and	200
1880)	114 71
1880)	4,207 74
International remonetization of silver, 1880	268 95
Berlin fishery exhibition (1880)	1,280.51
Publication of consular and other commercial reports, 1881	5,333 26
Monument marking the birthplace of George Washington	75 00
Stationery and furniture, 1881	3,463 61
Proof-reading and packing laws, 1881	1,710 80
Lithographing, 1881	1,200 00
Lithographing, 1880	108 70
Books and maps, 1881	2,823 04
Books and maps, 18c0	99 13
Editing, publishing, and distributing Revised and Annual Statutes, 1881	3, 153 84
3,1	, , ,

In order that the above exhibit might be complete in itself, it was necessary to include the following accounts, which have already been given in aggregating the expenses of the consular service:

Contingent expenses of consulates, 1881	\$28,497 10
Contingent expenses of missions, 1881	8,355 48
Rescuing shipwrecked American seamen, 1881	2,752 46
Relief and protection of American seamen, 1881	84 00

Other amounts above appertaining to the foreign service have not appeared in any former statement.

Accounts rendered by Mr. Richard Joseph, disbursing clerk of the Department of the Interior, were adjusted as follows:

Contingent expenses, office of Commissioner of Patents, 1881	\$15,518 75
Contingent expenses, office of Commissioner of Patents, 1880	384 85
Photolithographing, office of Commissioner of Patents, 1881	32,038 85
Photolithographing, office of Commissioner of Patents, 1880	1,215 15
Copies of drawings, office of Commissioner of Patents, 1881	16,871 80
Copies of drawings, office of Commissioner of Patents, 1880	5,636 47
Plates for Patent Office Official Gazette, 1881	14,768 71
Plates for Patent Office Official Gazette, 1880	3,910 20
Expenses for packing and distributing official documents, 1881	3,864 50
Expenses for packing and distributing official documents, 1880	282 60
Scientific Library, office of Commissioner of Patents, 1881	1,077 37
Scientific Library, office of Commissioner of Patents, 1880	1, 114, 66
Preservation of collections, Smithsonian Institute, 1881	34,426.38
Preservation of collections, Smithsonian Institute, 1880	94 59
Preservation of collections, Smithsonian Institute (Armory Building),	
1881	1,885 85
Preservation of collections, Smithsonian Institute (Armory Building),	
1880	24 39
Furniture and fixtures National Museum, 1881	21,272 67
Expenses of the Tenth Census	122,94054

Other accounts rendered by several disbursing agents of the Census Office were adjusted as follows:

Expenses of the Tenth Census	\$101,739,10
Expenses of the Tenth Census for transportation over subsidized rail-	
roads, settled on approval of superintendent of the Census	
round) between of approximation of the contraction	1,000 .0

Accounts rendered by Col. J. O. P. Burnside, disbursing clerk of the Post-Office Department, have been adjusted as follows:

Publication of Official Postal Guide	\$16,037 69
Stationery	7,225 13
Carpets	4,996 90
Gas	5,774 80
Furniture	4,998 73
Telegraphing	1,664 08
Hardware	• <b>7</b> 31 96
Rent of house No. 915 E street	1,500.00
Keeping horses and repair of wagons and harness	1,200 00
Plumbing and gas fixtures	3,975 89
Painting	3,999 95
Fuel	3,325 51
Miscellaneous items	9,452 28
Directories	200 00

Aside from the examination of 192,098 vouchers already noticed, there were 2,916 letters written, 9,220 reports recorded and copied, 22,361 coupon books counted, and 23,576 books scheduled. An examination of the accompanying tables, which are too extensive to be incorporated in the body of this report, will further convey some idea of the extent of the work performed and clearly demonstrate the necessity for the additional clerical force recommended for this Bureau. In the Consular Division alone, accounts are received from 286 consulates, and 283 consular agencies. These accounts, as well as those growing out of the collection of internal revenue, are especially complicated, requiring much time and great care in their adjustment. It is true that the accounts adjusted are now carefully and critically handled by clerks in charge, whose industry, efficiency, and integrity cannot be successfully challenged, but it is also true that the clerical force has been gradually reduced until only with the greatest difficulty can the work be kept up as it is now required to be done.

I have the honor to be, very respectfully, your obedient servant, D. S. ALEXANDER,

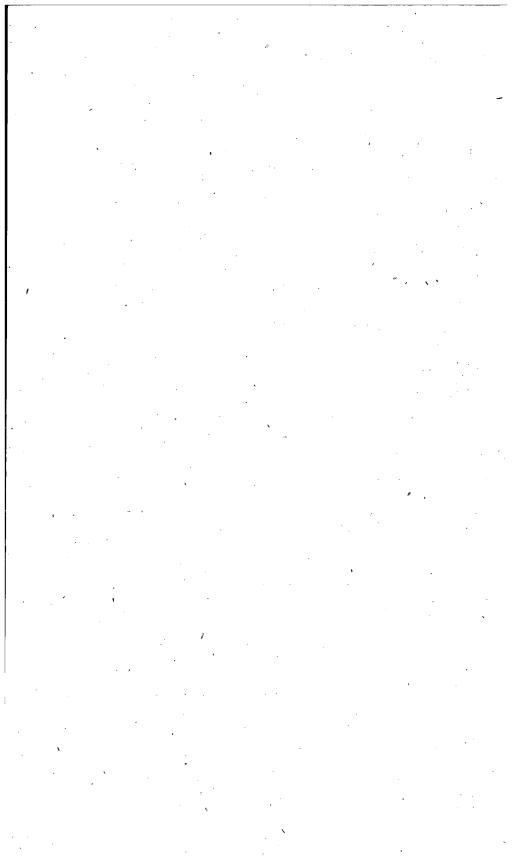

Auditor.

Hon. WILLIAM WINDOM,

Secretary of the Treasury.

NOTE.—The tabular statements pertaining to this report are omitted for want of space, but they are printed in the Auditor's pamphlet edition.

REPORT OF THE SIXTH AUDITOR. -

# REPORT.

OF THE

# AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT.

OFFICE OF THE AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT. November 8, 1881.

SIR: I have the honor to submit the report of the business operations of this office for the fiscal year ended June 30, 1881.

My annual report to the Postmaster General exhibits in detail the financial transactions of the Post-Office Department during the last fiscal year.

# REQUIRED INCREASE, IN THE CLERICAL FORCE.

The failure of Congress to authorize the employment of the number of clerks asked for by my predecessor-which did not exceed the requirements of the office—together with the increase of business during the past year, will, in my opinion, more than justify my estimate for nineteen clerks, four female assorters of money-orders, and two assistant

The rapid growth of the money-order system, the large increase in the number of accounts for mail transportation and miscellaneous payments, the great number and variety of orders of the Postmaster-General affecting the accounts of contractors, subcontractors, for special and temporary service, and of postmasters, the close scrutiny, thorough examination and dispatch required in the settlement of all accounts rendered to this office, make an increase in the number of clerks necessary for the protection of the interests of the government.

Heretofore it has been impracticable, with the force employed, to make quarterly reports to the Secretary of the Treasury, of the money-order Annual reports of these transactions have been made to transactions. the Postmaster-General. It is my opinion that quarterly reports of the money order business should be made to the Secretary of the Treasury,

and for this purpose increased force is required.

From the date of the establishment of the money-order system, in 1864, to the present time, a large number of money-orders remain outstanding and unpaid, estimated to amount to about \$1,250,000. only existing record of these orders is that afforded by the weekly moneyorder statements of the postmasters who issued such orders, which state-

Note.—The summary of the principal labors performed by the several divisions of this office, here omitted for want of space, will be found in the pamphlet edition of the Auditor's report.

ments cover nearly the whole period of the operation of the money-order system, and are difficult of access and inconvenient for reference. It is necessary that a complete, condensed record should be made of all these unpaid orders, for use in facilitating the payment of such as are from time to time presented, and of ascertaining at once the number, amount, and particulars of those still outstanding. To make such a record would require the services of about ten temporary clerks for one year, and I recommend that provision be made for the employment of the necessary force, as the importance and value of the record will warrant the expenditure.

The present diligent, faithful, and capable clerks find it impossible in many instances to perform the duties required of them within business hours, and it is the constant practice of a large number of them to work at night and on holidays in order to keep the work of their desks up to

the requirements of the office.

The following is a comparative statement of the business of the office, as shown by the annual reports for the years ended June 30, 1878, and June 30, 1881, exhibiting the increase in some of the branches:

Per cent. of increase	1, 234
Increase	149, 273
Number of certificates of deposit audited and registered during the year ended June 30, 1881	161, 367 12, 094

Increase	18, 273
Per cent. of increase	10.1

#### OBSOLETE FILES.

There are now stored in the archives of this office vast numbers of quarterly postal accounts and weekly money-order statements of post-masters, together with all the paid money orders. These accounts have, in part, accumulated since the fire which destroyed the Post-Office Department building, in 1836, and a portion antedate that occurrence. They have long since been audited and settled, and the items therein contained transferred to the registers and ledgers of the office; their further preservation is not material to the interests of the government or of individuals.

The greater part of the very large number of weekly money-order statements, dating back to 1864, may, with propriety, be dispensed with, after the record of unpaid money-orders therein contained has been transferred to permanent books.

I recommend that authority be requested from Congress for the sale or destruction of all unnecessary files over ten years old. Such action will relieve the office from the embarrassment now experienced for want of storage room, and afford space for the current accumulating files.

# ADDITIONAL OFFICE ACCOMMODATIONS REQUIRED.

Attention is invited to the present overcrowded condition of the rooms occupied by this office. Many of the rooms, but poorly lighted and illy ventilated, originally intended for the use of but two or three persons, are now occupied by five or six, and the available space diminished by file cases.

I recommend that suitable provision be made, at the earliest practicable date, for additional accommodations for this office.

I have the honor to be, very respectfully,

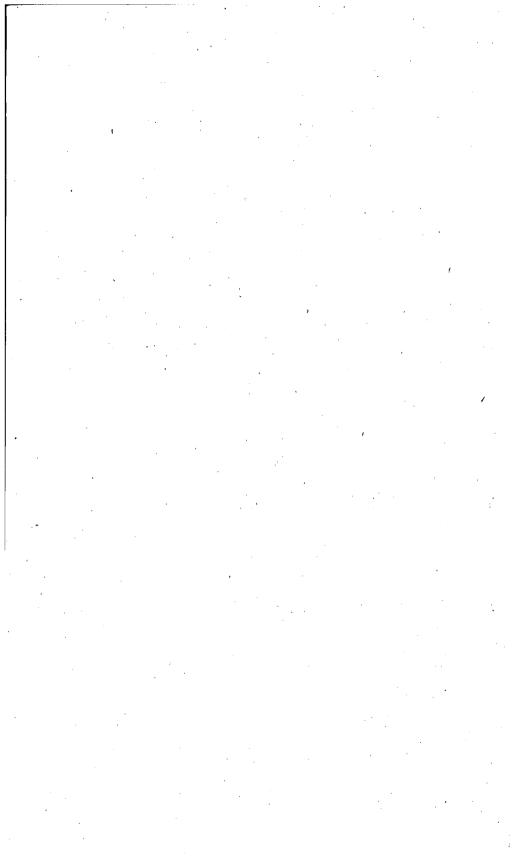

J. H. ELA, Auditor.

The Hon. SECRETARY OF THE TREASURY, Washington, D. C.

REPORT OF THE TREASURER OF THE UNITED STATES.

# REPORT

OF

# THE TREASURER OF THE UNITED STATES.

TREASURY OF THE UNITED STATES, Washington, October 1, 1881.

SIR: I have the honor to submit the following report showing the operations of the Treasury of the United States for the fiscal year 1881.

#### SUMMARY OF TRANSACTIONS.

The receipts of the government show an increase over those for 1880 from nearly every source. The increase in the receipts from customs is \$11,637,611.42; from internal revenue, \$11,255,011.59; from sales of publiclands, \$1,185,356.57, and from miscellaneous sources, \$3,177,702.01. The total increase is \$27,255,681.59, which, added to a net reduction of \$6,930,070.19 in expenditures, makes an increase in the surplus revenue of \$34,185,751.78. The net revenues were \$360,782,292.57, and the net expenditures \$260,712,887.59. The excess of receipts over payments was \$100,069,404.98, of which \$85,432,381.05 was expended in the redemption of the public debt. The balance in the Treasury increased \$48,667,603.93, from \$203,791,321.88, at the beginning, to \$252,458,925.81 at the end of the fiscal year. The amount expended on account of interest and premium on the public debt ran down from \$98,552,895.53 in the fiscal year 1880 to \$83,569,989.96, a reduction of \$14,982,905.57.

The balance standing to the credit of disbursing officers and agents of the United States with the various offices of the Treasury, June 30,

1881, was \$24,936,307.88.

The receipts for the fiscal year on account of the Post-Office Department were \$39,757,664.72, and the expenditures \$38,544,935.11, of which amounts \$24,702,703.44 was received and expended directly by post-masters.

The unavailable funds of the Treasury stand at \$29,521,632.72, having been increased \$9,425.87 since the last report, by reason of taking up on this account certain items previously carried in the cash. The unavailable funds of the Post-Office Department account remain unchanged at \$40,078.06.

During the year fifty-four national banks were organized and twenty went into voluntary liquidation, leaving 2,136 doing business at the close

of the year. No national bank failed during the year.

The semi-annual duty accruing from national banks during the year was \$8,493,552.55, all of which has been collected and paid into the Treasury, making the total amount collected by the Treasurer since the establishment of the national banking system in 1863, \$108,855,021.90.

At the close of the year there was held by the Treasurer in United States bonds \$360,505,900 as security for the circulation of national

banks, and \$15,295,500 as security for public deposits in national bank depositaries. During the year \$276,899,700 in bonds was deposited for these purposes, and \$277,527,350 withdrawn, exceeding by far the transactions of any former year. These changes were chiefly due to the continuance of the five and six per cent. bonds at three and one-half per cent., but were caused in considerable part by the substitution of the continued bonds for four and four and one-half per cents.

The United States currency outstanding at the close of the year was \$362,539,437.65. There was redeemed during the year \$71,069,974.95, making the total redemptions since the first issue of currency \$2,300,141,073.36.

United States bonds amounting to \$85,304,050 were retired during the year. The aggregate amount retired by purchase, redemption, conversion, and exchange, from March 11, 1869, to the close of the fiscal

year, is \$1,983,344,800.

Coupons from United States bonds, of the value of \$22,797,667.52, were paid during the year, and quarterly interest on registered stock of the funded loans, amounting to \$44,455,790.17, was paid by means of 305,101 checks drawn payable to the order of the respective stockholders and sent to them by mail.

The amount of national bank notes received for redemption during the year was \$59,650,259. The aggregate redemptions under the act of

June 20, 1874, have been \$1,099,634,772.

# THE STATE OF THE TREASURY.

The liabilities and assets of the Treasury, at the close of September, for the last four years, are shown by the following statement:

Comparing the condition of the Treasury September 30, 1881, with its condition on the same day last year, the most striking changes are the increase in the gold coin and bullion and standard silver dollars on hand and in the silver certificates outstanding. Deducting the gold certificates actually outstanding, the gold belonging to the government on September 30 of the last four years was \$112,602,622.20 in 1878; \$154,987,371.29 in 1879; \$128,160,085.77 in 1880; and \$169,552,746.41 in 1881. In 1880 the gold ran down nearly \$27,000,000, but this decrease was much more than overcome in 1881, when it increased more than \$41,000,000, reaching the highest point ever attained. This increase was largely due to the sale for gold coin in New York under the circular of September 18, 1880, of exchange on the West and South, payable in silver certificates. More than \$23,500,000 in gold has been deposited with the assistant treasurer in New York on this account during the last fifteen months, exclusive of the amount deposited on account of standard silver dollars. The effect of these operations, so far as the Treasury is concerned, is to convert its silver dollars into gold, for the issue of the silver certificates transfers the ownership of the silver dollars which they represent from the Treasury to the public.

The gross amount of gold and silver coin and bullion held by the Treasury, without regard to the obligations outstanding against it, has ranged from \$163,969,444.70, in 1878, to \$222,807,368.01 in 1879, \$214,303,215.38 in 1880, and \$269,706,998.76 in 1881. The increase within the last year has been \$55,400,000, of which \$39,150,000 is in the gold and \$16,250,000 in the silver. The increase in the gold has been greater, and in the silver less, in the last year than in any year since the coinage of the standard

silver dollar began.

The amount of United States notes on hand, which largely decreased

during the two preceding years, has slightly increased during the last year, notwithstanding the urgent public demand for notes for circulation. The amount on hand above the amount required for the payment of clearing house certificates is \$20,000,000, against \$18,000,000 a year The amount now held is not more than sufficient for the reasonable requirements of the various offices of the Treasury. The Treasurer, while freely furnishing new United States notes in redemption of old United States notes, and of national bank notes, has endeavored to husband the supply by the use of gold, standard silver dollars, and silver certificates, in payment of demands on the Treasury. The practice during the past year has been to make ten per cent. of all payments in silver dollars or certificates, forty per cent. in gold coin, and fifty per cent. in notes. this rule there is one important exception. Under the arrangement between the Treasury and the New York Clearing House all of the payments by the Treasury to this institution, aggregating two hundred and seventy-five million dollars a year, must be made in gold coin or United States notes; standard silver dollars are not receivable under its rules, although silver certificates are now being paid to it by the Treasury to some extent in large denominations, in lieu of gold coin for use in the payment of customs dues. Aside from any personal views as to the expediency of reviving the silver dollar, it would seem unwise for any branch of the government to encourage an arrangement by which a coin which the law has made a full legal tender is discredited.

The gross assets of the government, including the funds held for the redemption of gold, silver, and currency certificates, are \$331,981,210.11, having increased more than \$64,000,000 during the last year, and being larger than on the corresponding date in any year since 1878. This increase is due in chief part to deposits on account of silver certificates, which amounted during the year to \$45,600,000. A large share of these certificates was issued for deposits of gold, which directly increased the assets, while so far as they were issued in payment of demands on the

Treasury they protected the assets to a like extent.

#### THE RESERVE.

There is no provision of law requiring a specie reserve for the redemption of United States notes. In preparation for resumption of specie payments, a fund was created in the Treasury under section 3 of the resumption act of 1875, by the sale of \$95,500,000 of bonds and the accumulation of surplus revenue, to protect the outstanding notes. The amount of this fund has never been definitely fixed, but it has been maintained at about forty per cent. of the United States notes outstanding.

The present fund is estimated by deducting from the cash in the Treasury the aggregate of current liabilities other than United States notes, and this excess of cash has been maintained and called the reserve. These current liabilities include coin and currency certificates, balances subject to checks of disbursing officers, the funds for the redemption of national bank notes, interest due and unpaid, outstanding checks, matured bonds and interest, the balance due the Post Office Department, old debts, undistributed assets of failed national banks, and various smaller items.

Aside from the coin and currency certificates there has been but little fluctuation in the aggregate amount of these items since the close of the refunding operations. The obligations which are the evidences of these liabilities are innumerable and widely scattered—comprising bonds and interest notes, the remnants of old loans and calls long matured; old coupons, and many small amounts of unclaimed registered interest;

remnants of the circulation of failed, liquidating, and reducing national banks, all of which now find their way to the Treasury slowly, and could not be presented in any large amount without simultaneous action by many persons, which experience shows is impossible; and were it possible the various funds are always being replenished from the ample public revenues or by other deposits made in pursuance of law.

It has usually been assumed that a reserve of forty per cent. is sufficient for the protection of the United States notes, but it is plain that under this method of computation the reserve is not merely forty per cent. of the liability represented by United States notes, but also one hundred per cent. of all the other liabilities. So far as the gold, silver, and clearing-house certificates are concerned, it is necessary, under the laws authorizing their issue, that their full amount should be set aside. in gold, silver, and United States notes, respectively, as funds for their redemption; but as to the other liabilities no such obligation exists, and it is submitted that no higher reserve is required for their protection than is required for the protection of the United States notes. the changed condition of trade and commerce, unless some calamity shall overtake the nation, there seems to be no probability of a run upon the reserve of the Treasury. The total demand for coin in redemption of United States notes has aggregated since resumption but \$12,029,086, and no notes whatever have been presented for redemption since February, 1881.

Should there ever be a run on the specie reserves of the Treasury, the United States notes will be made the basis of the demand, and not the other matured obligations, which compose the very varied current liabilities of the government mentioned above; the amount and nature of which may be seen in the following statement showing the excess of assets over the demand liabilities of the government, other than United

States notes:

Considering these liabilities as a whole it is clear that whatever percentage of reserve will protect the United States notes will protect the other liabilities. The Treasurer does not attempt to say what this percentage should be, but he is of the opinion that a uniform percentage should be fixed for all the current liabilities other than the three classes of certificates and that the excess of cash in the Treasury should be expended, from time to time, in the purchase or redemption of the public debt according to some definite and publicly announced plan. Should this be done, the policy of the Department would cease to be a subject of speculation and the influence of the Treasury on the money-market would be reduced to a minimum.

The following statement shows that while the present nominal reserve of the Treasury held exclusively for the protection of United States notes has since January 1, 1879, ranged from 36.2 per cent. to 44.5 per cent., and has averaged for that period 41.1 per cent. of the outstanding United States notes, there has really been for the same period a reserve of cash against all demand liabilities, including United States notes and excluding the amount of outstanding coin and currency certificates from both sides, of from 40.5 per cent. to 55.7 per cent., which has averaged 51.6 per cent.; in other words, the reserve, as it has been maintained exclusively against United States notes, has been kept some \$46,000,000 in excess of what it would have been, had the same percentage been applied in computing the reserve to be held against all demand liabilities excluding coin and currency certificates.

At the present time the percentage of the surplus cash to the United States notes is only 40.1 per cent, while the percentage of the total cash to total liabilities (excluding certificates from both sides) is 54.1. Should 40 per cent, be fixed upon as a sufficient reserve for all the liabilities, the cash required to be held would be less than \$181,000,000 instead of the \$244,731,000 now held. Nearly \$64,000,000 or, excluding \$26,000,000 fractional silver coin not a full legal tender, \$38,000,000 might gradually be applied to the extinguishment of the public debt.

# UNITED STATES NOTES.

The following statement shows the changes which have taken place in the denominations of United States notes outstanding at the close of each of the last four fiscal years:

Denomination.	1878.	. 1879.	1880.	1881.	
One dollar	\$20, 929, 874 30 20, 910, 948 20	\$18, 209, 980 80 18, 092, 653 20	\$20, 332, 332 00 20, 352, 813 00	\$22, 645, 761 60 22, 244, 122 40	
Five dollars	65, 551, 644 00	54, 107, 113 00 64, 638, 562 00	65, 432, 548 00 74, 916, 751 00	69, 569, 078 00 76, 990, 387 00	
Twenty dollars	27, 182, 680 00	60, 470, 887 00 25, 523, 340 00	72, 143, 207 00 24, 808, 995 00	72, 271, 597 00 23, 702, 910 00

fire	1,000,000 00	1,000,000 00	1,000,000 00	1,000,000 00	
Outstanding	346, 681, 016 00	346, 681, 016 00	346, 681, 016 00	346, 681, 016 00	

During the last two years there has been a steady increase in the outstanding notes of the denominations of twenty dollars and under, and a proportionate decrease in the notes of higher denominations, the hundreds alone excepted. Of the five-thousand-dollar notes but ninety one and of the ten-thousand-dollar notes but twenty-six remain in circu-At the close of the fiscal year 1879 there were outstanding 48,497,283 notes; at the close of 1880, 55,573,301, and June 30, 1881, 59,839,069, an increase of nearly twenty five per cent. in two years. During the last year there was an increase of \$2,313,429 in one dollar notes; \$1,891,309 in two-dollar notes; \$4,136,530 in five-dollar notes; \$2,073,636 in ten-dollar notes; \$128,390 in twenty-dollar notes, and \$149,790 in onehundred-dollar notes. The amount of ones and twos outstanding has increased \$8,587,250 within the last two years. This increase is in part due to the discontinuance of the issue of notes of those denominations by the national banks upon the resumption of specie payments, though the chief cause is doubtless the revival of business and the demand for small notes for the payment of operatives and for use in small transactions.

The issues and redemptions during the last three fiscal years have been as follows:

Denomination.	<b>1879.</b>		1880.		1881.	
	Issued.	Redeemed.	Issued.	Redeemed.	Issued.	Redeemed.
One dollar Two dollars Five dollars Ten dollars Twenty dollars Fifty dollars One hundred dollars Five hundred dollars Five thousand dollars To thousand dollars To thousand dollars To thousand dollars	5, 892, 000 11, 060, 000 9, 280, 000 7, 400, 000 2, 400, 000 5, 007, 700 5, 650, 000 3, 900, 000 4, 005, 000 3, 010, 000	4, 059, 340 00 4, 593, 890 00 3, 959, 000 00 2, 042, 000 00	\$9, 057, 863 8, 232, 000 19, 680, 000 16, 520, 000 1, 400, 000 3, 052, 700 2, 300, 000 700, 000 2, 000, 000 2, 000, 000	\$6, 935, 511 80 5, 971, 840 20 8, 354, 565 00 6, 241, 811 00 2, 114, 345 00 2, 293, 310 00 15, 645, 500 00 19, 238, 000 00 4, 320, 000 00 4, 500, 000 00 81, 302, 563 00	\$9, 889, 034 8, 752, 000 14, 760, 000 9, 160, 000 6, 240, 000 1, 200, 000 2, 944, 300 700, 000 900, 000	\$7, 575, 604 44 6, 860, 690 66 10, 623, 470 00 7, 086, 364 00 6, 111, 610 00 2, 306, 085 00 2, 794, 510 00 5, 354, 000 00 25, 408, 000 00 200, 000 00

Although the amount redeemed in 1881 is \$26,757,229 less than in 1880, the number of notes constituting the amount is 1,617,045 greater. By virtue of a provision in the legislative, executive, and judicial appropriation bill for the current fiscal year making, an appropriation of \$50,000 "for the preparation and issue of new United States notes in place of worn and mutilated United States notes, and transportation of each to and from the Treasury," the express charges on worn and mutilated United States notes received for redemption in multiples of \$500 since July 1, 1881, and on new United States notes returned, have been paid by the government. This appropriation was highly necessary, as no provision for the renewal of United States notes, without charge, had existed since 1875, and the condition of the circulation had much deteriorated in consequence. It has led to a considerable increase in redemptions, which will doubtless continue during the year. It is suggested that a similar appropriation for the next fiscal year be recommended by the Secretary.

The amount of United States notes presented for payment in coin

during each month since the resumption of specie payments is shown by the following table:

Month.	1879.	1880.	1881.
January.	\$1, 571, 725	\$71, 500	
February March	909, 249 952, 766		
April	699, 773 1, 339, 883	16, 000 51, 000	
Tune Tuly	2,503,302	47, 200 25, 000	
August	981, 400	22, 000	
September October	740, 295	9,000	
November December	77, 499	12, 000 25, 000	

Redemptions have for the present entirely ceased, no notes having been presented for payment in coin since March 1, 1881. The entire amount redeemed in coin since January 1, 1879, a period of two years and nine months, is only \$12,029,086, an average of less than \$365,000 a month. The total redemptions thus far are less than  $3\frac{1}{2}$  per cent. of the United States notes outstanding, or a little more than one-tenth of one per cent. a month.

The amount of United States notes received in payment of duties on imports during each month since January 1, 1879, is as follows:

Month.	1879.	1880.	1881.
January	\$6, 864, 889	\$4, 126, 450	\$1, 689, 73
February	9, 340, 452	4, 477, 161 3, 702, 727	2, 049, 95 1, 830, 81
March April		3, 231, 697	1, 310, 29
May	9, 703, 566	2, 888, 138	1, 402, 11
June		3, 951, 588	1, 479, 50
July August		4, 029, 892 2, 844, 658	1, 641, 00 1, 873, 78
September		2, 241, 305	1, 476, 11
October	9, 281, 243	1, 802, 288	
November		1, 567, 184	
December	3, 051, 219	1, 405, 984	

The aggregate amount so received is \$160,050,101. The amount received during the year just ended is \$19,528,788, which is \$28,909,488 less than the amount received in the preceding year.

#### CLEARING-HOUSE TRANSACTIONS.

The transactions of the Treasury with the Clearing-House in New York during the last fifteen months are shown by the following statement:

Month.	Checks taken to clearing house.	Checks received from clearing- house.	Balances p a i d clearing house.	Balances received from clear- ing-house.

Checks on the Assistant Treasurer U. S., New York, received from the Clearing-House, 4.		280,	576	56
· ·				

The Treasury is almost invariably a debtor to the Clearing-House, the aggregate balances against it during the fifteen months having been \$345,471,775.94 against balances of only \$5,673,715.22 in its favor. The Treasury membership of the Clearing-House has been of great advantage to both the Treasury and the banks in saving the useless handling of money, and in enabling the Treasury to conform to commercial usage by accepting and collecting, without risk, drafts of banks and bankers tendered in payment of public dues and for other purposes.

#### STANDARD SILVER DOLLARS.

The total amount of standard silver dollars coined to September 30, 1881, under the act of February 28, 1878, is \$98,322,705, of which \$32,373,426, or nearly 33 per cent., is in circulation, and \$65,949,279 remains in the Treasury. The amount coined during the last year was \$27,753,955, of which \$9,589,420, or a little more than  $34\frac{1}{2}$  per cent., went into circulation, and \$18,164,535 remains in the Treasury. The amount put into circulation in the preceding year was \$11,956,680, or \$2,367,260 more than in the year just closed, indicating a considerable falling off in the demand. During the six months ending with June, 1881, the amount in circulation ran down \$445,775, but increased \$4,250,021 in the next three months. The amount going into circulation is invariably larger in the last half of the calendar year than in the first half. This is largely owing to the autumnal demand for Southern and Western exchange, which is met to a considerable extent by shipments of silver dollars. The dollars, being forwarded from the mints to all accessible points at the expense of the government, for deposits of gold coin or currency with any assistant treasurer, furnish a means by which exchange on any point in the West or South can be obtained in New York without expense. Silver certificates are paid out at the counters of the various sub-treasuries for deposits of gold coin with the assistant treasurer in New York, but when required at any point at which there is no assistant treasurer they are forwarded from the nearest sub-treasury at the expense of the person receiving them. For the purpose of placing funds at such points the silver dollars are therefore usually preferred. The dollars so placed are more likely to go into permanent circulation than those paid out in cities where there are assistant treasurers with whom they may at once be deposited for silver certificates. Any effort to put the dollars into actual circulation in such cities is frustrated by the return of the coins for certificates, which the holder is by law entitled to demand for them. As such attempts involve an unnecessary double handling of the coin by the Treasury, they have been generally abandoned, and when payments are to be made in silver the certificates are paid out in the first instance. Of the \$98,322,705 in standard silver dollars coined, \$72,001,777, or more than 73 per cent., has been paid out by the Treasury and mints. Of this latter amount \$39,628,351 has been returned to the Treasury in payment of public dues or in exchange for silver certificates.

The following table gives the amount of silver dollars coined, on hand, distributed, and outstanding at the close of each month since the coinage was resumed in March, 1878:

<del></del>					
Month.	Monthly coin- age.	Coined to the end of the month.	Balance on hand at the close of the month.		Outstanding at the close of the month.

The average monthly coinage has been \$2,287,000, and the average net

monthly issue \$753,000.

The distribution of the standard silver dollars in the Treasury September 30 is shown by the statement below. Of the sixty-six million dollars on hand more than thirty millions are held by the mint and subtreasury in San Francisco, and more than sixteen millions by the assistant treasurer in New York.

Treasury United States, Washington, D. C.	\$1,440,606
Sub-treasury United States, Baltimore, Md	" ´443, 311

The difference of \$199,400 between this and the preceding statement

is the amount in transitu.

Of the 28,825,242 standard silver dollars put into circulation during the last year 12,600,314 were paid out at the counters of the various offices of the Treasury; 5,067,000 were forwarded by the mints in New Orleans, Philadelphia, and San Francisco for deposits with the assistant treasurers in the same cities; 10,102,428 were forwarded from the mints to banks and other private parties on orders from the Treasurer, for deposits with assistant treasurers, or remittances of money or checks to his office, and 1,055,500 were transferred from the mints under the Treasurer's direction to national bank depositaries and charged to them in their accounts with the government. During the same period \$19,235,822 in silver dollars was returned to the Treasury in payment of dues or for silver certificates, making the net increase during the year in the amount outstanding \$9,589,420.

#### SILVER CERTIFICATES.

There was a large increase during the fiscal year in the amount of silver certificates in circulation, the amount outstanding at the close of the year being \$51,166,530 as compared with \$12,374,270 outstanding June 30, 1880. This increase is due in part to the demand for notes for circulation, but chiefly to the operation of the departmental circular of September 18, 1880, under which exchange on the sub-treasuries in the West and South payable in silver certificates is furnished by the Department for deposits of gold coin with the assistant treasurer in New York. Under this circular large amounts of silver certificates, chiefly of the denominations of ten and twenty dollars, have been paid out at the sub-treasuries in New Orleans, Saint Louis, Chicago, and Cincinnati, for the purpose of moving the cotton and other crops. Since the close of the fiscal year the circulation of the certificates has still further increased; the amount now outstanding being \$64,149,910, of which \$11,309,470 is held by the Treasury. The amount of silver dollars in the Treasury at this date is \$65,949,279, less than two million dollars

in excess of the outstanding certificates. As the certificates cannot be issued in excess of the dollars held by the Treasury, the limit of their issue is likely soon to be reached, although, of course, the certificates held by the Treasury in its cash can be paid out. Aside from this limitation, the issue of the silver certificates has little relation to the standard silver dollar. The Treasury pays them out because it finds it necessary to utilize in some way the enormous stock of silver which it is carrying, and they are taken by the public, without regard to the silver dollars behind them, because they constitute a convenient form of paper cur-To the extent of nearly two-thirds of the amount coined, the coinage and attempted circulation of the standard silver dollar have resulted simply in an addition to the paper circulation of the country. ever the ultimate result may be, the immediate effect has not been without positive advantages. The volume of the United States notes is limited by law, while the national banks do not find a sufficient profit in issuing circulation on United States bonds at present prices to induce them to supply the demand for additional paper circulation, caused by the increase of business. The issue of silver certificates, by meeting this demand, has averted what might have proved to be a serious public inconvenience.

The issues and redemptions of these certificates during the last fiscal year are shown by the following table:

#### GOLD CERTIFICATES.

The amount of gold certificates issued and redeemed during each fiscal year from 1866 to 1881, the total amount issued and redeemed, and the amount outstanding at the close of each year, are exhibited in the following statement. None of these certificates have been issued since December 1, 1878, although the law authorizing their issue is unrepealed and may at any time be put in force. Only \$5,782,920 was outstanding June 30, 1881, \$2,221,680 having been redeemed during the year.

#### CLEARING-HOUSE CERTIFICATES.

The clearing-house certificates outstanding at the close of the fiscal year amounted to only \$11,615,000, the smallest amount outstanding at the close of any fiscal year since their issue began in 1873.

These certificates are issued under section 5193 of the Revised Statutes (act of June 8, 1872), for deposits of United States notes with the Treasurer and assistant treasurers, and are held by national banks as a part of their lawful money reserves. The falling off in their use since the resumption of specie payments is due to the extensive conversion of the bank reserves into specie and the increased demand for notes for circulation. Since the close of the fiscal year the amount actually outstanding has still further decreased, being only \$8,185,000 on the thirtieth of September.

The following table shows the total amount issued and redeemed, and the amount outstanding at the close of each fiscal year from 1873 to 1881:

Fiscal year.	Total amount issued.	Total amount redeemed.	Outstanding as shown by the Treasurer's books.
1873	137, 905, 000 219, 000, 000 301, 400, 000 378, 285, 000 464, 965, 000 554, 730, 000 601, 785, 000	\$25, 430, 000 '78, 915, 000 159, 955, 000 268, 260, 000 324, 305, 000 418, 720, 000 525, 400, 000 588, 660, 000 601, 235, 000	\$31, 810, 000 58, 990, 000 59, 045, 000 33, 140, 000 53, 980, 000 46, 245, 000 29, 330, 000 13, 125, 000 11, 615, 000

#### FRACTIONAL SILVER COIN.

The amount of fractional silver coin in the Treasury, which on September 30, 1880, was \$24,723,892.68, steadily ran up until August 1, 1881, when it reached \$27,295,486.63. Within the last two months it has decreased, in consequence of the heavy shipments from this office, and now stands at \$26,343,477.17, an increase of \$1,619,584.49 in the last year but a decrease of \$952,009.46 since August 1. Prior to March last no provision existed for the free distribution of fractional silver coins, and persons desiring them had to pay the charges for their transportation from the Treasury, although the minor coins of five cents and under could be obtained from the mints without expense. Under the operation of these causes and of the act of June 9, 1879, providing for the exchange of fractional silver coin for lawful money, the amount in the Treasury has increased more than \$20,000,000 in the last three years, while the minor coin has run down nearly a million dollars within two years, although neither was coined to any extent, the brouze cents alone excepted. coinage of fractional silver virtually ceased in 1878. The sundry civil appropriation act of March 3, 1881, however, contained an appropriation of \$20,000; which was made immediately available, for the payment of the charges for the transportation of fractional silver to those applying for it. The regulations issued to carry the law into effect provided for the free shipment of the coins only from this office. Under this provision the shipments of fractional silver have largely increased, though its full effect was not felt until after the close of the fiscal year. During the fiscal year there were shipped 1,339 packages, containing \$1,106,467.85. During the next three months 1,524 packages, containing \$1,256,445.93, were forwarded, of which \$607,689.40 was shipped during the month of September. Of the \$2,362,913.78 sent out during the last fifteen months, \$1,717,395.18 or nearly three-fourths, was forwarded in the six and one-half months succeeding the date of the circular providing for the transportation of the coins at the expense of the government. The free distribution of the coins contributes greatly to the public convenience and it would be well to continue the appropriation for the purpose. At the present rate of shipment the appropriation already made will not last through the fiscal year. The large profit made by the government on the coinage of fractional silver warrants the pursuance of a liberal policy in its distribution and redemption.

#### MINOR COIN.

The amount of minor coin in the Treasury, which steadily increased from \$157,000 in 1876 to \$1,524,000 in 1879, has greatly decreased in the last two years. The amount now on hand is \$552,585.06, as compared with \$1,063,665.22 on September 30, 1880, and \$1,524,700.57 on the corresponding date in 1879. The decrease within the last year has been entirely in the five-cent nickel coins, the amount of one-cent copper-nickel, two and three cent pieces on hand having slightly increased, as they are uncurrent, and are retained unissued. The amount of five-cent coins now held is \$183,871.75, against \$728,442.15 in 1880, and \$1,184,252.95 in 1879. More than a million dollars in these coins has gone into circulation within the last two years. If the demand continues at this rate the supply will be exhausted in less than four months, and it will be necessary to resume their coinage, which virtually ceased in 1877. within the last six months these coins were forwarded to those ordering them, at the expense of the Mint for transportation, as authorized by section 3529 of the Revised Statutes. March 28, 1881, this practice was discontinued, and the public was notified by a departmental circular that the coins could be obtained only at the counters of the Treasurer and the assistant treasurers. Under this arrangement persons outside of cities in which there are offices of the Treasury are compelled to order the coins through their correspondents in those cities, and to bear the expense of their transportation.

The tendency of this change in a long established practice has been to lessen the orders for the five cent coins, of which there were plenty on hand, and to increase the orders for the bronze one cent pieces, which, though often less desirable, can still be obtained directly from the Mint without expense for express charges, and which the government is compelled to coin to supply the demand, at a considerable expense for the metal and labor of coinage. It is recommended that the former practice be restored, and that the five cent coins be again furnished by the Mint, and at its expense, to be paid from the minor coinage profit fund, the Mint to be kept supplied as heretofore by transfers of the coin from the

Treasury.

The bronze two cent pieces, whose coinage was discontinued by the coinage act of 1873, are used for recoinage into cents, and the supply in the Philadelphia Mint is intended for that purpose. The total amount coined was only \$912,020, of which \$695,030, or more than three fourths, was coined within three years from their authorization in 1864.

The amount of each denomination of minor coin held by each of the several offices of the Treasury September 30, 1881, is as follows:

Office by which held.	Five-cent nickel.	Three-cent nickel.	Two-cent bronze.	One-cent bronze, cop- per-nickel, and copper.	Mixed.	Total.

#### FRACTIONAL CURRENCY.

The redemptions of fractional currency have declined to a very low point, the amount redeemed during the year ending September 30 being but \$83,434.35 out of \$15,557,878.70 nominally outstanding a year ago, or a little more than one half of 1 per cent., as compared with \$189,628.89 for the preceding year. Of the \$41,508,737.48 outstanding April 17, 1876, the date of the act authorizing the issue of fractional silver coin in exchange for fractional paper currency, \$26,034,293.13 has been redeemed and \$15,474,444.35 remains outstanding. Of this latter amount more than \$14,000,000 has been lost or destroyed, and will constitute a profit to the Treasury. The steady decline in redemptions since the date of the cessation of the issue of fractional currency is shown by the following statement giving the redemptions for each year ending September 30, since 1876:

1877	\$11,071,773	35
1878	2, 489, 212	69
1879	549, 921	99
1880	189, 628 8	89
1881	83, 434	35

The total amount of each issue, the date of its discontinuance, and the amount and percentage outstanding September 30, 1881, are shown by the following statement:

Issue.	Total issued.	Issue ceased.	Outstanding Sep- tember 30, 1881.	Percentage outstand- ing.
First. Second. Third. Fourth	\$20, 215, 635 00 23, 164, 483 65 86, 115, 028 80 176, 567, 032 00 62, 661, 900 00	May 27, 1863 Feb. 23, 1867 Apr. 16, 1869 Feb. 16, 1875 Feb. 15, 1876	\$4, 283, 207 25 3, 108 163 05 2, 991, 247 70 3, 729, 318 25 1, 362, 508 10	21. 18 13. 41 3. 47 2. 11 2. 17
Total	368, 724, 079 45		15, 474, 444 35	4. 19

Contrary to the usual rule, the percentage outstanding is in direct proportion to the age of the issues, varying from 21 per cent. for the first issue of postal currency, which ceased in 1863, to a little more than 2 per cent. for the last two issues, which ceased in 1875 and 1876. The percentage outstanding of the aggregate amount issued is nearly four and one-fifth and cannot in all likelihood ever be reduced below 4 per cent.

#### MUTILATED, STOLEN, AND COUNTERFEIT CURRENCY.

There were detected by the counters of this office in remittances of currency received for redemption during the fiscal year, \$7,434 in counterfeit United States notes; \$449.45 in counterfeit fractional currency, and \$3,721 in counterfeit national bank notes, all of which were branded and returned to the persons from whom they were received. The counterfeit national bank notes were from fifty-seven different plates. The amount of each denomination was as follows: \$76 in twos; \$1,275 in fives; \$560 in tens; \$560 in twenties; \$150 in fifties; \$1,100 in hundreds. There was also detected and rejected \$450 in national bank notes which had been stolen when unsigned and put in circulation with forged signatures. There was deducted, on account of mutilations, from the face value of United States notes redeemed during the year \$9,125; from fractional currency \$202.12, and from notes of failed, liquidating, and reducing national banks, \$86.10, making the total deductions on this account \$306,776.98 on notes of the face value of \$2,300,447,850.34 redeemed.

The rule subjecting mutilated United States currency on its redemption to a discount proportioned to the part lacking is based on a false analogy to coined money, is unjust to the public and expensive to the Treasury, and should be modified. Almost the entire amount deducted is on account of mutilations which are plainly caused by ordinary wear and tear. The application of the rule requires a critical examination of each note and adds largely to the expense of redemption. A rule that fragments equal to three-fifths of whole notes would be redeemed in full, that half notes would be redeemed at half of the face value, and that fragments less than half would not be redeemed at all unless accompanied by proof of the absolute destruction of the missing parts, would be perfectly safe and fair. More than a thousand million dollars of national bank notes have been redeemed under a similar rule, without

loss to the banks or complaint from the public.

Of the stolen national-bank notes in circulation a part was stolen from the Treasury and a part from the banks of issue. For the redemption of the former an appropriation of \$5,000 was made by the act of June 20, 1878, but it was not sufficient for the purpose and has been exhausted. A further appropriation sufficient for the redemption of the remainder of these notes should be made. There would seem to be no question that the loss should be borne by the government, through the dishonesty of one of whose employees the notes were stolen, rather than by innocent holders, who have no sufficient means of determining the character of the notes, which are genuine in all respects save the signa-The notes stolen from the banks of issue are rejected under a decision of a State court that a State bank was not responsible for notes signed by but one of its officers, and put in circulation with forged sig-It is doubtful whether this decision properly applies to national-bank notes, which have had the seal of the United States and the signatures of the Treasurer of the United States and of the Register of the Treasury imprinted on them before being forwarded to the bank and which have been charged to the bank on the books of the department and receipted for by it. As a matter of equity the loss ought to be borne by the banks through whose negligence, either actual or constructive, the notes were stolen, rather than by the public.

#### SALES OF EXCHANGE.

During the fifteen months ending September 30, 1881, there was furnished to the commercial public through the various offices of the Treasury, exchange between different cities of the Union amounting to \$52,266,714, exclusive of the standard silver dollars forwarded from the mints for deposits with assistant treasurers. Under the circular of September 18, 1880, \$23,560,000 in gold coin was deposited with the assistant treasurer in New York, for which telegraphic orders, payable in silver certificates, were drawn by the Treasurer on assistant treasurers as follows: on New Orleans, \$10,300,000; on Saint Louis, \$7,110,000; on Cincinnati, \$4,345,000; and on Chicago, \$1,805,000. The orders for standard silver dollars under the same circular amounted to but \$50,000. as the circular provides only for the payment of the coins at the counters of the sub-treasuries, while they are forwarded from the mints to any point under other regulations at the expense of the government. the circular of September 19, 1879, \$7,026,500 in gold coin was paid or forwarded by the mint in Philadelphia on orders from the Treasurer for deposits of legal-tender notes with the assistant treasurer in New York. There was deposited with the same officer \$12,140,000, for which telegraphic orders, payable in gold coin, were issued by the Treasurer on the assistant treasurers in the following cities: Philadelphia, \$6,540,000; New Orleans, \$3,350,000, which was sold for a premium of \$2,067.80; and San Francisco, \$2,250,000. Currency exchange to the amount of \$190,214 was drawn in the same manner. For the purpose of supplying their offices with funds the assistant treasurer in San Francisco was furnished with \$9,000,000 in New York exchange, and the depositary at Tucson with \$100,000 in New York exchange, and \$200,000 in San Francisco exchange, to be disposed of for currency. The actual sales of exchange at these points during the fifteen months were \$9,653,000, a balance of unsold exchange having been carried over from the preceding year.

The extent of these transactions, averaging more than \$800,000 a week, and involving the transfer of funds between the various commercial centers of the country, illustrates the close connection between the necessary operations of the Treasury and the business of the country.

#### DRAFTS AND CHECKS.

During the fiscal year there were drawn and forwarded to the persons entitled to receive them 36,345 drafts on warrants of the Secretary of the Treasury, 14,713 drafts on warrants of the Postmaster-General, 305,101 checks in payment of quarterly interest on registered stock of the funded loans, and 42,992 transfer checks on assistant treasurers, making, in all, 399,151.

#### DEPOSITARY BANKS.

The receipts of public money by depositary banks during the fiscal year were \$131,820,002.20, and the total amount received by them since 1863, \$3,669,461,046.61. The average weekly balance held by them during the year to the credit of the Treasurer was a little less than eight million dollars, which, with other balances to the credit of disbursing officers, is secured by the deposit with the Treasurer of United States bonds to the amount of \$15,295,500, and of \$330,000 in personal bonds. There were 130 national banks acting as depositaries of public moneys at the close of the fiscal year, a decrease of one during the year.

The receipts and disbursements of public funds by bank depositaries during the last eighteen fiscal years have been as follows:

Fiscal year.	Receipts.	Funds transfer- red to deposi- tary banks.	Funds transferred to the Treasury by depositary banks.	Drafts drawn on depositary banks.	Balance at close of the year.
1864 1865 1866 1867 1868 1869 1870 1871 1872 1873 1874 1875 1875 1876 1877 1878 1879 1879	987, 564, 639 14 497, 566, 676 42 351, 737, 083 83 225, 244, 144 75 105, 160, 573 67 120, 084, 041 79 99, 299, 840 85 106, 104, 855 16 169, 602, 743 98 91, 108, 846 70 98, 228, 249 53 97, 402, 227 57	\$816, 000 00 \$, 110, 294 70 13, 523, 972 62 8, 405, 903 63 9, 404, 392 00 10, 052, 199 40 2, 466, 521 06 2, 633, 129 45 3, 050, 444 45 9, 004, 842 49 2, 729, 958 81 1, 737, 445 60 2, 445, 451 49 2, 353, 196 29 2, 353, 196 29 2, 353, 920 38 6, 890, 489, 66 6, 489, 634 75 5, 646, 692 46	\$85, 507, 674 08 583, 697, 912 72 363, 085, 565 65 331, 089, 872 57 215, 311, 460 69 114, 748, 877 24 111, 123, 926 18 89, 428, 544 04 94, 938, 603 76 108, 089, 786 76 134, 869, 112 57 82, 184, 304 05 89, 981, 146 99 94, 276, 400 35 90, 177, 963 35 100, 498, 469 29 109, 641, 232 64 118, 143, 724 91	\$28, 726, 695 88 415, 887, 767 81 149, 772, 756 11 37, 218, 612 76 22, 218, 187 92 14, 890, 463 75 11, 818, 228 61 13, 790, 961 01 13, 635, 837 49 16, 110, 519 07 13, 364, 554 52 13, 657, 678 25 13, 909, 616 83 14, 862, 200 88 12, 606, 870 60 15, 544, 058 34 15, 525, 023 03 18, 388, 772 82	\$39, 976, 738 7: 36, 065, 992 01 34, 298, 319 32 26, 182, 821 47 23, 301, 709 6: 8, 875, 141 7: 8, 483, 549 7: 7, 777, 875, 576 7, 777, 875, 576 7, 790, 292 01 11, 914, 004 8! 7, 870, 920 12 7, 555, 776 4: 6, 937, 916 3: 7, 183, 403 4: 7, 199, 953 8, 933, 550 7:

#### RETIREMENT OF BONDS.

During the year ending September 30, 1881, there were redeemed and paid for by this office called United States bonds, on which interest had ceased, of the face value of \$75,223,200. The proceeds, including interest, amounted to \$76,556,772.36. United States bonds to the amount of \$28,327,650 were purchased during the year for the sinking fund, at a cost, including accrued interest and premiums, of \$29,083,821,36.

#### PACIFIC RAILROAD SINKING FUNDS.

There are held at the date of this report on account of the Pacific Railroad sinking funds, established by the act approved May 7, 1878 (20 Statutes, 56), bonds as follows:

For the Union Pacific Railroad Company.	
Pacific railway bonds, currency sixes	\$361,000
Funded loan of 1881, 34 per cents	
Funded loan of 1907, 4 per cents	
, * ,	\$650, 100
For the Central Pacific Railroad Company.	
Pacific railway bonds, currency sixes	\$444,000
Thursday learn of 1991 21 non conta	101 000
runded toan of tool 35 per cents	194, 900
Funded loan of 1881, $3\frac{1}{2}$ per cents	199,100

Bonds of the funded loan of 1881, to the amount of \$256,450 held for the Union Pacific Railroad Company, and \$194,900 for the Central Pacific Railroad Company, bearing five per cent. interest, were continued at 3½ per cent.

### TRUST FUNDS.

#### The Indian Trust Fund.

The bonds and stocks of the Indian Trust Fund, at the close of the fiscal year, in the custody of this office, in conformity with the act of Congress of June 10, 1876 (19 Statutes, 58), amounted to \$4,186,366.833. Of this amount \$2,466,550 was in United States bonds, as follows:

Loan of July and August, 1861	<b></b> \$500
Pacific railway bonds, currency sixes	280,000
Funded loan of 1881, 31 per cents	
, , ,	\$2,466,550

In pursuance of a letter from the Secretary of the Interior, dated March 21, 1881, bonds of the funded loan of 1881, then held for the fund, amounting to \$2,850, were withdrawn and sold, and the amount deposited in the Treasury to the credit of the Secretary of the Interior, trustee of the Shawnee Indians, for the purpose of reimbursing certain purchasers of lands from the Shawnee Indians, for which the government could give no valid title.

In pursuance of authority from the Secretary of the Interior, the remaining bonds of the funded loan of 1881, amounting to \$2,186,050, were continued at 3½ per cent., and on the 11th day of July, 1881, under directions from the same officer, were forwarded to the assistant treasurer in New York, and sold at a premium of \$44,971, and the proceeds, \$2,231,021, deposited in the Treasury, as provided for in the act of Congress of April 1, 1880, in reference to such deposits in lieu of investments.

On the 1st day of July, 1881, the \$500 bond of the loan of July and August, 1861, was, by request of the Secretary of the Interior, delivered to the Secretary of the Treasury for redemption, and the proceeds deposited in the Treasury to the credit of the former officer as trustee of various Indian tribes.

The only United States bonds belonging to the Indian Trust Fund at the date of this report are Pacific Railway bonds, known as currency sixes.

The amount of bonds of the Nashville and Chattanooga Railroad Company held for the Indian Trust Fund at the close of the fiscal year 1880 was \$512,000. Of this amount, bonds amounting to \$391,000 were due and payable July 1, 1881, and were transmitted to the assistant treasurer in New York, for collection, together with coupons attached and detached amounting to \$15,360. The amount of the principal was deposited in the Treasury in accordance with the act of April 1, 1880; the interest was deposited to the credit of the Secretary of the Interior, trustee. The remaining bonds, \$121,000 in amount, are due July 1, 1882. Current interest is paid on presentation of the coupons.

Non-interest paying bonds are held, belonging to the Indian Trust Fund, as follows: Arkansas funded debt, \$168,000; Florida State stocks, \$132,000; Louisiana State stocks, \$37,000; South Carolina State stocks, \$125,000; Tennessee State stocks, \$335,666.663; Virginia State stocks, \$581,800; Virginia, Ohio and Chesapeake Canal bonds, \$13,000.

North Carolina State stocks are held amounting to \$192,000, on a portion of which interest is paid at irregular intervals by the receiver of the North Carolina Railroad Company.

There are also held \$6,000 in Wabash and Erie Canal bonds, on which interest is paid semi-annually, and \$8,350.17 in Maryland State stocks, on which interest is paid quarterly.

## American Printing-House for the Blind.

Under the act of March 3, 1879 (20 Statutes, 467), \$250,000 United States four per cent. bonds are held in the name of the Secretary of the Treasury, trustee, "to promote the education of the blind," the interest on which is paid to the trustees of the American Printing-House for the Blind, in Louisville, Ky., in conformity with that act.

## Pennsylvania Company.

Under the provisions of department circular No. 146, dated November 29, 1876, \$200,000, in registered bonds of the funded loan of 1891,

are held in trust for the Pennsylvania Company for the security of unappraised dutiable merchandise and dutiable merchandise in bond.

### Manhattan Savings Institution.

United States bonds issued to replace those alleged to have been stolen from the vaults of the Manhattan Savings Institution, New York, are held in this office to the amount of \$250,000 to protect the United States from loss, as provided by the act of December 19, 1878 (20 Statutes, 589).

### Cincinnati Chamber of Commerce.

Forty thousand dollars in United States four per cent. bonds, in the name of the Treasurer of the United States, in trust for the Cincinnati Chamber of Commerce and Merchants' Exchange, are held in this office in pursuance of a contract between the Secretary of the Treasury and the Cincinnati Chamber of Commerce and Merchants' Exchange, made under the authority of a joint resolution of Congress approved February 27, 1879 (20 Statutes, 488), being the investment of a partial payment for the site of the old post-office and custom house in the city of Cincinnati. The bonds are to be sold, and the proceeds applied in payment of the property named when a deed of conveyance is executed.

#### UNITED STATES BONDS HELD FOR NATIONAL BANKS.

At the close of the fiscal year 1880, the United States bonds held in trust for national banks amounted to \$376,429,050. Of this amount \$361,652,050 was held to secure circulation, and \$14,777,000 to secure public moneys.

The bonds held to secure circulation were of the following classes:

Loan of February, 1861	. \$2,092,000
Loan of July and August, 1861.	
Loan of 1863 (81s)	
Consols of 1867	3,000
Consols of 1868	
Ten-forties of 1864	
Funded loan of 1881	
Funded loan of 1891	. 37,760,950
Funded loan of 1907	. 126, 076, 300
Pacific Railway bonds	4, 368, 000
•	
Total	261 659 050

During the fiscal year all of the bonds known as the sixes of 1880 and 1881, held to secure circulation, included in the first three classes above given, aggregating \$53,670,150, having been called for payment or continuance, were withdrawn, excepting \$298,500. Of the \$138,378,750 United States bonds of the funded loan of 1881, held for the same purpose, all were withdrawn excepting \$43,814,950. A large proportion of all these bonds was continued at the rate of three and one half per centum per annum, and redeposited, as shown in the table in the appendix.

In addition to the large amounts withdrawn and deposited in these transactions, bonds of the funded loan of 1891, four and one-half per cents., and of the funded loan of 1907, four per cents., have been deposited and withdrawn to an aggregate of \$75,548,200.

The amount of bonds deposited during the fiscal year was \$276,899,700; of bonds withdrawn, \$277,527,350, so that the total movement of United States bonds held in trust for national banks was \$554,427,050.

#### SEMI-ANNUAL DUTY.

The semi-annual duty assessed upon and collected from the national banks by the Treasurer of the United States for the fiscal year is as follows:

On circulation	 \$3, 121, 374	33
On deposits	 4,940,945	12
On capital	 431, 233	10
Total	 8, 493, 552	<b>55</b>

This is the largest amount of semi-annual duty assessed and collected in one year since the establishment of the national banking system. It exceeds the amount for the fiscal year 1880 by \$901,782.12, and for the fiscal year 1879 by \$1,772,315.88.

The total amount of semi-annual duty collected by this office from the national banks for the fiscal years 1864 to 1881, as fully shown in the appendix, is:

On circulation On deposits On capital	 	 	52, 644, 349	23
Total			108 855 091	90

#### THE DEPOSIT AND DISBURSEMENT OF THE POSTAL REVENUES.

The first section of the act of March 3, 1849, as incorporated into section 3617 of the Revised Statutes, requires that "the gross amount of all moneys received from whatever source for the use of the United States * * * shall be paid by the officer or agent receiving the same into the Treasury, at as early a day as practicable, without any abatement or deduction on account of salary, fees, costs, charges, expenses, or claim of any description whatever." From this requirement the revenues of the Post Office are, however, excepted. By virtue of this exception the greater part of the postal revenues is received and disbursed by postmasters without actually going into the Treasury at all, being carried into and out of the Treasurer's accounts by warrants for the gross amounts involved issued at the end of each quarter. During the last fiscal year, of aggregate revenues amounting to nearly \$40,000,000, only \$15,000,000, or about two-fifths, was deposited in the Treasury, and of this amount more than three million dollars was appropriated by the government to make good the deficiency in the postal revenues.

Since the close of the fiscal year the system of making payments by drafts of the Postmaster-General on postmasters, which had grown up without any specific warrant of law, has been abolished; but even after this change nearly half of the revenues will continue to be disbursed outside of the Treasury. This consists of funds expended by postmasters, without draft or warrant, for the expenses of their offices and for salaries of rostal employees, on vouchers which are charged in their accounts with the department. It is evident that disbursements so made from funds already in the postmaster's possession, cannot be so efficiently controlled as disbursements which can be made only upon a warrant previously issued by the head of the department. The Treasurer regards the requirement of the act of 1849, that the public moneys shall be deposited in the Treasury without diminution in any way as most salutary and important, and he believes that there is no sufficient reason for excepting from it the public moneys collected by the Post-Office Department. To correct this, it would be necessary to repeal the clause in section 3617 of the Revised Statutes making the exception, and, if practicable, section 3861, permitting postmasters to pay their expenses directly out of their receipts, as well as section 4056, authorizing the transfer to contractors by means of "collection orders" of debts due to

the Post-Office Department.

One other change is required to bring the Post Office under the system of accountability which applies to every other department. The revenues of the Post Office, unlike those of any other department, are not deposited to the credit of the Treasurer in his general account, but are carried to his credit in a special fund, over which the Treasury has no control. They are drawn out, not as the other funds of the government are, by the warrant of the Secretary of the Treasury countersigned by the First Comptroller, but by the warrant of the Postmaster-General countersigned by the Auditor of the Treasury for the Post-Office Department. To secure efficient control and uniform accountability they should, in the Treasurer's opinion, be deposited like all other revenues, without abatement, to the credit of the Treasurer's regular account, and be drawn out only on the warrant of the Secretary of the Treasury, based upon the requisition of the Postmaster-General.

#### THE REDEMPTION OF NATIONAL-BANK NOTES.

The amount of national-bank notes redeemed during the fiscal year shows a still further decrease as compared with previous years. amount received for redemption was \$59,650,259.43, the smallest amount received in any year since the establishment of the present system of redemption, and two million dollars less than the amount received during the preceding fiscal year. In accordance with the recommendation made in the Treasurer's last annual report, the order requiring the charges for the transportation of national-bank notes for redemption to be paid by the senders, which had already been modified so as to permit the charges on notes clearly unfit for circulation to be paid from the 5 per cent. redemption fund, was revoked January 13, 1881, and since that date the transportation charges on all bank notes, whether fit or unfit for circulation, received by the Treasurer in multiples of \$1,000, have been defrayed out of the 5 per cent. fund. The effect of this order was shown in an increase of more than 60 per cent. in the redemptions of the last half of the fiscal year as compared with the preceding six months. This increase was entirely in worn, defaced, and mutilated notes, the notes fit for circulation assorted having fallen off \$647,000 in the same time.

Of the \$46,844,300 in notes assorted and charged to the banks of issue, \$6,763,600 were fit and \$40,080,700 unfit for circulation. The proportion of notes fit for circulation is much smaller than in any preceding year. In the fiscal year 1878, out of \$204,022,700 assorted, \$152,437,300, or nearly three-fourths, consisted of notes fit for circulation, while during the last year they constituted but a little more than one seventh of the amount redeemed. This falling off is undoubtedly

due to the increased activity of business.

The proportion of notes of failed, liquidating, and reducing banks was greater than during any preceding year, the amount redeemed, which consisted principally of notes of reducing banks, being \$12,219,750, or more than one-fourth as great as the amount assorted and charged to the banks of issue. In no preceding year did this proportion reach one-seventh. This increase was due to the extensive reduction of bank circulation last spring during the pendency of the funding bill, when 140 banks within fifteen days surrendered nearly \$19,000,000 of their circulation by depositing lawful money for its retirement under the fourth

section of the act of June 20, 1874. The redemptions of this class of notes were increased by the fact that, as soon as practicable after the veto of the funding bill, the banks that had just reduced their circulation began to increase it again—at the expense of the government for preparing the notes—many of them upon the self-same bonds which they had just withdrawn. A large share of the newly issued notes immediately came in for redemption and was charged to the lawful money deposits previously made. In all cases where these notes were received in separate packages or in blocks the senders were required to pay the express charges on them, but in most instances they were so mixed with other notes that they could not be separated, and the charges for transporting and assorting them were defrayed out of the 5 per cent. By this means the banks which thus reduced and increased their circulation were enabled to escape the expense of redeeming their notes, and to throw it upon the banks which maintained their full cir-The amount of notes of reducing banks redeemed ran up from \$4,590,600 during the eight months preceding the large reduction of circulation to \$7,629,150 during the remaining four months of the fiscal year, and they still constitute about two-ninths of the national bank notes redeemed.

Aside from the mere difficulty of properly apportioning the expenses of redemption, the Treasurer is more firmly than ever of the conviction that the power now possessed by the national banks of throwing up their circulation at will is wrong in principle, unnecessary, and dangerous. Under a sound system of currency the circulation can be reduced only by the act of the holders in presenting it for redemption. Under the present system the issuers can suddenly and arbitrarily contract it to any extent; and it may be for their interest to do this when there is a legitimate demand for all the currency in circulation or even more. There may be—in fact often is—a profit to the banks in withdrawing and selling their bonds when the circulation is already deficient. A bank, having issued circulating notes, should be held responsible for them until they are redeemed or it goes out of business. There is no sound reason why, while continuing to do business, it should be permitted to throw the burden of the redemption of its promissory notes upon the United States, and there is no obligation resting upon the United States to assume that The privilege of surrendering circulation by depositing lawful money for its redemption is not necessary to correct redundancy in the circulation, since any real redundancy will be naturally corrected by the return of the notes by the holders. If a bank finds that its issues are being redeemed so rapidly as to destroy the profit, the obvious remedy is to refrain from reissuing the redeemed notes and to retire them as permitted by section 5167 of the Revised Statutes, which provides for their surrender in sums of \$1,000. Nor would the withdrawal of the privilege prevent banks from winding up their business and going into liquidation, inasmuch as the surrender of circulation by liquidating banks is made under prior and distinct provisions of law (sections 5220, 5221, and 5222, Revised Statutes).

Notwithstanding the decrease in redemptions and the increase in the proportion of notes of failed, liquidating, and reducing banks, on which no assessment can be levied, there was a slight decrease in the rate for the expenses of assorting as compared with the previous year. The number of notes assorted was 6,591,178, of which 539,245 were fit, and 6,051,933 unfit for circulation. The "costs for assorting," including salaries of bookkeepers, clerks, counters, and assorters, in the offices of the Treasurer and of the Comptroller of the Currency, printing and binding, stationery, and incidental expenses, were \$92,368.26, making the

average rate for each thousand notes \$14.01\frac{1}{3}, against \$14.38\frac{1}{4} for the fiscal year 1880. The "charges for transportation" were \$33,843.86, which, when assessed upon \$46,844,300, redeemed and assorted, makes an average rate of 72\frac{1}{4} cents for each \$1,000, as against  $63\frac{3.95}{10000}$  cents for the preceding year. The increase is due to the payment out of the 5 per cent. fund of the charges for transportation on all the notes received during the last half of the fiscal year. The following statement shows, in a summary form, the amount of notes of each class assorted and the expenses of redemption during each of the seven years which have elapsed since the passage of the act of June 20, 1874:

Fiscal year.	Notes fit for circulation.	Notes unfit for circulation.	Notes of failed, liquidating, and reduc- ing banks.	Total redeemed and assorted.	Total expenses of redemption.
1875	151, 842, 700 151, 786, 600 112, 293, 000	\$115, 109, 445 78, 643, 155 62, 518, 600 51, 629, 800 40, 162, 000 29, 860, 000 40, 080, 700	\$6, 579, 217 24, 927, 900 24, 439, 700 11, 852, 100 8, 281, 550 6, 500, 800 12, 219, 750	\$136, 902, 162 201, 049, 755 238, 801, 000 215, 268, 500 160, 736, 550 61, 338, 400 59, 064, 050	\$290, 965 37 365, 193 31 357, 066 10 317, 942 48 240, 949 95 143, 728 39 126, 212 12
Total	560, 355, 700	418, 003, 700	94, 801, 017	1, 073, 160, 417	1, 842, 057 72

The third section of the act of June 20, 1874, although requiring each national bank to "keep and have on deposit in the Treasury of the United States, in lawful money of the United States, a sum equal to five per centum of its circulation, to be held and used for the redemption of such circulation," declares further on that the bank notes on presentation to the Treasurer in multiples of \$1,000 " shall be redeemed in United States notes," and that each bank, on being notified of the redemption of its notes, shall deposit with the Treasurer "a sum in United States notes equal to the amount of its circulating notes so redeemed." the passage of the act it has always been considered by the Treasurer and acquiesced in by the banks that the intent of these provisions was to establish a system of redemption of national-bank notes in United States notes, and that the requirement that the 5 per cent. deposit should be maintained in lawful money was governed by the subsequent provisions in the same section specifying the particular kind of lawful money, to wit: United States notes, in which the bank notes should be redeemed and deposits for the credit of the 5 per cent. fund made. He accordingly required all deposits for this purpose to be made in United States notes, declining all tenders of gold or silver coin, and at the same time recognized the right of holders of national bank notes to demand and receive from him United States notes in redemption of their bank notes. The legality of this requirement having been questioned, the matter was referred to the Attorney-General, who held that both the redemption of bank notes and deposits for the 5 per cent. fund might be made in coin, declaring that "the government notes are promises to pay dollars; for such promises the thing promised may properly be substituted by the promisor."

A similar question arose concerning the deposits for the retirement of bank circulation under the fourth section of the act, which was decided in the same manner, so that a bank desiring to reduce its circulation may accomplish its object by depositing in the Treasury gold coin, or silver dollars, or United States notes. The original theory of this provision was that whenever the paper circulation of the country became excessive, the redundancy would be cured by the deposit by the banks of United States notes for the retirement of their circulation. Now, how-

ever, that the banks may reduce their circulation by the deposit of coin, it is evident that the original theory of the act is destroyed. In fact, the question was raised by banks desiring to reduce their circulation, who averred that it was difficult, if not impossible, to obtain United States notes for the purpose, plainly showing that banks may desire to reduce their circulation when the currency is already deficient.

#### RESTORATION OF SALARIES.

The Treasurer earnestly urges the restoration to their former amounts of the salaries of this office, which were reduced by the act of August 15, 1876.

The following is a list of the officers affected, their present salaries, the salaries proposed to be restored, and the amount required to effect the restoration in each case:

Title.		Present salary.	Former salary.	Amount asked to be restored to each.	Total.
Treasurer of the United States Assistant treasurer of the United States. Cashier Assistant cashier Five chiefs of division Chief clerk Teller Two tellers Two assistant tellers Assistant teller Two principal bookkeepers Principal bookkeeper Total increase	keeper	2. 500 2, 500 2, 250 2, 000 2, 500 2, 400 2, 400	\$6, 500 3, 800 3, 800 3, 500 2, 700 2, 700 2, 600 2, 350 2, 200 2, 600 2, 500	200 100 100 200 100 100	\$500 200 200 300 1,000 200 200 200 200 200 100 100

The number of persons affected by the reduction was 22, while the entire saving made was only \$3,900. Two of the positions have since been abolished, so that the number whose salaries it is proposed to restore is now 20, and the amount required but \$3,600. This amount, which represents only the salaries of three clerks of the lowest grade, and is insignificant when compared with the aggregate amount appropriated for salaries for this office, has nevertheless inflicted hardship upon 20 officers upon whom are devolved duties of great importance and pecuniary responsibility. How grave their responsibilities are may be inferred from the following statement of the duties of this office.

All moneys deposited in the Treasury of the United States at all of the various sub-treasuries and depositories are placed to the credit of the Treasurer of the United States and can be drawn out only by his draft; all of the various classes of paper currency of the United States are issued and redeemed through his office; he has custody of the bonds deposited by national banks for the security of their circulation and public deposits, and assesses and collects the semi-annual duty on their capital, circulation, and deposits; he redeems and assorts the notes of all the national banks, redeems all bonds of the United States maturing or called in for redemption, pays by his check all dividends of interest on registered stock of the 3½, 4, and 4½ per cent. funded loans, receives, counts, and examines all coupons from United States bonds paid by the several assistant treasurers, has custody of the Indian and other trust funds, pays the salaries and mileage of the members of the House of Representatives, and performs numerous other duties connected with the receipt, custody, and disbursement of the funds of the United States. In

addition to these general duties, he has direct charge of the Treasury Office at Washington, which performs substantially the same duties as those performed by a sub-treasury, including the receipt and payment of money, the keeping of accounts with disbursing officers, the payment of interest on the public debt, and the like. He also performs the duties formerly intrusted to the commissioners of the sinking fund of the District of Columbia, and, in this capacity, has entire charge and con-

trol of the management of the funded debt of the District.

During the last seven years the average annual amount in round numbers of United States currency issued by him has been \$94,000,000; of United States currency redeemed, \$111,000,000; of national bank notes redeemed and assorted, \$157,000,000; of United States bonds redeemed, \$183,617,626; of coin coupons paid, \$44,000,000; of quarterly interest checks issued, \$24,000,000 (the number issued during the last year being more than 305,000); of semi-annual duty collected, \$7,300,000; of bonds on deposit for security of national banks, \$371,000,000; of drafts drawn on warrants, \$673,000,000; and of moneys transferred from one office to another, under his direction, \$752,000,000. The aggregate amount involved in the above transactions was \$16,910,000,000. The average number of persons employed in his office during this period was 395.

In consideration of the growing importance and responsibility of his office, the salary of the Treasurer was increased from time to time until 1866, when it was fixed at \$6,500. The duties of the office were afterwards greatly increased by devolving upon the Treasurer the entire charge of the redemption and assortment of national-bank notes, under the act of June 20, 1874; the payment of dividends to the creditors of the Freedman's Savings Bank; the issuing of the checks for registered interest on the funded loans; the custody and payment of the funds of the District of Columbia; the management of the funded debt of the District, and the custody of the sinking fund for its extinguishment; the custody of the Indian trust fund and of the Pacific Railroad sinking funds; the issue and redemption of silver certificates; and the distribution of the standard silver dollars and fractional silver coin. This immense addition to the labors and responsibilities of his office did not, however, prevent the reduction of his salary, which was cut down, along with the others mentioned.

Since the appointment of the present Treasurer on July 1, 1877, the force of his office, notwithstanding the increase in its duties and responsibilities, has been reduced from 405 to 286 persons, and the amount annually expended for salaries, from \$473,927.86 to \$346,331.92, a reduction of nearly 30 per cent. in number, and of nearly 27 per cent. in amount. Since 1875 the number of employees has been reduced 262, or not far from one-half, and the annual appropriation has been reduced \$234,244. The amount asked for, to restore the salaries of the officers of this office, is but little more than one and one-half per cent. of this amount, and would still leave a net reduction in the appropriation as compared with 1875 of more than \$230,000. As these salaries were fixed by sections 2 and 3 of the act of March 3, 1875 (18 Statutes, 397, 399), the only action necessary to effect the restoration seems to be to insert in the appropriation bill the amount required to pay them at the rates fixed by law.

Very respectfully,

JAS. GILFILLAN, Treasurer of the United States.

Hon. WILLIAM WINDOM, Secretary of the Treasury.

## APPENDIX.

REPORT OF THE REGISTER OF THE TREASURY.

## REPORT

OF

# THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT, REGISTER'S OFFICE, November 10, 1881.

SIR: I have the honor to transmit herewith a report in detail of the business transacted in the several divisions of this office during the fiscal year ended on the 30th of June last.

The report of the loan division shows a great increase in the work of that division caused by the continuance of the 6 per cent. and 5 per cent. bonds at the reduced rate of  $3\frac{1}{2}$  per centum, which necessitated the issue of a new bond in every case showing the change in the rate of interest.

The aggregate issues amounted to nearly \$800,000,000, the number of bonds issued being over 140,000, while the number of bonds redeemed.

and canceled was 730,000.

The clerical force of the office was entirely inadequate to the performance of the work imposed upon it, and about forty clerks were detailed from other bureaus of the department during nearly the entire summer, and a great deal of extra labor was performed outside of the prescribed hours, for which, in my judgment, extra compensation should be paid.

Great credit is due for the prompt and satisfactory performance of this work to the clerks of this bureau engaged thereon, and also to

those detailed from other offices.

A superior class of clerks was required to perform the important and responsible duties devolved upon them, and such were generally furnished by the offices called on by the honorable Secretary for details, the Bureau of Internal Revenue especially cheerfully sending a large number of its most efficient and faithful clerks.

I take pleasure in reporting the devotion to duty and general good

conduct of the employés of the bureau.

#### LOAN DIVISION.

Total number of coupon and registered bonds issued	140, 842; 730, 106
Amount issued: Original issue, coupon and registered Direct issue of bonds continued at 3½ per cent Coupon bonds issued on transfer (Oregon war debt). #### TONNAGE DIVISION.

The total tonnage of the country exhibits a decrease of 10,299.53 tons, the enrolled tonnage having increased 7,848.07 tons, while the registered tonnage has decreased 17,224.13 tons, and the licensed, under 20 tons, 924.03 tons.

The barge tonnage has decreased 58,264.26 tons under the operation of the act of Congress approved June 30, 1879, leaving 47,964.73 tons as the estimated increase in the tonnage during the past year.

Below are given the totals for the last two years:

	1880.		1881.		
	Vessels.	Tons.	Vessels.	Tons.	
Registered	2, 378 22, 334	1, 352, 810 2, 715, 224	2, 326 21, 739	1, 335, 586. 18 2, 722, 148. 29	
Total	24, 712	4, 068, 034	24, 065	4, 057, 734. 47	

The comparison of the different classes of vessels is as follows:

	1	1880.		1881.
	Vessels.	Tons.	Vessels.	Tons.
Sailing vessels. Steam vessels. Canal-boats Barges.	4, 717 1, 235	2, 366, 258 1, 211, 558 106, 590 383, 628	16, 760 4, 860 1, 327 1, 118	2, 350, 393. 14 1, 264, 998. 25 116, 978. 73 325, 364. 35
Total	24, 712	4, 068, 034	24, 065	4, 057, 734. 47

It may be seen from the foregoing that the steam tonnage has increased 53,440.25 tons, the canal-boat tonnage 10,388.73 tons, while the sailing tonnage has decreased 15,864.86 tons, and the barge tonnage 58,263.65 tons.

The proportion of the sailing tonnage registered is 50 per centum, and the steam tonnage registered 12 per centum.

#### SHIP-BUILDING.

The following table exhibits the class, number, and tonnage of the vessels built during the last two years:

Class.	1880.		1881.	
	Vessels.	Tons.	Vessels.	Tons.
Sailing vessels Steam vessels Canal-boats Barges	17	59, 057 78, 854 1, 887 17, 612	493 444 57 114	81, 209. 57 118, 070. 55 10, 189. 94 70, 988. 58
Total	902.	157, 410	1, 108	280, 458. 64

From the foregoing it appears that the amount built during the past year was greater by 123,048.64 tons than that of the preceding year.

The tonnage built during the last two years in the several grand divisions of the country is shown below:

Division.	1880.		1881.	
	Vessels.	Tons.	Vessels.	Tons.
Atlantic and Gulf coasts	589 41 137 135	92, 777 8, 943 22, 899 32, 791	653 58 215 182	114, 348. 66 11, 417. 49 • 73, 503. 61 81, 188. 88
Total	902	157, 410	1, 108	280, 458. 64

The following table exhibits the iron tonnage built in the country since 1867:

Class.	1868.	1869.	1870.	1871.	1872.	1873.	1874.
Sailing vessels	2, 801	1, 039 3, 545	679 7, 602	2, 067 13, 412	12, 766	26, 548	33, 097
Total	. 2, 801	4, 584	8, 281	15, 479	12,766	26, 548	33, 097
	1875.	1876.	1877.	1878.	1879.	1880.	1881.
Sailing vessels	21, 632	21, 346	5, 927	26, 960	22, 008	44 25, 538	'36. 04 28,319. 84
Total	21, 632	21, 346	5, 927	26, 960	22, 008	25, 582	28,355. 88

Tables showing the amount of iron tonnage outstanding may be found in the Report on Commerce and Navigation.

#### THE FISHERIES.

The tonnage engaged in the fisheries during the last two years is as follows:

Fisheries.	1880.		1881.	
	Vessels.	Ťons.	Vessels.	Tons.
Cod and mackerel fisheries	2, 323 174	77, 539 38, 408	2, 120 173	76, 137. 16 38, 551. 52

Below is shown the amount of tonnage employed in the cod and mackerel fisheries, with the per centum of each State:

States.	Tonnage.	Per cent.
Maine New Hampshire Massachusetts Rhode Island Connecticut New York New Jersey California	1, 068. 78 39, 129. 77 2, 081. 34 4, 349. 44 7, 657. 72 24. 59	25. 5 1. 4 51. 3 2. 7 5. 7 10. 5 . 06 2. 87
Total	76, 137. 16	100

This shows a decrease of about 2 per cent. during the year.

The tonnage employed in the whale fisheries is given below:

· Customs districts.	1880.		1881.	
	Vessels.	Tons.	Vessels.	Tons.
Boston, Mass Barnstable, Mass Edgartown, Mass New Bedford, Mass New London, Conn	19 6 134	531 1, 817 1, 124 33, 337 1, 599	5 18 7 132 11	794. 87 1, 726. 97 1, 371. 19 32, 908. 88 1. 749. 61
Total	174	38, 408	173	38, 551. 52

Of the above, nearly 86 per cent. belongs to New Bedford. Fuller tables, showing the various classes of tonnage, may be found in the appendix to this report.

## DIVISION OF RECEIPTS AND EXPENDITURES.

The following statement exhibits the work of this division for the year ending June 30, 1881:

The number of warrants registered during the year for civil, diplomatic, miscellaneous, internal revenue, and public debt expenditures and repayments was  In the preceding year	
Increase	
The number of warrants registered for receipts from customs, lands, internal revenue, direct tax, and miscellaneous sources was	12, 881 11, 634
Increase	1,247
The number of warrants registered for payments and repayments in the War, Navy, and Interior (pension and Indian) Departments was	15, 036 11, 833
Increase	
The number of drafts registered was	39, 056 32, 179
Increase	
The number of journal pages required for the entry of accounts relating to the civil, diplomatic, internal revenue, miscellaneous, and public debt receipts and expenditures was  In the preceding year  Increase	,
Increase	526
The number of certificates furnished for settlement of accounts was In the preceding year	13, 341 13, 489
Decrease	148
The number of accounts received from the First and Fifth Auditors and Commissioner of the General Land Office was	,
Increase	1, 356

In the appendix will be found a statement of the receipts and expenditures of the government, as required by the standing order of the House of Representatives of December 30, 1791, and section 237 of the Revised Statutes; also, statements of the money expended and the number of persons employed, and the occupation and salary of each person at each custom-house, as required by section 258 of the Revised Statutes.

Very respectfully, your obedient servant,

B. K. BRUCE, Register.

Hon. WILLIAM WINDOM, Secretary of the Treasury.
