Leaving	. 47, 852, 407 08

Against which there will remain on June 30, 1893, unexpended balances of continuing appropriations for heavy ordnance, rivers and harbors, increase of the Navy and public buildings amounting to \$44,000,000.00.

No account is made in the foregoing of the requirements of the sinking fund for 1894, amounting to \$48,600,000 beyond the redemption of past due bonds, fractional currency, and national bank notes estimated at \$5,000,000.

The estimated receipts are based upon conditions prevailing prior to the late election. Public opinion having decreed a change of policy, particularly in the tariff laws, the altered conditions resulting therefrom render it impossible at the present time to estimate the annual income with any marked degree of accuracy, and it is impossible to predict the effect that such proposed radical changes would have upon the future revenues of the Government.

Under all of the circumstances, it would be inappropriate in me to undertake to make an estimate other than as already stated, but it is not out of place to remark that the business community having a full knowledge of proposed tariff reductions, the inevitable result will be a falling off in importations and a corresponding decrease in the revenues. The extent of this decrease no one will be able to measure until business shall again adjust itself to new conditions.

A careful review of all the facts fully justifies the opinion that the large increase of receipts ascribed to the marvelous prosperity of the country under the present revenue system would, if continued, enable the Department during the coming fiscal year to meet all obligations without the slightest impairment of its cash, and thereafter continue to show a material improvement in its condition.

The estimates of appropriations for the fiscal year ending June 30, 1894, are based upon the reports of the heads of Departments and other data at command. They are believed to be only such as the needs of the public service demand.

Legislation will determine the amount to be appropriated and administration will in many instances define the sum to be expended in any one year. The committees of Congress can, with the data here furnished, more closely determine the appropriations to be made for the year ending June 30, 1894, and also of expenditures to be made therefrom, and from continuing appropriations above referred to, than it is possible for the Department to do at this time.

SINKING FUND.

The act of February 25, 1862, section 5 (12 Stat., 346), provides that all duties on imported goods shall be paid in coin, and that the coin so paid shall be set apart as a special fund and applied, first, to the payment of interest on bonds and notes of the United States; and second, "to the purchase or payment of one per centum of the entire debt of the United States, to be made within each fiscal year after the first day of July, eighteen hundred and sixty-two, which is to be set apart as a sinking fund, and the interest of which shall in like manner be applied to the purchase or payment of the public debt, as the Secretary of the Treasury shall from time to time direct."

The total requirements of the fund to June 30, 1892, as shown by the appended table, aggregate \$924,394,426.34. The bonds and other securities annually applied to the fund, including interest paid thereon, aggregate \$935,337,061.20, and the total redemption of the debt including amounts applied to the fund since August 31, 1865, when the debt attained its highest point, aggregated \$1,914,905,107.83, or \$990,510,681.49 more than was required to be paid by the terms of the sinking fund act. It is hardly probable that more than about \$7,000,000 can be credited to the fund during the present fiscal year as against a

legal requirement exceeding \$48,000,000, and further applications to the fund during succeeding years must necessarily be limited to such small sums as may from time to time be paid for past due bonds, fractional currency, and national bank notes redeemed under the act of July 14, 1890.

The act of March 3, 1881 (21 Stat. 457), provides that the Secretary of the Treasury may at any time apply the surplus money in the Treasury not otherwise appropriated to the purchase or redemption of United States bonds. In view of this provision and of the very large decrease of the debt already effected in excess of the legal requirements of the act, coupled with the probable future condition of the national finances, I would strongly urge its repeal. Sound policy would seem to dictate this course. The conditions which called for its enactment have long since passed away, and no valid reason for its continuance now exists. I therefore recommend its unconditional repeal.

Statement showing the annual requirements of the sinking fund, the amount of bonds and other securities applied thereto, the interest and premium paid thereon, and the total amount expended for the fund from April 1, 1869, to June 30, 1892.

One of the embarrassments to the Treasury, in the opinion of the Secretary, is the inability, with the limited amount of cash on hand above the one-hundred-million reserve, to keep up a sufficient gold supply. When the demand comes for the exportation of gold the Treasury is called upon to furnish it. If this demand should prove to be as large

the coming year as it has been for the past two years, gold in the Treasury would be diminished to or below the reserve line.

The status of this reserve and its amount, have recently been subjects of discussion. In the bank act of 1882 Congress gave expression to its belief that \$100,000,000 in gold was a suitable reserve; by providing that whenever the amount of gold in the Treasury should fall below that sum the issue of gold certificates should cease. In 1885 the then Secretary of the Treasury adopted the practice of reporting \$100,000,000 of the gold in the Treasury as a "reserve for the redemption of United States notes," and recently the majority of the Judiciary Committee of the present House of Representatives expressed the opinion that under existing law the maintenance of this reserve is obligatory.

But, if \$100,000,000 in gold was a suitable or necessary reserve in 1882 and in 1885, it would seem clear that a greater reserve is necessary now. It should be remembered that since 1882 we have added to our silver circulation the sum of \$259,016,182 in standard silver dollars coined under the old silver act of 1878. These dollars are nearly all outstanding, and largely represented by silver certificates. We have also increased the legal-tender paper circulation by issuing about \$120,000,000 of the Treasury notes authorized by the act of July 14, 1890, and to this we are adding about four millions each month in payment of silver bullion purchased.

It is true that silver certificates are not redeemable in gold, and that the Treasury notes of 1890 are redeemable in coin; but since it has been declared to be the established policy of the United States to maintain the two metals, silver and gold, on a parity with each other, it is obvious that this large addition to our circulation has increased the possible charge upon our gold reserve.

In view, therefore, of these increased and increasing liabilities, the reserve in the Treasury for the redemption of the Government obligations should, in my opinion, be increased to the extent of at least 20 per cent of the amount of Treasury notes issued and to be issued under the act of July 14, 1890.

As will be seen by the estimates submitted, the receipts of the current and the next fiscal year are not likely, if present conditions continue, to fall below expenditures. Yet in view of the fact that the surplus for this year will be small, upon the basis stated, with the probability of a falling off in receipts for causes mentioned, I think the revenues should be so increased as to enable the Treasury Department to maintain a gold reserve of not less than \$125,000,000, and to maintain a comfortable working balance in the Treasury cash. As a general revision of our customs laws is now probable, I do not feel at liberty to suggest any special method for increasing the revenue, though I should otherwise think that an additional tax on whisky, which could be collected without additional cost, would furnish an easy method.

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the Treasurer of the United States, 9 subtreasury officers, and 202 national-bank depositaries. The number of such depositaries on November 1, 1892, was 159, and the amount of public moneys held by them on that date, including those to credit of the Treasurer's general account and United States disbursing officers, was \$15,862,414.81, a reduction, since November 1, 1891, in number of depositaries of 24 and in amount of holdings of \$4,515,688.87.

LOANS AND CURRENCY.

Since March 1, 1889, there have been purchased and canceled United States bonds of the face value of \$233,729,150, for which there was expended the sum of \$270,952,431.20. Of the bonds so purchased \$121,-615,950 were four per cents and \$112,113,200 four and one-half per cents. The expenditure was \$55,352,493.51 less than the sum which would be required to redeem the bonds and pay interest thereon to the date of their maturity.

During the same period there were redeemed at par \$25,504,700 four and one-half per cent bonds, and a further amount of \$25,364,500 of the same loan has been continued during the pleasure of the Government, to bear interest at the rate of 2 per cent per annum. The annual interest charge March 1, 1889, was \$34,578,459.80; it is now \$22,893,-990.80.

The volume of money in circulation has increased during the twelve months ended November 1, 1892, as shown by the following table:

Monen	in	circulation	1

	Nov. 1, 1891.	Nov. 1, 1892.
Gold coin Standard silver dollars Subsidiary silver Gold certificates Silver certificates Treasury notes, 1890. United States notes Currency certificates, June 8, 1872. National bank notes	62, 135, 461 62, 105, 136 136, 100, 319 321, 142, 642 66, 473, 484 332, 553, 989	\$411, 252, 197 61, 672, 455 65, 985, 404 120, 255, 303 114, 557, 422 332, 080, 234 10, 550, 000 165, 224, 137

The principal changes are in gold certificates and Treasury notes of the act of July 14, 1890. Of the former there is a decrease of \$15,844,-970, and of the latter an increase of \$48,093,939.

The increase in circulation since March 1, 1889, is \$201,933,839, of which \$152,048,345 is paper money. The amount of paper money held in the Treasury March 1, 1889, was nearly thirty millions greater than on November 1, 1892, while the net increase in the issue was A notable fact connected with this increase is the large \$122,366,433. quantity of notes of the smaller denominations added to the volume of money, while at the same time there has been a decrease in the higher denominations. This is shown in the accompanying table:

Table showing the amounts of paper currency, by denominations, outstanding on March 1, 1889, and on November 1, 1892, and the changes during that period.

PRECIOUS METALS.

Deposits and purchases.

The value of the gold deposited at the mints and assay offices during the fiscal year 1892, was \$66,476,975.98, of which \$61,131,460.04 were original deposits, and \$5,345,515.94 were redeposits.

Of the original deposits, \$31,961,546.11 were the product of our own mines; \$24,975,342.39 foreign gold coin and bullion; \$557,967.86 light weight domestic gold coin; and \$3,636,603.68 old material.

The deposits and purchases of silver aggregated 72,121,268.03 standard ounces, of the coining value of \$83,922,930.01, including 640,461.19 standard ounces, of the coining value of \$745,263.92 redeposits.

Of the silver received, 63,130,608.86 standard ounces, of the coining value of \$73,461,072.08, were the product of our own mines; 2,118,077.89 standard ounces, of the coining value of \$2,464,672.45, were foreign silver bullion and coin; 5,593,907.71 standard ounces, of the coining value of \$6,509,274.43, were uncurrent domestic coins; 1,921.53 standard ounces, of the value of \$2,235.96, were trade dollars; and 636,290.85 standard ounces, of the coining value of \$740,411.17, consisted of old plate, jewelry, etc.

Coinage.

The coinage of the mints during the last fiscal year aggregated 113,-556,124 pieces, valued as follows:

Gold	 	\$35, 506, 987, 50
Silver		
Subsidiary silver	 *****	6, 659, 811. 60
Minor coins	 	1, 296, 710. 42

The number of silver dollars coined during the fiscal year from bullion purchased under the act of July 14, 1890, was 3,450,995, and from

trade-dollar bullion 4,878,472, a total of 8,329,467 silver dollars upon which the seigniorage or profit was \$930,487.41.

The total coinage of silver dollars from March 1, 1878, to November 1, 1892, has been as follows:

Act of February 28,	1878			\$378, 166, 793
Act of July 14, 1890				
Act of March 3, 1891	l (trade-dollar b	ullion)		5, 078, 472
			• • •	·

The net profit on the coinage of silver during the fourteen years ended June 30, 1892, including the balances in the coinage mints on July 1, 1878, has aggregated \$72,736,065.

Bars.

In addition to the coinage, gold bars were manufactured during the last fiscal year, of the value of \$36,125,552.39, and silver bars of the value of \$7,130,270.12, a total of \$43,255,822.51.

Purchases of silver.

The purchases of silver during the last year were made under the provisions of the act of July 14, 1890, requiring the purchase of 4,500,000 ounces in each month.

The total amount purchased was 54, 335, 748 fine ounces, costing. \$51,106,608, the average cost being 94 cents per ounce.

The total amount of silver purchased under the act of July 14, 1890, from August 13, 1890, to November 1, 1892, has been 120, 479, 981 fine ounces, costing \$116,783,590, an average cost of \$0.969 per ounce.

Price of silver.

The price of silver fluctuated during the last fiscal year from \$1.02 to \$0.855 per fine ounce, a variation of 16½ cents an ounce.

Since July 1, 1892, the price still further declined until, on August 11, 1892, it reached 83 cents a fine ounce, the lowest price on record.

The price November 1, 1892, was 86 cents per fine ounce.

The average price of silver during the year, based upon London quotations, was \$0.937 a fine ounce.

Imports and exports.

The net loss of gold by exports during the fiscal year was only \$142,-654 against a loss in the preceding fiscal year of \$67,946,768. The net exports of silver were \$5,035,828, against a net import in the previous year of \$2,745,365, a difference of \$7,781,193.

. Earnings and expenditures.

The total expenditures for the support of the mint service for the last fiscal year aggregated \$1,106,538 against \$1,335,910 in the preceding year, a reduction of expenses of \$229,371.

The total earnings of the mints and assay offices from all sources were \$2,294,288, and the total expenditures and losses of all kinds \$1,500,494, a net profit of earnings over expenditures of \$793,794.

Product of gold and silver.

The mines of the United States produced during the calendar year 1891 precious metals as follows:

	Fine ounces.	Commercial value.	Coining value.
Gold	 1, 604, 840 58, 330, 000	\$33, 175, 000 57, 630, 040	\$33, 175, 000
Suver	 30, 300, 000	37,030,040	75, 416, 565

The product of the mines and reduction works of the United States, including precious metals contained in foreign material reduced in the United States, was:

The product of gold and silver in the world, based upon returns to the Director of the Mint, was, the same year:

	Fine ounces.	Commercial value.	Coining value.
GoldSilver	6, 102, 893	\$126, 159, 000	\$126, 159, 000
	143, 994, 000	142, 266, 000	186, 174, 000

World's coinage.

The coinage of gold and silver by the various countries of the world aggregate, for the calendar year 1891, so far as reports have been received:

Gold	······································	\$119, 183, 735
Silver		135, 008, 142

Metallic stock of the United States.

The stock of gold and silver in the United States, based upon official tabulations brought forward from year to year, was, on November 1, 1892, approximately:

Gold	••••••	•••••	• • • • • • • • • • • • • • • • • • • •	\$656, 041, 863
Silver			••••••••	587, 614, 951

Use of gold and silver in the arts and manufactures.

According to the information gathered by the Bureau of the Mint, the value of the gold and silver used in the industrial arts in the United States during the last calendaryear was, approximately: gold, \$19,700,000, and silver, \$9,630,000, of which \$10,697,679 gold and \$7,289,073 silver were new bullion.

MONETARY CONFERENCE.

As early as the month of April, 1891, investigation was begun by this Department to ascertain the state of public sentiment in Europe regarding the propriety of an agreement to hold a monetary conference of representatives of the leading nations on the subject of the money uses of silver.

Upon the ascertainment that the leading nations were favorably disposed to the holding of such a conference, the United States, addressed an invitation, through the State Department, to the governments of Europe, of Mexico, and Turkey.

All of the countries to which this invitation was addressed accepted it.

Upon conference with the governments named, after considerable delay, occasioned by a variety of causes, Brussels, Belgium, was agreed upon as the place, and November 22, 1892, as the time, for the conference to assemble.

For this country five commissioners were appointed, as follows: Hon. Wm. B. Allison of Iowa, Hon. John P. Jones of Nevada, Hon. James B. McCreary of Kentucky, Mr. Henry W. Cannon of New York, and E. Benjamin Andrews of Rhode Island. By usage the American minister, Mr. Terrill, was added.

This conference is now in session; as yet little is known as to what its action may be beyond the general fact that the subject of the better use of silver as a money metal is receiving its earnest attention.

Whatever may be the outcome of the conference, it is safe to predict that a clearer idea will be had of the views and purposes of the countries represented.

NATIONAL BANKS.

The report of the Comptroller of the Currency* gives complete and detailed information as to the organization, condition, and management of all active and failed national banks during the year ended October 31, 1892.

One hundred and sixty-three banks, with an aggregate capital of \$15,285,000, were organized during the year, 53 went into voluntary liquidation and 17 became insolvent, leaving a net increase of 93 for the year.

Of the new banks organized during the year, about one-half were west of the Mississippi River and 35 per cent were in the Southern States.

The total number of banks in operation October 31, 1892, was 3,788, having an aggregate capital of \$693,868,665, and surplus and undi-

vided profits of \$340,524,179. The total amount of individual deposits was \$1,765,422,983; total bank deposits, \$530,653,202; and total resources, \$3,510,094,897. The national bank circulation outstanding shows a net increase of \$10,487,226, and the gold held by the banks, as compared with last year, shows an increase of \$21,994,115. Surplus and undivided profits, increase, \$9,663,020; individual deposits, increase, \$177,104,902; bank deposits, increase, \$100,058,428.

Of the liabilities of the 17 banks that failed during the year twothirds of the amount belonged to the Maverick National Bank of Boson. Aside from this one institution, the failures were not of a serious character. The estimated value of the assets indicate that over 85 per cent will be paid to creditors. The Maverick National Bank as already paid 85 per cent, and there is a probability of an additional dividend of from 2 to 5 per cent.

The domestic exchange drawn by banks for the year ended June 30, 1892, was \$12,994,959,590, an increase over the preceding year of over 10 per cent.

The following recommendations of the Comptroller are approved:

- (1) That the minimum deposit of Government bonds required of national banks be \$1,000 for banks of \$50,000 capital, and \$5,000 for banks whose capital exceeds \$50,000.
- (2) That banks be allowed to issue circulating notes equal to the par value of the bonds held to secure circulation.
- (3) That the monthly withdrawal of bonds pledged to secure circulation shall not exceed \$4,500,000 in the aggregate.
- (4) The banks should only be assessed in amount sufficient to defray the actual cost to the Government of providing circulation and maintaining Government supervision, and the tax should be placed upon capital as well as circulation.
- (5) That the limit of the amount which may be loaned to any person, company, corporation, or firm to 10 per cent of the capital stock of the bank be so amended as to read "capital and surplus," and also that an exception be made in favor of temporary loans secured by collateral in our largest business centers.
- (6) That the Government issue bonds having 20, 30, and 40 years to run, at a low rate of interest, with which to retire the present bonded debt of the United States, which bonds may be used as a basis to secure national bank circulation.

The Comptroller shows that by exchanging a 2 per cent bond, having the same length of time to run, for the 4 per cent bonds, at the

market value of each, on the 31st of October, 1892, the Government could have saved \$67,161,551.47. In addition to furnishing a permanent basis for circulation, it would prove a great saving to the tax-payers of the country.

- (7) That the Comptroller of the Currency, with the approval of the Secretary of the Treasury, be empowered to remove officers and directors of banks for violations of law, leaving the vacancy so caused to be filled in the usual way, first giving such officers and directors an opportunity to be heard.
- (8) That bank examiners be required to take an oath of office before entering upon the discharge of their duties, and give bond in such amount and with such sureties as the Comptroller of the Currency may require.
- (9) That the Comptroller of the Currency be allowed to appoint two general examiners, of conspicuous ability and experience, to be paid out of the public funds, whose duty it shall be to visit, assist, and supervise the various examiners in their several districts, in order to secure uniformity in method and greater efficiency in work.
- (10) That the law be so amended as to prohibit officers and employés of a bank from borrowing from its funds in any manner except upon application to and approval by the board of directors.
- (11) In order to facilitate the collection of assessments upon stockholders of failed national banks, that the receivers of such banks be required to file with the county clerk or register of each county in which any stockholder may reside, a statement showing the names of the stockholders who reside in such county, and the amount of the stock held by them respectively, the filing of such statement to constitute a lien upon any realty of said stockholder, which lien may be vacated upon motion and giving proper bond, and shall be discharged by the receiver upon payment of the assessment.
- (12) That section 380, United States Revised Statutes, be so amended as to leave it discretionary with the Comptroller of the Currency whether United States attorneys shall be employed by receivers of failed national banks.

The Comptroller submits a table showing the location of the various failed banks, and the location of the various United States attorneys in whose districts they are situated, from which it appears that when the district attorney does not reside in the same place, as happens in a few instances, the distances range from 28 to 435 miles, a great majority of the cases being over 100 miles, and the average being above 200 miles, showing the physical impossibility of these attorneys to properly repre-

sent these trusts. This results in the employment of local attorneys and the payment of double fees.

The Comptroller's argument in favor of national bank circulation, to which special attention is invited, shows that it is more elastic, more economical, and better calculated to serve the interests of the public.

He criticises and condemns State bank circulation from a historical standpoint, and shows the weakness and impolicy of Congress dividing with the forty-four State sovereignties the responsibility of furnishing the people with money; that the currency furnished by this chain of sovereignties would be no stronger or better than that of the weakest link.

Congress, by the Constitution, must furnish all money, of full debt-paying power, and by every consideration of public policy and public necessity should furnish all the money that the people require. The Government can only redeem its bonds in coin of standard value; it can not issue money except in exchange for some value—for something purchased. Every increase or dimunition of the currency of the country by the General Government must of necessity be arbitrary, and hence a currency so created is nonelastic. The experience of the Government in purchasing silver as a basis for coinage, or for issuing Treasury notes, does not commend itself on the score of economy, and the depreciation in the value of silver in the hands of the Government is in sharp contrast with the more than \$72,000,000 paid into the Treasury of the United States by the national banks as a tax upon circulation.

The subject of bank examiners, the duties of directors, and unsafe methods of banking are discussed at length.

Financial disturbances abroad occasioned larger exports of gold, in addition to the large merchandise balance in our favor. The after effects of the quasi-panic of 1890–'91, and the threatened visitation of cholera, have affected trade and embarrassed business to a certain extent; nevertheless the year has been one of general prosperity. Speculation has been held in check and business has been undergoing a hardening process. The results, as reflected in the banks, show steady growth and increased strength of business conditions.

CUSTOMS ADMINISTRATION.

The benefits accruing from the operation of the act of June 10, 1890, known as the "customs administrative act," have been so decided as to have demonstrated the wisdom of its enactment. The reports that have reached this Department show that both the importers and customs officers have obtained relief from many evils which it was intended to remedy, and that undervaluations have been decreased. Special attention is

invited to the annual report of the General Appraisers* as showing the valuable service they are rendering and emphasizing the wisdom of the establishment of this tribunal. Certain minor features of this act, however, in my opinion, should be amended, especially sections 7, 8, 15, and 19, to which I invited the attention of Congress in my last annual report. I renew the recommendation I then made, that section 7 be so modified as to limit the additional duty to not more than 100 per cent; that section 8 be repealed, as experience has shown that it is impossible of practical administration; that section 15 be so amended as to authorize the taking of testimony on appeal from the decision of the Board of General Appraisers by commissioners appointed by the court for that purpose, as well as by one of the general appraisers; and that section 19, which imposes additional duties on unusual coverings, be modified so that such coverings shall pay but a single duty, at the rate to which they would be subject if imported separately, not less than that imposed upon their contents. In this connection, I renew the recommendations of my predecessors and myself as to certain other amendments of the customs laws. Among such recommendations I invite especial attention to the following, which I deem of urgent importance:

First. The abolition of all fees, commissions, emoluments, and perquisites now authorized or allowed to collectors or surveyors of customs and the compensation of these officers by fixed salaries.

Second. The consolidation of the customs districts demanded alike for reasons of economy and the changed condition of commerce and transportation. This might be accomplished by authorizing the Secretary of the Treasury to change the boundaries of customs districts, and to abolish districts when the expenditures exceed the receipts therein. The Secretary of the Treasury should also have authority to designate or discontinue minor ports within collection districts.

Third. The revision and codification of the customs and navigation laws which I especially urge with such modification and new provisions as practice and experience have demonstrated are required for the efficiency of the service. The original legislation on these subjects dates from the foundation of the Government; subsequent partial and fragmentary legislation has introduced confusion and doubt as to the true intent of the law, and consequent embarrassment in its administration. The result has been litigation and loss to business interests that would be in a great measure obviated by the action I recommend.

These laws are now scattered through the statutes and should be brought together and enacted in one harmonious code. This subject

has heretofore been called to the attention of Congress, but the details of the work are of a kind that can hardly receive attention from a committee of Congress necessarily engaged upon other duties. I therefore recommend that provision be made for a revision and codification of these laws, by a commission or otherwise, to be reported to Congress at an early date.

FOREIGN COMMERCE.

The value of our foreign commerce (imports and exports of merchandise) during the last fiscal year was greater than for any previous year. It amounted to \$1,857,680,610, as against \$1,729,397,006 during the year 1891, an increase of \$128,283,604.

The value of imports of merchandise during the last fiscal year amounted to \$827,402,462, as against \$844,916,196 during the fiscal year 1891, a decrease of \$17,513,734.

The value of exports of merchandise during the last fiscal year was the largest in the history of our commerce, amounting to \$1,030,278,148, as against \$884,480,810 during the fiscal year 1891, an increase of \$145,797,338.

The value of the exports of merchandise exceeded the value of imports of merchandise \$202,875,686.

The value of the imports and exports of merchandise and specie during the last four years ending June 30, has been as follows:

Merchandise.

· · · · · · · · · · · · · · · · · · ·	1889.	1890.	1891.	1892.
Exports— Domestic	\$ 730, 282, 609	\$845, 293, 828	\$872, 270, 283	\$1,015,732,011

	,, ,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	,,	, , , , , , , , , , , , ,	- , ,-,-,-	, .,,	, ===,==,==

It will be observed that the value of our total trade in merchandise with the United Kingdom amounted to \$655,616,213, of which the value of exports was \$499,315,332, and the value of imports \$156,300,-881, showing an excess in exports of \$343,014,451.

Our import and export trade with the United Kingdom forms 35.3 per cent of such trade with all nations, and about 53 per cent of such trade with all Europe. Our trade with North America, including the

West Indies, stands next in value, followed by that with South America and that with Asia and Oceanica. Our trade with Germany showed an excess of exports of \$22,614,005, with France of \$30,571,914, and with Belgium and the Netherlands together of \$69,083,970.

In our total trade with Europe the excess of exports over imports was \$458,994,681.

Our commerce in merchandise with North America, including Mexico, Central America, and the West Indies, amounted to \$279,620,-365, of which, the value of imports was \$174,054,181, and of exports \$105,566,184, an excess of imports of \$68,487,997; but if our export trade by land carriage with Mexico and Canada had been correctly ascertained by means of an adequate law for that purpose, it is estimated that the value of our exports to the countries of North America would appear about \$133,000,000, and the total value of the exports and imports to and from the same countries would be about \$307,000,000, which would reduce the excess of imports to about \$41,000,000 instead of \$68,000,000 as it now appears.

Our total trade with South America in merchandise amounted to \$183,875,373, of which the value of imports was \$150,727,759, and of exports \$33,147,614, an excess of imports of \$117,580,145.

Values of the imports and exports of merchandise of the United States carried in cars and other land vehicles during each fiscal year from 1871 to 1892, inclusive.

Year ending June 30—	Imports and exports in cars and other land vehicles.	Year ending June 30—	Imports and exports in cars and other land vehicles.

Exports.

The total value of exports of domestic merchandise was \$1,015,732,011, an increase of \$143,461,728, and was the largest in the history of our commerce.

The material increase or decrease in the values of the principal articles of domestic exports was, during the last fiscal year, as follows:

Imports.

During the last fiscal year the value of imports of merchandise was \$827,402,462, a decrease of \$17,513,734 from the imports of the fiscal year 1891.

The value of free merchandise imported was \$457,999,658, and of dutiable was \$369,402,804, an increase in the value of free merchandise of \$91,758,306, and a decrease in the value of dutiable goods of \$109,272,040, caused mainly by the transfer of sugar from the dutiable to the free list by the new tariff.

The material increase or decrease in the value of the principal classes of free and dutiable imports during the year ending June 30, 1892, as compared with 1891, was as follows:

Increase in-

Free of duty:	
Sugar and molasses	\$61, 386, 453 30, 677, 830 1, 812, 286 1, 172, 423
Dutiable: Flax, hemp, and jute, manufactures of	2, 269, 123
Tobacco, leaf, suitable for cigar wrappers	2, 166, 058
Decrease in—	
Free of duty:	
Hides and skins other than fur skins	1,053,964 -789,307
Dutiable:	
Sugar and molasses. Iron and steel, and manufactures of	24, 820, 275
Silk, manufactures of	5, 494, 201
Tobacco, leaf, other than suitable for cigar wrappers Fruits, including nuts Vegetables	5, 117, 797 4, 265, 994 4, 193, 147

XLIV REPORT OF THE SECRETARY OF THE TREASURY.

Dutiable—Continucd.		
Flax, hemp, and jute, unmanufactured	\$3, 335, 034	
Barley	1, 630, 553	
Seeds	1,606,133	
Rice	1, 480, 560

TRADE WITH AMERICAN COUNTRIES SOUTH OF THE UNITED STATES.

The following table exhibits the total values of our import and export trade in merchandise with countries to the south of us during the years ended June 30, 1891 and 1892.

The total value of our imports of merchandise from Mexico, Central America, the West Indies, and South American States, during the fiscal year 1892, amounted to \$288,894,902, or 34.92 per cent of our total imports of merchandise.

The value of our exports of merchandise to these countries during the same year was \$92,545,868, or 8.98 per cent of the value of our total exports of merchandise.

Our total imports and exports of merchandise from and to these countries during the same year amounted to \$381,440,770, or 20.53 per cent of our total imports and exports of merchandise.

It will be seen that the excess of imports of merchandise from these countries over our exports to them during 1892 amounted to \$196,349,034, in other words, our imports of merchandise were 75.74 per cent, and exports 24.26 per cent, of the total trade with these countries, and we imported merchandise to the value of \$3.12 for every dollar in value exported to these countries.

The excess of imports over exports of merchandise for the fiscal year 1891 was \$152,099,061. For the fiscal year 1890 this excess was \$108.054.472.

Our commerce with this entire group of countries shows a gradual increase of both imports and exports of merchandise since 1870.

During the year 1870 the value of imports was \$117,398,951 and of exports \$55,140,322, an excess of imports of \$62,258,629.

During the year 1880 the value of imports was \$178,985,906 and of exports \$61,546,474, an excess of \$117,439,432 in imports.

The per cent of our commerce with these countries, as compared with our total commerce was in 1870, 20.82; in 1880, 15.99, and in 1892, 20.53.

Table showing the value of imports and exports of merchandise in the trade of the United States with Mexico, Central America, the West Indies, and South America, and the excess of imports or of exports, during the years ending June 30, 1890, 1891, and 1892.

TRADE WITH COUNTRIES WITH WHICH RECIPROCITY TREATIES, ARE IN FORCE.

A careful analysis of the statistics of our imports and exports from and to the countries with which reciprocity treaties have been established, from the commencement of such treaties to September 30, 1892, inclusive, shows that the predictions of the friends of this new policy have been largely verified, and that there has been a very gratifying increase in our commerce with these countries in both imports and exports. These values will appear more fully in the following detailed statement, in which a comparison of the value of our imports and exports from and to these countries during the period since the treaties have been in effect is made, with corresponding prior periods.

Value of the trade of the United States in merchandise with the following countries since the reciprocity treaties therewith went into effect, compared with the value of the trade during the corresponding preceding periods.

⁽a) As trade with Bermuda can not be separately stated before July 1, 1891, it is, for better comarison, included with British West Indies in 1892 for the six months ending June 30.
(b) Includes imports from Bermuda, \$441, 936.
(c) Includes exports to Bermuda, \$401,986.

From this table it appears that the total values of our imports and domestic exports of merchandise, in our trade with countries with which we have reciprocity treaties, during the periods since those treaties have been in force to September 30, 1892, as compared with corresponding periods, prior to the treaties, have been as follows:

		Prior to treaty.	Since treaty.	Increase.	Decrease.	Per cent of increase+ decrease-
Domestic exports— Germany and	Austria-Hun-	A 1.7 0.70 P.C.		240 240 200		Per cent.
American coun Imports— Germany and	tries	\$47, 673, 756 44, 160, 285	\$57, 993, 064 54, 613, 598			+21.65 +23.67
gary American coun		68, 566, 596 196, 079, 743	59, 674, 391 289, 266, 473		8,892,205	-12.97 +47.52

Exports.

It will be observed that the value of our exports to Germany and Austria-Hungary during the periods since the treaty of reciprocity has been in effect with these countries has increased \$10,319,308, as compared with corresponding periods prior to the treaty.

The increase of exports of domestic products to Germany consisted largely of breadstuffs and provisions.

There was an increase of \$10,453,313 in the value of our domestic exports to the American countries with which reciprocity treaties have been made, as compared with corresponding prior periods, and an increase of \$20,772,621 in the total value of our domestic exports to all the countries with which reciprocity treaties have been made, as compared with the corresponding prior periods.

The increase of domestic exports to the American countries named consisted mainly of wheat, flour, meat, and dairy products, bacon, hams and lard, iron and steel and manufactures of, and lumber and manufactures of.

With respect to the American countries, the most marked change in value of exports and imports was in our trade with Brazil and Cuba. The increase in value of exports to Brazil, during the operation of the reciprocity treaty, up to September 30, 1892, over the corresponding period before the treaty, was \$1,493,518, and the increase in value of exports to Cuba for the thirteen months ended September 30, 1892, after the treaty of reciprocity, over the value of like exports during the corresponding prior period, was \$9,114,350.

In our trade with Puerto Rico since the treaty there has been an increase in value of exports of \$472,512; and with Santo Domingo an increase of \$182,549.

There has been a decrease in our export trade to Salvador, Guatemala, Honduras, and a large decrease in imports and exports of merchandise from and to the British West Indies and British Guiana. The decrease of our trade with the two latter countries has been much larger in imports than in exports.

Imports.

During the period since the reciprocity treaties have been in effect, it appears that there has also been a very large increase in the value of our imports from countries with which we have these treaties, amounting in the aggregate to \$84,294,525. It will further be observed that this increase of imports is entirely from the American countries with which reciprocal relations have been established.

While there has been an increase in the value of our domestic exports to Germany and Austria-Hungary, amounting to \$10,315,199 to the former country and \$4,109 to the latter, there has been during the same time a decrease of \$7,650,974 in the value of our imports from Germany and of \$1,241,231 from Austria Hungary.

There has been a very large increase in the value of our imports of merchandise from Brazil during the eighteen months the reciprocity treaty has been in effect up to September 30, 1892, over the corresponding prior period, amounting to \$76,348,581.

In our trade with Cuba there has been an increase in imports of \$15,955,969 during the thirteen months ended September 30, 1892, over the corresponding prior period; our imports from Santo Domingo increased \$1,552,665 during the same period; and from Puerto Rico in-

creased \$314,969 during the thirteen months since the treaty, and from Salvador during the first eight months under the reciprocity treaty increased \$844,704.

It will be noticed the most marked increase in the value of imports since the reciprocity treaties went into effect, has been in our trade with Brazil and Cuba.

While there is a large disparity between the increase in the value of our imports and exports, it should be remembered that our imports from these American countries are of articles which we must necessarily purchase from them in any event, as they are articles of necessity, which are to but small extent, if at all, produced in this country, and not to be procured elsewhere than in southern countries. These imports consist almost entirely of sugar, coffee, india rubber and crude drugs.

This will be better understood when it is stated that the value of the imports of coffee alone from Brazil, from April 1, 1891, when the treaty of reciprocity went into effect, up to September 30, 1892, inclusive, was \$145,522,354, and the value of the imports of sugar alone into the United States from Cuba and Puerto Rico for the thirteen months ended September 30, 1892, during which the reciprocity treaty was in effect with these islands, was \$69,933,566.

If we consider the total value of our commerce, imports and exports, with all the countries with which reciprocity treaties have been made, during the several periods those treaties have existed with each, it will be found that the total value of our commerce was \$461,547,526, as compared with \$356,480,374, for the corresponding prior periods, or an increase of \$105,067,152. The total value of our imports under the treaties was \$348,940,864, and the value of the exports of domestic merchandise was \$112,606,662. The increase in the value of the imports of merchandise since the treaties was \$84,294,525, and the increase in the value of the exports was \$20,772,621.

When lines of shipping are more fully inaugurated, commercial relations more closely established, and the countries south of us become more familiar with our products and methods of business, and our manufacturers more carefully consult the tastes and wishes of southern buyers, our exports will, undoubtedly, largely increase.

Thus the result of reciprocity will be enlarged markets for our agricultural and manufacturing products, and increased employment for our ships.

INTERNAL REVENUE.

The receipts from the several objects of taxation under the internalrevenue laws for the fiscal years ended June 30, 1891 and 1892, are as follows:

	Fiscal year en	ided June 30—	-	Decrease.	
Objects of taxation.	1891.	1892.	Increase.		
Distilled spirits	32, 796, 270. 97 28, 565, 129. 92	\$91, 309, 983. 65 31, 000, 493. 07 30, 037, 452. 77 1, 266, 326. 00 243, 288. 86	\$7, 974, 020. 01 1, 472, 322. 85 188, 401. 86	\$1, 795, 777. 90 16, 838. 44	
Total	146, 035, 415. 97	153, 857, 544. 35	7, 822, 128. 38		

The receipts from all sources of internal revenue for the fiscal year The receipts from the same sources for fiscal year ended June 30, 1891,

Making an increase in the receipts for the fiscal year just ended of 7, 822, 128. 38 The total cost of collection for the fiscal year ended June 30, 1892, was 4, 315, 046. 26

The total cost of collection for the fiscal year ended June 30, 1891, was 4, 205, 655. 49

Increased cost of collection for the fiscal year ended June 30, 1892. 109, 390, 77

The amounts herein stated are the receipts actually collected during the fiscal years mentioned, but in many cases the money collected on the last day of June is not deposited until the first day of July, thus causing a discrepancy between the collections and deposits.

The increase of the cost of collection for the fiscal-year ended June 30, 1892, over the previous fiscal year resulted largely from the increase in the salaries and fees of gaugers, storekeepers, and storekeepergaugers, and deputy collectors whose employment was rendered necessary by the very large increase in the number of distilleries operated during the fiscal year, and also from the large sum expended for weighing beams utilized in putting into operation the system of ascertaining the production of distilled spirits by weighing instead of by use of the gauging rod.

A detailed statement of these increased expenditures will be found in the report of the Commissioner of Internal Revenue.*

It is estimated that the receipts from all sources of internal revenue for the fiscal year ending June 30, 1893, will aggregate \$165,000,000.

The percentage of cost of collection for the fiscal year ended June 30. 1892, was 2.80 per cent, as against 2.88 for the fiscal year ended June 30, 1891, the increase of collections resulting in a decrease in the percentage of cost of collection, even with the extraordinary expenditures above referred to.

A comparison has been made of the reports of distilled spirits produced at a large number of distilleries for the months of May, June, and July, 1891, when gauging was done with the rod, with the reports from the same distilleries for the months of May, June, and July, 1892, when the contents of packages were ascertained by weighing. It is found by this comparison that during the first period the Government lost in taxes upon fractional parts of a gallon less than fifty-hundredths the sum of \$48,947.40, while for the corresponding period in 1892 the loss from the same cause was only \$18,659.70, making a reduction in the loss as compared with the preceding year of \$30,287.70.

The total production of distilled spirits, exclusive of fruit brandies, for the fiscal year ended June 30, 1892, was 114,769,041 taxable gallons; the total production for the fiscal year ended June 30, 1891, was 115,962,389 gallons, making a decrease in the production of distilled spirits for the fiscal year just ended of 1,193,348 gallons.

There were also produced during the fiscal year ended June 30, 1892, 1,310,437 gallons of apple brandy, 99,398 gallons of peach brandy, and 2,257,630 gallons of grape brandy, making a total production of 3,667,465 gallons of brandy from fruits during the fiscal year ended June 30, 1892. A further comparison of the two fiscal years shows an increase of 1,026,402 gallons in the production of apple brandy, an increase of 98,621 gallons in the production of peach brandy, and an increase of 737,730 gallons in the production of grape brandy for the fiscal year ended June 30, 1892, an aggregate increase of 1,862,753 gallons of brandy produced from fruits as compared with the previous fiscal year.

The quantity of distilled spirits contained in any package was ascertained prior to May 1, 1892, by the use of the gauging rod.

It was made manifest, however, that the contents of such packages could be more readily and correctly ascertained by weighing than by the use of the old gauging rod, and on May 1, 1892, an order was issued requiring gaugers to ascertain the contents of such packages by weighing. This order was put into effect in all distilleries except fruit distilleries, where it was found impracticable to apply it. The result has been entirely satisfactory.

The quantity of distilled spirits gauged for the fiscal year ended June 30, 1892, was 352,728,202 gallons; the quantity gauged for the fiscal year ended June 30, 1891, was 342,343,638 gallons, making an increase in the quantity of spirits gauged for the fiscal year just ended of 10,-384,564 gallons.

During the fiscal year ended June 30, 1892, 5,925 distilleries of all kinds were operated; for the preceding fiscal year 3,819 distilleries

of all kinds were operated, a comparison showing an increase of 2,106 in the number of distilleries operated for the fiscal year just ended. The greater portion of this increase arose from the large number of fruit distilleries operated during the year.

During the fiscal year ended June 30, 1892, there were produced 31,856,626 barrels of beer. The number of barrels produced during the fiscal year ended June 30, 1891, was 30,497,209, making an increased production for the fiscal year just ended of 1,359,417 barrels.

For the fiscal year ended June 30, 1892, the total receipts from the taxes on tobacco, cigars, cigarettes, snuff, etc., were \$31,000,493.07. The receipts from the same sources for the fiscal year ended June 30, 1891, were \$32,796,270.97, the decrease in the receipts for the fiscal year just ended being \$1,795,777.90, which may be ascribed to the operations of the act of October 1, 1890, affecting this source of revenue.

Sugar bounty.

The total bounty paid upon sugar produced in the United States for the fiscal year ended June 30, 1892, was \$7,342,077.79.

Expenses relating exclusively to the payment of the bounty on sugar for the fiscal year ended June 30, 1892.

Additional deputies and clerks	\$98, 774. 72
Polariscopes and articles used in making analyses of sugar, etc	9, 512. 13
Salary and expenses of sugar inspectors	28, 554. 76
Additional clerks in office of Commissioner	10, 990. 00
Total expenditures	147, 831, 61

I respectfully call attention to the various recommendations contained in the report of the Commissioner of Internal Revenue,* and urge legislation in accordance with the views therein expressed.

NAVIGATION.

The Bureau of Navigation reports that the entire documented tonnage of the United States is follows:

Documented vessels.

		 		1892.
Registered Enrolled and licensed		 	No. 1,532 22,851	Tons. 994, 675, 47 3, 770, 245, 73
Total	,		22, 831	4,764,921.20

Last year the total documented tonnage was 4,684,758 tons.

^{*} See page 392.

The documented tonnage, by grand divisions of the country, is as follows:

•	Grand divisions.		1892.		
Atlantic and Gulf coasts	•••••		No. Tons. 17,891 2,805,916.29 464,619.68		
Great Lakes			1, 545 3, 657 1, 290 1, 183, 582, 55 310, 802, 68		
Total :			24, 383 4, 764, 921. 20		

The documented iron and steel tonnage, by grand divisions, is as follows:

	Grand divisions.		1892.		
Pacific coastGreat Lakes			43	Tons. 500, 926. 23 72, 575. 42 207, 805. 78 5, 101. 21	
Total	••••••••••••••••••••••••••••••••••••••		762	786, 408. 64	

The following table shows the tonnage, by grand divisions, built during the fiscal year 1892:

Grand divisions.		1892.
Atlantic and Gulf coasts	No. 988 139 169 99	Tons. 118, 093, 6 20, 769, 9 45, 968, 9 14, 800, 5
Total	1,395	199, 633. 0

The following table shows the iron and steel vessels built during the last fiscal year:

Grand divisions.			892.
Atlantic and Gulf coasts		No. 27 1 23 4	Tons. 22, 049. 05 400. 03 28, 458. 80 466. 39
Total		55	51, 374. 27

The table below shows the increase, in fiscal year 1892, of large vessels:

Vessels over 1.000 tons, documented.	1891.		1892.		Increase, 1892.	
Steam vessels	No. 618 397	Tons. 1,118,596 581,331	No. 640 403	Tons. 1, 162, 222 586, 281	No. 22 6	Tons. 43, 625 4, 949
Total	1,015	1,699,927	1,043	1,748,503	28	48, 574

The increase in the documented tonnage of the United States for the fiscal year of 1892 over the tonnage of the preceding year was 80,163 tons.

The foreign-go onnage, not including that engaged in the whale fisheries, is 977,623.76 tons, of which 247 vessels, aggregating 225,437.34 tons, are propelled by steam, and 1,212 vessels, aggregating 752,186.42 tons, are sailing vessels.

Of the total documented tonnage 2,074,416.94 tons are steam and 2,690,504.26 tons are other than steam.

The registered vessels in the whale fishery aggregate 17,051.71 tons. The enrolled and licensed vessels above mentioned include 3,700,773.09 tons engaged in the coasting trade along the seacoast, the rivers, and the Great Lakes of the United States, and 69,472.64 tons licensed for the fisheries.

The figures above, relative to navigation, by no means include all the craft suitable for transportation of merchandise by water. Including certain barges, flatboats, and steam craft, the transportation fleet of the United States at the beginning of 1890 was found by the Census Office to aggregate a gross tonnage of 7,633,676 tons, valued at \$215,069,296, the crews of the vessels numbering 106,436, and their wages being no less than \$36,867,305. These estimates of values and wages do not include the values of wharves, elevators, shipyards, or other plants connected with shipping, or the wages of the persons employed in connection therewith.

The total ton mileage of freight carried in vessels in the United States for the season of 1889 was reported to be 15,518,360,000 or nearly one-fourth of the total ton mileage of all the railways in the United States.

The tonnage of all the vessels, documented or undocumented, in the United States is reported by the Census Office to be, by grand divisions, for the year ending December 31, 1889, as follows:

	Grand divisions.	•	Grosstons.	Value.
Gulf of Mexico			77, 562	\$123, 874, 177 3, 851, 270 23, 067, 370 48, 941, 474 15, 335, 005
Total	-		7, 633, 676	215, 069, 296

Besides the shipbuilding noted above, our dockyards and iron works have been busy in constructing a considerable number of war and other vessels for the various services of the Government. A list of such vessels is published by the Bureau of Navigation. It will be seen that our coasting trade is in a flourishing condition, and constitutes one of our

greatest industries. No foreign vessel is allowed to engage in it. Foreign vessels, however, are admitted to our foreign commerce on equal, or, in certain cases, on better terms than our own, and in the absence of any protection to our ships, the trade is largely monopolized by foreigners, many of whose vessels are subsidized by their governments.

The following table shows the proportion of our exports and imports carried in American and foreign vessels, respectively, viz:

Values of imports and exports of United States carried, respectively, in cars and other land vehicles, in American vessels and in foreign vessels, during fiscal years from 1857 to 1892, inclusive, with percentage carried in American vessels (coin and bultion included from 1857 to 1879, inclusive, as method of transportation can not be stated; subsequent years merchandise only).

Year ending	Total imports	Carried in cars and	Carried in vessels—			Percentage in
June 30—	and exports.	other land vehicles.	American.	Foreign.	Total.	American vessels.
857	\$723, 850, 823		\$510, 331, 027	\$213,519,796	\$723, 850, 823	70.

Note.—The amounts carried in cars and other land vehicles were not separately stated prior to July 1, 1870. Exports are stated in mixed gold and currency values from 1862 to 1879, inclusive.

The figures in the above table exhibit a lamentable condition of affairs. It would seem that we were well hemmed in by subsidized steamship companies and subsidized railroads of the British Government monopolizing trade legitimately belonging to our own people. The amount paid per annum for the transportation of freight and passengers between the United States and foreign countries is stated

to be more than \$200,000,000; to nearly equal, year by year, our collections from the customs, and to be more than four times the value of our annual exports of wheat for the four years prior to the fiscal year of 1891. Most of the amount goes to support the trade and business of foreign countries, its payment constituting a continual drain on our resources, which by wise legislation might have been prevented. The step toward such prevention, by the provision in the statutes for payments to American built, American-owned vessels of certain classes in the foreign trade, is in the right direction. It has already borne fruit by causing the addition of steam vessels of a good class to our merchant marine, and its effect undoubtedly will be still more beneficial in future by encouraging the establishment of new lines of American vessels and the development of old ones. It is very desirable that there shall be a continuance or extension of the present policy of protecting our vessels in the foreign trade against the subsidized lines of foreign governments, so that we may retain for our merchants, our shipowners, sailors, insurance companies, brokers, iron and steel workers, miners, shipwrights, canvas manufacturers, ropemakers, farmers, and others, directly or indirectly interested, a fair portion of the money now expended in foreign countries for ships and the navigation thereof; so that employment and nautical knowledge and experience may be given to officers and men, who, in case of war, could be utilized in our Navy, and so that we may be enabled to build up, as auxiliary to the Navy, a class of powerful steam vessels, constituting an offset to the vast fleets of such craft, belonging to foreign nations, now swarming along our coasts, fitted for immediate use as war vessels, with cannon in store at home, and ready for service at a day's notice as destroyers of our commerce in waters with which their crews are familiar, or as transports for troops to our shores, or shores in our vicinity.

Some additional legislation may be found requisite, as mentioned in the reports of the Bureau of Navigation, or as specially recommended by this Department, regarding pilotage, the tax on tonnage, undocumented foreign vessels in the United States, bonds given on the documenting of vessels, advance wages to seamen, fees for certificates of title to vessels, lights on barges, and timber rafts on the ocean.

IMMIGRATION.

The Bureau of Immigration reports the arrival of 579,663 immigrants during the fiscal year ending June 30, 1892, an increase over former years.

This increase is accounted for by the abnormal emigration resulting from the unfortunate conditions in Russia. The great influx ceased

some six months since, and the number of incomers from Russia has now assumed something like its usual proportion.

An analysis of the statement of arrivals during the last fiscal year shows that the act approved March 3, 1891, has had a healthy deterrent effect on the classes who are the least inclined to assimilate with American life. For ten years prior to the act of March 3, 1891, undesirable immigration has been steadily increasing. Many societies throughout Europe have for years aided needy families to emigrate to America, and many public and private charities have assisted paupers and encouraged criminals to come.

There are a very large number of immigrants whose cases can only be properly decided by the officer making the inspection, and where it is impossible for the law to particularize in each case. The provisions of the new law, making the decisions of the inspectors of immigration final as to the right of an immigrant to land, except on appeal to the Superintendent of Immigration and the Secretary of the Treasury, has materially lessened litigation at the landing ports.

Formerly paupers were not allowed to land; now any person who is likely to become a public charge is also prohibited. Formerly the immigration aid societies and charity institutions of Europe unloaded many of their indigent upon our shores, supplying them with passage tickets and a pittance of money. They also assisted their outdoor poor or other doubtful classes to come. Now if an immigrant comes with a ticket, assisted by some one on the other side, he must show affirmatively and satisfactorily to the inspection officers that he does not come within any of the prohibited classes. In all other cases the Government must show that the immigrant is not entitled to land, else under the ultimate proceedings of habeas corpus he would be landed; but in these cases the burden of the proof is transferred to the incomer, and he must show his right to land. It certainly is not asking too much from any foreigner that he shall come prepared to show a clean bill of lading in health and morals, and ability to earn a living. This has proved one of the most salutary provisions of the law.

In this connection attention is called to the embarrassment attending the question of determining the status of the prohibited classes under the law. The only resource of the inspector, as a rule, is the answers given to questions, upon which he forms his judgment, and the personal appearance of the immigrant. If his decision is not satisfactory to the immigrant, and habeas corpus proceedings are taken, the result in most cases is that the inspector is overruled and the immigrant permitted to land.

I am clearly of the opinion that only by a rigid examination, made

at the place of departure, can the prohibitive features of the law be executed with any considerable degree of efficiency.

That section of the law which compels the steamship companies to return, free of charge, to the port whence he came, any immigrant who has been denied a landing, or has fallen into destitution within one year after landing, from causes existing prior to his coming to this country, and also that section charging to the steamship companies the maintenance of all immigrants until the date of the final decision in their cases, has been actively enforced. The steamship companies have consequently ordered an inspection on their own account of all emigrants applying for tickets on the other side. They have also issued circulars to their agents reciting the prohibitive provisions of the law, and instructing them to faithfully observe the law.

The effect of the publication of the restrictions of our law throughout Europe has been to cut off a portion of the undesirable elements that have been coming here. It is estimated that fully 50,000 of the most objectionable classes have thus been stopped.

The doors to immigration should not be closed, but it is evident that we are receiving great numbers of people who are thriftless and ignorant and who have come to this country in the spirit of adventure, or who are driven by starvation from their old homes.

The rapid exhaustion of our arable land is closing one of the hitherto great safety valves in distributing and Americanizing our foreign element, and, as a result, these undesirable people are congregating in our cities. There is a growing disposition to colonize in certain quarters of these cities, and to create there, in some sense, a nationality and independency of their own, thus perpetuating the habits and customs of their homes, and practically transplanting to our shores a section of the Old World. These sections may, after a time, come to revere the old, and bear antagonisms to the new country.

The remedy for these evils, now so apparent to all our people, and happily removed from the plane of politics, is within the control of Congress.

While we were receiving only such immigration as was of a character to be easily assimilated with American civilization a nominal tax, in amount barely sufficient to pay the expenses occasioned thereby, was sufficient. But now, that immigration has reached such vast proportions, and the quality of a large portion of it is such as to create alarm in the minds of thoughtful people, who doubt the ability of our institutions to assimilate these objectionable classes, the time is at hand when an increase of the head tax should be imposed, and other remedial measures adopted to protect the country.

One of the reasons why an undue number of undesirable immigrants come to this country is, because we can be reached at a less expense than South America and Australia.

As a measure to determine what this tax should be, it is suggested that the sum be such as would equalize, at least approximately, the cost to the immigrants to reach the other countries referred to.

It is suggested that an increase of this tax would deflect immigration to this country via the Dominion of Canada. Should attempts of this kind be made for the purpose of evading the tax, the country would not be without the resources necessary to prevent the success of such evasion.

In legislating upon this subject, it must not be overlooked that the rapid development of the country has been greatly stimulated by immigration of a most desirable character, and that immigration of the proper kind is yet desirable, but we have reached a condition when the character of future immigration should be the subject of vigilant scrutiny.

Alien contract-labor laws.

The alien contract-labor force has been reorganized and placed under one management which has greatly increased the efficiency of that branch of the immigration service. One thousand seven hundred and sixty-three alien contract laborers have been detected and returned to the country whence they came during the past year, as against 123 returned the year previous.

Inspectors have been stationed on the Canadian and Mexican borders and have enforced the provisions of the law with much success.

On the 1st of July, 1891, few of the suits brought for violation of the contract-laborlaw had been prosecuted, and 186 cases were on the docket. An inspector was detailed to take special charge of these prosecutions. Many of these cases had remained on the docket until the witnesses necessary to a successful prosecution could no longer be found.

Six cases were dismissed, judgment was obtained in 151 cases; 86 cases are pending. It is expected that all will be disposed of by the 1st of April, 1893.

On information which indicated a violation of the contract-labor law at any given place, an inspector was at once detailed to make a thorough investigation; and unless the inspector reported no violation of the law, the evidence in each case was forwarded to the United States, district attorney for that locality for his action in the premises.

The inspectors have been greatly assisted by the active coöperation of the labor organizations. The vigorous execution of this law has called a halt in the extensive importation of foreign laborers under contract. The effectiveness of the laws in question is not to be measured by the number of prosecutions of violators, or the number of laborers returned. Its most salutary effect has been to prevent, in a large measure, the continuation of the importation of unlawful laborers.

Chinese exclusion.

Notwithstanding the severity of the laws relating to the exclusion of Chinese, many persons of that race find their way into our territory chiefly by way of Canada. During the past year one hundred and seventy-five Chinese persons were arrested and returned to China under the exclusion acts.

The act approved July 5, 1884, provides as a condition precedent to landing that Chinese persons of the exempt class arriving at ports in the United States shall present certificates from the Chinese Government, or such other foreign government of which at the time the applicant may be a citizen, showing that permission has been obtained from said government to visit the United States. In no instance has a certificate been presented from the Chinese home Government, but in a number of cases certificates issued by the consular representative of China resident in Havana have been offered and accepted as prima facie evidence of the right of the holder to land. I have instructed collectors of customs to recognize such certificates upon the statement of the Chinese minister at this capital that his Government has authorized its consular officers to issue the same.

By a joint resolution of Congress approved August 5, 1892, provision is made for the admission of Chinese exhibitors and employés of exhibitors at the World's Columbian Exposition, and the requirement of the act of July 5, 1884, as to certificates is not applicable in such cases. It is probable that a large number of Chinese laborers will enter the United States under this authority.

Under an opinion of the Supreme Court Chinese merchants residing in this country, and who may depart therefrom with the intention of returning thereto, are permitted to land upon submission of evidence of their identity as such returning merchants. The question as to what constitutes a merchant is a perplexing one, in view of the practice among Chinese of organizing firms composed of a large number of members, each of whom may contribute a few dollars to the capital of the firm.

Chinese registration.

The Act of Congress of May 5, 1892 requires that certificates of residence be issued to such Chinese laborers as are entitled to remain in the United States after the date of such act. These certificates are to be issued by the collectors of internal revenue. The act further provides that "immediately after the passage of this act the Secretary of the Treasury shall make such rules and regulations as may be necessary

for the efficient execution of this act, and shall prepare the necessary forms and furnish the necessary blanks to enable collectors of internal revenue to issue the certificates required thereby, and make such provision that certificates may be procured in localities convenient to the application."

The necessary rules and regulations for the efficient execution of this act have been prepared, and the forms and necessary blanks to enable collectors of internal revenue to issue such certificates have been furnished to them. They have been placed in the hands of the collectors of internal revenue, who are ready to deliver the same to such Chinese as are entitled to them. The Commissioner of Internal Revenue reports that at the closing of the present fiscal year no applications for certificates had been made, and that there seems to be a determination on the part of the Chinese not to register. However, the collectors of internal revenue have been instructed to hold themselves in readiness to register under this act any person who is entitled to certificates and desires to register, and such persons will have an opportunity to do so at any time prior to the 5th of May with as little inconvenience as may be possible.

SEAL FISHERIES.

The modus vivendi entered into in 1891 between the United States and Great Britain was renewed in 1892 pending the arbitration between the two Governments, and in consequence thereof the quota of seals to be taken on the Pribilof Islands during the season of 1892 was again limited to 7,500.

Under the terms of the modus the taking of seals in the waters of Bering Sea was prohibited as it was last year, and vessels of the British and our own Navy, as well as those of the Revenue-Marine Service, coöperated to enforce its provisions. But three attempts were made to enter the sea through the passes, and the vessels in each case were seized and proceeded against under the international agreement. From thirty to forty thousand seals of the Pribilof Island herd, a large proportion of which were gravid females, were taken by pelagic hunters in the North Pacific between January and July, 1892. As a result, the number of seals on the breeding grounds on the islands was found to be smaller this year than last.

As the income derived by the natives on the islands of St. George and St. Paul from the taking of the 7,500 skins will be inadequate for their support, thus rendering them dependent upon the Government, I recommend that the appropriation of \$19,500 made for their support during the current fiscal year be renewed.

REVENUE-CUTTER SERVICE.

During the past fiscal year thirty-six vessels have been in commission, which have been constantly engaged in patroling the coasts, rivers, and harbors of the United States, for the protection of the revenue and the enforcement of law relative to other subjects. The following is a statistical statement of their work:

Aggregate number of miles cruised by vessels	335, 512
Number of merchant vessels boarded and examined	37, 521
Number of merchant vessels found violating law in some particular, and	*
seized or reported to proper authorities	1, 233
Fines or penalties of vessels so seized or reported	\$363, 173, 80
Number of vessels in distress assisted	84
Value of vessels and their cargoes imperiled by the sea, to which assistance	
was rendered	\$2, 417, 745
Number of persons on board vessels assisted	570
Number of persons picked out of the water and saved from drowning	50

The duties assigned to the revenue cutters have been faithfully and efficiently conducted by the officers of the service, and the record of duty performed shows a fair increase over that of past years, notwithstanding the disabled condition of some of the vessels which require extensive repairs or replacement by new vessels. A number of new vessels are urgently needed for the proper maintenance of the service, viz: two on the Pacific coast, two on the Great Lakes, and one on the New England coast to replace the Gallatin, wrecked on the 6th of January last, near Gloucester, Mass., during a blinding snowstorm. The necessary withdrawal of the steamers Rush and Corwin from the California and Oregon coasts, for duty in Alaskan waters during the summer, has left those districts without patrol and caused serious embarrassment to the customs service.

The work of patroling Bering Sea and other waters of Alaska Territory for the protection of the Seal Islands and other interests of the Government in those waters, and the enforcement of the provisions of the modus vivendi with Great Britain, was assigned to four vessels of the Navy and the revenue steamers Corwin, Rush, and Bear, all under the general direction and orders of Commander R. D. Evans, U. S. Navy. Having all the Government forces in those waters under one command has worked satisfactorily, and the duties have been efficiently performed.

Material assistance has been given as usual by the Revenue Marine to the Life-Saving Service; boats, stores, and supplies have been transported and delivered at stations off established routes of travel and difficult of access except by special conveyance.

The distance cruised while performing these services aggregated 10,370 miles.

The expenditures on account of this service for the year ending June 30, 1892, were \$975,551.29, of which \$20,448.88 was spent in enforcing the law regulating the anchorage of vessels in the bay and harbor of New York.

The personnel of the Revenue Marine consists of 222 commissioned officers and 843 pilots and enlisted men.

LIGHT-HOUSE SERVICE.

The number of light stations was increased from 852 to 883. first class light ships have been finished and placed on stations on the Atlantic coast. All of these vessels are fitted with compound engines and propellers. Each has a steam windlass, and the chain hawse-pipe is forged into the stem of the vessel that they may ride easier to heavy seas. The light-vessel for Cornfield Point, Long Island Sound, is fitted with an electric plant, and the masthead electric light will be displayed and extinguished automatically. This is the first vessel of the kind built by any nation. Two modern light house tenders were built at Cleveland, Ohio, and delivered on the Atlantic coast, each furnished with an electric plant and search-light. One of these vessels is now on her way to Portland, Oregon. Another light house tender fitted with twin screws, electric plant, and search-light, is under construction at Elizabethport, N. J., and will probably be delivered in December. The number of buoys, spindles, and daymarks was increased from 4,715 to 5,034 during the last fiscal year. The appropriation for buoyage for the last fiscal year was \$330,000, a sum altogether insufficient to meet the demands of commerce. The number of lights on the Western rivers remains practically the same as last year, and the average cost of each per year is about \$170. As each of these river lights serves the purpose that was formerly attained by a light-house costing very much more to build and maintain, it is deemed judicious as well as economical to increase their number.

The Light House Board again urges that the exhibition of private lights should be prohibited, and the penalty provided by law enforced for the infraction of its regulations as to the lighting of bridges over navigable streams.

In view of the fact that the Light-House Service was organized for the purpose of protecting life and property from the dangers of the sea, only men of experience and character who can intelligently and faithfully discharge the duties of light-keepers should be employed, and to this end the Service should be made absolutely nonpartisan.

MARINE-HOSPITAL SERVICE.

The report of the Supervising Surgeon-General of the Marine-Hospital Service shows that during the fiscal year ended June 30, 1892, the total number of cases treated was 53,610, of which number 16,022 were treated in hospital, the remainder being office or dispensary patients.

There were 1,344 pilots examined for color-blindness, of which number 60 were rejected.

Nine hundred and six surfmen and keepers of the Life-Saving Service were examined, of which number 64 were rejected for physical causes.

Two hundred and thirty-one seamen of the merchant marine were examined, before shipment, as to their physical fitness, and 11 were rejected.

The nineteen marine hospitals of the service are reported as being in good condition, save the one at Port Townsend, and the eight national quarantine stations have been kept in active operation during the whole of the year, the services which they rendered being of so great importance that it was deemed unwise to close them, even during the winter months. These stations are generally well equipped, except San Diego and Port Townsend, whose plants are in course of construction. Certain additions are required to a number of the stations to make them adapted to all the wants of modern quarantine science, and estimates for this purpose have been included in the Book of Estimates.

The quarantine service of the Marine Hospital Bureau has been marked by great activity during the past summer and fall, owing to the threatened invasion of cholera into the United States. As early as July eighth a circular was issued calling attention to the prevalence of the disease in Russia, and requiring disinfection of all articles from infected places, and laying restraint upon vessels from infected ports.

Regulations were issued requiring disinfection abroad of all rags prior to their entry into the United States, with a consular certificate to this effect, and the importation of old rags from infected places or localities was prohibited.

Disinfection abroad also of personal effects and baggage of immigrants was required, and all the above regulations are still in force.

September first a circular was issued, signed by the Supervising Surgeon-General and approved by the President and myself, imposing a quarantine detention of twenty days upon all vessels bringing immigrants into the United States. The object of this circular was to lessen the chances of the introduction of cholera by a temporary suspension

of immigration; the expense of the twenty days' detention being such that it might prove prohibitory in effect, for the time being. As a result, immigration has been practically suspended, and the danger of the introduction of cholera into the United States very materially diminished. It is proposed to keep in force this restriction until Congress shall have opportunity to express its will in the matter, or until the danger which prompted it shall have disappeared.

The necessity of this circular was found in the large influx of immigrants from cholera infected districts, and the great danger of the importation of the disease through their persons or baggage, this being the cause of the last cholera epidemic in the United States. The public health, therefore, and a public demand, required a temporary prohibition of immigration. There being no special provision for this by any act of Congress, it was determined to make use of the quarantine prerogatives of the several States, all of whose laws permitted of at least twenty days' quarantine detention. The power of the General Government to enforce this provision was found in the national quarantine act of 1878.

On the announcement of this quarantine restriction a hearty accord was given to the same by the State and local authorities.

To prevent ingress over the Canadian frontier, of immigrants who might seek entry from Canadian seaports, medical inspectors, aided by customs officers, were appointed to inspect the frontier stations from Maine to Dakota at all points where railroads cross from Canada into the United States. These inspectors are still kept on duty, and, under instructions, are obliged to see that no baggage of immigrants is admitted into the United States without previous disinfection, and to aid in the enforcement of local regulations.

Besides this corps of inspectors aid to the State authorities has been rendered at several important maritime points where cholera appeared or was threatened.

On account of the overcrowded quarantine accommodations of the State, at the port of New York, and as a relief for healthy passengers detained upon infected vessels, a camp was established on Sandy Hook, called Camp Low, capable of accommodating one thousand persons. Through the generosity of a private citizen of New York, Mr. Austin Corbin, the material and necessary help were promptly furnished to the Government for the rapid construction of this camp, obviating the slower process of Government construction. For the details of this camp and its occupancy by immigrants, reference is made to the report of the commanding officer, Surg. J. B. Hamilton (ex-Surgeon-General Marine-Hospital Service), which accompanies the annual report of Supervising Surgeon-General Wyman. The value of Dr. Hamilton's services is hereby acknowledged.

The thanks of the Treasury Department is extended to the Warr Department for consenting to the location of Camp Low on its reservation, to the Navy Department for furnishing the guards and boats for land and sea patrol, and to the Chamber of Commerce of New York for its support of the measure taken.

Additions will be made to this camp during the winter with a view to its utilization should cholera again appear in the spring or summer.

Sandy Hook belongs to the Government and is in charge of the War Department, and is only populated with Government employés. Owing to its peculiar conformation it can be completely isolated from the mainland. Camp Low is so located as to also be easily isolated from the stations of the Light-house and Life-saving stations and the quarters occupied by the War Department. Safe, deep, and commodious anchorage exists at Camp Low. Sandy Hook is in all respects admirably suited for the purpose of a sanitary camp, and if such portion of it as can be spared without detriment to the other departments of the Government service could be added to the present accommodations of the quarantine of the State of New York, it would afford an equipment that would furnish ample facilities to deal with the danger at that point of the introduction of contagious diseases that is constantly threatening the country.

A quarantine camp was also established at the Delaware Breakwater station, where permanent barracks for the accommodation of 800 immigrants have been erected and tents provided for the protection of additional numbers. A rigid quarantine has been and is still maintained at this point, and also at the national station near Cape Charles at the mouth of the Chesapeake.

A detention camp was also established at Fort Pulaski, Ga., for the protection of the city of Savannah and the surrounding territory. At the more southern national quarantines on the Atlantic coast as well as at those on the Gulf and North Pacific coasts the usual activity and vigilance have been maintained.

At smaller seaports, where local quarantine provision is insufficient, and where cholera infected vessels might seek entrance to avoid the greater restrictions at larger ports, the authorities have been invited by circular to apply for such aid from the Marine Hospital Bureau as may be required for their defense.

Sanitary information, including an account of the progress of the cholera has been regularly transmitted to all quarantine and loca health officers, through the publication of the Weekly Abstract of Sanitary Reports, under section 2, act of 1878; and for the purpose of securing accurate information from abroad, officers have been detailed

for gathering, in foreign seaports, such data regarding the recent epidemic of cholera and its threatened reappearance, as will be valuable to the sanitary authorities of the United States.

State laws can not properly control or direct the management of great quarantines where other States are interested. The quarantines of our seaboard are of equal interest to all our population. The whole country should have a voice in their ownership and management, and this can only be accomplished by such legislative action as will forbid the collection of quarantine fees by State or municipal authority, and which shall direct the assumption of all quarantine duties by the United States. This duty rests under the same authority as that under which laws relating to immigration are framed and executed.

Every serious epidemic that this country has ever known has been traced to the immigrant, and it must be apparent that the same authority that controls immigration should control quarantine.

Admitting that any particular local quarantine may be perfectly managed, of what avail is it if a neighboring port has either a lax and insufficient quarantine, or none at all? Such are the facilities for inland communication that all quarantines must be equally efficient to be successful in preventing implantation of disease, and only the strong arm of the Government, directed under laws enacted by representatives of the whole people, can give confidence and security.

STEAMBOAT-INSPECTION SERVICE.

The Supervising Inspector-General reports the inspections, during the fiscal year, of 7,661 domestic steam vessels, having a net tonnage of 1,546,325.29. Officers licensed, 36,520. Increase, 1,404. The number of foreign passenger steamers inspected was 293, with a net tonnage of 559,020.97. The number of passengers carried during the year (partly estimated) was 650,000,000. The number of lives lost was 200, being 138 less than in 1891. Of the lives lost, 48 were passengers and 152 were officers and sailors belonging to the vessels. The expenses of the Service have been, for salaries, \$244,300.43; contingent expenses, \$44,836.13; making a total of \$289,136.56.

Especial attention is invited to the gratifying results of the present law, as compared with the law of August 30, 1852.

During the nineteen years of the operation of the law of 1852 there were 1,504 disasters to steam vessels, with a loss of 9,320 lives, or an average loss of 490 lives per annum. Under the present law, notwithstanding the increase in the number of steam vessels since 1870 of over 100 per cent, there have been but 729 disasters to steam vessels, with a

loss of but 5,057 lives, or an average of 240 per annum, while the number of passengers carried per annum has increased from 122,589,130 in 1870 to not less than 650,000,000 in 1892. The average loss of life under the law of 1852, as obtained by dividing the number of passen gers carried in 1870 by the above average of 490, was 1 to every 250,181 passengers; while the average loss of life under the operation of the present law, as obtained by dividing the number of passengers carried in 1892 by the above average of 240, has been only 1 to every 2,708,393 passengers, or, considering the number of passengers carried, a decrease in the number of lives lost of nearly 11 to 1.

There are some defects in the present law, but they are matters of detail, and can be amended without affecting its main features.

In this connection, I renew my recommendation of last year that provision be made for the regulating and equalizing the pay of the subordinate officers of the Service.

The Supervising Inspector-General recommends that the officers and employés of the Service below the office of supervising inspector be appointed solely with reference to their fitness and without reference to their political or party affiliations, as is now the case in the Life-Saving Service. In this recommendation, the reasons for which are sufficiently obvious, I concur, and take occasion to urge upon Congress an early and favorable consideration of the subject.

LIFE-SAVING SERVICE.

The following statistics of the operations of the Life-Saving Service during the year are calculated to justify the confidence reposed by the public in that humane institution and the wisdom of Congress in giving it liberal support.

The number of stations in commission at the close of the year was 242. The reports of the district officers show that during the year there were 337 disasters to documented vessels within the scope of station operations. On board these vessels there were 2,570 persons, of whom 2,550 were saved and 20 lost. The estimated value of property involved was \$8,284,525, of which \$7,111,005 was saved and \$1,173,520 lost. The number of vessels totally lost was 60. In addition to the foregoing there were 170 casualties to smaller craft, such as sailboats, rowboats, etc., involving the lives of 353 persons, of whom 346 were saved and 7 lost. The property involved in these instances is estimated at \$67,810, of which \$63,470 was saved and \$4,340 lost.

The aggregate is as follows:

Total number of disasters	507
Total value of property involved	\$8, 352, 335
Total value of property saved	\$7, 174, 475
Total value of property lost	\$1, 177, 860
Total number of persons involved	2, 923
Total number of persons lost	27
Total number of shipwrecked persons succored at stations	
Total number of days' succor afforded	1,847
Number of vessels totally lost	60

There were also rescued 36 persons, not included in the above table, who had fallen from wharves, piers, etc., and would probably have perished but for the help of the life saving crews. Much assistance was rendered in saving imperiled vessels and cargoes, 480 vessels having been worked off when stranded, repaired when damaged, extricated from dangerous positions, and similarly aided by the station crews. There were also 265 instances where vessels in danger of going ashore were warned off by the signals of the patrolmen.

The cost of the maintenance of the Service during the year was \$1,009,234.86.

The stations mentioned in the last report as being in process of construction at Burnt Island (near the mouth of St. Georges River), Maine; Quonocontaug, Rhode Island; Fenwick Island, Delaware, and Ilwaco Beach, Washington, have been completed and are now in commission.

A new station is approaching completion at Brant Rock, Massachusetts, and the station authorized to be established on the grounds of the World's Columbian Exposition, to take the place of the old station at Chicago, is nearly finished.

Proposals have been invited for the construction of a new station at Fort Niagara, N. Y., and are about to be invited for the erection of stations at Duluth, Minn.; Ashtabula, Ohio, and Kewaunee, Wis.

During the year fifteen stations on the coasts of Maryland and Virginia have been extensively repaired and improved, as have also the Crumple Island station, coast of Maine; the Lewes station, coast of Delaware, and the Golden Gate Park station, California. Similar work is progressing on several stations on the coast of Massachusetts. The Short Beach station, coast of Long Island, is being removed to a new site, the old one having been rendered unsafe by the encroachment of the sea. Improved facilities for launching boats at the Crumple Island station, coast of Maine, and the Lewes station, Delaware, involving considerable expense, have been provided.

The telephone line authorized by act of Congress approved May 13, 1892, to be established between Cape Charles, Virginia, and the lower end of Assateague Island is now in process of construction and will soon be completed.

The higher rates of compensation provided by the act of Congress approved July 22, 1892, for the keepers and crews of stations while actually employed will result in very materially checking the frequent resignations referred to in the last annual report as seriously threatening the efficiency of the Service. They will also secure the best men to fill such vacancies as may occur in the natural order of things, and, together with the continued faithful observance of the provision of law requiring the employment of the officers and men with sole regard to their professional fitness and without reference to political considerations, will, it is believed, still further advance the acknowledged preëminence of the Service in its beneficent work of rescuing imperiled life and property.

COAST AND GEODETIC SURVEY.

The report of the Superintendent of the Coast and Geodetic Survey shows that upward of eighty-five field parties were actively employed during the fiscal year upon the coasts of the Atlantic, the Gulf of Mexico, the Pacific Ocean and Bering Sea, and in the interior of the United States. Their work was carried on within the limits and on or off the coasts of sixteen States on the Atlantic and Gulf seaboard; three States and one Territory bordering on the Pacific Ocean and on Bering Sea, and in fourteen States and three Territories in the interior. It included the measurement of base lines; reconnoissance and triangulation; time, latitude, longitude, and azimuth determinations; gravity research; geodetic leveling; magnetic observations; topographic surveys, and hydrographic work involving inshore and offshore soundings, and observations of currents and tides.

Among work of importance may be mentioned the continuation of the surveys of the Northeastern boundary lakes, the completion of which will afford data for the location of a part of the boundary line between the United States and the Dominion of Canada; the beginning of the resurvey of Boston Harbor; the completion of the resurvey of Nantucket Shoals; the connection of longitude determinations coming westward from the Atlantic coast with those coming eastward from the Pacific; the resurvey of Mobile Bay and entrance; the advance toward a junction in Colorado of the transcontinental triangulation proceeding westward from the Atlantic coast with that proceeding eastward from the Pacific; the completion of the observations for the vari-

ations of latitude at three widely separated stations in cooperation with the work of the International Geodetic Association, and the progress toward completion of the surveys in Alaska for the more exact determination of the geographical position of Mount St. Elias, and of its height and distance from the coast.

In addition to this advance of the regular operations of the Survey, a number of requests from national or State authorities for the detail of officers for special service were acceded to, in accord with the policy and practice of the Department. Upon the application of the commission organized for the adjustment of the boundary line between the States of Delaware and Pennsylvania, an officer of the Survey was detailed to execute the reconnoissance and triangulations desired by the commission. In compliance with a request from committees of the senate and house of delegates of the State of Virginia, an officer of the Survey was directed to make the observations needed for the accurate delineation and mapping of the natural oyster beds in the waters of the State. Action was taken by the Superintendent, at the request of the governor of Ohio, for such a preliminary investigation of the points at issue between that State and the State of Indiana relating to the Ohio-Indiana meridian boundary line as might lead to the organization of a joint commission empowered to establish and mark the line by suitable monuments. At the suggestion of the Secretary of State, made by him to the Secretary of the Treasury, officers of the Survey were detailed to determine in latitude and longitude such points on the boundary line between the United States and Mexico as the International Boundary Commission on the part of the United States might indicate.

The special services of an assistant in the Survey were requested temporarily by the mayor and board of supervisors of the city and county of San Francisco as consulting engineer in association with an officer of the United States Engineers. The detail of an assistant in the Survey to cooperate with the harbor line commission of the State of Washington in harbor surveys on Puget Sound was renewed at the request of the commission in the spring of 1892.

In addition to the service of one of the older officers of the Survey as a member of the Mississippi River Commission, as required by law, another officer was appointed by the President as a member of the International Boundary Commission organized for the location of the United States and Mexican boundary line.

From the office of the Survey there were issued during the year 52,675 copies of charts, of which number 2,581 were required by Congress, 14,278 by the Executive Departments, 1,985 by foreign govern-

ments, and 28,620 were sent to sale agents. Tide Tables for the Atlan tic coast, predicting for 1893 the times and heights of high and low water at fifteen principal ports, were published in May, 1892, and similar tables for the Pacific coast were sent to press. The monthly publication of Notices to Mariners was continued, and 130,000 copies were printed for free distribution. The first edition of the United States Coast Pilot, Atlantic coast, Parts I and II, from the St. Croix River to Cape Ann, was received from the Public Printer; also the third edition of the Pacific Coast Pilot, Alaska, Part I, Dixon entrance to Yakutat Bay. There were issued during the year 591 copies of Coast Pilots for the Atlantic and 327 copies of Coast Pilots for the Pacific coast.

Office of Standard Weights and Measures.

During the fiscal year, a complete set of weights and measures, customary and metric, was adjusted and verified, and delivered to the governor of the State of Idaho, under the provisions of the acts of Congress relating to the distribution of standard weights and measures to the States.

Much of the time of the limited force of the office was occupied in meeting the demands of the Internal Revenue Bureau for the verification of alcoholometers, saccharometers, sugar flasks, weights, and quartz plates for use with polariscopes in the analysis of sugars.

For the customs division of the Treasury, several sets of glass capacity measures, intended for distribution to custom-houses, were verified.

In compliance with numerous requests from engineers, surveyors, manufacturers, and others, who have submitted weights and measures for comparison with the United States standards, this office, being the custodian of these standards, has endeavored to serve the public by making the comparisons desired, although greatly in need of the more extended facilities for such service which all other civilized countries provide.

I renew the recommendation, made in my last annual report and in the annual report of my predecessor, that early action should be taken by Congress toward such legislation as will make the use of the metric system of weights and measures obligatory in transactions at United States custom-houses on and after the first day of the calendar year 1895. The adoption of this system by the chief commercial countries of Europe, and the recent action of most of the chambers of commerce in Great Britain recommending its early introduction into that country, lend added force to the reasons for the enactment proposed.

ENGRAVING AND PRINTING.

The work of this Bureau is steadily increasing from year to year. The number of sheets delivered during the year 1892 exceeded by slightly more than 13 per cent those for 1891, which were the largest during a period of fourteen years prior thereto. The work delivered during 1892 represented a value of over \$863,000,000. This large amount was handled throughout the various processes necessary to its completion without the loss to the Government of a single dollar. This result has been obtained by conducting the establishment upon a strictly business basis, and by thoroughly systematizing all its opera-

The method of printing by relief plates has been perfected and continued during the year, and out of 13,240,000 sheets of this class of stamps delivered during the year, 9,208,500 were printed by this process, at a net saving of \$131,648.40. It is expected that all of the stamps of this class will be printed by this process during the year 1893, at a saving of \$164,000.

With a view of improving the condition of the notes while in circulation, they have been, for several months during the past year, subjected to a bath of size, such as is used by paper-makers in finishing paper, which restores the sizing and finish destroyed by repeatedly wetting the paper for the several plate printings. makes a decided improvement both in the appearance and the wearing quality of the notes.

The Bureau is now fully equipped with all the necessary machinery, and has a force of trained employés sufficiently large to promptly execute within the regular hours all the securities, stamps, etc., that it may be called upon to furnish.

PUBLIC BUILDINGS.

At this date there are two hundred and ninety-seven completed public buildings; ninety-five in course of construction, or extensions and repairs under special appropriations, or for which sites have been selected but not yet paid for, or remain to be selected; of which number condemnation proceedings have not yet been determined for the acquisition of property for sites for two, and payment of the purchase money has not yet been made for the property selected for sites for seven, and sites have not yet been selected, but will soon be selected, for three, and land additional to the site has not been selected for one.

During the year ending September 30, 1892, there was expended for public buildings, \$6,741,286.71, and contract liabilities existed amounting to \$2,834.408.73, making a total of \$9,575,694.73.

From the present condition of the work done and being done on drawings and specifications, and the action taken and contemplated,

it is believed that between this date and the close of the second session of the Fifty-second Congress several millions of dollars of the aggregate amount of the various balances of appropriations now remaining available, and aggregating about \$15,000,000, will be covered by contract liabilities.

The attention of Congress is invited to the several recommendations made by the Supervising Architect which have my approval.

Also to the special statements made by the Supervising Architect in his report for the year ending September 30, 1892, in regard to the following subjects:

The proposed sale of the old court-house building in Baltimore.

Fixing a limit to the cost of the public building at Buffalo.

To secure a permanent foundation for the public building at Chicago.

As to complications as to public building at Empora, Kans.

The insufficient appropriation to pay for site of public building in the city of New York, and of the inability to sell present custom-house: at price fixed by law.

As to the appraiser's stores in New York.

To enlarging facilities at the Philadelphia post-office.

For an appropriation to commence work proposed on new mint at Philadelphia.

To prescribe limit of cost of new public building at San Francisco.

To amend inaccuracy in description of site for United States court-house at Savannah, Ga.

Modifying legislation relating to the sale of marine-hospital site and the purchase of another site at Pittsburg, Pa.

The unavoidable delays in the commencement of work on many new buildings has been largely caused (1) by the failure of Congress to provide by adequate appropriations for the technical and clerical force necessary for prompt conduct of the work; (2) because of the effect of act of Congress, approved August 1, 1892, limiting the hours of daily service of laborers and mechanics employed upon public works, new proposals had to be invited in a number of cases, etc.

And especial attention is also called to that portion of the report relating to the subject of securing plans for public buildings by competition.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1892 were \$6,331,960.56. The net revenues deposited in the Treasury on this account for the same period were \$2,967,044.71.

On July 1, 1891, there were due and payable \$2,490,200 six per cent bonds and \$276,700 seven per cent bonds, making a total of \$2,766,900.

There have been issued during the fiscal year \$27,100 of the 3.65 per cent bonds in satisfaction of judgments of the Court of Claims.

Under the provisions of the act of Congress approved March 3, 1891, the Treasurer issued and sold on July 1, 1891, \$2,400,000 of the 3.50 per cent bonds at a premium of 0.531 per cent, realizing the sum of \$2,412,744, which was applied to the redemption of the bonds maturing that date, leaving \$354,200 to be absorbed by the sinking funds, resulting in a net reduction of the bonded debt during the fiscal year of \$366,900, and reducing the annual interest charge \$84,781.

The net reduction of the bonded debt since July 1, 1878, is \$2,973,-250, and of the annual-interest charge \$262,120.72.

At the close of the fiscal year 1891 the net surplus arising from the sale of bonds in which the retention from District contractors was invested was \$28,066.96. During the fiscal year 1892, in settlement of these accounts, the sum due the contractors is in excess of the amount realized from the sale of bonds, showing a net loss of \$4,289.69, reducing the surplus at the close of the fiscal year to \$23,777.27.

Attention is invited to the fact that the fund held for the relief of policemen is being rapidly dissipated. The payments on this account being largely in excess of the receipts. At the close of the fiscal year 1891 the bonds held for this account amounted to \$27,200, and at the close of the fiscal year 1892 to \$20,000, a reduction of \$7,200 during the year.

Detailed information in regard to the affairs of the District of Columbia will be found in the report to be submitted by the District Commissioners and by the Treasurer of the United States, ex-officio commissioner of the sinking fund of the District.

WORLD'S COLUMBIAN EXPOSITION.

Satisfactory progress has been made in the preparation of the Treas ury Department's contribution to the Government exhibit at the World's Columbian Exposition. The Government building on the Exposition grounds, constructed under the direction of the Supervising Architect of the Treasury, is approaching completion and is now ready for the reception of exhibits. Suitable arrangements have been made for carrying out the customs laws and regulations respecting the admission of foreign goods for exhibition.

PUBLIC ACCOUNTS.

The desirability, if indeed it be not a necessity, of a change in the methods of disbursing public moneys, and the examination, adjudication, and settlement of public accounts, has long been manifest, not only to the officers of the Treasury Department charged with, and responsible for, the official working of those methods, but to many committees of Congress, standing and select, which have inquired into, and reported upon, such methods.

There is now a triplicate system of examination of public accounts, which has no counterpart in any other Government, whether European or in the several States of the Union. It is not only vexatious in respect to details, but wrong in respect to system. Beyond that, however, is the fact that it is highly expensive, without compensating results to the Government, while, in spite of the examination by three different offices and "sets" of clerks, accounts and claims are occasionally improperly adjusted or allowed.

The whole duty of control and audit appertaining to the public expenditure should be under the administrative direction of a Comptroller-General or Chief Comptroller of the Treasury, within whose bureau a board of audit might be created for the determination of quasijudicial questions arising in the examination, statement, and settlement of accounts, if that mode of procedure should be regarded with favor.

Standing and select committees of Congress have, from time to time, been instructed to inquire into the defects of departmental methods, and have made many valuable reports thereon, recommending or suggesting various changes, many of which have been enacted into law by Congress, with amendments recommended by various Secretaries of the Treasury.

Commissions or committees, composed of officers and clerks of the Treasury Department, have, from time to time, been appointed to examine into the methods of the Department, and have recommended changes which have been adopted in whole or part as "Treasury Regulations."

But these investigations and recommendations, valuable as they were, have fallen far short of meeting the requirements of the situation. In the nature of things, it is impossible for committees of Congress, with other duties and obligations as to committee and department work pressing upon its members, to give their entire time to a study of this great problem, and the same is true as to a commission composed of officers and clerks in the Treasury Department. They have their own current work to perform, most of it important (its members being

selected on account of their ability and efficiency), which can not be neglected, postponed, or transferred; and then, trained and accustomed as they are to existing methods, it is but natural to suppose that they would be slow to recommend radical changes therein. For this reason, it is believed that a non-partisan commission, similar in its organization to the Interstate Commerce Commission, but limited to a period of, say, three years' duration (which can be extended temporarily, if necessary), organized exclusively for the purpose of examining into existing methods of business and work in the several Executive Departments, more especially as to the disbursement of public money and the examination, adjudication, and settlement of public accounts, with the view of either establishing simpler and more accurate, as well as economical methods, or providing for a consolidation of the accounting offices of the Treasury Department, thus accomplishing a considerable reduction in the number of employés and a resulting reduction of expenditure for salaries, (thereby promoting the efficiency and general good of the public service) is highly desirable, and the subject is earnestly commended to the consideration of the President and Congress.

PROMOTIONS IN THE TREASURY DEPARTMENT.

The establishment, under the President's order, of an efficiency record which is the determining factor in the selection of clerks for promotion, has tended strongly to secure punctuality, regular attendance, industry, and accuracy, and the ambitious employés have endeavored to complete their knowledge of all matters pertaining to the offices in which they are employed, and to add to their stock of academic acquirements and general information. The ends usually sought by coercive rules and regulations have been better attained by the rewards offered for fidelity and ability. The friction first encountered in putting the new methods into effect has been largely overcome and ratings by the chiefs of division are practically equitable as between the several divisions.

The experience of the Department in making selections for places excepted from the competitive examination induced my predecessor to subject each candidate for the position of special agent to an examination as a test of fitness. I found the application of the principle to be beneficial to the service and continued it; and for the same reason I have applied during the year a like test of fitness to candidates for the position of chief of division with equally good results.

So far as can be learned the promotions, with few exceptions, have been approved by the chiefs and clerks of the bureaus in which they

LXXX REPORT OF THE SECRETARY OF THE TREASURY.

have been made. The head of the Department has been relieved of the importunities for promotion from those outside the classified service and from those within. The hope is entertained that the present rules, with a few modifications, will eventually place promotions wholly on the basis of merit, as ascertained from the records of faithfulness and efficiency of the clerks made from day to day. Attention is invited to the report of the Examiner, to be found in the Appendix.*

REPORTS OF HEADS OF OFFICES.

The several reports of the heads of offices and bureaus are herewith transmitted, and the Secretary desires to express his appreciation of the valuable service rendered to him by the officers and employés of this Department in the transaction of the public business.

CHARLES FOSTER,

Secretary of the Treasury.

The Hon. The Speaker of the House of Representatives.

* See page 809.

LEGAL-TENDER NOTES.							•
The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury	Indefinite	On demand	None	Par	450, 000, 000. 00		346, 681, 016. 00

might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the						8		OUTSTÂNDING
Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in heu of \$100,000,000 authorized by the resolution of January 17, 1863		•	1. -					JAG
(12 Statutes 822). The act of May 31, 1878 (20 Statues 87), provides that no more of the United States legal tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled or destroyed, but shall be reissued and paid out again, and kept in circulation.				,				PRINCIPAL

FIVE-PER-CENT LOAN OF 1881.						- 3	[A]	
The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of, at not less than par, in coin, either of the déscription of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), to the extent necessary for the redemption of fractional currency in silver coins of the denominations of ten, twenty-five, and fifty cents of standard value. The act of March 3, 1875 (18 Statutes, 466), directs the Secretary of the Treasury to issue bonds of the character and description set out in the act of July 14, 1870 (16 Statutes, 272), to James B. Eads, or his legal representatives, in payment at par of the warrants of the Secretary of War for the construction of jetties and auxiliary works to maintain a wide and deep channel between the South Pass of the Mississippi River and the Gulf of Mexico, unless Congress shall							FRLNCIFAL	DESTRAINT PRINCIPAL OF
have previously provided for the payment of the same by the necessary appropriation of money. The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$200,000,000 at 5 per centum, principal and interest payable in coin of the present standard value, at the pleasure of the United States	10 years	May 1, 1881	5 per cent	Par		517,994,150.00		अस्ति ।
Government, after ten years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act net to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's or to							rosuic	or rama
be exchanged for said 5-20's par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem. The act of January 20, 1871 (16 Statutes, 399), increases the amount of 5 per cents to \$500.000,000, provided the total amount of bonds issued shall not					· ·	:	DEDI.	Tagar
exceed the amount originally authorized, and authorizes the interest on any of these bonds to be paid quarterly. The act of December 17, 1873 (18 Statutes. 1), authorized the issue of an equal amount of bonds of the loan of 1858, which the holders thereof may, on or before February 1, 1874, elect to exchange for the bonds of this loan.		5		}	1,500,000,000.00		П АХХ	1 X X X V

FOUR-PER-CENT LOAN OF 1907. (RESUMPTION.)

The act of January 14, 1875 (18 Statutes. 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redeeming, on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-tender notes when presented in sums of not less than fifty dollars.

CERTIFICATES OF DEPOSIT.

The act of June 8, 1872 (17 Statutes, 336), authorizes the deposit of United States notes without interest by banking associations in sums not less than \$10,000, and the issue of certificates therefor in denominations of not less than \$5,000; which certificates shall be payable on demand in United States notes at the place where the deposits were made. It provides that the notes so deposited in the Treasury, shall not be counted as a part of the legal reserve, but that the certificates issued therefor may be held and counted by the national banks as part of their legal reserve; and may be accepted in the settlement of clearing-house balances at the place where the deposits therefor were made, and that the United States notes for which such certificates were issued, or other United States notes of like amount, shall be held as special deposits in the Treasury, and used only for the redemption of such certificates.

GOLD CERTIFICATES.

The act of March 3, 1863 (12 Statutes, 711), authorizes the Secretary of the Treasury to receive deposits of gold coin and bullion in sums of not less than twenty dollars, and to issue certificates therefor in denominations of not less than twenty dollars each; the coin and bullion deposited for or representing the certificates to be retained in the Treasury for the payment of the same on demand. The certificates so issued to be received at par in payment of interest on the public debt and for duties on imports. The act of July 12, 1882 (22 Statutes, 185), provides that the Secretary of the Treasury shall suspend the issue of gold certificates whenever the amount of gold coin and gold bullion in the Treasury reserved for the redemption of United States notes falls below one hundred millions of dollars.

SILVER CERTIFICATES.					,		
The act of February 28, 1878 (20 Statutes, 26, sec. 3), provides that any holder of the coin authorized by this act may deposit the same with the Treasurer or any assistant treasurer of the United States in sums not less than ten dollars and receive therefor certificates of not less than ten dollars each, corresponding with the denominations of the United States notes. The coin deposited for or representing the certificates shall be retained in the Treasury for the payment of the same on demand. Said certificates shall hereceivable for customs, taxes, and all public dues, and, when so received, may be reissued. The act of August 4, 1886 (24 Statutes, 227), authorizes the issue of silver certificates in denominations of one, two, and five dollars; said certificates to be receivable, redeemable, and payable in like manner and for like purposes as is provided for by the act of February 28, 1878. REFUNDING CERTIFICATES.	Indefinite	On demand	None	Par	No limit		\$331, 614, 304. 00
The act of February 26, 1879 (20 Statutes, 321), authorizes the Secretary of the Treasury to issue, in exchange for lawful money of the United States, certificates of deposit, of the denomination of ten dollars, bearing interest at the rate of four per centum per annum, and convertible at any time, with accured interest, into the four per centum bonds described in the refunding act; the money so received to be applied only to the payment of the bonds bearing interest at a rate not less than five per centum, in the mode prescribed by said act.	Indefinite	Convertible in- to 4 per cent bonds.	4 per cent	Par	No limit	\$40, 012, 750. 00	83, 580. 00
FUNDED LOAN OF 1881, CONTINUED AT THREE AND ONE- HALF PER CENT.	:				. *		
These bonds were issued in exchange for five-per-cent bonds of the funded loan of 1881, by mutual agreement between the Secretary of the Treasury and the holders, and were made redeemable at the pleasure of the Government.	Indefinite	At pleasure of the Govern- ment.	31 per cent	Par			21, 150. 00
FUNDED LOAN OF 1891, CONTINUED AT TWO PER CENT.							
These bonds were issued in exchange for the four and one-half per- cent funded loan of 1891, by mutual agreement between the Secre- tary of the Treasury and the holders, and were made redeemable at the pleasure of the Government.	Indefinite	At pleasure of the Govern- ment.	2 per cent	Par		25, 364, 500.00	25, 364, 500. 00

Ο.	NÝ ONT	TITT	7:19	1000

These bonds were issued in exchange for the five and six per cen bonds which had been previously continued at three and one-hal per cent by mutual agreement between the Secretary of the Treas urv and the holders, and were made redeemable at the pleasure of the Government.

TREASURY NOTES OF 1890.

The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of th Treasury to purchase, from time to time, silver bullion to the agere gate amount of four million five hundred thousand ounces, or s much thereof as may be offered in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy one and twenty five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver do lars coined therefrom then held in the Treasury, purchased by such notes: and such Treasury notes shall be a legal tender in paymen of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes provided for the Secretary of the Treasury shall redeem the same in gold or silver coin, at hi discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the pres ent legal ratio, or such ratio as may be provided by law.

NATIONAL BANK NOTES (REDEMPTION ACCOUNT).

The act of July 14, 1890 (26 Statutes, 289), provides that balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circu lating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneou receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said bank which may come into his possession subject to redemption, * * and the balance remaining of the deposits so covered shall, at th close of each month, be reported on the monthly public debt state ment as debt of the United States bearing no interest.

^{*}In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption should properly be deducted from the principal of the public debt in making comparison with former years. †Exclusive of gold, silver, currency certificates, and Treasury notes of 1890, held in the Treasurer's cash, and including \$64,623,512 bonds issued to the several Pacific railroads.

NOTE 1 .- The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

NOTE 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

NOTE 3.—The temporary loan per act of July 11, 1862, is included in the 4 per cents from 1862 to 1865, inclusive, with the exception of the amount outstanding August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

TABLE D.—STATEMENT OF THE ISSUE AND REDEMPTION OF LOANS AND TREASURY NOTES (BY WARRANTS) FOR THE FISCAL YEAR ENDED JUNE 30, 1892.

TABLE H.—STATEMENT SHOWING THE CHANGES IN THE INTEREST-BEARING DEBT OF THE UNITED STATES DURING THE YEAR ENDED OCTOBER 31, 1892.

Title of loan.	Rate of interest.	Outstanding November 1, 1891.	Increase during the year.	Decrease during the year.	Outstanding November 1, 1892.
Funded loan of 1891, continued. Funded loan of 1907. Refunding certificates		\$25, 364, 500 559, 573, 150 89, 070 585, 026, 720	*\$16, 050 16, 050	\$10, 750 10, 750	25, 364, 500 559, 589, 200 78, 320 585, 032, 020

^{*}See statement which follows, showing conversion of refunding certificates, for an explanation of the increase during the year in the interest bearing debt.

Since November 1, 1891, refunding certificates issued in 1879, under the act of February 26, 1879, have been presented for conversion into 4 per cent bonds as follows:

Accrued interest thereon.		
Total		16, 362. 70
For which settlement was made as follows:	* .	
	\$10,750	
Four per cent bonds issued on account of principal. Four per cent bonds issued on account of accrued interest. Interest paid in cash	5,300	\$16,050.00
Interest paid in eash		312.70

The certificates still outstanding amount to \$78,320.

The annual interest charge has been increased during the twelve months ended October 31, 1892, by the sum of \$212, being 4 per cent per annum on the \$5,300, bonds issued in settlement of accrued interest on refunding certificates surrendered for conversion.

The bonded indebtedness of the United States has been reduced during the period above mentioned by the redemption of \$3,617,700 $4\frac{1}{2}$ per cent bonds, and \$131,975 in 7-30 notes and bonds of various issues, all of which ceased to bear interest prior to November 1, 1891.

Note.—The difference between the amount of money in the country and the amount in circulation represents the money in the Treasury.

Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in the tables for the years 1873 to 1891 inclusive; in 1892 they are reported separately.

The foregoing tables present the revised figures for each of the years given.

TABLE J.—STATEMENT SHOWING THE ANNUAL APPROPRIATIONS MADE BY CONGRESS FOR EACH FISCAL YEAR FROM 1884 TO 1892, INCLUSIVE.

APPENDIX.

REPORTS OF HEADS OF BUREAUS AND OTHER OFFICERS.

(No. 1.)

REPORT OF THE TREASURER.

TREASURY OF THE UNITED STATES, Washington, December 1, 1892.

SIR: I have the honor to submit the annual report on the operations and condition of the Treasury.

REVENUES AND EXPENDITURES.

The net ordinary revenues and expenditures of the Government during the past two fiscal years are shown in the following table:

		; 		
	1891.	1892.	Increase.	Decrease.
REVENUES.				
Customs Internal revenue Sale of public lands Miscellaneous sources	\$219, 522, 205. 23 145, 686, 249. 44 4, 029, 535. 41 23, 374, 457. 23	\$177, 452, 964, 15 153, 971, 072, 57 3, 261, 875, 58 20, 251, 871, 94	\$8, 284, 823. 13	\$42, 069, 241, 08 767, 659, 83 3, 122, 585, 29

EXPENDITURES.				a .
Civil and miscellaneous: Customs, light-houses, public buildings, etc Internal revenue Interior civil (lands, patents, etc.). Treasury proper (legislative, executive, and other civil). Diplomatic (foreign relations). Judiciary. War Department Navy Department Interior Department (Indians and pensions). Interest on public debt. Premium on public debt.	24, 909, 689, 16 16, 552, 292, 50 15, 281, 705, 34 45, 217, 510, 47 2, 028, 715, 26, 6, 058, 254, 76 48, 720, 065, 01 26, 113, 896, 46 132, 943, 420, 41 37, 547, 135, 37 10, 401, 220, 61	19, 988, 290, 67 14, 412, 717, 33 10, 068, 209, 48 49, 094, 186, 79 1, 742, 400, 25 4, 536, 184, 09 46, 895, 450, 30 29, 174, 138, 98 145, 733, 630, 46 23, 378, 116, 23		4, 921; 398, 49 2, 139, 675, 17 5, 213, 495, 86 286, 315, 01 1, 522, 070, 67 1, 824, 608, 71 14, 169, 019, 14 10, 401, 220, 61
Total	365, 773, 905. 35	345, 023, 330. 58	19, 727, 128. 89	40, 477, 703. 66 20, 750, 574. 77
Surplus	26, 838, 541. 96	9, 914, 453. 66		16, 924, 088. 30

Exclusive of the \$10,401,220.61 applied in 1891 to the payment of premiums on bonds purchased, which, strictly speaking, is not an ordinary charge, there was a net decrease of \$10,349,354.16 in the expenditures, and one of \$27,325,308.91 in the surplus revenues.

Classified according to the principal heads, the revenues and expenditures on account of the public debt, which are set out in the usual detail in the Appendix, were as given below:

, (1891,	1892.	Increase.	Decrease.
REVENUES.				,
Dertificates of deposit United States notes Preasury notes National-bank notes Loans and fractional currency	\$186, 979, 000. 00 70, 792, 000. 00 51, 852, 417. 00 63, 571, 690. 75 13, 750. 00	\$252, 076, 000. 00 66, 264, 000. 00 60, 130, 424. 00 2, 977, 838. 00 15, 250. 00	\$65, 097, 000. 00 8, 278, 007. 00 1, 500. 00	\$4, 528, 000. 0 60, 593, 852. 7

Total	731, 126, 376. 22	684, 019, 289, 56		47, 107, 086. 66
Surplus	34, 694, 928. 84	52, 382, 006. 68	17, 687, 077. 84	

It will be observed that both years there was a surplus of receipts over disbursements, not only in the aggregate, but under each of the

two general heads.

To weigh the relative importance or value of the different classes of receipts, or, what is more pertinent still, to make clear the effect of the difference between the receipts and disbursements under the various heads, it is to be considered that with respect to the result to the Treasury the receipts are divided into two general classes. On the one hand, the ordinary revenues, together with the receipts from loans and the deposits for the retirement of national bank notes, increase for the time the cash available for the uses of the Government. The ordinary revenues are an absolute property, while the receipts from the sale of bonds or on account of the bank-note redemption fund become a property subject to the condition of future payment. The compilation of

the figures for the revenues and expenditures of these classes gives the following result:

	1891.	1892.	Increase.	Decrease.
Revenues	\$456, 197, 888. 06 490, 330, 260. 22	\$357, 930, 872. 24 385, 604, 138. 56		\$98, 267, 015, 82 104, 726, 121, 66
Excess of expenditures	34, 132, 372. 16	27, 673, 266. 32		6, 459, 105. 84

It must not be overlooked that the figures for the revenues of the former of the two years are swelled artificially by the transfer of the bank-note redemption fund, which amounted, at the time of its deposit in the Treasury, in July, 1890, to \$54,388,475.75. If this be considered in the present comparison what it was in fact, a receipt of prior years, the figures will show an excess of upwards of eighty-eight millions of expenditures over revenues in 1891, and one of upwards of twenty-seven millions in 1892. It is unnecessary to point out that these expenditures were applied to the reduction of the public debt, or to recall that they were undertaken in pursuance of the well-considered policy of the Department, which had for its purpose the stoppage of interest by the use of moneys lying idle and useless in the Treasury.

The remaining revenues and expenditures, composing the second general class, are those which arise from the issue and redemption of gold, silver, and currency certificates, United States notes, and Treasury notes. Receipts upon these accounts tend to swell the assets of the Treasury, but do not affect the available balance. The figures un-

der this head for the two years are as follows:

	1891.	1892.	Increase.	Decrease.
Revenues Expenditures	\$309, 623, 417. 00 240, 796, 116. 00	\$378, 470, 424. 00 298, 415, 151. 00	\$68, 847, 007. 00 57, 619, 035. 00	
Excess of revenues	:68, 827, 301. 00	80, 055, 273. 00	11, 227, 972, 00	

It will be seen from the foregoing that the tendency of the recent operations of the Treasury has been toward the diminution of the available balance and the increase of the trust funds. As regards the first of the changes, the result of the past year was attained for the most part by the operations of the first six months. How successful these operations were, is perhaps best illustrated by the saving of upwards of fourteen millions of interest, out of which a substantial surplus revenue was realized. The cessation of bond purchases, together with the continuance of this surplus, has left the Treasury in the same commanding position that it has occupied for years, notwithstanding the cutting down of the revenues by legislation.

STATE OF THE TREASURY.

At the close of business on June 30, 1891, there stood charged to the Treasurer on the books of the Register of the Treasury a balance of \$726,222,332.60. Adding thereto the revenues of the year from all sources, amounting to \$736,401,296.24, as stated in the preceding chapter, gives a total of \$1,462,623,628.84 to be accounted for. Out of this was disbursed, by warrant of the Department, as the expenditures for the year, a total of \$684,019,289.56, leaving a balance of \$778,604,339.28 charged to the Treasurer at the close of business on June 30, 1892.

In addition to the liability to the Department there were others aris-

ing from the postal revenues, from the deposits to the credit of disbursing officers, from the 5 per cent fund for the redemption of national bank notes, and from various other sources. These are classed together under what is known as the Treasurer's agency account. They amounted to \$50,290,009.36 on June 30, 1891, and to \$36,561,761.39, on June 30, 1892. Lastly, as the receipt into the Treasury invariably precedes the issue of the warrant, there is always a sum of money in the Treasurer's custody, forming a part of the current revenues, which has not yet been charged to him on the Register's books. This amounted to \$1,342,603.71 at the former of the two dates and to \$465,538.24 at the latter. The Treasurer's total liabilities at those dates, therefore, were, respectively, \$777,854,945.67 and \$815,631,638.91.

Against these liabilities the Treasury held, in the several offices and in the associated offices of the mint, certain known sums of coin, bullion, paper currency, and securities. There were other sums standing to the Treasurer's credit with the depositary banks. These together constituted the live assets. But as the Register's account contains no credit for the money deposited, under the law of 1836, with the States, or for the losses sustained by the Treasury at various times in the past, the Treasurer is entitled to count these amongst his assets, although he does not carry them as such on his books. So composed, the statement of assets and liabilities, in the broadest form, is as follows:

	June 30, 1891.	June 30, 1892.
ASSETS.		
Gold coin and bullion. Silver coin and bullion. Notes and certificates. Minor coin and fractional currency. Bonds, interest checks, and compons. Deposits in national-bank depositaries. Deposits with States. Unavailable funds.	399, 746, 943, 51 82, 742, 877, 40 328, 950, 88 27, 384, 22 26, 369, 482, 31	\$255, 671, 639. 87 448, 156, 453. 54 67, 077, 972. 37 465, 474. 99 26, 105. 11 14, 726, 914. 21 28, 101, 644. 91 1, 405, 433. 91
Total	777, 854, 945, 67	815, 631, 638. 91
LIABILITIES.		
General account. Agency account. Uncovered moneys	726, 222, 332, 60 50, 290, 009, 36 1, 342, 603, 71	778, 604, 339. 28 36, 561, 761. 39 465, 538. 24
Total	777, 854, 945. 67	815, 631, 638. 91

The foregoing reconciles the condition of the Treasury at once with the accounts of the Department and with the results of the operations of the past year.

As actually carried on the books of this office, however, the figures differ from those above by the omission of the deposits with the States and the unavailable funds, and by the merging of the uncovered moneys into the general account. In summary form the true condition of the Treasury may, therefore, be given thus:

	June 30, 1891.	June 30, 1892.
Assets	\$748, 347, 866. 85	\$786, 124, 560. 09
Liabilities: General account Agency account		749, 562, 798, 70 36, 561, 761, 39
Total	748, 347, 866. 85	786, 124, 560. 09

In the Appendix will be found tables showing the distribution of the assets and liabilities amongst the various offices and the depositaries; also the revised general statements, substantially in the form in which they are issued monthly, whence the above figures are taken. From those general statements may be formed the following classification of the assets with respect to the object for which they were held, and of the liabilities with respect to their character, whether arising out of outstanding obligations or out of working balance or reserve:

	June 8	30, 1891.	June 30, 1892.		
ASSETS.					
Silver coin and bullion	\$120,063,069.00 357,464,383.00		\$141, 093, 619. 00 428, 405, 536. 00	**	
Legal-tender notes Against deposits and reserve:	21, 875, 000. 00	\$499, 402, 452, 00	29, 840, 000, 00	\$599, 339, 155. 00

Bonds, interest checks, and cou-	328, 950. 88		465, 474. 99		
pons. Deposits in national-bank de- positaries.	27, 384. 22 26, 369, 482. 31	248, 945, 414, 85	2 6, 105. 11 14, 726, 914. 21	186, 785, 4 05. 0 9	
Total	······································	748, 347, 866. 85		786, 124, 560. 09	
Certificates and notes Deposits, agency account	50, 290, 009. 36	541, 210, 031. 00	36, 561, 761, 39	620, 380, 304. 00	
Reserve	156, 847, 826. 49	207, 137, 835. 85	129, 182, 494, 70	165, 744, 256. 09	
Total		748, 347, 866. 85		786, 124, 560. 09	

Since there were included in the assets considerable amounts of gold, silver, and currency certificates, which might have been canceled by the Department, and smaller sums of redeemed securities, which awaited delivery to the accounting officers as vouchers, the condition exhibited in the last table was such as to admit of a partial liquidation, wholly internal in its inception and consequences. Such an operation would have had the effect merely of clarifying the assets and simplifying the accounts, without affecting the real condition of the Treasury. If such an operation had been carried out the result would have been as follows:

	June 30, 1891.		June 30, 1892.		
ASSETS.			-		
Against certificates and notes Against deposits and reserve:		\$499, 402, 452. 00		\$599, 339, 155, 00	
Gold coin and bullion	42, 282, 560, 51		\$114, 578, 020. 87 19, 750, 917, 54		
Paper and minor coin Deposits in banks	19, 389, 249. 28 26, 369, 482. 31	207, 110, 451, 63	16, 662, 298. 36 14, 726, 914. 21	165, 718, 150. 98	
Total		706, 512, 903. 63		765, 057, 305. 98	
LIABILITIES.					
Certificates and notes Deposits and reserve		499, 402, 452. 60 207, 110, 451. 63		599, 339, 155, 00 165, 718, 150, 98	
Total		706, 512, 903. 63		765, 057, 305. 98	

Perhaps the most gratifying particular of this showing is the evidence it affords of the success which has attended the efforts of the Department to maintain a strong reserve of gold. In spite of the heavy disbursements, which cut down the working balance by more than forty millions, the gold balance, constituting as it did more than half of the net holdings, was impaired by less than five millions. the face of the adverse monetary conditions prevailing, this result was attained not without careful management and the adoption of some new measures.

THE PUBLIC DEBT.

For the purpose of more fully detailing the operations of the Treasury affecting the public debt, already shown in the aggregate in a preceding chapter, a brief notice of the condition of the loans classified under this head, and of the changes which occurred therein during the fiscal year, will be given, as in former reports.

The condition of the debt on June 30, 1891 and 1892, may be sum-

marized as follows:

Class.	June 30, 1891.	June 30, 1892.
Interest-bearing loans Matured loans Old demand notes United States notes Fractional currency, estimated National-bank notes Certificates of deposit Treasury notes of 1890	1,614,705.26 55,647.50 346,831,016.00 6,907,679.60 40,018,392.25 489,961,614.00	\$585, 029, 330, 00 2, 788, 875, 26 55, 647, 50 346, 681, 016, 00 6, 903, 462, 62 26, 763, 509, 25 118, 523, 233, 00 101, 712, 071, 00
Total	1,545,996,591.61	1, 588, 464, 144. 68

Arranged with respect to the character of the security, the figures are as follows:

Security.	June 30, 1891.	June 30, 1892.
Credit of the United States		
Total	1, 545, 996, 591. 61	1, 588, 464, 144, 63

In this statement the Treasury notes of 1890, against which full deposits of silver are held by the Treasury, are classed along with the gold, silver, and currency certificates, although, unlike the certificates,

they are not payable strictly out of the deposit.

If the conditions of payment be attended to, the interest bearing loans, which, with the exception of the 2 per cent bonds issued during the year, are payable at future dates, arrange themselves, with the same exception, under one head; the matured loans, the old dentand notes, the fractional currency, and the national-bank notes secured by deposits of lawful money, being all redeemable on demand, for retirement without reissue, form a group by themselves; the United States notes and the Treasury notes of 1890 are alike in being redeemable on demand for reissue, while the certificates, expressly payable out of full deposits of coin and paper in the Treasury, compose the last and least significant class, so far as their character as the evidence of debt of the United States is concerned. The result of this arrangement is as follows:

Condition of payment.	June 30, 1891.	June 30, 1892.
At maturity, future dates. At option of the United States On demand, without reissue. On demand, for reissue. On demand, out of deposits.	48, 596, 424, 61 396, 909, 433, 00	\$559, 664, 830, 00 25, 364, 500, 00 36, 508, 494, 63 448, 393, 087, 00 518, 533, 233, 00
Total	1, 545, 996, 591. 61	1, 588, 464, 144. 63

These figures show a satisfactory change, at once in the material reduction of the interest bearing debt, the conversion of matured bonds into others payable at the option of the Secretary, and the extinction of a considerable part of the demand loans. The processes by which these results were brought about are exhibited in the following table:

Loan.	Increase.	Conversions.	Redemptions.	Net increase.	Net decrease.
4½ per cent. bonds			\$24, 225, 800. 00		\$49, 638, 000. 00
2 per cent bonds	25, 412, 200. 00	10, 340. 00	47, 700. 00	25, 364, 500. 00	10, 340. 00
Old matured debt Fractional currency National bank notes			4. 216. 98	•	
Total Net		25, 422, 540. 00	40, 570, 467. 98	25, 379, 750.00	62, 967, 469. 98 37, 587, 719. 98

The net reduction was effected by the application of the \$9,914,453.66 of surplus revenue for the year, together with the apparent sum of \$27,673,266.32 taken from the cash in the Treasury. Both of these items have been shown on former pages. Since, however, \$4,910 of accrued interest on refunding certificates was converted into 4 per cent bonds, and included in the receipts for the year, the total application of money to the extinction of the principal of the debt was \$37,592,629.98, being the difference between the total redemptions shown in the table and the increase of \$2,977,838 arising from fresh deposits for the retirement of national-bank notes.

THE CURRENCY.

The stock of money in the United States on June 30, 1891 and 1892, is estimated to have been as follows:

Kind.	June 30, 1891.	June 30, 1892.
Gold coin Gold bullion Silver dollars Silver bullion Fractional silver coin Total coin and bullfon	61, 442, 802 405, 659, 268 38, 769, 772 77, 848, 700	\$589, 179, 550 75, 095, 785 413, 988, 735 78, 803, 331 77, 521, 478

These figures are the result of the final compilation of statistics relating to the dates named, and are intended to represent the facts actually existing on those days. They differ somewhat, but not materially, from those heretofore published and reproduced elsewhere in this report, which present the showing of the records current in the Department at the time the compilations were made. The differences between the two sets of figures do not, therefore, imply errors in either. As the more precise and authoritative record, the revised figures are to be preferred; but since they are made up for the last day only in each fiscal year, they are not available for the discussion of the movements occupying shorter periods of time. Neither would it be considered accurate to substitute them in the place of those for June in the series compiled monthly, since they rest upon a different basis of fact from the others in that series. Hence the revised figures are used herein to show the net results of the year, while those in the monthly series are recurred to in the discussion of monthly changes.

To arrive at the amount and composition of the effective monetary stock it is necessary to eliminate that part of the paper currency which is purely representative, consisting of the certificates of deposit and the Treasury notes. It might be questioned, perhaps, whether the latter, from their peculiar legal constitution, may properly be reckoned in this class, but such disposition of them is preferred for the present purpose. The following is thus obtained as the effective stock in com-

parison with several preceding years:

Kind.	1888.	1889.	1890.	1891.	1892.
Gold Silver Notes	\$705, 818, 855 386, 611, 108 599, 049, 337	\$680, 063, 505 420, 548, 929 558, 059, 979	\$695, 563, 029 463, 211, 919 532, 651, 791	\$646, 582, 852 522, 277, 740 514, 608, 990	\$664, 275, 335 570, 313, 544 519, 364, 866
Total	1, 691, 479, 300	1, 658, 672, 413	1, 691, 426, 739	1, 683, 469, 582	1, 753, 953, 745

The monetary history of the past year, however, is so peculiar that the foregoing figures do not give a clear idea of what has been going on. The seasonal changes which have usually distinguished the six months between June and January from the other six, the turn in each movement occurring approximately at the middle and end of each fiscal year, have been wanting or postponed. Gold exports, commonly ceasing in July, continued until September, while the return shipments, usually commencing early in the autumn, have not occurred at all. For these reasons the composition of the money stock is given also for the 30th of September in the same years, as follows:

Kind.	1888.	1889.	1890.	1891.	1892.
Gold	\$709, 881, 170 393, 948, 394 590, 210, 018	\$681, 819, 487 428, 440, 671 550, 248, 818	\$693, 026, 194 468, 988, 835 528, 283, 931	\$653, 308, 095 529, 019, 947 518, 466, 162	\$652, 130, 237 579, 211, 096 519, 467, 776
Total	1, 694, 039, 582	1, 660, 508, 976	1,690,298,960	1, 700, 794, 204	1,750,809,109

Both of these tables bring out a substantial increase of the stock of the circulating medium since June 30, 1891; but the tendency, apparently manifest during the first twelve months of the period, to accumulate gold, gave way to an opposite one in the next three. To exhibit more minutely the changes which occurred in the monetary stock during the fiscal year, the effects of the various causes which contributed to the result will now briefly be detailed. For reasons already explained, the estimates published monthly, compilations of which will be found in the Appendix, will be relied on for the statistics.

The imports and exports of gold, the net production of domestic mines in excess of industrial consumption, the net consumption in excess of production, and the consequent net gain or loss of the metal, month by month, during the fiscal year, were as follows:

Month.	Imports.	Exports.	Net pro- duction.	Net consumption.	Net gain.	Net loss.
1891.		٠.	·			12
July	\$1,029,148 1,394,755 7,451,428 16,897,947 8,871,717 6,018,851	\$6, 662, 674 172, 168 345, 290 809, 595 381, 949 254, 501	\$3,509,099 1,808,811 1,148,661 3,306,985		\$3, 031, 398 5, 818, 272 17, 237, 013	\$2, 124, 427

The changes in the stock of silver grew out of the monthly purchases under the law of 1890, with slight modifications from the subsidiary coinage. Those in the notes were limited to a gradual increase, amounting to \$5,000,000 in the aggregate, in the circulation of national banks. It will perhaps answer all purposes to lump these together. The monthly changes in the monetary stock are thus shown to have been as follows:

Month.	Gain of gold.	Loss of gold.	Increase of silver and notes.	Increase of stock.	Decrease of stock.
1891. July	5, 818, 272 17, 237, 013	\$2, 124, 427	5, 737, 029	22, 974, 042

Total Net	46, 128, 461 17, 762, 594	28, 365, 867	57, 138, 734 57, 138, 734	89, 524, 367 74, 901, 328	14, 623, 039

The direct connection of the Treasury with the movements of gold was confined almost altogether to furnishing the material for the exports. These, as is well known, occurred, with unimportant exception, at New York, the metal being drawn, in American coin, from the subtreasury there, in exchange for other kinds of money. These transactions, together with other receipts and payments of one kind of money for another, are recorded in what is called the exchange account, and are the only means through which the subtreasury loses gold in any considerable sums. A synopsis of that account will, therefore, show the results of the export movement of gold so far as the Treasury is concerned.

The receipts and disbursements of moneys on this account in the six months ending with June, during which the bulk of the exportations occurred, and the consequent gain or loss to the Treasury, were as follows:

Kind of money.	Receipts.	Disburse- ments.	Gàin.	Loss.
Gold coin Standard silver dollars Fractional silver coin United States notes Treasury notes of 1890 National-bank notes Gold certificates Silver certificates	20, 404 333 10, 910, 819 6, 056, 231 297, 780 61, 681, 360	836, 137 3, 680, 692 13, 345, 310 10, 263, 555	45, 337, 789	3, 680, 359 2, 434, 491 4, 207, 324
Total	106, 535, 623	106, 535, 623	59, 780, 536	59, 780, 536

It appears, then, that up to the end of the fiscal year the gold taken from the Treasury for export was paid for mainly in gold certificates. The effect of these operations was, therefore, to deplete the gross holdings of gold without effecting the reserve. No legal-tender notes in any considerable amounts were presented during this period for redemption in coin. The loss to the gold reserve, which amounted in the six months to sixteen millions, was due to the issue of gold certificates for disbursement in the ordinary expenditures of the Government, when there were no other available kinds of currency in the Treasury. During this period, however, there was a tendency of silver certificates toward the Treasury for redemption, but so far as could be ascertained this movement was an incident to the return of the small denominations which had been sent out during the previous autumn to different parts of the country, and was not due to any apparent lack of confidence in the certificates themselves.

But with the beginning of July an altogether different condition of things set in. On the first day of the month three millions in gold was taken for export, for which the subtreasury received two and a half millions in United States and Treasury notes, and only half a million in gold certificates. Of the ten millions in round numbers exported in the month, four millions was paid for in United States notes, four millions and a half in Treasury notes, and only a million and a half in gold certificates. During the continuance of gold shipments through August and part of September the proportion of gold certificates offered was still less. The net results of the operations of the three months affecting the exchange account, on the days when gold was taken for export, are shown in the following table:

Kind of money.	Receipts.	Disburse- ments.	Gain.	Loss.
Gold coin. Standard silver dollars Fractional silver coin. United States notes. Treasury notes of 1890 National bank notes. Gold certificates. Silver certificates.	7, 137, 925 10, 309, 990 17, 890	\$19, 275, 453 88, 574 341, 143 548, 000 436, 005 1, 062, 721 70, 998	\$6, 589, 925 9, 873, 985	341, 137
Total	21, 822, 894	21, 822, 894	18, 643, 590	18, 643, 590

With the cessation of gold shipments conditions more favorable to the Treasury set in, and the gold reserve, which had suffered severely, once more began to build up, under careful management. Advantage was taken, to this end, of the autumnal flow of currency to the South and West, by giving preference to gold for deposit in exchange for the paper desired for shipment. This plan worked well, and the results can be seen in the improved condition of the reserve.

THE CIRCULATION.

The estimates of the stock of monetary material comprise all bullion, Included in the figures, therefore, are certain amounts wherever found. of bullion, both gold and silver, which were in the custody of the mints, but were not treated as part of the cash of the Treasury, having not yet been turned over to the bullion fund or charged to the Treasurer's general account. There is included also in the estimate of the silver stock the bullion on deposit in New York against the certificates listed in the stock exchange, although this, in the strictest sense, is not money In estimating the circulation, therefore, the separate holdings of the mints must be added to the amount in the Treasury, while the private deposits in New York are treated as outstanding.

According to the official computations, the distribution of the stock of money, on June 30, 1891 and 1892, between the Treasury and the

circulation was as follows:

 •	In Treasury	y and mints. In circulation.			
Kind.	1891.	1892.	1891.	1892.	
Gold. Silver dollars and bullion Fractional silver coin	\$239, 263, 689 379, 927, 323 19, 629, 480	\$255, 706, 511 434, 240, 056 14, 227, 774	\$407, 319, 163 64, 501, 717 58, 219, 220	\$408, 568, 824 58, 552, 010 63, 293, 704	
Total coin and bullion	638, 820, 492	704, 174, 341	530, 040, 100	530, 414, 538	
United States notes Treasury notes of 1890 National-bank notes Gold certificates Silver certificates Currency certificates	9, 879, 713 5, 706, 929 32, 423, 360	37, 121, 111 3, 453, 379 5, 462, 333 15, 530, 310 4, 920, 839 590, 000	321, 332, 360 40, 348, 704 162, 221, 045 120, 063, 069 307, 235, 966 21, 875, 000	309, 559, 905 98, 258, 692 167, 221, 517 141, 093, 619 326, 693, 465 29, 840, 000	
Total paper	82, 742, 877	67, 077, 972	973, 076, 144	1, 072, 667, 198	
Aggregate	721, 563, 369	771, 252, 313	1, 503, 116, 244	1, 603, 081, 736	

To arrive at the proportions in which gold, silver, and promissory notes entered potentially into the circulation, the metal and paper may be supposed to take the place, whether in the circulation or the Treasury, of the certificates and Treasury notes, with the following result:

Kind.	Outstanding.	In Treasury and mints.	In circulation.
June 30, 1891: Gold Silver Notes Total	\$646, 582, 852 522, 277, 740 \$14, 608, 990 1, 683, 469, 582	\$119, 200, 620 51, 972, 133 9, 180, 585	\$527, 382, 232 470, 305, 607 505, 428, 405 1, 503, 116, 244
June 30, 1892: Gold Silver Notes Total	664, 275, 335 570, 313, 544 519, 364, 866 1, 753, 953, 745	114, 612, 892 23, 515, 673 12, 743, 444 150, 872, 009	549, 662, 443 546, 797, 871 506, 621, 422 1, 603, 081, 736

In view of the somewhat unusual conditions which have prevailed for some months past, to which reference has already been made, the virtual composition of that part of the circulating medium which was outside of the Treasury on September 30 in each of the last five years is given, as follows:

Kind.	1888.	1889.	1890.	1891.	1892.
Gold Silver Notes	\$512, 168, 055 328, 541, 932 543, 630, 293	\$492, 623, 064 387, 105, 167 525, 289, 769	\$545, 044, 462 434, 872, 007 518, 156, 240	\$520, 784, 873 499, 080, 336 510, 816, 827	\$532, 734, 728 558, 336, 989 504, 978, 266
Total	1, 384, 340, 280	1, 405, 018, 000	1, 498, 072, 709	1, 530, 682, 036	1, 596, 049, 983

In the last preceding chapter the sources of the increase of the aggregate monetary stock was traced. Of the total net increase of seventy-one millions realized during the fiscal year, about eighteen millions was gold, the surplus product of American mines, and forty-eight millions was silver, the net result of the year's operations in that metal, while the banks contributed nearly five millions in new issues of their notes. This seventy-one millions of fresh material, together with the twenty-nine millions paid out of the Treasury on balance, accounts for the increase of one hundred millions shown by the foregoing tables in the circulation. The proportions of the increase of the different kinds are readily to be seen in the tables themselves.

From September to September there was a gain of only fifty millions of new material, consisting wholly of silver, and this with the fifteen millions drawn from the Treasury on balance makes the sixty-five millions of increase of circulation which occurred during that period.

The changes from month to month in the amounts of gold and of silver and notes in the circulation, or represented therein by certificates or Treasury notes, as shown by the monthly estimates, during the fiscal year, were as follows:

The following table exhibits, in round sums, the changes that have occurred each year, beginning with 1879, in the aggregate amount of money in circulation, during the first and last six months and the whole twelve months:

	First six	months.	Last six months.		Twelve months.		
Fiscal year.	Increase.	Decrease.	Increase.	Decrease,	Increase.	Decrease.	
1879 1880 1881 1882 1883 1884 1885 1886 1887 1888 1889 1890 1890	119, 000, 000 105, 600, 000 73, 900, 000 58, 700, 000 26, 800, 000 49, 100, 000 65, 400, 000 66, 700, 000 34, 100, 000 49, 900, 000	\$2,400,000	35, 500, 000	1, 400, 000 20, 600, 000 1, 100, 000 38, 800, 000 11, 700, 000 25, 800, 000 1, 300, 000 29, 100, 000	154, 500, 000 141, 300, 000 59, 400, 000 57, 300, 000 6, 200, 000 48, 000, 000 55, 000, 000 8, 300, 000 48, 600, 000	\$41,200,000	

From these figures it appears that since the resumption of specie payments, with the exception of a single year, there has been an annual expansion of the volume of money in circulation, the result of a large increase from July to December, and a smaller increase, or a decrease, from January to June. The normal condition of the circulation would, therefore, appear to be one of yearly growth, but varied by a seasonal decline.

Incidentally to this ebb and flow of the circulating medium, and, in particular, to the changes in the materials of which it is composed, there has occurred, with more or less uniformity, in the month of January, a sharp drain upon the gold reserve of the Treasury. To illustrate this, the amount of gold in the Treasury in excess of gold certificates in circulation at the end of December, January, and February, in each of the last ten years, together with the average for the whole period, is given, as follows:

Fiscal year.	December.	January.	February.
1883 1884 1885 1886 1887 1888 1889 1890	. 141, 688, 432 147, 991, 808 170, 912, 413 208, 608, 130 203, 885, 219 190, 833, 052 148, 972, 935	\$125, 648, 194 144, 350, 736 125, 187, 596 136, 086, 611 168, 475, 362 202, 955, 184 194, 655, 264 177, 386, 285 141, 728, 097	\$135, 107, 161 144, 038, 203 127, 346, 559 144, 164, 038 175, 130, 261 212, 869, 914 196, 245, 981 187, 988, 948 149, 712, 824
Average	130, 740, 631	119, 574, 904	122, 122, 118 159, 472, 600

These figures show that each year there has occurred at this season a more or less considerable diminution of the gold reserve, averaging nearly ten millions, which has been succeeded in February by a less marked tendency in the opposite direction. Last January the loss occurred between the 1st and the 22d of the month, and at the latter date exceeded \$12,000,000. A recovery of one million was effected before the 1st of February. With a reserve of one hundred and fifty or two hundred millions, a reduction of five or ten in a month might pass unnoticed; but when the reserve is not more than a hundred and twenty or thirty millions, the loss of twelve in eighteen business days deserves attention.

In order to discover the causes and character of the movements which have thus annually affected the Treasury, it is necessary to inquire what other changes occured at the same times in the composition and distribution of the money stock. A hasty examination of the tables in the appendix is all that is necessary to see that there has been nothing in the aggregate supply of money or in its division between the Treasury and the people to throw any light on the subject. Changes have occured, it is true, in the volume of the effective stock, and in the amount of the Treasury holdings and of the circulation as well, but they have been less marked and regular, and not of a nature to have any direct bearing upon the movement of gold. It would appear to be sufficient for the present purpose, therefore, to study the facts relating to that metal in particular.

The whole stock of gold in the country at the end of each of the three months of December, January, and February in each of the last ten years is given in the following table:

Fiscal year.	December.	January.	February.
1883 1884 1885 1886 1887 1889 1889 1890	566, 108, 185 576, 118, 500 612, 980, 956 640, 418, 278 704, 703, 330 704, 608, 179 689, 524, 863 704, 100, 811	\$528, 438, 158 568, 231, 447 578, 828, 967 614, 128, 979 645, 869, 918 706, 471, 081 705, 758, 221 690, 980, 770 707, 008, 881	\$530, 465, 211 566, 994, 200 581, 162, 976 611, 484, 900 646, 880, 837 707, 848, 344 705, 954, 600 692, 100, 951
Average		690, 586, 886 643, 629, 831	689, 936, 89 643, 841, 37

It appears from these figures that invariably, during the months in which the Treasury has lost reserve gold, the stock of the metal in the country has been slightly increased. January is indeed the month when the turn between the imports and exports of gold frequently oc-

curs, as well as that between the autumnal increase of the circulation and the vernal decrease, as has been noticed on a preceding page. It is plain, therefore, that the gold lost to the reserve does not go out of the country, but into the hands of the people; also, since there are no corresponding changes in the circulation, it is equally apparent that the gold goes out in exchange, directly or indirectly, for other kinds of money.

The actual holdings of gold in the Treasury, however, show that during the month of January, in spite of the drain upon the reserve, the tendency toward increase has been nearly as persistent, and in the average almost exactly as effective, as that toward the increase of the total stock of the country. The total gain of metal to the Treasury during this month for the ten years together was twenty-two millions, while that to the country was twenty-six. Below are the figures:

	Fiscal year.		 December.	January.	February.
1884 1885 1886 1887 1888 1889 1890 1891			219, 014, 740 234, 975, 852 253, 351, 409 268, 128, 018 305, 342, 187 324, 773, 667	\$173, 317, 834 221, 813, 356 237, 167, 976 251, 371, 562 274, 140, 469 307, 809, 155 325, 641, 856 316, 043, 454 297, 567, 546 282, 753, 863	\$177, 661, 631 221, 881, 633 240, 029, 843 249, 801, 088 275, 088, 636 309, 567, 827 326, 456, 698 318, 593, 752 296, 831, 953 282, 123, 392
Average	***************************************	•	 266, 277, 635	268, 762, 707	269, 803, 644

The Treasury then, in fact, has not lost gold at all in January. The drain on the reserve must, therefore, have been the effect of an increase in the circulation of gold certificates. That circulation at the dates under consideration was as follows:

Fiscal year.	December.	January.	February.
883 884 885 886 887 887 888 890 890	63, 585, 140 93, 287, 420 105, 359, 601 97, 215, 605 96, 734, 057 120, 888, 448 122, 985, 889 144, 047, 279	\$47, 669, 640 77, 462, 620 111, 980, 380 115, 284, 951 105, 665, 107 104, 853, 971 130, 986, 592 138, 657, 169 155, 839, 449 163, 178, 959	\$42, 554, 470 77, 843, 430 112, 683, 290 105, 687, 050 99, 958, 365 96, 697, 913 130, 210, 717 130, 604, 804 147, 119, 129 160, 001, 279

It is thus brought out that at the return of January in each of the last ten years the Treasury's reserve of gold has been trenched upon by the issue of gold certificates, but, that, with the exception of one year only, the full effect of the fresh issues has been lessened by a gain of the metal. It has also been observed that these fresh issues are largely for direct or indirect conversion into other kinds of currency. To show the net results of all the operations of the month of January to the Treasury, without attempting the difficult if not impossible task of ascertaining what proportion of the loss of gold was due to the redemption of notes and silver certificates in gold certificates, and what to the excess of the receipts over the disbursements of silver and notes

on account of the ordinary revenues, the following table is given, exhibiting the net decrease of the gold reserve, the net increase of the holdings of silver and notes, and the increase and decrease of the cash in the Treasury in excess of certificates in circulation:

	Fiscal year.	•	Decrease of gold re- serve.	Increase of silver and notes.	Increase of cash.	Decrease of cash.
1884 1885 1886 1887 1888 1889 1890			11, 078, 864 16, 500, 836 11, 905, 197 2, 437, 051 5, 652, 946 9, 229, 955	\$9, 663, 397 10, 663, 267 11, 425, 213 17, 824, 835 7, 897, 096 8, 939, 148 6, 764, 421 10, 323, 128 16, 287, 514 4, 602, 030	\$3, 321, 833 5, 919, 638 5, 460, 045 3, 286, 202 9, 042, 676	\$415, 50 5, 075, 62 2, 465, 53 3, 123, 63
Average.	ge		9, 500, 375	10, 439, 005 10, 439, 005	2,703,039	1, 764, 40 938, 63

There is here apparent in the month of January not only a tendency toward an inflow of silver and notes to the Treasury at the cost of gold certificates, but also a not less marked tendency toward an additional loss of gold certificates, whenever, in the same month, the cash balance runs down, that is, whenever the current expenditures exceed the current revenues. It does not appear, however, that these losses are due to the development of any unusual demand, at this season, for gold certificates in particular, or to any lack of confidence on the part of the public in the ability of the Treasury to maintain the parity of the different kinds of money. The gradual rebuilding of the reserve, which ordinarily begins in February, would be sufficient proof of this, even without the confirmation lent by the experience of this office.

It is perhaps reasonable to suppose that an incident which has thus recurred annually has arisen out of the recurrence of the same conditions. An investigation of the causes which were at work last January may, therefore, throw some light upon those operative in earlier years.

Not to enter too much into detail, it was found that from the end of December to the 22d of January last the gold reserve ran down \$12,400,000; that in the same period there was a net gain of \$3,200,000 in gold coin and bullion to the Treasury; that the expenditures were \$3,000,000 in excess of the revenues; that the circulation of gold certificates increased \$15,600,000; that the Treasury holdings of silver and notes increased \$5,600,000. The net loss of \$12,400,000 to the reserve was, therefore, the result of the fresh issue of gold certificates and the receipt of new gold and was found to have been occasioned by the exchange of about \$3,000,000 in gold certificates for silver certificates, and the disbursement of about \$9,400,000 of gold certificates, in excess of their receipt, in other transactions. It was found also that these exchanges and disbursements were not made in response to demands for gold certificates, but simply because at the time and place where payment was to be made there was no other kind of paper The difficulties of the situation were all on the side of the Treasury, which paid out gold certificates when legal-tender notes, if not silver certificates, of suitable denominations, would have been equally acceptable to the applicant, but were not at hand.

. The expansion of the active circulation, which occurs in the autumn months, is attended by a partial change of character. The demands for moving the crops require paper money for cheapness of transporta-

tion, and small denominations for convenience of distribution. demands are, therefore, supplied for the most part in new legal tender notes and silver certificates, and advantage is taken of them, on occasion, to accumulate gold in the Treasury. The return tide sets in strongly after the 1st of January, through the subtreasuries. When received there the notes have two disqualifications which make them unavailable for immediate use; they are more or less worn, and of unsuitable denominations. They are therefore sent to Washington for redemption, and the demands upon the subtreasuries are met with such available currency as may be at hand. The shipment, redemption, and destruction of the old notes and the issue of new take time. Treasury can make the conversion the subtreasuries are drained, and the Treasury has nothing but gold certificates to send them. uation is aggravated by the circumstance that generally the limit of the issue of notes and silver certificates has been reached, so that none of these are available. In this way the gold reserve suffers, until the Treasury is able to gather in a working balance of other material.

Considered with reference to the gain of gold which the Treasury commonly realizes from the autumnal outflow of currency, this loss of the metal is no more than a compensation for previous favors. But with a low reserve it may threaten disturbance both by its rapidity and extent. It occurs, too, at an awkward time, especially in seasons when exports of gold begin early or become heavy. Unless the records of former years are misleading and the deductions here drawn from them erroneous, this incident is natural to the present monetary system, and may be expected annually under ordinary conditions. Doubtless it may be anticipated by adequate provisions, if not neutralized or prevented by proper measures. At all events it introduces into the currency problem an element that is not to be neglected in close calcula-

tions.

ISSUES AND REDEMPTIONS.

The issues of United States paper currency from the Treasury exceeded those of any previous year, amounting in all to \$376,726,583. The nearest approach to this was \$310,000,000 in the year before, and the next nearest \$291,000,000 in 1863. Upwards of \$298,000,000 of the year's issues took the place of equal amounts of like kinds redeemed and destroyed, while \$78,000,000 went to increase the balances outstanding. The redemptions, corresponding to the reissues, were also greater than those of any other year.

The amounts of the fresh issues, the reissues, and the total issues of

each kind of currency, were as follows:

Kind.	Fresh issues.	Reissues.	Total.
United States notes Treasury notes of 1890 Currency certificates Gold certificates. Silver certificates	\$50, 634, 813 6, 640, 000 4, 137, 500	\$66, 264, 000 8, 646, 770 64, 160, 000 66, 387, 500 92, 956, 881	\$66, 264, 000 59, 281, 583 70, 800, 000 70, 525, 000 109, 856, 000
Total	78, 311, 432	298, 475, 151	. 376, 726, 583

Reference has already been made to the changes which ordinarily take place, approximately between the first half and the second of each fiscal year, in the amount of money in circulation, and also, incidentally, to the changes in the denominations. While the issues and re-

demptions do not bear directly upon the result, the cash in the Treasury standing between them and the net circulation, they yet follow the general course of the latter, and, as the accounts are now kept, afford the only means there is of approximating the facts.

the only means there is of approximating the facts.

For the purpose of illustrating these changes in denominations, the issues and redemptions of all the different kinds of paper currency, for the first and the last six months of the fiscal year, are given below:

n de la companya de la companya de la companya de la companya de la companya de la companya de la companya de	- First six	months.	Last six months.		
Denomination.	Issues.	Redemptions.	Issues.	Redemptions.	
One dollar Two dollars Five dollars Ten dollars Twenty dollars Tity dollars One hundred dollars	6, 792, 000 31, 720, 000 33, 080, 000 24, 800, 000 2, 000, 000 3, 420, 000	\$7,080,517 4,908,820 21,493,040 20,785,690 14,447,840 3,431,350 4,781,200	\$7, 586, 898 7, 656, 000 26, 040, 000 26, 720, 000 19, 680, 000 6, 900, 000 13, 750, 000	6, 446, 334 26, 687, 340 24, 316, 840 14, 024, 720 3, 037, 400	
Five hundred dollars One thousand dollars Five thousand dollars Ten thousand dollars	2, 900, 000 8, 600, 000 9, 810, 000	3, 200, 500 4, 997, 000 4, 470, 000 54, 130, 000	3, 420, 000 9, 300, 000 8, 915, 000 67, 020, 000	2, 965, 500 8, 082, 000 10, 155, 000	
Total	179, 738, 685	143, 726, 457	196, 987, 898	154, 688, 694	

The net changes resulting from these operations, in the amounts outstanding, appear in the following table, which shows the increase or decrease of each denomination for each six months and the net increase for the whole year:

Denomination.	First six	months.	Last six months		Twelve mouths.	
	Increase.	Decrease.	Increase.	Decrease.	Increase.	
One dollar. Two dollars Five dollars Ten dollars Ten dollars Tenty dollars Fifty dollars One hundred dollars Five hundred dollars One thousand dollars Tenthousand dollars Tenthousand dollars	1, 883, 180 10, 226, 960 12, 294, 310 10, 352, 160 3, 603, 000 5, 340, 000	\$1, 431, 850 1, 361, 200	\$1, 209, 666 2, 403, 160 5, 655, 280 3, 862, 600 9, 380, 400 454, 500	\$1, 997, 062 647, 340 	2, 430, 750	
Total	46, 615, 778	10, 603, 550	46, 183, 606	3, 884, 402	78, 311, 432	
Net increase	36, 012, 228)	42, 299, 204		78, 311, 432	

A summary statement of the changes in the outstanding denominations of \$20 and under, and of \$50 and over, will bring out the main facts still more clearly, thus:

Denomination.	First siz	months.	Last six	months.
Donomination.	Increase.	Decrease.	Increase.	Decrease.
Twenty dollars and under Fifty dollars and over	\$37, 672,,778	\$1,660,550	\$6, 623, 704 35, 675, 500	

It appears from the foregoing that the increase of the smaller denominations in the first six months of the fiscal year, and that of the larger in the last six, were both effected substantially by the use of new material, there being but slight net changes in the aggregates of the several denominations previously outstanding. In both periods the result was

the outcome of the efforts of the Treasury to supply the demands of the

public.

Since the money of the country, with the exception of the gold mined or imported by private enterprise, is now all issued by the Treasury, and since the Government in various ways derives a profit from the monopoly, it would seem to be the proper policy to yield to the reasonable preference of the public for the different denominations as much as can be done consistently with law and the interests of the Treasury. Such a policy would contemplate provisions for the periodic changes which seem to be natural, both in the amount and the denominations.

The heavy redemptions have severely taxed the resources of this office, requiring a good deal of work overtime. Even with the best efforts that could be put forth occasional delays have not been avoided. It is probable that an increase of the clerical force employed in this

work will be required in the near future.

Tables will be found in the Appendix showing the yearly issues and redemptions of the several kinds of paper from the first. With the exception of a few years prior to 1870, when the unissued reserve was carried without record of denominations, the amounts given as outstanding are those which were actually performing the functions of money.

THE COINAGE.

A very satisfactory change has been effected in the condition of the fractional silver coinage, and another, not less so, in the distribution of the stock of pieces. The improvement in the former particular is the result of the liberal appropriations made by Congress for recoinage, while that in the latter is in no small part traceable to the same origin.

With only small amounts available for the expense of recoinage, the direct object of the appropriation had often to be sacrificed to that of supplying imperative demands for pieces of a particular denomination. The material had to be selected not with reference to its needs for rehabilitation, but with reference to the product required. Pieces so much worn as to be uncurrent could not be touched, since the loss would have been so heavy that the product would have been insufficient. Only pieces so near full weight as to bring the cost of the required product within the appropriation could be operated on. Consequently a good part of former expenditures for recoinage was devoted to working over good material, and brought about no substantial improvement in the condition of the whole stock.

The more adequate provisions made at the last two sessions of Congress have permitted attention to be devoted to the demands of the coinage itself, and by October last all the silver reported by the several offices of the Treasury to be held as uncurrent had been transferred to the mints. The amounts in the different denominations so turned over

during the last fiscal year were as follows:

	Denomination.	Amoun	
Standard dollars		\$42.88	1. 00
0-cent pieces		6, 405, 80 685, 83	2.50 6.00
O-cent pieces	• • • • • • • • • • • • • • • • • • • •	3, 650 150, 21	9.40
5-cent Dieces		29. 29	4. 10

The loss in melting was \$180,985.91. Minor coins amounting to \$80,000 were also transferred to be cleaned.

While noteworthy improvement has been effected by these operations, it must not be understood that no more uncurrent coin is left in the Treasury. Considerable sums of it are still held, being mixed through unassorted lots. The new coins, too, drive in the old to some extent.

A remarkable and satisfactory reduction has occurred in the amount of fractional silver in the Treasury, no less than \$7,000,000 having been disposed of between June 30, 1891, and September 30, 1892, out of \$19,600,000 held at the former date. Several causes appear to have contributed to this result, perhaps not the least effective of them being the change in the practice of the Department in the method of free distribution. So long as less than \$500 could not be obtained from the Treasury by express, without cost for transportation, the applicants were limited to persons and institutions that could afford to carry considerable sums of small change. When the limit was reduced to \$200, merchants and others began to take advantage of the offer, as well as bankers in the smaller places. There have been heavier expenses in the distribution than formerly, but the results in the relief to the Treasury and the increased convenience to the public will doubtless be considered an adequate return.

The improved condition of this coinage, aided by the novelty of the new designs, has doubtless tended to popularize it and contributed largely to the increase of its circulation. The recoinage proposed for the remainder of the present year will probably be attended with similar results. Especially is this expected to be true of the \$2,500,000 of the Columbian half dollars to be struck. The manufacture of these out of uncurrent subsidiary silver in the Treasury can not fail to have the double effect of improving the general stock and of still further relieving the Treasury of surplus holdings. The coins themselves, being limited to the proportion of one to every thirteen of population, and partaking, as they will, of the character of medals, seem destined to little active usefulness as money. They will doubtless be sought as souvenirs, if notas rarities, and remain nominally in circulation, without displacing any considerable amount of other coin.

At present the outlook for the speedy solution of the subsidiary silver

problem is very encouraging. It seems, indeed, not unlikely that with wise management the long-existing plethora of the Treasury will soon

be relieved altogether.

SPURIOUS AND FRAUDULENT ISSUES.

Counterfeit silver coins and paper currency of the following amounts and denominations were rejected and canceled, during the fiscal year, at the several offices of the Treasury:

Denomination.	Silver coins.	United States notes and silver cer- tificates.		Fractional currency.	Total.
Twenty-five cents	\$209.00 281.50			\$22.50 76.00	\$231.50 357.50
One dollar Two dollars	1, 469. 00	\$45 469			1, 514. 00 513. 00
Five dollars		545 660	.505 860		1,050.00 1,520.00
Twenty dollarsFifty dollars		1, 150	380 300		1, 440. 00 1, 450. 00
One hundred dollars Total	1, 959, 50	4, 229	2, 389	98.50	8, 676, 00

A decrease of \$207 in the aggregate, as compared with the preceding year, seems to indicate a slight improvement in the condition of the currency, so far as fraudulent issues are concerned. Some new work in this line has, however, come to light.

Important legislation, at once giving greater security to the public in the handling of paper money, and defining more precisely the character and status of national-bank notes, is embodied in the act of Congress approved July 28, 1892, which reads as follows:

AN ACT to amend the national bank act in providing for the redemption of national bank notes stolen from or lost by banks of issue.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the provisions of the Revised Statutes of the United States, providing for the redemption of national-bank notes, shall apply to all national-bank notes that have been or may be issued to, or received by, any national bank, notwithstanding such notes may have been lost or stolen from the bank and put in circulation without the signature or upon the forged signature of the president or vice-president and cashier.

Approved, July 28, 1892.

The immediate effect of this enactment was to provide for the redemption of incomplete notes of the following description and amounts, which had been issued by the Treasury Department to the banks whose titles they bear, but had been stolen and put into circulation before having been signed by the bank officers:

Bank.	Denomination.	Bank numbers	Treasury numbers.	Amount.
Osage National Bank, Osage, Iowa National Bank of Pontiac, Pontiac, Ill.	5's 5's	1751 to 2200 741 765	560959 to 561408 252111 252135	\$9,000 500
Merchants' National Bank, Albany, N. Y.	10's and 20's	759 766	45195 45202	400
First National Bank, Atchison, Kans National Bank of Barre, Barre, Vt	10's and 20's	655 668 911 936	679929 679942 932805 932830	700 1,300
National Hide and Leather Bank, Boston, Mass	10's and 20's	11919 11972	22900 22953	2,700
Kinsman National Bank, Kinsman, Ohio	10's and 20's	520 529	577058 577067	2, 700 500

This is the last of a series of steps, each leading to the same end, but each, until the last, leaving the matter in a more illogical and unsatisfactory condition than before. Following upon a loss of this kind came the demand of the bank for new notes to take the place of those stolen, which was refused. Consequently, while the thief had no difficulty in passing the notes the bank was lying out of the use of part of its circu-The surrender of the bonds held as security for the notes was also refused. Next, when the innocent holders who had received the notes for value, on the faith of their being impressions of the genuine plates, presented them for redemption, they were not received. the bank was losing interest and the public were losing principal. The thief alone had made his profits. In this position the matter rested until the passage of the act of July 12, 1882, which made it a condition of the extension of national-bank charters that lawful money should be deposited within a certain time for the redemption of the notes issued to the bank prior to the extension, and that the benefit arising from the failure to present notes for redemption should inure to the United

At this step the bank lost principal. Then the holders of the notes asked for payment out of the money on deposit in the Treasury. The law officers decided that the Department was without authority to accede. Here the Treasury came in as an active participant, making a quar-

tet of interested parties, of whom the public and the bank were losers, while the Treasury and the thief were gainers. The act above quoted simply turns the profits of the Treasury over to the holders of the notes, thus squaring two of the accounts, and restoring the whole matter to its original position of an affair between the bank and the thief. The banks are left in the situation in which they had been placed by previous legislation, and, so far as known to this office, take no concern in the new law. To the holders of the notes it has come as the righting of a long-standing wrong, and they have not hesitated to give expression to their feelings.

By this act, taken in connection with former ones, which provided for the redemption of incomplete national bank notes stolen from the Treasury Department, it is virtually settled that these notes derive qualities as money directly from the Department itself, and become binding obligations of the banks of issue by simple delivery thereto. If they are lost by accident or theft the consequences are the same as in the case of any other kind of money. These several acts have at last purged the currency of what had been for so many years its most

dangerous and exasperating impurity.

There remains of the appropriation of \$2,500 made by the act of September 30, 1890, for the redemption of certain incomplete notes of the Third National Bank of New York, the First National Bank of Jersey City, and the National City Bank of Lynn, stolen years ago from the office of the Comptroller of the Currency, a balance of \$870, the sum of \$1,630 of the notes having been redeemed since the passage of the act.

It would be a convenience to this office if the balance of this appropriation could be covered into the Treasury to the credit of the appropriation created by the act of July 14, 1890, and known as "National Bank Notes: Redemption Account." This would make these notes redeemable in exactly the same manner as all other national bank notes. Under the existing arrangement every bank note received at this office has to be scrutinized to ascertain whether it is one of the lot covered by the special appropriation, and as no such scrutiny is now required for any other purpose than the detection of the insignificant number of these particular notes believed still to be outstanding, a very considerable labor is imposed upon this office, with the promise of no practical result whatever. Under the proposed arrangement no such scrutiny would be necessary. It is doubtful whether the whole of the special appropriation will ever be required. The total amount of the notes stolen, less \$1,150 recovered, was \$16,100. Of this, \$7,500 has been provided for by the appropriation referred to and a former one of \$5,000. There is, then, an apparent uncovered balance of \$8,600 outstanding, but, with very few exceptions, no trace of the notes has ever been seen, and it has always been understood that the greater part of them were destroyed. Whatever amount may ultimately come to light, Congress could not now in justice neglect to provide for them all.

In the present shape of the matter, the exhaustion of the appropriation, which, though scarcely to be expected, may not be impossible, would restore the former condition of things, with all its annoyances and inconsistencies. It would be a sensible measure, therefore, it would seem, and perhaps the simplest that could be taken, to appropriate as much, if any, as may be needed for the liquidation of the circulation accounts of the banks concerned, the money to be drawn on only in the event of a deficiency, and only in the sums actually required. This would set all uncertainties at rest, and fully and finally settle

this much-vexed question of stolen national-bank notes.

TRUST FUNDS.

United States bonds of the descriptions and amounts shown in the following table were held on June 30 in trust for national banks as security for their circulating notes and for public deposits:

Class of bonds.	Rate of interest.	To secure circulation.	To secure public mon- eys.	Total.
Bonds issued to Pacific railroads		\$11,600,000 21,825,350 129,764,700	\$1, 116, 000 1, 733, 090 13, 003, 000	\$12, 716, 000 23, 558, 350 142, 767, 700
Total		163, 190, 050	15, 852, 000.	179, 042, 050

During the year \$48,575,750 of bonds were deposited and \$27,894,600 withdrawn as security for circulation, making an increase of \$20,681,150. The deposits on account of public funds amounted to \$3,418,000, and the withdrawals to \$13,915,500, diminishing the holdings by \$10,497,500. One hundred and seventy-seven new banks, organized during the year, deposited bonds as security for circulation.

The following-described bonds were held at the end of the fiscal year

for the Pacific railroad sinking funds:

Kind of bonds.	Rate per cent.	Union Pacific sinking fund.	Central Pacific sinking fund.	Total.
United States bonds issued to Pacific railroads Union Pacific first mortgage Central Pacific first mortgage Central Branch, Union Pacific Eastern Division, Union Pacific Eastern Division, Union Pacific Sioux City and Pacific Western Pacific	6 6 6	\$188,000 5,082,000 3,000,000 860,000 1,102,000 675,500 254,000	\$2, 261, 600 595, 000 1, 389, 000 62, 000 95, 000 5, 000 28, 000	\$2,449,000 5,677,000 4,389,000 922,000 1;197,000 680,500 282,000
Total		11, 161, 500	4, 435, 000	15, 596, 500

First-mortgage bonds of the Pacific railroads amounting to \$1,212,000 were added to the sinking fund of the Union Pacific and \$452,000 of like bonds to that of the Central Pacific.

United States Pacific railroad bonds of the amount of \$275,000 held for the Union Pacific were exchanged for a like amount of the first-mortgage bonds of the different roads, at a profit of \$20,264.13 to the fund. A like exchange of \$220,000 was made for the Central Pacific at a profit of \$14,039.12. These profits were invested in first-mortgage bonds. A total addition of \$1,664,000 was made to the par value of the securities composing these funds.

No change occurred during the year in the bonds and stocks held for the Secretary of the Interior as trustee of various Indian tribes.

The following is a list of them:

Class of bonds.	Registered.	Coupon.	Total
Arkansas funded debt. Florida State stocks Louisiana State stocks North Carolina State stocks South Carolina State stocks Tennessee State stocks Virginia State stocks Virginia, Chesapeake and Ohio Canal bonds United States bonds issued to Pacific railroads	\$191, 666, 663 540, 000, 00	69, 000 22, 000 41, 000 122, 000 123, 000	\$168, 000, 00 69, 000, 00 22, 090, 00 41, 000, 00 122, 000, 00 314, 666, 663 540, 000, 00 1, 000, 00 256, 000, 00
Total	987, 666. 663	546, 000	1,533,666.663

United States bonds, as follows, are held under various provisions of law for the institutions named:

Institution.	Rate of interest.	Amount.
American Printing House for the Blind. Manhattan Savings Institution North American Commercial Company	1 41	\$250, 000 75, 000 50, 000
Total		375, 000

The \$200,000 of 4½ per cent bonds formerly held for the Pennsylvania Company, as security under a contract, were surrendered by direction of the Secretary of the Treasury, the conditions of the contract having been fulfilled, and at the request of the owner were presented for redemption.

The bonds and other securities comprised in the following list belong to the United States, and are held for the Secretary of the Treasury:

Kind.	Amount
Arkansas State bonds	\$625,00
ouisiana State bonds Forth Carolina State bonds	
Connessee State bonds Virginia State bonds	
Tresapeake and Ohio Canal bonds, guaranteed by Virginia	41,00 12,00
Thesapeake and Ohio Canal bonds, guaranteed by Virginia onth Carolina State stocks Dorida State stocks	
Total	

A special deposit of \$70,000 United States 4 per cent bonds is held in the name of the Comptroller of the Currency for the benefit of the creditors of the Fidelity National Bank of Cincinnati.

REDEMPTION OF NATIONAL-BANK NOTES.

In proportion to the volume of national bank notes in circulation the redemptions continue heavy. The causes of this are doubtless to be found in the condition of the money supply of the country, and are probably the same as those which appear to have stimulated the return of the Government issues.

A decrease of \$13,254,883 has already been noticed in connection with the public debt in the fund for the retirement of national bank circulation. The balance of this fund at the close of the fiscal year was \$26,763,509.25. With no immediate prospect of any considerable fresh deposits, it is to be expected that the fund will continue to run down. Some additions will be made from time to time under the provisions of law requiring deposits after the expiration of charters, but they will not be large.

By arrangement with the Comptroller of the Currency a change has been made in the method of treating fragments redeemable under the

regulations for less than the full face value of the note.

The system of part valuation of fragments has never worked well in its application to the issues of banks. When the redemption agency was first established, many fragments valued in proportion to their size came in. For a while it was the practice to redeem them at the

valuation placed upon them by the Comptroller, and to hold them until they could be matched to make up full denominations. five years' trial a considerable amount of them had accumulated, forming part of the Treasurer's assets, but unavailable for use, the Comptroller refusing to accept them singly. It was then decided that the Treasurer was not required to bear the risk attending this way of handling them, so they were sent out to the banks and charged to the redemption account, with instructions to hold them until they could be matched and sent to the Comptroller. Thereafter when fragments came in for redemption they were returned to the owner, with the suggestion to apply to the bank of issue. Some banks would accept them. while others would not. In the one case the bank had to lie out of the use of the money, and in the other the owner received nothing. authority was exercised by the Department in such cases. Frequently banks would redeem under a misapprehension of the regulations. good deal of correspondence and some dissatisfaction attended the workings of the plan.

Recent legislation having clearly defined the responsibility of the banks for the full redemption of the circulating notes issued to them, and having also established the principle that the profits arising from loss or destruction shall accrue to the United States, the Department doubtless now has full authority to make and enforce proper regulations for the redemption of fragments. The practice with regard to these has therefore been changed, so that parts of notes valued under the regulations at half the original face are now received by the Treasurer directly from the owner and delivered to the Comptroller for credit of the circulation account of the bank of issue. In cases where the redemption is through the 5 per cent fund, the bank will be temporarily deprived of the use of an equal amount of its circulation, but as a large proportion of the banks have surrendered their circulation, or part of it, by the deposit of lawful money, thus retaining no interest whatever in its redemption, less difficulty will be encountered than formerly in

disposing of fragmentary notes.

SAFES AND VAULTS.

Attention is respectfully called to the labors of the Commission appointed under the act of Congress approved September 30, 1890, "for the purpose of reporting the best method of safe and vault construction, with a view to renewing or improving the vault facilities of the Treasury Department." By courtesy of the Secretary and the Commission, their report, rendered last summer, was forwarded through this office, where it has not failed to arouse the liveliest interest and to receive the most careful consideration.

The report is so ably prepared, so exhaustive in the treatment of its subject, and so minute and complete in its exposition of the existing state of the manufacture to which it relates, that any attempt to give an abstract of its contents is rendered impossible, if indeed such a notice of it would be proper in this place under any circumstances. The only way in which it ought to be given publicity is by printing it entire, and the hope is entertained that Congress will give it such circulation as it deserves, and as its value will surely gain for it, in the form of an executive document. It is a most important contribution to the literature of the subject, not only summarizing in brief space the present development of the art, but also throwing out suggestions that must prove to be a powerful stimulus to future invention.

The Commission have fully indorsed the representations heretofore made of the urgency of the needs of this office and the subtreasuries. They have also approved, in substance, the recommendations offered with reference to the extent of the reconstruction to be undertaken, and found no fault with the Department's estimates of the probable cost. Such high sanction should have weight commensurate with its

authority.

Not the least important point brought out is that the development of improvements in vault construction is so rapid, that what is now the best may in a few years be out of date. The necessity, even, of reconstruction at intervals of ten years or more, under the best of conditions and with the wisest foresight, is contemplated. It is apparent, therefore, that if the full measure of the advantage to be gained from the labors of the Commission is to be realized, prompt steps must be taken to carry their suggestions into effect. If delays are allowed to occur, the work of the Commission will produce no practical result, and the movement which had its initiative in their appointment will have to be abandoned for a new beginning.

PAPER CURRENCY ACCOUNTS.

The present methods of keeping account of the issue and redemption of paper money are imperfect and unsatisfactory. They do not afford the certainty of correctness desirable in a business of the magnitude to which this has grown. There being no record of the redemptions beyond a simple entry of date, denomination, and amount, the safeguards against error are insufficient. The sole reliance for accuracy is in the examination which the notes receive in passing through the Department. A mistake of description in the original schedule, if not discovered before the destruction of the notes, would probably be perpetuated. Worse than this, duplicate numbers, or numbers never regularly issued, would be passed without suspicion. In either case, the fact of an error having occurred might not be brought to light for years, and then only by the condition of the account. If, for example, in the course of the liquidation of a particular issue an overdraft should appear, the fact of some irregularity would be patent, but the correction, or even the location, of the irregularity itself might be impossible.

While some improvement might perhaps be made in the details of the present method, it is doubtful if any system short of a complete numerical registry of every note, with the dates of issue and redemption, would be entirely satisfactory. Such records would not only be a valuable check against the occurrence of errors, but would also bear upon their face a certain evidence of their own integrity, and afford the means of tracing and correcting any mistake that might creep in.

In concluding this report I desire to renew my commendation of the faithfulness and efficiency with which those officially associated with me have performed their reports the duties

me have performed their reponsible duties.

I have the honor to be, very respectfully, your obedient servant,
E. H. NEBEKER,

Treasurer of the United States.

Hon. CHARLES FOSTER, Secretary of the Treasury.

February	100, 393, 977 180-186-769
February 312,656,684 259,241,697 571,298,381 1,305,644,633 1, March 310,641,219 209,491,963 589,133,182 1,314,426,655 1,8 April 309,682,388 274,597,655 584,280,043 1,319,372,344 1,5 Mary 319,206,005 276,894,827 596,100,832 1,314,784,564 1,3 June 516,512,933 276,100,967 592,622,900 1,317,060,842 1,5 July 515,414,704 270,274,447 585,689,151 1,321,559,057 1,4 August 321,448,678 273,196,675 594,452,531 1,320,601,472 1,5 September 308,945,850 292,098,638 601,044,488 1,353,045,207 1,5 October 311,881,621 304,093,382 615,985,003 1,360,692,403 1, November 314,053,488 310,473,311 624,526,749 1,368,314,938 1,5 December 305,303,500 318,054,444 623,357,944 1,383,842,809 2, February 320,647,897 340,934,209 661,582,106 1,371,512,365 2,6 March 324,414,749 342,607,283 666,482,032 1,368,496,510 2,4 April 325,099,395 343,812,834 668,903,709 1,371,663,106 2,6 March 324,414,749 342,607,283 666,482,032 1,368,496,510 2,4 April 325,099,395 343,812,834 668,903,709 1,371,663,106 2,6 June 319,067,279 386,179,922 705,247,201 1,372,087,454 2,6 July 321,885,456 404,540,765 728,396,221 1,371,158,130 2,5 September 309,979,848 402,046,076 712,025,924 1,334,605,734 2,6 July 321,855,456 404,540,765 728,396,221 1,367,723,177 2,6 August 330,763,985 401,264,478 732,028,463 1,360,621,622 2,6 July 321,855,456 404,540,765 728,396,221 1,367,723,177 2,6 August 330,763,985 401,264,478 732,028,463 1,360,621,622 2,6 July 321,855,456 404,540,765 728,396,221 1,367,634,488 2,5 September 309,979,848 402,046,076 712,025,924 1,334,606,076 712,025,924 1,334,606,076 712,025,924 1,334,607,374 2,6 July 321,855,669 417,914,716 699,451,466 1,466,248,107 2,1 November 237,017,520 204,466,434 771,485,954 1,405,844,82 2,1 Bernary 281,348,676 423,560,381 704,904,057 1,405,904,166 2,1 June 271,164,328 400,479,255 704,111,405,894,162 2,1 Bernary 281,348,676 423,560,381 704,904,057 1,405,904,166 42,1 June 272,818,640 447,9255 704,111,105,255 1,406,416 2,1 February 284,330,407 454,567,707 174,667,459 1,397,3	369, 136, 763 376, 209, 537 376, 943, 014
April 309, 082, 388 274, 397, 050 584, 280, 043 1, 313, 312, 344 1, 314, 784, 564 1, 340, 340, 340, 340, 340, 340, 340, 340	376, 943, 014
April 309, 082, 388 274, 397, 050 584, 280, 043 1, 313, 312, 944 1, 318, 312, 944 1, 318, 312, 944 1, 318, 312, 944 1, 318, 312, 944 1, 318, 312, 944 1, 318, 312, 944 1, 318, 312, 944 1, 318, 312, 944 1, 318, 312, 944 1, 318, 312, 943 1, 314, 784, 564 1, 318, 318, 318, 318, 318, 318, 318, 3	394, 559, 817
1888—January 308, 589, 702 380, 688, 751 689, 288, 453 1, 382, 675, 888 2, 2, 2, 2, 2, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3,	103, 652, 387
1888—January 308, 589, 702 380, 688, 751 689, 288, 453 1, 382, 675, 888 2, 2, 2, 2, 2, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3, 3,	110, 669, 590
1888—January. 308, 589, 702 380, 688, 751 689, 288, 453 1, 382, 675, 888 2, 4 February. 320, 647, 897 340, 934, 209 661, 582, 106 1, 371, 512, 365 2, 6 March. 324, 414, 749 342, 667, 283 666, 482, 032 1, 308, 496, 310 2, 6 May. 320, 110, 618 372, 989, 688 689, 903, 769 1, 371, 512, 365 2, 6 June 319, 067, 279 386, 179, 922 705, 247, 201 1, 372, 087, 454 2, 6 July. 321, 855, 456 404, 540, 765 728, 396, 221 1, 372, 087, 454 2, 6 August 330, 763, 985 401, 264, 478 732, 028, 463 1, 360, 621, 622 2, 6 September 309, 979, 848 402, 046, 076 712, 025, 924 1, 334, 059, 734 2, 6 October 286, 900, 010 145, 934, 926 702, 834, 945 1, 407, 634, 748 2, 1 1889—January 279, 071, 156 420, 694, 661 699, 165, 817 1, 406, 248, 107 2, 1 March 2777, 725, 909 426, 369, 557 70	307, 248, 208
1888—January. 308, 589, 702 380, 689, 751 689, 288, 453 1, 382, 675, 888 2, 4 February. 320, 647, 897 340, 934, 209 661, 582, 106 1, 371, 512, 365 2, 6 March. 324, 414, 749 342, 667, 283 666, 482, 032 1, 308, 496, 810 2, 6 May. 320, 110, 618 372, 989, 688 689, 903, 702 369, 702, 283 1, 371, 151, 361 2, 6 June. 319, 067, 279 386, 179, 922 705, 247, 201 1, 372, 087, 454 2, 6 August 330, 763, 985 401, 540, 765 728, 386, 221 1, 360, 621, 622 2, 6 August 330, 763, 985 401, 264, 478 732, 028, 463 1, 380, 602, 122 2, 6 September 309, 979, 848 402, 046, 076 712, 025, 924 1, 334, 059, 734 2, 6 November 287, 019, 520 424, 466, 434 711, 485, 954 1, 407, 634, 748 2, 1 1889—January 279, 071, 156 420, 094, 661 699, 165, 817 1, 406, 248, 107 2, 1 March 277, 725, 090 426, 360, 57 704, 904, 657 1, 408, 902, 488 2, 1	15, 336, 825
1888—January. 308, 589, 702 380, 688, 751 689, 288, 453 1, 382, 675, 888 2, 4 February. 320, 647, 897 340, 934, 209 661, 582, 106 1, 371, 512, 365 2, 6 March. 324, 414, 749 342, 667, 283 666, 482, 032 1, 308, 496, 310 2, 6 May. 320, 110, 618 372, 989, 688 689, 903, 769 1, 371, 512, 365 2, 6 June 319, 067, 279 386, 179, 922 705, 247, 201 1, 372, 087, 454 2, 6 July. 321, 855, 456 404, 540, 765 728, 396, 221 1, 372, 087, 454 2, 6 August 330, 763, 985 401, 264, 478 732, 028, 463 1, 360, 621, 622 2, 6 September 309, 979, 848 402, 046, 076 712, 025, 924 1, 334, 059, 734 2, 6 October 286, 900, 010 145, 934, 926 702, 834, 945 1, 407, 634, 748 2, 1 1889—January 279, 071, 156 420, 694, 661 699, 165, 817 1, 406, 248, 107 2, 1 March 2777, 725, 909 426, 369, 557 70	054, 089, 695
1888—January. 308, 589, 702 380, 698, 751 683, 288, 453 1, 382, 675, 898 2, 4 February 320, 647, 897 340, 934, 209 661, 582, 106 1, 371, 512, 365 2, 6 March 324, 414, 749 342, 667, 283 666, 482, 032 1, 371, 512, 365 2, 6 May 320, 110, 618 372, 995, 668 689, 903, 709, 286 1, 371, 151, 361, 302 2, 6 June 310, 067, 279 386, 179, 922 705, 247, 201 1, 372, 087, 454 2, 6 August 330, 763, 985 401, 264, 478 732, 028, 463 1, 360, 621, 622 2, 6 August 330, 763, 985 401, 264, 478 732, 028, 463 1, 360, 621, 622 2, 6 October 286, 900, 101 145, 934, 926 702, 834, 945 1, 407, 634, 748 2, 1 November 287, 019, 520 424, 466, 434 711, 485, 954 1, 407, 634, 748 2, 1 1889—January 279, 671, 156 420, 694, 661 699, 165, 817 1, 408, 992, 488 2, 1 March 277, 725, 909 426, 366, 33 1, 704, 904, 657 1, 408, 992, 488 2, 1 March	182, 077, 406
1888—January. 308, 589, 702 380, 689, 751 689, 288, 453 1, 382, 675, 888 2, 4 February. 320, 647, 897 340, 934, 209 661, 582, 106 1, 371, 512, 365 2, 6 March. 324, 414, 749 342, 667, 283 666, 482, 032 1, 308, 496, 810 2, 6 May. 320, 110, 618 372, 989, 688 689, 903, 702 369, 702, 283 1, 371, 151, 361 2, 6 June. 319, 067, 279 386, 179, 922 705, 247, 201 1, 372, 087, 454 2, 6 August 330, 763, 985 401, 540, 765 728, 386, 221 1, 360, 621, 622 2, 6 August 330, 763, 985 401, 264, 478 732, 028, 463 1, 380, 602, 122 2, 6 September 309, 979, 848 402, 046, 076 712, 025, 924 1, 334, 059, 734 2, 6 November 287, 019, 520 424, 466, 434 711, 485, 954 1, 407, 634, 748 2, 1 1889—January 279, 071, 156 420, 094, 661 699, 165, 817 1, 406, 248, 107 2, 1 March 277, 725, 090 426, 360, 57 704, 904, 657 1, 408, 902, 488 2, 1	107, 200, 759
April 329, 099, 933 343, 812, 834 608, 903, 709 786 1, 371, 608, 100 2, 608, 903, 709, 208 1, 371, 608, 100 2, 608, 903, 709, 208 1, 371, 158, 130 2, 608, 903, 903, 903, 903, 903, 903, 903, 903	21, 964, 351
April 320, 999, 930 343, 812, 834 608, 903, 709 36 1, 371, 158, 130 2, 0 June 319, 067, 279 386, 179, 922 705, 247, 201 1, 372, 087, 454 2, 0 July 321, 855, 456 404, 540, 765 726, 896, 221 1, 367, 723, 177 2, 0 August 330, 703, 985 401, 264, 478 732, 028, 463 1, 360, 621, 622 2, 0 September 309, 979, 848 402, 046, 076 712, 025, 924 1, 384, 659, 734 2, 0 October 286, 900, 101 415, 934, 926 702, 834, 945 1, 407, 634, 748 2, 1 November 287, 019, 520 424, 466, 434 711, 485, 954 1, 405, 684, 162 2, 1 December 281, 536, 690 417, 914, 716 699, 451, 406 1, 406, 248, 107 2, 1 1889—January 279, 071, 156 420, 694, 661 699, 165, 817 1, 408, 902, 488 2, 1 February 281, 343, 676 423, 560, 381 704, 904, 057 1, 403, 900, 753 2, 1 March 277, 725, 900 426, 366, 557 704, 121, 647, 1405, 904, 166 2, 1 April 271, 164, 328 430, 479, 255 701, 643, 583 1, 433, 961, 644 2, 1 June 278, 186, 640 433, 633, 298 711, 819, 938 1, 335, 383, 742 2, 0 July 273, 913, 495 436, 602, 748 709, 938, 243 1, 379, 316, 177 2, 0 August 267, 684, 909, 454, 677, 948 722, 362, 047, 139, 909, 752 2, 1 September 255, 765, 906 455, 201, 919 711, 057, 825 1, 404, 743, 070 2, 1 September 246, 330, 945 444, 114, 769, 694, 667 2, 1 December 249, 962, 950 448, 371, 369 688, 334, 319 1, 418, 181, 530 2, 1 September 246, 230, 765 449, 074, 028 689, 324, 793 1, 430, 700, 909, 12, 1 September 246, 230, 765 449, 074, 028 689, 324, 793 1, 430, 700, 909, 12, 1 Peturary 249, 236, 967 457, 547, 278 706, 784, 275, 1457, 570, 900, 521 2, 1 March 241, 909, 621 462, 215, 742 703, 315, 633 1, 437, 409, 521 2, 1 April 244, 315, 562 465, 819, 992 708, 397, 554 1, 447, 470, 905, 21 2, 1 April 244, 315, 562 465, 819, 992 708, 397, 554 1, 477, 709, 521 2, 1 April 244, 315, 562 465, 819, 992 708, 397, 554 1, 447, 709, 952 1, 2 April 244, 315, 562 465, 819, 992 708, 397, 554 1, 447, 709, 952 1, 2 April 244, 315, 562 465, 819, 992 708, 397, 554 1, 447, 709, 952 1, 2 April 244, 315, 562 465, 819, 992 708, 397, 554 1, 447, 709, 952 1, 2 April 244, 315, 562 465, 918, 992 708, 397, 554 1, 4	33, 094, 471
October 286, 900, 010 415, 934, 926 702, 834, 945 1, 407, 634, 748 2, 1 November 237, 019, 520 424, 466, 434 711, 485, 954 1, 407, 634, 748 2, 1 December 281, 536, 690 417, 914, 716 99, 451, 406 14, 405, 884, 162 2, 1 1889—January 279, 071, 156 420, 694, 661 699, 165, 817 1, 408, 992, 488 2, 1 February 281, 334, 676 423, 560, 381 704, 904, 057 1, 403, 992, 753 2, 1 March 277, 725, 990 426, 396, 557 704, 121, 647 1, 405, 964, 166 2, 1 May 280, 109, 758 434, 557, 701 714, 667, 459 1, 413, 961, 644 2, 1 June 278, 186, 640 433, 633, 298 711, 819, 938 1, 397, 184, 471 2, 6 July 273, 913, 495 436, 624, 748 709, 938, 243 1, 379, 316, 177 2, 6 August 267, 684, 999 454, 677, 948 722, 362, 047 1, 407, 390, 992, 240 2, 1 September 255, 765, 906 455, 291, 919 711,	034, 978, 342
October 286, 900, 010 415, 934, 926 702, 834, 945 1, 407, 634, 748 2, 1 November 237, 019, 520 424, 466, 434 711, 485, 954 1, 407, 634, 748 2, 1 December 281, 536, 690 417, 914, 716 699, 451, 406 1, 407, 634, 748 2, 1 1889—January 279, 071, 156 420, 694, 661 699, 165, 817 1, 408, 992, 488 2, 1 February 281, 334, 676 423, 560, 381 704, 904, 657 1, 403, 992, 753 2, 1 March 277, 725, 990 426, 396, 557 704, 121, 647 1, 405, 964, 166 2, 1 May 280, 109, 758 344, 557, 701 714, 667, 459 1, 413, 961, 644 2, 1 June 278, 186, 640 433, 633, 298 711, 819, 938 1, 397, 184, 471 2, 6 July 278, 193, 495 436, 6024, 748 709, 938, 243 1, 379, 316, 177 2, 6 August 267, 684, 909 454, 677, 948 722, 362, 047 1, 407, 300, 992, 240 2, 1 September 255, 765, 906 455, 201, 919 711	140, 200, 870 164 228 416
October 286, 900, 010 415, 934, 926 702, 834, 945 1, 407, 634, 748 2, 1 November 237, 019, 520 424, 466, 434 711, 485, 954 1, 407, 634, 748 2, 1 December 281, 536, 690 417, 914, 716 699, 451, 406 1, 407, 634, 748 2, 1 1889—January 279, 071, 156 420, 694, 661 699, 165, 817 1, 408, 992, 488 2, 1 February 281, 334, 676 423, 560, 381 704, 904, 657 1, 403, 992, 753 2, 1 March 277, 725, 990 426, 396, 557 704, 121, 647 1, 405, 964, 166 2, 1 May 280, 109, 758 344, 557, 701 714, 667, 459 1, 413, 961, 644 2, 1 June 278, 186, 640 433, 633, 298 711, 819, 938 1, 397, 184, 471 2, 6 July 278, 193, 495 436, 6024, 748 709, 938, 243 1, 379, 316, 177 2, 6 August 267, 684, 909 454, 677, 948 722, 362, 047 1, 407, 300, 992, 240 2, 1 September 255, 765, 906 455, 201, 919 711	77, 334, 655

REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., November 1, 1892.

SIR: As required by section 345 of the Revised Statutes, I have the honor to hand you herewith a report of the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1892, the present being the twentieth annual report of the Director of the Mint and the fourth of the same series signed by me.

DEPOSITS AND PURCHASES OF GOLD AND SILVER.

Gold.—The gold deposits at the mints and assay offices of the United States during the fiscal year ended June 30, 1892, including gold contained in silver deposits and purchases, aggregated 3,573,137.461 standard ounces, of the value of \$66,476,975.98, against \$59,625,678.08 in the preceding fiscal year, an increase of \$6,851,297.90.

Of the gold deposited, 3,285,815.979 standard ounces, of the value of \$61,131,460.04, were original deposits, and 287,321.482 standard ounces,

of the value of \$5,345,515.94, were redeposits.

Of the redeposits \$1,085,820.30 consisted of fine bars bearing the stamp of the United States assay office at New York, being large gold bars redeposited for small, and \$4,259,465.39 were unparted bars, representing the deposits at the minor assay offices shipped to the mint at Philadelphia for refining and coinage.

Of the gold bullion received at Government institutions during the fiscal year, \$31,961,546.11 was the product of our own mines, against \$31,555,116.85 of the same class of bullion deposited in the preceding

fiscal year, an increase of \$406,429.26.

Of the domestic gold bullion received at Government institutions during the year, \$17,944,737.53 were fine bars bearing the stamp of private refineries and \$14,016,808.58 were unrefined domestic bullion.

The distribution among producing States and Territories of the unrefined gold deposited at Government institutions during the year will

be found in a table in the Appendix to this report.

Foreign gold bullion of the value of \$10,935,154.69 and foreign gold coin of the value of \$14,040,187.70, a total amount of foreign gold of \$24,975,342.39 were deposited and melted at the mints and assay offices during the last fiscal year.

Light-weight domestic gold coins were melted for recoinage, of the value of \$557,967.86, and old material, consisting of jewelry, plate, etc.,

containing gold of the value of \$3,636,603.68.

Silver.—The deposits and the purchases of silver, including silver contained in gold deposits, aggregated during the last fiscal year 72,121,268.03 standard ounces, of the coining value (\$1.16,\(^4\)_1 per standard ounce, or \$1.2929 per fine ounce) of \$83,922,930.01, against \$83,630,154.31 in the preceding year, an increase of \$292,775.70.

Of the silver received at Government institutions during the year 640,461.19 standard ounces, of the coining value of \$745,263.92, were redeposits, so that the original deposits of silver aggregated 71,480,806.84

standard ounces, of the coining value of \$83,177,666.09.

Of the silver received, 59,513,166.79 standard ounces, of the coining value of \$69,251,684.98, consisted of fine bars bearing the stamp of private refineries in the United States. All such bars are classified at Government institutions as of domestic production. As a matter of fact, such bars contain foreign as well as domestic silver, since nearly all the silver imported into the United States in the form of base bars or contained in miscellaneous ores is reduced at private works in conjunction with domestic ores and no distinction is made in the resulting product.

Of the domestic silver bullion deposited at the mints during the year, 3,617,442.07 standard ounces, of the coining value of \$4,209,387.10, were

unrefined silver from the mines of the United States.

The distribution of the unrefined silver deposited at Government institutions among producing States and Territories is exhibited in a

table in the appendix to this report.

Foreign silver bullion, distinctively known as such, containing 1,729,575.36 standard ounces, of the coining value of \$2,012,596.78, and foreign silver coin, containing 388,502.53 standard ounces, of the coining value of \$452,075.67, a total amount of foreign silver of the coining value of \$2,464,672.45, was received at the mints and melted during the year.

Light-weight silver coins of the United States, principally subsidiary pieces transferred from the Treasury to the mints for recoinage, were melted during the year, containing 5,593,907.71 standard ounces of silver, of the coining value of \$6,509,274.43.

In addition, trade dollars were sold to the Government as bullion and melted, containing 1,921.53 standard ounces of silver, of the coining value of \$2,235.96.

Old silver, consisting of jewelry, plate, etc., was melted during the year, containing 636,290.85 standard ounces, of the coining value of

\$740,411.17.

The coining value of the gold and silver (not including redeposits) received at the mints and assay offices of the United States each fiscal year since 1880 is exhibited in the following table:

VALUE OF THE GOLD AND SILVER (NOT INCLUDING REDEPOSITS) RECEIVED AT . THE MINTS AND ASSAY OFFICES, 1880-1892.

° Fiscal years.	Gold.	Silver (coining value).	Total value.
1830	\$98, 835, 096	\$34, 640, 522	\$133, 475, 618
1881	130, 833, 102	50, 791, 146	161, 624, 248
1832	66, 756, 652	33, 720, 491	100, 477, 143
1883	46, 347, 106	36, 869, 834	83, 216, 940

1888	72, 225, 497	`41,331,014	113, 556, 511
1889	42, 136, 436	41, 238, 151	83, 374, 587
1890	42,663,005	42, 644, 719	85, 307, 814
1891	48, 485, 801	71, 985, 985	120, 471, 786
1892	61, 131, 460	83, 177, 666	144, 309, 126

The usual tables, exhibiting, by weight and value, the deposits and purchases of gold and silver at each of the mints and assay offices, will be found in the Appendix.

COINAGE.

The coinage executed at the four coinage mints of the United States, located at Philadelphia, San Francisco, Carson City, and New Orleans, aggregated during the last fiscal year 113,556,124 pieces, of the nominal value of \$51,792,976.52.

The gold coinage consisted of 2,954,185 pieces, of the value of \$35,506,987.50, of which \$21,725,600 were in double eagles, \$8,921,530 in eagles, \$4,840,955 in half eagles, and \$18,902.50 in quarter eagles.

The silver coinage consisted of 8,329,467 silver dollars and \$971,016.50 in half dollars, \$3,023,331 in quarter dollars, and \$2,665,464.10 in dimes.

The minor coinage executed at the mint at Philadelphia aggregated 61,582,474 pieces, of the nominal value of \$1,296,710.42, of which 17,022,142 pieces, of the nominal value of \$851,107.10, consisted of nickel five-cent pieces, and 44,560,332 pieces, of the nominal value of \$445,603.32, of one-cent bronze pieces.

The coinage of the mints during the last fiscal year is recapitulated in the following table:

COINAGE, FISCAL YEAR 1892.

Description.	Pieces.	Value.
Gold		\$35, 506, 987. 50
Silver dollars	8, 329, 467	8, 329, 467. 00
Subsidiary silver coins	40, 689, 998	6, 659, 811. 60
Minor coins	61, 582, 474	1, 296, 710. 42
Total	113, 556, 124	51, 792, 976. 52

In the Appendix will be found the usual tables exhibiting, by institutions and by denominations, the coins struck at the mints during the fiscal year 1892 and also during the calendar year 1891.

A table is also presented exhibiting the coinage of the mints each calendar year since the organization of the mint in 1792 to the close of the fiscal year 1892.

GOLD AND SILVER BARS MANUFACTURED.

In addition to the coinage of the mints, gold and silver bars were manufactured during the fiscal year of the value of \$43,255,822.51, as follows:

BARS MANUFACTURED, 1892.

	Description.	Value.
-		1,1,1,
	·····	, , ,

MEDALS AND DIES MANUFACTURED.

During the last fiscal year 1,545 dies were prepared in the engraving department of the mint at Philadelphia, as exhibited in the following table:

DIES MANUFACTURED, 1892.

Description.	Number.
Gold coinage	
Silver coinage Miuor coinage	858 436
Proof coinage. New coins, original dies.	- 24
New coins, working hubs	6.
Annual assay medals Jeanette medal and rider	
Total	1, 545

The number of medals manufactured aggregated 1,872, distributed as follows:

PURCHASES OF SILVER.

The purchases of silver by the Government during the fiscal year ended June 30, 1892, were all made under the mandatory provisions of the act of July 14, 1890, requiring the purchase of 4,500,000 ounces in each month.

The amount purchased by the Treasury Department on telegraphic offers in lots of over 10,000 ounces was 49,112,327.39 fine ounces, cost-

ing \$46,254,520.73.

The purchases of silver at the coinage mints in lots of less than 10,000 ounces, aggregated 4,942,414.04 fine ounces, costing \$4,662,203.89. Silver contained in gold deposits and in bar charges, including fractional remnants of trade-dollar bullion of less value than one dollar, was purchased, aggregating 200,995.71 fine ounces, costing \$189,883.36.

The total amount purchased during the last fiscal year under the provisions of the act of July 14, 1890, as above enumerated, aggre-

gated 54,355,748.10 fine ounces, at a cost of \$51,106,608.01.

The average cost of the silver purchased during the year was \$0.94 per fine ounce. The following table exhibits the quantity and cost of silver purchased under the act of July 14, 1890, during the fiscal year at each of the coinage mints:

DELIVERIES ON PURCHASES OF SILVER, UNDER ACT OF JULY 14, 1890, FISCAL YEAR 1892.

Mints.	Fine ounces.	Cost.
Philadelphia	41, 574, 174. 11	\$39, 035, 370. 26
San Francisco	6, 841, 407. 46	6, 485, 363, 68
New Orleans	4, 708, 501. 99	4, 421, 833. 61
Carson	1, 231, 664. 54	1, 164, 040. 46
Total	54, 355, 748. 10	51, 106, 608. 01
*		<u> </u>

The accompanying table is a recapitulation of the purchases and mode of acquisition under the act of July 14, 1890:

Bullion Delivered on Silver Purchases under Act of July 14, 1890, Fiscal Year 1892.

Mode of acquisition.	Fine ounces.	Cost.
Purchased by Treasury Department (lots of over 10,000 ounces)	49, 212, 328. 38	\$46, 254, 520. 76
Purchased at mints (lots of less than 10,000 ounces)	4, 942, 414. 02	4, 662, 203, 89
ing 42 cents, transferred from trade-dollar bullion	200, 995, 70	189, 883. 36
	54, 355, 748. 10	51, 106, 608. 01

The amount of silver offered for sale to the Government during the fiscal year aggregated 97,803,300 fine ounces.

The accompanying table exhibits the offers and purchases of silver during the fiscal year, under the act of July 14, 1890:

SILVER OFFERED, PURCHASED, AND COST OF SAME, DURING THE FISCAL YEAR 1892, UNDER THE ACT OF JULY 14, 1890.

The mandatory coinage of 2,000,000 ounces of silver, purchased under the act of July 14, 1890, into silver dollars, ceased at the close of the fiscal year ended June 30, 1891, and during the past fiscal year only a limited coinage of dollars was executed from such bullion.

The quantity and cost of silver used in this coinage was 2,669,128.95 fine ounces, costing \$2,577,838.19, while 18,497.48 fine ounces, costing \$18,073.24 were wasted and sold in sweeps, leaving a balance of uncoined silver purchased under the act of July 14, 1890, on hand at the coinage mints June 30, 1892, of 78,927,665.42 fine ounces, costing \$76,314,868.17, distributed as follows:

SILVER BULLION PURCHASED UNDER ACT OF JULY 14, 1890, UNCOINED JUNE 30, 1892.

Shortly after April 1, 1873, when the act of February 12, 1873, revising the coinage laws of the United States, went into effect, the Government commenced the purchase of silver in order to supply a fund, as required by that act, from which depositors of silver for fine bars and for trade dollars authorized to be coined therein could be promptly paid, as well as to furnish silver for such subsidiary coin as might be required by the Government. Nearly all the silver acquired under this act was purchased for delivery at the mints at San Francisco and Carson City, for the reason that the States and Territories contiguous to these mints were at that time the principal sources of the production of silver. The act of January 14, 1875, known as the specie resumption act, directed the purchase and coinage into subsidiary silver coins of a

sufficient amount to replace the fractional currency in circulation. For this purpose there was purchased in the next three years no less than 31,603,905.87 ounces of silver. By reason of the facilities with which shipments of silver could be made from San Francisco to oriental countries the price of silver on the Pacific coast was generally higher than the price in London.

Upon the passage of the act of February 28, 1878, remonetizing the silver dollar and directing the purchase and coinage into silver dollars of not less than \$2,000,000 worth of silver monthly, sellers of silver on the Pacific coast demanded a price of from 1 to 2 cents an ounce more than silver could be bought in the London market and delivered at the

mints of the United States.

For this reason recourse was had by the Secretary of the Treasury to the London market, and some 5,000,000 ounces of silver were purchased there for delivery at the Philadelphia mint. After this it was not necessary to resort to the London market, as all the silver required was readily procured either in San Francisco or in New York at the

market price.

Prior to 1879 the greater part of the silver required by the Government was purchased in the markets of the Pacific coast, but this was changed by the large falling off in the silver product of Nevada and the large increase in the silver product of States and Territories penetrated by railroads from the East, and the consequent facilities with which ores could be shipped to the eastern smelting and refining works for reduction. Moreover, in recent years the demand for silver upon the part of China and other oriental countries has fallen off very largely, and in consequence the silver product of the country seeks the most available outlet, which is through the New York market, where it is either sold to the Government or shipped to London.

Of the silver purchased under the act of July 14, 1890, from August 13, 1890, to November 1, 1892, 103,047,180 fine ounces out of a total amount purchased of 120,479,981 were delivered at eastern mints, the

principal portion at the Philadelphia mint.

The aggregate amount of silver bullion purchased under the act of July 14, 1890, from August 13, 1890, to November 1, 1892, was 120,479,981 fine ounces, costing \$116,783,590, an average cost of \$0.969 per fine ounce.

In addition to the silver dollars coined under the act of July 14, 1890, there were coined from the balance of trade-dollar bullion on hand June 30, in accordance with the provisions of the act of March 3, 1891,

4,878,472 silver dollars.

The total coinage of silver dollars during the fiscal year and the total seigniorage on such coinage are shown in the following table:

Coinage of Silver Dollars, Fiscal Year 1892.

COURSE OF SILVER.

The fluctuations in the price of silver during the last fiscal year, while not covering so wide a range as in some previous years, were considerable, with a continued downward tendency. There were occasional rallies in the price caused by temporary improvements in the rate of Indian exchanges or continental demands for silver. As soon as these demands were supplied the price immediately declined, in many cases below the point of previous advance.

At the commencement of the fiscal year July 1, 1891, silver was quoted in the London market at $46\frac{2}{3}$ pence (0.925 fine, British standard), equivalent at the par of exchange to \$1.0165 per fine ounce. The price in New York at the same date was \$1.02\frac{2}{3}.

The opening quotations were the highest in either market during the

vear

From the 1st to the 13th of July the price steadily declined until it reached 45% pence, equivalent to \$1.00549 per fine ounce. From this date there was a sharp rally to 46½ pence, due to a demand for silver for Spain and Portugal. Large sales of silver were immediately made upon the advance by sellers to realize.

The price again declined, until on the 21st it had reached 455 pence,

equal to \$1 per fine ounce.

On the 22d the price suddenly arose to 46, equal to \$1.0111, and closed on the 31st of the month at 46 pence, equal to \$1.00837.

During the month of August the price declined from the opening rate, $46\frac{1}{16}$ pence, equal to \$1.00974 per fine ounce, to $45\frac{1}{16}$ pence, equal to \$0.98784 per fine ounce, being a decline of over 2 cents per ounce.

In September the price rallied, and closed at 45% pence, equal to

\$1.00563.

In October, however, the price declined to 44_{16} pence, equal to \$0.9659

per fine ounce.

After this date the price steadily declined, until on the 28th of March, 1892, it had reached 39 pence, equal to \$0.8549 per fine ounce, the lowest price on record up to that date. From this time forward the price gradually improved, closing May 31 at $40\frac{5}{16}$, equal to \$0.8833 per fine ounce.

The opening price for June was 403 pence, equal to \$0.886, and the

closing price 401 pence, equal to \$0.876 per fine ounce.

The difference between the opening and closing price for the year

shows a decline of \$0.14 per ounce during the year.

Since July 1, 1892, the price still further declined, until on August 11 it had reached $37\frac{7}{5}$ pence, equivalent at par of exchange to \$0.83 per fine ounce, the lowest price silver has ever reached. From this date the price has advanced slightly.

At this writing, November 1, the London price is 394 pence, equal to

\$0.86 per fine ounce.

The highest price of silver during the fiscal year was \$1.0165 per fine ounce, at which rate the value of the silver contained in the silver dollar was \$0.786; at the lowest price (\$0.855), per ounce fine, it was \$0.66; at the average (\$0.937), \$0.724.

The value of the silver contained in a silver dollar at the lowest

price of silver since the close of the fiscal year was \$0.642.

At the present writing, November 1, the value is \$0.86.

The following table exhibits the value of the pure silver in a silver dollar, reckoned at the commercial price of silver bullion from \$0.80 to \$1.2929 (parity of our coining rate), per ounce fine.

The exports of silver from London to India, China, and the Straits, during the first nine months of the present calendar year, from January 1, 1892, to October 6, 1892, were £8,325,098, against £4,899,621 in the corresponding period of 1891, showing an increase of £3,425,477.

The exports of silver from London to India, China, and the Straits, each year since 1881, have been as follows:

EXPORTS OF SILVER TO THE EAST.

DISTRIBUTION OF SILVER DOLLARS.

The number of silver dollars distributed from the mints during the last fiscal year was 9,407,920, being 3,800,874 less than for the previous year. The distribution during the fiscal year and the number of silver dollars in the mints at the commencement and close of the year are exhibited in the following table:

Period.	Philadelphia.	San Fran- cisco.	New Orleans.	Carson.	Total.
In mints July 1, 1891	51, 163, 675	36, 362, 220	10, 884, 500	2, 880, 360	101, 290, 755

SUBSIDIARY SILVER COINAGE.

The coinage of subsidiary silver during the last fiscal year aggregated 40,889,998 pieces, of the nominal value of \$6,659,811.60, consisting of \$971,016.50 in half dollars, \$3,023,331 in quarter dollars, and \$2,665,464.10 in dimes. Of this coinage \$1,058.25 were manufactured from purchased bullion and \$6,658,753.35 from worn and uncurrent silver coin transferred from the Treasury for recoinage.

During the fiscal year ended June 30, 1892, worn and uncurrent silver coin of the nominal value of \$7,118,602.78 was transferred from the Treasury to the mints for recoinage. Upon melting, these coins produced 5,018,693.31 ounces of fine silver, the coining value of the same in subsidiary silver coins being \$6,937,886.02, showing a loss of \$180,716.76, which sum was reimbursed the Treasury from the appropriation for loss on recoinage of worn and uncurrent silver coin.

The stock and cost of silver on hand July 1, 1891, available for the subsidiary silver coinage, the amount obtained, the amount used during the year, and balance on hand at the close thereof, are shown in the following table:

Aggregate	5, 342, 823. 45	6, 659, 668. 11	6, 659, 811. 60

The nominal value of the silver coins transferred from the Treasury to the mints for recoinage from July 1, 1890, to November 1, 1892, has been \$10,792,478.97 upon which the loss of metal representing the abrasion from wear, has been \$326,489.25, or an average of about 3 per cent. The actual coinage of the same into new silver coins has aggregated \$4,381,044.05.

The beneficial results of the liberal appropriations made by Congress for the last two years for loss on recoinage of worn and uncurrent silver coins in the Treasury is shown by the fact that the balance of such coin has been reduced from \$23,002,268 on July 1, 1890, to \$11,499,579 on November 1, 1892, a reduction of \$11,502,689.

By the conversion of worn and uncurrent coins in the Treasury, principally half-dollars, for which there was no demand, into quarter-dollars and dimes, for which there was an urgent demand, the Treasury has been relieved of a large amount of unavailable assets and the circulating medium of the country increased to a corresponding extent.

TRADE-DOLLAR RECOINAGE.

The number of trade dollars redeemed under the act of March 3, 1887, was 7,689,036, containing 6,687,690.61 ounces of standard silver of the coining value of \$7,782,040 in silver dollars, from which there were coined, up to the close of the fiscal year 1891, \$2,889,011 in subsidiary silver coins, containing 2,322,042.62 standard ounces, costing \$2,668,654.88.

In addition there was transferred from trade dollars remelted at the San Francisco mint to the silver bullion account 16.97 standard ounces, costing \$19.51, making a total amount disposed of up to June 1, 1891, 2,322,059.59 standard ounces, costing \$2,668,674.39, leaving on hand

June 1, 1891, 4,365,661.12 standard ounces, costing \$5,020,361.

The act of March 3, 1891, directed that, "the Secretary of the Treasury shall, as soon as practicable, coin into standard silver dollars the trade-dollar bullion and trade dollars now in the Treasury, the

expense thereof to be charged to the silver-profit fund."

Of the balance of trade-dollar bullion on hand June 1, 1891, 4,364,311.87 standard ounces, costing \$5,018,844.11, were consumed in the coinage of 5,078,472 silver dollars, while there were sold in sweeps, 1,318.89 standard ounces, costing \$1,517.08, leaving on hand December 31, 1890, when this coinage was completed, a fractional balance of .36 of an ounce, costing \$0.42, which was transferred to the account of silver bullion purchased under the act of July 14, 1890.

SEIGNIORAGE ON SILVER.

The balance of silver profits on hand at the coinage mints at the commencement of the fiscal year 1892 was \$152,315.35.

The seigniorage on the coinage of silver dollars during the year aggregated \$930,487.41, and on subsidiary silver coins \$143.49, a total seigniorage for the year of \$930.630.90.

From the gross seigniorage there was paid for the transportation of silver coin the sum of \$28,694, for reimbursements of silver wastage and loss on sale of silver in sweeps sold \$9,548.98, and on account of expenses incurred in the recoinage of trade-dollar bullion (as provided by the act of March 3, 1891) \$108,712.42, a total expenditure of \$146,955.40, leaving a net seigniorage for the year of \$783,675.50.

The total amount of silver profits covered into the Treasury during the last fiscal year aggregated \$865,026.60, leaving on hand in the four coinage mints at the close of the fiscal year \$70,964.25.

The net profit on the coinage of silver during the fourteen years ended June 30, 1892, including the balance in the coinage mints on July 1, 1878, aggregated \$72,736,065.75.

In the Appendix will be found a table showing the seigniorage on the coinage of silver dollars and subsidiary silver, separately, and at each mint, and also the disposition of the profits.

A table will also be found in the Appendix exhibiting the expenditures from silver profits on account of the distribution of silver coins.

MINOR COINAGE.

During the last fiscal year 61,582,474 minor coin pieces were struck at the mint at Philadelphia of the face value of \$1,296,710.42, as follows:

MINOR COINAGE, 1892.

	Denominations.	* · · · · · · · · · · · · · · · · · · ·	Pieces.	Value.
Five-cent nickel			17, 022, 142	\$851, 107. 10
One-cent bronze				445, 603. 32
Total		····	61, 582, 474	1, 296, 710. 42

The amount and cost of blanks purchased for minor coinage during the year was as follows:

	Blanks purchased.	Pounds, avoirdupois.	Cost.
Five-cent nickel blank	ks	168, 213	\$53, 727. 23
One-cent bronze blank	ks	367, 754	73, 330, 15
Total		535, 967	127, 057. 38

The demand for minor coins during the year was large, frequently taxing the utmost capacity of the mint at Philadelphia to meet the same, but no delay occurred upon the part of the mint in supplying such coins.

Of the blanks used in the manufacture of these pieces, 1-cent bronze pieces of the nominal value of \$14,290.87 and 5-cent nickel pieces of the nominal value of \$83,819.85 were coined from metal resulting from the melting of uncurrent minor coins of former issues transferred from the Treasury for recoinage.

The following statement shows the balance of coinage metal resulting from uncurrent minor coins melted on hand at the mint at the commencement of the year, and the balance remaining on hand at the close thereof.

MINOR COINS FOR RECOINAGE, FISCAL YEAR 1892, PHILADELPHIA MINT.

The mandatory coinage of silver dollars required by the act of 1878 rendered it difficult to continue the manufacture of ingots and blanks for the minor coinage (5-cent nickel and 1-cent bronze pieces) at the mint at Philadelphia, the only institution authorized by law to execute minor coinage. The difficulty was augmented by the largely increased demands for small coins for change purposes. It was, therefore, decided to ask by public advertisements for proposals to furnish minor coinage blanks suitable for coinage at the mint. Contracts were awarded for such blanks at various times from January, 1887, to June 30, 1892.

The deliveries of bronze blanks, the cost, the coinage value, and the seigniorage realized, under the several rates per pound, will be found in the table hereto appended:

CONTRACTS FOR 1-CENT BRONZE BLANKS FROM JANUARY, 1887, TO JULY, 1892.

Periods,	Rate per pound.	Pounds.	Cost.	Coinage value.	Seigniorage.
Jan., 1887, to Aug., 1887	\$0. 211	204, 379	\$43, 123. 97	\$298, 413. 34	\$255, 289, 37
Aug., 1887, to Sept., 1888	. 2565	299, 965	76, 941. 02	437, 948, 90	361, 007. 88
Sept., 1888, to Aug., 1889	. 3409	299, 991	104, 696, 86	437, 986. 86	333, 290. 00
Aug. 1, 1889, to June, 1890	. 26	1.50, 000	39, 000. 00	219, 000. 00	180, 000. 00
June, 1890, to July, 1892	. 1994	772, 805	154, 097, 35	1, 128, 295, 30	974, 197. 95

Contracts for nickel blanks for the same period gave results as follows:

Periods.	Rate per pound.	Pounds.	Cost,	Coinage value	Seigniorage,
Mar., 1887, to June, 1888	\$0, 379	22, 019	\$8, 345. 20	\$99, 856. 30	\$91, 511. 10
Do	. 348	7,000	2, 436. 00	31, 752, 00	29, 316, 00

June, 1890, to July, 1892	, 3194	338, 747	108, 196. 07	1, 536, 217. 65	1, 428, 021. 58

The several types and denominations of minor coins issued by the Philadelphia Mint since its establishment, the amount remelted by the mint, and the amount apparently outstanding June 30, 1892, are set forth in the following table;

Denominations.	Coined.	Remelted.	Outstanding June 30, 1892.
Copper cents	\$1,562,887.44	\$376, 300. 44	\$1, 186, 587. 10
Copper half cents *	39, 926. 11		
Copper nickel cents	2, 007, 720. 00	763, 782. 78	1, 248, 937, 22
Bronze cents.	6, 608, 500. 49	39, 871. 73	6, 578, 688. 76
Bronze 2-cent pieces	912, 020, 00	318, 926, 82	593, 093. 18
Nickel 3-cent pieces		230, 684, 74	. 675, 083, 78
Nickel 5-cent pieces	12, 396, 331, 65	111, 145. 60	12, 396, 331. 65
Total	24, 433, 154. 21	1, 840, 712.11	22, 673, 721. 69

^{*} There is no record of the melting of any old copper half cents, but it is believed that few, if any, are in circulation.

The foregoing exhibits show a general reduction in cost of minor coin blanks and a corresponding gain in profits to the Treasury during the last three years. Moreover, all such blanks are now delivered ready for the coining presses, which effects a saving of labor; time, and machinery probably equal to 10 per cent of the whole cost. By the last contract, awarded the Scovill Manufacturing Company, of Waterbury, Conn., the Government is getting its minor coinage metal at less cost than ever before in its history.

PERCENTAGES OF PROFITS AT THE DIFFERENT RATES.

Bronze.	Profits.	Nickel.	Profits.
At \$0, 211 per pound	\$1. 24 1. 20	At \$0.379 per pound At .348 per pound	\$4. 157 4. 188
At .349 per pound At .26 per pound	1. 109 1. 198	At .374 per pound At .421 per pound	4. 162 4. 115
At . 1994 per pound	1. 258	At .40 per pound	4. 136 4. 216

An avoirdupois pound of bronze will coin \$1.46. An avoirdupois pound of nickel will coin \$4.53.

APPROPRIATIONS AND EXPENDITURES.

The amounts specifically appropriated for the support of the mints and assay offices for the fiscal year 1892 aggregated \$1,079,850, against \$1,030,351.50 appropriated for the preceding fiscal year.

From the specific appropriation there was expended during the last fiscal year an aggregate of \$1,064,124.24, leaving in the Treasury unexpended the sum of \$15,725.76.

In addition there was expended at the coinage mints from the general appropriation contained in the act of July 14, 1890, the sum of \$41,487.55.

There was also expended at the Treasury Department, from the latter appropriation, the sum of \$927 for cablegrams from London, giving the daily quotation of silver.

The total expenditures for the mint service for the last fiscal year aggregated \$1,106,538.79, against \$1,335,910 expended in the prior fiscal year, showing a reduction of expenses during the last fiscal year of \$229,371.21.

The appropriations and expenditures for the various mints and assay offices (exclusive of the amount paid by the Treasury Department for baclegrams) are exhibited in the following table:

APPROPRIATIONS AND EXPENDITURES, 1892.

^{*} Includes \$1,000 for gas plant to replace worn-out furnaces.

On October 1, 1892, I had the honor to submit for your consideration estimates of appropriations required for the support of the mint service for the fiscal year to end June 30, 1894.

These estimates, including the usual appropriation for "freight on bullion and coin," aggregated \$1,126,760, against appropriations for the same purposes for the current fiscal year aggregating \$1,079,850.

The aggregate of the estimates submitted for the fiscal year 1894 is

the exact sum of the appropriations for the fiscal year 1892.

It will be necessary to ask for deficiency appropriations to complete the service of the fiscal year 1893, owing to the fact that the appropriations made by Congress were reduced from the carefully prepared estimates submitted.

EARNINGS AND EXPENSES OF THE REFINERIES OF THE COINAGE MINTS AND ASSAY OFFICE AT NEW YORK.

The sums collected from depositors during the fiscal year 1892, at the coinage mints and assay office at New York, as charges for parting and refining bullion, aggregated \$169,497.09.

The law requires that the charges collected of depositors shall be

used to defray the expenses of the operations of the refinery.

The total amount expended for parting and refining bullion was

\$207,253.43.

There was received, however, and covered into the Treasury during the year from the sale of by-products (blue vitriol and spent acid) the sum of \$11,449.23, a legitimate gain to the refinery.

Deducting from the gross expenditures the amount realized by the sale of these by products, the *net* expenditures for parting and refining

bullion were \$195,804.20.

The total receipts for parting and refining bullion since July 1, 1876, the date at which the refineries were made self-supporting, have exceeded the gross expenditures for the same period by the sum of \$85,615.07, which amount stands to the credit of the appropriation for parting and refining bullion on July 1, 1892.

The receipts and expenses of the refineries for the fiscal year 1892

are exhibited in the following table:

CHARGES COLLECTED AND EXPENDITURES FOR PARTING AND REFINING. BULLION, 1892.

Institutions.	Charges collected.	Gross ex. penditures.	Net ex- penditures.
Mint at Philadelphia		\$26, 457. 82 58, 199. 89	\$26, 457, 82 57, 230, 57
Mint at Carson	27, 422. 74	26, 918. 86	23, 949. 7
Mint at New Orleans Assay office at New York.	l '	252, 76 95, 424, 10	252. 7 87, 913. 2
Total	169, 497. 09	207, 253. 43	195, 804. 2

EARNINGS AND EXPENSES OF THE MINTS AND ASSAY OFFICES.

The total earnings of the mints and assay offices of the United States during the fiscal year ended June 30, 1892, aggregated \$2,294,288.20.

This is a very large reduction from the earnings of recent years, occasioned by the fact that the seigniorage on the coinage of silver dollars, which has aggregated six or seven million dollars annually, fell off during the last fiscal year to \$930,487.41, the coinage of the silver dollars being no longer mandatory. Only such dollars were coined as were deemed necessary in the business of the Government.

The total expenditures and losses of all kinds, including the entire expenses for the support of the mints and assay offices and acid refineries, the wastage of the operative departments, and loss on sale of sweeps, the expenses of distributing silver dollars, subsidiary silver, and minor coins, aggregated \$1,500,494.03, leaving a net profit of earnings over expenditures for the last fiscal year of \$793,794.17.

In the Appendix will be found the usual table exhibiting in detail the earnings and expenditures under each classification and at each in-

stitution of the mint service.

CLASSIFIED STATEMENT OF EXPENDITURES.

The following table exhibits the expenditures for the different classes of supplies (as well as for salaries and wages) at the institutions comprising the mint service during the fiscal year 1892, the expenses of the refinery being separated from the ordinary expenses of the Mint:

STATEMENT OF EXPENDITURES FOR SUPPLIES AT THE MINTS AND ASSAY OFFICES OF THE UNITED STATES FOR THE FISCAL YEAR ENDING JUNE 30, 1892.

MOVEMENT OF GOLD FROM THE UNITED STATES.

In the report of this Bureau for the fiscal year 1889, attention was directed to the heavy export of gold from the United States commencing in May, 1888, and continuing, with some interruption, to the end

of July, 1889, aggregating \$61,435,989.

In the summer of 1890 another movement of gold from this country commenced, which, while by no means as serious in amount as its predecessor, was somewhat remarkable as a monetary transaction, considering the low rate of sterling exchange which obtained during most of the period of shipments. This movement aggregated in a period of less than two months the sum of \$15,672,982.

In February, 1891, still another movement of gold to Europe commenced, which did not cease until the close of July, causing by far the most serious loss of gold which this country has sustained for many years. The total amount exported from the port of New York during

these six months was \$70,223,494.

In the reports of this Bureau for the fiscal years 1890 and 1891, detailed statements of the shipments, the names of the shipper, the destination of the specie, and prevailing rates of sterling exchange were presented, together with the causes which were believed to have occasioned these large movements.

In the following tables, which have been carefully prepared by the Superintendent of the United States Assay Office at New York, the exports of gold from that port to Europe during the fiscal year ended June 30, 1892, are presented in detail; also the exports during the four months from July 1 to Octber 31, 1892, as well as the return movement.

An examination of the above tables shows that the total export of gold from the port of New York during the fiscal year ended June 30, 1892, was \$47,165,025, and during the four months ended October 31, 1892, \$18,840,011, while the amount imported at the port of New York during the last fiscal year was \$36,827,984, and during the four months ended October 31, 1892, \$1,737,125.

ended October 31, 1892, \$1,737,125.

In another portion of this report the total imports and exports of the precious metals from all the ports of this country are given, from which it will appear that the total gold exports during the fiscal year ended June 30, 1892, aggregated \$50,305,533, and the total gold imports \$50,162,879, a net loss by excess of exports of gold over imports during the last fiscal year of only \$142,654 against a loss for the preceding fiscal year of \$67,946,768.

From an examination of the above tables, exhibiting the shipments of gold from the port of New York, it will be seen that the disturbance to the natural balance of trade continued during the last fiscal year.

It was thought that the effects of the financial difficulties in Europe caused by the heavy fall of South American securities several years ago had almost passed away, but their trail is still well marked and commented on freely abroad.

Besides this, the Austrian Government has been making strenuous exertions during the last year to obtain sufficient gold for a strong basis in establishing a gold standard for its currency.

Quite a number of the shipments for continental ports were reported as destined for Austria.

One great cause of continued large shipments of gold is, as stated by all exchanges and financial writers, the distrust of United States securities raised in the minds of European investors by the large and increasing preponderance of silver over gold in the reserve held for the redemption of our paper currency.

IMPORTS AND EXPORTS OF THE PRECIOUS METALS.

Gold.—The value of the foreign gold bullion imported into the United States during the fiscal year 1892 was \$11,358,518, of which \$4,820,117 came from France, \$3,251,707 from England, \$1,336,593 from Mexico, and the remainder principally from countries of Central and South America.

Gold was contained in imported silver-lead ores of the value of

\$214,121.

Foreign gold ores of the invoiced value of \$249,304 were imported into the United States for reduction, all except a small amount coming

from Mexico.

Foreign gold coins were imported of the value of \$22,908,493, of which \$8,222,724 came from Australia, \$5,538,725 from France, \$4,266,314 from England, \$2,392,310 from Germany, \$1,405,364 from Cuba, \$542,499 from Mexico, and the remainder from various countries.

United States gold coins' were returned to the United States of the value of \$15,432,443, of which \$5,486,975 came from France, \$5,272,315 from England, \$1,529,590 from the British possessions in North America, \$1,105,015 from Germany, and the remainder from various countries, principally of Central and South America.

The total imports of gold into the United States during the fiscal

year may be summed up as follows:

GOLD IMPORTS, 1892.

Items.	Amount.
Foreign bullion	
Foreign coin	22, 908, 49
Foreign ores	249, 30
Foreign gold in silver lead ores	
Total foreign	
United States coin	15, 432, 44
Total imports	50, 162, 87

The exports of domestic gold bullion aggregated \$479,388, and of

domestic gold coin, \$42,841,963.

Of the above amounts \$19,283,150 were invoiced to Germany, \$13,061,100 to France, \$6,328,040 to England, \$1,727,492 to Venezuela, \$1,258,720 to British possessions in North America, and the remainder to various countries.

In addition, foreign gold bullion was reëxported of the value of \$22,637 and foreign gold coin of the value of \$6,851,339, of which \$6,636,048 went to Cuba and the remainder principally to England.

Domestic gold ores were exported of the invoiced value of \$39,325, and foreign ores were reëxported of the value of \$13,004, while domestic gold was contained in copper matte shipped abroad of the value of \$57,877.

The movement of gold from the United States during the last fiscal year may be summed up as follows:

GOLD EXPORTS, 1892.

Items.	Amount.
United States bars	\$8, 260
Other domestic bullion	. 471, 128
Domestic coin	42, 841, 963
Gold contained in copper matte	57,877
Domestic ores	. 39, 325
Total domestic	43, 418, 558
Foreign bullion reëxported \$22,637	
Foreign coin reëexported	
Foreign ores reëxported	
Total foreign	6, 886, 980
Total gold exports	50, 305, 533

From the above tables it will be seen that the excess of the exports of gold over imports during the last fiscal year amounted to only \$142,654, against a loss for the preceding fiscal year of \$67,946,768.

Silver.—The commercial value of foreign silver bullion imported into the United States during the last fiscal year, as registered at the custom-houses, was \$5,115,808, of which \$4,431,920 consisted of commercial bars from Mexico, \$451,676 from Colombia, and the remainder in desultory amounts from various countries of this continent.

In addition to the importations of silver bars, silver ores were im-

ported of the invoiced value of \$9,656,761.

As usual, the bulk of these ores—\$9,508,321—came from Mexico, and

the remainder from British North America.

These ores were principally silver lead ores, containing, in addition to the silver contents, large quantities of metallic lead and some gold

and copper.

The following interesting table, kindly compiled by the Chief of the Bureau of Statistics from special statements furnished by the collectors of customs, exhibits approximately the quantity and value of the different metals contained in these ores:

STATEMENT SHOWING BY CUSTOMS DISTRICTS THE QUANTITIES AND VALUES OF SILVER ORE IMPORTED INTO THE UNITED STATES DURING THE FISCAL YEAR 1892, WITH THE QUANTITIES AND VALUES OF GOLD, SILVER, LEAD, AND COPPER CONTAINED IN THE ORE, SO FAR AS ASCERTAINED.

<sup>a No further data obtainable.
c Estimated at 85 cents per pound.
e Estimated at 5 cents per pound.</sup>

b Contains some gold, which cannot be separately stated d Estimated at $2\frac{1}{2}$ cents per pound.

NOTE.—The data in this table have been obtained from special reports by the collectors of customs, and, although necessarily incomplete in some details, are believed to be valuable. This table will not, in the total value of the ore, compare with the stated publications, which latter represent only the value of the free silver ore and exclude the value of the dutiable contents, such as lead and copper.

From the above table it will be seen that the approximate value of the silver contained in these ores was \$8,809,648, reckoned presumably at its commercial price, and of the gold \$214,121.

These ores contained in addition 50,382,297 pounds of metallic lead, valued at \$1,340,362, and 465,853 pounds of copper, of the invoiced

value of \$22;804.

Foreign silver coins were imported into the United States of the value of \$14,679,709, of which \$12,697,618 consisted of Mexican dollars and the remainder were principally South American coins.

Of our own silver coins, principally subsidiary pieces, \$159,569 were

returned during the year.

The imports of silver into the United States during the fiscal year are summarized in the following table:

IMPORTS OF SILVER, 1892.

Items.	Amount.
Foreign bullion (commercial value)	\$5, 115, 808
Silver in foreign ores (commercial value)	
Foreign silver coin	14, 679, 709
Total foreign	28, 605, 165
United States silver coin	159, 569
Total silver imports	, 28, 764, 734

The exports of domestic silver bars aggregated \$16,638,385, reckoned presumably at their commercial value, the bulk of which, \$13,692,977, went to England, \$809,964 to France, and \$617,369 to Japan.

In addition to the exports of domestic silver bullion, copper matte was exported from the port of Baltimore to England for reduction during the year containing silver of the commercial value of \$657,667.

The following letter from the collector of the port of Baltimore, inclosing a tabulated statement of copper matte exported during the year, is presented.

Office of the Collector of Customs, Port of Baltimore, September 6, 1892.

Sir: In compliance with your letter of the 2d instant I have the pleasure to transmit herein a statement showing the amount of gold and silver contained in copper matte exported from the port of Baltimore during the fiscal year ending June 30, 1892.

Very respectfully,

W. M. MARINE, Collector.

Hon. E. O. LEECH, Director of the Mint, Washington, D. C. STATEMENT OF SILVER-COPPER MATTE EXPORTED FROM THE PORT OF BALTIMORE DURING THE FISCAL YEAR ENDING JUNE 30, 1892.

[Calculated on a basis of 60.5 per cent pure copper, 35 ounces pure silver, and 0.14 ounce pure gold.]

Month.	, Mat	te.	Pure copper.	Pure silver.	Pure gold.
1891.	Pounds.	Tons.	Pounds.	Ounces.	Ounces.
August	1, 771, 600	885.8	1, 071, 818	31,003	124
September	410, 200	205.1	248, 171	7,178	29
December	1, 161, 214	580	702, 534	20, 300	· 81. 2
1892.		<i>:</i>			
January	3, 594, 000	1,797	2, 174, 370	. 62,895	251.6
February	1, 952, 117	. 976	1, 181, 031	34, 160	137
March	3,322,000	1,661	2,009,810	58, 135	233
April	5, 774, 000	2,887	3, 393, 270	101, 045	404
May	10, 800, 000	5, 400	6, 534, 000	189,000	756
June	11, 196, 000	5, 598	6, 773, 580	195, 930	784
Total	39, 981, 131	19, 989. 9	24, 088, 584	699, 646	2,799.8

Foreign silver ores were reexported of the value of \$332,336, and foreign silver bullion of the value of \$11,689.

Our own subsidiary silver coin was exported of the value of \$126,682,

principally to countries of this continent.

Foreign silver coins, principally Mexican and South American coins, were reexported to the value of \$16,033,803, of which \$6,648,031 went to Hong-Kong, \$5,863,476 were consigned to England, \$1,687,000 to Japan, and the remainder to various countries.

The exports of silver during the last fiscal year are exhibited in the

following table:

Exports of silver, 1892.

Items.		Amount.
Domestic bars (commercial value)		\$16, 638, 385
Silver contained in copper matte		657, 667
United States subsidiary silver coin		126, 682
Total domestic		17, 422, 734
Foreign silver coin reëxported	\$16, 033, 803	
Silver in foreign ores reëxported	332, 336	
Foreign silver bullion reëxported		
Total foreign		16, 377, 828
Total silver exports		33, 800, 562

From the above tables it will be seen that there was a net loss of silver to the United States by export during the last fiscal year aggregating \$5,035,828, against a net gain during the previous year of \$2,745,365, showing a net change of \$7,781,193.

STOCK OF MONEY IN THE UNITED STATES.

In continuation of previous tabulations, commenced in 1873 by the Bureau of the Mint, the following table is presented as exhibiting the stock of coin in the United States July 1, 1892:

OFFICAL TABLE OF STOCK OF COIN IN THE UNITED STATES JULY 1, 1892.

Items.	Gold.	Silver.	Total.
Estimated stock of coin July 1, 1891	\$585, 140, 050	\$483, 507, 968	\$1,068,648,018
Coinage, fiscal year, 1892	35, 506, 988	14, 989, 279	50, 496, 267
Net imports of United States coin, fiscal year, 1892		32,887	32, 887
Total	620, 647, 038	498, 530; 134	1, 119, 177, 172
Loss:			
Net exports of United States coin for fiscal year 1892	27, 409, 520		27, 409, 520
United States coin melted for recoinage fiscal year 1892.	557, 968	6, 819, 921	7, 377, 889
United States coin used in the arts, fiscal year 1892	3, 500, 000	200, 000	3, 700, 000
Total	31, 467, 488	7, 019, 921	38, 487, 409
Estimated stock of coin July 1, 1892	589, 179, 550	491, 510, 213	1, 080, 689, 763

It may be proper to repeat here that the basis of the annual tabulations of the stock of gold coin in the United States was the actual amount of gold coin in the Treasury and in national banks on June 30, 1872, with an addition of \$20,000,000 as an estimate of the minimum amount of gold coin in circulation in the States of the Pacific Slope.

No allowance was made in the initial estimate for any stock of gold outside of the Treasury and national banks or for any gold in circu-

lation in the States east of the Rocky Mountains.

Since that date the official estimates presented from year to year have been compiled by adding to the actual visible stock June 30, 1872, the coinage of the mints (less recoinage of our own coins) and the gain (or loss) by import and export of our own coin as registered at the custom houses, with an annual allowance for melting of United States coin for use in the industrial arts based upon three censuses taken by the Buof the Mint of the jewelry trade.

In the case of silver the stock of silver dollars is estimated to be the coinage since March 1, 1878, and the stock of subsidiary silver coin the coinage since 1873, with an estimate of the amount in the country at that date of \$5,000,000, and the annual gain or loss by coinage and import and an annual allowance for melting in the industrial arts, as

in the case of gold.

From the table above presented it will be seen that the estimated stock of our own coins in the country on July 1, 1892, aggregated: Gold, \$589,179,550; silver, \$491,510,213, of which \$413,988,735 were silver dollars and \$77,521,478 subsidiary silver coins; making a total coin stock of \$1,080,689,763.

In addition to the stock of gold and silver coins, gold and silver bullion belonging to the Government was stored in the mints and assay offices at the same date, valued as follows:

BULLION IN MINTS AND ASSAY OFFICES JULY 1, 1892.

	Metals.	Value.
Gold		\$75, 095 . 78 5
Silver (cost)		77, 068, 783
Total		152, 164. 568

The stock of silver bullion outside of Government vaults is not a matter of record, except the bars on deposit with the Mercantile Safe Deposit Company in New York City, against which certificates are issued which, according to the report of that company to the New York Stock Exchange, amounted at the close of business on June 30, 1892, to 1,954,420 ounces of silver, worth, at the market price, \$1,734,548.

Adding the value of the silver bullion in the vaults of the Mercantile Safe Deposit Company, and the value of the gold and silver bullion in the mints to the stock of coin in the United States, the total metallic

stock of the United States July 1, 1892, was as follows:

METALLIC STOCK JULY 1, 1892.

Coin and bullion.	Value.
Gold	\$664, 275, 335 570, 313, 544
Total	1, 234, 588, 879

The metallic stock on July 1, 1891, the commencement of the fisca year, was gold, \$646,582,852, silver, \$522,277,740, total, \$1,168,860,592.

From the above it will be seen that notwithstanding the large movement of gold from the United States during the year, there was a net increase in the gold stock of this country during the last fiscal year aggregating \$17,692,483, against a loss during the previous fiscal year of \$48,980,177, while the stock of silver increased \$48,035,804.

The ownership of the stock of United States coin, and of the gold and silver bullion in the country on July 1, 1892, is exhibited in the fol-

lowing table:

OWNERSHIP OF GOLD AND SILVER IN THE UNITED STATES JULY 1, 1892.

	0.11	Silver coin and bullion.				
Ownership.	Gold coin and bullion.	Silver dollars.	Subsidiary silver coin.	Silver bullion.	Total silver.	and silver coin and bullion.

Total	67, 077, 973	279, 891, 472	792, 775, 725	1, 139, 745, 170	

The number of silver dollars in actual circulation, that is, outside of the Treasury, on July 1, 1892, was 56,817,462, against 58,826,179 at the commencement of the fiscal year, showing that the number of silver dollars in bodily circulation fell off during the last fiscal year \$2,008,717, notwithstanding the fact that the Government stands ready to ship such coins, free of expense, to any person in the United States depositing lawful money for the same.

The number of silver dollars owned by the Treasury on July 1, 1892, was 30,308,448, against an ownership of 39,597,123 at the commencement of the year, showing that the number of these dollars owned by

the Government was reduced \$9,288,675 during the year.

The total metallic and paper money in the United States July 1, 1892. exclusive of the holdings of the United States Treasury and the silver bullion in the vaults of the Mercantile Safe Deposit Company, aggregated \$1,601,347,187, against \$1,497,440,707 at the commencement of the year, showing that the actual increase in the circulating medium of the country during the last fiscal year reached the enormous sum of **\$103,906,480.**

The following table exhibits approximately the stock of United States

gold and silver coins in the country on November 1, 1892.

STOCK OF GOLD AND SILVER COIN IN THE UNITED STATES NOVEMBER 1, 1892.

			Silver coin.	•	
Date.	Gold coin.	Silver dol- lars.	Subsidiary.	Total silver coin.	Total gold and silver coin.
Stock July 1, 1892	\$589, 179, 550 —11, 792, 106 577, 387, 444	\$413, 988, 735 2, 424, 100 416, 412, 835	\$77, 521, 478 - 36, 491 77, 484, 987	\$491, 510, 213 2, 387, 609 493, 897, 822	\$1,080,689,763 9,404,497 1,071,285,266

^{*} Includes \$8,498,000 gold clearing-house certificates.
† Includes \$3,757,117 of their own notes held by different national banks.

The value of the gold and silver bullion in the mints and assay offices at the same date was as follows:

GOLD AND SILVER BULLION IN MINTS AND ASSAY OFFICES NOVEMBER 1, 1892.

	Metals.	 	Cost value.
			\$78, 654, 419 91, 829, 247
			170, 483, 666

The market value of the silver bullion reported by the Mercantile Safe Deposit Company to the stock exchange as in its vaults at the close of business October 31, 1892, was \$1,887,882.

Adding the gold and silver bullion in the mints and the value of the silver bullion in the vaults of the Mercantile Safe Deposit Company to the stock of coin in the United States, the total metallic stock on November 1, 1892, was approximately as follows:

METALLIC STOCK, NOVEMBER 1, 1892.

Coin and bullion.	Amount
Gold	7,
Total	1, 243, 656, 814

The following table exhibits the amount of paper and metallic money in the United States, and the location of the same on November 1, 1892:

LOCATION OF THE MONEYS OF THE UNITED STATES NOVEMBER 1, 1892.

Moneys.	In Treasury.	Outside of Treasury.	Total.
METALLIC.			
Gold bullion	\$78,654,419		\$78,654,419

Total	49, 892, 363	1, 067, 229, 675	1, 117, 122, 038

From a comparison of this table with a similar table for the same date of 1891 it will be seen that the amount of paper and metallic money in circulation—that is, outside of the Treasury vaults and exclusive of the stock of silver bullion in New York City—was \$1,606,139,735, against \$1,564,492,161 at the same date last year, showing an increase in the amount of money in actual circulation in the United States during this period of \$41,647,574.

The following table exhibits approximately the stock of gold, silver, and uncovered paper money in the United Kingdom, France, Germany, and United States at the present time, and the amount per capita:

ESTIMATED STOCK OF GOLD AND SILVER AND ACTUAL AMOUNT OF UNCOVERED PAPER MONEY IN THE UNITED KINGDOM, FRANCE, GERMANY, AND THE UNITED STATES.

Countries.	Fopulation.	Gold stock.	Silver stock.	Uncovered notes.	Total metal- lic stock and uncovered paper.
United Kingdom	38, 000, 000	\$550, 000, 000	\$100,000,000	\$50, 000, 000	\$700,000,000
France	39, 000, 009	800, 000, 000	700, 000, 000	81, 402, 000	1, 581, 402, 000
Germany	49,500,000	600, 000, 000	210, 000, 000	107, 000, 000	917, 000, 000
United States	65, 900, 000	654, 000, 000	575, 000, 000	405, 790, 000	1, 634, 790, 000

Countries.		 Per capita.			
		Gold.	Silver.	Paper.	Total.
United Kingdom		\$14,47	\$2.63	\$1.32	\$18.42
France		 ~ 20. 52	17.95	2.09	40.56
Germany		 12. 12	4. 26	2.16	18.54
United States		 10.06	8. 85	6. 24	25. 15

In the above table, in the case of the United States the gold stock includes the gold certificates outstanding and the silver stock includes the silver certificates and Treasury notes, and these amounts have been deducted from the amount of paper money outstanding.

From the legal tender notes outstanding the sum of \$100,000,000 gold

held in the Treasury has been deducted.

GOLD AND SILVER USED IN THE INDUSTRIAL ARTS.

As in previous years inquiries have been made for the purpose of ascertaining approximately the amount of gold and silver used in the United States in the industrial arts and manufactures.

These inquiries have been confined to ascertaining from Government institutions and from private refineries the amount and value of the bars of gold and silver sold to jewelers and manufacturers for industrial uses during the last calendar year, and as nearly as possible the material used in the manufacture of such bars.

The following table exhibits the quantity and value of the gold and silver bars issued to manufacturers and jewelers by the United States Assay Office at New York during the calendar year 1891:

BARS MANUFACTURED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES ASSAY OFFICE AT NEW YORK, DURING THE CALENDAR YEAR ENDED DECEMBER 31, 1891.

Material used.	Gold	d.	Silver.		
material used.	Fine ounces.	Value.	Fine ounces.	Value.	
Domestic bullion	381, 839, 506	\$7, 893, 323	3, 208, 511. 99	\$4, 148, 379	
United States coin	46, 039	952	306. 76	397	
Foreign material	30, 404. 872	628, 525	970, 262. 08	1, 254, 480	
Old plate, jewelry, etc.	102, 201. 052	2, 112, 683	329, 528. 56	426, 057	
Total	514, 491. 469	10, 635, 483	4, 508, 609. 39	5, 829, 313	

The following table exhibits the value of gold and silver bars furnished for industrial use by the mint at Philadelphia during the calendar year 1891:

Bars Manufactured for use in the Industrial Arts by the United States Mint at Philadelphia during the Calendar Year ended December 31, 1891.

Material used.	Gold	l.	Silver.		
material used.	Fine ounces.	Value.	Fine ounces.	Valúe.	
Domestic bullion		\$1,391,088			
United States coin			1, 253. 48	\$1,621	
Old plate, jewelry, etc	2, 814. 473	58, 180	15, 891. 08	20, 546	
Total	70, 938. 481	1, 466, 429	17, 144. 56	22, 167	

For the purpose of ascertaining the value of the gold and silver bars furnished by private works for industrial uses, a circular letter, inclosing a form of report, was addressed to forty-one firms in the United States, believed to comprise all the private firms engaged in the manufacture of gold and silver bars.

It is gratifying to be able to report that replies have been received from all the firms addressed, so that the information on this head may

be considered complete.

Thirteen firms reported that they had not manufactured any bars for industrial use during the year, while twenty-eight firms furnished reports showing the value and composition of the bars sold by them.

The result of this inquiry on the part of the private works is exhib-

ited in the following table:

Bars for Industrial use Furnished Goldsmiths and others by Private Refineries during the Calendar Year 1891.

	Gold bars ma	nufactured.	Silver bars manufactured.	
Material used.	Fine ounces.	Value.	Fine ounces.	Coining value.
Domestic bullion (exclusive of United States bars)	68. 366, 838	\$1, 413, 268	2, 429, 130. 51	\$3, 140, 694

Total	311, 885. 814	6, 447, 252	3, 655, 060. 65	4, 725, 735

	,
Number of firms addressed 41	Number not manufacturing 13
Number replying 41	Number manufacturing

Of the bars furnished by private firms to goldsmiths and others for industrial uses \$1,904,211 in gold and \$945,469 in silver were "United States bars;" that is, bars bearing the stamp of Government institutions. As these bars are reported by the institutions issuing the same, to prevent duplication, their value must be deducted from the totals reported by private works.

Eliminating the value of United States bars furnished by private refineries, the following table exhibits the work of private refineries in

this line during the calendar year 1891:

BARS FOR INDUSTRIAL USE (EXCLUSIVE OF GOVERNMENT BARS) FURNISHED GOLD-SMITHS AND OTHERS BY PRIVATE REFINERIES DURING THE CALENDAR YEAR 1891.

	Gold bars ma	nufactured.	Silver bars manufactured.	
Material used.	Fine ounces.	Value.	Fine ounces.	Coining value.

The following is a summary of the work of Government and private refineries in the preparation of bars for industrial use during the calendar year 1891:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1891, AND CLASSIFICATION OF THE MATERIAL USED.

Material.	Gold.	Silver.	Total.
Domestic bullion	\$10,697,679	\$7, 289, 073	\$17, 986, 752
United States coin.	458, 037	228, 446	686, 483
Foreign bullion and coin	628, 525	1, 256, 101	1,884,626
Old material	4, 860, 712	858, 126	5,718,838
Total	16, 644, 953	9, 631, 746	26, 276, 699

For the purpose of comparison the following table, exhibiting the work of Government institutions and private refineries in the same line during the calendar year 1890, is here presented:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1890, AND CLASSIFICATION OF THE MATERIAL USED.

Material	Gold.	Silver.	Total.
Domestic bullion	\$10, 717, 472	\$7, 143, 635	\$17, 861, 107
United States coin	449, 941	2,024	451, 965
Foreign bullion and coin	362, 062	1, 245, 419	1, 607, 481
Old material	3, 076, 426	640, 100	3, 716, 520
Total	14, 605, 901	9, 031, 178	23, 637, 079

Comparing the results for the two years, it will be seen that the amount of both gold and silver used in this country for industrial purposes is *enormous*, and has largely increased.

The value of the gold bars reported as furnished for industrial use during the calendar year 1891 was \$16,644,953, against \$14,605,901 in 1890, an increase of \$2,039,052; and of silver, \$9,631,746 in 1891, against

\$9,031,178 in 1890, an increase of \$600,568.

The amount of gold coin reported as used in the composition of bars manufactured for industrial uses was only \$458,037, against an estimated melting down annually of \$3,500,000 of our own gold coin for industrial uses, based upon four censuses taken by this Bureau for different years as to the direct employment of the precious metals by goldsmiths and others in the manufacture of watches, jewelry, etc.

The melting of coin for industrial uses is principally upon the part

of small jewelers, and not by works manufacturing bars.

If there has been no falling off in the amount of coin melted annually for use in repairs and jewelry, the total value of the precious metals used in the industrial arts and manufactures in the United States during the calendar year 1891 was, approximately: Gold, \$19,700,000, and silver, \$9,630,000, a total of \$29,330,000, of which \$10,697,679 gold and \$7,289,073 silver consisted of new bullion.

It is the practice of the Bureau to tabulate the returns from private refineries covering the value of the bars of gold and silver furnished for industrial purposes only for calendar years. The information covering

fiscal years is confined to the work of Government institutions,

The following tables exhibit the quantity and value of the bars of gold and silver furnished by Government institutions for industrial uses during the fiscal year ended June 30, 1892:

Bars issued for use in the Industrial Arts by the United States Assay
Office at New York during the Fiscal Year 1892.

25.	Go	old.	Silver.

BARS ISSUED BY GOVERNMENT INSTITUTIONS, FOR USE IN THE INDUSTRIAL ARTS, DURING THE FISCAL YEAR 1892.

	Go	old.	Silver.		
Material used.	Fine ounces.	Value.	Fine ounces.	Value.	
United States coin	1, 154. 834	\$23, 872. 55	1, 533. 35	\$1, 982. 51	
Domestic bullion	432, 833. 139	8, 947, 455. 06	3, 545, 234. 51	4, 583, 737, 54	
Foreign material	39, 378. 773	814, 031. 49	1, 069, 488. 62	1, 382, 773. 16	
Old plate, jewelry, etc	100, 533, 612	2, 078, 214. 20	348, 388. 56	450, 441. 78	
Total	573, 900. 358	11, 863, 573. 30	4, 964, 645. 04	6, 418, 934. 99	

Comparing the totals of the above tables with the work of the preceding fiscal year, it appears that the gold bars paid out at the New York assay office and the mint at Philadelphia during the fiscal year 1892 aggregated \$11,863,573.30, against \$12,267,678.57 in the preceding fiscal year, a decrease of \$404,105.27.

For silver, the amount for the fiscal year 1892 paid out by these two institutions was \$6,418,934.99, against \$5,244,516.60 in the preceding fiscal year, indicating an increase of \$1,174,418.39 over the previous year.

PRODUCT OF GOLD AND SILVER.

The detailed statistics of the product of gold and silver in the United States for the calendar year 1891 were presented in a special report to Congress on that subject.

The statistics of the production of the precious metals are collected only for calendar years, under an annual appropriation made by Congress.

The product of gold and silver from the mines of the United States, exclusive of foreign bullion and ores reduced in this country, was for the calendar year 1891 as follows:

PRODUCT OF MINES OF THE UNITED STATES, 1891.

Metals.	Fine ounces	Commercial value.	Coining value.
Gold	1 1 1 1	\$33, 175, 000	
Silver	58, 330, 000	57, 630, 040	75, 416, 565
• Total		. 90, 805, 040	108, 591, 565
	1 ,		1

The distribution of the product of our own mines among producing States and Territories was approximately as follows:

APPROXIMATE DISTRIBUTION, BY PRODUCING STATES AND TERRITORIES, OF THE PRODUCT OF GOLD AND SILVER IN THE UNITED STATES FOR THE CALENDAR YEAR 1891, AS ESTIMATED BY THE DIRECTOR OF THE MINT.

	• Gol	a.	Silv	er.

Total	·		57, 443, 417	11, 892, 998	69, 336, 415

In the Appendix will be found a table showing the annual product of gold and silver from the mines of the United States annually since 1792.

A table will also be found, compiled from information furnished, at the instance of this Bureau, by foreign governments throughour diplomatic representatives abroad, and revised from the latest data, exhibiting the quantity and value of the gold and silver product of the principal producing countries of the world for the calendar years 1889,1890, and 1891.

In the preparation of this table, in cases where official estimates or reports were not at hand, either the product officially reported for the preceding (or some near year) has been used by way of estimate, or the product as ascertained from other reliable sources, but in all cases where the product credited producing countries is not officially estimated this fact, as well as the data upon which the estimate is based, is stated in a footnote.

For the sake of uniformity the value of silver in this table, as in similar tables published in preceding reports of this Bureau, has been reckoned at its coining rate in silver dollars, viz: \$1.2929 per fine ounce.

The following table exhibits the product of the precious metals in the world for each calendar year since 1873:

PRODUCTION OF GOLD AND SILVER IN THE WORLD FOR THE CALENDAR YEARS 1873-1891.

A Committee of the Comm	· -		Silver,	
Calendar years.	Gold.	Fine ounces (troy).	Commercial value.	Coining value.
1873	\$96, 200, 000	63, 267, 000	\$82, 120, 000	\$81,800,000
1874	90, 750, 000	55, 300, 000	70, 673, 000	71, 500, 000
1875	97, 500, 000	62, 262, 000	77, 578, 000	80, 500, 000
1876	103, 700, 000	67, 753, 000	78, 322, 000	87, 600, 000
1877	114, 000, 000	62, 648, 000	75, 240, 000	81, 000, 000
1878	119, 000, 000	73, 476, 000	84, 644, 000	95, 000, 000
1879		74, 250, 000	83, 383, 000	96, 000, 000
1880	106, 500, 600	74, 791, 000	85, 636, 000	96, 700, 000
1881	103, 000, 000 .	. 78, 890, 000	89, 777, 000	102, 000, 000
1882	102, 000, 000	86, 470, 000	98, 230, 000	111, 800, 000
1883 1884	95, 400, 000	89, 177, 000	98, 986, 000	1.15, 300, 000
		81,597,600	90, 817, 000	105, 500, 000
1885		91, 652, 000	97, 564, 000	118, 500, 000
1886		93, 276, 000	92, 772, 000	120, 600, 000
1887	105, 775, 000	96, 124, 000	94, 031, 000	124, 281, 000
1888	110, 197, 000	108, 827, 000	102, 283, 000	140, 706, 000
1889	· · · · ·	125, 420, 000	117, 268, 000	162, 159, 000
1890	120, 465, 000	134, 380, 000	141, 100, 000	173, 743, 000
1891	126, 159, 000	143, 994, 000	142, 266, 000	186, 174, 000

The silver product is given at its commercial value, reckoned at the average market price of silver each year, as well as its coining value in United States dollars.

WORLD'S COINAGE.

In the Appendix will be found a table, revised from the latest information received at the Bureau, exhibiting the coinages of the various countries of the world, during the calendar years 1889, 1890, and 1891.

The following summary is here presented:

WORLD'S COINAGE.

	Calendar years.	Gold.	Silver.
1889		 \$168, 901, 519	\$139, 242, 595
1890		 149, 095, 865	1 1 1
1891		 119, 310, 014	135, 508, 083

It is believed that the above figures represent substantially the total value of the gold and silver coinages executed in the world during the years herein named.

It must be borne in mind, however, that the total of these coinages does not even approximately represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage as well as old material, plate, etc., used in coinage.

In the circular letter of information prepared at this Bureau and sent to foreign Governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

So far as these recoinages have been reported for the calendar years 1890 and 1891, they are presented in the following table:

RECOINAGES REPORTED BY CERTAIN COUNTRIES, CALENDAR YEARS 1890 AND 1891.

VALUE OF FOREIGN COINS.

The law requires:

That the value of foreign coins as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint and be proclaimed by the Secretary of the Treasury immediately after the passage of this act and thereafter quarterly on the 1st day of January, April, July, and October in each year.

In accordance with the above requirement the values of foreign coins were estimated by me and proclaimed by the Secretary of the Treasury on January 1, April 1, July 1, and October 1, 1892, to be as follows:

VALUES OF FOREIGN COINS, JANUARY 1, 1892.

			Value in terms

^{*} Gold the nominal standard. Silver practically the standard. † Coined since January 1, 1886. Old half-imperial = \$3.98,6.

In estimating the value of foreign coins the same practice has been followed as in former years.

In the cases of countries having a gold or double standard, the value of the monetary unit was ascertained by comparing the amount of pure gold in such unit with the pure gold in the United States dollar, and the silver coins of such countries were given the same valuation as the corresponding gold coins, with which they are interchangeable by law.

In the countries having a silver standard the valuations of the silver coins were fixed at the commercial value of the pure silver contained in such coins.

WORK OF THE LABORATORY OF THE BUREAU OF THE MINT.

During the calendar year 1891 there were tested in the laboratory of this bureau. 283 gold coins and 954 silver coins, all of which were found to be within the legal requirements in regard to weight, fineness, and mechanical perfection.

Of the gold coins examined 41 per cent were found to be of exact standard fineness, while the pieces deviating most were .900,5 and .899,4 fine, with an average .889,9 fine, the legal limit of tolerance

being .001.

Of the silver coins examined 28.30 per cent were standard, while a single piece assayed was .902,5 fine and one piece as low as .898,3 fine. The average was .899,93 fine, the legal limit of tolerance being .003.

Considering the difficulties arising from segregation in silver alloys, these results bear witness to the degree of skill with which coinage is

conducted at the mints of the United States.

Tables will be found in the Appendix showing the number and fineness of the coins assayed from each mint, and also the percentage of coins of various degrees of fineness, with the average fineness of the coinage of each mint; also the fineness of all the coins examined during the year.

Special examinations have been made of samples of bullion received by the Philadelphia Mint from the various assay offices of the United States, where the difference in assays of the two institutions was

unusual.

Examinations were also made during the year of a number of dangerous counterfeit coins, the most noteworthy of which was an allow of copper, silver, and platinum, having very nearly the specific gravity of standard gold.

ANNUAL TRIAL OF COINS.

The following commissioners were appointed by the President under the provisions of section 3547 of the Revised Statutes, to test the weight and fineness of the gold and silver coins of the coinage of the calendar year 1892: Hon. William B. Allison, Committee on Finance, United States Senate; Hon. Charles Tracey, Committee on Coinage, Weights, and Measures, House of Representatives; William Mayo Newhall, esq., California; Prof. W. H. Chandler, Pennsylvania; George Rutledge Gibson, esq., New York; Prof. I. C. White, West Virginia; George A. Garretson, esq., Ohio; Andrew B. Hammond, esq., Montana; Henry W. Yates, esq., Nebraska; Henry W. Cannon, esq., New York; Prof. Charles E. Munroe, Rhodé Island; Alfred Eoff, esq., Idaho; Gen. Jasper Packard, Indiana; Gen. John T. Wilder, Tennessee; Prof. George F. Barker, Pennsylvania.

The Commission met in Philadelphia on February 10, 1892, and was called to order by the Director of the Mint, and with the exception of Hon. William B. Allison and Hon. Charles Tracey, all of the commissioners were present, together with the following ex officio commissioners: Hon. William Butler, United States judge for the eastern district of Pennsylvania; Hon. E. S. Lacey, Comptroller of the Currency; and Herbert G. Torrey, assayer of the United States assay office at

New York.

The committee on counting reported:

The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins corresponded with the record kept by the Director of the

Mint of all transcripts sent him by the several superintendents.

The coins reserved were as follows:

Mints.	Pieces.	Value.
GOLD.		•
hilad élphia	. 182	\$1,427.50
Philadelphiasan Francisco	1,289	25, 780. 00
Carson	318	2, 200.00
New Orleans		
Total	1,789	29, 407: 50
SILVER.		
Philadelphia	14,079	5, 660. 40
San Francisco	5, 356	3, 085. 90
	200	809.00
earson New Orleans	6, 285	4, 216. 50
Total	26, 529	13, 771. 80
Total gold and silver	28, 318	43, 179. 30

The committee on assaying reported:

No coin among those examined was found to deviate from the standard fixed by law beyond the legal tolerance, but they were in all cases far within the legal allowance.

The committee on weighing reported:

The committee on weighing pronounces the examination of the weights of the coinage of the several mints during the year 1892 to be satisfactory.

The result of the annual test is contained in the following resolution adopted by the Commission:

Resolved, That the Assay Commission, having examined and tested the reserved coins of the several mints for the year 1892, and it appearing that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial is considered and reported satisfactory.

THE NEW MINT AT PHILADELPHIA.

In the last fiscal report of this Bureau a full review was presented of the steps taken by the Department and by Congress looking to the erection of a suitable building for the mint at Philadelphia and sale of the present site.

It will be remembered that on March 2, 1891, a law was passed authorizing the purchase of a new site and the erection of a building thereon for the mint at Philadelphia, at a cost not to execed the sum of \$2,000,000; and it was decided by the Attorney-General that owing to the absence of specific words the act carried no appropriation.

Under the authority of that act, however, the Secretary of the Treasury addressed a communication to certain gentlemen residing in Philadelphia, requesting their services as a commission to recommend a suitable site for the Mint of the United States at Philadelphia.

The following is the report of the commission:

PHILADELPHIA, September 8, 1891.

SIR: The Commission designated by you in your communication of July 10, 1891, to recommend to the Department a suitable site for the new mint building in this city, and an estimate of the probable cost, have the honor to submit the following report:

report:
The members of the Commission met for organization in the office of the superintendent of the mint at Philadelphia on the 14th of July, 1891, and selected Edwin H.

Fitler as president and O. C. Bosbyshell as secretary.

At this meeting a number of sites were submitted for the consideration of the Commission. Action was deferred thereon until the president, with such other members of the Commission as would, could have an opportunity of personally inspecting the various locations suggested. This inspection was had, and at a meeting of the Commission, held in the office of Messrs. Drexel & Co. on the 18th of August, 1891, it was agreed to recommend to the Department the plot of ground bounded by Walnut, Seventh, Sansom, and Sixth streets as the one best suited for the purposes of a mint.

This lot has a front of 400.5 feet on Walnut street, and a depth running back to

Sansom street of 235.2 feet. It contains 94,198 square feet, and an assessed valuation of \$516,000, and could, it is believed, be purchased for from \$700,000 to \$800,000, not exceeding this latter sum. It is located within 500 feet of the custom-house and near the great financial center of the city, and is easy of access from all quarters. Across Walnut street to the south is Washington Square, and across Sixth street on the east Independence Square, two large open plazas that will remain as great

breathing places forever.

The beautifying of Independence Square by the erection there of the proposed national monument by the thirteen original States, and in Washington Square of the monument to Washington by the Society of the Cincinnati, combined with the convenience of access, renders this site most eligible in all respects for a grand pub-Thus located it can never be shut in by other buildings on two sides. There being 50 and 40 feet streets on the other two sides, it is practically without contact in any direction.

A building can be erected hereon 350 by 200 feet, ample for the purposes of the mint for years, and leave a space of 25 feet on Sixth and on Seventh streets, and of

15 feet on Walnut and on Sansom streets, inside the building line.

We believe this to be in every respect the most eligible site for a mint, and we respectfully recommend its selection by you.

Very respectfully, your obedient servants,

EDWIN H. FITLER. A. J. DREXEL. ALEX. K. McClure. James H. Windrim. SAMUEL GUSTINE THOMPSON. O. C. Bosbyshell. WM. M. SINGERLY.

Hon. CHARLES FOSTER, Secretary of the Treasury, Washington, D. C.

The act making appropriations for sundry civil expenses of the Government for the year ending June 30, 1893, approved August 5, 1892, contained the following provision:

For United States mint building at Philadelphia, Pa.: For purchase of site and commencement of building under present limit, \$620,500, together with the unexpended balance of the appropriation made by the act approved October 2, 1888, for an additional story to and enlarging the building, including vaults, alterations, and other necessary work for the United States Mint at Philadelphia, Pa., which unexpended balance is hereby reappropriated for the object herein named.

The total amount appropriated by this act, including the unexpended

balance referred to, was \$798,624.91. On September 12, 1892, I had the honor to address the following communication to the Secretary of the Treasury, recommending that steps be taken to procure a suitable site for the mint at Philadelphia.

> . TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., September 12, 1892.

SIR: I have the honor to invite your attention to the following provision contained in the act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1893, approved August 5, 1892:

"For United States mint building at Philadelphia, Pennsylvania: For purchase

of site and commencement of building under present limit, six hundred and twenty thousand five hundred dollars, together with the unexpended balance of the appropriation made by the act approved October second, eighteen hundred and eighty-eight for an additional story to and enlarging the building, including vaults, alterations, and other necessary work for the United States Mint at Philadelphia, Pennsylvaniá, which unexpended balance is hereby reappropriated for the object herein named."

The total amount appropriated by this act, including the unexpended balance

referred to, is \$798,624.91.

I also inclose copy of the law of March 3, 1891, entitled "A bill to provide for the purchase of a site and the erection of a public building thereon in Philadelphia, in the State of Pennsylvania," referred to in the act first quoted. I also inclose the report of the Commission appointed by you under the act of July 10, 1891, in pursuance of the act of March 2, 1891, recommending the selection of the plot of ground bounded by Walnut, Seventh, Sansom, and Sixth streets, in the city of Philadelphia, as the

one best suited for the purposes of a mint.

I also inclose a certified copy of the act of the assembly of Pennsylvania, ceding exclusive jurisdiction to the United States over such piece of land in the city of Philadelphia on which the United States may erect a Government building for the

use and accommodation of the United States Mint.

I have the honor to request that the necessary steps be taken to procure the site and commence the building for the United States Mint at Philadelphia.

Respectfully yours,

E. O. LEECH, Director of the Mint.

Hon. CHARLES FOSTER, Secretary of the Treasury.

In pursuance of this recommendation, on September 16, 1892, James P. Low, of the office of the Supervising Architect, was instructed to proceed to Philadelphia for the purpose of reporting on a suitable site for the mint in that city.

The following is the report of Col. Low:

WASHINGTON, D. C., October 7, 1892.

SIR: In the matter of the selection of the site for the United States Mint at Philadelphia, Pa., in compliance with instructions contained in Department letter of September 16, 1892, I have the honor to report as follows:

I have carefully examined, in connection with the report dated September 8, 1891, of the Commission of which the Hon. E. H. Fitler was president, all the properties considered by that Commission. I have also examined other sites offered to me during my stay in Philadelphia, and have visited all the localities suggested by citi-

zens as proper sites for the mint, but not offered by the owners.

I also gave full opportunity to the citizens to submit orally or in writing their opinions and suggestions. I have, as instructed, conferred with the Director of the Mint, the superintendent of the Philadelphia Mint, the members of the Commission appointed by the Department July 10, 1891, the United States district attorney, the postmaster, and the mayor of the city.

As far as possible, within the time at my disposal, I have investigated the question of the values of the sites, and in particular have addressed letters asking for prices to owners, or agents of owners, of the parcels included in the site recommended by the Commission (on Walnut street, opposite Washington Square); also, to owners of parcels included in the site which seemed to be in a sense the second choice of the Commission, namely, that at the corner of Broad and Spring Garden streets.

After carefully considering all the information obtained, and giving due weight to

such suggestions as are made by persons who disapprove of the selection made by the Commission, I concur in the recommendation of the Commission, and advise that the Department select as the site for the mint the block bounded by Walnut, San-

som, Sixth, and Seventh streets.

I further recommend that proceedings in condemnation be instituted for the acquisition of title.

My reasons for making these recommendations are these:

First. The area of the site is sufficient for a commodious building of four times the ground-floor area of the present mint, after allowing for a liberal increase of the width of Sansom street.

Second. The foundations will be almost certainly good, as indicated by the results of excavations for the Ledger building, on the opposite side of Sansom street:

Third. The locality is convenient for the resident public and for visitors, is near to the center of financial business, and to handsome buildings, the number of which will without doubt rapidly increase until the whole vicinity is well improved with costly structures.

Fourth. The site has the unique advantage of facing on two fronts upon squares improved as parks—that is, Washington Square on the Walnut street front, and Independence Square opposite the Sixth street front. These two exposures to the parks will not only handsomely exhibit the structure, but be practically advantageous for light and air. In this respect it is difficult to imagine a more appropriate

location for a public building.

Fifth. The location has great advantages for the security of the treasure deposited in the mint, both on account of the vigilance of police and private watchmen in the vicinity of banks and other valuable property, and because the parks afford space for the assemblage and encampment of troops in case of riotous outbreaks.

Sixth. The probable cost of the site (\$800,000, as estimated by the commission) is not unreasonable, and will leave within the limit fixed by law for cost of site and

building an amount sufficient for the erection of a building, say, double the floor area of the present mint. There then would remain a space on the site for a future extension of the building, should necessity require, to four times the floor area of

the present mint.

Seventh. I believe that this selection will be received with general public approval. When originally suggested by the commission, as I am informed, no dissenting opinion was expressed, the newspapers, without exception, commending the choice. Within the last two weeks two papers have come out in opposition; but I notice no response worthy of mention on the part of the public, and I think that the approval of the finding of the commission is substantially ger ral.

Eighth. Proceedings in condemnation will be necessary, because there are more than thirty ownerships on the site; but few owners will fix a price. Those prices which are fixed are almost without exception unreasonable; and there are some

cases in which condemnation will be necessary to clear the title.

To avoid extending this report and yet preserve the information on the files of the Department, I attach details of my investigations in the form of exhibits.

Very respectfully, your obedient servant,

JAMES P. LOW.

The SECRETARY OF THE TREASURY.

The following action was taken by the Secretary upon this report:

This report is approved, and action will be taken in accordance with the recommendation therein contained.

O. L. SPAULDING. Acting Secrétary.

The same day the following communication was addressed by the Secretary of the Treasury to the Attorney-General, requesting that proceedings be instituted to condemn the property selected for the site of the United States mint building in Philadelphia—viz, the entire block of property bounded by Seventh, Sansom, Sixth, and Walnut streets, in the city of Philadelphia:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., October 7, 1892.

SIR: I have the honor to advise you that on the 16th ultimo the Department directed an agent to proceed to Philadelphia, Pa., for the purpose of making a thorough examination and inspection of properties for a site for the United States Mint building authorized by acts of Congress approved March 3, 1891, and August 5, 1892, to be erected in said city, and submit his report and recommendation in regard thereto.

Under date of the 7th instant the agent submitted his report and recommendation

with all the papers in the case.

After a full consideration of the subject the Department has selected the entire block of property bounded by Seventh, Sansom, Sixth, and Walnut streets, in the city of Philadelphia, Pa., as a site for the United States Mint building authorized to be erected in said city by said acts of Congress, and decided that the interests of the Government will be best served by acquiring title to said block of property through condemnation.

I inclose herewith a plat of the above described property. Pursuant to said acts of Congress approved March 3, 1891, and August 5, 1892, and in accordance with the provisions of act of Congress approved August 1, 1888 (chap. 728, p. 357, vol. 25, U.S. Stat. L), I have the honor to request that you will give such instructions to the United States attorney for the eastern district of Pennsylvania as may be necessary to have proceedings in condemnation instituted against the above described property, in order that the United States may acquire title thereto, and that you will advise this Department of the result of such proceedings, and the effect of the same relative to vesting title in said property in the United States.

Respectfully, yours,

CHARLES FOSTER, Secretary.

The Attorney-General

SUMMARY OF OPERATIONS OF MINTS AND ASSAY OFFICES.

The precious metals received at the mints and assay offices during the fiscal year 1892 were valued at \$150,399,906, against \$143,255,832 received in the previous year—an increase of \$7,144,074.

received in the previous year—an increase of \$7,144,074.

The value of the precious metals deposited only partially represents the operations necessary for their metallurgical and mechanical treat-

The operations of the melting and refining departments of the coinage mints and of the assay office at New York, so far as the value of the metals treated is concerned, is exhibited in the following table:

BULLION OPERATIONS OF THE MELTING DEPARTMENTS, 1892.

Metals.	Standard ounces.	Coining value.
Gold		\$93, 909, 547
Silver		
Total	45, 104, 564	140, 521, 241

The operations of the coining branches of the mints in the manufacture of finished coins from ingots prepared by the melting departments were, in value of the metals operated on, as follows:

BULLION OPERATIONS OF THE COINING DEPARTMENTS, 1892.

	Metals	•	Standard ounces.	Coining value.
Gold		3	3, 855, 205	\$71, 724, 742
Silver		,	25, 657, 180	
Total			29, 512, 385	101, 580, 369

The work of the minor assay offices, which consisted in the receipt and assaying of deposits and the manufacture of unparted bars of gold and silver, was as follows:

OPERATIONS OF MINOR ASSAY OFFICES, 1892.

	Metals.	Standard ounces.	Coining value.
Gold		 225, 914	\$4, 203, o56
Silver		 109, 828	127, 800
Total		 335, 742	4, 330, 856

The following is a summary of the three preceding tables, intended to exhibit, as nearly as possible, the value of the precious metals treated in the operations of the mints and assay offices during the last fiscal year:

Bullion Operated Uron in the Melting and Coining Departments of all the Mints and Assay Offices, 1892.

-	Metals:			Coining value.
Gold	Y 2, 4	 	9, 128, 757	\$169, 837, 345
Silver		 	65, 823, 934	75, 595, 121
Total			·74, 952, 691	245, 432, 466

In quantity the precious metals operated upon in the different departments of the mints and assay offices during the last fiscal year exceeded 313 tons of gold and 2,257 tons of silver.

The value of the precious metals wasted in the metallurgical and

mechanical operations was \$13,794.95.

In addition to operative wastage, a loss of \$12,651.41 was incurred from the sale of sweeps, equivalent to the difference between the value of the precious metals contained in sweeps recovered and the amount realized from the sale of sweeps too base to be treated advantageously in Government refineries.

There was a similar loss of \$114.03 by the sale of leady melts.

These wastages and losses aggregated \$26,560.39.

Against these losses there were gains arising from the operations on bullion as follows:

Character.	Amount.
Surplus bullion returned by operative officers	\$27, 292. 46
Precious metals recovered in grains and sweepings	
Gain on bullion shipped from the minor assay offices to the mint for coinage	4, 994. 42
Total gains	39, 618. 46

Deducting the value of the total operative wastage and loss on sale of sweeps from the value of the incidental gains of bullion, there was a *net* gain in the operations of the mints during the year of \$13,058.07.

The relative cost of the coinage executed at the four coinage mints is exhibited in the following table:

COST OF COINAGE AT EACH MINT, 1892.

Location of mint.	Pieces coined.	Pieces coined, exclusive of minor coins.	Expenses for salaries, wages and incidentals.	Cost per piece includ- ing minor coinage.	Cost per piece, exclu- sive of minor coinage
Philadelphia	89, 948, 302	28, 365, 828	\$416, 146. 57	\$0.0046-+	\$0.0146+
San Francisco	8, 863, 038	8, 863, 038	257, 464. 90		.029 +
New Orleans	13, 128, 316	13, 128, 316	154, 683. 51		.0118-
Carson	1, 616, 468	1, 616, 468	123, 557. 25		. 0764+
Total and average	113, 556, 124	51, 973, 650	951, 852. 23	.0083+	. 0183+

It is exceedingly gratifying to report that the cost per piece of coinage executed was reduced during the last fiscal year from an average of nearly one cent to an average of eight-tenths of one cent, while the cost per piece, exclusive of minor coins struck, was reduced from about two cents in 1891 to one and eight-tenths cents in 1892.

The economy, however, is more marked when the cost of coinage is compared with the year 1890, when the average cost of coinage executed exceeded one cent per piece, or, excluding minor coins, two and one-half cents a piece.

The following table exhibits the proportion of finished coins produced from ingots operated upon at each of the coinage mints during the year:

Percentage of Good Coin Produced from Ingots operated upon, for the Fiscal Year 1892.

Coinage mints-			Gold.	Silver.	
PhiladelphiaSan Francisco			· · · · · · · · · · · · · · · · · · ·	51.8	52. 3 47. 0
New Orleans					49. 1 54. 1

MINT AT PHILADELPHIA.

The value of gold and silver received at the mint at Philadelphia during the fiscal year ended June 30, 1892, was as follows:

	Metal.	Standard ounces.	Value.
Gold		 . 311,513.765	\$5, 795, 604. 93
Silver		 . 49, 608, 969. 93	57, 726, 801. 37
Total		 	63, 522, 406. 30

In addition, 535,967 pounds of minor coinage blanks were received. The number of assays made during the year was:

Gold.	18,500
Silver	40,000

The quantity of precious metals operated upon in the metallurgical department was:

			Sta	ndard ounces. 🔈
Gold		<i></i>	 ·	1, 689, 539
Silver				

The melter and refiner returned in settlement a surplus of 1,709.99 standard ounces in silver. His wastage was 128.240 standard ounces in sold.

The number of melts made in the same department and the number condemned during the year were as follows:

MELTS OF GOLD AND SILVER, 1892.

1	<u></u>		For bars For		ingots.	
	 Metals.			made.	Made:	Con- demned.
Gold				327	251	6
Silver	 			482	2,892	46
Total	, , , , , , , , , , , , , , , , , , ,		,	809	3, 143	.52

The operations of the refinery of the mint at Philadelphia were as follows:

REFINERY OPERATIONS, 1892.

	Bullion.	·		Gold (stánd- ard ounces).	
Sent to refinery:	w'		,	000 000	1F.4. E.C.O.
Gross weight Standard ounces by assay			-	627, 775 295, 162	454, 568 846, 164
Returned from refinery				295, 207	847, 722

The operations of the coining department, comprising gold, silver, and minor coinage metal, are exhibited in the following table:

	Metals o	perated on.	·	Ounces.
Gold				1, 234, 616
Silver				
Minor coinage				

The wastage of the mechanical department was:

· · · · · · · · · · · · · · · · · · ·	 Description.	•	• ,	-	Standard ounces.
Gold	 :				56, 602
Silver					i
,	 				_, <u>_</u>

As will be seen the wastage in the mechanical branch of the mint was small, reference being had to the large amount operated upon.

The coinage executed was as follows:

	Description.	•	Number of pieces.	Value.
			1, 340, 042 27, 025, 786	\$10, 282, 147. 50 5, 691, 509. 25 1, 296, 710. 42
Minor coins	••••••		61, 582, 474	1, 296, 710. 42
Total	•••••		89, 948, 302	17, 270, 367. 17

The percentage of good coin produced from ignots operated on was:

*	•	 ** *	Per cent
Gold		 	 44.8
			52.3

The number of medals struck in the same department for the year was as follows:

MEDALS MANUFACTURED, 1892.

	Character.	Number
Gold		
Silver	***************************************	7
Bronze		1, 0
Aluminum [blanks furnished]		
Total	·	

The foreign gold and silver coins deposited in the mint at Philadelphia for the fiscal year 1892 were as follows:

FOREIGN GOLD AND SILVER COINS MELTED AT THE MINT AT PHILADELPHIA, FISCAL YEAR 1892.

	Countries of coinage.	Value of gold.	Value of silver.	Total.
Germany		\$4,774,83	\$187, 54	\$4, 774, 83 187. 54
Mixed		1, 135.63		
Total		5, 910. 46	187.54	6, 098. 00

The domestic gold coins deposited at the mint at Philadelphia during the last fiscal year and melted were as follows:

United States Gold Coins Melted at the Mint at Philadelphia, Fiscal Year 1892.

	 Denomination.		Value.
Double eagles	 · · · · · · · · · · · · · · · · · · ·	 · · · · · · · · · · · · · · · · · · ·	\$54, 39

At the close of the fiscal year the bullion and coin in the mint at Philadelphia were weighed and counted by Messrs F. P. Gross, W. E. Morgan, and F. W. Braddock, of this Bureau, who reported in writing that they had found on hand all the public money with which the superintendent was charged.

During the last fiscal year there has been introduced into the mint at Philadelphia Brown's patent annealing process, with most gratify-

ing results.

This process consists of a bath composed of the nitrate of potassium heated to a temperature of about 900° F. At this heat the bath is in a limpid, molten condition, favorable for the introduction of the long rolled strips of silver to be annealed, and in which they are immersed, remaining so immersed from ten to fifteen minutes, when they assume the same low cherry red heat of the bath; they are then removed and cooled in water. The bath is held in an iron vessel, which vessel is heated by coal, and it seems to be the property of the material composing the bath to maintain a uniform temperature of heat, so that all danger of overheating or the irregular heating of any portion of the strips can not occur. The absolute regular heat of the bath, affecting the entire strip at every point, is a wonderful improvement over our old method of annealing strips in a few furnaces heated by wood.

The new process affords a great saving in time, and permits the annealing of a larger mass of strips than was possible in the open wood-

heated furnaces.

What formally occupied twenty to twenty-five minutes to accomplish, can be done in the bath in ten to fifteen minutes, and the mass to be annealed is only limited to the capacity of the bath to hold them.

The materials comprising the bath and the fuel used to heat it can be secured at a saving of about 50 per centum over the cost of wood

required to heat the old annealing furnaces.

In the use of this new process it has developed that a much larger per centum of good blanks is produced from the strips annealed there-

in than could be obtained under the old way.

Many improvements have been introduced into the mint at Philadelphia during the last fiscal year, carrying out the general purpose of the superintendent to place the mint in as efficient condition as possible. By continuing the extension over the adjusting room, so as to include the roof over the engraving department, a very commodious room has been secured for the use of the engraver for softening die steels, and hardening the dies after completion. For this purpose gas furnaces, supplied by the American Gas Furnace Company of New York, have been introduced, which greatly facilitate the work.

The machinery in the rolling room has been rearranged, so as to make available all the space possible. This shifting necessitated additional shafting, which has been placed on the ceiling of the room, the machinery now being driven from above instead of below. Additional self-feeding cutting presses and draw benches have been added, and

also new rolls.

A new and improved topping press has been erected in the melting room.

The machine shop has been supplied with a 16-inch lathe, and one Brush die-grinding machine with a number of minor tools.

The cabinet has been overhauled, cleaned, repaired, and freshly

painted; cases for coins freshly and distinctly marked.

Thé rooms generally, with grounds and machinery, have been kept in repair, and all proper facilities have been afforded for carrying on the business of the mint.

Other improvements are contemplated, and under way, looking to the relief of the crowded basement, which, when completed, will afford more room for the storage of silver bars, the existing vaults for which are fast filling up. The expenditures for the different classes of supplies at the mint at Philadelphia during the past fiscal year were as follows:

EXPENDITURES AT THE MINT AT PHILADELPHIA, FOR THE FISCAL YEAR ENDING JUNE 30, 1892.

The melter and refiner received during the fiscal year bullion containing 2,526,391.501 standard ounces of gold.

He returned in settlement a surplus of 887.450 standard ounces of

gold and 426.83 standard ounces of silver.

The operations of the refinery comprise 207,343 standard ounces of

gold, and 713,901 standard ounces of silver.

The melter and refiner manufactured during the year 21 fine silver bars. He made 843 melts of gold ingots, of which 3 were condemned, and 2,249 melts of silver ingots, of which 1 was condemned.

The number of melts of ingots made and condemned at this mint from 1879 to 1892 have been, as follows:

MELTS OF INGOTS MADE AND CONDEMNED AT THE MINT AT SAN FRANCISCO, FROM 1874 TO 1892.

The coiner received and operated on 2,581,566 standard ounces of gold, and 4,024,885 standard ounces of silver.

The same officer manufactured \$23,400,000 in gold coin, and \$2,193,983.35 in silver coin, with a wastage of gold, 116.377 standard ounces, and of silver 548.57.

The gold wastage in the mechanical department was somewhat larger than usual, although it was only $9\frac{1}{2}$ per cent of the legal allowance.

The proportion of finished coin produced from ingots operated upon was gold, 51.8 per cent, silver 47 per cent. The percentage of silver was not as high as usual.

FI 92----13

The operations of the coining branch of the mint at San Francisco for a series of years are exhibited in the following table:

At the close of the fiscal year the bullion and coin in the mint were weighed and counted by Messrs. Cabell Whitehead, of this Bureau, and E. K. Leech, of the mint at Philadelphia, who reported in writing that they found on hand all the public money with which the superintendent was charged.

MINT AT NEW ORLEANS.

The precious metals deposited at the mint at New Orleans, during the last fiscal year, were as follows:

	•	Metal.	, .		Standard ounces.	Value.
Gold					 8, 200	\$152, 572
Silver		• • • • • • • • • • • • • • • • •		· · · · · · · · · · · · · · · · · · ·	 6, 275, 247	7, 302, 105
Total				· · · · · · · · · · ·	 	7, 454, 677

The work of the assay department consisted of 11,082 silver assays, and 912 gold assays, a total of 11,994 assays.

The operations of the metallurgical department, covering a period of fourteen months, from May 1, 1891, to June 30, 1892, were as follows:

•	 Sta	ndard ounces. 🕜
Gold received and operated on		
Silver received and operated on	 	12, 452, 571

The melter and refiner returned in settlement a surplus of 8.991 standard ounces of gold, valued at \$152.39. He had a wastage of 4,128.81 standard ounces of silver, or 22.1 per cent of his legal allowance.

From the examination made by Mr. Butler, of this Bureau, it was reported that over 2,000 ounces of this wastage was incurred in refining silver bullion, some 87,000 ounces, received from the Rescue mine, in Arizona, which contained considerable sulphide of silver.

The operations of the coining department was confined to silver.

The coiner received and operated upon 12,263,912 standard ounces of silver ingots with wastage of 2,059.04 standard ounces, or 16.82 per cent of his legal allowance.

While this loss is large as compared with the loss in the mechanical branches of the other mints, it is somewhat less than the silver loss in

the same department of this mint for the last three years.

During the year an artesian well has been sunk at the mint at New Orleans, which affords an abundant supply of clear, potable water, free from mineral substances, and of most excellent quality for steam. This will save the mint an annual expense of \$1,500 for water rent.

A Babcock and Wilcox Company tubular boiler has been substituted for the four old cylinder boilers which have been in use since 1879. The work of the new boiler has been very satisfactory, and it is estimated that a saving of fuel will be effected equal to 50 per cent.

The following table exhibits the denominations of United States gold coins melted at the mint at New Orleans during the last fiscal year:

UNITED STATES GOLD COINS MELTED AT THE MINT AT NEW ORLEANS DURING THE FISCAL YEAR 1892.

	Denominations.	Value.

At the close of the fiscal year the bullion and coin in the mint were weighed and counted by Messrs. B. F. Butler and A. A. Hassan, of the Bureau of the Mint, who reported that they found on hand all the bullion and coin with which the superintendent was charged.

MINT AT CARSON.

The deposits of gold and silver at the mint at Carson for the fiscal year 1892 were as follows:

		Metal.	_	Standard ounces.	Value.
Gold				79, 531	\$1, 479, 659 1, 592, 323
Silver	,				
Total			 		3, 071, 98

The melter and refiner received during the year bullion containing 217,678 standard ounces of gold. He made 79 melts of gold ingots, of which 6 were condemned.

The gold wastage was 4.969 standard ounces.

The same officer received during the year bullion containing 2,637,068 standard ounces of silver, from which were made 1,188 melts of silver ingots, of which 5 were condemned. He incurred a silver wastage of 553.73 standard ounces.

The coiner received from the superintendent 190,488 standard ounces of gold ingots, from which were manufactured and delivered \$1,824,840 in gold coin.

The same officer received 2,209,949 standard ounces of silver ingots, and he coined and delivered to the superintendent 1,392,000 silver dollars.

The gold wastage in the mechanical operations was 6.561 standard ounces, valued at \$122.06, being less than 7 per cent of the legal allowance.

The silver wastage in the mechanical department was 403.93 standard ounces, valued at \$470, being less than 19 per cent of the legal allowance.

The proportion of gold coin produced from ingots operated upon was 51.49 per cent and of silver 54.1 per cent, both being very high averages.

At the close of the fiscal year the bullion and coin in the mint were weighed and counted by Messrs. Cabell Whitehead, of this Bureau, and E. K. Leech, of the Philadelphia mint, who reported in writing that they found on hand all the public money with which the superintendent was charged.

The expenditures at the mint at Carson for the different classes of

supplies during the fiscal year 1892 were as follows:

Bars prepared by melter and refiner:					
Fine	1, 240, 012, 660	23, 070, 002 97	5, 549, 880. 76	6, 458, 043. 07	
Mint	380, 605. 460	7, 081, 031. 81	93, 408. 46	108, 693 48	
Standard	.21, 988. 593	409, 090. 11	28, 573. 17	33, 248. 77	
Unparted	16.414	305.38	311, 073. 51	361, 976. 45	
Total	1, 642, 623, 127	30, 560, 430. 27	5, 982, 935. 90	6, 961, 961. 77	

Compared with the previous year, there was an increase of about \$5,000,000 in gold deposits and a decrease of about \$600,000 in silver deposits.

The total number of bars manufactured was 56,518.

The bullion operated upon in the metallurgical department amounted to 7,433,780 gross ounces. The amount refined by acid was 3,611,593 ounces gross, containing 599,216 ounces of standard gold and 2,972,824 ounces of standard silver. The amount of sulphuric acid used was 1,441,420 pounds. The proceeds of sales of blue vitriol and spent acid [by-products] amounted to \$7,510.81.

The bullion returned by the melter and refiner to the superintendent at the close of the year, in excess of what was charged in his account, was 469.902 ounces of standard gold and 26.83 ounces of standard silver, of the total value of \$8,769.18. The machinery and apparatus in this department have been renewed in enlarged and improved form, to some

extent.

The work of the assay department comprised the testing of some 13,000 melts of bullion, 600 barrels of sweeps, besides 500 special assays. The assayer reports that during the year he found considerable percentages of platinum in many deposits of so-called refined gold, and for the determination of the silver alloyed therewith has adopted the cadmium process, suggested by Mr. Whitehead, the assayer of the Mint Bureau, finding it to work admirably.

At the close of the year the bullion was weighed and the coin counted by Messrs. H. C. Steir, of the First Auditor's Office, and E. N. Gilpin, of the First Comptroller's Office, Treasury Department, who reported that they found on hand all the bullion and coin with which the super-

intendent was charged.

The expenditures of the assay office at New York for the different classes of supplies are exhibited in the following table:

			, ,	

At the close of the annual examination the gold bars in the storage vault, of the total value of \$38,390,783.38, were placed under joint seal of the Bureau of the Mint and of the assay office at New York.

MINT AT DENVER.

The value of the gold and silver deposited at the mint at Denver during the last fiscal year exceeded by \$158,327 the deposits of the previous year, while the increase in the number of deposits was 128.

The heaviest receipts were from Gilpin County, as heretofore. In

creased receipts were recorded from New Mexico.

The business of the mint at Denver, conducted as an assay office, during the last fiscal year, is exhibited in the following table:

ASSAY OFFICE AT CHARLOTTE, N. C.

There is a marked tendency on the part of the producers of gold in the Appalachian Range to send it to the assay office at Charlotte. In former years a very large proportion was shipped direct to Philadelphia and New York, as well as abroad. With few exceptions all of the deposits now go direct to the assay office at Charlotte.

Some improvements have been made in connection with this institution during the year. The laboratory has been improved and gas furnaces erected. The grounds and outhouses have been thoroughly overhauled, and the general appearance of the property improved.

The business of the assay office at Charlotte, N. C., is exhibited in the following table:

		Items.		Amount.
Denosits				\$254, 908, 60
-				1,733.73
-				5, 249. 95

The expenditures of this office for the different classes of supplies during the fiscal year were as follows:

EXPENDITURES AT THE ASSAY OFFICE AT CHARLOTTE, N. C., FOR THE FISCAL YEAR ENDING JUNE 30, 1892.

Expenditures for supplies.	Total.
Assayer's materials	\$65, 24
Balances and weights	199, 25

ASSAY OFFICE AT ST. LOUIS.

The business of the assay office at St. Louis for the fiscal year 1892 is exhibited in the following table:

	Items		Amount.
Deposits		 • • • •	\$707, 902.
Earnings			. ,
Expenses			

Percentage of net expenses to deposits, 0.6 per cent.

The deposits show a gain for the year 1892 over the previous year of \$227,461.47, or 47½ per cent, showing that the business of the institution almost doubled during the last fiscal year, while the percentage of expenses to deposits was reduced from 0.9 of 1 per cent to 0.6 of 1 per cent.

In addition to the work exhibited above, assays of ores were made for the United States surveyor of customs, free of expense, which would have cost the Government \$176 if paid for according to the official schedule in force in the assay office. The expenditures of this office for the different classes of supplies during the fiscal year were as follows:

Expenditures at the Assay Office, at St. Louis, Mo., for the Fiscal Year ending June 30, 1892.

MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the coinage and production of the precious metals in foreign countries, published annually in the reports of this Bureau, are obtained directly from the governments of such countries by our representatives abroad, a fact which invests them with the highest degree of reliability, and explains why it is that the reports of the Mint Bureau have come to be recognized, the world over, as the most exhaustive and trustworthy authority on the statistics relating to these subjects.

The points on which information is sought are embodied in a set of questions in a circular sent through the Department of State to our diplomatic representatives abroad, and the answers are received in the form of a report direct to this Bureau.

The questions covering the calendar year 1891 were as follows:

(1) What was the amount of gold coined during the calendar year 1891 by denominations and values? What amount was recoined (withdrawn from circulation) during the year, domestic and foreign coins separately?

(2) Same for silver.
(3) What was the import and export of gold during the calendar year 1891? Coin, bullion, and ore should be given separately where practicable.

(4) Same for silver.

(5) What was the weight, expressed in kilograms, and the value of the gold produced from the mines during the calendar year 1891?

(6) Same for silver.

(7) What, approximately, was the stock of gold coin and bullion in the country at the close of the calendar year 1891?

- (8) Same for silver.(9) What was the amount of Government and bank notes outstanding at the same
- (10) Were any laws passed during the year 1891 affecting the coinage, issue, or legal-tender character of the metallic and paper circulation. If so, please transmit copies.

(11) In case the report of the operations of the mint is published please forward a

These replies should be in the form of a report, written on one side of the paper only and transmitted direct to the "Director of the Mint, Treasury Department, Washington, D. C."

This year as usual we have supplemented the information received through our ministers and consuls abroad by information from printed documents, some official and others not. We hereby express our acknowledgment to the senders for Twenty-second Annual Report of the Deputy Master of the Royal Mint, 1891, London, 1892; Government of India, Financial Statement, 1892-'93, Calcutta, 1892; Finance and Revenue Accounts and Miscellaneous Statistics relating to the Finances of British India, Calcutta, 1892; Report of the Head Commissioner of Paper Currency, Calcutta, to the Secretary of the Government of India for the year 1891-'92, Calcutta, 1892; Accounts Relating to the Trade and Navigation of British India for the Fiscal Year 1891-'92, Calcutta, 1892; Report on the Administration of the Mints at Bombay and Calcutta for the year 1891-'92, Simla, 1892; Annual Report of the Secretary of Mines of Victoria during the year 1891, Melbourne, 1892; The Australian Insurance and Banking Record, 1892; Broken Hill (notes on by Robert L. Jack, Government Geologist, Queensland); Broken Hill Proprietary Company, Limited, New South Wales, Reports, etc., for half year ending 31st May, 1892; Report of the Department of Mines, Nova Scotia, for 1891, Halifax, 1892; The South African Mining Journal, Johannesburg, 1892; Annual Report of the Gold Commissioner for British Guiana for 1891, Georgetown, Demerara, 1892; Report of the Director of the Imperial Mint of Japan for the year ending March 31, 1891, Hyogo, 1891; The Mexican Financier, Mexico, 1892; República Mexicana, Noticias del Movimiento Marítimo en el Año Fiscal de 1890 á 1891, México, 1892; República Mexicana, Exportaciones en el Año Fiscal de 1890 á 1891, México, 1892; Amonedaciones é Introducciones de Metales Preciosos á la Casa de Moneda, Año Fiscal de 1890 á 1891, México, 1892; República Mexicana, Exportaciones en el Año

Fiscal de 1891 á 1892, Primero Semestre, México, 1892; Denkschrift über das Papiergeldwesen der Oesterreichisch-Ungarischen Monarchie. Vienna, 1892; Montan, Geologische Beschreibung des Pribamer Bergbau-Terrains, etc., Vienna, 1892; Monatshefte zur Statistik des Deutschen Reichs, Jahrgang 1892, Berlin, 1892; Zeistchrift für Berg., Hütten und Salinen-Wesen im Preussischen Staate, Jahrgang 1892, Berlin, 1892; Bulletin de Statistique et de Législation Comparée, Paris, 1892; Revue des Banques, Paris, 1892; Algemeen Verslag van het Munt-College, over 1891, Amsterdam 1892; Jaarcijfers over 1890 en vorige Jaren, No. 10, Amsterdam, 1891; Jaarcijfers over 1891 en vorige Jaren, No. 11, Amsterdam, 1892.

The replies to the interrogatories, which are given in full in the Appendix* to this Report, are indicated by the numbers of the questions. A brief review of the most important facts contained in the various

reports received is here appended:

GREAT BRITAIN AND BRITISH COLONIES.

Great Britain and Ireland.

Items reported for 1891.	Value.	Value in United States money.
Gold coinage.	£6, 723, 648	\$32, 720, 633
Gold recoinage.	434, 508	2, 114, 533
Silver coinage		5, 141, 594
Silver recoinage	203, 465	990, 162
Gold imported	30, 303, 504	147, 472, 002
Gold exported	24, 172, 362	117, 634, 800
Gain	6, 131, 142	29, 837, 202
Silver imported	13, 081, 937	63, 663, 246
Silver exported	13, 355, 3 66	64, 993, 889
Loss	273, 429	1, 330, 643
Gold ores produced	13, 700	66, 671
Silver ores produced (commercial value)	52, 534	255, 657
Estimated stock of gold	115,000,000	559, 647, 500
Estimated stock of silver	22, 500, 000	109, 496, 250
Note circulation.	41, 283, 286	200, 905, 111

Of the gold coinage all were sovereigns except £543,942 in half sovereigns.

It is estimated that the withdrawal of the pre Victorian gold coins

has reached a total of £2,489,000.

An important step toward placing the gold coinage of Great Britain on a satisfactory footing was taken during the year 1891 by extending the application of the principle first adopted in the coinage act of 1889 as to the pre-Victorian gold pieces to the entire gold circulation, that is, to redeem without loss to the owner light gold coins which had not been illegally dealt with.

The amount of silver crowns issued since the resumption of the coinage of crowns in 1887 has been £939,935 (\$4,574,194), and of double florins £533,125 (\$2,594,453).

Colonial coinages were executed as follows:

Silver coinages—	
For British Guiana and West Indies, £4,700	\$22, 873
For Hong-Kong.	
For the Straits Settlements.	336,000

Australasia.—The coinage of the mints at Melbourne and Sydney for 1891 were as follows:

	Mints.	Value.	Value in United States money.
Melbourne: Sovereigns		£2,749,592	\$13, 380, 889
Sydney: Sovereigns		2, 596, 000	1
			26, 389, 044

Through the kindness of Mr. Anderson, the deputy master of the Melbourne Mint, I am able to present an approximate statement of the product of gold and silver in Australasia by colonies during the calendar year 1891, which will be found in the Appendix.

The total gross product of gold was 1,651,151 ounces.

British India.—The coinages executed at the Indian mints during the calendar year 1891 were as follows:

	Metals.		Value.	Value in United States money.
Gold :	 		Rupees. 247, 860	\$117, 411
Silver	 	***************************************	*68, 968, 762	32, 670, 503

*Of which 3,405,961 rupees (\$1,613,404) were recoinage.

The value of the gold produced from the mines of India during the calendar year 1891 was £512,814 (\$2,495,609).

Canada.—According to the Mineral Statistics of the United Kingdom, 1891, the amount of gold and silver produced in Canada during the calendar year 1889 was as follows:

Metals.	Ounces.	Value.	Value in United States money.
Gold	72, 328 383, 318	£259, 032 68,770	1

FRANCE.

Items reported for 1891.	Value.	Value in United States money.
Gold coinage	Francs. 17, 422, 020 12, 725, 200	\$3, 362, 450 2, 455, 966
Gold imported	359, 910, 044 235, 389, 221	69, 462, 638 45, 430, 120
Gain by imports	124, 520, 823	24, 032, 518
Silver imported	. 176, 323, 135 145, 365, 270	34, 030, 363 28, 055, 493
Gain by imports	30, 957, 865	5, 974, 868
Product of mines (1890): Gold	640, 000 11, 378, 720 3, 194, 394, 845	123, 526 2, 196, 093 616, 518, 203

Several coinages were executed at the Paris mint for other countries:

-		
For Tunis:	•	
Gold coinage (12,000,000 francs)		\$2, 316, 000
Silver coinage (3,500,000 francs)		675, 500
For San Domingo:		•
Silver coinage (612,000 francs)		118, 116
For Morocco:	· · · · · · · · · · · · · · · · · · ·	
Silver coinage (£49,430)		240, 551

On April 22, 1891, a census was taken of the circulating medium of France, both paper and metallic, by an examination of the amounts and kinds in the hands of Treasury agents, post-offices, and other branches of the Government, as well as in the Bank of France and other banks.

The sum examined was about 120,000,000 francs, composed of 97,000,-

000 francs in notes and 23,000,000 in coins.

Of the coins 16,000,000 were gold and 7,000,000 silver. It was found that nearly 90 per cent of the coin in circulation was of French coinage.

BELGIUM.

The mint at Brussels was closed during the calendar year 1891, and has not since been reopened.

The silver coinage for Congo, completed during the year 1891, before

the closing of the mint, amounted to 300,000 francs (\$57,900).

The amount of bank notes of the national bank of Belgium outstanding December 31, 1891, was 512,950,000 francs (\$98,999,350).

SWITZERLAND.

Items reported for 1891.	Value.	Value in United States money.

^{*}Valued according to number of kilograms.

The commission appointed by the Austro Hungarian Governments to inquire into the best monetary system for the empire have reported in favor of the single gold standard, and bills providing for the change in the currency have passed the Austrian and Hungarian legislatures.

The provisions of this currency reform are embodied in six bills; the two most important are those embracing the new currency system and the monetary treaty of Austria with Hungary. These two have already become laws, as have also the other four, which are merely auxiliary to the two which contain the text of the new fundamental monetary law of the two countries. The four auxiliary bills are intended to fix the relative value of the gold florin to the new gold coins, to determine the changes which have become necessary in the bank act, to authorize the Government to raise a gold loan, and to provide for the conversion of certain 5 per cent bonds free of tax. The new monetary unit is the gold crown, weighing .3387 grams of gold,

.900 fine, and containing .304878 grams of pure gold. Its value in United States money is \$0.2026.

The new currency is to consist of gold, silver, nickel, and bronze

coins.

The gold coins provided for are:

(1) A 20-crown piece weighing 6.775067 grams of gold, .900 fine, containing of pure gold 6.09756 grams.

(2) A 10-crown piece weighing half the former.

(3) Besides the gold coins above mentioned there are to be coined as heretofore, and as trade coins, Austrian gold ducats. The 4 and 8 gulden pieces are to be no longer coined.

The coinage charge is fixed at 4 crowns for each kilogram of standard

gold for the bank and 6 on individual account.

The new silver coin is:

The 1-crown piece weighing 5 grams of silver, .835 fine, and containing 4.175 grams of pure metal.

The ratio of gold to silver in the new system is 1 to 13.69.

Silver is coined only on account of the state. Silver coins are legal tender at their nominal value among private parties to the amount of 50 crowns, but in unlimited quantities to the state.

The Levantine, or Maria Theresa thalers will continue to be stamped

as trade coins, at the old weight and fineness.

The monetary agreement between Austria and Hungary provides that the total coinage of silver coins shall be 200,000,000 crowns, of which Austria's share is 140,000,000 crowns. The agreement is to remain in force until the year 1910.

Arrangements are to be made at the proper time for the regulation of

the fiduciary circulation and the resumption of specie payments.

Austrian paper money is to remain in circulation provisionally, the

paper florin to be worth 2 crowns.

The introduction of the coins of the new system will be made by degrees, in the course of several years, during which time the coins of the old silver standard, as well as the state notes, will remain current. The coins of the new system multiplied by 2 are to be of the same value as the pieces of the old silver and paper currency, each silver or paper florin to be equal to 2 crowns.

WORK OF THE BUREAU OF THE MINT.

It is with great pleasure that I bear testimony to the zeal and fidelity with which the officers and clerks of this Bureau have performed the onerous and responsible duties which have been intrusted

to them during the last year.

The work of this Bureau, especially in the line of the preparation of monetary statistics, has increased to such proportions as to seriously tax the capacity of the office to promptly supply the information called for. Owing very largely to the importance which coinage and currency questions have assumed in national legislation in recent years, there has been required of this Bureau, in addition to the regular work, the compilation of a vast amount of statistical matter covering the product, use, and movement of the precious metals not only in this country, but in all countries.

All this work has been cheerfully met and promptly performed by the small clerical force at my disposal.

I am, very respectfully, yours,

EDWARD O. LEECH, Director of the Mint.

Hon. Charles Foster, Secretary of the Treasury.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

DEPARTMENT OF THE TREASURY,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, D. C., December 5, 1892.

SIR: I have the honor to submit for the consideration of Congress, in compliance with the provisions of section 333 of the Revised Statutes of the United States, the thirtieth annual report of the Comp-

troller of the Currency.

The year covered by this report ended October 31, 1892. The crop of 1891 was phenomenal in all the great staples produced by this country, and at the same time a partial failure of the cereal crop in Europe created an unusual demand for our food products. The total value of our merchandise exports for the fiscal year ended July 1, 1892, exceeded one billion dollars—\$1,030,335,000.

	1891.	1892.
The merchandise balance of the United States (excess of exports over imports) for the fiscal year ended July 1	\$39, 565, 000 72, 703, 000	\$202, 914, 000 13, 352, 000
Trade balance	112, 268, 000	216, 266, 000

The remarkable feature is that we were compelled to add to an export merchandise balance of \$242,000,000 over \$86,000,000 in gold and silver.

Europe's short crop followed a serious financial crisis, which unsettled values, disturbed confidence, and entailed heavy losses. Instead of paying for our cereals from their surplus, they were obliged to draw upon their principal.

In a normal condition of affairs this large merchandise balance in our favor would have resulted in large gold imports; instead, they sent us

our securities.

The interest upon American securities held abroad aggregates a large amount, and its payment forms a continuous factor in international balances. The return of any portion of our securities increases our wealth at home, and the retention of the earnings of such securities

adds to our home prosperity. The absorption and assimilation of so large an amount in so short a period of time may have produced tem-

porary disturbance, but the permanent effect is beneficial.

The financial needs of Russia, and the accumulations of gold by Austria-Hungary, with a view to the resumption of specie payments upon a gold basis, caused a premium to be paid for gold exports, and was an important cause of its outflow.

Distrust of our monetary legislation, and the fear on the part of Europe that we were drifting towards a silver basis, also had an impor-

tant influence upon gold exports.

The national banks held on September 30, 1892, nearly \$22,000,000 more gold than on September 25, 1891. This, coupled with the known fact that many State banks and trust companies have also fortified themselves with a gold reserve during the year, shows that the fear that we were drifting towards a silver basis was not confined to foreigners.

All periods of monetary stringency, which necessarily restrain and

curtail business ventures, are followed by a plethora of money.

On June 18, 1892, the total deposits in the associated banks of the city of New York were \$543,663,100. The highest amount ever reached before was \$455,306,300 on December 26, 1891. The same plethora of money existed in all money centers; the rate of interest for the year averaged, on demand loans, 1½ per cent to 3 per cent, and time loans and commercial paper ranged about 2 per cent higher.

The cholera at home and abroad, with attendant quarantine restrictions, has held trade in fetters, and, to some extent, impaired the business of the year. The vigorous measures adopted by our authorities reduced it to control and kept its baleful influence at a minimum.

With conditions in the United States favorable for a year of unusual prosperity, speculation has been held in check and business kept within conservative limits. The lessons taught by the monetary stringency of 1890-'91, which fell so heavily upon all whose business was too much extended, have not yet been forgotten. A hardening process has obtained, and yet the record of the year covered by the report characterizes it as one of growth and prosperity.

COMPARATIVE STATEMENT OF THE CONDITION OF THE NATIONAL BANKS WITH RESPECT TO CERTAIN ITEMS AT NEARLY CORRESPONDING DATES FOR THE YEARS 1891 AND 1892.

	1891.	1892.	Increase,	Decrease.
Number of banks in existence October 31	3,694	3, 788	94	
Capital stock	\$684, 755, 865	\$693, 868, 665	\$9, 112, 800	1
Bonds deposited to secure circulation	152, 950, 350	164, 883, 000	11, 932, 650	
Bank notes outstanding	172, 184, 558	172, 432, 146	247, 588	
Bank notes outstanding				
tion outstanding	35, 430, 721	25, 191, 083		\$10, 239, 63
25 and 30, respectively	330, 861, 1 59	340, 524, 179	9, 663, 020	
respectively	1,588,318,081	1, 765, 422, 983	177, 104, 902	
Bank deposits September 25 and 30, re-	1,000,010,001	1, 100, 122, 000	1,,,101,002	
spectively: Total resources September 25 and 30, re-	430, 594, 774	530, 653, 202	100, 058, 428	
spectively	3, 213, 080, 271	3, 510, 094, 897	297, 614, 626	
· · · · · · · · · · · · · · · · · · ·			1 .	-

The above table shows a large decrease in the lawful money deposit to redeem circulation. The net circulation outstanding has increased \$10,487.226 during the year.

The following table shows the total cash held by national banks including 5 per cent. redemption fund, and mutilated currency in process of redemption for the years 1891 and 1892.

	1891.	1892.	Increase.	Decrease.

CURRENCY.

The business of banking is exchanging a generally known value or credit for a local value or credit. This definition applies equally to the money changers of the temple and to the banks of to-day. In the wonderful development of commerce and manufactures which has followed increased facilities for communication and transportation, banking, though hand in hand with trade, is ever in the lead; for credit, or money, is the motor which moves the wheels of progress, and all financial transactions, whether local, national, or international, have become mainly a matter of bookkeeping. Throughout the United States every locality has its bank, and most people, however limited their business transactions, have bank accounts, through which they pay their indebtedness. Bank accounts are generally used as the most convenient and most accurate method of keeping a cash account. This practice does not obtain in European countries in any such proportion. In this country, in the village having a single bank, the artisan pays the merchant by check, or vice versa, and the payment is usually consummated by a transfer of credit upon the books of the bank. Thus does the single bank become a clearing house for the community, and the actual transfer of money is minimized.

The day's exchanges in our larger cities are adjusted through a clearing house, where each bank is credited with the total demands it holds against all other banks, in the same place, and is debited with the total demands which the other banks hold against it, and either pays or receives the balance, simply, in money. The aggregate clearing-house transactions for the year ended October 31, 1892, in 57 clearing house cities, were \$61,017,839,067, the balances were (partly estimated) \$4,881,777,289. Thus, by a simple device of bookkeeping, this immense volume of business was done by means of 8 per cent of actual money.

Our international banking and commercial transactions are settled upon a system of balances through a few leading banks and banking houses that deal in foreign exchange. When the exchange market affords no bill of exchange to be remitted, gold is shipped to settle the balance of trade existing against such nation, and when so shipped, whether bars or coin, it goes simply as commodity, at its market value, precisely like merchandise.

Thus it appears that the bulk of the world's business transactions is done upon credit, witnessed by bookkeeping, and the percentage represented by actual money transfer is very small, in the United States

less than 8 per cent.

A man goes to his bank with his note, a local credit, and procures its discount, receiving the proceeds in a generally known credit or value. namely, a bank draft, or certificate of deposit, or money-something available for the contemplated business. The bulk of all business transactions is adjusted by the contracting parties, whether banking or other-It is the portion in which money passes that appeals to the Government for regulation. It is the recognized constitutional duty of government to furnish for its citizens a circulating medium adequate to their needs and convenient for their use. Gold and silver are the recognized money of the world, because they possess value in themselves, are conveniently coined, not easily counterfeited, exist in quantity sufficient to supply the demand, and are not so redundant as to unduly impair their value. Such money is adequate to the public want, but not convenient for public use, except in small change transactions. Paper money is a business necessity. Paper money possesses no value, simply represents value.

A currency to serve the demands of business must be sound—no doubt of its redemption. It should be elastic, that it may expand and contract, as the tide of business ebbs and flows. If supplied by the Government, the expense is borne by the taxpayers. If supplied by banks, it must possess an element of profit. It will readily issue so long as there is a profit. It may be made to contract by fixing a standard of issue and taxing the excess, so that the excessive issue would be retired with the cessation of the necessity which called it into ex-

stence.

The amount of paper money in circulation October 31, 1892, was:

National-bank notes	\$172, 432, 146
United States notes (greenbacks)	
Treasury notes	
Gold certificates	
Silver certificates	
Currency certificates	10, 550, 000

1, 074, 437, 684

Per cent of national-bank notes, 16.04.

The Government can not issue money gratuitously. It can only put it in circulation in exchange for some value or obligation. It can not

pay its bonds in anything other than coin of standard value.

By the terms of the act of February 28, 1878, the Secretary of the Treasury was directed to purchase and coin into silver dollars silver bullion not less in value than \$2,000,000 worth and not more than \$4,000,000 worth monthly. This act was supplanted by the act of July 14, 1890. While in force the Government purchased silver and coined 378,166,793 standard dollars, the seigniorage on which (that is, the difference between the price paid for the silver and the face value of the coinage) was \$69,967,531.

Total coinage of silver dollars under act of February 28, 1878	\$378, 166, 793.
Total cost of silver bullion used in such coinage	308, 199, 262
Seigniorage or apparent profit	69, 967, 531
Bullion value of such silver October 31, 1892	250, 493, 936
Difference between actual cost and market value October 31, 1892	57, 705, 326

This coinage accumulated in the Treasury vaults until the happy device was conceived of putting it in circulation by the use of paper substitute. As shown above, \$324,552,532 are serving the people by

proxv.

Under the act of July 14, 1890, the Government purchases monthly 4,500,000 ounces of silver, and pays for the same in Treasury notes issued for that purpose and equal at par to the cost of such silver. Thus the currency of the country is arbitrarily increased monthly. Up to November 1, 1892, the total issue of such notes has been \$116,611,233. The present market value of the silver purchased is \$102,648,944, showing a depreciation in value of \$14,134,646. This act was a compromise measure, designed to prevent the unlimited coinage of a dollar of full debt-paying power containing less than a dollar's worth of silver. From its nature (arbitrarily adding a large amount to the currency monthly) it is evident that it was intended to be tem-The severest commentary upon our silver coinage is the fact that it offers an inducement to the counterfeiter to coin a dollar exactly reproducing the genuine in quality and intrinsic worth, as well as form and design, the profit to the counterfeiter being represented by the difference between the market value of the silver contained in the coin and its face value, which was October 31, 1892, 33\frac{1}{2} cents.

In view of the above statistics, the silver currency furnished by the Government will hardly commend itself to the public on the score of economy. It is in sharp contrast with the national bank currency,

which has paid into the Treasury in taxes \$72,670,412.30.

What the settled policy of Congress as to the future currency may be remains to be seen. If furnished by the Government, it will possess the quality of soundness, for nothing can be better than the Government under which we live; but it cannot possess elasticity. Elasticity means conformity to business wants, the supply quickly responding to the demand, and not conformity to fixed rules and statutory laws. Government in the very nature of things cannot supply such currency as the public requires. The national banks can and with proper legislation would supply this want fully and completely. Large appreciation of the price of United States bonds, the basis for circulation, large depreciation of the rates of interest, and onerous taxation have made circulation unprofitable, and the volume has fallen from \$362,889,134, September 30, 1882—the highest amount in circulation at any one time—to \$172,426,610 at the close of the last fiscal year. The volume would have been much more contracted but for the fact that all national banks, whether they take out circulation or not, are obliged to own and assign to the Treasurer of the United States in trust interest-bearing bonds of the United States, and in case their capital is \$150,000 or less, to the amount at par of one-fourth their capital stock. If the capital exceeds \$150,000, they are required to have on deposit in the Treasury not less than \$50,000 in Being obliged to own these bonds, to measureably lessen the cost of carrying such high-priced securities, they take out circulation.

The following carefully prepared tables show the profits upon circulation based upon a deposit of \$100,000, bonds. June 30 was selected, as it marks the close of an interest period for Government bonds.

JUNE 30, 1892—2 PER CENTS.	•

RECAPITULATION.

Profit on the three classes of bonds, maximum circulation 90 per cent-

2 per cent bonds, *\$21,837,000—\$19,653,300, maximum circulation at 0.03152 per cent, \$6,194.72.

4 per cent bonds, *\$129,759,000—\$116,783,100, maximum circulation at 0.33016 per cent, \$335,571.08.

6 per cent bonds, *\$11,600,000—\$10,440,000, maximum circulation at 1.21858 per cent, \$127,219.75.

Total of bonds, \$163,196,000—\$146,876,400, maximum circulation at 0.353 per cent, \$518,985.55.

It will be noted that by taking out circulation the banks realize in each case more than 6 per cent on the money invested in bonds. The money invested in the purchase of bonds as a basis of circulation yields in the case of 2 per cent bonds 6.032; in case of 4 per cent bonds, 6.33; in case of 6 per cent bonds, 7.218.

Since the 5 per cent redemption fund counts as part of a bank's reserve as well in hands of the Treasury as in vaults of the banks, it would have been proper not to make the deduction above. This would add materially to the profit of circulation. The \$43 average cost of examinations of banks with \$100,000 capital is not wholly an incident of circulation.

In the above tables money is assumed to be worth 6 per cent. If the prevailing rate was less than 6 per cent a bank could better afford to take out circulation. If the prevailing rate was more than 6 per cent a bank could less afford to take out circulation. By allowing circulation to the par of bonds and removing the tax on circulation it would be possible for banks located in sections where rates of interest are high to take out circulation without loss.

Since the organization of the national banks \$1,521,437,753 have been issued and redeemed without loss to any bill-holder. There can be no loss upon national bank circulation. All the solicitude as to what shall serve as a basis for circulation when Government bonds cease to exist is premature. The 4½ per cent bonds (act July 14, 1870) matured September 1, 1891; \$25,364,500 were continued at the pleasure of the Government at 2 per cent interest; interest upon the balance ceased; \$24,520,900 have been redeemed and \$983,800 remain outstanding; \$3,617,700 have been redeemed since October 31, 1891. No bonds have been purchased by the Government during the past year, the interestbearing debt has not been reduced, and with the diminished revenues, under the act of October 1, 1890, and swelling volume of annual expenditure, there is likely to be no reduction in the immediate future. The trend of public opinion is decidedly in favor of limiting our revenues to the current needs of the Government. The currency sixes that begin to mature in 1896 are primarily obligations of the subsidized Pacific railroads. The railroads will hardly be prepared to pay these bonds at maturity, and they will likely be continued like the 41 per cent bonds, at the option of the Government, at a low rate of interest.

By relieving national bank circulation, as above suggested, these bonds could be extended at a very low rate of interest—too low for investment purposes, yet available as a basis of circulation. Of the \$25,364,500 of 2 per cent bonds outstanding October 1, \$22,050,350 were held by national banks to secure circulation. The 4 per cent bonds do not mature until July 1, 1907. Since December 6, 1890, the Government has been out of the market as a purchaser of its own bonds, and the price then paid for 4 per cent bonds (\$123.356) has fallen to \$114.625. The lower the price of the bonds the more available they become as a basis of profitable circulation. If happily the time arrives when the United States

^{*} Total amount of each class of bonds held to secure circulation June 30, 1892.

Government has no bonded debt, or not sufficient to be available as a basis for circulation, there will, of necessity, be other choice securities

available for such purpose.

tation:

In my judgment the Government should issue 2 per cent bonds, running twenty, thirty, and forty years, and with the proceeds purchase the 4 per cent bonds outstanding. This would result in a saving of interest to the Government, distribute the maturity of the bonds over a proper period, and furnish the best conceivable basis for circulation. The Government could hardly have floated a 2 per cent bond but for the needs of the national banks, and with liberal yet conservative laws as to circulation it is possible that a bond bearing a slightly lower rate than 2 per cent could be placed at par.

A United States 4 per cent bond of 1907, in order to yield interest at the rate of 2 per cent per annum for the remaining period it has to run, must have been purchased October 1, 1892, for \$125.492. In other words, the Government could have exchanged a 2 per cent bond, at par, maturing July 1, 1907, for the 4 per cent bond of 1907, at \$125.492, without loss or gain. The exchange would have been equal. The 4 per cent bonds on October 1, 1892, were worth \$114.625. The extended 2 per cent bonds, payable at the pleasure of the Government, were worth, on the same date, 101. Could the Government have exchanged a 2 per cent bond maturing July 1, 1907, for the outstanding issue of 4 per cent bonds upon the basis of the quotations just given, it would have resulted in saving to the Government (that is, the taxpayers) the

enormous sum of \$67,161,551.47, as appears from the following compu-

	•
Par value of outstanding 4s, October 1, 1892	641, 426, 312, 18
Quarterly interest paid on 4s	5, 595, 867. 50 3, 175, 377. 78
Quarterly saving of interest	2, 420, 489. 72
Present value, as of October 1, 1892, of these savings of interest to maturity, money at 2 per cent, reinvested quarterly: Present value, as of October 1, 1892, of \$75,488,806,62, principal of	123, 406, 683. 57
2s in excess of principal of 4s, money at 2 per cent, reinvested quarterly.	
Present value of net saving to the Government in accordance with the above statement	67, 161, 551. 47

While the principal of the indebtedness would be increased, the interest reduction would be so great for the remaining fifty-nine interest quarter periods, from October 1, 1892, to July 1, 1907, as to show a net saving of \$67,161,551.47.

A 4 per cent bond at 1145, on October 1, 1892, would pay an investor,

interest at the rate of 2.793 per cent.

It is probable, from the above statistics, that investors would not exchange 4 per cent bonds for 2 per cents, but the fact that banks own, for the purpose of securing circulation, nearly 87 per cent of the continued 2 per cent bonds in preference to the 4 per cents, shows that they prefer a bond at par, with a lower rate of interest, as a basis for circulation. A fixed period to run, and a long period would add to the value of the bond.

With so great a saving possible, the interests of economy, as well as all public and private interests that depend for prosperity upon a sound

and elastic currency, emphasize the wisdom of settling this question of a proper basis for national bank circulation by the issue of bonds having a long time to run, at a low rate of interest, with which to retire

the outstanding issue of 4 per cent bonds.

The national banks for a long series of years have demonstrated their ability to furnish the country with currency ample in amount, elastic in volume, sound beyond peradventure, and every dollar of which, every moment of its existence, was worth par throughout the length and breadth of the land. A change from such a currency to another less secure is certainly an unwise experiment. It is proposed to restore State bank circulation by removing the 10 per cent tax imposed March There is no fairer test of men or methods than the record they make for themselves. Every item of assets and liabilities, as shown by the trial balance of their general ledgers, of every national bank, for the whole period of their existence, has five times each year been published in the locality, reported to the Comptroller of the Currency, and become a matter of record. Additional tables resolve all composite items into detail. Additional statistical tables complete the history and workings of such banks. Special reports show the course of trade and exchange. In case of failure, equally explicit information is obtained from receiver's reports, total claims, total assets, percentage paid, percentage of loss, items of expense, including receiver's fees, and attorneys' fees.

All this information is annually reported to Congress and spread before the country. The course of trade, the material condition, the prosperity or depression of the country, are truthfully reflected in the condition of its banks. And the publication of the above conditions, in the reports of these banks, has been of inestimable value to publicists and economists. This is the record of national banks under Federal authority and Federal supervision. To compare the present national banking system with the old State banking system is to compare order with confusion—perfect system, under central control, with imperfect system, under diversified control. The banking systems of the different States, during the period that they were banks of issue differed Some had excellent banking laws; others had very crude laws. Some had effective supervision, and some had none, or worse than none. In no State was the aggregate or percentage of loss to note-holders of State banks reported, nor the losses to creditors or stock-The most careful research reveals only general statements, or estimates of loss, in the current financial literature of the time.

Congress, by resolution in 1832, directed the Secretary of the Treasury to procure and publish statistics relating to banks in the several Such publication was made more or less complete, with the exception of some years, until 1864*; then followed an interval until 1873, when the Comptroller of the Currency was directed to procure from official and other reliable sources and report to Congress information in relation to State banking institutions. The statistics in relation to State banks prior to 1864 have been the subject of much

^{*}When is stated that the statistics relating to the period prior to 1864 are mainly unofficial, it will be understood that the information conveyed is only approximately correct. The principal sources of information in compiling these statistics have been the reports of the Secretary of the Treasury to Congress since 1832, Baker's work on Banks and Banking, Blodgett's Economica, Elliott's Funding System, Thompson's Banknote Reporter and Counterfeit Detector, the Banker's Magazine, Hodges' new Banknote Safeguard, Consideration on the Currency and Banking Systems of the United States by Albert Goldstine, History of Banking in the United States by Albert Goldstine, History of Banking in the United States by Albert Goldstine, History of Banking in the United States by Lobn United States, by Albert Gallatin; History of Banking in the United States, by John Jay Knox.

study and research on the part of my predecessors. The Comptroller's report for 1876 contains elaborate tables upon this subject. The question of restoring State bank circulation gives especial value to all information of this character, and I have therefore carefully studied and analyzed all the statistics attainable upon this subject, showing the condition of State banks prior to 1864, and publish in the Appendix of this report, arranged in convenient form, tables presenting such information.

The most notable feature of the State-bank circulation was the violent

expansion and contraction to which it was subject.

The charter of the United States Bank expired March 4, 1811. Mr. Gallatin made the following estimate of the total circulation of the country, including notes of the Bank of the United States: In 1811, \$28,100,000; in 1815, \$45,500,000; in 1816, \$68,000,000; and in 1820,

\$44,863,000.

In 1840, according to Knox, there were in Ohio thirty-seven banks, with \$10,000,000 capital. January 1, 1845, there were but eight banks in operation, with a capital of \$2,171,807. Up to and including 1856 thirty-six of the banks organized under the laws of that State had failed, their notes being wholly worthless, and eighteen more had failed, their notes being worth 50 to 75 cents on the dollar. From January 1, 1857 the circulation of the whole country shrank from \$214,788,892 to \$155,208,744 on January 1, 1858, a decrease of over \$59,000,000 in one year (Report of Secretary of the Treasury). The circulation of Illinois increased from \$5,500,000 in 1857 to \$12,300,000 (Knox.) Much of this circulation was secured by various forms of security, and its redemption provided for by State authority. Yet it was seldom that this security proved adequate. The Bankers' Magazine for February, 1858, advertised a list of twenty-eight suspended banks in Indiana whose notes would be redeemed by the audifor of that State at the following rates: ten at par, and the remainder at prices ranging from 97 down to 69. According to the same authority, in July, 1859, a convention of Wisconsin bankers, held at Milwaukee, fixed the discount on Illinois bank bills at 1 per cent until September 20, and at 3 per cent thereafter. This action was retaliatory, and simply established the same discount upon Illinois bills that Illinois had adopted as to Wisconsin. In April, 1859, the Indiana banks determined not to accept the notes of Illinois or Wisconsin. All bank notes of interior banks were at a discount in New York (many unsalable) from 50 per cent down to the current exchange, which was charged against the notes of perfectly solvent banks.

The above instances illustrate the friction existing between different

States.

The cost of exchange on commercial centers was greatly increased under State bank circulation. Now a man in Montana deposits his money in his local bank and buys Chicago exchange. His money is as good in Chicago as Helena, and he simply pays the cost of transmittal. In fact, the competition for business is so intense and the indulgence of banks correspondingly great that frequently when an interior merchant goes to New York to buy goods he takes a letter of introduction from his home bank to their New York bank correspondent, draws checks for the amount of his purchases upon his home bank, which are paid by the New York correspondent and debited to the home bank. Thus the item of exchange disappears entirely.

The dangers of counterfeiting under the national banking system are at a minimum. The bills are printed by the Government upon

carefully prepared paper made by the Government and never out of the Government's possession. If circulating notes were to be printed by the forty-four different States, the opportunities for counterfeiting would be multiplied. Under the old State-bank system counterfeiting was an established industry, and a description of the methods and devices possesses the qualities of a romance. From January 1 to April 1, 1859,* there appeared 242 new counterfeits. Hon. John Jay Knox (whose long incumbency of the office of Comptroller of the Currency, as well as his qualities as a student of finance, entitles his judgment to highest consideration) estimates the average loss to note-holders under the old State-bank system at 5 per cent. As before remarked, no estimate can be made of the loss to creditors and stockholders. By advertising for the redemption of circulating notes the statutory period and refusing all later presentations, it frequently happened that the stockholders reaped large profits where the note-holders met almost total loss.

I have given the above random illustrations as suggestive simply of the evils attendant upon the old State-bank circulation. It is by no means exhaustive. I am aware that the present can hardly be compared to antebellum times, and that the changed conditions which now exist would necessarily obviate some and soften many of the evils at-

tendant upon State-bank circulation.

In order to furnish a modern standard of comparison between national banks and those other than national, Comptroller Knox reported statistics, showing the number of failures of State, savings banks, and private bankers, for the three years ending January 1, 1879. The number of failures was 210; total claims, \$88,440,028; amount paid and to be paid, \$58,152,638; losses, \$32,616,661; upon which he comments:

The average annual loss sustained by creditors during the past sixteen years by the insolvency of national banks throughout the United States has been \$390,012, and that occasioned by the failures of banks other than national, as shown by the incomplete data obtained by the Comptroller, has for the last three years been not less than \$10,872,220.

Hon. Edward S. Lacey, in his report as Comptroller for the year 1891, gave a list of failures in the United States of bankers, brokers, trust companies, and savings banks, for the year ended June 30, 1891. "These number, in all, 117 institutions, having liabilities estimated at \$38,271,511, and assets valued at \$20,794,092. (Bradstreet.)"

Through the courtesy of Bradstreet I am able to report, in a table to be found in the Appendix,† the failures of State, savings, and private banks, and loan and trust companies for the year ended June 30, 1892. The number is sixty-nine. Aggregate liabilities, \$11,024,628. Estimated value of assets, \$6,125,189. The percentage of assets to liabilities 55.56.

The seventeen national banks that failed during the last report year had aggregate liabilities amounting to \$12,538,448. Estimated value of assets, \$10,750,347. Percentage of assets to liabilities, 85.74.

However recent the comparison the conclusion is in favor of the

national-bank system.

If the forty-four States are to furnish the currency of the country, then we will have a chain of sovereignties furnishing our circulating medium, each with varying laws and varying supervision, and, like all chains, the system as a whole would be no stronger than its weakest

^{*}Thompson's Bank Note Reporter and Counterfeit Detector.
†This appendix, which is omitted for want of space, will be found in the separate volumes of the Comptroller's report.

link. Disorganized finance in one State would affect all. Argentine financial troubles precipitated the Barings failure at a time when this country was generally prosperous; and yet it produced a quasi panic in the United States and cast a cloud over the financial horizon of the whole world which has not yet fully disappeared. Banking is not a philanthropical business and banks will not issue circulating notes unless it is profitable. Manifestly issuing notes would be most profitable where greatest latitude was allowed or greatest laxity prevailed, and with the circulation of any State discredited or the particular banks of any State discredited, conservative bankers and conservative

business men would have to discriminate against such bills.

We all know the practical machinery employed to enforce such discrimination. Our State boundaries and commercial centers would be policed with brokers' offices, and commerce would be compelled to pause at State lines and pay the exchange demanded in order to provide itself with money acceptable in the locality where proposed business was to be done. The bill of a perfectly solvent bank in Oregon would be worth just as much less than its face in Chicago or New York as it would cost to send such bill to Oregon for redemption and secure the proceeds in return—cost of transmission each way and interest for the time required—in short, exchange. It would be precisely on a par with the note of any equally reputable business firm. The only way this discount could be avoided would be to provide for the redemption of such notes in Chicago, New York, Boston, and other money centers. Should interior and far Western banks make their bills worth par throughout the country by providing for their redemption at convenient money centers, it would compel them to keep an amount of idle reserve with their redemption agents that would seriously impair the profits on circula-And the United States Government would not facilitate banking transactions then, as it does now, by receiving money at its subtreasuries and transporting the same to any part of the country for the

meager charge of 15 to 50 cents per \$1,000.

A bank bill or note is a noninterest bearing obligation payable to bearer upon demand, in lawful money, title to which passes by delivery. The value of such note depends upon the financial credit of the bank issuing the same, the special provision of law for its redemption, the security set apart for such purpose, the fidelity with which such laws are enforced, as to redemption, the character of supervision, and the degree of conservative banking thereby insured. The profit to a bank issuing such bills depends altogether upon the length of time they remain outstanding before being presented for redemption. facilities afforded by railway and express companies for presenting such notes for redemption, it is probable that they would speedily find their way back to the place of issue. This would seriously impair the profits and would necessitate more favorable conditions of issue in order to render the issuing of circulation profitable. No circulation will issue unless there is a profit in it. The fact of the probable and speedy return of this circulation to the locality of issue is made an argument in its favor, inferring therefrom that each locality would be abundantly supplied with money. A bad penny always returns, and the tinge of doubt that would attend this State bank circulation would doubtless give it a homeward impetus. But bear in mind that it would be worth no more at the place of issue, though passing at par, than in Boston or New York. By just such a percentage as its purchasing power was diminished in our commercial centers, by just that percentage would the price of commodities be appreciated where it passed at par. This is an inevitable law attendant upon depreciated currency.

The stream that flows from the mountain to the sea obeys no more natural law than that which accumulates currency in commercial centers. If the water stood in pools on the mountain it would necessarily be pretty damp at the seaboard, and, if these localities that so loudly clamor for more money had all the currency they wanted, that same currency would be a drug in banking centers. There is money enough, and the range of interest for the past year has been phenomenally low, and, as before stated, any bank in any part of the country could have had any quantity of money transported to it at the moderate charge of 15 to 50 cents per \$1,000. But such bank must have the equivalent of money; it must have securities, or receivables, or some form of credits, acceptable, in order to get the money. And right here This clamor for more money comes from the newer, lessis the trouble. developed sections of the country, and from people who have something to sell that no one wants to buy. The securities they offer do not commend themselves to investors. No amount of currency would correct this. They say, "Money is plenty while the crop is being moved, but we want it plenty at all times." When the crop is gone, what have they to represent money, with which to buy money? People can get money for their labor and for their produce. They can borrow upon good collaterals, real or personal. People with any equivalent This whole trouble is born of the heresy, which of money can get it. has a strangely extended hold upon the public mind, that the Government can create wealth and that if there were more money people could, in some unexplained way, obtain it without rendering an equiv-

A conditional repeal of this 10 per cent tax is proposed, conditioned upon compliance by the State banks with certain regulations imposed by Congress, designed to secure circulation and protect note-holders Such State banks would then be national banks for the against loss. purpose of issuing circulating notes, and Congress must provide for their supervision and examination, to see that the laws are complied with. Can currency be better taken out by a bank organized under a State law than under an act of Congress? Would Congress or the country gain anything by the proposed divided jurisdiction over these banks Would not division lead to conflict and confusion? national banks make reports of condition to the Comptroller, on a past day, fixed by him, in such form as the Comptroller prescribes, and upon blanks furnished by him. These forms are very complete as to balance sheet and detail. In order to comply with these calls a bank's books must be so kept as to furnish the required information. These reports are of very great value to the banks themselves, in systematizing their bookkeeping and insuring good and uniform methods of business. information reported, all on the same date, is of great value to the pub-What would be gained by denationalizing our banks in all respects, except as to circulation? Can the various State legislatures be depended upon to provide better laws and better supervision than Congress?

It is argued that 92 per cent of all business transactions consummated through banks are represented by credits—that is, exchanges and offsets—and that 8 per cent only is represented by money. The Government does not assume to regulate the 92 per cent. Why should it the 8 per cent? Why not as well allow State bank notes to circulate? Their acceptance is purely voluntary. That statement is theoretically true, but practically it is wholly false. A banker, or large merchant or manufacturer, may be in a position, equipped with skilled

men or expert information, to exercise discrimination between the strong and the weak banks. But what can the artisan, the day laborer, the miner, or the farmer know of such a matter? From the nature of their calling they can exercise no discrimination. They know, and they can only know, that the Government allows such bills to circulate, in form and semblance of money, and they have the right to hold the Government responsible that it be worth 100 cents on the dollar,

whether it comes from New York or New Mexico.

The Constitution of the United States prohibits the States from coining money or making anything except gold and silver legal tender. State-bank bills could not become a legal tender. Neither are nationalbank bills. State-bank bills when issued add just so much to the liabilities of the bank. They would circulate freely in times of prosperity and confidence. In times of monetary stringency and general distrust they would return to the banks for redemption. They would have to be redeemed in legal-tender money provided by Congress. Congress must, under the Constitution, provide all the money that possesses a full debt-paying power. By every consideration of sound business principles it should provide all the money that the country requires. No public interest can be served by dividing this function with the forty-four States. Every period of financial depression in the past resulted in the suspension of specie payments, more or less general, by the banks; that is, resulted in the inability of the banks to redeem their notes. The same conditions would produce similar results in the future. If State-bank notes are allowed to circulate, their acceptance is not voluntary; it becomes a business necessity. mine owners, manufacturers, and large employers of labor practiced paying their help in store orders, in order to control their trade and make the extra profit. Surely, under the law, the acceptance or rejection of such orders was purely voluntary, and yet their acceptance for fear of losing their employment was general.

So great did this abuse become that many States have enacted laws compelling corporations to pay their laborers, at regular intervals, in The wealthy class could provide themselves with the means of discriminating against the notes of weak banks, and if they found themselves possessed of any would proceed to work them off upon their less fortunate neighbors. That is the record of the past. It would be the experience of the future. To the average laboring man a bank-note reporter and detector would be as inexplicable as the binomial theorem. When a bank suspends, the fact that the note is secured and will be eventually paid is poor consolation to the laborer who needs his money for The note of a failed national bank is as good as that of any his daily use. bank in the system. The restoration of State-bank circulation portends disaster to that class of our citizens who most need and have most right to ask protection from the Government. State-bank circulation loses its money power in a crisis. It is a source of weakness and adds to the danger. Instead of paying debts it comes forward itself to be paid.

CLEAN MONEY.

Currency, as applied to the money of a country, has been defined as a "continuous succession of uses." A little reflection upon such continuous use, the journey from hand to hand, till to till, pocket to pocket, over the damp counter of the saloon, through the necessarily soiled hands of honest industry, treasured by the poor and carried in close proximity to the person, it is easy to realize that it becomes "filthy lucre." Soiled

paper money is popularly believed to be a potent means of disseminating infectious and contagious diseases. The Bank of England never reissues a note.

The statute provides for the redemption of United States notes when they "are so mutilated or otherwise injured as to be unfit for use," and for the redemption of national-bank notes when they are "worn, defaced, mutilated, or otherwise unfit for circulation." A note with the accumulated filth of continuous use is unfit for circulation and should be redeemed. Send in the old and let the people have new and clean money. My experience as examiner in the discount and savings banks of New York has impressed this matter upon me.

The following table gives the number of banks organized during the year ended October 31, 1892, in each State and Territory, with their aggregate capital:

States and Territories.	No. of banks.		States and Territories.	No. of banks.	Capital.
Texas. Iowa. Indiana Ohio Pennsylvania Illinois. In point of numerical accessions to the system, Texas leads with twenty two banks; Iowa, Indiana, Ohio, and Pennsylvania following in the order named. Illinois, however, provided the largest amount of capital. It has been noticeable for several years that the large proportion of increase in the number of active national banks is assignable to those States and Territories located West of the Mississippi River and in the Southern States. Of the one hundred and sixty-three banks organized during the past year, eighty-two are located in States and Territories west of the Mississippi, and thirty-six are located in the Pennsylvania still has the greatest number of na-Southern States. tional banks in operation, Massachusetts the greatest aggregate capital, and New York the largest amount of deposits. As prosperity and population increase in the western portion of the country, extending from north to south, so the privileges of the national banking system are availed of in contrast with private banks and other financial corporations organized under State laws. During the past year the seventeen failures were widely distributed, there having been three in Kansas; in New Mexico and Texas two each, and in other States only one. following table exhibits the number of banks organized, failed, and in voluntary liquidation, and the net increase or decrease, numerically, each year since 1863:

Number and Authorized Capital of Banks Organized and the Number and Capital of Banks Closed in each Year ended October 31 since the Establishment of the National Banking System, with the Yearly Increase or Decrease.

Total net increase							*3, 786	†551, 128, 782		

^{*}Two banks restored to solvency, making 3.788 going banks.
†The total authorized capital stock on October 31 was \$693,868,665; the paid-in capital, \$692,512,330, including the capital stock of liquidating and insolvent banks which have not deposited lawful money for the retirement of their circulating notes.

As stated elsewhere with more particularity, the failures during the past year were not disastrous, and in proportion to the number in active operation were not so numerous as in some preceding years.

AMENDMENTS TO THE LAWS.

The Comptroller of the Currency is required annually to report "any amendments to the laws relative to banking by which the system may be improved, and the security of the holders of its notes and other

creditors may be increased."

(1) In my judgment the law should be amended so as to provided as follows: That the minimum deposit of Government bonds, required by national banks, be reduced to \$1,000 in case of banks of \$50,000 capital, and to \$5,000 in cases of banks whose capital exceeds \$50,000. Such deposit would be sufficient to guarantee the payment of all expenses and assessments imposed by law. Banks are no longer organized for the purpose of issuing circulation, and when organized to do business as banks of discount and deposit it is clearly a hardship to require them to purchase these high-priced Government bonds beyond the amount above suggested.

(2) That any national bank be allowed to issue notes equal to the par value of the United States bonds which it may purchase and assign to the Treasurer of the United States for the purpose of securing circulation.

(3) That the monthly withdrawal of bonds pledged to secure circulation shall not exceed four and a half millions in the aggregate. Should withdrawals equal the amount named in any month (which is unlikely) such amount would be offset by the additional circulation issued under the second amendment suggested.

(4) That the tax on national bank circulation be repealed. The banks have already paid into the Treasury \$72,670,412.30 in taxes upon circulation. The banks should only be assessed an amount sufficient to defray the actual cost to the Government of providing circulation.

(5) That the limit of the amount which may be loaned to any person, company, corporation, or firm, to 10 per cent of the capital stock of the bank, be so amended as to read "capital and surplus." There should be an additional amendment making an exception in favor of temporary loans, secured by collateral, in our largest business centers.*

(6) That the Government issue bonds, with a long period to run and at a low rate of interest, with which to retire the present bonded debt of the United States, and which bonds may be used as a basis to

secure national-bank circulation.*

(7) That the Comptroller of the Currency, with the approval of the Secretary of the Treasury, be empowered to remove officers and directors of a bank for violations of law, leaving the vacancy to be filled in the usual way; first giving such officers and directors an opportunity to be heard.

(8) That bank examiners be required to take an oath of office before entering upon the discharge of their duties, and to give a bond in such amount and with such sureties as the Comptroller of the Currency may

require.

(9) That the Comptroller of the Currency be allowed to appoint two general examiners, of conspicuous ability and experience, to be paid out of the public funds, whose duty it shall be to visit, assist, and supervise the various examiners in their several districts, in order to secure uniformity in method and greater efficiency in work.

(10) That the law be so amended as to prohibit officers or employés of a bank from borrowing its funds in any manner except upon appli-

cation to and approval by the board of direction.

(11) In order to facilitate the collection of assessments upon shareholders in failed national banks, that the receivers of such banks be required to file with the county clerk or register of each county where any shareholder may reside a statement showing the names of shareholders residing in such county and the amount of stock held by them respectively; the filing of such statement to constitute a lien upon the realty of such shareholders, which lien may be vacated, upon motion, by giving proper bond, and which shall be discharged, by the receiver, upon payment of the assessment.

(12) Section 380, United States Revised Statutes, reads as follows:

All suits and proceedings arising out of the provisions of law governing national banking associations, in which the United States or any of its officers or agents shall be parties, shall be conducted by the district attorneys of the several districts, under the direction and supervision of the Solicitor of the Treasury.

Under this section it is claimed that United States district attorneys are ex-officio attorneys of the receivers of all failed national banks

Discussed elsewhere in this report,

located within their respective districts, and that all suits and proceedings must be instituted by or through them. It is difficult to believe that the courts will finally sustain such a construction, that a simple action for debt, which can be maintained in a State court as well as in the United States court, and is not based upon any provision of the national-bank act, falls within the provisions of said act, or that a receiver of a failed national bank is an "agent" of the United States

within the meaning of said section. It is difficult to believe that Congress has the power to impose the services of any attorney upon such a trust, where the assets are wholly private property, belonging to creditors and shareholders. Certain it is that had Congress intended that such a broad construction would be put upon this section it would have made some provision for exceptional cases. It is a physical impossibility for the various United States attorneys to act as attorney or counsel for the receiver. In many instances they reside several hundred miles distant from the trust. other instances there are so many trusts within a single district that the United States attorney can not attend to all the business to be The result in such cases is that where United States attorneys insist upon being employed they become attorneys of record, nominally appearing in all actions or proceedings, while some resident attorney does the actual work. As a consequence the trust is obliged to pay double fees for having its work done.

If the United States attorney must be employed in accordance with the above section, then every time there is a change in such officer it would necessitate the substitution of his successor in office, thus bringing in an entirely new man, with no familiarity with the pending litigation. Under such circumstances the usual practice has been to retain the ex-district attorney as counsel, thus producing a double

charge for the services rendered.

Many United States attorneys make no claim to be employed. Others when confronted with the situation relinquish their claim, but still others insist upon being employed, and, when not employed, insist upon being paid a fee for every act that is done by the attorney in the regular administration of the affairs of the trust. The Department has in its possession bills rendered by United States attorneys who have never performed any act for the benefit of the trust, have never been consulted by the receiver, and never in any way had any connection with the affairs of the failed bank, except to ascertain from the record what suits and proceedings had been instituted and then have made such suits and proceedings a basis of claim for compensation.

I append a table showing the various failed banks, their location, and the location of the different United States attorneys who would have to be employed by the receiver in case the construction sought to be placed upon section 380 is a proper one. Also, the distance at which such United States attorneys are located from the respective

trusts.

From this table will clearly appear the physical inconvenience, if not impossibility, of these United States attorneys acting as attorneys for various receivers. Surely these attorneys ought not to be paid for what they can not and do not do. These trusts should not be subjected to double fees, and the above section should be amended so as to provide that attorneys other than United States attorneys may be employed by receivers of failed banks, whenever in the opinion of the Comptroller of the Currency such employment will be for the interest of a trust.

Title and Location of each Receivership with Location of United States Attorney.

The gross liabilities of the seventeen banks which failed during the year were \$12,538,448. The estimated value of the assets is \$10,750,347, or 85.74 per cent of the liabilities.

Five of these banks failed prior to December 1, and their failure was the result of the quasi panic of 1890 and 1891, and a continuation of the bank failures which characterized the year immediately preceding.

The Maverick National Bank of Boston had liabilities of \$8,727,833, or more than two-thirds of the total liabilities of the banks failing during the year. Aside from that institution the failures were inconsequential in amount, and, as noted above, the probable loss to creditors is less than the average for previous years.

No bank has failed since July 6, 1892.

DOMESTIC EXCHANGES.

One of the great values which the national bank system possesses is the facility it affords for obtaining accurate statistical information as to the course and character of business. With nearly four thousand banks, representing nearly every locality and every business interest, under central supervision, it is within the power of the Comptroller of the Currency to obtain data showing exact conditions of business at stated time or times.

For the purpose of showing the course and magnitude of business of the banks, my predecessors have called for the exchanges drawn by the different banks upon each other and upon the reserve and central reserve cities for a certain year. These exchanges represent the settlement of balances between the different banks and correspond exactly with the cash balances paid or received by the different banks, in settlement of their exchanges in our clearing-house cities. My immediate predecessor, Mr. Lacey, called for such information for the year ended June 30,

1890, and June 30, 1891.

Thinking that the monetary stringency that prevailed in the fall of 1890 and the early part of the year 1891 might be thought to impair the value of statistics for these years, as a criterion, I have also obtained like information for the year ended June 30, 1892. Thus we have three successive years, covering what may be fairly termed a sample period, and the information set forth in the following tables may be accepted as fairly reflecting the volume and character of the business of the banks for the periods covered, hence it will be unnecessary to call for similar information from the banks for some years to come.

Out of the 3,759 banks called upon, 3,647 complied with the Comptroller's request and furnished the data for the following table:

AMOUNT OF DRAFTS DRAWN BY NATIONAL-BANKING ASSOCIATIONS UPON NEW YORK, CHICAGO, St. LOUIS, THE OTHER RESERVE CITIES, AND ON ALL OTHER LOCATIONS, THE NUMBER OF BANKS DRAWING UPON EACH CITY, AND THE PERCENTAGES OF DRAWINGS IN 1892.

,		1892.

		1.	l		1	l	

^{*}The total amount of drafts drawn upon other reserve cities (not shown in detail in 1890) in 1891 was \$3,101,005,735 and the percentage 24.25.

From the preceding table it will be observed that the percentage of exchange drawn upon New York, Boston, and Philadelphia shows a slight loss each year, while the percentage drawn upon Chicago and St. Louis shows a slight increase, indicating that, with the growth and increase of wealth in the interior of the country, the proportionate amount of business done by these large interior cities is increased out of proportion to the seaboard cities.

The following table shows the number of banks drawing and the amount of exchange drawn by all the national banks reporting, classified by States and arranged in the order of the total amounts drawn, further subdivided so as to show the operations of the banks in reserve cities, and other banks, separately, during the year ended June 30, 1892, to which has been added a column giving corresponding totals

for the years 1891 and 1890:

Amount of Drafts Drawn by all Reporting Banks in 1892, 1891, and 1890.

It will be noticed that some changes have taken place in the relative importance of the several States during the year. Nothing especially significant, but all suggesting the westward trend of wealth and business.

In order to further illustrate the operations of banks covered by the foregoing statement, the following table is introduced, which exhibits the amount drawn by banks in the several reserve cities:

AMOUNT OF DRAFTS DRAWN BY BANKS IN THE SEVERAL RESERVE CITIES, 1892.

Reserve cities.	On New York.	On Chicago.	On St. Louis.	On other re- serve cities.		Total.
New York Chicago Boston Philadelphia Kansas City Cleveland Baltimore Cincinnati Pittsburg St. Louis Omaha Detroit Albany St. Paul New Orleans Minneapolis Milwaukee Louisville St. Joseph	711, 348, 880 711, 425, 452 411, 695, 566 148, 063, 578 263, 094, 031 228, 044, 734 185, 919, 734 100, 191, 368 109, 297, 538 119, 221, 922 125, 497, 292 125, 497, 293 118, 553, 557 55, 355, 282 28, 626, 086 45, 149, 951 32, 561, 982	\$54, 105 233, 163, 584 3, 317, 453 56, 063, 854 10, 708, 022 190, 565 15, 913, 739 12, 972, 128 21, 517, 158 46, 235 39, 279, 118 1, 725, 508 41, 085, 847 2, 854, 946 8, 763, 957	\$15, 919 8, 645, 379 6, 654 16, 540 58, 864, 911 1, 181, 403 17, 701 6, 162, 069 168, 344 14, 100, 505 145, 000 1, 192, 093 1, 155, 086 15, 000 1, 410, 024 7, 191, 286	\$90, 699, 735 93, 428, 780 55, 854, 418 34, 306, 731 3, 657, 289 36, 674, 520 32, 186, 520 32, 186, 520 32, 186, 520 311, 210, 048 16, 248, 766, 595 2, 850, 074 17, 529, 382 1, 566, 595 2, 372, 890 5, 396, 829 5, 396, 829 5, 396, 829	\$37, 235 56, 112, 290 252, 997 2, 553, 375 10, 386 835, 266 10, 010 4, 180, 888 10, 909 722, 453 176, 588 149, 986 280, 000 220, 000 855, 537	\$95, 171, 994 1, 107, 698, 918 750, 885, 974 449, 156, 355 266, 044, 487, 566 244, 987, 560 244, 362, 731 234, 830, 503 193, 641, 027 217, 230, 227 138, 763, 202 128, 393, 329 143, 039, 386 123, 001, 31 116, 917, 766 72, 099, 823 55, 667, 287 55, 246, 799

In connection with these tables, showing the vast volume of business done by these banks, the question naturally suggests itself: What is the cost of this business to the public and what character of service is rendered to the public by these banks?

Answering this question the Comptroller, in 1890, obtained data from which he submitted a table showing the amount of premium charged on each \$100 of exchange drawn, stated in cents, fractions

thereof being omitted.

The table referred to is here reproduced.

States and Territories.	Rate of ex- change on \$100.	States and Territories.	Rate of ex- change on \$100
Rhode Island New Hampshire Delaware Maryland District of Columbia Kentucky Massachusetts Connecticut Vermont New York New Jersey Ohio Missouri Maine Pennsylvania Kansas Nebraska Illinois Virginia Ilndiana Minnesota Utah Washington Wisconsin	1 4 4 5 5 6 7 7 7 7 8 8 8 8 9 9 9 9 10 10 10 11 11	Iowa North Dakota. North Dakota. South Dakota. Michigan West Virginia California Montana Wyoming Colorado Idaho. Louisiana South Carolina Mississippi Oregon Florida Tennessee Alabama Georgia North Carolina New Mexico Arkansas Arizona Nevada Texas. Lal exchange (\$11,550,898,255)	12 12 12 12 12 13 13 13 14 14 15 15 17 17 18 18 18 18 20 20 0 20 0 20

This table shows an average of 8½ cents on each \$100 of exchange drawn by all of these banks; that is, exchange drawn on each and every one of their correspondents with whom they may have had dealings during the year.

In order to give a more full and practical illustration of this subject, I have this year prepared data showing the total amount of exchange drawn by the various banks reporting to have been \$12,994,959,590, and the total commissions charged to have been \$3,343,736, or an average of .03 of 1 cent.

. Contrasting the current rates charged by the banks (when they make any charge at all) with the statement just made, and we see what a vast amount of exchange is drawn without any compensation whatever.

The following statement shows the average charge for exchange drawn by national banks in each State during the year ended June 30, 1892:

States and Territories.	Average charge.	States and Territories.	Average charge.	
Maine New Hampshire Vermont Massachusetts Rhode Island Connecticut New York New Jersey Pennsylvania Delaware Maryland Dirignia West Virginia North Carolina South Carolina Heorgia Florida Alabama Mississippi Louisiana Levasa Arkansas Kennessee	Per cent 01 . 08 . 03 . 004 . 0015 . 01 . 03 . 002 . 007 . 01 . 04 . 06 . 07 . 09 . 08 . 14 . 01 . 12 . 12 . 12 . 12 . 05 . 13 . 09 . 03	Ohio Indiana Illinois Michigan Wisconsin Iowa Minnesota Kansas Nebraska Nevada Oregon Colorado Utah Idaho Montana Wyoming New Mexico North Dakota South Dakota Washington Arizona California Oklahoma Territory Indian Territory	Per cent.	

In order to mark the progress made in banking and emphasize the improvement in the service which railroad, express companies, and telegraph facilities afford and bring into proper prominence the extent to which the bank service to the public has been cheapened, as well as enlarged and improved, I insert here, for the purpose of comparison or contrast, two tables taken from Elliott's Funding System, showing the cost of exchange and the charges which the public were required to pay at the dates therein mentioned.

* New York, resumption, May, 1838. † General resumption, February, 1839. † Resuspension, November, 1839.

The competition for bank accounts takes various forms. paid upon average balances, exceeding certain amounts, in many cases. But the usual method of rewarding depositors for keeping balances is taking their collection items and crediting the same as a cash deposit, and giving them the exchange required in course of business at par. The fact that the average commission received by the banks on exchange sold is three hundredths of 1 per cent shows conclusively what an enormous amount of business is done by the banks gratuitously, or without direct charge. The number of banks reporting exchange drawn this year (3,647) is 10 greater than last year. The volume of exchange drawn is greater by \$212,747,095. If to the \$12,994,959,590 reported by the 3,647 banks we add for the remaining 112 national banks, and then take into consideration the exchange that must have been drawn by the 4,520 private bankers and State banking institutions other than savings banks, whose general condition is set forth in a subsequent portion of this report, we shall have a grand total of exchange drawn by all the banks, approximating \$17,500,000,000. A bank having a balance to settle with another bank does so by remitting a draft upon some bank where it has a balance, usually upon New York City. Drafts on New York are at a premium in most parts of the country, seldom at a discount in any place. Thus by a system of draft remittances the obligation of one interior bank to another drifts into our money centers for collection, goes into the volume of the exchanges, enjoys the economy of every possible offset, and this great volume of business is transacted and all balances adjusted by the actual shipment of a very small amount of money.

SUBSTITUTES FOR MONEY.

The subject of the currency of the country, always one of interest and importance, is especially so at the present time, because of the differences which obtain in the minds of the people in regard to what the currency should be and under what authority it should be created.

It will appear from the statistics given in this report to what extent the use of money is minimized by means of clearing-house organizations in our principal cities, and, for the purpose of showing to what a limited extent actual money enters into the business transactions of the country, I have followed the precedent set by my predecessors in office in 1881 and 1890 and asked all the banks under the supervision of this

Bureau to report all receipts for the 15th day of September, 1892,

separately stated and classified.

My object in this report has been to furnish reliable data from which the public could see and realize how small a percentage of business transactions are represented by actual money, and how impossible it is for the Government to furnish a volume of currency sufficient to meet the wants of the people at all times—that is, in time of general distrust or quasi panic.

Over 90 per cent of all business transactions are done by means of credit. When the public lose confidence and credit is impaired and refused, over 90 per cent of all business transactions are directly affected. It is easy to realize how impossible it is for the remaining 10 per cent of money to carry on the business of the country without mon-

etary stringency and financial distress.

The refusal to extend or continue credit, the demand for payment in money, leaves the actual money or currency of the country, be it \$24 per capita or \$50 per capita, utterly powerless to supply business needs.

Out of the 3,759 banks reporting their condition on July 12, reports were received from only 3,473 in time for insertion in this report. Those failing to report were the newer and less important institutions, hence the data received may be taken as fairly representing the business of the country.

The total receipts of the 3,473 banks on September 15, 1892, were \$331,205,213. September 17, 1890, 3,474 banks reported total receipts of \$327,278,251. The classification is the same and the percentage

slightly varies.

The following table shows the character, amount, and percentage of receipts of national banks on September 15, 1892:

	September	15, 1892.
Character of receipts.	3,473 banks.	Percentage of total receipts.
Gold coin. Silver coin. Sold Treasury certificates. Silver Treasury certificates. Legal tenders. Treasury notes. National-bank notes. United States certificates of deposit for legal tenders. Clecks, etc. Clearing-house certificates Exchanges for clearing house.	1, 372, 054 3, 407, 340 6, 537, 015 8, 531, 514 2, 675, 269 3, 454, 483 2, 210, 000 154, 959, 059 2, 691, 829	1.03 1.97 2.58
Total	331, 205, 213	100.0

From the above table it appears that 9.39 per cent of the transactions were represented by actual cash, the balance by checks, drafts, exchanges, and other substitutes for money.

The following table shows the character, amount, and percentage of receipts of national banks in the central reserve cities, etc., on September 15, 1892:

Character of receipts.	Nev	v York.	Chicago.	St. Louis.	Other reserve cities.	Country.	Total.	Percent-

The following table compares the several cities with the total country banks:

Number of Banks, Total Receipts and Percentage of such Total, of Checks, ETC., RECEIVED IN NEW YORK AND 22 OF THE OTHER PRINCIPAL CITIES, SEP-TEMBER 15, 1892.

Cities.	No. of banks.	Receipts.	Percentage of checks, etc.
New York.	48	\$130, 976, 963	92. 3
Chicago	21	25, 078, 114	94. 5
St. Louis.		2, 390, 070	87.8
Boston		27, 339, 245	93. 1
Albany		1, 175, 496	95. 3
Philadephia		23, 369, 882	93.9
Pittsburg		4, 102, 424	90.0
Baltimore	. 22	4, 836, 972	82.4
Baltimore	. 12	940, 470	66.6
New Orleans	. 9	1, 498, 735	87.1
Louisville	. 9	950, 421	91.8
Cincinnati	. 12	6, 137, 507	94.6
Cleveland		1, 835, 908	92.7
Detroit	. 6	1, 658, 194	91.8
Milwaukee		684, 552	90.9
Kansas City	. 9	4, 168, 021	93.4
St. Joseph		610, 775	91, 6
Omaha		3, 190, 258	95.7
Brooklyn	. 4	1, 124, 720	81.5
St. Paul	. 5	2, 382, 940	97.0
Minneapolis		2, 195, 787	96. €
San Francisco		510, 393	83.3
Des Moines	3	333, 440	88.4
Total	281	116, 514, 324	92. 7
Total all cities	329	247, 491, 287	92. 5
Banks elsewhere		83, 713, 926	84.9
Total United States	3, 473	331, 205, 213	90.6

It will be noted that 74.72 per cent of the total receipts are reported by the 329 city banks, showing an increase of over 2 per cent by the country banks and a corresponding loss by the city banks, as compared with 1890, thus indicating a greater percentage of growth by the county banks.

In order to facilitate comparison the following table is given comparing the data obtained for September 15, 1892, with both July 1 and September 17, 1890, showing the proportions of gold coin, silver coin, paper money, and checks and drafts, including clearing-house certificates, to the total receipts in New York City, in other reserve cities, and in banks elsewhere, separately, and also the proportions for the

United States:

JULY 1, 1890.

In order to further facilitate comparison, a series of tables has been prepared, the first of which shows the amounts received by banks located in the city of New York on each of the five dates, June 30 and September 17, 1881, July 1 and September 17, 1890, and September 15, 1892, separately stating gold coin, silver coin, paper currency, and checks and drafts:

, T. T. J. C.	June 30, 1	1881.	September 1	7, 1881.	July 1, 1	890.
New York City.	48 bank	.s.	48 banl	rs.	47 bank	8.
Gold coin	\$460, 994 15, 997 1, 706, 604 165, 254, 164 167, 437, 759	Per ct	\$905, 588 7, 857 1, 071, 316 163, 208, 586 165; 193, 347	Per ct54 .01 .65 .98.80	\$140, 574 32, 758 6, 396, 749 159, 353, 301 165, 923, 382	Per ct. .08 .02 3.86 96.04
New York Cit	v		September 1	7, 1890.	September 1	5, 1892.
Now Total Oil,	,	-	47 banl	.8.	48 bank	8.
Gold coin			\$70, 173 20, 948 5, 174, 467 115, 185, 884	Per ct. . 05 . 02 4. 29 95. 64	\$87, 636 50, 331 9, 863, 806 120, 975, 190	Per ct. . 07 . 04 7. 53 92. 36
Total			120, 451, 472	100,00	130, 976, 963	100.00

The changes indicate a marked increase in the amount of paper currency received, the extremes being represented by .65 per cent on September 17, 1881, and 7.53 per cent on September 15, 1892. The decrease in gold coin is more marked than in the increase in silver.

The diminished proportion of receipts in checks and drafts is very remarkable, the average per cent for the two days in 1881 being 2.91

per cent greater than for the average of the two days in 1890; September 15, 1892, is 3.28 less than September 17, 1890.

Another fact which attracts attention is that the receipts of the forty-seven banks on July 1, 1890, are very nearly the same in the aggregate as those reported by forty-eight banks on September 17, 1881, and slightly less than for June 30, 1881. The receipts for September 17, 1890, show a very marked falling off in amount, but the percentages differ very slightly from those shown on July 1, 1890. The increase in paper currency (3.24) nearly equals the decrease in checks, as shown September 15, 1892. The receipts of the banks in all reserve cities, exclusive of New York, similarly arranged, appear below:

PERCENTAGE OF TOTAL RECEIPTS BY ALL BANKS.

Banks in four principal cities and elsewhere.	June 30, 1881.	September 17, 1881.	July 1, 1890.	September 17, 1890.	September 15, 1892.
New York Boston Philadelphia Chicago Average of four cities Other reserve cities Average of all reserve cities All other banks	11. 62 6. 34 2. 86 19. 91 6. 26	6.04	39. 34 10. 30 9. 03 5. 78 16. 11 13. 73 3. 55 21. 82	36. 80 8. 11 7. 11 6. 92 14. 74 14. 73 3. 35 26. 33	39. 55 8. 23 7. 07 7. 57 15. 60 12. 30 3. 35 25. 28

The most conspicuous change to be noted in the above table is the increase in the percentage of country banks from 14.11, June 30, 1881, to 25.28 on September 15, 1892.

The variation in the percentage of the different kinds of money, checks, and drafts received, as shown in the statistics for September 15, 1892. do not essentially vary from those of 1890 and 1881. They fully con-There has been firm the general character of the banks' transactions. a noted decrease in the amount of national-bank notes received and a corresponding increase in silver certificates and Treasury notes, caused by the retirement of national-bank circulation and its supplanting by money issued directly by the Government. The percentage of checks and drafts in New York in September, 1881, was 98.80; in September, 1890, 95.64, and in September, 1892, it was 92.36, showing a decrease for each of the three years reported, and a corresponding increase in the amount of cash received by the banks over their counters, which brings the cash receipts of the banks in the city of New York very near to the average of the whole country. The average percentage for all other reserve cities shows no material change.

IMPRUDENT METHODS.

The management of the national banks, as a whole, is entitled to the highest commendation for efficiency and conservatism. Banks that were disastrously affected, by continual crop failures, in certain sections of he country, are realizing the benefit of last year's bountiful harvest, and when their patrons realize upon this year's crop it is confidently expected that their condition will be made satisfactory. maxim that disaster usually overtakes any business when too much extended applies equally to banking, and syndicate banking illustrates Where the same parties organize a series of banks it usually transpires that they are not seeking investment for their own capital, but seeking the capital of others to invest. Such banks afford unusual facilities for "kiting," and it is with this class that much trouble is experienced. The competition for bank accounts among banks in re-The competition for bank accounts among banks in reserve cities is so intense that "promoters" find it easy to establish a bank, open an account with their reserve agent bank in some city, and the president or cashier secures from such reserve agent bank a loan upon his stock as collateral. By opening several such accounts the entire stock in some instances is used as collateral, and these "promoters" need but the 10 or 20 per cent margin required (in other words, \$5,000 or \$10,000) in order to start a bank. The opening of such accounts and making of such loans are coincident in point of time, or so nearly so that the creditor bank must know that they are furnishing capital with which to float the new enterprise. This results in organizing many banks where they are not needed, and are too frequently attended by loss to all parties connected with the enterprise.

Another practice that is made possible only by the assent of creditor banks, is borrowing money on certificates of deposit. A country bank wants to borrow money, issues its certificate of deposit, either time or demand, in favor of the city correspondent, and sends the same forward, accompanied by bills receivable as collateral, and requests the loan, which is granted. As a result, the country bank adds to its liabilities by increasing the amount due depositors, and adds to its assets by increasing the amount due from banks, and its published report of condition shows no bills payable. In other words, does not show the true condition of the bank. It is perfectly legitimate and proper for a bank to rediscount its receivables or borrow money, and all interior banks do at certain seasons of the year, when crops are being moved, for instance. Whatever the form of instrument used in borrowing money,

it is a bill payable and should be so reported. Reserve banks can aid the cause of good banking by requiring notes instead of certificates of deposit. Happily this practice is rapidly diminishing.

DIRECTORS AND OFFICERS.

The statute provides that five or more persons may organize a national bank. When it is fully organized and all preliminary requirements have been complied with, the Comptroller issues his certificate of authorization to commence the business of banking. The management of the bank is vested in a board of direction, who act through their executive officers, president and cashier. The common and statute law define their powers and prescribe the range and limits within which they may do business. Shareholders invest their money because of their faith in the efficiency of the management, their ability to acquire business, and successfully and profitably to manage it. It is a business venture on the part of the shareholders, with which the Government has no more to do and no more solicitude than it has with the purchase of a farm or stock in a manufacturing enterprise. The shareholders elect the board of direction, and through such board manage their Hence for them to claim protection, through Government control, would be to claim protection against their own acts. But these banks issue notes which circulate as money, and it being the duty of the Government to provide and regulate a circulating medium for the people, the Government examines and supervises these banks to see that all laws in respect to circulation are fully complied with.

This is apparently all that was originally contemplated as to national banks. But these banks furnish the instrumentality of exchange—the means of collection and payment of debts. They become large depositaries of the people's money (\$1,765,422,983.68 at date of last report), by means of which their business is largely transacted. They are so intimately connected with business transactions and their soundness so essential to business prosperity that governmental control has gone one step further and seeks to protect the public against loss—to protect a bank's creditors. To this end all shareholders in national banks are liable to an assessment for the purpose of paying creditors, to an amount equal to their stock holdings. Thus the entire capital stock, plus an assessment for an equal amount, becomes a guaranty of the faithfulness of the direction. The function of the Government is to restrain, to insure good banking, by enforcing the prohibitions against unsafe practices, which the law provides. The affirmative action of the banks in their competition for business is left to the enterprise of their managers, prompted by the desires of shareholders for dividends.

Directors give direction and control to the business of a bank, accept or reject credits, and should understand its general condition. The detailed workings of the banks must be intrusted to the officers and employés. We can have nothing better than men. Men make our laws and men enforce them. Men manage our banks. No matter how elaborate the system, how numerous the checks upon error or upon wrongdoing, or however perfect the machinery, the machinery must be set in motion and the system be enforced by men. There is in every system a point where good or ill results depend upon the character of the men in charge. If an engineer wants to ditch his train he can do so. If the president or cashier of a bank wants to rob it, he can. Well-devised systems may make it difficult. Efficient supervision may make it dangerous. The law may punish and risk thus be reduced to a minimum,

but nothing can prevent a dishonest man in charge from mismanaging. Hence the chief and most important duty of directors is to select officers of character as well as experience and ability. They can best protect themselves and best serve the public by so doing. Our worst bank failures reveal criminal conduct on the part of the directors, or neglect of duty approximating criminality. Serious as this defect is, its correction by legislation involves a counter danger. Legislation aimed at a few banks affects all.

In our large cities it is very difficult to get the most desirable men to act as directors. Those most actively engaged in business are the best judges of credit, can least afford to give attention to the duties of the office, and would most readily decline to serve. Legislation increasing the financial responsibility of a rectors for losses to creditors would depreciate the character of boards of direction and render the task of getting good, responsible men more difficult.

There is no reason why a director should not borrow money of his bank upon the same terms and conditions that other patrons are accommodated. There is every reason why he should not take advantage of his position to secure better rates or greater accommodations than his bank equities entitle him to. Officers of a bank should not be allowed to borrow money by overdrawing their accounts, by putting tickets in the cash, by discounting their own notes, or by discounting their business paper, or in any way except by application to the board of directors; and a law regulating such loans would be a wise enactment.

EXCESSIVE LOANS.

Section 5200 United States Revised Statutes reads as follows:

The total liabilities to any association, of any person, or of any company, corporation, or firm for money borrowed, including, in the liabilities of a company or firm, the liabilities of the several members thereof, shall at no time exceed one-tenth part of the amount of the capital stock of such association actually paid in. But the discount of bills of exchange drawn in good faith against actually existing values and the discount of commercial or business paper actually owned by the person negotiating the same shall not be considered as money borrowed.

As the volume of business has increased the magnitude of individual transactions has proportionately increased, in fact the concentration of capital under single management, by means of large corporations and by combinations, has been phenomenal. The natural economies attendant upon wholesale business, the lower rates of transportation and facilities of distribution, which location at metropolitan and railroad centers insures, is fast driving the small manufacturers out of business and concentrating business in metropolitan centers. All this increases the magnitude of separate transactions. Hence if 10 per cent of the capital stock was a proper limit to individual loans in 1864, the percentage of limitation should now be increased in our larger cities.

There is another important reason for such an increase. In the "sixties" banks did business upon their capital, supplied the wants of their customers, and earned their dividends with the money which shareholders supplied. Now, capital is made just sufficient to command public confidence. Usually a large surplus is accumulated, but the business is done upon depositors' money. Every symmetrical and well-managed business has its flush season, when its bank account should show a good balance and its want season, when it legitimately calls upon its bank for funds. Thus the balances of certain industries supply the wants of others and large bank capital is not required. Sur-

plus belongs to the shareholders, and, aside from statutory definition, is as much capital as the money originally paid in by shareholders. The section quoted should at least be amended so as to read, "one-tenth of the capital and surplus." It should be noted that many banks, upon advice of counsel, insist that "surplus" is "capital" within the meaning of said section.

In addition to including surplus with capital, as noted above, an exception to the one tenth limit should be made in favor of temporary

loans, well secured with collateral, in our largest cities.

In my judgment, the limit to 10 per cent of capital and surplus is none too small for rural and interior banks. The above section may be amended as to the large cities, so as to conform to the necessities of business and still be in strict accord with the requirements of conserv-

ative banking.

When so amended, there would be no more wholesome provision of the banking law, for, while there are instances where banks with well-distributed assets have failed, caused by repeated crop failures or extreme monetary stringency, or some cause affecting the whole community, the common history of bank failures reveals as the superinducing cause the concentration of the bank's funds in a few hands or in a few interests.

Experience has demonstrated that a strict compliance with the 10 per cent limit is impracticable in our large cities, for the reason that it is contrary to the necessities of business. A bank with a million capital could loan but \$100,000 to any individual, company, corporation, or firm. Single business transactions involving a larger amount are of frequent occurrence, and to divide one transaction between two or more banks would prove troublesome and is not demanded by conservative banking. For instance, a draft may be made against one consignment of grain for \$200,000, and the consignee needs to borrow \$150,000 upon the bill of lading as security. The security can not be divided; neither can the loan, in a practical sense.

Bank managers can not always gauge the business wants of the day, and frequently find, late in the day, that they have more money than their required reserve. Rather than carry it over night in their vaults they make over night loans as best they can. This necessarily results in loans in excess of the 10 per cent limit. A lower rate of interest is usually realized on such loans than obtains earlier in the day, and the

loan is expected to be, and usually is, paid the next day.

The penalty for the violation of this law—the commencement of an action by the Comptroller of the Currency, through the Attorney-General, to forfeit the bank's charter—is so severe as to render it nugatory. It was doubtless made severe to prevent vexatious interference with the affairs of the banks. It is difficult to fix a cast iron rule, with inflexible penalties, without doing more harm than good. During the quasi panic of 1890 many perfectly solvent firms were embarrassed for want of money, and but for indulgences and aid upon the part of the banks must have failed. They already had their full complement of bank accommodation. The banks found upon investigation that they were solvent, and, taking security, gave them additional accommodations, thus protecting themselves, saving these concerns from failure, and relieving the public generally from loss and injury, which each successive failure at such a time entails. Like other business, banking has its emergencies, and when they arise discretion should be allowed to act without incurring criminal liability.

Officers and directors are not apt to allow persons with whom they

are not financially interested to abuse the bank. Where loans to directors or officers are well secured there is no way of reaching such a case, as the law now exists, and, so far as safety is concerned, perhaps no In such case, if the loans are not well secured and the examiner and Comptroller are not satisfied that they are good, the bank could be required to charge them off and make an assessment upon their shareholders to make good the impairment, if impairment existed, or appoint a receiver, in case the capital was thus wiped out. course would involve a question of credit and values sometimes difficult to determine, and it frequently happens that the shareholders need protection rather than punishment. The circumstances attending loans made in excess of the 10 per cent limit are so various and diverse that they defy classification. It is difficult to frame a general rule that will correct the evil resulting therefrom and not itself be productive of bad Our country is so large and the contrast between city and results. country—between the immense volume and varied transactions of the one and the lesser volume and more uniform transactions of the otherso great, that a uniform law that can wisely be applied to both must of necessity possess wide latitude.

I think this whole difficulty, as well as others that arise, might be substantially reached if the Comptroller, with the approval of the Secretary of the Treasury, were given power, after a hearing, to remove bank officers and directors for violations of law, leaving the vacancy to be filled in the regular way. It is a power that would be seldom exercised. The existence of the power would deter many who now

keep the letter, only to violate the spirit of the law.

EXAMINERS.

There are in the employ of this Bureau forty two examiners. The position is responsible and honorable, and calls for the exercise of energy, tact, discretion, and firmness, as well as business experience and technical knowledge of banking. In order that he may discharge his duties with ease and confidence, familiarity with the mechanism of banking is indispensable. Our best examiners are those in the prime of life, who work with energy and fidelity, hoping to demonstrate their ability and worth, thereby securing for themselves a desirable and permanent position in some good bank. This incentive and this ambition insures the best work. As a body they are competent, conscientious, painstaking, and fearless in the discharge of their duties. They enjoy the full confidence of the Comptroller, and constitute his main reliance in all matters of discipline, and hence it is the purpose of this office to insist upon the highest standard of efficiency.

A bank examiner may own property and have interests that require the usual banking facilities and be entitled to such accommodation as he would receive were he not an examiner. But unsecured loans to an examiner, which, but for his position, would likely be refused, are wrong and destroy confidence in his work. No relation should exist that would tend to restrain an examiner's freedom in making criticisms or impair the force of his criticism when made. But criticism does not necessarily finean pointing out wrongdoing. It means the comment which an expert business man would naturally make upon the business under review. An examiner's work is not espionage. The national banks are the backbone of the financial system of the country, the conservators of public credit, officered by men of the highest integrity, who are striving to earn dividends for their shareholders by fostering

and building up the business of their clients as well as their banks. The exceptions to such honorable conduct only prove the rule. Examiners should work with the banks, with a disposition to aid in every proper way. They should get the confidence of bank officers by demon-

strating their entire fitness for the work intrusted to them.

While this Bureau accepts any system of doing business which is accurate and proves; still examiners, with their facilities for observation, should note the best methods and be able to render valuable aid by suggesting improvements. While the subject of credits is to be delicately treated, the knowledge an examiner acquires will enable him to make valuable suggestions on this subject. The banks pay for the examiner's services and are entitled to his good offices. The best service an examiner can render a bank, as well as this Bureau, is by doing thorough and painstaking work. He should obtain possession of the bank's assets and retain the same until his work is completed. In the smaller banks the securities, loans, and discounts should be placed in front of the examiner when he commences on the cash. In the larger banks, where more than one day is required to complete the work, he should obtain and keep possession of the assets by means of keys or He should know that no change is made in the assets, except in the regular course of business. Nothing should be done on the installment plan. Instead of objecting to this, the better the bank the more acceptable will it prove.

It is a satisfaction to a bank to have a competent examiner in absolute possession of their assets until the same are proven and he is able to assure them that the items for which their books call are all there. An inventory is the foundation of all examinations. All the items of assets are aggregated under their appropriate bookkeeping heads to prove the asset side of the bank. This is but half the work. Every item of liability should be inventoried and aggregated to prove the liability side. Every individual and every bank balance should be taken off and every liability account proved. An examination that does not include this is imperfect. Experience shows that defalcations

are oftenest hidden in the liability side of the bank.

Examiners are given detailed instructions, which, if fully complied with, would render their work very thorough and searching. The efficiency of the force is constantly improving, and it is alike for the interest of the banks and this Bureau to have it attain the highest standard of excellence. This office will be pleased to have the coöperation of and receive suggestions from bank officers upon this subject.

COMPARATIVE STATEMENTS OF THE NATIONAL BANKS.

The resources and liabilities of the national banks for fourteen years, at nearly corresponding dates, from 1879 to 1892, inclusive, are exhibited in the following table, and the same information with respect to preceding years will be found in the Appendix,* page 129.

^{*} See second foot note, page 314.

It is noticeable that the resources of the system were increased nearly \$300,000,000 during the past year notwithstanding the fact that seventy banks went into voluntary liquidation or became insolvent, such increase being strongly in contrast with that of any previous year covered by the statement. Proportional increase is common to nearly all the items, the principal decrease occurring in clearing-house exchanges.

The following table presents an abstract of the resources and liabilities of the national banks at the close of business on September 30, 1892, the condition of the banks in New York City, in the three central reserve cities, in other reserve cities, and of country banks shown

separately:

The capital, surplus, undivided profits, and deposits amounted to \$995,542,378 on January 1, 1866, and on September 30, 1892, were \$2,792,520,177. The loans and discounts have more than quadrupled, the number of active banks having increased from 1,582 to 3,773. holdings of bonds have decreased from \$712,437,900, the maximum, to \$183,439,550, the latter amount representing an increase of \$8,532,000 over the preceding year, resulting from accessions of new banks.

The specie held by the banks reached the highest point September

30, 1892, and amounted to \$209,116,379.

The following statement shows by comparison the percentages of loans and discounts, United States bonds, and specie to the aggregate fund of the banks, composed of capital, surplus, undivided profits, circulation, and deposits.

The percentage of circulation to capital, surplus, and undivided profits has decreased from about 45 per cent in 1866 to 14 per cent in

1892.

EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS.

Under the provisions of the act of July 12, 1882, eighty-seven associations applied for and obtained an extension of their corporate existence during the past year. The following table shows the number and capital of all extended banks and their geographical location:

States and Territories.	No. of banks.	Capital.	States and Territories.	No. of banks.	Capital-
Alabama Arkansas California Colorado Connecticut Delaware District of Columbia Georgia Illinois Indiana Iowa Idaho Kansas	6 2 2 5 73 111 5 8 79 45 46 1	\$885, 000 350, 000 2, 000, 000 960, 000 22, 450, 820 1, 503, 185 1, 277, 000 1, 750, 000 9, 693, 000 5, 579, 000 4, 120, 000 825, 000	Montana Nebraska New Hampshire New Jersey New York North Carolina South Carolina Ohio Oregon Pennsylvania Rhode Island Tennessee Texas	1 8 38 53 224 4 8 101 174 59 111	\$500,000 1,400,000 4,905,000 10,783,350 72,772,460 850,000 1,460,000 17,169,000 45,954,390 19,959,800 2,260,000 675,000

CIRCULATING NOTES.

The actual circulation outstanding on September 30, 1892, for which the banks were responsible was \$147,191,593, this amount being exclusive of \$25,595,167 also in circulation but represented by lawful money deposited by the banks for redemption of notes whenever presented to the Treasurer of the United States.

The minimum deposit of bonds required of the 3,773 national banks in operation September 30, 1892, was \$107,064,207, upon which only \$96,357,787 of national bank circulation could be issued. These banks held on September 30, \$163,275,300 of bonds, and were actually responsible for \$50,589,983 of circulation more than the minimum. It is not imperative upon banks to take circulation, and a few do not avail themselves of the privilege.

Of the 3,773 banks 2,737 have a capital not exceeding \$150,000 nor less than \$50,000, which is the lowest amount any bank in the system may have, the aggregate capital amounting to \$221,057,830. The remaining 1,036 have a capital of over \$150,000 each, the aggregate

amounting to \$465,515,185. If an amount of bonds equal to the total capital were deposited to secure circulation the whole body of banks might have a circulation amounting to \$617,915,714, or \$521,557,927 more than the present minimum. A table in the Appendix,* page 148, shows by States and geographical divisions this information in detail.

In preceding reports a table was presented showing what advantage was taken by newly organized banks of the provisions of section 8 of the act of July 12, 1882, fixing a minimum requirement with respect to the amount of bonds to be deposited. The percentage of excess is now so small that a perpetuation of the table does not seem necessary. During the year ended June 30, 1892, 177 banks were organized and commenced business; 106 having a capital of \$50,000 each, aggregating \$5,300,000; 55 with a capital of over \$50,000 and not exceeding \$5,150,000, aggregating \$5,430,000; and 16 with an aggregate capital of \$5,150,000. Only 4 of the 161 banks with a capital of \$150,000 or under deposited bonds in excess of the requirement. The 16 banks with a capital of over \$150,000 each, deposited the exact amount of bonds required.

The following table shows by comparison for nine years the amounts of lawful money deposited and the consequent decrease or increase of

DECREASE OF INCREASE OF NATIONAL-BANK CIRCULATION DURING EACH OF THE YEARS ENDED OCTOBER 31, FROM 1884 TO 1892, INCLUSIVE, AND THE AMOUNT

circulation:

National Bank of Cock	eysville, Md	50,000	12, 50

SECURITY FOR CIRCULATING NOTES.

The security for circulating notes of national banks is limited to United States registered bonds bearing interest, and the following table shows the amount of such bonds held by the Treasurer of the United States as security on June 30 of each year from 1865 to 1892, inclusive, and the amount owned and held by the banks for other purposes, including those deposited with the Treasurer to secure public deposits:

	United	l States bonds l	neld as securi	ty for circula	tion.	United States bonds held

^{*} Three and one-half per cent.

A table will be found in the Appendix,* page 130, showing on the first day of each month, from January 1, 1871, to November 1, 1892, the amount of authorized capital stock of the national banks, the amount of bonds on deposit to secure circulation, the amount of circulation secured by the bonds, the amount of lawful money deposited to redeem outstanding circulation, and the total amount outstanding, including notes of gold banks.

^{*} See second footnote, page 314.

INTEREST-BEARING FUNDED DEBT OF THE UNITED STATES.

The public debt reached the maximum August 31, 1865, and amounted to \$2,844,649,626. The noninterest-bearing obligations amounted to \$2,844,649,626. The noninterest-bearing obligations amounted to \$461,616,311, the interest-bearing debt being \$2,383,033,315. On October 31, 1892, the interest-bearing debt amounted to \$649,655,532.

The classes of bonds available as security for the circulating notes of national banks are shown in the following table, dates of authorizing acts, maturity of bonds, and rates of interest also being given:

BONDED DEBT AT DATES NAMED.

^{*}Funded loan 1891; authorizing act July 14, 1870, and January 20, 1871; date of maturity, 1891.
†Funded loan 1907; authorizing act July 14, 1870, and January 20, 1871; date of maturity, 1891.
†Pacific railroad bonds; authorizing act July 1, 1862, and July 2, 1864; date of maturity, 1895 to 1899.
The Navy pension fund, amounting to \$14,000,000 in 3 per cents, the interest upon which is applied to the payment of naval pensions exclusively, and \$78,320 of refunding certificates are not included in the table.

MARKET PRICES OF UNITED STATES BONDS.

The following statement prepared by the Actuary of the Treasury exhibits the market prices of United States bonds during the year covered by this report. The 2 per cents have steadily remained at par, with slight fractional increase during the month of October. The fluctuations in 4 per cents were not marked, the price with few exceptions having gradually declined about 2 per cent.

INVESTMENT VALUE OF UNITED STATES BONDS.

The investment value of United States bonds increases as the relative market price declines, and the following statement, also prepared by the actuary of the Treasury, exhibits the fluctuations in price and investment value of the 4 per cents from 1885 to 1892 inclusive. A comparison will show the exact increase or decrease in investment value for each quarterly period. The Government was not a purchaser of bonds during the year, but of \$4,601,500 of 4½ per cents, which were outstanding on November 1, 1891, and on which interest had ceased at date of maturity, all but \$983,800 were presented for redemption. All of this class of bonds which were held by the national banks as security for their circulation have been withdrawn. The total withdrawals from the three classes of bonds available as security for circulation during the year were \$4,387,600. Of this amount \$807,950 was deposited in substitution. Table on page 52 shows the net increase of bonds deposited during the year.

Total					1, 521, 437, 753. 75	172, 063, 931. 25	

The apparent discrepancy in the amount of circulating notes outstanding October 31, which will appear when the several statements in this report are compared, is explained as follows:

In the table on this page notes of national gold banks amounting to \$104,952 are not included, and the table on page 51 includes \$263,263, representing notes of other banks redeemed and destroyed, to be reissued.

The total issues of incomplete currency during the year are shown by the yault account, as follows:

National-bank currency in yault October 31, 1891	\$43, 035, 720
Amount received from the Bureau of Engraving and Printing during the year ended October 31, 1892	53, 854, 670
Total	96, 890, 390
1,040,040	51, 596, 990
Balance in vault October 31, 1892	45, 293, 400

The following table shows the amount of new currency issued to replace notes redeemed and destroyed under the provisions of the act of June 20, 1874, the amount issued to replace notes redeemed by lawful money deposited under the act of July 12, 1882, and the amount issued to both old and new banks upon bonds deposited for the purpose of obtaining additional circulation. The table also shows the amount of circulation redeemed under the act of June 20, 1874, establishing the National-bank Redemption Agency of the Treasury at Washington:

Table Showing by States the Amount of "Additional Circulation" Issued and Retired during the Year ended October 31, 1892, and Total Amount Issued and Retired since June 20, 1874.

Notes of gold banks are not included in the above table.

Of the total circulation issued as shown by the foregoing table, \$2,867,620 were issued to banks organized during the year or just prior to November 1, 1891, and \$10,856,244 to other banks which deposited bonds for the purpose of increasing their circulation. The provisions of law relating to the redemption of national bank circulation remain as heretofore, a redemption fund of 5 per cent on the total circulation being maintained with the Treasurer of the United States, and a pro rata annual assessment paid as the cost of redemption, amounting to \$1.464 on each \$1,000 during the year ended June 30, 1892.

During the past year the receipts of the National-bank Redemption Agency amounted to \$70,434,334, of which amount \$31,218,977, or 44 per cent, was received from New York City. The amount received from Boston was \$8,475,354; from Philadelphia, \$5,053,891; from Chicago, \$5,052,376; from Cincinnati, \$2,138,337; from Baltimore, \$2,100,453; from St. Louis, \$1,224,285; from New Orleans, \$936,217;

from Providence, \$924,501; and from Pittsburg, \$495,629.

Of the total amount received during the year, notes representing \$18,583,320 were fit for circulation and returned to the banks originally

issuing them.

The following table exhibits the amount of national-bank notes received monthly for redemption by the Comptroller of the Currency during the year ended October 31, 1892, and the amount received during the same period at the redemption agency of the Treasury, together with the total amount received since the passage of the act of June 20, 1874:

REDEMPTION OF NOTES OF BANKS REDUCING CIRCULATION. OF THOSE IN VOLUNTARY LIQUIDATION, AND OF FAILED BANKS, UNDER THE ACT OF JUNE 20, 1874, AND OF BANKS THE CORPORATE EXISTENCE OF WHICH HAS BEEN EXTENDED UNDER THE ACT OF JULY 12, 1882.

No change has occurred in the provisions of law with respect to a reduction of the outstanding circulation of an association upon the deposit of lawful money with the Treasurer of the United States in a sum not less than \$9,000, nor in the provisions of the act of July 12, 1882, requiring a deposit of lawful money for the retirement of the old circulation of such banks within a period of three years. Under these provisions of law \$458,024,277 of lawful money has been deposited with the Treasurer on account of liquidating and insolvent banks, including \$2,663,720 deposited for the redemption of notes of national gold banks and \$97,714,449 for the redemption of notes of national gold banks act of July 12, 1882. During the year ended October 31, 1892, \$1,063,300 in lawful money was deposited by banks reducing circulation, \$1,341,880 by banks in voluntary liquidation, \$12,328 by extended banks retiring old circulation, and \$761,820 on account of insolvent banks, making a total of \$3,179,328.

The total amount deposited prior to and under the acts of June 20, 1874, and July 12, 1882, is \$472,269,087, and of this \$73,792,900 was deposited by banks in liquidation. Deducting the amount of circulating notes redeemed and destroyed without reissue, which was \$447,078,004, from the total deposit, there remained in the hands of the Treasurer, on October 31, 1892, \$25,191,083 in lawful money for the redemption and retirement of national-bank circulation, including \$104,952 for the redemption of outstanding circulating notes of national gold banks.

Prior to June 20, 1874, \$10,431,135 of national bank notes were redeemed and destroyed without reissue, and \$436,646,869 have been so retired since that date. In the latter amount are included \$2,558,768 of the notes of national gold banks and \$82,081,203 of notes of associations which extended their corporate existence.

Under the act approved February 14, 1880, authorizing the conversion of gold banks and extending to them all the privileges applicable

to any national-banking association, the national gold banks either availed themselves of the opportunity thus afforded to convert or passed out of existence. As stated elsewhere, there still remains on deposit with the Treasurer of the United States in lawful money \$104,952 for the redemption of notes issued by national gold banks which are still outstanding.

TAX UPON CIRCULATION, REDEMPTION CHARGES, AND ASSESSMENTS.

No change has occurred in the provisions of law requiring national banks to pay a semi annual duty of one half of 1 per cent upon the average amount of their notes in circulation, and expenses incident to the redemption of such notes annually determined by the Treasurer of the United States, and a pro rata assessment levied upon the banks, based upon the exact status of each with respect to the amount redeemed. The banks pay the fees allowed to national bank examiners, as ascertained under the law, by means of drafts forwarded to the Comptroller, who in turn remits the proceeds to the examiners as their reports are received and accounts rendered. The amounts collected from the banks during the fiscal year from these sources and for the expense connected with the preparation of plates for circulation were as follows:

Semi-annual duty on circulation	\$1, 331, 287. 26
Cost of redemption of notes by the United States Treasurer	100, 593, 70
Assessment for cost of plates, new banks	15, 700.00
Assessment for cost of plates, extended banks	8, 100.00
Assessment for examiners' fees (sec. 5240, Revised Statutes)	161, 983. 68
· · · · · · · · · · · · · · · · · · ·	

The following table is a comparative statement of taxes assessed as semi-annual duty on circulation, cost of redemption of notes, cost of plates, and examiners' fees for the past ten years:

Years.	Semi-annual duty on cir- culation.	Cost of redemption of notes by the United States Treasurer.	Assessment for cost of plates, new banks.	Assessment for cost of plates, ex- tended banks.	Assessment for exam- iners' fees (sec. 5240, R. S.).	Total.

In the preceding tables the specie held represents the aggregate of gold and silver coin, Treasurer's certificates, and clearing house gold certificates. A table will be found in the Appendix,* page 153, showing the amount of each kind of coin and certificates held by the banks in each State and reserve city in October, 1888, September, 1889, October, 1890, September, 1891, and September, 1892.

FAILED BANKS.

Seventeen national banks, with an aggregate capital of \$2,450,000, were placed in the hands of receivers during the year, as shown by the following statement. In one case creditors have received dividends amounting to principal and interest in full; in another case principal in full; in another, 85 per cent; in another, 70 per cent; in two cases, 50 per cent; in five cases, 30 per cent; in two cases, 25 per cent, and in one case 20 per cent.

^{*} See second footnote, page 314.

CAUSES OF FAILURE.

The doors of the Maverick National Bank of Boston, Mass., were closed on the last day of the report year (October 31, 1891, too late to be included in the annual report) by the national bank examiner, acting under instructions from the Comptroller of the Currency. For some months the condition of the bank had been a source of anxiety to the Comptroller on account of excessive loans to certain of its directors. The aggravated character of these loans, however, was not revealed to the Comptroller, either through the reports of the examiner or the attested reports of condition. The bank had a large volume of business and did a large collection business throughout the country. Speculative banking and excessive loans to directors for speculative purposes were the causes of failure. Conservatively managed, its volume of business and good will would have possessed very great value. Its assets were easily convertible. The receiver has paid to creditors 85 per cent, and expresses the opinion that an additional dividend will

be paid, not exceeding 5 per cent, dependent upon the result of pending litigation and the amount realized from the assessment upon shareholders. An assessment of 100 per cent has been levied by the Comptroller upon the shareholders of the bank, the amount of collection

appearing in the table on page 224 of the Appendix.*

The doors of the Corry National Bank of Corry, Pa., were closed to business November 7, 1891. The entire management of the bank had been practically confided to the president and cashier, whom it appears were highly respected and enjoyed the full confidence of the community until their disastrous administration of affairs of the bank became known. A good many loans were made in excess of the 10 per cent limitation. False debits were made to other banks, and a corresponding credit given to certain individuals for the purpose of making a showing which would justify the payment of dividends to shareholders. Large rates of interest were paid on certificates of deposit, and the expenses of the bank were extravagant. A large amount of paper of bad character had been kept alive by renewals, interest in many cases being included in the renewals. The discoveries of the examiner, indicating criminal violations of law, were promptly reported to the United States attorney.

An assessment of 100 per cent has been levied by the Comptroller upon the shareholders of the bank, the amount of collection appearing

in table on page 224 of the Appendix.*

Dividends amounting to 50 per cent have been paid to creditors.

The doors of the California National Bank of San Diego, Cal., were not opened after close of business November 11, 1891. The failure was regarded as a great calamity by the local community, and considerable effort was made, in which many creditors joined, to accomplish a resumption of business. Under the peculiar circumstances and in view of repeated assertions in communications to the Comptroller from interested parties that a sufficient cash fund would be made immediately available to restore the impaired capital, as much time was given before the appointment of a receiver as seemed to be consistent with the Comptroller's discretion under the law. When it became known, upon thorough examination, that the entire capital and surplus of the bank had been lost and all efforts to resume had proved futile, the president of the bank, who had personally exerted himself in the interests of resumption of business, committed suicide. The funds of the bank were used to promote local enterprises of a public character involving large sums of money, and during a period characterized by a marked increase in prices and unusual activity in business. Succinctly stated, the president of the bank, in conjunction with one or more directors, at the date of its organization inaugurated schemes or deals in the interest of themselves and the local community which involved large sums of money. The necessary loans were for a time obtained from the Eastern States, but as these matured and demand for payment was made recourse was had to this bank. The local boom collapsed before any of these enterprises became paying investments. At length, the extreme danger to the bank became apparent to the management, and it appears that the president alone was forced to assume the attendant responsibility, and finally being unable to contend with the reduction in deposits and shrinkage in values suspension became inevitable.

An assessment of 100 per cent has been levied by the Comptroller upon the shareholders of the bank, the amount of collection appearing

in table on page 224 of the Appendix.*

Dividends amounting to 30 per cent have been paid to creditors.

The Cheyenne National Bank of Cheyenne, Wyo., closed its doors to business November 13, 1891, a run having been caused by the suspension of the California National Bank of San Diego, Cal. A few days later the cashier committed suicide. The president of the California National Bank of San Diego was likewise the president of the Chevenne National Bank, and the character of management in both cases was almost identical. The personal presence of the president, his correct manner of life, and his energetic attention to business are said to have given him the entire confidence of the community and enabled him to consummate questionable transactions without suspicion. From the first, the funds of the bank were diverted to his use. One common method was to purchase stocks of little or no value, sell them to irresponsible persons, taking notes in payment, which notes he caused to be discounted by this bank. He borrowed money in the Eastern States with which to purchase a controlling interest in the stock of the bank, using this stock as collateral. When demand was made, he would pay the loans with funds belonging to the bank realized upon accommodation paper obtained from his immediate friends. The cashier became a large and irresponsible debtor, and together these officers misappropriated an amount equal to the entire capital of the bank. Many bad loans were made, business was unduly extended, and the management was reckless and extravagant.

Dividends amounting to 25 per cent have been paid to creditors.

The doors of the First National Bank of Wilmington, N. C., were closed by order of the board of directors November 24, 1891. reason given to the public was that the capital had been impaired by heavy losses incurred in previous years, from which the bank could not No dividends had been paid since 1887. After a thorough investigation, the receiver reported that the failure was due to bad loans extending over a number of years, and to peculation and robbery by the cashier, a fugitive from justice. The directors took no interest in the management, and the cashier had been given complete control. A large part of the assets consisted of worthless bills receivable, which had been carried for a long time by renewal. Excessive loans had also False entries were made upon the books to conceal the actual liability from the examiner, and it was found that the cashier had so manipulated the accounts as to successfully postpone the collapse for a considerable length of time. It now appears that the directors were aware to a certain extent of the condition of the bank, but relied upon the hope that it would under most favorable circum-The class of assets relied upon as good at date of stances recover. failure amounted to only about 25 per cent of the whole, and the receiver up to date has been unable to collect more than 15 per cent of

An assessment of 100 per cent has been levied by the Comptroller upon the shareholders of the bank, the amount of collection appearing in table on page 224 of the Appendix.*

Dividends amounting to 30 per cent have been paid to the creditors. The doors of the Huron National Bank of Huron, S. Dak., were closed to business by the national-bank examiner December 18, 1891.

The examiner found that for some time prior to that date the bank-had been in a crippled condition, but thought, with careful and economical management, the affairs could be placed upon a safe footing. The shareholders finally voted to go into voluntary liquidation, but upon the disclosure that a large indebtedness due from the officers and

their friends was not collectible, the Comptroller was compelled under the law to appoint a receiver. It appears that the local community lost confidence in the bank from the fact that the management was supposed to be pecuniarily interested in a very spirited controversy and rivalry that existed between several cities over the location of the capital of the State, and this with other causes tended to make the business of the bank unprofitable. The farming interests in the surrounding country were largely indebted to the bank, and the continued crop failures made the loans almost worthless. It did not appear that there had been criminal violations of law, but it did appear that the suspension was due to bad loans and unremunerative business, which had been unduly extended.

The doors of the First National Bank of Muney, Pa., were closed to business January 11, 1892, by a national bank examiner who had for sometime been in attendance for the purpose of ascertaining the exact condition as to solvency. Criminal violations of law were apparent, and prompt communication was had with the United States attorney. There appeared to be a large shortage in cash as represented by the books of the bank. On the day upon which the examiner closed its doors, the want of public confidence was manifested by a slight run. The causes of failure may be stated as reckless management, incorrect bookkeeping, declaration of dividends that had not been earned, failure to charge off bad debts, and a persistent practice of allowing overdrafts

in large amounts.

Had the management of the bank been good and efficient, the appointment of a receiver would have been unnecessary and the bank might have been put in a sound condition by levying an assessment to

make good the impairment of capital.

No assessment was levied upon the shareholders as the assets of the bank were sufficient to pay creditors in full. The remaining assets have been turned over to an agent selected by the shareholders and the trust closed, principal and interest having been paid in full on all

proved claims.

The doors of the First National Bank of Downs, Kans., were closed January 23, 1892, by the national-bank examiner, upon discovering that the bank was insolvent. Bad management, frequent irregularities, and indications of collusion to violate the law were apparent, and the information was promptly reported to the United States attorney for that district. On or about the date of organization the assets of another bank were purchased, a considerable portion of which proved to be worthless; accommodation notes were taken to cover up large loans to certain individuals, the paper representing the actual loans being held as collateral. The management was extravagant and the cashier was reckless, his personal reputation being such as not to inspire confidence. Before the doors were closed an effort was made by some of the shareholders to change the management and restore the capital by voluntary assessment, but a large part of the stock being held by nonresidents the attempt was unsuccessful and suspension became inevitable.

A dividend of 25 per cent has been declared to creditors.

The Bell County National Bank of Temple, Tex., was closed by the national bank examiner January 30, 1892. The causes necessitating this action were numerous; bad and excessive loans, violations of correct business principles, and the indifference of the directors, permitting the president and cashier to dominate the board, made it comparatively easy to wreck the bank. These officers permitted no interference, and would not allow a duly appointed finance committee to

perform its duty. Many of the shareholders were nonresidents and gave their proxies to the president and cashier, who were thus able to elect such directors as they chose. By means of this power the board was reduced in number in order to dispose of a few directors who insisted upon a knowledge of the condition of the bank or were desirous of performing their whole duty. The personal extravagance indulged in by the officers resulted in the discounting of worthless paper prepared for the purpose, the borrowing of money from other banks at high rates of interest, the general welfare of the bank being wholly disregarded. Soon after the receiver took charge, these officers were arrested for violations of law and bound over for trial. The most culpable management was apparent, false entries in the books had been made to conceal misappropriations, and forgery had been resorted to.

Dividends amounting to 30 per cent have been paid to creditors. The doors of the First National Bank of Silver City and the First National Bank of Deming, N. Mex., were closed to business on February 4, 1892. The same person was president of both banks and represented the entire management, the boards of directors practically exercising no control. For several years he had borrowed the funds of the banks on notes of his own and worthless accommodation paper made by relatives, friends, and clerks, until more than the combined capital of the banks had been obtained for investment in speculative enterprises, such as wild lands, cattle ranches, prospective railroad construction, etc. Fraudulent entries were made on the books and dividends not earned regularly paid to the shareholders, who being mostly nonresidents took no other interest in the management. Charges of embezzlement and misappropriation of funds were promptly placed in the hands of the United States attorney.

An assessment of 82 per cent has been levied upon the shareholders of the First National Bank of Deming. Dividends amounting to 25 per cent have been paid to creditors of that bank, and 20 per cent to

the creditors of the First National Bank of Silver City.

The doors of the Lima National Bank of Lima, Ohio, were closed to business March 1, 1892. From the date of its organization the management of the bank continuously provoked criticism by the Comptroller of the Currency for apparent violations of the restrictive provisions The president, possessing considerable wealth and busiof the law. ness sagacity, was the principal promoter of a number of local and foreign enterprises, and diverted the funds of the bank to his individual At times he would crowd paper, based on these outside schemes, into the bank to the almost entire exclusion of other and legitimate Accommodation notes of clerks and other employés were resorted to, until the president's methods became a matter of public noto-The depositors necessarily lost confidence, and deposits were withdrawn to such an extent as to force the bank to rediscount all its good paper. When this crisis was reached an attempt was made to place the bank in voluntary liquidation, but failed because it was impossible at the time to realize from the assets the necessary funds for the prompt payment of creditors. A sharp run, which exhausted nearly all the cash on hand, precipitated its closing.

Dividends amounting to 50 per cent have been paid to creditors.

The doors of the Cherryvale National Bank of Cherryvale, Kans, were closed June 10, 1892, by a national bank examiner acting under instructions from the Comptroller of the Currency. For some time the management of the bank had subjected it to criticism, and upon an examination made in December, 1891, its condition was unsatisfactory and the capital was found to have become impaired. An assessment was

ordered by the Comptroller, the management taking exception, insisting that there was no impairment and requesting a reëxamination. The request was granted, but the result still showing an impaired capital, the Comptroller insisted upon the payment of the assessment, and shortly after the cashier made oath that it had been fully paid. A subsequent examination disclosed the fact that the assessment had not, in fact, been paid, whereupon the examiner was instructed to take charge. The condition of the bank was mainly due to the reckless management of the president, who for his own use discounted worthless accommodation notes. A strenuous effort was made to prevent a receivership by inducing creditors to accept obligations other than cash for their claims. Inasmuch as the assets of the bank were not sufficient to even permit of voluntary liquidation, no proposition other than immediate payment of creditors in full could be entertained. The president and cashier were afterwards arrested for embezzlement, perjury, and false entries in the books, and bound over for trial.

The doors of the First National Bank of Rockwall, Tex., were closed by the national-bank examiner June 11, 1892. A former president of the bank, who was the original promoter, was engaged in wild speculations during his incumbency, and through loans to men of straw, for his own use, absorbed the capital and earnings of the bank. Having accomplished this result, he sought other fields of operation, leaving the bank in such a crippled condition that a new management found it impossible to place it on a solvent footing. The amount of deposits had become insignificant, being at date of closing only \$6,000, so that cur-

rent business could not support the bank.

The doors of the National Bank of Guthrie, Territory of Oklahoma, were closed by its officers June 13, 1892. Certain information having come to the knowledge of the Comptroller, a national-bank examiner had been directed to make an examination. He arrived on the day the bank suspended business, and found that a receiver had been appointed by a Territorial court. It was claimed that creditors had been paid in full, and therefore the Comptroller had no jurisdiction. It appeared that a receiver had been appointed by the court upon a petition presented in the supposed interest of some of the shareholders who were friendly to the management. The Comptroller appointed a receiver, and a demand for possession of the records and assets of the bank was made and refused. The court maintained that it had jurisdiction in the matter, and up to this time the Comptroller has been unable to place a receiver in charge.

The doors of the First National Bank of Erie, Kans., were closed to business June 25, 1892. The failure was due to the payment of exorbitant rates of interest on deposits, and the injudicious manner in which funds of the bank were loaned to officers and directors, who were large borrowers at a lower rate of interest than the bank itself paid for rediscounts. The immediate cause of failure was the large loss on these loans which had been made without proper security. It was developed that the stock held by the officers had been purchased with borrowed money. the stock being pledged as collateral, and that their financial resources

had always been very limited.

On July 5, 1892, the president of the Vincennes National Bank of Vincennes, Ind., committed suicide. The bank had become insolvent. A national-bank examiner was immediately directed to take charge of affairs and closed the bank on the morning of July 7. For some years prior to insolvency a former president and large shareholder of the bank was connected with firms engaged in grain speculations, and it appears that his successor, the late president, was connected with him

in similar speculation. Correspondence was found which connected the president with heavy losses, and it would appear that the cause of failure was his connection with board of trade speculations. Various means were resorted to in using bank funds and considerable ingenuity was exercised in covering up shortages. Successful attempts were made to deceive the national bank examiner, and it is stated to the Comptroller that there was a systematic misappropriation of funds, which was acquiesced in, or known, to some extent by other officers and employés of the bank. In addition to this, large loans were made without proper security and in violation of law. The bank at one time purchased a large block of its own stock, paying a high premium therefor. An administrator was promptly appointed for the estate of the late president, who immediately offered restitution to the fullest possible extent, it being his desire to make as full a settlement as practicable, without reserve and without litigation.

A dividend amounting to 30 per cent has been paid to creditors. The affairs of eight national banks have been closed during the past year and final dividends have been paid to their creditors.

Out of 4,811 national banks organized since February, 1863, 181, or about 3.76 per cent, have been placed in the hauds of receivers. This includes 9 which had previously been placed in liquidation by the shareholders, but upon their failing to pay depositors the Comptroller appointed receivers to wind up their affairs. Of the 181 failed banks 38 have paid creditors in full, principal and interest; 6 have paid principal and a part of the interest, and 13 have paid the principal only. The affairs of 110 of the 181 banks have been finally closed, leaving 70 in process of settlement, of which 16 are virtually closed, with the exception of pending litigation, leaving 54 receiverships in active operation. In one case the receiver was withdrawn and the bank permitted to resume business.

The total amount so far paid to creditors of insolvent national banks has been \$48,052,938 upon proved claims, amounting to \$70,830,366. The amount paid during the year has been \$8,103,498, besides \$1,320,317 paid for dividends declared prior to November 1, 1892, on claims proved since that date. Assessments amounting to \$17,925,850 have been made upon shareholders of insolvent national banks under section 5151 of the Revised Statutes of the United States. From this source the gross collections amount to \$7,623,760, of which there has been received during the past year \$1,002,351. Suits are pending in some cases.

In the Appendix,* p. 214, a table will be found showing, under various heads, amounts collected from the assets of each of the 181 insolvent national banks, the amounts disbursed, and the purpose. All moneys and assets are accounted for, and the figures supply all information necessary to the ascertainment of percentages and loss.

INACTIVE RECEIVERSHIPS.

Sixteen banks remain in the hands of receivers, the affairs of which are practically wound up, and the trusts are kept on the inactive list because of pending litigation or of the possession of assets, an immediate disposition of which would entail unnecessary sacrifice. The expenses of a trust in this condition are nominal and limited to what is actually necessary to proper and careful attention to the matters in abeyance. Titles to property pass through a receiver and the courts, but final dividends are sometimes paid from the office of the Comptroller, especially in the event of a considerable lapse of time after a receiver has realized upon all available assets.

By comparison with the report of 1891 it will be observed that only two of the banks then reported on the inactive list have been stricken out. In two other cases the receiverships will be terminated within thirty days. It is expected that the unsettled affairs of other banks in the list will

be disposed of within the next year and the receiverships formally terminated.

The following is a list of receiverships in an inactive condition:

Name and location of bank.	Date of appointment of receiver.	Divi- dends paid.

*And interest.

The total number of national banks organized since February 25, 1863, is 4,811, of which 3,788 are now in operation, 1,023 having passed out of the system, accounted for as follows:

Passed into voluntary liquidation to wind up their affairs				
Passed into liquidation for purpose of reorganization Passed into liquidation upon expiration of corporate existence * Placed in hands of receivers.	662 80 102 181			
Less number restored to solvency and resumed business.	1, 025 2			
Total passed out of system	1,053			

LEGISLATION.

During the past year provision was made by Congress, in an act approved May 12, that any national bank located in the city of Chicago and State of Illinois might be designated by the World's Columbian Exposition to conduct a banking office upon the Exposition grounds, such designation to be approved by the Comptroller of the Currency, and the branch bank to be subject to the same restrictions and to have the same rights as the bank to which it belongs. The Chemical National Bank of Chicago was designated October 18, 1892. The text of the act is as follows:

That any national bank located in the city of Chicago and State of Illinois may be designated by the World's Columbian Exposition to conduct a banking office upon the Exposition grounds, and upon such designation being approved by the Comptroller of the Currency, said bank is hereby authorized to open and conduct such office as a branch of the bank, subject to the same restrictions and having the same rights as the bank to which it belongs: Provided, That the branch office authorized hereby shall not be operated for a longer period than two years, beginning not earlier than July first, eighteen hundred and ninety-two, and closing not later than July first, eighteen hundred and ninety-four.

^{*} Sixty of these have been reorganized.

Under the act approved July 28, provision was made for the redemption of certain national-bank notes which had been issued to, or received by, any national bank, but were either lost or stolen from the bank and put in circulation without signature by the officers or upon forged signatures. The text of the act is as follows:

That the provisions of the Revised Statutes of the United States, providing for the redemption of national-bank notes, shall apply to all national-bank notes that have been or may be issued to, or received by, any national bank, notwithstanding such notes may have been lost by or stolen from the bank and put in circulation without the signature or upon the forged signature of the president or vice-president and cashier.

In the Comptroller's report for 1890 comments were made upon the provisions of section 3 of the act approved June 30, 1876, affecting the rights of shareholders of an insolvent national bank after creditors had been paid in full, principal and interest, under a receivership. few cases shareholders had declined to elect an agent, and there seemed to be no means for distributing cash on deposit with the Treasurer of the United States for the benefit of the trust among shareholders by the payment of dividends. There were other difficulties in the application of the law with respect to title to real property passing through an agent, legal questions arising which provoked litigation. The amendment, which is in fact in full substitution of the entire section referred to, is as follows:

That section three of an act entitled "An act authorizing the appointment of receivers of national banks, and for other purposes, approved June thirtieth, eighteen hundred and seventy-six," is hereby amended so as to read as follows:

"Sec. 3. That whenever any association shall have been or shall be placed in the hands of a receiver, as provided in section fifty-two hundred and thirty-four and other sections of the Revised Statutes of the United States, and when, as provided in section for the device of the Country of the Co in section fifty-two hundred and thirty-six thereof, the Comptroller of the Currency shall have paid to each and every creditor of such association, not including shareholders, who are creditors of such association, whose claim or claims assuch creditor shall have been proved or allowed as therein prescribed, the full amount of such claims, and all expenses of the receivership and the redemption of the circulating of such association shall have been provided for by depositing lawful money of the United States with the Treasurer of the United States, the Comptroller of the Currency shall call a meeting of the shareholders of such association by giving notice thereof for thirty days in a newspaper published in the town, city, or county where the business of such association was carried on, or if no newspaper is there published, in the newspaper published nearest thereto. At such meeting the share-holders shall determine whether the receiver shall be continued and shall wind up the affairs of such association, or whether an agent shall be elected for that purpose, and in so determining the said shareholders shall vote by ballet in person or by proxy, each share of stock entitling the holder to one vote and the majority of the stock in value and number of shares shall be necessary to determine whether the said receiver shall be continued or whether an agent shall be elected. In case such majority shall determine that the said receiver shall be continued, the said receiver shall thereupon proceed with the execution of his trust and shall sell, dispose of, or otherwise collect the assets of the said association, and shall possess all the powers and authority, and be subject to all the duties and liabilities originally conferred or imposed upon him by his appointment as such receiver, so far as the same remain applicable. In case the said meeting shall by the vote of the majority of the stock, in value and number of shares, determine that an agent shall be elected, the said meeting shall thereupon proceed to elect an agent, voting by ballot, in person or by proxy, each share of stock entitling the holder to one vote, and the person who shall receive votes representing at least a majority of stock in value and number shall be declared the agent for the purposes hereinafter provided, and whenever any of the shareholders of the association shall, after the election of such agent, have executed and filed a bond to the satisfaction of the s faction of the Comptroller of the Currency, conditioned for the payment and discharge in full of each and every claim that may thereafter be proved and allowed by and before a competent court, and for the faithful performance of all and singular the duties of such trust, the Comptroller and the receiver shall thereupon transfer and deliver to such agent all the undivided or uncollected or other assets of such association then remaining in the hands or subject to the order and control of said Comptroller and said receiver, or either of them; and for this purpose said Comptroller and said receiver are hereby severally empowered and directed to execute any deed, assignment, transfer, or other instrument in writing that may be necessary and proper, and upon the execution and delivery of such instrument to the said agent the said Comptroller and the said receiver shall by virtue of this act be discharged from any and all liabilities to such association, and to each and all the creditors and shareholders thereof. Upon receiving such deed, assignment, transfer, or other instrument, the person elected such agent shall hold, control, and dispose of the assets and property of such association which he may receive under the terms hereof, for the benefit of the shareholders of such association, and he may in his own name, or in the name of such association, sue and be sued, and do all other lawful acts and things necessary to finally settle and distribute the assets and property in his hands, and may sell, compromise, or compound the debts due to such association, with the consent and approval of the circuit or district court of the United States for the district where the business of such association was carried on, and shall at the conclusion of his trust render to such district or circuit court a full account of all his proceedings, receipts, and expenditures as such agent, which court shall, upon due notice, settle and adjust such accounts and discharge said agent and the sureties upon said bond. At such meeting, held as hereinbefore provided, administrators or executors of deceased shareholders may act and sign as the decedent might have done if living, and guardians of minors and trustees of other persons may so act and sign for their ward or wards or cestui que trust. The proceeds of the assets or property of any such association which may be undistributed at the time of such meeting or may be subsequently received shall be dis

"First. To pay the expenses of the execution of the trust to the date of such pay-

ment.

"Second. To repay any amount or amounts which have been paid in by any share-holder or shareholders of such association upon and by reason of any and all assessments made upon the stock of such association by the order of the Comptroller of the Currency in accordance with the provisions of the statutes of the United States; and

"Third. The balance ratably among such stockholders in proportion to the number of shares held and owned by each. Such distribution shall be made, from time to time, as the proceeds shall be received and as shall be deemed advisable by the said Comptroller or said agent."

LEGAL DECISIONS.

A digest of prominent national-bank cases up to date will be found in the Appendix,* p. 95. This digest has become necessary in view of considerable inquiry by the general public, and it affords a convenient and ready source of reference to every national bank. It is not practicable to include the syllabus of every decision affecting a national bank, and generally those which are not an exposition of United States statutes are excluded. Much interest has been evinced during the past few years by bank officials and the general public as to the duty of directors, and the Supreme Court of the United States recently determined that the directors of a national bank must exercise ordinary care and prudence in the administration of the affairs of the bank, and this includes something more than officiating as figureheads; that they are entitled under the law to commit the banking business as defined to the duly authorized officers, but are not absolved from the duty of reasonable supervision, nor permitted to be shielded from liability because of want of knowledge of wrongdoing, if that ignorance is the result of gross inattention.

CLEARING-HOUSE ASSOCIATIONS.

In our smaller cities it is the custom of banks to send all claims against other banks in the same place by runners or messengers to such banks for payment. In such manner are their exchanges consummated, and in such cases the payment of these claims represents a

money transaction. In our larger cities, in order to save time and labor and avoid the risk attendant upon the transporting of money about the streets, and minimize the amount of actual money required to adjust its exchanges, clearing-house associations have been established, wherein each bank is credited with what claims it has against the other members of the association, and debited with the amount that each of the other members of the association hold against it. The balance only is paid or received in money. Thus each bank adjusts its day's exchanges, as though all transactions were with one bank instead of with many banks which constitute the other members of the association.

The total clearing-house transactions in the fifty-seven clearing-house associations in the United States for the past year aggregate the enormous sum of \$61,017,839,067, and this great volume of business was transacted by the use of only about 8 per cent in currency or money. These clearing-house transactions have such a direct and important bearing upon the currency of the country that a report upon the currency would be incomplete that did not include the history of the clearing-house transactions for a year. For that reason the following tables, giving full information upon the subject, are submitted.

TRANSACTIONS OF THE NEW YORK AND OTHER CLEARING-HOUSE ASSOCIATIONS.

The present membership of the New York Clearing-House Association comprises 46 national banks, 18 State banks, and the subtreasury at New York, 65 members in all. There are 48 national and 46 State banks in New York City, and 2 national and 28 State banks not being members, clear through other banks which are members of the association.

The following information with respect to the operations of the clearing-house associations in the United States has been kindly furnished, upon request, by Mr. William Sherer, manager of the Clearing House Association at New York City:

COMPARATIVE STATEMENT FOR TWO YEARS OF THE TRANSACTIONS OF THE NEW YORK CLEARING HOUSE, SHOWING AGGREGATE AMOUNT OF CLEARINGS, AGGREGATE BALANCES, AND THE KINDS AND AMOUNTS OF MONEY PASSING IN SETTLEMENT OF THESE BALANCES.

^{*} For nine months.

In 1891 there was a notable decrease in the volume of exchanges, amounting to over \$3,000,000. The year 1892 being placed in comparison, there has been an increase of over \$3,800,000.

CLEARING HOUSE OF THE NEW YORK STOCK EXCHANGE.

There was organized on the 17th day of May, 1892, a Stock Clearing House Association in the city of New York, which has since been in very successful operation. The object of this association was to avoid the personal delivery of stocks and enable each broker to adjust his deliveries and receipts of stocks in precisely the same manner as he would do were all his transactions of aday with a single broker, instead of the various brokers belonging to the association. The principle is the same as that which controls the bank clearing house, and the saving in time, labor, risk, and use of money or certified checks is equally as great.

The following statement shows the transactions from date of organization to October 31:

·			· · · · · · · · · · · · · · · · · · ·		<u> </u>	
Date.	Shares cleared both sides.	Total value both sides.	Share balances one side.	Value share balances one side.	Cash balances one side.	Number stocks cleared.
May 17 to Octo- ber 31, 1892	84, 808, 800	\$5, 591, 048, 200	9, 202, 400	\$576, 110, 200	\$7,661,400	4 to 16

The practical good accomplished by this exchange is very apparent and the wisdom of its establishment can not be too highly commended. When perfected and extended so as to clear all stocks dealt in upon the exchanges it will practically do away with the evil of overcertification of checks. During the brief period of its existence it is estimated that it has reduced bank clearing house transactions \$1,643,000,000 and avoided certification of checks to that amount.

SAVINGS BANKS AND LOAN AND TRUST COMPANIES OF THE DISTRICT OF COLUMBIA.

By act of Congress certain financial institutions, other than national banks, doing business in the District of Columbia, are placed under the supervision of the Comptroller of the Currency, report to him, and are examined precisely the same as national banks. These consist of The National Savings Bank, The National Safe Deposit, Savings and Trust Company, The Washington Loan and Trust Company, and The American Security and Trust Company. A detailed report of their condition on the 30th day of September, 1892, will be found in the Appendix.

STATE, SAVINGS, PRIVATE BANKS, LOAN AND TRUST COMPANIES.

Conforming to the provision of law that devolves upon the Comptroller of the Currency the duty of obtaining and publishing in his annual report to Congress statements showing the condition of banks and banking institutions incorporated under State authority, the desired information has been procured, through the courtesy of public officials, in all but nineteen States and Territories. Of the States from which no official returns have been received two are located in the

Middle, eight in the Southern, and nine in the Pacific and Territorial geographical divisions. To statements received from official sources have been added like information received directly by this Bureau from incorporated and private banks and bankers, located in States in which there are no provisions of law requiring such information to be reported to the State authorities. Over 6,000 such banks and bankers have been called upon to furnish statements for this report.

The number of incorporated banks in existence on June 30, 1892, was 4,668. The number of banks, statements of whose condition have been received by this Bureau, either directly or by means of their official reports to their respective State governments, showing their condition on or about the close of the fiscal year ended June 30, last, is 4,418, or over 94 per cent of all engaged in business at that time. The increase this year over last in number of reporting banks is 664, the material increase being accounted for, partially, by the fact that in one State (Nebraska) the banking department, in its abstract, included

private with incorporated banks.

Statements showing the condition of 5,579 incorporated and private banks have been received, the aggregate resources amounting to \$3,751,649,173. The principal items of assets are \$828,739,486 loans on real estate; \$388,749,959 loans on collateral security other than real estate; \$984,274,847 other loans and discounts; \$154,025,395 United States bonds; \$403,224,457 State, county, and municipal bonds; \$379,077,437 railroad, bank, and other stocks and bonds; \$261,278,559 due from banks and bankers; \$97,070,359 real estate, etc.; \$197,789,384 cash and cash items. The aggregate capital employed amounts to \$386,394,845; surplus and undivided profits, \$323,715,176; deposits, \$2,911,594,571. Of the 5,579 reports 3,191 are made by State banks having an aggregate capital of \$233,751,171; surplus and undivided profits \$90,358,180; deposits, \$648,513,809. The resources of 168 reporting loan and trust companies are \$600,244,908; the capital \$80,645,972; surplus and undivided profits \$61,768,148, and deposits \$411,659,996.

The condition of the savings banks of the country is of special interest owing to the enormous volume of funds in their custody, and to the further fact that these funds are largely the savings of people of limited means. Reports have been received from 1,059 savings institutions, including 416 stock savings banks, which associations do both a commercial and savings business. Of this number 643 are conducted, presumedly, in the sole interest of the depositors, and are classified as mutual savings banks. The resources of the latter class amount to \$1,605,415,679, being nearly 82 per cent of the total assets of both classes. An examination of the abstract of the reports of these banks shows that of this class 450 are located in the Eastern, 181 in the Middle, 1 in the Southern, and 11 in the Western geographical divisions.

A noticeable feature in this connection is the approximately uniform average deposit, in these banks, in the Eastern, Middle, and Western divisions, being \$356.87, \$352.28, and \$376.58 respectively and the average in all such banks being \$356.65. It is also noteworthy that while the entire deposits in mutual institutions are savings accounts, but 82 per cent of the deposits in stock savings banks, as shown by the reports, are of that class, and the actual percentage is undoubtedly much less, for the reason that in a number of States, notably Vermont, Iowa, and California, no classification of deposits is made, although accounts of a commercial nature are taken. The average rate of interest paid or credited to depositors in mutual savings banks appears to be about 4 per cent; simi-

lar information is not at command, in respect to stock savings associations, to enable even an estimate to be made, although it would seem that the rate is slightly in excess of that paid by the former class. Stock savings banks, with the exception of 15 in the Eastern and 15 in the Middle States, are located in the Southern, Western, and Pacific States and Territories.

The aggregateresources of all savings banks amount to \$1,964,044,861, of which loans on real estate amount to \$714,832,576; loans on collateral security other than real estate, \$79,173,174 and other loans and discounts, \$229,711,725. The following figures represent their investments in bonds, stocks, etc.: In United States bonds, \$133,344,199; State, county and municipal bonds, \$393,190,240; in all other bonds and stocks, \$246,001,306. The amount invested in real estate is \$33,097,998 and the funds deposited in other banks and cash on hand, \$81,576,253 and \$33,208,271 respectively. Of the liabilities of these 1,059 institutions, \$37,407,475 represents their capital, \$132,880,724 surplus, \$27,448,960 other undivided profits, \$1,712,769,026 savings deposits and \$45,560,592 other deposits.

Of the 5,579 reports of condition received by this Bureau 1,161 were from private banks and bankers having an aggregate capital of \$34,590,227 surplus and undivided profits \$11,259,164, deposits \$93,091,148.

The following tables present summaries of this information:

^{*}Includes all banks other than national.

The population of the United States by States and Territories on June 1, 1892, as estimated by the Government actuary, the aggregate capital, surplus, undivided profits, and individual deposits of national and State banks, loan and trust companies, and savings and private

banks of the United States at date of reports of the various classes nearest thereto, the average of these per capita, and the per capita average of such funds in each class of banks are shown in detail in the following table. It appears that the population of the country on the date named was 65,593,000 and the total banking funds \$6,390,094,128, an average of \$97.42. The per capita averages in each class of banks are: National banks, \$42.21; State banks, \$14.83; loan and trust companies, \$8.45; savings banks, \$29.81 and private banks, \$2.12. The table referred to is presented herewith:

Table showing, by States and Territories; the Population of each on June 1, 1892, and the aggregate Capital, Surplus, Undivided Profits, and Individual Deposits of National and State Banks, Loan and Trust Companies, and Savings and Private Banks in the United States on or about June 30, 1892; the Average of these per capita of Population, and the per capita Averages of such Resources in each Class of Banks and in all.

^{*}Estimated by Mr. Joseph S. McCoy, Government actuary. † Average of all banks other than national.

In the Appendix,* p. 227, tables will be found showing, by States, Territories, and geographical divisions, the condition of banks other than national, as obtained from both official and unofficial sources; aggregate resources and liabilities of each class; comparative statements of condition of State banks, 1872 to 1892; loan and trust companies, 1887-'88 to 1891-'92; savings banks, 1887-'88 to 1891-'92; private banks, 1888 to 1892; deposits in savings banks, number of depositors, and average amount due each, by States, in 1890-'91 and 1891-'92; the growth of savings banks in the United States as shown by the number of associations, number of depositors, and amount of deposits in the years 1820, 1825, 1830, 1835, 1840, and 1845 to 1892, inclusive; the number, liabilities, and assets at date of failure of State, savings, private banks, and loan and trust companies in each State that failed during the year ended June 30, 1892; the aggregate number, liabilities, assets and percentage of assets of State, etc., banks that failed during the fiscal years ended on June 30, 1891 and 1892; reports of condition of The First Bank of the United States in January, 1809 and 1811; principal items of resources and liabilities of The Bank (second) of the United States 1817 to 1840; number of banks, amount of specie, circulation, and capital in 1774, 1784, and 1790 to 1804; the number and capital of banks by States, etc., at eight different periods from 1792 to 1830; the number, capital, circulation, deposits, loans, and specie of banks at various periods from 1811 to 1840; the principal items of resources and liabilities by States, of banks in the United States in 1819, 1834 to 1863, and 1873 to 1892; the number of State banks in the United States and their principal resources and liabilities in the years 1834 to 1863 and 1873 to 1892, inclusive; the number, average capital, and deposits of all banks, other than national, as shown by reports to the Internal Revenue Bureau on November 30, 1875 and 1876, and on May 31, 1877 to 1882, inclusive; percentage of depreciation of bank notes during the suspension of specie payments from 1814 to 1817; discount of bank notes in New York in January, 1835 to 1838, inclusive; highest and lowest price of bank notes in Philadelphia in each year from 1814 to 1823 and from 1834 to 1838.

CONCLUSION.

Prior to the passage of the free-banking act a deep-rooted prejudice obtained against national banks as monopolies. They were believed to possess special privileges inimical to the interests of the general public. The act of January 14, 1875, removed all restrictions and extended the powers and privileges of a national bank to any five reputable men who might choose to organize such an institution, thus remov-

ing all proper ground of criticism.

All prejudices are long lived, but the one against national banks has possessed unusual vitality. There are many strong and excellently well managed State banks. Some of our States have good banking laws, well enforced, with competent and effective supervision. It is undeniable, however, that away from its immediate locality, a national bank enjoys greater prestige than a State institution. The system lends a credit and standing to its individual members. The actual advantage which national banks possess have won favor, and the prejudice once so strong, has yielded and is fast disappearing before the commercial advantages which the system affords. The large percentage of increase in national banks formed is found in sections where the prejudice was once strongest. It is very gratifying to note this.

^{*} See second foot note, p. 314.

There is no possible conflict of interests between the national system and State systems of banking. National banks do a purely commercial business. The various other banking functions are performed by State institutions, and the different boards of direction are so interwoven as to indicate the utmost harmony between State and national institutions.

More liberal provisions of law as to circulation or a reduction of the amount of United States bonds which national banks are compelled to own, would result in largely increasing the number of banks. As it is, each year marks a steady growth in number and in public confidence in the system. They have given the country the best currency and the best commercial service it has ever had, and the good solid business sense of the country can be relied upon to protect and preserve the system.

The work of the Bureau of the Currency is well systematized and is performed by a thoroughly competent and well equipped force of em-

ployés.

This force consists of ninety employes, the number having diminished from one hundred and twenty-five in 1876 to ninety at the present time, notwithstanding the fact that the large increase in the number of associations, under the supervision of the Bureau, has necessarily increased the amount of labor to be performed.

I have found all subordinates competent, courteous, and faithful in the discharge of their duties, and it is with pleasure that I acknowledge the valuable aid rendered by those charged with the labor of pre-

paring the statistical matter which appears in this report.

In the second volume of this report, comprising over 1,300 pages, will be found a detailed statement of the condition of all the national banks, as shown by the report of condition of September 30, 1892, arranged by States alphabetically and properly indexed.

A. B. HEPBURN, Comptroller of the Currency.

Hon. CHARLES F. CRISP,

Speaker of the House of Representatives.

REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, D. C., November 1, 1892.

SIR: In compliance with the instructions contained in your letter of July 15, 1892, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1892, and also certain additional information relating to the collections made and work performed during the first three months of the current fiscal year.

The titles of the tables found at the close of the bound volume of this

report* are as follows:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1892.

Table B, showing the number and value of stamps for special taxes, manufactured tobacco, snuff, cigars, cigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, and opium manufactured for smoking purposes; also the number of the different kinds of certificates of registry, with the number and value of documentary stamps used for validating unstamped instruments, issued to collectors of internal revenue during the fiscal year ended June 30, 1892.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by

fiscal years, from July 1, 1863, to June 30, 1892.

Table D, showing the aggregate receipts of internal revenue in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1892.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30, 1892.

Table F, showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal years, from

July 1, 1863, to June 30, 1892.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1892; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1892.

^{*} The tables here referred to are omitted.

Table H, showing the receipts from special taxes in the several States and Territories for the twelve months ended June 30, 1892.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal revenue laws during the fiscal year ended June 30, 1892.

Table K. Abstract of seizures of property for violation of internal-

revenue laws during the fiscal year ended June 30, 1892.

Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts during the fiscal years ended June 30, 1891 and 1892.

COLLECTIONS FOR THE CURRENT FISCAL YEAR.

I estimate that the total receipts from all sources of internal revenue for the current fiscal year will be \$165,000,000.

RECEIPTS FOR THE PAST SEVEN FISCAL YEARS.

Fiscal year ended—			
June 30, 1892		 - 	\$153, 857, 544. 35

June 30, 1886		 	116, 902, 869. 44

COLLECTIONS FOR THE FISCAL YEAR ENDED JUNE 30, 1892.

I estimated in my last annual report that the receipts of this Bureau for the fiscal year ended June 30, 1892, would reach the sum of \$150,000,000. I am pleased to say that the actual receipts from all sources of internal revenue for the fiscal year above named were \$153,857,544.35, exceeding my estimate in the sum of \$3,857,544.35.

The following statements exhibit in detail the amount of internal revenue collected during the fiscal year ended June 30, 1892, the sources from which the revenue was derived, the total sum collected in each district, State, and Territory, the cost of collecting, etc.:

COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the	
provisions of law taxing eleomargarine and the provisions of the	
act of October 1, 1891, relating to the payment of bounty on sugar.	\$1 879 038 37
For salaries and expenses of revenue agents, surveyors of distilleries,	41,010,000.01

Deduct expenses relating exclusively to the payment of bounty on sugar, as follows: Additional deputies and clerks	4, 462, 877 87
Deduct expenses relating exclusively to the payment of bounty on sugar, as follows: Additional deputies and clerks	

The percentage of the cost of collection is 2.80 per cent. The expenses for the previous fiscal year were \$4,205,655.49, being 2.88 per cent. of the collections, so that, while both the collections and the expense of collection during the last fiscal year were in excess of that of the previous year, the percentage of cost of collection has decreased.

The amount appropriated for salaries and expenses of agents, gaugers, storekeepers, etc., was \$2,165,000, while, owing to the increased number of distilleries in operation, resulting in an increase in the amount of taxes collected from spirits of more than \$5,900,000 as compared with the previous year, as shown in this report, the actual expenses for this purpose were \$13,424.57 more than the amount appropriated, as shown by unpaid accounts now on file, and for which an additional appropriation will be needed.

MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ending June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:

Express charges on public moneys forwarded by collectors and deputy	
collectors to the depositories	\$4, 484.50
Locks for use at distilleries	4, 228, 11
Hydrometers used in gauging spirits. Weighing beams for use in weighing spirits	7,002.20
Weighing beams for use in weighing spirits	17, 871, 75
Gauging rods	59.51
Steel letters for numbering stills	57. 90

Fourteen clerks, at	
Forty clerks, at	
Three messengers, at	
Fourteen assistant messengers, at	. 720
Thirteen laborers, at	

An aggregate of 208 persons.

I also recommend the appropriation of the sum of \$2,500 as salaries for one stamp agent at \$1,600 and one counter at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
\$25, 000 or less 25, 001 to \$37, 500 37, 501 to 50, 000 50, 001 to 75, 000 75, 001 to 100, 000 100, 001 to 125, 000 125, 001 to 175, 000 175, 001 to 225, 000 225, 001 to 275, 000 225, 001 to 275, 000 235, 001 to 375, 000	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875 2, 875 3, 000 3, 125	475, 001 to 550, 000 550, 001 to 625, 000 625, 001 to 700, 000 700, 001 to 775, 000 775, 001 to 850, 000 850, 001 to 925, 000	3,500 3,625 3,750 3,875 4,000 4,125 4,250 4,375

OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1892, in the various districts throughout the United States, as reorganized under the executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
36	4, 250 4, 125 3, 875	2 4 1 1 1	3, 500	2	\$3,000 2,875 2,750 2,625

There were also employed 963 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary:	Number.	Salary.
22	\$2,000 1,900 1,800 1,750 1,700 1,600 1,550 1,500 1,450	34 169 127 136 2 64 4 23	\$1,300 1,200 1,100 1,000 950 900 850 800 750	9	\$500 480 425 400 360 300 250 240
119	1,400 1,350	5	700 600	6	150 120

There were also employed in the offices of the different collectors 185 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1	\$1,800 1,600 1,500 1,400 1,300 1,250 1,200	8	\$1, 150 1, 100 1, 600 900 800 750 720	9	\$700 650 600 500 400

Also 30 porters, messengers, or janitors who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
6		14 11		1 2 3	\$180 120 100

In addition to the foregoing there were also employed for limited periods 409 persons in duties solely connected with the execution of the provisions of the act of October 1, 1890, relating to the payment of bounty on sugar produced, as shown more in detail in that part of this report relating to that subject.

STOREKEEPERS, GAUGERS, ETC.

There were also employed 666 gaugers, who received fees not to exceed \$5 per day; 574 storekeepers, and 1,243 storekeeper and gaugers, whose pay did not exceed \$4 per diem, and 6 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity of 100 bushels or more, and are paid such compensation as may be prescribed by the Commissioner of Internal Revenue, not to exceed \$4 per day.

The pay of storekeeper and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less is fixed by law at \$2 per diem. The pay of those assigned to larger distilleries has been graded according to the following scale:

Compensation for storekeeper and gaugers assigned to distilleries

having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, \$4 per day.

At the close of the year ended June 30, 1892, 207 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was \$270,585,02.

GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

It affords me great pleasure to testify to the diligence, fidelity, and accuracy of the officers, clerks, and employés of this Bureau during the past fiscal year. The condition of the work of the office is excellent, and it is as fully up to date as it is practicable to have it, and all business has been promptly and accurately disposed of.

The offices of the several collectors of internal revenue have been examined during the past fiscal year as frequently as was possible with the limited force of revenue agents at my command, and such examina-

tions have shown them to be generally in good condition.

To the industry, efficiency, and promptness of the collectors and their subordinates may be ascribed in a great degree the large increase in the receipts from internal revenue with so slight an increase in the cost of collection.

REVENUE AGENTS' DIVISION.

Twenty revenue agents have been employed during the last fiscal year, one as chief of division in this office, eleven in charge of territorial divisions, three in the examination of the offices and accounts of collectors, and five in assisting agents in charge of divisions and on special duty.

EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

Aggregate salary of agents	\$43,736,00
Aggregate amount of traveling expenses	29, 737, 11
Stationery furnished agents	357.78
Transportation over Pacific railroads	691.65
Total	74, 522, 54

WORK OF REVENUE AGENTS.

Two thousand four hundred and eighty-six violations of law have been reported by revenue agents during the year; 621 persons have been arrested on their information; property to the value of \$195,898.35 has been reported by them for seizure, and \$96,321.74 for assessment for unpaid taxes and penalties.

ILLICIT STILLS SEIZED.

The following statement shows the number of illicit stills seized, persons arrested, and casualties to officers and employés during the fiscal year ended June 30, 1892:

~	Stills s	eized.	Number	Casualties.

	purnoses	
Amount expended for misconsideous	, purposos	
: Makal ammandad		10 505 00

The accounts for expenditures under this appropriation are rendered monthly, with an itemized statement, and in all cases supported by proper subvouchers duly sworn to. These accounts pass through all the accounting offices in the Treasury Department and are filed in the Register's office.

INTERNAL-REVENUE INSPECTORS.

In accordance with the provisions of legislative act of March 3,1891, authorizing the Commissioner of Internal Revenue to employ not to exceed 12 inspectors, whose duty shall be to inspect sugar upon which a bounty is required to be paid, and to perform such other duties as may be required by the Commissioner, 12 inspectors have been employed during the past year, at a compensation of \$5 per day while actually and necessarily employed, and their necessary traveling expenses.

These inspectors have been employed most of the time in connection with the payment of bounty on domestic sugar, and have been assigned

as follows:

District of Kansas	1
District of Nebraska and Montana	1
First district of California	2
District of Louisiana and Texas	7
District of Florida	
	_

The duties which they have performed have been the inspection and classification of sugar upon which a bounty was claimed, making examinations and inspections at sugar factories, and other work incident to that branch of the service.

During the maple-sugar season inspectors were employed in connection with inspection and classification of maple sugar upon which bounty was claimed in the following districts:

Districts of New Hampshire and Massachusetts	3
Fourteenth, Twenty-first, and Twenty-eighth Districts of New York	
Twelfth and Twenty-third Districts of Pennsylvania.	. 1
Tenth and Eighteenth Districts of Ohio and First and Fourth Michigan	ī

Inspectors rendered valuable services in connection with the work to which they were assigned. In the cane-sugar producing districts I

found it necessary to employ inspectors during most of the year. In the beet and sorghum producing districts they were employed a greater portion of the year, and in the districts where maple sugar is produced several of them were employed about three months.

During the months of June, July, and August some of the inspectors were employed with revenue agents in general duty connected with the

nternal-revenue service.

EXPENSES OF REVENUE INSPECTORS.

The appropriation for the payment of salaries and expenses of inspectors was \$36,000. The following expenditures chargeable to that appropriation have been made during the year:

Aggregate salary o	f inspectors.		 •	\$16, 505. 00

MANUFACTURE OF STAMP PAPER.

On the 16th day of March, 1892, sealed proposals were solicited, by advertisement, from paper manufacturers for supplying this Bureau with paper to be used in the printing of internal revenue stamps for the fiscal year ending June 30, 1893. The Fairchild Paper Company, of Boston, Mass., was the only bidder. This company has had for a number of years the contract for furnishing the class of paper prescribed at a price satisfactory to the office, and on this occasion presented

acceptable terms and was again awarded the contract at the rate of 6.1 cents per pound, paper to be delivered at the Treasury Department in Washington. It is estimated that 800,000 pounds of paper will be required for the year's product of stamps.

PRINTING OF STAMPS.

The Bureau of Engraving and Printing supplies all internal-revenue stamps used, excepting those printed on tin-foil wrappers. These are furnished by the John J. Crooke Company, of New York, under a contract which relieves the Government of any expense for their production, the expenditure for salaries of a stamp agent and one counter—aggregating \$2,500 annually—being reimbursed to the Government by the contractor, and the cost of printing being paid by the manufacturers under special arrangement with the printing company.

CLAIMS FOR REDEMPTION OF STAMPS BARRED BY STATUTE.

The number of applications by letter for the redemption of check and proprietary stamps received during the year ended June 30, 1892, was eighty-six, the value represented ranging from 5 cents to \$15. The redemption of these stamps being barred by the statute of limitations, they were returned to the applicants with notice of rejection. There are still on hand seventy-eight cases hitherto reported as of insufficient data for adjustment, some stamps without claims and some claims without stamps. I repeat the suggestion made in my last report, that steps be taken to finally dispose of these cases in order that they may be omitted from subsequent reports, and would recommend that they be properly wrapped and sealed for preservation and filed away, record thereof being kept in this office.

OFFICIAL COUNT OF STAMPS IN VAULT.

On the 28th day of December, 1891, the vaults of this Bureau were turned over to a committee appointed for the purpose, under whose supervision the internal revenue stamps therein were officially counted. Tabulated statements showing by classes and denominations the balance on hand December 29, 1890, the receipts and deliveries since that date, ... and the balance on hand at the close of business December 26, 1891, were furnished by the Division of Loans and Currency, Secretary's office, and the count of stamps was found to agree in every respect therewith, and all the stamps with which the Commissioner was charged were properly accounted for. There were on hand December 27, 1890, date of previous count, 22,937,341 stamps, of the value of \$24,598,990.28. From that date to December 28, 1891, there were received from the Bureau of Engraving and Printing and from collectors for reissue 1,030,150,211 stamps, of the value of \$171,571,212.31. Total to be accounted for, 1,053,087,552 stamps; value, \$196,170,202.59. There were delivered for issue, reissue, and destruction during the period named 988,535,879 stamps; value, \$172,409,317.74, leaving a balance to be accounted for on the morning of December 28, 1891, of 64,551,673; value, \$23,760,884.85, which, by actual count, were found to be in the vaults on that date. A careful examination of the stamp division bookkeepers accounts, by money values, was made, and they were found to agree in every respect with reports of the superintendent of the vault and the books of the Secretary's office.

ISSUES TO COLLECTORS.

A comparison of the issues of tax paid stamps to collectors this year with the issues for the year ended June 30, 1891, makes an interesting exhibit, which is herewith submitted:

Class of stamps. Number issued.		issued.	Increase	Value of sta	Difference in	
		over year 1891. 1891.		1892.	values.*	
Tax-paid— Spirits Tobacco Cigar Cigarette Beer	1, 616, 250 504, 111, 697 78, 128, 325 251, 707, 970 86, 655, 700	1, 663, 050 527, 748, 239 78, 841, 830 273, 203, 358 90, 154, 400	46, 800 23, 636, 542 713, 505 21, 495, 388 3, 498, 700	\$88, 663, 275, 00 23, 259, 966, 57 13, 560, 332, 40 1, 354, 349, 70 30, 674, 300, 00	\$90, 260, 055, 00 19, 606, 920, 54 13, 674, 251, 55 1, 475, 600, 70 33, 048, 200, 00	- 3, 653, 046, 03 + 113, 919, 15

^{* +} increase; - decrease.

CERTIFICATES OF RESIDENCE FOR CHINESE LABORERS.

The provisions of the act of May 5, 1892, require that certificates of residence be issued by this Bureau to such Chinese laborers as are entitled to remain in the United States after the date of said act. These certificates have been prepared and will be supplied to collectors and issued to applicants under the regulations prescribed by the honorable Secretary of the Treasury. It is estimated that 120,000 certificates will be required to supply the several collection districts, 77,000 being estimated for the two districts of California and the district of Oregon. The printing of these certificates is being done at the Government Printing Office.

No applications have been made by any Chinese persons for registration under the terms of the above act. There seems to be, at present, a determination on the part of the Chinese not to register. However, I have taken the precaution to have all the papers necessary for such registration in the hands of the collectors of internal revenue, and should any person entitled to register under this act desire to do so, he can avail himself of the privilege with little or no inconvenience to himself.

TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was \$31,000,493.07. This amount includes internal-revenue taxes paid by stamps on imported and manufactured tobacco, snuff, cigars, and cigarettes.

The decrease of collections for the last fiscal year as compared with those for the previous fiscal year was \$1,795,777.90. This is due to the reduction by the act of October 1, 1890, of the tax on snuff, chewing and smoking tobacco, January 1, 1891, from 8 to 6 cents per pound, and to the repeal of special taxes relating to tobacco, May 1, 1891.

The tax on eigars and eigarettes was not changed, and the collections therefrom were increased \$325,941.99 during the last fiscal year.

mons incremon were increased \$525,541.55 during	, the last	nscar year.

Net decrease of collections ..

1, 795, 777, 90

The increase in the quantity of tobacco and snuff and in the number of cigars and cigarettes for the last fiscal year over those taxed the previous fiscal year was:

Manufactured tobacco Snuff	poundsdo	10, 456. 173 774, 157
Total	do	11, 230, 330
Cigars and cheroots		
Total	• • • • • • • • • • • • • • • • • • • •	282, 350, 730

The export account shows an increase in manufactured tobacco of 2,281,720 pounds, a decrease in the number of cigars exported of 1,224,435, and an increase of the number of cigarettes exported of 26,310,770.

COMPARATIVE STATEMENT.

The following exhibit shows in detail the receipts for the fiscal year ended June 30, 1892, from each particular source of the tobacco tax, as compared with those for the previous fiscal year:

RECEIPTS FROM TOBACCO AND SNUFF.

Manufactured tobacco.	a\$15, 237, 742. 32 669, 861. 08
Total for year ended June 30, 1892	15, 907, 603, 40 17, 806, 788, 06
Decrease in collections	1, 899, 184. 66
As follows: From chewing and smoking tobacco From snuff	1, 842, 890. 35 56, 294. 31
RECEIPTS FROM CIGARS AND CIGARETTES.	
Cigars and cheroots	\$13, 646, 398. 25 1, 446, 491. 42
Total for year ended June 30, 1892 Total for year ended June 30, 1891	15, 092, 889. 67 14, 766, 947. 68
Increase in collections	325, 941. 99

Of this increase \$221,719.95 was on cigars and \$104,222.04 was on cigarettes.

NO RECEIPTS FROM SPECIAL TAXES.

The act of October 1, 1890, repealed all special taxes relating to tobacco, and therefore there were none paid during the fiscal year ended June 30, 1892.

PRODUCTION OF TOBACCO, SNUFF, CIGARS, AND CIGARETTES.

The production of tobacco, snuff, cigars, and cigarettes for the fiscal year ended June 30, 1892, computed from the receipts from stamps sold for all such goods as were put on the market for consumption, together

a Including \$84.16, receipts at 8 cents per pound.

with those removed in bond for export and including importations for consumption, was:

The increase during the fiscal year 1892 of taxed cigarettes was 208,444,080, and of cigarettes exported was 26,310,770. The increase of cigarettes imported and withdrawn for consumption was 622,798.

THE TABULAR STATEMENTS.

In the tables* annexed will be found statements showing the manner in which the manufacturing is distributed among the different States and districts, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of material used, and the quantity and kind of product manufactured. These tables are compiled from the reports received from the collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1891, a period of time differing from the fiscal year, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

There were in New York City thirty-four persons who qualified and kept books as tobacco manufacturers solely for the purpose of lawfully dealing in the refuse scraps, clippings, cuttings, and waste made by cigar manufacturers. They sort, sieve, and pack this material and export most of it to foreign countries. The rest they sell in bulk, under permits, to other manufacturers, who manipulate it and pack their product as smoking tobacco. During the year 1891 they purchased 1,330,880 pounds of such material, and exported and sold 1,159,131 pounds. These purchases and sales are not included in the tabular statement, because they did not pack and sell any of this tobacco for use and consumption.

Many cigar manufacturers who prepare for use and pack as smoking tobacco their refuse material, clippings, cuttings, and scraps have, during the year 1891, qualified as tobacco manufacturers, and the number of such manufacturers is thereby more than doubled when compared

with the previous years.

STATEMENT SHOWING THE NUMBER, BY DISTRICTS, OF CIGAR MANUFACTURERS' ACCOUNTS REPORTED, THE QUANTITY OF TOBACCO USED, AND THE NUMBER OF CIGARS AND CIGARETTES REPORTED MANUFACTURED DURING THE CALENDAR YEAR JANUARY 1 TO DECEMBER 31, 1891.

a Increase.

b Decrease.

Note 1.—Increase in "smoking" includes scraps, cuttings, and clippings put up by manufacturers of cigars who, under law and circular No. 361, qualified as manufacturers of tobacco.

Note 2.—Tax on tobacco and snuff year 1890 was 8 cents per pound, and for the year 1891 reduced to 6 cents per pound.

SMOKING OPIUM.

Under the act of October 1, 1890, section 36, a tax of \$10 per pound was levied upon all opium manufactured in the United States for smok-

ing purposes.

Proper regulations, blanks, forms, records, bonds, stamps, etc., have been prepared in accordance with the terms of said act, but no persons qualified as manufacturers of opium during the past fiscal year, and except the issuing by this office of proper stamps, records, blanks, etc., to the collectors of the first and fourth districts of California and the district of Montana, there is at present nothing to report in connection with the legitimate manufacture of opium in the United States under the provisions of said act.

After two years of experience with the practical operation of that part of the act of October 1, 1890, providing for the collection of a tax of \$10 a pound upon all opium manufactured in the United States for smoking purposes, it is found that additional legislation is necessary

to an effective enforcement of the law.

During these two years a large portion of the opium seized for being unstamped has been released to the claimants because of the inability of the United States to prove its actual manufacture since October 1, 1890, in the face of testimony such as account books, bills of sale, etc., showing purchases of the opium before that date, which, it was morally certain, was fabricated for the occasion, but which it was impossible to

overthrow by positive evidence.

As ample opportunity has been given to holders of opium, made or imported before the passage of the act, to bring it forward and have it marked for identification by the revenue officers, and many thousands of cans have been thus marked, it is believed that all smoking opium remaining unstamped or unidentified should be declared illicit. I therefore recommend that (following the precedents found in sections 3378 and 3403, Revised Statutes, as to tobacco, snuff, and cigars) an amendment be made to the law which shall provide that after its passage all smoking opium found unstamped shall be deemed to have been manufactured or imported since October 1, 1890, and shall be forfeited to the United States.

As section 39 of the act of October 1, 1890, has been found inadequate to the prevention or punishment of frauds in the stamping of smoking opium, being nothing more than a mere general reference to other highly penal statutes relating to the stamping of tobacco and snuff, and a declaration that their provisions shall, "as far as practicable," be made to apply to the stamping of smoking opium, and being, besides, fatally defective in the omission of the word "affixing," I would further recommend that the provisions of sections 3373, 3374, 3375, and 3376, Revised Statutes, be adapted to the stamping of prepared smoking opium, and so drawn up in detail and enacted.

DIVISION OF LAW.

REPORTS OF DISTRICT ATTORNEYS.

ABATEMENT CLAIMS.

On the 1st of July, 1891, there were pending 1,497 claims for abatement of assessed taxes, amounting to \$270,679.56, and during the year 2,725 claims, amounting to \$561,478.91, were presented.

Of these, 3,076 claims, amounting to \$507,017.33, have been allowed by this office, and 927 claims, amounting to \$179,068.77, have been rejected or returned for amendment. This left 219 claims for abatement still pending on the 30th of June, 1892, amounting to \$146,072.37

Since that date and up to October 1, 604 other claims have been filed, amounting to \$74,302.28; 334 claims have been allowed, amounting to \$45,024.25, and 114 rejected or returned for amendment, amounting to \$33,965.86, and on the 1st of October, 1892, 375 claims for abatement were pending, amounting to \$141,384.54.

REFUNDING CLAIMS.

On the 1st of July, 1891, there were pending 140 claims for the refunding of taxes collected, amounting to \$132,984.02, and during the year 583 other claims, amounting to \$69,797.09, were presented.

Of these, 462 claims, amounting to \$34,366.31, have been allowed, and 124 claims, amounting to \$57,695.12, have been rejected or returned for amendment. This left 137 claims for refunding still pending on the 30th of June, 1892, amounting to \$110,719.68.

Since that date and up to the 1st of October, 1892, 66 other claims have been received, amounting to \$9,777.94. Of these, 55 claims have been allowed, amounting to \$9,286.14, and 17 have been rejected or returned for amendment, amounting to \$1,242.34, and on the 1st of October, 1892, 131 claims for refunding were pending, amounting to \$109,969.14.

REBATE CLAIMS.

The report for 1891 embraced the work on rebate claims up to October 1, 1891.

On the 1st of October there were outstanding 467 claims, amounting to \$14,973.62. These claims had been returned for amendment. Since that date and up to June 30, 1892, 242 of those claims, amounting to \$7,831.00, were again received. Of that number, 174 claims were allowed, amounting to \$6,674.84, and 68 claims, amounting to \$1,229.60, were returned or rejected.

Since June 30 and up to October 1, 8 claims have been received, amounting to \$96.18, and they have been allowed.

Note.—In the case of retail dealers in oleomargarine, the number of places where eleomargarine is sold or offered for sale is sometimes in excess of the number of persons who pay special taxes as retail dealers in oleomargarine, as will be seen by reference to the last column on pages 46, 47, and 48. This is accounted for from the fact that one retail dealer in some cases pays more than one special tax for the privilege of offering eleomargarine for sale at more than one store or place of business.

DIVISION OF DISTILLED SPIRITS.

The statements under the above heading relating to the fiscal year ended June 30, 1892, exhibit the number of grain, molasses, and fruit distilleries which were registered and operated in each collection district and State; the number and capacity of the grain and molasses distilleries in operation at the beginning of each month in the year and of the three following months; the number of grain distilleries, classified according to their different capacities, registered and operated in each district and State; the quantities and several kinds of grain and other materials used in the production of distilled spirits in each collection district and State; the different kinds of fruit brandy produced during the year in each collection district and State; the quantity of distilled spirits, in proof gallons, rectified in the several districts and States; and the number of cattle and hogs fed at the registered grain distilleries, together with other items.

DISTILLERIES REGISTERED AND OPERATED.

The following statement shows the number of distilleries registered and operated during the fiscal year ended June 30, 1892:

COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OP-ERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1892, was 1,663, of which number 1,457 were operated.

The numbers registered and operated during the fiscal year ended June 30, 1891, were 1,618 and 1,424, respectively, showing an increase during the last fiscal year of 45 in the number registered and of 33 in the number operated.

The larger portion of the increase in the number registered and in the number operated occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been an increase of 36 in the number of distilleries of this class registered and and an increase of 24 in the number operated.

In the class of larger distilleries there was an increase of 9 in the

number registered and of 9 in the number operated.

During the fiscal year ended June 30, 1891, there were registered 1,378 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,199, or 87+ per cent. were operated.

Of the larger distilleries having daily grain capacities varying from 60 bushels to several thousand bushels each, 240 were registered and 225, or 93+ per cent, were operated.

During the fiscal year ended June 30, 1892, of the smaller distilleries

1,414 were registered and 1,223, or 85 per cent. were operated.

Of the larger distilleries 249 were registered and 234, or nearly 94 per cent. were operated.

There were 10 rum distilleries registered and 10 operated, a decrease

of 1 from the number reported for the previous fiscal year.

There were 4,481 fruit distilleries registered and 4,458 operated, an increase of 2,061 in the number registered and of 2,074 in the number operated during the fiscal year.

The total number of grain, molasses, and fruit distilleries registered

and operated during the year is 6,154 and 5,925, respectively.

There was an increase of 2,105 in the number of all kinds of distilleries registered and of 2,106 in the number of all kinds operated during the fiscal year ended June 30, 1892, as compared with the fiscal year ended June 30, 1891.

The average yield per bushel of grain was $\frac{112,812,723}{*26,567,451}$ =4.24+ gallons of spirits.

The average yield per gallon of molasses was $\frac{1,956,318}{*2.550,759} = .766 + of a gallon of rum.$

^{*} Four hundred and ninety-nine thousand and twelve gallons of molasses were used for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

The quantity of grain used in the production of spirits during the fiscal year ended June 30, 1892 (26,489,827 bushels), is an increase of 142,186 bushels over the amount used in the preceding fiscal year (26,347,641 bushels), and is 5,715,160 bushels more than the average (20,774,667 bushels) for the last ten years. The number of gallons of spirits produced from grain during the year (112,812,723 gallons) shows a decrease of 1,365,354 gallons from the product (114,178,077 gallons) of the year ended June 30, 1891, and is 26,392,994 gallons more than the average produced (86,419,729 gallons) for the last ten years.

The yield of spirits from each bushel of grain is 4.24+ gallons. The yield for the two preceding years was 4.27+ for 1890 and 4.32+ for

1891.

The quantity of molasses used for the production of rum during the fiscal year (2,550,759 gallons) shows an increase of 182,588 gallons over the quantity used in the previous year (2,368,171 gallons), and is 183,056 gallons more than the average (2,367,703 gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year (1,956,318 gallons) shows an increase of 172,006 gallons over the product of the previous year (1,784,312 gallons), and is 155,099 gallons more than the average product (1,801,219 gallons) for the last ten years.

DISPENSING WITH GAUGING OUT FROM RECTIFYING HOUSES.

At its last session Congress, complying with our recommendations, passed an act dispensing with the gauging of spirits after rectification. The effect of this act will be to reduce the expenses of this Bureau more than \$100,000 annually. Regulations have been promulgated requiring the rectifier to mark and stamp the spirits rectified by him and make reports. It is believed that this system will be much more satisfactory to the trade, as well as saving a large sum annually to the Government.

CHANGE IN METHOD OF GAUGING DISTILLED SPIRITS.

In iny last annual report I advised you that new regulations had been prepared, approved by you, providing for a change in the method of gauging distilled spirits, from rod or caliper measurement to weight, and that a contract had been entered into with the Fairbanks Scales Company for furnishing weighing beams for this purpose. On the 15th day of March, 1892, the collectors of the several districts and distillers throughout the country were notified that the change would take effect on the 1st day of May following, at which time the new system was put into operation.

Considering the great changes resulting in the commercial methods of those engaged in the manufacture and sale of distilled spirits, the new system has produced but little friction. The few complaints that have been made arose mostly from misunderstandings on the part of the tax-payers as to the details of the system, and from the inexperi-

ence of the officers in applying the same.

I desire to state that the change was not advised because it was seriously believed that any great amount of distilled spirits had escaped taxation under the old system; for while it was possible that by manipulations of mechanics in the construction of packages, and the manipulations of cistern-room employés for the purpose of producing fractions of less than fifty one hundredths of a gallon, a considerable quantity of spirits might escape taxation; on the other hand it was equally possible that where these methods did not prevail the Government had received tax in many instances upon more distilled spirits than the packages actually contained.

The object to be accomplished was to determine as accurately as possible the capacity of casks of spirits put up under the internal revenue law. The varying results obtained by the measurement of the same package by the same rod, in the hands of different officers, had for nearly thirty years been the source of constant strife between the distiller on the one side and the Government officer on the other. It was believed that a method could be devised by which this source of trouble could be eliminated, and I am pleased to report that I think the problem has been solved by the adoption of the method of weighing for determining the contents of packages.

In order to present to you as clearly as possible some of the results that have been reached under the new system, I have caused data to be gathered comparing the first three months of the weighing system with the corresponding three months of 1891, when the gauging rod was still in use. For this purpose spirits warehoused in the spirit-producing sections of the States of Illinois, Indiana, Minnesota, Missouri, Nebraska, and Ohio were selected, for the reason that spirits produced in those States are at once withdrawn from warehouse and

During the months of May, June, and July, 1891, there were entered into warehouse in the States referred to 157,753 packages, containing an average of 66.16 proof gallons each, making an aggregate of 10,422,814.81 proof gallons under rod measurement; while in the three corresponding months of 1892, when gauging was done by scales, there were entered into the same warehouses 167,018 packages, containing 66.72 proof gallons each, making a total of 11,129,810.56 proof gallons.

The marked fact to be observed in the above data is, that of the 324,771 packages entered into warehouse in the two periods referred to, the 167,018 gauged by scales contained an average of .56

placed upon the market.

proof gallons to the package more than those gauged by the rod. While this increase might have occurred had the rod remained in use, yet, in view of the fact that the packages were filled at the same distilleries, with the same character of spirits, and were constructed by the same coopers in the same manner, it is believed to be a just conclusion that the increase in proof gallons contents is due to the use of the scales. Of the 10,422,814.81 gallons entered into warehouse by rod measurement in the first period named, the distillers found it possible, by manipulation of fractions, to evade taxation on fifty-two one hundredths of 1 per cent, or 54,386.81 gallons, while of the 11,129,810.56 proof gallons warehoused under the weighing system in May, June, and July, 1892, only eighteen one-hundredths of 1 per cent, or 20,733.56 gallons escaped taxation. There can be no question that this reduction in the percentage of loss of tax on fractions is due to the use of the scales.

An examination of the spirits deposited in warehouse during the two periods named demonstrates the fact that the Government lost in taxes on fractional parts of gallons of less than fifty one-hundredths of a gallon to the package, during the first period, \$48,947.40, while during the corresponding period in 1892, the loss from the same cause was only \$18,659.70, a reduction in loss from the preceding year of \$30,287.70. This result is not a matter of speculation, but a fact, as shown by the records of this office.

The only problem involved in the change which I have not been able to solve to my entire satisfaction is that of soakage. The difficulty in this question is due to the great variety of packages, a different allowance for soakage being claimed on each kind, and to the fact that the interests of different classes of distillers are necessarily differently af-

fected by any uniform rule.

While I am convinced that the information obtainable from the various sources above referred to by a series of experiments covering a period of three years would enable this office to settle the question in a manner that would be not only equitable but satisfactory to all, especially as to charred barrels, yet such a course would involve some complications which should be avoided if possible. I am therefore considering the propriety of disposing of this matter by abandoning the theory of soakage as to all packages except, perhaps, charred barrels, and using the wantage rod for ascertaining the wantage, as provided for in the "Carlisle bill." This is believed to be entirely practicable by ascertaining the correction of volume applicable to each package and applying it in inverse order to that used when the spirits were entered into warehouse by caliper measurement. This would enable the taxpaver who desires to withdraw his goods on original gauge to pay the tax on the actual contents as then found by weight, and would also enable the taxpayer who desires to withdraw his goods from warehouse on regauge, as now provided for by law, to do so by having the proof taken, the correction of volume applied, and the wantage ascertained. In this way it is hoped that all ground for controversy between the Government and the taxpayer on this question would be eliminated.

, AMENDMENTS SUGGESTED TO EXISTING LAWS.

While it is believed that only a very small per cent. of distilled spirits has escaped taxation, yet I deem-it proper to say that this office has experienced very great difficulty in enforcing the law in relation to small distilleries. During the past fiscal year 753 grain distilleries have been in operation with a producing capacity of 5 bushels and less. Section

5 of the act of March 3, 1879, authorized the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to exempt distillers whose distilleries have a daily spirit producing capacity of 30 gallons of proof spirits or less, from such of the provisions of existing law in regard to grain distilleries which require the process to be carried on through continuous closed vessels and pipes, or which require the cisterns to be connected with the outlet of the worm, and from doing certain other things required of large distilleries. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shortly after the passage of this act, exempted these small distillers from constructing their distilleries after the plan of larger ones. I am of the opinion that this was a mistake, or, at least, that the construction of small distilleries is not now sufficiently under the control of the Internal Revenue Bureau. Many of them are crude, and opportunities for committing fraud on the Government are manifold.

Another fruitful source of fraud upon the revenue in these small distilleries is in permitting the distiller alone to determine whether or not he is operating under a sweet or sour mash process, and thus to fix the

fermenting period of his distillery.

I have also found it very difficult to secure the services of efficient officers at these small distilleries, for the reason that the salary of the storekeeper gaugers assigned to them is limited by law to \$2 per day. These small distilleries are located in a few States, a majority in one State. This branch of the service has been very unsatisfactory. I have used all the means within the control of the office to remedy these evils. I am of the opinion that they will continue until there is a radical change in the law upon the subject.

I beg to recommend, therefore, first, that as a remedy the laws be so amended as to withdraw the exemptions heretofore allowed in the con-

struction of these small grain distilleries.

Second, I recommend that section 3264, in relation to surveys of distilleries, be so amended as to allow the Commissioner of Internal Revenue to fix the fermenting period of any distillery with reference to the process of distillation to be adopted by such distillery. The distiller. should be required to submit to the collector or officer making the survey a full and detailed statement of the process of distillation intended to be adopted by him and the fermenting period be determined thereby. Under the present law the officer making the survey ascertains the fermenting period by an indirect and very difficult method. Instead of ascertaining directly the time required for fermentation, he must determine whether or not the distillery is to be operated under a sweet or sour mash process. The fermenting period under a sour-mash process is ninety-six hours. Under a sweet-mash process it is seventy-It is quite easy, especially in small distilleries where the surveillance of an officer is limited, for the distiller to claim to operate under the sour-mash system with a fermenting period of ninety-six hours and in fact use a sweet-mash system, thereby largely increasing the number of mashes allowed by his survey. It is possible in this way for a distiller to manufacture a very considerable quantity of spirits and eyade the payment of tax.

Third, I would recommend that the law be so amended that all store-keeper-gaugers be paid such a compensation as may be allowed by the Commissioner of Internal Revenue, not to exceed \$4 per day, when acting as storekeeper-gauger or as storekeeper. This would give an opportunity to select a more efficient class of officers in many cases.

Fourth. I would recommend that the offices of storekeeper and of gauger beabolished, and that there be appointed in lieu of such officers

an officer to be known as a storekeeper-gauger, who shall be authorized by law in all cases to perform the duties now required of either a storekeeper or a gauger or both; and that while acting as a gauger he have the same fees now allowed gaugers, and that while acting as a storkeeper he be allowed a per diem of not to exceed \$4. By allowing one officer to act in this capacity, the services of an additional man may very frequently be dispensed with. The two positions are in no wise inconsistent. Storekeeper-gaugers have been used for a number of years at small distilleries, and I know of no reason why they may not be used at larger ones.

DIVISION OF ASSESSMENTS.

The following statements relative to assessments, to spirits deposited in and withdrawn from distillery warehouses and special bonded warehouses, the number and location of such warehouses and the names of the proprietors thereof; to the stock of spirits in the United States October 1, 1892; to the exportation of spirits, fermented liquors, tobacco, snuff, cigars, and cigarettes in bond; to the exportation of tobacco, cigars, fermented liquors, and stills, with benefit of drawback; to the use of grape brandy tax-free in fortifying wines; to the act of October 12, 1888, entitled "An act to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia," and to the act of March 3, 1891, authorizing the use of alcohol tax-free in the manufacture of sugar from sorghum, are prepared from reports in the Division of Assessments. The statements relative to assessments are to be found on this page and the page following; statements relative to operations in distillery warehouses commence on page 79 (see also special index on page 78); to operations in special bonded warehouses on page 164; to exportations in bond free of tax as to spirits on page 138; as to fermented liquors on page 175; as to tobacco, snuff, cigars, and cigarettes on page 173; to exportations with benefit of drawback on page 174; and to the use of brandy in fortifying wines on page 171. No case has yet arisen under the act of March 3, 1891, above referred to, and two only during the year under the act of October 12, 1888.

ASSESSMENTS.

1. BY STATES AND TERRITORIES, 1892.

The following statement shows the amount of assessments in each of the several States and Territories of the United States, except where two or more are comprised in one district, during the fiscal year ended June 30, 1892:

States and Territories.	Amount.	States and Territories.	Amount.
Alabama	\$4,839.16	Montana, Idaho, and Utah	\$3,023,75
Arkansas		Nebraska, North and South Dakota.	21, 217, 97
California and Nevada		New Hampshire, Maine, and Ver-	Q ,
Colorado and Wyoming	3, 407. 21	mont	4, 197. 89
Connecticut and Rhode Island	39, 303. 46	New Jersey	20, 624. 44
Florida		New Mexico and Arizona	3, 168, 04
Georgia	. 7,607.08	New York	44, 463, 04
Illinois		North Carolina	69, 348, 93
Indiana	164, 416. 48	Ohio	120, 311, 40
Iowa	15, 766. 55	Oregon, Washington, and Alaska	4, 272, 71
Kansas, Indian Territory, and Okla-	`	Pennsylvania	735, 996, 37
homa	4, 107, 71	South Carolina	3, 850, 73
Kentucky	3, 734, 758. 38	Tennessee	125, 450, 53
Louisiana and Mississippi	9, 684, 76	Texas	13, 178, 90
Maryland, Delaware, and District of		Virginia	38, 527. 02
Columbia		West Virginia	70, 178. 61
Massachusetts	87, 971, 95	Wisconsin	4,711.30
Michigan	13, 770. 79		
Minnesota	5, 575. 90	Total	5, 840, 211. 14
Missouri	18, 275, 58		

Taxes on deficiencies in the production of distilled spirits and on excess of materials used by distillers abated before assessment during the fiscal year ended June 30, 1892, are as follows:

Sixty claims received from grain-distillers, amount of tax abated— On excess of material used	\$3, 817. 15 57, 722. 29
Total	,
Claims received from fruit-distillers, amount of tax abated— On deficiencies in production of distilled spirits	1, 060. 27
Total, grain and fruit	62, 599. 71

2. By Articles and Occupations, 1891 and 1892.

The following table shows the assessments made by the Commissioner of Internal Revenue during the fiscal years ended June 30, 1891, and June 30, 1892, respectively, and the increase or decrease on each article or occupation:

	Assessed d year er	uring fiscal	Fiscal year ended June 30, 1892.		
Description of tax by article or occupation.	Jane 30, 1891.	June 30,1892.	Increase over 1891.	Decrease from 1891.	
Tax on deficiencies in production of distilled spirits	\$63, 458. 05	\$74, 806. 52	\$11, 348. 47		
Tax on excess of materials used in the produc- tion of distilled spirits	5, 289. 61	4, 430. 15		\$859.40	
Tax on circulation of banks and others Pax on distilled spirits fraudulently removed or seized, also taxes overdue Pax on fermented lignors removed from brewery	3, 418, 890. 10	5, 356, 190. 50	1, 937, 300. 40	•••••

INCREASED PRODUCTION OF SPIRITS.

The quantity of spirits (114,769,041 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1892, is less than the production (115,962,389 gallons) of the year 1891, by 1,193,348 gallons. The difference is distributed among the different kinds as known to the trade as follows:

Decrease in the production of— High wines Rye whisky Bourbon whisky Miscellaneous	1, 004, 949 913, 618
Total decrease	6, 070, 859
Increase in the production of— Gallons. Alcohol. 2, 230, 166 Rum 172, 006 Gin 44, 745 Pure, neutral, or cologue spirits 2, 430, 596	3
Total increase	4, 877, 511
Net decrease	1, 193, 348

Although the quantity of spirits deposited in distillery warehouses during the year was, as above stated, less than the quantity deposited in 1891, the production of spirits, including fruit brandy, was greater, it being 118,436,506 gallons, as against 117,767,101 gallons, the product of the year 1891. The largest spirit-producing year known to this office was the year 1881, with a product of 119,528,011 gallons. (See table on page 364.)

STATEMENT OF DISTILLED SPIRITS DEPOSITED IN BONDED WAREHOUSES DURING THE PAST FIFTEEN YEARS.

	Spirits warehoused.					
Fiscal year ended June 30—	Fruit brandy.	Bourbon whisky.	Rye whisky.	Alcohol.	Rum.

INCREASED WITHDRAWAL OF TAX-PAID SPIRITS.

The quantity of spirits (92,985,265 gallons) withdrawn tax-paid from distillery warehouses during the fiscal year ended June 30, 1892, is more than the quantity (87,176,226 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1891, by 5,809,039 gallons, the increase being distributed among the different kinds known to the trade as follows:

The same is well discussed and	Gallons.
Increase in withdrawals of— Rye whisky	OSO OSO
Rye whisky	200,000
Alcohol	г, этэ, 998
Gin	25,969
Pure, neutral, or cologne spirits Bourbon whisky	2, 379, 001
Bourbon whisky	. 5, 132, 481
m. t. 1 tu annone	0 149 970
Total increase	9, 142, 219
Decrease in withdrawals of— Gallor Rum. 45, 5	ns.
Rum	70-
High wines 377, 0 Miscellaneous 2, 910, 6	30.
Miscellaneous	35
Total decrease	3, 333, 240
Not increase	5 809 039

If the quantity, 1,026,278 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits reimported during the year upon payment of a customs duty equal to the internal-revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1892, is found to be 94,011,543 gallons, or 5,753,835 gallons more than during the year 1891, including the 1,081,482 gallons reimported and tax-paid during that year.

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN WAREHOUSE.

The quantity of spirits (3,532,810 gallons) reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of actual leakage in warehouse from packages withdrawn during the year

which has been allowed in accordance with the provisions of section 17

of the act of May 28, 1880.

The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named:

Year.	Total quantity	Leakage	Percentage o
	withdrawn.	allowed.	withdrawals
	Gallons.	Gallons.	
880	78, 199, 283	75, 834	0.09
	84, 335, 900	811, 466	0.96
882	80, 281, 611	1, 231, 336	1, 53
883	83, 291, 190	2, 291, 013	2, 75
884	92, 022, 593	3, 858, 494	4, 19
885	a90, 925, 782	4, 424, 314	4. 86
886	b78, 566, 767	1, 806, 868	
987	70, 782, 951	1, 833, 681	2.59
988	74, 391, 751	2, 209, 327-	
389	81, 879, 458	3, 145, 111	
390	88, 066, 945	2, 932, 249	
991992	92, 761, 985	2, 420, 256	2. 6
	100, 094, 159	3, 532, 810	3. 5

a Includes 7,750,696 gallons stamped for export not actually withdrawn. b Includes 2,494,091 gallons stamped for export not actually withdrawn.

The increase of leakage allowed as compared with the year 1891 is 1,112,554 gallons and is distributed among the different kinds of spirits known to the trade as follows:

Increase of leakage allowed for— Bourbon whisky Rye whisky Alcohol High wines. Pure, neutral, or cologne spirits Miscellaneous	212, 130 6, 717 4, 432 27, 983
Total increase of leakage Decrease in leakage allowed for— Rum	1, 117, 117
Total decrease Net increase of leakage allowed in 1892	1, 112, 554

EXPORTATION OF DISTILLED SPIRITS.

The quantity of spirits (3,218,787 gallons) withdrawn for exportation during the fiscal year ended June 30, 1892, is greater than the quantity (1,676,395 gallons) so withdrawn during the fiscal year ended June 30, 1891, by 1,542,392 gallons, the increase being distributed among the different kinds known to the trade as follows:

rease in the withdrawal		 Gall 969.

DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1892.

The quantity of distilled spirits in the United States, except what may be in customs bonded warehouses, on the 1st day of October, 1892, was 167,294,341 gallons, this quantity being distributed as follows:

	Gallons.
In distillery warehouses	117, 296, 325
In special bonded warehouses	. 2, 125, 274
In hands of wholesale liquor dealers	15, 557, 642
In hands of retail liquor dealers	. 32, 315, 100
	
Total	. 167, 294, 341

In making the above computation the average stock of each retail liquor dealer in the United States is estimated at 150 gallons.

FORTIFICATION OF WINES WITH GRAPE BRANDY FREE OF TAX.

Under the provisions of sections 42 to 49, inclusive, of the act entitled "An act to reduce revenue and equalize duties on imports, and for other purposes," approved October 1, 1890, provision is made for the fortification with grape brandy, free of tax, of pure sweet wine, and of wine intended for exportation. No limitations are prescribed as to the character of the wines intended for exportation, but certain limitations are

specified as to the pure sweet wine evidently designed to avoid the use of the brandy in fortifying wines other than pure sweet wines. The limitations are those requiring that the fortification be done in the winery where the grapes are crushed and the grape juice is expressed and fermented, that there must be no additions to the natural wine of any other substance, and that the addition of the brandy shall be for the preservation of the saccharine matter contained therein. The law also contains limitations to the effect that the wine to be fortified shall contain not less than 4 per cent of sugar, that the wine spirits added shall not introduce alcohol to exceed 14 per cent, and that the wine shall not contain more than 24 per cent of alcohol, these percentages of alcohol being computed by volume and on the volumes of the wine after fortification.

The law limits the use of wine spirits or brandy to the months of August to April, inclusive; allows the wine producer who is also a distiller to use the grape brandy produced by him to fortify his wine, and authorizes the withdrawal of grape brandy from special bonded warehouse to fortify wine.

Authority is given to the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to prescribe bonds, stamps,

seals, and necessary regulations.

Early in the present fiscal year the regulations were revised by providing therein for a fortifying room to be secured by the seal locks used at distilleries by abolishing the use of seals on packages and of the 600-foot limit as to distance between the place where brandy is used in fortifying wine and a distillery rectifying house and other premises used for producing or storing distilled spirits. Improvements have been made during the year in testing the wines and in the instruments used. The instruments used to ascertain the saccharine strength and those used to show the alcoholic strength are all now contained in one case.

The quantity of grape brandy used in fortifying wines under the act of October 1, 1890, was 695,844 tax gallons, all but 68,560 gallons being derived directly from distillers. The kinds of wine fortified were port, angelica, muscat, sherry, malaga, tokay, sauterne, and sweet catawba, the quantity of fortified wine produced being 2,746,655½ gallons.

The quantity of brandy used and of each kind of wine fortified during

the year in each district is shown in the following table:

WITHDRAWAL OF DISTILLED SPIRITS FROM DISTILLERY WARE-HOUSES, FREE OF TAX, FOR USE IN THE MANUFACTURE OF SUGAR FROM SORGHUM.

By the act of Congress making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1892, approved March 3, 1891, provision is made for the withdrawal of distilled spirits from distillery warehouses, free of tax, to be used solely in the manufacture of sugar from sorghum on the manufacturer's premises.

Regulations pursuant to said act have been issued, but no withdrawal of spirits for the purpose named was made or applied for during the

fiscal year 1892.

OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine,

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1892; also a summary of operations during the past two fiscal years, and by months covering the period from November 1, 1886, to June 30, 1892; also a statement of the quantity of oleomargarine in the United States June 30, 1892, in the hands of manufacturers and wholesale dealers.

Second. A statement of the receipts from all classes of taxes imposed by the oleomargarine law for the year ended June 30, 1892.

Third. A statement by States and Territories showing the number of establishments for which special tax was paid to carry on during the fiscal year ended June 30, 1892, the business of manufacturing and dealing in oleomargarine; also in aggregate of all persons who paid oleomargarine special taxes for the fourteen months ended June 30, 1891.

Fourth. A statement of the total production and of total receipts from all oleomargarine sources for each fiscal year since the oleomargarine law took effect.

It appears from the subjoined tables that the average monthly production of oleomargarine under the operations of the law has been as follows:

• • •		Pounds.
During the eight months ended June	30, 1887	2, 711, 828
During the fiscal year ended June 30,	1888	2, 860, 460.
During the fiscal year ended June 30,	1889	2, 972, 002
During the fiscal year ended June 30,		
During the fiscal year ended June 30,	1891	3, 699, 367
During the fiscal year ended June 30,	1892	4, 030, 346
. ,		<i>-</i>

It also appears that the average monthly quantity withdrawn from factories on payment of the tax was as follows:

	4	rounus.
During the eight months ended June 30, 1887.		2, 592, 946
During the fiscal year ended June 30, 1888		2, 707, 430
During the fiscal year ended June 30, 1889		
During the fiscal year ended June 30, 1890		
Duringothe fiscal year ended June 30, 1891		3, 601, 292
During the fiscal year ended June 30, 1892		3, 909, 625

The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

,				Pounds.
During the eight months	s ended June 30, 18	87		90, 566
During the fiscal year en	ided June 30, 1888.			140, 516
During the fiscal year er	ided June 30, 1889.			145, 746
During the fiscal year er	ided June 30, 1890.	,		134, 866
During the fiscal year er	ided Jüne 30, 1891.			102,426
During the fiscal year er	1000 ded June 30 , 1892 .			107,981
			•	

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; in the fiscal year 1891, March; while the greatest production during the fiscal year ended June 30, 1892, occurred in March. The quantity produced during these months was as follows:

	Pounds.
In March, 1887	3, 568, 254
In March, 1888	
In December, 1888	4, 181, 317
In October, 1889	4, 072, 333
In March, 1891	
In March, 1892	
	-,,

The months in which the production fell below 2,000,000 pounds were as follows:

as follows:	
During the fiscal year ended June 30, 1887:	
May, 1887, produced June, 1887, produced	1, 885, 027
June, 1887, produced	1, 375, 423
During the fiscal year ended June 30: 1888:	
July, 1887, produced. During the fiscal year ended June 30, 1889:	1, 208, 638
During the fiscal year ended June 30, 1889: June, 1889, produced	, ,
June, 1889, produced	1,575,362
During the fiscal year ended June 30, 1890:	
July, 1889, produced	1, 404, 749
August, 1889, produced	1, 975, 773
May, 1890, produced	1, 864, 746
During the fiscal year ended June 30, 1890: July, 1889, produced. August, 1889, produced May, 1890, produced. June, 1890, produced.	1,364,826
During the fiscal year ended June 50, 1891:	
July, 1890, produced	1,723,966

June, 1891, produced...

There was an increase in the number of persons engaged in the sale of oleomargarine during the fiscal year ended June 30, 1892, as well as

an increase in the production of the article.

The following table shows the quantity of oleomargarine, in pounds, at 2 cents tax, produced at manufactories during the fiscal year ended June 30, 1892, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1892:

SUMMARY OF OPERATIONS AT OLEOMARGARINE MANUFACTORIES DURING THE FISCAL YEAR ENDED JUNE 30, 1892.

Stock on hand July 1, 1891	Pounds. 206, 728	Pounds.

^{*}The number of wholesale establishments that actually carried on business after paying the special tax was 249.

The following table of production and total receipts from all oleomargarine sources for each fiscal year since November 1, 1886, the date the oleomargarine law took effect, is interesting as showing the extent of operations in the country:

	· Produced.	Received.
On hand November 1, 1886. During the fiscal year ended June 30, 1887. (from November 1, 1886). During the fiscal year ended June 30, 1888. During the fiscal year ended June 30, 1889. During the fiscal year ended June 30, 1890. During the fiscal year ended June 30, 1891. During the fiscal year ended June 30, 1892. AMENDMENTS SUGGESTED TO PRESENT LAW.

Section 3 of the act of August 2, 1886, defines a retail dealer in oleomargarine to be "every person who sells oleomargarine in less quantities than 10 pounds at one time," whereas section 6 of this act provides that "retail dealers in oleomargarine must sell only from original stamped packages in quantities not exceeding 10 pounds."

To reconcile the two sections, section 6 should be amended by striking out the words "not exceeding," and inserting in lieu thereof the

words "less than."

As a wholesale dealer in oleomargarine is defined to be a person who sells it "in the original manufacturer's packages" (section 3, act August 2, 1886); and it is further provided that "all sales made * * * by wholesale dealers in oleomargarine shall be in original stamped packages;" persons who sell more than 10 pounds, not in the original stamped packages, can not, as the law stands, be required to pay special

tax as wholesale dealers; nor is there any criminal provision of the

statutes directly reaching such cases.

If it be deemed unadvisable to change the law which confines a wholesale dealer in oleomargarine to selling only "original stamped packages," then the sale of 10 pounds or more, not in such packages, should be made a criminal offense by an amendment to section 6 of the act.

Section 41, act of October 1, 1890, requires wholesale dealers in oleomargarine to keep books and render returns in compliance with the regulations, but no penalty for violation of this section is provided for therein; and in view of recent decisions of the courts, it would seem that a penalty clause, directly accompanying the provisions of a statute requiring certain acts to be done, is essential to an effective enforcement of the law.

It is suggested that the last sentence of section 6, act of August 2,

1886, be stricken out and the following inserted:

"Évery person who knowingly sells, or offers for sale, or delivers or offers to deliver, any oleomargarine, in quantities exceeding 10 pounds at one time, otherwise than in the original stamped packages, and every retail dealer in oleomargarine who sells or offers for sale, oleomargarine otherwise than as herein required, or delivers or offers to deliver oleomargarine in any other form than in new wooden or paper packages as above described, and every manufacturer, dealer, or other person, who packs in any package any oleomargarine in any manner contrary to law, or who falsely brands any package, or affixes a stamp on any package denoting a less amount of tax than that required by law, shall be fined for each offense not more than \$1,000 and be imprisoned not more than two years."

The third clause of section 3 should be amended by applying the provisions of that clause of section 3244 of the Revised Statutes relieving from liability to special tax persons selling oleomargarine as exec-

utors, administrators, or in any other fiduciary capacity.

Section 5 should require every manufacturer of oleomargarine to file with the collector of the district a description of the premises constituting his manufactory, and that no business shall be carried on on those premises except the manufacture of oleomargarine or of other substances necessary for and to be used exclusively in the manufacture of the oleomargarine produced thereon.

Section 6 should be amended by requiring that all oleomargarine intended for consumption or sale in this country should be packed as required by that section. The same section should provide that all oleomargarine intended for exportation to a foreign country should be packed in wooden or metallic tubs or other vessels, as prescribed by the Commissioner of Internal Revenue with the approval of the Secre-

tary of the Treasury.

Section 16 should be amended by striking out the clause in the third and fourth lines "without affixing stamps thereto," thus giving the Commissioner, with the approval of the Secretary of the Treasury, authority to prescribe export stamps to be affixed to packages intended

for exportation.

The last clause of the same section should be amended by substituting for the words "export oleomargarine" the words "remove from the place of manufacture oleomargarine for exportation," so as to require the package intended for export to be branded by the manufacturer before or at the time of removal.

I think there should be a penalty denounced in section 16 for failure to brand packages of oleomargarine intended for export as required in

that section.

BOUNTY ON SUGAR.

The act of October 1, 1890 (26 Stat., 567), entitled "An act to reduce the revenue and equalize duties on imports, and for other purposes," provided—

That on and after July first, eighteen hundred and ninety-one, and until July first, nineteen hundred and five, there shall be paid, from any moneys in the Treasury not otherwise appropriated, under the provisions of section three thousand six hundred and eighty-nine of the Revised Statutes, to the producer of sugar testing not less than ninety degrees by the polariscope, from beets, sorghum, or sugar cane grown within the United States, or from maple sap produced within the United States, a bounty of two cents per pound; and upon such sugar testing less than ninety degrees by the polariscope, and not less than eighty degrees, a bounty of one and three-fourths cents per pound, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury shall prescribe.

The law requires that the sugar producer, intending to claim bounty, shall file, prior to July 1 of each year, with the Commissioner of Internal Revenue, a notice of the place of production, with a general description of the machinery and methods to be employed by him, with an estimate of the amount of sugar proposed to be produced in the current or next ensuing year, including the number of maple trees to be tapped, and make an application for a license, which notice and application must be accompanied by a bond in such an amount as the Commissioner shall prescribe.

The result of the first year's operations of the law relative to the bounty on sugar has been satisfactory.

NUMBER OF SUGAR PRODUCERS LICENSED.

The number of producers of sugar licensed during the last fiscal year was as follows:

Number of producers from sugar cane	727
Number of producers of sugar from beets	7
Number of producers of sugar from sorghum	6
Number of producers of sugar from maple sap	., 240
and the contract of the contra	

The following tables show the number of licenses issued in each district and State, and the number of applications which were disallowed, for the most part because the papers were not filed within the time required by law:

Total				 377, 970, 335

In some instances factories which reported to this office that they proposed to make sugar by the open kettle process afterwards made sirup only at their factories and had it granulated elsewhere under vacuum pan process. Returns not yet received may show a slight increase in the amount of vacuum pan sugar made and a corresponding decrease in the amount of open kettle sugar, the aggregate amount being as stated.

The cane sugar made which did not test 80°, or enough to obtain

bounty, amounted to 326,085 pounds.

The cane sugar made during the year testing 80° or over upon which bounty was not claimed, or was not paid until after July 1 was 2,596,540 pounds.

The wagon sugars, the product of cane-sugar factories, of last season on hand July 1, and reported as in process of manufacture on that date, were as follows:

Pounds.

Louisiana		 		3,544,291
Texas		 		175, 000
Florida	(1	157, 740
	***************************************	 		201,110
Total	·	 		3, 877, 031

The beet molasses, the product of the beet-sugar factories, of last season on hand July 1, held for subsequent treatment and reported as in process of manufacture, amounted to 593,189 gallons, capable of yielding 2,243,712 pounds of sugar, as estimated.

The total amount of sugar produced in the United States during the fiscal year ending June 30, 1892, not including wagon sugars held for subsequent treatment, was as follows;

	r ounus.
Cane	 367, 752, 306
Beet	 12, 004, 838
Maple (estimated)	 32, 000, 000
	,,
Total	419 803 930

As a large majority of the producers of maple sugar in the United States did not make application for license, this office can not furnish complete data as to the quantity of maple sugar produced in the United States. According to the returns of the census of 1890 there were in the United States, in 1889, 62,074 producers of maple sugar, and the quantity of sugar produced was 32,952,927 pounds, and the quantity of molasses 2,258,376 gallons.

BEET-SUGAR FACTORIES.

The sugar-producing season commenced August 20, 1891, with beets. The Chino Valley Beet Sugar Company, Chino, Cal., commenced on that date, being the first sugar factory in the United States to commence operations under the bounty act. Owing to the favorable climate

in southern California, they are able to begin the campaign earlier there than in other sections.

Six beet-sugar factories were in operation last year, producing 12,004,838 pounds of sugar, operating on an average 582 days, as follows: The Utah Sugar Company, Lehi, Utah; Alameda Sugar Company, Alvarado, Cal.; Western Beet-Sugar Company, Watsonville, Cal.; Chino Valley Beet-Sugar Company, Chino, Cal.; Oxnard Beet-Sugar Company, Grand Island, Nebr.; Norfolk Beet-Sugar Company, Norfolk, Nebr.

The same factories have been licensed for the year 1892-'93.

The production this year is expected to show considerable increase over last season, and a number of new factories will probably be erected

at no distant day.

The beet-sugar producers reported 17,314½ acres of beets under cultivation for this year's crop. The amount of sugar to be produced will be from 27,000,000 to 30,000,000 pounds as estimated.

SUGAR MADE FROM SORGHUM.

The Medicine Lodge Sugar Works and Refining Company, Medicine Lodge, Kans., was the first sorghum factory to commence operations. It commenced August 31, 1891.

There were only three factories which claimed bounty during the fiscal year, all located in Kansas, a summary statement of the operations of which is given below. They were in operation an average of forty-four days and produced 1,113,086 pounds of sugar.

The only licensed sorghum-sugar factories for the current year are the Medicine Lodge Sugar Company (Limited), Medicine Lodge (for-

merly the Medicine Lodge Sugar Works and Refining Company), and

the Parkinson Sugar Company, Kansas.

The act of March 3, 1891, making appropriations for the Department of Agriculture during the fiscal year ending June 30, 1892, authorized manufacturers of sugar from sorghum to use alcohol free of tax, under regulations to be prescribed by this office, with the approval of the Secretary of the Treasury. Sugar factories making sugar from sorghum have not, so far, taken advantage of this provision of law.

SUGAR FROM SUGAR CANE.

In Louisiana the sugar season commenced early in October. The first sugar was received at New Orleans October 9, 1891. There were 697 sugar producers licensed in that State, but only 619 made claims for bounty. Many planters did not grind at all, having found it more advantageous to sell their cane by the ton. Arrangements were made for weighing the sugar on the plantations and at New Orleans, in case the producer desired to ship it to that point. Deputies were designated by the collector for this duty with reference to the convenience of producers and the prompt and economical performance of the work.

The amount of sugar weighed in Louisiana at places of production was about 60 per cent of the crop, and at New Orleans about 40 per cent. In Florida and Texas all the sugar was weighed at the place of

production.

In Florida there were 15 sugar producers licensed, 11 of whom

applied for bounty.

In Texas there were 15 producers licensed, 14 of whom applied for

bounty.

The production did not equal expectations of a year ago based on the acreage planted and the producers' estimates in their applications for license. The weather was not favorable, and the overflow of the Mississippi damaged some plantations. The crops will be considerably larger the current year from present indications.

Only a small quantity of the sugar made tested less than 80°; more

than three-fourths of the sugar made tested over 90°.

Of the 619 licensees who claimed bounty 332 made sugar by the open-kettle process and 287 used the vacuum-pan process of evaporation. The open-kettle factories produced 83,724,827 pounds upon which bounty was paid, and the vacuum pan and centrifugal factories produced 271,175,226 pounds, or more than three-fourths.

STATEMENT OF THE NUMBER OF LICENSED PRODUCERS OF SUGAR FROM SUGAR CANE WHO RECEIVED BOUNTY DURING THE FISCAL YEAR ENDED JUNE 30, 1892, CLASSIFIED ACCORDING TO THE QUANTITY OF SUGAR PRODUCED.

SUMMARY.	*
Total acreage of cane under cultivation in the United States, as reported Acreage to be reserved for seed	38, 891
Net acreage for sugar production.	213, 8403
Many producers at the date of making their statements as to of cane were unable to state the quantity to be purchased, as come and their them have made. It is estimated that the quantity	ontracts

Many producers at the date of making their statements as to acreage of cane were unable to state the quantity to be purchased, as contracts had not then been made. It is estimated that the quantity of such cane, together with the cane under cultivation by parties who will make sirup only for sale to licensed producers, and which is not included in the above statement, will amount to 8,000 acres, more or less, making the total acreage under cultivation not less than 260,000 acres.

In Louisiana improvements have been made in sugar houses the past year costing many thousands of dollars in individual cases. New machinery of the latest and most improved pattern has been put into many factories which have been remodeled and often entirely rebuilt. These improvements are largely attributable to the bounty law.

MAPLE SUGAR.

Special regulations applicable to maple sugar were issued January

5, 1892, under the provisions of the law relative to bounty.

The work of weighing the sugar was performed by deputy collectors. The plan was adopted in districts where there was a number of sugar producers of establishing central weighing stations at points easy of access. The maple sugar territory was divided into divisions or subdivisions by collectors, and a weigher stationed in each. The service which was given the producers was satisfactory.

The presence of the weigher's marks on the sugar gave it an advantage in the market in some instances, enabling it to command a higher price.

The season was a poor one for sugar-making and of the producers, numbering 4,240 who obtained licenses, only 3,049 made claims for bounty, of which 242 have been disallowed, mainly on account of the producer not making 500 pounds testing at least 80° by the polariscope.

The laboratory for making polariscopic tests of maple sugar produced in the New England States was located at Montpelier under the charge of the collector of internal revenue of the district of New Hampshire, which includes Vermont.

The laboratory for the State of New York was located at Syracuse, under the charge of the collector for the twenty-first district of New

York.

Samples of the sugar produced in Maryland, West Virginia, Pennsylvania, and the Western States were sent to this office and the polariscopic tests were made in the laboratory under the charge of the chemist.

NUMBER OF SAMPLES TESTED.

At Syracuse At Montpelier In this office	 	 1, 938 6, 086 1, 680
Total		9.704

The number of maple sugar producers who were licensed the past year was less than one fifth of the whole number in the country. The following table shows the number of producers of 500 pounds or upwards of maple sugar in the United States according to the Eleventh Census:

Connecticut Illinois Indiana - Iowa Kentucky Maine Maryland Massachusetts	8 24 23 1 39 78 415	New York North Carolina Ohio Pennsylvania Tennessee Vermont Virginia West Virginia	930 1, 101 2 10, 099 4 26
Michigan Minnesota Missouri New Hampshire	23 5		

The number who have made applications for license next year is 6,100, an increase over last year of 1,860.

MAPLE TREES TAPPED AND THE QUANTITY OF SUGAR AND SIRUP PRODUCED BY LICENSED MAPLE-SUGAR PRODUCERS, 1892.

States.	Number of maple trees tapped.	Sugar pro- duced.	Sirup pro- duced, not made into sugar.
Maine	3, 200	Pounds. 3, 246	Gallons.
New Hampshire Vermont	59, 221	82, 503	1,676
Vermont	1, 524, 103	2,416,478	38, 369
Massachusetts	5, 152	7,0123	60
New York		753, 1163	8,572

Maryland	49, 629	117, 600	688
West Virginia	3, 237	8, 968	.
Ohio	126, 879	$271,867\frac{1}{8}$	8,0951
Michigan	35, 882	68, 026ร์	2,074
Minnesota	7.490	6,613	125
Iowa	839	1,300	681
Total	2, 317, 143	3, 981, 9532	62, 444

Note.—Sugar-makers agree with practical unanimity in fixing 3 pounds per tree as an average product in a good average season. Different orchards vary greatly, dependent on their more or less favorable location. Trees in the same orchard vary greatly, one producing not more than 2 pounds, or even less, while another will produce 5 pounds. From 12 to 15 quarts of sap will produce 1 pound of sugar. A sirup weighing 11 pounds to a gallon will, if a good quality, make 83 pounds of sugar.

Most of the above were temporary appointments, the persons being employed only during the sugar-making season and receiving pay only while on duty.

ESTIMATE OF BOUNTY TO BE PAID FOR THE CURRENT YEAR.

If the production equals present expectations it is estimated that the bounty to be paid during the current fiscal year will be, in round numbers, about \$8,400,000.

EXPENSE OF PAYING THE BOUNTY.

The expenses of carrying out the provisions of law relating to the sugar bounty during the fiscal year ended June 30, 1892, were approximately as follows, viz:

Additional deputies and clerks, etc., employed for limited periods as weighers, samplers, etc., in various districts	\$98, 774, 72
Polariscopes and chemical supplies, sample boxes, triers, etc., purchased	
Salaries and expenses of 12 sugar inspectors	
matal .	190 041 01

This is exclusive of the additional appropriations for increased clerical force in the office of Commissioner of Internal Revenue amounting to \$10,990. Total expense, \$147,831.61, or about 2 per cent on the amount paid out.

RECOMMENDING THE AMENDMENT OF EXISTING LAW.

Under the present law no bounty is paid upon sugar which polarizes less than 80 per cent. A bounty of $1\frac{3}{4}$ cents is paid upon sugar which polarizes 80 per cent and less than 90 per cent, and 2 cents per pound

upon all sugar which polarizes 90 per cent and over.

Under this law there is no inducement for the producer to make a higher grade of sugar than 90 per cent except such difference as there may be in the market price. The higher the grade of the sugar the greater is the percentage of foreign substances removed from it, and, as a consequence, the weight is diminished and the amount of bounty received is lessened. Therefore, there is no profit to the producer in making a high grade of sugar, but, on the contrary, it is to his interest, so far as the bounty is concerned, to make it as nearly 80 per cent or 90 per cent as possible.

I beg to suggest that Congress be asked to so amend the law as to permit the payment of a bounty of \$2.20 per hundred pounds upon pure sugar, graduated in amount according to the polariscopic test, increasing the amount for each degree from eighty to one hundred on the

basis of \$2.20 per hundred pounds of pure sugar.

It will be seen by a calculation that a bounty upon such a basis will

amount to almost exactly the same as the bounty now paid.

The practical working of a law of this kind would be to stimulate the production of sugar of the highest grade, and to remove the temptation to keep the grade of sugar down close to the bounty line.

Amount consumed	4, 024, 646, 975
Which, divided by 64.817,000, estimated population January 1, 1892, gives the amount con-	
	60.00

Note—Messrs. Willett & Gray, publishers of the Weekly Statistical Sugar-Trade Journal, New York, estimate the total consumption for the year as 1,882,471 tons, against 1,660,938 tons for the year ending June 30, 1891.

One million eight hundred and eighty-two thousand four hundred and seventy-one tons (2,240 pounds per ton)=4,216,735,040 pounds, which, divided by 64,817,000, the estimate made by the acting Actuary of the Treasury of the population January 1,1892, gives the amount consumed per capita as 65.06

pounds.

The quantity of sugar consumed per capita in the United States during each calendar year from 1880 to 1891, inclusive, is given in the Statistical Δbstract of the United States, 1891, p. 217, prepared by the Bureau of Statistics, as follows:

and the second second	Pounds.	•	Pounds.
1880	42.7 1886 .	 	56.
1881			
1882	48.4 1888	 	56.

The average value per pound of the Louisiana sugar crop of last season, exclusive of the bounty, was $3\frac{1}{8}$ cents per pound. This value is arrived at by taking the market price of the various grades of sugar for each of the different months and then making the average. figures used in making this calculation were obtained from the Louisiana Sugar Exchange.

12. Average Specific Rate of Duty on Dutiable Sugar for the Ten Years 1881 to 1890.

[Statistician and Economist, 1892, p. 220.]

DIVISION OF CHEMISTRY.

The large increase of work of a chemical nature resulting from the provisions of the act of October 1, 1890, relating to sweet wines and sugar, led to the establishment of the above named division on February 13, 1892. All questions of a scientific nature are referred to it, and all the laboratories it has been found necessary to institute in connection with internal-revenue work are placed under its control. This change did not involve any increase in the office force, the chemist being designated to act as head of the new division, and the necessary clerical work being provided for by the transfer of a clerk from another division.

TEMPORARY AND PERMANENT LABORATORIES.

To provide for the proper supervision of the work of fortifying sweet wines, and to classify sugar for the payment of bounty according to its polariscopic test, laboratories were established during the past fiscal year at points which were considered to be the most convenient for the purpose, and were placed under the control of the several collectors in whose districts they were located. The work was performed by deputy collectors assigned to that duty, or by revenue inspectors. These laboratories were of two classes, temporary and permanent. The former were fitted up temporarily for use during the "sugar season" only, while the latter were provided with permanent fixtures in a Government building, and were in operation during the whole or a greater part of the year. The temporary laboratories were nine in number, located as follows: Lehi, Utah; Norfolk, Nebr.; Fort Scott, Kans.; Sugar Lands, Tex.; St. Cloud. Fla.; Syracuse, N. Y., and Montpelier, Vt.

The permanent laboratories were three in number, located at San

Francisco, Cal.; New Orleans, La., and Washington, D. C.

WORK PERFORMED.

Lehi, Utah.—Located at the factory of the Utah Beet-Sugar Company. Tested samples of sugar produced at this factory only. Number of samples tested, 46.

Norfolk, Nebr.—Located at the factory of the Oxnard Beet-Sugar Company. Tested samples of sugar produced at the two factories in

Nebraska. No record of work kept.

Fort Scott, Kans.—Located in the post-office building. Tested all samples of sorghum sugar produced at the three factories in Kansas. No record of work kept.

Sugar Lands, Tex.—Located at the factory of E. H. Cunningham. Tested all samples of sugar produced in Texas. In operation from October 11 until February 29. Number of samples tested, 230.

St. Cloud, Fla.—Located at the factory of the St. Cloud Sugar Company. Tested all the samples produced in Florida. No record of work

kent.

Syracuse, N. Y.—Located in the post-office building in connection with the collector's office. Tested all the samples of maple sugar produced in the State of New York. In operation from March 7 to

May 11. Number of samples tested, 1,919; total number of tests

made, 2,122.

Montpelier, Vt.—Located in the post-office building. Tested all samples of maple sugar produced in New England, including the States of Vermont, New Hampshire, Maine, and Massachusetts. In operation from March 12 until June 9. Number of samples tested 5,067; total number of tests made, 7,423.

San Francisco, Cal.—Located in the custom-house in connection with the collector's offices. The work of this laboratory consisted chiefly in testing fortified sweet wines, the work of the gaugers being checked by a careful determination of alcohol and sugar in a sample of every lot of wine fortified. All the samples of beet sugar produced in the State were tested at this laboratory also. In operation from September 1 until June 30. Number of samples of sweet wine tested 1,099; number of samples of sugar tested, 220.

New Orleans, La.—Located in the custom-house in connection with the collector's offices. Tested all samples of sugar produced in Louisiana. In operation from October 10 until April 30. The following table shows the number of samples tested and the total number of tests made

for each month while the laboratory was in operation:

. 0	Samples tested.	Total tests made.
October November December January February March April	1, 545 3, 063 1, 663 509 176	596 2, 402 4, 763 2, 444 767 261 159
Total	7, 478	11,392

Washington, D. C.—Located in the Treasury building in connection with the general laboratory of this office, additional space having been

furnished for the purpose.

In addition to the work of testing polariscopes, apparatus, etc., receiving and shipping the same to outside laboratories, testing check samples, etc., this laboratory undertook the testing of all maple-sugar samples produced outside of New England and New York State, viz: in the States of Pennsylvania, Ohio, Michigan, Iowa, Minnesota, West Virginia, and Maryland. The clerical work incident to the making out of inspectors' returns relative to those samples was also performed here.
