Whenever the receipt of samples at an outside laboratory diminished to such an extent that they did not fully occupy the time of one polaricopist, the laboratory at that point was closed and the samples received thereafter sent to Washington. Number of samples tested, 1,941; (maple, 1,716; cane, beet, and sorghum, 225); total number of tests made, 3,030.

Summary.—The number of samples tested at all internal revenue laboratories where a record was kept was as follows: cane, beet, and sorghum, 8,199; maple, 8,666; total, 16,865. Total number of tests

made, 23,967.

CHECK SAMPLES.

In order to ascertain the accuracy of the polariscopic work done at the different laboratories and of the method prescribed by the regulations, a system of check samples was instituted, whereby duplicate or triplicate samples of the same sugar were polarized at different laboratories and the results reported. Owing to the rush of work and other causes, the system was not satisfactorily established during the canesugar season, but was carried out successfully during the maple sugar season by the three laboratories in operation at that time, viz, Syracuse, Montpelier, and Washington. The samples were prepared at Syracuse, in triplicate, and sent out every third day, one to Montpelier, one to Washington, and one polarized at Syracuse.

The results obtained are embodied in the following table. The agreement is fairly good, considering the hygroscopic nature of maple sugar, which rendered the samples very liable to change during their trans-

portation:

No. of sample.	Syracuse.		Montpelier.		Washington.	
	Date of test.	Polari- zation.	Date of test.	Polari- zation.	Date of test.	Polari- zation,

GENERAL LABORATORY.

The pressure of work in the general laboratory has been greatly relieved during the past year by the establishment of the outside laboratories, particularly the one at San Francisco, which handled all the samples of fortified sweet wine previously sent to Washington. But while the auxiliary laboratories have diminished the work of the central laboratory in one way, they have added to it in another; that is, in the way of control and supervision, the sending out of supplies, checking the results, correspondence, etc. All things considered, it may be stated that the work of the central laboratory has been more than doubled by the increase incident to carrying into effect the provisions of the act of October 1, 1890, relative to sweet wines, and to sugar bounty.

The general work of the laboratory (that is, exclusive of sugar work)

covered, altogether, one hundred and eighty-six samples.

Thirty-two samples of material suspected of being oleomargarine were examined, of which number eighteen proved to be oleomargarine and fourteen butter.

Forty-nine samples of fortified sweet wine were tested, of which number thirty-five were from the previous season and fourteen were analyzed

on appeal from the California laboratory.

Fourteen samples of "hop pop" and similar fermented liquors were analyzed, principally in reference to their liability to tax. Four samples of distilled spirits were examined for the presence of artificial coloring matter, which would render the distillers liable to tax as rectifiers.

Two samples of milk were examined for adulteration, under the act of October 12, 1888, "to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia." These are the only samples ever presented for examination under the provisions of this act.

Twenty samples of material suspected of being smoking opium were examined in connection with prosecutions under section 40 of the act of October 1, 1890. Testimony was also given in court concerning these

examinations.

Fifty-six samples of inks, mucilages, typewriter ribbons, carbon paper, etc., were tested for the Stationery Division of the Treasury, to determine the relative merits of the articles submitted on bids and to test the quality of the articles delivered as compared with the samples.

The remaining nine samples included tobacco, stamp paper, orange cider, distillery slop, etc., miscellaneous samples, of which an examination was made in connection with various questions arising in the work

of the office.

A complete distilling apparatus, packed in a portable case in compact form, has been designed and manufactured under special contract to the satisfaction of this office. These outfits will be furnished to gaugers for work during the coming campaign in making field tests of the alcoholic and sugar contents of sweet wine presented for fortification. The hydrometers or alcoholometers included in these sets have all been standardized by the Coast Survey to insure accuracy.

I have the honor to be, very respectfully,

JOHN W. MASON, Commissioner.

Hon. CHARLES FOSTER, Secretary of the Treasury.

REPORT OF THE CHIEF OF THE BUREAU OF ENGRAVING AND PRINTING.

TREASURY DEPARTMENT,
BUREAU OF ENGRAVING AND PRINTING,
September 30, 1892.

SIR: I have the honor to submit the following report of the opera-

tions of this Bureau during the fiscal year 1892:

The Bureau has accomplished another very successful year's work. The tables herewith submitted show that there were completed and delivered during the year 13,728,494 sheets of United States notes, Treasury notes, gold certificates, silver certificates, bonds, and national bank notes, having the enormous face value of \$709,760,800; 36,466,196 sheets of internal-revenue stamps, containing 1,042,806, 244 stamps and having a value of over \$154,000,000; 298,625 sheets of customs stamps, containing 2,053,250 stamps, and 2,015,123 sheets of drafts, checks, certificates, etc., together with miscellaneous work for the various departments of the Government, costing \$33,579.12. The number of securities. stamps, etc., delivered during the fiscal year 1891 was the largest during a period of fourteen years prior thereto. The number delivered. during the year 1892, however, exceeds that number 6,135,057 sheets, or slightly more than 13 per cent, while the expenditures for 1892 exceed those of 1891 only 4 per cent. This large amount of work, representing in the aggregate a value of over \$863,000,000, was handled throughout the various processes necessary to its completion without the loss to the Government of a single dollar, and this result has been obtained by conducting the establishment upon a strictly business basis, and by thoroughly systematizing all its operations.

The method of printing by relief plates the internal-revenue stamps known as strip-tobacco stamps has been perfected and continued, and out of 13,240,000 sheets of this class of stamps delivered during the year 9,208,500 were printed by the relief process at a net saving of \$131,648.40. It is expected that all of the stamps of this class will be printed by this process during the year 1893 at a probable saving of

\$164,000.

During the year a process has been added in the preparation of notes and certificates known as "resizing." This process consists of passing the notes, after they have been printed and thoroughly dried, through a bath of "size," such as is used by paper makers in finishing paper, which restores the sizing and finish destroyed by repeatedly wetting the paper for the several plate printings required. The work of resizing has been in successful operation for several months, and all the notes and certificates of series 1891 have been so treated. It makes a decided improvement, both in the appearance and wearing quality of the note.

The estimated amount of work to be executed during the fiscal year 1894 is 54,904,645 sheets, an increase of 2,496,207 sheets as compared

with 1892, or nearly 5 per cent.

The Bureau is now fully equipped with all the necessary machinery, and has a force of trained employes sufficiently large to promptly execute within the regular working, hours all the securities, stamps, etc., that it may be called upon to furnish.

The requirements of Department Circulars No. 194 for 1891 and No. 110 for 1892, providing for the keeping of an efficiency record, have been strictly adhered to in this Bureau, and have governed the promotions from one grade to another. The rule, I think, has proved beneficial, both in increasing the usefulness of employes by emulation, and in promoting good discipline.

The financial statement for the year is as follows:

Appropriations for the year:	
Salaries	\$17, 450.00
Compensation of employée	367 000 00
Plate printing	530, 000. 00
Plate printing Materials and miscellaneous expenses	181, 000. 00
materials and insochancods expenses	101,000.00
Total	1, 095, 450. 00
Repayments were made to credit of these appropriations on account of engraving and printing the Treasury notes and of materials fur-	
nished the several departments, divided as follows:	00 555 00
Compensation of employés Plate printing	90, 557. 30
Plate printing	73, 214. 49
Materials and miscellaneous expenses	58, 252. 00
	222, 023. 79
Aggregate available	1, 317, 473. 79
Expenditures during the year:	
Salaries	17, 173, 49
Salaries Compensation of employés Plate printing	457, 549. 15
Plate printing	603, 006: 81
Materials and miscellaneous expenses	238, 856. 44
Total	1, 316, 585. 89
Unexpended balances:	
Salaries	276.51
Compensation of employés	8. 15
Plata arinting	207. 68
Plate printing Materials and miscellaneous expenses	395, 56
manoriaio and miscentaneous expenses	355.50
Total	887. 90

There was added to the plant of the Bureau during the year new

machinery to the value of \$17,912.57.

The new wing of the Bureau building, authorized by act of August 30, 1890, was completed during the fiscal year, and the entire amount of the appropriation authorized by the act of March 3, 1891, for machinery, furniture, and expenses of occupying the wing, amounting to \$20,000, was expended for said purposes.

I desire to again earnestly call the attention of the Department to the great need of an appropriation for the erection of an outbuilding for the accommodation of the ink mills, laundry, carpenter shop, and for storage for this Bureau. These branches of the Bureau's work are at present accommodated in temporary frame structures erected in close proximity to the Bureau building. These structures are, from their inflammable character, a serious menace not only to the Bureau

building, but to the entire neighborhood.

The extent of this danger was fully seen on the morning of June 25 last after what came very nearly being a serious fire in the rag laundry. The laundry building was badly damaged, and the scorched sides of the large frame structure used by the Commissary Department indicate how very near the neighborhood was to a serious conflagration. It was only the vigilance of the employés of the Bureau and the exertions of the District fire department that prevented it. With an experience of over three years' service here, I do not know of any item that is more urgently demanded by the necessities of the service than the one for this purpose. If a destructive fire should occur here it would cost the Government at least \$50,000 before the work of the Bureau could be resumed—and that is \$20,000 more than is asked for—besides the embarrassment that would result. I therefore recommend that the attention of Congress be called to this matter and that urgent efforts be made to secure the necessary appropriation.

In conclusion I wish to acknowledge the courtesy with which I have at all times been treated by yourself and the assistant secretaries to whom I have reported from time to time. My thanks are also due to the assistant chief and other officers of this Bureau by whom, at all

times, I have been ably seconded and cordially supported.

Very respectfully,

WM. M. MEREDITH, Chief of Bureau.

Hon. CHARLES FOSTER, Secretary of the Treasury.

APPENDIX.

MISCELLANEOUS WORK.	
Official letters writter Letters received, briefed, and referred. Bonds, contracts, and powers of attorney examined, approved, registered, and filed Certificates of deposit examined, indorsed, and referred. Internal-revenue stamp books counted and certified. Copies of reports on accounts made and transmitted. Bonds of indemnity examined and approved. Accounts received and registered. Accounts indexed. Warrants examined and checked on register of accounts. Folios copied. Judgments of the Court of Claims and of circuit and district courts examined and certified. Consular drafts registered.	4, 592 1, 990 45, 983 780 163 28, 601 25, 153 13, 846 32, 567

The foregoing statement omits mention of a very large amount of official work, principally of a legal nature, and more especially requiring the personal consideration of the Comptroller, which does not admit of systematic classification and detailed report, and yet has occupied much time and care, such as, e. g., the investigation of and decision upon legal points arising in the adjustment of accounts; the examination of claims presented; the decision upon applications for the issuing of duplicates in lieu of bonds and other securities lost or destroyed, and also for the transfer of the same; the examination of powers of attorney for the collection of money due to creditors of the United States; decisions upon the rights of persons claiming to be executors, administrators, or heirs of deceased claimants to receive money due from the United States; the examination of official bonds; answering calls for information made by Congress, the Departments, and private persons; receiving and examining emolument returns, and other work of a miscellaneous character.

I renew the recommendations made in my last annual report in regard—

First. To suits brought against the United States;

Second. To the importance of some statute of limitation which will fix some time within which claims shall be presented for payment against the Government;

Third. Double compensation allowed persons holding office under the

United States;

Fourth. Collections of balances due to the United States; and

Fifth. Individual deposits for surveying public lands.

These subjects are of public importance, and, in my judgment, the

attention of Congress should be invited to them.

It is with pleasure that I commend the persons employed in this Bureau for the faithful and intelligent manner in which they have discharged their respective duties.

A. C. MATTHEWS, Comptroller.

The SECRETARY OF THE TREASURY.

REPORT OF THE SECOND COMPTROLLER

TREASURY DEPARTMENT,
SECOND COMPTROLLER'S OFFICE,
Washington D. C., August 30, 1892.

SIR: The following report for the fiscal year concluded June 30, 1892 is respectfully submitted.

Total number of accounts, claims, and cases settled.

		1892.		1891.	
From		Number.	Amount.	Number.	Amount.
Second Auditor Third Auditor Fourth Auditor Various sources		17, 971 2, 497	\$32, 637, 359 123, 272, 312 29, 773, 336 36, 294	24, 662 13, 116 2, 693 10, 261	\$27, 348, 754 122, 912, 594 26, 596, 232 26, 482
Grand total	• • • • • • • • • • • • • • • • • • • •	58, 100	185, 719, 301	50, 732	176, 884, 062

In noting the commendable record as indicated in the above table, it affords me great satisfaction to say that the employés of this office have been faithful and efficient.

Claims and accounts coming from the Second, Third, and Fourth Auditors' offices of the Treasury are finally settled by the Second Comptroller.

The entire force of the Second Comptroller's Office during the past fiscal year, consisted of the Comptroller, deputy comptroller, 7 chiefs, 56 clerks, 1 messenger and 3 laborers—in all 69. Out of the 56 clerks the average number employed was 49.

The office is composed of seven divisions, known as the navy division (5 clerks), army back-pay and bounty division (12 clerks), army paymaster's division (6 clerks), Indian division (4 clerks), quartermaster's division (9 clerks), pension division (10 clerks), and miscellaneous claims division (10 clerks). Each division has a chief.

A detailed statement of claims and accounts disposed of during the year in each division, including a general statement of their character, is as follows:

ARMY BACK-PAY AND BOUNTY DIVISION.

Character of the claims.	Number.	Amount.
Soldiers' pay and bounty allowed	10, 623 15, 263	\$1, 234, 254 12, 676
Total	25, 886	1, 246, 924

Miscellaneous work of the division.

Settlements entered	. <i>:</i>	 	25, 886
Rehearings of cases		 	275
Official letters written		 	5, 272

On July 1, 1892, there remained on hand and unadjusted in this division 4,986 claims, estimated to be 79 days' work of the division.

ARMY PAYMASTERS' DIVISION.

Character of the accounts.	Number.	Amount.
Army paymasters, for pay of the Army	421	\$14, 457, 63

The foregoing exhibit shows the very large volume of business transacted during the fiscal year 1892. It is not thought necessary to call special attention in this connection to the entirely inadequate clerical force allowed by law for the transaction of the constantly increasing business of this office, as that matter has been fully and specifically treated in a letter addressed to you under date of September 13, 1892, transmitting estimate for appropriation for this office for the fiscal year 1894, to which your attention is most earnestly invited.

I take great pleasure in commending to your favorable consideration the personnel of this office for faithful, intelligent, and exceedingly laborious services rendered during the past year.

> GEO. P. FISHER, First Auditor.

The SECRETARY OF THE TREASURY.

REPORT OF THE SECOND AUDITOR.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, Washington, D. C., October 26, 1892.

SIR: I have the honor to submit the following report, showing, as nearly as any written statement can do, the work performed in this office during the fiscal year ending June 30, 1892, and the condition of the public business intrusted to my charge.

The duties of the Second Auditor as prescribed by the act of March 3, 1817, and subsequent acts, which are embodied in sections 277 and

283 of the Revised Statutes, are as follows:

The Second Auditor shall receive and examine all accounts relating to the pay and clothing of the Army, the subsistence of officers, bounties and premiums, military and hospital stores, and the contingent expenses of the War Department; all accounts relating to Indian affairs and to agents of lead and other mines of the United States; and after examination of such accounts he shall certify the balances and transmit such accounts, with the vouchers and certificates, to the Second Comptroller for his decision thereon. He shall keep all accounts of the War Department and of all debts due to the United States on moneys advanced relative to those bureaus; shall receive from the Second Comptroller the accounts which shall have been finally adjusted and shall preserve such accounts with their vouchers and certificates, and record all requisitions drawn by the Secretaries of those Departments the examination of the accounts of which has been assigned to him. He shall annually, on the first Monday in November, report to the Secretary of the Treasury the application of the money appropriated for certain bureaus of the War Department and make such reports on the business assigned to him as the Secretary of War may deem necessary and require

With regard to certain classes of accounts mentioned above, it may be proper to remark that no bounties for military service have been offered by the United States since April 30, 1865, in the case of volunteer soldiers, and since June 30, 1865, in the case of regulars; that the payment of a premium of \$2 for each accepted recruit, which is authorized by section 1120, Revised Statutes, was suspended February 11, 1868, and entirely discontinued May 26, 1869, by orders from the War Department; that officers of the Army have not been entitled to subsistence since July 15, 1870, an act of that date having abolished allowances and established annual salaries in lieu thereof, and that no accounts of agents of lead and other mines have been rendered to this office since 1844.

For the better transaction of public business, and in order that the various details, which are so numerous and diversified as to be beyond the capacity of one officer, may be properly supervised by responsible persons, the work of the office is distributed among eleven divisions, six of which are in charge of the chiefs of division authorized by law, and the remainder are in charge of clerks of class four as acting chiefs of division. A brief synopsis of the work assigned to it is prefixed to the detailed report of each division.

BOOKKKEEPERS' DIVISION.

The application of moneys appropriated for the Indian service, the Medical Department, Pay Department, Ordnance Department, expenses of the Commanding General's Office, contingencies of the Adjutant-General's Office, the Soldiers' Home, the National Home for Disabled Volunteer Soldiers, the Artillery School at Fortress Monroe, publication of Official Records of the War of the Rebellion, contingencies of the military establishment, etc., is indicated by the subjoined tabular statements of amounts drawn from the Treasury on requisitions of the Secretary of War and Secretary of the Interior, repayments of unexpended balances, and aggregate balances remaining in the Treasury on June 30, 1892.

Total	33, 444, 904, 78	42, 828, 285. 50

The amount drawn from the Treasury on settlements was \$308,445.41, including the following sums on Soldiers' Home account:

PAYMASTERS' DIVISION.

The records of 269 officers have been examined for the purpose of establishing dates on which longevity pay accrued under acts of June 18, 1878, and February 24, 1881, and the decisions of the Supreme Court in the cases of the United States vs. Tyler and United States vs. Morton.

The record of deposits by enlisted men, under act of May 15, 1872, shows that 6,458 deposits were made since last report, amounting to \$387,711.43, and that 8,529 deposits, amounting to \$459,989.93, have been withdrawn, upon which the depositors received \$42,699.16 interest.

The amount involved in 425 paymasters' accounts and 192 miscellaneous settlements was \$14,653,383,08, as follows:

Amount disbursed by paymasters, as per audited accounts	,
courts-martial, etc. Amount transferred to the books of the Third Auditor's Office on ac-	126, 067. 34
count of subsistence and quartermasters' stores, transportation furnished soldiers on furlough, etc., also transfers on Second Auditor's	•
books to adjust appropriations	31, 118. 43
etc	46.70
Credits on account of overpayments refunded and charges removed on satisfactory explanations	364. 16
Payment of transportation accounts	131.47
Total	14, 653, 383. 08

On June 30, 1892, the accounts of paymasters were rendered to this office to include March, 1892, audited to include December, 1891, and confirmed by the Second Comptroller to include September, 1891. Thirty-five paymasters were on duty, so that the 109 monthly accounts on hand unsettled represent a period of about three months.

ORDNANCE, MEDICAL, AND MISCELLANEOUS DIVISION

The amount involved in 1,339 accounts and claims disposed of was \$6,324,426.75, as follows:

Ordnance, ordnance stores, etc., ordnance service, arming and equipping the militia, armament of fortifications, repairs of arsenals, and other appropriations of the Ordnance Department	
Medical and hospital department, artificial limbs, Army Medical Mu-	фэ, э 4 1, осо. э <i>2</i>
seum, Library of the Surgeon-General's Office, trusses and appliances	•
for disabled soldiers, and other appropriations of the Medical De-	·.
partment	696, 244, 14
Contingencies of the Army, publication of Official Records of the War	000, ====
of the Rebellion, expenses of military convicts, expenses of the Com-	
manding General's Office, contingencies of the Adjutant-General's	4
and Inspector-General's Departments, special acts of relief, Artillery	
School at Fortress Monroe, Infantry and Cavalry School at Fort	
Leavenworth, etc	225, 001. 36
Expenses of recruiting, local bounty claims, etc	88, 709. 30
Support of National Home for Disabled Volunteer Soldiers	1, 966, 583. 63
Total	6 324 426 75

When the miscellaneous files of settled accounts were placed in charge of this division, a large number of vouchers for expenses connected with enrollment and drafts during the late war remained in bundles and had never been properly arranged, and the pay rolls of armories and arsenals were to a great extent separate from the accounts to which they belonged, being too large for the file boxes. For convenience of reference and for the better preservation of these rolls and vouchers, it was deemed advisable to place them, not only in their proper order in the files, but also in boxes. From April to June, two clerks were employed on this work, during which time 72,507 vouchers were transferred from bundles to boxes, 10,241 were properly folded, and 5,508 were briefed.

INDIAN DIVISION.

The work of the division is indicated by the following statements:

	Money accounts.	Property accounts.	Claims.
On band July 1, 1891. Received during the year .	431 886	399 674	32 5, 206
Total. Audited and reported to the Second Comptroller		1, 073 757	5, 238 5, 224
On hand Tune 30, 1892	360	316	14

Disbursements allowed on the examination of accounts	
Total amount of disbursements allowed	 9, 379, 110, 42

The term "accounts" as above used includes both the quarterly accounts rendered by disbursing officers and the "explanations" filed by them in modification thereof to remove items suspended in settlement. The following analysis is therefore added to exhibit the status of each of these species of accounts on June 30, 1892:

	Cash. Property.		:		
	Quarterly accounts.	Explana- tions.	Quarterly accounts.	Explana- tions.	Total.
In process of examination	56 152	26 126	49 123	31 113	162 514
Total	208	152	172	- 144	676

Attention is invited to the following facts exhibited by the foregoing tables: The total number of accounts and claims on hand is 152 less than a year ago. The number of quarterly accounts, cash and property, is less than at that date by 44 cash and 68 property. Of claims, there were 5,238 under consideration, against 3,719 the previous year, an increase of 1,519; yet but 14 remained unsettled at the end of the year. The total number of accounts and claims settled in 1891 was 5,520; this year it is 6,938, an increase of 1,418. The disbursements show an increase of \$1,526,631.17. The accounts of 136 disbursing officers are now in the current files awaiting action or are on the desks of examiners. The number of quarterly cash accounts on hand is 360, an average of about 22 per officer. It is not practicable to reduce this

average much, because of the necessary connection between the accounts here and the preceding and succeeding accounts held by the Second Comptroller and the Indian Office, respectively.

In addition to the work of settlement, the voluminous records of the division, essential to the proper tracing of property and the fixing of responsibility where it belongs, have been brought well up to date.

Besides the above, the time of some of the best clerks has been largely occupied in overhauling the files to obtain evidence necessary to comply with the calls of the Attorney-General and the courts. These researches are laborious and exacting, though they count for little in the record of work performed. Much copying has been done in the course of this service, the total number of pages copied, including miscellaneous matters, being 4,731; number of letters written, 5,699.

PAY AND BOUNTY DIVISION.

The record of this division shows that during the fiscal year 1892, 15,673 new claims for pay and bounty growing out of the war of the rebellion (with few exceptions) were presented for the consideration of this office; that 2,750 claims which had formerly been examined and disposed of were revived; that 8,534 claims were certified and allowed; that 13,979 were disallowed and that 8,636 were referred elsewhere. As explained in last year's report the term "referred elsewhere" is used to cover three classes of claims, namely, (1) claims which are actually sent out of the office or referred to other divisions; (2) claims that have already been formally settled, leaving nothing more due to the claimant—the claimant is so notified and the papers are filed with the settlement; (3) claims that have been suspended for more than three years for material evidence required to complete the cases, and in which no reply has been received from the claimant or attorney. Cases of the latter class, which constitute the majority of those reported as "referred elsewhere" are regarded as abandoned and are transferred to the disallowed files. Some of these may, eventually, be revived by the receipt of new evidence, but the great mass of them will never be disturbed.

The total number of claims acted upon was 31,149, and the number remaining on hand June 30, 1892, was 45,511. The amount required to pay 8,534 claims allowed was \$1,047,169.95, which gives an average of \$122.70 per claim. In transacting the business of the division 167,494 letters were written and 389,889 rolls and vouchers consulted.

DIVISION FOR INVESTIGATION OF FRAUD.

It is the duty of this division to examine and investigate all cases in which fraud, forgery, unlawful personation of claimants and witnesses, disputed questions of heirship and identity, irregular practices of attorneys, etc., are involved, and to take the necessary steps, through the officers of the Department of Justice and otherwise, to recover any moneys that may have been improperly drawn from the Treasury and to punish the offenders.

The number of cases on hand June 30, 1891, was 1,415; number referred to the division during the year, 930; making a total of 2,345 cases for consideration; 1,275 have been disposed of, leaving 1,070 cases on hand June 30, 1892.

PROPERTY DIVISION.

About 1,200 officers render quarterly returns of clothing, camp and garrison equipage. The number of those returns on hand examined is therefore less than 1½ returns per officer, and the work of the division is practically up to date.

I deem it proper to invite attention to the subjoined extract from the report of this office for 1887, which was also inserted in the reports for 1888 and 1891:

Prior to 1871 this division was charged with the settlement of property accounts or returns rendered by Army officers responsible for ordnance, ordnance stores, and supplies, but on December 19, 1870, the Secretary of War directed that such returns, after rigid examination by the Chief of Ordnance, should be filed in the Ordnance Office, and not transmitted to the Treasury. As the act of March 3, 1817 (section 277, Revised Statutes), makes it the duty of the Second Auditor to receive and examine all accounts relating to military stores, it may be questioned whether such property accounts as have received only the rigid examination of the Ordnance Office have been adjusted in accordance with law. (See 13 Op., 483.)

DIVISION OF INQUIRIES AND REPLIES.

The work of card-indexing the book records of payments to enlisted men of the volunteer Army, said books having been transferred to this office by the Paymaster-General in 1889, was completed April 21, 1892. It was commenced January 27, 1890, and the total number of cards written is 728,627, as follows: January 27 to June 30, 1890, 143,574; July 1, 1890, to June 30, 1891, 497,410; July 1, 1891, to April 21, 1892, 87,643.

Considerable progress has been made in card-indexing payments to enlisted men on detached service, in hospital, etc., 4,977 vouchers having been disposed of, from which 259,733 cards were written. This covers the entire year of 1861, a large part of 1862 and 1863, and a portion of 1864. Including 8,813 cards written last year, the total number of payments of this class which have been card-indexed is 268,546.

The card-indexing of single vouchers for current payments made by paymasters of the Army is well in hand. It was estimated that these payments would require about 36,000 cards per year, but the estimate should be increased at least 50 per cent, for the reason that payments to officers of the regular Army, as well as enlisted men, are included. The number of current payments to these classes of payees which have been card-indexed is 69,060, namely, prior to July 1, 1891, 2,211; July 1, 1891, to June 30, 1892, 66,849.

The card-indexing of payments to men absent from their commands has produced very satisfactory results. No day passes without applications being made for information concerning this class of payments. Under the old system a clerk had literally to search for a record of payments, often examining several bundles of vouchers before he could find what he wanted. Now he can obtain from the cards such directions as will enable him to get any required voucher with the least possible trouble or delay.

In January last the Record and Pension Office turned over to this Bureau upward of 100,000 descriptive lists of volunteer soldiers of the late war. As opportunity offered 23,670 of these papers have been arranged and filed as follows: 2,561 with settlements, 1,234 with pend-

ing claims, and 19,875 with similar papers pertaining to the regiments

to which the men belonged.

Looking to next year's work I find that two acts were passed during the first session of the Fifty-second Congress which will materially affect this division, namely, the act of July 27, 1892, granting pensions to survivors of the Indian wars of 1832 to 1842, and the act of August 5, 1892, granting pensions to army nurses. About 25,000 payments made on hospital rolls to army nurses have already been card-indexed, and the cards will probably be assorted by the time that calls for information are made by the Pension Bureau. It is, therefore, confidently anticipated that such calls will be promptly responded to without additional clerical assistance. With regard to the survivors of Indian wars, known as the Black Hawk war, Creek war, Cherokee disturbances, and the Seminole war, the inquiries will not be so easily answered, because the records can not be so readily referred to.

MAIL DIVISION.

The incoming mail is generally distributed within an hour after it reaches the office, special attention always being given to important matters. The system devised for examining and disposing of the outgoing mail continues to work satisfactorily. All letters from the office are carefully scrutinized and any errors that may be discovered are charged to the clerks who made them. The result is greater uniformity in business methods and fewer errors, either of omission or commission.

ARCHIVES DIVISION.

In copying the worn and defaced registers of payments to volunteer organizations which have been in constant use for about 20 years it is found necessary, in order to correct errors made when the registers were first written, to refer to every muster and pay roll covering said payments. The number of the paymaster's voucher has been added to the record of payments, which much simplifies the work of withdrawing papers from the files. The record now shows at a glance the company and regiment to which payment was made, the period embraced in each payment, the paymaster's name, the file number, the number given to the account by the Pay Department, and the number of the voucher.

All original muster and pay rolls and other vouchers which have been copied are very carefully preserved, and a proper index to them is kept, so that should a question arise as to the correctness of the copy or the genuineness of a signature the original document can be produced at a minute's notice.

THE OLD ARMY DIVISION.

The work performed is shown by the following statement:

Classes of claims.	Claims pending July 1, 1891.	New claims received.	Old claims revived	Allowed.	Dis- allowed.	Referred else- where.	Claims pending June 30, 1892.
Arrears of pay, etc. (regulars and volunteers)	160	181	79	44	148	79	149
dresses, tailors, etc	68	136	56	39	68	65	88
Total	. 228	317	135	83	216	144	237

The time of one clerk was occupied in answering letters of inquiry as to payments made and amounts due for services in the old Army and in furnishing information to other divisions of the office. The number of vouchers examined was 133,160; number of letters written, 7,672; number of cards written for restoring and improving old records, 66,725. The amount found due claimants in the 83 allowed claims was \$2,256.15.

Under section 4818, Revised Statutes, and the legislative, executive, and judicial appropriation acts of February 26, 1889, July 11, 1890, and March 3, 1891, the accounts of soldiers who deserted or were discharged by sentence of court-martial subsequent to March 3, 1881, also the accounts of deceased soldiers whose arrears of pay, etc., have not been claimed, have been audited in favor of the Soldiers' Home. The number of cases acted upon was 6,865, in 4,656 of which nothing was due. In the remaining 2,209 cases balances aggregating \$65,828.84 were found due and passed to the credit of the permanent fund of the Home.

RECAPITULATION OF THE WORK OF THE OFFICE.

Description of accounts.	On hand July 1, 1891.	Received.	Disposed of.	On hand June 30, 1892.

Total number of letters written	210, 328 230

CONDITION OF PUBLIC BUSINESS.

Accounts of disbursing officers.—As shown by the above recapitulation there are 657 disbursing accounts on hand awaiting settlement, namely, 109 paymasters' accounts, 188 miscellaneous accounts, and 360 accounts of Indian agents. Although this is 16 in excess of last year's showing, the increase does not call for special remark. The paymasters' and miscellaneous Army accounts are practically up to date. These accounts are rendered promptly and are noticeable for their good form and general accuracy. The accounts of Indian agents are more nearly up to date than they have ever been since the war. Of late years there has been a commendable improvement in the form in which they

reach this office, but they are susceptible of further improvement in the matter of correctness and compliance with law and the regulations of the Indian Office. This is indicated by the fact that there are 126 "explanations" awaiting consideration. These explanations consist of evidence furnished by disbursing officers in connection with items suspended in the settlement of their accounts, and are themselves evidence

of irregularities and error.

Property accounts.—There are 1,869 property accounts (1,553 Army and 316 Indian) on hand, a decrease of 168 as compared with last year's report. The Army property accounts are generally correct, owing in a great measure to the rigid accountability to which officers are held by the War Department for every article of public property intrusted to them. The remarks concerning the disbursing accounts of Indian agents are also applicable to their property accounts, there being 113 "explanations" awaiting action. It is only fair to add that Indian property embraces a far greater variety of articles than the Army property which is accounted for to this office, and that the modes of expenditure are also more various.

Claims.—The number of unsettled claims is 45,762, namely, 45,748 pay and bounty and 14 Indian, a decrease of 12,735 since June 30, 1891. The unsettled Indian claims call for no remark. This class of work has never been in arrear. These claims are chiefly for supplies furnished to meet current wants of the Indian service, and contractors urge as one reason for immediate adjustment that they sell on so small a margin that every day's delay in payment is an injury to them. Some delay is absolutely unavoidable, but, so far as this office is concerned, it has been reduced to a minimum. With regard to claims for arrears of pay and bounty, it is a noteworthy fact that a large proportion is presented by the heirs at law of the soldier and by collateral heirs. In some instances more than twenty heirs, residing in half a dozen different States, have applied for a soldier's pay and bounty. Each heir is required to furnish satisfactory evidence of identity and heirship, and his claim must be decided upon the evidence presented and upon the law applicable to the case.

Claims for pay and bounty are registered in the name of the soldier, and only one settlement is made in each case, no matter how many claimants there may be. It will be seen, therefore, that while 31,592 claims for pay and bounty are reported as disposed of during the fiscal year 1892, there were really many times that number of claimants. In like manner the 45,748 claims on hand, while representing only that number of soldiers, may represent 150,000 claimants or even more. follows as a matter of course that the work now involved in settling a soldier's case, where many heirs appear, is very much greater than it would have been to settle the same case twenty years ago, when only the soldier himself, or his widow, was represented. In addition to this it should be stated that claims are now examined and settled with a thoroughness not considered necessary even a dozen years since. der the practice of former years if a soldier claimed bounty his claim for bounty was considered to the exclusion of everything else, unless it appeared that he had been overpaid. Then the debit items were taken cognizance of. If a soldier now presents a claim, either for pay or bounty, his claim is considered in connection with his entire military service, and whatever he may be found entitled to is allowed and paid whether he makes a specific claim for it or not. In other words, his account is exhaustively examined and settled on principles of strict and impartial justice.

DISALLOWED ČLAIMS.

In my last report I commented at some length on the fact that more than 60 per cent of the claims for arrears of pay and bounty acted upon during the preceding ten years were disallowed for the reason that payment had already been made in full, either to the soldier or to his legal heirs, and I suggested the enactment of a law authorizing the Second Auditor to reject all such cases without referring them to the Second Comptroller. Following up the matter, I prepared a bill which received the approval of the Second Comptroller and the Secretary of the Treasury, was presented in both Houses of Congress, passed the Senate without objection, and was favorably reported by the House Committee on War Claims. It was finally incorporated in the bill making appropriations for the legislative, executive, and judicial expenses of the Government, and became a law July 16, 1892, as follows:

That hereafter nothing in section 277 of the Revised Statutes shall be so construed as to prevent the Second Auditor of the Treasury from disallowing claims for arrears of pay and bounty in cases where it appears from the records and files of his office that payment in full has already been made to the soldier himself, or to his widow or legal heirs: Provided, That if any person whose claim may be disallowed be dissatisfied with the action of the Auditor, he may, within six months, appeal to the Second Comptroller; otherwise the Auditor's action shall be deemed final and conclusive, and be subject to revision only by Congress or the proper courts.

The necessity for the passage of such a measure, which was fully apparent a year ago, is emphasized by another year's experience. From July 1, 1891, to June 30, 1892, as shown by the present report, 14,195 claims for pay and bounty, including those which accrued prior to 1861, were disallowed and 8,617 allowed. That is, out of 22,812 claims formally certified by the Second Auditor and Second Comptroller, more than 62 per cent were cases in which nothing was due the claimants.

It is perhaps unnecessary to say that the power now conferred upon the Auditor to deal summarily with a class of claims which for eleven years past has been a source of trouble and vexation will be exercised with due care and discretion. They will be so treated that in case of appeal they can be referred to the Comptroller without avoidable delay and with the least possible expenditure of labor.

PAYING SOLDIERS OF THE LATE WAR ON A GOLD BASIS.

During the last eight or ten years the question of paying soldiers who served during the war of the rebellion, or their widows and legal heirs, the difference between paper currency and gold has frequently been raised, and this office has on several occasions been called upon for an estimate of the amount which would be required to make such payment. So far as I am informed enlisted men are the only persons to whom it has been proposed to grant relief of this character, although every soldier, commissioned as well as enlisted, would seem to have an equal claim if it be admitted that any just or equitable claim exists. As the subject is one of general interest, especially in view of the enormous amount involved, I deem it proper to place on record the following estimate and explanatory remarks:

The difference between coin and currency which it has been proposed to pay to enlisted men of volunteers is on their pay proper only, but there is no record, either here or elsewhere, of the amount paid to enlisted men on that account during the late war. As a rule officers and men of volunteers were paid on the same rolls, which contained not

only pay proper, but also all allowances to which they might be entitled, such as subsistence and other allowances of officers, and clothing, bounty, and traveling allowances of enlisted men. Another obstacle in the way of a satisfactory estimate of the amount involved is that the actual number of enlisted men who served during the war of the rebellion is not known. The aggregate strength of the armies of the United States at various times during the war was as follows:

	Officers and men.
January 1, 1862	 575, 917
March 31, 1862	 637, 126
January 1, 1863	 918, 191
January 1, 1864	
January 1, 1865	 959, 460
March 31, 1865	 980, 086

These figures are official, but I am not aware that any further statistics on the subject have been compiled. Taking the above figures in connection with the fact that nearly 2,000,000 troops were added to the Army under special authority, calls, and proclamations, issued between January, 1862, and December, 1864, I estimate that the average strength of the Army during the period from January 1, 1862, to April 9, 1865, was as follows:

•	Officers	and men.
January 1 to December 31, 1862		700,000
January 1 to December 31, 1863		800,000
January 1 to December 31, 1864		900,000
January 1 to April 9, 1865		950,000
		,

The proportion of officers to enlisted men is not known, but for the purpose of this estimate a regiment of infantry of minimum strength may be taken as a basis of calculation. Such a regiment consisted of 36 officers and 830 men, which will give a proportion of a fraction more than 40 officers to each 1,000 men; but some allowances must be made for officers of the general staff, of whom about 1,600 were in the service in 1862; 3,000 in 1863, and 4,000 in 1864 and 1865. The 700,000 troops estimated to have served in 1862 would, therefore, approximately consist of:

Staff officers, 1,600; regimental and company officers, 28,000; rank and file, 670,400; total, 700,000. In 1863 there would be 3,000 staff officers, 31,800 regimental and company officers, and 765,120 rank and file; total 800,000. In 1864 the number would be: staff officers, 4,000; regimental and company officers, 35,800; rank and file, 860,200; total, 900,000. In 1865 there would be 4,000 staff officers; 37,840 regimental and company officers, and 908,160 rank and file; total, 950,000.

The amount required to pay a regiment of infantry consisting of 830 enlisted men was, in 1862, a little more than \$11,000 per month; so that the pay proper of 670,400 enlisted men for that year would be, in round numbers, \$106,500,000.

By the act of May 1, 1864, the pay of enlisted men was increased, and the amount required to pay a regiment of minimum strength, subsequent to the date of said act, was about \$14,000 per month.

By the above method of calculation, which in view of the scanty data obtainable appears to be the only feasible one, the amount required to pay the difference between coin and currency is \$144,922,500, as follows:

Date.	Estimated number of enlisted men.	Amount of pay proper in currency	Amount required to place the pay on a gold basis.	Difference between coin and cur- rency.
January 1 to December 31, 1862. January 1 to December 31, 1863. January 1 to April 30, 1864. May 1 to December 31, 1864. January 1 to April 9, 1865.	765, 120 860, 200 860, 200	\$106, 500, 000 121, 000, 000 45, 500, 000 116, 000, 000 50, 500, 000	12 per cent 32 per cent 51 per cent 51 per cent 37 per cent	38, 720, 000 23, 205, 000
Total	tures for abse say 5 per cent	nce without le	ave, clothing	152, 550, 000 7, 627, 500
Net amount required to pay the differen	nce between co	oin and curren		144, 922, 500

If commissioned officers were included in the foregoing estimate, the the amount required to pay volunteers the difference between gold and greenbacks would be in the neighborhood of \$200,000,000.

MONEY DUE THE ESTATES OF DECEASED COLORED SOLDIERS.

The fact that there is money (arrears of pay and bounty) in the Treasury belonging to the estates of deceased colored soldiers who served during the late war, has excited considerable interest from time to time, and sundry efforts have been made to obtain possession of it for the benefit of colored educational and charitable institutions. In order to place the matter in a proper light, the following details are given:

In accordance with the joint resolution of March 29, 1867 (15 Stat., 26) all moneys certified to be due colored soldiers were paid to the Commissioner of the Freedmen's Bureau, who was charged with the faithful disbursement of the funds. When the Bureau was discontinued in 1872 the unexpended balance of said funds was turned over to the Adjutant-General's Department for disbursement, and every effort was made to find the persons entitled thereto. In many instances it was ascertained that the payees were dead, and in all such cases the amounts were returned to the Treasury. In other cases the funds were held for seven years, and then repaid into the Treasury on the legal presumption of the death of the payees. The total amount repaid was \$504,000. In 1882 it was found that more than one-half of that sum had been claimed, the actual amount then remaining unclaimed being \$240,233.

Although no separate account has been kept of the claims paid since 1882, or still pending, it is estimated that the amount now unclaimed does not exceed \$100,000, a large proportion of which will undoubtedly be paid out, as claims are being constantly filed by the original claimants, who could not be found by the disbursing officers, or by the heirs of those who died subsequent to the allowance of their claims. It is, of course, quite impossible even to estimate what sum will finally remain unclaimed, because claims of this character are not barred by any statute of limitations. If it should be deemed just or expedient that unclaimed moneys belonging to the estates of colored soldiers be set apart, either for the education of the colored race or for charitable purposes, it will be necessary to determine by actual examination how much remains unclaimed. It will also be necessary to bar all claims not presented prior to some date to be fixed by law.

SOLDIERS' HOME ACCOUNTS.

By the act of March 3, 1851, (section 4818, Revised Statutes), all court-martial fines and all forfeitures on account of descrition and all

moneys belonging to the estates of deceased soldiers remaining unclaimed for three years subsequent to the death of such soldiers were set apart and appropriated for the support of the Soldiers' Home. For reasons which need not now be considered, payments to the Home from these sources fell very much in arrear, and in 1883, after a committee of the Senate had investigated the matter, a special force of clerks was provided to settle the accounts of deserters and deceased soldiers. In 1886, Congress limited the settlement of such accounts to those that accrued subsequent to March 3, 1851, and in 1889 the adjudication of said accounts was still further limited to such as originated subsequent to March 3, 1881. During the nine years from 1883 to 1892 the accounts of all deceased soldiers whose arrears of pay, etc., remained unclaimed for three years were adjusted and the proceeds placed to the credit of the permanent fund of the Soldiers' Home, in accordance with the act of March 3, 1883. The accounts of deserters from the cavalry, artillery, and fifteen regiments of infantry from April 13, 1861, to March 3, 1881, were also settled and the proceeds similarly disposed of, and settlements have been made crediting the permanent fund with moneys forfeited by soldiers dishonorably discharged between 1881 and 1891 by sentence of court-martial with forfeiture of pay, etc. The accounts of soldiers who deserted subsequent to March 3, 1881, have also been adjusted with few exceptions.

The accounts of the Home are now settled substantially up to date that is, so far as existing law permits them to be settled—and the

special force of clerks was dispensed with on June 30, 1892.

By the operation of the act of February 26, 1889, which prohibited the adjustment of accounts which originated prior to March 3, 1881, the following classes of cases have not been examined:

(1) Accounts of soldiers who deserted from the Army between March 3, 1851, and

April 13, 1861, and did not return to the service.

(2) Accounts of soldiers who deserted from four regiments of infantry (Sixteenth to Nineteenth, inclusive), between April 13, 1861, and December 31, 1866, and did not return to the service.

(3) Accounts of soldiers who deserted from forty-five regiments of infantry (First to Forty-fifth, inclusive), between January 1, 1867, and December 31, 1869, and did

not return to the service.

(4) Accounts of soldiers who deserted from ten regiments of infantry (Sixteenth to Twenty-fifth, inclusive), between January 1, 1870, and March 3, 1881, and did not return to the service.

(5) Accounts of soldiers dishonorably discharged from the Army by sentence of court-martial between March 3, 1851, and March 3, 1881, with forfeiture of pay and allowances.

If the bar to the settlement of these five classes of accounts were removed the permanent fund of the Home would be increased by arrearages which have accrued since March 3, 1851, as follows:

Forfeitures by soldiers who deserted between 1851 and 1861 (estimated) \$50,000 Forfeitures by soldiers who deserted between 1861 and 1881 (estimated).... 500,000 Forfeitures by soldiers dishonorably discharged between 1851 and 1881 (estimated).. ... 150,000

PAYMENT OF CLAIMS FOR BACK PAY AND BOUNTY.

For many years past this office has earnestly recommended the appropriation, in advance, of sufficient funds to pay such claims for arrears of pay and bounty for services during the late war as might be certified by the Second Auditor and Second Comptroller. By the act of April 4, 1890, appropriations were made to meet claims to be certified during the remainder of the fiscal year 1890, and by the acts of August 30, 1890, and March 3, 1891, sufficient appropriations were made for the fiscal years 1891 and 1892, respectively. An estimate was submitted for the fiscal year 1893, as follows: Pay of two and three year volunteers, \$650,000; bounty to volunteers and their widows and legal heirs, \$375,000, and bounty under the act of July 28, 1866, \$50,000; total, \$1,075,000. The amounts appropriated by the act of August 5, 1892, were: Pay of two and three year volunteers, \$435,000; bounty to volunteers and their widows and legal heirs, \$250,000; bounty under the act of 1866, \$35,000; total, \$720,000, being \$355,000 less than the estimate.

Up to the date of this report the claims certified (during four months of the fiscal year 1893) aggregate \$417,720, namely: Pay of two and three year volunteers, \$258,500; bounty to volunteers, etc., \$141,110, and bounty act of 1866. \$18,110, leaving only \$297,280 available to meet claims to be certified during the rest of the fiscal year. The indications are that this balance will be exhausted long before June 30, 1894, and that many claimants will have to wait for their dues unless additional appropriations are made early in the ensuing session of Congress.

THE CLERICAL FORCE.

It affords me great satisfaction to say that the clerks of this office are entitled to credit for diligence, fidelity, and general efficiency. The detailed reports of each division show the amount of work that has been performed, but, in the words of one of my predecessors (the late Hon. E. B. French), "the wearisome details, the anxious, patient, and faithful clerical labor necessary to accomplish this can only be imagined."

In compliance with the directions of the President of the United States, dated December 4, 1891, and the orders of the Secretary of the Treasury, dated December 24, 1891, there has been kept "an efficiency record of all persons in the classified service, with a view to placing promotions wholly upon the basis of merit." This record shows how each person stands as to daily punctuality and attendance and the monthly average efficiency of each. The elements of efficiency are punctality, attendance, industry, accuracy, aptitude, conduct, and ability. The record has been kept justly and impartially, and affords conclusive evidence of the high standing of the clerical force. (On July 1, 1892, the Secretary's orders of December 24, 1891, were so far modified as to require that the monthly average efficiency shall be determined by punctuality, attendance, conduct, industry, and ability.)

Several competitive examinations for promotion were held between January 1 and June 30, and it is gratifying to be able to report that the result reflected great credit upon those who were examined. My only regret is that there were not vacancies enough in the higher grades to reward all those who proved themselves worthy of promotion.

Very respectfully,

J. N. PATTERSON,
Auditor.

The SECRETARY OF THE TREASURY.

REPORT OF THE THIRD AUDITOR.

TREASURY DEPARTMENT,
OFFICE OF THE THIRD AUDITOR,
Washington, D. C., November 1, 1892.

SIR: I have the honor to submit the annual report of this bureau for

the fiscal year ending June 30, 1892.

I desire to acknowledge with generous appreciation the faithfulness, efficiency, and industry of the chiefs and employés of the different divisions. The work of the office has been entered into by all with energy and earnestness and the results of the year's labors are very

gratifying.

The consolidation of the divisions of this office, to the end that business should be divided on practical lines, has enabled the bureau to make a better exhibit in results, with two less chiefs, than has ever marked its history. The Horse Claims and Miscellaneous Claims Divisions being merged together, the work will hereafter be done in four divisions, with a reduction of \$6,000 per year in salaries, and as the result of consolidation a very material saving of labor that in superfluous organization is always wasted in unnecessary references and duplication of duties.

The work of this office is so closely in touch with the active and marvelous development of the country that the growth of business continues to steadily increase. The summary presented by the book-keeper's division, especially as indicated in the items for river and harbor improvements, will illustrate the priceless advantage of this appropriation to the general public and the fidelity which marks its outlay. The disbursements audited exceed by \$14,000,000 the amount of any previous year, while the average increase of work per clerk em-

ployed is near 10 per cent.

The auditing of pension payments represents about one-half the labor incident to the duties of this bureau. The very full statistics presented will best represent the care and detail employed in the supervision of this appropriation, given to the soldiers of the Union on account of their heroic and patriotic sacrifices to the Republic. The disbursements as audited during the fiscal year were \$21,263,148.17 more than in 1891, while the original and increase pensions listed on the ledgers were 169,402 more than the last fiscal year. In the reimbursement section, the duty of which is to apply accrued pensions to the payment of last sickness and burial expenses of indigent pensioners, the number of deaths in excess of 1890 shows an increase of 40 per cent.

Under legislation of recent years, many war claims heretofore adjudicated in the Departments are reviewable in the Court of Claims, and the labors of this office are considerably increased in the collecting of

information for the use of the court.

NOTE—Much of the summary relating to the duties and work of the different divisions of this office is omitted for want of space.

HORSE CLAIMS DIVISION.

The statute of limitation barring the presentation of new claims went into effect August 13. During the year 2,185 cases have been disposed of, and I hope by the close of the next fiscal year to dispose of all the unfinished business now on the docket. The division will be consolidated with that of the miscellaneous claims.

MILITARY DIVISION.

At the commencement of the fiscal year I consolidated the collection division with this one, and the result has been not only a saving of salary by having one less chief, but by the systematizing of business on new lines, a saving of labor that has permitted the transfer of a number of clerks to pension and other work that is so rapidly increasing.

CLAIMS DIVISION.

To this division is assigned all the miscellaneous claims, railroad and telegraph accounts, lost vessels, preparation of evidence called for in cases before the Court of Claims, Oregon and Washington Indian war claims, State war claims, etc. The nature of the duties requires not only expert accountants, but a familiarity with appropriations, statutes, and departmental business, that renders it one of the most responsible and important divisions in the Treasury.

PENSION AND BOOKKEEPER'S DIVISIONS.*

THE RECORDS.

The records are in a fairly good state of preservation; but for want of room it has not been possible to keep each class of accounts in its proper consecutive order; however, much work has been done to that effect. A large quantity of old matter of a very miscellaneous character has been assorted and briefed, and several hundreds of volumes of pension abstracts have been bound, making an unbroken series of abstracts from 1862 to 1889 inclusive.

Although additional shelving has been provided for every available place in the files rooms and a great deal has been done in the way of moving and condensing the packages of records, unless additional space is largely added it will not be possible to accommodate the current files of the coming year.

The increase in bulk of pension papers has been beyond all precedent and is likely to continue for many months. The force employed consists of two clerks and two laborers.

Respectfully,

W. H. HART, Auditor.

Hon. CHARLES FOSTER.

Secretary of the Treasury.

^{*} Tabulated statements relating to the operations of these divisions will be found in the Appendix.

APPENDIX.

EXCHANGE.

Bills of exchange were sold by the pay officers of the Navy Department during the year to the amount of \$1,074,568.05. Of this sum \$776,407.33 was drawn on the Navy agents at London, and \$298,160.72 on the Secretary of the Navy.

These bills were negotiated at varying rates of exchange, the gross loss being \$3,408.20; gross gain, \$12,044.94, making the total net gain

of \$8,636.74.

The following tables show these transactions in detail.

Drafts drawn on the Navy Agents, London, England, for the Fiscal Year ending June 30, 1892.

Note.—Much of the summary relating to the work of the different divisions of this office is omitted for want of space.

SPECIAL FISCAL AGENTS AT LONDON.

The same contract continues in force with Messrs. Seligman Brothers, special fiscal agents at London, as stated in my last annual report, viz:

A commission of one-half of 1 per cent is paid on disbursements made by them on account of the Navy Department. On daily balances in their hands they pay to the Government the rate of interest paid by the London joint stock banks, and on advances they receive the rate charged by the Bank of England. Commissions amounting to \$4,398.29 have been paid to them during the year. They have paid the amount of \$2,903.65 as interest on the daily credit balances.

There has been a net gain of \$3,866.80 in the transfer of funds from

New York to London.

DISBURSEMENTS FOR PENSIONS.

Pension Agency.	Navy invalid pensioners.		Children under 16 years of age drawing pension.	Dependent relatives.	Minors.	Total.	Disburse- ments for the year ending June 30, 1892.
Boston Chicago New York Philadelphia San Francisco Washington	3, 316 3, 068 2, 481 2, 112 523 3, 342	1, 376 679 1, 047 825 89 829	607 405 651 390 52 457	210 99 134 101 9	47 31 28 33 8 33	5, 556 4, 282 4, 341 3, 461 681 4, 789	\$804, 386. 77 590, 337. 81 558, 805. 99 437, 106. 00 108, 638. 80 747, 798. 64
Total	14, 842	4, 845	2, 562	681	180	23, 110	3, 247, 074. 01

The sum of \$4,936.01 was expended under section 4718 of the Revised Statutes to reimburse those who bore the expense of last sickness and burial of pensioners.

CONDITION OF BUSINESS.

It will be seen that the current work of the Bureau is practically up to date. The current business that was most in arrears a few years ago was replies to inquiries from the Pension Office asking the naval history of applicants for pension for service in the Navy. Inasmuch as final action could not, in such cases, be taken by the Pension Office until the information asked for had been furnished by this Bureau, I deemed it an act of simple justice to applicants for naval pensions and the legal representatives of those who may have died to make that class of work special, and to bring it up to date at all hazards.

For this purpose Congress granted a few additional clerks, who, with extra effort, under the supervision of the efficient chief in charge of that division, accomplished the desired result. The final adjustment of such claims, therefore, is not delayed awaiting information from this

office.

Your attention is especially invited to the reports of the several chiefs of divisions under whose efficient supervision you will notice that not only a large amount of work has been done, but it has also been done in a satisfactory manner.

Too much can not be said in commendation of the chiefs of divisions and their able assistants for the creditable way in which they have dis-

charged their duties.

I renew my recommendation, made in my last report, that the amount found due claimants for bounty for service in the Navy be made payable out of current appropriations instead of being certified to Congress.

JOHN R. LYNCH, Auditor.

Hon. Charles Foster, Secretary of the Treasury.

REPORT OF THE FIFTH AUDITOR.

TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, Washington, D. C., October 22, 1892.

Sir: As instructed by your letter of July 15 last, I have the honor to hereby make a report of the transactions of this office during the fiscal year ended June 30, 1892, and of the present condition of the public business intrusted to my charge. It is proper for me to state that the year for which this report is made was during the incumbency of my predecessor in office, the Hon. L. W. Habercom, whom I relieved on July 15, 1892; yet I may say a considerable part of the year's work was, from the nature of the case, performed after my induction as Auditor. The last quarter's accounts of the fiscal year were nearly all of them received in the office and adjusted after I took charge, and many accounts covering the whole of the fiscal year had not been passed be, cause their settlement depended upon the annual business transacted and could not be finally disposed of until the accounts for the last (June) quarter had been received, completing the returns for the year.

I would also state that I found the affairs of the office in good condition and the personnel of the Bureau capable and experienced.

NOTE-Much of the summary relating to the different divisions of this office is omitted for want of space.

This office referred in its last year's report to the matter of importations claimed to be in transit at the outset being changed in their destination and the goods sold in the United States, thus depriving the Treasury of the consular fees required by law for certifying bona fide importations, consular officers retaining the said fees as notarial under the regulations as for goods actually destined to a foreign country.

The measures which had been taken to correct the irregularity were also referred to. It was stated that the circular on the subject issued to consular officers by the Department of State on July 17, 1891, would be construed by this office "to mean that in all cases where a certificate to an invoice is procured from a consular officer of the United States the fee therefor shall be returned to the Treasury as official, without

regard to the alleged destination of the goods."

In accordance with this statement and the construction placed upon the circular the fees have been charged as official in all cases where the service has been reported in the returns to this office. Some perplexity has naturally resulted to consular officers affected by this course, owing to differences thus caused against them in their accounts, which they were not willing to concede and which were troublesome to get rid of by reason of the seeming difficulty of obtaining evidence as to whether the goods were carried out of or sold in the United States.

I may say, however, that experience has demonstrated the practica-

bility of procuring satisfactory proof in each case of the disposition of

the goods.

The customary tables lettered from A to K will appear at the end of the report as an appendix,* showing in detail, by legations, consulates, and internal-revenue districts, the salaries, expenses, collections, and fees involved in the adjustments made; and the following are résumes of the same as they relate to their respective appropriations, and also of some additional disbursements on other accounts. They will be presented in the order of the divisions of the office, namely:

DIPLOMATIC AND CONSULAR DIVISION.

Diplomatic service.—The accounts of ministers and other officers of the diplomatic service have been adjusted, showing (Table A of the Appendix*) expenditures and passport fees for the year, as follows:

Paid for salaries of ministers	\$295, 563, 09
Paid for salaries, secretaries of legations	
Paid for salary, clerk to legation in Spain.	1, 200, 00
Paid for salary, clerk to legation in Spain	· .
transit	4,931,15
Paid for salaries, chargé d'affaires ad interim	29, 795, 96
Paid for salaries, interpreters to legations	9,827.64
Paid for contingent expenses, foreign missons	116, 063. 57
Paid for loss by exchange, diplomatic service	700.34

There are several accounts of legations yet to be received. These are pointed out by figures referring to footnotes in Table A of the appendix.

The appropriations made for salaries, charges d'affaires ad interim, \$20,000, and contingent expenses, foreign missions, \$105,000, were both

exceeded by the expenditures.

Payments to charges d'affaires ad interim, however, necessarily result in a saving of the appropriation for salaries, secretaries of legations, as the salaries of secretaries lapse while they act as charges d'affaires.

Consular service.—Accounts of consular officers have been adjusted, showing expenses for this service and official fees collected as follows (Tables B, C, D, and E of the Appendix*):

Paid:

Rec

u.	
Salaries, consular service	\$490, 391, 06
Salaries while receiving instructions and in transit	7, 751. 01
Salaries, consular officers not citizens	13, 032, 74
Salaries, consular clerks	14, 154, 43
Loss on bills of exchange	3, 912, 25
Pay of consular officers for services to American vessels	23, 700, 35
Compensation from fees (sections 1703, 1730, and 1733, Revised Stat-	,
utes)	200, 548, 53
Office rent and clerk hire (section 1732, Revised Statutes)	2, 536, 67
Contingent expenses, United States consulates	218, 134, 83
Allowance for clerks at consulates	87, 884, 85
Expenses of prisons for American convicts	7, 220.88
Salaries, interpreters to consulates in China, etc	13, 559. 24
Salaries, marshals for consular courts	8, 000.00
Expenses of interpreters and guards, etc	6,000.00
Boat and crew at Hongkong and Osaka and Hiogo	758.71
	1, 097, 585. 55
eived:	
Consular fees received for official services	940, 040. 50

157, 545. 05

Excess of expenditures over receipts.....

There is shown to be an increased excess of expenditures over receipts as compared with last year of \$40,526.70. It is due mainly to

the falling off in the consular fees.

The expenditures of two of the appropriations exceed the amounts appropriated, namely: Contingent expenses United States consulates appropriated, \$150,000; allowed to date, \$218,134.83; salaries, consular officers, not citizens, appropriated, \$10,000; allowed, \$13,032.74. The discontinuance by Congress of the last-named appropriation for aliens in the act making appropriations for 1893, and the uniting of the same with salaries, consular service, will be very satisfactory in its effects, and the provision in the same act is just as satisfactory and important for including the payments for time while a consul is waiting the receipt of his exequatur in with his account for receiving instructions and in transit, and which this office recommended in its reports for the fiscal years 1887 and 1892.

Consular fees.—The consular fees collected for official services are stated in detail as to the character and amount at each consulate in Table H of the Appendix,* and aggregate in kind and amount as fol-

lows:

Invoice certificates Landing certificates Bills of health Currency certificates Other fees	28, 750. 00 21, 339. 00 13, 028. 00
Total	940, 040. 50

The fees are short of what they were last year by \$38,102.08, made up of differences in the kinds of fees as follows:

Falling off in invoice fees Falling off in landing certificates	\$34, 136. 25 11, 112. 00
Gain in bills of health\$346.50Gain in currency certificates4, 347.00Gain in other fees2, 452.60	0 7
	38, 102, 08

A falling off in the invoice fees has been going on since 1890. As compared with the collections for the fiscal year 1890, there is a diminution in the amount for this year of \$89,421.75, indicating a less number of invoices of foreign goods brought into the United States in 1892 than in 1890 by 35,768 invoices.

Relief of seamen.—As shown by Tables F and G of the Appendix,* accounts for relief and wages of seamen were adjusted, with the following results:

Board and lodging	6, 324. 45 7, 568. 22 107. 07
Total	41, 165. 84
Amount of extra wages and arrears collected	257, 456. 26

^{*} Omitted. See note, page 549.

Amount of extra wages and arrears paid to seamen \$244, 579. Amount of extra wages and arrears paid for relief 6, 255. Amount of extra wages and arrears in hands of consuls 6, 621.	03
Total	26
Total relief afforded. 41, 165. Wages and extra wages applied 6, 255.	
Amount paid by the United States	33 67
Total sum appropriated	00
The cost to the Government for relief of seamen during the year namely, \$34,910.33, compares favorably with the average expense for this purpose during the past ten years. For the ten years previous the last decade the expenditure for relief of seamen averaged must greater than for the last. A great lessening of the average annual coof relief from one decade to another argues in favor of an improved a ministration of the service on the part of consular officers. Other expenses of the foreign service.—Accounts, other than those her inbefore reported and in addition to the amounts which are included the table coming immediately after this of disbursing clerk's account adjusted during the year, relating to appropriations as follows:	or to ch st d- e- in
Section Sect	87 39 555 00 555 93 500 23 22 20 63 59 87 87 90 48 73 90 42
Disbursing clerk's accounts.—Accounts of F. J. Kieckhoefer, disburing clerk of the Department of State, have been adjusted, showing expenditures on account of appropriations as follows:	s- ig
Salaries, Department of State, 1891, \$3,049.38; 1892, \$114,279.14 \$117,328. Stationery and furniture, Department of State, 1892. 4,601. Books and maps, Department of State, 1891, \$198.76; 1892, \$1,591.09 1,789. Proof-reading, Department of State, 1892 720. Binding manuscript papers, Department of State 3,727. Lithographing, Department of State, 1892 1,200. Contingent expenses, Department of State, 1891, \$666.51; 1892, \$4,700.52 5,457. Editing revised and annual statutes 1,502. Contingent expenses foreign missions, 1890, \$978.13; 1891, \$4,610.36; 1892, \$27,526.89 33, 115. Contingent expenses, United States consulates, 1890, \$200; 1891, \$828.74; 1892, \$18,091.72 18, 922. Rescuing ship wrecked American seamen, 1891, \$12.00; 1892, \$923.86 935. Annual expenses, Cape Spartel Light, 1891
Salaries, consular officers not citizens, T891
\$2,862.12
1889, \$108.47; 1890, \$720.10; 1891, \$2,732.98 3,719.10 Compensation of consular officers from fees, 1890, \$72.50; 1891, \$492.50 565.00 Consular fees adjusted, 1888, \$15.00; 1889, \$20.00; 1890, \$805.00; 1891, \$7,147.00 7,987.00
London bankers' accounts.—Accounts of the United States bankers at London, Morton, Rose & Co., adjusted during the year, show payments by them aggregating \$275,573.89, and receipts from consular officers of
surplus fees amounting to \$227,804.89, and of wages of seamen \$44.53. The disbursements related to appropriations, as follows:
Salaries of ministers, 1891, \$24,664.29; 1892, \$158,261.45 \$182, 925.74 Salaries, chargés d'affaires ad interim, 1891, \$2,827.17; 1892, \$1,645.47 4,472.64 Salaries, secretaries of legations, 1891, \$3,762.25; 1892, \$21,368.60 25, 130.85 Salaries, interpreters to legations, 1891, 1.051.43; 1892, \$8,590.41 9,641.84 Salary of clerk to legation in Spain, 1891, \$42.00; 1892, \$1,200.00 1,242.00 Salaries and expenses commercial agent at Boma, 1892 3,996.25 Contingent expenses, foreign missions, 1891, \$3,520.40; 1892, \$42,023.44 45,543.84 Contingent expenses, United States consulates, 1891, \$59.40; 1892, \$109.85 169.25 Steam launch for legation at Constantinople, 1892 1,800.00 Loss by exchange, consular service, 1892 651.48
Estates of decedents trust fund.—Accounts of this (section 1709 Revised Statutes) were adjusted, showing the following sums paid over to the legal representatives of citizens of the United States who died abroad:
Estate of David Goble \$45.03 Estate of William B. Haines 50.00 Estate of Joseph R. Loomis 985.23

INTERNAL REVENUE DIVISION.

The total collections of internal revenue during the fiscal year 1892, as shown by the adjustments of collectors' accounts, and exhibited in detail in Table 1, amounted to \$153,889,401.70. Included in this amount, \$1,934.06 belongs to the collections of previous year.

The accounts of collectors of internal revenue, as adjusted for the fiscal year, aggregate \$3,879,881.02, inclusive of amounts allowed store-keepers and gaugers. These expenses in detail are given in Table K.*

Of this total expense the sum of \$1,789.20 belongs to prior fiscal year, of which \$723.21 are commissions on tax-paid spirit stamps sold.

MISCELLANEOUS DIVISION.

Payments to States for refund of direct tax under act of March 2, 1891, have been made as follows:

Florida Georgia Iowa Kentucky Mondon	83, 031. 03 384, 274. 80 606, 641. 03	South Carolina	10, 716. 86 180, 886. 72 129, 407. 80
Maryland	371, 299. 83 71, 870, 75	Virginia	442, 702. 77
Mississippi North Carolina	26, 217. 78	Total	2, 533, 516. 89

By the last annual report of this office for 1891 it appeared the Secretary of the Treasury had on deposit to his credit on account of "fines, penalties, and forfeitures" (special deposit account No. 1), \$70,368.31. During the year \$128,840.91 have been deposited and \$128,042.91 have been disbursed, leaving a balance to his credit, January 1, 1892, of \$71,166.31.

On account of "miscellaneous deposits" (special deposit account No. 3) there was a balance to his credit January 1, 1891, of \$77,415.72; \$23,381.85 have been deposited, and \$76,519.91 disbursed, leaving a balance to his credit, January 1, 1892, of \$24,277.66.

The balance to his credit January 1, 1891, on account of "offers in compromise" (special deposit account No. 5) was \$19,854.10. During the year \$121,250 were deposited and \$47,605.56 disbursed, leaving a balance to his credit January 1, 1892, of \$93,498.54.

During the year nine judgments, Court of Claims, for direct tax, amounting to \$30,617.88; two claims for moneys erroneously received and covered into the Treasury, amounting to \$123.93; and five claims for taxes paid on spirits lost by casualty, amounting to \$536.85, have been adjusted.

The disbursements made by George Waterhouse, special disbursing agent of the Treasury Department, of the South Carolina free school fund commissioners, amounted to \$1,901.50.

Accounts of two stamp agents, involving \$945.18, were adjusted dur-

ing the year.

Accounts of Theodore Davenport, disbursing clerk Post-Office Department, have been adjusted as follows:

Sales of post-route maps, 1891, \$311.63; 1892, \$3,522.99	\$3, 834. 62

received during the fiscal year 1892, and deposited with the Treasurer of the United States on account of patent fees.

During the year accounts for transportation over Pacific railroads amounting to \$2,090.26 have been adjusted.

I have the honor to be, very respectfully,

ERNST G. TIMME, Fifth Auditor.

Hon. CHARLES FOSTER, Secretary of the Treasury.

REPORT OF THE SIXTH AUDITOR.

TREASURY DEPARTMENT, SIXTH AUDITOR'S OFFICE, Washington, D. C., October 5, 1892.

SIR: I have the honor to submit the following report of the business operations of this office during the fiscal year ended June 30, 1892.

My annual report to the Postmaster-General, exhibiting in detail the financial transactions of the Post-Office Department, has been completed and submitted.

NOTE.—Much of the summary relating to the duties and work of the divisions of this office is omitted for want of space.

The following table shows the principal transactions of the office in money orders and postal notes for the fiscal year ended June 30, 1892:

It affords me pleasure to inform you that the work in the several branches of this Bureau is in a very satisfactory condition and fully up to the requirements of the Department. In fact, in many important particulars, it is in a more advanced stage at this period in the year than has heretofore been the case. This satisfactory result has, however, been accomplished only by the most systematic and unremitting efforts on the part of the officers and employés throughout the entire The work of this office is constantly on the increase from year to year by reason of the natural growth of the postal service, while a corresponding increase of force has not been made. The want of additional clerical force has been seriously felt in several divisions, but most severely in that branch of the office in charge of assorting and numbering money orders and postal notes. By reason of the failure of Congress at its last session to provide an increase in the number of money order assorters it has been impossible, notwithstanding the excellent work accomplished in the assorting division during the past year, to dispose of the accumulation of vouchers now on hand, amounting to about the business of one year. In this connection I strongly urge your aid and support during the coming session of Congress in so presenting the matter to that body as to secure provision for the employment of addi-For this purpose a further communication on this subject, together with an estimate for the proposed increase, will be submitted to you at the proper time. It is a matter of vital importance to the interests of the service that the money order accounts be fully audited without the delay at present occasioned by reason of the inability of the present force to properly assort the vouchers so as to admit of the final checking with the statements of paying postmasters. I have prevented the growth of this accumulation of unassorted vouchers by utilizing all time which could possibly be spared by employes of other branches of the office in assisting in the work of assorting, but the increasing volume of the money-order business will no longer admit of the successful use of this expedient to prevent the accumulation of arrears of vouchers.

In my last annual report I suggested that the Busch building, on E street NW., between Seventh and Eighth streets NW., occupied exclusively by the money-order service of this office, be placed under the control of the Secretary of the Treasury, instead of that of the Post-Office Department. I renew that recommendation and earnestly urge your attention thereto, as it seems to me clearly evident that the several offices of this Bureau should, as far as possible, be under the control of the head of the Treasury Department.

The improved system of auditing postmasters' quarterly postal accounts, and the changes in the method of bookkeeping resulting therefrom, to which reference was made in the last annual report, have, during the past fiscal year, still further demonstrated their value in the prompt and accurate settlement of these accounts. Some additional features have been added to the system during the last year whereby a further saving of time has been accomplished and additional checks established, insuring accuracy and the prompt detection of clerical errors occurring during the process of auditing

ical errors occurring during the process of auditing.

Under the present postal laws, as construed by the Post-Office Department, certificates for deposits made by postmasters with their depositories, are transmitted to the Third Assistant Postmaster-General. It is my opinion, which, however, it may be proper to state, is not shared by the authorities of the Post-Office Department, that the interests of the postal service would be as well protected as they are

under the present system, if such necessary change of legislation could be secured as to provide for the transmission directly to this office of the certificates of deposit for postal funds, instead of, as now, through the Post-Office Department. Such a change would greatly facilitate the auditing of postmasters' accounts and expedite their settlement.

An acknowledgment is due to the officers and employés of this Bureau for their able and intelligent coöperation in the improvement of official methods, and for such diligent attention to duty and faithful performance of onerous labor, as, in my opinion, deserves highly hon-

orable mention.

Respectfully submitted.

T. B. COULTER,

Auditor.

Hon. Charles Foster, Secretary of the Treasury.

REPORT OF THE REGISTER.

TREASURY DEPARTMENT,
REGISTER'S OFFICE,
October 31, 1892.

SIR: I respectfully submit my annual report for the fiscal year ending

June 30, 1892, viz:

The operations of this Bureau have been conducted by a nominal force of 108 persons, at an expense of \$139,750. The effective force was 107.43, and cost for salaries \$139,022.02, distributed among the Register's office and four divisions, as appears from the following table, showing the—

DISTRIBUTION OF FORCE AND SALARIES FOR FISCAL YEAR ENDING JUNE 30, 1892.

Divisions.	Register, \$4,000.	Chief of division, \$2,000.	Class 4, \$1,800.	Class 3, \$1,600.	Class 2, \$1,400.	Class 1, \$1,200.	Class E, \$1,000.	Class D, \$900.	Messenger, \$840.	Assistant messenger, \$720.	Laborer, \$660.	No. in each divi- sion.	salaries.
Register's and assistant register's offices		 1.00 1.00 1.00	3. 39 2. 77 1. 37	6. 75 . 98 6. 50	3. 04 2. 00 5. 37	1. 68 4. 00 4. 71 2. 17	. 15		1	1 2		26. 12 14. 88 46. 03 8. 99	\$11, 924, 94 39, 658, 72 20, 047, 97 52, 778, 99 11, 169, 37 3, 442, 03
Total effective clerical force	1	 	!	15. 86	10. 99	13. 93	1. 98	28. 80	1		7. 96	107. 43	139, 022. 02

Details of the work done by each division are given both for information and for record, showing what has been done and with what intelligence and fidelity.

The organic law creating the Treasury Department gave the Secretary of the Treasury a Treasurer to receive and pay out the revenues, and a Register to keep an account of all receipts and expenditures of public moneys and of all debts due to and from the Government.

RECEIPTS AND EXPENDITURES DIVISION.

These, and various cognate duties imposed by law and regulations, are discharged in the division of receipts and expenditures. During the fiscal year the effective force employed in this division was one chief and 26.12 clerks, whose salaries aggregated \$39,658.72.

The report shows the-

This division prepares the annual volume of receipts and expenditures of the Government required by law to be furnished the Congress of the United States. During the past year the volume for 1888 has been delivered, that for 1889 is in the hands of the printer, that for 1890 is ready for the printer, that for 1891 nearly completed, and work begun on the volume for 1892.

LOAN DIVISION.

This division has charge of all issues, exchanges, and redemptions of United States registered and Spanish indemnity bonds, the preparation of interest schedules for the use of the United States Treasurer in paying accruing dividends on the interest bearing public debt, opening and keeping accounts with all registered bondholders, care of redeemed and canceled registered bonds, the receipt from the Bureau of Engraving and Printing, and the custody of all unissued registered bonds. The preparation of reference index cards, a work of prime importance, is also in its charge.

Its operations during the current year have been under the direction of Division Chief A. M. Hughes, jr., at a cost for salaries of \$20,047.97.

The following statement shows the average force in the division and the expenditure for salaries during each of the last nine years:

Year.	Average force.	Amount of salaries.	Year.	Average force.	Amount of salaries.
1883-'84 1884-'85 1885-'86 1886-'87 1887-'88	25. 90 19. 35 16. 89	\$42,551.41 35,675.45 27,251.95 23,469.87 21,864.11	1888-'89. 1889-'90. 1890-'91. 1891-'92.		\$21, 971. 70 21, 260. 68 21, 079. 64 20, 047. 97

The decrease in the force of the division and in the amount of salaries paid, which has been substantially continuous for many years, still continues.

The following table shows by months, first, the total number of days' work performed; second, the total number of days for which salary was paid, but on which the Department was closed (i. e., Sundays and holidays); third, the total number of days' leave; fourth, the total number of days' sickness:

		1891. 1892.						1892.

Tabular statements herewith, marked A and B, show the total number and amount of all United States bonds issued and canceled during the last fiscal year, as recorded upon the books of the division.

The following table shows the number and amount of bonds issued and canceled and the total handled during the last seven-years:

	Bond	ls issued.	Bonds	canceled.	Total handled.		
	Number.	Amount.	Number.	Amount.	Number.	Amount.	
7 1885-'86 1886-'87 1887-'88 1888-'89 1889-'90 1890-'91 1891-'92	34, 620 26, 598 21, 500 17, 669 16, 592	\$180, 987, 250 171, 119, 600 114, 831, 900 103, 894, 350 67, 181, 500 69, 151, 600 107, 738, 200	70, 753 106, 173 72, 135 85, 149 66, 830 75, 606 54, 288	\$191, 667, 950 325, 019, 750 189, 656, 950 231, 811, 450 171, 575, 200 172, 256, 450 129, 009, 825	109, 926 140, 793 98, 733 106, 649 84, 499 92, 198 80, 541	\$372, 655, 200 496, 139, 350 304, 488, 850 335, 705, 800 238, 750, 700 241, 408, 050 236, 748, 025	

As compared with the previous year, the number of bonds issued last year was 9,661 greater and the number canceled 21,318 less, making a net decrease of 11,657 bonds handled.

Comparing the same periods, there was an increase last year in the amount issued of \$38,586,600, and a decrease in the amounts canceled of \$43,246,625, making a net decrease of \$4,660,025 in the amount of bonds handled.

As classified upon the loan account, the foregoing amounts were divided as follows:

BONDS ISSUED.

Year.	Direct issues.	Exchanges.	Transfers.	Total issued.
1885-'86 1886-'87 1887-'88 1888-'89 1888-'99 1890-'91 1890-'91	44,050 101,550 48,350 50,100 64,500	\$9, 623, 150 19, 139, 700 5, 915, 700 3, 493, 900 1, 888, 100 1, 738, 650 1, 940, 650	\$171, 301, 550 151, 935, 850 108, 814, 650 100, 352, 100 65, 243, 300 67, 348, 450 77, 943, 000	\$180, 987, 250 171, 119, 600 114, 831, 900 103, 894, 350 67, 181, 500 69, 151, 600 107, 738, 200

BONDS CANCELED.

Year.	Redemptions.	Exchanges.	Transfers.	Total canceled.
1885-'86 1836-'87 1887-'88 1888-'89 1888-'90 1890-'91 1891-'92	-153, 944, 200 74, 926, 600 126, 965, 450 104, 443, 800	\$9, 623, 150 19, 139, 700 5, 915, 700 3, 493, 900 1, 888, 100 1, 738, 650 1, 940, 650	\$171, 301, 550 151, 935, 850 108, 814, 650 100, 352, 100 65, 243, 300 67, 348, 450 77, 943, 000	\$191, 667, 950 325, 019, 750 189, 656, 950 231, 811, 450 171, 575, 200 172, 256, 450 129, 009, 825

An important event in the history of the past year has been the refunding of \$25,364.500 of United States $4\frac{1}{2}$ per cent bonds into 2 per cent bonds payable at the pleasure of the Government, and the redemption of all of the remaining $4\frac{1}{2}$ per cent bonds which have been presented for payment. The total amount of canceled $4\frac{1}{2}$ per cent bonds, coupon and registered, recorded upon the books of the office last year was 48,970,250. A new District of Columbia loan, at $3\frac{1}{2}$ per cent, has been issued under the act of March 3, 1891, to the amount of \$2,400,000, thereby providing funds for the redemption of the District of Columbia 6 per cent permanent improvement and 7 per cent permanent improvement loans which were payable on 1st of July, 1891.

The following bonds issued by the District of Columbia when under a Territorial Government, and redeemed by the Treasurer of the United States, were recorded in the books of the division during the year:

Loans.	Number bonds.	Amounts.
per cent permanent improvement bonds	6, 025 597	\$2, 440, 550 270, 300

SPANISH INDEMNITY CERTIFICATES.

The amount is shown in Table C. As compared with previous years, the amounts are as follows:

Year.	Amounts.	Year.	Amounts.
1886-'87	165, 404, 58 13, 770, 26	1889-'90 1890-'91 1891-'92	10, 189, 70

New bonds were received from the printer as follows:

			Number of bonds.	Amounts.
1907 consols, registered. 1891 fund 2 per cent, regis Pacific Railroad loans. District of Columbia bon	stered ds, various loans		31,000 19,500 1,360 3,028	\$103, 600, 000 56, 025, 000 10, 360, 000 3, 738, 100

The following table gives a classification under three principal heads of the outstanding registered bonds in each of the unmatured loans, as shown in connection with the dividends due July 1 and September 1, 1892. The amounts for the July dividends are twelve months later than those given in my last report; those for the September dividends are fifteen months later:

Loan and date.	Foreign.	Treasurer United States in trust for national banks.	Domestic.	Total.
44 per cent Sept. 1, 1892. 2 per cent. Sept. 1, 1892.		\$23, 715, 850 143, 056, 200	\$548, 000 1, 648, 650 336, 972, 250	\$611, 200 25, 364, 500 484, 907, 000
4 per cent July 1, 1892 Pacific Railroad, July 1, 1892 Total	4, 941, 750	12. 588, 000 179, 360, 050	52, 035, 512 391, 204, 412	64, 623, 512 575, 506, 212

The changes in these items within the last twelve months and last fifteen months, respectively, are as follows:

[Increase.	4.	decrease.	1

Loan.	Foreign.	Treasurer United States in trust for national banks.	Domestic.	Total.
4½ per cent	- 1, 012, 900	-\$26, 671, 450 + 23, 715, 850 + 9, 977, 250 + 2, 569, 000	-\$10, 395, 950 + 1, 648, 650 - 7, 173, 700 - 2, 569, 000	
Total	_ 2, 376, 000	+ 9,590,650	18, 490, 000	— 11, 275, 350

From these tables it appears that the amounts upon the foreign books are less than nine-tenths of 1 per cent of the total amount of registered debt, and that amounts upon these books are decreasing much more rapidly than upon the registered debt in general. The decrease upon the foreign debt was about one-third of the whole amount. The amount of registered bonds was somewhat increased by issues in exchange for coupon bonds and refunding certificates, and the net decrease upon the registered debt other than foreign was only about 1½ per cent. Of the registered debt held in this country, there was a decrease of \$18,490,000 in the amount held by corporations, private individuals, trustees, etc., which in part is counterbalanced by an increase of \$9,590,650 held by the Treasurer United States for national banks as security for circulation and deposits.

The foregoing tables do not show the same changes as are exhibited in Tables A and B, as coupon bonds are included in the latter. Neither are the dates in the two sets of tables the same.

The total number of open accounts in connection with the four United States loans included in the foregoing tables were, at the dates given, as shown below. The three District of Columbia and the Spanish indemnity loans are also given at the last dividend periods, together with a comparative statement for the last six years.

Work has been continued upon the general index to all accounts opened with holders of United States registered bonds, in accordance with the plans described in the last annual report of this division.

The number of entries placed upon the cards during the year was 21,033, and the number of entries examined 21,319. At the close of the year the total number of entries was 96,478. All the cards have been examined and arranged in alphabetical order in a case consisting It is believed that this is the most perfect system of indexing the loans of the Government known, affording the most expeditious and reliable way of ascertaining the facts desired.

Table E, herewith, gives the usual summary of work performed by the

division.

DIVISION OF NOTES, COUPONS, AND CURRENCY.

This division has charge of all unregistered redeemed evidences of public debt, as notes, currency, coin and currency certificates, interest checks, etc., of the file archives, the receipt and custody of current settlement reports and the preparation and authentication of all official statements of settlements called for by the proper officers in set-Of these a most important is the examination, tling of accounts. verification, counting, and destruction of redeemed United States currency, gold, silver, coin certificates, and fractional currency.

During the past fiscal year this division has carried on its work under its efficient chief, B. F. Worrell, by an average effective clerical force

This chief says:

Tables 1 to 14 following, covering every branch of labor assigned to this division, give in detail an itemized account of the work performed during the year.

There were received 146,395 interest checks, amounting to \$19,394,715.76, an increase of 19,228 in number and a decrease of \$3,441,334.94 in amount. During the year there was a decrease of 9,650 checks in the registration and examination as compared with the report of the last fiscal year.

With the maturity and retirement of the $4\frac{1}{2}$ per cent loan, the receipts of interest checks of the same, together with the coupon bonds and detached outstanding coupons, will diminish rapidly, consequently will cease to furnish any considerable part of the work in this division during the current fiscal year.

The receipts of checks are now confined to those issued on dividends on bonds of the United States, 4 per cent and 41, continued at 2 per cent, Pacific railways, District of Columbia, and to outstanding checks of bonds of various old issues, on which the interest has ceased.

To June 30, 1892, there have been received and filed 3,207,968 interest checks,

amounting to \$589,384,819.47.

In number, 628,004 detached redeemed coupons were received, and in amount \$3,170,767.95, being a decrease in receipts of 326,543 coupons and in amount \$2,119,360.43. With the number received and number on hand at the close of the preceding year, there is a decrease in the amount of work performed in almost every branch, which can be readily explained by the statement, supported by facts in figures, from the records of the division, that during the year imperative calls were made from time to time on the regular coupon force for service in the currency section, besides frequent details from the same to other divisions of the Bureau, the total amount of time thus lost to the coupon force being six hundred and thirteen days on other than coupon work in this division, twenty-eight days on work for other divisions of this office, and twelve days temporary details to other offices in the Department; in the aggregate, six hundred and fifty-three days during the year.

To June 30, 1892, there have been received and filed 97,733,453 coupons, amounting to \$1,201,183,843.37½.

There were received in number 18,859 redeemed coupon bonds, amounting to

\$8,594,950, a decrease of 12,842 in number and \$839,050 in amount, the decrease in the work, therefore, being caused by the decrease in receipts, as at the end of the year every bond on hand and received was registered, examined, scheduled, and filed.

The receipts of coupon bonds during the current fiscal year may be still further lessened in consequence of the withdrawal of the 4½ per cent loan and the less fre-

quent exchanges of the 4 per cent coupon bonds for registered bonds.

Received, registered, scheduled, and examined in this division to June 30, 1892,

4,242,322 coupon bonds, amounting to \$2,502,383,150.

In the currency work, the tables show a marked increase in the receipts, count, cancellation, and destruction of United States notes, gold, silver, refunding certificates, and fractional currency, the total number of pieces received during the year being 38,182,735, amounting to \$204,263,407.98, an increase in receipts of 8,916,023 pieces and in amount \$33,100,255.61.

These securities are received daily and being therefore current work, closely connected with the corresponding work in the offices of the Secretary and Treasurer, at intervals additional force from other branches of this division is added and withdrawn, as pressure may require, in order to be able to complete the count and exam-

ination of each day's receipts.

The increase or decrease in the work on currency certificates of deposit and gold certificates, series 1888, is governed by the receipts of the year, all received being

finished and filed before the close of the year.

Redeemed internal-revenue stamps and statistical matter of various kinds are counted and examined by a joint committee appointed by the Secretary, with one representative assigned from this office as a member. This work is not classed with the leading and important operations of this division, as the meetings of the committee consume but two days in each week, when the sheets with all the stamps attached are counted and examined, without involving either much time or labor. Internalrevenue stamps have a money value, and being issued under stated dates of license, the dates expiring before they are used or by some change in the laws, are not sold by the collectors, but returned to the Department; consequently receipts vary according to circumstances.

Statistical redemptions consist of matter retired before issue and are of no money value, being largely misprints of various securities received from the Bureau of En-

graving and Printing

A recapitulation of the table of issues and redemptions, in numbers and amounts, of United States interest-bearing notes and certificates redeemed and outstanding to June 30, 1892, shows that, according to the books of the office, there are still outstanding the following of each class of securities:

Seven-thirty Treasury notes, issued under various acts	\$139,650
Certificates of indebtedness, issued under various acts	
One-year 5 per cent Treasury notes, act March 3, 1863	
Two-year 5 per cent Treasury notes, act March 3, 1863	28, 150
Three-year 6 per cent compound-interest notes, acts March 3, 1863, and	
June 30, 1864	179,250
Gold certificates, act March 3, 1863, various issues	
Three per cent certificates, acts March 2, 1867, and July 25, 1868	5,000
Refunding certificates, act February 26, 1879	84, 280
Total	726 925

There is an increase of work in all the leading branches of the current files for the year, which will necessarily continue in a corresponding degree with the increasing business of the Department.

Within the lines of instructions, the work of rearranging the old accounts continues, and when finished the general files system of the office will be reasonably

complete in every feature.

In the line of old and uncurrent work is the restrapping with wire of packages of redeemed coupons now on file. During the year there has been a large decrease in the work, for the reason that operations had to be wholly suspended on account of the pressure of more important business.

It will require some years, as done at intervals, to complete the whole work.

To this date the agents of all the States interested, except the State of Florida, have been furnished with all the books, papers, etc., necessary to enable them to make a copy of the matter relative to their respective States in regard to refunding the direct tax collected in 1865 and 1866.

Every courtesy has been shown to the agents and every facility extended for an

examination of the books of the office.

In summing up the business of the year, I trust the amount of work performed and the results secured will meet with your most reasonable expectations.

The tabular statements appended hereto are reported to exhibit and place on record the details of the work done by this division.

INTEREST, EXPENSE, AND WARRANT DIVISION.

This division was organized to determine, so far as the records disclose, the amount paid by the United States for interest and for all expenses of all public loans, and was designated "interest and expenses of public loans." Its work was peculiar, demanding expert clerks originally furnished by detail, by order of the Secretary of the Treasury, from the Register's, Secretary's and Treasurer's offices. Casualties reduced the number of these experts and retarded, but did not suspend, the progress of the work.

The vastness of the financial records and the constantly increasing number of the Government's fiscal transactions make necessary some simple and effective way of making examinations into them and searching out cases, as a library requires a catalogue or the more recent system of index cards. A beginning of the preparation has been made

by clerks transferred from others to this division.

The force engaged on copies and records of accounts, warrants, transfers, etc., occupying a portion of the same large room, was transferred from the roll of the Receipts and Expenditures Division to this, Interest and Expenses, giving it charge of the warrant business, and its present designation.

The following is a summary of the work done under each head:

INTEREST AND EXPENSES OF PUBLIC LOANS.

The amount or sum total of interest paid from 1835 to 1885, inclusive, having been ascertained as per our last report, the work of obtaining the amount of interest paid on each loan separately from 1835 to 1860 is now being prosecuted, and two elerks have been constantly

employed on this work.

The difficulty of ascertaining the amount "paid by loans" lies in the fact that quite an amount of interest was paid between 1835 and 1860, on what is called "unclaimed dividends," or "interest on loans," made in years prior to 1835, running back to the foundation of the Government; so that if the Government paid in 1845 a certain amount of interest on loans made in 1793, in order to ascertain the amount of interest paid, the accounts of that loan must be examined, and the amounts must be classified by loans. This work is progressing slowly, but has been

prosecuted with as much dispatch as possible with the force employed, and this force is sometimes called upon to assist with the other work of the division, but an inexperienced clerk can not be put upon this work, for it requires one familiar with it; in short, it takes an expert to do it.

Over 30,000 items of accounts have been examined during the fiscal year, and tabulated statements prepared, which must be compared, checked off, and verified. Thousands of pages have been footed and verified. Books were imperfectly kept at that time, and no one can realize without practical experience what a difficult job it is; but it is certainly desirable for the Government to be able to answer the question, How much interest has been paid on each particular loan? It will take at least another year to complete this branch of the work with the present force employed.

The work of copying into book form the interest paid by loans is being carried out as fast as the work is completed, or as nearly as the other work will allow, so that it may be ready for printing when fin-

ished.

The work of ascertaining the premiums and discounts on the loans is very large, and at present we have no force to put on it.

WARRANT AND INDEX RECORD WORK.

In November all the force employed in what was termed the copy room of the receipts and expenditures division was consolidated with this division, and the name of the division changed, as before stated. The work of copying accounts for warrants and registering warrants and transfer drafts is now done in this division. The amount of this work for the fiscal year is as follows:

Accounts received, examined, stamped, and registered	32,727
Settlements copied and compared for warrants Civil warrants copied and compared.	16, 775
Civil warrants copied and compared.	26, 852
Interior civil warrants registered Treasury warrants registered Internal Revenue warrants registered	$\frac{2,941}{7,679}$
Internal Personne warrants registered	7,678 $3,483$
Diplomatic warrants registered	4, 207
Customs warrants registered	4, 559
Indiciary warrants registered	3, 957
Public debt warrants registered	27
War warrants registered Navy warrants registered	4,355
Navy warrants registered	1,898
Interior (Indian) warrants registered	4, 738
Interior (Pensions) warrants registered	4,405
War repay warrants registered	1, 205
Navy repay warrants registered.	323 330

Number of index record cards examined and classified under their appropriate heads, alphabetically arranged under subjects and catchwords, and placed in the file cases

66, 255

Making a grand total of work performed

. 301, 251

The work of ascertaining all the expenditures from the beginning of the Government by means of subjects and catchwords on cards, was

assigned to this division in November last.

The index record card system is an alphabetical arrangement by cards, under subjects and catchwords, of the appropriations and expenditures of the Government. It is intended to classify in concise form and for ready reference the expenditures for any particular subject, so that the same may be found under any prominent leading word of the subject-matter.

Up to June 30, ten years of the expenditures of the Government, extending from 1878 to 1888, compiled from the printed books of receipts and expenditures, have been completed, and the division has already been able to answer some questions of interest propounded to

the Department.

When completed, it will be easy to prepare consolidated cards, so as to have on one card the information on one particular subject that is

contained on many cards.

In many cases the request for the information is so indefinite, no period of time being correctly given, that many books must be examined before even a trace of the subject matter sought can be found; but with the index record cards it must be in a certain place, and it must all be there, and the information not only quickly obtained, but when obtained must be correct.

I have no hesitation in recommending the continuation of the work. The foregoing informs the Department of the year's work done in this Bureau and the condition of the public business in its charge at the close of the fiscal year, and shows the state of efficiency of our clerical

force to be very creditable.

Among the betterments of the service, undertaken during the year, the most important are those initiated by the President's order of December 4, 1891. They have been set in operation under Department circulars Nos. 194 and 195 of December 24, 1891, and improved by the prescriptions of Department circulars Nos. 50 and 110 of 1892, aiming to put each clerk's efficiency record beyond the reach of momentary impressions, lapses of memory, caprices and transient feelings to which

the minds of chiefs may be liable in making up standings.

To embrace the chief elements of clerical efficiency record, some complication was required, but within two or three months the heads of divisions overcame the chief difficulties in their markings, and were compelled to give daily attention to those facts and mental processes which are necessary elements of any judgment concerning a clerk's official merit. This schooling of the minds of division or acting chiefs is going on successfully in this Bureau, and will soon make a clerk's monthly record of efficiency a protrait of his official work drawn by

Important defects to be remedied are:

(1) Each division or acting chief should be required to record each clerk's performance at the close of each day and allow the clerks to see this daily record, to avoid complaints, correct records, and excite emulation.

(2) Provision should be made for an adequate expression by the head of the Bureau of his responsibility as legal chief. This becomes all the

more important, since the competitive system, as now practiced, absolutely excludes heads of bureaus from participation in making appointments and promotions in their own bureaus.

This vital defect causes them to regard these great betterments of the clerical service contemplated in the Department circulars, as evils to

be borne.

(3) Competitive examinations for promotion, as conducted in the two or three held in this Bureau, have given very unsatisfactory results. These results commend the system to neither superiors nor to the clerical system.

ical force in this Bureau.

(4) The public service does not, as prime qualities, demand that employés should be quick-witted, of all around intelligence, able to give pedagogic instruction on Department and general matters; it requires efficient clerical service. Therefore the monthly record of efficiency is greatly superior to the haphazard results of the competitive examination which commanded no respect of chiefs or subordinates in this office.

But this record of efficiency only counts for 20 per cent, while the competitive results count 80 per cent, in spite of all their defects from chances of comparative inequality of opportunity sometimes occasioned by length of service and of exclusive attention to office work. It would be vastly better for the service and the competitive examinations to reverse these ratios and make the efficiency record count 80 per cent, and the results of the examination to count 20 per cent. In any event proper provision for the exercise of the best judgment of the responsible head of the Bureau in the matter of promotions should be made.

Neither the interest of the public service nor of true economy is

subserved by injustice.

But gross injustice results to 29 clerks of the copyist grade in this Bureau from the requirement that all promotions shall be by successive grades in each bureau. Hence, copyists must first be promoted to the \$1,000 grade. Now, in this bureau there are only two clerkships of \$1,000 each: therefore the 29 \$900 clerks must wait for one of those to become vacant.

To remedy this state of things, I would recommend that \$500 be added to the appropriation, to increase by \$100 each the pay of five of these copyist clerks, so that there will be seven \$1,000 clerkships instead of but two.

Equal pay for equal service and equal reponsibilities is demanded

by justice and sound policy.

Attention is called to the following list of salaries paid in this department:

	,	
Chief of Appointment Division		\$2,750
Chief of Warrants, Estimates, and Appropriations		3,000
Assistant Chief		2,400
Chief of Loans and Currency		2. 500
Chief of Stationery, etc		2,500
Treasurer		6,000
Chief of Miscellaneous Division	 .	2,500
Comptroller of the Currency		5,000
Deputy Comptroller		2,800
Chief Clerk of Comptroller's Office		2,500
Chiefs of Divisions Comptroller's Office		2,200
First Comptroller		5,000
Deputy First Comptroller		2,700
Second Comptroller		5,000
Deputy Second Comptroller		2,700
Chiefs of Division, First and Second Comptrollers' Offices		2, 100
Chief Clerk of Treasury Department		3,000
		.,

This is one of the oldest as well as one of the most responsible bureaus in this Department, being coexistent with the Government itself, but the salaries paid to the register, assistant register, and chiefs of divisions are less than those paid to such officers in other bureaus, as will be seen by the figures here given. The register's salary is \$4,000; assistant register's, \$2,250; that of chiefs of divisions, \$2,000. This bureau has no chief clerk, and yet there is as much necessity for such an officer as exists in any other bureau of the Department.

In part, to correct this inequality of pay, I recommend that the salary of the register shall be increased to \$5,000; that of the assistant register to \$2,700, and that of the chiefs of the several divisions to

\$2,100.

W. S. ROSECRANS, Register.

The SECRETARY OF THE TREASURY.

IX.--UNITED STATES INTEREST-BEARING NOTES AND CERTIFICATES ISSUED, REDEEMED, AND OUTSTANDING TO JUNE 30, 1892--Continued.

NOTE.—The register's office is the last to receive the redeemed securities of the Government, and therefore the amounts reported as "redeemed" will be less than the actual redemptions by the amount in transitu, and the amounts reported as "outstanding" correspondingly increased.

LX.—United States Interest-Bearing Notes and Certificates Issued, Redeemed, and Outstanding to June 30, 1892—Continued.

#### REPORT OF THE SUPERVISING SPECIAL AGENT.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., December 1, 1892.

SIR: Your attention is respectfully invited to the following summary of the work of the division of special agents for the year ended June 30, 1892, viz:

Reports received	
Arrests for smuggling	134
Customs districts examined	68
Reduction in expenses recommended	\$20, 107. 75
Value of seizures	169, 635, 22
Recovered on account of duties, fines, penalties, and forfeitures	339, 968, 58
Expended for salaries and traveling expenses of special agents	92, 663. 79

The regular examinations of the books and accounts of collectors of customs have been made and many irregularities in the methods of business corrected. These periodical examinations by experienced and intelligent agents are of the highest value in enforcing conformity to the regulations and in detecting and preventing dishonest or erroneous practices of customs officials. It is gratifying to observe that no case of embezzlement of the customs collections is known to have occurred during the past year.

The smuggling of dutiable merchandise upon the Canadian and Mexican frontiers has largely increased since the passage of the tariff act of 1890 imposing high duties on agricultural products. From Mexico horses and cattle are smuggled, as well as tobacco and other merchandise. The maintenance of the so-called "free zone" by the Mexican Government and the privilege accorded by our laws of transportation across our territory of merchandise from Europe destined for places in the said "free zone" facilitate illicit traffic and make it profitable.

It is practically impossible with the limited customs force on the Mexican frontier to prevent smuggling. Frequent seizures are made, but they are believed to be few compared with the number of shipments successfully smuggled. Public sentiment on the Mexican border is hostile to the enforcement of the revenue laws, and customs officials have been discouraged in the performance of their duties by the censure of grand juries for making seizures of smuggled merchandise. A similar feeling prevails on the Canadian frontier, although it has not

taken the extreme form of hostility exhibited on the Mexican frontier. That smuggling is looked upon with leniency, if not with positive favor, by many of the people living near the Canadian line, is beyond question, and this feeling renders more difficult the task of local officials and impedes the enforcement of the law. The principal articles of clandestine importation on the Canadian frontier are wool, clothing, live animals, eggs, and opium. The duty on eggs, which were free under the old tariff, is now equal to about 50 per cent ad valorem, and furnishes an inducement for extensive smuggling. This is usually accomplished at night by use of wagons, or by boats. Several large shipments thus

brought in have been seized.

Smoking opium of Canadian manufacture is constantly smuggled at various points along the line from Puget Sound to Island Pond, and large clandestine shipments are made by vessels from British Colum-One method is to conceal the cans containing the drug in barrels A number of seizures of opium thus concealed have been made at San Francisco, Portland, and other points on the coast. The active efforts of the commanding officer of the revenue cutter cruising in the waters of Puget Sound have been of great value as a check upon smugglers in that region, but the facilities at his command are wholly inadequate for the needs of this service. The smugglers are better equipped than the Government, and the revenue cutters can not compete in swiftness of movement with the modern craft used by violators of the law, who smuggle Chinese as well as merchandise. vigilance of the customs officers and the frequent seizures made have tended to restrict the operations of opium smugglers on the Canadian border to small shipments of 10 to 50 pounds at a time. But the number of persons thus engaged is large, and the aggregate of these clandestine importations represents a considerable loss of revenue. Although smoking opium made in Canada sells for about \$7.50 per pound there, it will not bring more than \$10 to \$11 per pound in the United States. Thus, opium seized and sold at public auction will not bring enough to pay the duty of \$12 per pound. This most troublesome article of illicit commerce will continue to be smuggled so long as the present high duty is maintained. The suggestion made last year is therefore renewed that the rate should be reduced to \$4 or \$5 per pound, and thus remove the inducement to evasion. Under present conditions no duty whatever is collected upon Canadian opium, although a large proportion of the product of some thirteen or fourteen factories in British Columbia finds its way into the United States.

There are a number of tradesmen in Canada who make a specialty of selling goods to our citizens and delivering them by express to the purchasers without payment of duty. The packages, when ready for delivery, are intrusted to an agent, usually a sleeping-car conductor or porter, who conceals the goods until the border is crossed, and then ships them by express to the purchaser. Certain merchant tailors and dealers in furs in Canada have been detected in this business. Some of the tailors have traveling agents in the United States who take orders for clothing to be made to measure and to be delivered free of duty in the manner described. A number of seizures have been made of clothing and furs thus smuggled. Clothing is also smuggled by vessels from Europe, through the officers and employés of such vessels. Several seizures of this character have been made. Returning tourists often bring clothing for friends at home who have sent orders to London tailors and who adopt the means indicated to escape payment of

duty.

The large amount of foreign-made clothing brought in by American citizens returning from abroad, as wearing apparel free of duty under the law, is a growing abuse involving great loss to the revenue and demands correction. A customs inspector charged with the duty of examining passengers' baggage finds great difficulty in determining what is dutiable and what should be exempt, and the prevailing practice by tourists of tipping the inspectors either as an inducement to expedite the examination or to pass duitable goods, has tended to demoralize this branch of the service at the port of New York. These abuses growing out of the discretionary power now given to customs officers in passing baggage could be to a certain extent corrected by requiring American citizens who go abroad to pay full duties on all articles purchased by them in foreign countries, which would be dutiable if imported by a merchant. There is no good reason why persons of sufficient means to enable them to enjoy a European trip should be exempt from payment of duties upon their foreign purchases while those who stay at home have no such privilege. The greater the wealth of these tourists the larger the quantity of clothing and personal effects they bring with them, and the larger the amount of duties remitted to them under the existing law and the decisions of the courts.

The law provides that the Secretary of the Treasury may pay to persons not officers of the United States suitable compensation for information leading to the seizure of goods smuggled. It also provides that when an officer of the customs detects and seizes smuggled goods the Secretary may pay to such officer a sum not to exceed one half the net proceeds after deducting all costs, charges, and duties on the goods seized. This limitation to net proceeds precludes the officer who seizes opium, cigars, and other merchandise subject to high rates of duty from receiving any reward for extraordinary activity and vigilance, inasmuch as these goods do not usually sell for enough to pay the duties and costs. It is suggested that if the law to reward officers for seizing smuggled goods is to remain in force, it should be so modified as to place the seizing officer on an equality with the informer as to awards. This would be but just, and would stimulate customs officers to greater diligence.

The customs officers under direction of the collectors for the several districts are, as a rule, occupied during the regular hours of business with administrative work and can not devote their nights to watching smugglers. The frontier is therefore unguarded at the time when smugglers are most active. Then, too, the public sentiment of leniency toward the crime of smuggling, to which allusion has been made, weakens the hands of the local customs official however zealous he may be. These considerations lead to the suggestion that a more efficient service might be obtained by the organization of a preventive force for frontier duty, to be appointed by the Secretary, to act in conjunction with the local officers, but subject to change of location from time to time. Such a force properly equipped and handled could accomplish much toward the suppression of smuggling.

Under section 25 of the tariff act of 1890, the labors of the customs officers relating to refund of duties on foreign materials used in the manufacture of articles exported have been largely increased. A partial list of articles on which rates of drawback have been established

under said section is as follows:

Barb wire, made in part from domestic material; billiard tables; cotton-gin saws; Scott's emulsion; condensed milk; sulphate of copper; soaps and sapolios; nails in boxes made from domestic lumber; bath and washtubs; split leather; steam motors with boilers; locomotive engines, boilers, blast pipes, flues, etc.; lead seals; mixed

paints; dry white lead; plate glass in car bodies; confectionery; cigarette paper; carriage and tire bolts with nuts made from domestic material; cornet valves; oil-cloths; brass boiler tubes; tinned wire; cloth used in wagons and carriages; brass bedsteads; gold paint; court-plasters; tin house-furnishing goods; electric-lighting cables; lamp black or carbon; carpets; railroad-truck wheels; mirror glasses; white metal, photographic cameras; corsets; copper boiler tubes; dry colors; steel cam shafts; white lead in oil; chairs; galvanized wire and staples with domestic spelter; hay knives; iron bolts with domestic nuts; refined butter; nickel product; horse cars; woolen plush in sleeping cars; anhydrus ammonia; railway cars; waterproof clothing; Pasteur's germ-proof filters; ferrotype plates; rivets in barrel hoops; orange mineral; outing shirts; China and Japan printed silks; Waterbury watches; linen netting; plows; electric-light witches; steel-wire rods; steel pipes; pearline; steel drills; railway cars; wheels, etc.; articles manufactured from lead from imported ore; magnolia anti-friction metal; Hercules powder; fish nets; embroidered silk handkerchiefs; butts and hinges.

The investigation of the claims of manufacturers in these cases devolves upon officers of this division, and is a work requiring a high order of intelligence and accuracy. The special agent to whom an application for drawback is referred must personally visit the factory where the article is produced and investigate, scrutinize, and verify the details covered by the application. He must exercise the utmost care in the examination of the facts as to the proportion of foreign material used and the percentage of wastage incurred. What is or is not a manufacture within the meaning of the law is a question which constantly confronts the officer and which he must investigate closely under the regulations prescribed by the Department. Upon his report depends the rate of drawback, if any, to be allowed. The importance of this work will appear when it is stated that the amount of money paid as drawbacks and debentures during the last fiscal year was **\$3,688,999.66.** 

This division is charged with the correspondence relating to the enforcement of the Chinese exclusion acts, except as to registration under the act of May 5, 1892, which is devolved by law upon collectors of internal revenue. During the past fiscal year 175 Chinese persons were arrested and deported to China at a cost for deportation alone of \$9,443,90. The severe restrictions imposed by the act of May 5, 1892, do not appear to diminish the number of Chinese seeking to effect clandestine entry into the United States. So long as Canada admits Chinese on no other conditions than the payment of a head tax of \$50 our Government will find great difficulty in preventing their ingress. believed that many laborers obtain entry upon false representations that they are merchants formerly residing in the United States, such persons being entitled to admission under a recent decision of the Supreme Court. The papers in such cases are subjected to careful scrutiny, but the evidence in many instances is that of Chinese persons resident here, and experience has demonstrated the general unreliability of such testimony.

There is reason to believe that advantage has been taken of the recognition by our Government of certificates issued by the Chinese consul-general at Havana to introduce Chinese laborers under the pretense that they are persons of the exempt class. It is alleged that in some cases these persons having arrived at San Francisco from China and been allowed to pass in bond through our territory to New Orleans, and thence to Havana, return without delay to New Orleans presenting the certificate of the Chinese consul-general as to their character as merchants. This certificate gives them a prima facie right to admission, and its statements are not easily disproved. It is difficult to understand why Chinese persons of the exempt class intending to come

to the United States should go to the expense of a journey across the country to Havana and there obtain a certificate from the consul-general of their country, required by our laws as a condition precedent to their admission, instead of procuring such certificate from their home government before departure from China. Violations of the law have also been attempted by means of naturalization papers obtained in contiguous countries, but the refusal of this Department to recognize such papers as establishing the right of a Chinese laborer to enter the United States has operated to discourage that method of evasion.

An experience of two years has demonstrated the superiority of the present system of reappraisement by the board of general appraisers over the old method of calling in a merchant to sit with a general appraiser, and undervaluations have been materially checked while the rights of importers have been protected. It should be understood, however, that it is only upon appeals from the action of the local appraisers that the general appraisers can act with respect to valuations, and it is here that the weakness of the system of appraisement is found. Under the present organization of the local appraiser's office at New York and with the present force employed, the work is so divided and assigned that one examiner has usually the sole examination of certain lines of goods. All or nearly all the invoices of the particular class or classes of goods assigned to one examiner are inspected and appraised The volume of business is so great that assistant apby this one man. praisers in charge of divisions can do little in the way of supervision of the work of the examiners in detail. They must rely upon the integrity and skill of the examiners, whose returns are not usually questioned. The examiner is thus enabled, if he be dishonest, to pass undervalued invoices with impunity, or if he be incompetent such invoices may be passed by him without discovery. He may also report improper classifications where the rate can only be determined upon inspection of the goods. That many invoices have been thus improperly appraised, classified, and returned, whether by reason of dishonesty or ignorance, admits of no question. The system under which this is possible is faulty and should be changed.

The existing method whereby one man is continued year after year on the same work has this advantage, that an intelligent examiner thus becomes expert in a particular line of merchandise, and this is the reason assigned for the usage which has governed the appraiser's department for many years. Whatever advantage there may be, in this respect is more than counterbalanced by the evil tendencies of the system above detailed, and until this can be remedied the work of the general appraisers in enforcing correct and uniform values must be limited and

unsatisfactory.

When it is considered that the value of the imports, free and dutiable, at New York during the last fiscal year was \$530,994,613, and that the duties collected at that port for the same period amounted to \$120,160,048, the importance of faithful and intelligent appraisements can be appreciated. Small percentages of undervaluation, or errors in classification whereby dutiable goods are passed free or at a lower rate of duty than the law prescribes, may result in a loss of millions.

of duty than the law prescribes, may result in a loss of millions.

There has been a tendency of late years to create new ports in the interior with the privileges of immediate transportation, and this has been done in some cases in anticipation of business which has not been realized. The records of the Department show that there are twelve ports of destination under the immediate transportation acts which did not receive a single shipment of merchandise during the past year. It

would thus appear that the creation of these ports was not needed nor justified from a business point of view. In so far as the immediate transportation system facilitates the prompt delivery of merchandise at the large interior distributing centers like Chicago, St. Louis, Cincinnati, and other places of like commercial importance, its practical workings are unobjectionable, as there are located at such large ports trained officers who can intelligently appraise and classify foreign merchandise. It should be remembered, however, that the treatment of imports in this manner involves about double expense to the Govern-All such goods must first be entered at the seaboard ports for immediate transportation, and little or no expense would be added if the merchandise were also appraised at the port of first arrival. Every additional interior port created thus adds to the expense of collecting the revenue, while the aggregate amount of duties collected for the whole country is not increased, and the dangers of loss by undervaluation or false classification are multiplied.

Instances have occurred during the past year where advantage was taken of the inexperience of the customs officers at certain small ports near New York to send to such ports for examination and appraisement goods imported at the place named, such goods being immediately returned to New York for sale. It was discovered after the merchandise had been passed by the collector that the object of the importer was to defraud the revenue by undervaluation and false classification, and the goods in at least one such instance were seized and forfeited. This case illustrates the unwisdom of entrusting the important duty of appraising foreign merchandise to unskilled hands. So far as possible the appraisement and classification of imported merchandise should be confined to the larger ports, where expert officers are located. Should the creation of customs ports continue at the same rate as in the last few years, every town in the country will have its custom-house, offices will be unnecessarily multiplied, the expense of collecting the revenue will be greatly increased, and serious loss of duties will result from official incompetence.

While new ports have thus been created, the old customs districts and ports which have existed for years, with little or no foreign trade, have been continued. The collector's compensation in these places is as a rule so small that the President's commission is accepted simply for the honor it confers. The incumbent of the office usually pursues his. ordinary avocation, and the Government employs one or more persons to perform the almost nominal duties of the collector's office. This is too often the case with the greater number of the small custom-The expense of collecting the revenue might be considerably reduced if all collectors were required to attend personally to their offi-

cial duties.

The obvious remedy in these cases, however, is the abolishment of all customs ports no longer required for the uses of commerce, and the consolidation of districts. The collectorship of a consolidated district would then be a place justifying the payment of a fair salary which would command the services of a competent man. Deputy collectors could be appointed for such places within a custom's district as may be needed for the convenience of vessel owners or importers, if any there

An examination of the accompanying statement of all business transactions in the several customs districts shows that during the last fiscal year the expense of maintaining fifty ports exceeded the money collections therein. In one case it cost \$500.32 to collect a dollar. These conditions have existed to a greater or less extent for many years, and present a most unbusinesslike exhibit of our customs establishment which can not be corrected by the Executive branch of the Government. It is to be hoped that Congress will take action on this subject and remedy the evils pointed out, which had their origin in the legislation of one hundred years ago.

Very respectfully,

A. K. TINGLE, Supervising Special Agent.

Hon. CHARLES FOSTER, Secretary of the Treasury.

Note.—The accounts of receipts and expenditures published by the Register will vary in some cases from the figures above given, for the reason that his statement is made up from warrants issued during the fiscal year, regardless of balances in the hands of officers at the beginning and end of the year. If the accounts of each collector were closed and balances settled at the end of the fiscal year the two statements would agree.

## REPORT OF THE BOARD OF UNITED STATES GENERAL APPRAISERS.

NEW YORK, November 1, 1892.

SIR: We have the honor to submit the following report of our work for the year ending October 31, 1892, as to reappraisement and classification, and supervision of the appraisement and classification of imported merchandise.

Reappraisements from November 1, 1891, to October 31, 1892.

	· -	
Grand total	_	2,632
		-, 502

The table shows 2,632 appeals to reappraisement against 2,655 for the preceding year, a decrease of 23 cases.

The usual difficulties in ascertaining foreign market values have been

encountered, but accumulated and accumulating evidence from various sources is enabling the general appraisers to reach more satisfactory conclusions in ascertaining market value of imported merchandise. It is now practicable for American merchants to put in the open market at the places of production many varieties of foreign goods that were formerly under the exclusive control of sole agencies in this country. Leading merchants of some of the great western cities have given assurance that, owing to the fact that the work of the general appraisers has made dishonest competition difficult, they are largely increasing their direct importations.

## CLASSIFICATION.

On November 1, 1891, there were on hand 38,757 cases suspended, and 6,379 pending, making, with 45,995 received during the year, a total of 91,131 to be disposed of. Of these, 59,592 were decided, 25,483 suspended, and 6,056 are now pending and are being disposed of daily, as our regular docket is called.

The very large number of cases decided this year—59,592 against about 6,000 for the preceding year—is largely due to affirmances under the decisions of the Supreme Court on the constitutionality of the new

tariff act.

The great majority of the protests now pending are covered by de-

cisions already made by the board in similar cases.

During some months after the legislation of 1890, protests were so numerous that there appeared to be only the alternative of either disposing of them without a careful investigation, or else, in bestowing the attention proper in each case, to run the risk of an overwhelming accumulation. The problem was, however, successfully solved by members of the board, and the mass of business was disposed of with proper consideration and reasonable dispatch.

Practically, all points raised by protest against the customs administrative and tariff acts up to three months ago have been definitely settled so far as decisions of the board reach, and there is no reason why the new points that will arise should not be promptly determined.

Since our last annual report the Board has had three series of hearings, embracing in fall, spring, and summer dockets all cases in the office at the time a docket was prepared, or that had been filed for hearing up to three weeks prior to the hearing of the class of cases to which protests might belong. The protests embraced in the hearings have all been decided, with the exception of those suspended to await the decision of similar issues pending in court, most of which cases were suspended at the request of the importers, and cases that have been otherwise delayed at the request of the appellants.

The large number of suspended cases is in no small measure due to the delay in the organization of the circuit court of appeals. A few judicial decisions will finally dispose of the great majority of these cases.

For instance, decisions on the following questions will cover the number of protests stated:

	Protests.
Hemstitched and embroidered handkerchiefs	2, 296
Wool knit goods	. 1.076
Conversion of foreign currency.	. 658
Laces	. 2.266
Embroideries	686
Inclusion of selvedges under paragraph 411	. 1, 110

It will be observed that nearly one-third of all suspended protests are comprised under the foregoing six heads.

A statement is appended showing the character and number of questions embraced in the various dockets.

#### SUPERVISION.

Supervision over appraisements and classifications has been directed to a careful examination of the reports and samples received from the several ports, and to advice to the proper customs officers, when there appeared a want of uniformity or a failure to conform to established practice. The division of samples has not yet been brought to the thorough system which we believe to have been designed by Congress, but now that the pressure consequent upon the interpretation of a new tariff has been somewhat relaxed, it has become practicable, and it is our purpose to give this branch of the work the attention which its importance demands.

## OBSERVATIONS AND SUGGESTIONS.

In compliance with the requirements of the customs regulations that the Board should embody in its annual report such suggestions and observations as its experience might warrant, attention is called to the suggestions in the reports of 1890 and 1891 concerning the modification of the additional duty provision in section 7, act of June 10, 1890, the matter regarding the cost of production in section 8, and the portion of section 19 relating to unusual coverings.

## APPEALS FROM THE BOARD'S DECISIONS.

Renewed attention is invited to the paragraph in our last report having reference to appeals taken by the Government from the Board's decisions on questions of classification. Experience for two years past in this branch of customs administration corroborates the belief heretofore expressed that certainty and stability in our customs laws will be greatly promoted by confining the right of appeal on the part of the Government to the Secretary of the Treasury on the favorable opinion

of the United States Attorney-General.

Where appeals involve mainly questions of fact settled by the Board's decisions, it is earnestly recommended that no appeal be prosecuted by the Government without a careful review of the entire evidence on which the particular case was decided. The same question of fact decided by the Board, if allowed to stand undisturbed, applies uniformly to each port in all the States. If appeals be taken to several circuits, experience shows that the judges often differ on doubtful questions, and the rates of tariff duties are left in confusion. Moreover, the Board has the superior advantage of having before them the witnesses during the process of oral examination, whereas the courts, under the present law, try all appeals on the record of the testimony as taken by a stenographer.

We may further add on this important subject, what is unquestionably the fact, that all interests, public and private, regard uniformity as one of the most desirable features in tariff administration. This uniformity could be much more readily secured by the limitation of all appeals from the Board to appeals on questions of law alone direct to the circuit court of appeals. As illustrative of the want of harmony in the

decisions of the lower courts, the following cases are cited: The Board's decisions on marble mosaics, hemstitched handkerchiefs, and embroideries have been affirmed in some circuits and reversed in others; its decision in the great hair case was reversed by the circuit court and

affirmed by the court of appeals.

Without laying stress upon the argument that the members of the Board, whose time and energies are wholly devoted to such investigations, have better opportunities for ascertaining the facts in customs cases than are as a rule available to judges of the circuit courts, we deem it proper to invite attention to the suggestion, which we are advised has been made to Congress, that the findings of fact by the Board be made final, and that appeals from the Board's decisions be taken direct to the circuit court of appeals. This simplification of procedure would greatly facilitate the settlement of these customs cases,

and would, we believe, give general satisfaction.

During the year a board of general appraisers held hearings, on classification, at Buffalo, Detroit, Chicago, St. Louis, Cincinnati, and Philadelphia, and notice has been given that a board will sit at any port when the interest of importers or of the public require its presence. But we have not been called upon, nor have we seen the necessity, to make frequent or regular visits to any one of the several ports of the United States. It has been generally recognized that, owing to the facility of obtaining expert information in New York, customs cases can usually be determined here better than elsewhere. This does not refer, of course, to reappraisements by individual general appraisers which are held at the ports of entry unless otherwise requested by the importer.

It may be of interest to mention that there has been no occasion for compelling the attendance of witnesses under the penal provisions of section 17 of the customs administrative act. A simple invitation has been sufficient to bring before the Board experts who were needed, either from the mercantile and manufacturing interests or from scien-

tific and professional life.

The attendance at the hearings by the Board on classification cases, which are all public, has been larger at every succeeding docket, and the greater care and interest manifested by appellants in the preparation and presentation of their cases shows that importers and their attorneys are fully confident that they will receive an intelligent and impartial hearing.

#### APPEALS TO COURT FROM THE BOARD'S DECISIONS.

As before stated, the whole number of protests from all the collection districts in the United States, upon which decisions have been

rendered by the Board, is 59,592.

In the southern district of New York, the whole number of appeals taken from decisions of the Board, since the act of June 10, 1890, took effect, is 1,146. Many of these appeals are upon like claims and contentions, having been thus taken to save the rights of the appellants.

At the outset returns were made to the circuit court as soon as practicable after the orders for the same were received. Latterly, however, returns have not been made upon duplicate subjects and contentions, and this practice is upon the request of the United States attorney, and of the attorneys representing the protestants.

A return, however, is invariably made at once on the request of the

collector or the protestant, or their counsel.

Of the 1,146 appeals in this district, returns have been made to the court in 398 cases; and of these the Board has been affirmed in 70 cases and reversed in 52 cases. In 5 cases the Board has been affirmed in part, and reversed in part. In 5 cases the appeals have been dismissed, and in 1 the appeal was withdrawn.

In 19 cases no trial was held, for the reason that they severally involved an issue identical with the issue in another case tried, and apart

from these there are 141 appeals to the circuit court still pending.

An analysis of the issues shows that in 53 appeals involving separate issues, the Board has been affirmed, and in 43 cases involving separate

issues, the Board has been reversed by the circuit court.

In 4 cases where the Board was reversed by the circuit court, its decisions have been sustained by the Supreme Court of the United States. In 166 appeals from the decisions of the Board, where no returns have been made, orders of dismissal have been entered in the circuit court on motion of the United States district attorney.

In the several districts other than the southern district of New York

In the several districts other than the southern district of New York returns have been made to all the orders of the circuit court where appeals have been taken, and the following statement is submitted

concerning the disposition of the appeals:

## DISTRICT OF MASSACHUSETTS.

The whole number of appeals has been 29, in 8 of which the Board was affirmed or the appeals were discontinued. In 3 of the cases the Board was reversed, and there are 18 cases still pending. Of the cases decided 2 were taken to the circuit court of appeals, where the circuit court was reversed and the Board sustained on the classification of goat hair, and the remaining appeal is pending.

## EASTERN DISTRICT OF PENNSYLVANIA.

There have been thirty-two appeals from the decisions of the board. In one the appeal has been discontinued, and all the others are pending.

## SOUTHERN DISTRICT OF OHIO.

There have been eleven appeals to the circuit court, in two of which the decisions of the board have been affirmed. All the others are pending.

#### EASTERN DISTRICT OF MICHIGAN.

There are eight cases in which appeals have been taken from the decisions of the board, and none have been heard or disposed of.

## NORTHERN DISTRICT OF NEW YORK.

There have been four cases in which appeals have been taken, and all are pending.

## WESTERN DISTRICT OF TEXAS.

There has been one case on appeal in which the circuit court held that the board had no jurisdiction, and an appeal from this decision has been taken to the circuit court of appeals.

## EASTERN DIVISION OF THE EASTERN DISTRICT OF MISSOURI.

There have been six cases, in two of which the appeals have been dismissed; in the three the board has been reversed, and in one the board has been sustained. Of the last four cases three have been carried to the circuit court of appeals.

#### NORTHERN DISTRICT OF OHIO.

There have been three cases, in one of which the appeal has been discontinued, and the remaining two are pending.

## DISTRICT OF COLORADO.

There has been one case, which is pending.

## DISTRICT OF DELAWARE.

There has been one case, which has been heard on appeal to the circuit court and is undecided.

## DISTRICT OF NEW JERSEY.

There has been one appeal, which is pending.

## DISTRICT OF KENTUCKY.

There has been one case, and in this the appeal was dismissed; and the case has been further appealed to the circuit court of appeals.

#### EASTERN DISTRICT OF LOUISIANA.

One appeal has been taken, and is pending.

NORTHERN DIVISION OF THE WESTERN DISTRICT OF MICHIGAN.

One appeal has been taken to the circuit court, and is pending.

## DISTRICT OF MARYLAND.

There have been five appeals from the decisions of the board. In two of these cases the board has been affirmed, and the remaining three are pending. In one affirmance the board was sustained on further appeal by the Supreme Court of the United States, and in the other affirmance an appeal has been taken to the circuit court of appeals.

## NORTHERN DISTRICT OF CALIFORNIA.

There have been six cases, in two of which the board, having sustained the classification of the collector, was reversed, and no appeal has been taken by the Department. In the remaining four the cases are pending.

## NORTHERN DISTRICT OF ILLINOIS.

In this district there have been quite a number of appeals from the decisions of the board. In reply to our request to the clerk of the court for information as to their disposition, that officer did not furnish

the information, but referred us to a report made by the United States

attorney for that district to the Department.

There have been five or six cases decided by the board, in which appeals have been taken to the Supreme Court of the United States. In these it may not be improper to add that the rulings of the board have been sustained in all except one. In two cases the decisions of the circuit court were reversed and the rulings made by the board adhered to.

Respectfully, yours,

GEO. C. TICHENOR,
H. M. SOMERVILLE,
J. B. WILKINSON, Jr.,
CHAS. H. HAM,
GEO. H. SHARPE,
THAD. S. SHARRETTS,
F. N. SHURTLEFF,
W. F. LUNT,
JAS. A. JEWELL,
U. S. General Appraisers.

Hon. Charles Foster, Secretary of the Treasury.

# REPORT OF THE BOARD OF EXAMINERS OF THE TREASURY DEPARTMENT.

## REPORT OF THE BOARD OF EXAMINERS.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., December 28, 1892.

SIR: We transmit herewith the report of Mr. Theodore L. De Land, the Treasury examiner, relative to the operation of the board of examiners under the rules and regulations promulgated by you on December 4, 1891, which provided for the keeping of efficiency records of all persons in the classified service of this Department, and for competitive examinations for promotions so far as practicable and useful.

Your attention is invited to the tables which accompany the report,

and which illustrate the system as applied.

Specimens of the different kinds of examinations used during the competitive tests and pass examination tests are appended for the purpose of comparison.

Your attention is also invited to the suggestions of Mr. De Land rel-

ative to improvements in the system and in the service.

Respectfully, yours,

FRED A. STOCKS,
A. L. STURTEVANT,
Members of the Board of Examiners.

Hon. CHARLES FOSTER, Secretary of the Treasury.

## REPORT OF EXAMINER.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
BOARD OF EXAMINERS,
Washington, D. C., December 24, 1892.

GENTLEMEN: I have the honor to transmit herewith a report of the operations of the board of examiners of the Treasury Department for the past twelve months. No report was made in 1891.

## THE PRESIDENT PROVIDES FOR COMPETITIVE EXAMINATIONS.

Early in the last fiscal year the President promulgated a rule which provides that, so far as practicable and useful, competitive examinations shall be established in the classified civil service to test fitness for

promotion, under regulations to be approved by him. This rule contained the limitation that until such regulations are applied to any part of the classified service, promotions therein shall be made in the man-

ner prescribed in the rule applicable thereto.

The Treasury examiner, on the receipt of the above order, shaped his course accordingly, and prepared to execute at once the will of the President so soon as the new regulations should be issued; and in the meantime promotions were made after examinations conducted under Secretary Fairchild's system, which went into force in the fall of 1887.

## THE PRESIDENT ORDERS AN EFFICIENCY RECORD.

The President, on December 4, 1891, issued his circular letter addressed to the heads of the several. Departments, in which he referred to the fact that in his message to the first session of the Fifty-first Congress he had suggested to the members of his Cabinet that they consider whether a record of the elements of faithfulness and efficiency might not be kept in each bureau, showing the relative merits of the clerks, which might be regarded as a test on which to make promotions; and he then issued the imperative order that in each Department a plan be at once devised and put in operation for the keeping of such a record of all persons in the classified service, with a view to placing promotions wholly on the basis of merit.

When the President's suggestion first appeared, the chief of one of the most important bureaus unofficially asked the examiner to prepare a plan based upon the one outlined in the message. This was done in February, 1890, but no further action was taken by the officers of this

Department, so far as known to any member of the board.

When the President's letter reached the Department, it was given to the examiner, with verbal instructions to prepare plans for submission to the Secretary, and ultimately, to the President for his approval.

## THE RECORDS OF FAITHFULNESS AND EFFICIENCY.

Exhibit No. 1 is a copy of the efficiency circular issued by Secretary Foster on December 24, 1891, in which the President and the Secretary expressed their confidence that such a record fairly kept and opened to the inspection of those interested would stimulate the work of the Department, and be accepted by all as the basis of a system that would tend to place the question of promotions upon a just foundation. the circular the subjects of faithfulness and efficiency, the potent and general factors of a clerk's effectiveness, were resolved for convenience of record, into the elements—fidelity in punctuality and attendance, industry, accuracy, aptitude, conduct, and ability; and to each element a relative weight was assigned commensurate with its importance. Secretary very carefully defined these terms, and modified each definition by a proviso in the interest of kindness, liberality, and justice; and he exhorted the officers of his Department to administer the provisions firmly, justly, impartially, and never in an offensive or oppressive manner; and he further cautioned them to exercise great care to reward the clerks who performed their duties with zeal and fidelity.

#### SECRETARY FOSTER ORDERS COMPETITIVE EXAMINATIONS.

Exhibit No. 2 contains the rules and regulations prescribed in a circular issued on December 24, 1891, by Secretary Foster, relative to com-

petitive examinations for promotion of persons within the classified service, and of pass examinations before appointment of chiefs of division and of special agents. This circular was issued to make effective the new rule issued by the President, and the efficiency record provided for in the circular referred to in the preceding paragraph. positions in the classified service below that of chief of division are under the provisions of this circular unless the civil-service rules specially except them from examination; the promotions are to be from grade to grade in the same bureau; they must be competitive only where competition is practicable and useful; they are open to all in the bureau, and they must be practical in character and include only the subjects that shall test the general intelligence of those who compete, and their technical knowledge of the laws, regulations, and duties of the office in which the competition takes place. Special weights are given to optional subjects, to length of service, and to war records of candidates. Eligible registers must be kept for each bureau, and in certifying from the registers the name of the person standing highest must be sent, and that person must be promoted forthwith.

Examinations that are noncompetitive and not technical are provided to test candidates designated for chiefs of divisions or special agents, which must be practical in character and relate to those matters which fairly test the person's fitness and capacity to discharge the important

duties incumbent upon persons appointed to those positions.

The rules went into effect on January 1, 1892, but were applied December 24, 1891, when a pass examination then in progress for promotion to a clerkship of class two in the First Comptroller's office was abruptly terminated, all the clerks in that office in the class below being invited to compete, and the prize being awarded at once to the clerk who attained the highest mark.

#### THE RULES GO INTO OPERATION.

The rules, when they were published, did not meet with a very enthusiastic reception. The attendance and punctuality features were novel to some and irksome to others; while the fact that the ratings of the elements of ability and aptitude were to be considered comparative or perhaps contrastive, and that executive force or the active power to perform intelligent work with rapidity and accuracy was to be a potent element in future determinations of fitness for higher work and better pay, operated to make the poorly equipped shrink from competition with those in possession of superior resources of mind and physique.

All the officers on whom fell the duty of comparing their subordinates did not respond with alacrity to the expressed will of the President. Some were courageous, attacked the problem at once, and reached well-considered and happy results; while others were timorous, procrastinated, and, finally, evaded the issue by assigning to the inferior and to the superior identical ratings; and it was noticeable that the head of the bureau with the greatest number of persons in the classified service on his rolls had less trouble than the chiefs with the least

number.

## THE CONFERENCE OF BUREAU OFFICERS.

The Secretary, to secure uniformity in ratings, called a meeting of the heads of bureaus and chiefs of divisions of his office in April last to discuss the matter. At the meeting the Secretary said that he had noticed the January reports and had observed that 843 persons were marked 100 and 453 were marked 99 or more, but less than 100, or that 1,296 clerks were marked 99 or more. This, he thought, could be construed to mean that nearly 1,300 clerks had reached such a high order of efficiency that no improvement was possible in their cases, and which would be very gratifying if it could stand the test of critical analysis. He had also noticed similar reports for February, in which 1,360 were marked 99 or more out of 2,739 persons marked, or that virtually one-half the clerical force of the Department had nearly, if not quite, reached the state of perfection. He realized that they met with some difficulties; that they were all trying to be just and fair, and that the difficul-

ties would disappear with experience.

He told the chiefs that the President was extremely anxious that the efficiency records be kept with so much care that exact justice might be done to all concerned; that he shared that anxiety with the President, and that he should do all in his power to make the plan succeed. He hoped that they would cooperate heartily with him, and that they would avoid the perfunctory marking of all persons in a division with the same mark, be it high or low, as that course would evidently defeat the President in his efforts to ascertain the relative merits of the clerks in making promotions; and he was of the opinion that when identical efficiency marks were given to groups of persons who were competitors for promotion, it was equivalent to saying that promotions could not be made on the records of their efficiency, which in his opinion was absurd. The Secretary concluded with the remark that when a chief marked a clerk 100 for general efficiency, he virtually made it impossible to recognize in him further growth of mind or future improvement, and he firmly discouraged such marks.

The conference was largely attended, the freest discussion was allowed, and the meeting was concluded with an invitation to all to submit their views in writing, in order that a consensus of opinions might be reached.

Nineteen officers of the Department submitted written suggestions, and they readily fell into one of three groups: First, they suggested slight modifications of the rules then existing; or, second, they indicated a readiness to continue the rules unchanged; or, third, they proposed changes so radical that the potency of the rules would be extirpated.

Those who favored radical changes for the most part wished to eliminate the elements aptitude and ability as factors in estimating clerical

efficiency

When the Secretary's attention was called to the communications he saw that they contained opinions diametrically in opposition to one another.

The President's language was referred to, in which he mentions "those elements that are covered by the terms 'faithfulness' and 'efficiency,' and a rating made showing the relative merits of the clerks of each class."

It was argued that the term "faithfulness" covered those qualities of a clerk that are entirely under his own control and may reach the maximum in any system of marking, but that the term "efficiency" covers qualities that are partly, if not wholly, a matter upon which the superior officer is to pass judgment and are not, except remotely, under the control of the clerk.

It was also shown to him that danger would arise should he follow the suggestions of the bureau chiefs who wished to eliminate absolutely the factors "aptitude" and "ability," or should he concur with those officers who wished these two factors to be ignored by the bureau chiefs, and who had suggested that it be left to the competitive examination to determine their value, and he was asked, would he not thus be unable to obtain an efficiency record of those persons who would not consent to enter the competitive examinations? The President's peremptory order was to at once devise and put in operation a plan for keeping an efficiency record of all persons within the classified service. Would not an efficiency record with "aptitude" and "ability" effaced, be, when reduced to the last analysis, a mere time report?

When the Secretary signed and promulgated the rules, he declared to the examiner that he would change them whenever it was found to

be practicable and useful to do so.

## THE RULES MODIFIED.

In view of the fact that certain of the bureau chiefs earnestly asked that the rules be modified, the examiner suggested to the Secretary that he consider the question of revision; and referred to him the exhaustive and scholarly communication which Prof. T. C. Mendenhall, the distinguished Superintendent of the Coast and Geodetic Survey, had written on that subject. The examiner urged that Prof. Mendenhall's suggestions were judicious; and that, with a few slight modifications, their adoption would remove most of the objections made to the rules.

Prof. Mendenhall, after discussing the other elements, said:

The remaining three elements, accuracy, aptitude, and ability, I would fuse into one, calling it, perhaps, "ability." It is especially difficult to discriminate between aptitude and ability, and as far as I am able to see, entirely useless. Accuracy is an important element of ability, and may properly be classed under that head. The three are alike also in the fact that they are not, in any great degree, subject to the

will or desire of the individual.

We thus divide the various elements of efficiency into three classes, the first including punctuality and attendance; which are entirely controlled by the individual, and the rating in which must always be accurate; the second includes conduct and industry, elements which are in themselves under the control of the individual, but whose rating must rest with the chief; and the third, including ability, accuracy, and aptitude (now proposed to be reduced to one, under the first name), elements not in any degree under the control of the individual, and whose rating requires the most careful consideration, owing to their relatively great importance in the make-up of the whole.

I would change the relative weights attached to these somewhat, putting them as follows: Punctuality, 2; attendance, 2; conduct, 2; industry, 6; ability, 13. In explanation of these changes I will simply remark that good conduct is so universal that it should not be given more weight than punctuality or attendance. I am convinced that too little account is made of industry in the existing scheme. It has such an important bearing on efficiency as measured by "output" that I would rank it higher.

higher.

Much difficulty was encountered in the different bureaus in comparing the efficiency of persons in the classified service when the chief of one division would raise the marks of his clerks unduly, in order that they might not be below the marks given by the chiefs of other divisions, who for some reason had marked their clerks perhaps too high. To obviate this difficulty, and to secure a just uniformity in marking ability (in the new scale), a schedule was suggested to be applied to all grades of employés in the classified service of the Department, as follows:

All persons in the classified service in each bureau or office in the Department to be arranged into five groups, thus: (1) The superior, (2) the excellent, (3) the good, (4) the fair, and (5) the poor.

When arranged as described above, each person so classified to be

given a mark for ability under the following schedule according to his or her estimated worth:

95, but no higher, to represent the highest order of excellence or the superior; 90 or higher, but less than 95, to represent the excellent; 85 or higher, but less than 90, to represent the good; 80 or higher, but less than 85, to represent the fair; and 75 or higher or lower, but less than 80, to represent the poor.

All persons in the classified service should be marked in ability by the above standard; but a clerk in the lower grade should not be com-

pared with a clerk in a higher grade.

Exhibit No. 3 is a copy of a circular issued by Secretary Foster July 1, 1892, in which he modified the rules nearly as recommended by Prof. Mendenhall. It contains new features as follows: When desired by the clerks in any bureau, or in the Secretary's office, a committee of clerks will be appointed by the Secretary of the Treasury to confer with the board of examiners and the examiner, to consider such complaints as to inequalities in the ratings as may be submitted; a ruling to permit any person in a classified office to compete for promotion in his office; and a modification of the rules providing for specials, by eliminating in such cases the relative weight of the special.

Exhibit No. 4 contains some minor changes suggested by experience. Exhibit No. 5 provides that a clerk must inspect and verify his record made by his chief, with the penalty that neglect on the part of the clerk to verify his record or to correct errors in computations before a competitive examination shall forfeit the right to have the correction

made after the examination.

## PRELIMINARY AND GENERAL PAPERS.

Exhibits Nos. 6, 7, 8, and 9 are copies of papers preliminary to a competitive examination.

Exhibit No. 10 is the form of the report used by the board of exam-

iners in case of each candidate examined.

Exhibit No. 11 is a specimen examination, used in a competition for clerkships of class two in the office of the First Auditor. For positions above or below this grade the papers vary only in a slight degree.

Exhibit No. 12 is a specimen average sheet copied from one in the files, and illustrates the process by which results are reached after the

papers are marked.

Exhibit No. 13 is the form on which the name of an eligible is cer-

tified for promotion.

Exhibits Nos. 14, 15, 16, 17, and 18 contain specimen groups of questions from which tests in arithmetic, accounts, grammar, and general information (history, geography, Government and departmental matters) were chosen. This system effectually prevents duplication of papers in the different examinations, and provides, with slight cost, for extended combinations, permutations, and arrangements of questions, thus securing an endless variety of practical tests.

Exhibit No. 19 is a table in which will be found a list of the clerks who entered a competitive examination for promotion to clerkships in the First Auditor's office, with the marks attained by each in the subjects on which examined and in the order of merit. In this group will be found the names of four persons who were not employed in that office, but were designated by the Secretary to enter the competition, a sufficient number of clerks in the First Auditor's office not having accepted

the invitation of the head of the Department to compete for positions on the eligible lists from which promotions could be made in the future. It is the rule and policy of the Secretary to select for such designations, by reason of their faithfulness and efficiency, persons from other offices in order that the examination may be fairly competitive.

Exhibit No. 20 will show the distribution of the competitive examinations in this Department conducted under the President's order of December 4, 1891, and Secretary Foster's rules and regulations. The ex-

hibit is by offices, classes, and sex.

Exhibit No. 21 contains the distribution of the first 100 promotions in the Treasury Department as the result of the competitive examinations held under the President's order and Secretary Foster's rules. This table is also arranged by bureaus, classes, and sex.

## THE FIRST 100 PROMOTIONS.

Exhibit No. 22 is a list of the names of the first 100 persons promoted in the Treasury Department under the President's order and Secretary Foster's rules. The names are arranged in the order of their certification and by offices. In each case the person certified stood at the head of the list, and there has been no deviation from that inflexible rule. In all cases the person certified has been promoted forthwith, or so soon as the question of rolls could be adjusted. The list also shows the efficiency mark of each candidate, the general average attained, and the time occupied in the examination; the years of service in the Treasury Department, the mark attained in each subject involved in the test, and the complimentary mark given in case of war service.

## BUREAU AND OFFICE QUESTIONS.

Exhibit No. 23 is an extended and comprehensive compilation of the miscellaneous bureau, division, and special official questions asked of clerks in the Department, while under examination for clerkships of classes A, B, C, D, and E, and for clerkships of classes one, two, three, and four, in the divisions of the office of the Secretary of the Treasury and in the several bureaus of the Treasury Department. The list as now printed covers substantially every branch of work in the Department, and is given at length in response to repeated requests from the clerks. The prior lists that have been published embraced only a portion of the work of the divisions, thus giving some of the clerks an advantage These questions are a fair index of the work assigned over the others. to the Department in all of its numerous branches. It is believed that their publication will stimulate study and investigation on the part of the clerks by indicating to them the portions of the work in which their knowledge may be deficient.

In a few instances objection was made to their publication on the ground that it would outline the examinations to the candidates. The board of examiners considered that phase of the subject and reached the conclusion that it was now imperative to publish for the reason that it would give to the clerks an opportunity to increase their knowledge

of official duties.

## SECRETARY FAIRCHILD'S STANDARD EXAMINATIONS.

Exhibits Nos. 24, 25, 26, 27, 28, and 29 are specimen standard pass-examination papers (used prior to the adoption of the competitive rule),

prepared under the special direction of Secretary Fairchild. As modified by him these tests were adopted as the standard for future examinations. They were considered at the time to be within the range of the courses of the common schools of the Republic. Those for \$900 or the lesser grades were below the course of study of the sixth grade of the public schools of this city; those for the clerkships of class one were below the course of the seventh grade of schools, and those for the clerkships of class four were within the limits of the course of the eighth grade; and all were within the President's order as defined in Department Rule II, and of those used by the United States Civil Service Commission for admission, with the following modifications:

Candidates were required to tabulate Treasury statistics, to have a general knowledge of the Department itself, to have a special knowledge of the bureau to which assigned, and a technical knowledge of the work upon which they had been engaged during the last year. To these modified features special relative weights were given—the greatest weight having been given to the work of the candidate's desk.

In addition to the common-school education as a basis, the special education of the candidate when used in official work was recognized and each candidate was given an opportunity to voluntarily exhibit his skill in his special line, as, for instance, in drafting ,free hand drawing, tracing, map-drawing, topography, perspective, algebra, geometry, the use of logarithmic and other tables, statics, hydraulics, graphic statics, stenography, typewriting, the making of stencils for mimeographic copying, tabulations with typewriters and caligraphs, etc., all resting on the common-school education as the essential feature; but when taken at the option of the candidate special marks were given according to the skill required.

Exhibit No. 30 contains the names of 100 persons under the pass-examination system who attained marks worthy of honorable mention, grouped as follows: Those below 100 but over 95, those below 95 but over 90, and those below 90. The mark attained by each candidate in

each subject is also given.

Exhibit No. 31 contains a tabulated list of the number of examinations for promotion under the pass-examination system in the Treasury for the year 1891, by office, sex, and class, and the number who passed or failed.

Exhibit No. 32 is a specimen set of examination papers used to test the fitness of candidates designated by the Secretary of the Treasury

for positions of special agents or chiefs of division.

Exhibit No. 33 is a photolithographic specimen reduced from a sheet used to test typewriters in copying tables. Tests of this kind are used only with experts and not in the usual competitive examination.

Exhibit No. 34 is a specimen copy from which dictations are taken for use when typewriters are examined for promotion. The examiner holds the copy and verbally instructs the candidate how to prepare the table.

Exhibit No. 35 is a specimen of matter dictated to phonographers and stenographers.

## SECRETARY SHERMAN'S COMPETITIVE EXAMINATIONS.

Exhibit No. 36 is a copy of Secretary Sherman's order providing for competitive examinations. Under his administration a board met and formulated rules for examinations for promotion which were approved by him. These rules provided that when, in his opinion, the public interests demanded it, the Secretary of the Treasury would appoint a

board of examiners to conduct examinations for the promotion of clerks in the grade next lower than that of a vacancy, by selection from the three persons who should have passed the highest examination in competition with clerks of their grade; and they also provided that the list of eligibles should be good for all vacancies accruing within six months from the examination; unless another examination were ordered by the Secretary. Only a few examinations were held under the above order.

• Exhibit No. 37 is a specimen of the papers used in a competitive examination under the rules of Secretary Sherman in a competition for a clerkship of class four in the Second Auditor's office. They indicate

fairly the scope covered by the examinations of that time.

Exhibit No. 38 is a series of competitive examinations used by the Civil Service Commission appointed by President Grant. This Commission operated from January 1, 1872, to March 9, 1875, and during that time made many promotions in this Department. These questions will illustrate very clearly the character of the examinations held at that time, both for admission and for promotion. It is but just to say that the splendid work of that early Commission has always been realized and appreciated in this Department, for under it many of the best clerks who now stand high in the estimation of their chiefs took office and secured promotion.

Exhibit No. 39 contains the rules under which the Board of Exam-

iners marks the papers of candidates.

Exhibits Nos. 40 and 41 contain full instructions prescribed by the Secretary of the Treasury for the preparing, folding, and briefing of official papers. The fact is frequently revealed in the examining room by candidates under examination for promotion that the Secretary's circular has never been given to them. These circulars are printed in large quantities and are intended for the guidance of the official force of the Department. To assist in its distribution the circular is published with this report. Hereafter the examiner will insist upon exact compliance with its terms on the part of the candidates who enter the competitive examinations.

## THE NUMBER EXAMINED.

There have been examined under the new competitive rules 444 candidates, of whom 273 were males and 171 females. They came from 13 bureaus, and were arranged into eligible lists as follows: 5 lists for class four, 6 for class three, 9 for class two, 10 for class one, 9 for class E, 3 for class D, and 1 for class C, or a total of 43 eligible lists.

There were for the classes candidates as follows: 44 candidates for class four, 69 for class three, 114 for class two, 77 for class one, 96 for class E, 30 for class D, and 14 for class C. In the Treasurer's office all who were examined below class D were considered as eligible for class D; and promotions were made grade by grade without further examination.

## THE RECORD OF THE WOMEN.

Of the 100 promotions that have been made under the new rules, 54 were won by women, of whom 32 received a general average of 90 or more. Of the women so promoted 21 have served in this Department over ten years and 8 have served between twenty and thirty years. Sixteen of the 54 promoted were certified from the lists of the Civil Service Commission.

## THE RECORD OF THE MEN.

Forty-six of the first 100 promotions under the new rules were given to men, of whom 28 were appointed from the eligible lists of the Civil Service Commission. Six of the persons so promoted received a complimentary credit for military or naval service during the civil war, 7 had served in this Department over ten years, and one had served over twenty years.

## WHERE SHALL EXAMINATIONS BE CONDUCTED?

The opinion has been expressed that examinations for promotions should be taken from the Departments and be placed exclusively under the control of another organization, in order that they may be uniform in So far as this Department is concerned it can pass at once under any control decided upon; but the question of uniformity in the examinations is too important to be lightly considered. Experience is the only guide in a matter of this kind; and experience has shown that the examinations of persons in the classified service can not be uniform even in the same Department; and it has also shown that it is neither practicable nor useful at all times to have them uniform in the same bureau, and frequently not in the same division. In the Coast and Geodetic Survey it is not practicable to enter the same grade—as now classified and hold a competitive examination in which computers and draftsmen are to be competitors, for that is an attempt to compare incomparable terms. It is neither practicable nor useful in the Bureau of Engraving and Printing to ask examiners of printed securities to compete with persons who manipulate the numbering machines. In the Secretary's office it is not fair to ask a copyist to compete with a paper-counter, nor a typewriter to compete with a bookkeeper on terms of equality so long as their special work is so different. It would soon be observed that the examinations should be adjusted to the needs of the service, which are endless in their variety. No person outside of the Department can possibly take more interest in the work of the Department or in the welfare of the persons in the classified service than the distinguished men who from time to time are selected as heads of the Departments.

## HISTORY OF EXAMINATIONS IN THE TREASURY DEPARTMENT.

The history of the Treasury Department is the history of civil-service reform. From its offices went the men who directed the work of President Grant's Commission; from the Treasury went the men who started the present Commission on its road to success; from the active brain of one of the Treasury's great men, now dead, sprang the system itself; and the Treasury alone, during the years that intervened between the Grant Commission and the present Commission, kept steadily on its course of reform under each succeeding Secretary; so that when President Harrison promulgated his order the Treasury examinations did not stop for a day, but were adjusted at once to the new conditions.

## THE INTEREST OF THE SECRETARIES OF THE TREASURY.

The history of this Department demands that the work in behalf of the clerks performed by the distinguished Secretaries be noticed. Before the days of the Grant Commission, Secretary Boutwell, in the interest of a better civil service, and wearied with the perfunctory methods used in selection for appointment and promotion then in vogue, began the system of written examinations as tests of fitness, and enforced his orders with so much energy that the service immediately improved.

During the days of the Grant Commission, Secretary Richardson was interested in a just enforcement of the rules, and on several occasions

interposed to prevent injustice to his subordinates.

After the Grant Commission had terminated its work, pass examinations were resumed and continued until Secretary Sherman's administration, when he devised the system already referred to in this report. His mind was intensely occupied with the refunding problems, but in many ways, in the face of other pressing duties, he did much to elevate the civil service by recognizing the zeal and fidelity of his clerks in the performance of their public work, and for that reason has left upon them an impression that time has not effaced, that he was their sincere friend.

During his first administration as Secretary Mr. Windom made an exhaustive study of the civil service in his Department, and had on his desk the data—now in the files of the board of examiners—on which to base new rules for admission to and promotion in the service, but this important work on his part was suddenly terminated by the assassination of President Garfield and the election of Mr. Windom to the

Sanata

Secretary Folger was the head of the Department when the Pendleton bill became a law. During his administration his work in behalf of an improved service is well known and is a matter of record: The writer can say that the advice given to him by Secretary Folger when assigned to duty as an examiner with the Civil Service Commission, was an assurance of the Secretary's interest in the service. He said: "Stand up for what is right; protect your Department from incompetents; give us good material for the clerks of the future, and I will stand by you." Subsequently he discussed a plan for promotions, but his untimely and unexpected death ended his work in that direction.

The mutations of politics and the reversal of public opinion in 1884 threw the clerical force into a disturbed condition of mind, which was calmed only by a few words of assurance from the President elect. The advent of the new Secretary was awaited with painful interest, but the course of Mr. Manning in a short time restored confidence in the stability of the system and he continued to the day of his death an

active friend of the faithful clerk.

Secretary Fairahild probably gave the subject of promotions more thought than many of his predecessors. He and his private secretary carefully read the proof sheets of the standard examinations adopted under his administration, modified the plan in several important particulars, and raised the standard higher than ever before; and then, on the suggestion of Assistant Secretary Thompson, extended the principle to cover all clerical places. Mr. Fairchild stated shortly before he retired, when he was inspecting the examination papers of a clerk who had attained a high mark, that he was prepared to go still farther in the way of reform. The plan that Mr. Fairchild adopted is based upon the theory that a clerkship is academically a progressive step from grade to grade.

During the second administration of Secretary Windom he again interested himself in the question of the civil service. He found for his own protection that the fitness of persons who applied for positions of special agents must be tested, provided a brief plan for their exami-

nation, and at the time of his sudden death had on his desk a proposition to extend the principle to other branches of the service.

Shortly after Secretary Foster entered upon his duties in the Treasury he began to investigate the question of the promotion of his clerical force, and was considering a draft of regulations for the enforcement of the principle of competitive examinations for promotion when the order of December 4, 1891, issued by the President, reached the Department. A few changes in the rules were made to conform to the President's wishes relative to the efficiency record. The proposition to examine applicants for chiefs of division was included, and then, after receiving the approving check of nearly every bureau officer and chief of division in the Secretary's office, the rules were signed by Secretary Foster, with the remark that if he could place the question of promotions on an equitable foundation in his Department he would consider his work as a Cabinet officer well done.

The above review of the interest manifested by the line of distinguished Secretaries from Boutwell to Foster is conclusive proof that it would be difficult to hand over promotions to any organization that could or would have a higher interest in the subject than the head of a Department, under whose direction the work is now done.

## THE ACADEMIC TESTS AND EFFICIENCY RECORDS.

What weight should be given to the efficiency record in computing the result of an examination for promotion, and should that examination cover the usual branches of a common-school or business education, as now, or be confined to office questions? If the plan of the record were perfect, if heads of bureaus and divisions were impartial in disposition and infallible in judgment, if the public work were uniform in kind or easily graded as to quality or difficulty, then the "efficiency record" might furnish all the needed elements of competition, and the formal examination could be abolished. It is evident that experts have not agreed on the perfect form of the record; they differ as to the elements that should compose it; the relative weight to be given each and the mode of keeping the account. Some chiefs mark conscientiously and with judgment, some without, and some with indifference; therefore, so long as these things are true, the "efficiency record" can not be the Two records that are equal may be only test of fitness for promotion. selected, one of which may represent service on difficult and complex work requiring high powers of analysis, practical judgment, and thorough technical education, while the other may show a like marking for work demanding only good penmanship and careful copying. Treasury Department furnishes hundreds of such examples. In fact, the efficiency record, as it may be kept, may indicate, outside of the time report, little but the personal opinion of the marking officer. There are positions in which the clerk has to have numerous laws, regulations, orders, and decisions at his fingers' ends; has to weigh evidence, verify thousands of computations, determine questions of law or fact. state accounts from original data, and write statements of the details of official action and the reasons therefor, for the information of interested parties. It is a grave defect of our service that this high grade of work is not classed by itself, but the fact is it is not. Clerks accomplished in work of high quality compete in examination with those doing inferior work, and they go together on the eligible list.

This might afford an argument for taking all the examination questions from office work. While, however, the higher work would per-

mit an endless variety of questions frequently testing to the utmost the clerk's knowledge and talent, the questions taken from the lower work must usually be simple in character and limited in scope and number, so that under uniform rules of marking the better clerk finds a certain disadvantage arising from the very qualities that should in

sure his triumph.

A clerk engaged on lower work may allege, and often with truth, that it is not his fault that he is not employed on work that would call forth his best powers. To equalize matters, therefore, each should be allowed to compete in a field that all enter on equal terms; that is, the examination should cover subjects in which each may be expected to be fairly proficient, which may be called the academic test, i. e., penmanship, orthography, and business arithmetic. These should be essential to all examinations; even a copyist who is ignorant of them does poor work. Syntax, business composition, and double-entry bookkeeping (at least of the elementary sort) are essential for any higher A knowledge of actual office work is a very necessary element of competition and should be given a high weight. An innovation might consist of a relative weight of from 1 to 10, given to each question by the chief who proposes it, as indicating the comparative difficulty of each, this weight to be used as a multiplier of the mark on the question in averaging the sheet. Where the questions are very simple this system would afford the examiner an opportunity to discrimi-

Experience shows that the most accurate and reliable clerks are the quickest. Slow men seldom understand their work clearly.

## COMPLIMENTARY MARKS GIVEN FOR WAR RECORDS.

Attention is called to the rating given to those who were honorably discharged from the military or naval service of the United States. few months before his death Secretary Windom issued an order which gave 5 points additional to those who could claim credit under section 1754 of the Revised Statutes. Experience soon compelled the Department, in the interest of justice, to go farther and give this credit to all soldiers or sailors who were honorably discharged, thus going farther than the law, which provides only for those persons honorably discharged from the military or naval service by reason of disability resulting from wounds or sickness incurred in the line of duty. plementary credit of 5 points was given in the first instance to aid in the promotion of those who did not possess the required clerical capacity, and therefore could not pass the examinations; but, under the rule, it was given also to all who came within its provisions, and thus frequently was given to men with good academic accomplishments, who, under any system, would attain high marks. In some cases it would make the effective average over 100. To avoid such inconsistency the plan was adopted of assigning a special relative weight to war records and giving to each candidate the mark of 100 in that subject, thus avoiding the apparent paradox, but always putting the soldier ahead, all other things being equal. A little reflection will show that a difference of 5 points between two candidates where one makes 45 and the other 50 does not mean the same as the difference between two candidates where one makes 90 and the other 95. As the limit 100 is approached the arbitrary constant becomes more potent, and finally when the limit is passed the inconsistency begins; but under the new rule

the limit may be reached and each may attain but never exceed 100, and when the limit 100 is attained by each of two candidates, one being a soldier and the other a civilian, all other things are equal and the promotion would go to the soldier. (See Exhibit 42.)

#### LOST TIME AND OVERTIME.

It has been suggested that clerks who leave their desks during office hours on private business should be allowed to choose and specify in entering the loss of time, at the close of the day, whether the time so lost shall be charged against their annual leave or against their punctuality record; and it has also been suggested that any clerk who works out of office hours on public business, by order of a superior officer; if the time exceed one hour, should have the time so credited that it may offset time lost, when the time so lost is by permission. These suggestions deserve and are commended to you for consideration.

#### THE DANGER POINT INDICATED.

There is a danger point in the civil service which can not be overlooked much longer. The present policy is to promote from grade to grade, the result of which will be eventually to fill all the higher grades with persons now in the lowest grades. Will the best of those who compete before the Civil Service Commission for admission accept positions when the compensation is so small? And if the best will not enter the service by reason of the inadequate pay, how can deterioration of the service be prevented? The question of the substitute is also one that will soon require consideration, for the commencement of the service of such persons is on such small pay, the tenure is apparently so insecure, and the period of temporary appointment so indefinite that many who would make good clerks refuse positions after being selected. The Departments must be protected if possible under all conditions. This may be accomplished in part if the Civil Service Commission will raise its standard for admission so that none but the best can reach the eligible list.

## INTERMEDIARY GRADES PROPOSED.

There is also a chance to improve the opportunities of those who enter by increasing the number of grades in the civil service; that is, when the classified service is increased, as it soon must be, especially in the Sixth Auditor's Office, provide for places the pay of which may be fixed at \$1,700, \$1,500, \$1,300, and \$1,100, positions intermediary between those now fixed by law. This will increase the number of promotions and elevate the service by the inducements offered for the advancement of the faithful and efficient.

## THE GRADE OF JUNIOR CLERK PROPOSED.

A grade of junior clerk might be provided for in the Treasury Department with a low but reasonable compensation, say \$800 per annum, to be under the Secretary of the Treasury; this branch to be the entrance grade for all persons who come into the service from the eligible lists of the Civil Service Commission. When vacancies occur in the bureaus the heads of the offices might select from the persons on the junior clerk rolls those best fitted to do the work required, in which

case the chief could see the work of the clerk before he selects him, which is not now possible. It would also prevent the putting of "square pegs in round holes," the assignment of a clerk to a distasteful line of work, and also prevent the anomaly of placing a graduate of Vassar or Harvard at counting paper or copying plain copy. Secretary could use this class to aid in emergencies in any office where work was pressing; and to this roll could be transferred the clerk who is chronically sick, leaving his position in his own office to be used for the good of the public service, not as now to be filled temporarily by a substitute with no stable tenure. A clerk when entering the junior grade would have an opportunity, perhaps, to select a duty congenial to himself, commensurate with his abilities, and beneficial to the Department. In other words, this grade could be used as a clearing house for the positions of the clerical force. It would have the additional advantage of employing at once a new appointee on a variety of work that would develop his capability, and would enable the head of the bureau to learn from practical tests the comparative fitness of candidates for specific positions. And it is believed that this system could be carried into effect with little or no increase of expenditure for the Department.

## SHALL THE TRAINED MEN HAVE THE HIGHER PLACES?

The position of the clerk in the higher grades is also worthy of attention. He has reached the position of class four, or possibly assistant chief of division, by his zeal and fidelity; but under the present order of things it is useless for him to expect or to hope for further promotion. Does not the advancement of the public service demand that this selected material shall be considered, from which to take, as the result of a competitive examination, or by other means, the best men for chiefs of division, and possibly deputies? Will not the trained men of the Department, those who have risen by reason of merit, give better satisfaction as chiefs of division than men who enter the service with no knowledge of official life or of official duties? This question will soon press hard for solution upon the Secretaries of the future.

## THE EXPERIENCE OF THE FIRST YEAR.

The efficiency rules and promotion regulations have been issued and in force one year, and have been observed by all the heads of bureaus and chiefs of divisions of the Secretary's office, with a single exception. Those not called upon to create have had an opportunity to criticise, it being much easier to criticise than to create or organize. As long as man is fallible, so long will any theory devised by man be imperfect and subject to animadversion. The old truism that "Rome was not built in a day" is applicable to any such undertaking. The man who expects to see a system spring from one mind, as Minerva did from the head of Jupiter, full-panoplied and invulnerable, expects the impossible. All healthy growth is evolutional; time and the application of a theory to practical affairs will show its defects. The unnecessary parts are lopped off, some deficiency supplied, or some radical change, perhaps, adopted. Criticisms from enemies as well as suggestions from friends should, therefore, be welcome, showing as they do the vulnerable points. The United States Civil Service Commission has been in existence for ten years, yet in nearly every year has some change been adopted, some rule modified, or its scope in some way made more comprehensive. The present system in the Treasury Department has

been in operation but a short time; but it has been much modified and improved, which modification and improvement it is to be hoped will continue from time to time as its practical workings disclose points of weakness, until it shall attain to that degree of justice and fair discrimination so ardently desired by all thinking people and by all who are truly interested in the progress of civil-service reform.

## NO DELAY IN PROMOTIONS.

The heads of bureaus and the chiefs of divisions of the Secretary's office have promptly rendered aid when the examiner has called on them for assistants in conducting the competitive examinations. For that reason results have been determined without delay, promotions have rapidly followed the vacancies, and at the present time there are no unmarked papers or uncompleted work in the office of the board of examiners.

The board of examiners is indebted to Miss Carolyn M. Comstock for the faithful and efficient manner in which she has served for nearly a year as an assistant, to Miss Clara G. Quint for valuable services for several months, and for aid during emergencies to Miss Jennie T. Rugg, Miss Ida Howgate, Miss Tillie J. Gallagher, Mr. Paul T. Bowen, Mr. C. C. Snow, Mr. E. E. Gaddis, Mr. C. E. McNabb, Mr. W. C. Eldredge, Mr. William Waring, Mr. Charles Hedges, Mr. H. A. Whallon, and Mr. Montgomery Cumming.

Respectfully, yours,

THEODORE L. DE LAND, Examiner.

The BOARD OF EXAMINERS, TREASURY DEPARTMENT.

## APPENDIX.

## EXHIBIT No. 1.

#### CIRCULAR

Relative to the President's order of December 4, 1891, directing that a plan be devised and put in operation for keeping an efficiency record of all persons in the classified service, with a view to placing promotions wholly upon the basis of merit.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., December 24, 1891.

To the heads of bureaus, chiefs of divisions of the Secretary's office, and all persons in the classified service of the Treasury Department:

The following communication from the President of the United States is published for the information of those concerned and for the guidance of the officers and employés of this Department:

## THE PRESIDENT'S ORDER.

## EXECUTIVE MANSION, Washington, December 4, 1891.

To the SECRETARY OF THE TREASURY:

SIR: In my message to the first session of the Fifty-first Congress I said:

"I have suggested to the heads of the Executive departments that they consider whether a record might not be kept in each bureau of all those elements that are covered by the terms 'faithfulness' and 'efficiency,' and a rating made showing the relative merits of the clerks of each class, this rating to be regarded as a test of merit in making promotions."

In some of the departments this suggestion has been acted upon, in part at least, and I now direct that in your Department a plan be at once devised and put in operation for keeping an efficiency record of all persons within the classified service,

with a view to placing promotions wholly upon the basis of merit.

It is intended to make provisions for carrying into effect the stipulations of the civil-service law in relation to promotions in the classified service. To that end the rule requiring compulsory (competitive) examinations has been rescinded. In my opinion, the examination for promotion of those who present themselves should be chiefly, if not wholly, upon their knowledge of the work of the bureau or department to which they belong and the record of efficiency made by them in their previous service. I think the records of efficiency, kept from day to day, should be open to the inspection of the clerks.

Very respectfully, yours,

BENJ. HARRISON.

#### THE EFFICIENCY RECORD.

A book has been prepared, which the proper officers will obtain upon requisition, in which a form is prescribed for keeping a daily journal of all those elements that are covered by the terms faithfulness and efficiency.

This efficiency record, so soon as established, will be the basis of a comparative rating of the clerks within the classified service, with a view to placing promotions

therein wholly upon the basis of merit.

The President and the Secretary are confident that such a record, fairly kept and open to the inspection of those interested, will greatly stimulate the work of this Department, and they hope that it will be accepted by all as a system that will tend to place the question of promotions upon a just foundation.

#### ELEMENTS OF EFFICIENCY.

It will be observed that the subject of efficiency has been resolved for the convenience of record into seven elements, as follows: (1) and (2) fidelity in punctuality

and attendance; (3) industry; (4) accuracy; (5) aptitude; (6) conduct, and (7) ability; and that to each element a relative weight has been assigned according to its value.

So far as possible the elements of efficiency will be rated as follows

(1) Punctuality.—Should the person arrive for duty at the time fixed by the rules and regulations of the Department a maximum credit of 100 shall be given in the proper column; but should there be a lack of punctuality there shall be deducted from the maximum credit of 100 the maximum of 1 for each five minutes or fractional part of five minutes lost

(2) Attendance.—Should the person remain upon duty during the hours fixed by the rules and regulations of the Department or the special rules of the office where employed a maximum credit of 100 shall be given in the proper column; but for an absence during the day for any cause other than that due to sickness there shall be deducted from the maximum credit of 100 the maximum of 1 for each five minutes or fractional part of five minutes lost: Provided, That persons absent on official busi-

ness shall be marked as though present.

(3) Industry.—Prompt and reasonable attention to duty during the month, from day to day, shall receive the maximum credit of 100. Failure in this respect shall cause a deduction from the maximum monthly credit of 100, in the discretion of the head of the bureau or division. A note shall be entered, under the head of general remarks, of any departure from prompt and reasonable attention to duty, specifying the date and the nature of the deviation, for which delinquency a deduction of not less than 5 shall be charged for each and every departure: *Provided*, That the persons charged with the enforcement of this rule shall be careful to discriminate between the reasonable and necessary rest from fatiguing or monotonous labor and an attempt to evade a reasonable duty or shirk a necessary work.

(4) Aptitude.—Should a person possess the quality of aptness or the faculty that renders him capable of easily receiving an explanation, and if he be ready, quick, and expert to learn, for such quickness of appreheusion or readiness in learning there shall be given at the end of the month, based upon the conditions observed from day to day, a maximum credit of 100; but should a person be deficient in the quality of aptness for the duty assigned to him there shall be taken from the maximum credit of 100 such an amount as in the judgment of the head of the bureau or division shall fairly rate him with others performing the same or similar duties: Provided, That the possession of extraordinary aptness for the duties assigned to him or an extraordinary deficiency in this quality shall be noted on the monthly record with

specific reasons why the entry is made.

(5) Accuracy.—Should the work of a person show extreme precision or exactness, a conformity to the rules or models prescribed, an absence of noticeable or serious errors, and give evidence during the month that his tendency is toward correct, precise, exact, nice, just, or careful work, and should he possess the faculty that readily detects errors, there shall be given a maximum credit of 100; but should there be a tendency to mistakes, to carelessness, to slovenly work, to the perpetration of errors. to a failure to detect errors, there shall be deducted from the maximum credit of 100 such an amount, not less than 5, as in the judgment of the head of the bureau or division shall fairly rate him when compared with others engaged upon similar work: Provided, That a record of important errors or unsatisfactory work shall be entered with the date and the nature of the work objected to; and when there have been noticeable efforts worthy of commendation the facts shall be entered under the head of general remarks.

(6) Conduct.—Personal behavior or deportment, including personal habits, shall be considered in marking under this head, and the maximum credit of 100 shall be given for good behavior and correct deportment; and for any breach of discipline, insubordination, or other misconduct a deduction shall be made in the monthly mark of not less than 10, in the discretion of the head of the bureau or division: *Provided*, That under the head of general remarks a record shall be entered which shall state specifically the nature of the charge made and the date.

(7) Ability.—Where the person is possessed of talents, mental gifts or endowments, has executive force, or the active power to perform intelligent work with rapidity and accuracy, the faculty to comprehend the abstruse questions that arise in the Department, the capacity to devise new and improved methods for transacting public business, and is in possession of resources of mind, and has strong or unusual intellectual qualifications, and by private study and superior education shows especial fitness for higher work, there shall be given the maximum credit of 100; and where there is a deficiency in the above-described qualities the rating shall be decreased in the discretion of the head of the bureau or office.

When the work in an office is of such a nature that the shades of difference between aptitude and ability are difficult to determine the same mark will be entered

opposite each.

The officers of this Department who will be called upon to administer the provisions of this circular are expected and instructed to execute them firmly, justly, impartially, and never in an offensive or oppressive manner; and great care will be exercised to reward the clerks who perform their duties with zeal and fidelity, and to exhibit by contrast and comparison the record of those persons who may endeavor to evade their duties or shirk their responsibilities. This circular shall take effect January 1, 1892.

CHARLES FOSTER, Secretary.

For the information of those charged with the keeping of the record of efficiency fictitious records are given on opposite page to exemplify the subject.

#### EXHIBIT No. 2.

## CIRCULAR

Relative to competitive examinations for promotion of persons within the classified service, and of pass examinations before appointment of chiefs of division and of special agents.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., December 24, 1891.

To the officers and employés of the Treasury Department:

Your attention is particularly called to the requirements of this circular, which are to be carefully complied with, as follows:

#### LAWS, OPINIONS, RULES, AND REGULATIONS.

Section 7 of the civil service act, approved January 16, 1883, provides, among other things, that no person shall be employed to enter, or be promoted in, either of the classes now existing, or that may be arranged thereunder pursuant to the rules, until he has passed an examination, or is shown to be specially exempted from such

examination; the Attorney-General has decided that to be eligible for appointment to any class (whether by way of promotion or otherwise) the applicant must have passed an examination for the purpose of testing his fitness for the place; General Rule III, clause 6, provides that so far as practicable and useful competitive examinations shall be established in the classified service to test fitness for promotion; Department Rule IX, clause 4, of the rules of the Civil Service Commission provides that other promotions may be made upon any test of fitness determined upon by the promoting officer; and the circular letter of the President addressed to the heads of Departments, dated December 4, 1891, directs that a plan be at once devised and put in operation for keeping an efficiency record of all persons within the classified service, with a view to placing promotions wholly upon the basis of merit; and therefore it is ordered:

#### COMPETITIVE EXAMINATIONS FOR PROMOTION.

First. On and after January 1, 1892, promotions of persons within the classified service, viz, those in classes A, B, C, D, and E, and those in classes 1, 2, 3, 4, and 5, and those in positions below the position of chief of division, shall be made from one grade to the grade next higher, and from a list of eligibles in the order of excellence as shown by a competitive examination limited to the clerks in the office or bureau where the positions to be competed for are either provided for by law or by the Department regulations: *Provided*, (1) That the competitive examinations shall be applied only where practicable and useful; (2) that the head of the bureau or office shall nominate (from those who stand highest on the general efficiency list) to the Secretary of the Treasury for designation a reasonable number of clerks to compete voluntarily for promotion under this order; (3) that the competitive examinations herein provided for shall be applied in the first instance, and in the order named, to the offices of the Sixth Auditor, the Second Auditor, the Third Auditor, and to the internal revenue, and to the other bureaus and offices of the Treasury Department so soon as in the judgment of the board of examiners it is practicable; (4) that pending the application of the principle of competitive examinations for promotion to a grade in any office, promotions therein shall be made under the rules at present in force in the Treasury Department, and (5) that the competitive examinations for promotion shall be practical in character, and shall include the subjects that shall test the general intelligence of the candidates, their technical knowledge of the duties assigned by law and Department regulations to the bureau or office in which they are engaged, and of the work performed in their offices.

The subject of general efficiency shall have a relative weight equal to one-fifth of the sum of all the relative weights in the examination: Provided, That the subject of general efficiency shall include elements as follows: (1) and (2) fidelity in punctuality and attendance; (3) industry; (4) accuracy; (5) aptitude; (6) conduct, and (7) ability: Provided, That a daily record for general efficiency shall be kept in each bureau, and, when so directed by the head of the bureau, in each division thereof, and a copy of the general average of such record shall be transmitted at the end of

each month by the heads of bureaus to the Treasury board of examiners.

The mark for general efficiency to be used by the Treasury board in determining the general average of competitors in competitive examinations for promotion shall be the average of the marks shown by the record provided for in these regulations

during the three months next preceding the competitive examination.

When practicable special optional subjects may be given to candidates who apply for them. To such subjects the relative weights may be determined by the board of

The board of examiners shall allow extra time for such subjects

The subject of longevity shall be given in each competitive examination for promotion a relative weight of, say, one-tenth of the sum of the relative weights: Provided, That candidates who have served the Treasury Department one year shall be given the mark of 76 in this subject; for two years' service, 77; for three years' service, 78; and so on, adding to the mark 75 the number which expresses their years of service; but when the candidates have served twenty five years or more they shall be given in this subject the mark 100.

The subject of war record as a compliment to the soldier shall be given in each competitive examination for promotion a relative weight, say, of one-tenth of the sum of the relative weights of the essentials. That is to say, candidates who were honorably discharged during the war of the rebellion from the military or naval

service of the United States shall be given in this subject the mark of 100.

A register of persons eligible for promotion in each bureau or office for which competitive examinations for promotion are held shall be kept by the board of exam-

The board of examiners, when notified that a vacancy exists, shall certify to the chief of the appointment division the name of the person standing highest on the list of eligibles, and that person shall be promoted forthwith,

Eligibles on the register having the same grade shall have priority in certification in the order of their standing for general efficiency in the Treasury Department.

When practicable and useful special competitive examinations may be held open to such persons in the Treasury Department as the head of the bureau may recommend and the Secretary may designate, and who have previously signified in writing to the board of examiners that they wish to compete, and who state the subjects they wish to have included in the competitive examination: *Provided*, That the register of persons who have taken the special examination shall be used by the Secretary, in his discretion, as a list from which transfers may be made.

The board of examiners for the examination of such persons shall be the same as the board provided for in section 164 (R.S.), to wit: The chief of the bureau into which such person is to be promoted, the chief clerk of the Treasury Department, and the

third person (or his alternate) appointed for that purpose.

The bureau officers and chiefs of division of this Department will furnish the examiner with such assistants as he may select to aid in the prompt execution of the terms of this circular.

#### PASS EXAMINATIONS-CHIEF OF DIVISION.

Second. Hereafter no person shall be appointed a chief of division in this Department until he shall have first saisfied a board of examiners of his fitness for that position: Provided, That the chief of the division of appointments, the chief of the division of special agents, the chief of the secret service division, and the chief of the-mail division may, in the discretion of the Secretary, be appointed, as at the present time, without examination.

The examination for this purpose will be noncompetitive and not technical, and shall be practical in its character, and so far as may be shall relate to those matters which will fairly test the capacity and fitness of the person examined to discharge

the duties of the office to which he is to be appointed.

The board of examiners for the examination of such persons shall be constituted as follows: The assistant secretary in charge of appointments, the chief of the bureau into which such person is to be appointed, or the chief clerk of the Department when the person is to be appointed a chief of division in the Secretary's office, and the Treasury examiner.

## PASS EXAMINATIONS—SPECIAL AGENTS.

Third. Hereafter no person shall be appointed a special agent of the Treasury Department until his fitness has been ascertained by suitable tests. A special agent should have good character, good habits, good health, a courteous bearing and address, and should not be incapacitated by age or other cause for active work. He should possess fair ability and intelligence, and be able to write his own reports in clear, concise, and correct language. He should have a sufficient knowledge of bookkeeping and accounts to comprehend and examine intelligently the system of accounts used in custom-houses. Those who apply for these positions will, therefore, be subjected to such an examination as may be necessary to ascertain whether they are possessed of these requisite qualifications. Appointments will be considered probationary for six months, permanency of tenure to be dependent upon the aptitude shown by the appointee for the work assigned him. The examination will be noncompetitive and not technical.

The board of examiners for the examination of special agents shall be constituted as follows: The assistant secretary in charge of customs, the chief of the division of

special agents, and the Treasury examiner.

CHARLES FOSTER, Secretary.

## THE CLASSIFICATION OF EMPLOYÉS.

The classification of September 8, 1888, is reprinted below for the information of those concerned.

Class A.—All persons receiving an annual salary of less than \$720, or a compensation at the rate of less than \$720 per annum.

Class B.—All persons receiving an annual salary of \$720 or more, or a compensa-

tion at the rate of \$720 or more, but less than \$840 per annum.

Class C.—All persons receiving an annual salary of \$840 or more, or a compensation at the rate of \$840 or more, but less than \$900 per annum.

Class D.—All persons receiving an annual salary of \$900 or more, or a compensation at the rate of \$900 or more, but less than \$1,000 per annum.

Class E.—All persons receiving an annual salary of \$1,000 or more, or a compensation at the rate of \$1,000 or more, but less than \$1,200 per annum.

Class 1.—All persons receiving an annual salary of \$1,200 or more, or a compensation at the rate of \$1,200 or more, but less than \$1,400 per annum.

Class 2.—All persons receiving an annual salary of \$1,400 or more, or a compensation at the rate of \$1,400 or more, but less than \$1,600 per annum.

Class 3.—All persons receiving an annual salary of \$1,600 or more, or a compensa-

tion at the rate of \$1,600 or more, but less than \$1,800 per annum.

Class 4.—All persons receiving an annual salary of \$1,800 or more, or a compensation at the rate of \$1,800 or more, but less than \$2,000 per annum.

Class 5.—All persons receiving an annual salary of \$2,000 or more, or a compensation at the rate of \$2,000 or more per annum.

## EXHIBIT No. 3.

## CIRCULAR

Relative to modifications in the plan prepared under the President's order of December 4. 1891, for keeping an efficiency record of all persons in the classified service, and of the rules issued to enforce the principle of competitive examinations for promotions in the Treasury Department.

> TREASURY DEPARTMENT. OFFICE OF THE SECRETARY, Washington, D. C., July 1, 1892.

To the heads of bureaus, chiefs of divisions of the Secretary's office, and all persons in the classified service of the Treasury Department:

Your attention is particularly called to the requirements of this circular, which

are to be carefully complied with, as follows:

Department Circular No. 194 (1891), dated December 24, 1891, which defines the elements of efficiency, is hereby modified as follows: The elements "aptitude," "accuracy," and "ability," are consolidated and called ability, with a relative weight of 12, in the bureaus or offices of this Department where the work is of such a nature that "accuracy" can not be estimated readily as a single factor. The relative weights in the record of efficiency in such offices are changed as follows:

Punctuality	-	 •	2
Attendance		 	3
Conduct			
Industry			
Ability			
m 1 3	the second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second secon		· ~~

The following modifications are made in Circular 194 to apply in the offices of the Bureau of Engraving and Printing, the Treasurer of the United States, the Comptroller of the Currency, the Register of the Treasury, the Internal Revenue, the division of loans and currency of the Secretary's office, and in other offices where some of the employes are engaged on work which requires manual dexterity and unusual mental activity and expertness: That portion of the effective force not employed on clerical work but engaged entirely in the count and examination of new or old notes, coins, sheets of paper, internal-revenue stamps, and in the assorting of money orders, where accuracy is a paramount consideration, shall be given (in the discretion of the head of the office) a special rating in this element; and when possible the rating for accuracy shall be based upon the record of the work of the employé as compared with others in the office engaged upon similar work. The head of the office may fix any standard, for the purposes of such comparison, as in his judgment may be equitable to all concerned. The relative weights in the record of efficiency in such offices are changed, as follows:

Punctuality	2
Attendance	
Industry	6
Accuracy	5
Conduct	
Ability	7

To secure uniformity in the marking of the element "ability" for the current quarter of the present fiscal year, and after that quarterly in advance, all persons in the classified service in each bureau or office in the Department shall be arranged into five groups, thus: (1) The superior, (2) the excellent, (3) the good, (4) the fair, and

(5) the poor.

The comparative ratings for ability when fixed by a conference of chiefs shall remain unchanged for the quarterly period, unless in the opinion of the bureau officer good and sufficient reasons exist for a change in the rating of this element for any or

all of the clerks.

When arranged as described above each person so classified shall be given a mark for ability under the following schedule according to his or her estimated worth: 95, but no higher, to represent the highest order of excellence, or the superior; 90 or higher, but less than 95, to represent the excellent; 85 or higher, but less than 90, to represent the good; 80 or higher, but less than 85, to represent the fair; and 75 or higher or lower, but less than 80, to represent the poor. All persons in the classified service shall be marked in "ability" by the above standard, but a clerk in a lower grade shall not be compared with a clerk in a higher grade.

The heads of bureaus shall convene at once the chiefs of divisions of their respective offices in a conference for the purpose of grading the persons in the classified service of their offices in accordance with the plan outlined above.

The chief clerk of the Department shall convene at once the chiefs of divisions of the Secretary's office in a conference for the purpose of grading the persons in the classified service of the Secretary's office in accordance with the plan outlined above.

A report of the bureau officer, in which is given the comparative ratings of all the clerks in his office, shall be made to the board of examiners promptly at the close of

each month on a form to be furnished by the examiner.

The books now in use can be adapted readily to the plan proposed.

When desired by the clerks in any bureau or in the Secretary's office, a committee of clerks will be appointed by the Secretary of the Treasury to confer with the board of examiners and the examiner, who will consider such complaints as to inequalities in the ratings as may be submitted.

The board of examiners and the examiner are hereby constituted a committee to secure uniformity in the execution of the terms of this circular throughout the De-

partment.

Circular No. 195 (1891), dated December 24, 1891, is hereby modified as follows:

Any person in the classified service of any bureau in this Department or in any division of the Secretary's office may compete for promotion in any examination in the office where employed for positions in the grade next above the one held by him or her at the time of the examination, subject, however, to the following provisions of Circular No. 50, 1892:

"Seventh. Clerks detailed to work in an office where provision is made by law for a clerical force shall have the right to compete for promotion in the office to which they may be detailed, provided that they shall have served in said office for a period of three full calendar months. But should their service be for a period of time less than three full calendar months, their right to compete for promotion in the office from which detailed shall not be forfeited.

"Eighth. The clerks who are transferred from another bureau or another Depart-

ment to an office or bureau in this Department shall have the same rights as the clerks have in the office or bureau to which they have been transferred who are not upon an eligible list of that office; that is, they may compete at the next competitive examination in that office should their general efficiency justify their designation.

"Ninth. The clerks in this Department who are detailed or assigned to duty with

an officer who has no appropriation for clerical force shall have the right to compete

for promotion in the office from which they are detailed.'

When competitive examinations are held for eligible lists in the Secretary's office all the clerks in the next grade below in the Secretary's office may compete: Provided, That the Secretary reserves the right to restrict the competition to one or more divisions, or to a lesser number of clerks, when, in his opinion, the public service will be benefited thereby.

The rule relative to special optional subjects is modified to read as follows: When practicable, special optional subjects may be given to candidates who apply for them. To such subjects no relative weights shall be given by the board of exam-

Extra time shall be allowed for such subjects.

The efficiency records of each office shall be open to the inspection of any person in the classified service to inspect his or her own record, but it shall not be open for him or her to inspect the record of any other person: Provided, That any person in the classified service shall be permitted at any time to inspect his or her record of general efficiency, as compared with others in his or her grade and office, when said record is on file with the examiner.

The heads of bureaus and chiefs of the divisions of the Secretary's office are hereby instructed to submit at an early date their monthly reports for June on the old form. CHARLES FOSTER,

Secretary.

## EXHIBIT No. 4.

## CIRCULAR. :

Rules governing absence chargeable on "Time report" and "General efficiency" and competitive examinations.

> TREASURY DEPARTMENT, OFFICE OF THE SECRETARY Washington, D. C., April 9, 1892.

The following rules will hereafter be observed relative to "Time reports" and "General-efficiency" marks of employés of this Department and competitive exam-

inations in the Department:

First. When an officer, clerk, or employe is granted permission by the head of his office to be absent for one-half of a day, such absence may be reported and charged to annual leave, and not to "Attendance" on the "Efficiency record;" but any absence taken in excess of the half day granted shall be charged to "Attendance" in the "Efficiency record" of such officer, clerk, or employe.

Second. An absence for a portion of a day less than half of a day may be reported and charged to "Attendance" on the "Efficiency record," or may be considered as half of a day and reported and charged to annual leave, as the officer, clerk, or employé may elect.

Third. Should no leave be due, all absence, except absence on account of sickness, shall be reported and charged against "Attendance" on the "Efficiency record," and shall be without pay.

Fourth. All absence without leave or permission, except absence on account of sickness (unless the absence is satisfactorily explained and is charged to annual leave), shall be reported and charged against "Attendance" on the "Efficiency record."

Fifth. In an absence for any cause which is continuous and which exceeds three days, the Sundays, if any, intervening shall be counted and charged on the "Time

report" and charged to annual leave, or sickness, as the case may be.

Sixth. A half day, under these rules, shall be considered as from 9 a.m. to 12 m., or from 12:30 p. m. to 4 p. m.

Seventh. Clerks detailed to work in an office where provision is made by law for a clerical force shall have the right to compete for promotion in the office to which they may be detailed; provided, that they shall have served in said office for a period of three full calendar months; but, should their service be for a period of time less than three full calendar months, their right to compete for promotion in the office from which detailed shall not be forfeited.

Eighth. The clerks who are transferred from another bureau or another Department to an office or bureau in this Department shall have the same rights as the clerks have in the office or bureau to which they have been transferred, who are not upon an eligible list of that office; that is, they may compete at the next competitive examination in that office should their general efficiency justify their designa-

Ninth. The clerks in this Department who are detailed or assigned to duty with an officer who has no appropriation for clerical force shall have the right to compete for promotion in the office from which they are detailed.

O. L. SPAULDING, Acting Secretary.

## EXHIBIT No. 5.

## CIRCULAR.

Relative to the inspection of the efficiency records by the clerks in the classified service of this Department; to the correction of errors in the same before the clerks enter a competitive examination, and to the prompt report by heads of bureaus by the 10th of each month.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., December 5, 1892.

To the heads of bureaus, chiefs of divisions of the Secretary's office, and all persons in the classified service of the Treasury Department:

Your attention is called particularly to the following extract from Department Circular No. 110, dated July 1, 1892:

"The efficiency records of each office shall be open to the inspection of any person in the classified service to inspect his or her own record, but it shall not be open for him or her to inspect the record of any other person: Provided, That any person in the classified service shall be permitted at any time to inspect his or her record of general efficiency, as compared with others in his or her grade and office, when said record is on file with the examiner."

Hereafter every person in the classified service of this Department whom the head of a bureau or office gives a record of general efficiency must inspect his or her record and verify the same at the close of each month, in order that correct reports may be filed with the board of examiners. Classified persons who neglect to inspect or to verify their efficiency records as made in their respective offices shall not have them corrected after a verdict has been rendered by the board of examiners as the result of a competitive examination.

The heads of bureaus and chiefs of the divisions of the Secretary's office are hereby instructed to submit to the board of examiners by the tenth day of each month their

monthly efficiency reports for the prior month.

CHARLES FOSTER. Secretary.

## EXHIBIT No. 6.

# REQUISITION FOR THE NAME OF AN ÉLIGIBLE.

TREASURY DEPARTMENT, Office of the Secretary, Washington, D. C., November 12, 1892.

The Board of Examiners, Treasury Department:

GENTLEMEN: A vacancy in clerkships of class two exists in the office of the First Auditor.

You will please furnish this office with the name of the person in the next grade below standing highest on the eligible list for promotion. By direction of the Secretary.

Respectfully, yours,

DANIEL MACAULEY, Chief of Division of Appointments.

### EXHIBIT No. 7.

## NOTICE OF AN EXAMINATION.

## COMPETITIVE EXAMINATIONS.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., November 12, 1892.

All persons in the classified service in the office of the First Auditor are invited to compete for positions on the eligible lists, from which, in the future, promotions will be made to clerkships of classes 2, 1, and E, in that office.

The competitive examination will take place at the room of the board of examination.

ers, No. 74, third floor, Treasury building, and will begin at 9 a. m. November 16, 1892.

The competition will be subject to the provisions of circulars Nos. 194 and 195 (1891) and Nos. 50 and 110 (1892).

CHARLES FOSTER. Secretary.

## EXHIBIT No. 8.

## CANDIDATE'S ACCEPTANCE OF INVITATION TO COMPETE.

TREASURY DEPARTMENT, OFFICE OF THE FIRST AUDITOR,
Washington, D. C., November 14, 1892.

Sir: I have the honor to accept herewith your invitation, bearing date November 14, 1892; to compete for a position on the eligible list for promotion to a clerkship of Class 2 in this office, as provided in the rules issued by you, dated July 1, 1892.

I am now employed in this office as a part of the regular force; or I have been here as a detailed clerk for at least three full calendar months prior to the date fixed for this examination.

Respectfully, yours,

W. C. PENNYWITT. Clerk of Class One.

The SECRETARY OF THE TREASURY.

### EXHIBIT No. 9.

# REQUISITION FOR OFFICIAL QUESTIONS.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY. BOARD OF EXAMINERS. Washington, D. C., November 14, 1892.

To the First Auditor of the Treasury:

SIR: There will be a competitive examination at an early date, in which the following-named clerks in your bureau will contest for promotion to clerkship of classes 2, 1, and E:

 Name.	For class.	Name.	For class.
	,		
 · · · · · · · · · · · · · · · · · · ·			

I have to request that at your early convenience you cause to be prepared at least ten questions relative to the general duties assigned by law and Department regula-

ten questions relative to the general duties assigned by law and Department regula-tions to the bureau or office under your charge and relative to the work upon which the candidates have been engaged during the last year.

I would especially suggest that the questions be of such a nature as will best test the candidates' general and technical knowledge of the official business of the bureau and division to which the candidates belong; that all ambiguous questions, and those that can be answered by "yes" or "no" be excluded; that they be written or imprinted upon the standard letter paper of the Department; that they be written or imprinted upon the standard letter paper of the Department; that the questions and official answers (the answer to follow the question to which it pertains) to the same be prepared in like manner for the use of the examiner, and that the lists be signed by you (one list, without the answer, for the use of each candidate). The candidate's name should be written on his list.

The questions should be marked "Confidential," and should be forwarded to the board of examiners.

The examination is fixed for November 16, 1892, at 9:30 a. m., at the office of the board of examiners, Room No. 74, third floor, Treasury building.

Respectfully, yours,

THEODORE L. DE LAND, Examiner.

Note.—The bureau and division questions will have a relative weight of 10 in the examination-marked on the scale of 100.

## EXHIBIT No. 10.

## COMPETITIVE EXAMINATION FOR PROMOTION.

[Serial No. 25.]

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, BOARD OF EXAMINERS, Washington, D. C., November 21, 1892.

SIR: The undersigned, constituting a board of examiners under the provisions of the laws of the United States, the rules and regulations of the Civil Service Commission, and Department circulars Nos. 194 (1891) and 195 (1891), dated December 24, 1891, have the honor to report that a competitive examination has been conducted to obtain a list of eligibles for promotion to clerkships in the classified service in the office of the First Auditor, Mr. W. C. Pennywitt, a clerk of Class 1 in the office referred to, with a general efficiency average of 97.12, was invited by the Secretary of the Treasury to voluntarily compete for promotion to a clerkship of Class 2, and attained in that examination a general average of 94.16, which secured standing No. 1 on the eligible list.
Should vacancies occur in the next grade above this clerk's name will be certified

for promotion when reached in order, as provided for in the regulations.

Accompanying will be found the papers pertaining to this candidate's examination.

Respectfully, yours,

GEO. P. FISHER, FRED. A. STOCKS, A. L. STURTEVANT, Board of Examiners.

Hon. CHARLES FOSTER Secretary of the Treasury.

# SPECIMEN OF THE COMPETITIVE EXAMINATIONS UNDER SECRETARY FOSTER'S RULES AND REGULATIONS.

### EXHIBIT No. 11.

### COMPETITIVE EXAMINATION CLASS TWO.

Treasury Department.—Competitive examination for promotion to second class (\$1,400) under the President's order of December 4, 1891, and Rules of the Treasury Department.

### [Sheet No. 1—Letter and brief.]

INSTRUCTION.—Write a letter of not more than a page in length; address it to the Secretary of the Treasury; sign it with your full name; fold it and indorse upon its proper fold a brief or summary of its contents.

The official forms prescribed by the Secretary of the Treasury should be used for the address, the fold, and the brief.

You may take the following topic for the subject of your letter:

Permanency of tenure in the consular service.

NOTE.—This part of the examination is designed to show your aptitude for composition and correspondence; your power to state clearly and grammatically your views; your knowledge of the forms of address; your neatness; your faculty of adhering to the subject matter throughout your letter; and it will also determine your averages in pénmanship and punctuation.

Please to read the directions at the head of each sheet and carefully comply with

Upon completing each paper the candidate should sign it and place it upon the examiner's desk.

N. B. —No extra copies of the sheets will be furnished. Continuation sheets furnished by the examiner. The time occupied in the examination is limited to two days.

## [Sheet No. 2.—Miscellaneous arithmetical questions—addition and subtraction.]

# [Sheet No. 3.-Miscellaneous arithmetical questions-notation and numeration.]

CAUTION.—Write the answers directly under the questions to which they pertain, and be careful to insert the proper points.

Q. II. Express in words the amount: \$2,000,009,909,874.

Q. III. Express in words the number: .010101.

Q. IV. Express in figures the date: MDCCLXXVII; express in the Roman notation the date: 1892.

Q. V. From ten thousand, and ten ten-millionths, subtract ten thousand ten ten-millionths. (Show-operation and solution of No. V).

## [Sheet No. 4.—Miscellaneous arithmetical questions—solution of problems.]

Q. VI. A man owing \$575.40 paid 40 per cent of the debt; afterwards he paid 25 per cent of the remainder; at another time 12½ per cent of what he owed after the second payment; how much remained due?

Q. VII. Reduce \(\frac{1}{26}\) of a day to hours, minutes, and seconds.

Q. VIII. A Treasury clerk who was promoted recently, after a competitive examination to a clerkship of class 3, obtained averages (on the scale of 100) in the different subjects as follows (the relative weight of each subject is given in the parentheses): Letter and brief (6), 96; penmanship (8), 85; punctuation (2), 85; addition (4), 100; miscellaneous arithmetical questions (12), 97; accounts (3), 90; grammar (7), 86; rough draft (8), 100; orthography (7), 95; general information (3), 97; bureau and division questions (10), 100; general efficiency (20), 99.99; and longevity (10), 83.15. What was his general average? (Give operation in full in all cases).

[Sheet No. 5.-Miscellaneous arithmetical questions and solution of problems.]

Q. IX. A drover paid \$4,000 for a horse, some sheep, and some hogs. The sheep at \$2\frac{3}{2}\$ each cost \$650. There were 2\frac{3}{2}\$ times as many hogs as sheep, bought at \$4\frac{3}{2}\$ per head. How much did he pay for the horse?

head. How much did he pay for the horse?

Q. X. An importer declares the value of his goods to be \$1,470, but the appraiser finds the correct value is \$1,764. What amount of penal duty accrues to the United States at the legal rate of 2 per cent of the total appraised value for each 1 per cent that such appraised value exceeds the value declared in the entry?

(Give operation in full in all cases.)

## [Sheet No. 6.—Statement of account.]

James Gardner, engineer and disbursing officer, has charge of the improvements of the harbor at Charleston, S. C. On September 1, 1891, the sum of \$74,000 was to his credit with the assistant treasurer at New York. On September 4 he paid Timothy Hutchins \$9,000 for building three coffer dams. On September 16 he paid John Harris \$16,800 for blasting and dredging, which sum included 5 per cent additional on the contract for prompt work. Defective work was discovered on one of the cofferdams, on account of which Timothy Hutchins paid back to him \$1,200, which was deposited to the credit of the Treasurer of the United States on October 3, 1891. On October 4 he paid the salaries of four \$1,200 clerks for the month of September, at the Government rate, or \$97.80 each; an expense account of \$4,500, and office rent \$150. On October 4 he was directed to deposit the unexpended balance on hand to the credit of the Treasurer of the United States. State his account with the United States in the accmpanying frame or form.

[Sheet No. 7.—Questions in grammar—false syntax and improprieties.]

Correct the following sentences; but do not change the sentences or the order of the words except where necessary to remove improprieties, ambiguities, or false syntax:

I. The problem was solved bi she and i.

II. General efficiency and not political sycophents win the promotion; but before the reform that was seldom or ever the case.

III. That clerk could neither add or subtract correct; but here is one which possesseth fine talents.

1V. The brave Indian was heard say, that he would dare any one mount the wild pony who he had captured.

V. Almost the whole inhabitants of the city was present to hear the discussing among the two candidates, which were to speak on "civil-service reform."

## [Sheet No. 8\frac{1}{2}.—Criticism of a letter—writing from rough draft.]

DIRECTIONS TO CANDIDATE.—Make on this sheet, ready for an official signature, clean copy of the letter, a photolithographic specimen of a rough draft of which will be found herewith on Sheet 8. Punctuate, formulate, and capitalize as in copy, but write in full all abbreviated words, except D. C.

(Raduced from 8 1/4")

## [Sheet No. 9—Orthography.]

The words in the following list were selected at random from the finance report, and are submitted to you to test your capacity for detecting atsight errors in orthography and your ability to correct the errors you find. Copy, correctly spelling, the entire list:

1. Opperations. 2. Fyskle.

5. Asetts. 6. Balance.

9. Ackountibal. 10. Skedule.

3. Unaveilabal. 4. Fasiletated.

7. Agergating. 8. Rekuring.

[Sheet No. 10. - General information and departmental questions-history, geography, and government.]

This exercise is designed to show, in a limited degree, the candidate's aptitude for the observing of matters and aquiring information about the Executive Departments in general, and to show his general information and knowledge, acquired in and out of school

B. I. Name the largest city situated on each of the following rivers: (a) Penobscot, (b) Connecticut, (c) Hudson, (d) Delaware, (e) Potomac, (f) Mississippi, (g)

Missouri, (h) Arkansas, (i) Ohio.
Q. II. In what war did Washington acquire the military experience that made him the leading general of the Revolution

Q. III. Mention four European countries from which immigrants come to the

United States in large numbers.
Q. IV. What proposed legislation is frequently called a "force bill," and what is

its ostensible purpose?

Q. V. To what Department is each of the following bureaus and offices subordinate: (a) Coast Survey, (b) Geological Survey, (c) Life-Saving Service, (d) Hydrographic Office, (e) Surgeon-General's Office, (f) Weather Bureau, (g) Bureau of American Republics, (h) Dead-Letter Office, (i) Office of the Solicitor of the Treas ury ?

## [Sheet No. 11.—Bureau and division questions.]

The ten questions handed to you herewith have been prepared by the head of the bureau or chief of division in which you are employed, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to show your general knowledge of the official business of the bureau or office in which you are employed, and the work upon which you and your fellow clerks have been engaged. These questions will have a relative weight of 10, on the scale of 100.

Copy the questions and give your answers on this and the accompanying sheets. Each answer is to immediately follow the question to which it pertains.

Q. I. What are the duties of the First Auditor? Q. II. When accounts passed by the First Auditor are finally adjusted what officer of the Department is charged with their custody and preservation?

Q. III. How do disbursing agents obtain advances of money? Q. IV. In what way is the auditor notified of moneys advanced to disbursing agents?

Q. V. How are supplies for the Department to be obtained?

Q. VI. What authority is necessary before advertisements, notices, or proposals for supplies for the Executive departments of the Government may be published in the newspapers? Q. VII. For how long are balances of annual appropriations available for payment

of expenses incurred within any fiscal year?

Q. VIII. When balances still remain and are no longer available what becomes of them?

Q. IX. In what way only is the receipt of money into the Treasury acknowledged? Q. X. What steps are necessary to make valid a transfer or assignment of a claim upon the United States or a power of attorney to receive payment of such claim?

## Ехнівіт №. 13.

## REQUISITION FOR THE NAME OF AN ELIGIBLE.

[Back of requisition of November 12, 1892.]

TREASURY DEPARTMENT, November 12, 1892.

Chief of division of appointments requests name of the person standing highest on the list of eligibles for promotion in the office of the First Auditor to Class 2.

> TREASURY DEPARTMENT, BOARD OF EXAMINERS, November 21, 1892.

Respectfully returned to the chief of the division of appointments with the information that the name of Mr. W. C. Pennywitt stands highest on the eligible list of those persons who were found qualified, after a competitive examination, for promotion to clerkships of Class 2, in the office of the First Auditor.

Department Circular No. 195 (1891), dated December 24, 1891, which provides

rules and regulations relative to competitive examinations for the promotion of per-

sons within the classified service contains the following paragraph: The board of examiners when notified that a vacancy exists shall certify to the chief of the division of appointments the name of the person standing highest on the list of eligibles, and that person shall be promoted forthwith.

The following averages have been obtained by this eligible: General efficiency, 97.12.

General average in examination, 91.16.

THEODORE L. DE LAND, Examiner.

TREASURY DEPARTMENT. DIVISION OF APPOINTMENTS, November 21, 1892.

Promoted this date to Class 2.

## Ехнівіт №. 14.

Specimen miscellaneous arithmetical problems from sheet No. 4, from which three problems were chosen for use in making tests in the competitive examinations during the year.

XL. A quartermaster in the United States Army shipped 150 cattle, which averaged 900 pounds each, 100 miles, for which he paid in freight \$250. One-half of the cattle were killed for the subsistence of the soldiers, when 125 more were purchased, which made all the cattle in the stock average 1,200 pounds each. The Army then The Army then moved to a point 150 miles farther on. If the cost for freight be increased 20 per cent, what would the quartermaster pay for the latter shipment?

XLI. How many yards of carpet border would be required for a room 21 feet by

161 feet? At 75 cents a yard, how much would it cost?

XLII. How many yards of paper border, 5 strips in a piece, would be required for a room 16 feet 3 inches long and 12 feet 6 inches wide, adding 2 feet 6 inches for chimney, jambs, etc.? At 13 cents a yard, what would it cost?

XLIII. A mechanic employed on the new Library building works 10 hours a day, 6 days in the week; at the end of 4 weeks he receives \$36.40. He is paid at the rate

of \$1.75 a day. How much time had he lost?

XLIV. A dealer bought 728 pounds of coffee at 16\(\frac{2}{3}\) cents a pound; had he purchased for 3\(\frac{7}{3}\) cents less a pound, how many pounds could he have bought for the

XLV. If a 5-cent loaf of bread weighs 15 ozs. when wheat is \$1.26 per bushel, what must be the weight of a loaf that costs one cent more per loaf when wheat has fallen seven cents per bushel?

XLVI. Seven children had left to them \$7,186 a piece; one died and his share was divided among the surviving six. How much had each one?

XLVII. Subtract 23 lbs. 8 oz. 19 dwt. 10 grs. from 58 lbs. 6 oz. 17 dwt. 21 grs. XLVIII. The Commissioner of Internal Revenue shipped from the stamp division to a collector of internal revenue a book which contained 100 sheets of 60-gallon taxpaid stamps. 'To each stamp there were attached 9 coupons for 1 gallon each, and the tax was 90 cents per gallon. The collector sold the stamps as follows: 60 sheets with the decrease of the stamps as follows: 60 sheets with the stamps as follows: 60 sheets with the stamps as follows: 60 sheets with the last 6 stamps as follows: 60 sheets with all the coupons attached, 30 sheets with the last 6 coupons cut from each stamp, and 10 sheets with all the coupons cut from each stamp. What was the collector's debit, and what were his cash receipts?

XLIX. A farmer in Maryland sowed 5 bu. 1 pk. 1 qt. of seed, and harvested from it 103 bu. 3 pks. 5 qts. How much did he raise from one bushel of seed?

L. The fountain between the Treasury and the White House yields 1172 gallons in of an hour. What rate per hour does it flow?

LI. If 54 counters can count a lot of paper in 14 days, working 5 hours a day, how many hours a day must 12 counters work to count a like amount in 45 days?

LII. The appropriation of Congress for work in a certain office was to be "covered in" in 24 days. What must the rate of wages per day be reduced that 9 men What must the rate of wages per day be reduced that 9 men may earn in 14 days the same amount that 12 men may earn in 10 days if each of the

12 men could earn \$15.75 in 10 days?

LIII. At the census of 1880 the population of a city was 26,275; its population at the census of 1890 was 31,530. What was the per cent of increase and the percentage

of increase?

LIV. The population of a certain city by the census of 1880 was 12,275, and it had increased 8 per cent at the census of 1890. What was its population in 1890? LV. The Light-House Board, to determine the relative efficiency of two systems

of electric lights for channel buoys, placed the first system in Gedney's Channel on the night of July 1, 1890, and kept 6 lights in position to the end of the first quarter of the fiscal year, when they added two lights per night for the second quarter; but during the two quarters the number which went out in the service estimated by night was 63. The second system was placed in position on the night of January 1, 1891, with 7 lights on the line to the end of the fiscal year; but during the two quarters the number which went out in the service estimated by night was 47. Re-

quired—the percentage of efficiency of each system, on the scale of 100.

LVI. The Treasury Department made a requisition on the Public Printer for the reprint of a report which consisted of 810 pages, with 40 lines to a page, and 60 letters in a line; but to reduce the presswork it was determined to have 50 lines to a page and 72 letters in a line. How many pages would there be in the reprint?

LVII. A farmer in Massachusetts bought 1,240 pounds of wheat at the rate of 90 cents and 60 pounds to the bushel; he drove into Connecticut with it at an expense

of \$5, and then sold the wheat at the rate of \$1.10 and 56 pounds to the bushel.

How much did he make?

LVIII. A man has two boarders, each of whom pays him \$5\frac{a}{2} per week, a third who pays \$61, and a fourth who pays \$71. How much will he receive from them all in 14 weeks and 2 days?

LIX. A man owes his grocer \$15.89\frac{1}{2}. He pays him at one time \$10, and buys from him goods amounting to \$7.471, and then gives him to pay the entire bill 2 ten-dollar

tes. How much change must the grocer return to him? LX. A drover has 875 sheep. He can sell them all to one man at \$4.68 a head; of he can sell them in two lots, one lot of 495 at \$4.79 each, and the remainder at \$4.56. Which is the better way and what is the difference?

LXI. Upon a military and Coast Survey map the distance from Laredo, Texas, to Monterey, Mexico, is given at 2,850 mm. What is the distance in kilometers from Laredo to Monterey?

[The map is made on the scale of 1 to 80,000; that is, 1 m. on the map represents 80,000 m. of actual measurement upon the ground. One kilometer is equal to one

million millimeters.]

LXII. The Department purchased 100,000 ounces of silver bullion, English standard (.925 fine), and 100,000 ounces of low bullion (.7877 fine). The two lots were mixed and metal added to reduce the compound to the American standard (.900 fine). The alloy in each case was copper. Which of the two metals, silver or copper, must

be added, and in what amount?

LXIII. The duty on cotton yarn valued under 80 cents per pound is 38 cents per pound; if valued over 80 cents per pound, the rate is 48 cents per pound. What

would be duty on 101.75 kilos costing 7½ marks per kilo?

Note.—The kilo equals 2.2046 pounds, and the mark equals 234 cents.

## EXHIBIT No. 15.

Specimen miscellaneous arithmetical problems from sheet No. 5, from which two tests were taken in the competitive examinations during the year.

XLVI. The Secretary of the Treasury bought under contract an equal number of pounds of distinctive paper for United States notes at 12 lbs. per M sheets, price forty-three and one-half cents per pound, and for pension checks at 26 lbs. per M sheets, price \$0.385 per pound. The appropriation available for distinctive paper was \$55,000, of which sum \$3,832 was expended in express transportation and other necessary expenses at the Government mill, and the remainder was used in the purchase of the above paper. Required—(1) the number of pounds of paper purchased of each kind; (2) the number of sheets of paper purchased of each kind; and (3) the amount paid for each kind of paper.

XLVII. A man going a journey of 663 miles travels the first day 12 hours at 23 miles per hour, and finishes the journey the second day at the rate of 4 miles per

hour; how many hours and minutes in all does he travel?

XLVIII. The freight charge from Washington to San Francisco is divided between the railroad companies as follows: Twenty-five per cent, Washington to Chicago, and deduct 5 cents per hundred lbs. from the remainder and give 15 per cent of the balance for Chicago to Council Bluffs. From the then remainder deduct 10 cents per hundred lbs., and of the balance give 54 per cent, and 5 cents per hundred lbs. for Council Bluffs to Ogden, and 46 per cent and 5 cents per hundred lbs. for Ogden to San Francisco.

If the War Department shipped 20,000 lbs. of clothing from Washington to San Francisco, at \$4.20 per hundred pounds, what would be the share of the Pennsylvania Railroad Company, Washington to Chicago; Chicago, Rock Island and Pacific Railway Company, Chicago to Council Bluffs; Union Pacific Railway Company, Council Bluffs; Union Pacific Railway Company, Council Bluffs to Ogden, and Central Pacific Railroad Company, Ogden, to San Francisco?

XLIX. Two new vaults were finished recently in the mint at San Francisco; one is 29 feet 4 inches long, 17 feet 9 inches wide, and 11 feet 10\frac{7}{2} inches high, and the other is 20 feet 3\frac{7}{2} inches long, 17 feet 9 inches wide, and 11 feet, 10\frac{7}{2} inches high.

Required—(1) the larger one and (2) their combined canceity in cubic feet.

Required—(1) the larger one, and (2) their combined capacity in cubic feet.

L. A merchant has 33,10 yards of cloth, from which he wishes to cut an equal number of coats, pants, and vests. What number of each can he cut if they contain 3\frac{3}{4}, 2\frac{7}{4}, and 1\frac{4}{5} yards, respectively?

LI. Two men engage in business, each man having \$1,600; they continue in business.

ness 15 months, one man making \$80 per month and the other losing \$20 per month. How much more has the first than the second at the end of the time?

LII. If a lady can copy 5 pages an hour, in how many hours could she earn \$6.40 if

she receive 8 cents a page?

LIII. If the public debt of the United States amounted to \$2,588,452,213.94 July 1,

1869, and \$2,480,672,427.81 July 1, 1870, what was the per cent of decrease for one

LIV. What will be the cost of papering the walls of a room 45 feet long, 30 feet wide, and 9 feet high, at 30 cents a roll, each roll being 9 yards long and 18 inches wide?

LV. Three men hired a pasture for \$42. The first put in 3 horses, the second 7

horses, and the third 11 horses. How much should each pay?

LVI. The junior member of a clock company received during the year \$2,400, or 8 per cent of the profits, and the profits were 25 per cent of the cost. What was the cost?

LVII. A commission merchant sold 220 barrels of potatoes at \$2.75 per barrel at 2\frac{1}{2}

What was his commission?

(d) \$547.60, from February 20 to December 5, at 6\frac{1}{2} per cent.

LIX. Find the interest on (a), (b), (c), or (d): (a) \$875, from May 5, 1880, to June 21, 1881, at  $5\frac{1}{2}$  per cent.

(a) \$518,50, from January 5 to July 1, at 4½ per cent.
(b) \$758.50, from January 5 to July 1, at 4½ per cent.
(c) \$342.42, from February 5, 1879, to March 15, 1881, at 7 per cent.
(d) \$540, from March 5 to September 21, at 3½ per cent.
LX. The dimensions of an ordinary brick are 8 in. by 4 in. by 2 in. On the grounds of the new Library Building there is a pile of such bricks 8 feet 6 inches high, 14 feet long, and 15 feet wide. Required—(1) the number of brick in the pile, and (2) their cost at the rate of \$12.50 per M.

LXI. A counter in the Bureau of Engraving and Printing is paid \$1.25 per working day. How much can she earning during the month of July if the first day of the

month is Friday, and she rests Sundays and holidays?

LXII. A speculator sells two farms for \$9,000 each. How much does he gain or lose if he sells one for 50 per cent more than it cost, and the other for 1 less than it

LXIII. A man died leaving of his estate to his wife, to his son, to his daughter,

and the remaining \$39,000 to charity. What was the value of his estate? LXIV. What is my annual rate of profit on a ten-acre wood lot which cost \$100, the yearly growth of wood averaging I cord to the acre, and the market price \$4.25 a cord, the cutting and handling costing 75 cents a cord? LXV. Find the amount of duty due the United States on the following entry of

merchandise: 1 case cotton hosiery,  $4\frac{1}{2}$  doz. pairs, value £7 16s. 9d., at the rate of 50 cents a dozen pairs and 30 per cent ad valorem; wool wearing apparel weighing 51 lbs., value £32 9s. 6d., at the rate of  $49\frac{1}{2}$  cents per lb. and 60 per cent ad valorem; and 71 yds. printed cotton, value £1 11s., at  $5\frac{1}{2}$  cents a yard.

NOTE.—£1=\$4.8665.

Note.—£1=\$4.8665. LXVI. What amount of drawback is payable to an exporter on 8 T. 11 cwt. 1 qr.

jute bagging at \$5 per ton after deducting the legal retention of 10 per cent?

LXVII. A colonel in the U. S. Army is entitled, during the winter season, to draw from the Quartermaster's Department 3½ cords of hard wood per month. One cord of hard wood is equivalent to  $1\frac{1}{4}$  cords of soft wood, or 1,573 pounds of Pennsylvania anthracite coal. The officer may, at his option, draw either of these in whole or in part. In the first quarter, 1889, a colonel drew  $3\frac{3}{4}$  cords of hard wood,  $\frac{7}{8}$  cord soft wood, and 6,480 pounds of coal. How much coal (expressed in long tons and pounds) was he entitled to draw to close his account?

## EXHIBIT No. 16.

Specimen accounts used on sheet No. 6 in competitive examinations from which tests were taken from time to time during the year.

VIII. The collector at Corpus Christi, Tex., on January 1, 1881, was indebted to the United States to the amount of \$1,228.50. An advance of \$500 was made to him February 16, 1881. He paid out on account of salaries of employés, March 27, \$528.50; contingent expenses, April 8, \$48.32; on account of his own salary, April 12, \$82.50; and May 6, for commissions, 11 per cent on \$2,400. State the collector's account with the United States in the accompanying frame.

IX. John Jones, collector of customs at El Paso, Tex., was indebted to the United States, March 31, 1890, to the amount of \$427.92. He collected, in April, duties, \$497.42; tonnage, \$36.90. In May, duties, \$1,471.60; tonnage, \$74.63. In June, duties, \$2,119.71; tonnage, \$18.21. He deposited to the credit of the United States, April 17, \$500; May 12, \$1,000; May 31, \$425; June 18, \$1,000; June 30, \$1,175, and July 7, \$1,500. State his account for the period ending June 30, under official bond dated January 2, 1889, as he should render it to the United States.

X. Three teachers—William Brown, John Brady, and Miss Mary Smith—establish X. Three teachers—William Brown, John Brady, and Miss Mary Smith—establish a private school, and agree to share the labor, expenses, and profits equally, and each contributes at the beginning of the year \$500. During the year Brown receives for tuition, cash, \$2,200; pays rent, \$224, and contingent expenses, \$360. Brady receives for tuition, \$3,600; pays for rent, \$448, and pays contingent expenses, \$240, Miss Smith receives for tuition, \$4,800; pays rent, \$672, and pays in contingent expenses, \$120. The firm pays for supplies, cash, \$600, and sells for cash to the pupils during the year all the supplies for \$1,000. Required—a statement of the accounts, in the accompanying frame, to adjust the affairs of the partners at the end of the year.

XI. S. W. Hance, a physician, and A. C. Little, a lawyer, opened new accounts, each with the other, on January 1, 1891, with a balance due Little of \$175. On February 7, Hance charged Little \$40 for medical services; on March 6, Little drew legal documents for Hance, and charged \$25; on April 10, Hance borrowed of Little \$500 for six months at 6 per cent per annum; on May 11, Little took a horse of Hance worth \$250; on June 12, Hance sold Little a carriage for \$120 and a harness worth \$45; on July 13, Little and Hance ten hundred dellarshapes of stock worth 933; on April 25. on July 13, Little sold Hance ten hundred dollarshares of stock worth 93‡; on August 14, some real estate, which they jointly and equally owned, worth \$1,500, was transferred to Little, on which he paid to Hance at that time, cash, on account, \$1,000; on September 15, Little drew a will for Hance, and charged him \$25; on October 10, Hance paid the interest due on the note of April 10, in cash, \$15, and later in the day paid the note itself; and on December 31, Little tried a lawsuit for Hance, and charged him \$42.50, and Hance, on that date, transferred to Little one \$1,000 bond at par. State the account from Little's book in the accompanying frame.

XII. William B. Allen, a collector of customs, on January 1, 1891, was indebted to the United States in the sum of \$1,000. An advance of \$350 was made to him on February 23, and he paid on account of salaries to employes, \$572.25, March 23; contingent expenses, \$74.32, April 14; for his own salary, \$37.50, May 7; and for commissions, 24 per cent on \$1,000, on June 28. State the collector's account with the

United States in the accompanying frame.

XIII. General Eaton, chief engineer and disbursing officer, has charge of "improving the harbor of Buffalo, N. Y." The following data are from his disbursing proving the harbor of Buffalo, N. Y." The following data are from his disbursing account, viz: July 10, 1887, the available appropriation for the above object for the fiscal year 1888, \$70,000, was deposited to his credit with the assistant treasurer at New York. July 20, 1887, he paid John Ray \$10,000 for building breakwater. May 20, 1888, paid J. Davis, contractor, \$44,000 for dredging, including his 10 per cent commission for prompt work; July 3, 1888, he deposited to the credit of the Treasurer of the United States the amount of 10 per cent commission refunded by Contractor Davis, and which was erroneously paid him May 20, 1888, as above stated; July 9, 1888, paid one-quarter's salary to four \$1,200-clerks, to June, 1888, and rent July 9, 1888, paid one-quarter's salary to four \$1,200-clerks, to June, 1888, and rent of office for the fiscal year, amounting to \$3,200. July 10, 1888, he was ordered to deposit the unexpended balance on hand to the credit of the Treasurer of the United States, which he did. State his account with the United States for the above transactions in the accompanying frame.

### EXHIBIT No. 17.

Specimen tests in false syntax and improprieties from sheet No. 7, used in the competitive examinations during the year. Five questions were chosen.

Correct the following sentences marked by the examiner, but do not change the sentences or the order of the words, except where necessary to remove improprieties. ambiguities, or false syntax.

I. He divided his estate between his three children and mother.

II. Either me or you had aught go as soon as conveniently. III. Neither our positions or the plan of attacks were known. IV. The younger of them three sisters are the prettier.

V. A widow woman and a little sweet infant was on the train to two-day.

I. He set long waiting for a sail, then laid down and fell too sleep.

II. Who should I trust if not he who I have lived with for this five years?

III. Me and you had went before they come.

IV. He had not aught venture in deep water that can not swim.

V. When the buffalo is wounded, they turn furious on their pursuers and sometime trample him too death.

I. The brewer intended to have paid the tax; but neither the casks or the package were stamped plain.

II. There is two pictures of General Grant; but neither of them are good, I don't

III. He tread on the snake and was bit by it; but the poison was soon counteracted by the using antidotes.

IV. I have got to go. Can you keep this here seat for me against I come back?

The earth was ever a bounteous mother to its children.

The problem was solved bi she and i.

II. General efficiency and not political sycophents win the promotion; but before the reform that was seldom or ever the case.

III. That clerk could neither add or subtract correct; but here is one which possesseth fine talents.

IV. The brave Indian was heard say, that he would dare any one mount the wild

pony who he had captured.

V. Almost the whole inhabitants of the city was present to hear the discussing among the two candidates, which were to speak on "Civil Service Reform."

## Ехивит №. 18.

Specimen questions from sheet No. 10, from which five tests were chosen in general information in the competitive examinations held during the year.

I. Name the largest city situated on each of the following rivers: (a) Penobscot, (b) Connecticut, (c) Hudson, (d) Delaware, (e) Potomac, (f) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) Mississippi, (g) souri, (h) Arkansas, (i) Ohio.
II. In what war did Washington acquire the military experience that made him

the leading general of the Revolution?

III. What are the constitutional qualifications for incumbents of the offices of President, Senator, and Representative &

IV. Mention four European countries from which immigrants come to the United States in large numbers.

V. What proposed legislation is frequently called a "force bill," and what is its

ostensible purpose?

I. Who was Secretary of the Navy during the civil war? What was the most important naval combat during that war? What vessels fought off the coast of France in June, 1864, who commanded them, and what was the result of the engagement?

II. What State is the geographical center of the Union?

III. What is the Monroe doctrine? By whom and on what occasion was it pro-

mulgated?

IV. How often and when is the ratio of population to representation in the House

of Representatives fixed?

V. To what Department is each of the following bureaus and offices subordinate:

(a) Coast Survey, (b) Geological Survey, (c) Life-Saving Service, (d) Hydrographic Office, (e) Surgeon-General's Office, (f) Weather Bureau, (g) Bureau of American Republics, (h) Dead-Letter Office, (i) Office of the Solicitor of the Treasury?

I. What qualifications must a person possess to be eligible to the office of President of the United States? For what term is he chosen? In case of his death or resignation who succeeds him, under the Constitution? Who may succeed him un-

der the laws of the United States and under what circumstances

II. Name five of the principal battles of the late civil war, the States in which they were fought, and the commanding generals on either side in three of the battles.

III. Name the States which border on the Great Lakes, and the respective capitals of those States.

IV. During what wars, respectively, did the naval battle on Lake Champlain, the battle of Lake Erie, the battle of Mobile Bay, the battle of Monterey, the battle of Saratoga, and the battle of the (Little) Big Horn take place? Name three United

States officers each of whom took part in any one of the engagements.

V. What was the joint electoral commission? Name three of its members. briefly, in general terms, one question it decided; also name the year in which it

terminated its labors.

I. If the President of the United States were to vacate his office before the expiration of the term for which he was elected, who would succeed him in that office, and how long could such successor hold that office?

II. Name in order the last 8 Presidents of the United States, and after the name

of each of the last 5 name his Secretary of State.

III. Who was the President of the United States at the time of the war of the Rebellion? What great paper did he issne? What President preceded him and what President succeeded him in that office?

IV. Select any State of the United States and bound it; then give approximately its population by the census of 1890, the date of its admission into the Union, its principal cities, rivers, manufactures, mineral and agricultural products, its area in square miles, and its attitude towards the Union during the war of the Rebellion.

V. Name five Bureaus of the Treasury Department and select one of the five and

briefly state the duties imposed upon it by law and regulation.

# MISCELLANEOUS, BUREAU, DIVISION, AND GENERAL QUESTIONS.

Specimens of the various office questions used in the examination of the candidates for clerkships of Classes A, B, C, D, and E, and for clerkships of Classes 1, 2, 3, and 4, in the divisions in the office of the Secretary of the Treasury and in the several bureaus of the Treasury Department.

#### OFFICE OF THE SECRETARY OF THE TREASURY

Q. I. Define the duties of the storekeeper of the superintendent's office.

Q. II. Under what conditions, if any, may a leave of absence with pay be granted to the cabinetmakers?

Q. III. What is required of the head of a bureau or the chief of a division in order

to secure for official use supplies from the superintendent's office?

Q. IV. Who can authorize expenditures from the appropriations: "Annual repairs, Treasury building;" "fuel, lights, and water;" "furniture and repairs of furniture;" and "contingent expenses, Treasury building?"

Q. V. How can personal service be paid from the appropriation, "furniture and repairs of furniture, 1890?"

 ${f Q}$ . VI." Name the contingent expense appropriations under the control of the superintendent's office.

Q. VII. State the process of settling accounts in case of carpets furnished by this Department to rented buildings occupied by collectors of customs.

Q. VIII. State in a general way the manner of preparing vouchers as required by paragraph 2, section 21, "Instructions to custodians."

Q. IX. Name ten articles properly chargeable to the appropriation, "furniture

and repairs of furniture." Q. X. Name fifteen articles properly chargeable to the appropriation, "fuel, lights, and water."

Q. I. State briefly and in a general way the duties performed by the superintendent's office.

Q. II. Who alone has authority to authorize expenditures from the contingent appropriations of this Department?

Q. III. Under what circumstances may purchases be made in the open market? Q. IV. Under other circumstances what is required? Q. V. What is required of a head of a bureau or chief of a division in order to secure for official use supplies from the superintendent's office?

Q. VI. In how many newspapers, published in the District of Columbia, does the

law require that an order for Department supplies shall appear?

Q. VII. In order that a disbursing officer may get credit for payment for fuel, what must accompany the voucher? Q. VIII. From what appropriation is all of the carpet originally purchased that is

used in the Treasury building and the various buildings under its control?

Q. IX. State the number of laborers that are provided by law for the superintend-

ent's office, the classes into which they are divided, and the pay of each class.

Q. X. What disposition is made of the proceeds of sales of condemned public property?

Q. I. Describe the method of bookkeeping adopted by the superintendent's office in keeping appropriation accounts.

Q. II. What individual accounts are kept in this office, and with what appropriations?

Q. III. What is the preliminary step taken by the superintendent's office to advance money to a disbursing officer from the appropriations under its charge?

Q. IV. By whom are vouchers approved paying money from the appropriation,

"fuel, lights and water?"
Q. V. By whom are vouchers approved paying money from the contingent appropriation, Treasury Department?

Q. VI. Checks involving what appropriations are drawn in the superintendent's

Q. VII. By what process is the appropriation, "furniture and repairs of furniture," reimbursed, and from what appropriation for carpet supplied the Treasury building 🕈

Q. VIII. Upon what are the appropriations in charge of the superintendent's office based?

Q. IX. To what appropriations are the repairs to the Treasury and Winder building property chargeable, respectively? By whom should the vouchers be approved in each case?

Q. X. What is the method adopted for perfecting the records of the Department in

regard to the official correspondence of the superintendent's office?

Q. I. Name the appropriations of which the superintendent of the Treasury Department has charge.

Q. II. What is the method pursued in letting contracts for furniture and other

supplies of the Department?

Q. III. A carpet rug is required for the office of the Comptroller of the Currency; the diagram of the floor shows the room to be 40 feet 1 inch long and 21 feet 6 inches wide, and it is desired to make an estimate of the cost of such a carpet rug, as the appropriation to which the expense is to be charged is very much depleted. The carpet is of Brussels, which costs \$1.08\frac{1}{2} per yard; the border is \frac{1}{2} of a yard wide and costs 971 cents per linear yard; the lining in quantity is 3 of that of the carpet and border together, and costs 41 cents per square yard; and the making and laying cost 7 cents per yard. What would be the cost of the rug laid?

Q. IV. What is the method required by the Department in shipping or forwarding

carpets to public buildings located in cities west of Chicago?

Q. V. During the construction of a public building what office in the Treasury Department has it in charge and what officer has immediate supervision of it?

Q. VI. When such public building is completed what officer assumes control over it, becomes responsible for its proper care, has the control of the appointment of employes, and to whom is he directly responsible?

Q. VII. Describe the method of keeping the records of the superintendent's office. Q. VIII. The Register's office being in need of a water cooler, describe the method to be pursued in obtaining it; and if the article be not in stock, explain in detail the course pursued to the delivery of the cooler to the Register and the payment

therefor. Q. IX. Describe in detail the steps to be taken to supply a new public building

- with furniture. Q. X. If you observe tiles in one of the corridors of the Treasury building to be in a loose or broken condition or displaced, what course would you pursue to have the damage repaired? Explain in detail the steps taken by the officers of the Department and other persons to repair the damage and to pay for same.
- Q. I. What duties are assigned to the division of warrants, estimates, and appropriations?

Q. II. What kind of warrant is issued in payment of an account allowed by the

accounting officers in favor of a local inspector of steam vessels?

Q. III. What kind of a warrant is issued in payment of a requisition made on the Secretary of the Treasury for money appropriated for the census of the United States? Q. IV. In whose office are accounts relating to the census of the United States andited?

Q. V. Name the different classes of warrants issued for covering money into the

Treasury?

- Q. VI. State approximately the largest sum as yet provided for pensions in the yearly appropriations made by Congress.

  Q. VII. What comptroller certifies accounts pertaining to the Army and Navy?

  Q. VIII. By whom are the accounts pertaining to internal revenue audited?
- Q. IX. By whom are the accounts pertaining to the diplomatic and consular service audited?

Q. X. What is an appropriation warrant?

Q. I. Under what general heads are the receipts and expenditures of the Government published yearly?

Q. II. Give in round figures the revenue of the Government for the fiscal year 1890. Q. III. Give in round figures the expenditures of the Government, exclusive of principal of the debt, for the fiscal year 1890.

Q. IV. In what offices are accounts of the charitable institutions in the District

of Columbia audited and certified?

Q. V. In what manner do settled accounts chargeable to appropriations for the Treasury Department reach the Secretary of the Treasury for payment?

Q. VI. What is the course of a warrant for the payment of money from the Treas-

ury after it has been issued from the warrant division?

Q. VII. For what are transfer and counter warrants issued?

Q. VIII. What class of appropriations is disbursed by engineer officers of the Army?

Q. IX. How is an agent admitted to practice before the Treasury Department? Q. X. Where are accounts of paymasters of the Army and of paymasters of the Navy audited?

Q. I. What duties are assigned to the division of warrants, estimates, and appro-

Q. II. Name the different classes of warrants issued for the payment of money

from the Treasury.

Q. III. Name the different classes of warrants issued for covering money into the Treasury

- Q. IV. What is a revenue-covering warrant?
  Q. V. What is the fiscal year of the Treasury of the United States?
  Q. VI. What class of appropriations is available only for expenditures incurred within a fiscal year?

Q. VII. What is an appropriation warrant? Q. VIII. What papers are daily certified by the Register of the Treasury to the Secretary of the Treasury in connection with the issue of warrants?

Q. IX. What books of appropriations are kept in the warrant division to complete

the work which you begin in preparing warrants?

- Q. X. What is the course of a pay warrant after it has left the warrant division up to the time when a draft is drawn thereon?
- Q. I. How many assistant secretaries of the Treasury are provided for by law, and what are the names of the present incumbents?

Q. II. Who is ex officio superintendent of the Treasury building?

Q. III. What are the duties of United States local appraisers, as defined by law?

Q. IV. How is the appraiser of customs at a port of entry appointed?
Q. V. What principal officers of the customs are prescribed by law at the port of New York

Q. VI. What bureau officers settle the accounts of collectors of customs?

Q. VII. Under whose immediate supervision are fur seals taken in Alaska? Q. VIII. By what authority are articles imported by foreign ministers for their own use admitted to entry free of duty?

Q. IX. What evidence is required to enable an importer to make entry of imported

goods at the customs-house?

Q. X. When is an entry of imported merchandise liquidated?

Q. I. How are the values of foreign currencies calculated by officers of the customs?

Q. II. What change has been made by the tariff act of October 1, 1890, as to the estimation of the value of foreign coins?

Q. III. What change was made by the act of June 10, 1890, in the method of determining the proper classification of imported merchandise?

Of how many General Appraisers does the Board consist?

Q. IV. Of how many General Appraisers does the Board c Q. V. Where is the Board of General Appraisers located?

Q. VI. How are questions of classification brought under their jurisdiction? Q. VII. What change was made by the tariff act of October 1, 1890, as to draw-

back allowances?

Q. VIII. What change has been made by the tariff act of October 1, 1890, in the matter of allowances for damage on imported goods on voyage of importation.

Q. IX. What recourse has an importer in the event of his goods being damaged

- on the voyage?
  Q. X. What change has been made by the tariff act of October 1, 1890, as to articles imported for the use of the United States?
- Q. I. What is the Division of Customs, Secretary's Office, and what are its duties generally?

Q. II. Who signs the letters prepared in the division?

Q. III. What duties have been recently transferred from the Customs Division to the board of general appraisers at New York?

Q. IV. Under what laws are duties imposed on imported merchandise? Q. V. What is an ad valorem rate of duty? Give an instance.

VI. What is a specific rate of duty? Give an example.

Q. VII. What remedy has an importer, under the customs administrative act, if dissatisfied with the rate of duty levied on his importation?

Q. VIH. What are some of the different classes into which the work of the Cus-

toms Divison is divided, as entered on its books and registers?

Q. IX. Under what act are customs duties now imposed?

Q. X. What is the difference between a revenue tariff and a protective tariff?

Q. I. What are the "Revised Statutes" and the "Statutes at Large" of the United States?
Q. II. To what officers are referred questions as to the bearing of the law upon

customs cases?

- Q. III. To what division should be referred a charge that smuggling is practiced in a certain locality?
- Q. IV. Under what conditions are personal effects and household effects admitted free of duty?

- Q. V. How are refunds of duty made under decisions of the courts?
  Q. VI. What classes of goods are prohibited from importation under the law?
- Q. VII. What course is pursued in regard to offers of compromise in customs cases? Q. VIII. Explain what is meant by specific, ad valorem, and compound rates of duty.
  - Q. IX. What papers are required to be presented on the entry of merchandise? Q. X. Explain the difference between a port of entry and a port of delivery.
- Q. I. Name the dates, respectively, of the so-called customs administrative act and of the latest tariff act.
- Q. II. What customs officer establishes the value of imported merchandise for the assessment of duty?

- Q. III. What is meant by the liquidation of an entry?  $\circ$  Q. IV. What is the procedure required of importers dissatisfied with the collector's assessment of duty!
  - Q. V. What are the respective duties of collectors, naval officers, and appraisers?

Q. VI. What is the function of the Board of General Appraisers?
Q. VII. By whom can appeals be carried to the courts in customs cases?
Q. VIII. What is meant by the I. T. law?

- Q. IX. What are the provisions of law in regard to American goods exported and returned?
  - Q. X. What officers have jurisdiction over the money accounts of customs officers?
- Q. I. Describe the proceedings which take place in your division on the arrival of the mail

Q. II. Describe the method of preparing and mailing the correspondence.

Q. III. How are letters filed and recorded for reference?

- Q. IV. Name some of the principal subjects of correspondence.
  Q. V. What is the mode of promulgating decisions of the Board of General Appraisers?
- Q. VI. What questions regarding customs matters pertain to the functions of the Customs Division?

Q. VII. In what year was the last volume of customs regulations published?

- Q. VIII. In what form are the Department's decisions on customs questions preserved for reference?
- Q. IX. What classes of customs officers correspond with the Treasury Department through the Customs Division?

Q. X. What books are supplied to customs officers for their general guidance?

Q. I. How is a change (otherwise than by resignation or death) made in a Presiden-

tial office during the recess of the Senate?

Q. II. If a person nominated by the President fails of confirmation by the Senatethat is, the Senate does not act on the nomination before adjournment—and the President appoints that person during the recess, for how long can the person serve under the said appointment?
Q. III. How are collectors of customs, and of internal revenue, appointed, and for

what terms of service?

- Q. IV. How are bureau officers of the Treasury appointed? Name those appointed for limited terms and give the limit of said terms.
- Q. V. To what branches of the Treasury Department do the civil-service rules apply?

VI. Name the customs ports to which the civil-service rules apply.

Q. VII. By whom are deputy collectors of internal revenue appointed? Q. VIII. Name the principal branches of service of the Treasury Department in which appointments are made through the Appointment Division.

Q. IX. If a vacancy occurs in the Secretaryship of the Treasury, what is done to fill the vacancy temporarily or until a regular appointment of a successor is made, and for how long can the temporary action last?

Q. X. Who fixes the amount and approves bonds for collectors of customs?

Q. I. What is the office designation of the deskwork upon which you are engaged?

Q. II. How are employes in the unclassified customs service appointed? Q. III. How are employes in the classified service appointed?

Q. IV. What officers in the classified customs service are exempt from examination ?

Q. V. Give briefly the classification of employés in the classified customs service-VI. For what terms of service are collectors of customs, surveyors of customs naval officers of customs, and appraisers appointed?

Q. VII. In the absence of a collector, surveyor, or naval officer, who performs their

duties, and under what authority?

Q. VIII. How are the First Auditor and Commissioner of Customs made aware of

the changes in the force of employés at the various customs districts? Q. IX. In the event of a vacancy occurring suddenly in the office of any collectorship, or other chief officer of customs, what is done to protect the interests of the

service in the district in which the vacancy occurs?

- Q. X. How, and by whom, are the examiners for the Central Board of the Civil Service Commission selected, and what persons, under the law, may be ordered to duty on that service; how are they compensated for their services, and what is the period of their assignment to that duty?
- Q. I. When a letter is written in the Appointment Division, requiring the signature of the Secretary, what course does it take until completion?

Q. II. What is done with press copies?
Q. III. What are the duties of a copyist in the Appointment Division?
Q. IV. Name the Executive Departments?

- Q. V. How many kinds of copies are made of, official letters written, and what are
- Q. VI. What is done with official communications when first received in the division?

Q. VII. What is done with papers after action has been taken?

- Q. VIII. After copies are made of changes in force, and authorizations in expenditures from customs appropriations, what is done with the copies?
  - Q. IX. What is done with the estimates of the collectors of customs for funds?

Q. X. After a requisition is drawn, what is done with it?

- Q. I. Give a brief statement of the manner in which collectors of customs draw money from the Treasury for the payment of salaries and contingent expenses of their districts.
- Q. II. When collectors of customs include in their estimates an allowance as commissions or fees, how is the amount claimed as said commissions or fees verified or allowed at your desk?

Q. III. When there is a vacancy in the chief office of a customs port or district,

how are the salaries and contingent expenses usually paid?

Q. IV. What division issues authorizations for contingent expenses in the customs districts? Q. V. Which branch of the service of the Treasury Department, the business of

which pertains to your desk, is under Civil Service rules?

Q. VI. To what bureaus of the Department are reports made of authorizations for contingent expenses in customs districts?

Q. VII. How are supervising inspectors of steam vessels appointed? Q. VIII. How are the salaries of employés of Steamboat Inspection Service paid? Q. IX. How do the assistant treasurers obtain funds for the payment of salaries in their respective offices?

Q. X. For what terms of service are the assistant treasurers appointed?

Q. I. By whom are gaugers, storekeepers, and storekeepers and gaugers appointed?

- Q. II. When do such appointments take effect?
  Q. III. By whom are surgeons, passed assistant surgeons, and assistant surgeons appointed?
- $ar{\mathbb{Q}}.$  IV. By whom are acting assistant surgeons and hospital stewards appointed ? Q. V. By whom are commissioned officers of the Revenue-Marine Service appointed?

Q. VI. Through what division of the Secretary's Office are the movements of the

Revenue Marine directed?

Q. VII. How is the Light-House Board constituted?
Q. VIII. Who is chairman of the Light-House Board?
Q. IX. Into how many life-saving districts is the coast line divided?
Q. X. Give the name and date of act under which the compensation of district superintendents is fixed.

Q. I. How are supervising inspectors of steam vessels appointed?

Q. II. (a) How are assistant treasurers United States appointed? (b) For what

Q. III. Are they required to give bond?

Q. IV. By whom are subordinates to assistant treasurers appointed?

Q. V. Are such subordinates in the classified civil service? Q. VI. What is a customs estimate?

Q. VII. (a) In case of the death of a collector of customs can the acting collector obtain funds upon a customs estimate? (b) How are bills paid pending the appointment of a new collector?

Q, VIII. From what appropriation is fuel purchased for rented buildings used for

customs purposes?
Q. IX. How are the proper accounting officers apprised of authorizations to incur

miscellaneous expenses given by the Department to collectors of customs?
Q. X. What is a brief (as the term is ordinarily used in the Appointment Division), and what is its purpose?

Q. I. How are appointments to the classified departmental service made? Q. II. What are the requirements for reinstatement of a clerk who has become

separated from the service?

 $\hat{\mathbf{Q}}$ . III. If a person holding an unexcepted place be transferred to an excepted place, is he eligible for transfer back to an unexcepted place without examination by Civil Service Commission?

Q. IV. Under what condition may a person be transferred from an excepted place

to an unexcepted place in the departmental service?

- Q. V. What is the maximum time allowed employes on account of absence with
- Q. VI. If an employé is absent over thirty days in any year, the excess being on account of sickness, what is required before he can receive pay for the excessive

Q. VII. What offices or bureaus, other than Appointment Division, make appoint-

ments which are not of record in Appointment Division? Q. VIII. What is the designation of such appointees?

Q. IX. How and by whom are examiners for the central board of examiners of the Civil Service Commission selected?

Q. X. What compensation do they receive for such service?

Q. I. Upon whose recommendation are expenditures from the appropriation, "Pay of assistant custodians and janitors," authorized?

Q. II. Upon whose recommendation are custodians of public buildings appointed,

and what condition must exist before they are eligible for appointment?

Q. III. To what officer of the Department are all communications from custodians involving expenditures from the appropriation, "Pay of assistant custodians and janitors," sent for recommendation? janitors, sent for recommendation? Q. IV. State the practice of the Department in the matter of absence of persons employed and paid out of the appropriation, "Pay of assistant custodians and jan-

Q. V. State the character of the personal service which must be rendered to constitute an expenditure legally payable out of the appropriation, "Pay of assistant custodians and janitors.

Q. VI. Designate the class of buildings at which the custodian and janitor service

is payable out of the appropriation, "Pay of assistant custodians and janitors."
Q. VII. From what appropriation are superintendents of construction of public

buildings payable?
Q. VIII. Describe the manner of appointment of persons employed on the construction of a public building.

Q. IX. Describe the manner of leasing buildings for public use.

- Q. X. Describe the requirements of the law as to the incurrence of an expense in excess of an appropriation.
- Q. I. Who recommends the amounts in which principal customs officers shall be bonded?
- Q. II. Who approves the amounts in which principal customs officers shall be bonded?
- Q. III. At what classified customs port must promotions be made upon competitive examination and certification by the Civil Service Commission?
- Q. IV. Upon the disability or death of a collector of customs, upon whom does his d**u**ty devolve?
- Q. V. In cases of occasional and necessary absence, or of sickness, how may collectors, naval officers, or surveyors of customs perform their duties?

Q. VI. Give designations of subordinate officers and employés in the classified cus-

toms service who are exempted from Civil Service examination?

Q. VII. Give designations of the officers who take charge of the office and conduct the business of collectors, surveyors, and naval officers, during their temporery absence.

Q. VIII. Give the designations of the officers who disburse public moneys in place of collectors and surveyors, acting as collectors, when they are temporarily absent.

Q. IX. Give the designations of the officers who examine and report upon the transactions of the customs collection districts, and upon all matters requiring investigations therein, under the immediate direction of the Secretary of the Treasury.

Q. X. Designate the customs officers who are appointed by the President, by and

with the advice and consent of the Senate.

Q. I. State the requirements of the law in relation to designating an officer to perform the duties of a Presidential office in the Department, in case of a vacancy caused by the death of an incumbent; what period of time may such officer serve?

Q. II. What is the average which must be attained at a Civil Service examination

to make a person eligible for appointment?
Q. III. What skilled laborers are required to pass examination before appointment?
Q. IV. Name two officers of the Department who are appointed for five years?

Q. V. By whom is the Supervising Architect of the Treasury appointed

Q. VI. Name five places in the departmental service which are excepted from examination under Civil Service rules?

Q. VII. What conditions must exist before a transfer from the departmental to the

customs service can be made?

Q. VIII. Under what conditions can clerical service be performed by persons who are placed in positions designated as laborer, workman, watchman, or messenger?

Q. IX. Under what rules may substitutes be employed? Q. X. In what manner and under what circumstances do substitutes receive regular appointments?

Q. I. What is the amount of the appropriation for "Pay of assistant custodians and janitors," for the current fiscal year?

Q. II. Upon whose recommendation are janitors, watchmen, laborers, and other

employés in the assistant custodian and janitor service appointed?
Q. III. Are employés of the assistant custodian and janitor service required to take the oath of office before entering upon their duties?

Q. IV. Name the titles or official designations of the public buildings in which

assistant custodian's and janitor's force is employed?

Q. V. Are custodians of public buildings paid for their services from the appropriation for "Pay of assistant custodians and janitors?" Q. VI. Upon whose recommendation are custodians appointed in the various pub-

lie buildings?
Q. VII. What items are considered and paid as incidental expenses from the appropriation for "Pay of assistant custodians and janitors?"
Q. VIII. To what officer of the Department should letters addressed to the Secretary of the Treasury requesting appointment in the assistant custodian and janitor service be sent from the mail and files division?

Q. IX. Are the salaries of the employes in the assistant custodian and janitor service specifically appropriated for? If not, by whom are they fixed?

- Q. X. By whom and how are the employes in the assistant custodian and janitor service paid?
- Q. I. Where are gaugers' accounts checked for the signature of the Assistant Secretary?

Q. II. By whom and under what authority are sugar inspectors appointed? Q. III. How is the Supervising Surgeon-General of the Marine-Hospital Service

appointed ?  $ar{ extsf{Q}}$ . IV. How are assistant surgeons appointed?

Q. V. How are passed assistant surgeons appointed?
Q. VI. By whom and under what authority may eligible persons be appointed cadets in the Revenue-Marine Service?

Q. VII. At what age máy one be appointed keeper of a light-house?

Q. VIII. What is the method of appointing the officers of the light house tenders

and supply vessels?

Q. IX. What is the maximum compensation of keepers of life-saving stations? Q. IX. What is the maximum compensation of keepers of life-saving stations Q. X. Who appoints superintendents of construction of life-saving stations?

Q. I. (a) How many supervising inspectors of steam vessels are provided for by law? (b) How are they appointed?
Q. II. Describe the modus operandi of appointing local inspectors of hulls and

local inspectors of boilers?

Q. III. How are assistant inspectors of hulls and assistant inspectors of boilers appointed?

Q. IV. For what term are assistant treasurers of the United States appointed?
Q. V. How are the subordinates of the assistant treasurers outside of the Treasury

Department appointed?

Q. VI. At what cities outside of the District of Columbia may assistant treasurers be appointed?

be appointed?

Q. VII. What provision may be made by an assistant treasurer for some one to act

in his place in case of sickness or unavoidable absence?

Q. VIII. (a) Is an assistant treasurer bonded? (b) What protection has the Government when some one is acting for him in case of sickness or unavoidable absence?

Q. IX. Describe how collectors of customs ordinarily obtain funds to defray the

expenses of collecting the revenue from customs?

Q. X. Given an estimate (properly made) from a collector of customs, describe in detail each usual step of Departmental action resulting therefrom, from the receipt of the estimate until the draft is forwarded?

Q. I. What are the principal sources from which public moneys are derived?

Q. II. Where are the moneys of the United States kept?

Q.III. How are public moneys deposited with a national-bank depositary secured? Q.IV. In what manner and how often do national-bank depositaries report to the Department deposits and balances to the credit of the Treasurer of the United States?

Q. V. In what manner and how often do national bank depositaries report to the Department balances to the official credit of United States disbursing officers?

Q. VI. When are moneys technically in the Treasury so that they can be paid out only in consequence of an appropriation made by law?

Q. VII. What signatures should appear on a revenue-covering warrant when com-

plete?

Q. VIII. Who designates national banks as public depositaries?

Q. IX. What disposition is made by national-bank depositaries of public moneys deposited therewith to the credit of the Treasurer of the United States?

Q.X. Under the law may receipts from any and all sources be deposited with national-bank depositaries? State the exceptions, if any exist.

Q. I. To whom are accounts of receivers of public moneys rendered, and how often? Q. II. By whom are receiver's accounts audited and settled, and by whom confirmed?

Q. III. Is a receiver of public moneys required to make any report to the Secretary of the Treasury? If so, state its character, how often to be rendered, and whether required by law or only by regulation.

Q. IV. Under whose instructions are moneys collected by a receiver of public mon-

eys disposed of?

Q.V. On what do receivers of public moneys receive credits in their accounts for moneys deposited?

Q. VI. Under the general regulations of the Department, how often is a receiver of

public moneys required to deposit his receipts?

Q. VII. To whose credit are receipts from sales of public lands deposited when paid into the general Treasury?

Q. VIII. How are certificates issued for deposits by a receiver of public moneys on

account of sales of lands, and how is the set disposed of?

- Q. IX. What certificates of deposit, if any, are receivable in payment for public lands?
- Q. X. What evidence has the Secretary of the Treasury, other than the statement of the receiver of public moneys, that the amount reported by him as on hand at the end of the month is correct?
- Q. I. Under what letter should a communication to Joseph J. Cooke, collector of customs at Brownsville, Tex., be indexed in the record of letters sent?
- Q. II. Under what letter should a communication from Geo. L. Johnson, collector of internal revenue, Tenth district, Ohio, be indexed in the record of letters received?
- Q. III. How should a Department letter appointing a committee be indexed? Q. IV. Name the appropriation from which a bill for transportation of standard silver dollars from the assistant treasurer United States at Cincinnati, Ohio, to a bank or individual at Chillicothe, Ohio, is payable?

Q. V. Name the appropriation from which a bill for transportation in July, 1888, to an assistant treasurer United States, for deposit, of moneys collected by a collector

of customs, is payable?

Q. VI. Name the appropriation from which a bill for actual and necessary expenses of an employé of the Department assisting in the examination of a subtreasury office is payable.

Q. VII. State what action is taken upon the official bond of a collector of internal revenue as disbursing agent when received in the Division of Public Moneys?

Q. VIII. What officials approve the official bond of an assayer in charge of a United

States assay office, and who is the custodian of the bond when completed?
Q. IX. Who designates national banks as depositaries of public money?

Q. X. How are public moneys deposited with national-bank depositaries secured? Select and answer ten questions.

Q. I. State the general duties assigned to that branch of the division in which you are employed.

Q. II. To which office of the Department must the holder of a called bond present

it for redemption?

Q. III. In what respect do registered United States bonds differ from coupon bonds Q. IV. What rate of interest per annum do the United States refunding certificates bear? How can the interest be realized?

Q. V. Give the detailed history of a coupon bond passing through the office to

which it is presented for exchange into a registered bond.

Q. VI. How are the original issues of the bonds of the United States, under the several authorizing acts of Congress, divided?

Q. VII. How are the registered bonds of the United States transferred? Q. VIII. Give the nature of the work assigned to the currency branch of the Loan Division in which you are employed.

Q. IX: Describe in detail the duties of your desk.

Q. X. From whom does the Secretary receive securities for destruction? Describe those received from each office, and give the technical name by which the (paper) securities circulating as cash are known in the office; also state what, if any, securities are destroyed beside those delivered to the division.

Q. XI. State the kind and description of paper used for each class of securities,

where and by whom made, and give the legal restrictions imposed by law.

Q. XII. By whom are the different securities issued by the Department printed?

and what check has the Government against illegal issue?

Q. XIII. The Secretary bought of the present contractors 10,000 sheets of paper, size 81 by 131, for United States notes; he ordered 5,000 sheets of check paper, size 14 by 17, to be cut and transferred for United States notes; 5 per cent was mutilated by the printer, 1,000 sheets were destroyed as blank, and the balance was turned over to the proper officers as perfect.

Put the transaction on the journal, use fictitious dates, but do not post to the ledger.

(As blank paper.)

Q. I. Give, in your own way, and order the names of the different kinds of securities that are received by the Division of Loans and Currency from the Treasurer of the United States for count and verification.

Q. II. Give the distinctions made in the Division of Loans and Currency in the designation of the national-bank currency that is received from the Comptroller of

the Currency

Q. III. What national-bank currency is received from the Comptroller of the Currency that does not appear in the cash accounts? Why is it received by this division? What disposition is made of it? Why is it destroyed?

Q. IV. This division received from the proper officer \$390 in notes issued by the First National Bank, of Middletown, N. Y You can assume dates, then make the proper journal entries, showing the necessary transactions, to show the final disposition of the notes by this office.

Q. V. How many witnesses are necessary to verify the destructions of the notes of banks that have gone into liquidation, or have failed, or that are destroyed under the act of July 12, 1882, or whose charters have expired? And what officers or other

bodies do they represent?

Q. VI. A committee is to be appointed to take an inventory of the dies, rolls, and plates in the office of the custodian, in the Bureau of Engraving and Printing. What offices should be represented on that committee? by whom would the committee be appointed? and what, in general, would be the duties assigned to it?

Q. VII. A committee is to be appointed to count and verify the stamps in the stamp vault of the Commissioner of Internal Revenue. Who would appoint the committee? What offices should be represented? How would the chairman of the committee

verify his count with the records? Explain the work of verification in detail. Q. VIII. A contract is to be drawn between the Department and a contractor for the

manufacture of distinctive paper for United States notes, silver certificates, nationalbank currency, and coin certificates. State some of the essential conditions of the contract usual in such documents, the condition imposed by law, and the amount of the bonds exacted by the Department.

Q. IX. When was the first distinctive paper made for the printing of United States securities? By whom was it made? What were its distinctive features? What securities were printed upon that paper? When, and by what authority, was it

Q. X. Who is the present contractor for making the distinctive paper for notes, certificates, bonds, checks, etc.? When did that contractor first contract for making such paper? What changes have been made in that paper from its first production to the present time? What are its essential distinctive features? What securities have been printed on that paper? What are the penalties imposed by law for having in unlawful possession, for imitating, or for unlawfully using such paper?

Q. I. By whom is the distinctive paper for internal-revenue stamps made? Where is the establishment of the manufacturer located? What are the distinctive features of the paper?
Q. II. To what office are the perfect sheets of internal-revenue stamps delivered

for issue?

Q. III. To what office are the imperfect sheets of internal revenue stamps spoiled

in printing delivered?
Q. IV. Explain in your own way what is done with the imperfect sheets.
Q. V. Enumerate the stamps used by the Treasury Department (other than postage stamps) that are not printed on a distinctive paper. State what they are used for, and to what office they are delivered by the printer.

Q. VI. How many kinds of strip-tobacco stamps are in use by the Treasury De-

partment, and what are they?

Q. VII. What redeemed United States securities are received in the branch of the division in which you are employed, and from whom are they received?

Q. VIII. When the paper for one class of stamps is no longer required, to what

account is it debited and credited in case of transfer?

- Q. IX. Ten thousand perfect sheets of \$20 United States notes have reached the United States Treasury for issue, and have been issued and redeemed. Trace, by proper entries in the books of the Division of Loans and Currency, all the official transactions, including the manufacture of the paper, involved in accomplishing the result.
- Q. X. On July 1, 1889, the Department ordered of the contractor 60,000 sheets of internal-revenue paper for 16-ounce tobacco stamps, size 13 by 18½ inches. The paper was delivered to the proper officer August 20, 1889, and immediately shipped to the Department, where it was received August 25, 1889. November 25, 1889, the Bubepartment, where it was received August 25, 1889. November 25, 1889, the Bureau of Engraving and Printing made a requisition for 5,000 sheets of 16-ounce to-bacco-stamp paper. On December 12, 1889, 4,750 sheets of perfect 16-ounce to-bacco stamps were delivered to the proper office, and on December 15, 1889, the sheets spoiled in printing were delivered to the proper office, from which they were delivered to the person authorized to give them the final count, December 31, 1889, and were destroyed January 10, 1890. On January 10, 1890, 8,000 sheets of 16-ounce to-bacco-stamp paper was cut to tax-paid stamp paper, size 9½ by 13 inches. January 17, 1890, the Purson of Engraving and Printing paper, was expectation of Source of Source and Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of Source of S 17, 1890, the Bureau of Engraving and Printing made a requisition for 3,000 sheets of tax-paid stamp paper, 9½ by 13, of which 86 sheets were found unfit for printing, and returned to the paper room to be exchanged. These were delivered January 18, 1890, for destruction, and the certificate for the destroyed sheets was dated January 27, 1890. The perfect sheets of the tax-paid stamps, 2,930 in number, were delivered to the proper office February 12, 1890, and those spoiled in printing were delivered February 14, 1890, were receipted for February 28, 1890, and the certificate of destruction was signed March 13, 1890.

Put the foregoing-described transactions on the books of the Division of Loans and

Currency and prepare a trial balance.

Q. I. Describe the paper used for printing silver certificates.

Q. II. Describe the paper used for printing internal-revenue stamps for tobacco, etc.

Q. III. In what respect does the paper used for printing United States checks differ from that used for silver certificates?

Q. IV. In the examination of internal-revenue paper, what defects are deemed sufficient for its rejection as unfit for printing?

Q. V. What is the size of the largest internal-revenue paper, and what stamps are printed thereon?

Q. VI. What kinds of redeemed money are counted and examined in the Loan Division?

Q. VII. Which half of the notes and certificates comes to the Loan Division, and what office receives the other half? Q. VIII. Whose portraits appear on the one and the two dollar silver certificates?

Q. IX. How are counterfeit notes usually distinguished from genuine ones? Q. X. What is the color of the backs of the national-bank notes, series of 1882?

- Q. I. How many vessels are there in the Revenue-Cutter Service at the present time?
  - Q. II. At what ports on the Atlantic Ocean and Gulf of Mexico are they stationed?

Q. III. At what ports on the lakes?

Q. IV. At what ports on the Pacific Ocean?
Q. V. What revenue vessels make long voyages annually and for what purposes?
Q. VI. At what ports are the vessels stationed which perform special winter cruising by direction of the President?

Q. VII. Name the grades of commissioned officers in the Revenue-Cutter Service. Q. VIII. By whom are they commissioned and how?

Q. IX. How are appointments made in the Revenue-Cutter Service of lieutenants and assistant engineers?

Q. X. When are members of the crews of revenue vessels entitled to the benefit of the pension laws?

Q. I. Through what persons are orders sent to the commanders of revenue vessels in ordinary cases?

Q. II. Describe the system of book-marking in use in the Revenue Marine Divi-

sion.

Q. III. Describe the number, kind, and size of flags allowed a new revenue vessel of the first class on going into commission.

Q. IV. Describe the revenue ensign. Q. V. Describe the revenue pennant.

Q. VI. Describe the national ensign. Q. VII. How many commissioned officers are there in the Revenue-Cutter Service?

Q. VIII. Give the rates of compensation of the officers when on duty. Q. IX. Give the rates of compensation of the officers when not on duty.

- Q. X. If you should be promoted to Class 1, September 10, what would be your compensation for the month of September?
  - Q. I. When was the Revenue-Cutter Service instituted?

Q. II. Name some of the duties of this service.

Q. III. How are supplies for revenue vessels obtained?
Q. IV. For what objects are contracts prepared in the Revenue Marine Division?
Q. V. Give the process used in executing the contracts—how they should be signed, and by whom approved.
Q. VI. When are revenue vessels to be used in towing?

Q. VII. By whom are the complements of crews of revenue vessels determined? Q. VIII. What is the law respecting the use of revenue vessels for private purposes?

Q. IX. Are officers of the revenue cutters officers of the customs?

- Q. X. At what distance from the coast are revenue marine officers authorized to board vessels bound for the United States?
- Q. I. State the difference between the Treasury Department and the Secretary's Office.

Q. II. Mention some kinds of business in charge of the Miscellaneous Division that come directly to the Secretary without the intervention of any bureau?

Q. III. What is the rule of the Department for the care and preservation of records, documents, letters, or papers of all kinds?

- Q. IV. What is the tax levied by the immigration act?
  Q. V. What classes of immigrants are excluded by that act?
  Q. VI. How can these prohibited classes get into this country without legal hindrance?
- Q. VII. In what ports were contracts made with State commissioners or officers for the supervision of immigration matters?
- Q. VIII. What change in immigration matters has recently been made at the port of New York by the Secretary?
  Q. IX. What is the object of the alien contract-labor law?
  Q. X. What is the penalty for importing alien immigrants under contract?

- Q. I. Under what sections of the Revised Statutes are compromise cases sent to the Miscellaneous Division of the Secretary's Office for the Secretary's action?

Q. II. What are the principal requirements of these sections?
Q. III. What is the work of the Miscellaneous Division in each case?

Q. IV. Under what sections of the Revised Statutes, and for what purposes can the Secretary issue permits for the withdrawal of alcohol and distilled spirits without payment of internal revenue? Withdrawal from what?

V. Under what section can the Secretary abate or refund the tax on distilled

spirits, and for what causes?

Q. VI. What is the work of the Miscellaneous Division in cases of this kind?

Q. VII. What section allows drawback of internal revenue tax on distilled spirits, and how is the amount of drawback in any particular case determined?

Q. VIII. What is the work of the Miscellaneous Division in cases of this kind? Q. IX. Under what section and what circular are awards made to informers in

internal-revenue cases, and what is the maximum allowance? Q. X. State some other kinds of business that come from the Office of Internal

Revenue to the Miscellaneous Division for the action of the Secretary.

Q. I. How does business reach the Miscellaneous Division of the Secretary's office? How registered and how distributed?

Q. H. Mention the kinds of business assigned to the Miscellaneous Division which come directly to the Secretary of the Treasury without the intervention of any bureau in the Treasury Department.

Q. III. Mention the kinds of business which coule to the Miscellaneous Division

for the Secretary's action from bureaus in the Depaltment.

Q. IV. Which are the so-called remission sections in the Revised Statutes, and what class of cases comes to the Miscellaneous Division under these sections?

Q. V. What sections of the Revised Statutes authorize the Secretary to fix and allow fees for United States attorneys? And what is the work of the division in preparing such claims for his action?

Q. VI. What section of the Revised Statutes allows drawback of internal-revenue tax on distilled spirits which have been exported? How does a claim for such drawback reach the Secretary for his action? And what is the work of the division in

preparing these cases?
Q. VII. When spirits have been exported with the benefit of drawback of the in-

ternal-revenue tax, upon what gauge should the tax be computed?

Q. VIII. Which auditor passes upon all internal-revenue accounts requiring the approval of the Secretary?
Q. IX. Can the Secretary abate or refund the internal-revenue tax on distilled spirits? If so, under what section of the Statutes and for what causes?

- Q. X. For what purposes may the Secretary issue permits for the withdrawal of alcohol and distilled spirits without exacting the payment of the internal-revenue tax, and to what uses are spirits so withdrawn limited?
- Q.I. State the difference between the Treasury Department and the Secretary's office.

Q. II. What is the rule of the Department for the care and preservation of records, documents, letters, and papers of all kinds?

Q. III. How is information or evidence contained in Department records or files

furnished to Congress, and how to courts? Q.IV. What are the requirements of Department Rule XII as to applications by

individuals for information or for copies of papers?

Q.V. What general rule governs in the Secretary's office on an application to re-

open and rehear a case which has been decided or adjudicated by a predecessor?

- Q.VI. State the class of claims that were adjudicated by the commissioners of claims (southern claims); also state where the records of said commissioners are now on file
- Q. VII. What kind of evidence does the Department of Justice call for in cases pending in the Court of Claims for payment for stores and supplies alleged to have been taken by the Union army during the rebellion?

Q. VIII. For what purposes are the custom-house records and files from the year

1789 to 1801 now in the custody of the Treasury Department?

- Q. IX. What purpose is subserved by the preservation in this Department of the books and papers known as the "Confederate archives?"
- Q. X. What authority has the Secretary to consider an offer to compromise any civil or criminal suit arising under the internal-revenue laws?
- Q. I. What is done by your division before it gives a final receipt to the Bureau of Engraving and Printing for cigars, cigarettes, liquor, and opium stamps?

Q. II. How are the above stamps forwarded to customs officers?

Q. III. For what purpose are the above stamps used? Q. IV. What records are kept in your division of the above stamps, and what reports are required?

Q. V. What freight bills and what authorizations for expenditures does your division act upon?

Q. VI. What references are now signed by the chief of your division?

Q. VII. What advantage is there in having letters—manuscripts and others your division copied (written) into a book in that division?

Q. VIII. What are the principal matters treated in above correspondence?

2. IX. What letters other than manuscripts are copied into blank books in your division?

Q. X. What "form letters" in your division are simply press-copied in books?

Q. I. What desirable results are obtained by the Department purchasing stationery in bulk and issuing it to officers instead of permitting each officer to buy his own supplies ?

. II. What results are obtained by the Department printing and issuing books

and blanks to customs officers?

Q. III. Are specific appropriations for stationery made for the entire Department, including "outside offices," or is the Department reimbursed from the general appropriations of outside (of Washington) offices for stationery issued to them?

Q. IV. To whom are awards for furnishing stationery made—to the lowest bidder

on all the items aggregated, or to the lowest bidder on each article?

Q. V. What exception is there to the general rule that the Public Printer shall furnish both material and labor in filling requisitions; or, what material does the Department furnish that officer to be printed upon and returned?

Q. VI. After a requisition has been made on the Public Printer, what must that officer submit and the Department approve before any expense can be incurred?

Q. VII. What is done with bills for printing, etc., sent to your division by the

Public Printer?

O. VIII. What must be obtained from the Secretary before an advertisement can

be legally published in a newspaper for the Department?

Q. IX. Are appropriations now made for the Secretary's office as a whole, or for divisions separately?

Q. X. Which Assistant Secretary has direct supervision of the work of your divi-

sion?

Q. I. In what manner is stationery sent to Treasury officers outside of the city of Washington?

Q. II. In what manner are blank forms and blank books sent to officers of the cus-

toms service?

- Q. III. How is the greater part of the stationery received and used by the Depart-
- ment purchased?
  Q. IV. Before stationery is placed in stock, what is required to be done with it?
  Q. V. What steps are taken, and how often, to ascertain the condition and value of the stock on hand?

Q. VI. What is the regulation in regard to shipping ink and mucilage? Q. VII. In what manner are customs eigar and liquor stamps shipped to customs

officers?

Q. VIII. When a requisition is received from, say, the Treasurer of the United States, for stationery, give the usual manner of filling it from the time received till it is ready to be recorded.

Q. IX. When a requisition is received from, say, the collector of customs, New York

City, for stationery, give the manner of filling it from the time received till it is ready

to be recorded.

- Q. X. When an officer denies having received, say, for instance, one dozen penholders, which it is claimed were sent, what proof can the division present that the articles were sent?
- Q. I. What are the duties performed in the Records, Files, and Mail Division of the Secretary's office?
- Q. II. What classes of papers are charged to the Customs Division for action?
  Q. III. To what division are papers pertaining to the bonding of railroad lines, for the transportation of merchandise in bond, sent for action?

Q. IV. To what division are applications for duplicate checks sent?

- V. Give as nearly as you can the organization of the office of the Secretary of the Treasury and the duties pertaining to each division.
- VI. Where would you refer a letter in regard to the transportation of goods in bond ?
- Q. VII. What disposition is made of the letters charged to the various divisions of the Secretary's office after having served their purpose?

Q. VIII. Where are all press copies of letters originating in the Secretary's office filed; what course is pursued in regard to them?

Q. IX. Where is the final resting place of all copies (written or press) of letters

originating in the Secretary's office?

- Q. X. A letter is received relative to counterfeiting the paper money of the United States, and the circulation of spurious gold and silver coins; to what officer should it he referred for direct action?
- Q. I. To what divisions of the Secretary's office are compromise cases sent, and what class to each?
- Q. II. To what division are requisitions for flags for public buildings and revenue boats for use of collectors of customs sent?

Q. III. To what office would you refer a claim for bounty?
Q. IV. Where would you send a letter from the Secretary of State advising this
Department of the receipt by him of information from the United States consulat Timbuctoo that cholera had broken out there?

Q. V. A letter is received making inquiries relative to the service of a soldier in

the war of 1812; to what office should it be referred?

Q. VI. A letter is received relative to the expenses of the World's Columbian Ex-

position,; to whom should it be referred?

Q. VII. A letter is received relative to the amount of money paid to seamen on account of prize money paid for the destruction of one of the ships of an enemy during one of the wars of the United States; to what office should it be referred?

Q. VIII. A letter is received relative to the distinctive paper on which United States securities are printed at the present time; to whom should the letter be re-

ferred for direct reply?

Q. IX. A letter is received relative to the changes in the weights of the gold and

- the silver dollar; to whom should it be referred?

  Q. X. A letter is received to the aggregate cost of the war of the rebellion as shown by the books of the Department; to whom should it be referred for reply?
- Q. I. Name three of the appropriations under the control of the Chief Clerk, Treasury Department?

Q. II. After the revision of accounts by the First Comptroller, to what office are

they sent for file?

- Q. III. When a citizen writes to the Treasury Department inclosing the required amount for a passport to travel abroad, to whom should it be referred?
- Q. IV. To whom would you send a request for necessary repairs to buildings in this city occupied by Treasury officials?

- Q. V. By whom are national-bank examiners appointed? Q. VI. Who has supervision of matters pertaining to the clearance, entrance, and admeasurement of vessels?
- Q. VII. What division has supervision of matters relating to the importation and deportation of Chinamen?

Q. VIII. Why is a requisition for a safe for use of customs officers, occupying

rented buildings, sent to the Appointment Division?

- Q. IX. Under regulations now in force, to what division would you send an application from a customs officer for authority to incur an expense for post-office box rent?
- Q. X. When the Commissioner of Internal Revenue recommends the return of money deposited in offer of compromise, to what division should it be charged on the books of the Mail and Files Division?
- Q. I. Where would you send a requisition from a collector of customs for a national flağ 🤋

Q. II. What class of papers are referred to the Bureau of Immigration?

Q. III. When a call is made by the Court of Claims for information as to the loy-

alty of a claimant, to what division should it be referred?
Q. IV. Does the First or Second Comptroller revise the accounts passed by the

Second and Third Auditors?

Q. V. Who audits the accounts for the transportation of destitute American sea--men 🖁

Q. VI. In what office are filed the omeral bonds of the comparative Q. VII. What division is charged with the examination of reports of comparative

tests of sugar by the polariscope?

Q. VIII. Out of what appropriation would a bill be payable for water furnished for use of the court-house and post-office in New York?

Q. IX. A letter is received reporting that goods have passed through a custom-house at an undervaluation; where should it be referred?

- Q. X. To whom would you refer a letter from a United States consul notifying the Secretary that he has drawn on him on account of salary?
- Q. I. What office would authorize the purchase of scales for the use of customs officers?
- Q. II. What division has supervision of matters for the detection and prevention. of frauds?
- Q. III. What division authorizes an assistant treasurer to purchase coin scales for his office?
- Q. IV. When a merchant appeals from the decision of a collector of customs in assessing excessive duty, to what division is the appeal charged?

Q. V. Under whose supervision is the Report of Commerce and Navigation prepared?

Q. VI. Name two of the appropriations under the control of the Supervising Architect.

Q. VII. What division furnishes officers under the control of the Treasury Department with the Official Register of the United States?

Q. VIII. In what bureau is the list of merchant vessels prepared?

Q. IX. What division affixes the Treasury seal to papers prepared by the Department for authentication?

Q. X. What office should investigate the matter of steamboat collision occurring on inland waters through the negligence of the officers of the vessel?

Q. I. Name the divisions in the office of the Secretary of the Treasury.

Q. II. What division has charge of matters pertaining to the bonding of warehouses for the storage of dutiable merchandise in bond?

Q. III. What division has charge of questions relating to appointments and re-

movals?

Q. IV. What division has charge of questions relating to the sale, purchase, and

redemption of Government bonds?
Q. V. What division is charged with the prevention and detection of frauds on the customs revenue?

Q. VI. When can an officer of the United States receive special compensation for services relating to seizure of imported merchandise?

Q. VII. When can a person not an officer of the United States receive special compensation in relation to frauds on the revenue?

Q. VIII. In what division are estimates of appropriations prepared for the use of

Congress ?

- Q. IX. When an importer of merchandise claims that he has paid more duties than the law requires, and appeals to the Secretary for redress, what division passes upon the subject?
- Q. X." By whom and under whose instructions are examinations of books and accounts of collectors of customs made?
  - Q. I. How should a letter to the President of the United States be addressed? Q. II. How should an official letter to the Secretary of State be addressed?
- Q. III. What officers are under the direction of the Supervising Special Agent? Q. IV. What is first done with the official reports received in the Division of Special Agents?

Q. V. After action has been taken, what is done with the reports?

 $ilde{\mathbf{Q}}$ . VI. What is done with a report from a special agent relating to the business of other divisions

Q. VII. What disposition is made of press copies of letters sent out? Q. VIII. What is done in the Division of Special Agents with bonds of common carriers which have been approved?

Q. IX. How many classes of bonded common carriers are there? Name them.

Q. X. How are bonded cars secured?

- Q. I. What officers are under the direction of the Division of Special Agents? Q. II. How many special agents are there, and what is their compensation?
- Q. III. What action will be taken in the Division of Special Agents on a report of misconduct of a customs officer?

Q. IV. What is done with press copies of letters in the Division of Special Agents?
Q. V. What are the bonded warehouses?

 $ilde{\mathbf{Q}}$ . VI. What is the difference between warehouses of class 2 and those of class 3?

Q. VII. What are manufacturing warehouses? Q. VIII. What officers have charge of bonded warehouses, and how are they com-

pensated? Q. IX. What are bouded common carriers?

Q. X. How many classes of bonded common carriers are there?

Q. I. Describe the duties of special agents of the customs service.

Q. II. When merchandise is seized by special agents, what disposition do they make

of the goods?

Q. III. In what manner may an importer be relieved from payment of duties on goods destroyed by accident while in bond?

Q. IV. In the event of the loss of checks for salary while in transmission through

the mails, what proceedings are required before duplicate checks are issued?

Q. V. Which of the accounting officers of the Department audit accounts of customs officers?

Q. VI. When can special compensation for services relating to seizure of imported merchandise be paid to customs officers?

Q. VII. What is necessary to secure free entry of domestic goods exported and returned to the United States?

Q. VIII. The duty on cigars is 25 per cent ad valorem and \$4.50 per pound. What would the duties amount to on a consignment of cigars purchased for \$65 per M and weighing 14 pounds per M?
Q. IX. What protection other than the bond of the proprietor of the warehouse

has the Government for duties due on imported goods stored in warehouse?

Q. X. What division of the Secretary's office has supervision of the expenditures under the appropriation for defraying the expenses of collecting the revenue from customs?

Q. I. Name the several bureaus of the Treasury Department.

Q. II. What are the duties of the Customs Division of the Secretary's Office, and of the office of the Commissioner of Customs?

Q. III. What is the difference between bonded warehouses of classes 3 and 6? Q. IV. What action is taken in cases where special agents discover deficits in the

accounts of collectors of customs.

Q. V. Should a special agent report that commerce on navigable waters is obo

structed by a corporation or firm, what action would be taken on said report?
Q. VI. What are the conditions specified in the bonds of common carriers of du-

tiable goods in bond?

Q. VII. How many classes of bonded warehouses are there, and what are the means of supervision exercised over them by the Treasury Department?

Q. VIII. What classes of officers are under the direction of the Division of Special

Agents?

Q. IX. How often, under the regulations of the Department, are examinations of custom-houses required to be made by special agents?

Q. X. What is the scope of such examinations and in what manner are the reports thereon made up?

Q. I. By what authority are ports of entry or delivery created?

Q. II. Upon what conditions are Chinese permitted to enter the United States? Q. III. When Chinese are found to be unlawfully in the United States what disposition is made of them?

Q. IV. Name eight of the principal ports of entry and a similar number of ports

of delivery.

Q. V. What is the official title of the chief customs officer at Omaha, Nebr. Q. VI. How is the dutiable value of imported merchandise ascertained?

Q. VII. If an importer is dissatisfied with the appraisement of his goods, what

remedy has he? Q. VIII. What is meant by the classification of merchandise under the tariff laws?

- Q. IX. By whom is such classification made primarily?
  Q. X. If an importer is dissatisfied with the classification so made, what is his remedy?
- Q. I. Where are the checks used by the disbursing officers of the Treasury Department printed?

Q. II. How is the paper on which disbursing officers' checks are printed distin-

tinguished from plain paper?

- Q. III. Name the places at which the disbursing clerk of this office has funds on deposit
- Q. IV. A clerk of Class E (\$1,000) was appointed November 3, 1889, and was promoted to Class 1 November 12, 1889, and to Class 2 November 27, 1889?

  Required: His pay for November, 1889. (Use table.)

  Q. V. A clerk of Class 4 was absent during November seven days without pay.

- Compute his salary for the month with a pay table.
- Q. VI. How does the disbursing officer obtain his funds for the payments made
- through his office?

  Q. VII. Name five bureaus the clerical force of which is paid by this office?
- Q. VIII. Name the different kinds of money used by this office in its official payments, besides gold notes.
- Q. IX. How is the paper on which silver certificates are printed distinguished from
- the United States check paper?
  Q. X. What officers of the Treasury Department audit and revise the pay rolls of the clerical force paid by this office?
- Q. I. In case of a lost check, what steps should be taken by the party in interest to procure a duplicate.

Q. II. What course is taken by the Department previous to the issue of duplicate

check ?

Q. III. The disbursing clerk has \$10,000 on account of a certain appropriation; he disburses \$750 and deposits \$25 to the credit of the appropriation to meet an account referred to the Auditor for settlement. State the account on the accompanying blank, and use the additional accompanying blank.

Q. IV. How often are accounts rendered by the disbursing clerks? Q. V. What process do accounts pass through before final settlement, and where are they finally filed?

Q. VI. Take the accompanying account of checks paid by the assistant treasurer

at (

( ), and examine the reported balance.
Q. VII. Fill the accompanying blank pay receipts; one for an advance of \$35, and one for twenty-seven days' pay of a second-class clerk for November, 1889, and show the process by which the roll is prepared for payment.

Q. VIII. In case of an erasure or alteration of a check by a disbursing officer, what

action is taken by him?

Q. IX. Where are the checks issued by the disbursing clerk of this office finally

Q. X. Upon what authority and upon whose approval are payments made to the clerical force of the Coast and Geodetic Survey?

Q. I. Give titles and uses of blanks provided by the Chief of the Secret-Service Division for the use of employés (limited to lettered forms).

Q. II. Give names of cities known as headquarters of officers in charge of districts,

exclusive of Washington, D. C.

Q. III. Upon what character of work may agents expend money and expect reimbursement from the appropriation made by Congress for sustaining the operations of this division?

Q. IV. How many kinds of circular letters are printed giving information to the public? Give a general outline of the information the circular contain

Q. V. Name the titles of the employes in the field?

Q. VI. To whom do agents having charge of districts report? How often and through what medium? What time and subjects should be embraced in each report? What matter must not be reported, and what final disposition is made of all such reports?

Q. VII. To whom do agents not having districts in charge report and what use is

made of such reports?

Q. VIII. State how agents in the field are held responsible for counterfeit notes, coin, and other property taken by them from criminals or surrendered to them by other persons?

Q. IX. What is the final disposition of all counterfeit notes and coin coming into

the possession of the Government through the medium of this division?

Q. X. How are the accounts of the agents made up and prepared for the approval of the Assistant Secretary?

Q. I. State what rules should govern in indexing reports.

Q. II. What other information should be noted for the records?

Q. III. Should an operative be unable to write his reports or accounts, who may

be requested to write the same for him?

Q. IV. If a person makes counterfeit money in the western district of Pennsylvania and is arrested in the southern district of New York with counterfeit money in his possession, in what district should he be indicted, and for what offense?

Q. V. If you were detailed to make an investigation for the Treasurer of the United States, to whom would you address your report and what expenses would you

embody in said report?

Q. VI. When a record is incomplete in some of its details, what are the duties of

the record clerk in such a case?
Q. VII. "Facts known, and alleged of life record," what information would you enter under this heading in "Description and information of criminals?"

Q. VIII. When is the criminal record of a person finally closed in our books?
Q. IX. A person not already indicted is arrested in the act of making counterfeit money by an agent of this service; recite agent's proper action in the case from time

of arrest up to day of trial. Q. X. Fill the accompanying blank form "A" with the details of a supposititious

Q. I. State what rules should govern in indexing reports.
Q. II. What other information should be noted for the records?

Q. III. An informer purchases for evidence from John Brown in St. Louis, Mo., twenty counterfeit silver dollars; Brown is subsequently arrested in New Orleans, La., for the offense of selling counterfeit money. In briefing inventory of the property what district and State should be entered as the place of trial and what crime charged?

Q. IV. An inventory of counterfeit money shows that the same was purchased of John Doe by Richard Roe, and by Roe turned over to Operative Abbott, who in turn delivers the evidence to United States Attorney Shields. In entering this inventory in the "Index of inventories of property," what names should be used?
Q. V. After the above entry has been made, what names should be checked thus?
Q. VI. How many pages should constitute a volume of an operative report?

Q. VII. If an operative's report should be written by a hand unknown to you, what would be your duty in the premises?

Q. VIII. What disposition would you make of original correspondence addressed

to operatives accompanying their reports when not needed for filing in chief's office?
Q. IX. For what purpose is the "Register of peculiar marks of criminals and sus-

pected persons" kept?

Q. X. What suggestions have you made for improving the methods employed in performing the official duties which specially engage your attention?

## SUPERVISING ARCHITECT.

Q. I. For what purpose are inverted arches used in foundations?

Q. II. State the approximate thickness at bottom of a retaining wall sustaining a bank of loose earth 18'-0" high.

Q. III. Describe briefly the construction of a fireproof building. Q. IV. Two forces of 6 tons each are exerted at right angles against a point. What amount and direction of force is required to keep the point in equilibrium?

Q. V. For what strains must a truss rafter be calculated on which the purlins rest at intermediate points between joints?

Q. VI. What lead is generally allowed on good brickwork?
Q. VII. What form takes the equilibrium curve of a girder uniformly loaded?

Q. VIII. A rectangular wooden beam is to be cut in the middle to allow the pas-Where would you cut the beam, at top, middle, or bottom?

Q. IX. A wooden beam, 4 inches wide by 6 inches deep, carries safely a center load 700 pounds. What center load will a beam of the same material, 4 inches wide by 12 inches deep, carry?

Q. X. What is the maximum deflection allowed in floor beams which carry a plas-

tered ceiling underneath?

Q. I. A beam is loaded in center with 50 tons; how much will another beam of the same section material and span bear, if the load is equally distributed and the factor of safety is 4?

Q. II. The effective load of a column is 16 tons, 5 feet from support (A) upon a beam, what will be the transmitted load on (A) and (B) from same, no other load

being considered, the span being 20 feet?

Q. III. Draw a cast-iron base, or shoe, or lug, to spread or distribute a heavy load on granite cap of a brick pier without calculating thickness of iron, when it is necessary to have the bottom plate 4 feet square and 2 inches thick, and the column resting on it being 20 inches diameter with 2 inches shell thickness; draw plan, elevation, and section in ‡" scale.

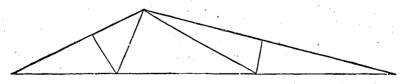

Q. IV. Draw a sketch in pencil of a gargoyle, in 1" scale.
Q. V. Draw a sketch in pencil of a wrought-iron finial, 4 feet high, in 1" scale.

Q. VI. Draw a sketch by free-hand of a dormer window directly in perspective,

without constructing it in perspective.

Q. VII. Construct in accidental perspective a single point located 50 feet above the perspective horizon, 30 feet from the picture plane, and 10 feet to the right of a line at right angle to the picture plane in plan drawn from the point of sight, thus. Either construction, with or without ground plan, will be accepted if correct. (Scale, 16 feet to 1 inch.)
Q. VIII. Mark with red ink all members of the truss (diagram below) which are

under compressive strain.

Q. IX. If a column, which has a shell of 20 square inches sectional area, is to rest upon a plate girder, of which the webs are 3" thick each, what provision will you make on the girder for a safe support.

- Q. X. Draw a sketch by free-hand of a column bearing the Tuscan character. (It is not required to draw it exactly according to the measurements of Vitruvius or Vignola.)
- Q. I. When was the force of employés in the office of the Supervising Architect placed within the operations of the civil service rules and regulations?

Q. II. From what branch of the Federal Government is authority derived for the construction of public buildings under the control of the Treasury Department?

Q. III. In what Federal officer's the authority vested for the construction of a public building under the control of the Treasury Department?

Q. IV. Under what authority does the Supervising Architect act in matters pertaining to the construction of public buildings under the control of the Treasury Department?

Q. V. Under the supervision of what chief of division of what Department are estimates for appropriations classified, compiled, indexed, and printed before they

are transmitted to Congress?

Q. VI. Through what Federal officer are all estimates for appropriations trans-

mitted to Congress?
Q. VII. When does a specific appropriation for work on a public building under the control of the Treasury Department become available?

Q. VIII. When does a "general appropriation," such as for repairs and preserva-

tion of public buildings, become available?

Q. IX. After acquisition by the United States of title to land for a site for a public building, under the control of, the Treasury Department, what must be done before expenditures can be made on account of the appropriation for the construction of the building?

Q. X. Before an award of contract is made by the Supervising Architect under proposals received through invitation by public advertisement, what must be done?

Q. I. How wide should the concrete course be to support a wall which transmits a load of 15 tons per lineal foot, when the ground will resist safely a pressure of 2 tons per square foot?
Q. II. How thick should a brick wall be if the brickwork resists safely 9 tons per

square foot?

- Q. III. Draw a section showing connection of such a wall with concrete course, in 1-inch scale.
- Q. IV. If there are two stories in a building, of which one is to be decorated with Doric and the other Corinthian columns, one over the other, where would you place the latter?

Q. V. What should be the least fall in a vitrified drainpipe? Q. VI. Show by sketch or plan how you would bond every fifth course of face brick, all courses to show stretches.
Q. VII. Show part of elevation with Flemish bond (brickwork).
Q. VIII. How thick at the least should the brickwork backing be for a wall with

stone ashlar facing?

Q. IX. How should the total of weights of a sash compare with the weights of the

sash when finished and glazed?

- Q. X. What should be the greatest width of tongued, grooved, and blind nailed flooring?
  - Q. I. Name the classical Greek orders. Q. II. Define "Entablature."

- Q. III. What proportion should the height of a Corinthian column bear to its diameter?
- Q. IV. Should the horizontal or perpendicular lines predominate in a Gothic design?
  - Q. V. What are the principal characteristics of the French Romanesque style? Q. VI. Which of the three forms of arches exerts the greatest thrust and which
- the least, semicircular, segmental, or pointed?
- Q. VII. How many bricks are contained in a brick pier 4 feet square and 10 feet
- high, and about what will be the cost to build such a pier?
  Q. VIII. To what depths should the heads of piles be sunk for foundations of a permanent structure?

Q. IX. Give ingredients of good concrete; also their proportions.

- Q. X. Should there be ventilation provided on a running trap on main house drain? If so, on the house side or the sewer side?
  - Q. I. Inertia of a 12-inch I beam is 264 tons. Calculate moment of resistance.
- Q. II. Define "Radius of gyration," and state in calculation for what structural members is the same special value.

Q. III. A brick dome 40' 0" diameter exerts a thrust of 1 ton per linear foot against supporting wall. Give area of cross section of iron ring required to counteract that thrust, allowing 6 tons fiber strain per square inch.

Q. IV. A continuous girder over two spans, each 20' 0", carries a uniform load of tons per linear foot. What is the reaction at central support and at each end sup- $1\frac{1}{2}$  tons per linear foot.

port?

Q. V. What is the bending moment in center of girder, 20'0" span, 2'0" high, supporting a uniformly distributed load of 32 tons?

Q. VI. What is the tension in lower flange of said girders?
Q. VII. Is a parabolic arched rib-hinged at abutments and loaded uniformly horizontally subject to any bending moment? Give reason.

Q. VIII. What is the horizontal thrust of an arch 50' 0" span and 10' 0" rise, hinged

at abutments and crown, and loaded with 20 tons in center?

- Q. IX. What stresses must pins be calculated to resist?
  Q. X. Where is the maximum bending moment in a semicircular arch loaded uniformly horizontally?
- Q. I. In what division of the office of the Supervising Architect are all contracts, "bonds for accepted proposals," leases, and other legal papers prepared?

Q. II. How many copies of each formal "contract and bond" are prepared?

Q. III. To whom is each of the several copies of each formal "contract and bond" sent after the same shall have been satisfactorily executed?

Q. IV. How many copies of each "bond for accepted proposal" are made?
Q. V. What disposition is made of each of the copies of each "bond for accepted proposal?"

Q. VI. What two officers engaged upon a building in course of construction are required to give bond for the faithful performance of their official duties?

Q. VII. After the disbursing agent's bond shall have been executed and approved,

to what officer of the Treasury Department is it referred for file?

Q. VIII. When competitive proposals have been invited and the bidders are required to submit certified checks with the proposals, and the proposals and checks are received at the office of the Supervising Architect, to whom are the certified checks handed for receipt and record?

Q. IX. When an acceptance of a proposal is made in a case where competitive proposals have been required to be submitted with the proposals and a formal bond, or a formal "contract and bond," is not required by the letter of acceptance, what action is taken in regard to the certified checks submitted with the proposals of the unsuc-

cessful bidders and the proposal of the successful bidder?

- Q. X. When an acceptance of a proposal is made in a case where competitive proposals have been received, and certified checks have been required to be submitted with the proposals, and the letter of acceptance requires a formal bond or a formal "contract and bond," what action is taken in regard to the certified checks submitted with the proposals of the unsuccessful bidders and the proposal of the successful bidder.
- Q. I. In what division of the office of the Supervising Architect are all letters of authority for expenditures from general appropriation (Repairs and Preservation of Public Buildings, etc.) prepared

Q. II. In what way would the custodian of a public building proceed to make payment for repairs to the building in his custody?

Q. III. What form of voucher would the custodian use for payment for authorized

repairs, chargeable to a general appropriation?

Q. IV. What action is taken at the Department upon receipt of a voucher certified

by the custodian, for repairs to a public building?

Q. V. After a voucher for general repairs has been approved, how is the payment made ?

Q. VI. When the custodian receives this letter what action does he take? Q. VII. What is the form (number) used in transmitting to public creditors checks issued in payment of vouchers for work upon completed public buildings?

Q. VIII. On what public depositary are checks of the disbursing clerk drawn in payment for repairs to public buildings?

Q. IX. How does the examiner of a voucher, received in the Supervising Architect's office, know that payment of the amount has not already been made?
Q. X. What is meant by a "general annual appropriation?"

Q. I. What division of the office of the Supervising Architect is charged with the registration, classification, filing, and safekeeping of all official papers received?

Q. II. By whom are all official papers received each day, marked for distribution to the several divisions of the office, to the work of which said papers relate, respectively, and then sent to the "Records and Files Division" for record and such distribution?

Q. III. After all official papers received each day are properly marked to the divisions to which they respectively belong, and sent to the "Records and Files Division." what is done with them?

Q. IV. How is an official letter received about a particular public building briefed? Q. V. After an official letter is so briefed, how is it registered on the "Register of

Letters Received?'

Q. VI. If a letter does not relate to any particular public building, how is it registered on the "Register of Letters Received?"

Q. VII. How are all letters received pertaining to different public buildings filed? Q. VIII. What class of letters, or letters relating to what subjects, are sent to the "Law and Contract Division?"

- Q. IX. What official papers (not letters) received each month from a superintendent of construction of a public building in course or construction, are sent to the "Construction Division?"
- Q. X. To what division are the "Lock-box-key Accounts" from custodian of public buildings sent?

Q. I. What is the official designation of an officer at a new public building in course of construction?

Q. II. What is the designation of the corps of clerks, foremen, watchmen, etc.,

allowed such an officer?

Q. III. What is the designation of the officer at a public building in course of construction who makes payments for labor and materials supplied in connection with the construction of the building?

Q. IV. What officer of the Treasury Department signs letters appointing superintendents of construction and appointing disbursing agents of public buildings?

Q. V. What officer of the Treasury Department signs letters authorizing superintendents of construction of public buildings to employ clerks, foremen, watchmen, etc., at the building?

Q. VI. What officer of the Treasury Department signs letters advising disbursing agents of public buildings of authorities given to the superintendents of construction of public buildings to employ clerks, foremen, watchmen, etc., at the building and authorizing him to make payment for such service?

Q. VII. What are the titles of the official papers which a superintendent of construction of a public building in course of construction is required to prepare and

submit each month?

Q. VIII. For what periods are superintendents of construction of public buildings authorized to employ clerks, foremen, watchmen, etc.?

- Q. IX. In what division of the office of the supervising architect are the ledgers of "Appropriations and Available Balances" kept? Q. X. In what division of the office of the Supervising Architect are the weekly "Balances of Appropriations Available" prepared?
- Q. I. How many copies of a "Bond for Accepted Proposals" are made in each case?

Q. II. How many copies of a "Contract and Bond" are made in each case?

Q. III. To what office is the original of each "Bond for Accepted Proposal," and the original of each "Contract and Bond" sent for file?

Q. IV. What copy of each "Contract and Bond," is filed in the office of the Super-

vising Architect? Q. V. What copy of each "Bond for Accepted Proposal" is filed in the office of the Supervising Architect?

Q. VI. How many sureties are required to be furnished on each bond? Q. VII. What officer of the Supervising Architect's office, and what officer of the Treasury Department, examine bonds, leases, contracts and bonds, as to form and execution ?

Q. VIII. What officer of the Treasury Department approves all "Bonds for Accepted Proposals," and "Contracts and Bonds," in connection with work on public buildings!

Q. IX. In what division of the office of the Supervising Architect are all matters pertaining to the receipt, registration, custody, and return of certified checks, submitted with proposal for work on public buildings, attended to?

Q. X. What officer of the Supervising Architect's office signs the certificate as to the correctness of the "certified copy" of a "Contract and Bond," after the original instrument is executed and approved?

Q. I. In what division of the office of the Supervising Architect are the specifications for work on public buildings under the control of the Treasury Department prepared under the direction of the Supervising Architect?

Q. II. After a specification for a particular branch of work in a public building is approved by the Supervising Architect, in what division and by what process (name only) are the required number of copies made?

Q. III. What three papers are always attached to each copy of a specification for work on a public building?

Q. IV. Is there any rule prevailing in the office of the Supervising Architect about prescribing a time within which parties obtaining copies of specifications and drawings for work on a public building for the purpose of submitting competitive pro-

posals must return them; and, if so, in what paper is such time always stated?
Q. V. Under the rule adopted in the office of the Supervising Architect since July 15, 1891, for what amount must a certified check be that is submitted with a compet-

itive proposal for work on a public building?
Q. VI. To whose order are all certified checks submitted with competitive proposals for work on public buildings, required by the "General Instructions and Conditions," to be drawn? tions," to be drawn?
Q. VII. What officer of the Treasury Department is the only officer of the Treasury

who has authority to authorize the publication of advertisements for proposals?

Q. VIII. What chief of division in the office of the Supervising Architect is the only person authorized to receipt for, and have custody of, certified checks submitted with proposals for work on public buildings?

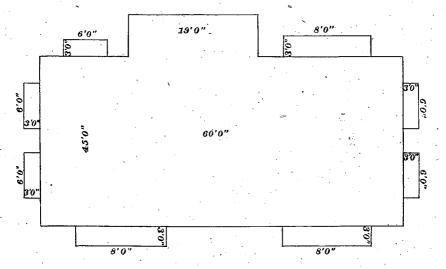

Q. IX. When proposals are received for work on a public building what must the

Supervising Architect do before he can accept one, or reject all, of the proposals?

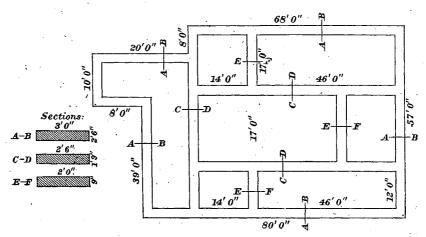

Q. X. After a letter is received and answered, to what division of the office of the

Supervising Architect is it sent for safe-keeping?

Q. I. Find the quantity of excavation, in cubic yards, as per diagram, ground assumed to be level, general excavation 5'3" deep, window areas 3'9" deep; also cost of same at 42½ cents per cubic yard.

 $\,$  Q. II. Find cubic yards of concrete as per plan below, and cost of the same at \$6.40 per cubic yard.

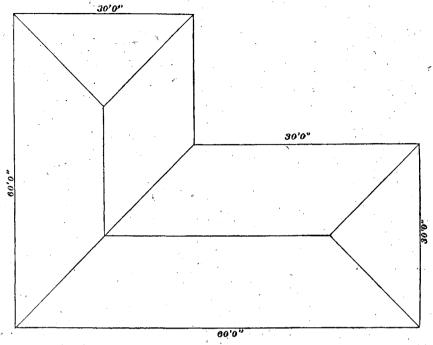

Q. III. In the basement of a building there are 346 linear feet of wall, 2' 2" thick; 754 linear feet, 1' 5" thick; 978 linear feet, 1' 1" thick; all 9' 8½" high. Find number of cubic feet of brickwork, also number of bricks at 20 to a cubic foot, and cost of same at \$43.50 per M

of same at \$13.50 per M.
Q. IV. Find cost of stone, belt course, as per section below, at the rate of \$2.37 per cubic foot. There are 750 lineal feet.

Q. V. Find total area of the roof surface as per diagram below. Pitch of roof equal to 41" to 1 foot of span.

Q. VI. How many slate  $8'' \times 16''$  laid  $6\frac{1}{2}''$  to the weather will it take to cover roof as per question No. 5, and what will be the cost at \$13.75 per square; double courses at caves and ridges, no allowance for cutting at hips?

Q. VII. What is the cube root of 62,099,136?
Q. VIII. Find cubic feet in stone of following dimensions: 8' 3½'' x 2' 5½'' x 1' 9'';
4' 9½'' x 2' 4½'' x 1' 2½''; and 3' 2'' x 0' 8½'' x 0' 4½''.
Q. IX. Define, in general terms, the work assigned to the Computing Division.
Q. X. Iu brick work what is (a) English bond, and (b) Flemish bond? What bond is generally specified for brickwork for public buildings?

#### FIRST COMPTROLLER.

Q. I. What is an accountable warrant; by whom must it be signed and by whom countersigned?

Q. II. What warrants may be lawfully signed by an Assistant Secretary of the

Treasury?
Q. III. What official papers may the deputy first comptroller lawfully sign in the name of the First Comptroller?

Q. IV. When may services or supplies for the Government be procured without advertising for proposals?
Q. V. When only, and in what manner, may a claim against the United States be

lawfully assigned? Q. VI. Under the decisions of the Supreme Court of the United States and the rulings of the Department, in what cases only may the Comptroller lawfully reopen an account which has been finally settled by a former Comptroller or grant a rehearing thereon?

Q. VII. State briefly the several steps taken in the process of paying a balance found due to an officer of the Government, upon the settlement of his account, after the balance has been certified by the First Comptroller, and where the amount is payable from an appropriation placed by law under the control of the Secretary of the Interior?

Q. VIII. If an officer of the Government, whose bond is filed in the office of the First Comptroller, and whose accounts are settled by the First Comptroller, is in default, in what way does the Comptroller proceed to bring suit, after the accounts of

such officer have been finally settled?

Q. IX. For what payments only may the balance of an annual appropriation, remaining unexpended at the expiration of the fiscal year for which such appropriation was made, be lawfully applied?

Q. X. Define a "statement of differences," as the term is understood by the ac-

counting officers of the Government.

Q. I. Who approves the bonds of receivers of public moneys, and where are they filed?

Q. II. State the several steps taken in the Treasury Department in the matter of the approval and filing of the bond of a Territorial secretary, which has been properly

executed and forwarded to the Secretary of the Treasury?

Q. III. A Territorial secretary deposits with the assistant treasurer of the United States at Chicago, a balance due by him to the United States on his account of legislative expenses, and transmits the original certificate of deposit to the Secretary of the Treasury; state briefly the several steps in the process of covering the amount into the Treasury, and crediting the Territorial secretary therewith upon the Register's books.

Q. IV. In what way does a Territorial secretary obtain an advance of money from the Treasury from an appropriation which he is authorized to disburse? State the

several steps in the process.

Q. V. In what way are deputy surveyors of public lands paid for services rendered

for the Government under surveying contracts?

Q. VI. When does payment of salaries of officers of the Territories of the United States, appointed by the President, commence?

Q. VII. What is the provision of law relating to absence of a Territorial officer

from the Territory and the duties of his office? Q. VIII. For how long a time are governors and secretaries of the Territories ap-

pointed?

Q. IX. What is the limitation of law on expenses of printing for any session of the legislature of any of the Territories?

Q. X. How many supervising inspectors of steam vessels does the law authorize, how are they appointed, and what is the salary allowed by law to each?

Q. I. Which of the accounts does the law provide shall be examined and certified by the First Comptroller?

Q. II. Which of the accounts are examined and certified by the Second Comptroller

of the Treasury?

- Q. III. By what auditor are accounts accruing in and relative to the Department of State settled? Q. IV. What officer in the Treasury Department is the general bookkeeper for ac-
- counts which are examined and certified by the First Comptroller? Q. V. What officer in the Treasury Department is charged by law with the safe-

keeping and paying out of the public moneys?

Q. VI. What is the lawful authority and direction to the proper officer of the

United States upon which he pays out moneys from the Treasury? Q. VII. What does the Constitution of the United States provide respecting the

payment of money from the Treasury?

Q. VIII. State briefly the several steps pursued in the Treasury Department in the payment of a balance found due on an account which has been examined and certified by the First Comptroller and direction for payment has been given in the Comptroller's certificate.

Q. IX. How long does an annual appropriation remain available upon the books of the Treasury Department before it is carried to the surplus fund by operation of

Q. X. In the settlement of an officer's account by the accounting officers of the Treasury, what voucher or certificate is filed with the account, showing the balance found due to or from the United States on the previous settlement of the same officer's account, as certified by the First Comptroller?

Q. I. Give a statement in detail of the class of accounts examined and settled in the Division of Judicial Accounts.

Q. II. What is required as a prerequisite to the presentation of an account to the Treasury Department for payment by a marshal? District attorney? Clerk of circuit or district court? Circuit court commissioner?

Q. III. What provision is made for the payment of expenses incurred by ministerial officers in executing the laws of the United States, the payment of which is not

specifically provided for?

Q. IV. With what sums should a marshal charge himself in his account current? For what does he claim credit? How are the several items checked and verified by the accounting officers?

Q. V. What officers of United States courts are paid salaries in full for all services? What officers receive their compensation in fees and salaries?

Q. VI. What is the maximum compensation allowed by law to a marshal?

trict attorney? Clerk of a circuit or district court?

Q. VII. Where suit is instituted against a delinquent official and the sureties on his bond, to what officer does the Comptroller forward transcript of accounts? Q. VIII. On what branch of the Government are balances certified by the Comptroller

conclusive? By what branches only are such balances subject to revision?

Q. IX. Under what circumstances may the Comptroller direct the auditors to state an account?

Q. X. What is a Treasury statement of differences, and what its purpose?

Q. I. By whom are the governors and secretaries of the Territories appointed, and for what length of time?

Q. II. What official of the Treasury Department approves the bonds of Territorial

officers?

Q. III. In what department of the Government and in what bureau are the bonds of Territorial officers filed?

Q. IV. In what office of the Treasury Department are the accounts of Territorial officers stated, and what bureau has the final revision of the same?

Q. V. What is necessary for a Territorial officer to do in making application for his salary?

Q. VI. In case of death, resignation, absence, or removal of the governor of a Territory, who acts as governor?

Q. VII. Where does the law require that Territorial officers shall take the oath of

office, and when do the salaries of such officers begin?
Q. VIII. What officer superintends the administration of the steamboat-inspection

laws, and under whose direction?

Q. IX. In what office of the Treasury Department are the accounts for expenses of the steamboat-inspection service stated, and what bureau certifies them for pay-

Q. X. By what official of the Government are the bonds of steamboat inspectors approved, and in what bureau are they filed?

- Q. I. What are the principal articles subject to tax under the internal-revenue laws?
- Q. II. What amount of tax must be paid on a barrel of whisky containing 40 proof gallons?

Q. III. How long does the law provide that distilled spirits may remain in a distillery warehouse without payment of tax?

Q. IV. What is the maximum limit of salary allowed to collectors of internal revenue

Q. V. What is the highest compensation allowed to internal-revenue gaugers? Q. VI. By whom are internal-revenue gaugers paid?

Q. VII. How many internal-revenue agents are authorized by law?

Q. VIII. By whom are internal-revenue agents appointed?

Q. IX. What number of sureties are required upon the bond of a collector of inter-

Q. X. What limitation is fixed by law as to the time in which claims for refunding taxes illegally collected may be presented to the Commissioner of Internal Revenue?

Q. I. With what duty are warrant clerks charged?

Q. II. Why are warrants issued?

Q. III. Why should warrants be examined in the First Comptroller's office? Q. IV. What is the object of an appropriation warrant? How is the amount which it appropriates posted?

Q. V. What is the difference between a repay covering and a revenue covering

warrant?

Q. VI. What is a surplus fund warrant?
Q. VII. In an appropriation warrant what directions are given to the Register and to the comptrollers?

VIII. What is the basis of an accountable warrant?

Q. IX. On what is a requisition for an accountable warrant based?

Q. X. On what is a requisition for a repay warrant based?

Q. I. What are the titles of land officers in charge of each land district? How are

they appointed and for what period of time?
Q. II. What is the amount of the official bonds of registers and receivers? Where must such officers reside?

Q. III. What other position or appointment is held by a receiver of public money, and by whom is he so designated or appointed?

Q. IV. What is the minimum and the maximum compensation allowed by law to

registers and receivers, and of what does each consist, or how made up?

Q. V. When does such compensation begin? Q. VI. What are the principal appropriations made by Congress for local land offices?

Q. VII. What must be done with the receipts from sales of public lands before a

receiver is given credit in a stated account for such receipts?

Q. VIII. What executive department has control or charge of the public lands, and what offices adjust, state, and certify public land accounts?

Q. IX. What officer directs suits to be instituted for balances due the United States from receivers of public money? What officer is requested to cause such a suit to be instituted?

Q. X. Who is authorized to change the location of land offices to other places in the land districts? Who must recommend, who must approve, and who must order the discontinuance of a land office and the transfer of its business?

Q. I. What accounts are adjusted and certified in the Division of Foreign Intercourse and by which auditor are they stated?

Q. II. What general accounts are diplomatic and consular officers, respectively,

required to keep?

Q. III. What officers are comprehended within the designation "diplomatic officers" and "consular officers," respectively?

Q. IV. How are consular officers divided as to compensation? Q. V. When does the salary of diplomatic and consular officers commence?

Q. VI. By what authority are the fees of a consular officer for official services prescribed ?

Q. VII. What are "official" services in the business of the several legations, consulates, and commercial agencies?

Q. VIII. How do consular officers receive payment of balances due on accounts

rendered by them?

Q. IX. When a diplomatic or consular officer negotiates drafts and receives the proceeds in foreign money, what is the officer required to furnish as evidence of loss or gain by exchange, and what must it show?

. X. In the adjustment of accounts or charges for loss by exchange, what is the method prescribed for determining the value of foreign currency in terms of United

States currency?

Q. I. What is the largest interest-bearing debt of the United States now outstanding, when does it mature, and what rate of interest does it bear?
Q. II. What is the distinction between coupon and registered bonds, and how is

the interest on them paid?

Q. III. What vouchers are submitted to this office by which the Treasurer of the United States obtains credit on the books of the Register for amounts of legal-tender notes, Treasury notes, gold and silver certificates, etc., withdrawn from circulation because of mutilation, defacement, etc., and destroyed?

Q. IV. In the report of the work done by this division made each month to the

Comptroller, what items are specifically reported?

Q. V. When a request for an advance of public money is made to the Secretary of the Treasury by a disbursing officer, not a disbursing clerk of an executive department, to what officers and with what requests does the Secretary refer the requisition?

Q. VI. Certain certificates of deposit are sent to this division by the Public Moneys Division of the Secretary's office for indorsement and return. What informa-

tion is given by the indorsements made?
Q. VII. What bonds of indemnity are examined in this division?
Q. VIII. If a check signed by a disbursing officer be lost, what time must elapse before a duplicate may be issued?

Q. XI. What is the largest amount of disbursing officer's check for which a dupli-

cate may be issued without special action by Congress?

Q. X. What is done at the close of each fiscal year with the amounts of moneys that are represented by checks or drafts, which have remained outstanding and unpaid for three years or more?

Q. I. Which department of the Government has authority under the Constitution to coin money of the United States?

Q. II. When and where was the first Mint of the United States established?

Q. III. What officer has the general supervision of the several establishments of the Mint?

Q. IV. What is the unit of value in the coins of the United States?
Q. V. What proportion of gold and silver coins of the United States is required to be of fine metal, and what of all y?
Q. VI. Where are located the our coinage mints?
Q. VII. A deposit of gold bull ion, containing no silver, weighs 50.205 gross ounces after melting; fineness of gold 50 thousandths, base metal 150 thousandths. What is the weight of the standard gold contained, adding to the fine weight one-ninth for the alloy? State also its gress value at the rate of \$18.60\frac{2}{3}\$ (or \$18\frac{2}{3}\frac{2}{3}\$) per standard output

Q. VIII. A deposit of gold bullion containing silver is reported thus: Gross weight 43.25 gross ounces after melting. Fineness of gold .797; fineness of silver .195. What is the standard weight of the gold is to be deducted from the silver to alloy the gold? Q. IX. On the coiner's pay roll a workman is credited with 26 days' regular service and for extra time 9\frac{3}{4} days; e is also debited for lost time 4\frac{7}{4} days, \frac{3}{2}.75 per day. What balance is due the workman is credited for 27 days' regular time at

- Q. X. On the general pay roll workman is credited for 27 days' regular time at \$2.90, and for extra time 11 + days at same rate, \$2.90; is debited for absence 3 + daysat same rate, \$2.90, and is credited for Sundays, 3 days, at rate of \$2.50. How much is due him?
- Q. I. State the different kinds of moneys and securities in the United States Treasury subject to transportation.

Q. II. What express company has, by contract, the agency for transportation of public moneys for the Treasury Department?

Q. III. In giving public moneys at the Treasury for transportation, what by con-

tract constitutes a good delivery to the express company?

Q. IV. What officer of the Treasury has the immediate control of public moneys?

Q. V. What officer of the Department has lawful authority to transfer moneys from public depositories to the Treasury?

Q. VI. Where is the National Bank Redemption Agency established, and who is

the redemption agent?

Q. VII. In what cities are the offices of assistant treasurers of the United States? Q. VIII. What officer of the Treasury receives and examines accounts of transportations of public moneys between the sub treasuries and the Treasury at Washington? Q. IX. What officer receives and examines accounts for the transportation of

moneys from collectors of internal revenue to assistant treasurers or designated depositories?

Q. X. What is the limit of territory determined by contract with the United States Express Company for transportation of public moneys?

#### SECOND COMPTROLLER.

Q. I. Name some of the duties of the Second Comptroller.

Q. II. How is the Second Comptroller appointed?

Q. III. When the Comptroller disallows a claim, what redress has the claimant? Q. IV. State the nature of the accounts received from the Second Auditor for the consideration of the Second Comptroller's office.

Q. V. State the nature of the chief accounts coming from the Third Auditor's

office for the decision of the Second Comptroller.

- Q. VI. Name the accounts received from the Fourth Auditor for the consideration of the Second Comptroller's office.
- Q. VII. John Smith wants a document on file in the Second Comptroller's office. How is he to get it? Q. VIII. Give the names and proper titles of the Comptrollers of the Treasury.
  - Q. IX. What classes of warrants are issued by the Second Comptroller?
  - Q. X. State the requisitions countersigned by the Second Comptroller.
- Q. I. Give dates of five laws granting bounty for services in the war of the rebel-

Q. II. B was enrolled and mustered into service June 16, 1861, as a private in the volunteer force, to serve three years, and was discharged for promotion July 12, 1862. He has received no bounty. State the amount of bounty to which he is entitled and

the date of the act of Congress granting such bounty.
Q. III. An enlisted man of volunteers, who was enrolled January 1, 1862, was honorably discharged December 31, 1862. He drew \$28.40 clothing in kind and his clothing account was never settled. State the amount of clothing money due him at time of discharge.

Q. IV. When did the time for filing claims for additional bounty, act of July 28,

1866, expire?

Q. V. On company pay roll to June 30, 1864, a private of New York volunteers was paid his monthly pay for period from March 1, 1864, to June 30, 1864, inclusive. No allowance for clothing and no stoppages. What amount did he receive?

Q. VI. On what day was the pay for an officer's servant increased to \$16 per

month 9

Q. VII. A captain of infantry volunteers, discharged in October, 1864, was paid travel pay and subsistence for traveling from place of discharge to his home, a distance of 200 miles. What was the gross amount, the internal-revenue tax, and the

net amount paid?

Q. VIII. M was paid the pay and allowances of a second lieutenant of infantry from January 1, 1863, to August 31, 1863, inclusive, and the pay and allowances of a first lieutenant of infantry from September 1, 1863, to April 30, 1864, when discharged. His record was amended under the provisions of the act of June 3, 1884, to show him mustered into service as a first lieutenant to date May 1, 1863. His claim for difference of pay on amended record was settled in June, 1891. No attorney. What was the gross amount of difference of pay, the amount of internal-revenue tax, and the amount of the balance certified as due claimant?

Q. IX. In a claim for arrears of pay, in case of a captain of Pennsylvania Volunteers, an attorney was employed by the claimant and recognized by the Second Auditor and Second Comptroller. The sum of \$346.80 pay was allowed. How much of said sum is due and payable as fees to the attorney?

- Q. X. In a claim for arrears of pay in case of a colored soldier, in which an attorney was entitled to recognition, the sum of \$240.66 pay was allowed and two certificates were issued. State the amount allowed in the certificate in favor of the soldier and the amount allowed in the separate certificate in favor of the attorney.
- Q. I. Give the several steps in the process of registering and recording accounts in this division.
- Q. II. What is shown by the Second Comptroller's certificate, made upon settlement of a disbursing officer's account?

Q. III. How often are Army paymasters required to render their accounts?
Q. IV. When are officers of the Army paid commutation of quarters?
Q. V. What travel allowances are officers, traveling without troops under orders,

entitled to receive?

Q. VI. What is the monthly pay of a private soldier in the fourth year of his enlistment?

Q. VII. What is meant by the term "reënlistment pay?"

Q. VIII. What is continuous-service pay?

Q. IX. What limit was placed upon the adjustment of "Soldiers' Home accounts" by the legislative act of February 26, 1889?
Q. X. What rate of interest does the permanent fund of the Soldiers' Home, deposited in the United States Treasury, draw?

Q. I. When may an officer on the retired list of the Navy be employed on active duty?

Q. II. How long must surgeons, paymasters, and chief engineers serve before they become entitled to the highest rate of pay of their grades as authorized by law?

Q. III. When is an officer of the Navy, traveling under orders, entitled to actual expenses?

Q. IV. How can an officer of the Navy be transferred from the retired list on furlough pay to the retired pay list?
Q. V. What class of accounts is settled in the Navy Division of the Second Comp-

troller's office?

Q. VI. When is an officer of the Navy entitled to a ration, or commutation there-

Q. VII. How long must an officer of the Marine Corps serve before becoming en-

- titled to 10 per cent increased pay?

  Q. VIII. To what rate of increased pay per month is an enlisted man of the Marine Corps entitled when serving in his third, fourth, and fifth years on his first enlistment?
- Q. IX. When an enlisted man of the Marine Corps is honorably discharged from the service, what is the rate of travel pay and allowances to which he is entitled? Q. X. By what authority is the pay of the enlisted men of the Navy fixed?
- Q. I. What class of accounts is revised and finally settled in the Quartermaster's Division?

Q. II. By what Auditor are these accounts stated? Q. III. By what vouchers of the War Department are the appropriations for the support of the Army expended?

Q. IV. Upon what evidence is a disbursing officer allowed credit for a sum claimed to have been disbursed?

Q. V At what intervals are the disbursing officers whose accounts are revised and

finally settled in the Quartermaster's Division required to render their accounts?

Q. VI. May funds appropriated for the service of the Quartermaster's Department of the Army be legally applied to the service of the Subsistence Department, or vice

Q. VII. May funds appropriated for a specified purpose during a fiscal year be

legally used for the same purpose during a subsequent fiscal year?

Q. VIII. If a disbursing officer should pay for quartermaster's stores purchased within the fiscal year 1891 with funds pertaining to the fiscal year 1890, how could the appropriation be adjusted on the books of the Treasury?

Q. IX. Under what branch of the Army are the appropriations for the improve-

ment of rivers and harbors disbursed?

- Q. X. What contracts are required to be filed in the Quartermaster's Division?
- Q. I. By whom are the accounts of Army pension agents audited and revised? Q. II. Name and locate any four of the pension agencies of the United States.

Q. III. Name the different classes of Army pensioners.

Q. IV. What rate of pension is allowed to the widows of majors, captains, and first lieutenants?

Q. V. From what date is the additional two dollars per month for each minor child allowed?

Q. VI. From what date was the rate of pension to widows increased to \$12 per

- month? Q. VII. On what date was the "dependent and disability pension act" approved? Q. VIII. How are all pensioners of the United States paid the amount of pension
- duĕ? Q. IX. Frances Harrison, a pensioner of the United States, widow of Samuel, who
- was captain, Company B, Fortieth New York Volunteers, died August 18, 1890; she was last paid to June 4, 1890. What amount of pension had accrued at the time of her death?
- Q. X. George Harvey, by certificate 241965, is entitled to a pension of \$10 per month, commencing November 4, 1883, and \$14 per month from October 4, 1889. has been paid at the rate of \$8 per month from November 4, 1883, to December 4, 1889. How much is due the pensioner December 4, 1889?
- Q. I. What officers of the Government are required to examine accounts and claims arising in the Indian service before they are legally subject to revision by the Second Comptroller?

Q. II. What officers of the Treasury Department settle the property accounts of

all disbursing officers in the Indian service?

- Q. III. In what office does the law require that the original bonds of all disbursing officers of the Indian Department and original contracts made by that Department shall be filed?
- Q. IV. In what office are Indian accounts and claims filed after final action by the Second Comptroller ?
- Q. V. A was duly appointed an Indian agent. What steps are necessary on his part before public funds could legally be placed to his credit?

Q. VI. After the Second Comptroller has certified a balance in favor of a claimant, can it be lawfully changed? If so, by whose action?

Q. VII. What course is taken to collect balances declared due the United States upon final adjustment of the accounts of disbursing officers in the Indian service?

Q. VIII, What classes of accounts and claims are settled by the Indian Division?

Q. IX. Name the principal books of record kept in the Indian Division.

- $\hat{\mathbf{Q}}$ . X. After the Comptroller has signed an official report certifying a balance due on an Indian claim what is done with the report?
- Q. I. Over the accounts of what department and bureaus does the Miscellaneous Claims Division of the Second Comptroller's office exercise supervision?
- Q. II. From what Auditor are the accounts received and settled by the Miscella-

neous Claims Division reported?

Q. III. What disposition is required to be made of the accounts themselves after

adjustment?

- Q. IV. Describe the claims and tell the names of some of the railroad companies having accounts adjusted in the Miscellaneous Division of the Second Comptroller's office.
- What limitation is placed by statute on the charges of the bond-aided railroads for Government transportation for the Army?

Q. VI. What soldiers of the United States engaged in suppressing the late rebel-

lion are entitled to commutation of rations?

Q. VII. What compensation are the railroads having received aid from the United States by donation of public lands entitled to for services rendered to the Government?

Q. VIII. What class of claims is entered in the Docket, and what class in the Register, in the Miscellaneous Division? Describe the entries of a claim in each of

these books.

Q. IX. If the Secretary of the Department in which a claim originated wishes to have paid the balance found due by the revising clerk in the Miscellaneous Division and certified by the Comptroller, what does he do, and what are all the steps necessary to the issuance of a Treasury draft in its payment?

Q. X. What is the kind and character of the claims received, examined, and adjusted in the Miscellaneous Division, Second Comptroller's office?

## COMMISSIONER OF CUSTOMS.

Q. I. How is the standard determined for the conversion of foreign moneys into moneys of the United States, for the estimation of duties?
Q. II. What officer of the Treasury states the accounts examined in this office?

Q. III. To what officer of the Treasury are referred the accounts settled in this

office ? Q. IV. Should it be necessary to prosecute a delinquent officer, who has charge of

the suit?

Q. V. Who originally had the powers and performed the duties which now devolve on the Commissioner of Customs?

Q. VI. Who directs the superintendence of the collection of the revenue from customs?

Q. VII. Explain a covering warrant. Q. VIII. In what department must the commissions of officers engaged in laying or collecting public revenue be made out and recorded?

Q. IX. How many divisions are authorized by law in the office of Commissioner of

Customs?

- Q. X. When may the Secretary of the Treasury discontinue a port of delivery?
- Q. I. To what appropriations do the moneys collected from fines, penalties, and forfeitures belong

Q. II. What power has the Secretary of the Treasury in relation to fines, penalties, and forfeitures?

Q. III. Out of what appropriation are the awards of compensation paid? Q. IV. What returns in relation to fines, penalties, and forfeitures are customs officers required to make?

Q. V. Give the general course of an account for fines, penalties, and forfeitures collected by a customs officer through the Department.
Q. VI. What is smuggling?.
Q. VII. For what term are collectors, surveyors, and naval officers appointed?

How are they appointed?

Q. VIII. In what year was the latest tariff act passed?

- Q. IX. What is a port of entry, and what a port of delivery? Q. X. What general classes of accounts are adjusted in the office of the Commissioner of Customs?
- Q. I. Goods being imported on which the owners are not at once ready to pay the duties, how are they generally disposed of?
  Q. II. What are the four classes of entry of imported merchandise?

Q. III. What is a customs collection district?
Q. IV. What is a port of entry?
Q. V. By whom are commissioned officers of the customs appointed?

Q. VI. How are subordinate officers of the customs appointed? Q. VII. At the rate of \$30 a month, how much should a person receive for ten days' employment in January?

Q. VIII. At the rate of \$1,000 a year, what is the compensation for September, by Treasury rule?

Q. IX. Who has charge of leases of buildings for customs purposes? Q. X. What officer authorizes such leases?

Q. I. What is the date of the present tariff act? Q. II. When duty is computed on the value of an article, how is such duty denominated?

- Q. III. When duty is computed on quantity, how is such duty denominated? Q. IV. What is the purpose expressed in the title of the act of June 10, 1890, known as the "Customs administration act?"
  - Q. V. How often is the value of foreign coin for duty purposes estimated? Q. VI. What is the present rule in relation to damage on imported goods?
- Q. VII. A person being dissatisfied with the duty imposed on an importation, in what manner can be express such dissatisfaction with a view to having rate or classification corrected?

Q. VIII. Out of what appropriation are refunds of duties collected in excess re-

funded?

Q. IX. What is the rate of retention on drawback paid on exportation of imported

- goods on which duty has been paid?
  Q. X. What duty is chargeable on American goods liable to internal-revenue tax, exported, and afterwards returned to the United States?
- Q. I. Into what two general classes may fines, penalties, and forfeitures be divided? Q. II. Under what act, and by whom, is distribution made of fines, penalties, and forfeitures collected under the provisions of customs laws?

Q. III. For what one offense may goods become so liable as to give customs officers a share in their proceeds? For what other acts are goods liable to seizure?

Q. IV. How large a share may a customs officer obtain if allowed by the Secretary of the Treasury, and what is the limit in dollars for information in any one case?

Q. V. Who is the custodian of seized merchandise before suit is instituted, and

who after the suit is begun for condemnation?

Q. VI. What disposition should court officers make of money collected for fines,

penalties, and forfeitures? Q. VII. Explain the system of "Statement of public funds." VII. Explain the system of check on disbursing officers by the return known

- Q. VIII. Explain "Return of moneys received and paid."
  Q. IX. With what is this compared?
  Q. X. What officer of the Treasury Department has charge of matters relating to enrolling, licensing, etc., of vessels?
- Q. I. What classes of appointments are recorded in the office of the Commissioner of Customs?

Q. II. What division of the Secretary's office has charge of appointments? Q. III. What are unclaimed goods, as the term is used, in the returns examined by

you ?

Q. IV. How long may they remain unclaimed before being liable to sale?

Q. V. How are subordinate customs officers appointed?

VI. If unclaimed goods are sold, what becomes of the proceeds? VII. What one act is necessary on the part of subordinate officers of the customs before their services are legal and before they become entitled to salaries?

- VIII. To what division of the Secretary's office are requisitions for blanks, etc., sent?
- Q. IX. Name some of the classes of the subordinate employés in the customs service.
- Q. X. What is the compensation of an inspector of customs as distinguished from that of a clerk or deputy collector?

## FIRST AUDITOR.

Q. I. What are the duties of the First Auditor?

Q. II. When accounts, passed by the First Auditor, are finally adjusted, what officer of the Department is charged with their custody and preservation?

Q. III. How do disbursing agents obtain advances of money? Q. IV. In what way is the Auditor notified of moneys advanced to disbursing

Q. V. How are supplies for the Departments to be obtained?

Q. VI. What authority is necessary before advertisements, notices, or proposals for supplies for the Executive Departments of the Government may be published in

Q. VII. For how long are balances of annual appropriations available for payment

- of expenses incurred within any fiscal year?
  Q. VIII. When balances still remainand are no longer available, what becomes of
- Q. IX. In what way only is the receipt of money into the Treasury acknowledged? Q. X. What steps are necessary to make valid a transfer or assignment of a claim upon the United States or a power of attorney to receive payment of such claim?

Q. I. Name the principal accounts audited in the office of the First Auditor.

Q. II. By whom only may balances certified by the revising officers in the settlement of accounts be revised?

Q. III. Under what circumstances may the First Auditor administer oaths to witnesses

Q. IV. What officers are charged with the revision of the accounts examined by the First Auditor?

Q. V. What classes of accounts go to these officers, respectively?
Q. VI. What evidence is required to show that money has been received into the Treasury of the United States?

Q. VII. What officer is the final custodian of accounts settled by the First Auditor? Q. VIII. For what period are balances of annual appropriations available?

Q. IX. How are values of foreign moneys in accounts estimated? Q. X. What is the value fixed by law for the sovereign or pound sterling of Great Britain'?

Q. I. When the appraised value of merchandise shall exceed by more than 10 per

cent the entered value, what additional duty attaches?

Q. II. When an importer is dissatisfied with the decision of the collector of customs as to the rate and amount of duties chargeable on imported merchandise, where must the collector send all the papers in the case for examination and decision ?

Q. III. In what way can an importer avoid the payment of duties on damaged

Q. IV. What sugars are now admitted free? Q. V. Name the two principal classes of drawbacks?

Q. VI. What percentage is retained by the United States on each class?

Q. VII. By whom may a fine levied by a collector of customs be remitted? Q. VIII. From what ports must vessels arrive to entitle them to the 3 cent rate of tonnage tax?

Q. IX. From what two sources does a collector of customs obtain his storage

compensation?

- Q. X. What limits are fixed by law to drawbacks of duties paid on imported merchandise exported?
  - Q. I. Into what two principal classes are debentures and drawbacks divided?

Q. II. What retentions of duty are kept in each class respectively?

Q. III. As the precise duty on manufactured articles can not be conveniently fixed, how is the amount of drawback ascertained?

Q. IV. How long may unclaimed merchandise remain in public store before sale?

Q. V. How long may bonded merchandise remain in warehouse?

- VI. In case an importer is dissatisfied with the collector's assessment of duty, within what time after the liquidation must he file his protest?
- Q. VII. To what extent must the value of imported merchandise be raised by appraisement to render the merchandise liable to a penalty?

Q. VIII. What is the penalty, in case it accrues?

Q. IX. What is immigrant head money or capitation tax?
Q. X. What is the deceased passenger tax?

Q. I. How are sites for public buildings under the control of the Treasury Depart-

ment usually selected?

Q. II. The sum of \$527.53 was paid by disbursing clerk Hobbs from "Fuel, Lights and Water," 1891, which should have been paid from "Contingent Expenses, Treasury Department, Miscellaneous Items," 1891, an appropriation disbursed by disburs-

ing clerk Bartlett: How may the error be corrected?

- Q. III. Two bills are dated July 2, 1888, and are referred to the First Auditor's office for settlement August 17, 1891. The first is for services of a district attorney in the examination of title to post-office site at Aurora, Ill.; the second is for repairs to the heating apparatus for the custom-house at Galveston, Tex. How should these accounts be certified in this office as to methods of payment, and why so certified ?
- Q. IV. What constitutes the examination of an account for the purchase of a site? Q. V. What are the vouchers of the United States Treasurer for his disbursements? Q. VI. Who are the disbursing officers for salaries of members and officers and contingent expenses of the Senate and House of Representatives?

Q. VII. Who disburses the appropriations made by Congress to defray the expenses

of the legislatures of the different Territories?

Q. VIII. In what way are the salaries of the judges of the various Federal courts paid?

Q. IX. What is necessary for the payment of the salaries of Territorial officers? Q. X. How do appropriations become available on the books of the Department? Q. I. What class of accounts is adjusted in the Public Debt Division?

Q. II. At what periods are the accounts rendered by the Treasurer of the United States, and to what office are they submitted for examination and revision?

Q. III. In the settlement of the accounts of interest-checks, what is the method of examination before payment is allowed?

- Q. IV. How are interest-checks passed in the settlements noted on the records of the division?
- Q. V. What precaution is taken to prevent a check from being passed upon and allowed the second time? Q. VI. What is required in the indorsement of checks before payment is made?
  - Q. VII. What is the rule covering indorsements where payees can not write? Q. VIII. What is required where indorsements are by an agent, attorney, guardisa,

executor, administrator or trustee of an estate?

Q. IX. When the indorsement of a check is defective under the rules of the office.

- what should be done with it? Q. X. What time is allowed the Treasurer of the United States, under the rules,  $t \sim$ perfect a defective indorsement before the amount is deducted from the settlement?
  - Q. I. Name eight classes of accounts audited in the Judiciary Division?

Q. II. How are United States marshals compensated?

Q. III. What is the purpose of an emolument account?

Q. IV. By whom are Deputy United States marshals appointed?

Q. V. How are Deputy United States marshals compensated? Q. VI. Give the process by which a United States marshal draws money from the United States Treasury to defray expenses of United States courts?

Q. VII. Suppose an item is suspended in an account of a United States attorney for explanation, to whom should explanation be made?

Q. VIII. By whom should an extraordinary expense account of a United States marshal be approved, and under what section of the Revised Statutes?

Q. IX. Name a ministerial officer of a United States court? Q. X. By whom are United States commissioners appointed?

Q. I. From what source is the revenue for the support of the Government of the District of Columbia derived?

Q. II. Where is this revenue kept under the present form of government?
Q. III. How is it drawn from the Treasury?
Q. IV. What proportion of the expense of the District government does the United States Government pay?

Q. V. How is the District governed?

VI. How is the money expended for the support of the District? VII. How are the accounts of the Commissioners settled?

VIII. Who pays the interest on the bonded debt of the District?

- Q. IX. How is the estimated cost for the support of the District government ascertained?
- Q. X. What is the special provision in the law in reference to contracts for the construction, improvement, and repairs of streets, etc.?
- Q. I. How are disbursing clerks, authorized by law in the several Departments, appointed, and by whom?

Q. II. Do they give bonds, and, if so, in what amount and to whose satisfaction?

Q. III. When are accounts of disbursing officers required to be rendered?
Q. IV. Where are contracts for supplies, etc., required to be filed?
Q. V. Have the several Auditors of the Treasury Department authority to admin-

ister oaths? Q. VI. How are values of foreign moneys calculated in the settlement of accounts?

Q. VII. What is the value fixed by law for the sovereign or pound sterling of Great road companies settled for compensation earned from the United States for trans-Britain?

Q. VIII. What officer, if any, has the power to direct the immediate settlement of an account by the First Auditor?

Q. IX. By whom only may balances certified by the revising officers in the settlement of accounts be revised?

 ${f Q}$  . X. In what way are the accounts of the Union Pacific and Central Pacific P portation over subsidized roads?

Q. I. What is a customs warehouse?

Q. II. What officer has charge of a United States warehouse?

Q. III. By whom and to whom are warehouse bonds given? Q. IV. What does such a bond secure to the United States Treasury?

Q. V. What is required to cancel a warehouse bond?

Q. VI. What is a transportation bond?

Q. VII. What is an exportation bond? Q. VIII. What is required to cancel a transportation and exportation bond from Canada to a foreign port?

Q. IX. What is the principal object of warehouse and bond accounts? Q. X. What is a salt bond?

## SECOND AUDITOR.

Q. I. Name four classes of commissioned officers (civil or military) whose money accounts are audited by the Second Auditor; stating in what division the respective accounts are stated.

Q. II. What property accounts are settled by the Second Auditor and by what

divisions?

Q. III. Name the divisions to which the following accounts and claims should be respectively referred for settlement:

(a) Account of contingent expenses of the Army.

(b) Claim for deceased Army officer's pay.(c) Claim for supply of beef cattle to Nez Percé Agency.

(d) Claim for a soldier's "additional" bounty.

(e) Soldiers' Home accounts.

- Q. IV. When an account is stated, what is the duty of the Auditor?
  Q. V. What officers issue requisitions on the Treasury for payment of balances certified by the Second Auditor and confirmed by the Second Comptroller? If the Second Comptroller certify a balance different from that found by the Auditor, which What authorities have power to change the balance declared by the Comptroller?
- Q. VI. How long is an annual appropriation available to pay balances due public creditors? Within what period must such balances have accrued? What becomes of any balance of appropriation remaining after expiration of the period of availability?

Q. VII. (a) What is meant by a "permanent annual" appropriation? Which of

the following are annual?

(b) Fulfilling treaties with Chickasaws.
(c) Pay of interpreters.
(d) Indian school buildings.

(e) Support of Makahs.

Q. VIII. In what cases may Auditors administer oaths? Q. IX. What is meant by the term "charges," as used to designate a paper on which the statement of a disbursing officer's account is based? Who furnishes it?

- Q. X. When a Treasurer's draft has been paid and is returned to the Treasury, where is it filed and with what other document?
- Q. I. What is a requisition? By what officer is it issued in Indian cases, and by whom subsequently acted on?

Q. II. What is a warrant? State what officers act on it.

 $\tilde{\mathbf{Q}}$ . III. If a balance is due an agent under a lapsed appropriation, what must be rected on the "report" in regard to payment? What is the further action taken directed on the "report" in regard to payment?

Q. IV If an agent has gone out of service, how is a check issued by him while in the service paid

Q. V. What officers institute and conduct suits against Indian agents? What does

this office furnish?

Q. VI. What is the lawful disposition of the following moneys when received by an agent, and under what heads should they be respectively charged in stating his account by the Auditor?

(a) Rent of Government buildings;

(b) Proceeds of sales of property not needed for the Indians at an agency;
(c) Proceeds of sales of subsistence to employés;
(d) Proceeds of right of way for cattle across reservations;

- (e) Proceeds of sales of hides of cattle bought for Indians.
- $\hat{\mathbf{Q}}$ . VII. (a) In case of loss or destruction of property to a large amount at an agency, what is the agent's duty? (b) If the loss is small, what evidence must be filed to prevent charging him with the value?

Q. VIII. What points must be covered by an agent's affidavit as to employes?

Q. IX. What action should be taken on the following items if found in an agent's account?

(a) He pays fare over a bond-subsidized road:

- (b) He overpays employé A \$1, and underpays employé B by the same amount;
- (c) He charges for a telegram without subvoucher; (d) He charges and files a hotel bill at \$6 per day;
- (e) He charges salary prior to date of taking oath of office. Q. X. The Auditor's certificate of an agent's account shows the following balances:

### Due the United States:

Contingencies of the Indian Department, 1890	\$25.19
Support of Indian schools, 1889	
Support of Molels, 1890	200.00
	-

381.39

Due the agent:

Pay of Indian agents, 1889	624.13
Telegraphing and purchase of Indian supplies, 1889	13,09

What requisitions should be called for on the report in order that the account shall close on next settlement?

Q. I. What is the character of the labor performed by the Division for the Inves-

tigation of Fraud?
Q. II, "A" presented a claim for bounty through his attorney "B," to whom he will be a suitable of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the gave a power of attorney to indorse any check that might be issued. the check for "A." Was it a legal indorsement, and if not, why not?

Q. III. "A" personated a soldier for bounty; a Treasury certificate or check was issued, which he assigned to "B," to whom payment was made. Is "B" liable to the Government, and if so, why?

Q. IV. When is prosecution for forgery in pay and bounty claims barred, and

under what statute

Q. V. What is the limit of remedy in a civil action for the recovery of money due the Treasury?

Q. VI. When do the accounts of bonded disbursing officers of the Treasury become

res adjudicata so as to discharge principal and surety.? Q. VII. Under what circumstances is the Auditor empowered, ex officio, to admin-

ister oaths in cases pending before his office?
Q. VIII. What class of disbursing agents or officers of the Treasury or Government

is exempt from bonding?
Q. IX. Who is the legal custodian of the bonds of the Army, Navy, Indian, and

Pension disbursing officers?

- Q. X. Under the joint resolution of March 29, 1867, the pay and bounty due in case of a colored soldier were paid to the Commissioner of the Freedmen's Bureau, and the money misappropriated by an agent of the bureau. Have the accounting officers authority to resettle the claim and repay the amount so misappropriated? If not, why not?
- Q. I. Under late legislation, state for what period the foriestures by desertion in the regular Army are paid to the Soldiers' Home?

Q. II. Under what laws are these forfeitures paid?
Q. III. What officers of the Government settle these accounts, and where is the

money paid?
Q. IV. As the Soldiers' Home accounts are now being settled, how would you dis-

pose of the following case?

A soldier enlisted in Company A, Second Cavalry, July 15, 1879; promoted sergeant August 1, 1880; deserted December 30, 1880, and last paid to August 31, 1880. Due United States, for clothing overdrawn, \$40. A sergeant at desertion. A deserter

Q. V. When a settlement in favor of the Soldiers' Home has been made, what officer is custodian of the papers, and what representative of the Home must be notified

of said settlement?

Q. VI. What stoppages or fines are paid over to the support of the Soldiers' Home? Q. VII. Audit the following cases exactly as you would for reporting to the Second

Comptroller:

A soldier enlisted into Company G, First Cavalry, January 1, 1878; discharged by reënlistment January 1, 1883; deserted July 1, 1883; last paid to February 28, 1883. Due soldier for retained pay \$6, and clothing \$12. Apprehended July 16, 1883; \$30 paid for apprehension. Tried by general court-martial and found not guilty of desertion, but of absence without leave. Sentenced to forfeit all pay due at date of desertion and to make good the time lost. Discharged January 1, 1888, by expiration of term of service. A private during service.

Q. VIII. If, instead of discharge, this soldier had again deserted August 31, 1883, how would you report?

Q. IX. Suppose the soldier had been found guilty of desertion by the general court-martial and sentenced to forfeit all pay due or to become due and be dishonorably discharged, and was discharged September 30, 1883, as per sentence?

Q. X. A soldier enlisted in Company B, First Cavalry, July 1, 1880; deserted December 16, 1883; last paid to June 30, 1880. Due soldier for clothing, \$46. Due United States for ordnance and ordnance stores \$150, for camp and garrison equipage \$131. Apprehended March 1, 1884; \$30 paid for apprehension. Again deserted April 15, 1881, taking with him two horses valued at \$75 each. A deserter at large. A private during service.

Q. I. In copying a muster and pay roll, what is most important?
Q. II. What is the rule in copying indorsements made in red ink on muster and pay rolls?

Q. III. What is the rule in copying remarks that appear in lead pencil on the

original rolls?

Q. IV. In copying a pay roll the name of the mustering officer is often obscure; where do you find the name for correction?

Q. V. When a name or remark on pay roll can not be obtained, how should it be

disposed of?

Q. VI. When an indorsement appears on pay roll similar to the following, "Paid by certificate No. 255896, August 1, 1885," and it is difficult to make it out, where do you find the information?

Q. VII. What is the difference between a muster and pay roll?
Q. VIII. In copying a pay roll, what action do you take as to proof of the addition of the rolls?

Q. IX. What is the rule in reference to interlineation?
Q. X. Where do you apply for remarks or names of soldiers that may have been torn from a pay roll?

Q. I. Name the various papers essential to a complete cash and property account of an Indian agent as rendered by him, and describe the purpose of each and the nature and arrangement of its contents. How often are such accounts rendered; to what officer, and by what officers successively examined?

Q. H. Describe the general process of examining an Indian disbursing officer's accounts for cash and property; state what official documents are prepared in stating the accounts; state when property unaccounted for is charged; to whom the Second Auditor and Second Comptroller, respectively, certify balances found due, and what paper is sent to the agent.

Q. III. What direction is given on the Auditor's certificate in each of the follow-

ing cases?

(a) A balance is finally found due the agent, partly under current appropriations, partly under appropriations that have lapsed.

(b) Balances are found due the agent on final settlement under some appropria-

tions and due the United States under others; some lapsed, some current.
Q. IV. What is an Interior requisition? When made for the Indian service, by what officers successively acted on, and in what manner? Give like particulars in regard to the subsequent warrant; also, in case of pay requisitions, in regard to When are "transfer and counter" requisitions called for, and what the draft issued. effect do they have on the funds when drawn on current appropriations?

Q. V. In what ways may an Indian agent lawfully account for moneys received

by him from the following sources?

(a) Advances by United States Treasury. (b) Sales of subsistence to employés.

(c) Sales of beef hides.(d) Sales of condemned public property. (e) Sales of produce raised by Indians.

(f) Rent of public buildings.

(g) Pay for privilege of passing cattle over reservation.(h) Pay for grazing privileges.

(i) Earnings of agency workshops.

(k) Pay for railway right of way. Q. VI. Name the five sets of books kept by the Indian Division for recording claims and tracing goods to destination; state the purpose of each, and how this purpose is effected. Show the process by which a bale of goods bought in New York for the Crow Creek Agency is traced in its course till finally distributed to the Indians

Q. VII. Name ten of the more common classes of claims settled in the Indian Division; in what offices successfully examined, and what papers are made in each,

describing each paper. On invoices of contractor's supplies, what receipts or certificates appear? Under what circumstances may open market purchases be made

in the Indian service?

Q. VIII. Define specific, permanent, and permanent annual appropriations. Give an example of each. How long may an annual appropriation be used; for what purposes; and what becomes of unexpended balances? When, to what extent, and by what authority may an appropriation for support of one tribe of Indians be used for another tribe?

Q. IX. What is meant by a bond-subsidized railroad? Give the list of companies operating such roads. What is the mode, under the law and Treasury regulations, of settling claims of these companies, respectively? In what case may public supplies be transported over these roads without applying the rules for deduction?

Q. X. What action should be taken on the following items, if found in an agent's

account?

(a) He pays fare over a bond-subsidized road.

- (b) He overpays employé A \$10, and short-pays employé B by the same amount.
- (c) He charges for a telegram without subvouchers. (d) He charges and files a hotel bill at 7 per day.

(e) He charges salary prior to taking oath of office.
(f) He charges salary to September 30, but renders accounts only to June 30.

- (g) He accounts for a large amount of property by alleging it to have been destroyed by fire.
- (h) He carries a balance from first to second quarter, 1890, on his account current \$100 short.
  - (i) He enters on his account current the amount of a Treasury draft \$150 short.

(k) He pays an amount due a contractor without authority.

Q. I. What accounts and claims are settled in the Ordnance, Medical, and Miscellaneous Division of the Second Auditor's office?

Q. II. Describe the work upon which you are directly engaged.

Q. III. What records are kept in your section of the division, and for what purpose are they kept?

Q. IV. Of accounts examined, in this division, which two classes are the most im-

portant, with respect to amount of disbursements involved?

Q. V. Of claims examined in this division, name the principal class, as regards number received. Q. VI. Describe the two classes of payments, abstracts or statements of which are

furnished by this division in answer to calls from the Pay and Bounty Division.

Q. VII. Referring to the preceding question, explain how the abstracts in case of one class of payments are made up, and in case of calls for the other class, how the fact of payment or nonpayment is ascertained.
Q. VIII. Name the "files" in which the vouchers for either class of payments re-

ferred to in the preceding question are to be found, and designate the division that has charge of those "files" in either case.

- Q. IX. On examination of a disbursing account, the following errors were noted: In a voucher for receipt of money for Government stores sold, the items making up the amount of the voucher, as receipted, were overadded in the sum of \$1, and the erroneous amount carried to the "Abstract of Sales," but the said abstract was underadded in the sum of \$1, and the erroneous amount carried to the account current. State why either error should or should not appear either as debit or credit item of difference in the "statement of differences" arising on settlement of said account.
- Q. X. How are the accounts of the bond-aided Pacific Railroad companies adjusted for services rendered the United States over their aided or nonaided lines?

Q. I. What are the duties of the Division for the Investigation of Fraud?

Q. II. What are the requirements of the act of February 26, 1853, in regard to transfers and assignments of claims against the United States, and powers of at-

torney to receive payment of such claims?

Q. III. If the payment of a claim were made by the United States on a power of attorney not executed by the claimant in accordance with the requirements of the act of February 26, 1853, would the Government still be liable to the claimant, in case the attorney embezzled the money? If not, why?
Q. IV. What statutes are repealed by the Revised Statutes?
Q. V. In what cases is the doctrine of laches applied against the claimants?

Q. VI. Under what circumstances can original papers on file in this Department be withdrawn by attorneys or other persons? Q. VII. Under what circumstances may copies of original papers on file in this

Department be furnished to persons requesting the same?

Q. VIII. Within what time after the discovery that an officer, chargeable with public money, is indebted to the United States must suit be brought against such officer and his sureties?

Q. IX. If a paymaster's check drawn on United States depositary, payable to A, fall into the hands of B, and the latter forge A's indorsement and receive payment, will A have a right of action against the United States depositary? If not, why?

- Q. X. What offenses against the United States are exempt from the provisions of the act of April 13, 1876, limiting the time of prosecution to three years?
  - Q.- I. How are the traveling allowances of a discharged soldier computed?

Q. II. Under what circumstances are aforesaid allowances forfeited

- Q. III. How may an enlisted man be discharged before the expiration of his term of service?
- Q. IV. What is the rule for retaining pay of enlisted men, and how are amounts so retained to be treated?

Q. V. For what causes will the retained pay of a discharged soldier be withheld?

- Q. VI. For what time are Indian scouts enlisted? State pay and allowances of same.
- Q. VII. When is an officer entitled to mileage, and what are his allowances while thus traveling?

Q. VIII. When are officers not entitled to commutation of quarters?

- Q. IX. How is the longevity record of an officer determined, and at what period of service would his first increase of pay be due?
- Q. X. When is the outstanding check of an army paymaster payable by the Treasury Department?
  - Q. I. What class of accounts is settled in the Property Division?

Q. II. By whom are these accounts rendered?

Q. III. Through what bureau of the War Department are they received?
Q. IV. How often are officers required to render returns for property?
Q. V. In case an officer fails to render returns for property in his charge, what steps are taken?

Q. VI. State manner of accounting for property lost or stolen.

- Q. VII. What vouchers are required for property worn out in service? Q. VIII. On what vouchers are issues of clothing made to enlisted men?
- Q. IX. How often and on what dates are the clothing accounts of enlisted men
  - Q. X. Who has final jurisdiction in the settlement of property accounts?

Q. I. What are the duties of the Division of Inquiries and Replies?

Q. II. To what time are enlisted men entitled to pay for use and risk of horse and horse equipments?

Q. III. On what dates was the rate of pay proper of enlisted men changed, subsequent to 1860 and prior to 1866?

Q. IV. Give the pay and allowances of a first lieutenant of cavalry from October 1, 1863, to December 31, 1863, both dates included. Give items in detail.

Q. V. An officer of infantry was assigned to duty requiring him to be mounted.

- Was he entitled to additional pay? If so, to what?
  Q. VI. A soldier enlisted July 20, 1864, for one year. Under what act of Congress
- is he entitled to bounty, and how is it payable?
  Q. VII. An officer resigned on March 10, 1863; the resignation was accepted March 25, 1863, and he received official notice of its acceptance March 30, 1863. To which date is he entitled to pay?

Q. VIII. A soldier reënlisted in the Veteran Reserve Corps. To what bounty was

he entitled for such enlistment?

- Q. IX. A soldier was transferred to the Veteran Reserve Corps. To what bounty was he entitled?
- Q. X. A soldier was captured July 3, 1863, and paroled October 20, 1863. To what amount would be entitled as commutation for that period? Answer in detail.
- Q. I. What are the general duties and the nature of the work performed in the Mail Division of the Second Auditor's Office?
- Q. II. Should an application for reimbursement for care and nursing or funeral expenses of a deceased pensioner be received by the Second Auditor, to whom should it be sent for settlement?

Q. III. Should an application for bounty land be received by the Second Auditor,

to whom should it be sent for adjudication?
Q. IV. What disposition should be made of a claim filed in the Second Auditor's Office by a soldier for subsistence while on furlough?

Q. V. By whom are claims by soldiers or their heirs for pay, for use and risk of a private horse in the United States service, adjusted, and where are such claims sentfor settlement?

Q. VI. By whom are claims by soldiers or their heirs for pay, or three months' extra pay, for services in the Mexican war, adjusted, and where are such claims sent

for settlement?

Q. VII. What disposition should be made of a claim sent to the Second Auditor by a soldier or his heirs for pay for commutation of rations while the soldier was a prisoner of war?

Q. VIII. To whom should be sent an application received by the Second Auditor from a soldier of the volunteer service for duplicate discharge or certificate of

service?

Q. IX. To whom should be sent an application received by the Second Auditor for

pay for service as sailor in the U.S. Navy?

- Q. X. By what office are claims for pay by a soldier for services in the war of 1812 adjusted?
- Q. I. For what periods are the following classes of appropriations subject to draft: Annual, permanent annual, indefinite, and permanent indefinite?
  Q. II. Describe the modus operandi of withdrawing Indian appropriations from

the Treasury.

Q. III. Describe the modus operandi of returning unexpended balances of war appropriations to the Treasury.

Q. IV. What records are kept in the Bookkeepers' Division in connection with

accounts of appropriations made by Congress?

Q. V. What records are kept in the Bookkeepers' Division in connection with

accounts of disbursing officers?

Q. VI. By settlement No. 273, confirmed October 31, 1891, the sum of \$8,569.14 was certified to be due William Hammond, for beef furnished to the Indian Department, to be charged to the following appropriations: Fulfilling treaties with Crows, \$2,000; fulfilling treaties with Sioux of different tribes, \$6,569.14. Give the journal entry of this transaction.

Q. VII. Give the ledger entry of the same transaction. Q. VIII. What certificates are required from the Bookkeepers' Division in connec-

tion with the settlement of claims for arrears of pay and bounty?
Q. IX. On June 1, 1891, the Secretary of War issued his requisition, No. 520, in favor of the assistant treasurer, New York, for \$50,000, to be placed to the credit of Maj. George Jones, paymaster, U.S. A., who is accountable for the same under his official bond, dated May 19, 1891, and to be charged to the appropriation for "Pay, etc., of the Army, 1891." On July 31, 1891, an unexpended balance of \$10,000 was passed to the credit of Maj. Jones, under the same appropriation, by repay requisition, No. 8,600. Give charges for settling clerk.

Q. X. What estimates are prepared annually in the Bookkeepers' Division?

Q. I. What papers are contained in the files of the Archives Division?

Q. II. What is a paymaster's settlement?

Q. III. What period is covered by vouchers on file in the Archives Division?

Q. IV. Of what do official papers of a paymaster's settlement consist, or what are official papers?

Q. V. When a confirmed settlement is on file, what payments are noted upon the back, and what dates are noted on the front of each box?

Q. VI. What is the difference in the matter contained in an ordinary pay roll and

a muster-out roll?

Q. VII. What is the rule for withdrawing vouchers from a paymaster's settlement? Q. VIII. When several boxes constitute a single settlement, where should the

official papers be filed?

Q. IX. What is meant by the following abbreviations: A. G. O., R. Q. M., U. S. C. T., and C. and G. E.?

Q. X. In case a voucher should be lost from a paymaster's settlement, what steps should be taken to recover the same?

Q. I. What difference, if any, is the effect of a charge of "desertion" and a charge of "absence without leave" upon the right of a soldier to bounty under act of July 22, 1861, who enlisted after July 5, 1862, had an actual service of two years, was honorably discharged, but received no bounty?

Q. II. A soldier was enrolled and mustered in April 1, 1863, in the volunteer service, for three years, and was discharged August 3, 1863, because of disability existing at date of enlistment. He was paid regularly the pay, bounty, and clothing provided by law to include June 30, 1863. What amount should he have received on final statements dated August 3, 1863?

Q. III. What would be the amount of pay and allowances due a major of volunteer infantry for the month of June, 1864?

Q. IV. When is a soldier entitled to veteran bounty, joint resolution January 13, 1864?

- Q. V. What rates of pay were allowed to a private of volunteers during the war of the rebellion, and what were the dates when the changes in the rate of pay occurred?
- Q. VI. John Jones, private of Company A, First New York Volunteers, claims pay, bounty, and allowances. In what Departments and what offices can be obtained (1) record of his military service; (2) record of his clothing account, and (3) record of his final payment?
- Q. VII. A soldier enlisted July 3, 1862, deserted December 22, 1862, and never returned. He never received pay or allowances and never served in the Army at any Charge of desertion was removed under section 5, act of March 2, 1889. Is the soldier entitled to pay and allowances? If not, why?

Q. VIII. What pay, bounty, or allowances are payable to a soldier dishonorably

discharged from the service?

Q. IX. A soldier claims commutation of subsistence while a prisoner of war.

what office should such a claim he referred?

- Q. X. If there is any law authorizing payment of bounty to six months' volunteers, give the date of the act and the conditions under which payable to the soldier or to his heirs, and state in order of priority what heirs, if any, are entitled.
- Q. I. What was the purport of the act of March 3, 1873 (relating to colored soldiers), and how was it construed by the accounting officers?

Q. II. What are the conditions under which an officer is entitled to three months'

extra pay proper?
Q. III. A soldier enrolled and mustered in August 15, 1864, for two years, died in service, having received no bounty. He left a widow residing in Scotland. To what bounty, if any, is she entitled?

Q. IV. A captain of infantry was paid \$70 a month from May 1, 1864, to October

31, 1864, date of discharge. His record is amended to show him a major from May

15, 1864. To what amount of pay proper is he entitled?
Q. V. An officer was absent, with leave, 30 days in August, 1863, and 30 days in

August, 1864. How much pay should he forfeit in each case?

- Q. VI. A soldier enrolled and mustered in July 15, 1861, for three years, was discharged on January 15, 1862, on account of disease existing before enlistment. He died of said disease on February 10, 1862. His widow filed a claim for bounty in July, 1879. To what bounty is she now entitled, no prior settlement having been
- Q. VII. Two unmarried brothers were mustered into the volunteer service in May, 1864, one as a captain of cavalry, the other as a captain of infantry. The cavalry captain died April 2, 1865, and the infantry captain on April 28, 1865. Their father filed a claim, without attorney, for three months' extra pay proper in 1890. What amount of money will he receive in each case, nothing being due but three months'

extra pay proper?

Q. VIII. Give all the necessary conditions under which the mother of a soldier may receive \$200 bounty, \$100 under act of April 22, 1872, and \$100 under act of July

28, 1866. Q. IX. A captain of infantry was discharged at New York City on August 5, 1866, having been enrolled at Columbus, Ohio, 665 miles distant. He now claims travel pay and travel subsistence, which is due for the entire distance. What amount of

money will be allowed?
Q. X. A soldier was enrolled and mustered in August 6, 1862, for three years, and mustered out August 31, 1865, receiving \$100 original bounty. He died on September 15, 1866. His widow filed a claim for bounty, act July 28, 1866, on August 10, 1867. She remarried on February 1, 1869. Is claimant now entitled to any bounty, no final disposition having yet been made of her claim?

# THIRD AUDITOR.

Q. I. Where or when are amounts advanced credited pension agent and by what are such offset?

Q. II. How often and to what office must accounts of pension agent be rendered,

and of what must they consist?

Q. III. Upon receipt of an agent's monthly account what immediate action is taken? Q. IV. From what portion of the account of a pension agent are the entries of payments made on the roll books, and for what purpose are the entries made?

Q. V. For what purpose are entries made on roll books; or what general purpose other than their use in auditing the accounts of a pension agent do the roll books serve

Q. VI. If pensioner is paid upon incomplete or improper voucher what course is

pursued in settlement of agent's account?

Q. VII. In furnishing statements of former payments in any given case, what steps

are necessary?

Q. VIII. If a check for pension is presented at the Department and agent who issued it is out of office with no funds to his credit in any public depository, what course must be pursued to secure payment to the holder?

Q. IX. In transcribing the name of a pensioner who has been paid to March 4, 1890, from series of 1882 to one for 1890, what is the entry made?

Q. X. In July, 1890, certificate is issued to the widow of a deceased soldier granting her a pension of \$12 per month from May 19, 1887, and \$2 per month additional for two minor children. What is the amount due June 4, 1890?

Q. I. Name the books of record kept in the division and the purpose of each.

Q. II. What classes of settlements of account should be posted in the personal ledgers?

Q. III. If any settlements made by Third Auditor are excluded from the personal

ledgers, name them, and state the reasons.

Q. IV. Having posted settlement on which requisition is issued, how is the requi-

sition itself to be treated in reference to the ledger account?

Q. V. Why may not the journal of the personal accounts be made before those accounts have been posted into the ledgers?

Q. VI. Describe briefly the method of answering "Call for Charges" from the

personal ledgers.

- Q. VII. What record is made in the division of requisitions on the Treasury for funds to be advanced to disbursing officers or agents and for the payment of allowed
- Q. VIII. Name the steps taken in the division toward covering funds into the Treasury that have been deposited in Government depositories for that purpose. Q. IX. How long may the balance of money appropriated for a specific fiscal year
- remain on the books and be available for the payments of that year?
  - Q. X. Under what circumstances may drafts be made upon the surplus fund?
- Q. I. By what law was the Third Auditor's office created, and its general jurisdiction defined

Q. II. What classes of accounts are within its province?

- Q. III. What classes of claims are within its jurisdiction?
- Q. IV. To what officer does the Auditor report his findings or conclusions in accounts or claims?
- Q. V. To what extent, if any, is that officer bound by the Auditor's conclusions? Q. VI. By what authority, if any, in the Executive Departments, can that officer's action be changed?
- Q. VII. What is meant by the term "appropriations," as commonly used in statutes and in the Executive Departments, and how are they made or provided?

Q. VIII. For what period, generally speaking, are appropriations available by

law for payments?

- Q. IX. Upon the final settlement of a claim in one of the classes above spoken of, if an appropriation be presently available for payment, what are the further steps looking toward payment?
  Q. X. And if no appropriation be then available, what are the further steps?

Q. I. In the examination of the returns of quartermaster's stores of Lieut. A, it appears from the proceedings of a board of survey and other satisfactory evidence filed therewith, that a quantity of corn, invoiced by Capt. B as "sound and in good condition," was, in fact, damaged when in Capt. B's hands and through his negli-What course should be taken in adjusting the matter?

Q. II. An officer having been stationed on duty as acting commissary of subsistence and as acting assistant quartermaster, expended all the subsistence funds in his hands, but having quartermaster's funds still on hand, purchased subsistence stores, paid for them with quartermaster's funds and took credit for the expenditure on his quartermaster's account. How can the account be adjusted, the expenditure having been

disallowed by the proper military bureau, as in violation of law?

Q. III. An acting commissary of subsistence having sold subsistence stores to officers and enlisted men at a higher rate than the legal one, and having charged himself with the amount so received, he is apparently a creditor of the United States to the amount of the excess received. What is necessary on his part to become an actual creditor for the amount in question.

Q. IV. If the officer referred to in the preceding question fails to take the necessary steps to become an actual creditor of the United States, how can his account

Q. V. An officer of the Quartermaster's Department, and one of the Corps of Engineers engaged in harbor improvements, are stationed in the same city, and on the same day each purchased like quantities of the same articles for the public use in open market from the same person, and paid for the articles out of funds in their hands. The vouchers in each case are made in the same way, each showing on its face the necessity for the purchase in open market. Why can not the quartermaster receive credit for his expenditure at once, as well as the Engineer officer?

Q. VI. April 1, 1891, a contractor agreed to erect certain buildings for the Quartermaster's Department, the work to be commenced April 15 and be completed May 26, 1891. For satisfactory reasons the buildings were not completed until August 5, 1891; the Quartermaster having disbursed all the funds in his hands, made requisition for a sufficient sum to pay the contractor the amount due, but receipted for the money as pertaining to the appropriation, "Regular Supplies, Q. M. D., 1892." He paid the contractor, and on his account current for August, 1891, f. yr. 1892, he took credit for the payment under the head of appropriation to which the funds How can the matter be adjusted, the expenditure being payable only out of the appropriation, "Barracks and Quarters, 1891?"
Q. VII. What payment should a quartermaster make for the transportation of

675,842 pounds quartermaster's stores from New York City to San Francisco, Cal., via St. Louis, Mo., 1,065 miles, Iron Mountain Railroad to Texarkana, 490 miles, Texas Pacific Railway, Texarkana to El Paso, 860 miles, and Southern Pacific Railway, El Paso to San Francisco, 1,286 miles, the stores being rated as second class, and the through tariff rate to the public being \$3.20 per 100 pounds?

Q. VIII. What payment should a quartermaster make for the above-mentioned

stores, via Chicago, 912 miles; thence by Chicago and Rock Island Railroad to Omaha, 503 miles; thence by Union Pacific Railway to Ogden, 1,034 miles; and thence by Central Pacific to San Francisco, 833 miles; the stores being rated second class and the through tariff rate to the public being \$3.20 per 100 pounds?

Q. IX. What payment should a quartermaster make for the above-mentioned stores via St. Louis, 1,065 miles; thence by the San Francisco line to Burton, 538 miles; thence by Atchison, Topeka and Sante Fe Railway to Albuquerque, 699 miles; thence by the Atlantic and Pacific Railway to Mojaw, 819 miles; and thence by the Southern Pacific Railway to San Francisco, 382 miles?

Q. X. What would be the amount earned by the respective roads over which the stores were transported, the distance between New York City and Chicago being considered as one road, and the distance between New York City and St. Louis as one road?

# FOURTH AUDITOR.

Q. I. In what year was the Navy Department organized?

Q. II. When was the Fourth Auditor's office established?

Q. III. What are the duties of the Fourth Auditor?

Q. IV. How is money appropriated for the use of the Navy Department drawn from the Treasury?
Q. V. What is prize money?

Q. VI. By what authority is the pay of the enlisted men of the Navy fixed?

Q. VII. What is an allotment? Q. VIII. How is an allotment registered?

Q. IX. In the event of an officer of the Navy or seaman desiring to allot more than the usual amount allowed (one-half of his salary), how is it accomplished?

- Q. X. How many pension agencies are there in the United States, and at what agencies are Navy pensions paid?
- Q. I. When does an officer of the Navy become entitled to sea pay if ordered to sea duty

Q. II. If an officer be placed on furlough, to what rate of pay is he entitled? Q. III. Under what circumstances do enlisted men of the Navy become entitled

to one-fourth additional pay? Q. IV. What is the allowance to officers of the Navy in traveling abroad or in the

United States under orders.

Q. V. What does a man forfeit by desertion?
Q. VI. To whom must the application be made for the removal of the mark of desertion?

VII. To what office do Navy accounts go from the Fourth Auditor?

Q. VIII. How are paymasters abroad supplied with funds to meet the necessary expenses of the vessel?

Q. IX. How many divisions are there in the Fourth Auditor's office.

). X. Under what circumstances do enlisted men in the Navy become entitled to three months' additional pay?

Q. I. When is an officer of the Navy entitled to sea pay?

? II. What must be stated in the orders which direct an officer of the Navy to perform shore duty?

Q. III. For how much time should a seamen who enlisted February 28 receive credit for pay during the quarter in which he enlisted?
Q. IV. For how many commuted rations could he receive credit?
Q. V. What is "extra pay for reculistment under honorable discharge?"

Q. VI. What addition is made to the monthly pay of men serving in the Navy under a continuous-service certificate?

Q. VII. How do fleet paymasters on foreign stations procure money for disburse-

Q. VIII. From what appropriation do paymasters on foreign stations draw money for disbursement?

Q. IX. What does the expression "By adjustment of appropriations" signify in

the statement of a Navy paymaster's account?
Q. X. How is the clothing fund of the Navy reimbursed for issues of clothing to enlisted men of the Navy?

Q. I. To what office should claims for commutation for rations in the Army be referred?

Q. II. To what office should claims or inquiries in regard to artificial limbs be referred ?

Q. III. What is prize money?
Q. IV. To whom is it payable?
Q. V. How and in what proportion is it distributed?
Q. VI. When was the Fourth Auditor's office established?

Q. VII. What are the duties of the Fourth Auditor!

Q. VIII. What disposition is made of the accounts that have been examined by the Auditor and the balances certified by the Comptroller?

Q. IX. What is an allotment? Q. X. What is a "reconciling statement?"

Q. I. What is "bounty for the destruction of enemies' vessels?".

Q. II. Under what act is prize money paid to captors?
Q. III. In what proportion is it distributed to officers and enlisted men?
Q. IV. What difference is observed in the settlement and payment between "prize money" and "bounty for destruction of enemies' vessels?" Q. V. What course is taken when balances are found due claimants, and there is

no money available for payment?
Q. VI. What fact should be shown in a "Report of service" of an applicant for

invalid pension?

Q. VII. If a record of service can not be completed from muster or pay roll, what other source should be examined?

Q. VIII. What evidence is necessary in a claim by the widow of a sailor for prize

money due him? Q. IX. Sold a bill of exchange for 2,000 pounds at 1 shilling 87 pence to the rupee,

and with the rupees bought United States dollars at \$0.436 per rupee, how much was received in rupees, and what sum received in United States money?

Q. X. A paymaster sold a bill of exchange for 2,000 pounds at 52½ pence per milrei, and with the milreis bought English money, receiving 2,022 pounds, 2 shillings, 4 pence, what rate was gotten for the milreis, and with what sum should the paymaster be charged in United States money at \$4.8665 to the pound sterling.

Q. I. What duties are assigned by law to the Fourth Auditor? Q. II. What are the principal accounts and claims adjusted by the Fourth Auditor? Q. III. By what divisions of the Fourth Auditor's Office are these accounts and claims respectively settled?

Q. IV. By whom are the accounts settled by the Fourth Auditor revised? In case of a difference of opinion between the Fourth Auditor and the revising officer, whose decision prevails? Q. V. Who prescribes the official forms to be used by pay officers of the Navy and

Marine Corps and the manner and form of keeping and stating their accounts?

Q. VI. Who is required by law to superintend the preservation of the accounts settled by the Fourth Auditor, and in whose custody are such accounts preserved?
Q. VII. How often must pay officers of the Navy render their accounts?
Q. VIII. Who is authorized to direct a more frequent rendition of accounts?

Q. IX. How is the length of time allowed to pay officers of the Navy to render their accounts fixed, and upon what does it depend?

Q. X. By whom must requisitions for money drawn by the Secretary of the Navy be countersigned, and by whom registered?

Q. I. What are the duties of the Paymaster's Division?

Q. II. What are the principal papers required as vouchers to a pay roll of a vessel?

Q. III. What are the essential features of a pay roll of a vessel?
Q. IV. What is a transfer account, and what must it show?
Q. V. How much time is allowed pay officers of the Navy for the rendition of accounts of first, second, third, and fourth rate vessels, respectively?

Q. VI. What action follows a failure to render accounts within the prescribed time, and what penalty is fixed by regulations for such failure?

Q. VII. What are the essential features of a worker.

Q. VII. What are the essential features of a voucher for money paid for supplies furnished a vessel on a foreign station, and what papers must accompany the voucher to support it?

Q. VIII. What are the essential features of a mechanics' pay roll? Are any sub-

vouchers required to support it?

- Q. IX. When officers and seamen are transferred overpaid how is the overpayment treated in the account of the pay officer from whom they were transferred
- Q. X. What disposition is made of the premium or discount on a bill of exchange in the settlement of a pay officer's account?
- Q. I. When is an officer of the Navy entitled to sea, shore-duty, and waiting-orders pay, respectively, and when will each rate of pay begin?
  Q. II. What sources of revenue has the Navy Hospital fund?

Q. III. By what process is the amount due from officers and seamen to the Navy Hospital fund collected and paid to said fund? Q. IV. What is "General Account of Advances?"

Q. V. By whom is the account between "General Account of Advances" and the specific appropriations adjusted?
Q. VI. What is required by law with regard to the rendition and settlement of pay

officers' accounts under different bonds?

Q. VII. What are the rules for the computation of the pay of officers and seamen of the Navy, respectively?
Q: VIII. What must a pay officer of the Navy file with his account with reference

to a sale of a bill of exchange?

Q. IX. What disposition is made of proceeds of sales of condemned material? Q. X. What is the minimum complement of a vessel that will entitle a pay officer

- of the Navy to a clerk?
- Q. I. What amount is withheld as "retained pay" from the pay of an enlisted man in the Marine Corps in his first enlistment, during each year of his service, and how much will be due him as "retained pay" when discharged at the end of five years of faithful service?

 $\mathbf{Q}.\;\;\mathbf{II.}\;\;\mathbf{From}\;\mathbf{what}\;\mathbf{appropriation}\;\mathbf{is}\;\mathbf{paid}\;\mathbf{the}\;\mathbf{amount}\;\mathbf{due}\;\mathbf{a}\;\mathbf{marine}\;\mathbf{for}\;\mathbf{undrawn}\;\mathbf{cloth}$ 

ing on discharge?

Q. III. From what appropriation are marines subsisted when on board United States vessels and at Marine Barracks, respectively?

Q. IV. What is the commutation value of the Navy ration? Q. V. Are officers of the Marine Corps on duty at sea entitled to a Navy ration or commutation therefor?

Q. VI. What disposition is made of fines imposed on officers and men of the Navy

by court-martial?

Q. VII. When and to what amount may funeral expenses of a deceased naval officer be paid?

f Q. VIII. How does the promotion of an officer of the Navy on the retired list affect

his pay?

Q. IX. What is the penalty for temporary absence of enlisted men without leave? When is such absence considered desertion?

Q. X. What is required by the accounting officers in lieu of signatures to unsigned accounts on pay rolls of vessels?

- Q. I. What are the essential features of a pay roll of a post of the U. S. Marine Corps?
- Q. II. What are the principal vouchers required to support a pay roll of marines? Q. III. To what rates of pay are officers and enlisted men of the Marine Corps by law entitled?

Q. IV. What is required by law as preliminary to the making of purchases or procuring of services for the Marine Corps? What exception is made to these requirements?

Q. V. What is required by regulations from the quartermaster of the Marine Corps with regard to shipments of public property over lines of land-grant and bond-subsidized railroads?

Q. VI. What does the law require of the bond-subsidized railroads with regard to

the transportation of troops and property of the United States?

Q. VII. What disposition is made of the amount found to be due the bond-subsidized railroads for services rendered the United States?

Q. VIII. When a railroad company transports public property over a line sub-

sidized in part only, what is the rule in making a settlement for the services?

Q. IX. Where a railroad company duplicates its subsidized line between two points, and transports public property between those points over the unsubsidized line, what is the rule of settlement?

Q. X. Is the tariff issued by a railroad company taken by the accounting officers

as conclusive of "fair and reasonable rates" requeed by law?

Q. I. How may a seaman who has served ten or twenty consecutive years in the Navy gain admission to the Naval Home at Philadelphia, Pa.?
Q. II. What constitutes the Navy pension fund, and who is custodian of the same?

Q. III. To whom do pension agents render their accounts? Q. IV. Who are entitled to the accrued pension due deceased pensioners under section 4718 of the Revised Statutes?

V. How are pension vouchers prepared and paid?

Q. VI. In what cities are the Navy pay officers located and what are their duties? Q. VII. How is money obtained by a disbursing officer?

VIII. When accounts are settled in the Fourth Auditor's office and passed upon by the Second Comptroller, who are notified of said settlements?

Q. IX. When are the pension agents required to render their accounts?

 $\hat{\mathbf{Q}}$ . X. How are the balances in the hands of pension agents disposed of at the close of each fiscal year?

Q. I. When does the pay of an appointed officer in the Navy begin?

Q. II. When does the pay of a promoted officer in the Navy begin? Q. III. To what rate of pay is an officer of the Navy entitled when traveling to enter on duty in obedience to orders?

Q. IV. To whom is paid the balance due a deceased officer or enlisted man at date of death?

Q. V. Under the general law what amount is allowed an officer of the Navy for loss of clothing by shipwreck?

VI. Under the same law what is the amount allowed enlisted men for loss of personal effects?

Q. VII. By what authority is the pay of enlisted men of the Navy fixed  ${
m \$}$ Q. VIII. How is the pay of enlisted men of the Marine Corps regulated?

Q. IX. Within what period must a man in the Marine Corps reculist to entitle him to additional pay?

Q. X. What is the rate of mileage allowed to officers of the Navy when traveling under orders within the United States?

# FIFTH AUDITOR.

Q. I. When was the Fifth Auditor's office created?

Q. II. What are the general powers of the Fifth Auditor for determining and adjusting accounts?

 $m \widetilde{Q}.$  III. The Fifth Auditor is assigned accounts for adjustment arising under which

of the Executive Departments?

- Q. IV. What is the substance of the Treasury rule for the guidance of officials in forwarding reports, accounts, certificates of deposit, or papers of like character, and
- when shall they be accompanied by a letter of transmittal?

  Q. V. Give the substance of Treasury Rule XII, regulating the withdrawal by or the furnishing of accounts or papers in the files of the Department, or copies of the same, to any person.

Q. VI. How old is the consular service of the United States, and how were United States consuls originally provided for?

Q. VII. What documents do consuls receive, and whence, from which they derive their powers?

Q. VIII. What are the principal duties of consular officers?

Q. IX. How is a consul's salary affected by his being appointed temporarily to perform diplomatic duty in the absence of the minister?

Q. X. What diplomatic and consular officers of the United States are at present entitled to receive salary for time "while receiving instructions?"

Q. I. What is the legal title of this bureau?

Q. II. When [in what year] was the first Fifth Auditor appointed?
Q. III. What is the present organization of the office?
Q. IV. What accounts were assigned to this office at its organization?
Q. V. What principal accounts have been assigned to this office since its organi-

- Q. VI. What is the substance of the rule of this Department respecting the fur-
- nishing of copies of accounts or documents of any kind on file in the Department? Q. VII. What is the provision of law in respect to the Auditor administering oaths?

Q. VIII. To what extent is the action of the head of a Department binding upon

the accounting officer?

Q. X. To what extent does the action of Auditor or Comptroller bind each the other officer?

Q. IX. What course should a subordinate pursue in a case when he differs in opinion from the action directed by the Auditor?

Q. I. What is the provision of law or regulation for adjusting the salary of a consulate during the leave of the principal officer, say for ninety days, in the United States?

Q. II. What would be the effect, if any, on allowance of salary to principal officer on leave if a newly appointed consul should take charge before the expiration of

statutory leave of old consul?

Q. III. When would the salary of the principal officer commence again after the lapse of his statutory leave?

Q. IV. If a consul should go on a special mission by order of his Department, prior to his reaching his post of duty, occupying, say, one month in excess of maximum transit, what would be the effect upon his salary as consul?

Q. V. If a consul should be sent by his Department away from his post on special

mission, how would his salary be affected thereby?

Q. VÍ. The masters of what vessels are required to pay United States consular officers the Treasury fees?

Q. VII. What is the amount and character of a consular fee for corrected invoice? Q. VIII. What is the character of a fee for consular certificate to household effects?

Q. IX. Example of loss by exchange: Gross amount of draft on London £30. Rate of exchange 332d. The proceeds were received in a foreign coin worth .699.

Wanted loss or gain, and how much?

Q. X. If a consul should receive \$2,000 during the year from his consular agencies, \$1,550 of said amount being his half of fees collected at three agencies, no one of them having collected more than \$1,000 per annum, and should deposit \$1,000 in the Treasury, how will the account stand?

Q. I. How are the United States consular officers classified?
Q. II. How long may a consular officer delay rendering his accounts to this office and paying over the balances of moneys due to the United States, without incurring the penalty of the law?
Q. III. What are the regulations respecting the currency and the language in the

rendition of foreign vouchers and accounts?

Q. IV. What is the precedence of accounts as required by the regulations, in applying fees to the payment of consular salary and expenses?
Q. V. In what manner, as a rule, are payments made on consular accounts for offi-

cial services to American vessels and seamen, and to whom?

Q. VI. What pay can a consul receive while in charge of a legation?
Q. VII. A consul in Germany has a balance to remit to the London bankers; he buys a draft on London for which he pays 1,575 marks, at the rate of 206 per pound

How much should he be credited with as loss by exchange? sterling.

Q. VIII. A consul received his commission and took the oath of office on May 12, 1890; started for his post of duty on June 11 and arrived there July 10; he received his exequatur August 6 and entered upon the duties of his office on the day following. From what appropriations should his salary be paid for the periods named, and until September 30?

Q. IX. From July 1, 1890, to February 28, 1891, the fees collected at a consular agency amounted to \$1,745. On March 1 a new agent took charge of the office and during the remainder of the year collected \$277.50 of fees. What disposition should

be made of the fees in stating the consul's account at the close of the fiscal year?

Q. X. A consul's quarterly accounts are for salary, \$500; contingent expenses, \$145.50; clerk hire, \$75, and official fees, \$653. He draws a draft on the Secretary of the Treasury for the balance, which is paid out of the appropriation for salaries, consular service. State the several accounts and write out the necessary warrants and counter warrants thereon.

Q. I. What is Internal Revenue? Give a general view of the process of collecting o Internal-Revenue duties

Q. II. What commodities are affected by the Internal Revenue, and state the

amount of tax levied on each?

Q. III. Give an account of the processs by which a collector receives funds from which to defray the expenses of collecting the Internal Revenue. May he use therefor the funds received from Internal-Revenue duties?

Q. IV. Give the process in detail by which a collector of Internal Revenue receives

credit for the funds derived from Internal-Revenue duties.
Q. V. What is a warrant? What are the principal kinds of warrants? State the difference between a "revenue-covering warrant" and an "accountable warrant."
Q. VI. Give in detail the method used to transfer a balance due to a disbursing

- officer from the United States on one appropriation, to his credit on a different appropriation
- Q. VII. With what items is the Collector of Internal Revenue charged and with what items credited in the adjustment of his accounts as collector? With what items as disbursing agent?

Q. VIII. Explain what is meant in the adjustment of the collector's account by

"duplicate charges on lists" and what by "abatements." Q. IX. In the case of the death of a collector does the acting collector receive sal-

- ary as deputy or as collector? Q. X. Are commissions on receipts allowed to all collectors, and if not why are they paid to some and not to others? And upon what collections are such commissions based?
- Q. I. What principal classes of accounts are adjusted in the division in which you are emyloyed?

Q. II. What disbursing officer's accounts are adjusted in your division?

Q. III. How are funds obtained by disbursing officers?

- Q. IV. Name the different classes of Internal-Revenue stamps for which accounts are adjusted in your division?
- Q. V. Describe the manner of verifying the statements of stamps received by the Commissioner of Internal Revenue?

Q. VI. How does a revenue agent receive his compensation for services, and how

for expenses?

Q. VII. When is a revenue agent entitled to commutation of subsistence and at what rate?

VIII. What is the legal limitation of time in which Internal-Revenue stamps can be redeemed?

Q. IX. What are "drawback" accounts?

- Q. X. Give the usual method of disposing of an account in your division from the time of its receipt.
- Q. I. In the course of work, as done at present, how would you enter in your monthly report of work the copying by you of one hundred consular reports and one hundred Alabama judgments?
- Q. II. If, in the customary work of the office, you should copy during the month two hundred and fifty consular accounts and Mrs. R. two hundred, how should you report the number you compared, considering, of course, that you and she worked together as usual?

Q. III. What, if any, different course is to be pursued in disposing of an account after copying a Comptroller's certificate differing from the Auditor's?

- Q. IV. If several accounts are received by you at the same time, for different fiscal years, for copying in the same record book, which of them should be copied first? Q. V. In what record book should a consul's account for an interpreter's salary be
- recorded? Q. VI. In what record book should an account for "estates of decedents' trust
- fund" be recorded? Q. VII. In what record book should an account for loss by exchange on an account of a chargé d'affaires, ad interim, be recorded?

Q. VIII. What step next follows the copying and initialing of a report?

- Q. IX. If an error should be detected in the copy while comparing, at what point in the progress of the work should it be corrected?

  Q. X. What step follows next in the order of work on an account after comparing
- the copy?

## SIXTH AUDITOR.

Q. I. What accounts are audited by the Sixth Auditor?
Q. II. To what officer, and within what time, may an appeal be taken from the official decision of the Sixth Auditor?

Q. III. From what officers does the Auditor receive the following-named official

information:

(a) Notice of the action of the Post-Office Department concerning the mail serv-

(b) Notice as to items affecting the stamp accounts of postmasters.

(c) Notice of the establishment, discontinuance, and change of site of post-offices,

and all changes of postmasters, Presidential as well as fourth class.

Q. IV. What rates of commission or fees are chargeable for the issue of a postal note, a domestic money order, and an international money order, each of the value of \$4.99?

Q. V. What is the maximum amount for which a domestic order may be issued

and for which a postal note may be issued?

Q. VI. Within what time must money orders be presented for payment? Q. VII. Within what time must postal notes be presented for payment?

Q. VIII. How many indorsements are permitted on a money order?

Q. IX. If an international order be spoiled in issuing, what blanks must the postmaster transmit with his statement? Q. X. What is a "repaid" money order?

NOTE.—The three questions marked I, II, and III are general, and were given to all the candidates and constitute a part of each group of ten.]

Q. IV. What is the difference between a money order and a postal note? Q. V. What is necessary to make a money order a valid voucher for its payment? Q. VI. Under what circumstances do money orders and postal notes become invalid?

Q. VII. Under what circumstances and by whom may duplicate money orders and postal notes be issued?

Q. VIII. How many postmasters obtain funds, when necessary, for the payment of orders and notes presented at their office?

Q. IX. How often and in what manner do money-order offices dispose of surplus money-order funds?

Q. X. What is a fixed reserve?

Q. IV. What are the duties of the collecting division?

Q. V. For what purpose, in whose favor, and by whom are Auditor's drafts issued? Q. VI. For what purpose, by whom, and against whom are Postmaster-General's drafts issued?

Q. VII. What is the limit of time of the liability of sureties on a postmaster's bond,

as it relates to the acts of the postmaster in the line of his duty?

Q. VIII. In case a late postmaster refuses or fails to comply with the Auditor's demand of payment of the balance due the United States, what is the next step in the process of collection?

Q.IX. How are allowances for supplies lost by fire and burglary treated, as they

relate to the accounts of postmasters under different bonds?

Q. X. What is the rule with reference to the application of payments made by a postmaster after he has given new bond?

Q. IV. How should the checker proceed to verify domestic money orders? Q. V. By whom must a domestic money order be signed to be a valid voucher?

Q. VI. What is a duplicate money order?

Q. VII. What is the duty of the checker if the amount of the money order, or

postal note, does not agree with the postmaster's weekly statement?

Q. VIII. When the checker discovers a discrepancy on the face of a money order between the amount stated in figures and in writing, what disposition is to be made of the order?

Q. IX. State an instance when a money order becomes invalid?

Q. X. What is a repaid money order, and by whom should it be signed?

Q. IV. By whom is this office notified of claims allowed for stamps stolen? Q. V. By whom should a postal account be rendered, no acting postmaster having been appointed on the death of the postmaster?

Q. VI. In the case of the death of the postmaster during a quarter, how should the

account be divided?

Q. VII. How do postmasters obtain credit for money paid on account of freedelivery service?

Q. VIII. By whom are railway postal clerks paid?

Q. IX. What is a credit slip? Q. X. Upon what are the salaries of postmasters of the Presidential class based?

Q. IV. What are the duties of the Assorting Division?

Q. V. Into how many classes is the Assorting Division divided?
Q. VI. In what manner are money-order vouchers first distributed in this division? Q. VII. What are the duties of the assorters assigned to the State and Territory "round tables?"

Q. VIII. What is meant by "assorting" money-order vouchers?

Q. IX. What is meant by numbering vouchers?

Q. X. How should an assorter proceed to number ten boxes of money orders issued at the same office?

Q. IV. What are the duties assigned to your desk?
Q. V. What constitutes a quarterly postal account?
Q. VI. How are late postmasters' accounts treated, and in what way and by whom are they settled?

Q. VII. Upon what basis are postmasters' salaries of the fourth class computed

and how paid?

Q. VIII. How do postmasters obtain credit for payment of balances due on their postal accounts?

Q. IX. What are the requirements necessary before a fourth-class office can be

raised to the third class?

- Q. X. State what accounts, other than postal, are kept in the Bookkeeping Division.
- Q. IV. State, in a general way, what work is done in the division in which you are employed.

Q. V. Describe the particular work on which you are employed. Q. VI. Name the different kinds of service employed in transporting the mails, the accounts for which are audited in the Pay Division?

Q. VII. What is the difference between railroad and star service as to the basis of

Q. VIII. If a contractor receives \$480 per annum for carrying mails three times a week over a route 15 miles in length, how much additional pay should be receive in case his service be increased to four times a week over 72 miles of the route?

Q. IX. What is mail-messenger service, and how is the pay of mail messengers

reported to the auditor?

 $\overline{\mathbf{Q}}$ . X. What is the compensation of special mail carriers, and how ascertained?

Q. IV. What are the duties of the Review Division?
Q. V. Can more than one-fourth of the yearly allowance for rent, light, and fuel be allowed in any quarter of the year; and, if so, when?

Q. VI. When postage stamps, stamped envelopes, etc., ordered by a postmaster are not received by him within the quarter in which issued by the Post Office Department, how are they to be treated in his account?
Q. VII. How is the Sixth Auditor notified of the allowance to postmasters for

rent, light, and fuel, and from whom is such information received?

Q. VIII. From whom is authority received to credit postmasters for damaged stamps and envelopes returned to the Department?

Q. IX. When does a new bond given by a postmaster take effect?.
Q. X. State for what purposes Postmaster-General's drafts and Auditor's drafts are issued?

# TREASURER.

Q. I. What, in brief, are the duties of the Treasurer of the United States?

Q. II. In what manner are United States notes redeemed, and at what offices and in what amounts?

Q. III. What constitutes a repayment into the Treasury? Q. IV. What is meant by a counter-entry of a receipt into the Treasury, and by whom is it authorized?

Q. V. In what sums are national-bank notes redeemed, and by whom?

Q. VI. What legal-tender functions pertain to standard silver certificates? Q. VII. What steps are taken to get public moneys into the United States Treas-

ury, and by what authority is it paid out?
Q. VIII. What entry is made in general account when United States currency is forwarded for redemption and new currency sent in return?

Q. IX. What kind of security is required for the issue of national-bank circulation, and what amount of such currency is allowed to a bank having a capital of \$50,000 \$

Q. X. When the Treasurer United States draws his check on the Assistant Treasurer United States, New York, for a deposit of currency or coin in the United States Treasury, what account is charged?

· Q. I. In what respects do registered bonds differ from coupon bonds?

Q. II. How is interest paid on coupon and registered United States bonds of the funded loans of 1881, 1891, and consols of 1907?

Q. III. Give the denomination of coupons and the days of the year when payable on the following loans, viz: (a) Oregon war debt; (b) loan of July and August, 1861; (c) loan of 1863; (d) 5-20s of 1862; (e) 5-20s of June, 1864; (f) 5-20s of 1865; (g) consols of 1867; (h) 10-40s of 1864; (i) funded loan of 1881; (k) funded loan of 1891; and (l) consols of 1907.

Q. IV. State briefly the duties of the counters of paid coupons.

Q. V. Prepare on blanks herewith "statements" of the following-described called consols of 1865, received for redemption from the First National Bank of New York:

Coupon bonds, \$50s, Nos. 70005 to 70010, inclusive; \$100s, Nos. 124003 and 126999; \$500s, No. 86000; \$1,000s, Nos. 168991 to 169000, inclusive; coupons attached from January 1, 1879, inclusive, on all bonds except \$100 bond No. 126999, which has coupons on from July 1, 1879, inclusive. Registered bonds: \$5,000, No. 10500; \$1,000, Nos. 20401 and 20501, inscribed in the name of John Smith, and properly assigned

for redemption for account of Richard Doe. Q. VI. Make "statement" of bonds of the 5 per cent funded loan of 1881 continued at 3½ per cent, included in one hundred and twentieth call, received for redemp-

tion from August Belmont & Co., viz:

(a) Two bonds of \$1,000, one of \$5,000, inscribed in the name of the Treasurer United States, in trust for the First National Bank, Clinton, Iowa, assigned by the Treasurer United States to the bank, and subsequently by August Belmont & Co. to the Secretary of the Treasury for redemption, under a power of attorney from said bank.

(b) One bond of \$10,000 assigned by the payee, John Smith, trustee, to the Secre-

tary of the Treasury for redemption for account of John Smith. Q. VII. Prepare "statement" of bonds of the 3 per cent loan of 1882, of the one hundred and thirty-fourth call, received for redemption from the payee, First National Bank of Chicago, Ill., properly assigned "for account of the First National Bank of New York, N. Y.," viz, one of \$50, two of \$100, one of \$500 and six of \$1,000

Q. VIII. Name the loans on which the registered interest was formerly and is now

- paid by check.
  Q. IX. On what condition was interest prepaid under Department Circular No. 90, dated August 3, 1887? Q. X. When may coupons from called bonds, bearing date subsequent to the date of maturity of the call, be accepted for their full face value?
- Q. I. How is the interest paid on bonds held by the Treasurer of the United States as security for public funds deposited with national banks?

Q. II. What offices are authorized to pay coupons from bonds of the District of

Columbia

- Q. III. What is done with mutilated coupons lacking date? Q. IV. State the rule governing the conversion of United States refunding certificates.
  Q. V. What will the owner of 17 United States refunding certificates receive pre-
- sented for conversion on October 1, 1891?
- Q. VI. What are the requirements relating to assignments of United States bonds registered in the name of a bank?
- Q. VII. State the rule governing payments for registered bonds purchased during the month immediately preceding the interest date.

Q. VIII. When did interest on the bonds of the funded loan of 1891 cease?

Q. IX. When and upon what condition could holders of these bonds obtain in advance the interest accrued from June 1, 1891, to date when interest ceased?

- Q. X. What record is made of moneys received from postmasters on account of sales of stamps?
- Q. I. What interest was obtainable before maturity by the offer contained in Secretary's circular of August 3, 1887, and on what terms?

Q. II. State mode of prepayment of interest on coupon and registered bonds?
Q. III. What disposition is made of the rebate deducted in prepayment of interest?

Q. IV. The Treasurer receives on November 14, 1887, from the subtreasurer, New York, \$10,000 in canceled coupons, including \$1,000 dated January 1, 1888, paid with a rebate of \$3.56. With what amount is the subtreasurer credited and why?

Q. V. On September 28, 1887, the Treasurer received for payment \$8,000 in 4 per cent bonds (\$2,000 coupon and \$6,000 registered), purchased from John Smith, of Buffalo, N. Y., by the Department at a premium of 25 per cent. The coupon bonds lacked the coupons due October 1, 1887, and the Register certified that on \$4,000 registered bonds the interest due January 1, 1888, had been prepaid. Give the amount due John Smith and a statement of the case sent him with the Treasurer's check, and also state how the transaction was reported to the Cash Division.

Q. VI. How is the interest paid on registered bonds deposited with the Treasurer United States as security for the circulation of national banks?

Q. VII. How is the quarterly interest paid due May 1, 1887, on 3 per cent bonds included in the one hundred and forty-eighth call, matured that day?

Q. VIII. What is done with interest checks paid on an imperfect indorsement? Q. IX. What evidence is required for the acceptance of the indorsement of Richard Doe, attorney, on interest check drawn to order of "trustees of Eureka Lodge, No. 10, I. O. O. F., New York, N. Y.?"
Q. X. State the rule governing indorsements of checks for interest on United States

bonds registered in the name of a deceased trustee of an estate.

Q. I. What, in brief, are the duties of the chief clerk of the United States Treas-

Q. II. What is done with checks, drafts, and money returned unclaimed?

Q. III. What steps are necessary to obtain a duplicate of a lost transfer or interest check of Treasury draft?

Q. IV. What record is kept of such transactions, that is, applications for duplicate

checks and drafts, and what is done in each case?

Q. V. State briefly what disposition is made of all important official letters received by the Treasurer?

Q. VI. What record is kept by the chief clerk as to the history and payment of

the officers and employés of the Treasurer's office? Q. VII. In the process of the redemption of United States notes and silver certifi-

cates, what disposition would you make of a note found to be unscaled?
Q. VIII. At what stage in their preparation do United States notes or silver cer-

tificates have any value as money? Q. IX. At what rate of discount are mutilated United States notes, gold certifi-

cates, and silver certificates redeemed?

Q. X. What is the nature of circular No. 55, of March 23, 1889, issued by the Treasurer United States?

Q. I. What, in brief, are the duties of the chief clerk of the office of the Treasurer of the United States?

Q. II. State what disposition is made of all important official letters received by

the Treasurer of the United States.

- Q. III. What steps are necessary in order to obtain a duplicate of a lost transfer or interest check or draft, and what record is kept of such transactions?
- Q. IV. What disposition is made or checks, drafts, and money returned unclaimed? Q. V. What system has been adopted for keeping the records of the Treasurer's office in the files room in charge of the chief clerk?

Q. VI. Under what conditions can books, papers, and records be withdrawn from the files

Q. VII. Will the Treasurer of the United States permit any paid draft or check to pass out of his custody?

Q. VIII. Why are all manuscript letters from the office recopied in a register?
Q. IX. For what purpose is a "Register of Letters Received" kept?

Q. X. How can copies of checks, drafts, or of official records in the Treasurer's office be obtained?

Q. I. Give the definition of a Treasurer's "Agency Account," and cite examples. Q. II. Assuming that the Treasurer had no "Transfer Account" with the subtreasury at Chicago, what steps would be taken to open such an account, and what entries would be made on the books of the Cash Division?

Q. III. To whom, in what sums, and for what class of funds are certificates of deposit, act of June 8, 1872, issued? What disposition is made of the money so re-

ceived?

Q. IV. A transfer check drawn June 30, 1888, on the assistant treasurer of the United States at New York was paid and charged July 1, 1891, by that officer; what steps, if any, are required in the settlement of this item?
Q. V. Name the classes of gold certificates now issued by the Department, and

give distinguishing features.

Q. VI. The amount of United States notes outstanding is limited by law to \$346,681,016; in what way is the law complied with when such notes, unfit for reissue, are redeemed and destroyed, and what entries are made on the books of the Cash Division?

- Q. VII. How are Treasury notes of 1890 primarily put in circulation?
  Q. VIII. What provision of law determines the outstanding amount of such notes?
- Q. IX. In which of the Treasurer's accounts are moneys credited that have been received from postmasters on account of sales of stamps, and in what manner are such funds disbursed?

Q. X. What does the Treasurer's account with the Comptroller of the Currency

represent?

Q. I. Name some of the vouchers paid by the paying teller.

Q. II. What are some of the requirements to be complied with in the indorsements of checks and drafts before being paid?

Q. III. How are payments made for minor coin forwarded to an assistant treas-

urer for redemption?

Q. IV. What distinction or difference is made between the "general" and "transfer" accounts of the Treasurer?

Q. V. When and how is the registered interest on the public debt paid?
Q. VI. What is a "transfer order" and for what purpose is it issued?
Q. VII. How are members of the House of Representatives paid?

Q. VIII. At what periods and in what way are the transfer accounts of the Treasurer balanced or settled?

Q. IX. What metho the Treasurer's office? IX. What method is followed by a disbursing officer to open an account with

- Q. X. How can a bank procure silver coin from the Treasury, or what regulations govern its issue?
- Q. I. Under what provision of law are silver certificates issued, and to what extent is their issue limited?

Q. II. As no money can be paid out of the Treasury except by warrant of the Secretary of the Treasury, state upon what the issue of such warrant is based.

Q. III. How is the accountability of moneys advanced to a United States disburs-

ing officer ascertained?

Q. IV. The emoluments of some public officers are from fees for services; state how these items are carried into the account of receipts and expenditures of the United States?

Q. V. How is the Treasurer reimbursed for interest paid? Q. VI. How is the loss on recoinage of silver coin made good in the Treasurer's general account?

- Q. VII. How does profit on minor coinage arise?
  Q. VIII. What is seigniorage, and how is it brought into the Treasurer's general account
- Q. IX. From what fund is the express charge on silver coin shipped from the mints paid?
  - Q. X. Can gold coin be exchanged for gold bars? If so, where, and in what sums?
- Q. I. Where is the making of United States currency begun and where finished? Q. II. At what stage in the making of United States currency do the notes become of value as money?

Q. III. What disposition is made of notes which are unavoidably mutilated or

defaced during the process of sealing or separating?

Q. IV. In the process of sealing United States currency state if there is any check upon the pressmen, or method of verifying their work, and if so, what?

Q. V. Who is primarily and ultimately responsible for all United States currency

received from the Bureau of Engraving and Printing?
Q. VI. Give the names of the persons whose vignettes appear upon the various denominations of United States currency.

Q. VII. What are the present authorized silver coins?

Q. VIII. In what amounts are subsidiary silver and minor coins redeemable?

Q. IX. In the redemption of United States coins what would you reject?
Q. X. What rule, if any, exists relative to the dismissal of employes for the day?

Q. I. What classes of money issued by the United States Government, when presented for redemption, are received by the Redemption Division?

Q. II. For what portion of a mutilated note will full value be given?

Q. III. What disposition should be made of half a note found in a remittance? Q. IV. On what account is money received from an assistant treasurer of the United States credited?

Q. V. How does the Redemption Division pay national banks for mutilated United States currency received from them?

Q. VI. How are national-bank notes received in mixed remittances disposed of by the Redemption Division?

Q. VII. What are the duties of the express clerk of the Redemption Division?

Q. VIII. What are the duties of a counter?
Q. IX. What are the duties of the teller?
Q. X. What are the duties of the delivery clerk?

Q. I. What bonds are at present available as security for the circulating notes of

national banks?

Q. II. By whose authority are bonds, held to secure the circulating notes of na-

tional banks, withdrawn?

Q. III. What kind of security, and in what proportion to the public moneys held by them, are national bank depositaries required to give?

Q. IV. If a bank has on deposit with the Treasurer five bonds of \$10,000 each, and wishes to withdraw \$25,000 of the bonds, how can such a withdrawal be made?

Q. V. What tax or duty is due from national banks to the United States, and how often is it collected?

Q. VI. If a bank fails or refuses to pay this tax, to what can the Treasurer resort for payment?
Q. VII. When were the sinking funds of the Central and Union Pacific railroads

created? Q. VIII. In what manner and by whose authority does the Treasurer make invest-

- ments for these sinking funds?
  Q. IX. When do the first-mortgage bonds of the Pacific railroads mature?
  Q. X. Of what bonds is the Treasurer custodian for the Secretary of the Interior?
- Q. I. Which of the general duties devolved upon the Treasurer is performed by the National Bank Redemption Agency?

Q. II. What denominations of national-bank notes are there in circulation? Q. III. How many series of national-bank notes are there, and what are they commonly called?

Q. IV. What fraudulent issues are chiefly to be guarded against in handling national-bank notes?

Q. V. How many numbers are there now printed on each national-bank note, and

what are they commonly called?

Q. VI. How much of a mutilated national-bank note must there be presented to make it redeemable for full face value, without proof of the destruction of the missing parts?

VII. Through how many processes requiring a separate count do notes pass in

the National Bank Redemption Agency, and what are the processes called?
Q. VIII. What, in brief, is the method or plan of assortment now employed in the National Bank Redemption Agency?

Q. IX. In what condition of preservation must a note be to be considered fit for

circulation?

- Q. X. In the absence of special directions, what disposition is made of notes fit for circulation, and what of those unfit for circulation, by the agency?
- Q. I. What, in brief, is the method or plan of assortment now employed in the National Bank Redemption Agency?

Q. II. What, in detail, are the duties of the first assorter?

- Q. III. What, in detail, are the duties of the second assorter? Q. IV. How is the second assorter informed of the special directions for the assort-
- ment of the notes of any bank? Q. V. How many series of national-bank notes are there and what are they called ? Q. VI. Which, if any of them, is treated by the National Bank Redemption Agency
- as all unfit for circulation? Q. VII. What denomination of national-bank notes are there in circulation? Q. VIII. What fraudulent issues are chiefly to be guarded against in handling
- national-bank notes?

Q. IX. How, in general, may these be distinguished from genuine notes? Q. X. How much of a mutilated national-bank note must there be left to make it receivable for full face value, without proof of the destruction of the missing parts?

Q. I. What are the duties of a first assorter? Q. II. What distinctive mark or characteristic of the notes is attended to in separating them in the first assortment?
Q. III. What are the "specials" in the first assortment?

Q. IV. What are the duties of a second assorter?
Q. V. What distinctive mark or characteristic of the notes must be attended to by the second assorter in separating the notes?

- Q. VI. What is the largest number of notes of any denomination that may be put into a strap?
  Q. VII. What is the smallest amount that may be put into a strap by a first as-
- sorter?
- Q. VIII. In what color of strap does the first assorter receive notes and in what color put them up?
- Q. IX. In what color of strap does the second assorter receive notes and in what color put them up?
  Q. X. What is the object of the process called proving?
- Q. I. Describe briefly the method or plan of assortment employed in the National Bank Redemption Agency.
  Q. II. When and by whom are the notes assorted by denominations?

Q. III. What, in detail, are the duties of a first assorter and of a second assorter? Q. IV. What are "specials" in the first assortment? Q. V. What is the largest number of notes of any denomination that may be put

- into a strap?
  Q. VI. What is the smallest amount that may be put into a strap by a first assorter
- and by a counter?
- Q. VII. How many series of notes has a bank whose charter has been extended
- and which was not retiring its circulation at date of extension?

  Q. VIII. Where a bank has only one series of notes and is not retiring its circulation, how are its notes separated?

  Q. IX. Where a bank has notes of the old series, series of 1875, and series of 1882,

and is not retiring its circulation, how are its notes separated? Q. X. What separation is made of the notes of a bank designated both "X" and "U" on the assorter's list, and what notes, if any, of such a bank are treated as fit for circulation?

#### REGISTER.

Q. I. By what act was the office of the Register created?

Q. II. Define, in general, the duties of the Register, as specified by that and subsequent acts, with reference to accounts.

 $\hat{\mathbf{Q}}$ . III. What is the duty of the Register in reference to balances of adjusted accounts?

Q. IV. Specify, in general, the nature of the work performed in the Division of the Receipts and Expenditures.

Q. V. What is an accountable warrant? Q. VI. What is a settlement warrant?

- Q. VII. Describe the nature of the work performed in the Note, Coupon, and Cur-
- rency Division.
  Q. VIII. Specify the United States loans now outstanding upon which interest is paid.

Q. IX. Describe the nature of the work performed in the Division of Loans.

Q. X. For what purpose was the Division of "Interest and Expenses on Loans" created?

Q. I. Define the nature of your duties in the Register's Office.

- Q. II. Enumerate the general classes of accounts received in the Register's Office. Q. III. Specify, in order, the officers auditing and certifying Treasury and judi-
- ciary accounts. Q. IV. Specify, in order, the officers auditing and certifying diplomatic and inter-
- nal revenue accounts.
  - Q. V. Specify, in order, the officers auditing and certifying customs accounts. Q. VI. Specify, in order, the officers auditing and certifying land accounts. Q. VII. Where do transportation accounts originate? Q. VIII. Who audits and certifies to said accounts?

- Q. IX. On whose order only can accounts be withdrawn from the files of the Register's Office?
  - Q. X. State, in order, the papers constituting an account.
- Q. I. In what books in the Register's Office are the accounts of the United States ministers and consular officers kept?
  - Q. II. Explain the manner of keeping personal accounts?

Q. III. Name the different classes of receipt warrants?
Q. IV. For what purpose are certificates furnished?
Q. V. What is the difference between an accountable warrant and a chargeable settlement warrant?

Q. VI. Who are the United States fiscal agents in London, England, and what are their duties in relation to the accounts of United States diplomatic officers?

Q. VII. Are the personal ledgers in the Register's Office kept by single or double entry?

Q. VIII. What part of personal ledger work is journalized?
Q. IX. What is done with a balance outstanding on the personal ledgers, when an officer goes out of office?

Q. X. From what offices are accounts received in the Registers Office?

Q. I. By whom and where are coupons redeemed?

Q. II. Through what Bureaus of the Treasury Department do redeemed detached coupons pass in transit to the Register's Office?

Q. III. Give a full and detailed account of the manner of disposing of redeemed

detached coupons after they are received in the Note, Coupon, and Currency Division. Q. IV. Give the authorizing acts, length of loan, when redeemable, rate of interest, manner of payment, and months of maturity of interest in each year of coupon bonds of the loan known as the "funded loan of 1891."

Q. V. Describe a numerical register and the method of entering therein redeemed

coupons.

Q. VI. What is a coupon bond? Q. VII. How many coupons are attached to a bond of the 1907's when issued? Q. VIII. What value does a coupon on a \$50,000 bond of the 1907's represent?

Q. IX. When are coupons redeemable? Q. X. Name the different denominations of the coupon bonds of the "Funded Loan of 1891," with the denomination of the coupons attached to each.

Q. I. When is a coupon on a bond payable?

Q. II. How many coupons are attached to a coupon bond when issued?

Q. III. What does a coupon represent? Q. IV. When are coupons not redeemable?

Q. V. By whom and where are coupons redeemed?

Q. VI. Through what bureaus of the Treasury Department do redeemed detached

coupons pass in transit to Register's Office?

Q. VII. Give briefly the general method and manner of handling coupons, the different processes, and explanatory reasons therefor, and the successive order of the work observed in preparing them for file when delivered to the Note, Coupon, and Currency Division.

Q. VIII. Describe a numerical register and the mode of entering redeemed de-

tached coupons.

Q. IX. Name the month or months of maturing coupons on the coupon bonds of the consols of 1907.

- Q. X. Name the month or months of maturing coupons on the coupon bonds of the funded loan of 1891.
- Q. I. What are the principal books used in the Loan Division of the Register's office?
  - Q. II. What are the principal differences between coupon and registered bonds?

Q. III. Describe the process of transferring registered bonds.

Q. IV. On what loans is the Government paying interest?
Q. V. When are dividends payable on each loan?

Q. VI. In case of the death of John Smith, who would be authorized to assign a bond standing in his name?

VII. Describe a numerical register and its uses.

Q. VIII. Who could assign a bond inscribed in the name of the First National Bank of Jonesboro, Alaska?

Q. IX. In the above case what proof of authority would be required?

- Q. X. Through what bureaus does a redemption of bonds pass?
- Q. I. Who was the first Register of the Treasury and when was he appointed? Q. II. When was the office of Assistant Register created?

Q. III. Name the divisions now existing in the Register's office in the order of seniority.

Q. IV. How many employés are there in the Register's office, of what classes, and at what salaries?

Q. V. What is the amount of the appropriation for the service of the office of the Register for the fiscal year ending 1893?

Q. VI. How is the title or ownership to United States registered bonds passed? Q. VII. How is the title or ownership to a coupon bond passed? Q. VIII. How often is the interest paid on the 4-per cent loan; who certifies to interest schedule; and how is the interest paid?

Q. IX. What record of a registered bond is made in the Register's office?

Q. X. How can a person become the owner of a registered bond at the present time?

Q. I. By what act was the office of Register created?

Q. II. Define, in general, the duties of the Register as specified by that act.

Q. III. How is the Assistant Register appointed? Q. IV. What are the duties of the Assistant Register?

Q. V. In the absence of the Register and the Assistant Register, who can perform the duties of Register?

Q. VI. What duties are assigned to the clerk on duty in the Register's room? Q. VII. What letters received, and what answered in correspondence are preserved in the Register's room, and what in the various divisions?

Q. VIII. How many divisions are there in the Register's bureau, and what are the general subjects in charge of these divisions?

Q. IX. In what divisions does the transaction of business call for knowledge of

French, Spanish, and German?
Q. X. What languages do you understand, and to what extent do you understand them, respectively?

## COMPTROLLER OF THE CURRENCY.

Q. I. What reserve is a national bank required to hold and how are banks classified according to the place at which the reserve may be held?

Q. II. In case the reserve falls below the legal requirement what penalty attaches? Q. III. To what extent, if any, are national-bank notes a legal tender? Q. IV. What rate of interest may national banks legally charge?

Q. V. What is the penalty for charging a rate of interest greater than that allowed by law?

Q. VI. What are the provisions of law relating to dividends? Q. VII. What are the provisions of law relating to the extent to which loans may be made to any person, company, corporation, or firm?
Q. VIII. What is the limit to the indebtedness of a national bank and what the

exceptions thereto?

Q. IX. What reports are national banks required to make to the Comptroller of the Currency?

Q. X. What, if any, limit does the national-bank act place upon taxation of national banks?

Q. I. What is necessary to be done to secure the designation of a city as a reserve or central reserve city?

Q. II What is the limit of indebtedness an association may incur? Q. III. What are the qualifications of directors and of how many directors must a board consist?

Q. IV. For what obligations are national-bank notes not a legal tender?

- Q. V. By whom and what amount are national-bank examiners paid? Q VI. Under what circumstances, except insolvency, is the Comptroller authorized to place an association in the hands of a receiver?
- Q. VII. Who only are preferred creditors of an insolvent association? Q. VIII. What proceedings are necessary to secure the change of the title or location of a national bank?

- Q. IX. How are vacancies in a board of directors filled? Q. X. What is the limit of liability of a shareholder of an association in case of insolvency?
- Q. I. How do the aggregate resources of State banks, loan and trust companies, savings and private banks, received from official sources, compare with those of national banks ?

Q. II. Give an approximate amount.

Q. III. How is it that statistics as to State, savings banks, etc., appear in the report of the Comptroller of the Currency?

Q. IV. How is the information obtained, and how is a deficiency supplied?
Q. V. Arrange the following items under the appropriate heads of "Resources" and "Liabilities:" overdrafts, State, county, and municipal deposits, current expenses and taxes paid, United States bonds, surplus fund, State bank notes outstanding, dividends unpaid, real estate, furniture and fixtures, bank stock, capital stock, and individed profits and undivided profits.

Q. VI. Are the notes of any person, or State banking association, used for circulation and paid out by a national bank, taxable under United States statutes; if so,

at what rate?

Q. VII. What is the present tax on deposit of national banks?
Q. VIII. Who was the first Comptroller of the Currency?

Q. IX. How, by whom, and for what period is the Comptroller of the Currency appointed, and how and by whom can he be removed?

Q. X. What are the steps which the law contemplates should precede the appoint-

ment of a receiver of a national bank?

Q. I. Give the general character of the books and accounts kept by you in the division of issues, and any other work performed.

Q. II. Under what two acts are entries of additional circulation now made on the

respective journal and ledger accounts?
Q. III. What accounts of additional circulation were kept prior to 1875, and what was the date of the acts under which entries were made?

Q. IV. What was the object of posting additional amounts of circulation issued to

accounts of States prior to 1875?

- Q. V. What effect did the act passed in 1875 have upon the apportionment of circulation among the States and Territories?
- Q. VI. What issue comes under the head of "Additional circulation to new banks?"  $ilde{\mathbf{Q}}$ . VII. What difference is there between an issue of currency on bonds deposited an on account of mutilated notes destroyed, as affecting the volume of national-bank currency outstanding?

Q. VIII. What issues of currency are reported to the United States Treasurer as

the basis on which to calculate the five-per-cent redemption fund?
Q. IX. Why are shipments under section 6, act of July 12, 1882, not reported to the Treasurer?

- Q. X. What records do you make of original and duplicate plates engraved by the Bureau of Engraving and Printing?
- Q. I. How many times in a year are national banking associations required by law to report their condition to the Comptroller of the Currency?

Q. II. State the process of examination of a national bank's report of condition. Q. III. By how many directors must a national bank's report of condition be at- ${f tested}$  ?

Q. IV. State in brief the requirements of the act of February 26, 1881.

Q. V. Name the various forms of currency which a national bank is permitted to count as a lawful-money reserve.

Q. VI. What portion of a national bank's lawful-money reserve may be kept with approved reserve agents in the case of banks located outside of reserve cities? In the case of banks located in reserve cities not central?"

Q. VII. Name the "reserve" cities, the "central" reserve cities.
Q. VIII. Give definition of "bad debts," as contained in section 5204, U. S. R. S. Q. IX. What is the limitation to the liability of a bank for money borrowed, prescribed by section 5200, U. S. R. S.?

Q. X. How long may a national bank, under section 5137, U. S. R. S., hold real

estate taken for debt?

- Q. I. State the different accounts upon which incomplete national-bank notes are issued.
- Q. II. How does the issue of currency on bonds deposited affect the amount of circulation outstanding?

Q. III. Explain briefly the method of redeeming mutilated notes under the act of

June 20, 1874, and the issuing of incomplete currency to replace the same.
Q. IV. To whom, and for what purpose, is the weekly report of additional circu-

lation made?

Q. V. Explain the method of balancing the shipping clerk's schedule. Q. VI. Which items are debited and which credited in the entries of the vault

clerk's ledger account?
Q. VII. When a bank liquidates what disposition is made of its unissued currency

on hand in the office?

Q. VIII. For what purpose is the daily report of currency received, made to the

- Division of Loans and Currency, Secretary's office?
  Q. IX. When a withdrawal of bonds is made and lawful money deposited to retire a corresponding amount of circulation, what change is made in the circulation account of a bank?
- Q. X. Under what act of Congress were the designs of bank notes known as the "brown backs" issued  $\P$
- Q. I. How many persons are required to form a national banking association? Q. II. In organizing a national bank, how is the capital stock paid to the associa-
- tion ? Q. III. In organizing a national bank, at what time does the association become a body corporate?

Q. IV. State the minimum capital stock required for a national bank established in a place the population of which does not exceed 6,000 inhabitants.

Q. V. State the minimum capital stock required for a national bank established in a place the population of which is 9,500 inhabitants.

Q. VI. State the minimum capital stock required for a national bank established in a place the population of which exceeds 55,000 inhabitants.

Q. VII. What amount of bonds must a national banking association deposit with the Treasurer of the United States, the capital stock of which bank is \$60,000 ?
Q. VIII. What amount of bonds must a national banking association deposit with the Treasurer of the United States, the capital stock of which bank is \$160,000?

Q. IX. How is an increase of the capital stock of a national banking association effected?

Q. X. How is the reduction of the capital stock of a national banking association effected?

Q. I. Upon what are issues of circulation to national banks based? Q. II. What is the authority for the entry of transactions of banks in bonds, and

also of capital stock?
Q. III. What does the "retired circulation" represent?

Q. III. What does the "retired circulation" represent?
Q. IV. What is the method of computing the outstanding circulation of national banks?

Q. V. When can the account of a national bank be finally closed? Q. VI. What does the debit side of "lawful money redemption account" represent, and also the credit side?

Q. VII. What is the compensating account of "sundry banks-issues?" Q. VIII. When can the old circulation account of a bank be closed?

- Q. IX. Name the accounts represented in the general ledger.
  Q. X. Make the required journal entries of a bank that has deposited lawful money to reduce its circulation, and while so doing has gone into voluntary liquidation, and while in process of liquidation has been placed in the hands of a receiver as an insolvent bank.
- Q. I. What are your regular duties in connection with the Redemption Division of the office of the Comptroller of the Currency?

Q. II. Describe in a general way the work of the Redemption Division.

Q. III. From what source is the national-bank currency received by this division? Q. IV. How many kinds of money are received from the Treasurer of the United States?

Q. V. Explain the purport of the different-colored memoranda on the packages of currency as received from the Treasurer of the United States.

Q. VI. What record and final disposition is made of the currency of insolvent

banks? Q. VII. What record and final disposition is made of the currency of liquidating banks?

Q. VIII. What record and final disposition is made of the mutilated currency of

banks in active operation?

Q. IX. What record and final disposition is made of the unfinished sheets of national-bank notes received from the Bureau of Engraving and Printing on statistical account?

Q. X. In what manner can an active bank reduce its circulation?

Q. I. How, by whom, and for what period is the Comptroller of the Currency appointed?

Q. II. Give in a general way the duties of the Comptroller of the Currency.

- Q. III. Give the names of all those who have occupied the office of Comptroller of the Currency.
- Q. IV. State how many divisions exist in the Bureau of the Comptroller of the Cur-

rency, and designate them.
Q. V. Describe in a general way the work assigned to each division.
Q. VI. For what period of time is a national bank organized?
Q. VII. If a bank has \$25,000 in bonds on deposit, what amount of circulating

notes is it entitled to receive? Q. VIII. What percentage of the amount of its circulation is each bank required to keep on deposit with the Treasurer of the United States for the redemption of its

circulating notes?
Q. IX. How many reports of condition must the Comptroller of the Currency require every association to make during each year?

Q. X. In case a bank becomes insolvent, who appoints the receiver?

## COMMISSIONER OF INTERNAL REVENUE.

Q. I. What is the rate of tax per gallon on distilled spirits, and what special taxes are required of wholesale and retail dealers in distilled spirits?

Q. II. How are fractional parts of a gallon of distilled spirits taxed and what is

the exemption?

Q. III. State in round numbers the gross receipts from internal-revenue sources

as given in the last report of the Commissioner?

- Q. IV. State in a general way the duties of the Commissioner of Internal Revenue under the act to prevent the manufacture or sale of adulterated foods or drugs in the District of Columbia.
- Q. V. What is the rate of tax per pound on eleomargarine, and what special taxes are required of manufacturers of eleomargarine, wholesale dealers in eleomargarine, and retail dealers in oleomargarine, respectively?

  Q. VI. What are some of the provisions of the pending tariff bill relating to in-

ternal revenues?

Q. VII. What is the evidence of the payment of the tax on articles taxed?

Q. VIII. Under what conditions may imported cigars be put upon the domestic market, import duty being paid?
Q. IX. To what department does the Solicitor of Internal Revenue belong?

Q. X. By whom are assessments of internal-revenue taxes made?

Q. I. What are the duties of the Solicitor of Internal Revenue?

- Q. II. What is the law in regard to compromising internal-revenue cases; and what is the course of procedure after an offer of compromise has been received?
- Q. III. What occupations require payment of special tax, and at what time are
- such taxes payable?
  Q. IV. What rewards are offered for information leading to the detection and punishment of persons violating the internal-revenue laws?
- Q. V. What is the law in regard to the release, before judgment, of distilleries seized for violation of law?

- Q. VI. What is the law in regard to the destruction of illicit distilleries? Q. VII. What is the course of procedure on seizure of property valued at \$500 or less?
- Q. VIII. What is the limit of time within which prosecutions may be instituted against persons charged with violating internal-revenue laws? Q. IX. What is the limit of time within which the Commissioner can make assess-

ments of taxes in different cases?

- Q. X. What action must the taxpayer take to obtain relief, in case he claims an assessment is erroneous, and within what time must action be taken?
- Q. I. What is the remedy for official acts and defaults of a deputy collector and acting disbursing agent placed in charge by a vacancy occurring in the office of collector?
- Q. II. What officer audits collectors' accounts, and to what officer are these accounts transferred by the auditing officer?
  - Q. III. What is the minimum penal sum of a storekeeper's or gauger's bond? Q. IV. State what manufactures internal-revenue officers are positively forbidden
- to engage in.

Q. V. What is the limit as to number of gaugers and storekeepers, etc., in commission at one time?

Q. VI. Who has the power to suspend a collector of internal revenue for good and

- sufficient cause? Q. VII. What officer may require a collector of internal revenue to execute a new
- bond, in place of the original bond?
  Q. VIII. What is the maximum net compensation of a collector of internal revenue?
- IX. In whom is the power vested to consolidate collection districts?

  X. Who appoints deputy collectors and how are they compensated for their services?
- Q. I. How many divisions are there in the Internal Revenue Office and how are they designated?
- Q. II. What officer is head of the division of revenue agents and by whom is he appointed?
- Q. III. To what department does the Solicitor of Internal Revenue belong? Q. IV. To what division of the Internal Revenue Office is the work connected with claims for abatement of taxes assigned?
  Q. V. By whom is the Deputy Commissioner of Internal Revenue appointed?
- Q. VI. By whom are internal revenue agents and inspectors appointed, and how many of each are allowed by law?

Q. VII. By whom is the analytical chemist appointed?
Q. VIII. What is the maximum per diem pay of internal-revenue agents other than the chief of revenue agents?

Q. IX. What is the per diem pay of an internal revenue inspector?

- X. By whom is the chief clerk of the Internal Revenue Office designated as such, and under what title is he paid?
- Q. I. How are collectors of internal revenue appointed and by whom may they be removed from office?

Q. II. What is the only condition of eligibility to the office of collector of internal

revenue named in the act of Congress creating that office?

Q. III. Name the three reasons for any one of which the Commissioner of Internal

Revenue may suspend a collector of internal revenue from duty

Q. IV. How many sureties does the law require on the official bond of a collector of internal revenue, and to what Department does the officer belong by whom said bond must be approved?

Q. V. What provision is made by law for relieving the sureties on a collector's

official bond from further liability for his official acts

Q. VI. What other duties are required of every collector of internal revenue besides those pertaining to the office of collector?

Q. VII. By whom is the penalty of a collector's bond as disbursing agent fixed,

and by whom is the bond approved?

Q. VIII. What two methods are provided by law for temporarily filling a vacancy in the office of collector of internal revenue pending the appointment and qualification of a successor?

Q. IX. What is the remedy for the official acts and defaults of a deputy collector acting as collector by reason of a vacancy in that office?

Q. X. In what office are the official bonds of collectors filed?

Q. I. By whom are internal-revenue storekeepers appointed and by whom are they assigned to duty?

Q. II. What is the maximum per diem pay of a storekeeper?

Q. III. By whom is the penal sum of a storekeeper's bond prescribed and by whom must it be approved?

Q. IV. What is the minimum sum fixed by law for the penalty of the bond of an internal-revenue gauger?

Q. V. By whom may gaugers and storekeepers be transferred from one internal-revenue collection district to another?

Q. VI. By whom are internal-revenue gaugers appointed and by whom are they assigned to duty?

- Q. VII. What is the amount of the penalty of a storekeeper's bond as fixed by the Commissioner of Internal Revenue, and how many sureties does he require on such bond ?
- Q. VIII. Under the act of Congress imposing the duties of storekeeper and gauger on one officer for small distilleries, who fixes the maximum capacity of a distillery where one officer may be assigned for both classes of duties?

Q. IX. What is the title of the officer who performs the combined duties of store-

keeper and gauger at small distilleries?

Q. X. Name the internal-revenue collection district in which the largest number of storekeepers and gaugers (combined office) are employed?

Q. I. By whom are internal-revenue taxes collected?

Q. II. By whom are internal-revenue districts established?

Q. III. What taxes imposed by acts now in force are not payable by stamps, but must be assessed?

Q. IV. What is the rate of tax per gallon on distilled spirits?

Q. V. By what officers must tax-paid spirits stamps be signed? Q. VI. Which of the internal-revenue collection districts pays the largest revenue? Q. VII. What is the maximum number of special bonded warehouses for fruit brandy that may be established in any one collection district?

Q. VIII. During which months of each year may grape brandy be used free of tax for the fortification of sweet wines, under the act of October 1, 1890?

- Q. IX. By whom may the records of manufacturers of tobacco and snuff kept in the several collectors' offices be inspected? Q. X. What specific duty is imposed by law on the Solicitor of Internal Revenue?
- Q. I. How are collectors and deputy collectors of internal revenue compensated for their services?
- Q. II. What is the maximum sum that a collector of internal revenue can be paid per annum as salary?

Q. III. By whom are deputy collectors of internal revenue appointed?

Q. IV. In what respect is the number of deputies and clerks now limited by law? Q. V. What exceptions are there to this rule? Q. VI. How often and on what form must a collector render his account for ex-

penses of deputies, clerks, etc.?

Q. VII. In reimbursing a deputy collector for traveling expenses, what limitation is there to the sum he may be paid?

- Q. VIII. What particular expenses are specified by law as allowable to a collector of internal revenue?
- Q. IX. In the case of other office expenses, upon whose approval can they be
- Q. X. How are collectors of internal revenue usually supplied with stationery and blanks?
- Q. I. How often and on what form does a collector of internal revenue receipt for taxes assessed?

- Q. II. On what form and how often must be account for these tax lists?
  Q. III. How often is a collector of internal revenue required to deposit money collected?
  - Q. IV. If a tax proves uncollectible how can the collector obtain credit for it?
- Q. V. If a tax is assessed on a list and afterwards paid and a stamp issued, in which account should the collector credit the money received?

Q. VI. In what manner can he get credit in the other account?
Q. VII. If a collector distrains on real estate for taxes due, and it is bid in for the United States, how long a time must elapse before he can be credited for the amount? Q. VIII. How often and on what form is a collector's account for taxes, stamps,

etc., adjusted?
Q. IX. How often and on what form is a collector required to render an account

for disbursements to storekeepers?

- Q. X. By what rule is the compensation allowed to a storekeeper, or a storekeeper and guager, determined?
- Q. I. What way is provided by law for the settlement of liabilities incurred by persons under the internal-revenue laws other than by suits and prosecutions?

  Q. II. What power is given to the Commissioner herein, and how is it guarded?
- Q. III. In compromise proceedings, before final action is taken by the Commissioner in any case, what is done by the Solicitor of Internal Revenue pursuant to the statute?
- Q. IV. What officers, other than internal-revenue officers, are governed by regulations established by the Commissioner of Internal Revenue respecting suits arising under the internal-revenue laws?
  Q. V. What is the scope of the Commissioner's authority as to such officers?

Q. V. What is the scope of the Commissioner's authority as to such officers?
Q. VI. When real estate is acquired by the United States under operation of internal-revenue laws, who has charge of it, and what are his powers in relation thereto

Q. VII. What is the statutory restriction as to commencement of suits for recov-

- ery of taxes, or fines, penalties, and forfeitures, under the internal-revenue laws? Q. VIII. Who is empowered to pay for information resulting in the detection, trial, and punishment of persons guilty of violating the internal-revenue laws, and what is the limit set to this power?
- Q. IX. Who may seize property that is subject to forfeiture for violation of the internal-revenue laws?
  - Q. X. What are special taxes under the internal-revenue laws?
- Q. I. What officer of the United States has authority to remit, refund, or pay back internal-revenue taxes erroneously or illegally assessed or collected?
- Q. II. Upon what form should a claim for the remission of a tax erroneously assessed be made.
- Q. III. If taxes assessed are found to be uncollectible, how should a claim for abatement be made?
- Q. IV. Within what time after the receipt of an assessment list by the Collector should it be closed, either by collection or by filing claims for abatement.
- Q. V. Upon what form should a claim be made for the refunding of taxes erroneously or illegally assessed and collected?
- Q. VI. Within what time should a claim be made for the refunding of taxes erroneously or illegally assessed and collected?
- Q. VII. In whose name should a claim be made for the refunding of taxes erroneously or illegally assessed and collected?

Q. VIII. Who should make a claim for the release of duplicate charges arising from the assessment of stamp taxes, and in what manner should the application be made?

Q. IX. If from unavoidable accident a distiller fails to produce eighty per centum of the producing capacity of his distillery as established by law, and a tax is assessed

on the deficiency, by whom and to what extent can relief be granted?

Q. X. If distilled spirits are destroyed by accidental fire, or other casualty, without fraud, collusion, or negligence of the owner, while in the custody of a revenue officer in a distillery, warehouse, or bonded warehouse, of the United States, before the tax thereon is paid, what relief can be granted?

Q. I. By whom are assessments of internal-revenue taxes made?

Q. II. What are the principal objects of taxation under the internal-revenue laws?

Q. III. Define proof spirit.
Q. IV. What officer is authorized by law to compromise cases of liabilities incurred under the internal-revenue laws in which judgment has been rendered in favor of the United States?

Q. V. What officer has authority to suspend a collector of internal revenue for

gross neglect of duty?

Q. VI. What is the rate of tax per pound on manufactured tobacco? Q. VII. What is the net amount of tax on a barrel of fermented liquors?

Q. VIII. State in a general way the duties of the Commissioner of Internal Revenue under the act of Congress entitled "An act to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia."

Q. IX. To what internal-revenue collection district does the District of Columbia

- Q. X. What is the total amount of tax due on two packages of distilled spirits containing, respectively, 40\frac{1}{2} and 38\frac{1}{4} proof gallons, the spirits in each case being above proof? State also the amount due on each package.
- Q. I. Give the date and title of the original act of Congress establishing the present internal-revenue system.

Q. II. Give the date of the act of Congress imposing an internal-revenue tax on

oleomargarine.

Q. III. When was the act of Congress approved reducing the tax on tobacco to its present rate per pound, and when did the reduction take effect?

Q. IV. What manufactures are internal-revenue officers forbidden by law to engage in?

- Q. V. Name the occupations now subject to internal-revenue tax? Q. VI. How many occupations were relieved from internal-revenue tax by the act of October 1, 1890?
- Q. VII. By what instrument does the law require that sugar shall be tested to ascertain the rate of bounty thereon under the act of October I, 1890, and what per cent of pure sugar must it contain in order to entitle the producer to a bounty of two cents per pound?

  Q. VIII. What is the minimum distance from a rectifying house at which the law

permits the erection and operation of a distillery?

- Q. IX. Name the several denominations of stamps for fermented liquors.
- Q. X. How often may fruit brandy be removed from one special bonded warehouse to another without payment of the tax thereon?

Q. I. By whom are Internal-Revenue agents appointed?

- Q. II. How many Internal-Revenue agents are authorized by law? Q. III. What are the general duties of Internal-Revenue agents?
- Q. IV. To whom are Internal-Revenue agents required by law to report violations of the Internal-Revenue law discovered by them?

- Q. V. What reports are Internal-Revenue agents required to make? Q. VI. By whom and for what purpose are examinations of collectors' accounts and offices made?
- Q. VII. What are now the objects of taxation by the Internal-Revenue laws? Q. VIII. What is the rate of tax now imposed upon distilled spirits, fermented liquors, cigars, tobacco, eleomargarine, and domestic manufactured opium?
  Q. IX. To what officers is the authority of seizure delegated by law?

- Q. X. By whom and for what purpose are internal revenue inspectors appointed?
- Q. I. Name the kinds and grade of sugar produced in this country on which bounty is paid?

Q. II. What is the rate of bounty allowed?
Q. III. What is a polariscope?
Q. IV. How long does the law provide for the continuance of the bounty?

Q. V. What was the object in giving a bounty on sugar?

VI. What steps must a producer of sugar take in order to obtain a license?

Q. VII. What must his notice state?

VIII. In what section of the country is cane sugar produced?

- Q. IX. In what section of the country are the beet and sorghum sugar factories located?
- Q. X. In what offices of the Treasury Department are claims for bounty examined after leaving the office of the Commissioner of Internal Revenue?
- Q. I. What is a brewer under the Internal-Revenue laws, without regard to specific exceptions? How, under the same conditions, would you define the following: Manufacturer of stills; rectifier; retail dealer in liquors; wholesale liquor dealer; retail dealer in malt liquors; wholesale dealer in malt liquors; manufacture of oleomargarine; wholesale dealer in oleomargarine; and retail dealer in oleomargarine?

Q. II. What special taxes are imposed on brewers? and upon the following: Manufacturers of stills; rectifiers; retail dealers in liquors; wholesale liquor dealers; retail dealers in malt liquors; wholesale dealers in malt liquors; manufacturers of elecmargarine; wholesale dealers in oleomargarine; and retail dealers in oleomargarine?

Q. III. What assessable penalties does the law provide as to returns of special tax

payers?

- Q. IV. What time limit as to assessment of special taxes and penalties is fixed by law?
- Q. V. What is the time limit for assessment as to articles on which the tax is paid by stamps ?

Q. VI. What is the tax-on a barrel of spirits containing  $46\frac{1}{2}$  wine gallons at 96 per

cent proof?
Q. VII. What is the tax on a cask of fermented liquor containing 33 gallons? Q. VIII. What is the tax on a box of 100 cigarettes which weigh five ounces?

IX. A sour-mash grain distiller produced during the month of September, 1890, 5,468.81 proof gallons of spirits, his producing capacity for the month as estimated according to law being 12,129.61 proof gallons. He used during the month 311,904 gallons of mash or beer, and reported 5,184 bushels of grain used. His mashing capacity estimated according to law was 3,465.66 bushels. His yield of spirits per bushel as required by the survey was 3½ gallons of spirits, and the reported product

of each bushel of grain used was 1.578 gallons.
What is his deficiency under section 3309, R. S.?
What is his excess of grain in bushels used?

What is the equivalent of this excess in proof gallons? Also, what tax is to be assessed in this case on the deficiency plus the excess, provided that the distiller is not entitled to relief under section 6 of the act of March 1, 1879, as amended by section 8 of the act of May 28, 1880?

Give computations in your answer by which you arrive at results.

- Q. X. Under what circumstances may the Commissioner of Internal Revenue relieve a distiller from assessment for deficiency in production of spirits or on account of materials used in excess of the legal capacity of his distillery
- Q. I. What is the rate of tax per gallon on distilled spirits, and what special taxes are required of wholesale and retail dealers in distilled spirits?

Q. II. How are fractional parts of a gallon of distilled spirits taxed and what is

the exemption?

Q. III. State in round numbers the gross receipts from internal-revenue sources as

given in the last report of the Commissioner.

- Q. IV. State in a general way the duties of the Commissioner of Internal Revenue under the act to prevent the manufacture or sale of adulterated foods or drngs in the District of Columbia.
- Q. V. What is the rate of tax per pound on eleomargarine, and what special taxes are required of manufacturers of oleomargarine, wholesale dealers in oleomargarine, and retail dealers in eleomargarine, respectively?

  Q. VI. What are some of the provisions of the pending tariff bill relating to in-

ternal revenues?

Q. VII. What is the evidence of the payment of the tax on articles taxed? Q. VIII. Under what conditions may imported cigars be put upon the domestic market, import duty being paid?

Q. IX. To what Department does the Solicitor of Internal Revenue belong?

Q. X. By whom are assessments of internal-revenue taxes made?

Q. I. What are the duties of the Solicitor of Internal Revenue?

. II. What is the law in regard to compromising internal-revenue cases, and what is the course of procedure after an offer of compromise has been received?

Q. III. What occupations require payment of special tax, and at what time are such taxes payable?

Q. IV. What rewards are offered for information leading to the detectioned

punishment of persons violating the internal-revenue laws?

- Q. V. What is the law in regard to the release, before judgment, of distilleries seized for violation of law?
- Q. VI. What is the law in regard to the destruction of illicit distilleries? Q. VII. What is the course of procedure on seizure of property valued at \$500 or less?
- Q. VIII. What is the limit of time within which prosecutions may be instituted against persons charged with violating internal-revenue laws?

Q. IX. What is the limit of time within which the Commissioner can make assess-

ments of taxes in different cases?

- Q. X. What action must the tax- ayer take to obtain relief, in case he claims an assessment is erroneous, and within what time must action be taken?
- Q. I. What is the remedy for official acts and defaults of a deputy collector and acting disbursing agent placed in charge by a vacancy occurring in the office of collector?

Q. II. What officer audits collectors' accounts, and to what officer are these accounts

transferred by the auditing officer?

Q. III. What is the minimum penal sum of a storekeeper's or gauger's bond?

Q. IV. State what manufactures internal-revenue officers are positively forbidden to engage in?
Q. V. What is the limit as to number of gaugers and storekeepers, etc., in com-

mission at one time?

- Q. VI. Who has the power to suspend a collector of internal revenue for good and
- sufficient cause?

  Q. VII. What officer may require a collector of internal revenue to execute a new bond, in place of the original bond?

  Q. VIII. What is the maximum net compensation of a collector of internal revenue?

- Q. IX. In whom is the power vested to consolidate collection districts? Q. X. Who appoints deputy collectors and how are they compensated for their services?
- Q. I. What is the smallest quantity of distilled spirits that can be exported with benefit of drawback of the internal-revenue tax?

Q. II. In what description of casks or packages may distilled spirits be exported

with benefit of this drawback?

- Q. III. What officer is authorized by law to allow drawback of the tax on distilled spirits?
  Q. IV. What officer is authorized to allow claims for drawback of the tax on manu-
- factured tobacco?

Q. V. How are drawbacks found to be due on tobacco, snuff, and cigars, paid? Q. VI. Out of what money are these drawbacks payable? Q. VII. What paper must the exporter desiring the drawback file before ship-

ment, with whom should the paper be filed, and within what time?

Q. VIII. John Doe, of San Francisco, Cal., being about to export 4,800 2-ounce packages of smoking tobacco to Honolulu, desires to file the paper spoken of in the last question. What tax would he specify in the paper, provided each package is properly stamped?

- Q. IX. What two officers are present at the lading of this merchandise?
  Q. X. What duty is required of each of these officers when present at the said lading?
- Q. I. By what officers, how often, and on what numbered form are bonded accounts as to distilled spirits other than brandy from apples, peaches, and grapes, rendered?

Q. II. What kinds of spirits known to the trade are reported on this form? Q. III. What transactions affect the warehouse accounts?

- Q. IV. On what vouchers are credits on line 13, page 1, of the account, allowed?
  Q. V. On what vouchers are credits on line 9 of said first page allowed?
  Q. VI. The quantity on line 1 of said first page is 3,326,912 gallons; on line 5 it is 1,726,531 gallons; on line 7 it is 1,710,586 gallons; on line 9 it is 1,383 gallons; on line 10 it is 47,101 gallons; on line 17 it is 19,989 gallons. What should the quantity be on line 24?
- Q. VII. The quantity on line 2 of said first page is 1,106,898 gallons; on line 11 it is 7 gallons; on line 13 it is 15,456 gallons. What is the proper entry on line 21, the entries on other lines being the same as those given in question 6?

Q. VIII. The quantity on line 3 of said first page is 13,984 gallons. What is the proper entry on line 23, the entries on other lines being those given in question No. 6?

Q. IX. In case a package of spirits upon withdrawal from the distillery warehouse is found to contain more spirits than was shown by the original gauge, how is the

excess found treated in the account?

Q. X. What receipts must accompany the last bonded spirits account of an outgoing collector?

Q. I. What two legal instruments must a person intending to manufacture tobacco furnish to the collector of internal revenue for his district before commencing busi-

Q. II. What two things must a manufacturer of tobacco display conspicuously at his factory

Q. III. When can a manufacturer of tobacco lawfully return materials on his com-

mencing inventory?

Q. IV. To whom can a tobacco manufacturer lawfully sell, under permits, in bulk,

unstamped refuse scraps?

Q. V. What is the tax on manufactured tobacco and how is it paid?

m Q.~VI.~What~are~the~taxes~on~cigars~and~on~cigarettes~weighing~less~than~3~poundsper thousand?

Q. VII. What two things must a cigar manufacturer affix by pasting on each box of cigars manufactured by him?

VIII. How must a cigar manufacturer attach strip stamps to boxes of cigars?

- Q. IX. What is a special requirement for packing cigars?
  Q. X. What are the numbers of cigars constituting the several legal packages?
- Q. I. Who must make assessment for taxes on tobacco or cigars sold without payment of the tax thereon?

Q. II. What is the usual basis of estimates of such deficiencies?

Q. III. What three accounts are involved in these estimates? Q. IV. How are manufacturers of tobacco and cigars notified of apparent deficiencies found in their accounts?

Q. V. How must the manufacturers present evidence in explanation of apparent

deficiencies in their accounts?

- Q. VI. What four causes of loss of stock are accepted as satisfactory explanations? Q. VII. In making assessments for deficiencies in the accounts of cigar manufacturers, how many pounds of leaf tobacco are estimated to make 1,000 cigars?
- Q. VIII. In making assessments for deficiencies in the accounts of tobacco manufacturers, what allowance is made for stems in manufacturing plug and fine-cut chewing tobacco?

  Q. IX. Within what limit of time can such assessments be made after sale or re-

moval?

Q. X. On what office forms are the accounts of manufacturers of tobacco and manufacturers of cigars presented to this office?

Q. I. By whom are internal-revenue agents appointed?

- Q. II. How many internal-revenue agents are authorized by law?
- Q. III. What are the general duties of internal-revenue agents? Q. IV. To whom are internal-revenue agents required by law to report violations of the internal revenue discovered by them?

Q. V. What reports are internal-revenue agents required to make?

- . VI. By whom, and for what purpose are examinations of accounts of collectors of internal revenue made?
- Q. VII. What are now the objects of taxation under the internal-revenue laws? Q. VIII. What are the rates of tax on distilled spirits, fermented liquors, cigars, tobacco, eleomargarine, and domestic-manufactured opium?
  Q. IX. To what officers is the authority of seizure delegated by law?

Q. X. By whom and for what purpose are internal-revenue inspectors appointed?

Q. I. What is the rate of tax on oleomargarine?

Q. II. How is the tax paid on oleomargarine manufactured and sold represented? Q. III. What is the special tax required to be paid by manufacturers of oleomargarine?

Q. IV. What special taxes are imposed upon dealers in oleomargarine? Q. V. When does the special-tax year begin?

- Q. VI. What returns are manufacturers of oleomargarine required to make? Q. VII. What returns are dealers in oleomargarine required to make?
- Q. VIII. How are the sales by manufacturers of oleomargarine and dealers in oleomargarine ascertained in the Office of Internal Revenue?

- Q. IX. For what purpose are abstracts made of sales of oleomargarine by manufacturers and dealers?
  - Q. X. What disposition is made of such abstracts?

## LIGHT-HOUSE BOARD.

- Q. I. What is the composition of the Light-House Board?
- Q. II. Name the committees of the Light-House Board. Q. III. What officers of the Light-House Establishment are authorized to make
- disbursements?
  - Q. IV. Name the different kinds of fixed aids to navigation.
  - Q. V. Name the kinds of floating aids to navigation.
- Q. VI. About how many light-keepers were there in the Light-House Service on
- June 30, 1890?
  Q. VII. About how much was appropriated for the Light-House Establishment under the general and special estimates for the fiscal year to end June 30, 1891?
  - Q. VIII. What is a counter warrant and how is it used?
- Q. IX. What are the essential requirements of the accounting officers for the passage of accounts under a contract?
  - Q. X. What are the necessary prerequisites for building a light-house?
- Q. I. By what authority do light-house inspectors and engineers disburse public funds?
- Q. II. What are the different steps by which money is obtained by a light-house disbursing officer for public use?
- $\overline{Q}$ . III. At what times must light-house disbursing officers render their accounts  ${\bf f}$   $\overline{Q}$ . IV. What is the distinction between a general and a special light-house appro-
- priation?
  - Q. V. How long is each class of appropriations available for use?
- Q. VI. In what cases may articles be purchased in open market?
  Q. VII. Who determines whether or not a public exigency exists?
  Q. VIII. From what appropriations may the expense of the repairs of the lighthouse tenders and light-vessels be defrayed?
  - Q. IX. What limit is fixed by law for the salaries of keepers of light-houses?
  - Q. X. What is the surplus fund?
  - Q. I. Of whom does the Light-House Board consist?
  - Q. II. What are the duties of the Light-House Board?
  - Q. III. What are the general duties of the Naval Secretary of the Board?  $ilde{ ext{Q}}$ . IV. What are the general duties of the Engineer Secretary?
  - Q. V. What are fixed and what are floating aids to navigation?
  - Q. VI. What are some of each class of floating aids to navigation?
    Q. VII. Of how many districts does the Light-House Establishment consist?
  - Q. VIII. What are the official designations of the officers in charge of districts? Q. IX. What are the general duties of district inspectors?
  - Q. X. What are the general duties of district engineers?
- Q. I. Who are the members of the Light-House Board? Give their names and official titles, if any.
- Q. II. How many light-house districts are there, and what officers of the Army and Navy are assigned to them? Where are their offices located?
- Q. III. Give the general details of the duties of the principal clerks of the Light-
- House Board. Q. IV. What are fixed aids to navigation, and what are floating aids to navigation?
- Q. V. If an aid to navigation is to be established or discontinued what are the steps to be followed from the first recommendation to final action by the Board?
- Q. VI. What publications are issued by the Light-House Board for the benefit of commerce
- Q. VII. When light keepers are to be appointed, promoted, or transferred, who makes the recommendation in such cases, and who makes the appointment, promo-
- Q. VIII. Where is the general light-house deposition, and the Gulf coasts Q. IX. By what means are the light-houses on the Atlantic and the Gulf coasts VIII. Where is the general light-house depot located, and what is kept there? furnished with annual supplies, and from where are they sent?
- Q. X. Name the different kinds and order of lenses and lamps in use by the Light-House Establishment. What kind of oil is used?

## LIFE-SAVING SERVICE.

Q. I. Who is authorized by law to make regulations for the government of the Life-Saving Service?

Q. II. What officer has authority to discontinue a life-saving or life-boat station, or house of refuge, and under what circumstances can this authority be exercised? Q. III. What disposition may be made of the apparatus, appliances, equipments,

and supplies of a discontinued station, and what officer makes such disposition?

Q. IV. Give the official designation of the officers under whose supervision lifesaving stations are constructed, and state how many such officers there are appointed by law to be and who are eligible to be appointed?

Q. V. What does the law require to be regarded in the appointments of district superintendents, and inspectors and keepers and crews of life-saving stations?

Q. VI. From what source does the authority to establish life-saving stations upon the coasts of the United States emanate?

Q. VII. Upon whom, by law, does the duty of collecting and compiling the statistics of marine disasters devolve?

Q. VIII. What is the General Superintendent required by law to do upon the occurrence of a shipwreck within the scope of the operations of the Life-Saving Service attended with loss of life?

Q. IX. From what source is information derived relative to disasters to American

shipping in foreign waters?
Q. X. When is the beach required to be patrolled in daytime?

Q. I. Describe, in general terms, an annual contract for supplies for the Life-Saving Service—that is, state what information it embraces when complete?

Q. II. What is a requisition for annual supplies?

- Q. III. Describe the printed form furnished by the Department upon which such annual requisitions are prepared?
- Q. IV. What additional information is the district superintendent expected to supply in submitting such a requisition?

Q. V. Describe the steps taken to establish a telephone line for the service?
Q. VI. In what districts has the service established telephone lines?
Q. VII. Describe, so far as now established, the organization of the telephone service connected with the Life-Saving Service, naming generally the duties assigned to

Q. VIII. What is the use of a patrol check, and what conditions make it necessary

to substitute the patrol clock for the check?

Q. IX. In what manner are worn out and unserviceable life-saving appliances disposed of ?

Q. X. When can purchases be made in the open market?

Q. I. By what authority are reports of casualties to vessels furnished to the Treasury Department, office of the Life-Saving Service, through collectors of cus-

Q. II. What penalty does the managing owner, agent, or master of a vessel suffering material damage, incur for neglect or refusal to furnish a report thereof, upon-

 $\hat{\mathbf{Q}}.$  III. In case of an incomplete wreck report, signed by the owner, agent, or mas-

ter of the vessel, how does the office proceed to get it completed?

Q. IV. Under what head in the statistical tables of wrecks would you classify a casualty reported as the sinking of a vessel by collision with ice? How one reported as capsized and sunk?
Q. V. How are vessels standing into danger warned of that fact by the life-saving

Q. VI. In case a wreck occurs near a life-saving station, during the inactive sea-

son, what is a keeper required to do?

- Q. VII. By whom is notice of the occurrence of a wreck within the scope of the operations of the Life-Saving Service required to be given as soon as it can be done, without the interruption of duty at the wreck, and to whom should notice be sent?
- Q. VIII. How would you ascertain whether the managing owners, agents, or masters of vessels had reported all the disasters occurring to their vessels within the scope of the operations of the Life-Saving Service?

Q. IX. What watch is kept at life saving stations between the morning and evening patrol, and what record is made concerning it?

Q. X. What action is taken by the Department in case a surfman fails or willfully neglects to perform his duty?

- Q. I. Into how many life-saving districts are the sea and lake coasts of the United States divided?
- Q. II. Define, in consecutive order, the boundaries of the several life-saving districts.
- Q. III. On what waters other than the Atlantic and Pacific Oceans have lifesaving stations been established in the United States?
- Q. IV. State the different means employed for ascertaining whether the surfmen on patrol have faithfully performed their duty.
- Q. V. Who is held directly responsible for the patrol of a life-saving station and is to see that the regulations regarding the same are strictly complied with?
- Q. VI. What does a patrolman do upon discovering a wreck or vessel in distress

at night?
Q. VII. When is the beach required to be patrolled in the daytime?
Q. VIII. How are the surfmen at a station designated?

Q. IX. When a patrolman from one station fails to meet the patrolman from an

adjacent station at the usual place of meeting, what is he required to do?
Q. X. What should a complete transcript of a life-saving station journal contain?

Q. I. Given a scale of  $_{120}^{1}$ , show decimally the number of inches and fractions thereof in one statute mile.

Q. II. What is the length of one meter, in feet and inches?
Q. III. How many square yards of plastering are there in a room 9 by 10 feet, and 12 feet high?

Q. 1V. Solve  $6,080 \times 0.8684 \div 400,000$ .

Q. V. How many cubic feet are contained in a space 4 yards by 16 yards by 21/2 feet?

Q. VI. What is understood by "westerly variation" of the compass? Q. VII. How many degrees, minutes and seconds, are contained in a quarter of a

right angle?

Q. VIII. Construct the length of a shadow of a vertical pole 60 feet long upon a horizontal plane, the light falling under an angle of 38 degrees to the plane, and give the result in feet and tenths.

(For questions IX and X, see lithographic plate, Exhibit for testing tracers.)

## BUREAU OF NAVIGATION.

Q. I. What marine document is granted by the collector of customs to a vessel in the foreign trade?
Q. II. What documents are granted to vessels above 20 tons in the coasting trade?

Q. III. What document is granted to a vessel under 20 tons engaged in the fisheries?

- Q. IV. Under what tonnage are vessels exempt from documenting? Q. V. If a vessel of 40 tons be employed in the coasting trade on the Great Lakes, what documents must be obtained?
- Q. VI. If a citizen of the United States purchase a vessel away from her home port, what will be the character of the register issued at the port of purchase, as contradistinguished from a register issued at the home port?
- Q. VII. If a foreign vessel be wrecked in waters of the United States and repaired. what must be the nationality of the purchaser to entitle the vessel to documents in the United States?

Q. VIII. If a vessel of the United States is condemned abroad and sold to an alien, what action is taken by the Bureau of Navigation?

Q. IX. Where must a foreign vessel be wrecked in order to entitle her to a register? Q. X. In the following case, which was submitted to this office, what course should be pursued, viz:

"ALPENA, MICH.

"CUSTOM HOUSE,

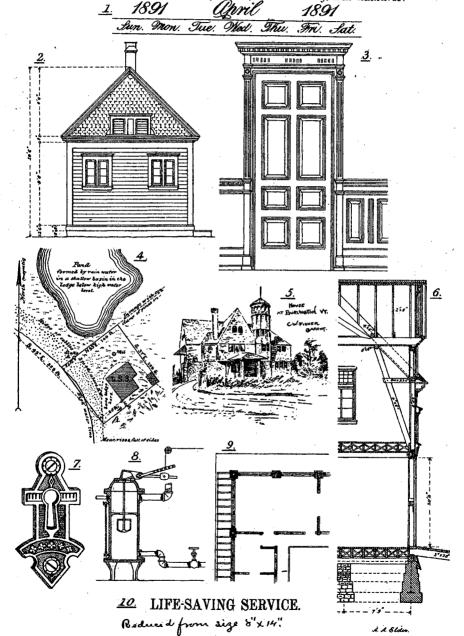

"Port Huron, Mich .:

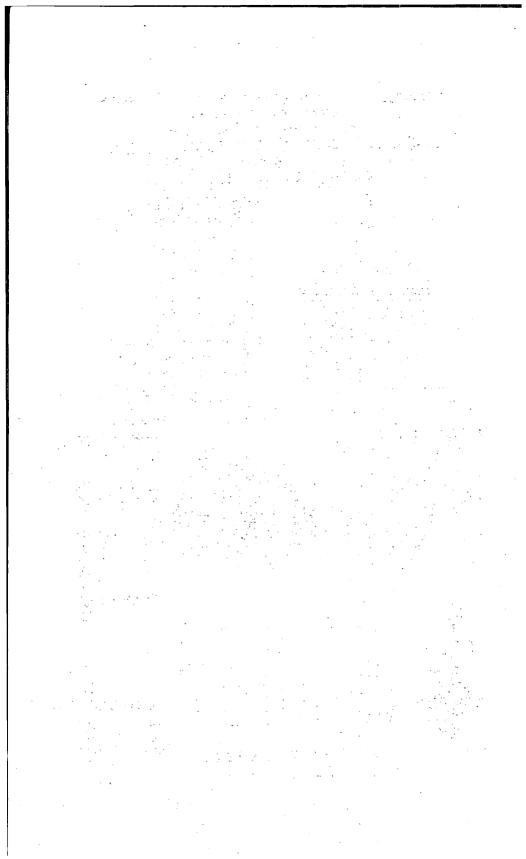

"SIR: A client of ours has purchased a ship under the following circumstances: The vessel was owned by two men, partners in running the same. They owed present owner for money loaned. Present owner sued and recovered judgment in justice's court for amount of his claim. Execution was issued and vessel levied upon and sold under execution sale, the judgment creditor bidding in the same. One of the partners refuses to deliver over the papers issued by the customs officer, while the other wants them turned over, and would, if the other would, quitclaim to present owner. The present owner has control of, and has had for upwards of a year, the boat in question. He is very auxious to get the necessary papers to run the vessel. Will your office please advise us what steps must be taken?"

# EXAMINATION FOR PROMOTION.

BUREAU OR OFFICE QUESTIONS_ TRACING.

Make a tracing of each of the ten samples given upon the accompanying sheet, showing strong lines, open line shading, and hackures

Q. I. What letters of the alphabet are employed in assigning signal letters to vessels?

Q. II. How many letters are assigned to any particular vessel.

Q. III. For what time must the official number of a vessel documented in the United States be retained by such vessel?

Q. IV. For what time does a vessel's license remain in force?

v. V. By what officers are enrollments signed?

Q. VI. How does a collector of customs dispose of registers surrendered?

VII. How is the collector at the port of issue of a register apprised of the surrender of the register at another port?

VIII. What particulars regarding vessels are embodied in the annual list printed by the Bureau?

Q. IX. In what cases only does the annual list specify the name of the managing

owner of the vessel?

- Q. X. When a vessel has been repaired and enlarged and a new name has been given to her by the owners without authority from the Bureau of Navigation, what course is pursued?
- Q. I. How should the Secretary of State be addressed in a letter from the Treasury Department?

Q. II. What marine document must a vessel of the United States obtain before

engaging in the foreign trade.?
Q. III. What officers grant such documents?

Q. III. What officers grant such documents? Q. IV. What marine document is granted to vessels under 20 tons in burden?

Q. V. What must the nationality of the purchaser of a vessel be to entitle her to marine documents?

Q. VI. What marine papers are issued to yachts of the United States?

Q. VII. Where must a foreign vessel be wrecked in order to entitle her to registry in the United States?

Q. VIII. What proportion of the original cost must be expended on such vessel in repairs to entitle her to papers?

Q. IX. Before what United States officers can foreign-going vessels engage sea-

Q. X. What masters of vessels must engage their seamen before the officers re-

ferred to in the previous question? In the following cases, which were submitted to the Bureau of Navigation, what course should be pursued?

Q. I. The COMMISSIONER OF NAVIGATION: SIR: T. G. Smith, master of the schooner Apollo, a licensed vessel under 20 tons burden, gives you the following information and thereupon makes the protest hereinafter expressed.

A few years ago he purchased the said schooner Apollo, giving his notes therefor, with Jameson of Isle of Wight County, Va., as endorser thereon (said Jameson being his father-in-law). The said Jameson took the bill of sale in his own name as security for the said endorsements. When the said notes became due took up the notes and now holds them; but that the whole indebtedness from Smith by reason of said notes to said Jameson has been fully paid by board furnished to two daughters of said Jameson by said Smith upon contracts that it should be paid; that recently the said Smith has been compelled to leave his wife, and that he has instituted a suit for divorce, in the corporation court of this city. That since the institution of said suit, said Jameson has made a bill of sale of said schooner Apollo, which does not, however, appear on record, to Pinkey Smith, the wife of said Smith; that the said Pinkey has attempted to appoint one of her brothers master of the said schooner and that the said Jameson, together with a second brother, went on board said schooner Apollo, then lying in Pagan Creek, Virginia, in the absence of the master, Smith, and took possession of said schooner, putting her crew ashore, and forcibly seizing the said schooner and appurtenances, the sailing papers of said schooner, and all the private property of said Smith on board of her. And to you F. G. Smith protests against the issue of other papers, or the indersement of any other master to the said schooner, on the ground that he has not voluntally surrendered the same, but has been dispossessed thereof by the fraud and force of the said Jameson, father and sons, and his said wife.

Respectfully submitted.

# Q. II. Mr. ROBERT SMALLS, collector, etc., Beaufort, S. C.:

DEAR SIR: The schooner George E. Vernon came through to us coastwise to-day, and we find that she has been charged entry and clearance by your office. As this is evidently an error and contrary to provisions of present laws we call your attention to the fact, and ask that you will please correct it accordingly.

Q. III. In this case claim is made by Randall, as informer, for \$2,430.

The master of the S. S. Strathairly incurred fines decided by the Supreme Court to amount to \$16,430 for a violation of the passenger act as contained in the Revised Judgment was obtained against him in the United States district court in San Francisco. Subsequently, to wit, on the 2d of August, 1882, Congress specifically repealed the section of the Revised Statutes authorizing in such cases the payment of half the penalty incurred to the informer. No portion of the fines could be recovered from the master, and proceedings were instituted against the vessel. United States District Court, decided subsequently to August 2, 1882, that the vessel was not liable. This decision was affirmed by the United States circuit court. On appeal, the Supreme Court (October term, 1878) held that the vessel was liable. Thereupon this Department mitigated the penalty and instructed the collector at San Francisco to deposit the reduced amount less deductions authorized by law. He deducted one-half the penalty and paid it to Brown as informer. The papers in the case before the Department did not refer to the first judgment against the master, and the Department informed the collector that there was some doubt whether the reduction he had made was authorized by law, citing a certain decision made under the internal-revenue laws, in which it was held that there must be a judgment and actual payment to the informer to invest his right. An examination of the records of the Department of Justice shows that, as a matter of fact, there was a judgment against the master prior to the passage of the act repealing the section that authorized the informer's share. The question is presented whether the first judgment vested Brown's right, or whether the right in such cases remains inchoate until actual payment to the claimant, and whether his claim is valid.

Q. IV. Hon. JNO. M. GLAZIER,

Collector of the Customs at the Port of Erie, county of Erie, Pennsylvania: The petition of William E. Sampson respectfully represents: That he is a citizen of the United States, being a resident of the city of Erie in said county, and by occupation a merchant; that he is the sole owner of the fishing tug, propeller or vessel called the Fred B. Jones, of the burden of 7.42 tons or thereabouts, together with her nets, buoys, corks, leads, fish boxes, tackle, furniture, and all necessaries thereto

belonging.

That his ownership as to one-half thereof is disputed by one Fred B. Jones, who claims to own one-half interest therein; that a bill in equity is pending in the court of common pleas of Eric County, Pa., No. 2, May term, 1891, to settle the claim of said parties to the ownership of said tug or vessel. That the said Fred B. Jones got possession of said tug or vessel and wrongfully held the same against your petitioner, the lawful owner thereof, and on the 23d day of March, A. D. 1891, caused an enrolment and license to be issued to him, the said Fred B. Jones, as managing owner of the said tug or vessel without the knowledge or consent of your petitioner, in which he swears that he, together with your petitioner, were the owners of said tug or vessel, each one-half. The official number of said enrollment is 120757, as by reference thereto will fully and at large appear. That in order to recover the possession of said tug or vessel thus wrongfully withheld from him by the said Fred B. Jones, as aforesaid, your petitioner, on the 9th day of April, A. D. 1891, caused to be issued out of the court of common pleas of Eric County, Pa., a writ of replevin to No. 157, May term, 1891, against the said Fred B. Jones, and on the same day the said tug or vessel was duly replevined and delivered by the sheriff of Erie County to your petitioner, your petitioner having given bond to the said sheriff in the sum of \$4,000 to indemnify him for executing said work, all of which will fully and at large appear by reference to the records of said court. That the said vessel or tug has been lying idle at the port of Erie ever since said replevin and delivery to your petitioner; the said Fred B. Jones having possession of the enrolment and license aforesaid, and refusing to deliver them to your petitioner or surrender them to the collector of the port. Your petitioner therefore prays that a new enrolment and license for said tug or vessel may be issued to your petitioner as the owner and managing owner of said tug or vessel upon his complying with such terms and conditions as are by law required for granting such papers, excepting only the delivering up of the former certificate of registry, in accordance with the provisions of the act of Congress in such case made and provided.

# Q. V. PROVINCE OF BRITISH COLUMBIA, VICTORIA. In the matter of the British steam tug Lorne.

The Secretary of the Treasury of the United States:

Your petitioner, Joan Olive Dunsmuir, of Victoria, in the Province of British Columbia, Dominion of Canada, widow, would respectfully represent that she is now and at all times hereinafter mentioned was, the owner of the British steam tug

Lorne, whose home port is Victoria, in the Province of British Columbia; that at all times hereinafter mentioned James A. Christensen was, and now is, the master of the said steam tug Lorne; that on the 12th day of April, 1891, the said steam tug Lorne was pursuing the business for which it was designed, namely, towing vessels, and was at that particular time, namely, on the 12th day of April, 1891, off the straits of Juan de Fuca, about 12 miles west-north-west from Tatoosh Lights and straits of Juan de Fuca, about 12 miles west-north-west from Tatoosh Lights and outside the jurisdiction of the United States and upon the high seas; that the American ship Oriental being then on her way from San Francisco, a port in the United States, to Tacoma, another port in the United States, was at that time in question, upon the high seas and beyond the jurisdiction of the United States, at a place off Cape Flattery and between 8 and 9 miles west-north-west from Tatoosh Lights; that the American ship Oriental signaled to the steam tug Lorine for a tow; that, in obedience to the signal, the steam tug approached the Oriental and then and there made arrangements with the master of the ship Oriental to tow the Oriental to the port of Tacoma, in the State of Washington, within the United States of America; that the place at which the steam tug Lorne took hold of the ship Oriental was upon the high seas and at least eight (8) miles from land; that the said ship Oriental was towed thence by the Lorne through the Straits of Juan De Fuca and the Admiralty Inlet; that, after entering the Straits of Juan de Fuca, the towing was partly in foreign waters, that is to say it was partly in British waters, being north of the middle channel of the Straits of Juan De Fuca; that the Oriental was towed by the Lorne directly to the port of Tacoma.

That thereafter, to wit, on the 18th day of April, 1891, the said steam tug Lorne had occasion to enter the port of Port Angeles, in the State of Washington, and while there was seized by the Government of the United States, under the authority of and by direction of the collector of Port Townsend, and was fined the sum of eight hundred and forty-four dollars (\$844) for towing the said ship Oriental from a point

on the high seas to the port of Tacoma, as aforesaid.

CUSTOM-HOUSE, COLLECTOR'S OFFICE.

Q. VI. Sir: I have the honor to inclose copy of a bill of sale, original of which has been presented to this office for record; and issue papers to new owner as named

I am informed that the vessel named in bill of sale was attached under the laws of the State of Rhode Island for a debt alleged to be due from the owners to the plantiff, the attachment being made in a suit brought in a Rhode Island State court for wages due for keeping the boat for a certain time. Whatever maritime lien, if any, existed seems to have been waived.

The order of court referred to in bill of sale was based upon section 2, chapter-

208, of the Public Statutes of Rhode Island, page 572.

It has been suggested that the case differs from that upon which decision 6131, dated January 23, 1884, was based, in this, that the attachment is not strictly a proceeding in rem, but is incidental to a suit for debt; that the claim in this case was for wages or services on the boat, which was, so far as a lien therefor may be claimed by attachment or otherwise upon the boat is concerned, strictly within the jurisdiction of the United States court, and that the order under which the boat was sold is not a judgment in rem, but simply an order of sale issuing out of a State-court for the sale of a vessel registered under the United States laws in a suit in which final judgment has not yet been rendered.

Respectfully,

P. H. COZZENS, Collector.

KEY WEST, FLA.

Q. VII. SECRETARY OF THE TREASURY, Washington, D. C .:

DEAR SIR: The collector of customs at Key West and at St. Augustine both claim Lake Worth in their district for documenting vessels.

Please investigate and let me know at once which district I live in. My sailing vessels' licenses are temporary; home port, Lake Worth, and district Key West.

Respectfully yours,

S. P. CLARK.

Q. VII.

CUSTOM-HOUSE, PHILADELPHIA, PA., COLLECTOR'S OFFICE.

COMMISSIONER OF NAVIGATION, Washington, D. C.:

SIR: I have the honor to inform you that from papers presented at this office it is shown that the American brig C. S. Packard, of Camden, Me., 304.65 tons, was stranded at Cayo Verde, Cuba, 13th August last. She was surveyed, condemned, sold at public auction at that place September 9 by one José Swarz, licensed auctioneer, to Pedro Mora, jr., an American citizen residing in Cuba, for \$1,500, and a bill of sale given by said auctioneer to said Mora. The commercial agent of the United States at Sagua la Grand certifies to these facts, and issues the necessary papers to Mora establishing the same.

The vessel in question has now reached this port with a cargo of sugar, and having no papers beyond those referred to was permitted to enter to-day. She is consigned to S. & J. Welsh, to whom said Mora gives a power of attorney, authorizing them to represent him in the ownership of the vessel and to sell and transfer the same.

In order that this vessel may clear from this port, it is necessary that a register should be issued to her. The power of attorney referred to can not be recognized as a basis upon which to issue a register to an American vessel owned by an American citizen residing abroad, and the only means by which S. & J. Welsh can take out a register is through bill of sale made out to them by Mora. This, however, is a question to be hereafter settled between the parties themselves, but the point on which I desire to be advised is, whether a bill of sale on an American vessel, from an auctioneer in Cuba, constitutes in Mora a sufficient and clear title to ownership, under the proceedings of condemnation and sale certified to by the consul, and if such bill of sale constitutes such a title, whether, under section 2, act of December 31, 1792, this vessel can be registered if owned in whole or in part by any citizen of the United States who usually resides in a foreign country, unless it can be shown that said Mora is an agent for, or partner in, some house of trade or partnership, consisting of citizens of said States actually carrying on trade within the States.

Very respectfully,

CHARLES HENRY JONES, Special Deputy Collector.

P. S.—What is the law regulating the condemnation and sale of vessels under the circumstances herein described?

C. H. J.

Q. VIII.

[Telegram.]

SAN DIEGO, CAL.

SECRETARY TREASURY, Washington, D. C.:

Itata arrived July 4. Master offers to pay fine for violation of section 4197, confessing liability as provided by Article 1079, General Regulations. Would acceptance prejudice Government on other charges? This violation was promptly reported to United States attorney, but no notice yet been served on master Itata that libel proceedings to recover penalty have been begun. Customs officer now in charge of vessel. Instructions requested.

JOHN R. BERRY, Collector.

Q. IX.

JACKSONVILLE, FLA.

The SECRETARY OF THE TREASURY,
Washington, D. C.:

SIR: Morris Lyman, alien, Canadian by birth, resident ten years in United States, aged about 30, purchased, in ignorance of law, American schooner Bessie B., engaged in coasting trade of Florida. On March 16, 1889, he applied, as owner and master, to the collector, port of Jacksonville, for license and papers, and was advised by collector to take out papers of citizenship. On March 26, same year, he made declaration of intention, and both he and collector believing that was sufficient the vessel was, on March 27, duly licensed. Each year since her license has been duly renewed under same state of facts, owner believing in good faith that he had done all that was necessary. Schooner has been engaged in same business, came in port to-day as usual, when, on application to present collector for change of masters the owner's declaration of intention with ship's papers, handed collector, caused inquiry, with above results. Collector seized vessel and libel has been filed by district attorney. Vessel only 13 tons, valued \$1,500; owner bears good reputation, acted in good faith, but through ignorance. Can not vessel be released on bond? Owner can and will now be duly naturalized immediately, in which case can't vessel be duly licensed at once? Party is poor; each day's delay is expense; the violation is technical, not intentional. Could collector be instructed by wire?

Q..X.

CUSTOM-HOUSE, DULUTH, MINN., COLLECTOR'S OFFICE.

Hon. SECRETARY OF THE TREASURY, Washington, D. C .:

SIR: In reply to your letter of the 26th ultimo, 8936 N. inclosing a report from the collector of customs at Marquette, relative to the practice of entering and clearing foreign vessels at the head of the lake, I beg to state, in addition to my letter of the first instant, upon the same subject, that the situation at the head of the lake seems to be somewhat different from the way Collector Osburn, of the Superior district, has it in mind—as our difficulty has been mainly with foreign vessels that have

cleared from Duluth, have unloaded and surrendered their manifests and in fact finished their voyage at Duluth, then wish to go further inland into another district

for export cargo.

I take the liberty of inclosing a map showing the head of Lake Superior, with the dividing line between the districts of Duluth and Superior marked in red ink. It will be seen by this why foreign vessels coming to the head of the lake naturally prefer the Duluth entrance to that of Superior; in fact, no foreign vessels have ever, to my knowledge, come into this harbor in any other way since our entrance has been in existence—for this natural reason; also from the fact that the business part of vessel brokerage is, as yet, all done on the Duluth side of the bay—the board of trade, elevator offices, and the head offices of all the transportation companies being on this side, foreign vessels will probably continue to clear to Duluth, as they do now, for some time to come.

Hence it seems important for the two ports to agree in practice upon the following

(a) When a foreign vessel having cleared for Duluth, and discharged cargo, in fact finished her voyage, desires to go to West Superior to take on return cargo for exportation, what kind of permit should be given such a vessel to enable her to do so?

(b) When such foreign vessel, having taken on cargo at West Superior and

cleared foreign from there by way of our harbor, as seems to be allowed, is such vessel required to report at Duluth (the last port of contact), before final departure?

(c) When having taken on part cargo at West Superior and coming to Duluth to finish, is said foreign vessel required to take out foreign clearance from both places?

Or what is the proper procedure?

(d) If foreign vessel is cleared for Superior and goes to that place through Duluth entrance, is said vessel not required to report at Duluth and from here get permission to proceed to destination?

(e) If foreign vessel is cleared for Duluth and wishes to change her destinationeither with or without cargo-to Superior, what course should be pursued by this

office?

# BUREAU OF ENGRAVING AND PRINTING.

Q. I. What is the general business of the Bureau of Engraving and Printing?

Q. II. Name the divisions of the Bureau of Engraving and Printing in which mechanical and manual processes are applied to the sheets in the manufacture of securities, etc.

- Q. I. What is the principal clerical work in the office of the Bureau of Engraving and Printing?

Q. II. What are the titles of the appropriations for the "Bureau of Engraving and Printing?"

Q. III. What percentage of the number of impressions printed is allowed plate printers for spoilage?

Q. IV. What is the difference between "monthly basis" and "daily basis" in

charging a printer for spoilage?
Q. V. What is the difference between registered and unregistered work?
Q. VI. How would an operative in the Bureau of Engraving and Printing be compensated for temporarily working overtime each day?

Q. VII. What class of paper is kept in the memorandum files of the Bureau of

Engraving and Printing?

Q. VIII. Describe the proceedings in the appointment of a printer's assistant.

Q. IX. After a printer's assistant has served a probationary appointment of six months, on what points of her record does the Chief of Bureau report to the Secretary of the Treasury?

Q. X. What positions except the higher offices in the Bureau of Engraving and

Printing may be filed without examination under Civil Service rules.

Q. I. What is the general business of the Bureau of Engraving and Printing?

Q. II. Name the divisions in which mechanical and manual processes are applied to the sheets in the manufacture of securities, etc.

Q. III. Name several of the principal classes of securities, etc., manufactured in the Bureau of Engraving and Printing.

Q. IV. What part of the work is executed in the binding division?
Q. V. What is meant by a four-subject impression?

Q. VI. What number of sheets is usually contained in a package of work?
Q. VII. What daily report is made to the office by the binding division?
Q. VIII. To what do the daily statements of the condition of orders for internalrevenue stamps refer?

Q. IX. Name several classes of stamps that are perforated.

Q. X. Name some classes of stamps that are bound.

Q. I. What is the general business of the Bureau of Engraving and Printing?

Q. II. What officer of the Treasury Department has general direction and supervision of all matters of public business assigned to the Bureau of Engraving and Printing?

Q. III. On what kind of paper are the securities of the United States printed? Q. IV. What division of the Secretary's Office has the care and custody of the

paper used in printing securities, etc.? Q. V. What division of the Bureau has charge of the preparation of the dies, rolls,

- and plates from which the securities, etc., are printed?

  Q. VI. What officer has the custody of the dies, rolls, shells, plates, etc., when not in use?
- Q. VII. What officer of the Treasury Department audits the accounts of the Bureau of Engraving and Printing?

  Q. VIII. How is money provided for the support of the Bureau of Engraving and

Printing 9

Q. IX. What are the titles of the regular annual appropriations for the support of the Bureau of Engraving and Printing?

Q. X. Through which division of the Bureau are the finished securities, stamps, checks, etc., delivered to the Treasury and other Departments?

Q. I. What are the principal duties of a printer's assistant?

Q. II. Name the defects in printing for which impressions are rejected.

Q. III. What is the appearance of a mashed impression?

Q. IV. How does a broken impression appear? Q. V. What is the cause of a sly-wipe? Q. VI. What is a waste impression?

Q. VII. When a printer fails to print all the paper drawn what is done with the remainder?

Q. VIII. How may any printer's work be identified?

- Q. IX. What is meant by a four-subject impression?
  Q. X. What is done with the work produced by the printing division each day?
- Q. I. What class of circulating notes is accounted for in this division? Q. II. What classes of stamps are accounted for?

- Q. III. Name some other classes of face work received for surface printing which are accounted for.
- Q. IV. Name some of the classes of work for which the paper to print tints is accounted for.
  - Q. V. Name a class of work for which the paper to print faces is accounted for. Q. VI. How is the paper obtained for printing internal-revenue stamps, etc.?

Q. VII. How are the plates or forms obtained for printing?

- Q. VIII. To whom is the national currency immediately and finally delivered?
- Q. IX. How is the mutilated or imperfect work disposed of? Q. X. What daily reports of balances on hand are made?
- Q. I. Name the principal kinds of work printed by the relief process.

Q. II. Name a kind of work fed to center guide.

Q. III. What result would appear on the sheet by failing to feed the paper down to guide before the grippers closed?

Q. IV. What is it proper to do after failing to feed the paper far enough down to be clutched by the grippers?

Q. V. What effect would be produced by the grippers failing to clutch the paper while the press is in motion?
Q. VI. What should the feeder do immediately upon finding that more than one

sheet at a time has been fed to the press? Q. VII. What would be the effect of printing two or more impressions on a sheet?

Q. VIII. What would the feeder do in case of any unusual noise at the press?

Q. IX. By what means is a press stopped at the close of work?

Q. X. What part of the work particularly requires the feeder to have clear vision?

Q. I. Describe process of pressing work in examining division.

- Q. II. Name some of the kinds of work which are required to be pressed.
- Q. III. What is meant by single work?
  Q. IV. What is meant by double work?
  Q. V. What is the amount of pressure used?

- Q. VI. What should the presser be careful to do in putting the work between the boards?
- Q. VII. What should the presser be careful to do in taking work out of the
- Q. VIII. What are the next processes applied to the sheets after they are taken from the boards?

Q. IX. What is done if the pressed work is found short when counted?

Q. X. What is done with sheets mutilated in pressing?

Q. I. Who should be notified of the fact when a plate is finished and ready for press?

Q. II. How can a finished die, roll, or plate required for use by the engraving

division be procured?

Q. III. Before what hour should the clerk draw plates for annealing, and how

many plates may be drawn at a time?
Q. IV. When should reports of new work begun be made?
Q. V. How are the receipted requisitions that are returned to clerk by custodian at close of work, disposed of?

Q. VI. What are the elements of expense to prepare a portrait plate? Q. VII. Describe the course of making a complete record of a new die engraved for national currency plates.

Q. VIII. At what time should the first and second deliveries of stock be made to the custodian of dies, rolls, and plates, and what papers should accompany each

delivery?

Q. IX. What entry is made in the records when a plate has been canceled by order of the superintendent of engraving division?

Q. X. Of what particular thing should the clerk know before filling out a pass for an employé to leave the Bureau?

Q. I. What are the duties of a wet-counter?

Q. II. How is the printed work received by the examining division?

Q. III. What is done when a lot is found to contain more or less than the number of sheets marked on the slip?

Q. IV. Name some of the classes of work counted. Q. V. What do you understand to be tissue work?

Q. VI. What is done with the wet work after it leaves the counters?

Q. VII. What part of the printed work is received and counted by wet counters? Q. VIII. What does the printer have to show that his work is correct before he can leave the building when the work is finished?

Q. IX. What do you understand to be plain work and registered work?

- Q. X. State briefly the processes which are applied to the 10-pound tobacco stamps in the examining division.
  - Q. I. Name several imperfections found in printed sheets.

Q. II. What is a second impression?

Q. III. Name some classes of work that have one, some that have two, and some that have three printings.

- Q. IV. On what sheets generally are the registry marks printed?
- Q. V. What purpose do the registry marks on the plates serve? Q. VI. What is done with the sheets rejected by the examiner?
- Q. VII. What allowance is made to the printers in charging them for spoiled work? Q. VIII. How are the mutilated sheets disposed of?
- Q. IX. What work is delivered directly from the examining division to the Internal Revenue Bureau?
  - Q. X. If a sheet is missing in any class of work what is done to recover it?
- Q. I. What official forms are used in making bills against the Bureau for materials, etc.
  - Q. II. What is a purchase under annual contract?
- Q. III. What is a purchase to meet public exigency?
  Q. IV. What is the certificate required with vouchers for purchase to meet pub-
- lic exigency?

  Q. V. What is the certificate made in the Accountant's office to all vouchers for supplies, etc.?
- Q. VI. Who certifies to the quality of any article furnished?
  Q. VII. What constitutes the contract under which any article of supplies is purchased?
- Q. VIII. Name the classes of articles of supplies included in the annual advertise-
- ment for proposals.
  Q. IX. What annual contracts under advertisement are made, other than those for articles of supplies?
  - Q. X. From whom will no proposal for supplies be accepted?
  - Q. I. What does the order given to a numberer state?
  - Q. II. What daily reports are made?
  - Q. III. What monthly report is made?
  - Q. IV. Name the schedules that are made.
  - Q. V. Name some of the records that are kept of notes, certificates, etc. Q. VI. Name some of the records that are kept of internal-revenue liquor stamps.
  - Q. VII. Name some of the other records that are kept.
  - Q. VIII. What is meant by stock?
- Q. IX. How is a numberer directed to re-number on sheets from stock to take the place of mutilated numbered sheets?
- Q. X. How may it be ascertained which employé numbered or which employé examined and passed the numbers on any particular numbered note in circulation or otherwise ?
- Q. I. What two different kinds of daily reports of balances on hand are made by the binding division?
  - Q. II. Name the various sizes of water-marked check paper.
- Q. III. Under what separate general heads are the accounts of water-marked paper kept?

  - Q. IV. On what divisions are orders made to number checks?
    Q. V. In what separate ways are the three varieties of pension checks drawn?
  - Q. VI. Which of the internal-revenue stamps are bound?
  - Q. VII. Of what series are all the tobacco stamps?
- Q. VIII. Which of the internal-revenue stamps have red strips of paper pasted on their backs

  - Q. IX. Which of the customs stamps are perforated and bound? Q. X. Which of the stamps are prepared for the Department of Agriculture?

  - Q. 1. What are the general duties of a files clerk?
    Q. II. Into what subdivisions are the letters, etc., received classified?
    Q. III. What are "orders?"
    Q. IV. What are "official?"

  - Q. V. What are the "miscellaneous?"
  - Q. VI. What do the "applications" comprise? Q. VII. What are the "special?"

  - Q. VIII. What records are kept of the letters which pass from the Bureau?
- Q. IX. By what ready method may information be found in the files respecting any applicant for position, or any employé that has ever been in the Bureau
- Q. X. By what ready method may information on any important subject be found in the files?
  - Q. I. What written reports are made by a register clerk?
  - Q. II. Name four of his principal mechanical duties.
  - Q. III. Which of the printing-press locks are under the clerk's control?

Q. IV. What is a waste impression? Q. V. What is a transfer and what is an offset?

Q. VI. Against what improper action are the clips a check?

Q. VII. Against what improper action is the shoe a check? Q. VIII. What is the object of the rule which requires printers to report at the time of their occurrence all accidents to their presses?

Q. IX. What is a packing?

Q. X. When are transfers returned by the printers?

## BUREAU OF STATISTICS.

Q. I. State briefly the duties of the Bureau of Statistics as administered. Q. II. Name the various statements received from collectors of customs in regard to foreign commodities brought into this country or passing through the country

Q. III. When, or about what year, was the first general statistical law passed for the collection of statistics of foreign commerce; to what office of this Department were the duties in connection with it assigned; also state briefly what statistics were to be collected under that law, and how often did the law require statements to be published?

Q. IV. When, or about what year, was the second statistical law, creating the present Bureau of Statistics, passed, and what were some of the material changes

which it made in the first general statistical law?

Q. V. Name the regular publications of the Bureau of Statistics.
Q. VI. From what sources does the Bureau of Statistics derive the data from which its publications on foreign commerce and internal commerce are prepared?

Q. VII. How were foreign goods, passing across United States territory from one country to another, treated in the United States statistical accounts prior to the act creating the Bureau of Statistics, in 1866, which required separate statements of such merchandise passing in transit through the United States?

Q. VIII. Name some of the countries which furnish the largest portion of our

sugar, coffee, and tea.

Q. IX. During the last and current fiscal years has the value of the imports of merchandise or the value of the exports of merchandise preponderated?

Q. X. From what sources do collectors of customs derive their data for their statements of exports?

Q. I. If our imports were valued at their cost landed on our shores, what are some of the principal items of expense attached to their importation which it would be necessary to add to the values they now bear in our import statistics?

Q. II. Is the larger amount of our duty collected on imports derived from specific

or ad valorem rates of duty?

Q. III. When did the last general tariff act take effect, and did it repeal or only modify the prior tariff acts?

Q. IV. What is the distinction between the terms "general imports" and "imports

entered for consumption," as used by the Bureau of Statistics?

Q. V. Does the term "entry for consumption," as used in the statistical accounts,

imply that the goods were actually consumed in the United States?

Q. VI. On articles imported, nonenumerated or not specially described in the tariff, what are some of the general principles which govern the fixing of the rate of duty? Q. VII. What kinds of duty are imposed on sugar, on manufactures of silk, and on

raw wool, respectively? Q. VIII. Name four leading articles, or classes of articles, from which our customs

revenue is derived.

Q. IX. From what sources do collectors of customs derive the data for their returns of imports; and what are some of the particulars embraced in such data?

Q. X. Name the kinds of duty imposed by our tariff laws on imports.

Q. I. State briefly the duties of the Bureau of Statistics as administered.

Q. II. Name the political subdivisions or provinces of the Dominion of Canada as grouped in the statistical accounts of this Bureau.

Q. III. What is the difference between ad valorem and specific duties? Q. IV. How is the value of domestic commodities exported ascertained?

Q. VIII. How are the values of imported merchandise ascertained?

 $m ilde{Q}.~V.~What is~the~difference~between~exports~of~domestic~commodities~and~exports$ of foreign commodities?

Q. VI. Name the regular monthly statements (including the advance statements) published by the Bureau of Statistics.

Q. VII. What is the meaning of in-transit or transshipment trade as distinguished from the import and export trade?

Q. IX. What duty is levied on exported domestic spirits when imported again? Q. X. Formerly all imports were required to be first entered at an exterior port of the country. In 1870 the law on this subject was changed. What, in substance, was the change in this particular?

- Q. I. State briefly the duties of the Bureau of Statistics. Q. II. State briefly the nature of the statistics collected and published by this Bureau
- Q. III. State as nearly as you can the title of each series of regularly issued publications of the Bureau and their periodicity.

Q. IV. State briefly the general nature of the contents of each series of publica-

Q. V. To whom are the publications of the Bureau of Statistics sent? Give principal classes of distributees.

 $\overline{\mathbf{Q}}$ . VI. From what sources does the Bureau of Statistics derive the data from which

its publications on foreign commerce and internal commerce are prepared?

Q. VII. Name some of the countries which furnish the largest portion of our imports of sugar, coffee, and tea, respectively.

Q. VIII. From what sources do collectors of customs derive the data, first, of imports; second, of exports?

Q. IX. Name the kinds of duty imposed by our tariff laws on imports and the dis-

- tinction between each kind. Q. X. Are the statistics of our exports to Canada and Mexico as complete as our export statistics to other countries? If not, why?
- Q. I. What standard has the Secretary of the Treasury prescribed as to spelling in official correspondence?

Q. II. State instructions of Secretary in briefing letters. First, as to fold; second, place of brief; third, order of matter in brief.

Q. III. What are the Secretary's instructions as to what the subject-matter of brief shall contain? Q. IV. What are the Secretary's instructions in referring or forwarding reports,

accounts, and other papers as to letter of transmittal?

Q. V. What disposition is made of the numerous applications for statistical infor-

mation when such applications refer to matters properly within the jurisdiction of the Bureau of Statistics and when they do not?

Q. VI. Is sugar now free of duty, or dutiable, when imported into the United States?
Q. VII. How would you index a letter written to George H. Morgan, secretary of the Merchants' Exchange, St. Louis, in your book of outgoing letters?

Q. VIII. What are the Secretary's instructions as to what should appear in the brief of a letter, say, from C. H. Keep, Buffalo, transmitting bills of John Smith, of Green Bay, Mich., S. Jones, of Marquette, Mich., and S. Martin, of Milwaukee, for \$20 each in payment of services for collecting special information in regard to lake commerce

Q. IX. Into what two classes are exports from the United States divided, and what

is the distinction between them?

Q. X. Are shipments of merchandise from New York to San Francisco, around Cape Horn, exports in the technical sense of the term? If not exports, why not?

### MARINE-HOSPITAL SERVICE.

- Q. I. What are the general duties performed by the Marine-Hospital Bureau? Q. II. From what source is the expense of the Marine-Hospital Service borne?
- Q. III. What is the plan of organization of the Marine-Hospital Service, including the names of the various grades of officers?

Q. IV. What are the general duties of medical officers at a relief station? Q. V. What are the general duties of officers at quarantine stations?

Q. VI. By whom are the appropriations of the service disbursed?

Q. VII. How must a voucher be made out at a contract relief station to secure payment for the board of seamen?

Q. VIII. From what source of information is the weekly abstract of sanitary reports compiled?

Q. IX. What is a relief station of the Marine-Hospital Service?

- Q. X. Under what circumstances do foreign seamen receive relief from the Marine-Hospital Service?
- Q. I. What is the minimum period of service aboard a vessel which will entitle seamen (a) of the merchant marine (b) and of the Revenue-Cutter Service to the benefits of the Marine-Hospital Service?

- Q. II. Through whom should the official correspondence of acting assistant surgeons stationed (a) at first-class stations (b) and at second-class stations be transmitted?
- Q. III. What is the difference between stations of the first, second, and third class?
- Q. IV. The number of deaths during the month of May in a city of 10,960 inhabitants was 37; give annual death rate per 1,000.
- Q. V. Name the districts into which the United States is divided for ease of administration of the Marine-Hospital Service, and name the stations of the first class in each district.
- Q. VI. Of 1,200 men examined for enlistment 25 were found to be color blind and 133 were rejected for other physical disability; give percentage of rejections for each
- Q. VII. What disposition is made of unclaimed money and valuable effects of deceased seamen
- Q. VIII. What is the daily rate charged foreign seamen for treatment in marine hospitals of the United States and who is charged with the collections of these bills? Q. IX. Criticise the inclosed "master's certificate," Form 1914. (Imperfectly filled blank submitted to candidate.)

Q. X. What monthly reports of relief are forwarded to this Bureau from stations of the first class?

Q. I. Name the appropriations under the control of the Marine-Hospital Service?

Q. II. By whom are the bills paid?

- Q. III. How do the disbursing agents receive funds for the payment of bills?
- Q. IV. In what manner do disbursing agents render accounts of disbursements on account of the service?

Q. V. To what accounting officer are such accounts referred?
Q. VI. What disposition is made of bills not receipted before payment?

- Q. VII. What disposition is made of funds collected for the care of foreign seamen in marine hospitals?
- Q. VIII. How are the accounts of moneys collected by collectors of customs for the care of foreign seamen proved to be correct?
- Q. IX. What disposition is made of money derived from the sale of condemned
- property? Q. X. What accounting officers of the Treasury examine accounts pertaining to this Bureau?
  - Q. I. How should bills be rendered against the Marine Hospital fund?

- Q. II. What is necessary prior to their payment?
  Q. III. How are the monthly amounts due salaried officers determined?
- $ilde{\mathbf{Q}}.$  IV. If a Government salary table was not at hand how would you compute the amount due for any month?
- Q. V. What is the allowance to medical officers as to baggage, and how should it be sent when changing stations?
  - Q. VI. What is the age limit for admission to the medical corps? Q. VII. How are examining boards constituted and convened?
  - Q. VIII. What percentage is required for a successful candidate?

- Q. IX. Can an unsuccessful candidate be reexamined? Q. X. Under paragraph 24 of the regulations what is the maximum salary of an assistant surgeon?
- Q. I. What persons are entitled to the benefits of the Marine-Hospital Service? Q. II. How may a sick or disabled seaman obtain the benefits of the Marine-Hospital Service?

- Q. III. By whom are certificates of service to be issued? Q. IV. What disposition is to be made of relief certificates and hospital permits, when completed according to the blank forms furnished by the Treasury Department for that purpose?
- Q. V. From what Government services may seamen be admitted to the benefits of the Marine-Hospital Service? And under what circumstances will relief be furnished ?
- VI. By whom, and when, should reports be made of diseases and injuries treated by them in hospital, and of like cases treated as out-patients?

Q. VII. What standard is to be observed as to names and order in reporting dis-

eases and injuries on Forms 1920 and 1921?
Q. VIII. What is done with these monthly reports when received in the office of the Surgeon-General?

Q. IX. Where United States hospitals have not been established, how is provision made for furnishing quarters, subsistence, and nursing to sick and disabled seamen? Q. X. How must all bills on account of the Marine-Hospital Service be rendered!

## STEAMBOAT INSPECTION.

Q. I. Name the necessary qualifications required by law of a Supervising Inspector-General of Steam Vessels

Q. II. Define briefly the duties of the Supervising Inspector-General as prescribed by law.

Q. III. Define briefly the duties of a supervising inspector as prescribed by law. Q. IV. In case of an accident to the hull or steam machinery of a steam vessel, who comprise the first board or commission of inquiry into the circumstances of the

Q. V. By what process are the accounts of the customs officers for inspections verified?

Q. VI. Describe the general organization of the Steamboat Inspection Service, with the designation or title of its various officers.

Q. VII. Into how many supervising inspection districts is the United States divided?

Q. VIII. How many persons compose a local board of inspectors, of steam vessels, and what are the legal titles of the different members of such a board, and what are

the general duties of the board? Q.IX. When the inspection of a steamer is completed, to whom is the original certificate of inspection sent?

Q. X. By whom are the inspections of steamers reported to the Department?

Q. I. What do you deem a steam vessel within the meaning of the Revised Statutes?

Q. II. How many supervising inspectors are provided by law? State the compensation of each and the localities where they are stationed.

Q. III. By what process are the accounts of the customs officers for inspections

Q. IV. Describe the specific duties pertaining to your desk during the time you have been assigned to duty in the office of the Supervising Inspector-General of

Steam Vessels.

Q. V. By what general method is the accuracy of the personal expense accounts of inspectors determined?

Q. VI. When inaccuracies are discovered or discrepancies exist between the expense accounts of inspectors composing the board of local inspectors, what is the mode of proceeding before final action is taken in such accounts?

Q. VII. What is the procedure of the office when notified by local inspectors that certain persons named by them have become entitled to per diem and mileage for appearance by summons before such local inspectors at an investigation into the

conduct of a licensed officer of steam vessels? Q. VIII. What is the procedure when discrepancies are found in the name or tonnage of steamers as reported respectively by the supervising inspectors of steam vessels and the collector of customs in their quarterly reports of steamers inspected?

Q. IX. When and where do the board of supervising inspectors of steam vessels assemble and for what purpose?

Q. X. How many local boards of inspectors are there and how are their districts assigned?

Q. I. Name the necessary qualifications required by law of a Supervising Inspector-General of Steam Vessels?

Q. II. State what colored light is required by law to be carried, respectively, at the foremast-head, the starboard side, and the port side of an ocean-going steamer,

and during what portion of the day must they severally be exhibited?

Q. III. In case of an accident to the hull or steam machinery of a steam vessel, who comprise the first board or commission of inquiry into the circumstances of the disaster?

Q. IV. How many supervising inspectors are there?

Q. V. How many officers constitute a board of local inspectors?
Q. VI. Describe the general organization of the Steamboat Inspection Service, with the designation or title of its various officers?

Q. VII. Into how many supervising inspection districs is the United States divided?

Q. VIII. When the inspection of a steamer is completed, to whom is the original certificate of inspection sent?

Q. IX. Describe the specific duties pertaining to your desk during the time you have been assigned to duty in the office of the Supervising Inspector-General of Steam Vessels?

Q. X. By what general method is the accuracy of the personal expense accounts of inspectors determined?

Q. I. Describe the general organization of the Steamboat Inspection Service, with the designation or title of its various officers.

Q. II. Define briefly the duties of the Supervising Inspector-General as prescribed by law.

Q. III. Define briefly the duties of a supervising inspector as prescribed by law.

Q. IV. State how many supervising inspectors there are, the compensation received, and their location.

Q. V. When and where does the Board of Supervising Inspectors of Steam Vessels

assemble, and for what purpose?

Q. VI. To whom do the supervising inspectors report the transactions in their respective districts?

Q. VII. How many local boards of inspectors are there, and how are their districts assigned?

Q. VIII. Of how many members does a board of local inspectors consist, and what

- are their official titles? Q. IX. By whom are steamers inspected and officers licensed, and for what period? Q. X. In case of accident to the hull or steam machinery of a steam vessel, who comprises the first board or commission of inquiry into the the circumstances of the disaster?
- Q. I. By whom, and to what classes of officers of steam vessels are licenses issued? Q. II. Describe the method by which an accurate record is kept in your office of
- the serial numbers of licenses issued. Q. III. When and by whom are local inspectors' license books to be examined? Q. IV. What are local inspectors specially required to note in reporting a viola-
- tion of the steamboat laws?

Q. V. By whom, to whom, and when are all casualties affecting the Steamboat Inepection Service to be reported?

Q. VI. How are the books containing copies of letters sent from the office of the Supervising Inspector-General designated?

Q. VII. By what method are the letters sent to the officers of the Steamboat In-

spection Service indexed?

Q. VIII. What is required to obtain a permit to use petroleum in the production

of motive power upon a steam vessel, and what record is kept of permits granted?

Q. IX. For what length of time can a temporary permit to use a boiler not constructed of riveted iron or steel plates be granted, and what record is kept of such

Q. X. When can the name of a steam vessel be changed, and what record is made of the change, in the office of the Supervising Inspector-General?

Q. I. Describe the specific duties pertaining to your desk during the time you have been assigned to duty in the office of the Supervising Inspector-General.

Q. II. By what general method is the accuracy of the personal expense accounts

of inspectors determined?

Q. III. When inaccuracies are discovered or discrepancies exist between the expense accounts of inspectors, what is the mode of proceeding before final action is taken in such accounts?

Q. IV. How often, and in what manner, do inspectors render accounts for their personal traveling expenses? To what bureau are such accounts referred after ap-

proval, and what is their course from here until warrant is issued?

Q. V. How often may a steamer be inspected at the expense of the Government, and when does she forfeit this right, and at whose expense is the inspection then made?

Q. VI. When the inspection of a steamer is completed, to whom is the original

certificate of inspection sent?

Q. VII. What is the procedure when discrepancies are found in the name or tounage of steamers as reported respectively by the Supervising Inspector of Steam Vessels and the collector of customs in their quarterly reports of steamers inspected?

Q. VIII. What is the procedure of your office when notified by the local inspector that certain persons named by them have become entitled to per diem and mileage for appearance, by summons, before such inspectors in cases of investigations into the conduct of a licensed officer of steam vessels?

Q. IX. By whom and in what form are instructions issued for your guidance in the

examination and settlement of accounts of inspectors and customs officers?

Q. X. Name the different forms of reports and statements received at your desk from supervising, local, and special inspectors, and customs officers?

Q. I. What records are kept by you? What reports are received by you? On what dates are they made? What disposition is made of them? State briefly the other duties connected with your desk, and your experience as a typewriter and mathematician.

Q. II. On what dates do the officers of the service make their returns of public peoperty? Describe the method of keeping the record of public property.

Q. III. What entries relating to remission of fines and penalties are made in the

indorsement book?

Q. IV. From what ports do you receive reports of foreign steam vessels inspected? Q. V. A steamer is reported to have the safety-valve lever loaded with three weights, one at the end weighing 20 pounds, the second, 15 pounds, with center of gravity 6 inches from end, and the third, 10 pounds, with center of gravity 12 inches from end. Length of lever, 32 inches. Valve area, 7.91 inches. Fulcrum distance, 4 inches. Weight of lever, 20 pounds. Weight of valve and stem, 8 pounds. For

what pressure of steam is the safety valve set?

Q. VI. What steam pressure should be allowed on a single-riveted marine boiler, having a diameter of 40 inches; thickness of plate, 0.25 inch; and tensile strength of material, 50,000 pounds? On a double-rivetted boiler of same dimensions and

T. S. ?

Q. VII. What would be the carrying capacity of a foreign steamship's lifeboat of the following dimensions: Length, 20 feet; beam, 6 feet; and depth 3 feet? On

domestic lifeboat of same dimensions on river steamers?

Q. VIII. What is the buoyancy of a life-raft constructed of two cylinders with conical ends, having given: Length of each cylinder, 12 feet; diameter of each cylinder, 16 inches; altitude of each cone, 20 inches (neglecting material)? What would be the rated carrying capacity on the ocean if such were the actual buoyancy?

Q. IX. What diameter of stay bolt spaced 6 inches from center to center would be allowed in the flat surface of a boiler carrying an allowed steam pressure of 100

pounds?

Q. X. What working pressure would be allowed on flat surface of a boiler fitted with socket bolts 5-inch center, plate three-eighths inch thick? (Use Rules and Regulations in solving this problem.)

## DIRECTOR OF THE MINT.

Q. I. How is gold for coinage purposes obtained by the Government?

Q. II. What is the requirement of existing law in regard to the purchase of silver bullion?

Q. III. For what purpose can silver be deposited at the mint other than for pur-

- chase by the Government?
  Q. IV. Give the denomination, weight, and composition of each of the gold, silver, and minor coins authorized by existing law?
- Q. V. Is there any coinage charge at the mint for the manufacture of gold coins? Q. VI. For what amount are the subsidiary silver coins legal tender among individuals?
  - Q. VII. At what institution of the mint service are minor coins manufactured? Q. VII. What is meant by the "bullion fund" of the mints?

Q. IX. Explain the meaning of seigniorage on silver coins.

- Q. X. What are the requirements of law in regard to the valuation of foreign coins?
- Q. I. Give the names and locations of the mints and assay offices of the United States.

Q. II. What is the difference between a mint and an assay office?
Q. III. How are appointments in the mint and assay offices made (exclusive of Presidential appointment)?

Q. IV. How is gold for coinage at mints obtained?

Q. V. How is silver for the coinage of silver dollars obtained? Q. VI. What amount of silver does the law require to be coined monthly in silver dollars?

Q. VII. How are silver purchases made? C. VIII. What accounts are required to be rendered by the superintendent of a mint

Q. IX. At what institution are minor coins executed?

- Q. X. At what assay office of the United States is parting and refining conducted?
- Q. I. What is the value, in United States gold coin, of 1 Troy ounce of pure gold? What is the coining value, in silver dollars, of 1 Troy ounce of pure silver? Q. II. Ascertain the weight, in Troy ounces, of \$1,100,000 of gold coin. How much

pure gold contained?
Q. III. Ascertain the weight, in Troy ounces, of 1,280,000 silver dollars. How

much pure silver contained?

Q. IV. Ascertain the amount which would be paid a depositor of gold bullion, weighing 61.26 Troy ounces, containing 800 parts of pure gold and 126 parts of pure silver, the charges being \$1 for melting, 2 cents per gross ounce for parting the gold and silver, 2 cents for each ounce of copper required to alloy the gold, with the usual deduction of 1/99 of the standard weight of gold from the silver; the value of the silver contained being reckoned at 95 cents per fine ounce.

Q. V. From what fund is paid the expense of distributing siver dollars? Q. VI. From what fund is paid the expense of distributing minor coins?

Q. VII. How many dollars, in half-dollars, quarter-dollars, or dimes, could be coined from 321,500 Troy ounces of standard silver bullion?

Q. VIII. How many silver dollars can be coined from 220,000 Troy ounces of standard silver bullion?

Q. IX. What is the meaning of the mint terms "fine" and "standard?" Q. X. What accounts are rendered by the officers in charge of the mints and assay offices?

Q. I. Give the weight and fineness of the gold coins of the United States.

Q. II. Give the weight and fineness of the silver coins of the United States. Q. III. If a deposit of gold bullion weighs 30.63 troy ounces and contains 9264-thousandths of gold and 63-thousandths of silver, what would be the number of standard ounces of gold and silver contained, 1-99th of the standard weight of gold being deducted from the silver?

Q. IV. What would be the value of the gold in the above deposit, and what of sil-

ver, the rate for silver partings being 87 cents per standard ounce?

Q. V. What would be the total charges on the above deposit, the rate for parting being 4 cents per ounce, melting \$1 per thousand ounces or less, and alloy 2 cents per ounce for the copper required for the gold, and what the net value due the depositor?

Q. VI. What is the coining rate of gold per standard ounce and what per fine

ounce?

Q. VII. What is the coining rate of silver dollars per standard ounce and what per fine ounce?

Q. VIII. What is meant by seigniorage on coins?

Q. IX. How many silver dollars can be coined out of 859,375 standard ounces of silver?

Q. X. How many gold dollars can be coined out of 43 standard ounces of gold? Note.—There are very few clerks of low grade in the office of the Director of the Mint, and when they are examined questions from the above sets would be given to them.

#### COAST AND GEODETIC SURVEY.

[The candidate will select and answer any ten of the following questions]

Q. I. Give a brief abstract of the history of the Coast and Geodetic Survey from its origin to the present time. Name the superintendents.

Q. II. How are the funds necessary to carry on the work provided? What do you

understand by "itemized appropriations?"

Q. III. Under what general heads is the field work carried on?
Q. IV. When the work is turned into the office how are the original records taken care of? Tell what you know generally of this subject.

Q. V. If you wished to inform yourself on the conduct of the operations of the Survey what books would you consult, and what would you consult to learn about the laws and regulations governing the same? You may name any book or pamphlet giving the general history of the Survey.

Q. VI. What relation does the office of construction of standard weights and

measures bear to the Coast and Geodetic Survey, if any? And what connection has the Superintendent with the office of construction of standard weights and meas-

VII. What arrangement is made to place the publications of the Coast and Geodetic Survey before the public? If you wished to see how the charts are arranged, their prices, etc., what publication would you consult?
Q. VIII. What is the relation of this Bureau to the civil service? Tell what you

know about the matter.

Q. IX. What is the title of the person at the head of the Survey? Outline the organization of the office.

Q. X. To the head of which of the Executive Departments does the Superintendent of the Coast and Geodetic Survey report?

Q. XI. In what class of work are the naval officers who are doing duty on the Coast and Geodetic Survey engaged?

Q. XII. What are the hours of beginning and closing the day's work in the office

If there are any exceptions you may name them?

Q. XIII. What rules are applied to the employes of the Coast and Geodetic Survey office concerning the matter of leave of absence?

Q. I. Outline the relation between the normal force and the Superintendent? Q. II. How does the Superintendent proceed to put an officer of the normal force in the field and in charge of a party?

Q. III. How does an officer under instruction generally get funds for the work;

that is, what are his responsibilities and how does he proceed?

Q. IV. After the assistant has his approved estimates in hand, how does he get his money?
Q. V. What security has the disbursing agent in making such advances as the

Superintendent directs?

 $\hat{\mathbf{Q}}$ . VI. Where does final responsibility rest with regard to every act in the Survey, whether in the field or in the office?
Q. II. How is the Superintendent's annual report made up?

Q. VIII. What is the general arrangement of its contents?

Q. IX. How does the Superintendent proceed to make known to Congress the wants of the Bureau?

Q. X. By what date does the Sceretary of the Treasury require estimates for annual expenditures to be submitted to him?

Q. I. Indicate by the usual notation the principal diurnal harmonic components of the tide, the principal semi-diurnal components, also the higher harmonics provided for in Professor Ferrel's tide-predicting machine.

Q. II. What is the characteristic difference between the tides of the Atlantic and Pacific coasts of the United States, and what is the corresponding difference in the relative magnitude of the harmonic component tides?

Q. III. What is the effect of variations in depths and width of tidal rivers upon the

amplitude of the tide wave and its velocity of propagation?

Q. IV. What is the effect of progress up a river upon the form of a tide wave and

upon the duration of its rise and fall?

Q. V. The times of high and low water at a station in longitude 81° 28" west from Greenwich are recorded in Eastern Standard time and so used in the reduction. The Washington transits of the moon are taken unmodified from the Ephomeris. How should the establishments so computed be modified to obtain the local establishments, working to the nearest minute of time?

Q. VI. Taking the mean synodic month equal to 29.53059, ±0.00001 mean solar days, determine the speed of the mean moon per mean solar hour with the greatest

precision the data will warrant. Exhibit the probable error of the result.

Q. VII. The results of six lines of spirit levels, transcribed into an unverified duplicate record, give zero of tide staff below bench mark 11.247, 11.231, 10.262, 11.250, 1.238, 11.348 in meters. The instrument and observer are known to be good; nothing is known of the recorder or the transcriber save this record. How far is staff zero below bench mark, and what is the probable error of the determination? Give reasons for your interpretation and use of the record.

Q. VIII. In the process of finding the amplitude and epoch of a component tide (other than mean solar), the height of the curve tabulated at equal intervals  $\alpha^{\rm b}$  which are aliquot parts of a mean solar day, were used instead of the heights tabulated at intervals which are aliquot parts of the component day, by invariably taking the tabular height nearest in time to the true height at the component hour. Expressing

the component tide by

$$h = \sum_{r=1}^{r=\infty} (A_r \cos r\theta + B_r \sin r\theta)$$

determine the factor by which the amplitudes  $A_r$ ,  $B_r$ , so obtained must be multiplied to get the true amplitudes  $A_r$ ,  $B_r$ . Give the factor and its logarithm (to seven places) when  $\alpha=30^{\rm m}$ , for r=1,2,3,4,6, and 8.

Q. IX. Show how the mean range of tide can be derived from the harmonic components, when these are known, and thus save the labor of a special reduction for the same.

- Q. X. Describe the maxima and minima tide-predicting machine invented by Prof. William Ferrel and used by the Coast and Geodetic Survey in the preparation of the annual Tide Tables for the Atlantic and Pacific coasts of the United States. Show how it may be adapted to the work of predicting hourly or other heights of the sea. Draw rough diagrams when necessary.
- Q.I. What causes diurnal aberration, and what is its effect on the position of northern circumpolar stars?

Q. II. What is meant by a partial differential of a function of several independent variables?

Q. III. Define the "Nonagesimal." Q. IV. State the different means that may be employed for the purpose of climinating the effect of the difference of personal equation in telegraphic longitude work.

Q. V. What is meant by "personal scale" in eye and ear observations for time? Q. VI. What is the principle involved in Gauss's method of indirect elimination, as applied to the solution of normal equations, and when are the latter favorable to

its application?
Q. VII. In the operation for determining the earth's magnetic force a magnet suspended on a thread is allowed freely to oscillate in a horizontal plane, what forces

are then in action?

Q. VIII. Suppose  $t_1$ , subject to a probable error of  $e_1$ , and  $t_2$  subject to  $e_2$ , what is the probable error of  $t_1t_2$  and of  $\frac{v_1}{t_2}$ 

- Q. IX. Explain the difference between mean and apparent places of stars. Q.X. What advantage is gained in azimuth determinations by combining results of a star observed at east and west elongation, and again when observed at upper and lower culminations?
  - Q. I. How many equations of condition are there in a quadrilateral?

- Q. II. What is the nature of these conditions? Q. III. What is the object of observing horizontal directions in different positions of the circle?
- Q. IV. Describe the diurnal variation in the direction of the horizontal magnetic needle?
- Q. V. In computing the geographical position of a point of a triangulation, what must be known?
- Q. VI. State under what condition the three-point problem gives inaccurate results or fails?
- Q. VII. How are normal equations modified to answer for different weights of the unknown quantities?
  Q. VIII. Has the shape of a triangle any relation to its spherical excess, and what
- does the spherical excess depend upon?
- Q. IX. What is the difference between the measure of angles by repetitions and by directions?
- Q. X. In undertaking a piece of work, why is it important to take a general view of the entire subject?
- Q. I. What are the units of measure adopted by the Coast and Geodetic Survey for horizontal distances, for soundings, and for elevations?

Q. II. What is the meaning of contours, as used in topography?

- Q. III. On what scales are the original sheets usually made and what is meant by the numerical scale of a map?
- Q. IV. What methods are used in reducing original field sheets to scale of publica-
- Q. V. Describe tersely the manner of constructing a "polyconic projection" for field use in coast and geodetic survey?

Q. VI. How is a projection verified?

- Q. VII. Make a drawing* (about 2" square) of an inlet showing high and low water lines, low sand dunes, fresh-water pond, and soundings with 6', 12', and 18' curves at bottom.
- Q. VIII. Make the word BASTION in full-sized letters for title to chart on scale of 1:20000
  - Q. IX. Make the same word in small Roman letters for the same chart.
  - Q. X. Make a sample of a sounding note (in stump letter) for same chart.
  - Q. I. What are "sectors," as the word is used in the Chart Division of this office?

Q. II. Of what value is this arrangement to the navigator?

- Q, III. What are the four principal classes of buoys as designated by colors? Q. IV. Describe the numbering, odd or even, of the red buoys and the black, what they are intended to mark, and on which side each should be left on entering port.
- Q. N. What are the red and black horizontal striped buoys and the white and black perpendicular striped buoys used for, and how should they be left on entering a harbor
- Q. VI. Represent the ordinary symbols for light-houses, light-vessels, stake-lights, buoys (four classes), wrecks, beacons, and life-saving stations.

Q. VII. What are the four principal classes of charts used in the Survey and the scales of each?

*The drawing in VII and the lettering in VIII, IX, and X were subject to criti-

cism under the power of a magnifying glass.

The expression 2' 4", in the Supervising Architect's office, would be read "two feet four inches, and would not be read "two inches four seconds," as explained in the arithmetics of the country.

Q. VIII. What are the catalogue numbers within which are included the "coast" charts of the Atlantic coast?

Q. IX. What are the catalogue numbers, stated in hundreds, within which are included the charts of California, Oregon, and Washington? What are they as to

Q. X. In correcting charts, if you wish to represent a shoal spot, what arrangement of dots do you generally use to show the curves of one, two, and three fathoms respectively?

ADDITIONAL.—Please give specimens of several kinds of lettering, including plain

and fancy, upright and slanting, small and large.

Q. I. On what scales are the original sheets usually made, and what is meant by

the numerical scale of a map or sheet?

Q. II. What size sheet of paper, in inches, would be required for a map of one degree of latitude and longitude on a scale of 1-250,000—to allow 1 inch all around outside the neat lines, one minute of latitude to equal 1850 m and one minute of longitude on the largest arc to equal 1356 m, the meter to equal 40 inches?

Q. III. The distance between two points on a map scale 1-350,000, is 18.45 inches.

Give the distance in miles. Give operation in full.

Q. IV. In reducing original sheets to scale of publication what methods are used? Q. V. What is the meaning of contours, as used in topography?

Q. VI. What is the unit of measure adopted by the Coast and Geodetic Survey for horizontal distances, for elevations, and for soundings?

Q. VII. Make a drawing (about 2 inches square) of an inlet showing high and low water lines, low sand dunes, and general topography, with soundings, and the 6, 12, and 18 feet curves?

Q. VIII. Make the word "Corpus" in Roman capitals, in size suitable for a map 15 by 20 inches?

Q. IX. Make a sample of a sounding note in stump letter for same map? Q. X. Make a sample of water-lining for fresh water pond?

Q. I. What are the principal aids to navigation?

- Q. II. State what you know of B. and R. buoys as to the side of channels and how numbered?
  - Q. III. What do H. S. and P. S. buoys indicate—that is, how are they placed? Q. IV. What do buoys with ball or cage indicate? Q. V. What is the use of the red sector in light-houses?

Q. VI. How are principal channels marked?

- Q. VII. How are minor channels marked?
- Q. VIII. How should erasures on charts be made for hand corrections?
  Q. IX. What do the three shades of sanding on Coast Survey charts indicate?
  Q. X. What is the meaning of port and starboard?

Q. I. Define the following:

(a) High-water lunitidal interval;

(b) Vulgar establishment;

(c) Corrected establishment;

(d) Range of tide. Q. II. (a) What is the length, in mean solar time, of the mean lunar day of

(b) How many tides occur each lunar day?

(c) How many each solar day?

Q. III. (a) How do you modify a table of Washington lunar transit to adapt it to the meridian of San Francisco?

(b) What is the general rule ? 0

Q. IV. (a) What do you understand by the term "diurnal inequality?"

(b) To what is diurnal inequality due?

- (c) On what parts of our coast is this inequality relatively large?
  Q. V. (a) In making a "first reduction" of tidal observations, what data are taken from the field record?

(b) From the astronomical ephemeris?

(c) And what tidal elements are deduced therefrom?
Q. VI. (a) Name the three most usual "second reductions."

(b) Which of these is most frequently used for the Atlantic coast?(c) Which two for the Pacific coast?

Q. VII. (a) Which one of the harmonic tidal components usually has the greatest amplitude?

(b) Which three contribute most to the diurnal inequality?
Q. VIII. Make a "first reduction" of the tidal observations at Eastport, Me., June 22 to July 20, inclusive, 1887. The longitude of Eastport is 67°, that or Washington, 77°.

The examiner will furnish herewith:

1 and 2. Two volumes, rough journals 1 and 2, of the Eastport, Me., tidal observations for 1887:

3. Table of Washington lunar transit for 1887;

4. Four "first reduction" forms.

Q. IX. Make a "second reduction" of the Eastport observations, basing it upon the "first reduction" furnished by the examiner.

The examiner will furnish herewith:

 "First reduction, station Eastport, Me.," free from errors.
 Eight "second reduction" forms, blanks (four for high and four for low water).
 X. Under which of the Executive Departments does the Coast and Geodetic Survey come?

Q. I. Develop formulæ for determining the true scale of a maregram and the reading, y, on the scale, of the fictitious or secondary zero, by the use of which the primary zero of the scale will fall on the point of the maregram corresponding to the zero of the tide staff.

Q. II. Describe in detail the maxima and minima tide-predicting machine invented by Prof. William Ferrel and used by the Coast and Geodetic Survey in the preparation of the annual tide tables for the Atlantic and Pacific coasts of the United

Q. III. (a) When is the moon said to be in conjunction? In opposition?
(b) When is the moon said to be in syzygy? When in quadrature?

(c) What is meant in tidal work by the term moon's phase? (d) What are the moon's nodes, and by what terms are they distinguished from

each other? Q. IV. Define lunitidal interval, spring tides, neap tides, mean establishment. What are the three principal tidal reductions based upon the "first reduction," and what are their arguments of distribution?

Q. V. Give, approximately, the limits between which the monthly maximum declination of the moon fluctuates. What is the period of this fluctuation, and what its

proximate cause?

Q. VI. Compute to seven and six decimals, respectively,

$$\log f = \log \frac{\frac{s}{4}}{\sin \frac{s}{4}}, \text{ and } f = \frac{\frac{s}{4}}{\sin \frac{s}{4}},$$

for the values of s following:

$$\begin{array}{lll} s_1 = 15.0410686^\circ & s_5 = 13.9430356^\circ \\ s_2 = 29.5284788 & s_6 = 14.9589314 \\ s_3 = 14.4920521 & s_7 = 13.3986609 \\ s_4 = 28.4397296 & s_8 = 27.9682084 \end{array}$$

Note.—The examiner will pass to candidate with this question Vega's 7-place logarithms and Crelle's Rechentafeln, 2 vols. in all, herewith.

Q. VII. The times of high and low water at a station in longitude 124° 32′ west of Greenwich are recorded in standard time and so used in the first and second reductions, for which also the Washington transits are taken unmodified from the manuscript tables of the tidal division. How should the establishments so computed be modified to obtain the local establishments, working to the nearest minute?

Q. VIII. (a) On what parts of the coast of the United States are the diurnal com-

ponent tides large? Where small?

(b) What is the mean range of the tides, approximately, at Eastport, Me.? at New York? at Washington? at Savannah Entrance? at Key West? at San Fran-

Q. IX. Given the synodic month = 29.53059 mean solar days, compute the speed in degrees per mean solar hour of M, to eight significant figures.

Q. X. The formula for the velocity of a free wave in latitude 45° is—

$$\log t^{m} = 0.80168 - \frac{1}{2} \log d^{f}$$

Where log denotes common logarithms,  $t^m$  the number of minutes required to travel one statute mile, and  $d^f$  the depth of water in fathoms. Construct a table showing the time in hours, to three decimals, in which a free wave will travel 100 statute miles in water 1, 2, 3, .... 20 fathoms deep.

Q. I. Describe the maxima and minima tide-predicting machine invented by Prof. William Ferrel and used by the Coast and Geodetic Survey in the preparation of the annual tide tables for the Atlantic and Pacific coasts of the United States.

Q. II. (a) Indicate by the usual notation the principal diurnal harmonic component tides, the principal semidiurnal components, and the higher harmonics pro-

vided for in Prof. Ferrel's tide-predicting machine.

(b) On what parts of the coast of the United States are the diurnal component tides small? On what parts are they relatively large? And what are the corre-

sponding characteristic differences in the form of the observed tide?

Q. III. In carrying out the harmonic analysis of the tides show how the labor of copying the tabulated solar ordinates for the several components may be avoided by the use of stencils. Given the mean synodic month = 29.53059 mean solar days, indicate with a check mark where the four blanks herewith marked C should be punched to form M-stencils for the first fourteen days of a series tabulated every mean solar hour as in the form herewith marked D1, connect by a line the the checked spaces belonging to the M-hour, and append the numerical table by which you mark the stencils in this case.

NOTE.—The examiner will pass to the candidate with this question the four blanks C and the tabulation D_i; the latter should finally be filed with the division answer

to this question.

Q. IV. In carrying out the harmonic analysis of the tides by tabulating the ordinates at equidistant intervals which are submultiples of the mean solar day, and then in the summations substituting for each component ordinate the nearest solar ordinate, the mean component ordinate obtained requires modification by a factor known as the "augmenting factor." Determine this factor for a component of speed i, when the tidal ordinates are tabulated at intervals of  $\alpha$  mean solar hours, also for the special case of M2 when  $\alpha =$  a mean solar hour, the synodic month being 29.53059 mean solar days.

Q. V. The results of seven lines of spirit levels, transcribed into an unverified duplicate record, give zero of tide staff below bench mark 11.492, 11.508, 10.479, 11.387, 11.473, 1.511, 11.472 in meters. The instrument and observer are known to be good; there were three stations between staff and bench mark; nothing is known of the recorder or transcriber save this record. How far is staff zero below bench mark? And what is the probable error of the determination? Give reasons for your inter-

pretation and use of the record.

$$r_0 = 0.845 \frac{v}{n\sqrt{n-1}}$$

Q. VI. The height of a component tide is expressed in the form:  $h = A + C_1$ .  $\cos \theta + S_1$ .  $\sin \theta + C_2$ .  $\cos 2\theta + S_2$ .  $\sin 2\theta + C_3$ .  $\cos 3\theta + S_3$ .  $\sin 3\theta$ ..; and the values of h derived from observation are,  $h_0, h_1, h_2, \ldots, h_{m-1}$  for  $\theta$  $=0.\frac{2\pi}{m}.1.\frac{2\pi}{m}.2.\frac{2\pi}{m}...,(m-1).\frac{2\pi}{m}, respectively, m being a positive integer; find the most probable values of A, C₁, S₂, C₂, S₃, C₃, S₃, .... by the method of least$ squares.

Q. VII. (a) Name and define the more usual five kinds of month.

(b) Define perigee and apogee.

(c) Define lunar parallax and give approximately the mean equatorial horizontal · lunar paraļlax.

(d) Give approximately the mean inclination of the plane of the moon's orbit to the plane of the ecliptic.

Q. VIII. Taking the sidereal year = 365.25637  $\pm$  0.00001 mean solar days, determine the speed of the sidereal component  $K_1$  per mean solar hour with the greatest precision the data will warrant, and the probable error of the result to two signifi-

Q. IX. (a) What three different nonharmonic reductions are most usually based upon the "first reduction" and what are their arguments of distribution?

(b) How many kinds of standard time are employed in the tide tables published by the Coast and Geodetic Survey? What names are assigned to them, and with the local time of what meridians do they agree?

Q. X. A year of tidal observations beginning at local mean midnight August 31— September 1, 1885, at St. Paul, Kadiak Island, Alaska, in latitude 57° H. Ft. 48' north, longitude 152° 18' west from Greenwich, tabulated at each 0 - 3.36mean solar half hour, was subjected to the ordinary stencil process used in the tidal division, U.S. Coast and Geodetic Survey Office, and yielded 2 - 1.484 + 1.87for the M component twenty-four ordinates, of which the twelve even-

 $6 \dotplus 3.32$ hour ordinates are given in the margin.

8 + 1.52Subject these twelve, unchanged, to harmonic analysis on the form 10 - 1.93 herewith marked H, without interpolating the intermediate odd-hour ordinates, 12 - 3.22 14 - 1.37put in evidence the smallness of M3 and M4, and find the amplitude and lag of  $M_1$  and  $M_2$ . Give on separate paper the work for finding  $V_0 + u$ , log. aug. fac., and log (1 + f). 16 + 1.94

18 + 3.32In answering this question correct theory is even more important than numer-20 + 1.44ical accuracy, and special attention is invited to  $V_0 + u$  and log. aug-22 - 2.06 menting factor. Take middle of year at local mean moon March 4, 1886.

If you can not devise a means of using the form H for twelve ordinates, inter-

polate the intermediate hours and then proceed.

Note.—The examiner will pass to candidate, with this question a blank H and a pamphlet entitled "Report of a Committee for the Harmonic Analysis of Tidal Observations, by G. H. Darwin."

## CIVIL SERVICE COMMISSION.

Questions used in the competitive examinations for promotion of civil service examiners' detailed from the Treasury Department to the Central Board of the Civil Service Com-

- Q. I. What is the title of the act which provides for competitive examinations for the classified departmental service; when was such law enacted; when did it go into effect?
- Q. II. What provision is made in the above-mentioned law in regard to the selection of boards of examiners?

Q. III. Who are prohibited under the above-mentioned law from soliciting or re-

ceiving assessments or contributions for political purposes?

Q. IV. Give the official titles of the principal officers of the Civil Service Commission; state how they are appointed, and mention the limitation fixed by law in regard to the appointment of adherents of the same political party.

Q. V. Name the principal divisions of the Civil Service Commission and state

briefly the duties pertaining to each division?

Q. VI. Name the five distinct branches of the classified service for which competitive examinations are held, and state the different examinations the same candidate may take?

Q. VII. State the general rule for marking a letter of the clerk examination, and mention five errors for which charges are made and the charge for each error.

Q. VIII. Name the subjects in the clerk and copyist examinations, and give the relative weight of each subject.

- Q. IX. Describe the process of marking papers by the Central Board from their receipt to their entry on the register by the secretary of the Board.
  Q. X. What is the term of eligibility under the clerk and copyist examinations, and how may a person whose name is on the eligible register secure reexamination before his term of eligibility has expired?
- Q. I. What provision is made in the civil service law in regard to providing accommodations for examinations?

Q. II. (a) What provision is made in the civil service law in regard to persons

habitually using infoxicating beverages to excess?

- (b) What provision is made in regard to employing members of the same family? Q. III. What class of persons are entitled to preference in certification, and under what circumstances?
  - Q. IV. (a) Name the subjects of the superintendent examination, Indian service.
- (b) Name four supplementary examinations for the Indian service.
  Q. V. (a) What is meant by the following terms: "Excepted positions," "non-excepted positions," "unclassified positions?"

(b) What is a noncompetitive examination? Give two examples. Q. VI. How much time is allowed for each of the following-named examinations: (1) Fourth Assistant Examiner of the Patent Office; (2) Railway mail clerk; (3) Superintendent, Indian service; (4) Typewriting; (5) Stenography.

Q. VII. Name five of the points on which examiners are required to instruct

classes at the beginning of an examination.

Q. VIII. Give the rules and charges for marking orthography in the spelling exercise.

Q. IX. Specify five rules and five charges for marking arithmetic.

- Q. X. In an examination of eight subjects the weights on the first, second, and third subjects were 1 each, on the fourth, fifth, and sixth 2 each, and on the seventh 4, and on the eighth 7. The averages of a competitor on the first, second, and third subjects were 80 each, on the fourth, fifth, and sixth, 75 each, on the seventh and eighth, 70 each. What was his general average? Give the result in tabular form.
- Q. I. (a) Name the three branches of the classified service for which applications are filed with the Commission at Washington; (b) how many vouchers are required for applications for each of these branches, and (c) what are the qualifications of youthers for each branch of the service named? (State the qualifications of each kind of voucher for each service.

mentaries?" (b) What is the difference between a "supplementary" and a "special" examination?

Q. III. Name four supplementary and four special examinations. Q. IV. (a) What are the subjects of the teacher examination; (b) of the railway. mail examination?

V. What is meant by the weighting of subjects? Illustrate.

Q. V. What is meant by the weighting of subjects: All what would be the general average of an examination consisting of six Q. VI. What would be the general average of an examination consisting of six Q. VI. What would be the general averaging 90 each with a weight of 1, and the last subjects, the first five subjects averaging 90 each with a weight of 1, and the last subject being marked 65, with a weight of 15?

Q. VII. (a) What is the charge for each error in the spelling exercise; (b) for each error in plain copying, and (c) for "wrong process" in arithmetic?
Q. VIII. Under the rules when may a candidate who fails be re-examined without

Q. IX. (a) What privilege has a candidate who is dissatisfied with the marks of the examiners on his examination papers; (b) what are the age limits of candidates for the Railway Mail Service?

Q. X. What penalty is provided by the civil service act for falsely marking, grading, estimating or reporting upon the examinations or proper standing of any person, or making false representations concerning the same, or furnishing special or secret information for the purpose of improving the chances of any person so examined, and to what classes of persons is this penalty made applicable?

Miscellaneous algebraic questions given to a candidate from the Central Board of the Civil Service Commission who asked for a special or optional subject.

Q. I. Solve the equation:

$$\frac{1}{2}(27-2x) = \frac{9}{2} - \frac{1}{10}(7x-54)$$

Q. II. Solve the equations:

Q. III. Solve the equations:

$$bz + cy = a$$
 (1)  
 $az + cx = b$  (2)  
 $ay + bx = c$  (3)

Q. IV. Solve the problem: A and B together can do a piece of work in 48 days, A and C in 30 days, and B and C in  $26\frac{2}{3}$  days. How long will it take each to do the work?

Q. V. Solve the problem: A sum of money at simple interest amounted in a months to e dollars, and in b months to d dollars. Find the sum and the rate of interest.

Q. VI. Find the values of x in the equation:

$$1 - 7x + 39x^2 - 99x^3 + 156x^4 - 144x^5 + 64x^6 = 0.$$

Q.VII. The hypotenuse of a right triangle is 20 meters, and the area is 96 square eters. Compute the sides.

Q. VIII. From the attached table find the value of square of (N-1), the cube of

(N+1), the square root of (N-3), and the cube root of (N+7), when N=586. Q. IX. A. and B. go into partnership, each with \$4.500. A. draws out \$1,500, and B. \$500, at the end of 3 months, and each the same sum at the end of 6 and 9 months; at the end of 1 year they quit with \$2,200. How must they settle?

Q. X. Find the values of X in each of the following equations: When the value is

approximate give the true value to the fourth decimal place.

$$X^3 = 94818816$$
.  
 $X^2 = 634$ .

Questions in physics propounded to a candidate from the Central Board of the Civil Service Commission in a competitive examination at the Treasury Department for promotion, special and optional.

Q. I. What in brief is the definition of the term physics?

Q. II. What is meant by the term molecule as defined by the physicist?

Q. III. What is meant by the term atom as defined by the chemist and as defined

by the physicist? .

Q. IV. What is meant briefly by the term energy? How many types of energy are there? What is each called? How do they differ? Give example in each case.

Q. V. Illustrate by a diagram the parallelograms of forces so that a single vector (or space directed line) may represent the transmission of a body produced by three forces acting simultaneously but in different planes on that body.

Q. VI. How many states of matter are there? Give an example of each, and name

a substance capable of interchangeability to each state,

Q. VII. Define the difference between chemical and physical action?

2. VIII. What is meant by the term volt?

. IX. At the Bureau of Engraving and Printing internal-revenue stamps during their manufacture are subjected to the enormous pressure of the hydraulic press. Explain the principle of such a press and give the general limit of pressure such a press can exert.

. X. The incandescent lamp suspended above your table in the examining room is 18 inches from your paper. How many such lamps would it require, theoretically, to supply you with the same amount of light if the lamps be 54 inches from your

paper

# STANDARD PASS EXAMINATIONS UNDER SECRETARY FAIRCHILD.

EXHIBIT No. 24.

# EXAMINATION CLASSES A, B, C, AND D.

Treasury Department.—Examination for promotion to Classes A, B, C, and D, \$900 or less .- New Series, No. 1.

## [Sheet No. 1.-Letter and brief.]

INSTRUCTION. - Write a letter of not more than one full page in length; address it to the Secretary of the Treasury; sign it with your full name; fold it, and inderse upon its proper fold a brief or summary of its contents.

The official forms prescribed by the Secretary of the Treasury should be used for the address, the fold, and the brief.

You may select your own subject or take any one of the following topics for the subject of your letter.

(a) A description of your native place.(b) A description of the schools you have attended.

The things that have most interested you in Washington. (d) Since leaving school, what study has most interested you and why?

Note.—This part of the examination is designed to show your aptitude for composition and correspondence; your power to state clearly and grammatically your views; your knowledge of the form of adddess; your neatness; your faculty of adhering to the subject matter throughout your letter; and it will also be considered in determining your average in penmanship.

Please to read the directions at the head of each sheet, and carefully comply with

Upon completing each paper the candidate should sign it and place it on the examiner's desk.

N. B.—No extra copies of this sheet furnished. Continuation sheets furnished by the examiner.

## [Sheet No. 2.—Copying.—First exercise—Writing from dictation.]

As a test of the candidate's orthography and of his accuracy in recording words and placing punctuation marks, the examiner will read a paragraph from the last finance report or from a bureau report or a selected extract from the works of some standard writer, slowly, for the candidate to copy from the dictation.

Note:—Spelling, use of capitals, punctuation, and all omissions and mistakes will be taken into consideration in marking the exercises under copying.

[Specimen of English read to the candidates for promotion to clerkships of Classes A, B, C, and D, salaries less than \$720 or more, but less than Class E (\$1,000).]

## DREAM CHILDREN: A REVERIE:

Children love to lisen to stories about their elders, when they were children; to stretch their imagination to the conception of a traditionary great uncle, or grandame, whom they never saw. It was in this spirit that my little ones crept about me the other evening to hear about their great-grandmother Field, who lived in a great house in Norfolk (a hundred times bigger than that in which they and papa lived), which had been the scene—so at least it was generally believed in that part of the country—of the tragic incidents which they had lately become familiar with from the ballad of the Children in the Wood. Certain it is that the whole story of the children and their cruel uncle was to be seen fairly carved out in wood upon the chimney-piece of the great hall, the whole story down to the Robin Redbreasts, till a foolish rich person pulled it down to set up a marble one of modern invention in its stead, with no story upon it. Here Alice put out one of her dear mother's looks, too tender to be called upbraiding. Then I went on to say, how religious and how good their great-grandmother Field was, how beloved and respected by everybody, though she was not indeed the mistress of this great house.—Charles Lamb.

[Sheet No. 3.—Copying.—Second exercise—Writing from plain copy.]

Note.—Spelling, use of capitals, punctuation, and all omissions and mistakes will be taken into consideration in marking the exercises under copying.

Copy the following precisely:

# MOVEMENT OF GOLD FROM THE UNITED STATES.

In my last fiscal report attention was directed to the heavy drain of gold from the United States, which commenced in May, 1888, and continued, with some interruptions, up to the end of July, 1889, during which period we lost by export \$61,435,989 in gold bars.

These bars were invoiced to three countries, viz: France, England, and Germany

in the following proportions:

France				 \$27,692,855
England Germany			 	 18, 717, 087
	. 1	*		 
20000				01, 100, 000

In the article treating of this inovement I showed that, in addition to the bars directly consigned to France, the bulk of the other gold shipments were intended for the Bank of France. I also set forth at some length the causes which seemed to have operated in producing this drain of gold from the United States, mentioning among others the large expenditures by Americans at the Paris Exposition.

In the summer of 1890, another outward movement of gold commenced, which, although by no means so serious, was somewhat remarkable as a monetary transaction, considering the low rate of sterling exchange, and which, while it lasted, was quite heavy.

[Sheet No. 5.—Copying—Continued.—Third exercise—Writing from rough draft.]

DIRECTIONS TO CANDIDATE.—Make on this sheet, ready for signature, a copy of the letter, a rough draft of which is on sheet 4, punctuating and capitalizing as in copy, but writing in full all abbreviated words, except D. C. and etc.

# [Sheet No. 6.—Miscellaneous arithmetical questions.]

IX. Name five navigable rivers in the United States.

X. Ask the examiner for an interest table, and from it show the interest on \$8,500 for 7 days at 4 per cent.

# [Sheet No. 10.—Bureau or office questions.]

The ten questions handed to you herewith have been prepared by the head of the bureau or chief of division in which you are employed, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to show your general knowledge of the official business of the bureau or office in which you are employed and on which you have been engaged.

Copy the questions and give your answers on this and the accompanying sheets. Each answer is to immediately follow the question to which it pertains.

[Specimen of office questions propounded to a candidate for promotion to a clerkship of Class D (\$900) in the First Comptroller's Office.]

Q. I. Which of the accounts does the law provide shall be examined and certified by the First Comptroller?

Q. II. Which of the accounts are examined and certified by the Second Comptroller

of the Treasury?

Q. III. By what Auditor are accounts accruing in and relative to the Department. of State settled?

Q. IV. What officer in the Treasury Department is the general bookkeeper for accounts which are examined and certified by the First Comptroller?

Q. V. What officer in the Treasury Department is charged by law with the safekeeping and paying out of the public moneys?

Q. VI. What is the lawful authority and direction upon which the proper offi-

cer of the United States pays out moneys from the Treasury?
Q. VII. What does the Constitution of the United States provide respecting the

payment of money from the Treasury?

Q. VIII. State briefly the several steps pursued in the Treasury Department in the payment of a balance found due on an account which has been examined and certified by the First Comptroller and direction for payment has been given in the Comptroller's certificate.

Q. IX. How long does an annual appropriation remain available upon the books of the Treasury Department before it is carried to the surplus fund by operation of

law?

Q. X. In the settlement of an officer's account by the accounting officers of the Treasury, what voucher or certificate is filed with the account, showing the balance found due to or from the United States on the previous settlement of the same officer's account, as certified by the First Comptroller?

## (Sheet No. 11—Expert counting.)

Instructions.—The examiner will hand to you a package of Government paper. You will please to measure the paper with a graduated ruler; count it; stack it; and officially tag it; and then fill the following blanks:

The paper is intended for

The paper measures When printed it will be for --

It contains sheets as follows:-

It is over sheets as follows: It is short sheets as follows:

A full package should contain -- sheets.

## Distinctive paper.

What are the distinctive features of:—(a) The paper used for United States notes, silver certificates, gold notes, and the national bank notes? (b) The paper used for United States checks and drafts? (c) The paper used for United States internalrevenue stamps?

Describe the paper on which customs stamps are printed.

## EXAMINATION CLASS E.

Treasury Department.—Examination for promotion to Class E (\$1,000 or less).—New Series, No. 3.

## [Sheet No. 1.—Letter and brief.]

INSTRUCTION.—Write a letter of not more than two and one-half full pages in length; address it to the Secretary of the Treasury; sign it with your full name; fold it, and indorse upon its proper fold a brief or summary of its contents.

The official forms prescribed by the Secretary of the Treasury should be used for the address, the fold, and the brief.

You may select your own subject or take any one of the following topics for the subject of your letter:

(a) General Grant, as a citizen, a statesman, and a soldier.
(b) The growth of the country during the last ten years.
(c) The relations of labor and capital.

(d) The natural advantages of your State as a place of residence.

Note.—This part of the examination is designed to show your aptitude for composition and correspondence; your power to state clearly and grammatically your views; your knowledge of the forms of address; your neatness; your faculty of adhering to the subject-matter throughout your letter, and it will also be considered in determining your average in penmanship.

Please to read the directions at the head of each sheet and carefully comply with

Upon completing each paper the candidate should sign it and place it upon the

examiner's desk. N. B.—No extra copies of the sheets will be furnished. Continuation sheets furnished by the examiner. The time occupied in the examination is not limited.

[Sheet No. 2.—Copying.—First exercise—Writing from dictation.]

As a test of the candidate's orthography and of his accuracy in recording words and placing punctuation marks, the examiner will read a paragraph from the last finance report or from a bureau report, or a selected extract from the works of some standard writer, slowly, for the candidate to copy from the dictation.

NOTE.—Spelling, use of capitals, punctuation, and all omissions and mistakes will be taken into consideration in marking the exercises under copying.

[Specimen of English read to the candidates for promotion to clerkships of Class E (\$1,000).]

#### THE CROWN OF WILD OLIVE.

For indeed the fact is that there are idle poor and idle rich and there are busy poor Many a beggar is as lazy as if he had ten thousand a year and many a man of large fortune is busier than his errand boy and never would think of stopping in the street to play marbles. So that, in a large view, the distinction between workers and idlers, as between knaves and honest men, runs through the very heart and innermost economies of men of all ranks and in all positions. There is a tween workers and idlers, as between knaves and nonest men, runs through the very heart and innermost economies of men of all ranks and in all positions. There is a working class—strong and happy—among both rich and poor; there is an idle class—weak, wicked, and miserable—among both rich and poor. And the worst of the misunderstandings arising between the two orders come of the unlucky fact that the wise of one class habitually contemplate the foolish of the other. If the busy rich people watched and rebuked the idle rich people, all would be right, and, if the busy poor people watched and rebuked the idle poor people, all would be right; but each class has a tendency to look for the faults of the other. A hard-working man of property is particularly offended by an idle beggar and an orderly. but man of property is particularly offended by an idle beggar and an orderly, but a poor workman is naturally intolerant of the licentious luxury of the rich; and what is severe judgment in the minds of the just men of either class becomes fierce enmity in the unjust, but among the unjust only. None but the dissolute among the poor look upon the rich as their natural enemies or desire to pillage their houses and divide their property. None but the dissolute among the rich speak in opprobrious terms of the vices and follies of the poor.

There is, then, no class distinction between idle and industrious people; and I am going to-night to speak only of the industrious. The idle people we will put out of our thoughts at once, they are mere nuisances; what ought to be done with them,

we'll talk of at another time.—[From John Ruskin.]

[Sheet No. 3.—Copying—Continued.—Second exercise—Writing from plain copy.]

NOTE.—Spelling, use of capitals, punctuation, and all omissions and mistakes will be taken into consideration in marking the exercises under copying.

Copy the following precisely:

## WIDOWS AND DAUGHTERS OF THE SOLDIERS OF THE REVOLUTION.

With a feeling of reverence I invite your attention to the list of Revolutionary pensioners, consisting of 20 widows and 3 daughters of soldiers of the Revolution.

These venerable persons represent the dead heroes of that great struggle which established constitutional liberty in America, and their names, with the survivors of the war for the Union, connect the two great events in the history of the Republic: its creation and preservation.

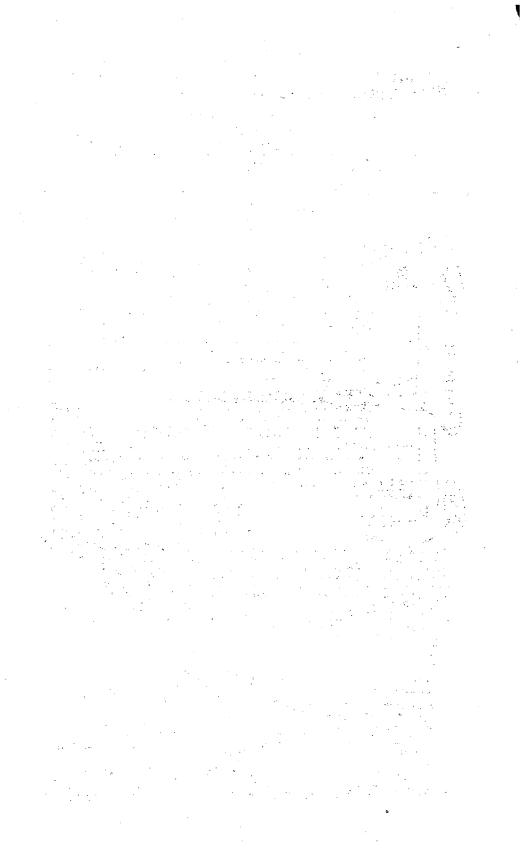

In 1870 there were 727 widows of Revolutionary soldiers on the pension rolls. In

a few years more the small remnant remaining will have passed away.

#### THE PENSION ROLL.

There were on June 30, 1891, 676,160 pensioners borne upon the rolls, being 138,216 more than were carried on the rolls at the close of the last fiscal year, and classified as follows:

Widows and daughters of Revolutionary soldiers	. 23
Army invalid pensioners	413, 597
Army widows, minor children, etc	108, 537
Navy invalid pensioners	
Navy widows, minor children, etc	2, 568

OPPICE OF THE SUBSETARY, Board of Resident.

# [Sheet No. 7.—Miscellaneous arithmetical questions.]

I. Express in words the number: \$2,301,010,001.0108625.

II. Express the following in figures: Two hundred forty billions three hundred twenty-one millions eighty thousand one, and (decimal) two hundred twenty thousand three hundred and forty-one ten-billionths.

III. Express in words the following figures, signs, and abbreviations: £11 9s. 3d. 2½ far.; 17° N.,; 7 T.9 cwt. 2qr. 8 lbs. 14 oz.; 2 mi. 19 rds. 2 yds. 3 ft. 7 in.; 19km. 23 m. 13 cm. and 9 mm.

IV. Express in words the following four examples: (a), (b), (c), and (d); and express (e) in the Roman notation: (a) MDCCCLXVIII; (b)  $13\frac{1}{2}$ ; (c)  $1.33\frac{1}{2}$ , (d)  $18^{\circ}$  3'

12" S., and 19° 48' 59" E.; (e) the date A. D. 1892. V. Add .00043, 179.0083, and seventeen hundred-thousandths, and multiply the sum by one hundred; from the product subtract 17 thousand and seventeen-thousandths, and divide the remainder by  $T_{000}$ . (Express the answer in a whole number and a common fraction in its lowest terms.)

Give operation in full.

# [Sheet No. 8.—Miscellaneous arithmetical questions—Concluded.]

VI. Add 3 T. 2 gr. 7 lbs. 9 oz. to 7 T. 4 cwt. 6 lbs. 7 oz., and from the sum take 15 cwt. 6 lbs., and divide the remainder by 2.

Give operation in full by compound addition, subtraction, and division.

VII. The superintendent of the Government mill, at Dalton. Mass., shipped to the Treasury Department, for the new coin certificates, 20 cases of distinctive creamwhite silk-threaded paper; each case contained 20 packages; each package was separated by 9 tags into 10 parts; each part contained 100 sheets, and upon each sheet 4 notes could be printed. If the sheets were all good how much in money value could be printed on the sheets shipped if ½ were used for 1s, one-fourth for 2s, one-eighth for 5s, and the remainder for 10s?

Give operation in full. VIII. Find the interest on \$36,000 for three years five months and eighteen days at

6% per annum; also find the amount. Give operation in full.

IX. What would it cost to carpet a room in the Treasury 40 feet 6 inches long and 17 feet 2 inches wide with carpet 27 inches wide, if the carpet run crosswise of the room, costs \$1.25 per running yard, and if there be a waste of 1 of a yard on each strip?

Give operation in full.

X. Make the computations in the following bill: Enter the amounts on the proper line, add them, and find the total; give credit, on proper line, for two-thirds the bill, and show, on proper line, the balance due.

WASHINGTON, D. C., September 6, 1890.

## Mr. Henry B. Broadhead to John F. Page, Dr.

1890. July " Aug.	12 16 23 6 9 12	To 180 lbs. sugar, at 8 cts.  " 3 bags coffee, 50 lbs. each, at 32 cts. per pound  " 15 gals. molasses, at 80 cts.  " 12 lbs. gunpowder tea, at \$1.30  " 6 lbs. codfish, at 6 cts.  " 15 lbs. meat, at 18 cts.

Signature, ·

# [Sheet No. 9-Orthography.]

This exercise is intended to test the candidate in orthography. The examiner will select from some Treasury report twenty words, pronounce each word distinctly, and give its definition. The candidate will write opposite a number only the word, and will not write its definition.

## [Specimen list.]

1. Hydraulics.	6. Needle.	11. Fiscal.	16. Resumption.
2. Distinctive.	7. Apparent.	12. Storage.	17. Growth.
3. Copy.	8. Preceding.	13. Borne.	18. Operations.
4. Copied.	9. Specie.	14. Consignees.	19. Pursuance,
5. Balance.	10. Moneys.	15. Judicious.	20. Assessed.

## [Sheet No. 10—Questions in grammar—false syntax and improprieties.]

Correct the following sentences; but do not change the sentences or the order of the words except where necessary to remove improprieties, ambiguities, or false

I. Them accounts was settled by he and i.
II. This am an discovery of Prof. John Tyndall.
III. The who he had most injured he had the greatest reason to love.

IV. How pleasantly this breeze feels.

V. Henry or William will give us their company. VI. Gladstone is greater than any English statesman.
VII. I intended to have been at home when you called.
VIII. High pleasure and luxurious living begets satiety.
IX. He failed in grammar; for he could neither reed or right.

X. Of all the other qualities of style, clearness is the most important.

# [Sheet No. 11—General information.]

This exercise is designed to show the candidate's general information and knowledge, acquired in and out of school.

I. Name five States which border on the Dominion of Canada, and after each State name its capital city; and also name those in your selection which were a part of the Thirteen Original States.

II. Name the last decisive battle of the Revolutionary war; also name the commanding general on either side; and whom the contending forces represented.

III. On which side and in what war did the following officers serve: (1) General U. S. Grant, (2) General John Pope, (3), General A. S. Johnson, (4) General George B. McClellan, (5) General P. G. T. Beauregard, (6) Commodore Andrew H. Foote, (7) General Joseph E. Johnston, (8) General George G. Meade, (9) General Braxton Bragg, (10) General John A. Logan, (11) General W. S. Rosecrans, (12) General George H. Thomas, (13) General J. B. Hood, (14) General Jubal A. Early, (15) General W. T. Sherman, (16) General A. E. Burnside, (17) Capta u Raphael Semmes, (18) General "Stonewall" Jackson, (19) General B. F. Butler, and (20) General Philip H. Sheridan.

IV. Name the last Vice-President of the United States who died in that office, the State he was from, the year he was elected, and the other high offices he had held.

V. In what city of the Union will the World's Columbian Fair be held? where is that city? on what water is it situated? how does it rank in size as compared with the other cities of the Union? and by what authority will the fair be held there?

VI. Name the largest city in the Union, the largest State in the Union, the largest

body of water wholly within the Union, and the two longest rivers in the Union?

VII. Name the five leading Republics now in existence.

VIII. Name five United States Senators and five Representatives in Congress and the States they each represent.

IX. Name ten Americans, living or dead, who have acquired literary fame.

X. Where can the following truisms be found: We hold these truths to be selfevident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness.

#### [Sheet No. 12.—Bureau or office questions.]

The ten questions handed to you herewith have been prepared by the head of the bureau or chief of division in which you are employed, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to show your general knowledge of the official business of the bureau or office in which you are employed and on which you have been engaged.

Copy the questions and give your answers on this and the accompanying sheets.

Each answer is to immediately follow the question to which it pertains.

[Specimen of office questions propounded to a candidate for promotion to a clerkship of class E (\$1,000) by the Fifth Auditor.]

Q. I. In the course of work, as done at present, how would you enter in your monthly report of work the copying by you of one hundred consular reports, and one hundred Alabama judgments?

Q. II. If, in the customary work of the office, you should copy during the month two hundred and fifty consular accounts, and Mrs. R. two hundred, how should you report the number you compared, considering, of course, you and she worked together

Q. III. What, if any, different course is to be pursued in disposing of an account after copying a Comptroller's certificate differing from the Auditor's?

Q. IV. If several accounts are received by you at the same time, for different fiscal years, for copying in the same record book, which of them should be copied first?

Q. V. In what record book should a consul's account for an interpreter's salary be

recorded?

Q. VI. In what record book should an account for "estates of decedents' trust fund" be recorded? Q. VII. In what record book should an account for loss by exchange on an

account of a chargé d'affaires, ad interim, be recorded?

Q. VIII. What step next follows the copying and initialing of a report?

Q. IX. If an error should be detected in the copy while comparing, at what point in the progress of the work should it be corrected?

Q. X. What step follows next in the order of work on an account after comparing the copy?

## EXHIBIT 26.

#### EXAMINATION CLASS ONE.

Treasury Department.—Examination for promotion to first class (\$1,200).—New Series, No. 1.

# [Sheet No. 1.—Letter and brief.]

Instruction.—Write a letter of not more than a page in length; address it to the Secretary of the Treasury; sign it with your full name; fold it and indorse upon its proper fold a brief or summary of its contents.

The official forms prescribed by the Secretary of the Treasury should be used for

the address, the fold, and the brief.

You may select your own subject, or take any one of the following topics for the subject of your letter:

(a) The increase in the weight of the subsidiary silver coin.

(b) Why do Americans pay to labor the highest wages in the world?
(c) Write a description of Washington, D. C.

(d) The advantages your State offers as a residence.

Note.—This part of the examination is designed to show your aptitude for composition and correspondence; your power to state clearly and grammatically your views; your knowledge of the forms of address; your neatness; your faculty of adhering to the subject-matter throughout your letter; and it will also determine your averages in penmanship and punctuation.

Please to read the directions at the head of each sheet, and carefully comply with

Upon completing each paper, the candidate should sign it and place it upon the examiner's desk.

N. B.—No extra copies of the sheets will be furnished. Continuation sheets furnished by the examiner. The time occupied in the examination is not limited.

## [Sheet No. 2.—Notation and numeration.]

CAUTION .- Write the answers directly under the questions to which they pertain, and be careful to insert the proper points.

I. The United States has received from loans from 1837 to 1885 the sum of \$11,690,187,817.92. Express this amount in words.

II. The not receipts of the Government from 1837 to 1885 were eleven billions seven hundred two millions one hundred twenty-eight thousand seven hundred fifty-four dollars and sixty-five cents. Express this amount in figures.

III. The Assay Commission showed that the average fineness of gold coins at the Mint was .899'37. Express this number in words.

IV. The Director of the Mint stated the average price of silver bullion in London was forty-seven and thirty-five thousand seven hundred ninety-five hundred-thousandths pence per ounce. Express this number in figures.

V. Express in figures the date MDCCLXXXVII.

VI. Express in the Roman notation the date 1492. VII. Express in words the mixed number 1,114+33.

VIII. Express in figures the mixed number one hundred twenty-seven and one.

hundred eleven nine thousand five hundred twenty-firsts.

IX. Express decimally the numbers  $\frac{1}{120}$ ,  $\frac{1}{120}$ , 16 per cent., 33\frac{1}{2} per cent.,  $\frac{2}{120}$ \frac{1}{2}; and in vulgar fractions (lowest terms) .16, .875, .00875, and thirty-five fortieths of one per cent.

X. Express in words (no abbreviations) the denominate numbers symbolized as follows: 2 T., 3 cwt., 4 lb., 5 oz., 10 gr., 1 lb., 2 pwt., 3 hhd., 2 bbl., 3 gal., 2 pt., 6 gi.; 1° 2′ 3″ N.; 3 yr., 2 da., 2 hr., 1 m.; and 6 cu. ft.

[Sheet No. 4.—Miscellaneous arithmetical questions.]

(Signature.)

I. There were issued to the Bureau of Engraving and Printing sheets of distinctive paper for the printing of the silver certificates: 1 were issued for 10's, 1 for 5's, 1 for 2's, and the balance, or 10,000 sheets, for 1's. How many sheets were issued in all? Give operation in full.

II. The standard weight of the United States double-eagle (gold) is 516 grains, 900 thousandths fine. How many grains of pure gold in 1,000 quarter-eagles?

Give operation in full.

III. Ask the examiner for a reduction table, and with it reduce \$56,431.12 and two and eleven-twelfths mills U. S. standard of value to British sterling.

tive operation in full.

IV. A Treasury clerk, recently promoted to a clerkship of class 1, obtained in his examination (on the scale of 100) averages in the different subjects as follows (the relative weight of each subject is given in the parentheses): Notation and numeration, 93, (1); addition, 100, (1); miscellaneous questions in arithmetic, 98, (6); accounts, 100, (2); bureau questions, 79, (6); division questions, 93, (8); history, geography, and government, 83, (2); orthography, 100, (4); syntax, 96, (4); letter and brief, 75, (1); penmanship, 75, (4); and puctuation, 70, (1). What was his general average?

(Sive operation in fall.

Give operation in full.

V. The assistant treasurer at New York received a lot of old gold coin weighing 8 lbs. 10‡ gr.; when assorted ‡ was found to be of full weight, and these coins were put into circulation, and the balance was sent to the Mint. What was the weight of those sent to the Mint?

Give operation in full.

VI. To execute an order for blank forms 1,000 sheets of paper 24 by 20 inches, weighing 24 lbs., were purchased; but to execute another order the same number of sheets and same weight were required, but the paper was only 16 inches wide. What. was its length?

Give operation in full.

# [Sheet No. 5.—Miscellaneous arithmetical questions—Concluded.]

VII. At the close of the fiscal year 1887 the Secretary of the Treasury stated that a the amount of the 4 per cent bonds outstanding (interest payable quarterly, on the first day of January, April, July, and October) was \$737,800,600. What was the total interest on this amount of these bonds for the months of April, May, and June, 1887?

Give operation in full.

VIII. What sum of money, if loaned at 6 per cent on October 21, 1885, would amount, interest and principal, to \$1,370.22, on September 15, 1887?

Give operation in full. IX. What would 100,000 hundred-dollar United States 4½ per cent bonds cost when the market rate is 110?

Give operation in full.

X. The Commissioner of Internal Revenue shipped from the stamp division to a collector of internal revenue a package of 100 sheets of 40-gallon tax-paid stamps, each sheet contained 3 stamps, to each stamp there were attached 9 coupons for 1 gallon each, and the tax was 90 cents per gallon. The collector sold the stamps as follows: 50 sheets with all the coupons attached, 30 sheets with the last 6 coupons cut from each stamp, and 20 sheets with all the coupons cut from each stamp. Required, the collector's debit and his cash receipts.

# [Sheet No. 6.-Statement of account.]

John Todd, paymaster U. S. Navy, in rendering his account current for the quarter ended March 31, 1887, owed the United States a balance of \$10,001.01; April 3, he received from paymaster of flagship, \$12,345.67; May 4, he paid on vouchers per abstracts, \$4,287.89; he received May 10, on requisitions, from other paymasters, \$24,000; he paid May 31, officers and crew of Mohican, \$18,147.46; he paid June 2, marines, \$4,000.26; he received June 4, as proceeds of bills of exchange, \$18,247.98; paid June 10, officers' commuted rations, \$3,987.62; he received June 11, from sale of effects of dead sailor, \$27.13; he paid June 14, commuted rations to crews, \$14,122.10; received June 18, cash sale of deserter's watch, \$4,02; paid June 21, commuted rereceived June 18, cash, sale of deserter's watch, \$4.02; paid June 21, commuted rations to marines, \$4,826; June 28, deposited with an assistant treasurer, \$110,000; June 29, received, cash, on Treasurer's draft, \$110,000; and paid June 30, repairs for broken spar, \$146.
Acting for the paymaster, open and state the account between him and the Gov-

ernment for the quarter ended June 30, 1887; show the balance due, and give the

proper heading.

[Sheet No. 7.—Questions in grammar—false syntax and improprieties.]

Correct the following sentences; but do not change the sentences or the order of the words except where necessary to remove improprieties, ambiguities, or false

I. There is an harshness in the following sentences.

II. The detective hoped to find the counterfeiter whom he imagined was concealed

III. In that occupation there is no room for the mind's exerting any great effort.

IV. However, in these cases, custom generally determines.

V. Who do they say it is?
VI. We are still much at a loss who civil power belong to.
VII. The silver vault must be ten foot broad.

VIII. For ought I know there aught to be another nought in your divident.

IX. No unless an previous understanding to the contrary have been had with the Secretary.
X. The buk were red bi hym an i.

## [Sheet No. 8.—Criticism of a letter.]

Copy the following paragraphs, correct errors in orthography, syntax, punctuation, form, and other improprieties; put it into the form of a letter; address it to the Speaker of the House of Representatives, and prepare it for the Secretary's official signature.

The exercise is designed to show your qualifications for quickly and accurately criticising the faulty composition of another, so far as to see that it is finally ex-

pressed in correct and official form.

(NOTE.—This exercise is frequently varied by substituting for it the lithographed rough draft. See Class E.)

## [Sheet No. 9.—Orthography.]

The words in the following list were selected at random from the finance report, and are submitted to you to test your capacity for detecting at sight errors in orthography and your ability to correct the errors you find. Copy correctly, spelling the entire list: 1, sequestrashun; 2, colatterel; 3, konsumshun; 4, killegrames; 5, seinyerage; 6, subcidearey; 7, pamflet; 8, byemettalist; 9, tolarense; 10, recievibal; 11, reasembbling; 12, negoshiashun; 13, apendixes; 14, parelell kollums; 15, merretoreous; 16, preceeding; 17, a slite eror; 18, supeseeded; 19, the det was skailed; 20, fundibal 20, fundibal.

[Sheet No. 10.—Dictation exercise.]

As a test of the candidate's orthography, and of his accuracy in recording words and placing punctuation marks, the examiner will read a paragraph from the last finance report, or from a bureau report, or a selected extract from the works of some standard writer; once through for the full information of the candidate, and then slowly for the candidate to copy from the dictation.

[Specimen of English read from Thomas Carlyle.]

## THE WAY OF WAR.

What, speaking in quite unofficial language, is the net purport and upshot of war? To my own knowledge, for example, there dwell and toil in the British village of Dumdrudge usually some five hundred souls. From these, by certain "natural enemies" of the French, there are successively selected, during the French war, say,

thirty able-bodied men. Dumdrudge, at her own expense, has suckled and nursed them; she has, not without difficulty and sorrow, fed them up to manhood, and even trained them to crafts, so that one can weave, another build, another hammer, and the weakest can stand under thirty stone avoirdupois. Nevertheless, amid much weeping and swearing, they are selected, all dressed in red, and shipped away, at the public charges, some two thousand miles, or say only to the south of Spain, and fed there till wanted.

And now to that same spot in the south of Spain are thirty similar French artisans, from a French Dumdrudge, in like manner wending; till at length, after infinite effort, the two parties come into actual juxtaposition; and Thirty stands fronting

Thirty, each with a gun in his hand.

Straightway the word "Fire!" is given, and they blow the souls out of one another, and in place of sixty brisk, useful craftsmen, the world has sixty dead carcasses, which it must bury, and anon shed tears for. Had these men any quarrel? Busy as the devil is, not the smallest! They lived far enough apart; were the entirest strangers; nay, in so wide a universe, there was even, unconsciously, by commerce, some mutual helpfulness between them. How then? Simpleton! their governors had fallen out; and instead of shooting one another, had the cunning to make these poor blockheads shoot. (Sartor Resartus.)

# [Sheet No. 11.—Tabulation of U.S. Treasury statistics.]

Rule, with a pen, ink, and ruler, in the space below, a table of eight columns; one for "Issues;" six for "Denominations," and, under this head, place denominations as follows: 3c., 5c., 10c., 15c., 25c., and 50c.; and the eighth column for "Amount;" prepare it for seven lines of items, and under the head "Issue" write on the respectively. tive lines: First, Second, Third, Fourth, Fourth 2d, Fourth 3d, and Fifth; then give one line for Totals, and then fill the table from the following data, so as to show by

one line for Totals, and then fill the table from the following data, so as to show by issues and denominations the redeemed fractional currency of the United States destroyed by the Secretary of the Treasury:

Third issue—3c., \$13.58; 5c., \$15.12; 10c., \$187.05; 25c., \$367.49; denominations—50c., first, \$182.50; second, \$210.75; third, \$620.25; fourth, \$244; fourth 2d, \$1,242.75; fourth 3d, \$1,366.25; fifth, \$2,672; total, \$6,538.50; first issue—5c., \$33.84; 10c., \$61.15; 25c., \$77.63; amount, \$355.12; denominations, 10c.—second, \$75.45; fourth, \$727.40; fifth, \$1,745.80; total, \$2,793.85; second—5c., \$46.12; 25c., \$92.97; denominations—15c., fourth, \$285.41; 25c., fifth, \$4,295.99; totals—3c., \$13.58; 5c., \$95.08; 15c., \$285.41; 25c., \$6,159.01; amount, \$15,885.43; amount—second, \$422.29; third, \$1,203.49; fourth, \$2,581.74; fourth 2d, \$1,242.75; fourth 3d, \$1,366.25; fifth, \$8,713.79; denomination, 25c.—fourth, \$1,324.93.

This exercise is designed to develop the candidate's capacity for arranging figures for ready reference.

for ready reference.

#### [Sheet No. 12. - General information.]

This exercise is designed to show the candidate's general information and knowledge, acquired in and out of school.

I. What vote is required by the electoral college to elect a President of the United

II. Who is Commander-in-Chief of the Army of the United States? III. What interoceanic canal is now in process of construction on the continent of

IV. What important sea duel took place near Cherbourg, France, in 1864; who were the respective commanders of the vessels; and what was the result of the fight?

7. How many articles in addition to and in amendment of the Constitution of the United States have been adopted?

VI. What officer of the United States shall preside when the President is tried upon impeachment?

VII. What silver coins are now coined by the United States at the mints?
VIII. Who is the President pro tempore of the United States Senate?
IX. Who is the Speaker of the House of Representatives?
X. Name two lumber-producing States, two iron-producing States, and two cattlegrowing States of the Union.

## [Sheet No. 13.—Departmental questions.]

This exercise is designed to show, in a limited degree, the candidate's aptitude for the observing of matters about the Executive Departments in general.

I. Briefly state two recommendations made by the head of your bureau in his last annual report.

II. It comes to your knowledge that counterfeit money is in circulation in a certain portion of the United States. To what officer of the Department should you give your information direct?

III. To whom should the interest due on bonds held by the Treasurer of the United States for the security of the circulating notes issued by the national-banking asso-

ciations be paid?

IV. What officer of the Treasury receives and disburses the moneys of the United States?

V. What officers of the Treasury have their engraved signatures imprinted on the United States notes?

VI. What paper moneys are now printed for circulation by the United States?

(Include the gold certificates.)

VII. What member of the Cabinet precedes the Secretary of the Treasury in rank? VIII. What is the highest rate of interest paid at the present time by the United States on the interest-bearing debt?

IX. Name the Treasurer of the United States and the Assistant Treasurer of the

United States at Washington.

X. Name five bureau officers of the Treasury Department, excluding the head of the office in which you are engaged.

# [Sheet No. 14.—Bureau or office questions.)

The ten questions handed to you herewith have been prepared by the head of the bureau in which you are employed, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to show your general and technical knowledge of the official business of the bureau or office in which you are employed.

Copy the questions and give your answers on this and the accompanying sheets.

Each answer is to immediately follow the question to which it pertains.

[Specimens of questions asked on November 11, 1889, to a candidate from the First Comptroller's office.]

# First Comptroller's office.

Q. I. Which of the accounts does the law provide shall be examined and certified by the First Comptroller?

Q. II. Which of the accounts are examined and certified by the Second Comptroller

of the Treasury?

Q. III. By what Auditor are accounts accruing in and relative to the Department of State settled?

Q. IV. What officer in the Treasury Department is the general bookkeeper for accounts which are examined and certified by the First Comptroller?

Q. V. What officer in the Treasury Department is charged by law with the safe-keeping and paying out of the public moneys?

Q. VI. What is the lawful authority and direction to the proper officer of the United States upon which he pays out moneys from the Treasury?

Q. VII. What does the Constitution of the United States provide respecting the

payment of money from the Treasury?

 $\ddot{\mathbb{Q}}$ . VIII. State briefly the several steps pursued in the Treasury Department in the payment of a balance found due on an account which has been examined and certified by the First Comptroller and direction for payment has been given in the Comptroller's certificate.

Q. IX. How long does an annual appropriation remain available upon the books of the Treasury Department before it is carried back to the surplus fund by operation of law

Q. X. In the settlement of an officer's account by the accounting officers of the Treasury, what voucher or certificate is filed with the account, showing the balance found due to or from the United States on the previous settlement of the same officer's account, as certified by the First Comptroller?

#### | Sheet No. 15.—Division questions.]

The ten questions handed to you herewith have been prepared by the chief of the division in which you are employed. They have been approved by the head of your bureau and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to develop your general, special, and technical knowledge of the official duties on which you have been engaged during the last year. These questions will have a greater relative weight in this examination than any other list of questions submitted to you.

Copy the questions and give your answers on this and the accompanying sheets.

Each answer is to immediately follow the question to which it pertains.

[Specimen of questions given on November 11, 1889, to a caudidate from the First Comptroller's office.]

Division of foreign intercourse and public debt, First Comptroller's office.

Q. I. How are consuls of the United States appointed?

Q. II. How are commercial agents of the United States appointed?

Q. III. By whom are the bonds of United States consular officers approved and

where are they filed?

Q. IV. For what time may a consul of the United States receive salary after he has been commissioned and taken the oath of office and before he actually enters upon the duties of his office?

Q. V. What is the maximum amount that a consular officer, who is compensated by

fees only, may retain as his annual compensation from official fees collected?

Q. VI. What limit do the laws and consular regulations fix as to the amount to be allowed and paid to the United States consular officers for office rent?

Q. VII. What is the maximum amount that a consular agent may receive and re-

tain from official fees collected as his annual compensation?

- Q. VIII. How does a salaried consular officer, at a post where the fees collected are not sufficient to pay his salary in full, obtain and receive the balance that may be due to him at the end of a quarter, on his salary account?
- Q. IX. State briefly the several steps pursued in the Treasury Department in the payment of a draft of a consular officer drawn on the Secretary of the Treasury on account of salary and filed with the First Comptroller for payment.

Q. X. With whom are deposited the surplus consular fees collected by the consular officers of the United States in Great Britain and on the Continent of Europe?

Chief Clerk and Member of the Board.

In addition, special weights are given to special subjects, as drafting, algebra, and higher arithmetic, etc.

## EXHIBIT 27.

#### EXAMINATION CLASS TWO

Treasury Department.—Examination for promotion to second class (\$1,400).—New Series, No. 1.

## [Sheet No. 1.—Letter and brief.]

Instruction.—Write a letter of not more than a page in length; address it to the Secretary of the Treasury; sign it with your full name; fold it and indorse upon its proper fold a brief or summary of its contents.

The official forms prescribed by the Secretary of the Treasury should be used for the address, the fold, and the brief.

You may select your own subject or take any one of the following topics for the subject of your letter:

(a) How to reconcile labor and capital.
(b) The character of President Garfield.
(c) The effect of the civil service law.

(d) How can the departmental service be improved?

Note.—This part of the examination is designed to show your aptitude for composition and correspondence; your power to state clearly and grammatically your views; your knowledge of the forms of address; your neatness; your faculty of adhering to the subject-matter throughout your letter; and it will also determine your averages in penmanship and punctuation.

Please to read the directions at the head of each sheet and carefully comply with

them.

Upon completing each paper the candidate should sign it and place it upon the examiner's desk.

N. B.—No extra copies of the sheets will be furnished. Continuation sheets furnished by the examiner. The time occupied in the examination is not limited.

# [Sheet No. 2.—Notation and numeration.]

CAUTION.—Write the answers directly under the questions to which they pertain, and be careful to insert the proper points.

I. Congress has appropriated, since March 4, 1789, to June 30, 1885, inclusive, the

sum of \$21,713,599,992.15. Express this amount in words.

II. The principal of the public debt on June 30, 1885, was one billion eight hundred seventy-two millions three hundred forty thousand five hundred fifty-seven dollars and fourteen cents. Express this sum in figures.

III. The market value of silver, at which the silver coins were computed on Jan-

uary 1, 1885, was \$1.099465 per ounce fine. Express this amount in words.

IV. The rate at which the silver coins were computed for 1886 was one and thirtyeight thousand one hundred and forty-one millionths dollars per ounce fine. Express this sum in figures.

V. Express in figures the date MCDXCII.

VI. Express in the Roman notation the date 1888. VII. Express in words the mixed number 1,113137.

VIII. Express in figures the mixed number one hundred twenty-three and two

hundred thirty-one three hundred forty-fifths.

IX. Express decimally the numbers: \(\frac{1}{4}\); \(\frac{1}{6}\)\(\frac{6}{6}\); and in vulgar fractions (lowest terms): \(.18\); \(.625\); \(.625\); \(.1665\); \(.1667\); per cent.; \(.33\)\(.18\) per cent.; \(.66\)\(.63\) per cent. \(.33\)\(.18\) per cent.; \(.66\)\(.63\)\(.18\) per cent. \(.34\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\(.18\)\

# [Sheet No. 4.—Miscellaneous arithmetical questions.]

I. In making carpets for the Second Anditor's Office, 1 of 1 of a lot was used on one requisition, ½ of ½ of it for a second, and the balance, or 413 yards, on the third. How many yards were used for each of the three requisitions, and how much altogether?

Give operation in full.

II. The Treasury storekeeper had in stock at the last inventory 132 yards of linoleum, and issued on requisition, during the following quarter,  $131.17^3$  yards, for which he took credit for \$208.68 7 T. What was the price per yard, and the value of the stock at first?

Give operation in full.

III. If, as a result of this examination, you receive a promotion, what would be the amount of your entire salary from date of oath, September 23, 1890, to October 12, 1890, both dates included?

Give operation in full.

IV. A Treasury clerk, recently promoted to a clerkship of class two, obtained in his examination (on a scale of 100) averages in the different subjects as follows (the relative weight of each subject is given in the parenthesis): Notation and numeration, 90, (1;) addition, 94, (1;) miscellaneous questions in arithmetic, 86, (6;) accounts, 100, (2;) bureau questions, 67, (6;) division question, 92, (8;) orthography, 95, (4;) syntax, 86, (4;) letter and brief, 70, (1;) penmanship, 72.50, (4;) and punctuation, 70, (1.) What was his general average?

Give operation in full.

V. The Philadelphia mint received one lot of old gold coins weighing 8 lbs. and 101 gr. and a second lot weighing 5 lbs, 11 oz. 19 pwt. and 21 gr. The lots were mixed and assorted, when coins weighing 5 lbs. 4 ozs. 3 pwt. and 2 gr. were found to be of full weight, and were taken out. What weight was left?

Give operation in full.

VI. The stationery division received a lot of paper in packages of 480 sheets each, each package weighing 24 pounds. The chief ordered a lot more paper cut to the same size, but directed that it be put in packages of 1,000 sheets each, and that the weight of each sheet be increased 25 per cent. What was the weight of a package of the latter paper?

Give operation in full.

# [Sheet No. 5.—Miscellaneous arithmetical questions.]

VII. On the statement of the public debt of the United States for August, 1887, it was shown that the amount of the 41 per cent bonds outstanding (interest payable quarterly on the 1st day of March, June, September, and December was \$244,251,600. What was the total interest on this amount of these bonds for the months of June, July, and August, 1887?

Give operation in full.

VIII. What sum of money, if loaned at 7 per cent on October 21, 1885, would amount, interest and principal, to \$1,393.59 on September 15, 1887?

Give operation in full. IX. What would \$10,000 in United States 4 per cent bonds cost when the market rate is 1287?

Give operation in full.

X. A citizen invested \$13,837.50 in United States 42 per cent bonds when the market rate was 1121. What rate of interest did he realize on his investment? Give operation in full.

# [Sheet No. 6.—Statement of account.]

Maj. John G. Grant, paymaster, U. S. Army, when he rendered his account current for June, 1887, was indebted to the United States \$23,486.97; July 3, he drew \$40,000 on account of "Improvements, New York Harbor;" July 6, he paid West Point cadets \$22,000.01; July 8, he paid for work, New York Harbor, \$10,187.43; July 9, he drew, "Pay of Army," \$48,000; July 10, he transferred to Paymaster George \$12,000; July 11, he paid detachment of soldiers, \$400.01; July 15, he paid bill for dynamite, New York Harbor, \$48; July 16, Paymaster Longs transferred to him \$18,000; July 17, he 11, he paid detachment of soldiers, \$400.01; July 15, he paid bill for dynamite, New York Harbor, \$48; July 16, Paymaster Jones transferred to him \$18,000; July 17, he paid contractor, New York Harbor, \$22,000; July 20 he drew \$10,000, "Improvements, Hell Gate;" July 24, he paid, "Improvements, Hell Gate," \$9,999.99; July 28, he drew \$40,000, "Improvements, Hallets Point;" July 29, he paid troops on Governors Island \$27,486.37; July 30, he drew for "Pay, Army," \$48,000, and on July 31, he paid his own salary for July, \$291.67, and that of his clerk, \$116.67.

Acting for the Government, open and state his account with the United States for

Acting for the Government, open and state his account with the United States for July, 1887; show balance due, close the account for July, bring down the balance, and open the account for August, 1887. Give the proper heading for the July account.

# [Sheet No. 7.—Questions in grammar—false syntax and impropricties.]

Correct the following sentences, but do not change the sentences or the order of the words except where necessary to remove improprieties, ambiguities, or false syntax.

I. The Secretary endeavored to find out an wholesome remedy.

II. Him I accuse has entered.

- III. Caution! Carelessness will considerably increase the danger of your being
- IV. He simply argues on one side of the case and then finishes.

V. Although I knew it to be he.
VI. But if you can't correct it, who do you complain of?

- VII. The room is ten foot high.
  VIII. There is no rule given how truth may be found out.
  IX. One great cause of the low state of industry in the country were the restraints put upon it.

X. Neither men or money were wanting for the service.

XI. No not without the Secretarys being full aware.

XII. On them depend the duration of our Constitution and country.

# [Sheet No. 8.—Criticism of a letter.]

Copy the following paragraphs, correct errors in orthography, syntax, punctuation, form, and other improprieties; put it into the form of a letter; address it to the Speaker of the House of Representatives, and prepare it for the Secretary's official

signature.

The exercise is designed to show your qualification for quickly and accurately criticising the faulty composition of another, so far as to see that it is finally ex-

pressed in correct and official form.

16. Sleaves roled up.

# [Sheet No. 10.—Dictation exercise.]

As a test of the candidate's orthography and of his accuracy in recording words and placing punctuation marks, the examiner will read a paragraph from the last finance report or from a bureau report, or a selected extract from the works of some standard writer, slowly, for the candidate to copy from the dictation.

[Specimen of English read from a brochure by Osborne Ward.]

#### THE GREAT LAND QUESTION.

Yet we do not complain, because it was the natural outcome of a science. Nothing can resist its inroads. Neither can anything resist the scientific, onward tread of the movement before us to-day. But now comes the answer to the inquiry as to when this change shall come. It is not now even asked for. Outside parties may seize upon the land question and attempt to project its issues in advance of their time, but nothing could be more dangerous. The history of the past, to which you justly allude, is a most memorable warning to all men to beware of the mere nationalization of land. Why, it was that which, under Roman control, plunged millions of free men into slavery! All through Greece, Sicily, Italy, and Asia Minor, land, before the Roman conquest, was worked by small farmers, who, although, as we have shown, liable to failure like all others in the competitive conflicts of business, were comparatively prosperous and contented, working their bits of land as individual tenants on the same system of small holdings as that prevailing at this day. Unions of trades existed all around them; for the ancient laws tolerated labor societies. The farmers themselves sometimes had their grange organizations. They were respected and probably were as well off all things against as many of our farmers to day. probably were as well off, all things considered, as many of our farmers to-day. As Rome spread her conquests of arms these lands fell into her clutches and became They became ager publicus, or public lands, incorporated with the Beautiful farms, village homes in Asia, Greece, everywhere, fell by nationalized. Roman domain. seizure and cruel confiscation into her rapacious hands. Rome assumed ownership of it all and the working people lost their homes. And what was Rome? Nothing but the lords, blooded grandees, millionaire politicians, braggarts of boasted family and their toadies, and speculating fortune-hunters, all maintained by the military, the armed force and repressive laws of which you so grandly speak. These were the They constituted all that was recognized of Rome except her enormous wealth robbed and plundered from labor.

# [Sheet No. 11.—Tabulation of U. S. Treasury statistics.]

Rule, with a pen, ink, and ruler, in the space below, a table of five columns, one for "Denominations," three under the general head of "Deliveries," and under this head each of the three to be headed, respectively, "To Comptroller," "To Secretary," and "To balance," and the fifth column to be headed "Amount." Prepare the table for five lines of items and with one for totals; and then fill the table from the following data, so as to show by denominations in the natural order of the numbers, and with a proper heading, the statement by the Bureau of Engraving and Printing of deliveries and balances of national currency, 1882:

eries and balances of national currency, 1882:

Fives—to Comptroller, \$23,605,320; to Secretary, \$1,476,100; to balance, \$4,744,040; amount, \$29,825,460; deliveries—10's, to Comptroller, \$22,348,200; 10's to balance, \$3,915,180; amount—10's, \$27,510,510; 20's, \$18,340,340; 50's, \$5,861,400; 100's, \$11,-722,800; totals, \$93,260,510; deliveries—to Secretary, 10's, \$1,247,130; 20's, \$831,420; 50's, \$246,300; deliveries—to Comptroller, 20's, \$41,898,800; 50's, \$3,617,650; 100's, \$7,235,300; deliveries—100's, to Secretary, \$492,600; to balance, \$3,994,900; to balance—20's, \$2,610,120; 50's, \$1,997,450; total, \$17,261,690; totals—to Comptroller, \$71,705,270; and to Secretary, \$4,293,550. [Finance report, 1886, page xc.]

This exercise is designed to develop the candidate's capacity for arranging figures for ready reference.

for ready reference.

## [Sheet No. 12.—General information.]

This exercise is designed to show the candidate's general information and knowledge acquired in and out of school.

Q. I. How many votes has your State in the Electoral College? (Name the State.) Q. II. Who was the last General of the Army of the United States on the retired list?

Q. III. What foreign nation attempted to establish an empire in Mexico during the late civil war?

Q. IV. Who was the Lieutenant-General of the Army of the United States at the closing of the late civil war?

Q. V. What waters form a portion of the boundary line between the United States and the Dominion of Canada?

Q. VI. What is the maximum time for which Congress may appropriate money for the support of the Army of the United States under the Constitution?
Q. VII. What is the present unit of value of United States money?
Q. VIII. What rates of interest, respectively, do the interest-bearing securities

of the United States now draw?

Q. IX. Who are the American ministers to Germany, England, and Austria at the

Q. X. Give in the space below any important facts relative to your State. (Name the State.)

# [Sheet No. 13.—Departmental questions.]

This exercise is designed to show, in a limited degree, the candidate's aptitude for the observing of matters about the Executive Departments in general.

Q. I. What, in brief, was the financial policy inaugurated by the Treasury De-

partment in the summer and fall of 1887?

Q. II. A letter is received at the Department asking to be advised as to the amount of imports, exports, immigration, navigation, and other statistics relative to the trade and industry of the country. To what officer of the Department should the trade and industry of the country. To what officer of the Department should you apply direct for such information?

Q. III. What proportion of the par value of the bonds deposited for the security of the national currency may be issued in circulating notes by the national banks?

Q. IV. What officer of the Treasury audits the money-order accounts of the post-

masters of the United States?

Q. V. What officers of the United States have their engraved signatures imprinted

- on the silver certificates?
  Q. VI. What gold coins are now made at the mints of the United States for circulation in this country?
- Q. VII. What member of the Cabinet succeeds the Secretary of State in rank? Q. VIII. What was the highest rate of interest paid by the Government on the bonds of the United States issued during the civil war?
- Q. IX. Name the present Assistant Secretaries of the Treasury.

Q. X. Name in chronological order the Secretaries of the Treasury since Secretary Chase.

#### [Sheet No. 14.—Bureau or office questions.]

The ten questions handed to you herewith have been prepared by the head of the bureau in which you are employed and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to show your general and technical knowledge of the official business of the bureau or office in which you are employed.

Copy the questions and give your answers on this and the accompanying sheets.

Each answer is to immediately follow the question to which it pertains.

[Specimens of questions propounded to a candidate from the office of the Comptroller of the Currency.

Q. I. What is meant by lawful money?

Q. II. What security does the national-banking system furnish to the holders of the circulating notes of national banks?

- Q. III. When does the law forbid a national bank to declare a dividend? Q. IV. To what extent are the stockholders of a national bank individually liable for debts due by the bank?
- Q. V. Under what conditions may a national bank purchase, hold, and convey real estate?

Q. VI. How may the capital of a national bank be increased? Q. VII. Define "net profits."

Q. VIII. For how long a time is a national bank chartered?

Q. IX. What is the lowest amount of United States bonds that may be deposited to secure the circulation of a bank in a city of less than 6,000 inhabitants, after its capital is fully paid in?

Q. X. How is a vacancy in the board of directors filled?

#### [Sheet No. 15.—Division questions.]

The ten questions handed to you herewith have been prepared by the chief of the division in which you are employed. They have been approved by the head of your bureau, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to develop your general, special, and technical knowledge of the official duties on which you have been engaged during the last year. These questions will have a greater relative weight in this examination than any other list of questions submitted to you.

Copy the questions and give your answers on this and the accompanying sheets.

Each answer is to immediately follow the question to which it pertains.

[Specimens of questions propounded to a candidate from the office of the Comptroller of the Currency.]

- Q. I. What treatment do reports of condition receive from the clerk to whom they are allotted for examination?
  - Q. II. State in the same way how reports of earnings and dividends are treated. Q. III. Describe in general terms how reports of examinations are treated by the

clerks in charge of same? Q. IV. How is the greater part of the correspondence from this division (of reports)

prepared ?

Q. V. What portion of the correspondence is typewritten? Q. VI. After the figures taken from reports of condition have been abstracted by

States, etc., in what forms are the totals of these sheets tabulated further?

Q. VII. What aggregate tabulation is made of the totals by States and of items taken from reports of earnings and dividends and how often are these aggregations made each year?

Q. VIII. In case a bank when called upon can not furnish a report of condition. signed by the president, or cashier, and attested by three directors, within the time

required by law, what course is it advised to pursue?
Q.IX. When the figures on a report showing resources and liabilities fail to balance,

what course is pursued with regard to the report?

Q. X. Name some of the violations of law of most frequent occurrence, as shown by reports of condition.

#### EXAMINATION CLASS THREE.

Treasury Department.—Examination for promotion to third class (\$1,600).—New Series, No. 1.

#### [Sheet No. 1.—Letter and brief.]

Instruction.—Write a letter of not more than a page in length; address it to the Secretary of the Treasury; sign it with your full name; fold it and indorse upon its proper fold a brief or summary of its contents.

The official forms prescribed by the Secretary of the Treasury should be used for

the address, the fold, and the brief.

You may select your own subject or take any one of the following topics for the subject of your letter:

(a) The appropriation of the surplus in the Treasury for educational purposes.(b) The removal of import duties from raw materials.

(c) Competitive examinations for promotion in the classified civil service.

(d) The advantages Washington city offers as a place of residence and its especial

advantages as an educational center.

Note. This part of the examination is designed to show your aptitude for composition and correspondence; your power to state clearly and grammatically your views; your knowledge of the forms of address; your neatness; your faculty of adhering to the subject-matter throughout your letter; and it will also determine your averages in penmanship and punctuation.

Please to read the directions at the head of each sheet and carefully comply with

them.

Upon completing each paper, the candidate should sign it and place it upon the examiner's desk.

N. B.—No extra copies of the sheets will be furnished. Continuation sheets furnished by the examiner. The time occupied in the examination is not limited.

#### [Sheet No. 2.—Notation and numeration.]

CAUTION.—Write the answers directly under the questions to which they pertain and be careful to insert the proper points.

I. The total net ordinary expenses of the Government from 1836 to 1885 amounted to \$10,358,762,125.18. Express this amount in words.

II. The total net revenue of the Government from 1883 to 1885 was eight billions nine hundred seventy-six millions three hundred seventy-nine thousand two hundred and thirty-three dollars and forty-seven cents. Express this amount in figures.

III. Express the date 1776 in the Roman notation. IV. Express the date A. D. MDCCLXXXVII in figures.

V. The weights of the silver dollar and the half dollar are expressed, respectively, in grains and grams. The gram weighs nearly 15.432348 grains. Express this weight in words.

VI. Express in words the mixed number 18,376187.

VII. The contract price for a certain article furnished the Bureau of Engraving and Printing was eighteen and sixty-two thousand five hundred and seventy-five hundred thousandths cents. Express this amount in figures, using the dollar as the

VIII. Express in figures the mixed number one million one hundred and one thousand one and two hundred and seventy-five three thousand three hundred thirty-

IX. Express the following numbers in decimals:  ${}^{8}_{70}$ ;  ${}^{8}_{6}$ ;  ${}^{8}_{6}$ ;  ${}^{8}_{1}$  per cent;  ${}^{4}_{1}$ ; and the following in vulgar fractions (lowest terms): .8; .625; 40 per cent;  ${}^{4}_{10}$  per cent; and two and three-eights per centum with a whole number and a vulgar fraction with symbol for per centum.

X. Write in words (no abbreviations) the quantities expressed by the following: 8 T., 7 cwt., 3 qr., 5 lb., and 4 oz.; 88° F.; 16 yds., 2 ft. and 6 in.; and \$0.385 per M

[Note.—Omit the questions erased with red ink.]

I. The space occupied by a bag of standard silver dollars, when snugly piled in bags of \$1,000 each, is 12 inches long, 9 wide, and 4 deep. It is proposed to cut off from a vault 32 feet long and 10 feet high a space sufficient to store 16 million silver dollars. Required, the width of the space. Give the operation in full.

II. In one silver dollar there are 371.25 grains of pure silver, and in the trade-dollar 420 grains of standard silver 900 thousandths fine. The Department purchased 2,000,000 trade-dollars; and at the mint they were mixed with 23,625,000 grains of pure silver, then alloyed, and the whole mass coined into silver dollars. Is silver dollars were produced by this coinage? Give the operation in full. How many

III. A, an examiner in the Printing Bureau, examined \( \frac{2}{3} \) of a lot of internal revenue stamps, B\( \frac{2}{3} \), and C the remainder. The Government paid \( \frac{2}{3} \) 3.60 for the labor and in proportion to the amount each did. What part did C do, and what amount should each receive\( \frac{2}{3} \) (100 the operation in full.

IV. The light-house at Point Lookout consumed 155 barrels of mineral cil, while the light-house at Barnegat consumed 42 times that quantity during the same period. The bill for oil at Barnegat was \$73\frac{2}{3}\$. What was the price of oil per bbl.? Give answer in dollars and the fraction of a dollar reduced to lowest terms. Give the operation in full.

V. There were received at the assay office two ingots of gold; one weighed 20 lbs. 7 pwt. and 18 grs., and the other 21 lbs. 12 oz. 23 pwt. and 10.75 grains; they were combined, and in the assaying there were lost 6 oz. 4 pwt. and  $4\frac{7}{5}$  grains, when the residue was divided into 5 equal ingots. What was the weight of one of these

latter ingots? Give the operation in full.

VI. A man bought 1,650 bushels of flaxseed in New York, at \$1.05 per bushel, and sold it in New Jersey, at \$1.04 per bushel. Did he make or lose by the transaction, and how much? (In New York 56 pounds per bushel and in New Jersey 55 pounds per bushel.) Give the operation in full.

[Sheet No. 5.—Miscellaneous arithmetical questions.—Concluded.]

(Note.—Omit the questions erased with red ink.)

VII. A note of \$1,000, drawing 6 per cent interest per annum, dated October 27, 1884, was paid on September 3, 1887, with the interest then due. What was the amount of interest paid? Give the operation in full.

VIII. What sum of money, put at interest at 7½ per cent per annum for 1 year, 1 month, and 6 days, would amount, interest and principal, to \$3,247.50? (Consider

the year of 360 days). Give the operation in full.

IX. At what rate should a Government 4½ per cent be quoted on the market in order that an investor might realize 3½ per cent interest? Give the operation in full.

X. The Secretary of the Treasury, to comply with the terms of the law relative to the United States sinking fund, wished to purchase one million dollars par value of the Government 4½ per cent bonds, market rate 109% and brokerage ½ per cent. For what amount must the draft be drawn to cover the whole cost? Give the operation in full.

# [Sheet No. 6.—Statement of account.]

The following is a statement showing the assets and liabilities of the United States mints and assay office June 30, 1886: Gold bullion, \$42,454,430.23; the bullion fund, \$135,699,144.73; silver bullion, \$3,468,620.67; items of undeposited earnings, \$19,513.60; gold coin, \$38,798,949.75; silver coin, \$51,206,946.92; seigniorage on silver, \$553,201.44; minor coin, \$4,003.51; unpaid depositors, \$234,655.91; minor-coinage metal, \$46,124.22; minor-coin profits, \$57.73; value of bullion shipped for coinage, \$164,010.15; minor-coin metal fund, \$50,000; old deficiencies brought forward, \$413,557.96; and unpaid cent depositors, \$70.00. Make a statement of the assets and liabilities in the form below and give it a proper heading.

[Sheet No. 7.—Questions in grammar—false syntax and improprieties.]

Correct the following sentences; but do not change the sentences or the order of the words except where necessary to remove improprieties, ambiguities, or false syntax.

Note.—Omit the questions erased with red ink.

I. None of his fellow clerks are more beloved than him.

II. It was not him that done it.

III. The clerk endeavored to surpass.

IV. He felt himself grateful to the Secretary for promote.

V. Whom am their? It am not him; it be me.

VI. The President will be content if every possible means are used.

VII. I have not been in Buffalo this five years.

VIII. He was an old faithful clerk.

IX. Here are ten errors, correct either of them.

X. The foregoing errors in syntax are deserving the more serious perusal.

XI. He being the special agent, to which the case was referred. XII. Avoid copying and scrutinizing your neighbor's examination; it will not be allowed.

XIII. The agent intended to have sold the stamps soonest. XIV. "Mr. President, please recognize me."

XV. "I suppose each of you think it your own letter."

# (Sheet No. 8.—Criticism of a letter.]

Copy the following paragraphs, correct errors in orthography, syntax, punctuation, form, and other improprieties; put it into the form of a letter; address it to the Speaker of the House of Representatives, and prepare it for the Secretary's official.

signature.

The exercise is designed to show your qualification for quickly and accurately criticising the faulty composition of another, so far as to see that it is finally ex-

pressed in correct and official form.

5. Fasiletated.

11. Surtifitikates.

#### [Sheet No. 10.—Dictation exercise.

As a test of the candidate's orthography, and of his accuracy in recording words and placing punctuation marks, the examiner will read a paragraph from the last finance report, or from a Bureau report, or a selected extract from the works of some standard writer, slowly for the candidate to copy from the dictation.

(Specimen of English read, from Special Report, Wool and Manufactures of Wool, Bureau of Statistics, 1888.)

#### ANTIQUITY OF SHEEP, WOOL, AND GARMENTS OF WOOL.

According to the New American Cyclopedia it appears that the rearing of sheep dates from the earliest times. The passages in the Bible alluding to sheep, wool, and woolen garments are well known, and it is a noticeable fact that distinct mention of the last two of these begins at a period much later than that in connection with which the first is named. In Leviticus, XIII, mention is made of garments having "the warp or woof of linen, or of woolen"; and these two materials appear to have been the staples of the primitive weavers of Syria, Palestine, Greece, Italy, and Spain. Pindar applies to Libya the epithet "flock-abounding." Attic wool was celebrated from an extremely early period, and at least down to the time of the Latin poet Laberius, in the first century before the Christian era; and the woolen fabrics of both Greece and Italy attained special excellence. Strabo, however, living in the first century of our era, remarks that the fine cloths worn by the Romans in his time were manufactured from wool brought from Spain.

The myth of "The Golden Fleece," and the perilous adventures of the Argonauts attending its capture at the jaws of the fiery dragon, appear now to have been prophetic of the almost fabulous wealth which has attended the pursuit and capture of the rich-coated ram of the nineteenth century, and show that even prior to the days of Homer and Hesiod the golden qualities of the fleece of the ram were well known

The Romans brought with them to England at the time of their conquest of that

country a knowledge of the use and manufacture of wool hitherto unknown there. In the year 1678 England, by statute, enacted that all corpses should be buried in woolen shrouds, and this statute remained in force until the year 1808. not this law afforded any comfort or consolation to the English citizen, who thus secured for himself, in death, at least, if not before, one suit of woolen clothes, is not known, but the result of the law, it is said, was most beneficial to wool-growing and wool manufacture.

# [Sheet No. 11.—Tabulation of U. S. Treasury statistics.]

This exercise is designed to show the candidate's general information and knowl.

edge, acquired in and out of school.

Rule, with a pen, ink, and ruler, in the space below, a table of five columns; one for "Denominations," one for "Issued," one for "Redeemed," one for "Increase in circulation," and one for "Decrease in circulation;" prepare it for eleven lines of items, and with one line for "Totals;" and then fill the spaces in the table from the following data, so as to show by denominations in the natural order of the numbers, and with a proper heading, the issues and redemptions of United States notes by de-

nominations for the fiscal year ended June 30, 1886:

Ones—redeemed, \$7,348,139; decrease, \$7,348,139; issued—fives, \$21,320,000; tens, \$9,960,000; fives redeemed, \$11,688,586; twos redeemed, \$7,090,700; decrease—twos, \$7,090,700; twenties, \$48,130; increase—fives, \$9,631,414; tens, \$2,119,275; twenties— \$7,090,700; twenties, \$48,130; increase—nves, \$7,631,414; tens, \$2,119,275; twenties—issued, \$7,120,000; redeemed, \$7,168,130; redeemed, tens, \$7,840,725; fifties—issued, \$2,000,000; redeemed, \$2,168,630; decrease, \$168,630; one hundreds—decrease, \$1,537,090; redeemed, \$6,237,090; issued, \$4,700,000; issued—five hundreds, \$400,000; one thousands, \$17,500,000; increase—one thousands, \$8,645,000; total, \$20,395,689; totals—issued, \$63,000,000; redeemed, \$63,000,000; decrease, \$20,395,689; decrease—5,000's, \$40,000; 10,000's, \$30,000; redeemed—500's, \$4,533,000; 1,000's, \$8,855,000; 5,000's, \$40,000; 10,000's, \$30,000; and decrease, 5,000'f, \$4,133,000. [See Treasurer's Report 1886] Report, 1886.

It will not be necessary to add the colums.

# [Sheet No. 12.—General information.]

I. How often is the census of the United States taken?

II. How are the members of the President's Cabinet appointed?

III. Name the States of the Union entirely west of the Mississippi River.

IV. Who is the Chief Justice of the United States Supreme Court?

V. Who was the president of the convention that drafted the Constitution of the .United States?

VI. Which was the first State admitted into the Union under the Constitution, and

which were the last seven States admitted into the Union?

VII. How many Representatives are there in the Congress of the United States? VIII. What is is the annual salary of each of the following officers of the United States: The President, the Vice-President, a Senator, a Representative, and a member of the Cabinet?

IX. Who is governor of the State of New York?

X. Name an important article of import and one of export.

#### [Sheet No. 13.—Departmental questions.]

I. Your superior officer refers to you for official action an important letter on official business pertaining to your bureau; and it also contains matters relative (1) to back pay and bounty of a soldier of the late war, and (2) a mutilated 10-dollar United States note for redemption. Dispose of the letter

II. The above letter also contained inquiries (1) as to the survey of public lands, (2) an inquiry as to weights and measures, and (3) an inquiry as to the common schools of the United States. Required, your action.

III. Select one of the several bureaus of this Department, in which you have never been engaged, and briefly state its duties under law and regulation.

V. Name the last six Secretaries of the Treasury in chronological order.
V. What security is there for the ultimate redemption of the national-bank currency?

VI. What security is there for the ultimate redemption of the gold and the silver certificates of the United States?

VII. Give the standard weight and fineness of the gold and the silver dollar.

VIII. What is the annual salary of the head of your bureau?

IX. When was the last bureau of the Treasury Department organized? By what authority? And what in brief are its duties?

X. Name the moneys issued by the authority of the United States that are a full legal tender without limit.

# [Sheet No. 14.—Bureau or office questions.]

The ten questions handed to you herewith have been prepared by the head of the bureau in which you are employed, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to show your general and technical knowledge of the official business of the bureau or office in which you are employed.

Copy the questions and give your answers on this and the accompanying sheets.

Each answer is to immediately follow the question to which it pertains.

[Specimens of questions propounded to a candidate from the office of the Second Comptroller.]

Q. I. Name some of the duties of the Second Comptroller.

Q. II. How is the Second Comptroller appointed?

Q. III. When the Comptroller disallows a claim, what redress has the claimant? Q. IV. State the nature of the accounts received from the Second Auditor for the consideration of the Second Comptroller's office.

Q. V. State the nature of the chief accounts coming from the Third Auditor's office for the decision of the Second Comptroller.

Q. VI. Name the accounts received from the Fourth Auditor for the consideration of the Second Comptroller's office. Q. VII. John Smith wants a document on file in-the Second Comptroller's office.

How is he to get it?

Q. VIII. Give the names and proper titles of the Comptrollers of the Treasury. Q. IX. What classes of warrants are issued by the Second Comptroller? Q. X. State the requisitions countersigned by the Second Comptroller.

# [Sheet No. 15.—Division questions.]

The ten questions handed to you herewith have been prepared by the chief of the division in which you are employed. They have been approved by the head of your bureau, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to develop your general, special, and technical knowledge of the official duties on which you have been engaged during the last year. These questions will have a greater relative weight in this examination than any other list of questions submitted to you.

Copy the questions and give your answers on this and the accompanying sheets. Each answer is to immediately follow the question to which it pertains.

[Specimens of questions propounded to a candidate from the office of the Second Comptroller.]

Q. I. When does the pay of an assistant paymaster (Navy) begin?

Q. II. What officers of the Navy serve four years before becoming entitled to an increased rate of pay?

Q. III. When is an officer of the Navy, traveling under orders, not entitled to mile-

Q. IV. Under the law, what disbursing officers transmit their accounts direct to the accounting officers?

Q. V. What is the present highest rank in the Navy? Q. VI. When is a disbursing officer of the Navy attached to a ship not entitled to the services of a clerk?

Q. VII. Under what circumstances can an acting appointment of a paymaster be

Q. VIII. How can an officer of the Navy, placed on the retired list on furlough pay, be transferred to the retired-pay list?

Q. IX. What is the present annual pay of the colonel commandant of the Marine Corps?

Q. X. Since June 22, 1874, when is an officer of the Navy entitled to a ration?

#### EXAMINATION CLASS FOUR.

Treasury Department.—Examination for promotion to fourth class (\$1,800).—New Series, No. 1.

# [Sheet No. 1.—Letter and brief.]

INSTRUCTION.—Write a letter of not more than a page in length; address it to the Secretary of the Treasury; sign it with your full name; fold it, and indorse upon its proper fold a brief or summary of its contents.

The official forms prescribed by the Secretary of the Treasury should be used for

the address, the fold, and the brief.

You may select your own subject, or take any one of the following topics for the subject of your letter:

(a) The general efficiency of the clerks furnished this Department by the Civil

Service Commission.

(b) A departmental clerkship as a profession.

(c) How to relieve the Treasury of its surplusage of receipts.

(d) A postal savings bank, when the receipts of the Government are in excess of

Note.—This part of the examination is designed to show your aptitude for composition and correspondence; your power to state clearly and grammatically your views; your knowledge of the forms of address; your neatness; your facility of adhering to the subject-matter throughout your letter; and it will also determine your averages in penmanship and punctuation.

Please to read the directions at the head of each sheet and carefully comply with

them.

Upon completing each paper the candidate should sign it and place it upon the examiner's desk.

N. B.—No extra copies of the sheets will be furnished. Continuation sheets furnished by the examiner. The time occupied in the examination is not limited.

## [Sheet No. 2.—Notation and numeration.]

I. The total receipts of the Government from March 4, 1789, to June 30, 1886, were \$21,649,805,641.27. Express this amount in words.

II. The total expenditures of the Government from March 4, 1789, to June 30, 1886, were twenty-one billions one hundred twenty-eight millions eleven thousand six hundred and fifteen dollars and one cent. Express this amount in figures.

III. Express the date 1787 in the Roman notation.

IV. Express the date MDCCCLXIV in figures.

V. The weight of the standard silver dollar is expressed in grains, and that of the silver half dollar in grams. The gram is the equivalent (approximately) of 15.43234874 grams. Express this latter weight in words. VI. Express in words the mixed number  $14,389_{13}^{18}|_{37}^{17}$ .

VII. The contract price for a certain article furnished the Bureau of Engraving and Printing was eight and three thousand four hundred and eighty-three ten-thou-

and remaining was eight and enter thousand four fundred and eighty-three ten-thousandths cents. Express this amount in figures, using the dollar as the unit. VIII. Express in figures the mixed number one million ten thousand one and three hundred forty-six two thousand three hundred forty-sixths.

IX. Express the following numbers in decimals: \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\); \(\frac{1}{3}\);

a vulgar fraction and symbol of per centum, and also with decimals.

X. Write in words the quantities expressed by the following terms and symbols, using no abbreviations: 10 yds.; 3 ft. 6 in.; 90° F.; ½ doz.; 3 sq. rd. & 7 sq. ft.; 9 T., 8 cwt., 3 qr., 6 lb., and & oz.; 1 hhd., 2 bbl., 3 gal., 2 qt., and 1 pt.

[Sheet No. 4.—Miscellaneous arithmetical questions.]

Note.—Omit the problem erased in red ink.

I. A requisition was made on the Bureau of Engraving and Printing for a certain amount of internal-revenue stamps to be finished in 40 days. The appropriation being short, part of the force was furloughed, and the printing was divided between four printers, A, B, C, and D. A worked 10 days, and printed \(\frac{1}{2}\); B, 10 days, and printed \(\frac{1}{2}\); C, 10 days, and printed \(\frac{1}{2}\); and D finished the work in the required time. The Bureau paid, in all, \$144 for the printing. How rauch should be paid to each? Give operation in full.

II. A contractor furnished the Treasury Department with a roll of Brussels caror the contractor tends are the freesarty beparture with a roll of Brissels carpet containing 51\frac{2}{3}\frac{1}{3}\text{ yds., for which he was paid \frac{1}{3}\frac{1}{3}\text{ 3d, 3d, 2d} and with a roll of Wilton carpet containing 52\frac{1}{3}\text{ yds., for which he received 75 cents more per yard. What did he receive for the roll of Wilton carpet? Give operation in full.

III. The Treasury Department purchased \( \frac{1}{2}\text{7},652,800 \) lbs. of Cumberland coal, at \( \frac{1}{3}.21 \) per ton (2,240 lbs.). What did the coal cost? Give operation in full:

IV. If two paper-counters can count \( \frac{1}{3}\text{ of a lot of money in 3\frac{1}{4}\text{ hours, how many hours would it take them to finish that lot and another lot 2\frac{2}{3}\text{ as large?} \( \frac{1}{3}\text{ Give operation in full} \)

V. If 10,000,000 sheets of distinctive paper cost \$46,200, what would be the cost of 7 sheets? Express the answer in figures as decimals of a dollar; and in words, in

cents and decimals of a cent. Give operation in full.

VI. A contractor for distinctive paper for printing internal-revenue stamps submitted a sample, size  $20 \times 24$  inches, weight 24 lbs. for 480 sheets. The Department adopted the paper, but stipulated that it be of the same relative weight, be cut into sheets, size  $16 \times 18$  inches, and be put up in packages of 1,000 sheets each. What was the weight of a package? Give operation in full.

[Sheet No. 5.—Miscellaneous arithmetical questions.—Interest, principal, bond purchase, and market rate.]

STATEMENT: On August 3, 1887, the Secretary of the Treasury gave a public notice that the interest due September 1 and December 1, 1887, on the 4½ per cent bonds of the United States, October 1, 1887, and January 1, 1888, on the 4 per cent bonds, would be prepaid on and after August 15, 1887, with a rebate at the rate of 2 per centum per annum on the amounts prepaid; and he also invited proposals for the sale to the Government of the United States 4½ per cent bonds, to be applied to the sinking fund. (Bonds draw interest quarterly.)

Note.—Omit the problems erased with red ink.

II. Referring to the above statement, if the holders of \$73,000,000 of the 4½ per ce. 5 bonds accepted the Secretary's offer on August 15, 1887, what was the amount saved in interest to the Treasury by this transaction? Give operation in full.

VIII. Referring again to the above statement, from what amount of interest accruing to the holders of the 4 per cent bonds could a rebate of \$7,176 be taken, if the

Secretary's offer was accepted on August 15, 1887? Give operation in full.

IX. Referring again to the above statement, if the Secretary of the Treasury determine to use \$35,310,000 of the Treasury surplus for the purchase of  $4\frac{1}{2}$  per cent bonds for the sinking fund, market rate of bonds  $109\frac{7}{4}$  and one-eighth per cent brokerage, what would be the par value of the bonds purchased? Give operation in full.

X. If the Secretary of the Treasury were to use \$8,750,000 of the Treasury surplus to buy for the sinking fund eight thousand \$1,000 bonds, 4½ per cents, paying one-eighth per cent brokerage, what was the market rate? Give operation in full.

# [Sheet No. 6 .- Statement of account.]

The statement of the assets and liabilities of the Treasury of the United States on July 30, 1887, showed items nearly as follows: Gold coin and bullion, \$281,296,417.45; silver coin and bullion, \$216,621,246.94; gold certificates in circulation, \$94,990,087.00; silver certificates in circulation, \$144,166,141.00; United States notes in cash, \$28,093,739.92; currency certificates in circulation, \$8,460,000.00; unpaid interest, \$2,376,292.83; trade dollars, \$7,186,317.68; accrued interest, \$4,369,922.83; national-bank notes, \$273,802.00; matured debt, 6,161,115.26; deposits in depositaries, \$23,493,267.01; redeemed fractional currency, \$1,821.03; interest checks, and coupons paid, \$335,748.48; interest on matured debt, \$195,885.27; national-bank notes in process of redemption, \$2,868,303.45; debt bearing no interest, \$1,821.03; interest on D. C. bonds paid, \$125,069.40; unpaid interest on P. R. R. bonds, \$99,320.36; minor coin, \$12,739.54; accrued interest on P. R. R. bonds, \$323,117.56; reserve for redemption of V. S. notes, \$100,000,000; sundry redemption funds, \$113,933,836.50; outstanding drafts and checks, \$4,383,902.10; fund for paying interest on D. C. bonds, \$635,574.71; unenumerated accounts due, \$34,500,122.76; and fractional silver coin, \$26,691,105.74. Make a statement of the assets and liabilities in the frame below; give it a proper heading, and show the balance.

[Sheet No. 7.—Questions in grammar—false syntax and improprieties.]

Select and correct any ten of the following sentences; but do not change the sentences or the order of the words except where necessary to remove improprieties, ambiguities, or false syntax.

I. The children of Washington are now being educated in them public schools.

II. Many of the citizens have mistock the manning of the civil service law.

II. Many of the citizens have mistook the meaning of the civil-service law.

III. You were promoted for giving the most attention to official duty than any other clerk of the division.

IV. Neither the Secretary or the President were willing to approve such an proposition.

V. Neither silver certificates or fractional currency were issued before the war.

VI. The Secretary intended to have prosecuted him; but he flew from the chief's of the Secret Service officers.

VII. There is no data by whom it can be corrected; and there seems to be no other words required.

VIII. Neither do the silver certificates extend in trade as far as might be imagined.

IX. Please correct this sentence quick so as to neither lengthen or shorten it.

IX. Please correct this sentence quick so as to neither lengthen or shorten it.

X. Some clerks seldom or ever study. This blunder is said actually to have incurred; but every clerk will not see it, or every person correct.

XI. The work is not completed, but soon will be.

XII. Was any person besides the Secretary present? Yes, both him and his private secretary.

XIII. Never employ those words which may be susceptible of a sense different from the sense you intend to be conveyed.

XIV. The President took leave to accept the invite.

XV. A friend exaggerates a man's virtues; an enemy inflameth his crimes.

# [Sheet No. 8.—Criticism of a letter.]

Copy the following paragraphs, correct errors in orthography, syntax, punctuation, form, and other improprieties; put it into the form of a letter; address it to the Speaker of the House of Representatives, and prepare it for the Secretary's official signature.

The exercise is designed to show your qualification for quickly and accurately criticising the faulty composition of another, so far as to see that it is finally ex-

pressed in correct and official form.

treas., Dept. ofice of The secy; Wastong, d; C—Agst 14 1887;

sur i is hear of Obedince too your invite whitch, permitts me make eny stament; or furnish any dayta, witch in mi jugemunt ma, aid the Comitee in consyerring this resolve i thanks the com fur thiss kurtysey but; after maytour considering I hav comed to the conclud, that, i aught not express any oppinion on this resolve or; atempt to unform the minds of thee cummite as to thee resulls who ma foller if itt be coms la; i am forct to this conklude for too resons furst kongres has alers hear two four permit thee seckretari of The treasury deeside at whitch times, an fur whitch Amounts bondkals shude bee maide i am not inform whi this has bin the praktise but; probably it were beekase it has untill now bin konsyderred too bee difkult to four kaste the fewtour conditions of the treaseury and the bussiness of the Country; and by these conditions as they might change from month to month it has been probably thought well to determine the wisdom or unwisdom of a bondcawl; therefour it has bin left too thee deskreshion of the Sec. of The treas; he being allways on The Watch; and in a posishon dayly to git infurmation to gide him in the exercize of this discretion i are not awair that this custom has hin harmefall to the country under former admynistashuns some mistakes ma have been maide but on the whole; the country has been benefitted of the exersize, of this diskretion under this admynistrashuns; and by the present Sec of The treas; I prefur not to spek thee facks is recent an wel none to the Comitee an to thee country. Sec of Th treas

Too honerbal Justin S. Morrill, financical comit u S senate. [For the "criticism of a letter" candidates, under proper circumstances, are given for copy the "rough draft of a letter," which may be found in the specimen examination papers of Class D or Class E.]

# [Sheet No. 9.—Orthography.]

The words in the following list were selected at random from the finance report, and are submitted to you to test your capacity for detecting at sight errors in orthography and your ability to correct the errors you find. Copy, correctly spelling, the entire list:

1. Bulyon. 8. Maratime. Lickydatied. 20. Artificial. 2. Physkal. 9. Insufishunt. 15. Compairitive. 21. Subsidiary. 3. Receats. 10. Kolaps. 22. Invoices. 16. Ekewaylyze. 17. Tarrif. 18. Uterred. Kryticize. 11. Obstruckshion.12. Inn as mutch. 23. Predecessors. 24. Suckering. Miscelaneeous. 13. Curant. 25. Skedule. 6. Compaired. 19. Surtyfikates.

7. Kongeenyal.

[Sheet No. 10:—Dictation exercise.]

As a test of the candidate's orthography, and of his accuracy in recording words and placing punctuation marks, the examiner will read a paragraph from the last finance report, or from a bureau report, or a selected extract from the works of some standard writer, once through for the full information of the candidate, and then slowly for the candidate to copy from the dictation.

#### [Specimen of English read from a Government report.]

#### CORRECT LANGUAGE TEACHING THE PROPER PREPARATION FOR LEARNING TO READ.

The ultimate purpose of learning to read is the training that will give its possessor the power to see the concrete as clearly in the written description as the trained eye would see the thing described; to feel the emotion expressed as his own; to know the willing expressed or to understand the conclusions expressed, as if willing, doing, or making the conclusions himself

know the willing expressed or to understand the conclusions expressed, as if willing, doing, or making the conclusions himself.

Much of the work done in English in all grades of school above the first is put upon paper with pen or pencil by the child. This, of course, involves the spelling of words. Thus, much spelling is done. Thus, too, the correct spelling of many words is insured that, under a different kind of teaching, would not be found in the vocabularies of the children, which, when writing, they would not spell because they would not use them. If this class of words be taken into consideration, and the list is a long one, and if there also be taken into consideration the breadth of vocabulary involved by the great variety in the kinds of work done, and then the percentage of misspelled words noted, our children will be declared good spellers.

Furthermore, the fact that the child knows the real meanings of the words he spells, which is shown by the use of the words in his own composition, should rate

him high as a practical speller.

By the introduction of the study of plants, animals, vapor, physical geography, surface geology, physics, etc., the children are not necessarily overloaded with work. The practical effects of such work are to relieve the pupils by giving variety, for the work is not done to get definite results in botany, in zoology, in physics, in geol-

the work is not done to get definite results in botany, in zoölogy, in physics, in geology, in chemistry, but is done chiefly, as I have tried to show, to give opportunity for the right kind of training in English, and to properly prepare the child in the lower-grade school for learning to read, and to train the pupil in the advanced grades of school to read and examine profitably and economically for definite results.

Finally, I want to call your attention to the variety of work done in the schools requiring change in the exercises, thus insuring that rest which is better for health than inactivity.

"Rest is not quitting the busy career, "Rest is the fitting of self to its sphere."

If, in addition to what has been said in the foregoing, it is remembered that a fair percentage of the time and efforts of the schools is given to "health exercises" especially adapted to the needs of the children, circumstanced as they are, and, furthermore, that 90 per cent of our schoolrooms are well ventilated; that the seating is healthful, and that the surroundings are cheerful, clean, and agreeable, it must be conceded that the hygienic condition of the schools is good and should be gratifying to you and to the parents who send their children to them.—W. B. POWELL, Superintendent of Schools, District of Columbia.

# [Sheet No. 11.—Tabulation of U.S. Treasury statistics.]

Rule, with a pen, ink, and ruler, in the space below, a table of four columns; one for "Denominations," one for "Outstanding," one for "In Treasury," and one for "In circulation;" prepare it for twelve lines of items, and with one line for "Totals;" and then fill the table from the following data, so as to show, by denominations in the natural order of the numbers, and with a proper heading, the general

inations in the natural order of the numbers, and with a proper heading, the general recapitulation of the condition of the United States currency:

Ones—outstanding, \$18,020,404; in treasury, \$688,344; in circulation, \$17,332,060; outstanding—twos, \$18,425,166; ten thousands, \$53,040,000; in treasury—tens, \$9,905,490; ten thousands, \$27,840,000; in circulation—one thousands, \$40,496,000; five thousands, \$5,870,000; ten thousands, \$25,200,000; totals—outstanding, \$900,419,695; in circulation, \$777,395,884; in treasury, \$123,023,711; in treasury—twos, \$489,442; fives, \$1,264,260; fives—in circulation, \$167,605,835; outstanding, \$168,870,095; in circulation—twos, \$17,935,724; tens, \$208,364,527; outstanding—tens, \$218,270,017; one thousands, \$57,654,000; five thousands, \$13,490,000; in treasury—one thousands, \$17,158,000; five thousands, \$7,620,000; twenties—outstanding, \$184,800,598; in treasury, \$12,403,080; in circulation, \$172,397,518; in circulation—fifties, \$45,245,525; one hundreds, \$64,048,220; five hundreds, \$16,717,000; fifties—outstanding, \$59,625,995; in treasury, \$14,380,470; in treasury—five hundreds, \$11,363,000; one hundreds, \$16,095,100; outstanding—one hundreds, \$80,143,320; five hundreds, \$28,080,000; and \$16,095,100; outstanding—one hundreds, \$80,143,320; five hundreds, \$28,080,000; and national bank notes unassorted—in treasury, \$3,816,525.

This exercise is designed to develop the candidate's capacity for arranging figures for ready reference. It is not necessary to add the columns.

### [Sheet No. 12.—General information.]

This exercise is designed to show the candidate's general information and knowledge acquired in and out of school.

I. By what bodies are the President and Vice-President of the United States

elected?

II. What officers shall act as President in case of removal, death, resignation, or inability of both the President and Vice-President of the United States?

III. What is the standard weight, respectively, of the gold dollar, the silver dol-

lar, the trade dollar, and the silver half dollar.

IV. How would you compute the salary of a fourth-class clerk for 17 days in August, 1887? . From whom did the United States acquire Louisiana and Alaska, respectively?

VI. What is meant by the term standard time?

VII. Name the thirteen original States of the Union.

VIII. State as near as you can the population of the United States and Territories

as shown by the census of 1890.

IX. State the name of the Governor of the State from which you were appointed, the names of its United States Senators, and the name of the Representative in Congress from the Congressional District in which you reside.

X. Which State of the Union extends the farthest north?

# [Sheet No. 13.—Departmental questions.]

This exercise is designed to show, in a limited degree, the candidate's aptitude for the observing of matters about the Executive Departments in general.

I. Into how many coordinate branches is the Government of the United States

divided, and what are they?

II. What are the functions of each under the Constitution of the United States? III. State the number of Executive Departments of the United States, and name them in their proper order, beginning with the one that ranks the highest.

IV. Name the last ten Secretaries of the Treasury in chronological order.

V. In what year, and by what authority, was the United States Treasury Depart-

ment established?

VI. Who was the first Secretary of the Treasury, and by whom was he appointed? VII. State the number of bureaus or offices in the Treasury Department, and give names of ten of them.

VIII. When was the bureau or office in which you are employed established?

1X. Name the members of the present Cabinet of President Harrison.

X. What officer of the Treasury Department is charged with the supervision of the duties of the clerks and employes connected with the Department?

# [Sheet No. 14.—Bureau or office questions.]

The ten questions handed to you herewith have been prepared by the head of the bureau in which you are employed, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to show your general and technical knowledge of the official business of the bureau or office in which you are employed.

Copy the questions and give your answers on this and the accompanying sheets.

Each answer is to immediately follow the question to which it pertains.

[Specimens of questions propounded to a candidate from the office of the Second Auditor.]

Q. I. Name four classes of commissioned officers (civil or military) whose money accounts are audited by the Second Auditor, stating in what division the respective accounts are stated.

Q. II. What property accounts are settled by the Second Auditor and by what

divisions?

Q. III. Name the divisions to which the following accounts and claims should be respectively referred for settlement:

(a) Account of contingent expenses of the Army;
(b) Claim for deceased Army officers' pay;
(c) Claim for supply of beef cattle to Nez Percé Agency;

(d) Claim for a soldier's "additional" bounty;

(e) Soldiers' Home accounts.

Q. IV. When an account is stated, what is the duty of the Auditor?
Q. V. What officers issue requisitions on the Treasury for payment of balances certified by the Second Auditor and confirmed by the Second Comptroller? If the Second Comptroller certify a balance different from that found by the Auditor, which stands? . What officer has power to change the balance declared by the Comptroller?

Q. VI. How long is an annual appropriation available to pay balances due public creditors? Within what period must such balances have accrued? What becomes of any balance of appropriation remaining after expiration of the period of availa-

Q. VII. (a) What is meant by a "permanent annual" appropriation? Which of the following are annual?

(b) Fulfilling treaties with Chickasaws;

(c) Pay of interpreters

(d) Indian school buildings;

(e) Support of Makahs.

Q. VIII. In what cases can Auditors administer oaths?
Q. IX. What is meant by the term "charges," as used to designate a paper on which the statement of a disbursing officer's account is based? Who furnishes it?

Q. X. When a Treasurer's draft has been paid and is returned to the Treasury, where is it filed and with what other document?

#### [Sheet No. 15 .- Division questions.

The ten questions handed to you herewith have been prepared by the chief of the division in which you are employed. They have been approved by the head of your bureau, and are made a part of this examination by the direction of the Secretary of the Treasury. They are designed to develop your general, special, and technical knowledge of the official duties on which you have been engaged during the last year. These questions will have a greater relative weight in this examination than any other list of questions submitted to you.

Copy the questions and give your answers on this and the accompanying sheets. Each answer is to immediately follow the question to which it pertains.

[Specimens of questions propounded to a candidate, accountant's grade, from the office of the Second Auditor.]

Q. I. What is a requisition? By what officer is it issued in Indian cases, and by whom subsequently acted on?

Q. II. What is a warrant? State what officers act on it.

Q. III. If a balance is due an agent under a lapsed appropriation, what must be directed on the "report" in regard to payment? What is the further action taken as thereon?

Q. IV. If an agent has gone out of service, how is a check issued by him while in the service paid?

Q. V. What officers institute and conduct suits against Indian agents? What does this office furnish?

Q. VI. What is the lawful disposition of the following moneys when recei an agent, and under what heads should they be respectively charged in stat account by the Auditor?	ved by
(a) Rent of Government buildings;	
(b) Proceeds of sales of property not needed for the Indians at an agency;	
(c) Proceeds of sales of subsistence to employés;	
(d) Proceeds of right of way for cattle across reservations;	
(e) Proceeds of sales of hides of cattle bought for Indians.	
Q. VII. (a) In case of loss or destruction of property to a large amount at an	voneve
what is the agent's duty? (b) If the loss is small, what evidence must be	filed to
prevent charging him with the value?	mica b
Q. VIII. What points must be covered by an agent's affidavit as to employ	609
Q. IX. What action should be taken on the following items if found in an	oor
secount?	agonte
(a) He pays fare over a bond-subsidized road;	
(b) He overpays employé A \$1, and underpays employé B by the same amount	nn+0
	THO A
(c) He charges for a telegram without a subvoucher;	
(d) He charges and files a hotel bill at \$6 per day;	4
(e) He charges salary prior to date of taking oath of office.	1

# REQUEST FOR OFFICE QUESTIONS, CLASS ONE (\$1,200) AND ABOVE.

What requisitions should be called for on the report in order that the account shall

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, BOARD OF EXAMINERS, Washington, D. C .. -

То	the	·	,	
----	-----	---	---	--

close on next settlement?

Sir: With a view to the examination, at an early date, of Mof class - (\$---), for promotion to a clerkship of class -- (\$---), I have to request that at your early convenience you cause to be prepared at least ten questions relative to the general duties assigned by law and department regulations to the bureau

or office under your charge.

I have also to request that you direct the chief of the division in which the candidate is employed, to prepare a further list of at least ten questions relative to the work upon which the candidate has been engaged during the last year.

I would especially suggest that the questions be of such a nature as will best test the candidate's general and technical knowledge of official business; and that all ambiguous questions, and those answered by "yes" or "no," be excluded; that they be written or imprinted upon the standard letter paper of the Department: that the questions and official answers to the same be prepared in like manner for the use of the examiner; that the one list be signed by you, and that the other be signed by the chief of division and be approved by you.

The questions should be marked "confidential," and should be forwarded to my

address, marked on the envelope for whom they were prepared.

The examination is fixed for -----, 189-, at ---

Respectfully yours,

Chief Clerk and Member of the Board.

Note.—The Bureau questions will have a relative weight of 6, and the division questions a relative weight of 8, in the examination.

# ·EXHIBIT No. 32.

# PASS EXAMINATIONS FOR SPECIAL AGENTS AND CHIEFS OF DIVISIONS,

Treasury Department.—Examination for admission as Special Agent, at \$6 per day. and Chiefs of Divisions. Series No. 2.

# [Sheet No. 1.-Letter and brief.]

Write a letter of not less than four pages, addressed to the Hon. Secretary of the Treasury, giving some account of your education and your business experience, and mention any particular talent or aptitude you may possess. Give some history of the discussions which have taken place in this country relative to the proper objects of a tariff upon imports, and state briefly some of the arguments which have been advanced on either side. You may also briefly discuss. (Here is inserted a topic.) Properly fold and brief your letter.

NOTE.—This part of the examination is designed to show your aptitude for com-

position and correspondence; your power to state clearly and grammatically your views; your knowledge of the forms of address; your neatness; your faculty of adhering to the subject-matter throughout your letter, and it-will also be considered

in determining your average in penmanship.

Please to read the directions at the head of each sheet and carefully comply with Upon completing each paper the candidate should sign it and place it upon the

examiner's desk.

N. B.—No extra copies of the sheets will be furnished. Continuation sheets furnished by the examiner. The time occupied in the examination is not limited.

# [Sheet No. 2.—Notation and numeration.]

CAUTION .-- Write the answers directly under the questions to which they pertain, and be careful to insert the proper points.

Express the following in figures:

One hundred millions one thousand and one dollars.
 Two billions thirty-three dollars and seven eighths cents.

Express the following in words:

3. \$12,080,102.87. 4. \$22,022,220,020.22.

Express the following in decimal figures:

Seven hundred sixteen millionths.

6. Three hundred and decimal seven ten-thousandths.

7. Express the following in Roman notation: A. D. 1890.

8. Express the following date in Arabic notation, also in words: MDCCCLXXXVIII.

[Sheets No. 4 and 5.—Miscellaneous arithmetical questions.—Customs problems.]

I. Required the total duty on 11 cases of woolen dress goods (weighing over 4 oz. per square yard) valued at £138 18s., and weighing 2,342 pounds. The rate of specific duty was 35 cents per pound, and the ad valorem duty was 40 per cent. Give operation in full.

II. What is the value in United States currency of 2 T. 19 cwt. 3 qus. 16 lbs. of imported goods valued at £2 12s. 6d. per cwt. Give operation in full. [Ask the examiner for a reduction table if you have use for one.]

III. Find the interest on \$1,000 from February 5, 1879, to March 23, 1881, at 6 per cent. per annum. Give operation in full.

IV. A special agent of the Treasury having discovered a raudulent entry of 10 cases of silks he causes a seizure to be made of the goods. Duty had been paid at 60 per cent on an invoice value of \$1,848, but on reexamination the value was appraised at \$3,872. Duty was taken on the excess at 60 per cent besides a penal duty of 20 per cent upon the whole value. How much duty was paid altogether? Give operation in full.

V. Ask the examiner for a reduction table and with it reduce \$135,673.96 and four and seven-twelfths mills U. S. standard value to British sterling. Give operation

in full, and find the exact answer.

Total, \$

# [Sheet No. 6.—Book-keeping and accounts.]

A special agent of the Treasury was, on December 25, 1889, instructed to examine the accounts of the collector of customs in the district of New York, N. Y., the report to be dated January 10, 1890.

He found cash on hand January 10, 1890, by actual count, \$3,535.88, and the assistant treasurer at New York certified that there were on deposit in his office on that date to the credit of the collector, as disbursing agent, \$237,010.21, and it was itemized as follows: Expense collecting revenue, \$50,001.01. Excess of deposits, \$101,010.10. Debentures, \$83,000.09, and Revenue-Marine Service, \$2,999.01.

The last report of the collector to the commissioner of customs, dated November 30, 1889, of "Moneys received and paid" showed balances as follows, due United States on accounts, to wit: Customs, \$3,346.10. Expense collecting revenue, \$27,873.60. Excess of deposits, \$4,389.76. Debentures, \$126,398.51. Revenue-Marine Service, \$987.31. And due officer on account of official emoluments, \$1,387.61.

Since the date of the last report to the commissioner of customs there had been received on accounts: Customs, \$18,943,876.10. Expense collecting revenue, \$1,287,300.01. Excess of deposits, \$2,020,002.02. Debentures, \$200,000.08. Revenue Marine Service, \$20,000. Official emoluments, \$20,380. And since that date that there had been paid on account: Expense collecting revenue, \$1,200,172.60. Excess of deposits, \$1,923,381.68. Debentures, \$243,398.50, and Revenue-Marine Service, \$17,000. And since that date there had been deposited on accounts: Customs, \$18,942.287.01. Expense collecting revenue, \$65,000. Official emoluments, \$21,380.

pense collecting revenue, \$65,000. Official emoluments, \$21,380.

On the blanks handed to you by the examiner enter the above items in the proper tables, make the necessary additions to complete tables 2, 3, and 4, and then com-

pute the necessary amounts to fill and complete tables 5 and 6.

# [Sheets Nos. 8, 9, 10, and 11.—General information.]

This exercise is designed to show the candidate's general information and knowledge acquired in and out of school.

N. B.—Carefully read and then answer each of the following questions:

1. Name the three great coördinate branches of the Government of the United States and briefly describe the functions of each.

2. Name the Executive Departments of the Government, and state generally the scope of public business devolved upon each.

3. Describe as nearly as you can the duties and prerogatives of the Secretary of

- the Treasury.

  4. Name the chief customs officers and state generally the duties devolved upon
- 5. By whom are special agents of the Treasury appointed, and what in general are their functions?
- 6. What are (1) "customs districts," (2) "ports of entry," and (3) "ports of delivery?"

7. Name the last seven States admitted into the Union.

- 8. Name ten United States Senators, ten Representatives in Congress, and the last ten Presidents of the United States in chronological order. (Name the State from which each was chosen.)
- 9. Name several routes by which goods can be exported from Chicago to Europe. 10. Name ten important ports of entry in the States bordering on Atlantic and Pacific seaboards, three near the Gulf of Mexico, three interior ports, and four on the northern border.
- 11 Name the different routes (by rail or water) by which merchandise may ordinarily be transported from New York to San Francisco.

12. Name the principal European, Asiatic, and South American ports from which merchandise is ordinarily exported to the United States.

13. By what routes can merchandise be sent from New York to Calcutta?

14. What form of government of the United States was first adopted during the Revolutionary war, and when and by whom was the present Constitution adopted?

15. In case of the death of both the President and Vice-President of the United States who (in the order of succession) would succeed to the Presidency and under

what conditions? 16. Which of the Presidents served a portion of one term, which served one full,

term, and which served more than one term?

17. How many amendments have been made to the Constitution of the United States, and which amendment prohibits slavery?

18. What waters form a portion of the boundary line between the United States

and the Dominion of Canada?

19. When and by what authority were the tariff laws of the United States last

revised?

20. In traveling from New York City to San Francisco, Cal., via the New York Central and Hudson River Railroad, the Lake Shore and Michigan Southern Railroad, the Chicago, Burlington and Quincy Railroad, the Union Pacific Railroad, and the Central Pacific Railroad, what States, Territories, important rivers, and mountain ranges would you cross? (Or you may select your route from New York to Chicago or to St. Louis, and thence to San Francisco.)

> LEGATION OF THE UNITED STATES Bogota, May 5, 1890.

SIR: In accordance with the instructions from the State Department, under date of December 18, 1889, I have the honor to submit the following report as to the gold and silver coinage and products of this Republic for the year 1889.

### Answers to interrogatories, 1889.

(1) No gold was coined or recoined during the year.

(2) Silver half-dollars, .835 fine, were coined and recoined in the mint at Bogota to the amount of \$65,156.50, but the amount of recoinage is not known.

Silver half-dollars, .500 fine, were coined in the mint at Medellin to the amount of \$150,980, and there was no recoinage.

#### (3) GOLD.

* .	Description.		Imports.	Exports
fold coin			Kilogràms.	\$113,40
Gold bullion				363, 37 2, 354, 68
iold and silver bars			<i></i> .	483,08
, , , , , , , , , , , , , , , , , , , ,		1.		3, 437; 92

#### (4) SILVER.

_ Description.	Imports.	Exports.
Silver coin Silver and "bills"	Kilograms. 2, 615	\$139, 117 10, 000
Silver and "bills" Silver bars Silver and platinum Silver, manufactured		643, 747 1, 828 600
Total	2, 615	795, 292

Exports of minerals (ores), \$508,873.

(10) No laws affecting coinage were passed in 1889. I am, sir, your obedient servant,

JOHN T. ABBOTT, Minister.

The DIRECTOR OF THE MINT, Washington, D. C.

^{(5, 6, 7,} and 8) There are no data by which the weight in kilograms and the value of the gold and silver production can be obtained, and the same is true of the amount of gold and silver coin and bullion in the country at the close of 1889.

(9) The amount of Government and bank notes then outstanding was \$12,000,000.

# Ехнівіт 35.

#### SPECIAL DICTATION TO PHONOGRAPHERS OR STENOGRAPHERS.

(Specimen of matter read by the examiner to the candidate. A verbatim copy is exacted before the candidate is given the full credit of 100.

The candidate must also submit his shorthand notes for file with the examination.)

### TEACH THE LITTLE ONES THE FEAR OF GOD.

My Fellow-Citizens: This large assemblage of people from this new and energetic city is very pleasant, and I thank you for the welcome that it implies. All of these evidences of extending industry are extremely pleasing to me as I observe them. They furnish employment to men. They imply comfortable homes, contented families, a safe social organization, and are the strength of the Nation.

I am glad to see that these enterprises that are taking the ores from the earth and adapting them to the uses of civilization have not been started here unaccompanied by that more important work—the work of gathering the children into the schools and instructing them that they in their turn may be useful men and women. [Applause.] I am glad to greet these little ones this morning. It is a cheerful sight. We are soon to lay down the work of life and the responsibilities of citizenship. These mothers are soon to quit the ever-recurring and never-ending work of the home and give it into new hands.

It is of the utmost consequence that these little ones be trained in mind and taught the fear of God and a benevolent regard for their fellow men, in order that their lives and social relations may be peaceful and happy. We are citizens of one country, having one flag and one destiny. We are starting upon a new era of development, and I hope this development is to keep pace and to be the promoting cause of a very perfect unification of our people. [Cheers.]

#### FREE AND FAIR ELECTIONS.

We have a Government whose principles are very simple and very popular. The whole theory of our institutions is that, pursuing those election methods which we have prescribed under the Constitution, every man shall exercise freely the right that the suffrage law confides to him, and that the majority, if it has expressed its will, shall conclude the issue for us all. There is no other foundation. This was the enduring base upon which the fathers of our country placed our institutions. Let us always keep them there. Let us press the debate in our campaigns as to what the law should be; but let us keep faith and submit with the reverence and respect which are due to the law when once lawfully enacted. [Applause.]

The development which is coming to you in these regions of the South is marvel-

The development which is coming to you in these regions of the South is marvelous. In ten years you increased your productions of iron about 300 per cent—nearly a million and a quarter of tons—and you have only begun to open these mines and to put these ores to the process of reduction. Now, I want to leave this thought with you: In the old plantations of the South you got everything from somewhere else; why not make it all yourselves? [Cheers.] (Speech of President Harrison on April 16, 1891, at Tallapoosa, Ga., while on his tour through the South and West.)

#### Ехнівіт 36.

#### COMPETITIVE EXAMINATIONS FOR PROMOTION RESTORED.

Secretary Sherman's rules, dated February 28, 1878, governing examinations for promotions in the Treasury Department.

(1) When in his opinion the public interests demand it, the Secretary of the Treasury will, from time to time, appoint a Board of Examiners composed of three officers of the Department, who will conduct all examinations of applicants for promotion to clerkships of Classes 2, 3, and 4, in the Treasury Department, the examinations to be confined to clerks of the next lower grade in the bureau or office in which the vacancies exist, unless specially extended to other persons or grades, and the appointment to be made by selection from the three persons who shall have passed the highest examination with clerks of their grade.

(2) Whenever the Secretary of the Treasury shall notify the Board of Examiners that a vacancy, which he desires to fill, exists in a clerkship of Class 2, 3, or 4 in the Department, the Board will fix a time for holding an examination for the purpose, and, at least ten days before the examination is to take place, will cause a notice to be posted in a conspicuous place in the Department, stating the grade and office in which the vacancy exists, the date of the examination, and that the vacancy is to be filled by a competitive written examination of applicants from the next lower

grade in the office, if any such applicants shall be found competent.

(3) The examinations will be upon the general subjects fixed for examinations for clerkships of class 1, subject to such modifications as the Board of Examiners may deem proper, and upon such other subjects as the nature of the business of the office in which the vacancy exists and of the position to be filled may seem to the Board

to require.

(4) To each subject of the examination a relative weight, according to its importance in the examination, will be assigned. The degree of accuracy with which the marks in each subject will next be ascertained. Each average will then be multiplied by the number indicating the relative weight of the subject, and the sum of the products will be divided by the sum of the relative weights; the quotient will

determine the candidate's standing on a scale of 100.

(5) The Board of Examiners will prepare a list of the persons examined in the order of excellence, as proved by the examination, beginning with the highest, and will certify the same, with the rating of each candidate, to the Secretary of the Treasury. A book showing the standing of all the competitors in each examination

shall be open to the inspection of each person examined therein.

(6) Promotions will be made from the three of those standing highest on the list in the order of excellence, but no person shall be promoted who shall have failed to pass a minimum standard of 70 per cent. in the examination.

(7) If no candidates from the next lower grade shall be found competent, the

vacancy will be thrown open to the competition of such other persons as the Secre-

tary may direct.

(8) All vacancies occurring in any grade in any office within six months after an examination shall have been held to fill a vacancy in that grade will be filled from the certified list of competitors in such examination, with like limits in the order of excellence, unless the Secretary shall direct that another examination be held. JOHN SHERMAN,

Secretary.

FEBRUARY 28, 1878.

Under the above order a few competitive examinations were held in the Treasury Department. The following list of questions is taken from the examination held on July 20, 1880, in the Second Auditor's Office, for promotion to a clerkship of Class 4, in which Mr. Charles C. Snow was the successful competitor:

## **Е**хивіт No. 37.

#### COMPETITIVE EXAMINATIONS UNDER SECRETARY SHERMAN.

# COMPETITIVE EXAMINATION-PROMOTION-JULY 20, 1880.

To fill vacancies in clerkships of Class 4, Office of the Second Auditor.

Please to read the directions at the head of each sheet and carefully comply with

Upon completing each paper, the candidate should sign it and place it upon the examiner's desk.

[Sheet No. 1.—Letter and brief.]

1. Write a letter of about one page, in the space below, addressed to the Secretary of the Treasury, giving your views as to the grounds upon which promotions should be made in the classified departmental service, and stating what, if any, weight should be given to (1) age, (2) length of service, (3) dependent family, (4) war record, (5) amount and accuracy of work done, (6) intellectual attainments, (7) good character, and (8) special talent for a particular kind of work. Sign the letter with your full name, fold it, and indorse upon it a summary or brief of its contents.

This exercise is designed to show your skill in penmanship, and to test your

aptitude for official correspondence.

# [Sheet No. 2.-Notation and numeration.]

Care must be taken to insert the proper points.

Write in figures the following numbers:

Seventy-nine thousand six hundred and one.
One hundred and fifty millions five thousand and one.
Three millions one thousand and two, and decimal two thousand and two hundredthousandths.

Write at length the numbers expressed by the following figures:

10,355,607,305. 75,226.032.

87,317,216.01001.

# [Sheet No. 3.—Addition.]

Add the following columns, and write the answer in large, plain figures immedi ately below each example:

dollars? Give the operation at length.

4. The Secretary of the Treasury, in his monthly report at the close of business June 30, 1880, stated that the public debt bearing interest in coin was as follows: Bonds at 6 per cent, \$235,780,400; bonds at 5 per cent, \$484,864,900; bonds at 44 per cent, \$250,000,000, and bonds at 4 per cent, \$739,347,800. If this principal remains the same from June 30, 1880, to December 18, 1909, what amount of interest would be saved to the United States by funding it into 4 per cent bonds? Simple interest, 30 days to the month, and 360 days to the year. Give the operation at length.

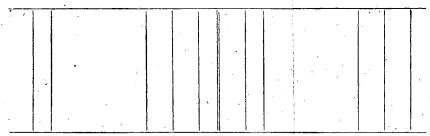

5. The Secretary of the Treasury has surplus gold coin available for reducing the public debt, and enters the market to buy \$5,000,000 in United States bonds on account of the sinking fund. The 6's of 1880 are quoted at 101½; 6's of 1881, at 103½; the funded loan of 1881, at 103½; the funded loan of 1881, at 103½; the funded loan of 1881, at 103½; the funded loan of 1881, at 103½; the funded loan of 1891, at 1097; and the consols of 1907, at 108½. If he buy an equal amount of each kind of security, how much gold will it take if its market quotation be 105? Give the operation at length.

6. The Secretary of the Treasury, in his monthly report at the close of business

6. The Secretary of the Treasury, in his monthly report at the close of business June 30, 1880, stated that the 6 per cent bonds of 1881 outstanding on that date amounted to \$219,459,950. This day, July 14, 1880, the 6 per cents are quoted at 103\frac{2}{3}\$ and the 4 per cent bonds are quoted at 108\frac{1}{3}\$. If the Secretary, under law, could enter the market this day, and sell his 4's and with the proceeds of the sale buy up all the 6's, how much interest would be saved to the Government by June 30, 1881? Give the operation at length.

#### [Sheet No. 9.—Statement of account.]

John Thompson, postmaster at Thompsonville, on the 1st of July, 1881, owed the United States \$175.15; July 9 he received from the Post-Office Department stamps of the value of \$983, with which he was charged; July 16 he collected for the Department a draft for \$890 on the postmaster at Brownsville; August 3, he paid a contractor the amount due him for a quarter's services, less a fine of \$27.50 for neglect of duty, on a route the compensation of which was \$900 per annum; August 7 he paid a draft drawn on nim by the Department for \$489.53; September 30 he paid his own salary for the quarter at the rate of \$1,200 per annum, and the quarterly salaries of four route agents, at the rate of \$900 per annum each. During the quarter he collected \$25.75 on unpaid letters, \$9.80 for postage on newspapers, and \$97.62 for box rents. State his account with the United States in the form below.

[Sheet No. 10.—Questions pertaining to office.]

With this sheet the candidate for promotion will be furnished with a set of questions pertaining to the duties of the division to which he belongs, and which he is required to copy and answer in the space below. Please to number each question so copied precisely as it is numbered in the paper containing the original questions.

No extra copies of this sheet will be furnished. When finished, sign and return it, together with the original questions, to the ex-

aminer. P. S.—Don't forget to copy the questions.

# (Questions by Board of Examiners.)

Q. I. Into how many coördinate branches is the National Government divided? And what powers are vested in each by the Constitution of the United States

Q. II. Into how many Departments is the Executive Branch of the National Government divided? Give the technical name of each, and the lawful designation of Give the technical name of each, and the lawful designation of the head thereof?

Q. III. Into how many Bureaus is the Department of the Treasury divided? Give the lawful designation of each Bureau, and a brief description of the duties assigned to each by law? (Exclude the duties of the Bureau in which you are employed.)

Q. IV. What duties, in detail, are assigned by law and regulations to the Bureau

in which you are employed?

# (Questions by the Chief of the Bureau-the Second Auditor.)

Q. I. When was the office of the Second Auditor organized?

Q. II. How many divisions and subdivisions are there in the office of the Second

Auditor, and what duties are assigned to each?

Q. III. Are all officers, whose accounts are settled by the Second Auditor, required to give bonds? If not, state who are and who are not. State also who is the legal custodian of such bonds.

Q. IV. By whom and under what circumstances can claims and accounts that have been settled by the Second Auditor, and confirmed by the Second Comptroller, be reopened?

# (Questions by Chief of the Indian Division.)

Q. I. An Indian agent was appointed for four years from July 1, 1879. He filed official bond as follows: One on July 1, 1879; one on December 3, 1879; and one on May 1, 1880. How should his accounts be rendered and stated with regard to said bonds, and what effect have the second and third bonds?

Q. II. An Indian agent received \$100 on account of sale of subsistence stores to employes, and \$50 on account of sale of office furniture. What disposition should he make of the money? and how will he be charged and credited on the books of

this office?

Q. III. How long, and under what conditions, can an Indian agent be absent from

his agency, and not forfeit his salary?

Q. IV. Can treaties be concluded between the United States and Indian tribes? Why can they, or why can they not?

#### [Sheet No. 11.—Orthography.]

Write out all of the following words, and correct the spelling of such of them as

are incorrectly spelled:

Millitary, refered, difference, surjon, accountible, oppertunity, ballance, illustrate, preceeded, annually, importence, adequate, comutation, exibit, disburseing, entrys, incurred, untill, arsinals, opperations, acuracy, recomend, fulfil, pursuant, comissary.

#### [Sheet No. 12.—Syntax and punctuation.]

Copy the following letter, correcting errors in syntax, and inserting the proper punctuation marks, but not changing the words or their order, except so far as may be necessary to correct the false syntax:

> TREASURY DEPARTMENT. SECRETARY'S OFFICE, . 188 .

DEAR SIR: I have received your letters of the 1st and 2d instants.

In reply to your inquiries you are informed that, as the number of clerkships have been greatly reduced by the recent act of Congress, the chances for admission are not as great as formerly; that of the two first grades of clerks to whom you refer the last receive the lowest salary; that it is through this grade only that candidates can, under the Civil Service Rules, be admitted to clerkships in any of the Departments, and that no one will then be admitted unless they pass a satisfactory exami-

The first appointment is for six months, during which the character and capacity of the clerk is tested, and, if found satisfactory in this respect, they are given a per-

manent appointment.

The memoranda enclosed by you is not pertinent. As neither the Treasurer or Assistant Treasurer are present, I am unable to give you their views on the question; nor can the Secretary's opinion be obtained for the same reason.

Very respectfully, your obedient servant,

James Smith Esq., Beltsville, Tennessee.

[Examination No. 1443. July 20, 1880.]

# COMPETITIVE EXAMINATIONS UNDER PRESIDENT GRANT'S CIVIL-SERVICE COMMISSION.

# EXHIBIT No. 38.

### SPECIMENS OF EXAMINATION PAPERS FOR COMPETITIVE EXAMINATIONS FOR PROMOTION IN THE TREASURY DEPARTMENT.

Examination No. 30-Promotion-February 7, 1873-To fill vacancies in clerkships of classes two, three, and four, office of the Comptroller of the Currency.

[Please to read the directions at the head of each sheet and carefully comply with them.]

Upon completing the answers to the questions, the candidate should note on the paper the exact time that he has been engaged upon it and place it upon the examiner's desk.

The answers must be given immediately under the questions to which they pertain.

- 1. Name and address.
- 2. Residence.
- 3. Place of birth.
  4. Date of birth.
- State briefly as to your education.
- 6. What experience in business or profession?
- 7. What experience as a clerk?
- 8. State in what division of the office you are now employed, and the character of the duties you perform.

### ARITHMETICAL.

9. Write in figures the following numbers:

Seven hundred thousand and three.

Three hundred and twenty-one millions one thousand and six.

Twenty-three millions and twenty-one, and decimal twenty-three ten-thousandths.

10. Write at length the numbers expressed by the following figures: 907,263.
300,001,001.
476,021.0012.
27,300,021.01003.

11. Add the following columns of figures, and give each answer immediately under the column to which it pertains.

37, 640, 787, 95		37, 640, 787. 95

Show the operation at length in each case.
12. The following is a statement of the resources and liabilities of a national bank in the city of New York:

Loans and discounts		Capital stock	\$5, 000, 000. 00
Overdrafts	1, 700, 000. 00	Surplus fund	
U. S. bonds to secure deposits U. S. bonds and securities on hand.		Undivided profits	241, 903. 72
Other stocks, bonds, and mortgages.	1	National-bank notes outstanding State-bank notes outstanding	971, 165. 00 9, 418. 00
Due from redeeming agents Due from other national banks	115, 659. 90	Dividends unpaid	12, 572. 00
Due from State banks and bankers. Real estate, furniture, and fixtures.	300, 000, 00	Individual deposits	5, 136, 756. 53
Current expenses Premiums paid		U. S. deposits	
Checks and other cash items Exchanges for clearing-house		Due to national banks	
Bills of other national banks Fractional currency	83, 010. 00	Due to State banks and bankers	
Specie	223, 957. 09	Notes and bills rediscounted Bills payable	
Three per cent certificates	260, 000. 00	Dins payable	
Total	14, 212, 792. 76	Total	14, 212, 792. 76

Compute the lawful-money reserve which it should have on hand; state whether its reserve is more or less than the lawful amount, and give the amount of the excess or deficiency.

13. On December 16, 1871, the total amount of specie, legal tenders, three per cent certificates, and clearing-house certificates (being the only cash funds available for their reserves) held by the national banks of the United States was \$140,273,524. The total liabilities to be protected by their reserves were as follows:

Of the country banks. Of the banks in the city of New York. . . Of the banks in other cities of redemption ..... 248, 430, 418

What was the percentage of the total cash reserve on the total liabilities? (Give the answer in words.)

14. The Treasurer sells for the Interior Department, certain Southern State bonds at 76½, and purchases with the proceeds exactly \$24,500 in five-twenty bonds at a premium of 14½. What was the face value of the bonds sold?

15. Semiannual duty is levied on national banks on their average circulation, deposits, and capital (in excess of the United States bonds), for each six months, as follows: On circulation, ½ of one per cent, and on deposits and capital, ½ of one per cent each. The total amount of duty paid by national banks on these items for the six months preceding January 1, 1872, was as follows: On circulation, \$1,575,442.28; on deposits, \$1,549,015.27; on capital in excess of United States bonds, \$191,588.05. What were the average circulation, deposits, and capital (in excess of United States bonds) of the national banks for that period?

16. What rate percent is required to make \$10,050 gain \$682.00 ½ interest in 11

months and 19 days, reckoning 360 days to the year?

#### ORTHOGRAPHY AND PUNCTUATION.

17. Copy the following passage clearly and legibly, correcting mistakes of spelling and punctuation, but not otherwise altering either the words or their order:

Let us I say asume this and a problem the most interesting presents itself to us namely how shuld we or whoever else might in that event have bin living in england have supplyed the abscence of these words. what would englishmen have dun if the langwidge had never recieved these addishuns, it would be a slite and a shallow anser. In fact no anser at awl to reply we shuld hav dun without them; we could not have dun without them the words which we thus poses and which it is sugested we might have dun without; expres a mulltitude of facts thawts feelings concepshuns which rising up before a peple growing in civillisation in noledge. In lerning in intercourse with other lands in conciousness of its own vocation in this world must find uterance by one means or another.

#### SYNTAX.

18. Copy the following sentences, and correct such as contain errors in syntax: Every member of the company but he were present.

We lay down our burdens and then laid down ourselves.

Leave the papers lay where I have lain them.

The defaulters had flown before their guilt was discovered.

The difference between he and me is not very great.

Jay Cooke's and Companies bank is not organized under the national currency act.

There have been several financial crisises in this country.

The person with whom money is deposited is called a depositary, but the place in which it is deposited is called a depository.

Discount is quite a different thing than premium.

# LETTER AND BRIEF.

19. Answer the following inquiries scriatim, in the form and style of a letter to the Secretary of the Treasury, and fold and brief your reply:

TREASURY DEPARTMENT, February 6, 1872.

SIR: I will thank you to furnish me with answers to the following inquiries, for the information of a committee of Congress:

1. Into what divisions is the Currency Bureau divided?

2. What papers are required in the organization of a national bank?

3. What reports are national banks required to render to the Comptroller of the Currency 9

4. What is the mode of issuing circulating-notes to a national bank?

5. What is the mode of retiring worn out and mutilated national currency? Very respectfully,

GEO. S. BOUTWELL, Secretary of the Treasury.

Hon. JOHN J. KNOX. Comptroller of the Currency.

#### NATIONAL-CURRENCY ACT.

20. How is the national currency secured?

21. What amount may now be issued?
22. What is meant by the term "United States bonds," as used in the nationalcurrency act?

23. What proportion of the capital stock of a national bank must be paid in before it can commence business, and in what manner must the remainder be paid?

24. Of what kinds of funds may the lawful money reserve of a bank consist? 25. How large an amount may a national bank with a capital of \$150,000 and a surplus of \$10,000 lend to any one person?

26. What is meant by the term "cities of redemption?"

27. What proportion of its net profits must a national bank carry to its surplus fund, and when does the obligation to add to the surplus fund cease?

#### ACCOUNTS.

28. The following were the resources and liabilities of a national bank October 3, 1871: Due to national banks, \$317.90; bills of other national banks, \$2,445; individual deposits, \$105,475.06; loans and discounts, \$196,810.98; due from redeeming agents, \$17,902.22; fractional currency, \$433.24; due to State banks and bankers, \$555.48; legal-tender notes, \$37,459; United States bonds to secure circulation, \$102,500; due from other national banks, \$4,045.44; capital stock, \$100,000; premiums paid, \$556.43; undivided profits, \$12,312.29; current expenses, \$2,260.05; due from State banks and bankers, \$10,248.37; national-bank notes outstanding, \$90,500; real estate, furniture, and fixtures, \$3,500; and surplus fund, \$63,000.

Make a balanced statement of the same in the frame beneath.

# HISTORY, GOVERNMENT, AND GEOGRAPHY.

29. Give the names of the Secretaries of the Treasury since March 4, 1861.

30. In what year was the office of Comptroller of the Currency created?

31. During whose administration was Texas admitted into the Union?
32. To whom is the power to coin money delegated, and to whom denied, by the Constitution ?

33. How only can money be constitutionally drawn from the Treasury?

34. Mention the State or Territory in which each of the following towns is situated: Tucson, Santa Fe, Olympia, Charleston, Carson City, Boise City, and Denver.

35. Where is the island of San Juan, and to what nation does it belong?

36. The Government contract with Adams Express Company does not extend westward beyond Omaha and Nebraska City, in Nebraska, and Atchison and Leavenworth, in Kansas. Which of the following places are within, and which without, the territory covered by the contract: Detroit, Denver, Kansas City, Salt Lake City, Saint Paul, Santa Fe, and New Orleans?

Examination No. 55—Promotion—August 7, 1873, to fill a vacancy in the position of principal bookkeeper, office of the Treasurer of the United States.

Please to read the directions at the head of each sheet and carefully comply with them.

PRELIMINARY.

Upon completing the answers to the questions, the candidate should note on the paper the exact time that he has been engaged upon it and place it upon the examiner's desk.

The answers must be given immediately under the questions to which they pertain. [The first seven questions are the same as in the examination for admission.]

### ARITHMETICAL.

Show the operation at length in each case.

8. The true value of the £ sterling is \$4.8665 in American gold coin, but it is computed in drawing exchange at 4.445, the difference between the nominal and the real value being charged as premium. What is the real premium on exchange on London when the nominal premium is 10½ per cent, and what amount in United States currency is required to purchase a bill of exchange on that city for £400 at that rate when the premium on gold is 154?

9. The standard gold and silver coins of the United States contain 9 parts of pure metal and 1 part of alloy (the latter being considered worthless for the purposes of this calculation). The weight of the United States eagle is .5375 ounces Troy. The value of a given weight of pure gold is 15.6 times that of an equal weight of pure silver. What is the value in United States gold coin of a Troy ounce of pure silver?

### TREASURY SYSTEM OF ACCOUNTS.

10. What are the functions of the Secretary, the Treasurer, the Register, the Audi-

tors (collectively), and the Comptrollers (collectively), in the settlement of accounts ?

11. Give the titles of the several Auditors, and state what classes of accounts are settled by each of them.

12. How many Comptrollers are there, and what are the functions of each?
13. What is the Treasurer's general account?
14. How often, and by whom, is it settled?

15. To what credits is the Treasurer entitled in its settlement, and by what vouchers must they be supported?

16. With what is he charged, and on what are the charges based?

17. What is meant by the term "covering money into one recovery.

18. Explain the difference between an original receipt and a repayment. What is meant by the term "covering money into the Treasury?"

19. On what authority are counter entries made in the Treasurer's general account?

20. Can receipts which have been "covered in" be counter-entered?

21. Explain the difference between "receipts" and "transfers."

22. Is money received on account of new fractional currency a "receipt" or a "transfer?" Why?

23. What is the purpose of the Treasurer's transfer account?
24. By whom is it settled?

25. Are the balances of the transfer account included in the balances of the general account? Why?

26. How does the Treasurer obtain credit for the payments made by transfer checks? 27. If the Treasurer issues a transfer check in redemption of \$100,000 in legal-

tender notes, on what evidence does he obtain credit for the payment?

28. A national-bank depositary deposits \$50,000 to the credit of the Treasurer's currency transfer account with the assistant treasurer of the United States in New York, and receives from the treasurer a transfer order for a like amount on the assistant treasurer of the United States in St. Louis, Mo. What entries should be made in the Treasurer's general and transfer accounts at Washington?

29. By whom is the Treasurer's account of receipts and expenditures for the serv-

ive of the Post-Office Department settled?

30. How is money advanced to disbursing officers?

31. Are funds to the credit of disbursing officers included in the Treasurer's bal-

32. What is the outstanding liabilities account?
33. To whose credit are deposits on that account placed on the Register's books? 34. When bonds of one loan are converted into those of another, what entries are made in the Treasurer's general account?

### ACCOUNTS.

35. On April 30, 1873, there was due the "general Treasury of the United States" \$108, 149,042.52. The Treasurer United States, Washington, over \$21,366,191.02; the assistant treasurer United States, New York, owed \$45,194,463.65; the assistant treasurer, Boston, owed \$6,500,823.77; the assistant treasurer, Philadelphia, owed \$9,159,-645.59; the assistant treasurer, Saint Louis, owed \$780,153.41; the assistant treasurer, San Francisco, owed \$3,521,698.95; there was due the assistant treasurer, Charleston, \$13,794.15; the assistant treasurer, New Orleans, owed \$1,373,306.97; the assistant treasurer, Baltimore, owed \$2,093,707.19; the United States depositary at Cincinnati owed \$1,404,220.45; the United States depositary, Chicago, owed \$389,742.12; there was due the depositary, Louisville, \$7,890.89; the depositary, Buffalo, owed \$125,692.03; the depositary, Pittsburg, owed \$232,008.81; the depositary, Mobile, owed \$146,870.08; the depositary, Tucson, owed \$28,157.19; there was due the depositary, Santa Fe, \$38,636.86; United States mints owed \$8,654,347.84; national banks owed \$7,237,558.49; and suspense account owed \$776.86.

Required, a trial balance from the above.

#### BOOKKEEPING.

36. What are the distinctive features of bookkeeping by double entry? 37. What books are required, and what are the functions of each? 38. What is meant by "journalizing" a daybook entry?

39. William Sample bought, September 3, 1871, of D. Morgan & Co., two cases prints:

No. 1. 4 pieces, 120 yards, at 8 cents;
20 " 600 " at 10 cents;

66 " 400 No. 2. 10 at 15 cents;

" " 15 580 at 20 cents:

for which he paid one-half in cash, one-fourth in a note of D. Morgan & Co., and the remainder on account.

Required, the journal entry on the books of William Sample.

40. James French bought of Samuel Burch & Co., July 5, 1872, 10 barrels flour, at \$14.50 per barrel, for which he paid one-third in general merchandise, one-third in his note at 60 days, and the remainder in a debt against George Brown, which Burch & Co. agreed to accept without recourse.

Required, the journal entry on the books of James French.

41. The collector of customs at New York deposits, July 1, 1873, with the assistant treasurer of the United States in that city, \$10,000 coin.

A collector of internal revenue also deposits \$10,000 in currency. Required, the journal entry of the above on the books of the Treasurer of the United States.

42. July 2, 1873, the Treasurer of the United States draws drafts on the assistant treasurer, New York, in payment of Government indebtedness, amounting to \$250. It is found that of the \$10,000 received from the collector of customs July 1, \$1,000

was paid in error, and is, therefore, by direction of the Secretary, to be returned. Required, the journal-entry of the above on the books of the Treasurer United States. 43. On July 5, 1873, the assistant treasurer United States, Baltimore, receives-

From assistant treasurer United States, New York, \$50,000 coin certificates. From Third National Bank, Baltimore, \$25,000 as a transfer of funds.

From sale of internal-revenue stamps, \$5,000.

From Capt. John Hunter, paymaster, U. S. A., \$12,000 as a repayment of money heretofore advanced to said Hunter.

From Treasurer United States, for collection and credit of his account, check of the Second National Bank of Baltimore, on itself, in payment of semiannual duty, \$800. From First National Bank, Frederick, Md., its check on Central National Bank,

Baltimore, \$325, in payment of semiannual duty.

Required, the journal entry on the books of the Treasurer United States, Wash-

44. On July 3, 1873, the United States depositary at Chicago transmits— To assistant treasurer, New York, \$10,000 redeemed coin certificates, \$5,000 worn and mutilated United States notes, and \$1,000 mutilated fractional currency, which latter proves to be but \$998.

To the United States mint, Philadelphia, \$8,000, gold coin, for recoinage, which the mint finds to be worth but \$7,996, the Government sustaining the loss.

Required, the journal entry on the books of the United States depositary at Chicago, and the corresponding entry on the books of the Treasurer United States.

#### SYNTAX.

The exercises are not all incorrect.

45. Copy the following sentences, and correct such as contain errors in syntax:

The legal-tender act become a law in 1862.

Him, who the money was intrusted to, should be held accountable. The wisdom of these measures has been established.

He writes more rapidly than me, but my writing is the most legible. Neither national-bank notes or fractional currency are a legal tender.

The Secretary, with the Register and the Treasurer, were present. The principal bookkeeper learned him how to keep the account.

Coin, and not legal-tender notes, is receivable in payment of duties on imports. There has been five Secretary's of the Treasury since 1861.

The two first Presidents were Washington and Adams.

### ORTHOGRAPHY AND PUNCTUATION.

46. Copy the following passage clearly and legibly, correcting mistakes of spelling and punctuation, but not otherwise altering either the words or their order:

the opperrations of the treasury have reeched unpresadented magnatude these are conducted under the direcsion of the secratary by the tresurer, the assistent tresurers and the dessignated depositorys by whom monies which go into or out of the nashunal treasury are recieved and disburced the labor cair and anxiaty insidant to the borrowing recieveing and paying of the sums nessasary to meat the det becomeing dew duering the year or in other words the makeing and aplying of the lones nessasary to the renewing of matureing lones embraise transackshuns offen complex and nessasarilly multatudenous which reeched duering the year an agragate of more than a hundred and eighty one millions of dollers the responsabilaty and labor of the whole money opperrations of the government may be inferred from this staitment consurning a compareitivly small part.

### LETTER AND BRIEF.

47. Answer the following letter, and fold and brief your reply:

TREASURY DEPARTMENT, August 6, 1873.

SIR: I will thank you to furnish me with answers to the following inquiries, to be used in my forthcoming annual report:

What are the duties of the Treasurer of the United States as defined by law?
 Name the divisions of his office, and briefly describe the duties of each.

3. What duties are paid to the Treasurer by national banks?

4. On what terms are new legal-tender notes and fractional currency furnished to private parties? 5. If coupons which matured after the cessation of interest on a "called bond" are

lacking, what course is pursued in redeeming the bond?
6. In what cases are notes of which less than one-half is presented redeemed in

- 7. What are the requirements of law in regard to powers of attorney for the collection of drafts issued in payment of claims upon the United States?

Very respectfully,

Bank vetoed?

.WM. A. RICHARDSON Secretary of the Treasury.

Hon. F. E. SPINNER, Treasurer of the United States.

#### HISTORY.

48. Name the Presidents of the United States in their order.

49. Give the date of the act creating the Independent Treasury. 50. Why is the system established by that act sometimes called the Independent

Treasury and sometimes the Sub-Treasury? 51. By what Presidents were the acts renewing the charter of the United States

#### GOVERNMENT.

52. May the States lay duties on imports?

53. How only can capitation or other direct taxes be laid?

54. Describe the mode of electing the President.

#### GEOGRAPHY.

55. Name the States and Territories, distinguishing the former as Eastern, Middle, Southern, Western, and Pacific.

Examination No. 29—Promotion—To fill vacancies in clerkships of classes two, three, and four in the office of the Treasurer of the United States, on February 7, 1873.

### PRELIMINARY.

Upon completing the answers to the questions, the candidate should note on the paper the exact time he has been engaged upon it and place it upon the examiner's

The answers must be given immediately under the questions to which they pertain. The questions from one to seven, inclusive, are the same as in the examination for admission. See No. 30.1

8. State in what division of the office you are now employed, and the character of the duties you perform.

#### ARITHMETICAL.

9. Write in figures the following numbers: Seven hundred thousand and three. Three hundred and twenty-one millions one thousand and six.

FI 92-64

Twenty-three millions and twenty-one, and decimal twenty-three ten-thousandths. 10. Write at length the numbers expressed by following figures:

907,263.

300,001,001. 476,021.0012.

27,300,021.01003.

11. Add the following columns of figures:

(The columns of figures are about the same as in the examination for admission.

See No. 30.)

12. Semiannual duty is levied on national banks on their average circulation, deposits, and capital (in excess of United States bonds), for each six months, as follows: On circulation, \(\frac{1}{2}\) of 1 per cent, and on deposits and capital, \(\frac{1}{2}\) of 1 per cent each. The total amount of duty paid by national banks on these items for the six months preceding January 1, 1872, was as follows: On circulation, \$1,575,442.28; on deposits, \$1,549,015.27; on capital in excess of United States bonds, \$191,588.05. What were the average circulation, deposits, and capital (in excess of United States bonds) of the national banks for that period?

13. The rate paid by the Treasury Department for the transportation of gold coin under the Government contract with the Adams Express Company is one-quarter of a cent a mile for each \$1,000 for distances over 500 miles. The rate paid for the transportation of silver coin is twice that paid for the transportation of gold. What would be the cost of transporting \$433,000 in gold coin and \$87,000 in silver coin from

New Orleans to New York, the distance being 1,492 miles?

14. The rate established by the Postmaster-General for the transmission of telegraphic dispatches for the Government is one cent a word for each circuit of 250 miles, any fraction of a circuit in excess being considered as a whole circuit, and a dispatch any fraction of a circuit in excess being considered as a whole choice, and a disparred of less than 25 words being reckoned as 25 words. What would be the amount of the bill of the Western Union Telegraph Company for the following dispatches: Treasurer United States to Assistant Treasurer United States, San Francisco, 83 words, 3,251 miles; Depositary, Louisville, to Treasurer, 18 words, 747 miles; Treasurer United States to First National Bank, Omaha, 56 words, 1,356 miles; and Assistant Treasurer New York to Treasurer, 26 words, 232 miles? Treasurer, New York, to Treasurer, 26 words, 232 miles ?

15. The United States gold double-eagle has a weight of 516 grains troy, and the smaller gold coins proportionate weights according to their value. A pound avoirdupois is equivalent to 7,000 grains troy. What is the avoirdupois weight of 100,000 double-eagles, 25,000 eagles, 10,000 half-eagles, 4,000 quarter-eagles, and 1,983 gold

dollars?

16. The consul of the United States at Mazatlan, Mexico, being indebted to the United States \$308.56, on account of surplus fees, forwards to the Treasury a bill of exchange on a Mexican bank for that amount, to cash which the Department is obliged to pay \(\frac{2}{3}\) per cent on its face. How much does he still owe the United States, and for what amount should the bill have been drawn in order to net the Govern-

ment the amount due?

17. The Treasurer sells for the Interior Department certain Southern State bonds at 761, and purchases with the proceeds exactly \$24,500 in five-twenty bonds at a

premium of 143. What is the face value of the bonds sold?

### ORTHOGRAPHY AND PUNCTUATION.

18. Copy the following passage clearly and legibly, correcting mistakes of spelling and punctuation, but not otherwise altering either the words or their order (the same as that used in No. 30):

### SYNTAX.

19. Copy the following sentences, and correct such as contain errors in syntax (the same as that used in No. 30):

Jay Cooke's and Companies bank is not organized under the national-currency act.

There have been several financial crisises in this country.

The person with whom money is deposited is called depositary, but the place in which it is deposited is called a depository.

Discount is quite a different thing than premium.

#### LETTER AND BRIEF.

20. Answer the following letter, and fold and brief your reply:

OLYMPIA, W. T., January 25, 1873.

SIR: Being about to engage in the banking business at this place, I am desirous of obtaining information on the points mentioned below. Will you, therefore, be so kind as to answer the following inquiries in a concise and explicit form?

1. What is the difference between an advance warrant and a settlement warrant, and between an ordinary covering warrant and a repay covering warrant?

2. With what officers and others may deposits be made to the credit of the Treasurer

of the United States?

3. In what cases is mutilated currency of the United States subject to "discount?" What amount would be paid at the Treasury for five-eighths of a \$10 United States

4. Is fractional currency a legal tender? By whom and in what amounts is it ex-

changeable for United States notes?

5. On what terms is new fractional currency furnished to banks and private individuals?

6. By whom and on what terms are the notes of national banks which have failed or have gone into voluntary liquidation redeemable?

7. What is the mode of paying interest on registered stock of the funded loan of

8. What is meant by the term "called bonds?" What kinds of bonds may be

"called," and by whom, in what manner, and under what authority?

9. For what purposes are United States bonds deposited with the Treasurer in trust for national banks? Do bonds so deposited afford any security to individual depositors with national banks?

10. Within what periods must national banks make their returns of semiannual duty to the Treasurer, and what is the penalty for failing to make return within

the prescribed time? Very respectfully, yours,

Adam Smith.

Hon. F. E. SPINNER, Treasurer United States.

#### ACCOUNTS.

21. The Treasurer transmits to the Assistant Treasurer United States, New York, on behalf of the Interior Department, \$1,650 in 5-20 U. S. bonds, \$750 in 10-40 U. S. bonds, a check for \$360 in gold, and one for \$713 in currency, with instructions to dispose of the same and to purchase \$2,000 in bonds of the funded loan of 1881, and \$1,000 in U. S. Pacific Railway bonds, for the benefit of certain Indian trust funds. The Assistant Treasurer sells the 5-20's for 115, the 10-40's for 115, and the gold for 114, and pays 116 for the bonds of 1881, and 114 for the Pacific Railway bonds, paying a broker's charge of \(\frac{1}{2}\) per cent on the proceeds of the gold and bonds sold, and on the face value of the bonds bought, and depositing the remainder to the credit of the Treasurer's transfer account. State the Treasurer's account with the Assistant Treasurer for the transaction on the frame beneath.

### HISTORY.

22. What is the "Independent Treasury system," and why is it so called? 23. What was the date of the approval of the "legal-tender act," and why is the act so called?

24. Give the names of the Secretaries of the Treasury since March 4, 1861.

### GOVERNMENT.

25. Describe, in the briefest and most general terms, the functions of the Auditors, the Comptrollers, the Register, the Secretary of the Treasury, and the Treasurer in the settlement and payment of accounts.

26. To whom is the power to coin money delegated, and to whom denied by the

Constitution

27. How only can money be constitutionally drawn from the Treasury?

### GEOGRAPHY.

28. Mention the State or Territory in which each of the following towns is situated: Tucson, Santa Fe, Olympia, Charleston, Carson City, Boise City, and Denver. 29. Where is the island of San Juan, and to what nation does it belong?

30. The Government contract with Adams Express Company does not extend westward beyond Omaha and Nebraska City in Nebraska, and Atchison and Leavenworth in Kansas. Which of the following places are within, and which without, the territory covered by the contract: Detroit, Denver, Kansas City, Salt Lake City, St. Paul, Santa Fe, and New Orleans?

Examination No. 12-Promotion-To fill a vacancy in the position of Deputy Comptroller of the Currency, August 2, 1872.

# PRELIMINARY.

Upon completing the answers to the questions, the candidate should note on the paper the exact time he has been engaged upon it and place it upon the examiner's desk.

The answers must be given immediately under the questions to which they pertain. (The questions from I to 6 inclusive, are the same as in the examination for admission. See No. 30.)

7. State in what division of the office you are now employed, and the character of the duties you perform.

#### ACCOUNTS. .

8. The following were the resources and liabilities of all the national banks in the United States on October 2, 1871. Make a balanced statement of the same in the frame beneath:

Bills payable, \$4,528,191.12; specie, \$13,252,998.17; premiums paid, \$5,500,890.17; dividends unpaid, \$4,540,194.61; notes and bills rediscounted, \$3,964,552.57; three per cent certificates, \$27,502,069.81; loans and discounts, \$831,552,210.00; undivided profits, \$42,008,714.38; current expenses, \$6,153,370.29; capital stock, \$458,255,696.00; individual deposits, \$600,868,486.55; real estate, furniture, and fixtures, \$30,089,783.85; legal tenders and fractional currency, \$109,083,150.98; surplus fund, \$101,112,671.91; United States deposits, \$20,511,935.98; United States bonds to secure circulation, \$364,475,800.00; due to national banks, \$131,730,713.04; due from redeeming agents, \$86,878,608.84; United States bonds to secure deposits, \$28,087,500.00; checks and other cash items, \$14,058,268.86; United States bonds and securities on hand, \$17,753,650.00; due to State banks and bankers, \$40,211,911.67; stocks, bonds, and mortgages on hand, \$24,517,059.35; due from national banks, \$43,525,362.05; national bank notes outstanding, \$315,519,117.00; exchanges for clearing-house, \$101,165,854.52; deposits of United States disbursing officers, \$5,393,598.89; bills of national banks, \$14,197,653.00; State bank notes outstanding, \$1,921,056.00; and due from State banks and bankers, \$12,772,669.83.

#### ARITHMETICAL.

9. How much gold, at  $114\frac{1}{8}$ , must be sold to purchase \$213,350 in registered five-twenty bonds of 1862, at  $115\frac{2}{8}$ ?

10. The legal-tender circulation of the United States is \$356,500,000. What is the amount of its depreciation relatively to gold when gold is at a premium of 1418

11.  $\$4,483.43_{10}^{3}$  is the simple interest on \$143,215.25, at 7 per cent per annum, for what time, reckoning 360 days to the year?

12. The population of the United States is about 38,500,000—of the Eastern States, about 3,500,000; of the Middle States, about 8,900,000; of the Southern States, including the District of Columbia, about 9,100,000; and of the Western States and Territories, about 17,000,000. The amount of national currency authorized by law is \$354,000,000. If the apportionment should be made on the basis of population alone,

to how much national-bank circulation would each section be entitled?

13. A bank offers to discount a note of \$101,515.62\frac{1}{2}, payable three months after date, for either 6 per cent bank discount, or 6 to per cent true discount. Which is the better offer, and how much would be saved by accepting it in preference to the

other?

14. The following is a quarterly report of the resources and liabilities of a national bank in Albany, N. Y. Compute the lawful money reserve which it should Compute the lawful money reserve which it should have on hand, and state whether its reserve is more or less than the lawful amount, and give the amount of the excess or deficiency:

Resources.		Liabilities.

# ORTHOGRAPHY, SYNTAX, AND PUNCTUATION.

15. Copy the following and correct the orthography, syntax, and punctuation:

Up to this pint the effects of, a paper curincy is substancially the same wether they are convertable into specei or not, it is wen the metels has been compleatly superceded and drove from cirkulacion that the diference between convertable and inconvertable paper begin to be oppurative. Wen the gold or sylver have all gone from cirkulacion and an equel quantety of paper have taken their place supose that a stil ferther issu is supuraded the same ceries of phenomena recommence prices raise among the rest the price of gold and sylver artikles and they become an object as before to prokur coin in order to convert them into bulyon. There is no longer eny coin in cirkulacion but if the paper curincy are convertable coin may stil be obtaned from the isuers in egschange for notes.

# HISTORY,

16. Who was the first Secretary of the Treasury of the United States?

17. Name the Comptrollers of the Currency in the order of their incumbency.

18. When did the present suspension of specie payments take effect?

19. What was the proceeding known as "the removal of the deposits," and in the administration of what President did it occur?

20. What is the "Independent Treasury" system, why is it so called, and when

did it go into operation?

#### GOVERNMENT.

21. Where must bills for raising the revenue of the United States originate?
22. To whom is the power to coin money delegated and to whom denied by the Constitution?

23. In what way only can money be drawn from the Treasury of the United States under the Constitution?

24. What only, under the Constitution, can the States make a tender in payment of debts?

### GEOGRAPHY.

25. Name the States of the Union, giving the Eastern, the Middle, the Southern, the Western, and the Pacific States separately.

# BANKING, GENERALLY.

26. Mention the distinctive features of the safety fund banking system, and the free banking system of the State of New York, and of the Suffolk bank system of the State of Massachusetts, or, if not familiar with those systems, describe that of any State with which you are acquainted.

27. What are the principal features of the business of a bank of circulation and

deposit?

28. What are the functions of a clearing house for banks? Describe the mode of effecting clearances at the New York clearing house.

#### NATIONAL BANKING SYSTEM.

29. Give the dates of the approval of the national currency acts and principal

30. State concisely the distinctive features of the national banking system.

31. How much national currency was first authorized, how much can now be legally issued and on what security, and by whom and on what principle is it distributed among the several States and Territories?

32. Describe the process of organizing a national bank.

33. How, by whom, and for what period is the Comptroller of the Currency appointed, and how and by whom can he be removed?

34. In payment of what dues and demands is national currency receivable? Is it

legal tender in payment of debts?

35. What is the meaning of the term "lawful money reserve," and what are the requirements of law in regard to it?

36. By what is the rate of interest which a national bank may lawfully charge on

a loan or a discount governed?

37. What reports are national banks required to make to the Comptroller of the Currency. 38. What are the requirements of law in regard to the surplus funds of national

39. What security does the national banking system furnish to the holders of cir-

culating notes of national banks; and what, if any, to their depositors and other creditors? 40. What are the steps which the law requires should precede the appointment of

a receiver of a national bank? 41. For what violations of law is a national bank liable to forfeit its charter.

# PRACTICE OF THE OFFICE.

42. Should "premiums paid" and "expenses" be classed as liabilities or as resources? Why

43. Describe the papers required to be executed in organizing a national bank. 44. Describe the course which you would pursue in making an examination of the condition of a national bank.

# LETTER AND BRIEF.

45. Write a letter to the Secretary of the Treasury, of not less than a page and a half in length, expressing your views concerning the national banking system, and pointing out what, in your opinion, are the advantages and defects of the system, and fold and brief it.

# SUGGESTIONS BY PRESIDENT GRANT'S TREASURY BOARD.

There are eleven papers used in each examination, the subjects of which are as follows: (1) Letter and brief: the candidate is required to write a letter, of about one foolscap page in length, on a given subject, and to fold and brief it. (2) Addition: two exercises in simple addition. (3) Notation and enumeration of whole numbers and decimals: eight exercises. (4) Fractions: eight exercises in the addition, subtraction, multiplication, division, and mutual conversion of common and decimal fractions. (5) Arithmetic: six miscellaneous examples involving common and decimal fractions, percentage, discount, and simple interest. (6) Bookkeeping: a very few elementary questions and an exercise in journalizing. (7) Accounts: the statement of a simple account from items given. (8) Orthography: about twenty examples of false orthography for correction. (9) Syntax: ten or twelve examples of false syntax for correction. tion. (10) Transcribing from a rough draft: a fair and legible copy of a rough draft of a letter is required; and (11) History, geography, and Government of the United States: five general questions upon each.

The first five papers will be given out in the morning at the beginning of the examination, and after their completion the remaining six papers will be given out. Candidates will be permitted to leave the examination room only after they have given up the first five papers, and before they have received the remaining six.

Any candidate who shall attempt to use books or manuscripts, either in the examination-room or elsewhere, during the hours of examination, or who shall copy from the papers of another, or permit his own papers to be copied, or receive or give assistance of any description, will expose himself to the penalty of having his papers

thrown out, at the discretion of the Civil Service Commission.

The examinations for promotion turn very largely on questions pertaining to the duties, practice, and organization of the offices in which the candidates are employed. The weight and scope given to questions of this character by the different boards vary widely, but a general disposition is shown to introduce them whenever it can be done safely and judiciously. Great care is required to prepare questions of a kind which will not give an undue advantage to a portion of the competitors.

For positions requiring special kinds of knowledge the examinations are so shaped as to give a controlling weight, if not the whole weight, to questions which will test the possession of that knowledge. Among these may be mentioned the examination for principal bookkeeper in the office of the Treasury of the United States, which was almost purely technical. The candidates were thoroughly tested in their knowledge of the science of accounts generally and of the peculiar Treasury system of accounts, both by general questions and by practical examples similar to those arising in commercial bookkeeping and in the accounts of the Department. The result of the examination was perfectly satisfactory. This flexibility of the system is one of its greatest merits. It is often urged that, at any rate, the system can not be applied to candidates for positions requiring manual dexterity or quickness of the senses, as for instance experts in the handling of money and the detection of counterfeits. But there is no reason why candidates for such places may not be tested in the examination room, by requiring them to do there the very things they would be required to do in the Departments. The money to be counted, or the coin, mingled with counterfeits to be detected, may be actually placed before them and their relative expertness accurately determined by a practical test.

#### Ехнівіт 39.

# MARKING RULES.

Rules used in marking the examination papers of candidates examined for promotion in the Treasury Department at the present time, December 24, 1892.

The general rules of the Civil Service Commission have been used by the Treasury

board, though more liberality is used here than by the Central Board.

The letter and brief.—In marking this subject attention is given to three principal points, the fold and brief, the form, and the style. If the letter be folded and briefed in accordance with the terms of the circular on official communications issued by the Secretary of the Treasury on March 8, 1890, a credit of 25 is given. If the formal part of the letter, which includes the heading, the address, and the complimentary words at the close, are in accordance with the circular, a credit of 25 is given. If the subject-matter of the letter be grammatically expressed, be respectful in language, and adhere to the subject, a credit of 50 is given. Any deviations from the foregoing essentials are marked according to their gravity. It is possible, therefore, if a candidate adhere rigidly to the rules, for a credit of 100 on this subject to be

Penmanship.—On this subject it is seldom a candidate is marked below 70, and very seldom so high as 90; and any multiple of 5 between these limits is given according to the regularity and the legibility of the exhibit. Should the other papers in an examination each receive a credit of 100, and if the penmanship were acceptable, the board of examiners, as a compliment to the candidate for his worthy efforts, would credit him 100 in penmanship, thus making it possible for a candidate to ob-

tain a general average of 100. Notation and numeration.—It will be observed by a reference to the text-books that there is no uniformity in the rules published for the reading and writing of numbers. The Board of Examiners insists that compound words should be joined with a hyphen; that the separatrix should differ from the comma, so that the whole number and the decimal can be absolutely distinguished, the one from the other; that the whole number and the fraction be not confounded, and when combined as mixed numbers should be expressed so that the words and figures may be readily interchanged; and that all expressions for denominate numbers be correctly translated. When the efforts of the candidate are approved a credit of 100 is given, and a deduction of 10 is made for each and every error.

Addition and subtraction.—When the candidate correctly adds and correctly subtracts a credit of 100 is given, and a deduction of 20 is made for each and every error. In view of the importance of this subject in treasury transactions, the Board of Examiners has insisted on accuracy, which may be attained by care on the part of the can-

didate, and has changed the deductions from 10 to 20.

Miscellaneous arithmetical questions.—In marking solutions of arithmetical problems a credit of 100 is given for correct methods, which produce correct results; and a deduction of 10 is made for each and every error in calculation, and a deduction of from 20 to 60 for errors in principle. The candidate is allowed to do his work in his own way; to select his own rule; and should he give the problem a different construction from that intended by the author, and should the language of the problem justify (when liberally construed) his view, he is given the benefit of the doubt. In solving problems involving computations of interest or discount the candidate may compute by any of the methods in use.

Accounts.—If the heading of an account be omitted a deduction of 25 is made, and a proportionate amount for errors in the heading; for errors in form, a deduction of from 5 to 10 is made; for each omitted item a deduction of 10 is made; for each transfer of items a deduction of from 5 to 10 is made; and for neglecting to take up a balance, or to bring down a balance, a deduction of 10 is made. There is also a deduction for an unclerical exhibit of the statement, according to its gravity.

Grammar.—Each question in grammar, or false syntax, is given 100 when the answer is correct; and deductions are made for errors in each answer in proportion to the When the candidate evades the test entirely, a deducnumber of errors in the test.

tion of 100 is made.

Criticism of a letter.—A credit of 100 is given for a correct translation, or a clean

copy; and a deduction of from 2 to 5 is made for each and every omission.

Orthography. - When errors are made by the candidate in spelling test words a deduction of 5 is made for each and every error; but when the candidate makes errors in the words selected by himself in the other portions of the examination (excluding the criticism of the letter) a deduction of 5 is made for each and every error.

Dictation.—The Board of Examiners now applies this rule for marking dictations:

The examiner, in reading, dictates the entire article, and includes the punctuation marks, capital letters, the paragraphs, the italies, when and how to insert leaders, and the form of the tabular work when used, and in general gives a credit of 100 for perfect work, and deducts from 1 to 5 from each and every deviation from the text, taken as the standard.

Tabulation of Treasury statistics.—When a candidate prepares the table in accordance with the instructions, and carefully fills it with the data before him, gives the table a proper heading, if neatly made, the credit of 100 is given, and from 5 to 10 is de-

ducted for each and every error.

General information.—The Board of Examiners has always marked this subject libererally, giving the candidates much latitude in their construction of questions and in the answers submitted.

Departmental questions.—There has been much liberality in marking these questions, and heavy deductions are made only in the cases where gross errors are found.

Bureau or office questions.—As these questions are prepared in the several bureaus and the answers accompany the questions, a credit of 100 is given only when the candidate's answers are substantially in accord with the standard answers, and dedeductions are proportionate to the errors; and as this should relate to the work upon which the candidate has been engaged during the last year, and as he is supposed to have a technical knowledge of them, all deviations from an answer true in essential particulars are visited with heavy deductions.

Stenography and typewriting.—Examinations in these branches are optional. Speed is not demanded of the candidates, but accuracy is considered essential and is in-

sisted upon. Errors are marked in proportion to their gravity.

Miscellaneous mathematics.—These questions are optional; the branch is selected by the candidate, and as the relative weight given is heavy, compared with other sub-

jects, heavy deductions are made for errors.

Technical questions in office. - As these questions have the greatest relative weight in the examination, and as they are generally given the candidate to help retrieve ground lost on other subjects, the candidate is given 100 for technically correct answers, and heavy deductions are made for deviations from technical accuracy. The head of the office is consulted in all cases of this kind and his judgment determines the value of the answers given.

The foregoing rules apply generally in marking papers of candidates for clerkships of Classes 1 to 4; but for examinations for clerkships for Classes A to E, there is

more liberality exercised in the marking, especially for the low grades.

When a question is of such a nature that the value of the mark is in the discretion of the examiner the candidate is always given the benefit of the doubt.

An effort is always made to make the marks uniform for all examinations of a kind; and it is believed that the tendency is in that direction.

### OFFICIAL COMMUNICATIONS.

Circular of March 8, 1890, providing official communication formulas.

The circular provides that attention is specifically called to the requirements of Department Circular No. 116, of 1887, which are to be carefully complied with, as

"The following instructions, for the information and guidance of all the officials of this Department and the offices under its control, in regard to the size, preparation, initialing, folding, indorsing, referring, superimposing, transmitting, and addressing official communications are hereby promulgated in lieu of those issued May 26, 1881:

"1. The standard letter sheet shall be as nearly as possible 8 by 10 inches in size. The standard legal cap or foolscap shall be as nearly as possible 8 by 12½ inches in

"2. The standard authorities on spelling shall be Webster's Dictionary and the

United States Postal Guide.

"3. Every communication received calling for information shall be answered, unless the sender of it has been otherwise formally notified of its receipt and disposal. "4. Every communication prepared shall be paged, and shall be formulated in the following manner:

The Department or office where written, The place where written, The date when written.

The name of the person or office addressed, The title, if any, of the person addressed, The residence of the person addressed. "Sir (or Madam):

(The subject-matter.)

Respectfully, yours (or submitted),
The signature of the writer, His official title, if any.

"5. No blank sheet shall be attached or filed with any letter, report, or paper."6. There shall be placed on all communications the initials of the principal officer of the division, bureau, or office in which such communications are written.

"7. The initials found on any letter, report, or paper shall be referred to in the

"8. All papers shall be so folded, from the bottom to the top of the page, as to conform as nearly as possible to the standard size, which is 3½ inches in width by 8 nches in length.

"9. The first indorsement upon any communication shall commence 1 inch from the top, writing from the free edge of the fold, and shall be formulated as follows: "The Department or office where the communication was written.

"The place where the communication was written.

"The date when the communication was written.

"The name of the writer.

"Title of the office or officer.

"A brief of the subject-matter, showing all the separate parts and the names of persons and firms referred to. (See next page.)

"10. Indorsements shall be placed in regular sequence or chronological order. "11. The receiving-date stamp or mark of any office, bureau, or division shall be placed immediately following the last indorsement, reference, or stamp, and must

not be superimposed upon it.

"12. A reference shall follow the matter immediately preceding it, but if it be necessary to carry it to the next side of the fold, the word 'over' must be placed at the bottom of the last.

"13. No paper shall be attached in any way for additional indorsement or reference until the whole back of the letter sheet is covered, and then, if necessary, a sheet 31by 8 inches, with a flap for attachment, may be fastened in such manner as not to cover a previous indorsement, reference, or date.

"14. In forwarding reports, accounts, certificates of deposit, or papers of like character, no letter of transmittal shall be sent, unless it contains additional information

or explanation."

# EXHIBIT No. 42.

### THE SOLDIER'S AVERAGE.

In the competitive examinations under the new rules and regulations of the Treasury Department, when the civilian and the soldier have attained the same mark, the complimentary credit given for services in the war of the rebellion on

mark, the complimentary credit given for services in the war of the rebellion on the Union side when the soldier was honorably discharged, would make the relative general averages appear as follows for the averages assumed:

If the civilian attained 1, the soldier would be given 10.

If the civilian attained 12, the soldier would be given 20.

If the civilian attained 23, the soldier would be given 40.

If the civilian attained 34, the soldier would be given 50.

If the civilian attained 56, the soldier would be given 60. If the civilian attained 50, the soldier would be given 60. If the civilian attained 67, the soldier would be given 70. If the civilian attained 78, the soldier would be given 80. If the civilian attained 89, the soldier would be given 90. If the civilian attained 100, the soldier would be given 100.

For the intermediate numbers the different averages would be in like proportion; and would be found by adding 1000 to the sum of the products and then dividing by 110.

Under this plan the soldier when all other things are equal is always ahead and will be given the promotion.
