H. Doc. 9, 59-2-2

REPORT ON THE FINANCES.

Fiscal year 1907.

The revenues of the Government for the current fiscal year are thus estimated upon the basis of existing laws:

From customs From internal revenue From miscellaneous sources. From postal revenues	263 , 000, 000, 00 5 3 , 000, 000, 00
Total estimated revenues	813, 573, 264, 00

The expenditures for the same period are estimated as follows:

For the civil establishment For the military establishment For the naval establishment For the Indian Service For pensions For public works: For interest on the public debt For Postal Service	$102,000,000.00 \\95,000,000.00 \\15,000,000.00 \\138,000,000.00 \\76,000,000.00 \\25,000,000.00 \\$
Total estimated expenditures	, ,
Or a surplus of	58,000,000.00

Fiscal year 1908.

The estimates of appropriations required for the fiscal year 1908, as submitted by the Executive Departments and offices, are as follows:

OPERATIONS OF THE TREASURY.

The net result of the ordinary transactions of the Government for the fiscal year 1906 was a surplus of \$25,669,322.61 as compared with a deficit of \$23,004,228.60 for the preceding year. The interest-bearing public debt was increased \$800, and the debt bearing no interest \$10,165,075.20, caused by net additions of lawful money to the national-bank note redemption fund. The increase of the debt proper was \$10,165,875.20.

The trust funds increased \$52,380,900, and amounted to \$1,044,638,869 at the close of the fiscal year 1906.

Under the provisions of the act of March 14, 1900, \$53,032,400 two per cent consols of 1930 were issued in exchange for bonds of the four per cent loan of 1907 and the three per cent loan of 1908.

The excess of revenues over expenditures and the additions to the national-bank note redemption fund in excess of redemptions advanced the available cash balance to \$180,689,354.82 at the close of the fiscal year, an increase for the year of \$35,211,862.93.

For the first quarter of 1907 the revenues were \$5,871,314.27 in excess of the expenditures, while in the first quarter of 1906 the expenditures were \$9,574,241.56 in excess of the receipts.

The national-bank depositaries were utilized during the fiscal year as a medium through which the excessive accumulation of money in the Treasury was restored to the channels of trade. The balance in banks to the credit of the general fund July 1, 1905, was \$65,084,246.87, against which there was an unpaid call for \$14,659,500. By the end of July this balance became \$52,944,109.68, and remained practically at that figure until the end of February, when additional deposits of public moneys to the amount of \$9,941,000 were apportioned and made in depositary banks in important centers. In the early part of April an unusual stringency in the money market was relieved by the temporary increase of public deposits with depositary banks to facilitate the importation of gold. In the import movement thus assisted more than \$49,000,000 in gold was added to the general stock of that metal in the country. On May 1, public moneys to the amount of \$4,220,000 were placed in depositary banks in the District of Columbia, to avoid a local stringency likely to arise from the collection and deposit in the Treasury of taxes during that month. By these measures the balance in banks to the credit of the general fund on May 5 was \$102,708,123.19, the highest point reached during the fiscal year, after which it was gradually reduced to \$81,101,775.33 by June 30, 1906.

During the first quarter of 1907, additional temporary deposits of public moneys were made in depositary banks to enable them to import gold, which, by October 15, resulted in an addition of \$34,119,000 to the stock of that metal. Also on the 27th of September, owing to the continued accumulation of money in the Treasury in excess of its immediate requirements, \$26,000,000 of the public moneys was apportioned and placed in existing depositary banks, located in 26 of the leading cities of the country, with notice to the banks that it would be called for after February 1, 1907. The balance in banks to the credit of the general fund on October 1 was \$124,088,475.42.

There was an increase of \$186,866,727 in the monetary stock of the country during the last fiscal year. The growth in gold was \$118,050,777, in silver \$5,450,396, and in national-bank notes \$65,392,554, while Treasury notes declined \$2,027,000.

The money in circulation July 1, 1906, amounted to \$2,736,646,628, a per capita circulation of \$32.32. By October 1 the total circulation had increased to \$2,812,133,694, or \$33.08 per capita, 43.6 per cent of this amount being gold.

The Treasury holdings of gold at the close of the last fiscal year was \$807,051,690.30. By October 15 this increased to \$871,893,899.77, the largest amount of the precious metal ever held in the Treasury.

The United States paper currency issued during the fiscal year 1906 amounted to \$629,896,000, and the redemptions were \$577,445,100; gold certificates increased \$42,269,900, silver certificates \$12,208,000, while Treasury notes decreased \$2,027,000. The average cost of each piece of United States paper currency issued and redeemed was 1.571 cents, and the annual cost of maintenance of the currency issued by the National Government averages about one-fifth of 1 per cent of the amount outstanding.

The United States bonds pledged to secure bank circulation amount to \$520,605,210, an increase of \$52,538,270 during the fiscal year. The United States and other bonds held to secure public deposits aggregated \$95,575,725, an increase of \$15,170,775 since June 30, 1905.

SECRETARY OF THE TREASURY.

The redemptions from the reserve fund during the year were as follows: United States notes, \$11,452,195; Treasury notes, \$192,810. The redeemed notes were immediately restored to the general fund in exchange for gold, and the reserve was thus maintained at the amount fixed by law.

The volume of national-bank notes increased \$65,392,554 during the last fiscal year, but, notwithstanding this increase, only \$296,292,885 were presented for redemption as against \$308,298,760 in 1905. The expenses incurred for such redemption were \$250,924.24, which have been assessed on the banks at the rate of \$0.84528 per \$1,000 of notes redeemed.

On March 1, 1900, the paper circulation of the denominations of \$10 and under outstanding was \$720,062,845, and by October 1, 1906, it increased to \$1,087,788,228, an average annual increase of about \$56,000,000. But the needs of business, measured by the appeals made to the Treasury for small notes during the last fiscal year, makes it clear that the supply is not equal to the demand. Under existing law, the National Government provides nearly three-fourths of the paper circulation, but the resources for the issue of small denominations are practically exhausted, and can be adequately enlarged only by legislation.

The receipts of moneys for redemption and exchange during the fiscal year 1906 were \$1,104,449,492, as against \$1,150,625,763 in 1905.

The shipments of silver coin at Government expense for transportation during the fiscal year 1906 were \$41,562,828 in standard silver dollars and \$29,378,631.40 in subsidiary coin. The average rate for transportation was \$2.15 per \$1,000.

The San Francisco earthquake, April 18, 1906, was followed by a fire which destroyed the greater part of the city. The subtreasury was burned, and the treasure in its vaults was buried and for a time was inaccessible. The United States mint, by the vigilance and heroic action of the superintendent and employees, was saved with its \$300,000,000 of coin and bullion.

Contributions for the relief of the stricken city, as well as moneys withdrawn by the banks of San Francisco from their Eastern correspondents, were received at Treasury offices to the amount of \$37,360,344.44, and through the medium of the general fund payments in like amount were made by the mint at San Francisco upon telegraphic advice from the Treasurer of the United States.

The vaults of the subtreasury were opened May 23, 1906. The contents were found intact and uninjured.

NATIONAL BANKS.

From the establishment of the national banking system in 1863 to September 30, 1906, national banking associations to the number of 8,380 were chartered, of which 6,189, with capital of \$841,864,775, are in active operation. During the period in question 448 national banks failed and 1,743 were placed in voluntary liquidation. From statistics compiled by the Comptroller of the Currency it is shown that creditors of insolvent national banks have received, on an average, 78 per cent on their claims.

Over one-third, or 37.2 per cent, of the national banks organized were chartered between March 14, 1900, and September 30, 1906. This rapid increase, an average of nearly 40 banks for each calendar month, was due to the legislation embodied in the act of March 14, 1900, which authorized the incorporation of banks with minimum capital of \$25,000, the issue of circulating notes to the par value of the bonds deposited, and reduced the semiannual tax on circulation from one-half to one-fourth of 1 per cent. The authorized capital of the 3,116 banks chartered since March 14, 1900, was \$178,763,300, and the amount of charter bonds \$44,831,520. Two thousand and thirty-six banks, or practically two-thirds of the banks chartered in this period, were organized with a capital of \$25,000 each. Banks of larger capital to the number of 1,080, with a total authorized capital of \$125,682,800, were organized in this period under authority of the act of 1864.

Of the total number of banks chartered since March 14, 1900, 347, with capital of \$23,041,800, were conversions of State banks; 1,024, with capital of \$65,434,000, were reorganizations of State and private banks, and 1,745, with capital of \$90,287,500, were banks of primary organization.

During the year ended September 30, 1906, 450 banks, with aggregate capital of \$21,260,500, were chartered, of which 309 were banks with \$25,000 capital, and 141 with capital of \$50,000 or over. Fiftythree of these banks were conversions of State banks, 134 were reorganizations of State and private banks, and 263 were primary organ-Since October 1, 1905, 82 national banks, with capital of izations. \$13,523,000, were placed in voluntary liquidation, and 14 banks, with capital of \$1,230,000, were closed by order of the Comptroller Three closed banks, with aggregate capital of of the Currency. \$125,000, were restored to solvency and authorized to resume business. The number and capital of national banks organized in each State and geographical division, from March 14, 1900, to September 30, 1906, are shown in the table on the following page:

SUMMARY, BY CLASSES, OF NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, TO SEPTEMBER 30, 1906.

The number of active national banks and their aggregate authorized capital, bonds on deposit, and circulation outstanding secured by bonds and lawful money on March 14, 1900, and September 30, 1906, together with the increase, appear in the table following:

	Mar. 14, 1900.	Sept. 30, 1906.	Increase.
Number of banks .		6,189	2, 572
Authorized capital		\$841,864,775	\$225, 556, 600
Bonds on deposit		530,772,270	286, 160, 700
Circulation, on bonds .		527,768,924	311, 394, 129
Circulation, lawful money		46,134,184	8, 106, 249
Total circulation		573,903,108	319, 500, 378

From the foregoing it will be noted that the net increase in number and capital of banks during the period in question was 2,572 and \$225,556,680, respectively, and also that circulation outstanding, covered by bonds and deposits of lawful money, increased to the extent of \$319,500,378. National-bank circulation forms approximately 18 per cent of the circulating medium of the country.

The following table is of interest as indicating the number of national banks in active operation at the close of each month from October 31, 1905, to September 30, 1906; their authorized capital stock, bonds on deposit to secure circulation, circulation secured by bonds and by lawful money, and the average monthly market price of 2 per cent consols:

12

Condition of national banks.

The latest returns of national banks, made to the Comptroller of the Currency, exhibit conditions on September 4, 1906, on which date there were in operation 6,137 associations with paid-in capital stock of \$835,066,796, and surplus and other profits of \$670,814,981. The surplus proper was \$490,245,124, which is nearly three times the amount required to be accumulated and maintained under the law. The surplus and "other undivided profits" amount to over 80 per cent of the paid-in capital.

Of the total liabilities of the banks, namely, \$8,016,021,066, over one-half, or \$4,199,938,310, is represented by individual deposits. The deposits to the credit of banks amounted to \$1,589,001,462, and to the credit of the United States and disbursing officers of the Government \$107,831,814.

The principal items of resources of the banks were as follows: Loans and discounts, \$4,298,983,316; United States bonds, \$628,796,710; other bonds and securities, \$701,240,755; specie, \$464,437,291 (of which \$363,840,256 represents gold and gold certificates), and legal tenders \$161,575,120.

Since August 25, 1905, the date of approximately corresponding returns, there is shown to have been an increase of 380 in number of reporting banks, \$35,196,567 in capital stock and \$50,521,024 in surplus and undivided profits. There was an increase of \$379,256,597 in individual deposits and \$45,741,514 in Government deposits. The amount to the credit of other banks decreased \$35,876,120. The deposits on which reserve was required amounted to \$4,927,865,452, on which a reserve of 20.70 per cent was held on September 4, 1906. The cash on hand, the redemption fund, and the net amount due from reserve agents equaled 25.72 per cent of deposit liabilities. On August 25, 1905, the deposit liabilities were \$4,735,477,535; the lawful reserve, 21.69 per cent, but including the net amount due from reserve agents, with cash and the redemption fund, a reserve was held of 27.33 per cent. Compared with August 25, 1905, the September 4, 1906, reports show an increase of \$300,474,163 in loans and discounts and \$77,315,040 in Government bonds, but a reduction in specie and legal tenders of \$31,042,162 and \$8,498,727, respectively.

MINT SERVICE.

The domestic coinage of the mints during the fiscal year amounted to 167,371,035 pieces, of the value of \$60,216,747.90. Of this, \$53,002,097.50 was gold coin, \$4,016,368.10 was subsidiary silver coin, and \$3,198,282.30 was minor coin. No silver dollars were coined, all bullion purchased for that purpose being exhausted. The mint at Philadelphia also coined 1,000,000 ten-peso pieces and 3,000,000 five-peso pieces, of the value in United States money of \$12,461,240.32, for the Mexican Government; 700,000 fractional silver pieces for the Government of Costa Rica; 1,000,000 half-balboa pieces for the Government of Panama, and 1,557,629 pesos and 3,765 pieces in fractional silver coins for the Government of the Philippine Islands.

The new mint at Denver has been in operation since February 1, 1906. The demands on all the mints are growing every year with the enlargement of the gold supply and the rapidly increasing need for the subsidiary silver and minor coins. There are indications that the cessation of coinage of the silver dollar will cause an enlarged use of the half dollar.

For many years, until the last year, it has been the practice to buy the nickel and bronze blanks for the minor coins from contractors, but these blanks are now made at the mints from pig metal, and with economy to the Government. In this connection, it is gratifying to state that the representatives of the mint services of foreign governments are of late years frequent visitors at the United States mints, and that numerous devices and methods originated in the latter have been adopted elsewhere. The new mint structures at Philadelphia and Denver are the most beautiful buildings designed for coinage purposes in the world, and the mechanical equipment and processes are of the most approved and modern type.

Renewal of silver purchases.

In my report of last year attention was called to the fact that bullion must be had at an early day for the subsidiary coinage, and authority was asked for the recoinage of abraded silver dollars into fractional denominations. No action having been taken upon this recommendation, or to provide by other means the supply of metal required, purchases of silver bullion have been resumed under section 3526, Revised Statutes, the Attorney-General having given a written opinion to the effect that authority for purchases existed under this statute, and that the demand for these coins might be supplied without limit. On the basis of the coinage of the last five years, approximately 5,000,000 ounces of silver will be required annually for subsidiary coinage, and with the growth of population and business this amount will be exceeded.

I repeat my recommendation of a year ago that section 3527, Revised Statutes, be amended by striking out the provision which requires silver coins to be paid out at the mints and at the assay office at New York. The issue and redemption of these coins should be through the Treasury and subtreasuries. The mints should pay out coins only on orders from the Treasurer. The effect of the law as it stands is to create a demand on the mints for perfectly new coin, although there may be already an abundance of coin in good condition in the Treasury.

14

SECRETARY OF THE TREASURY.

Assay office in New York.

Congress at its last session having made appropriations of \$370,000 for repairs to the assay office, steps have been taken to have the building put into safe and serviceable condition. When this is done the institution will be completely equipped with an electrolytic refinery, which will put an end to the acid fumes which at times have been troublesome in the neighborhood.

Production and deposits of gold.

The production of gold in the United States for the calendar year 1905 is estimated at \$88,180,700, and the industrial consumption at \$33,208,615, of which \$27,621,979 was of new material. The original deposits of gold at the several mints and assay offices aggregated \$153,109,493.52.

Earnings and expenditures.

The earnings and gains of the Mint Service during the fiscal year 1906 were as follows:

	BODD 040 00
Parting and refining charges	\$233, 860. 99
Alloy charges.	14.198.03
Melting, assaying, and stamping charges	28, 798. 38
Seigniorage on subsidiary silver coin	507,761.94
Seigniorage on minor coin	2,738,324.26
Profits on manufacture of proof coins and medals	1,696.98
Charges received for mounting medals	146.14
Gains on bullion deposits	49, 113.60
Proceeds from sale of old material	3,425.62
Received for special assays	3,735.00
Sale of by products	21,384.94
Received for manufacturing appliances for Government institutions	18,843.26
Received for coinage for foreign countries	70,676.00
Received for coinage for Philippine government	15, 962. 33
Tatal coming and asing	9 707 097 47
Total earnings and gains	3, 107, 927.47

The expenditures were as follows:

Equipment, Philadelphia mint	\$13, 322.60
Equipment, Denver mint	131, 130.61
Transfer of gold coin and bullion between mints and assay offices	60, 848.71
Paid in salaries and wages	1,060,799.24
Contingent expenses (less wastage and loss in sweeps sold)	444, 588. 50
Wastage and loss on sweeps	27,383.97
Expense of distributing minor coin	35,609.28
Loss on recoinage, minor coin	10,270.97
Charges paid for mounting medals	146.14
Total expenditures and loss	1,784,100.02

LOANS AND CURRENCY.

The outstanding principal of the public debt June 30, 1906, was \$895,159,140, an increase of \$800 in the fiscal year, due to the issue of 4 per cent bonds of the funded loan of 1907 in settlement of accrued interest on 4 per cent refunding certificates surrendered during the year under the act of February 26, 1879.

The refunding operations described in the last annual report, which were begun October 2, 1905, were terminated November 29 following. The amount of 2 per cent consols of 1930 issued in exchange for 3 per cent bonds of 1908–1918 and 4 per cent bonds of 1907 was \$53,032,400.

On July 2, 1906, the Department invited proposals for \$30,000,000 2 per cent bonds, the proceeds to be used in the construction of the Panama Canal. The call for bids was in the following terms:

The Secretary of the Treasury offers to the public \$30,000,000 of the bonds of the Panama Canal loan, authorized by section 8 of the act approved June 28, 1902, and supplemented by section 1 of the act of December 21, 1905.

The bonds will bear interest at the rate of 2 per cent per annum; will be dated August 1, 1906, and the interest will be paid quarterly on the first days of November, February, May, and August. They will be issued in denominations of \$20, \$100, and \$1,000 of coupon bonds, and of \$20, \$100, \$1,000, and \$10,000 of registered bonds. They will be redeemable in United States gold coin, at the pleasure of the United States, after ten years from the date of their issue, and will be payable thirty years from such date. They will be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. They will be available to national banks as security for circulating notes upon the same terms as the 2 per cent consols of 1930, to wit: The semiannual tax upon circulating notes based upon the said bonds as security will be one-fourth of one per cent. They will be receivable, like all other United States bonds, as security for public deposits in national banks.

The law forbids their sale at less than par and provides that all citizens of the United States shall have equal opportunity to subscribe therefor.

In pursuance of the above announcement, the Secretary invites bids for the bonds heretofore described, which must be submitted to this Department on or before the 20th of July, 1906. Each bid should state the amount of bonds desired by the subscriber, whether coupon or registered, the price he is willing to pay, and the place where he desires to make payment—whether at the Treasury of the United States or at the office of some one of the Assistant Treasurers at New York, Baltimore, Philadelphia, Boston, Chicago, St. Louis, Cincinnati, New Orleans, or San Francisco. All bids should be addressed to the Secretary of the Treasury, Division of Loans and Currency, and the envelopes inclosing them should be plainly marked "Bids for Panama Canal Bonds."

Upon receipt and classification of the bids hereby invited, the successful bidders will be advised of the acceptance of their bids, and they will be instructed as to the date upon which payment is desired to be made at the Treasury or some subtreasury of the United States.

In considering bids, the bidders offering the highest prices will receive the first allotment. Of two or more bidders offering the same price, those asking for the smaller amounts of bonds will receive priority in allotment. The Department reserves the right to permit bidders offering the highest prices to increase the amount of their purchases.

The Department also reserves the right to reject any or all bids, if deemed to be to the interests of the United States so to do.

The bonds will be ready for delivery about August 1, 1906.

Prospective bidders desiring information not contained in this circular may address the Secretary of the Treasury, Division of Loans and Currency, Washington, D. C., the Assistant Treasurers at Chicago, St. Louis, New Orleans, or San Francisco. When the bids were opened July 20 it was found that their aggregate was \$446,371,300, at prices from par up to 125. The average price offered by the successful bidders was 104.036+, and the premium received for the \$30,000,000 of bonds sold to them was \$1,210,817.95.

Including the issue of Panama bonds, the public debt November 1, 1906, was \$925,159,250. Of this amount bonds of the face value of \$631,542,630 were held by the Treasurer of the United States in trust for national banks as security for circulating notes and deposits, leaving \$293,616,620 in the hands of other investors.

The changes in the amounts of the several kinds of money in the United States outside the Treasury between November 1, 1905, and November 1, 1906, are shown in the table following:

Classes.	In circulation Nov. 1, 1905.	In circulation Nov. 1, 1906.	Decrease.	Increase.
Gold coin Standard silver dollars Subsidiary silver Gold certificates Silver certificates Treasury notes, act of July 14, 1890 United States notes National bank notes	$\begin{array}{c} 81,822,311\\ 107,157,932\\ 479,965,439\\ 471,625,776\\ 8,594,378\\ 340,107,480\end{array}$	$\begin{array}{c} 83,606,468\\ 120,278,648\\ 575,958,419\\ 473,419,449\\ 6,894,518\\ 344,516,149\end{array}$	\$1,699,860	1,784,157 13,120,716 95,992,980 1,793,673

Net increase				213,751,208

COMPARATIVE STATEMENT SHOWING THE CHANGES IN CIRCULATION.

PUBLIC MONEYS.

The monetary operations of the Government have been conducted through the Treasurer of the United States, 9 subtreasury officers, the treasury of the Philippine Islands, the American Colonial Bank of Porto Rico, and 962 national bank depositaries. The amount of public moneys held by the bank depositaries on June 30, 1906, including funds to the credit of the Treasurer's general account and United States disbursing officers, was \$90,443,923.66, an increase since June 30, 1905, of \$16,686,567.01. On June 30, 1906, there were 317 regular and 606 temporary depositaries; 121 were designated during the fiscal year and 35 discontinued. On November 1, 1906, the number of depositaries was 1,106, and the amount of public moneys held by them was \$148,975,346.14.

ENGRAVING AND PRINTING.

The demand on the Bureau for United States notes, silver certificates, and other securities is insistent and increasing. The increase in the number of sheets delivered in 1905 over 1904 was 3.4per cent, and in 1906 over 1905 was 9+ per cent. Before Congress had an opportunity to consider the estimates for the fiscal year ending June 30, 1907, the Treasurer of the United States increased his requirements by 8,000,000 sheets of certificates, and the Comptroller of the Currency increased his requirements by 2,000,000 sheets of national-bank notes, making a total increase of 10,000,000 sheets of notes and certificates. The estimates for 1908 show an increase over the amended estimates for 1907 of 12,319,269 sheets, or 6.1 per cent. This increase is entirely to supply the current business of the country, and does not take into consideration any increase that may be necessary should Congress provide for a more elastic currency or for more frequent redemptions of the notes and certificates issued by the Government in response to the demand for clean money.

To provide the notes, certificates, and securities required by the estimates of the officers supervising their issue, the Bureau of Engraving and Printing is working a very large proportion of its force overtime, and a large force of printers and their assistants and a smaller force of operatives in the examining and the numbering divisions are working at night. The working of any portion of the force of the Bureau beyond the regular hours and at night is for obvious reasons objectionable. Some steps must therefore be taken to dispense with the necessity for so doing. No further extension of the present building can be made, for the reason that its site is now occupied as far as it is possible to utilize it. The only adequate relief will be the erection of an entirely new building designed and constructed for the special purposes of this Bureau. This building should be in every way adapted to the work, having the rooms for the several divisions conveniently arranged, and should embody all of the improvements in building construction and in the operation of machinery, including electric light and power and other processes, that have been developed during the twenty-five years since the completion of the building now occupied. The present building can be readily utilized for other governmental purposes. I specially call the attention of Congress to this subject, and urge that provision be made for the erection of a proper building for the execution of the important work of this Bureau.

The work delivered during the year aggregated 180,289,766 sheets an increase over 1905 of 14,935,252 sheets, or slightly over 9 per cent. In addition to the impressions delivered, miscellaneous work was executed to the value of \$118,293.70—an increase over 1904 of \$28,875.98, or 32.3 per cent. The aggregate amount available for the operations of the Bureau during the year from appropriations and repayments was \$3,378,117.72. The aggregate amount expended for all purposes connected with the work of the Bureau was \$3,355,786.23. The increase in expenditures for 1906 over 1905 was \$63,569.17, or 1.93 per cent. There was an unexpended balance of \$22,331.49.

Work on the additional building authorized by the act of March 3, 1903, was completed in March, 1906. The expectation heretofore expressed that upon the completion of this building there would be no further occasion for night work has not been realized because of the increase in the work above stated.

Notwithstanding the large increase in the work required of the Bureau, it has promptly filled all orders given it for securities. A notable instance in this respect is the order for the bonds of the Panama Canal loan. The final instructions for these bonds were given on July 6, 1906, and the bonds were delivered August 1, 1906.

PUBLIC BUILDINGS.

During the past year the Department has completed and occupied 67 buildings; 35 are now in course of erection; 23 authorized prior to June 30, 1906, have not, for various reasons, been commenced. The total number of buildings completed and occupied under the control and maintenance of this Department is 515, of which 43 are marine hospitals and quarantine stations. In addition, 46 sites had been acquired prior to June 30, 1906, for which no construction appropriations were provided until that date.

Congress, by act past June 30, 1906, made provision for the purchase of many sites and the erection of numerous buildings. This legislation may be briefly summarized as follows: The limits of cost of 43 buildings previously authorized were increased; three specific authorizations were made for the purchase of additional land; provision was made for the enlargement, extension, remodeling, or improvement of 45 buildings, 28 of which require enlarged sites; limits of cost were fixed and appropriations made for 41 buildings upon sites already owned by the Government; 5 buildings were authorized in certain cities upon condition that the sites do not exceed \$1 in cost; 86 sites without buildings were ordered to be purchased, and 116 sites with buildings were provided for. The total amount authorized was \$27,569,000, and \$10,306,600 was appropriated with which to begin the work. Energetic measures have been taken to carry this legislation into effect. Advertisements for the purchase of sites were issued immediately upon the approval of the act, and agents of the Department are now reporting upon the properties offered. Some of the sites have already been selected, and it is believed that this preliminary work will be completed early in the coming calendar year.

Nearly all the buildings authorized in the omnibus public building acts approved June 6, 1902, and March 3, 1903, were either finished or under contract by June 30, 1905, at which date it became necessary to reduce largely the technical force of the Supervising Architect's Office on account of lack of work. The disorganization of that highly trained force is now seriously felt, and although every effort is being made to overcome the handicap, the work of reorganization is proceeding slowly, due chiefly to the fact that men well equipped with architectural knowledge now find more stable employment and higher salaries in the fields of private enterprise. It is hoped that when the office in question is reorganized upon the basis of its former efficiency the necessity to impair its usefulness will not This could be averted by the passage each year of a arise again. bill carrying a moderate number of public buildings. Such a policy would result in their prompt commencement and completion without undue strain upon the Department, and at the same time insure stability in the architectural force-a condition absolutely necessary in a great construction bureau.

The Department has continued its policy of designing public buildings along lines as nearly classic as possible. This has been done without sacrificing the purposes for which they are intended, and it has resulted in the erection of many buildings which well represent the Government in their dignity and strength. In the rapid evolution of Federal architecture, a type of building has been reached equal in all respects to the best examples of modern construction.

The following tables show the operations of this Department with respect to public buildings during the fiscal year ended June 30, 1906:

EXPENDITURES DURING THE FISCAL YEAR 1906.

For sites, for the construction of public buildings, and for extensions and repairs especially appropriated for For repairs and preservation For heating apparatus For, vaults, safes, and locks For plans, including books and periodicals	\$7, 996, 525, 82 425, 379, 15 195, 308, 39 55, 556, 35 894, 83

PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

The Surgeon-General reports 54,363 patients treated during the year. Of these, 13,925 were treated in hospital and 40,438 were out-patients.

Aid was extended to other branches of the Government in the physical examination of 5,348 persons, of whom 435 were rejected. One hundred and seventeen seamen were examined to determine their fitness for shipment on merchant vessels of the United States, of whom 14 were rejected.

A total of 1,175,000 arriving aliens were examined by medical officers of the Service to determine their physical fitness for entrance into the United States and its dependencies. The details of officers at Naples, Quebec, St. John, Winnipeg, Victoria, and Vancouver for the medical inspection of aliens bound for the United States were continued. The officers on duty at ports in Japan and China, in addition to their quarantine duties, also inspected aliens at the request of the Department of Commerce and Labor.

Personnel.

At the close of the fiscal year the commissioned corps of the Service consisted of 118 officers as follows: The Surgeon-General, 5 assistant surgeons-general, 28 surgeons, 56 passed assistant surgeons, and 28 assistant surgeons. Of this number, 8 commissioned officers were assigned to duty in the offices of American consuls in foreign ports; 3 were continued upon detail to the Panama Canal Commission; 14 were assigned to the Immigration Service for the examination of aliens; 7 to the quarantine service of the Philippine Islands, and 7 detailed for duty upon vessels of the Revenue-Cutter Service.

Three sanitary inspectors, 205 acting assistant surgeons, and 45 pharmacists were on duty at the close of the fiscal year.

Expenditures.

The balance of the Public Health and Marine-Hospital fund available at the commencement of the fiscal year was \$230,124.98. The receipts from all sources, tonnage tax, repayments for care of foreign seamen, reimbursement for Immigration Service, etc., and including an appropriation of \$200,000, were \$1,280,461. The expenditures were \$1,090,272.51.

The balance on hand at the end of the fiscal year was \$420,313.47, from which should be deducted estimated amount of outstanding bills and liabilities \$82,000, leaving an estimated balance of \$338,313.47.

Congress at its last session made an appropriation for the expenses of the Service during the fiscal year ending June 30, 1907. The unexpended balance of the Public Health and Marine-Hospital fund will be therefore turned into the Treasury.

H. Doc. 9, 59-2-3

The balance of the appropriation for preventing the introduction and spread of epidemic diseases at the beginning of the fiscal year. was \$331,476.69. An appropriation of \$200,000 was provided by Congress, in addition to the available balance reappropriated. The expenditures were \$234,023.65, leaving a balance June 30, 1906, of \$297,453.04.

The appropriation for the maintenance of the quarantine service was \$340,000. The amount of repayments was \$1,702.19. The expenditures were \$308,330.04, leaving a balance at the end of the fiscal year of \$33,372.15. Deducting outstanding bills and liabilities leaves an estimated balance of \$16,297.82.

National quarantine service.

The inspection, detention, and disinfection, when necessary, of all vessels prior to entry have been continued at 40 national domestic quarantine stations upon the Atlantic, Gulf, and Pacific coasts of the United States. During the fiscal year 5,957 vessels have been inspected and 687 disinfected. National quarantine has been maintained at 8 stations in the ports of Porto Rico, 7 in Hawaii, and 7 in the Philippines.

Surveillance upon the Canadian and Mexican borders has been maintained to prevent the introduction overland of the quarantinable diseases.

Medical officers have been stationed at Havana, Matanzas, and Cienfuegos, Cuba; at 8 fruit ports in Central America; at Vera Cruz and Progreso in Mexico; at Guayaquil, Ecuador; Callao, Peru, and at Colon, Panama. These officers have continued to exercise supervision over outgoing vessels bound for the United States and its insular possessions and dependencies.

Under the act of Congress approved June 19, 1906, overtures have been made for the purchase from State authorities of the quarantine plants at ports where quarantine is necessary to prevent the introduction of yellow fever, namely: Galveston and other ports in Texas; Mississippi River Quarantine Station in Louisiana; Mobile in Alabama, and Charleston and other stations in South Carolina. The negotiations in most cases are still pending. South Carolina having by an act of legislature last winter provided for the transfer of her quarantines to the United States, the property of the State has been leased and the National Government has assumed the quarantine function.

Yellow fever.

The report of the Surgeon-General contains a detailed account of the epidemic of yellow fever in New Orleans, and other portions of Louisiana, and in Mississippi and Florida, last summer and fall,

SECRETARY OF THE TREASURY.

to which reference was made in my last annual report. Owing to sanitary measures adopted in the places infected and to great care in the administration of quarantine, there has been no recurrence of the fever during the summer and fall just past.

Tuberculosis.

In accordance with Executive order of February 28, 1906, a sanitary inspection of the Government buildings and workshops, other than those under the Departments of War and Navy, in the District of Columbia, has been made by a board of officers appointed for this purpose, having for its object the prevention of tuberculosis among Government employees. Under the terms of the same order a like inspection will be made in other cities of the United States.

Typhoid fever.

The prevalence of typhoid fever has been studied in several localities. In response to a request from the Commissioners of the District of Columbia, with the approval of the Treasury Department, a board of officers is now engaged in making a comprehensive investigation into the origin and prevalence of this disease in the District.

Léprosy. •

The investigation of leprosy at Molokai, Hawaii, provided for by act of Congress approved March 3, 1905, has been undertaken. The director of the station to be erected has been appointed. Plans of the buildings have been completed, and specifications and working drawings are now in course of preparation in the office of the Supervising Architect.

The Surgeon-General renews his recommendation for the establishment of a home for lepers in the United States.

Smallpox.

Smallpox was reported during the fiscal year in 43 States and one Territory and the District of Columbia, with a total of 10,554 cases and 122 deaths. As shown by previous reports, there has been a steady annual decrease in this disease since 1902, in which year the number of cases was 55,857 and deaths 1,852.

Cholera.

In the Philippine Islands, during the fiscal year, there were 359 cases of Asiatic cholera and 321 deaths at Manila, and 4,087 cases and 3,033 deaths in the provinces outside of Manila. Careful quarantine of outgoing vessels prevented the disease from being carried to any other country.

REPORT ON THE FINANCES.

Sanitary conferences.

The Second General International Sanitary Convention of the American Republics was held in Washington October 9-14, 1905, at which 11 republics were represented. A convention dealing with plague, cholera, and yellow fever was signed *ad referendum*, and was ratified by the President of the United States with the advice and consent of the Senate May 29, 1906. Most of the republics represented have likewise confirmed the agreement, and it is believed that all the American republics will adopt it, as recommended by resolution of the International Conference of American States at Rio de Janeiro in July and August of the present year.

The fourth annual conference of State and Territorial boards of health with the Surgeon-General of the Public Health and Marine-Hospital Service was held in Washington May 23, 1906. Twentyseven States, one Territory, and the District of Columbia were represented. The subjects of discussion were car sanitation, pollution of water supplies, and prevention of tuberculosis.

LIFE-SAVING SERVICE.

The Life-Saving Establishment at the close of the fiscal year embraced 278 stations, distributed as follows: Atlantic and Gulf coasts, 200; coasts of the Great Lakes, 60; Falls of the Ohio (Louisville, Ky.), 1; Pacific coast, 17 (including a station at Nome, Alaska).

The number of documented vessels sustaining disaster within the scope of station operations during the year was 357. There were 4,099 persons on board these vessels, of whom 19 were lost. The value of property imperiled is estimated at \$14,736,350, viz: Vessels, \$10,187,545; cargoes, \$4,548,805. The estimated value of property saved was \$1,972,280, and of property lost \$2,764,070. The number of vessels totally lost was 49.

Undocumented vessels—sailboats, rowboats, etc.—to the number of 491 sustained casualties involving 1,221 persons, of whom 10 were lost. The estimated value of property involved was \$304,790, of which \$293,820 was saved and \$10,970 lost.

There were succored at the stations 811 persons, 1,727 days' relief being furnished.

The foregoing figures aggregate as follows:

Number of disasters	$\substack{848\\49}$
Number of persons involved	
Number of persons lost	
Number of shipwrecked persons succored at stations	811
Number of days' succor afforded	1,727
Value of property involved	\$15,041,140
Value of property saved	\$12,266,100
Value of property lost	\$2,775,040

The station crews also rendered assistance of more or less importance to many vessels not included in the preceding figures, the total number to which aid was extended being 1,245. The lives of 66 persons who had fallen from docks, wharfs, etc., or who were otherwise in dangerous situations not connected with vessels, were saved. One hundred and seventy-four vessels were warned of danger by the signals of the patrolmen and watchmen of the Service in time to avert disaster. These warnings were given at night in 161 instances, and in 13 cases during the day in thick weather. Ninety-seven of these vessels were steamers.

The net expenditure for the maintenance of the Service during the year was \$1,832,465.93.

The stations at Cape Henry, Va., and Fletchers Neck, Me., mentioned last year as in process of rebuilding, were completed during the year. Extensive improvements were also made to a number of other stations.

Sites were selected during the year for new stations at Fishermans Island and Myrtle Island, Virginia, and steps taken to secure a site for a new station on Neah Bay, Washington, pursuant to act of Congress approved April 19, 1906.

Titles have been secured to sites for new stations at Eagle Harbor, Mich., Tillamook, Oreg., and Bethany Beach, Del.

The Service sustained considerable loss in the earthquake and fire disaster which devastated San Francisco in April last. Its storehouse was wrecked and burned, and life-saving apparatus and miscellaneous station supplies to the value of several thousand dollars were destroyed. The life-saving stations at and in the vicinity of San Francisco were also considerably damaged by the earthquake. The crews of the stations affected, however, were able to render much valuable service in fighting the fire, transporting supplies, succoring the homeless, and in other ways ministering to the needs of the victims of the disaster.

The coast telephone system has been improved and extended as the needs of the Service required. Upward of 1,500 miles of line are now in operation. On the Long Island and New Jersey coasts a number of patrol telephones have been installed midway between stations with a view of securing to the keepers speedy news of the occurrence of shipwreck, and such information of attendant circumstances and conditions as will enable them to determine what apparatus it is advisable to convey to the place where the rescue of life and property is to be attempted, thus saving much valuable time. This new feature also additionally safeguards the patrol system.

For some years the Service has been engaged upon the problem of the application of mechanical power to the lifeboats used at the stations. In 1899 a gasoline motor was installed in a self-righting and self-bailing lifeboat at the Marquette station, with fair results. The tests made, however, suggested a number of important improvements, which were adopted and advantageously applied to another boat. Subsequently, power was installed in several of the largest Service lifeboats with results that have fully demonstrated the great value of this addition to the life-saving equipment. During the past year seven additional self-righting and self-bailing lifeboats were supplied with gasoline motors and one new power boat was constructed. These boats have enlarged the scope of the Service wherever they have been placed and expedited its operations by enabling the lifesaving crews to respond more promptly to calls of distress and to cover great distances more speedily and safely than was possible by oars and sails alone. They are capable, also, of being maneuvered with greater facility and less danger wherever the depth of water renders their use practicable. It is proposed to place them, as rapidly as available funds will permit, at all stations where they can be advantageously used.

Important improvements have also been made in the boat wagons and the apparatus carts of the Service, as well as in several other appliances used in wreck operations, all of which have contributed to the effectiveness of work on the beach.

While it is gratifying to note these betterments in the wrecking equipment, and the generally effective condition of the materiel of the Service, I am compelled to admit a steady decline in the efficiency of the personnel during recent years in consequence of the inability to offer adequate inducement to proved veterans to remain in the Service or to promising recruits to fill the places of those who leave. Owing to the great advance in wages in outside and less dangerous employment, and the increased cost of living, this decline has been constant, and has now become a matter of serious concern. As a rule, the most capable men now in the crews are those who have past the vigorous period of life, while the best brawn and muscle have quit, and the vacancies have had to be filled by inferior men. Those of advanced years, and necessarily more or less impaired vigor, ought not, it is true, to be subjected to, or relied upon to endure, the hardships incident to the vocation of a surfman, but they are retained because under existing conditions they are the best to be had.

During the progress of this decadence attention has been several times called to the necessity of remedial measures, and what are regarded as the only two adequate remedies have been pointed out. The choice lies between an increase in the compensation of keepers and surfmen and a provision for their retirement upon a suitable rate of pay. The Department has recommended the adoption of the latter as being much less expensive, more desired by the corps, and more consistent with the spirit of the age as evidenced by the action of nearly all the principal cities in the Union under the sanction of State legislation with regard to their policemen and firemen, and even here in the District of Columbia under the authority of Congress.

Several of the State legislatures have recommended the application of this provision to the crews of the Life-Saving Service, the chief maritime interests urge it, and the press seems to be nearly, if not quite, unanimous in its favor. A bill with this object in view is now pending in both Houses of Congress, indorsed by the favorable report of this Department. In the Senate the Committee on Commerce has made a unanimous report in its favor, and it is earnestly hoped that it may be past during the present session of Congress. It is believed that its enactment would speedily restore the personnel of the Service to its former high estate, and even render it more efficient than ever.

REVENUE-CUTTER SERVICE.

Following is an abstract of the regular work performed by the Revenue-Cutter Service during the fiscal year 1906, together with the net expenditures:

Lives saved (actually rescued) from drowning	. 17
Persons on board vessels assisted	1,664
Persons in distress taken on board and cared for	1,285
Vessels assisted	131
Vessels boarded and papers examined	17,344
Vessels seized or reported for violation of law	378
Fines and penalties incurred by vessels reported	\$67,410
Value of vessels assisted and their cargoes	\$5,012,955
Vessels examined or spoken by patrol fleet during yellow-fever epi-	
demic	1,923
Net expenditure:	
Appropriation for maintenance	\$1,450,000
Unexpended balance	

The operations of the Service have continued actively along the seacoast of the United States, including Alaska, the Hawaiian Islands, and Porto Rico, and on the waters of the Great Lakes. Much important work has been done by revenue cutters in Bering Sea and the Arctic Ocean, where extended cruises have been made for the protection of fur-seal, salmon, and other fisheries and the public interests generally. There have been in commission 23 vessels of the larger class, and 16 harbor vessels and launches which are engaged at various ports in boarding duty and the enforcement of anchorage laws.

Fourteen officers have been on duty in connection with the Life-Saving Service, one as inspector of that Service and the others as assistant inspectors. They have performed the usual duties of inspecting the various life-saving districts, drilling the crews, and

a No allowance made for unexpected claims.

superintending the construction of buildings and life-saving appliances, etc. One officer is on duty with the Immigration Service at the port of New York.

During the prevalence of yellow fever in the South, which continued from July to November, 1905, the Revenue-Cutter Service rendered effective aid in maintaining a quarantine patrol on the Gulf coast from Louisiana to Florida and preventing the introduction of the disease into the seaport towns by the water routes. Six revenue cutters and 6 chartered vessels, each in charge of an officer of the Service, composed the patrol fleet which cooperated with the Public Health and Marine-Hospital Service and examined or spoke 1,923 merchant vessels, a considerable number of which it was found necessary to place in detention. Not a case of yellow fever entered any locality by water within the limits of the patrol.

Great assistance was rendered by the Service to San Francisco immediately following the earthquake of April 18, 1906. Many lives and a large amount of property and treasure, the value of which can not be estimated, were saved by the efforts and resourcefulness of officers and men, while timely aid was given to numerous homeless and stricken people. The Service cooperated with the municipal authorities and the Army in preserving order, in checking the progress of the conflagration, which threatened to destroy the entire city, and in the transportation and distribution of supplies.

Revenue cutters have, by direction of the President, continued to cruise actively on the Atlantic coast during the winter months for the relief of distrest shipping. Succor in various ways has been afforded a large number of disabled and stranded vessels and their crews. Derelicts and other dangerous obstructions to navigation have been promptly removed or destroyed whenever it was practicable to do so.

The enforcement of the regulations governing the conduct of regattas, as required by law, has been effectively maintained in every instance coming under the supervision of the Service, which has insured a proper control of these events and the safety of participants and spectators.

Vessels.

I strongly recommend the passage of Senate bill 925, which has been amended and reported favorably to the House by the Committee on Interstate and Foreign Commerce. This bill provides for the construction of a first-class cutter for Puget Sound, a first-class cutter for Savannah, Ga., and adjacent waters on the Atlantic coast, an able seagoing tug for New Bedford, Mass., and the waters of Vineyard and Nantucket sounds, and a boarding vessel for duty at New Orleans, La. These vessels are urgently needed to improve the efficiency of the Service at the points named. It has been found necessary to discontinue the services of the *Grant* on Puget Sound (where she has been stationed for many years) owing to her present deteriorated and unseaworthy condition and to the fact that she is not worth further repairs. This will leave Puget Sound, with its extensive maritime interests, and the dangerous outlying waters of the coast of Washington, without a regular cruising cutter. The pressing need of a new vessel to take the place of the *Grant* is apparent.

Two vessels, one for the coast of Maine and one for Albemarle and Pamlico sounds, North Carolina, are now in process of building, and proposals will be solicited as soon as practicable for the construction of a seagoing tug for life-saving purposes for the north Pacific coast and an able steamer for destroying derelicts at sea, the last two having been authorized by the present Congress. Repairs to the *Thetis* have been completed, and she is under orders to make the annual cruise to the Arctic Ocean. The additional appropriation allowed for special repairs will enable me to put in good condition a number of vessels which are greatly in need of repairs.

Personnel.

The act to promote the efficiency of the Revenue-Cutter Service, approved June 23, 1906, is in accordance with the recommendations contained in my report of last year, and will be the means of providing in due time a sufficient number of junior line officers for the various ships. This law contains also other provisions which will prove of marked benefit in the administration of the affairs of the Service.

The limited number of grades, both in the line and staff, makes promotion unreasonably slow, particularly in the engineer corps, and I recommend that officers after performing five years' service in the grade of third lieutenant, or that of second assistant engineer, and upon passing the examinations now required by law, be eligible for promotion to the next higher grade.

I renew my previous recommendation that the senior 10 chief engineers be given longevity increase of pay up to 60 per cent on the basis of 10 per cent for every five years of service.

Suitable legislation should also be enacted in behalf of the warrant officers and enlisted men; they should be granted the same benefits as to length of service, retirement, and pensions as are accorded to men of other military branches. It is hoped that adequate provision in this respect will soon be made for them. The law contemplates that the pay of petty officers, seamen, and others on revenue cutters should be as high as the average wages paid to merchant sailors, but while the appropriation for the Service for the fiscal year 1907 will permit of a small increase of pay to enlisted men, the increase will not be sufficient to correct the inequality.

REPORT ON THE FINANCES.

Discipline.

Much will be gained in maintaining the discipline of the Service by the act approved May 26, 1906, to regulate enlistments and punishments. This measure, which has been long needed, provides the legal means for the prompt punishment of desertion and other infractions of discipline.

Wireless telegraphy.

In my last report I called attention to the need of having wireless telegraphy on all first-class cruising cutters. In view of the proved advantages of such a system on seagoing vessels, and especially its great usefulness on public craft charged with assisting distressed mariners, the matter should not be longer delayed. I therefore recommend that \$45,000 be appropriated for installing and operating the apparatus as suggested.

SECRET SERVICE.

In the suppression of counterfeiting the secret-service division reports a satisfactory diminution of activity on the part of makers of fraudulent notes and coins. But three new counterfeit issues were noted during the year, and their circulation was restricted to comparatively small amounts. The total of counterfeit money of all denominations confiscated and destroyed was a trifle over \$38,000, about equally divided between notes and coins. This is nearly \$100,000 less than it was ten years ago. There were 356 prosecutions for violations of the laws relating to counterfeiting. During the last six months of the fiscal year there was not one new counterfeit note Specialists in criminal investigation have been provided by issued. the secret-service division to conduct important investigations for other Departments, and there have been many arrests and prosecutions for fraudulent naturalization and for violations of the laws relating to public lands.

REPAIRS TO TREASURY BUILDING.

That portion of the Treasury building which was first constructed is built of sandstone, and the east front is in need of restoration. This is due to the fact that disintegration of the stone has set in, and some portions of it have already fallen. This condition is dangerous, and the architectural appearance of the building would be decidedly improved by replacing the sandstone with granite. The constant cost of repairs would also be avoided, and I strongly recommend that this improvement be made.

There is now on the books of this Department an appropriation of \$175,000, made for the purpose of improving the ventilation of the Treasury building, of which \$162,147.42 remains unexpended. The problem of ventilation having been solved, it is recommended that said sum of \$162,147.42 be reappropriated, together with \$162,852.58, making in the aggregate \$325,000 for replacing the east front of the Treasury building, including the colonnade, with granite, which is the estimated cost of said work.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1906 were \$11,487,249.80. The net revenues deposited in the Treasury on this account for the same period were \$5,993,018.96.

The amount of the funded debt retired during the year was \$463,650, reducing the annual interest charge by \$16,923.22. Since the close of the year the debt has been further reduced by the purchase of 3.65 per cent bonds to the amount of \$358,600. The bonded debt outstanding October 1, 1906, was \$11,229,100 in bonds bearing 3.65 per cent interest.

Total issue of the 3.65 per cent bonds is limited by law to \$15,000,000, and of this sum \$14,997,300 has been issued.

The act of Congress approved March 31, 1906, provides that the 10 per cent retentions from District contracts for the construction of bridges and sewers shall be held for a period of one year instead of five years, as heretofore. The act also applies to all contracts of this character now completed and accepted. This has increased the number of settlements during the year, and retentions from 67 contracts, amounting to \$163,611.59, were canceled by the return to the contractors of \$111,950 in bonds and \$38,091.11 in cash, leaving in the hands of the Treasurer \$296,087.90 in retentions, represented by \$208,240 in bonds and \$67,914.89 uninvested cash.

Detailed information in regard to the affairs of the District of Columbia will be found in the report to be submitted by the District Commissioners and by the Treasurer of the United States, ex officio commissioner of the sinking fund of the District.

STATE BONDS AND STOCKS OWNED BY THE UNITED STATES.

The following statement shows the nonpaying State bonds and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:

North Carolina	·····	58,000.00
Total		430 666 662

A history of these State stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

REPORT ON THE FINANCES.

CENTRAL PACIFIC DEBT.

All amounts which have become due to the United States under the agreement dated February 1, 1899, for the settlement of the indebtedness of the Central Pacific Railroad Company, have been paid by the railroad company in full, including interest on all outstanding notes to August 1, 1906.

The principal of all notes held August 1, 1906, amounted to \$14,703,178.90, and first-mortgage bonds to the amount of \$14,704,000 are held as security for the payment thereof.

TERRITORY OF HAWAII.

The debt of Hawaii assumed by the terms of the joint resolution of July 7, 1898, consisted of \$3,235,400 in interest-bearing bonds and \$764,570.31 in postal savings deposits. This indebtedness has been fully paid by the United States, except \$2,894.31 in postal savings certificates, not yet presented for payment.

The appropriation of \$1,000,000 provided by Congress for the liquidation in part of awards made for property destroyed in suppressing the bubonic plague in the Territory in 1899 and 1900 has been practically expended. The First National Bank at Honolulu reports that 28 awards, amounting to \$3,357.65, are now outstanding.

INTERNAL REVENUE.

The most important legislation affecting internal revenue enacted by the last session of Congress is the act approved June 7, 1906, providing for the withdrawal from bond, tax free, of domestic alcohol rendered unfit as a beverage or for liquid medicinal uses by the admixture therewith of denaturing materials. This legislation is in harmony with similar laws adopted during the last fifty years by nearly all foreign countries. Its prime object is to furnish cheap alcohol for domestic and manufacturing purposes. The present internal-revenue tax per wine gallon on alcohol at 180 degrees proof is \$1.98. This tax is removed by the act.

It is believed that by means of this legislation not only will the manufacturing interests of our country using alcohol be placed on equal footing with those of other countries, but there will be marked benefit to the people at large in securing a new product for the production of heat, light, and power, and that this new product will be a competitor with kerosene, gasoline, and coal in our domestic and farm life. The use of wood alcohol for domestic and manufacturing purposes will be largely, if not completely, displaced by this product.

There will be some loss of revenue to the Government through this new legislation, though the amount of such loss can not now be definitely stated, but the benefits accruing to the people will greatly outweigh the loss of revenue. Regulations and instructions relative to the enforcement of the act (effective January 1, 1907) were promulgated by the Department September 29, 1906.

The receipts from internal-revenue taxes for the fiscal year 1906, as shown by collectors' reports, were \$249,102,738, a net increase over 1905 of \$14,914,761.63.

The following items show increases for 1906: Distilled spirits, \$7,435,542; manufactured tobacco, \$2,763,086.88; fermented liquors, \$5,281,305.38; filled cheese, \$1.40; mixed flour, \$918.84; adulterated butter, \$5,319.46; banks, bankers, etc., \$50.10; total increases, \$15,486,224.06.

The following items show decreases for same period: Oleomargarine, \$35,440.88; process or renovated butter, \$18,657.17; miscellaneous, \$517,364.38; total decreases, \$571,462.43.

The total expenditures for the maintenance of the Internal Revenue Service for the fiscal year 1906 were \$4,727,170.11. The cost of collecting \$1 of internal revenue was \$0.019.

The following table gives a comparative statement of receipts for the fiscal years 1905 and 1906. For a more detailed statement reference should be made to the report of the Commissioner of Internal Revenue:

RECEIPTS FROM INTERNAL REVENUE IN 1905 AND 1906, AS SHOWN BY COLLECTORS' REPORTS.

	Fiscal year er	nded June 30—			
Manufactured tobacco Fermented liquors Oleomargarine Filled cheese Mixed flour Adulterated butter Process or renovated butter Banks, bankers, etc Miscellaneous	1905.	1906.	Increase.	Decrease.	
Distilled spirits. Manufactured tobacco. Fermented liquors. Oleomargarine. Filled cheese. Mixed flour. Adulterated butter. Process or renovated butter. Banks, bankers, etc. Miscellaneous. Total.	45, 659, 910, 50 50, 360, 553, 18 605, 478, 81 1, 648, 39 3, 938, 97 156, 735, 26	\$143, 394, 055, 12 48, 422, 997, 38 55, 641, 858, 56 570, 037, 93 1, 40 2, 567, 32 9, 258, 43 138, 078, 09 50, 10 a 923, 833, 76 249, 102, 738, 00	1,40 918,84 5,319,46 50,10	\$35, 440. 88 18, 657. 17	

a Includes \$489,347.26 from playing cards, \$283,991.62 from penalties, \$142,148.22 from legacies on which the tax had accrued prior to the repeal of the act, and \$8,346.66 from miscellaneous sources.

The total production of distilled spirits, exclusive of fruit brandies, was 145,666,125.1 taxable gallons against 147,810,794.3 gallons in 1905, a decrease of 2,144,669.2 gallons.

The production of fruit brandies decreased 1,004,512.5 gallons.

During the fiscal year 1906, 1,885 distilleries of all kinds were operated, an increase of 113.

The production of beer was 54,724,553 barrels, an increase of 5,202,524 barrels.

CUSTOMS.

The past fiscal year shows the largest customs receipts in the history of the country. Over three hundred millions of dollars were collected in customs duties at the different ports. Previously, the fiscal year of largest customs receipts was 1903, when two hundred and eighty-six millions was collected. The following statement shows the relative standing and receipts of the 12 leading ports of the country, where customs receipts for the fiscal year ended June 30, 1906, amounted to at least one million dollars:

1.	New York	\$200, 698, 240	7. Baltimore	\$4,933,854
2.	Boston	27, 337, 297	8. St. Louis	2, 127, 743
3.	Philadelphia	20,532,928	9. Tampa	1,679,004
4.	Chicago	9,997,904	10. Detroit	1,595,263
5.	San Francisco.	7,449,196	11. Port Townsend	1,260,409
6.	New Orleans	6,548,695	12. Cleveland	1,174,662

At all ports, large and small, it cost the past year less than 3 cents to collect each dollar of customs revenue, the smallest cost yet reached. But there were many ports where the cost was out of all proportion to the revenue collected, and some where there were no receipts at all. This emphasizes again the necessity for legislation to bring about a rearrangement of customs districts.

The following table clearly sets forth the conditions in this respect:

LIST OF PORTS AT WHICH CUSTOMS EXPENSES EXCEEDED RECEIPTS, ETC.-Continued.

The extension of the immediate-transportation privileges to San Juan, P. R., is again recommended. Merchandise arriving at a port in the United States from a foreign country for shipment to San Juan is now forwarded under procedure not adapted to such shipments, and in consequence there is unnecessary confusion and delay. The business is sufficiently large to justify such extension, and the requisite officers are at San Juan to appraise and classify the merchandise there in accordance with the law.

Special agents.

By the efficient work of the special agents and special employees of the Department considerably over a million dollars has been added to the revenue during the past year. The work of the agents abroad has been systematized. Each agent has been given a special station and territory, resulting in prompter and more effective service. The work of discovering and remedying undervaluation and wrong classification has received special attention and with excellent results.

The following statement gives a summary of the work of the special agents during the fiscal year ended June 30, 1906:

Number of reports to the Department	5,914
Number of seizures	2,903
Appraised value of seizures	\$263, 554.86
Number of arrests	169
Number of suits commenced	79
Amount involved in suits	\$322,402.21
Number of suits pending	. 99
Number of suits disposed of July 1, 1905, to July 1, 1906	25
Number of customs districts examined	\$ 46
Amount recovered on account of seizures	
Amount recovered on account of suits.	
Amount recovered on account of fines, penalties, and forfeitures	\$70, 899, 55
Amount recovered on account of undervaluation, improper classifica-	
tion, etc	

REPORT ON THE FINANCES.

SPECIAL TREASURY OPERATIONS.

This being the fifth and last annual report submitted by the present head of this Department, it may not be deemed inappropriate to review briefly the financial operations of the Treasury for the five years last past.

1902 to 1906.

Notwithstanding the expenditure of \$10,000,000 to the Republic of Panama, and \$40,000,000 to the Panama Canal Company for the right of way on which to construct the canal, and \$10,000,000 expended in preliminary work upon the canal, and the issuance of \$30,000,000 in bonds for continuing the work of construction, the bonded indebtedness of the Government has decreased during the last five years \$14,000,000, the annual interest charge has decreased \$4,000,000, the money in the Treasury to the credit of the general fund has increased nearly \$50,000,000, while the total circulation in the country has increased \$600,000,000, and the per capita circulation nearly \$5.

The following is a summary covering the period:	
Bonded indebtedness February 1, 1902 Bonded indebtedness November 1, 1906	939,094,330.00 925,159,250.00
Decrease	13,935,080.00
Annual interest charge February 1, 1902 Annual interest charge November 1, 1906	27,866,892.00 23,848,068.00
Decrease	4,018,824.00
In Treasury to credit of general fund February 1, 1902 In Treasury to credit of general fund November 1, 1906	174,796,646.00 223,300,810.00
Increase	48, 504, 164.00
Number of national bank depositaries February 1, 1902 Number of national bank depositaries November 1, 1906	468 1,106

Per capita circulation February 1, 1902 Per capita circulation November 1, 1906	28. 77 33. 68
Increase	4.91

1902.

During the summer of 1902 surplus bank reserves throughout the country ran relatively very low. This is one of the surest indications of trouble in the fall. Preparatory for the crisis certain to ensue, the Secretary of the Treasury caused to be printed as much unordered national-bank circulation as the Bureau of Engraving and Printing could turn out, in addition to the ordinary demands upon it, and in September of that year offered to accept satisfactory security other than Government bonds for deposits of public money then held by the banks for which this additional circulation had been printed, on condition that the released bonds should be immediately made the basis for circulation. He also anticipated the payment of November interest due on outstanding obligations of the Government, and offered to purchase for the sinking fund any United States 4 per cent bonds of the loan of 1925 that might be offered at $137\frac{3}{4}$ and interest to date of purchase. He also increased deposits in national banks in quite a considerable sum. In these several ways he restored to the channels of trade somewhat over \$57,000,000 and stimulated national-bank circulation to the extent of \$18,000,000. He also issued an announcement that he would not exercise the discretion given him by statute to liquidate banks which fail to maintain their reserve should they fail to maintain the same against deposits of Government money.

These operations were not begun, however, until a condition existed which in the opinion of many leading bankers of New York City justified the issuance of clearing-house certificates, and when a resort thereto was being seriously considered. Two of these methods (the acceptance of other than Government bonds as security for deposits, and the announcement that the discretion with which the Secretary of the Treasury is clothed by statute would not be exercised against banks failing to maintain reserve against Government deposits) received their full meed of criticism at the time, but no lawyer ever doubted their legality and no business man now questions their necessity. Financiers generally now recognize, and some of the best known have publicly announced, that but for what was then done a panic would have ensued rivaling in severity any in our history, and which would possibly have continued until industrial conditions were disastrously affected.

1903.

The law authorizes the Secretary of the Treasury to deposit in national banks only internal revenue and miscellaneous receipts. Having found it impracticable to relieve a monetary stringency with current internal-revenue receipts, amounting only to about \$500,000

H. Doc. 9, 59-2-4

per day, the Secretary early in 1903 ordered their segregation and the accumulation of a separate and distinct fund composed entirely of internal-revenue and miscellaneous receipts, so as to be prepared in case of an emergency to grant prompt relief by large deposits. This practice has been continued.

During the fall of 1903 there was restored to the channels of trade an aggregate of \$27,000,000. This was accomplished by purchasing outstanding Government bonds for the sinking fund amounting to \$13,000,000, and by direct deposits in national banks aggregating \$14,000,000. National-bank circulation was also stimulated to some extent.

1904.

In the spring of 1904, by direct appropriation of Congress \$10,000,000 was paid to the Government of Panama and \$40,000,000 to the Panama Canal Company for the right of way on which to construct the canal across the Isthmus. Preparatory to making these payments pro rata transfers were made of Government deposits from all depositary banks outside to those within the city of New York, and the amount thus transferred distributed pro rata among depositaries in that city. The payment of \$40,000,000 to the Panama Canal Company on May 9, 1904, was accomplished by the appointment of J. P. Morgan & Co. special disbursing agents for the Treasury Department, and a pay warrant for \$40,000,000 was then issued to said firm, which was paid through the clearing house. Morgan & Co. at once deposited an equal amount through the same channel in the banks from which the money was drawn with which to pay the warrant.

As the transaction worked out, only a few thousand dollars actually changed hands, money rates were not affected in the slighest degree, and not a dollar of gold was shipped from this country. The transfer to France was skillfully effected by Morgan & Co. through the purchase from time to time of foreign exchange. Neither was there any expense to the Government, the disbursing agents volunteering to represent the Government gratis and look to the French Canal Company for their pay.

The Republic of Panama invested most of the purchase price of her cession in the United States, and thus shipments of money to that country were avoided.

No purchases for the sinking fund were made during the year.

1905.

For reasons which can not be fully explained, revenues fell off during the calendar year 1904 and the early months of 1905, which, coupled with the extraordinary expenditures, caused a deficit for the fiscal year ending June 30, 1905, of \$23,000,000. To make good this deficit and to meet these expenditures, \$50,000,000 was withdrawn from depositary banks. These withdrawals, however, were insufficient to inspire conservatism, and during the summer the surplus reserve of the associated banks of New York City fell below \$7,000,000, while the rate on call money fluctuated from below 1 to $3\frac{1}{2}$ per cent, averaging for the season, perhaps, about 2 per cent.

The anticipated stringency was deferred, however, possibly in part by extensive refundings of Government bonds into consols of 1930, which, in conjunction with withdrawals of deposits, lowered the price of consols to a point where banks found the maintenance of circulation profitable, and an increase of \$25,000,000 resulted. The crisis inevitable came, though some months belated.

1906.

In February of 1906, \$10,000,000 was deposited in national-bank depositaries in seven of the principal cities and satisfactory security other than Government bonds accepted, but with the distinct understanding that it would be recalled in July of that year. This relief was not sufficient, however. Banks everywhere, West as well as East, found themselves in the spring with surplus reserve exhausted. The foreign exchange market responded sympathetically in a very marked decline in sterling exchange sufficient to have insured the importation of gold if the banks had been in position to buy the exchange with which to secure it. The Secretary then offered to make deposits, satisfactorily secured, equal in amount to any actual engagements of gold for importation, the same to be promptly returned when the gold actually arrived. In this way approximately \$50,000,000 (more than six carloads) in gold, largely in bars, was brought from abroad. Most of this came from Europe, but in part from Australia and South Africa.

This was accomplished without expense to the Government and without profit to the importing banks, but with great benefit to the business interests of the country. The various banks which imported this gold lost in the transactions several thousand dollars as established by their books; the price of exchange promptly advanced so that merchants and exporters of grain and cotton having exchange to sell were benefited in excess of \$150,000, and interest rates dropped sufficiently to effect a saving to borrowers in New York City alone of more than \$2,000,000. This means of relieving financial stringencies, which has been once since repeated, attracted far more attention throughout Europe than in the United States, though it has been widely commented upon in both places. It has at least demonstrated that the United States is in a position to more effectually influence international financial conditions than is any other country, and justifies great caution lest while protecting our own interests we cause distress elsewhere, which will soon be reflected here.

The United States can ill afford to disturb financial conditions in Europe, and if necessary to prevent it, the present head of the Treasury Department would not hesitate to make deposits in national banks on condition that the banks in turn promptly deposit an equal amount abroad. The world throughout is enjoying an unprecedented period of prosperity, and no Government operations in this country must be permitted to interfere therewith either at home or abroad. The Treasury now holds (November 20) in its own vaults a working balance of \$78,000,000, as much as can possibly be spared of which will be deposited if business conditions require it, though it become necessary to pay the current expenses of the Government with checks on depositary banks. The money of the country belongs to the people, and Treasury operations must be made subordinate to the business interests of the country.

Stiff rates on call money in New York, however, are not an unmixed evil, nor are they a very reliable barometer. For instance, during the forenoon of November 13, 1906, ruling rates on call money were 12 per cent, touching as high as 14, but after an announcement by the Secretary that he would in no manner relieve the situation, the rate dropped to about 5 per cent and closed at $5\frac{1}{4}$.

This does not indicate, however, that money is plentiful. The sure indication of world-wide money stringency is the fact that legitimate interest rates on commercial paper everywhere are higher than for many years. Universal business activity creates universal demand for money, and universal demand influences the price at which the use of money can be obtained.

SALE OF PANAMA BONDS.

By act of Congress the Secretary of the Treasury is directed to sell bonds from time to time to secure money with which to construct the Panama Canal. On July 2, 1906, \$30,000,000 in these bonds were advertised to be sold to the highest bidder on July 20. When this advertisement was published the market price of Government 2 per cent consols having nineteen years to run was 1.0325. The Panama bonds, payable at the option of the Government after ten years and due in thirty years, brought 1.0436. This price was obtained by calling the \$10,000,000 of special deposits made in February of that year, which was secured by other than Government bonds, and by making other and additional deposits to be secured by Government In other words, a market for Government bonds was created bonds. which stimulated their price.

SECRETARY OF THE TREASURY.

WEAKNESS OF OUR CURRENCY SYSTEM.

The harvest of 1906 overtaxed our granaries, our warehouses, the carrying capacity of our railroads, and, in conjunction with our unprecedented industrial activity, strained well-nigh to the limit the credit possibility of the country. A cotton crop sometimes estimated at fourteen million bales, seven hundred and fifty million bushels of wheat, near three billion bushels of corn, three hundred million bushels of potatoes, garnered in a single season, required both actual money and bank credit based thereon. During the summer months grain sacks were not in use, granaries and warehouses were empty, freight cars stood on sidetracks, business men fished in mountain streams or rested at vacation resorts. Meanwhile the banks were comfortably well supplied with money, and interest rates were low. Everything seemed serene to everybody except to those who recognized that in this latitude crops mature in the fall.

Precautionary steps taken.

The Government quarantines against yellow fever; it spends millions to protect the people against unwholesome food; it inspects banks in the interest of depositors, and does a thousand other things to safeguard the people against disaster of various kinds. This policy of governmental supervision receives universal approbation. Believing it to be the duty of the Government also to protect the people against financial panics, which, in this country, have caused more mental and more physical suffering than all the plagues known to man, and recognizing that under our system no possible cooperation can be secured among banks, each independent of the other, and finding these institutions in the interior sending their money to be loaned on call in the cities, and the reserve of the country, even in the idle season, very low, the Secretary of the Treasury undertook the task of making some slight provision for the inevitable. He withdrew from the channels of trade \$60,000,000 and locked it This was accumulated in part by excessive revenues and in up. part by deliberate and premeditated withdrawals. His only excuse for withdrawing the people's money when they did not need it, and when its presence invited speculation, was to have it ready to restore when they did need it, and when its absence would bring certain disaster.

A condition.

At the approach of autumn, business men returned to their desks fresh for more intense activities. Crops began to mature, granaries and warehouses began to fill, freight cars were put in commission, checks and drafts were drawn in multiplied number and in multiplied amounts, while the people naturally carried in their pockets more ready cash than at other seasons. The strain inevitable began to develop. Interior banks called their loans and shipped the proceeds home, but in some instances seemed to think it strange that the withdrawal of the actual money from financial centers, whither it had been sent to be loaned on call, should cause any stringency at these centers. Those who studied to write articles that would surely be read, and neglected to study actual conditions, attributed the noticeable tension not to increased business, but to the presence of sudden speculation.

It becomes acute.

It was not long until warehouses were overflowing and railroads. found themselves utterly unable to transport the tendered freight. Before the first of September, great quantities of freight had accumulated west of the Rocky Mountains, which five transcontinental railroads combined did not have trackage enough nor equipment sufficient to transport. A little later ships were compelled to tie up at lake ports, unable to unload in warehouses or in cars. The New York Central Railroad, with its four tracks, did not have available cars enough to carry the freight tendered at Buffalo. To meet unprecedented demands, its board of directors at a single meeting appropriated \$27,000,000 for additional equipment. Other roads were equally congested and equally liberal in their plans and in their appropria-The principal railroads of the country within a period of tions. ninety days appropriated more than \$100,000,000 for additional equip-It soon became impossible to place an order for steel rails ment. or other equipment to be delivered in twelve months.

Treasury relief.

Finding transportation facilities inadequate to promptly export our agricultural products, the Secretary of the Treasury deemed it wise to again facilitate the importation of gold from abroad with which to carry them until they could be exported. Under plain and unequivocal authority of law, and without a penny of expense to the Government, approximately another \$50,000,000 of gold was brought from abroad and turned into the channels of trade. In addition, \$26,000,000 of the money withdrawn in midsummer was restored. Of this, \$3,000,000 was given to New York City and the same amount tendered to Chicago, a part of which was declined, however, because the banks found it impossible to borrow the bonds with which to secure it and unprofitable to buy them. Boston, Philadelphia, St. Louis, and New Orleans each received \$2,000,000; Baltimore, Louisville, Kansas City, Cleveland, and Cincinnati \$1,000,000 each; Pittsburg, Buffalo, Minneapolis, Milwaukee, Detroit, St. Paul,

SECRETARY OF THE TREASURY.

Omaha, Des Moines, Denver, Sioux City, Memphis, Peoria, Atlanta, Nashville, and Sioux Falls approximately \$500,000 each. Meanwhile, sensational writers told the people that all this was being done for the encouragement of speculation on Wall Street. If those who recognize that a deposit of money at Denver relieves financial tension at Wall Street will also acknowledge that a deposit in New York relieves financial stringency at Denver, no material harm will ensue. Money is almost as liquid as water and finds its level about as quickly.

More bank-note circulation.

The Secretary also offered to accept satisfactory security, other than Government bonds, for Government deposits to the extent of \$18,000,000, conditioned that the bonds thus released should be immediately made the basis of circulation by banks for which circulation had been already prepared, and further conditioned that the same should be retired at the rate of \$3,000,000 per month between March 15 and September 1. This is the maximum contraction of national-bank circulation during the summer months which the Secretary of the Treasury has power, under the law, to enforce, or even to permit.

The effect.

It is never possible to measure the influence of Treasury transactions such as are here described, nor to state what our experience would have been had the Treasury failed to act in a given crisis. One man of very large experience, with business interests in several States, who never made a speculative transaction in stocks or bonds, recently expressed the opinion that but for the precautionary measures adopted by the Treasury the price of every bushel of grain in the United States would have declined ere this 10 cents. Business men in western cities have crossed the street to express appreciation and to give assurance that the action taken was immedately felt in their localities, though in some instances at no small distance from any city where a deposit was actually made.

Much-needed elasticity.

These cases have been thus reviewed, not for the purpose of expressing an opinion as to the wisdom or want of wisdom exercised by this Department, but solely as the basis of an argument in favor of some Congressional legislation on the subject of a more elastic currency. Every other instrument of business from grain sack to merchant ship responds in some measure at least to the actual needs of commerce, while the money of the United States remains a fixed quantity.

43

REPORT ON THE FINANCES.

Methods discussed.

Various methods have been suggested by which this well-recognized defect in our monetary system may be corrected. Committees composed of prominent financiers have met, deliberated, devised, and made reports. Financial writers, doctrinaires, practical business men, and impractical theorists, men of experience and those wholly without, have discussed the question with much learning and occasionally in much ignorance. This is all very welcome. Frequently the most impracticable and unthinkable plan will suggest something wise or help to eliminate what is unwise.

Divergent views.

Unfortunately, but naturally, even the reports of committees appointed because of their recognized experience and intelligence are quite divergent. On one thing only is there well-nigh universal agreement—all recognize the necessity of a currency system that will contract when money is redundant as promptly as it will expand when money is scarce. Inflation is not the remedy. A currency that will not as promptly contract as it will expand would be harmful.

Partial agreement.

Most of the reports of committees indorse all the essential features of the suggestions contained in recent reports of the Secretary of the Treasury, where heavily taxed additional national-bank circulation is recommended. The most important feature of this plan is the certainty of retirement when the extraordinary demand ceases. Its retirement will be accomplished not by collecting in the actual notes and redeeming them, but by allowing the bank issuing the same to make a corresponding deposit with the Treasury or at a subtreasury. This accomplishes the contraction, and the bills themselves will sooner or later be returned and charged against this Interest on the issue will of course cease when the deposit deposit. By eliminating the words "secured by United States is made. bonds deposited with the Treasury of the United States" from the present bank note, the additional circulation issue need contain no distinguishing feature. The Government should accept the tax as a premium for underwriting the issue, and should guarantee its prompt redemption. The people have become familiar with national-bank notes and will not discredit them, though they fail to recite the fact that bonds have been deposited against them. The ultimate redemption of national-bank notes is now guaranteed by the Government by reason of the Government's liability on the bonds deposited for their security. The direct guarantee of the Government would not change this essential feature so far as the public is concerned, and the tax collected would cover the risk many fold.

German plan.

There is nothing particularly new in this plan. Barring the Government's guarantee, which, in view of recognized public sentiment against unguaranteed currency, I think wise to provide in any and all currency, it is the application as far as possible of the German plan to our present system. In Germany the rate on uncovered currency is 5 per cent, and the current interest rates are lower there than in the United States. It is questionable whether any lower rate of tax in this country would insure prompt retirement. I deem it inappropriate, however, to carry my recommendations to the details of legislation. Both the plan to be adopted and the details of the plan must be worked out by the legislative branch under such advice as it may call to its aid. Only on the subject generally does this Department commit itself.

Credit currency.

Much can be said in favor of credit currency for permanent-maintenance. The addition thereof to our present currency system has been urged for half a century. Many bills have been introduced embodying the plan; Congressional committees have from time to time made favorable reports thereon; and it has quite recently received the unqualified indorsement of a joint committee representing commercial and banking organizations and composed of men of the very highest business and financial standing.

If a new currency system were being devised, unquestionably this plan would be included, and it might possibly take the place of the present bond-secured circulation. No one now, however, recommends it as a substitute. Those who favor it propose its incorporation into, rather than its substitution for, our present system.

Whether it will work as freely and as automatically in conjunction with other bank-note circulation as when the entire issue of bank notes is based on credits can be determined only by trial. To what extent the existence of State banks, savings banks, and trust companies will afford a resting place for such an issue is another matter, which can not be computed. Until the experiment is tried both these elements will remain matters of estimate if not of conjecture. It must not be forgotten that a given per cent of increased rapidity of redemption when money is redundant over that prevailing when money is scarce will not work the same aggregate of contraction when less than one-fourth of the bank circulation is based on credits as would result if all bank circulation were of the kind proposed.

The circulation of the country has increased during the last five years more than \$600,000,000, or \$120,000,000 per annum, and business interests have certainly kept pace with this increase, and interest rates throughout the world are now unusually high. I would not, therefore, view even with apprehension of evil any credit currency legislation so restricted as to render impossible the permanent maintenance of more than \$200,000,000.

The limitation of \$3,000,000 per month.

It has frequently been suggested that if the limitation of \$3,000,000 in the amount that may be deposited by national banks for the retirement of circulation were removed greater elasticity would ensue. I very seriously doubt the proposition and beg to cite some experiences.

No sooner was the new issue of Panama bonds advertised in July, 1906, than banks throughout the country commenced to retire their circulation that they might sell their bonds, a process which, but for the provision limiting the amount of retirement to \$3,000,000 per month, would have probably pounded the price of 2 per cent bonds approximately to par. Several times when deposits have been made, resulting in an advance in the price of consols, national-bank circulation has been retired and the bonds sold at an advance. In several instances banks have sought to be made depositaries of Government money on the ground that there was a scarcity in their locality, and when designated have tried to retire their circulation so as to use the bonds on which the circulation was based as security for the deposit.

It may be said of such a course that it is natural and inevitable, and I cite it as one reason for the suggestion on page 54 hereof that it would be wise to clothe the Secretary of the Treasury with discretion whether he will allow retirement of circulation at any given time, and to place such limitation thereon as in his judgment will best conserve the business interests of the country.

Central bank.

Several other plans have been proposed for supplying the element of elasticity in our currency system. Many practical and well-informed financiers have recommended a central Government bank patterned, in some measure at least, after those of the principal financial countries of Europe. The abolition of the independent treasury would be of course involved in such a plan. Government money would be then regularly deposited in this central bank, from which disbursements would be made, and the Government's supervision of and interference with the monetary operations and the financial condition of the country would be effectually eliminated.

At first blush this seems desirable, but in practice I fear it would soon be found to work less satisfactorily than the present system. Such a bank would of necessity be governed by a board, the members of which would doubtless have outside interests. They would be responsible to no administration, to no political party, and each could shift the responsibility from himself to the board as an aggregation. It is doubtful whether such an institution could be managed less selfishly and more in the interest of the people generally than the Treasury Department has been conducted even under the most unfortunate management to which it ever has been subjected. The Treasury has always been the bloody angle of criticism of an administration, but no critic has ever charged the head of this Department with cupidity or with operations having selfish ends in view.

Possibly a central bank could be kept forever free from operations having for their end larger dividends, but there is little justification for such a hope.

Cooperation.

If some method could be devised by which the national banks of the country could be made to cooperate, the major portion of legitimate criticism to which our present system is now subjected would soon vanish. That the banks do not now cooperate in the slightest degree is self-evident. New York City, for instance, has the only call money market in the world, but so impossible is it to secure cooperation between the financial institutions of that great city that the current rate on call money, as I have already shown, on the morning of a certain day was 12 per cent, with some loans as high as 14 per cent, while in the afternoon it dropt to $5\frac{1}{4}$ per cent. During a part of the previous season millions were loaned at 1 per cent and some below, and later in the season the rate touched 100 percent. It must be manifest to laymen even, as well as to financiers, that such want of cooperation, resulting in such fluctuation in interest rates, offers little encouragement to the hope that international balances in the near future will be kept in this country. I do not criticise these banks for failing to cooperate, for I have been repeatedly assured that cooperation is impossible.

Another indication of the want of cooperation, not only in New York City but quite as much throughout the country generally, is discoverable in reserves. Admittedly, conditions have been no worse in New York than elsewhere, though the weekly statement reveals conditions only in that city. Repeatedly within the last five years surplus reserves have been practically exhausted in midsummer, and sometimes the aggregate surplus reserve of the associated banks in New York City has only equaled that reported by a single institution. I must not be understood as expressing an opinion that this condition indicates any want of conservatism, but I do know that if there were the slightest measure of cooperation between the national banks of the country a very large reserve would be gathered in midsummer to provide for increased business operations incident to the crop-moving season and the revival of commercial activity annually witnessed during the autumn and winter months.

REPORT ON THE FINANCES.

Can cooperation be enforced by law?

Whether cooperation can be secured by statute is a question on which students of the situation will of course differ. I suggest for the consideration of Congress two possible plans: First, a graduated reserve, determined by statute. The objection to this plan is that conditions vary with different seasons. Sometimes the crisis is deferred, and occasionally the most stringent season is during the spring. Second, a better plan, in my judgment, would be to clothe the Secretary of the Treasury with authority to require all banks, at certain times fixed by him, to slightly and gradually increase their reserves and hold the same within their own vaults, with corresponding authority to release the same from time to time as in his judgment will best serve the business interests of the country.

In quarantining against yellow fever, the Government grants great latitude and well-nigh unlimited discretion to the Secretary of the Treasury through the Marine-Hospital Bureau. Actual experience justifies the statement that the American people hold the Secretary of the Treasury quite largely responsible for financial conditions. This being true, he should have that measure of discretion and authority requisite to enable him to fulfill this expectation. Can he not be trusted as a financier as well as in the capacity of an expert health officer?

An illustration.

Suppose the national banks were required either by statute or by direction of the Secretary of the Treasury to increase their reserve, and to carry the same in their own vaults, in an amount equal to 1 per cent of their capital stock every fifteen days from the first day of April to the first day of September. This contraction under ordinary conditions prevailing in these months would work no hardship upon any institution, and would result in the collection of \$80,000,000 of reserve money with which to meet the demands of increased business. It is probable, and under ordinary circumstances well-nigh certain, that the banks would find such a contraction profitable, for interest rates during the summer would not be likely then to drop excessively low, and it is equally certain that the rates would not be dangerously high in the fall and winter.

It may be said that the banks can now strengthen their reserve during the summer on their own motion. The best answer to this is the admitted fact that they do not do it to any considerable extent, and for the reason already pointed out—want of cooperation. No one bank, nor the banks of any one city, will contract their reserve when all other banks are loaning the last available dollar at the best rate obtainable, however low that rate may be. National-bank circulation might be made the basis of contraction instead of reserve. Suppose the Secretary of the Treasury had authority to order the national banks to make deposit to the credit of the redemption fund of an amount equal to 1 per cent of their circulation every fifteen days during the above-mentioned period. This would result in a contraction of national-bank circulation amounting to sixty millions, and by requiring the bonds to remain on deposit this amount could again be issued during the fall and winter as necessity required.

If the Secretary of the Treasury were given \$100,000,000 to be deposited with the banks or withdrawn as he might deem expedient, and if in addition he were clothed with authority over the reserves of the several banks, with power to contract the national-bank circulation at pleasure, in my judgment no panic as distinguished from industrial stagnation could threaten either the United States or Europe that he could not avert. No central or Government bank in the world can so readily influence financial conditions throughout the world as can the Secretary of the Treasury under the authority with which he is now clothed.

If it be said that such power, augmented with the authority which I have outlined would be dangerous, I reply that no man has yet been at the head of the Treasury Department, and no man is likely to occupy that position, in whose hands such authority would not be The best financial advice on earth is at his command, and the safe. selfishness or the unselfishness of the advice tendered, and, therefore, the value thereof, can be readily weighed. The advice which he can thus obtain is, in my judgment, far better and would prove far safer than would be the direction which might be given by a board of governors of a large centralized bank. In all administrative matters large authority, and therefore great responsibility, with strict accountability, is the better policy. A public officer, spending the best years of his time at a salary grossly inadequate to pay living expenses, naturally looks for no reward but the inner consciousness of having fulfilled the requirements of his position.

Finally.

It is hoped that the discussion of several ways by which the muchdesired end may be accomplished will not tend to bewilder, but rather to make clear that the adoption of any one or more of them will work much good, while the failure to provide some prompt means of relief will most certainly invite disaster. Under the Constitution it does not lie with an administrative officer to urge any one plan to the exclusion of all others. It is the duty of the head of this Department to point to defects, and he may suggest ways in

ł,

which, in his opinion, they can be cured. The legislative branch of the Government must, in the nature of things, have credit for whatever laws are passed, and it must likewise bear alone the responsibility if it fail to act after threatened dangers have been clearly defined.

FORMER RECOMMENDATIONS RENEWED.

I desire to repeat, and emphasize if possible, several of my recommendations of previous years.

First. A law giving trust companies of large capitalization in large cities the privilege of incorporating under national law with corresponding supervision, but with no authority to issue circulation.

Second. The establishment of a Department savings bank in Washington upon the mutual plan prevalent in most of the New England States, in the hope of encouraging the habit of saving among Government clerks.

Third. A law licensing customs brokers, or some other provision by which the customs department can protect itself from the few disreputable practitioners before it.

Fourth. A provision for a nominal filing fee for entering protests and appeals in customs cases, recoverable should the case be successfully prosecuted.

Fifth. The abolition of all fees and perquisites of collectors and other customs officers.

Sixth. A liberalization of our drawback laws. Any provision that will assist in securing a foreign market for the product of American labor has the unqualified indorsement of the present head of this Department.

Seventh. Legislation which will insure a merchant marine. For years I have urged this in season and out of season. The next twenty years will witness as intense commercial contests for trade expansion as were ever prosecuted for territorial expansion. It is idle to suppose the United States can attain any considerable measure of success without as favorable equipment as its commercial competitors.

Eighth. The establishment of a pneumatic tube system between the several Executive Departments within the District of Columbia.

Ninth. The early erection of a Hall of Records on the site already purchased. The saving in rent would more than pay interest on its cost, and its erection would result in greater efficiency in all the Departments.

LESLIE M. SHAW,

Secretary.

To the SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TABLES ACCOMPANYING THE REPORT ON THE FINANCES.

LEGAL-TENDER NOTES.							
ne act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denomi- nations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private,	Indefinite	On demand	None	Par	450, 000, 000. 00		346, 681, 016. 00
within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bonds. The act of July 11, 1862 (12 Statutes, 522), authorized an additional issue of $\$150,000,000$, of such denominations as the Sec- retary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than							
\$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000, of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the

τ. Δ

Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822). The act of May 31, 1878 (20 Statutes, 87), provides that no more of the United States legal-tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled, or destroyed, but shall be reissued and paid out again, and kept in circulation.

The act of March 14, 1900, provides that United States notes, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed in said act, and that in order to secure the prompt and certain redemption of such notes it shall be the duty of the Secretary of the Treasury to set apart in the Treasury a reserve fund of one hundred and fifty million dollars in gold coin and bullion, to be used for such redemption purposes only, and that whenever and as often as any of said notes shall be redeemed fro said fund it shall be the duty of the Secretary of the Treasury use said notes so redeemed to restore and maintain the reserve fur so established-first, by exchanging the notes so redeemed for a gold coin in the general fund of the Treasury; second, by accepting deposits of gold coin at the Treasury or at any subtreasury in e change for such notes; third, by procuring gold coin by the use said notes in accordance with the provisions of section 3700 of the Revised Statutes of the United States. The above-mentioned a also provides that if the Secretary of the Treasury is unable restore and maintain the gold coin in the reserve fund by the for going methods, and the amount of such gold coin and bullion said fund shall at any time fall below one hundred million dolla it shall be his duty to restore the same to the maximum sum of o hundred and fifty million dollars by borrowing money on the cred of the United States, and for the debt so incurred to issue and s coupon or registered bonds of the United States bearing interest the rate of not exceeding three per centum per annum, payat quarterly, the bonds to be payable at the pleasure of the Unit States after one year from the date of their issue, and to be payab principal and interest, in gold coin of the present standard value the gold coin received from the sale of said bonds to be exchange for an equal amount of the notes redeemed and held for exchange and the Secretary of the Treasury may, in his discretion, use sa notes in exchange for gold, or to purchase or redeem any bonds the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet de ciencies in the current revenues.

 $\cdot 62$

The act of March 14, 1900, section 11, authorizes the Secretary of the Treasury to receive at the Treasury any of the outstanding bonds of the United States of the five per cent loan of 1904, of the four per cent funded loan of 1907, and of the three per cent loan of 1908-1918, and to issue in exchange therefor an equal amount of coupon or registered bonds of the United States, in such form as he may prescribe, in denominations of fifty dollars, or any multiple thereof, bearing interest at the rate of two per centum per annum, payable quarterly, such bonds to be payable at the pleasure of the United States after thirty years from the date of their issue. The principal and interest of said bonds to be payable in gold coin of the present standard value. and to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. The bonds to be issued at not less than par and numbered consecutively in the order of their issue; and when payment is made the last numbers issued shall be first paid, and this order followed until all the bonds are paid. Interest to cease three months after any call made by the Government to redeem.

TREASURY NOTES OF 1890.

The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of the Treasury to purchase, from time to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered, in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy one and twenty-five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes; and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes provided for, the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.

TREASURY NOTES OF 1890—Continued.							
The act of November 1, 1893 (28 Stat., 4), repeals so much of the act of July 14, 1890, as directs the Secretary of the Treasury to purchase from time to time silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, and to issue in payment for such purchases Treasury notes of the United States. The act of June 13, 1898 (30 Stat., 467), directs that all of the silver bullion in the Treasury purchased in accordance with the provi- sions of the act of July 14, 1890, shall be coined into standard silver dollars as rapidly as the public interests may require, to an amount of not less than one and one-half millions of dollars in each month, and that said dollars, when so coined, shall be used and applied in the manner and for the purposes named in said act. The act of March 14, 1900, provides that United States notes, and Treasury notes issued under the act of July 14, 1890, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed by said act, and requires that the Secretary of the Treasury shall set apart in the Treasury a reserve fund of one hun- dred and fifty million dollars to be used for such redemption pur- poses only. It also provides that it shall be the duty of the Secre- tary of the Treasury, as fast as silver dollars are coined under the provisions of the act of July 14, 1890, to retire and cancel an equal amount of Treasury notes whenever received into the Treas- ury, and upon such cancellation to issue silver certificates against the silver dollars so coined.							
NATIONAL-BANK NOTES (REDEMPTION ACCOUNT).				-			
The act of July 14, 1890 (26 Stat., 289), provides that balances stand- ing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption, $*$ * and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public debt statement as .debt of the United States bearing no interest.							\$42, 635, 639.00 2, 337, 161, 839.04

a In the amount here stated as the outstanding principal of the public debt are included the certifi-cates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years. ^b Exclusive of gold, silver, currency certificates, and Treasury notes of 1890 held in the Treasurer's cash, and including bonds issued to the several Pacific railroads not yet redeemed. ^c Exclusive of gold and silver certificates and Treasury notes of 1890 held in the Treasurer's cash.

Note 1.—Annual interest charge computed on amount of outstanding principal at close of fiscal year and is exclusive of interest charge on Pacific Railway bonds. Note 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed. Note 3.—The temporary loan per act of July 11, 1862, is included in the 4 percents from 1862 to 1868, inclusive, with the exception of the amount outstanding August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days' notice after thirty days, but being constantly changing it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on Ġ an average for the year.

TABLE H.-INTERNAL AND CUSTOMS REVENUE AND EXPENSES OF COLLECTING, FROM 1858 ro 1906.

a Based on warrants issued.

^a Based on warrants issued. ^b The cost of collecting the internal revenue embraces the following items: Salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforc-ing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gagers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, and expenses of detecting and punishing violations of internal-revenue laws. ^c The expenses of collecting the revenue from customs includes all sums drawn from the appropria-tion made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gaging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include expenditures for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor expenditures for erecting new buildings, all of which are paid for from specific appropriations made for those suproses.

The expension include for those purposes. The expenses of collecting internal and customs revenue do not include the expenditures for salaries, etc., incident to auditing these accounts in the Departments at Washington.

NOTE 1.—Specie payments were suspended from January 1, 1862, to January 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1375, inclusive. NOTE 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning

Note 2.—In 1970 Substituty shift again came into use, and is included in this statement, beginning with that year. Note 3.—The coinage of standard silver dollars began in 1878, under the act of February 28, 1878. Note 4.—Specie payments were resumed January 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date. Note 5.—For redemption of outstanding certificates an exact equivalent in amount of the appro-priate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.

assets of the Government. Note 6.—This table represents the circulation of the United States as shown by the revised state-ments of the Treasury Department for June 30 of each of the years specified. Note 7.—The details of the foregoing table, showing the amount of each kind of money in circula-tion each year since 1860, are omitted; but they may be had upon application to the Secretary of the Treasury, Division of Loans and Currency, where a circular covering information on the subject has been prepared for distribution.

98

APPENDIX TO THE REPORT ON THE FINANCES.

APPENDIX.

REPORTS OF HEADS OF BUREAUS.

REPORT OF THE TREASURER.

TREASURY DEPARTMENT, OFFICE OF THE TREASURER, Washington, D. C., October 15, 1906.

SIR: The transactions of the Treasury of the United States for the fiscal year ended June 30, 1906, and its condition on that and subsequent dates, are presented in the annexed tables.

REVENUES AND EXPENDITURES FOR 1905 AND 1906.

The activity of business and the general prosperity of the country are reflected in the ordinary receipts and expenditures of the Treasury during the fiscal year 1906. The revenues (exclusive of the Post-Office Department) were \$594,454,121.67 and the expenditures \$568,784,799.06. The net result is a surplus of \$25,669,322.61, as compared with a deficit of \$23,004,228.60 for the fiscal year 1905.

The comparison shows an increase of \$38,453,020.86 in customs, or 14.6 per cent; and the internal-revenue collections, keeping pace with the customs, show an increase of \$15,054,472.06, or 6.4 per cent; the receipts from lands are increased by \$20,583.85, while the revenues from miscellaneous items are decreased by \$3,348,639.95. It will be observed that the burden of taxation falls about equally upon foreign imports and domestic products.

REVENUES AND EXPENDITURES, FIRST QUARTERS OF 1906 AND 1907.

The revenues for the first quarter of 1907 are more than the expenditures by \$5,871,314.27, and as compared with the same period a year previous show an increase of \$12,788,915.74.

In the annexed table the items for the two quarters are compared:

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE POST-OFFICE DEPARTMENT.

The receipts on account of the Post-Office Department for the fiscal year 1906 were \$178,593,821.33 and the disbursements \$188,736,-607.24, of which amounts \$113,210,993.25 was received and expended directly by postmasters without being deposited in the Treasury. To cover the deficit, \$12,850,000 was drawn from the appropriation made by Congress.

There was an increase of \$18,898,894.88 in the receipts and of \$14,141,674.01 in the expenditures, as compared with the preceding year. The statement of receipts and disbursements will be found on page 150 of this report.

TRANSACTIONS IN THE PUBLIC DEBT.

The receipts and disbursements on account of the public debt during the fiscal year 1906 have been limited principally to transactions incident to the exchange of \$53,032,400 of the loan of 1908–1918 and the loan of 1907 for consols of 1930 and to replacing or retiring the

worn and mutilated paper currency of the country. The receipts show an increase of \$58,422,768.50, as compared with the preceding year, and the disbursements an increase of \$7,374,627.53. The record is given in the following table:

PUBLIC DEBT 1905 AND 1906 AND FIRST QUARTER OF 1907.

The public debt, including certificates and Treasury notes offset by an equal amount of cash in the Treasury June 30, 1905, aggregated \$2,274,615,063.84, and at the close of the fiscal year 1906 \$2,337,161,839.04, an apparent increase of \$62,546,775.20. The items of increase were consols of 1930 \$53,032,400, national-bank notes (redemption fund) \$10,408,537, gold certificates \$42,199,900, and silver certificates \$12,208,000, while reductions were made in the following accounts: Loan of 1908-1918 \$13,189,900, loan of 1907 \$39,840,450, refunding certificates \$1,250, matured loans \$242,110,fractional currency \$1,351.80, and Treasury notes \$2,027,000.

The total debt at the close of the first quarter of 1907 was \$2,392,-783,158.04, an apparent increase of \$55,621,319, resulting principally from the sale of \$30,000,000 of the Panama Canal loan, the deposit of \$2,938,539 of lawful money in excess of actual redemption of national-bank notes, and the issue of \$22,685,000 in certificates, for which an equal amount of gold and silver coins are held in the Treasury.

The items of debt for the three periods are compared in the following table:

	Rate.	When payable.	June 30, 1905.	June 30, 1906.	September 30, 1906.

PUBLIC	DEBT.	1905	AND	1906.	AND	FIRST	QUARTER	OF	1907.

EXCHANGE INTO CONSOLS OF 1930.

By public notice, September 28, 1905, the Secretary of the Treasury offered to receive in exchange for consols of 1930 securities of the loan of 1907, 4 per cents, and those of 1908, 3 per cents, reserving the right to discontinue the exchange of bonds without notice whenever, in his opinion, the interests of the Government may be best served thereby. The conditions were that the older bonds mentioned would be received at a valuation equal to their present worth to yield an income of $2\frac{1}{4}$ per cent per annum, and like amounts of United States registered or coupon bonds bearing interest at the rate of 2 per cent per annum would be issued in exchange therefor at a premium of 1 per cent. The exchange continued till November 29, when the Secretary of the Treasury canceled the option. Bonds to the amount of \$53,032,400 were exchanged and the details of the operation are combined in the annexed statement:

Title of loan.	Principal.	Accrued interest.	Present worth in excess of par value.
4 per cent funded loan of 1907	\$39, 842, 500. 00 13, 189, 900. 00	\$95, 287. 02 58, 153. 97	\$1, 153, 310. 86 264, 168. 67

		24, 100, 300. 00

ANTICIPATION OF INTEREST.

By authority of the Secretary of the Treasury the payment of the interest due on the public debt January 1, 1906, was anticipated and paid from and after December 15, 1905. The items of interest authorized to be prepaid were:

Loan.	Registered.	Coupon.	Total.
Funded loan of 1907 Consols of 1930	\$816, 574.00 2, 933, 686.75	\$353, 378.00 46, 025.00	\$1,169,952.00 2,979,711.75
Total	3, 750, 260. 75	399, 403.00	4, 149, 663. 75

On January 2, 1906, the Secretary of the Treasury authorized the immediate prepayment of the interest due on February 1, 1906. The items of interest due on February 1 were:

Loan.	Registered.	Coupon.	Total.
Loan of 1908-1918 Loan of 1925	\$243, 284. 70 932, 297. 00	\$236, 306. 25 252, 602. 00	\$479, 590. 95 1, 184, 899. 00
Total	1, 175, 581. 70	488, 908. 25	1,664,489.95

PANAMA CANAL LOAN.

The Secretary of the Treasury on July 2, 1906, invited bids for 330,000,000 of the bonds of the Panama Canal loan authorized by section 8 of the act approved June 28, 1902, and supplemented by section 1 of the act of December 21, 1905. The bids were opened July 20, 1906, and the entire amount offered was sold at an average premium of 4.036+, and the amount realized from the sale was 331,210,817.95.

RESERVE AND TRUST FUNDS.

The redemptions from the reserve fund during the last fiscal year were, in United States notes, \$11,452,195; in Treasury notes, \$192,810, making a total of \$11,645,005. Thru the process of exchange for gold, the redeemed notes were restored to the general fund and the reserve thus maintained at the amount fixt by law.

The trust funds, consisting of gold coin for the redemption of outstanding gold certificates and standard silver dollars for the redemption of outstanding silver certificates and Treasury notes, attained a maximum at \$1,044,638,869 during the last fiscal year,

REPORT ON THE FINANCES.

and showed a net increase of \$52,380,900 at its close, as compared with the same period twelve months earlier.

The transactions in this account are recorded in the statement following:

	Outstanding	Fiscal y	ear 1906.	Outstanding
	June 30, 1905.	Issued.	Redeemed.	June 30, 1906.
Gold certificates. Silver certificates. Treasury notes.	465, 265, 000	\$200,830,000 321,156,000	\$158, 630, 100 308, 948, 000 2, 027, 000	\$559, 779, 869 477, 473, 000 7, 386, 000

AVAILABLE CASH BALANCE.

The available cash balance (including the gold reserve) at the close of the last fiscal year was \$330,689,354.82. These figures have been exceeded in previous years, and noticeably so on September 30, 1903, when the balance attained a maximum at \$389,417,184.22.

REPORT ON THE FINANCES.

The amount of the balance in the Treasury at the end of each month from January, 1902, will be found in Table No. 31, page 183: and for July 1, in each year since 1896, in the following table:

Available Cash Balance (including the Reserve Fund), from the Revised Statements, on the Dates Named.

GOLD IN THE TREASURY.

The Treasury holdings of gold continues to attract the attention of financiers both at home and abroad, and from the new record made each year it is evident that a large share of the worlds' product of the precious metal comes to the United States. The amount of gold held in the Treasury at the close of the fiscal year 1906, was \$807,051,690.30.

By October 15, 1906, the gold in the Treasury had taken on a growth of \$64,842,209.47, and attained a maximum at \$871,893,899.77. The Treasury holdings of gold on July 1 in each year from 1897,

set apart for the respective uses, was as here stated:

Gold 1	IN	THE	TREASURY.

BONDS HELD AS SECURITY FOR NATIONAL BANKS.

There were 470 new national banks organized during the fiscal year 1906, at the close of which, the Treasurer held as security for the circulating notes of national banks \$520,605,210 in United States bonds, an increase of \$52,538,270 as compared with the holdings at the close of the fiscal year 1905. The bonds pledged to secure deposits of public funds showed an increase of \$15,170,775.

The amount of each kind of bonds held is stated in the table following

Bonds held for National Banks, close of June 30, 1904, 1905, and 1906 and September 30, 1906, and Changes During 1906.

PUBLIC DEPOSITS IN NATIONAL BANKS.

At the close of the fiscal year 1905 the balance of public moneys in national banks to the credit of the Treasurer of the United States was \$65,084,246.87, against which there was an unpaid call for \$14,659,500, issued by the Secretary of the Treasury April 7, 1905, payable July 15, 1905. Upon the payment of the call the balance in banks was reduced by the end of July to \$52,944,109.68 and remained practically at that figure until the end of February, 1906, when the Secretary of the Treasury made the following announcement:

In the month of February, just closed, the Treasury Department locked up about \$10,000,000—four and one-half millions by excess of Government receipts over expenditures and five millions by excess of deposits of lawful money for redemption of national bank circulation over and above the actual redemption. For this reason the Secretary of the Treasury will at once deposit \$10,000,000 of public funds in existing depositary banks. These deposits will be made entirely in important centers, and will be temporary only; depositary banks receiving them will be called upon to return the same on or about July 10.

The amount apportioned to and transferred to the banks in each city was as follows:

New York	\$3,100,000	Philadelphia\$1, 120,000
		St. Louis
Chicago	1,205,000	· · · · · · · · · · · · · · · · · · ·
New Örleans	1,000,000	Total
Boston	1,286,000	

By the end of March the balance of public moneys in national banks to the credit of the Treasurer had increased to \$64,855,236.07. During the early part of April there was a stringency in the money market, and call loans touched the highest level for April in twentyfour years—30 per cent. This was due largely to the requirements for commercial and farming purposes resultant upon the phenomenal prosperity of the country. The foreign exchange market showed the sympathetic influence of the monetary stringency in a sharp decline of 80 points in sight sterling, sufficient to make gold imports probable. Under such conditions the Secretary of the Treasury made the following announcement:

The price of exchange having reached the point where gold ought to have been imported, and believing the reason why it was not engaged to be the loss of its use during transit, the subtreasury at New York is authorized to accept bonds available as security in savings banks and to increase the deposits of any national bank desiring to import gold to any amount, when assured that the money would be immediately used in the engagement of gold for shipment to the United States, the same to be returned immediately on the arrival of the gold.

The effect of this action was instantaneous and the stringency in money rates disappeared.

The amount of gold imported by the national banks under the foregoing conditions was \$49,870,000. The date of the advance as well as the return of the temporary deposits are enumerated in the statement following:

Under provisions of law the greater part of the taxes in the District of Columbia is paid during the month of May and the collections are deposited in the Treasury of the United States. A large part of the money required for the purpose is withdrawn from local banks by the taxpayers, and as it is not returned to circulation immediately, the Secretary of the Treasury, in order to avoid a stringency in local financial conditions, decided to temporarily increase the deposits of public moneys in local national banks, and on May 1 \$4,220,000 was apportioned and transferred to the depositaries, 10 per cent of the same to be returned monthly after the 1st of July.

By means of the foregoing measures the balance in depositary banks to the credit of the Treasurer at the end of April was \$90,954,996.86, and by May 5 it had been increased to \$102,708,123.19, the highest point reached during the fiscal year 1906, after which the amount was gradually reduced to \$81,101,775.33 by June 30, 1906.

During the latter part of July in the current fiscal year the return to the Treasury by banks of the temporary deposits made in March and May, and the deposit of proceeds of the Panama Canal bond sale increased the cash holdings of the Treasury beyond its immediate requirements. The Secretary of the Treasury, in order to afford the largest measure of relief to aid in the movement of the unusual crops of the country, utilized the national banks for an increase of the public deposits for the purpose. The balance of public moneys, by the end of August, in national banks to the credit of the Treasurer had grown to \$96,217,044.76.

Early in September the conditions in the money market were such that gold imports were facilitated by the Secretary of the Treasury under the terms and limitations granted for like purposes in April preceding. The amount of gold imported on this occasion by the banks was \$34,119,000 to October 15, 1906.

The temporary deposits made with banks importing gold, and return of the same to the Treasury, may be observed in the statement following:

REPORT ON THE FINANCES.

The accumulation of money in the vaults of the Treasury continued near the close of September, showing a very large excess of receipts over expenditures. Under such conditions on September 27 the Secretary of the Treasury announced that \$26,000,000 of the public moneys would be deposited with existing depositary banks in the following-named cities:

New York	\$3,000,000	Philadelphia	\$2,000,000
Boston	2,000,000	New Orleans	
St. Louis	2,000,000	Louisville	1,000,000
Baltimore	1,000,000	Cleveland	1,000,000
Kansas City	1,000,000	Buffalo	500,000
Pittsburg.	500,000	Milwaukee	500, 000
Minneapolis	500,000	Cincinnati	
Detroit	500,000	Omaha	500, 000
St. Paul	500, 000	Denver	500, 000
Des Moines	500, 000	Memphis	500, 000
Sioux City	500,000	Atlanta	500, 000
Peoria.	500, 000	Sioux Falls	500,000
Nashville		· · · · · · · · · · · · · · · · · · ·	
Chicago		Total	26,000,000

stating that-

Security in bonds which are lawful investments for savings banks of New York and Massachusetts will be accepted for these deposits at 90 per cent of market value. The deposits are temporary in character, to be returned as soon as the pressure is over, beginning, probably, February 1, next.

The balance in depositary banks to the credit of the Treasurer at the end of September was \$124,088,475.42, and by October 15 the amount had increased to \$144,907,857.41.

GENERAL STOCK OF MONEY IN THE UNITED STATES.

The monetary stock of the country at the close of the fiscal year 1906 was \$3,069,976,591, an increase of \$186,866,727 as compared with that of twelve months earlier. The growth in gold was \$118,050,777, in silver \$5,450,396, and in national-bank notes \$65,392,554, while Treasury notes declined \$2,027,000. There was no change in the volume of United States notes.

By October 1 the general stock of money had advanced to \$3,148,732,552.

The amount of each kind of money embraced in the general stock is given here:

RATIO OF GOLD TO THE TOTAL STOCK OF MONEY.

The extraordinary addition of \$118,050,777 in gold to the money of the country during the past fiscal year raised the ratio of that metal to the total stock to 48.07 per cent.

In the first quarter of 1907 the ratio of gold to the total stock attained a maximum at 48.9 per cent.

The ratio of gold to the total stock of money on July 1 in each year since 1897 is recorded in the table following:

RATIO OF GOLD TO TOTAL STOCK OF MONEY FROM JULY 1, 1897.

[From the revised statements of the Treasury Department.]

Date.	Total stock o money.	f Gold.	Per cent.
July 1, 1897 July 1, 1898 July 1, 1898 July 1, 1899 July 1, 1900 July 1, 1900 July 1, 1902 July 1, 1902 July 1, 1903 July 1, 1904 July 1, 1905 July 1, 1905	2,073,574,442 2,190,093,905 2,339,700,673 2,483,147,292 2,563,266,655 2,684,710,987 2,884,710,987 2,883,109,864	$\begin{array}{r} 861, 514, 780\\ 963, 498, 384\\ 1, 034, 384, 444\\ 1, 124, 639, 062\\ 1, 192, 594, 589\\ 1, 248, 681, 528\\ 1, 327, 656, 398\\ 1, 357, 655, 988\end{array}$	$\begin{array}{c} 36.52\\ 41.54\\ 43.90\\ 44.21\\ 45.29\\ 46.52\\ 46.51\\ 47.35\\ 47.09\\ 48.07 \end{array}$

MONEY IN CIRCULATION.

The total circulation during the past eight years advanced more than \$898,000,000, of which the gold mines contributed 54.6 per cent; such an expansion would indicate no peril to the stability of the currency.

At the close of the fiscal year 1906, the circulation was \$2,736,646-628, or a per capita of \$32.32. The increase during the year was \$148,763,975, of which \$48,942,586 was in gold coin and certificates, \$30,264,175 in silver coin and certificates, \$1,584,825 in United States notes and Treasury notes, and \$67,972,389 in national-bank notes.

By October 1 the total circulation had increased to \$2,812,133,694 and the per capita to \$33.08, an amount unparalleled in our history. The percentage of gold to total circulation became 43.6.

RÉPORT ON THE FINANCES.

Comparisons for the years since 1890 are presented in this table:

NOTE.-Currency certificates, act of June 8, 1872, are included in the amount of United States notes and Treasury notes during the years when they were in use.

CIRCULATION AND POPULATION.

The population of the United States, it is estimated, has increased over 8,000,000, or about 10 per cent, since July 1, 1900, and the money in circulation for the same period has taken on a growth of more than \$681,000,000, or over 33 per cent. The per capita circulation grew in the meantime from \$26.94 to \$32.32, an increase of nearly 20 per cent.

Statistics relative to the money in circulation and the population, by years, may be studied in the annexed table:

Fiscal year.	Money in circulation.	Population.	Circulation per capita.	Per cent of increase of popula- tion per year.	Per cent of increase of circula- tion per capita per year.

INCREASE IN POPULATION AND IN CIRCULATION PER CAPITA.

a Decrease.

CONDITION OF THE UNITED STATES PAPER CURRENCY.

The condition of the paper circulation of the country can not be accurately described by the experience of this office thru its redemption divisions, for the reason that only the unfit United States paper currency is redeemed, while all the national-bank notes fit or unfit for circulation are redeemed upon presentation. However there is a notable and widespread interest among the public in the supply of a cleaner or more sanitary currency. The sentiment is a laudable one and should be attainable, because the expenditure, as per tables of cost, is but a trifle as compared with the beneficent results. No government can afford to have its currency a source of conveyance of infectious diseases or a menace in any way to the public health. The profit it derives from the issuance of currency is ample compensation for the small expense that this change would It is gratifying to note that the House Committee on Bankinvolve. ing and Currency have this matter in charge and are making most painstaking investigation as to the merit of this proposition.

The acuteness of Treasury conditions has been so urgent for lack of adequate supply of bills of small denominations that banks and others rather than utilize subtreasuries have remitted direct to the Treasury for redemption, preferring to pay transportation charges both ways in order to save time and secure the small denominations desired. The shortage in the supply of small denominations has had a tendency to retain the currency much longer in circulation, and for this reason, the following recommendation from the last annual report is renewed for consideration of Congress, viz:

It is suggested that provision should be made that will enlarge the facilities to all holders to exchange worn for new currency, and in furtherance of this object, section 3932 of the Revised Statutes may be amended to permit holders of worn and defaced United States currency to forward the same by registered mail, without charge, to the Treasurer of the United States for redemption.

UNITED STATES NOTES.

The amount of United States notes, by denominations, issued and redeemed during the year, and outstanding June 30, 1905, and 1906, are given in the table following:

	Outstanding	Fiscal y	Outstanding		
Denomination.	June 30, 1905.	Issued.	Redeemed.	June 30, 1906.	
One dollar.	\$1,899,017			\$1,885,924

Net	346,681,016	107,840,000	107,840,000	346,681,016	

REPORT ON THE FINANCES.

The amount of United States notes redeemed in gold from January 1, 1879, to June 30, 1906, was \$646,608,672, but the volume outstanding is undiminished because of the provisions of law which require the notes so redeemed to be paid out again.

TREASURY NOTES OF 1890.

The Treasury notes of 1890 are gradually disappearing; as they are paid into the Treasury they are canceled, under the provisions of the act of March 14, 1900, and for those received other than for silver dollars, silver certificates are substituted. The amount redeemed and retired during the fiscal year 1906 was \$2,027,000. The total outstanding, by denominations, September 30, 1906, was \$7,021,000, offset by an equal amount of silver dollars held in the trust funds for their redemption when presented, as may be observed on page 128 of this report.

GOLD CERTIFICATES.

The demands for currency in large denominations are met by the issue of gold certificates against gold coin in the Treasury or for deposits of gold coin by holders thereof. The volume of these certificates outstanding at the close of the fiscal year 1906 was \$559,779,869, the highest point reached at the end of any year since the issue began in 1865.

The following statement shows the amount of each denomination issued and redeemed during the year, and the amounts outstanding June 30, 1905, and 1906:

	Outstanding	Fiscal y	Outstanding		
Denomination.	June 30, 1905.	Issued.	Redeemed.	June 30, 1906.	
Twenty dollars. Fifty dollars. One hundred dollars. Five hundred dollars. One thousand dollars. Five thousand dollars. Ten thousand dollars.	$\begin{array}{r} 41,284,455\\61,159,850\\14,442,000\\57,431,500\\54,655,000\end{array}$	\$66,000,000 12,200,000 16,800,000 4,900,000 11,200,000 5,750,000 83,980,000	\$42,315,000 10,086,600 14,363,500 3,603,000 8,947,000 2,045,000 77,270,000	\$198, 132, 164 43, 397, 855 63, 596, 350 15, 739, 00(1 59, 684, 500 58, 360, 000 120, 870, 000	
Total	517,579,969	200,830,000	158,630,100	559,779,869	

By October 15 the volume of gold certificates outstanding had advanced to \$610,611,869.

SILVER CERTIFICATES.

The volume of silver certificates outstanding increased during the fiscal year from \$465,265,000 to \$477,473,000, and this growth was entirely in denominations of \$5 and under.

The right to increase the amount of silver certificates outstanding depends entirely on the amount of free silver dollars in the Treasury. The supply is limited, and the Treasury is without resources to meet the demand for small bills. The silver certificates of the denominations of \$10 and above as they are redeemed are reissued in denominations of \$5 and under.

The extent of changes made in the denominations outstanding during the fiscal year 1906 may be studied in the annexed table:

	Outstanding	Fiscal y	Outstanding	
Denomination.	June 30, 1905.		Redeemed.	June 30, 1906.
One dollar. Two dollars Five dollars. Ten dollars. Twenty dollars. Fifty dollars. One hundred dollars. Five hundred dollars. Five hundred dollars. Five hundred dollars. DEMAND FOR SMALL DENOMINATIONS OF CURRENCY.

The amount of paper currency of the smaller denominations that is actually required in the channels of trade can not be correctly estimated. During the past six years the Treasury has largely increased the denominations of \$10 and under by canceling the larger denominations of United States currency when presented for redemption, and issuing in their stead the smaller denominations; but the limit seems to have been reached, because the presentation of large denominations of silver certificates has practically ceased, and the available resources of the Treasury are at a standstill.

From March 1, 1900, to October 1, 1906, the country has absorbed \$367,725,383, or about \$56,573,000 annually, in paper money of the denominations of \$10 and under, but the needs of business, measured by the continuous appeals for small notes that have reached the Treasury during the last fiscal year makes it clear that the supply is not equal to the demand.

128

The following comparative statement shows the additions to the denominations of \$10 and under since March 1, 1900:

The second sectors	Outsta		
Denomination.	Mar. 1, 1900.	Oct. 1, 1906.	Increase.
One dollar. Two dollars. Five dollars. Ten dollars.	\$58, 546, 413 37, 028, 695 295, 570, 315 328, 917, 422	106, 355, 763 50, 940, 826 392, 252, 117 538, 239, 522	\$47, 809, 350 13, 912, 131 96, 681, 802 209, 322, 100
Total	720,062,845	1,087,788,228	367, 725, 383

The total amount of national bank notes outstanding on October 1, 1906, was \$573,903,108, of which \$86,369,245 was in the denomination of \$5, as against \$191,301,036 allowed under the law, making a deficit in the normal supply of more than \$104,000,000 in \$5 notes.

At present the national banks, in response to the appeal of the Secretary of the Treasury, are issuing a greater number of \$5 notes, and since June 30, 1906, have increased the volume of that denomination outstanding by \$9,479,070.

Experience, however, in recent years demonstrates the fact that many of the national banks are reluctant to issue \$5 notes, though there is constant demand for an increased supply of that denomination in every section of the country.

CONGRESS CAN PROVIDE REMEDIES.

The National Government furnishes nearly three-fourths of the paper circulation, and the supply of denominations should respond to the demands of the public. The pressure from bankers and others for a larger and regular supply of small denominations of currency continues unabated, with the Treasury unable under existing law to comply with their urgent requests. The sentiment of the country seems so unanimous for a rectification of this untoward condition that it is naturally to be expected that Congress will ultimately enact the legislation that it has under consideration, which will bring full relief to Treasury conditions and add to the volume of small denominations without inflating the currency.

COST OF PAPER CURRENCY.

Many inquiries reach the Treasury relative to the cost attending the production, issue, and redemption of United States paper currency. A careful and searching investigation upon the experience of the fiscal year 1906, with due allowance for every item of expense incident thereto, shows the average cost for each piece to be 1.571 cents. The details of the reckoning may be followed here:

Cost of each 1,000 sheets of paper delivered to the Bureau of Engraving and Printing	\$5.95
Cost of engraving and printing each 1,000 sheets (4,000 notes) of perfect work, delivered to the Treasurer of the United States Cost of sealing, separating, bundling, and issuing each 1,000 sheets (4,000 notes)	$\begin{array}{c} 42.\ 09 \\ 6.\ 00 \end{array}$
Total average expense of 4,000 notes issued	54. 04
Total average expense of 4,000 notes redeemed	8. 80
Aggregate average expense of issue and redemption	62. 84
Average expense of issue and redemption of each note	0. 01571

The cost of maintenance of the United States paper currency, based upon the average expenses of issue and redemption, is set forth in the following table:

Fiscal year.	Number of pieces.	Cost per 1,000 pieces.	Total cost.
1905.			
Issued Redeemed	169,259,812 158,734,031	\$13.51 2.20	\$2,286,700.06 349,214.87

REPORT ON THE FINANCES.

PAPER CURRENCY PREPARED FOR ISSUE AND AMOUNT ISSUED.

Experience and precaution prompts the preparation of an adequate volume of paper currency of the kinds and denominations authorized by law in advance of putting, it into circulation. Its wearing qualities are improved by allowing the ink to dry and the bills to become thoroly seasoned. With the large denominations the object is easily accomplished, but the smaller denominations have met with such marked favor and the demands for them are so great that additional facilities for the production of an increased supply have been called into requisition for the current fiscal year.

The paper currency prepared for issue and amount issued may be studied in the tables following:

Number of Pieces of Paper Currency Prepared for Issue and the Number Issued in the Fiscal Years 1902, 1903, 1904, 1905, and 1906.

UNITED STATES PAPER CURRENCY ISSUED DURING THE FIRST QUARTER OF 1906 AND 1907.

a Decrease.

REDEMPTIONS OF PAPER CURRENCY.

The redemptions of currency during the fiscal year 1906 were less than in 1905, owing to the great demand for money in all sections of the country, and the reluctance of holders thereof to lose its use from the channels of trade while in transit to and from the Treasury.

It is also presumed that the inability of the Treasury to supply small denominations except thru redemptions in kind may have had a tendency to decrease presentations for redemption.

Under present regulations, United States paper currency is redeemed at full face value of the note when not less than three-fifths of the original proportions remain. Fragments less than three-fifths are redeemed at face value of the whole note when accompanied by an affidavit of the owner or other persons having knowledge of the facts that missing portions have been totally destroyed.

The redemptions, by months, for the fiscal years 1905 and 1906 and first quarter of 1907 are recorded in the following table:

STANDARD SILVER DOLLARS.

The total stock of standard silver dollars in the country at the close of the last fiscal year was \$560,865,530, of which \$483,864,162 were held in the Treasury and \$77,001,368 were in circulation.

Eventually the total stock of silver dollars will be increased by \$7,386,000, as that amount of silver dollars are held in the Treasury against outstanding Treasury notes of 1890—the notes are counted as stock and not the silver dollars. When the notes are redeemed and retired the silver dollars are added to the stock.

All of the silver dollars held in the Treasury, except \$6,391,162 at the close of the fiscal year 1906, were covered by Treasury notes and silver certificates outstanding, and this limited amount of free silver dollars necessitated instructions to subtreasury offices to receive Treasury notes of 1890 and silver certificates only for shipments of this coin.

MOVEMENT OF SILVER DOLLARS.

The large amount of standard silver dollars delivered to depositors therefor during the fiscal year is not indicative of the preference for that coin over other kinds of money. Owing to the exhaustion of the appropriation for paying transportation charges, shipments during April, May, and June were made at the expense of depositors, and the decrease in the demand for those months, as compared with the corresponding period in 1905, is quite significant. The true explanation of the matter is that the silver dollars are preferred only when the Government pays the cost of transportation.

The movement, by months, in the past two years and a quarter is recorded here:

Total			

Subsidiary silver coin is redeemable in the lawful money of the United States, and during the months from January to July large amounts of the coins are returned to the Treasury for redemption, but it is again distributed either by shipments to depositors therefor or paid over the counter at Treasury offices in exchange for other kinds of money during the later months of the year.

The amount of subsidiary silver redeemed at the Treasury offices for the fiscal years 1905 and 1906 and the first quarter of 1907 was:

	Fiscal	year-	rter—

MINOR COIN.

The minor coins are in great favor, and in order to meet the demands for them the Mint Bureau made an addition of \$3,198,282.30 to the coinage during the last fiscal year, of which \$895,884.80 was in bronze cents, and of \$2,302,397.50 in nickel 5-cent pieces.

In the following statement may be observed the amount of each denomination of minor coin outstanding at the close of the fiscal years 1905 and 1906:

	Outstanding	Fiscal yea	Outstanding	
Denomination.	June 30, 1905.	Coined.	Remelted.	June 30, 1906.

THE EARTHQUAKE AT SAN FRANCISCO.

An earthquake, the like of which has not been experienced in any other part of the country, occurred at San Francisco April 18, 1906, followed by the worst fire in the history of the United States. Within four days the greater part of the city was consumed, including nearly all of the public buildings, banks, and hotels. The subtreasury was burned, and the treasure therein locked in vaults buried under fallen walls was for a time unavailable.

The mint of the United States with its \$300,000,000 of coin and bullion was saved thru the vigilance and forethought of the superintendent, Frank A. Leach, who rendered inestimable service immediately after the conflagration had subsided. The mint was opened for the transaction of business April 23, and the assistant treasurer of the United States, Julius Jacobs, laboring under great difficulties, gathered his scattered force, and tho in a crippled condition was furnished with office accommodations in the mint building and resumed business on April 27, 1906.

Contributions for the relief of the stricken city, as well as moneys withdrawn from eastern correspondents by the banks of San Francisco, were received at all Treasury offices, and payments in like amounts were made thru the medium of the general fund by the mint at San Francisco upon telegraphic advice from the Treasurer of the United States.

The amounts thus deposited were as follows:

Washington	\$281, 219.00	Philadelphia	\$182,761.69
New York	37, 189, 885.00	Cincinnati	79, 813. 34
Boston	257,727.20	St. Louis	101, 813.20
Chicago	1,704,704.61		· · · · · · · · · · · · · · · · · · ·
New Örleans	13, 120. 15	Total	39, 827, 409. 44
Baltimore	16, 365. 25		

Of the foregoing amount, \$2,467,065 was returned to the depositors, leaving a net payment at San Francisco of \$37,360,344.44. The cost of the telegram in each instance was the only expense attending these transfers, and there was no delay in making payment. This is another instance in which the moneys in the Treasury were utilized to relieve distress immediately, and no bank or combination of banks could have rendered the service so quickly.

MONEY FOR MOVING THE CROPS.

Owing to the limited resources of the Treasury for the issue of small denominations of currency, it has not been able to render the usual facilities in the movement of the crops, but during the last year when deposits were made in the kinds of currency needed at the point of payment, the amounts have been transferred promptly thru the medium of the general account.

The amounts received in New York and transferred during 1904, 1905, and 1906 are recorded in the following table, by offices and months:

DEPOSITS OF GOLD BULLION AT MINTS AND ASSAY OFFICES FISCAL YEARS 1904, 1905, AND 1906.

The new product of the mines or original deposits of gold bullion at the mints and assay offices during the fiscal years 1904, 1905, and 1906 may be observed in the statement following:

Office.	1904.	1905.	1906.
Philadelphia. San Francisco. New Orleans. New York. Denver. Carson. Boise. Helena. Charlotte. St. Louis.	$\begin{array}{c} 71,352,253.25\\ 651,504.55\\ 66,171,083.37\\ 13,171,510.63\\ 175,967.85\\ 1,091,200.72\\ 2,582,021.38\\ 237,895.17\\ 324,957.47 \end{array}$	$\begin{array}{c} \$2, 449, 309, 64\\ 48, \$17, 162, 46\\ 568, 394, 02\\ 46, 146, 494, 96\\ 22, 202, 567, 00\\ 293, 287, 44\\ 1, 035, 764, 56\\ 2, 476, 999, 09\\ 255, 062, 73\\ 425, 041, 58\\ \end{array}$	\$2,040,242.66 35,808,830.73 737,333.54 64,345,545.58 25,830,358.12 735,974.22 811,377.41 2,341,811.92 229,582.49 220,810.55

For the deposits of gold bullion in the mints and assay offices the depositors are paid in coin, or by checks on the local assistant treasurer, in subtreasury cities, and at other places by checks on local depositary banks, or by exchange on Chicago, New York, or San Francisco. To accommodate the depositors during the last fiscal year, \$25,000 in gold coin was transferred to Carson and \$2,300,000 to Seattle, to be used in payment when coin was desired.

REPORT ON THE FINANCES.

GOLD RECEIVED IN SAN FRANCISCO, PAID FOR BY TELEGRAPHIC EXCHANGE ON NEW YORK.

Deposits of gold to the amount of \$17,489,290.89 were made in San Francisco for which telegraphic exchange on New York was given in payment, during the fiscal year 1906.

The transactions, by months, for the fiscal years 1905 and 1906, are recorded here:

	Japanese yen.	Proceeds of other foreign coin.	New product of the mines.	Total.

The custom prevailing of giving exchange on New York for deposits of gold bullion at the mint in San Francisco has resulted in the accumulation of an excessive amount of gold in the mint at the latter place. In the movement for the relief of San Francisco after the disaster in April last \$37,360,344 of the amount was shifted to more accessible points without expense.

If the accumulation of gold at San Francisco continues, it becomes a question whether it is equitable to pay to the depositors of gold bullion its full value at the place of deposit and transfer the proceeds for them free of expense to commercial centers; this is practically what is being done under present regulations. Should the Government find it necessary to transport this coin to points of greater demand for its use it would involve a cost of \$1.75 per \$1,000. This threatened expense, together with the fact that it is not even safe for too great a sum of money to be located at one place, should impress us to conservative action in the future.

SHIPMENTS OF CURRENCY FROM WASHINGTON.

The total shipments of currency from the Treasury in Washington during the fiscal year 1906 show a decrease of \$17,357,818 in amount, as compared with 1905, while the number of packages sent is increased by 3,479.

The comparison follows:

	Fiscal	year 1905.	Fiscal year 1906.

REDEMPTIONS AND EXCHANGES.

The moneys received at Treasury offices on account of redemptions and exchanges during the fiscal year 1906 amounted to \$1,104,-449,492, a decrease of \$46,176,271 as compared with the preceding year.

The kinds of money received and paid are shown in the subjoined table:

REPORT ON THE FINANCES.

REDEMPTION OF NATIONAL-BANK NOTES.

The national-bank notes presented for redemption amounted to \$296,292,885, or 55.07 per cent of the average amount outstanding during the year. Notwithstanding an addition of \$65,392,554, or 13.19 per cent, to the volume of notes during the year the amount presented for redemption was \$12,005,875, or 3.89 per cent, less than the amount presented in the preceding year. The sums received from the principal cities were less than in the previous year with the exception of Chicago and Cincinnati. The notes presented for redemption in January amounted to \$36,711,000, the largest monthly sum ever presented. The number of notes redeemed was 25,906,503, and the average denomination was \$11.42. The average denomination outstanding on June 30 was \$11.29. During the year 470 national banks were chartered and 113 charters were surrendered. making a net increase of 357 banks and a total of 6,107 on June 30. Bank-note circulation, which had been below \$300,000,000 for nearly fourteen years (since November, 1886), began to appreciably increase after the passage of the act of March 14, 1900, and by May of that year it had reached \$300,000,000. Since then the increase has been continuous, and on June 30 last the circulation amounted to \$561,112,360. The rate of redemptions also increased from 37.25 per cent in 1900 to 65.84 per cent in 1905, but declined to 55.07 per cent in 1906, albeit there was an increase in the circulation during that year.

The average circulation during the fiscal years 1900 to 1906 and the rate of redemptions are shown in the table which follows:

Fiscal year.	Average.	Redemptions.		
r iscar year.	circulation.	Amount.	Per cent.	
1900	\$260, 293, 746 339, 884, 257	\$96,982,608 147,486,578	37.25 43.39	
1902	383, 173, 195	171,869,258 196,429,621 262,141,930	47.98 51.20 61.12	
1905. 1906.	468, 285, 475 538, 065, 425	308, 298, 760 296, 292, 885	65,84 55.07	

The ratios of the denominations outstanding to the total circulation on March 14, 1900, and at the close of each fiscal year since are given in percentages in the following table. A notable change has taken place in the \$5 notes, which have continuously decreased until they represent only 13.70 per cent of the total.

1905.	71. 74		62. 33	74. 32	88. 07
1906.	62. 24		50. 48	66. 53	78. 26

At times during the year small notes were not available in sufficient amount to meet all requests for them in redemption of bank notes, and for this reason the payments by United States currency practically all in small denominations were but \$123,371,142, as against \$146,595,108 in the previous year. The payments by checks were \$122,852,833, and by silver coin \$109,491. The balance, \$48,840,954, was paid by credits in accounts with this office.

The deposits of lawful money in the several redemption accounts amounted to \$315,862,057; those to reimburse the 5 per cent fund for notes redeemed and reissued were \$279,186,849, and those for the retirement of notes \$36,675,208. Of the latter sum \$9,609,791 was received from banks whose charters had been extended, and under the operation of the law an equivalent in a new series of notes was issued at once. Similar deposits and issues in 1905 amounted to \$4,504,057. The applications to make deposits for the retirement of circulation under the act of June 20, 1874, limited to \$3,000,000 monthly by the act of July 12, 1882, amounted to \$33,093,305, but of this sum only \$17,467,743 was deposited. Applications to make deposits in the months of October, November, and December were received early in May, and the movement was pronounced for all months except July, August, and September. At no time either before or after the limitation was enacted has it appeared that any considerable retirement of circulation was due to its redundancy, but rather to the operations of the Government in refunding and retiring its bonds, and for the purpose of making available the margin between the value of the bonds pledged and the circulation issued against them. This difference in value was practically eliminated by operations under the act of March 14, 1900, and correspondingly affected the retirement of circulation. The act, however, created a demand for bonds by new banks and this demand and the desire of banks at certain times to use their circulation bonds for public deposits account for most of the current transactions.

If a necessity arose for the retirement of circulation on account of a redundancy it could be effectively accomplished under provisions in the original national-bank act if banks would elect to have their notes as redeemed by the redemption agency retired instead of reissued. Redeemed notes were assorted and delivered to the amount of \$298,216,662.50. The notes fit for circulation amounted to \$88,930,700, or 29.82 per cent of the total. This was a falling off of 4.85 per cent as compared with the percentage of such notes in the redemptions of a year ago.

The expenses incurred were \$250,924.24. They have been assessed on the banks in the usual manner at the rate of \$0.84528 per \$1,000 of their notes redeemed.

RECOINAGE IN THE FISCAL YEAR 1906.

The remintage of gold, silver, and minor coins was in 1906 less in value than in 1905. The details for the two years follow:

D error in a time	190	5.	1906.

SPURIOUS ISSUES DETECTED IN 1906.

To the ceaseless vigilance of the Secret Service agents and the expert money counters in the Treasury offices are due the gradual elimination of spurious issues from our circulation. Moneys of the various kinds, greater in value than the entire circulation of the country, were received and disbursed by the Treasury offices during the fiscal year 1906. The receipts were subjected to a close inspection, and the experts rejected only \$11,717.33 in counterfeit coins and paper currency.

SPECIAL TRUST FUNDS.

A further reduction of the indebtedness of the Central Pacific Railroad to the Government, amounting to \$5,881,271.56, was made during the fiscal year 1906, and the two notes paid and the bonds held to secure said notes were released as the payments were made.

The kind and amount of securities held in special trust and the transactions therein during the last fiscal year are enumerated in the following table:

Special	TRUST	FUNDS 13	N THE	CUSTODY	OF	тне Тр	REASURER OF	THE	United	States

DISTRICT OF COLUMBIA.

The transactions of the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia, pertaining to the affairs of the District, are fully set forth in a separate report.

During the fiscal year 1906 the bonds of the funded debt retired amounted to \$463,650, resulting in a reduction of the annual interest charge by \$16,923.22.

From July 1, 1878, to the close of the fiscal year 1906, the bonded debt was increased by the issue of 3.65 per cent bonds for \$1,254,050, and decreased by the operations of the sinking funds and otherwise \$11,773,000, making a net reduction of \$10,518,950, and of the annual interest charge \$592,808,07. The interest-bearing bonds of the funded debt outstanding June 30, 1906, were \$11,587,700.

Since the close of the fiscal year the debt has been further reduced by the purchase of 3.65 per cent bonds for \$358,600. This leaves outstanding October 1, 1906, \$11,229,100 in bonds bearing 3.65 per cent interest.

The act of Congress approved March 31, 1906, provides that retentions from contracts with the District of Columbia for the construction of bridges and sewers shall be held for one year instead of five years, as provided for in prior acts. The act also covers and comprehends all contracts of this character now completed and accepted.

The provisions of this act increased the number of settlements, and during the fiscal year the retentions from 67 contracts were canceled by the return to the contractors of \$111,950 in bonds, and \$38,091.11 in cash, representing retentions amounting to \$163,611.59. At the close of the fiscal year 1906 the 10 per cent guaranty fund retained from District contractors amounted to \$296,087.90 and was credited to 63 separate contracts. Of this sum, \$228,173.01 is invested in bonds purchased at the request and risk of contractors.

The receipts during the year for account of the police relief fund were \$75,827.12, and for account of the fireman's relief fund, \$28,112.84. These sums were advanced to the Commissioners of the District in monthly installments.

The securities of the District in the care and custody of the Treasurer are:

3.65 per cent bonds (unsigned) Bonds for account of District contractors Chesapeake and Ohio Canal bonds	208, 240
Total	6,287,975

WORK OF THE OFFICE.

The foregoing statements as well as those appended, show a gradual increase in the volume of business. The duties which the immense transactions of the Government impose on the Treasurer's office are many and involve great responsibilities.

Many changes have been made during the last year in the manner of keeping the records and of rendering reports by saving duplications, triplications, and unnecessary entries that have been eliminated without detriment, thereby saving time and labor to the Treasury as well as to the various subtreasury offices.

The Treasurer recognizes and commends the efforts put forth by the staff, chiefs of divisions, and every person employed in the office to improve the efficiency of the service and to lighten the burdens of his responsibilities.

Respectfully,

CHAS. H. TREAT, Treasurer of the United States.

Hon. LESLIE M. SHAW, Secretary of the Treasury.

REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., December 3, 1906.

SIR: I have the honor to submit herewith the thirty-fourth annual report of the Director of the Mint, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1906, with such available statistics for the fiscal year as may be valuable in connection therewith.

OPERATIONS OF THE YEAR.

The operations of the mints were reduced somewhat during the last fiscal year, owing chiefly to the fact that there was no silver bullion available for the usual supply of subsidiary silver coins. The stock of bullion accumulated under the act of July 14, 1890, was exhausted and some question existed as to the authority of the Secretary of the Treasury to resume silver purchases. The force in the Philadelphia mint was furloughed three months and the force of the New Orleans mint four months.

The work of the San Francisco mint was interrupted by the catastrophe of April 18, 1906. The structure and its contents were saved from the fire by intelligent and courageous work on the part of the superintendent and employees, but as the fuel used for its melting, annealing, and assaying operations was city gas, the destruction of the gas works made a discontinuance of operations necessary. Moreover, the mint, by reason of the destruction of the subtreasury and all of the banks of the city became the only financial institution able to do business in the city and the agency through which all remittances to and from the city and disbursements within the city were made. The mint became the depository and treasury for the relief fund and its superintendent, Mr. Frank A. Leach, had many new and very important responsibilities suddenly thrust upon him, all of which were borne with fidelity and signal ability.

The most important development in the mint service during the year was the opening of the new mint at Denver.

HISTORY OF THE DENVER MINT.

Gold was first discovered in what is now the State of Colorado in 1858, on the Platte River, near the city of Denver, then embraced in the State of Kansas. Colorado was created a Territory by an act of Congress approved February 28, 1861. The discovery of gold in Colorado created much excitement and it was not long before there was a rush for the new gold fields. Owing to the lack of transportation the only means of the outside world to reach there was by wagon and stage across the plains. At times this was attended by great hardships, on account of the hostilities of the Indians. In 1859 placer mining was carried on with great activity, not only on the Platte River, where gold was first discovered, but in other sections of the State. Mining was for some years confined exclusively to placer claims. Miners experienced considerable difficulty in disposing of their product, which was on account of lack of transportation facilities and the want of a circulating medium, and they were frequently compelled to dispose of their dust at a sacrifice. From 1860 to 1862 there were three firms, namely, Clark, Gruber & Co., John Parsons & Co., and John Conway & Co., who manufactured \$5 and \$10 gold pieces. Of these firms, Clark, Gruber & Co. were the most prominent and did the largest coinage, the coinage of the other firms being very limited.

The mint in Denver was established by an act of Congress approved April 21, 1862. It was exclusively for the coinage of gold and the sum of \$75,000 was appropriated to carry into effect the provisions of the act to meet the expenses for the fiscal year 1863.

June 11, 1862, George W. Brown, Samuel E. Browne, district attorney, and Samuel H. Elbert, secretary of the Territory, were appointed by the Secretary of the Treasury as a committee to inquire into the expediency of purchasing the lot, building, and apparatus of Clark, Gruber & Co. for the branch mint of the United States at Denver. Dr. Oscar D. Munson, formerly connected with the mint at San Francisco, was authorized to confer with the committee. The committee reported in favor of the purchase of the plant of Clark, Gruber & Co., fixing the value of the same at \$25,000, and on November 25, 1862, a formal offer was made by the Secretary of the Treasury to Clark, Gruber & Co. to purchase the plant for the sum of \$25,000, which was accepted. It was found that the ground upon which the building was located was preempted by Clark, Gruber & Co., and they had not been able to perfect their title to the same, for the reason that no land office had been established for that district.

On March 3, 1863, the following resolution was passed by Congress, enabling the Secretary of the Treasury to obtain a title to certain property in the city of Denver, for the purposes of the branch mint located in said place:

Whereas the Secretary of the Treasury of the United States, in order to carry into effect an act entitled "An act to establish a branch mint at Denver, in the Territory of Colorado," approved April twenty-first, eighteen hundred and sixty-two, has purchased of Messrs Clarke, Gruber and Company, the preemptors and occupants thereof, certain city lots in said town of Denver, together with all the valuable improvements thereon;

And whereas the said Clarke, Gruber and Company have not, and can not at an early day, perfect their title to said lots by entry of the same at the district land office, for the sole reason that no such office is yet established in said district;

And whereas it is highly important for the interest of the Government to obtain at an early date the use and possession of said property to establish and open said mint: Therefore,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby, authorized to receive and accept from said Clarke, Gruber and Company such relinquishments and conveyances of their right or claim to said lots and property as he, the said Secretary, shall deem sufficient for the extinguishment of any claim, right, or title which the said Clarke, Gruber and Company may or can have thereto. And said lots and property shall thereafter be reserved from public sale, preemption, or homestead settlement, and shall remain the property of the United States.

Title was finally obtained to the property in April, 1863, and immediate steps were taken to equip the building, but the time required to prepare the building, and to have machinery, apparatus, etc., constructed in the East, transported to so distant a point, prevented the opening of the institution until the latter part of September, 1863.

The operations of the mint were confined to the melting, refining, assaying, and stamping of the bullion, and the return of the same to the depositors in unparted bars, stamped with the weight and fineness. A superintendent, assayer, and coiner were appointed in November, 1862, and a melter and refiner in December, 1862. The institution continued on this basis until 1869, when Congress, on the approval of the Secretary of the Treasury, provided that it should be conducted as an assay office, with an assayer in charge and a melter, the amount of bullion deposited not justifying its continuance as a branch mint with a full corps of officers. Operations were confined to the melting and assaying of bullion and its return to the depositors.

An act was passed February 20, 1895, providing for the establishment of a mint at Denver, Colo., for the coinage of gold and silver.

The bill making appropriations for legislative, executive, and judicial expenses of the Government for the fiscal year 1896, approved March 2, 1895, made provision for the purpose of a site and the commencement of a mint building at Denver, at a cost of \$100,000, and authorized the Secretary of the Treasury to contract for the completing of a building at a cost, including site, heating, ventilating, fireproof vaults, etc., not exceeding \$500,000. On April 22, 1896, a site was purchased at a cost of \$60,261.71. The original appropriation for the construction of the building was not sufficient, and this was increased by additional appropriations to \$800,228.01. This amount has been further increased by providing that the amount received for the sale of the old mint building, authorized by act of June 30, 1906, shall be applied to the finishing of the new building. The new building was occupied in 1904, but the coinage operations were not commenced until February, 1906.

The amount appropriated for the equipment of the new building with machinery was \$345,055, of which amount \$327,258.50 have been expended.

DEPOSITS OF GOLD BULLION, FISCAL YEAR 1906.

The deposits of gold bullion at the mints and assay offices of the United States during the fiscal year 1906, exclusive of the redeposits, were of the value of \$153,109,493.52, against \$143,378,969.86 reported the previous year. Redeposits, which consist of bullion transferred from one office of the service to another or bars bearing the stamp of one of the offices of the service, amounted to \$33,779,481.74.

The aggregate of all deposits, including redeposits, is the total of

H. Doc. 9, 59-2----16

metal operated upon in the year by the mint service. This total of gold bullion received in the fiscal year 1906 was 10,045,282.710 standard ounces, of the value of \$186,888,975.26, against 9,454,-866.186 standard ounces, of the value of \$175,904,480.45, reported the previous year.

The deposits of domestic bullion amounted to 5,581,307.090 standard ounces, of which 1,670,693.036 standard ounces were in a crude condition, direct from the miners operating in the different States; 863,354.120 standard ounces of refinery bars (less than 0.992 in fineness) and 3,047,259.934 standard ounces of refined bullion (0.992 in fineness and over) were received from private refineries, bromide, chlorination, and cyanide works.

UNCURRENT DOMESTIC GOLD COIN FOR RECOINAGE.

Uncurrent and mutilated domestic gold coin received for recoinage contained 81,393.153 standard ounces, of the coining value in new coin of \$1,514,291.19. Of this amount 39,626.023 standard ounces were received over the counter, and 41,767.130 standard ounces were received on transfers from the Treasury.

DEPOSITS OF FOREIGN GOLD BULLION.

Foreign gold bullion containing 1,952,085.304 standard ounces, of the value of \$36,317,864.38, was received, of which 784,451.271 standard ounces were unrefined and 1,167,634.034 standard ounces were refined previous to its receipt at the mint.

DEPOSITS AND PURCHASES OF SILVER.

Silver is coined in the United States on Government account only. Deposits of silver bullion are received by the mints and assay offices to be returned to the depositors in fine or unparted bars with the weight and fineness stamped thereon. These deposits are confined almost exclusively to the assay office at New York, and the bars when returned to the depositors are sold for use in the arts or exported.

The deposits and purchases of silver at the United States mints and assay offices during the fiscal year 1906 were as follows:

Item.	Standard ounces.
Silver contained in gold deposits. For Philippine coinage. Uncurrent domestic coin For return in fine bars.	1,063,270.40
For foreign coinage.	·

Included in silver "for Philippine coinage" is 1,375,758.10 standard ounces uncurrent old Spanish coins received for recoinage.

UNCURRENT DOMESTIC SILVER COINS FOR RECOINAGE.

Uncurrent and mutilated domestic silver coins received for recoinage contained 1,063,228.05 standard ounces of the value of \$1,322,834.27 in new subsidiary coin. In addition there were transferred from the Treasury 4,328.20 standard ounces of Hawaiian silver coin of the value in new subsidiary coin of \$5,385.

COINAGE OF THE UNITED STATES, FISCAL YEAR 1906.

The mint at Philadelphia coined for the Government of Mexico 1,000,000 gold ten-peso pieces and 3,000,000 gold five-peso pieces; for Costa Rica, 300,000 silver ten-centimo pieces and 400,000 silver five-centimo pieces; for Panama, 1,000,000 silver half-balboa pieces. In addition to the above the mints at Philadelphia and San Francisco coined for the Philippines the following:

Denomination.	Phila- delphia.	San Francisco.	Total.
Silver: Pesos. 50 centavos. 20 centavos.	Pieces. 629 629 629	Pieces. 1, 557, 000	Pieces. 1, 557, 629 629 629
10 centavos Nickel: 5 centavos Bronze:	629 626		629 626
1 centavo	626 626	1,557,000	626 626 1, 561, 394

The Philippine coinage made by the mints of the United States from date of the act of March 3, 1903, authority for this coinage, to June 30, 1906, is as follows:

Denomination.	Phila- delphia.	San Francisco.	Total.
Silver: Pesos. 50 centavos. 20 centavos. 10 centavos. Nickel: 5 centavos.	3, 116, 518 5, 367, 688	Pieces. 24, 158, 000 3, 012, 000 2, 630, 000 6, 240, 000	Pieces. 26, 964, 358 6, 128, 518 7, 997, 688 11, 357, 557 9, 999, 884
Bronze: 1 centavo	37, 845, 284 17, 752, 884 82, 006, 173	36,040,000	37, 845, 284 17, 752, 884 118, 046, 173

Of the subsidiary coinage made during the year \$3,156,097.10 were from bullion received from the Treasury for recoinage and \$860,271 from silver bullion purchased under the provision of section 3526 of the Revised Statutes.

The loss on the recoinage of \$1,528,553 in worn and uncurrent gold coins was \$14,261.81, and the net loss on the recoinage of \$1,414,963.90in worn and uncurrent silver coins was \$92,129.63, for which the Treasury of the United States was reimbursed from the appropriation for that purpose. On the transfer from the Treasury of \$5,311.75 in Hawaiian coin there was a gain of \$73.25.

RECOINAGE OF STANDARD SILVER DOLLARS.

There were purchased as bullion 909 mutilated silver dollars during the fiscal year 1906, which were for use in the manufacture of subsidiary silver coins.

Mutilated and uncurrent silver dollars received and melted at the mints and at the assay offices since 1883:

Fiscal year.	Amount.	Fiscal year.	Amount.
883		1896 1897	\$2,03
885 886	. 1,850	1898 1899	1,36

Total	·····	•••••		124, 795, 691.44

Tables will be found in the appendix showing in detail the character of bars manufactured at each institution during the year.

WORK OF THE GOVERNMENT REFINERIES.

There were received and operated upon by the refineries connected with the mints at Philadelphia, San Francisco, New Orleans, and Denver and the assay office at New York, during the fiscal year 1906, gold bullion containing 3,820,944.542 standard ounces, and silver bullion containing 8,724,887.16 standard ounces, of the total coining value of \$\$1,239,936.27, as shown by the following table:

	G	old.	Silver.		
Institution.	Standard ounces.	Value.	Standard. ounces.	Coining value	
Philadelphia San Francisco New Orleans Denver	50,031.392 1.085.732.899	\$27,019,747.78 6,757,304.33 930,816.60 20,199,681.84 16,179,789.77	$\begin{array}{c} 3,007,583.53\\ 1,755,669.66\\ 117,455.13\\ 28,480.94\\ 3,815,697.90 \end{array}$	\$3, 499, 733. 56 2, 042, 961. 06 136, 675. 05 33, 141. 45 4, 440, 084. 83

MARKET PRICE OF SILVER DURING THE FISCAL YEAR 1906.

The price of silver 0.925 fine (British standard), in London, for the twelve months ended June 30, 1905, ranged from $26\frac{7}{4}d$. (July, 1905) to $31\frac{2}{3}d$. (May, 1906), the average price for the year being 29.4298d. At the lowest price, the equivalent for a fine ounce in New York with exchange at par was 58.958 cents; at the highest 68.777 and at the average for the year 64.513 cents.

The following table exhibits the monthly fluctuations:

Highest, Lowest, and Average Price of Silver Bullion and Value of a Fine Ounce, each Month During the Fiscal Year 1906.

Month.	High- est.	Low- est.	Average price per ounce, British standard (0.925).	Equivalent value of a fine ounce with ex- change at par (\$4.8665).	Average monthly price at New York of ex- change on London.	Equivalent value of a fine ounce based on average monthly price and average rate of exchange.	Average monthly New York price of fine bar silver.

SEIGNIORAGE ON SILVER COINAGE.

The balance of profits on the coinage of silver on hand in the mints June 30, 1905, was \$144.17.

The total seigniorage on the coinage of silver during the fiscal year 1906 was \$507,906.11, from the coinage of subsidiary silver coins.

Including the balance on hand at the mints July 1, 1878, the net seigniorage on silver coined from that date to June 30, 1906, aggregated \$136,307,059.19.

The amount of seigniorage deposited in the Treasury during the fiscal year was \$253,311.13, leaving a balance on hand at the mints on June 30, 1906, of \$105,689.97.

A table showing the seigniorage on silver coinage at each mint, and the disposition of the same, will be found in the appendix.

APPROPRIATIONS AND EXPENDITURES.

The act approved February 3, 1905, making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ended June 30, 1906, contained specific appropriations for the support of the mints and assay offices of the United States, amounting in the aggregate to \$1,322,120.

In addition to the specific appropriations contained in the above act, the mints at Philadelphia and San Francisco collected \$105,438.09 as charges on foreign coinage and for the manufacture of appliances for Government institutions, which amount was deposited in the Treasury to the credit of the appropriations for wages of workmen and contingent expenses of said institutions.

Acts approved June 6, 1900, March 3, 1903, April 28, 1904, and March 3, 1905, contained the following specific appropriations:

In addition to the specific appropriation of \$440,185 for the mint at Philadelphia, that institution has collected \$4,600 from the mint at Denver for the manufacture of steel rolls, which amount has been deposited in the Treasury to the credit of the appropriation "New machinery, mint at Philadelphia."

The expenditures from these appropriations during the fiscal year were:

Mint at Philadelphia..... . \$13, 322.60 Mint at Denver. . .. 131, 130. 61 The total expenditures from the above appropriations to June 30, 1906, have been:

Mint at Philadelphia..... \$430, 639. 83 Mint at Denver. 308, 892, 97

DIRECTOR OF THE MINT.

APPROPRIATIONS AND EXPENDITURES OF THE OFFICE OF THE DIRECTOR OF THE MINT FOR THE FISCAL YEAR 1906.

The acts approved February 3, 1905, and February 27, 1906, making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ended June 30, 1906, contained appropriations for the office of the Director of the Mint aggregating \$43,170.

The expenditures from these appropriations comprised the amounts paid on account of salaries, supervising the annual settlements at the mints and assay offices, expenses incurred in collecting and compiling the statistics of the production of gold and silver in the United States, the amount paid for incidental expenses and the purchase of and subscription to books and pamphlets, and contingent expenses incurred in support of the laboratory of the Bureau.

The expenditures during the year aggregated \$41,021.71, leaving an unexpended balance of \$2,148.29 to the credit of the several appropriations.

In addition to the above appropriations for the support of the office of the Director of the Mint, the provisions of the acts approved February 3, 1905, February 27, 1906, and June 30, 1906, contained specific appropriations aggregating \$70,000 for "freight on bullion and coin between mints and assay offices." The expenditures from these appropriations for the fiscal year amounted to \$60,848.71, leaving an unexpended balance of \$9,151.29 to the credit of said appropriation.

LABORATORY OF THE BUREAU OF THE MINT.

During the calendar year 1905 there were tested by the assayer of this Bureau 250 gold and 530 silver coins, all of which were found within the legal requirements as to weight and fineness.

In the gold coins the greatest deviation above standard (the legal limit being 0.001 above or below) was 0.0003, while the greatest deviation below was 0.0007.

246

The greatest deviation of silver coin above standard (the limit being 0.003 above or below) was 0.0013, while the greatest deviation below was 0.0020, as shown by the following table of assays made at the Bureau of the Mint:

	Philad	lelphia.	San Fr	ancisco.	New O	rleans.	Тo	tal.

PROCEEDINGS OF THE ASSAY COMMISSION, 1906.

The following-named gentlemen were designated as commissioners to test and examine the weight and fineness of the coins reserved at the several mints during the calendar year 1905, pursuant to the provisions of section 3547 of the Revised Statutes:

provisions of section 3547 of the Revised Statutes: Gen. Francis S. Dodge, Paymaster-General U. S. Army; Mr. Augustus St. Gaudens, Windsor, Vt.; Dr. G. A. Hulett, Princeton University; Prof. J. S. Ames, Johns Hopkins University; Prof. W. A. Noyes, Bureau of Standards; Prof. W. B. Rising, University of California; Mr. George F. Graves, Bennington, Vt.; Mr. A. B. Chace, Providence, R. I.; Mr. John S. Kennedy, Corning, N. Y.; Mr. E. R. Sharp, Columbus, Ohio; Mr. W. C. Dowd, Charlotte, N. C.; Mr. James Crosby Brown, Philadelphia, Pa.; Mr. John L. McNeill, Durango, Colo.; Mr. Harvey Ingham, Des Moines, Iowa; Mr. George H. Earle, jr., Philadelphia, Pa.; Mr. Marcus Benjamin, Washington, D. C.; Mr. Herbert B. Webber, Ionia, Mich.; Mr. F. C. Stevens, Toledo, Ohio. (Dr. H. G. Torrey; Mr. William Barret Ridgely, Comptroller of the Currency; Hon. J. B. McPherson, judge, eastern district of Pennsylvania, ex officio members.)

The commission met at the mint at Philadelphia on the 14th day of February, 1906.

On motion of Mr. Ingham, seconded by Professor Ames, General Dodge was elected chairman of the commission. Miss M. V. Kelly was chosen to act as secretary.

The roll of the commission being called, the following members answered to their names:

Messrs. Dodge, Hulett, Ames, Noyes, Rising, Chace, Kennedy, Sharp, Dowd, Brown, McNeill, Ingham, Earle, Benjamin (Messrs. Ridgely and Torrey, ex officio members).

The following committees were appointed by the chairman with the approval of the commission:

Committee on counting: Mr. Sharp, chairman; Messrs. Kennedy, Dowd, Earle, McNeill, and Dodge.

Committee on assaying: Professor Rising, chairman; Messrs. Hulett, Torrey, Ridgely, and Chace.

Committee on weighing: Professor Ames, chairman; Messrs. Ingham, Benjamin, Noves, and Brown.

REPORT OF THE COMMITTEE ON COUNTING.

FEBRUARY 15, 1906.

To the Board of Assay Commissioners:

GENTLEMEN: The committee report respectfully that the packages containing the pieces reserved by the several mints for the trial of coins in accordance with section 3539 of the Revised Statutes were delivered to us by the superintendent of the mint at by the Director of the Mint and found to be correct. The verification of the packages containing the reserved coins being completed, they were delivered to the committees on weighing and assaying. In the report of those committees will be found an account of the disposition of these coins.

The quantities of coin reserved at the mints for the purposes of the committee were as follows:

Gold coins from the mint at Philadelphia, 841, of the value of \$5,497.

Silver coins from the mint at Philadelphia, 041, of the value of \$1,516.75. Gold coins from the mint at San Francisco, 3,064, of the value of \$44,365. Silver coins from the mint at San Francisco, 5,617, of the value of \$1,201.80. Silver coins from the mint at New Orleans, 2,569, of the value of \$450.50. The coins reserved on account of the coinage executed for the Philippine Islands were as follows:

Mint at Philadelphia:

Pesos	. 4
50-centavos	
20-centavos	. 4
10-centavos	4
Mint at San Francisco:	1.1

20-centavos	. 210

REPORT OF THE COMMITTEE ON ASSAYING.

PHILADELPHIA, PA., February 15, 1906.

900.2

To the Board of Assay Commissioners:

GENTLEMEN: In compliance with section 3547 of the Revised Statutes, we have taken samples of the coins reserved from the United States mints at Philadelphia, San Francisco, and New Orleans for assay. These samples represent the various deliveries made by the coiners to the superintendents of the several mints during the calendar year 1905.

The results of the assays made of the individual coins and of the same in mass are given in the following schedules. From these it will be seen that the greatest excess in the assay value of the gold coinage above standard at the different mints (the limit of tolerance being one-thousandth) is at-

Philadelphia San Francisco New Orleans. (No gold coinage.)		900, 2 900, 1
The greatest deficiency below st is at—	tandard (the limit of tolerance being one-thousand	dth)
Philadelphia		899. 8

248

The greatest excess in silver coins (the limit of tolerance being three-thousandths) is at– Philadelphia. 900. 9 San Francisco. 900. 7 New Orleans. 900. 0 PHILIPPINE COINAGE. The greatest deficiency in the silver coins (the limit of tolerance being threethousandths) is at—

 Philadelphia
 898.4

 San Francisco
 898.9

 New Orleans
 898.6

PHILIPPINE COINAGE.

The committee also tested the quartation silver and found it free from gold, and the lead used in the assay of gold bullion and found it free from gold and silver. The acid used in the humid assay of silver was found to be free from silver and also from chlorine. The balances used were tested and found to be correct.

The committee therefore deem the assays exhibited in the accompanying schedule to be entirely trustworthy.

REPORT OF THE COMMITTEE ON WEIGHING.

FEBRUARY 14, 1906.

To the Board of Assay Commissioners:

GENTLEMEN: The committee on weighing respectfully report that they have examined sample coins selected at random from those reserved by the several mints. The

weighing of coins in mass was omitted in accordance with the recommendation of the committee on weighing for the year 1905. The weighing of the single pieces was made in part by a balance by Henry Troemner, of Philadelphia, and in part by a balance by Becker & Sons, of New York. The weights employed were furnished under seal by the Director of the Bureau of Standards, and were accompanied by a certificate stating their variations in mass from the standards fixed by law. Both balances were carefully tested and found to be suffi-ciently accurate without making corrections. The weights ordinarily employed in the mint were also examined and found to be in accordance with the usual interpretation of the standards prescribed by law.

The details of the weighings as shown in the following tables indicate that the deviations from the statutory standard weights of the coins examined were all within the legal tolerance. Consequently the committee on weighing pronounces the examination of the weights of the coinage of the several mints during the year 1905 to be satisfactory.

The committee on resolutions submitted the following:

"Resolved, That the Assay Commission appointed to examine and test the reserved coins of the several mints of the United States for the year 1905 begs leave to submit the following report:

"1. The Commission has thoroughly and carefully, according to law, examined and tested, in the presence of the Director of the Mint, the fineness and weight of the

coins reserved by the several mints for this purpose. "2. The Commission, by examination and test, has found that the coins do not differ from the standard fineness and weights by a greater quantity than is allowed by law, but are far within the limits, and that therefore the tests are entirely satis-

factory in every particular, and are so reported. "Resolved, That the members of the Assay Commission desire to express their most hearty approval of the highly satisfactory conduct of the mint in Philadelphia, and feel it due to the Director of the Mint that they express to him and his subordinate officers their most hearty approval and congratulations."

The Commission wishes to thank most heartily the officers and employees of the mint for the courtesy and assistance given in the performance of the duties of the Commission.

Mr. Kennedy moved that the above resolutions be adopted as read; motion seconded by Doctor Hulett and carried unanimously.

There being no further business before the Commission, the chair declared it adjourned sine die.

REPORT ON THE FINANCES.

MINT OF THE UNITED STATES AT PHILADELPHIA.

This mint was practically idle, with the force on leave or furloughed without pay, in July, August, and September, 1905, owing to a lack of bullion on which to work. After the resumption of operations the coinage was heavy for the remainder of the year. All departments have shown increasing efficiency and some notable changes in methods are mentioned in detail below.

The following table shows, by weight and value, the gold and silver deposited at the mint at Philadelphia for domestic coinage during the fiscal year 1906:

Metal.	Deposits.	Redeposits.	Standard ounces.	Coinage value.
Gold	2,659 895	2, 129 31	1, 936, 421. 498 3, 456, 843. 38	\$36,026,446.56 4,022,508.66
Total	3, 554	2,160		40,048,955.22

There were also deposited during the year 835,900 standard ounces of silver bullion, of the subsidiary coinage value of \$1,040,000 for coinage for foreign governments.

Particulars as to the source and character of deposits and redeposits will be found in tables numbered 1, 2, 3, and 4, of the appendix, and concerning transfers of uncurrent coin in table No. 7.

MELTER AND REFINER'S DEPARTMENT.

During the fiscal year the melter and refiner received from the superintendent gold bullion containing by assay 3,786,726.346 standard ounces, of the value of \$70,450,722.72, his legal allowance for wastage being 3,786.726 standard ounces, of the value of \$70,450.72; the silver bullion containing by assay 5,529,003.23 standard ounces of the value of \$6,433,749.21, his legal allowance for wastage being 8,293.50 standard ounces, of the value of \$9,650.62. He returned to the superintendent 3,786,519.891 standard ounces of gold and 5,538,423.25 standard ounces of silver. He operated upon bullion as follows:

Items.	Gold.	Silver.
Ingots. Refinery. Merchant bars.	Standard ozs. 3,686,361.060 1,452,311.443 356,509.649	Standard ozs. 3,940,474.20 3,007,583.53 1,476,368.65
, Total	5, 495, 182. 152	8, 424, 426. 38

The excess of gold and silver operated upon over the amounts charged during the year is due to duplicate operations.

Upon settlement of the melter and refiner's accounts, June 30, 1906, there was found an apparent loss upon the gold bullion during the fiscal year of 206.455 standard ounces; and in the operation upon the silver bullion an apparent gain of 9,420.02 standard ounces. The melts made aggregate as follows:

Melts.	Bars.	Ingots.	Granula- tions.	Deposits.	Special.	Total.
Gold. Silver.	565 1, 112	610 999	998	2,700 835	253 87	3, 128 4, 031
Total	1,677	1,609	998	3, 535	340	7,159

During the year one gold melt and one silver-ingot melt were condemned.

NUMBER, WEIGHT, AND VALUE OF GOLD AND SILVER BARS FOR INDUSTRIAL USE.

Metal.	Bars.	Standard ounces.	Coinage value.
Gold Silver	3, 926 5, 592	349, 524. 049 1, 417, 773. 53	\$6, 502, 773. 12 1, 649, 772. 83
Total	9, 518		8, 152, 545. 95

During the year 150 barrels of sweeps were gathered, containing by assay 897.083 standard ounces of gold and 3,343.49 standard ounces of silver.

The operations of the refinery were as follows:

Bullion.	Gold.	Silver.
Sent to the refinery, 4,133,631.94 gross ounces, containing by assay Bullion received from refinery. Sweeps.	Standard ozs. 1, 452, 311. 443 1, 451, 762. 252 616. 714	<i>Standard ozs.</i> 3,007,583.53 3,005,597.25 2,166.08
Apparent gain	67. 523	179.80

Silver bullion sent to the refinery upon which refining charges were collected contained by assay 1,428,653.73 standard ounces, and silver owned by the Government returned to the refinery for parting purposes upon which no parting charges were imposed contained by assay 1,578,929.80 standard ounces.

	. Troy ounces.
During the year the melter and refiner received from the superintendent minor c	oinage
metal	18, 261, 450. 35
Delivered prior to settlement:	
Bronze ingots	
Nickel ingots	
17.742	681 30
Delivered in settlement:	,
Bronze ingots

Alloy, etc	
471	, 665. 10
	18, 214, 346. 40
Showing an apparent loss of	47.103.95

He operated upon minor coinage metal as follows:

	Melts.	Troy ounces.
Bronze Nickel	 3, 376 2, 505	10, 912, 439. 30 7, 176, 825. 10
Total	 5,881	18,089,264.40

Trained and experienced men were sent from the melter and refiner's department to the new Denver mint and to the New York assay office to introduce the electrolytic processes which have been developed in this mint during the last ten years from laboratory experiments to a working plant capable of refining 150,000 ounces of gold and 400,000 ounces of silver per month, the product being almost chemically pure. Besides furnishing greatly superior products, the processes are less expensive, are neat, cleanly, and free from the noxious fumes incident to the old acid methods of parting. The saving of platinum, a metal now more valuable than gold, is an item of importance in this connection. In the electrolytic process it is recovered as a by-product, while in the acid treatment it is either lost or deteriorates the working qualities of the gold from which it has not been parted. The installation of a new dynamo brings the capacity of the refinery up to any demands likely to be made upon it.

In the melter and refiner's department there were no changes of note in the melting rooms, though the problem of substituting oil for gas is kept steadily in view. The most important addition to the plant in this department is the placing of spacious settling chambers through which the gases from the melting furnaces must pass before the final exit from the stack. The first one installed was connected with the furnaces in the ingot-melting room. This chamber was made as large as space in the attic would permit, and with the largest cross section possible in order to diminish the rapidity of current flow. It is evident that any values in the deposit will be condensed fumes of vaporized metals, and therefore impalpable powders-mere dust. This chamber has a capacity of about 6,000 cubic feet and was built at a cost of \$900. From October 15, 1905, to May 3, 1906, a period of say six months, the dust collected in it produced a bar containing 244.32 standard ounces of gold, having a value of \$4,544.35. This is nearly 1 ounce in 10,000 ounces melted. Very little silver was coined during this period, and 35 ounces only of silver were found in the deposited dust. There is reason to believe that a still larger chamber would be more effective. These results were so satisfactory that a second chamber was recently erected to connect with the melting furnaces in the refinery. From this there have been no returns as yet.

The electrolytic refinery has continued to demonstrate its superiority over any method previously in use, both as to economy of working and superiority of product. Both the coiner and the public recognize the better working qualities of the electrolytically refined bullion.

COINER'S DEPARTMENT.

During the fiscal year 1906 this department received 3,191,138.460 standard ounces of gold, of which 3,163,926.060 standard ounces, of the value of \$58,863,578.78 were operated upon, and from which there were produced 1,089,894.321 standard ounces of gold coin, of the value of \$20,261,887.82, and upon which there was a wastage of 115.072 standard ounces, of the value of \$2,140.87, being 7.21 per cent of the legal allowance.

During the same period the coiner also received and operated upon 3,929,033.90 standard ounces of silver, from which there were produced 2,144,878.15 standard ounces of silver coin, of the value of \$2,668,588.68 in subsidiary silver coin, and upon which there was a wastage of 2,073.56 standard ounces, of the cost value of \$1,065.76, being 52.78 per cent of the legal allowance.

DIRECTOR OF THE MINT.

There were also delivered to the coiner during the fiscal year 7,198,274.80 ounces of nickel ingots and 3,537,101.33 ounces of nickel planchets, from which were produced 7,395,562.16 ounces of 5-cent nickel coin, of the face value of \$2,302,397.50, and upon which there was a wastage of 14,116.07 ounces; and 10,782,268.20 ounces of copperbronze ingots and 3,160,158 ounces of copper-bronze planchets, from which there were produced 8,966,317.60 ounces of 1-cent coin, of the face value of \$895,884.80, and upon which there was a wastage of 14,600.10 ounces.

The following table shows the coinage executed during the year:

Grand total, 154,881,034 pieces.

In the coining department important improvements in methods, processes, and appliances have been introduced, among the most important of which are changes in the method of rolling ingots into strips, the abolition of strip annealing, changes in the punches on the cutting presses, improvements in the annealing and cleaning of blanks, and the abandonment of the practice of adjusting silver blanks.

In rolling, by making the reduction of the strip more gradual, increasing the number of drafts, but decreasing the amount of reduction at each draft, it has been found possible to eliminate the work of annealing the strips and produce perfectly bright blanks. The gradual reduction permits rolling closer to standard, and produces a larger percentage of good blanks.

The punches on the cutting presses have been changed so as to cut from two to five pieces at one stroke, thus increasing the percentage of blanks cut and decreasing the amount of clippings to be returned to the melting pot. By this change alone the percentage of good blanks obtained from the ingots operated upon has been increased 15 per cent, and with new ingot molds now being made a larger saving is expected.

It has been found possible to prevent oxidation or tarnish on the bright blanks during annealing by keeping them from contact with the air from the time they are introduced into the rotary annealing furnace until the annealing is completed and they have been cooled under water. The hot planchets are now delivered from the furnace through a tube, the lower orifice of which is under the water in the cooling vat. The blanks are then washed and finally dried in hardwood sawdust.

The changes described make it possible to discard the strip annealing furnace, the old style colander and riddle, and the tumbling barrel, the metal being carried through all the operations to the coining press in a bright state, thus reducing the loss in cleaning at least 50 per cent. The blanks are not adjusted or weighed; every blank goes to the press, but the finished coins are examined and weighed separately. The results obtained are shown by the following figures: In a lot of coined quarter dollars weighing 238,817.65 ounces, but 9,424.65 ounces were condemned, showing a percentage of 96.05 good coin from the blanks cut and coined; another lot of half dollars weighing 492,803.40 ounces had but 23,128.75 ounces condemned, showing a percentage of 95.30 good coin from all blanks.

These results were obtained from .999 fine electrolytic silver; a low grade of silver would not show as good results.

Assayer's Department.

The number of assays made in this department was as follows:

Silve	r	 8,500
	Total	 38,950

There were also 167 barrels of sweeps assayed. In addition to this, 200 ounces of proof gold and 160 ounces of proof silver were made.

Of the 610 melts of gold ingots (for coinage) made by the melter and refiner, 556 were passed by the assayer, being well within the limit of

Fifty-three melts, while within the range of standard finetolerance. ness allowed by law, were not sufficiently uniform to warrant passing, and were therefore returned for remelting. One melt was condemned as being outside the legal limit.

The fineness of the melts passed was:

34 melts at	899.8 899.9	7 melts at 1 melt at	900.2
-------------	----------------	-------------------------	-------

Nine hundred and ninty-nine melts of silver ingots (for coinage) were made, of which 25 were rejected for want of proper mixture, including 3 which were outside the legal limit.

The melts were of the following fineness:

41 melts at	8981 8981 8981	68 melts at 18 melts at 19 melts at	899 <u>1</u> 899 <u>1</u>
-------------	----------------------	---	------------------------------

ENGRAVERS' DEPARTMENT.

All of the dies used in the coinage operations of all the mints of the

United States are made in the engraving department at Philadelphia. The number of dies prepared for United States coinage last year was 1,797. In addition, 85 dies were made for the Philippine coinage, 60 for Mexican coinage, and 76 for medals. The number of dies made for the different mints, and denominations, are shown by the following table:

	_

The recent increase in the demand for medals, both national and private, made necessary greater facilities and a larger workroom. The only sufficiently large spaces not already utilized for workrooms were the areas around the vaults under the terrace in front of the building. The Department introduced skylights and a ventilating system into each of these spaces, and the one at the Sixteenth street end being selected for the new medal room, it was divided into three rooms, and heating, lighting, and power systems installed. The three rooms are used, respectively, as an annealing and acid room, a bronzing room, and a press and general workroom. The annealing room is furnished with large gas ovens for annealing the metal. The dipping and cleaning of the medals are also done here. The bronzing room is fitted up with all necessary appliances for this operation, including sand blasting. The press room is the largest. In this there are four hydraulic presses-one of 1,000 tons, two of 450 tons, and one of 350 tons. In addition, there are two grinders, one rotary file, one cutting press, one milling maching, one lathe, one shaper, and one drill. All the presses with the exception of the large one are fitted with an automatic knockout, which is a great advantage and saves much time of the operator, thus increasing the output. In this room the blanks are punched from the strip and the medals struck the number of blows necessary to bring up the design-as many as 18 with a like number of annealings are necessary for some of the medals manufactured. With the exception of the cleaning, sand blasting, and bronzing, all the work of finishing the medals, including the mounting, and all the mechanical work necessary in preparing for striking the medals, bars, and pins, except the manufacture of the dies, is done here.

The new machinery purchased for this branch during the fiscal year was: One Hendey-Norton shaper, one Hendey-Norton lathe, one dry grinder, and one 450-ton hydraulic press.

The medal department, as now equipped, is the best in this country and the equal to that of any mint in Europe.

During the fiscal year there have been struck in this department 50,173 pieces—medals and proof coins. Of this number 34,850 were bronze medals made for the Louisiana Purchase Exposition, at a cost of \$18,572.94.

The designs for the Louisiana Purchase Exposition medals were made by Mr. A. A. Weinman, a sculptor of New York, the hubs and dies being the work of the engraving department of this mint. On the obverse of these medals the United States is represented by a female figure in the act of throwing a flag around a smaller and more youthful female figure, which symbolizes the claim of France to the Louisiana territory. From the latter figure the flag of France is falling, indicating the relinquishing of French authority. The United States is represented on the reverse by the eagle and the extent of territory from the Atlantic to the Pacific by the two dolphins.

The dies for the railroad life-saving medal, also the design of Mr. Weinman, and the dies for the Pike Monument Association, both authorized by Congress, were engraved during the year.

Thirty-six additional medal dies and hubs have been manufactured for the War and Navy Departments and other purposes.

PROOF COINS AND MEDALS.

The following table shows the number of proof coins and medals sold, nominal value, amount received, and the profit on the same during the fiscal year:

Articles.	Number of pieces.	Nominal value.	Amount received.	Profit.
Gold medals. Silver medals. Bronze medals. Gold proof coins. Silver proof coins. Minor proof coins. Total.	267 35,263 434 3,500 2,572	\$1, 406. 50 173. 65 400. 00 3, 615. 00 637. 00 77. 16 6, 309. 31	\$1,569.25 371.90 866.46 3,722.50 1,050.00 102.88 7,682.99	\$162.75 198.25 466.46 107.50 413.00 25.72 1,373.68

NUMISMATIC COLLECTION.

The work on the nuismatic collection for the year was directed mainly to the rearrangement of the collection and the correction of errors of classification. Numerous additions were made, chiefly of Roman sesterces (first brasses), Greek silver, Russian and Polish coins, and miscellaneous pieces of various countries, chiefly Germany. The aggregate number of coins and medals added was about 230.

MINOR COINS.

The manufacture of the 1-cent bronze and 5-cent nickel coins has heretofore been confined by law to the Philadelphia mint. The Fifty-ninth Congress at its first session authorized the making of these coins at the other mints, but the output of the last fiscal year was wholly at Philadelphia, and was by a large sum the greatest ever issued, comparing with the fiscal year 1905, as shown below:

	1905.	1906.
1-cent bronze	\$774, 193. 68	\$895, 884. 80
5-cent nickel	1, 290, 874. 05	• 2, 302, 397. 50

For many years the blanks for the bronze and nickel coins were purchased from contractors ready-made, but most of these coins issued last year were made in the mint from pig metal. Bronze and nickel blanks were purchased as follows:

Character.	Pounds avoirdu- pois.	Cost.
Bronze 1-cent blanks Nickel 5-cent blanks	216,000.00 242,500.00	\$59, 540. 00 94, 575. 00
Total	458, 500. 00	154, 115. 00

The amount of metal purchased for the manufacture of minor coinage other than blanks was 552,201 pounds avoirdupois, at a cost of \$121,521.92.

The amount of uncurrent copper, nickel, and bronze coins transferred from the Treasury during the year for conversion into current coins, cost, and seigniorage are shown by the following table:

Old copper cents. Nickel 1-cent coins Bronze 1-cent coins Bronze 2-cent coins Nickel 3-cent coins Nickel 5-cent coins	683.25 31,752.14 210.50
Total	180, 423. 50
Cost of nickel added to nickel 1-cent metal to convert into 5-cent alloy for recoinage into nickel 5-cent coin	29.02
5-cent coin. Cost of tin and zinc added to old copper-cent metal to convert into bronze 1-cent alloy for recoinage into bronze 1-cent coin. Cost of metal of same alloy added to nickel 3-cent metal for recoinage into nickel 5-cent coin. Seigniorage (gain by recoinage).	4.83 6.38 3,242.17
Total	183,705.90
Coinage executed, nominal value: Bronze 1-cent coin	
Loss by recoinage.	173, 434. 93
Total	

The seigniorage or gain on recoinage of minor coin was \$3,242.17, as against a loss of \$10,270.97, showing a net loss of \$7,028.80.

The seigniorage on the coinage of nickel and bronze coins coined from purchased metal was \$2,735,082.09, less a net loss of \$7,028.80 on the recoinage of minor coin and a wastage of the operative officers in the minor coinage operations of \$1,299.83 gives a net seigniorage on minor coin of \$2,726,753.46.

The total amount of the several types of minor coins manufactured from 1793, when the first coinage of copper cents was made, until June 30, 1906, aggregated \$47,442,002.27. From the records of this mint to which this coinage was assigned by law, it appears that there have been melted for recoinage \$4,411,181.65, leaving outstanding June 30, 1906, \$43,030,820.62.

The several types and denominations of minor coins issued, manufactured by the mint at Philadelphia since its establishment, the amounted remelted, and the amount outstanding June 30, 1906, are set forth in the following table:

DIRECTOR OF THE MINT.

Denomination.	Coined.	Remelted.	Outstanding, June 30, 1906.
Copper cents Copper half cents . Copper nickel cents . Bronze cents . Bronze 2-cent pieces . Nickel 3-cent pieces . Nickel 3-cent pieces .	$\begin{array}{c} 39,926.11\\ 2,007,720.00\\ 14,813,273.25\\ 912,020.00\\ 905,768.52 \end{array}$	\$380, 095. 30 800, 832. 22 269, 552. 95 338, 865. 72 280, 752. 61 2, 341, 082. 85	\$1, 182, 792, 14 39, 926, 11 1, 206, 887, 78 14, 543, 720, 30 573, 154, 28 625, 015, 91 24, 859, 324, 10
Total	47, 442, 002. 27	4, 411, 181.65	43, 030, 820. 62

MINOR COINS ISSUED, REMELTED, AND OUTSTANDING.

Minor coins to the amount of \$2,457,623.40 have been distributed throughout the States and Territories of the United States during the fiscal year 1906—\$1,586,440.30 in nickel 5-cent pieces, and \$871,183.10 in bronze 1-cent pieces.

The expenditure for the distribution of minor coin for the same period was \$35,609.28.

ALL SEIGNIORAGE.

The seigniorage on the coinage of purchased metal for the fiscal year was \$2,963,320.19, as shown by the following table:

·	Item.	Coined.	Seigniorage.
Subsidiary silver coins Minor coins		\$392, 271.00 3, 024, 847.37	\$228, 238. 10 2, 735, 082. 09
Total	·	3, 417, 118. 37	2,963,320.19

The superintendent makes the following recommendation concerning minor coinage, which is approved:

During the year the manufacture of minor coin blanks has been perfected. Bronze and nickel blanks of a quality as good, if not superior, to those heretofore purchased under contract are now made, but the rolling of the ingots for the manufacture of these blanks could be done more economically on larger rolls than those in use for gold and silver, and the work should be done in a room away from that in which gold and silver are rolled, as there is great danger of pieces of bronze or nickel alloy becoming mixed with gold or silver, the colors being so much alike. The cost of installing such a plant in the space under the terrace at Seventeenth and Spring Garden streets would not be a large amount and would greatly increase our facilities and decrease the liability of contamination of the precious alloys.

VISITORS.

x

4

A large number of visitors from all States of the Union and from foreign countries visited the mint during the year, 98,991 having been shown through by the several guides.

NUMBER OF EMPLOYEES.

The force of employees at the end of this fiscal year shows a reduction of 35 from the number carried on the rolls at the end of the previous fiscal year. A number of these were experts in the different departments, who were sent to the mint at Denver, Colo., to instruct the employees in their duties prior to the opening of that mint in January last.

The total number on the rolls at the close of the fiscal year was 533, distributed in the several departments as follows:

Department.	Male.	Female.	Total.
General department. Melter and refiner's department. Coiner's department. Assayer's department. Engraver's department.	195 67 108 12 19	44 1 87	239 68 195 12 19
Total	• 401	132	533

MINT OF THE UNITED STATES AT SAN FRANCISCO.

BULLION RECEIVED.

The weight and value of the gold and silver bullion deposited at the mint at San Francisco during the fiscal year 1906 was as follows:

Metal.	Deposits.	Redeposits.	Standard ounces.	Value.
Gold Silver	4,879 1,062	69	1, 958, 168. 749 1, 565, 373. 30	\$36, 431, 046. 49 1, 821, 525. 29
	5,941	69		38, 252, 571. 78

Of the above amount of silver bullion, 65,188.99 standardounces of Spanish-Filipino coin was received for recoinage for the government of the Philippine Islands.

Particulars as to the source and character of the deposits and redeposits appear in tables 1, 2, 3, and 4 of the appendix. Details as to transfers of mutilated coin for recoinage appear in table 7.

MELTER AND REFINER'S DEPARTMENT.

The melter and refiner received and operated upon gold and silver bullion during the fiscal year as follows:

Received from the superintendent during the fiscal year ended June 30, 1906, bullion containing gold. Returned to superintendent prior to settlement. Returned to superintendent at settlement.	2,636,780,862	idard ounces. 3, 321, 656. 901

Gain	89.963

In refining 363,205 standard ounces of gold bullion there were used 322,000 pounds of sulphuric acid, being nine-tenths of a pound for each ounce of gold.

In refining 983,859 standard ounces of silver there was used 246,000 pounds of sulphuric acid, being one-fourth of a pound for each ounce of silver.

	ounus.
Copper used during the year for reduction of sulphates	25,620
Bluestone manufactured containing in copper.	23,150
Copper lost	2,470

Average tineness of refined gold, 0.995.

COINER'S . DEPARTMENT.

The coiner in his department operated upon 2,545,624.540 standard ounces of gold and 4,592,746.45 standard ounces of silver.

He delivered during the same period 1,429,346.875 standard ounces of gold coin, valued at \$26,592,500, and 2,502,781.25 standard ounces of silver coin, valued at \$2,912,327.27, in standard dollars, or \$3,113,880.25 in subsidiary silver coin, aggregating 12,635,250 pieces. Of this amount there was delivered for the government of the Philippine Islands, under act of March 2, 1903, 1,557,000 pesos, weighing 1,435,000 standard ounces, valued at \$1,669,818.18, in standard dollars, or \$1,785,381.03 in subsidiary silver coin.

H. Doc. 9, 59-2-18

REPORT ON THE FINANCES.

The following table exhibits the coiner's deliveries for the fiscal year:

Denomination.	Pieces.	Value.
Gold:		
Double eagles. Eagles. Half eagles.	758,000	\$15, 160, 000
Eagles	694,250 898,000	6,942,500 4,490,000
fran cagies		4,490,000
Total	2,350,250	26, 592, 500
Silver:		
Half dollars	762,000	381,000
Dimes.	1,716,000 6,250,000	429,000 625,000
Philippine Islands pesos.	1,557,000	1,557,000
Total	10, 285, 000	2, 992, 000
Total coinage	12,635,250	29, 584, 500

The percentage of coins produced from the amount operated upon was gold 56.19 per cent and silver 55.77 per cent.

At the annual settlement of his accounts it was found that there had, been a surplus in this department of 11.039 standard ounces of gold, valued at \$205.38, and a wastage of 1,038.25 standard ounces of silver, being 21.76 per cent of the legal allowance. The excess of gold was occasioned by the amount obtained from the burning of the carpets in the adjusting rooms, which netted 30.223 standard ounces of gold, valued at \$562.29, and 13.29 standard ounces of silver.

Assayer's Department.

The work of this department is shown by the following figures:

	Number.
Gold assays	23, 949
Silver assays	9,380
Silver assays Sweeps assays Qunces of proof gold made.	248
Ounces of parting silver cut.	75
Cupels made	60.000
Lead cut and rolled	60,000
Lead cut and rolled	60,000

VISITORS.

Notwithstanding that the mint was closed to visitors after April 18, 1906, from the commencement of the fiscal year to that time 46,676 persons availed themselves of the privilege accorded of witnessing the operations.

Employees.

The total number of employees in this mint at the close of the fiscal year 1906, was 190, distributed as follows:

Department.	Men.	Women.
General department. Melter and refiner's department. Coiner's department. Assayer's department.	32	41
Total		43

262

THE GREAT EARTHQUAKE AND FIRE.

The mint escaped destruction or serious damage by the earthquake of April 18 and the fire that followed, although it was the only structure, but one, left standing within many blocks in every direction. The superintendent supplies the following account of the damage suffered, of the vigorous fight made to save the edifice, and of the service rendered to the city by the institution and its staff of officials and employees in the period of disorganization which followed:

The San Francisco mint building was constructed shortly after what was called the big earthquake of 1868 and was built against damage by future seismic disturbances, and it is a pleasure to report that, with the exception of a few hundred dollars' damage to the chimneys of the building, the earthquake did not leave its mark otherwise on the entire building. There is not a fracture or a crack to be found anywhere in the massive walls. The damage to the chimneys and stacks was repaired at a comparatively small outlay, but, upon the advice of the superintendent of repairs of public buildings, it was decided to cut down the height of the tall smokestacks by taking about 20 feet off of the tops for the purpose of reducing the possibility of further damage should we be visited by another earthquake.

The building, however, was not so fortunate in the matter of damage after escaping destruction by the great earthquake. As the front of the building sets back from the street a short distance, and the current of wind was from the building, this part of the structure was very little injured, the flag pole surmounting the peak on the front of the building being the only part damaged; but the other sides of the building, being nearer to the flames, all suffered. On the south end the damage was confined to the loss of plate-glass windows; on the west end, in addition to the glass, the sash and window frames were destroyed, and on the north end, besides the loss of the window finishings, the stone forming the walls was badly flaked for the entire face of the wall. It was here the greatest heat was encountered, the flames having driven directly against the whole side of the structure. In addition to this damage a section of the roof covering probably a space of 30 by 40 feet was burned. During the few days following the fire, while inexperienced and careless city officials were blowing down dangerous walls in the vicinity of the mint, several thousand dollars' worth of plate-glass windows left in the front of the building were destroyed by the dynamite explosions. In all, the damage, in dollars and cents, is estimated to be as follows:

Inasmuch as the flaked stone on the north end of the building in no way affects the comfort or stability of the structure, and the only purpose in replacing it would be to make a perfect wall, I would suggest that the scarred wall be allowed to remain as a record of the greatest disaster that ever visited a civilized people, and as a monument to the heroic conduct of the Government employees who risked their lives to preserve the building. In a few years every vestige of the disaster will have been removed and these scars left on one of the Government's best buildings will be a matter of interest for the generations to come. The building was saved through the recent establishment of a fire-protection plant within the building. About fifty of the officers and employees of the mint succeeded in reaching the institution and, with the exception of two or three, they remained in the building there was a constant battle from early morning until quite late in the afternoon. An abundance of water was supplied from the artesian well in the mint and forced to the various parts of the building by a steam pump.

As the subtreasury had been destroyed and every bank in the city lay in ruins, the mint was the only financial institution left intact, consequently it immediately became the financial center and nucleus for the resumption of business, and the point of distribution of financial relief. The assistant treasurer was given offices and vault room in the building and supplied with money with which to resume business. The banks organized a union bank, embracing all the leading banks of the city, and they were afforded space^a and vault room, by which they were able to transact a regular banking business. Besides this, at the request of the President, we became the depository and treasury for the relief funds until the banks were able to return to business in their own quarters. In addition to all this the mint officials handled, in round numbers, \$40,000,000money that was transferred by telegraph through a system of transferring funds from various parts of the East to individuals and banks and corporations in this city, made possible by an order of Secretary of the Treasury Shaw. This was one of the greatest relief measures instituted, and was received with expressions of gratitude by all. This work was the most arduous of all our labors, employing nearly all of the clerical force from early morning until late in the evening. Of course we had no system or method for the transaction of that kind of business, it being entirely foreign to our usual line of work, but all the money was transferred and distributed without loss, error, or unnecessary delay.

It can be readily understood that the great fire destroyed the gas and electric lighting system throughout that portion of the city swept by the conflagration. Our electrician, however, by the Saturday following the fire, had improvised an electric-lighting plant by changing over one of our big motors into a generator, so the building and the streets around were lit up by electricity, which helped to add a little cheerfulness to the desolation and ruin surrounding us.

In addition to protecting the building, our artesian water supply afforded a priceless blessing to thousands for some weeks after the fire, it being the only source of water for a great distance around. We arranged supply stations on the outside of the building, and a constant throng of people availed themselves of it all day.

The workmen who were not assisting in cleaning up the building, or handling the vast sums of money being paid out, were detailed into shifts for doing guard duty, night and day, and inasmuch as there were no restaurants or food-supply places within a great distance of the mint, it was necessary for us to arrange to furnish food for all connected with the institution. Some of our workmen who had had experience in cooking volunteered to act as cooks, while others served as waiters. Our principal meal was at the lunch hour, when as many as 124 persons were furnished with meals in one day. At first these meals were supplied gratis, but subsequently it was thought best to impose a small charge, so as to cover the cost of food necessary to be purchased. When we discontinued the restaurant, some time in June, we found there had accumulated a surplus, after all bills had been paid, of \$188.35. This fund was kept intact until the news of the great earthquake and fire at Valparaiso was flashed across the country, whereupon the sum was donated for the relief of the unfortunates in that section.

In closing this report I would like to make acknowledgment of the very generous and noble response of the officers and employees of the Philadelphia mint who, immediately after receiving the news of the disaster, raised the sum of \$863.69 for the relief of the employees of this mint who met with losses in the fire, and also to acknowledge the prompt tender of aid and relief from the people of the United States mint at Denver, Colo.

THE MINT OF THE UNITED STATES AT NEW ORLEANS, 'LA.

The mint of the United States at New Orleans was in operation eight months. On March 1, 1906, coinage operations were suspended by reason of the exhaustion of the bullion supply available for silver coinage. The greater part of the force of employees were furloughed without pay, and only such employees were retained as were deemed necessary to meet the situation.

The assay and melting departments were in operation throughout the fiscal year.

The standard weight and value of the gold and silver deposited at this mint during the fiscal year was as follows:

Metal.	Deposits.	Redeposits.	Standard ounces.	Coining value.
Gold. Silver	517 50	1	41,486.211 101,163.860	\$771,836.39 117,717.96
Total	567	· 1	142,650.071	889,554.35

Particulars as to the source and character of the deposits and redeposits appear in Tables 1, 2, 3, and 4 of the appendix. Details as to transfers of mutilated coin for recoinage appear in Table 7.

A special feature of interest is found in the following figures, which show a marked increase in gold deposited at this mint:

	Standard ounces.
1890, deposits of gold 1900, deposits of gold 1906, deposits of gold	

Nearly all of this gold came from Central America, mostly from Nicaragua, and the receipts are steadily increasing.

MELTER AND REFINER'S DEPARTMENT.

The amount of gold and silver delivered by the superintendent to the melter and refiner during the fiscal year 1906 was as follows:

Metal.	Standard ounces.	Coining value.
Gold		\$1,946,727.03 1,435,236.87
Total		3,381,963.90

The number of gold and silver ingot melts made by the melter and refiner and the number condemned by the assayer were as follows:

•	Metal.	Ingots made.	Ingots con- demned.
Gold		31	2
Silver		120	2

Refinery operations were as follows:

	Ge	old.	Silver.	
Item	Standard ounces.	Coining value.	Standard ounces.	Coining value.
Bullion sent to refinery Bullion received from refinery Surplus recovered. Apparent loss.	50,031.392 50,044.984 13.592	\$930,816.59 913,069.46 252.87	117, 455.13 117, 392.82 57.31	\$148,133.90 146,056.38 66.68

Silver bullion on which charges were collected contained 33,859.15 standard ounces, and silver bullion on which no charges were made contained 83,595.98 standard ounces.

There were used 19,354 pounds of nitric acid and 6,814 pounds of sulphuric acid in refining 50,044.984 standard ounces of gold, or 0.386 pound of nitric and 0.136 pound of sulphuric acid to each standard ounce of gold separated.

The refinery was in operation twice during the fiscal year; the first run was from July 24 to November 9, 1905, and the second run was from February 23 to May 7, 1906. Only two men were employed in the refinery, and 34 fine gold melts were made, averaging 999 in fineness.

From 18 barrels of sweeps 46.209 ounces of gold and 510.92 ounces . of silver were obtained.

REPORT ON THE FINANCES.

MELTS MADE.

Fine silver Consolidations	$\frac{17}{22}$	Silver deposits	68 15
Goid deposito	517 1	Miscenancous	20

The annual settlement was made on June 8, 1906, when there were turned over to the superintendent in surplus gold 29.537 standard ounces; and silver, 508.88 standard ounces.

COINER'S DEPARTMENT.

During the fiscal year 1906 the coiner received and operated upon 82,706.750 standard ounces of gold. He also received and operated upon 1,122,160.73 standard ounces of silver.

He manufactured during the same period 46,706.063 standard ounces of gold coin, valued at \$868,950, and 630,943.75 standard ounces of silver coin, valued at \$785,000, aggregating 4,983,895 pieces, as shown by the following table:

	Denomination.	Pieces.	Value.
	GOLD.		
Eagles		86, 895	\$868,950.00
	SILVER.		
Half dollars Quarter dollars Dimes	· · · · · · · · · · · · · · · · · · ·	259,000 1,278,000 3,360,000	$\begin{array}{c} 129,500.00\\ 319,500.00\\ 336,000.00 \end{array}$
Total		4,897,000	785,000.00
Total coinag	e	4, 98°, 895	1,653,950.00

The percentage of coin produced from the amount operated upon was: Gold, 56.472; and silver, 56.22.

At the annual settlement of his accounts it was found that there had been a wastage during the year of 4.553 standard ounces of gold, being 11.010 per cent of the legal allowance, and 694.66 standard ounces of silver, being 61.90 per cent of the legal allowance.

Assayer's Department.

The operations of this department of the mint for the fiscal year 1906 were as follows:

	69

THE MINT OF THE UNITED STATES AT DENVER.

At this institution the receipts of gold and silver during the fiscal year 1906 were as follows:

Metal.	Deposits.	Redéposits.	Standard ounces.	Coining value.
Gold	· 4, 512 , 54	2 14	1, 390, 818. 436 253, 885. 53	\$25, 875, 691. 82 295, 430. 42
Total	4, 566	16		26, 171, 122. 24

Fine gold, chlorination, and cyanide bars predominated, although retorts from stamp and amalgamating mills, placer clean ups, and jeweler's plate furnished a fair percentage.

Domestic bullion refined carried 619,876.585 standard ounces gold . of a coinage value of \$11,532,587.63, while the metallurgical plants manufacturing high-class bars below 990 assay fineness furnished 544,963.935 standard ounces gold of a coinage value of \$10,138,863.90 and 4,687.37 standard ounces silver of a coinage value of \$5,454.38.

Melter and Refiner's Department.

The melter and refiner received from the superintendent during the year metal as shown below:

	Standard ounces.
Bullion containing gold	2,682,424.481 260.620
Returned in bars at settlement	2,682,589.942
⁰ Surplus in gold recovered	
Bullion containing silver. 247,6 Returned in ingots prior to settlement 247,6 Returned in bars at settlement. 147,6	392, 828. 80 627. 10
Returned in bars at settlement	395,248.86
Surplus in silver recovered	

The surplus, as well as the additional amount necessary to cover actual operating losses, was recovered from unreported fractions of assay, from fractional gains in weight of gold deposits, and from the difference between standard and actual fineness of ingots delivered.

Metal. Anodes. Deposits. Mint bars. Ingots. Special. Total. 4,512 5, 158 144 Gold 198 270151 12 54 69 1 206 4,566 152339 39 5,302Total .

The following melts were made:

During the year two gold ingot melts were condemned because they were not homogeneous. No silver ingot melts were condemned.

Two hundred and ninety-eight sacks of sweeps were gathered during the year, containing, by assay, 132.047 standard ounces of gold and 866.23 standard ounces of silver.

Refinery operations were as follows:

Item.	Gold.	Silver.
Delivered to the refinery bullion containing	Standard ozs. 1,085,732.899	Standard ozs. 28, 480. 94
Returned in fine bars. Returned in settlement bars. Returned in sweeps.	1,007,810.231 77,900.057 87.163	2,666.44 27,501.91 772.95
Surplus recovered in refinery	64.552	2,460.36

During the fiscal year ended June 30, 1906, there was sent to the refinery 17,981.19 standard ounces of silver bullion upon which refining charges were collected, and 10,499.75 standard ounces of silver owned by the Government upon which no parting charges were imposed. There was returned from the refinery 30,941.30 standard ounces of silver, which included 772.95 standard ounces recovered from refinery sweeps, showing an apparent gain of 1,687.41 standard ounces silver in refinery.

The average fineness of the fine gold returned from the refinery during the year was 0.99985, and in the last operating month, May, there were produced 361,534.34 ounces of fine gold of an average fineness of 0.9999+.

All refining at this mint is done by the electrolytic process, which was originally adopted and developed at the Philadelphia mint. Some changes were made in minor details in the installation at Denver, and others have been made since the installation. A new anode mold has been devised which reduces about one-half the amount of scrap produced in the gold cells. The gold chloride to replenish the electrolyte cells is now made without nitric acid.

The amount of hydrochloric acid used for each thousand ounces of gold refined was 26.8 pounds.

At the annual settlement of the melter and refiner's accounts it was found that there had been a wastage during the year of 110.24 standard ounces of gold, valued at \$2,050.97, being 13.99 per cent of the legal allowance on the amount received from the superintendent,

268

or 14.36 per cent on the amount operated upon; and 61.70 standard ounces of silver, being 24.91 per cent of the legal allowance on the amount received from the superintendent, or 25.19 per cent of the amount operated upon.

COINING DEPARTMENT.

The coining department began coining operations February 1, 1906. From that date to the end of the fiscal year the coiner received 1,575,260.62 standard ounces of gold and operated upon 1,535,371.76 standard ounces, and received 247,627.10 standard ounces of silver and operated upon 244.891.20 standard ounces.

and operated upon 244,891.20 standard ounces. It manufactured during the same period 2,132,250 pieces of the value of \$17,909,000, as shown by the following table:

	Denomination.	Pieces.	Value.
Fold: Double cagies Eagles Half cagles			\$12, 405, 000 4, 390, 000 945, 000
Total			17,740,000
Quarter uonais			49,000
Total			169,000
Total coinage			17,909.000

The percentage of coin produced from the amount operated upon was: Gold, 62.74 per cent, and silver, 57.11 per cent.

The beginning of coinage operations in this mint, on February 1, 1906, was the most notable incident of the year in the mint service. It is the latest of our coinage institutions to be equipped, and should be, as it is believed to be, in all its methods and equipment, the most completely up to date of them all. It has had opportunity to learn from them all, to adopt the best features developed by each, and thus to get what is probably the most completely modern equipment possessed by any mint in the world.

The officials and workmen have, however, not been content to simply accept and use the methods and devices of other institutions, but have shown a commendable desire to improve upon what has been done elsewhere, and in the first year of their experience have made a good record in this respect.

The new mechanical plant started off smoothly and successfully. The power plant is a model of efficiency and beauty. Particulars as to it and the other equipment will be found elsewhere. A word is also due in recognition of the excellent work done by the machine shop of the Philadelphia mint, where the coining machinery was built.

The most important innovation undertaken in the equipment of this mint is the use of oil as fuel for all melting and annealing operations. The first distillate is the grade used and the results are so far considered satisfactory. It flows freely and evenly and furnishes under blast a very high heat, which gives results more rapidly than any other fuel that has been used in the mint service. A comparison of cost between oil and gas has not yet been submitted, but oil is believed to accomplish a considerable saving. The effect of so intense a heat upon the furnaces themselves, from an economical standpoint, has not at this writing been actually determined, although it has been found that fire brick of the highest heat-resisting qualities is indispensable for lining purposes.

The Denver mint was the first in the service to definitely abandon the annealing of strips. Other mints of this service had experimented with a view to doing so, but never heretofore with convincing results. The Denver mint was favored in this respect by having metal of better quality than has been commonly operated upon in the past. It is the first mint to pass all its gold through the electrolytic refinery, which gives a purer, more ductile product than any other process. The silver product of private refineries in recent years is uniformly of better quality than formerly.

The elimination of strip annealing increases the amount of rolling, but is believed to reduce the total of expense for the preparation of blanks.

This department has made a special effort to raise the percentage of blanks cut from the ingots received and is entitled to credit for distinct success. By using two and three punches in the cutting machine at once, "staggered," and adapting the width of the ingot to them, with careful feeding the percentage on silver blanks has been raised as high as 74 and 75 per cent. An oiling swab has been added to the punches. This swab con-

An oiling swab has been added to the punches. This swab consists of a tightly woven piece of merino wool felt, three-eighths of an inch thick, cut to snugly fit the male punches and held in place by clamps on each side, made of copper, and screwed to stripper plate, which uniformly distributes the oil and lubricates the punches. The swab increases the life of the punch, requires the minimum amount of oil, and prevents the oil from running on to the blanks and strips.

The loss of weight by oxidation in the planchette annealing process has been practically eliminated.

Assay Department.

The operations of the assay department during the fiscal year 1906 were as follows:

ASSAY OFFICE OF THE UNITED STATES AT NEW YORK, N. Y.

The receipts of this institution during the year were as follows:

Bullion received.	Number of deposits.	Number of redeposits.	Standard ounces.	Value.
Gold Silver	8,528 2,205	3 34	3, 490, 730. 043 4, 372, 687. 20	\$64, 943, 814. 65 5, 088, 217. 83
Total	. 10,733	37		70,032,032.48

The gross weight of the bullion as above, 7,573,449.76 ounces, shows an increase over the previous year of 626,111.34 ounces.

The value of foreign gold bullion and coin was \$30,110,530.15, an increase from that of last year of \$22,615,613.37.

The value of domestic gold in above total was \$34,833,284.50, a decrease from that of last year of \$8,902,860.77.

• The sources of this domestic bullion (gold) were as follows:

From new production in the United States and Territories From private refineries.	
From jewelers' bars, jewelers' plate, etc. From redeposited bullion (including transfer from Philadelphia mint)	3, 577, 618. 74 25, 371, 87
From United States gold coin of light weight.	572, 897. 20

This statement shows a decrease of \$4,333,973.74 in gold deposits from the amount received last year from private refineries.

Of the silver deposits, the fine silver (757,866 ounces) from private refineries shows a decrease from that of last year of 413,182 ounces.

The silver in foreign unrefined and refined silver bullion (2,260,524) ounces fine) shows an increase over that of last year of 515.809 ounces fine; of the total amount received nearly all (2,171,271) ounces) came from Mexico.

The redeposits of silver consisted of 74,110.65 standard ounces contained in fine bars made at this office, 29,460.66 standard ounces fine bars from Philadelphia, and 125.28 standard ounces of unparted bars made at the assay office at Seattle and the assay office at Helena.

Of the gross amount of bullion received during the year, 878,000 ounces gold deposits and 3,149,000 ounces silver deposits, approximately, required acid treatment.

Particulars as to the source and character of the deposits and redeposits appear in Tables 1, 2, 3, and 4 of the Appendix. Details as to deposits of uncurrent coin appear in Table 7.

The surplus silver recovered by the melter and refiner in his operations was 327.38 ounces fine silver.

The wastage of gold by the melter and refiner in his operations was 103.37 ounces fine gold.

The amount of bullion delivered to the melter and refiner during the fiscal year 1905-6 was:

The amount of bullion returned by the melter and refiner to the superintendent during the same period was:

GoldSt Silver	andard ounces. 3,750,371.464 5,139,045.35
There were stamped during the year 51,813 gold bars a silver bars. During the last year there were stamped 22,307 gold bars silver bars.	
Gold bars issued to depositors of bullion for domestic use	\$4,380,415.92 20,622.32
Gold bars exchanged for gold coin for domestic use	4,359,793.60

Showing an increase of \$4,877,771.20 compared with last year.

The value of gold bars exchanged for coin for export was \$1,055,-397.42, being a decrease of \$27,786,574.83 from that of last year.

The income from the exchange of gold bars for coin was \$9,845.19. The force employed in this office at the close of the year comprised 75 men, embracing the superintendent, assayer, melter, and refiner, and 72 others, distributed as follows:

General department. Melter and refiner's department. Assay department.		- 38
Total	-	

MELTER AND REFINER'S DEPARTMENT.

This department handled bullion as follows: The amount of bullion debited to this department was:

Item.	Ounces, gross.	, Gold.	Silver.

containing 3,123,534.430 ounces of standard gold, and 4,334,480.69 ounces of standard silver.

Deductions on base silver bullion equal 4,113.40 ounces gross, estimated as containing 3,200 ounces of standard silver. The amount of metal refined by acid during the year was 4,658,868.84 ounces gross, containing 869,663.70 ounces of standard gold and 3,815,697.90 ounces of standard silver.

The amount of silver bullion re-refined and upon which no charges were collected (and included in above statement) was 634,191.18 ounces gross, containing 657,650.80 ounces of standard silver.

There was used in the refinery 1,684,328 pounds of sulphuric acid and 80,094 pounds of reduction copper, the amount stated in each case being the quantity received during the year ended June 30, 1906.

Two million five hundred and sixty-seven thousand nine hundred pounds of waste acid and 229,001 pounds of blue vitriol were sold, and there were delivered to the superintendent 520 barrels of sweeps.

Three hundred sixty-three and seventy-six one hundredths ounces of standard silver (value \$363.76) was returned in settlement June 30, 1906, in excess of the amount debited to the melter and refiner, and there was a wastage of 114.852 ounces of standard gold (value \$2,136.78), being 3_{16}^{τ} per cent of the legal allowance.

		137,893.67
		<u></u>

The following shows the relation between the expenses of parting and refining and the charges collected therefor:

Over \$9,000 of above expenses was due to purchase of materials for the new electrolytic refinery, new dressing-room, and also to the replacing of old apparatus that had worn out, and which occurs in such degree only every five or six years or more.

Probably \$2,000 could have been saved on this year's copper account if it had been possible to have melted at the proper time the scrap copper that had accumulated for two years or more, owing to rush of work and excessive amount of sickness among the workmen, but it is now melted and this department will receive the benefit in next year's accounts.

At the close of the year there was on hand considerable metal containing iridium and platinum, the amount of which can not be estimated, but if it could have been sold, would have increased the receipts considerably.

"Assayer's Department.

In this department during the fiscal year 1906, there were assayed 9,647 melts of gold deposits and 3,360 melts of silver deposits, a total of 13,007 melts. About 1,400 melts of fine gold and fine silver were assayed, and fineness stamped upon 51,813 bars of gold and 23,340 bars of silver, a total of 75,153.

Special assays numbered 880, largely articles of jewelry. There were 560 barrels of sweeps assayed and the usual assays for the melter and refiner's department and for settlement, the latter augmented by a large number made for the examiners during settlement.

The necessary proof gold, silver, and cupels were made as usual, and the year showed a slight increase in all parts of the work.

THE MINT OF THE UNITED STATES AT CARSON, NEV.

At this institution the number of deposits increased quite materially over those of the previous year, the value showing a gain of \$442,754.11.

739, 570. 01

These deposits were principally from the State of Nevada. California deposits amounted to 1,107.956 standard ounces of gold and 591.15 standard ounces of silver. The larger part of the bullion is from

the famous Goldfield district; and with the advent of more milling facilities, a larger amount of bullion will be handled at this institution. The operations of the assay department required 2,363 assays.

This includes melts, consolidations, bullion, and ore assays.

The force of employees consists of 7 men.

The following table shows the amount of deposits, earnings, and expenditures, together with the percentage of net expenses to deposits for the fiscal year:

Item.	Amount.
Deposits: Gold	\$743.518.10
Earnings. Expenditures. Percentage of net expense to deposits. 1. 16627	\$743, 518. 10 1, 879. 74 10, 551. 22

ASSAY OFFICE OF THE UNITED STATES AT BOISE, IDAHO.

At this institution there were received during the year 1,698 deposits of bullion, originating in the States of Idaho, Oregon, Montana, Washington, and Utah.

The office force consists of 9 employees.

No redeposits, silver, foreign coin, or bullion were offered. The volume of business handled, the earnings and expenditures, and the percentage of net expense to deposits were as follows:

Item.	Amount.
Deposits: Gold	\$837,031.05 3,784.24 13,922.58

ASSAY OFFICE OF THE UNITED STATES AT HELENA, MONT.

At this office, there were 1,141 deposits of gold bullion, unrefined, during the fiscal year 1906. Of these 1,052 were regular deposits, and 89 were small deposits of less than \$50 value in gold, or less than 500 fine in gold. The weight of the 1,052 regular deposits as received from the depositors was 148,232.93 ounces; after melting, 146,241.08 ounces, a loss equivalent to 1.344 per cent. The average fineness of the resulting bullion was gold. 776‡: silver, 146.

fineness of the resulting bullion was gold, $776\frac{1}{2}$; silver, 146. The coinage value of the gold and silver contained in the deposits of the year was \$2,375,633.18, an average of \$2,258.21.

The greater portion of the bullion handled was of domestic production, from the States of Montana, Idaho, Washington, Nevada, and the Territory of Alaska. Foreign bullion, unrefined, was received from the Northwest Territory, containing 8.988 standard ounces of gold and 1.75 standard ounces of silver; British Columbia, 6,692.091 standard ounces of gold and 1,617.11 standard ounces of silver; jewelry, 57.186 standard ounces of gold and 14.12 standard ounces of silver; redeposits, 329.420 standard ounces of gold and 113.21 standard ounces of silver in base bars originally made at this office.

The force of employees consists of 13 men.

The following table shows the value of deposits, amount of earnings, and expenditures, and the percentage of net expense to deposits:

Item.	Amount.
Deposits: Gold	
Earnings Expenditures. Percentage of net expenses to deposits	\$2.375.633.1

ASSAY OFFICE OF THE UNITED STATES AT CHARLOTTE, N. C.

This office was a coinage mint for a period of some twenty-five years prior to the civil war. The business of the office is small, the deposits being chiefly of gold produced in the South Appalachian States.

Prof. George B. Hanna, who had been the skilled assayer of this institution since March 8, 1870, died on May 21, 1906, and up to date no successor has been found. The eligible list of the Civil Service Commission has been exhausted, and efforts have been continuously made to find a competent man outside of the Commission's list, but no one to whom the place has been offered has been willing to accept it permanently at the salary heretofore paid, to wit, \$1,250 per annum. Congress should either increase the appropriation for the Charlotte office or abolish it.

The deposits in the last fiscal year were: Gold, \$230,344.95; silver, \$1,759.20, making a total of \$232,104.15, against \$257,098.42 in the preceding year—a decrease of \$24,914.27.

The total deposits numbered 296, all being gold. There were two redeposits. One hundred and fifty-five ore assays were made and 18 pieces of chemical work performed.

The employees are 2 officers (males), 1 clerk (female), 2 laborers (males).

The following table shows the amount of deposits, earnings, and expenditures; also percentage of net expenses to deposits during the fiscal year 1906:

Item.	Amount.
Deposits: Gold	
Percentage of net expenses to deposits 1. 41376	

ASSAY OFFICE OF THE UNITED STATES AT ST. LOUIS, MO.

The receipts of this office were the smallest last year of any office in the service. They aggregated \$221,520.06, showing a reduction in value compared with those of 1905 of \$204,376.47.

The receipts of domestic gold bullion amounted to 10,236.869 standard ounces of gold and 9.02 standard ounces of silver; of jewelers' bars containing 1,612.687 standard ounces of gold and 435.47 standard ounces of silver; foreign bullion contained 19.021

276

standard ounces of gold and 6.19 standard ounces of silver; uncurrent domestic gold coin, 9.950 standard ounces of gold.

One hundred and seventy-seven melts of gold deposits were assayed. There were received and assayed 42 special bullion assays, for which a charge of \$2 each was made.

The working force of this office consists of assayer in charge and one clerk, male.

The following statement shows the amount of deposits, earnings, and expenditures, also percentage of net expenses to deposits during the fiscal year 1906:

Item.	Amount.
Deposits: Gold	\$221, 520. 06 447. 02
Earnings. Expenditures. Percentage of net expenses to deposits	447.02 3,545.45

ASSAY OFFICE OF THE UNITED STATES AT DEADWOOD, S. DAK.

At this office, there were deposited during the fiscal year 1906, 126 deposits of bullion, valued at \$567,068.98, all from the Black Hills district, South Dakota.

There were 6 button and 31 ore assays and 9 assays on mass melts, in addition to 126 assays on bullion deposited.

No mutilated or uncurrent gold or silver coins were received during the year.

The total number of employees in the assay office at the close of the fiscal year was 5 men, all in the general office.

Our business shows a decrease from last year, owing to the closing down of the mills of two of our regular depositors and the burning of the Horseshoe mill.

The following statement shows the amount of deposits, earnings, and expenditures, also percentage of net expenses to deposits during the fiscal year 1906:

Item.	Amount.
Deposits: Cold	
Earnings. Expenditures. Percentage of net expenses to deposits	\$567,068.98 1,116.21 8,983.23

Assay Office of the United States at Seattle, Wash.

A change occurred in the head of this institution during the year, Calvin E. Vilas succeeding Frederic A. Wing, resigned, on March 1, 1906. At the same time H. L. Glenn, formerly first assistant assayer of the United States assay office at Helena, became first assistant assayer at the Seattle office, succeeding F. C. Newton, resigned, and L. S. Kerfoot, of the San Francisco mint, became chief clerk, succeeding T. G. Hathway, who in turn succeeded George E. Adams as cashier of the office.

H. Doc. 9, 59–2–––19

George Edward Adams, who had been a trusted employee of this institution almost from the time it was opened, was arrested November 23, 1905, charged with stealing gold from deposits while they were awaiting assay. He was indicted and has since pleaded guilty to two counts in which the amounts stolen aggregated \$45,000, and received a sentence of ten years in the penitentiary at hard labor.

Adams's method was to abstract a small amount of gold dust from each deposit, substituting enough sand to make good the gross weight by which the deposits are checked until the assays are made. Civil suits are pending against him to recover the equivalent of the thefts and considerable property has been attached.

The business of this office during the year is shown by the following statements:

Bullion received.	Number of deposits.	Number of redeposits.	Standard ounces.	Coining value.
Gold			964, 560. 646 166, 500. 25	\$17, 945, 312. 67 193, 745. 74
Total	3,595		1,131,060.896	18, 139, 058. 41

Number of buildin assays determined	8,4/8
Number of lead assays determined	305
Number of special bullion assays received	75
Number of returned bars	8
Number of ounces proof gold manufactured	None.
Number of ounces quartation silver manufactured	550
Number of cupels manufactured	
Total weight of deposits before melting	1.044.501.99
Total weight of deposits after melting	1,035,779.85
Average loss in meltingper cent.	0.835

Twenty ounces of proof gold were obtained from the United States mint at Philadelphia in return for an equivalent value of gold cornets.

The 305 lead assays were made for the collector of customs to determine duties on ores shipped into this country.

The number of employees at the end of the fiscal year was 31 (all male), but for six months of the year, during the winter season, only 27 men were employed, all in general department.

Of the 3,595 deposits received, 3,572 were crude bullion and 23 refined. The great bulk of refined bullion is foreign, coming principally from smelters and refineries in British Columbia.

The source of production of deposits is shown in the following table:

	Ge	old.	Silver.		
Locality.	Standard ounces.	Value.	Standard ounces.	Coining value.	
Alaska. California. Colorado. Idaho. Montana. Nevada. Oregon. Washington. Wyoming. British Columbia. Northwest Territory. Masbate Island. United States gold received over counter Jewelry bars. Foreign coin.	$\begin{array}{cccccccccccccccccccccccccccccccccccc$		$\begin{array}{c} 75,780.65\\ 83.86\\ 39.82\\ 367.01\\ 39.46\\ 1.49\\ 377.63\\ 251.23\\ .07\\ 11,802.06\\ 77,641.61\\ 3.55\\ 0.00\\ 109.03\\ .78\end{array}$	\$88, 181, 12 99, 99 46, 3, 427, 00 45, 99 1, 77 439, 44 292, 3, 00 13, 733, 33 90, 346, 60 126, 84 4, 12 0, 00 126, 84 9, 91	
Total	964, 560. 646	17,945,312.67	166,500.25	193,745.7	

A comparison of this table with that of last year shows that the output of Alaska increased \$5,645,845.58, while that of the Yukon, or Northwest Territory, decreased \$2,612,245.22. With the exceptions of Oregon and Washington, from which there were slight decreases in receipts, the other districts showed small increases in receipts. The total increase in receipts for the year 1906 over the year 1905 was \$3,018,846.71.

The receipts from the different districts of Alaska are shown in the following table:

	. Go	ld.	Silver.

GOLD.

The value of the precious metals wasted in the metallurgical and mechanical departments was \$12,247.62. A loss of \$13,836.52 occurred from the difference between the assay value of the bullion contained in sweeps and leady melts sold and the amount received for the same.

WASTAGE AND LOSS ON SALE OF SWEEPS, FISCAL YEAR 1906.

	Mint at—				Assay of-	
Items.	Philadel- phia.	San Fran- cisco.	New Or- leans.	Denver.	fice at New York.	Total.
Melter and refiner's gold wastage. Coiner's gold wastage. Coiner's silver wastage. Loss on sale of sweeps. Loss on sale of leady melts.	1,065.76	\$522.20 1,105.33	\$84.70 372.04 322.33	\$2,050.98 33.27	\$2, 136. 78 10, 451. 37 590. 41	\$5,977.80 4,276.55 1,993.27 13,246.11 590.41

Total	8, 414. 73	1,627.53	779.07	2,084.25	13, 178. 56	26,084.14

The wastage and losses aggregated \$26,084.14. Against these losses there were gains arising from the operations in bullion, as follows:

Character of gains.	Fiscal year 1906.
Surplus bullion returned by operative officers.	\$21, 645. 96
Precious metals received in grains and sweeps.	22, 409. 46
Gains on bullion shipped from the minor assay offices to the mints for coinage.	5, 058. 18
Total gain.	49, 113. 60

Deducting the incidental gains on bullion from the value of the total operative wastage and loss on sale of sweeps, there was a net gain in the operations of the mints during the fiscal year of \$23,029.46.

SUMMARY OF THE WORK OF THE MINOR ASSAY OFFICES.

The institutions of the mint service consist of the coinage mints at Philadelphia, San Francisco, New Orleans, and Denver; the mint at Carson, which at present is conducted as an assay office; the assay office at New York, which, like each of the coinage mints, operates a refinery, and the minor assay offices at Boise, Helena, Charlotte, St. Louis, Deadwood, and Seattle. Bullion is received at the assay offices on the same terms as at the mints, except that an additional charge of one-eighth of 1 per cent is made at the former. Bullion purchased at the assay offices becomes the property of the Government, and is shipped to the mints at the expense of the Govern-

The express charges upon bullion shipped from the minor offices to the mints and upon coin from the mints to the assay effices during the year amounted to \$56,753.69, and on shipment of gold and silver

REPORT ON THE FINANCES.

bullion from the assay office at New York to the mint at Philadelphia to \$4,095.02. The cost of maintaining these minor offices and a statement of their deposits and earnings are given below:

UNITED STATES GOLD COIN IN CANADA.

The holdings of United States gold coin in the Dominion of Canada treasury on the 30th of December, 1905, was \$29,494,298; the holdings of the charterbanks (34 in number) on the same date aggregated \$11,320,323, or 57.56 per cent, of their specie holdings. The total amount of United States gold coin in sight in Canadian reserves on the foregoing date was, therefore, \$40,814,621.

WORLD'S STOCK OF MONEY.

The monetary systems and an estimate of the approximate stock of gold, silver, and uncovered paper money in the different countries of the world at the close of the calendar year 1905, are shown in the following table compiled from official and unofficial sources, the latter being used only in the absence of official information:

a In United States Treasury and national banks.
b Official information furnished through United States representatives.
c No information.
d Estimate, Burcau of the Mint.
e The figures of the total stock of gold in India are for the net imports since 1893-94 plus the production of the country. The amount in the government treasury is from official advices. The net imports of gold since 1835-36-when the records begin-amount to \$817,374,610, and the production recorded to \$103,209,754. The tide of gold and silver has been flowing into India for centuries.

/ Includes Straits Settlements, the Malay States, and Johore.
p L'Economiste Européen, January 1, 1906.
h Except Costa Rica and British Honduras—gold-standard countries.
i Exclusive of \$106,036,290 gold credit of State bank held abroad.
Nore.—The value of the monetary stock of the silver-standard countries has been changed to conform to the decline in silver values. The monetary stock of Mexico and other countries where the Mexican dollar circulates is given in Mexican dollars at bullion value.

The foregoing table of the world's stock of money is for December 31, 1905. It is submitted as giving the best information obtainable, although unsatisfactory in many respects. From many countries it is impossible to obtain official information, and where obtained it is not always consistent with previous reports. This is particularly true as to the estimates of money in circulation, which, obviously, in every case, must be only an approximation. The figures for the stock of gold in banks and public treasuries are from official sources and believed to be accurate, although there may be some duplication through bank credits. A special effort has been made to eliminate everything but the actual gold coin and bullion holdings of each reporting bank.

The figures for gold in banks and public treasuries for the United States include only gold in the national banks and United States Treasury. These figures for other countries include no banks but the authorized banks of issue. For Germany they include the war fund of \$28,560,000.

The figures for the total amount of gold in banks of issue and public treasuries show an increase during the calendar year 1905 of \$104,-700,000. The figures for the total stock of gold in the world in use as money show an increase over the figures given for the close of 1904 of \$496,400,000. As this amount largely exceeds the year's production, of course no such increase actually occurred, but must be accounted for in part by changes from the provisional estimate. The increases over the estimate made for the close of 1904 are given below, by countries.

The total increases foot up \$504,500,000 and scattering decreases in other countries \$8,100,000, reducing the gain to the sum given.

The most notable gains are those of France, Italy, and the United States, which are well verified.

United States. Austria-Hungary. Belgium . Canada. United Kingdom. India. Bulgaria. Denmark. France. Germany. Italy.	$\begin{array}{c} 2,300,000\\ 500,000\\ 15,800,000\\ 25,900,000\\ 13,100,000\\ 5,300,000\\ 3,500,000\\ 106,200,000\\ 106,200,000\\ \end{array}$	Russia. Servia. Argentina. Chile. Colombia. GOLD AND SILVER USED IN INDUSTRIAL ARTS IN THE UNITED STATES DURING THE CALENDAR YEAR 1905.

Among the purveyors of gold and silver bars for use in the industrial arts the United States mint at Philadelphia and the United States assay office at New York hold the foremost places, consequently the larger portion of the material consumed in the arts is brought under Government notice as a matter of public record.

The following table gives the value of the gold and the quantity of the silver bars issued by the Government institutions and private refineries during the calendar year 1905: Gold and Silver Bars Issued by the Government Institutions and Manufactured by Private Refineries for Use in the Industrial Arts during the Calendar Year 1905.

•		Gold.		Silver.			
Material used.	Govern- ment insti- tutions.	Private refineries.	Total.	Govern- ment insti- tutions.	Private refineries.	Total.	
Domestic bullion Foreign material. United States coin Old jewelry Total	\$19,950,844 3,561,251 566 2,881,812 	\$609,066 818 430,087 2,704,824 3,744,795	\$20,559,910 3,562,069 430,653 5,586,636 30,139,268	Fine ozs. 1,284,171 2,712,633 163 576,354 4,573,321	Fine ozs. 15,296,136 41,370 500 3,712,669 19,050,675	Fine ozs. 16,580,30 2,754,00 66 4,289,02 23,623,990	

Estimating that the total amount of gold coin used in the arts during the calendar year has been \$3,500,000, and silver coin, \$100,000 equivalent to 77,344 fine ounces—the total industrial consumption would be as follows:

Material used.	Gold.	Silver.
Domestic bullion. Foreign material. United States coin. Old material. Total.	5,586,636	Fine ounces. 16,580,307 2,754,003 77,344 4,289,023 23,700,677

The following table gives the amounts and the classification of gold and silver used in the industrial arts in the United States since 1880:

Of the total value of bars (\$26,447,598.47) exchanged for coin, \$1,055,397.42 were exported and \$25,392,201.05 were used in the industrial arts.

THE WORLD'S INDUSTRIAL CONSUMPTION OF THE PRECIOUS METALS IN 1905.

This Bureau estimates the world's consumption of the precious metals in the arts during 1905 as follows:

Gold, 128,080 fine kilograms, of the value of \$85,122,000, equivalent to 4,117,777 fine ounces; and silver, 1,576,859 fine kilograms, of the value of \$30,937,980, equivalent to 50,718,000 fine ounces. In these estimates only new material is taken into account.

PRODUCT OF GOLD AND SILVER IN THE UNITED STATES IN 1905.

The detailed statistics of the product of gold and silver in the United States for the calendar year 1905 were presented in a special report to the Secretary of the Treasury.

The distribution of the product among producing States and Territories was as follows:

H. Doc. 9, 59–2–––20

[As estimated by the Director of the Mint.]

WORLD'S PRODUCTION.

Tables compiled from information furnished by foreign governments through our diplomatic representatives and revised from the latest data, exhibiting the weight and value of the gold and silver product of the principal countries of the world for the calendar years 1903, 1904, and 1905, will be found in the appendix.

WORLD'S COINAGE.

In the appendix will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of the world during the calendar years 1903, 1904, and 1905. The following is a summary of the same:

	COINAG	EOF	NATIONS.
--	--------	-----	----------

•	Calendar year.	Go	ld.	Silver.
1904		\$240, 455, 245,	499, 547 427, 085 954, 257	\$211, 795, 829 176, 508, 646 103, 880, 205

The above figures represent, as nearly as this Bureau has been able to ascertain, the total value of the gold and silver coinages executed in the world during the years given.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this Bureau and sent to foreign governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

VALUES OF FOREIGN COINS.

The law requires (sec. 25, act of August 28, 1894)—

That the value of the foreign coins as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint, and be proclaimed by the Secretary of the Treasury immediately after the passage of this act and thereafter quarterly on the 1st day of January, April, July, and October in each year.

In accordance with the foregoing requirements the values of foreign coins have been estimated and proclaimed as follows:

VALUES OF FOREIGN COINS, OCTOBER 1, 1906.

[The coins of silver-standard countries are valued by their pure silver contents, at the average market price of silver for the three months preceding the date of this circular.]

MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the production and coinage of the precious metals, imports and exports of gold and silver, amount of bank and government notes, both covered and uncovered, of the different foreign countries, are published annually in the reports of the Bureau of the Mint. They are obtained directly from the governments of such countries by the representatives of the United States accredited to them.

Respectfully,

GEO. E. ROBERTS, Director of the Mint.

Hon. LESLIE M. SHAW, Secretary of the Treasury.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,

OFFICE OF THE COMPTROLLER OF THE CURRENCY, Washington, D. C., December 3, 1906.

SIR: In compliance with the requirements of section 333 of the Revised Statutes of the United States, the forty-fourth annual report of the operations of the Currency Bureau for the year ended October 31, 1906, is herewith submitted.

CONDITION OF NATIONAL BANKS.

The resources and liabilities of national banks in active operation at date of the periodical reports made to the Comptroller during the past year are shown in detail in the following table:

Abstracts of Reports of Condition of National Banks in the United States from November 9, 1905, to September 4, 1906.

As will be noted from the foregoing statement, 6,137 national banking associations, with aggregate resources of \$8,016,021,066, were in active operation on September 4. Over three-fourths of the resources of the banks are in loans, bonds, securities, etc., and lawful money, the loans amounting to \$4,298,983,316; United States bonds on deposit to secure circulation, \$524,036,980; Government loans, \$97,171,580; and held in bank, \$7,588,150; other bonds and securities, \$701,240,755; speeie, \$464,437,290; legal-tender notes, \$161,575,120. The paid-in capital stock is shown to be \$835,066,796; surplus, \$490,245,134; other undivided profits, \$180,569,857; circulating notes outstanding, \$517,964,511; individual deposits, \$4,199,938,310; United States deposits and deposits of United States disbursing officers, \$107,-831,813.

Since August 25, 1905, the date of the corresponding call, increases have occurred as follows: Loans and discounts, \$300,474,163; United States bonds, \$77,315,040; capital stock, \$35,196,567; surplus and other profits, \$50,521,023, circulation outstanding, \$48,984,722, individual deposits, \$379,256,597. The amount of specie and legaltender notes held on September 4, 1906, was \$39,540,889 less than on August 25, 1905, and the amount due to other banks and bankers was less to the extent of \$35,876,120. The abstracts further show that from November 9, 1905, there was a gradual increase in the volume of loans from \$4,016,735,497 to \$4,298,983,316 on September 4, 1906. Individual deposits amounting to \$3,989,522,834 at the beginning of this period increased to the extent of \$99,000,000 by January 29, 1906; fell off to the extent of \$110,000,000 on April 6, but between that date and June 18 increased \$77,000,000, and from that date to September 4 increased \$144,000,000. The total increase in individual deposits from November 9, 1905, to September 4, 1906, was approximately \$210,400,000.

LOANS AND DISCOUNTS.

Periodical reports of condition made to this office by national banking associations show the amount and character of loans, classified as demand paper, with one or more individual or firm names; demand paper collateraled by stocks, bonds, and other securities; time paper, with two or more individual or firm names; time paper, single name, and time paper secured by stocks, bonds, etc.

The amount of loans and discounts on September 4, 1906, was \$4,298,983,316, of which \$1,016,793,343 were held by the 61 banks in the reserve cities of New York, Chicago, and St. Louis. Accommodations of this character granted by the 295 banks in the 38 reserve cities amounted to \$1,161,984,189. The total for banks in both classes of reserve cities was \$2,178,777,532, divided as follows: Demand, singlename paper, \$171,787,594; demand, secured by stocks, bonds, etc., \$621,324,914; time paper, with two or more individual or firm names, \$571,779,482; time paper, single name, \$406,430,691; time paper secured by stocks, bonds, etc., \$407,454,851.

Loans granted by the 5,781 country banks aggregated \$2,120,205,784, classified as follows: Demand, single-name paper, \$202,901,651; demand paper, with collateral, \$206,691,820; time paper, two or more individual or firm names, \$930,255,416; time paper, single name, \$369,694,410; time paper, with collateral, \$410,662,487.

The amount and percentage of each class of loans shown by the reports made nearest to October 1, 1896, 1905, and 1906 are exhibited in the following table:

	1896.		1905.		1906.		
Class.	Amount.	Per cent.	Amount.	Amount. Per cent.		Per cent.

H. Doc. 9, 59-2----23

The amount and percentage of loans on September 4, 1906, of national banks in New York city, the three central reserve cities, other reserve cities, and elsewhere, are shown in the accompanying table, in which appears also a corresponding statement from the returns on August 25, 1905, and September 6, 1904. It will be noted that the banks located in the reserve cities held on September 4, 1906, but 50.7 per cent of the volume of loans as against 53.8 per cent in 1905 and 53.9 per cent in 1904.

The table in question follows:

	September 4,	1906.	August 25, 1	905.	September 6, 1904.

RESERVE.

With the abstract of reports of condition of national banks at each call is presented a statement of the amount of deposits on which reserve is required, together with a classification of, and the amount and per cent of reserve held. National banks located in the central reserve cities—New York, Chicago, and St. Louis—are required to hold a cash reserve of 25 per cent; banks in other reserve cities 25 per cent, of which, however, one-half may be deposited to their credit with central reserve city banks; and 15 per cent by banks not located in reserve cities, three-fifths of which reserve may consist of balances due from approved correspondents in central or other reserve cities.

due from approved correspondents in central or other reserve cities. On November 9, 1905, the deposit liabilities of banks were \$4,667,-325,425 and the reserve held \$988,293,963. or 21.17 per cent. The

$\mathbf{342}$

New York city national banks held a reserve of 25.26 per cent, but the deficiency in the other central reserve cities brought the average of the three cities down to 24.55, and while the other reserve city banks held a reserve ranging from 21.23 to 32.40, the average for these cities was but 24.77. The average reserve held by country banks was 2.30 per cent in excess of the requirement. On January 29, 1906, the average reserve for the central reserve city banks was 26.51; other reserve city banks 25.70, making the average for both classes 26.09. The average for the country banks was 17.03. On April 6, 1906, the reserve held by the central reserve city banks averaged 24.60 per cent and that of other reserve city banks 24.69, an average for both classes of 24.64. The average for the country banks exceeded the requirement by 2.07 per cent. The June 18, 1906, statement shows the average reserve held by the central reserve city banks to have exceeded the requirement by 0.95 of 1 per cent; Chicago and St. Louis banks were deficient, but the excess of New York City banks made the average for all good. The other reserve city banks had an average reserve of 25.42 per cent and the country banks 16.77. On September 4, 1906, the deposit liabilities of all the banks aggregated \$4,927,865,451, and the reserve held \$1,020,168,046, the average being 20.70 per cent. The average reserve held by all banks in the central and other reserve cities was deficient, amounting to 24.37 and 24.52 per cent, respectively. The average reserve of the country banks was 16.71 per cent.

RELATION OF CAPITAL TO OTHER ITEMS. /

In connection with the general statements in relation to the condition of national banks it is interesting to note changes which have occurred in the relation of capital, etc., to individual deposits, etc. The table appended is based upon the reports made to this office on or about September, 1896, 1905, and 1906. As will be noted the ratio of capital to individual deposits in 1896 was as \$1 to \$2.46; in 1905, \$1 to \$4.78; in 1906, \$1 to \$5.03 and, including with capital, surplus and other undivided profits, the ratios were in 1896, \$1 to \$1.62; 1905, \$1 to \$2.66; 1906, \$1 to \$2.77. The proportion of capital to aggregate resources has gradually decreased from \$1 to \$5.03 in 1896 to \$1 to \$9.60 in 1906. The relation of specie and legal tender notes to individual deposits varied from \$1 to \$5.13 in 1896 to \$1 to \$5.74 in 1905 and to \$1 to \$6.71 in 1906. The variations in the ratios relating to banks located in New York City have not been so marked, as the ratio of capital to individual deposits of banks in that city in 1896 was as \$1 to \$5.48 and in 1906 \$1 to \$6.22. The ratio of capital to aggregate resources in 1896 was \$1 to \$11.56 and in 1906 \$1 to \$13.92. The proportion of capital, surplus and other undivided profits to individual deposits was as \$1 to \$2.49 in 1896 and as \$1 to \$2.77 in The ratio which shows the least change is in respect to specie 1906.and legal tenders as compared with individual deposits. In 1896, for each \$3.22 of individual deposits, the banks held \$1 in lawful money and in 1906 \$1 was held against each \$3.31 of individual deposit liabilities.

The table relating to all national banks follows:

RATIOS OF CAPITAL, ETC., TO INDIVIDUAL DEPOSITS, ETC., OF NATIONAL BANKS IN SEPTEMBER, 1896, 1905, AND 1906.

Items.	1896.	1905.	1906.			
Capital to individual deposits Capital to loans. Capital to aggregate resources. Capital and surplus and other profits to individual deposits. Specie and legal tenders to individual deposits.	1.00 to 2.92 1.00 to 5.03 1.00 to 1.62	1.00 to 9.34 1.00 to 2.66	1.00 to 5.15 1.00 to 9.60 1.00 to 2.77			

The relative proportion of the principal items of resources and liabilities to the aggregate resources of national banks at date of reports nearest to October 1, from 1900 to 1906, inclusive, is shown in the following table:

CAPITAL, BONDS, AND CIRCULATION.

During the year ended October 31, 1906, there was a gross increase of \$49,935,500 in the authorized capital stock of national banks, of which \$28,517,000 was from old banks increasing their capital, and \$21,418,500 from newly chartered banks. The loss of capital was \$15,409,800, which includes \$13,223,000 by associations placed in voluntary liquidation and as a result of expiration of the corporate existence of two associations; \$1,536,800 by banks reducing their capital, and \$650,000 by insolvent national banks. The net increase as a result of these changes was \$34,525,700, but this includes \$612,000, the capital of banks closed but for which lawful money has not been deposited for the retirement of circulation and release of bonds on deposit as security therefor. The books of the office show the actual net increase as \$33,913,700.

The average authorized capital of the 6,225 national banks in operation October 31, 1906, was \$135,895 as against an average of \$170,000 for the 3,617 banks in existence on March 14, 1900. This reduction is the result of the organization of 2,062 national banks under authority of the act of March 14, 1900, the minimum capital authorized being \$25,000, but the average was approximately \$26,000. The average capital of the 1,095 banks organized under the act of 1864, but since March 14, 1900, was \$115,722, making an average for the 3,157 banks incorporated from March 14, 1900, to October 31, 1906, of \$57,480.

The authorized capital stock of national banks at the close of the current report year was \$845,939,775; bonds on deposit as security for circulation, \$539,653,180; circulation outstanding secured by bonds, \$536,933,169; circulation secured by deposits of lawful money, by banks reducing their circulation, those placed in voluntary liquidation, and on account of insolvent national banks, \$46,238,816, making the aggregate circulation outstanding \$583,171,985. Bonds on deposit as security for circulation are as follows: Two per cent consols of 1930, \$492,170,650; Panama Canal bonds, \$14,482,080; fours of 1907, \$25,124,650; fours of 1925, \$4,602,100; threes of 1908, \$3,273,700. The consols of 1930 and the Panama Canal bonds represent approximately 94 per cent of the bonds on deposit as security for circulation. The highest and lowest market prices of 2 per cent consols of 1930 in October were $104\frac{3}{4}$ and $104\frac{1}{4}$; Panama Canal bonds,

105 and $104\frac{1}{2}$; fours of 1907, $102\frac{5}{8}$ and $102\frac{3}{8}$; fours of 1925, $131\frac{1}{2}$ and $130\frac{1}{4}$; threes of 1908, 103 and $102\frac{1}{4}$.

The number of national banks in operation, authorized capital stock, bonds on deposit to secure circulation, circulation secured by bonds and by lawful money, total amount of circulation outstanding, and the average monthly market price of 2 per cent consols from November 1, 1905, to October 31, 1906, are shown in the accompanying table.

	Num-		Bonds on deposit.	Average	Circulation secured by—		Total circu-

CLASSIFICATION OF BANKS BY CAPITAL STOCK.

By reference to the subjoined table it will be noted that 50 per cent of the number of banks in existence, representing one-fourth of the capital stock, are of the class with capital of \$50,000 to \$100,000, inclusive, and that nearly 28 per cent of the capital, representing 7 per cent in number, is with banks having individual capital of over \$250,000 to \$1,000,000, inclusive. Nearly 16 per cent of the capital is represented by approximately 12 per cent of banks with capital of \$100,000 to \$250,000, inclusive. Approximately 1 per cent of the banks with capital in excess of \$1,000,000 represent nearly 25 per cent of the aggregate capital. Of the smallest class, those with capital of less than \$50,000, there are 1,831 associations, nearly 30 per cent of the number, but with only 5.72 per cent of the capital stock. The table in question is as follows:

Capital, classified.	Number of banks.	Percent.	Capital.	Per cent.
Less than \$50,000. \$50,000 to \$100,000, inclusive. Over \$100,000 to \$250,000, inclusive. Over \$250,000 to \$1,000,000, inclusive. Over \$1,000,000 to \$5,000,000, inclusive. The percentage of outstanding circulation to the paid-in capital of national banks, as shown by reports of condition, periodically, from January, 1866, to December, 1885, materially exceeded 50 and ranged from a maximum of 70.3 at the close of 1868 to 50.5 at the close of 1885. From the latter date there was a gradual decrease to 18.4 in July, 1891. From October, 1893, to March, 1895, the average was approximately 25 per cent, and thereafter a steady and slight increase to 33.8 per cent in December, 1899. The act of March 14, 1900, resulted in an increase of the rate to 38.3 per cent on April 26 of that year, and 47.3 at the close of the year. With the exception of July, 1902, when the rate was 44 per cent, the proportion of circulation to capital has exceeded 45 per cent since the date last named, and reached a maximum of 62.03 per cent in September, 1906.

Distribution of national-bank circulation, based on reports of condition during the year ended September 4, 1906, is shown in the following table in its relation to the amounts issued by national banks ocated in reserve cities and elsewhere:

Date.	New York.	New York, Chicago, and St. Louis.	Other reserve cities.	All reserve cities.	Country.	Total
1905. November 9	Millions. 55.2	Millions. 74.8	Millions. 106.5	Millions. 181.3	Millions. 304.2	Millions. 485.5
1906. January 29. April 6. June 18. September 4.	52.5 49.3	76. 2 75. 9 73. 3 69. 7	108. 1 110. 9 113. 5 116. 5	184.3 186.8 186.8 186.2	313. 9 318. 7 324. 1 331. 7	498.2 505.5 510.9 517.9

Amount of each denomination of circulation outstanding on October 31, 1906, the amount previously issued, together with total redemptions, are shown in the following table:

Denominations.	Issued during the year.	Issued previ- ous years.	Total issued to Oct. 31, 1906.	Total redeemed to Oct. 31, 1906.	Outstanding Oct. 31, 1906.

a Excluding \$75,185 gold bank notes.

During the year ended October 31, 1906, notes to the amount of \$278,550,060 were received for redemption at the United States Treasury redemption agency, of which \$203,247,874 were delivered to the Comptroller of the Currency for destruction, \$177,851,593 of the latter amount being replaced by new notes; \$12,912,870 redeemed and destroyed as a result of reduction of circulation, and \$12,142,389 redeemed and destroyed on account of insolvent and liquidating banks. In addition to the amount stated, notes aggregating \$341,022 were received by the Comptroller direct from national banks for redemption without reissue.

Nearly one-third of the notes received for redemption at the agency were in condition to warrant their return to the issuing banks upon redemption, the amount returned being \$77,523,750. About 86 per cent of the receipts for redemption came from banks located in the reserve cities and nearly 50 per cent from banks located in the city of New York. The amount and per cent of receipts from the principal reserve cities were as follows:

Reserve cities.	Amount.	Per cent.
New York Chicago	20,710,985 19,276,901 13,233,505 10,256,200	48.9 9.7 7.4 6.9 4.8 3.7 2.9 2.1
Total	240,677,251	86.4

The law limits the retirement of national-bank circulation by the deposit of lawful money to \$3,000,000 in any one calendar month. Beginning with January, 1906, applications to retire circulation exceeded the limit each month, but the aggregate amount of circulation retired in this manner from November 1, 1905, to October 31, 1906, was but \$20,686,400. Deposits to retire circulation of insolvent and liquidating banks and the coincident withdrawal of bonds to a like amount aggregated \$31,980,090.

The relative proportion of national-bank circulation to aggregate currency of the country was greatest in 1873, namely, 43.7 per cent, but with the increase in the coinage of gold and silver the ratio steadily declined to 7.3 per cent in 1891. From this low point there was a very gradual rise and in June, 1906, 16.6 per cent was reached and, coincidently, the percentage of circulation to capital reached a higher rate (61.8) than in any year since 1883, when it stood at 63.7.

In 1900 circulating notes of the denomination of \$5 amounted to approximately one-third of the outstanding issues. As a result of the legislation of March 14 of that year, limiting the amount of fivedollar notes issuable by any one bank, the percentage steadily declined to 13.6 per cent in 1904, but increased to 14.01 per cent in 1905 and to 15.63 per cent on October 31, 1906. As an aid to the issue of the largest amount possible of notes of the lower denominations, and without permitting a deviation from the provisions of the act of March 14, 1900, during the past year the Department authorized the engraving of an additional plate for the printing of four notes of the denomination of \$10. Theretofore, under departmental regulations, notes could be printed only from one or more of three sets of plates, namely, four \$5's, three \$10's and a \$20, and a \$50 and \$100. It should be stated, however, that the use of the four-\$10 plate has not been in effect long enough to result in a material increase in the amount of notes issued of that denomination.

PROFIT ON CIRCULATION.

The profit on, as well as the flexibility of, national-bank circulation depends upon the cost of bonds deposited as security therefor. The average net price, monthly, of 2 per cent consols of 1930 fluctuated during the year from a minimum of 103.075 in February, 1906, to 103.95 in July, 1906. In August the price rose to 104.756, in September to 105.090, but declined in October to 104.221. At the minimum price of bonds during the year, 103.075 in February, the profit on circulation was 1.160 per cent. At the market price of bonds in September, namely, 105.090, the profit is reduced to 0.982 per cent. The average rate of profit, based on the average cost of bonds, monthly, during the year ended October 31, 1906, was 1.09 per cent. In estimating the profit on circulation 6 per cent is taken as the rate for money. From the gross receipts, interest on bonds at 2 per cent and on circulation at 6 per cent, taxes, expenses for redemptions, and sinking fund are deducted to determine the net receipts. The difference between net receipts and interest on cost of bonds at 6 per cent is the measure of profit over the cost price of bonds invested at 6 per cent. Upon circulation secured by \$100,000 2 per cent bonds at 104.221, the average market price in October, gross receipts are \$8,000, taxes, etc., \$646, making net receipts \$7,354. Interest on the cost of the bonds at 6 per cent amounts to \$6,253.26, resulting in an excess profit on the issue of circulation to the amount stated of \$1,100.74 or 1.056 per cent.

BANKS WITHOUT CIRCULATION.

At the close of the year ended October 31, 1905, there were 8 national banks in operation, with aggregate capital of \$2,625,000 and bonds on deposit with the Treasurer of the United States in trust of \$181,250, which had no circulating notes outstanding. At the close of the current year the number of nonissuing-note banks was reduced to four, with capital and bonds of \$280,000 and \$70,000, respectively.

EARNINGS AND DIVIDENDS.

In the year ended March 1, 1906, shareholders of national banks were paid dividends to the amount of \$80,831,561 on \$779,544,247 capital, the average rate being 10.4 per cent, the highest since 1870. Based on capital and surplus the ratio was 6.8 per cent. The net earnings were \$113,662,529, or 9.5 per cent, of the combined capital and surplus. The average rate of dividends paid by national banks annually from 1870 to 1906, 37 years, was 8.42 per cent. The aggregate net earnings of the banks during the period in question were \$2,313,396,556, from which dividends were paid to the amount of \$1,780,712,714, which is over three times the average annual capital. As the act providing for the submission to this office of semiannual

reports of earnings and dividends was enacted in March, 1869; from that date to the present time the reports have been compiled and published for the six months periods ending March 1 and September 1. By reason of the fact that the dividend periods for the large majority of banks end on June 30 and December 31, in future the returns will be compiled and published for the six months ending on those dates.

EXPENSES.

The expenses of national banks, in so far as this Department is concerned, during the fiscal year ended June 30, 1906, were as follows: Semiannual duty on circulation, \$2,509,977.80; examiners' fees, \$396,766.23; cost of redemption of notes by the Treasurer of the United States, \$250,924.24; cost of plates for new banks, \$54,150; cost of plates for extended banks, \$31,450; the aggregate being \$3,243,268.27. The cost of redemption of circulating notes per thousand dollars was 84.528 cents. The cost per thousand in 1905 was 80.993 cents. During the existence of the system national banking associations have paid \$98,730,906 in tax on circulating notes; from 1874 to 1906, for expenses in connection with redemption of circulating notes, \$5,461,959; for examiners' fees, 1883 to 1906, \$5,094,273; cost of plates for the printing of circulating notes, \$981,530. In addition to these amounts taxes were paid on capital to June 1, 1883, and under the war-revenue act of 1898, amounting to \$14,904,301, and on deposits to June 1, 1883, \$60,940,067, the total payments for all purposes enumerated being \$186,113,036. These payments are stated in the following table:

Expenses.	Amount.
Redemption of circulating notes from 1874 to 1906. Cost of original plates, 1883 to 1906. Cost of extension plates, 1883 to 1906. Fees for examination authorized by section 5240, United States Revised Statutes, 1883 to 1906.	\$5, 461, 959 581, 910 399, 620 5, 094, 273
Total. Tax paid on capital to June 1, 1883, and under war-revenue act of 1898. Tax paid on deposits to June 1, 1883. Duty paid on circulation to June 30, 1906.	11, 537, 762 14, 904, 301 60, 940, 067 98, 730, 906
Total	186, 113, 036

GAIN ON NATIONAL-BANK NOTES NOT PRESENTED FOR REDEMPTION.

From the date of the first issue of national-bank circulation in 1863 to October 31, 1906, notes to the amount of \$3,566,012,225 were issued; \$2,982,955,511 redeemed, leaving outstanding on the latter date \$583,056,714, of which \$46,238,816 is covered by deposits of lawful money with the Treasurer of the United States from which the notes are redeemed as presented. Under the law any gain that may arise from the failure to present notes for redemption inures to the benefit of the United States. An examination of the records discloses the fact that from the beginning of the system up to October 31, 1872, 119 associations were closed, 98 by voluntary liquidation, and 21 by failure; further, that the notes issued by these associations aggregated \$13,351,233, and that of these issues there is still outstanding \$100,488,

350

or seventy-five one-hundredths of 1 per cent. The fact that during the past year notes to the amount of \$635 were presented for redemption, which were issued over thirty-five years ago, makes it impossible to state the percentage of such notes which will never be presented for redemption. Some years since an estimate was made by the Department in relation to the percentage of Government and national-bank notes that would never be presented for redemption, and which would represent the measure of the gain that would inure to the Government. It was then estimated that the proportion of nonpresented notes would not exceed two-fifths of 1 per cent. From the records hereinbefore presented it would appear probable that the gain on nonpresented national-bank notes will not exceed one-half of 1 per cent and may possibly be reduced to two-fifths of 1 per cent.

CHANGES IN CORPORATE TITLES.

Under authority of the provisions of the act of May 1, 1886, 14 national banks changed their corporate titles during the year, change of location within the 30-mile limit occurring in one instance. By special act of Congress the American National Bank of Graham, Va., was removed to Bluefield, W. Va., and the title changed by the substitution of the word "Bluefield" for "Graham."

The associations concerned in these changes are shown in the following table:

No.	Title and location.	Date.
		, 1905.
1274	"The Marthas Vineyard National Bank of Edgartown," Mass., to "The Marthas Vine- vard National Bank of Tisbury." Mass.	Nov. 15

	Hornell''	Aug. 23
3555	"The Crocker-Woolworth National Bank of San Francisco," Cal., to "The Crocker National Bank of San Francisco"	Aug. 31

EXTENSIONS OF CORPORATE EXISTENCE.

During the past year the corporate existence of 124 national banking associations was extended, of which 102 were effected under the act of July 12, 1882, and 22 under the act of April 12, 1902, banks in the latter class having reached the completion of their second period of succession. Subsequent to July 12, 1882, and under authority of the act of that date, the corporate existence of 2,450 associations, with aggregate capital of \$519,261,365, have been extended. Since April 12, 1902, 957 associations, with capital of \$317,284,365, have extended their charters for a further period of twenty years. During the year ending October 31, 1907, the corporate existence of 138 banks, with capital of \$18,595,000, will expire and may be extended under the act of July 12, 1882, and in the same year four associations, with aggregate capital of \$950,000, will reach the period when their charters may be extended for a second time under the act of April 12, 1902. The names of banks in both classes, with the dates of expiration of existing charters, will be found in the appendix to the report of the Comptroller of the Currency.

LIQUIDATIONS AND CONSOLIDATIONS.

Including 2 associations whose charters expired by limitation, 81 national banks, with capital of \$13,223,000, were placed in voluntary liquidation during the past year. Four of the banks in the list, however, were closed prior to October 31, 1905, but not reported until subsequent to that date. Of these liquidated banks 22, with capital of \$3,612,000, were closed to consolidate with other national banks, the capital of the latter prior to consolidation being \$5,270,000 and subsequent thereto \$7,190,000. Two associations with capital of \$363,000 were reorganized, with authorized capital of \$1,050,000; 45 banks, with capital of \$8,735,000, were reorganized as state institutions or succeeded or absorbed by banks of that character; 12 associations, with capital of \$513,000, are reported to have been liquidated to close business.

The liquidating national banks, with date of authority to begin business, date of closing, capital stock, circulation issued, redeemed, and outstanding, are listed in the accompanying table:

		te of	Data af	Conital	Circulation.

^a Resumed business Jan. 29, 1906. ^b Resumed business July 17, 1906. c Resumed business Apr. 30, 1906.
 d Resumed business Oct. 15, 1906.

By reference to the foregoing statement it will be noted that the capital and outstanding circulation of the 12 associations listed were \$830,000 and \$253,670, respectively. It further appears from the examination of reports of condition made to this office prior to closing that the liabilities of the banks to depositors and other creditors aggregated \$1,656,796. Four of the associations listed, with combined capital of \$150,000, having been restored to solvency, were permitted to resume business and the receivers discharged. Of the remaining eight banks in the list three have paid dividends to creditors to the extent of 50 per cent, one 35 per cent, and one 100 per cent, together with 2.9 per cent of interest. In addition to the 50 per cent dividend paid by one of the banks in the list up to October 31, a final dividend was subsequently declared in full payment of all claims.

Transactions effected during the year show collections from assets of \$8,988,860 and dividends paid \$8,840,327. Nonliquidated assets of the nominal value of \$15,933,698 are still held, being a reduction of \$9,314,322 since October 31, 1905. The Comptroller and receivers have on hand, to the credit of the trusts, cash to the amount of \$1,031,796. The collections made and dividends paid during the year were materially greater than in any similar period since 1900.

Since the beginning of the national banking system, banks to the number of 468 have been placed in the charge of receivers, with capital stock aggregating \$75,417,420. Assessments amounting to \$43,018,240 were made upon the shareholders, and assets of the nom-

inal value of \$295,112,058 were taken charge of by receivers, classified as "good" \$143,666,558, "Doubtful" \$90,205,825, and "worthless" \$61,239,675.

The disposition of assets was as follows:

Collections Offsets allowed and settled Losses (assets compounded or sold under order of court) Returned to shareholders. Remaining on hand.	22, 153, 295 103, 302, 481 9, 512, 682
Total	295, 112, 058

In addition to collections from assets, there was realized from assessments upon shareholders \$20,288,907. These collections have been disposed of as follows:

Loans paid and other disbursements Dividends paid	\$32, 583, 458
Legal expenses	4, 453, 299
Receivers' salaries and other expenses Returned to shareholders	2,626,768
Balance held by Comptroller or receivers	1, 031 <u>,</u> 796

The record of every national bank which failed and was placed in charge of a receiver from the first failure in 1865 will be found in the appendix, showing the date of appointment of receiver, capital stock, dividends paid prior to failure, cause of failure, circulation issued, redeemed, and outstanding, lawful money deposited to redeem circulation, the amount of assets, collections therefrom and from stockholders, dividends paid, expenses incident to liquidation, etc., and also similar information relating to each insolvent national bank fully liquidated up to and including October 31, 1906.

RECEIVERSHIPS TERMINATED.

Within the past twelve months the affairs of 15 national banks theretofore placed in the charge of receivers were fully settled by the payment of final dividends to creditors, leaving 71 pending trusts.

Of the three largest banks the affairs of which were closed during the year, two—the Central National Bank of Boston, Mass., and the First National Bank of Macon, Ga.—paid their creditors, principal and interest, in full. The third—the National Bank of Illinois, at Chicago—paid principal in full and 16.30 per cent of all the interest. The latter bank was much the largest of all banks closed by this office in recent years. Its largest asset was an interest in the Calumet Electric Street Railway Company of Chicago. Much credit is due to the receiver, Mr. Edwin A. Potter, of Chicago, for the ability with which he managed the affairs of this trust, and especially his skill and fidelity in the operation and sale of the street railway property, of which he was also the receiver. This property consisted of about 80 miles of street railway track and equipment in South Chicago, operated under different franchises expiring within various periods, respectively ranging from three to fourteen years. It required business judgment and tact of the highest order to prevent a sacrifice of this valuable interest, upon which Mr. Potter succeeded in realizing for the creditors \$3,000,000. From many expressions of approval received it is believed the creditors of the National Bank of Illinois generally appreciate the result which was so gratifying to the Comptroller.

The affairs of 376 insolvent national banks have been fully settled and the receiverships terminated. The capital of these banks at date of failure was \$59,047,420, and the total assets, nominal value, taken charge of by the receivers, \$236,459,547. United States bonds, amounting to \$20,678,650, were held as security for \$18,503,548 outstanding circulation. These bonds were sold for \$22,310,069.86, leaving a balance transferable to the general assets of the trusts of Stockholders were assessed \$35,753,390, and there \$3,806,521.86. was realized from the assessments \$17,362,345. The collections from assets and the amount settled by offsets, etc., were \$114,622,566 and \$17,945,308, respectively. The losses on assets compounded or sold under order of court aggregated \$92,152,092. On the final settlement of the affairs of these trusts assets of the nominal value of \$11,607,387 were returned to stockholders, including \$2,094,705 in cash. Dividends were paid to the amount of \$94,690,043, or 74.42 per cent, on claims proved, amounting to \$127,236,915. In order to ascertain the full amount realized by creditors it is necessary to add the dividends paid to the amount of offsets allowed and loans paid. The records, therefore, show that creditors realized on their claims a total of 80.88 per cent.

The following shows the liabilities of the 376 trusts which have been finally closed and how disposed of:

Liabilities	\$170, 236, 026
Deduct— Liabilities canceled by offsets	
Liabilities paid (loans, etc)	
Liabilities proved for dividends Dividends paid to creditors on claims proved	127, 236, 915 94, 690, 043
Amount of loss to creditors	32 546 872

The actual value of the assets of an insolvent national bank is not known at date of failure. Assets coming into possession of a receiver are scheduled at their face value in his first report, and this valuation appears in all subsequent reports to this office. The actual value of the assets is determined only at the termination of a receivership when reduced to cash or otherwise liquidated.

In the same manner the liabilities require adjusting and can not always be definitely known for a considerable lapse of time after the beginning of a receivership.

The first process in adjusting claims against the bank is to recover collateral, if in excess of the loans, which may have been placed with other banks as security for money borrowed. To recover this class of assets, generally rediscounted paper, it becomes necessary to pay off the loan from funds of the trust, expenditures for this purpose being shown in the receiver's reports under the head of "Loans paid," etc. Disbursements for protecting the assets of the trust from deterioration are also reported under this head. Liabilities may be further reduced by offsets allowed where the same party is both a debtor and creditor of the bank. All remaining creditors are permitted to prove their claims for participation in dividends as from time to time these are declared. It is therefore seen that the total

H. Doc. 9, 59-2-24

liabilities at date of failure, determined at close of the trust, consist of the amounts reported under the heads of "Claims proved," "Loans paid," and "Offsets." Likewise the gross value of assets at date of failure is indicated by collections therefrom added to amount of offset against liabilities.

Cost of liquidation of the affairs of insolvent national banks—that is, receivers' salaries, legal and all other incidental expenses—based on the amount of assets (nominal value) of the trusts, averaged up to and including October 31, 1906, 4.28 per cent, against an average of 4.6 per cent to October 31, 1905.

The greatest number of failures of national banks (given geographically), the affairs of which have been finally liquidated, occurred in the Western States, namely, 92, with capital of \$9,267,000. In the Middle Western States there were 81 failures, with capital of \$16,772,000; in the Eastern States, 72 failures, the capital of the banks being \$12,470,620; in the Southern States, 71 banks with capital of \$9,996,500; Pacific States, 37 banks with capital, \$4,760,000; and New England States, 23 banks with capital \$5,781,300. Creditors of banks located in the New England States realized 94.09 per cent on their claims; in the Middle Western States, 90.42 per cent; Eastern States, 76.01 per cent; Pacific States, 71.71; Southern States, 70.25 per cent, and Western States, 67.73 per cent.

Questions have been frequently raised as to the demand for, and successful operation of, national banks with the minimum amount of capital (\$25,000), authorized by the act of March 14, 1900. The records show that under authority of that act 2,062 associations have been chartered, with capital of less than \$50,000, the average being approximately \$26,000; and that of this number, 17, or less than 1 per cent, have failed. Of the total number of failures since March 14, 1900, namely, 72, less than one-fourth were of the smaller class, which would indicate that these banks are as conservatively managed, and that, as far as the six years' record shows, the probability of failure is less, than with banks of larger capital.

For the purpose of comparison, there is submitted herewith a statement covering the years indicated of the annual (average) deposits in active national banking associations and the ratio of annual loss sustained by creditors of insolvent national banks to the average deposits, together with the amount of claims proved and the aggregate and average loss sustained by creditors:

Annual (average) deposits in active national banks, 1865–1904	\$1, 333, 063, 452
Total claims proved against insolvent national banks to 1904	147, 309, 310
Total loss to creditors (actual 1865-1892, and estimated at 25 per cent	
of claims, 1893–1904)	43,028,977
Average annual loss	1,075,724
Average annual amount of claims proved	3,682,732
Average annual lossper cent	29.21
Average (annual) rate of loss, based on average deposits in active	
national banksper cent	0.0807

The affairs of practically every bank which failed prior to 1892 have been finally liquidated, and in calculating the total amount of loss it has been assumed that trusts still open will be finally liquidated at an average loss not greater than 25 per cent.

COMPTROLLER OF THE CURRENCY.

ORGANIZATION OF NATIONAL BANKS.

The First National Bank of Philadelphia, chartered June 20, 1863, was the first national banking association authorized to do business under authority of the act of February 25, 1863. From that date to the close of the year ended October 31, 1906, 8,421 associations were chartered, of which 6,225, or 74 per cent, are in active operation, 1,750, or 21 per cent, closed by voluntary liquidation or expiration of charter, the number of the latter being 167. Four hundred and forty-six banks, exclusive of 22 temporarily in charge of receivers, but subsequently authorized to resume business, were liquidated through, or are still in charge of receivers. The number of failures represents but 5 per cent of the total number of banks chartered. Included in the total number of banks organized are 1,271 State banks, which were converted into national banking associations under the provisions of section 5154 of the United States Revised Statutes, the capital at date of conversion being \$302,476,928. Approximately, one-half of the converted banks, and representing over two-thirds of the capital, were institutions in existence in the States of New York, Massachusetts, Pennsylvania, Connecticut, and Rhode Island. The number of conversions in the State of New York was 204; Massachusetts, 182; Pennsylvania, 102; Connecticut, 65, and Rhode Island, 52.

Legislation embraced in the act of March 14, 1900, resulted in the organization from that date to October 31, 1906, of 2,062 banks with aggregate capital of \$53,755,500, and individual capital of less than \$50,000. That the act in question gave an impetus to the organization of national banks with capital in excess of \$50,000 is evidenced by the fact that during the period mentioned 1,095 banks of this class with aggregate capital of \$126,707,800 were chartered, the number and capital of both classes being 3,157 and \$180,463,300, respectively, being nearly 40 per cent of the number of associations organized during the existence of the system. That the organization of banks since March 14, 1900, has not been spasmodic is evidenced by the fact that the average number of banks chartered during each month of the years in question was approximately 40.

Prior to 1900 no record was kept of the number of banks organized to succeed State or private banking institutions, but since that date organizations have been divided into three classes: (1) primary organizations; (2) conversions of State banks, and (3) reorganizations of State or private banks; and from which it is shown that 1,772 of the organizations were primary, the capital represented being \$91,417,500; 352 conversions, capital \$23,256,800, and 1,033 reorganizations, capital \$65,789,000.

In the current year charters were granted to 455 associations, the aggregate capital being \$21,418,500, and bonds deposited to secure circulation to the amount of \$6,071,830. This number includes 307 banks with capital of \$7,938,500, and individual capital of less than \$50,000, and 148 with aggregate capital of \$13,480,000, and individual capital of \$50,000 or more. Banks organized in each State and geographical division chronologically arranged, are shown in the appendix of this report.

As supplementary to the data given in Table No. 7 of the appendix to the report of the Comptroller of the Currency, relating to the number of national banks organized during the year, in liquidation, and the number and capital of banks in existence in each State on October 31,1906, there is submitted herewith a statement relating to the organization of national banks since March 14, 1900.

NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, TO OCTOBER 31, 1906.

As hereinafter shown, there were in operation on March 14, 1900, but 3,617 national banks, with authorized capital of \$616,308,095 and circulation outstanding secured by bonds of \$216,374,795. Since that date there has been an increase in the number of banks to 6,225 and authorized capital to \$845,939,775. The outstanding circulation on October 31, 1906, secured by bonds on deposit with the Treasurer of the United States in trust was \$536,933,169. Notes are outstanding to the amount of \$46,238,816, which are secured by deposits of lawful money made by banks reducing their circulation, those placed in voluntary liquidation, and on account of insolvent national banks. The total circulation outstanding secured by bonds and lawful money was \$583,171,985. The conditions with respect to the number of

banks, authorized capital, bonds on deposit, and circulation outstanding on the two dates mentioned, and also on October 31,1904, June 30 and October 31, 1905, are shown in the following table:

	Mar. 14, 1900.	Oct. 31, 1904.	June 30, 1905.	Oct. 31, 1905.	Oct. 31, 1906.

ORGANIZERS OF NATIONAL BANKS.

Section 5210 of the Revised Statutes provides in part for the submission to the Comptroller of lists of shareholders of national banks, showing the number of shares held and residence of shareholders. These lists, however, contain no information in relation to the vocations of shareholders. To a certain extent the business in which applicants for authority to organize national banks are engaged is an indication of the occupation of shareholders as a whole. Beginning with November, 1905, a record has been kept relative to the business of approximately 3,200 applicants, and the results show that 876, or 28 per cent, of the applicants are bankers; 971, or 30 per cent, merchants, with which are included manufacturers, lumber and coal dealers, publishers, hotel proprietors, real estate and insurance Farmers and stockmen to the number of 485 represent 15 agents. per cent of the applicants and the law and medical professions 285, or 9 per cent; the remaining 555 not engaged in any of the lines of business heretofore mentioned, and including a number with respect to whom no information is of record, represent 18 per cent of the total.

STATE, SAVINGS, AND PRIVATE BANKS AND LOAN AND TRUST COMPANIES.

Conformably with the provision of law which requires the Comptroller of the Currency to incorporate in his annual report to Congress statements exhibiting the resources and liabilities of banks organized under State laws, there is submitted information relating to 11,852 banks of that class.

Official reports as to incorporated banking institutions herein presented are from all the States and Territories with the exception of Arkansas, Indian Territory, Oregon, Nevada, Alaska, and Hawaii.

Statements showing the condition of private banks and bankers have been received from official sources from North Carolina, Indiana, Missouri, South Dakota, Kansas, Wyoming, and California. Official statements of private banks of South Carolina, Nebraska, and Idaho, and unofficial statements from Indian Territory are included with the statements of incorporated banks for those States. The private banks of the other States and Territories sent reports direct to this office.

Reliable authorities place the number of banks and bankers in the United States and island possessions, exclusive of national banks, at 15,343. Of this number reports pertaining to 11,852 banks have

362

been received and tabulated, being 1,110 more than in 1905. The aggregate resources of these banks amount to 10,363,350,846, being an increase of approximately 773,000,000 over the previous year. The returns include 8,862 commercial banks, 742 loan and trust companies, and 1,319 savings banks (of which 678 were of the mutual class—that is, without capital stock), and 929 private banks and bankers.

The capital stock of the State banks is \$421,845,705; individual deposits, \$2,741,464,129; surplus and undivided profits, \$251,114,808. The loans aggregate \$2,272,959,644; investments in stocks, bonds, and other securities, \$412,966,794; and total resources, \$3,677,050,317. The resources of State banks reporting in 1905 aggregate \$3,190,-911,378, thus showing a gain in 1906 of \$486,138,939.

Reports received from 742 loan and trust companies show aggregate resources of \$2,959,230,534 against 683 companies with aggregate resources of \$2,865,976,479 in 1905, a gain over 1906 of \$93,254,055. The resources in detail compared with 1905 are: Loans, \$1,610,407,833 against \$1,549,633,063, a gain of \$60,774,770; investments in stocks, bonds, and other securities, \$760,285,420against \$787,918,435, indicating a loss of \$27,633,015 in this class of assets. The capital stock of these institutions as reported for June 30, 1906, shows a gain of \$25,250,715, being \$268,384,337 as against \$243,133,622 in 1905. The surplus and undivided profits, which in 1905 amounted to \$363,515,702, are now reported at \$395,373,620, a gain of \$31,857,918. Individual deposits have increased from \$1,980,856,737 in 1905 to \$2,008,937,790 in 1906, a gain of more than \$28,000,000.

While the summary of reports of the loan and trust companies of the United States shows that resources have increased over \$93,000,000 during the past year, it appears from statements made by the loan and trust companies of the city of New York to the New York banking department, as of date May 16, 1906, that there had been a loss of approximately \$174,000,000 in the assets of these companies since the report for June 7, 1905, when they amounted to \$1,239,878,936. Of the 35 loan and trust companies making reports on May 16, 12 show increase in resources from \$300,000 up to approximately \$6,000,000, while each of the other 23 companies doing business in that city show a shrinkage in resources for the period named from a few thousand dollars to over \$47,000,000. A large proportion of this shrinkage was later regained, the bank commissioner's statement for August 6 showing that the companies then had assets aggregating \$1,120,554,720, as against \$1,065,952,448 on May 16.

Reports were obtained from 929 private banks with aggregate resources of \$144,045,800. Last year reports were received from 1,028 private banks with resources of \$165,233,295. The decrease shown in the number reporting this year is accounted for by the fact that some of the States have recently legislated private banks out of existence, a large number of such banks having since incorporated under State laws. The loans and discounts of the reporting private banks aggregate \$96,535,709; investments in stocks, bonds, and securities, \$7,131,705; and amount deposited in other banks, \$24,723,406. The capital stock of these concerns amounts to \$20,036,992; surplus and profits, \$8,856,787, and individual deposits, \$109,947,509.

Statistics submitted with respect to the amount and average rate per cent of dividends paid by State and private banks and loan and trust companies for the year ended June 30, 1906, will be found in the appendix. Reports covering the subject were received from 3,124 State banks, with capital of \$191,456,642, showing the payment of dividends to the amount of \$17,273,356, or an average rate of 9.02 per cent; from 641 loan and trust companies which paid dividends amounting to \$21,529,190, or 9.64 per cent on capital stock of \$223,325,178, and from 304 private banks with capital of \$6,528,077, on which dividends aggregating \$917,592, or 14.05 per cent, were paid.

CONSOLIDATED RETURNS FROM STATE, SAVINGS, AND PRIVATE BANKS AND LOAN AND TRUST COMPANIES.

There is submitted herewith for the purpose of comparison a table showing the principal items of resources and liabilities of banks other than national in the years 1900, 1902, 1904, 1905, and 1906.

Item.	• 1900.	1902.	1904.	1905.	1906.
Loans. Bonds. Cash Capital Surplus and undivided		\$3, 942, 592, 907 2, 094, 496, 729 250, 815, 787 499, 621 208	\$4, 360, 209, 382 2, 522, 890, 815 301, 578, 011 625, 116, 824		\$5, 656, 832, 201 2, 790, 159, 501 334, 938, 185 739, 163, 401
profits Deposits Resources		614, 509, 805 6, 005, 847, 214 7, 355, 110, 843	779, 241, 781 6, 688, 107, 157 8, 542, 839, 386	824, 243, 066 7, 567, 080, 822 9, 590, 401, 009	893, 679, 524 8, 159, 894, 029 10, 363, 350, 846

The foregoing figures indicate an increase in the aggregate resources in 1906 over 1905 of \$772,949,837, and of \$4,521,692,026 since 1900. The gain in resources for the fiscal year ended June 30, 1906, has not been so great as for the year 1905 over 1904, the increase for the latter period being over \$1,047,000,000. Loans and discounts have increased during the year \$559,000,000, and individual deposits approximately \$593,000,000. Loans have increased over 87 per cent and deposits more than 70 per cent since 1900.

A statement showing the principal items of resources and liabilities of national banks from reports of condition on June 18, 1906, and from all other reporting banks and banking institutions on or about that date, separately and in the aggregate, is presented herewith:

Classification.	6,053. national banks.	11,852 State, etc., banks.	Total, 17,905 banks.
Loans		Millions. \$5,656.8	Millions. \$9, 893. 7
United States bonds		20.0 2.770.2	652.2 3.421.4
Cash	681.5	334.9	1,016.4
Capital stock	826.1 665.2	739.2 893.7	1,565.3 1,558.9
Deposits (individual)	4,055.9	8,159.9	12, 215. 8
Aggregate resources	7,784.2	10, 363. 4	18, 147. 6

The principal items of resources and liabilities of national and all other reporting banks by years from 1864 to 1906, inclusive, and of State banks separately from 1834 to 1872, are shown in Tables XXV and XXIII of the appendix to the report of the Comptroller of the Currency.

364

By reference to the first of the tables in question it appears that the aggregate resources of all reporting banks increased in 1904 over 1903, \$895,700,000; in 1905 over 1904, \$1,719,400,000, and 1906 over 1905, \$1,229,400,000. The increase for the ten years ended June 30, 1906, amounted to \$10,593,700,000.

Tables I to IV in the appendix to the report of the Comptroller of the Currency show by States the resources and liabilities in detail of the several classes of banks other than national from reports on or about June 30, 1906, and Tables V to VIII, inclusive, the aggregate resources of the several classes of banks annually from 1902 to 1906.

The following table is a summary of reports received for the year 1906 from State banks, loan and trust companies, savings and private banks:

RESOURCES	AND	LIABILITIES	OF	State	Banks,	Loan	AND	TRUST	COMPANIES,

SAVINGS BANKS.

Savings bank reports to the number of 1,319 have been received, of which 678 are from mutual institutions and 641 from stock savings banks, the latter being operated for the benefit of both shareholders and depositors. The principal items of resources and liabilities of savings banks, both mutual and stock, are as follows: Loans, \$1,676,-929,015; bonds, etc., \$1,609,775,582; deposits, \$3,299,544,601; aggregate resources, \$3,583,024,195.

Compared with 1905, these figures show an increase in loans of \$142,814,000; bonds, stocks, and securities of \$74,421,000; deposits, \$206,467,000, the aggregate resources having increased approximately \$215,000,000. All of these items show a much larger increase for the current year than for the year 1905.

In the following table is given a comparative statement of the number of depositors, amount of deposits, and the average savings deposit in savings banks in the States named for the years 1905 and 1906. Included in this table are deposits in savings departments of commercial banks in operation in the State of Illinois, for the reason that the auditor of public accounts of that State in his periodical statements reports such deposits separate from deposits subject to check. The result of the addition of Illinois savings deposits is the raising of the aggregate savings deposits of the United States to \$3,482,137,198; the number of depositors to 8,027,192, the average deposit being \$433.79.

Number of Savings Depositors, Aggregate Savings Deposits, and Average Amount due to Depositors in Savings Banks in each State in 1905 and 1906.

^a Partially estimated.

Includes 3 banks in liquidation.

Includes 13 banks in liquidation.
 Included in abstract of State banks having savings departments.

MUTUAL SAVINGS BANKS.

The mutual savings banks are located in the New England and the Eastern States, with the exception of one in West Virginia, two in Wisconsin, 3 in Ohio, 5 in Indiana, and 14 in Minnesota. The number of reporting institutions is 678, being 10 more than reported last year. As shown by Table IV in the appendix to the report of the Comptroller of the Currency, the aggregate resources of mutual savings banks is 3,134,591,325, or a gain of over 167,000,000since June 30, 1905, the gain for the prior year having been 149,-000,000. The loans and discounts, which in 1905 amounted to 1,269,755,274, are reported this year at 1,375,582,066, a gain of 105,826,792. The loans are classified as follows: On real estate, 1,150,250,807; other collateral security, 46,986,647; all other loans, 178,344,612. Compared with the returns for 1905, real estate loans in this class of banks have increased approximately 95,000,000; loans on other collateral, 5,700,000, and unclassified loans, 4,800,000. The amount invested in bonds, stocks, and other securities has increased from 1,453,091,615 in 1905 to 1,522,989,449 in 1906, a gain of 69,897,834. The investments in bonds and other securities are as follows:

United States bonds	\$12, 159, 058
State, county, and municipal bonds	140.345-235
Railroad stocks and bonds	346, 343, 902
Bank stock	25,724,090
Other bonds, stocks, etc	998, 417, 164

Compared with the returns for 1905, it will be found that investments in State, etc., bonds have increased \$3,800,000; railroad bonds in the sum of \$25,000,000; other unclassified bonds, stocks, etc., in the sum of \$43,500,000, while the holdings of United States bonds and bank stocks have decreased \$1,119,000 and \$1,395,000, respectively. Cash in banks is \$1,033,578 less than was reported in 1905, being now \$17,370,985, against \$18,404,563 in 1905. The cash on deposit with other banks is \$117,840,827, or \$3,974,880 less than was shown by the reports for 1905. Individual deposits have increased from \$2,736,-533,039 in 1905 to \$2,908,710,654, a gain of \$172,177,615. Deposits are credited to 6,753,037 depositors, the number reporting for 1905 being 6,463,677, a gain of 289,360. The average deposit account has increased during the same period from \$423.37 to \$430.73. Reports from each State having this class of banks show large increases in deposits over 1905. Of the \$172,000,000 added to the deposits of the mutual savings banks during the past year more than \$125,000,000 was gained by the banks located in New York, Massachusetts, and Connecticut, the New York savings banks having gained \$82,000,000 in deposits; Massachusetts, \$31,000,000, and Connecticut, \$12,000,000. New York mutual savings banks gained 123,665 new depositors during the past year, Massachusetts 62,873, and Connecticut 19,335. The number of depositors given for the several States is from official reports except for Maine, which has been partially estimated.

Comparing the average deposit account in the mutual savings banks by geographical sections, it will be observed that the average in the New England States is \$391.04 against \$384.90 in 1905; for the Eastern States \$466.91 against \$458.40 in 1905. The Middle Western States show an average deposit of \$392.42 for the present year against \$393.47 for the prior year. The one mutual savings bank in West Virginia, being the only bank of this class reporting from the Southern States, gives the average deposit account as \$206.30 against \$183.68 in 1905.

STOCK SAVINGS BANKS.

Reporting stock savings banks are located in the District of Columbia, North Carolina, Iowa, and California. The resources of these banks amount to \$448,432,970. The loans aggregate approximately \$301,347,000; investments in stocks, bonds, and other securities, \$86,786,000; deposits with other banks, \$38,923,000; and cash on hand, \$8,759,000. The capital is \$28,896,000; surplus and undivided profits, \$16,825,000; deposits, \$390,834,000; the number of depositors, 742,165, and the average deposit \$526.61.

Comparing the stock savings-bank returns for the current year with those of 1905, an increase in the aggregate resources is shown of approximately \$47,495,000, the increase in 1905 over 1904 being The deposits have increased by \$34,289,000, being \$43,676,000. \$5,520,000 less than the increase for the year ended June 30, 1905. The number of depositors, estimated at 754,601 in 1905 and 742,165 in 1906, shows a loss of 12,436. The exact number of depositors is given only for the District of Columbia; those for the three States named are partially estimated, the estimate being based upon unofficial returns from such banks as gave that information.

The number of depositors in all savings banks reporting (exclusive. of those having accounts in savings departments of the State banks of Illinois) has increased since 1905 from 7,218,278 to 7,495,202, and the average deposit from \$428.51 to \$440.22. The total number of savings depositors, including those of Illinois State banks, has increased from 7,696,229 in 1905 to 8,027,192 in 1906, and the average amount to the credit of each depositor, estimated to be \$423.74 in the former year, amounts to \$433.79 this year. The aggregate deposits were \$3,261,236,119 in 1905 and \$3,482,137,198 in 1906, an increase of \$220,901,079.

The following table shows the growth of savings banks in the United States from 1820 to 1906 as evidenced by the amount of deposits, number of depositors, average deposit account, and the average per capita in census years from 1820 to 1890 and annually thereafter.

NUMBER OF SAVINGS BANKS IN THE UNITED STATES, NUMBER OF DEPOSITORS, Amount of Savings Deposits, Average Amount due each Depositor in the Years 1820, 1825, 1830, 1835, 1840, and 1845 to 1906, and Average per Capita

INTEREST RATES PAID BY SAVINGS BANKS.

From an examination of the returns submitted with respect to the rate of interest paid on savings accounts it will be noted that the maximum rate is 4.50 per cent, the minimum rate 3 per cent. The estimated average rate is 3.545 per cent, a slight decrease in the estimated average interest rate of 3.55 per cent in 1905.

The following table shows the reported rate paid in each State by savings banks located therein:

State, etc.	Rate per cent.	State, etc.	Rate per cent.

STATE AND PRIVATE BANK FAILURES.

Through the courtesy of the Bradstreet Commercial Agency this office has been placed in possession of information relating to the number, assets, and liabilities of State and private banks which failed in the year ended June 30, 1906. The total number of failures during the year was 37, the assets of the banks being \$6,591,515 and the liabilities \$7,187,858. In the year ended June 30, 1905, there were 57 failures of banks of this character, with assets of \$6,970,345 and liabilities of \$10,273,023. Included in the 37 failures of banks in 1906 were 15 State banks, 5 savings banks, 4 trust companies, and 13 private banks. The failures by geographical sections were as follows: New England States, 3; Eastern States, 2; Southern States, 16; Middle Western States, 14; Western States, 1; Pacific States, 1. The assets of the 16 banks which failed in the Southern States amounted to \$5,110,414 and their liabilities to \$4,806,924. The assets of the 21 banks failing in the other sections aggregated \$1,481,101 and liabilities \$2,380,934.

The number of banks of these classes that failed annually from 1864 to 1906, together with their aggregate assets and liabilities and dividends paid, from 1864 to 1896, is shown in the table following:

Year.	Number of failures.	Capital.	Nominal asšets.	Liabilities.	Dividends ·paid.

^aStatements for April 6, 1906.

COMPTROLLER OF THE CURRENCY.

Upon an examination of the foregoing statement it will be noted that there was an increase in deposits from \$4,945,124,423 in 1896 to \$7,238,986,450 in 1900, or over 46 per cent. During the four years from 1900 to 1904 deposits increased over 38 per cent; for the year ended June 30,1905, the increase was 13.5 per cent; the increase in the current year over 1905 was \$865,000,000, or about 7.6 per cent. The ratio of increase in individual deposits from 1896 to 1906 was nearly 147 per cent.

The following table shows the amount of individual deposits in national and other reporting banks by geographical divisions on or about June 30, 1896 and 1906, together with the amount and per cent of increase:

		Individua	l deposits.	
Geographical divisions.	1896.	1906.	Increase.	Percent.
New England States. Eastern States. Southern States. Middle Western States. Western States. Pacific States.	2,291.7 221.7 877.8 128.8	Millions. \$1,869.0 5,411.8 882.3 2,729.4 506.1 797.4	Millions. \$675.7 3,120.1 660.6 1,851.6 377.3 565.6	56. 62 136. 15 297. 97 210. 94 292. 93 244. 00
Total	4,945.1	12, 196. 0	7,250.9	146.63

It will be noted from the foregoing table that banks of the Southern States show the largest percentage of increase in deposits during the period from June 30, 1896, to June 30, 1906, the percentage of gain being 297.97, followed by the Western States, where the ratio of increase is 292.93, and in the order named: The Pacific States, 244; the Middle Western States, 210.94; the Eastern States, 136.15, and the New England States, 56.62.

The average individual deposit in the United States per capita of population has risen from \$65 in 1896 to \$95 in 1900, \$122 in 1904, \$136 in 1905, and \$144 in 1906, being an average annual gain of \$8.

The following comparative statement showing increase in population, individual deposits, and money in circulation in the United States from 1896 to 1906 is of interest:

	1896.	1906.	Increase.	Per cent of increase.
Population	71, 390, 000	84, 662, 000	13, 272, 000	18.6 146.6 82.2
Deposits	\$4, 945, 124, 423	\$12, 196, 029, 486	\$7, 250, 905, 063	
Money in circulation	1, 506, 434, 966	2, 744, 483, 830	1, 238, 048, 864	

PROPORTION OF INDIVIDUAL DEPOSITS HELD BY THE VARIOUS CLASSES OF BANKS.

In 1896 savings banks had the largest portion of the aggregate deposits of the country, or 39.1 per cent of the individual deposits in all reporting banks. National banks held 33.7 per cent; state banks, 14.1 per cent; loan and trust companies, 11.9 per cent, and private banks 1.2 per cent. Statistics relating to deposits for the current year show that the national banks now hold the largest portion of deposits, although the ratio has decreased from 33.7 per cent to 33.2 per cent since 1896. Savings banks hold 27 per cent against 39.1 per cent in 1896,

H. Doc. 9, 59–2––25

while within the same period State bank deposits have risen from 14.1 to 22.5 per cent and loan and trust companies from 11.9 to 16.4 per cent.

The following table shows the amount and per cent of deposits held by the several classes of banks in 1896 and 1906.

	1896.		190	6.	. Ratios.		
Classification.	Amount.	Percent.	Amount.	Percent.	Increase.	Decrease.	
State banks Savings banks Private banks Loan and trust companies National banks Total	1,935.5 59.1 586.5	14.1 39.1 1.2 11.9 33.7	Millions. \$2, 741.5 3; 299.5 109.9 2,008.9 4,055.9 12, 215.7	22.5 27.0 .9 16.4 33.2	Per cent. 8.4 4.5	Per cent. 12.1 .3 .5 12.9	

On June 30, 1906, savings banks held the largest proportion of deposits in the New England and Pacific States, viz: 62 per cent and 33 per cent, respectively. In the Eastern States savings and national banks each held 31 per cent of the aggregate deposits of that section. State banks held 50 per cent of deposits in the Southern States; 45.9 per cent in the Middle Western States, and 33.1 per cent in the Pacific States. National banks held the largest proportion of deposits in the Western States, 58.2 per cent, and stand second as to deposits in the Southern States, with 47.4 per cent; in the Middle Western States they hold 39.6 per cent; in the Eastern States 31 per cent, and in the Pacific States 28.6 per cent.

Loan and trust companies hold 28 per cent of the aggregate deposits of the Eastern States; 18 per cent in the New England States; 4.3 per cent in the Pacific States, and 4.2 per cent in the Middle Western States. The proportion of deposits held by private banks in the geographical sections is 2.9 per cent in the Middle Western States; 2.1 per cent in the Western States; 0.9 per cent in the Southern States; 0.7 per cent in the Pacific States, and 0.1 per cent in the Eastern States.

BANK RESOURCES.

Table XII in the appendix to the report of the Comptroller of the Currency shows the average per capita of resources of each class of banks, state and national, and the per capita of all banks arranged by States and geographical sections. It appears that the average per capita of bank resources for the United States is Geographically, the Eastern States are first, with \$427.86; \$214.69. New England States second, \$393.25; Pacific States third, \$319.55; Middle Western States fourth, \$164.24; and the Western and Southern States fifth and sixth, with \$131.41 and \$61.25, respectively. The State having the largest per capita of bank resources is New York, the amount per capita in that State being \$639.80; California is second, with \$515.70; and Rhode Island third, with \$491.91. It is interesting to note that, excluding the Southern States and four of the Territories, the per capita in every other State ranges from \$110 to \$639, while in the Southern section only one State has a per capita of over \$100, that being West Virginia. with a per capita of \$105.46. The total resources of all banks, including island possessions, on or about June 30, 1906, was \$18,147,578,959, and the estimated population of the United States on June 1, as computed by the government actuary, was 84,348,000 and of the island possessions 9,197,000.

Total	21,396	1,640,649,186	100.00	12,628,927,665	100.0	

From returns to this office on or about June 30, 1906, it appears that there were in operation 6,053 national banking associations, with capital of \$826,129,785 and individual deposits of \$4,055,873,636; also 11,852 State, savings, and private banks and loan and trust companies, with aggregate capital and deposits of \$739,163,401 and \$8,159,894,029, respectively; nonreporting banks to the number of 3,491, with capital and deposits estimated at \$75,356,000 and \$413,160,000, respectively; or a total of 21,396 banks and banking institutions, with capital of \$1,640,649,186 and deposits of \$12,628,727,665. Since 1902 the increase in the number of banks has been 5,240, capital stock has increased in the sum of \$300,488,770, and individual deposits \$3,045,611,887.

The number of national banks in active operation has increased by more than 33 per cent, and the foregoing indicates that the number of banks other than national have increased in about the same ratio. In 1902 national-bank capital represented 52.04 and deposits 32.3 per cent of aggregate capital and deposits, respectively, of all reporting banking institutions. The percentage of capital of national banks to capital of all banks in 1905 was 51.41, and of deposits, 32.10. For the present year the percentage of capital is 50.23 and of deposits 32.12.

During the period from 1902 to 1906 the percentage of capital or banks other than national to the capital of all banks has increased from 47.6 to 49.77, and the percentage of individual deposits in such banks from 67.7 to 67.88. In 1902 there was in operation in the United States one bank for every 4,897 inhabitants, in 1905 one for every 4,182, and in the present year one for every 3,956 inhabitants.

BANKS AND BANKING IN THE ISLAND POSSESSIONS.

THE PHILIPPINES.

The treasurer of the Philippine Archipelago is required by law to make examinations of banks and banking institutions doing business in the Philippine Islands, and also to obtain from the banks periodical statements of their condition. These statements are forwarded to the Insular Bureau of the War Department, and the reports of condition under date June 30, 1906, have been submitted by that Bureau to this office for use in connection with this report.

There are in operation in the archipelago, as shown by the reports in question, the following banks:

The Manila agency and the Iloilo subagency of the Hongkong and Shanghai Banking Corporation; the Manila agency and the Cebu subagency of the Chartered Bank of India, Australia and China; the Banco Español-Filipino at Manila and the Iloilo subagency; the Monte de Piedad and Savings Bank at Manila; the S. Misaka Bank at Manila, and the International Banking Corporation at Manila and its Cebu subagency.

A summary of the returns from these banks on June 30, 1906, together with individual statements made to the treasurer of the Philippines under that date, appears in the appendix to the report of the Comptroller of the Currency.

The resources of the 10 banks named aggregate \$17,359,483, or a decrease of \$4,040,381 as compared with the returns submitted in 1905. The principal items of resources and liabilities are: Loans and discounts, including overdrafts, \$9,703,309; Philippine and other currency and bullion, \$2,292,953; due from banks and agencies, \$2,249,578; capital stock, \$1,393,080; surplus and undivided profits, \$1,224,230; bank notes outstanding, \$750,000; individual deposits, \$7,031,636; public deposits, insular, \$309,333; bank deposits, \$4,924,815. Comparing these returns with those submitted to this office under date of June 30, 1905, the loans and discounts show a decrease of \$1,647,912, and cash holdings a decrease of \$498,282. Individual deposits have increased in the sum of \$549,814 and public deposits by \$32,098; on the other hand, bank deposits have decreased from \$8,530,464 in 1905 to \$4,924,815 in 1906, a loss of \$3,605,649.

Statements showing the condition on June 30, 1905, of the Bank of Pangasinan and the Yuen Sheng Exchange and Trading Company (Limited) were published in the Comptroller's report for 1905. Since that date the treasurer of the Philippine Islands has taken possession of the former bank as receiver, and the latter bank has discontinued making reports to the Island government in accordance with a decision of the attorney-general of the Philippine Islands that inasmuch as it does not receive money on general deposit this bank is not subject to governmental examination under the statutes of the Philippine Islands.

The International Banking Corporation has established an agency at Cebu during the past year, a statement of condition of which as of June 30, 1906, appears in the appendix to the report of the Comptroller of the Currency.

PORTO RICO.

By the courtesy of the treasurer of Porto Rico, reports have been received showing the condition of 8 Territorial banks and 1 private bank in operation in that island as of June 30, 1906. The capital stock. of these 9 banks is \$2,296,908, and aggregate resources \$9,009,612. There is 1 national banking association in active operation in Porto Rico, with capital stock of \$100,000 and resources on June 18, 1906, of \$460,883. Combining the resources of the 9 Territorial banks with the national banking association reporting on the date named, the resources of the banks of Porto Rico aggregate \$9,470,495, which is \$605,765 less than the amount reported in 1905. The principal items of resources and liabilities of banks other than national are: Loans, \$2,751,905; bonds and stocks, \$1,663,751; due from banks and bankers, \$1,076,077; real estate, furniture, and fixtures, \$659,289; cash on hand, \$1,576,444; capital stock, \$2,296,908; surplus and undivided profits, \$465,320; individual deposits, \$4,739,509; bank deposits, \$107,058. All of these items show gains over the year past, with the exception of cash on hand, amount due from other banks, and bank deposits.

The principal items of resources and liabilities of the one national bank, in operation in the island, as shown by the report of condition of June 18,1906, are as follows: Loans, \$23,855; United States bonds, \$100,000; other bonds, stocks, and securities, \$151,658; due from banks and bankers, \$92,843; cash in bank, \$53,467; capital stock paid in, \$100,000; undivided profits, \$9,949: circulation outstanding, \$100,000; individual deposits, \$250,933.

HAWAII.

There are 4 national banks in the Territory of Hawaii with paidin capital stock, as shown by reports made under call of June 18, 1906, aggregating \$587,500. Two banks have been authorized to begin business during the current year. The deposits in the 4 banks on June 18, 1906, aggregated \$1,268,621, and the total resources were \$2,244,907, against \$1,886,212, as reported by the 2 national banks doing business in the Territory on May 29, 1905.

Unofficial reports have been received from 5 other banks doing business in the Territory, a summary of which shows capital of \$2,178,702; individual deposits, \$6,461,624; and aggregate resources of \$9,611,414. In 1905, 7 banks reporting capital of \$2,877,500 furnished statements for compilation of statistics relating to the banking institutions of Hawaii.

The principal items of resources and liabilities of the nine reporting banks, Territorial and national, are: Loans, including overdrafts, \$6,802,905; stocks, bonds, etc., \$2,253,078; due from banks, \$489,574; cash on hand, \$1,800,265; capital, \$2,766,202; surplus and profits, \$568,828; individual deposits, \$7,400,120; United States deposits, including deposits of United States disbursing officers, \$330,126; due to other banks, \$289,639; aggregate resources, \$11,856,321.

By comparing these figures with those published in the Comptroller's report for 1905 it will be found that the aggregate resources have increased in the sum of \$540,660; investments in bonds, \$885,329; cash on hand, \$164,639; individual deposits, \$500,484; United States deposits, \$117,866, while the items that show a decrease are loans, in the sum of \$112,134; amount due from banks and bankers, \$338,392; capital stock, \$111,298; surplus and profits, \$17,152, and amount due to banks and bankers, \$13,426.

BUILDING AND LOAN ASSOCIATIONS. •

By the courtesy of H. F. Cellarius, secretary of the United States League of Local Building and Loan Associations, recently compiled statistics relating to the condition of the building and loan associations of the country are herewith presented. The report is for the year ended December 31, 1905. The receipts and disbursements of building and loan associations of the United States, as shown by the report, were \$38,000,000 in excess of the previous year, the receipts from weekly dues being \$15,000,000 more than in the prior year. There was also a large increase in the earnings, aggregating \$5,294,204 more than in the year before, as the mortgage loans were over \$22,000,000 in excess of the previous year. The receipts and disbursements of the associations for the year ended January 1, 1906, are shown in the following statement:

RECEIPTS, 1905.

Total..... 449, 482, 432

Total 449, 482, 432

The secretary states in his annual report that the associations during the past year have, in a marked degree, shared the general prosperity of the country, and have done the largest business in their history. It appears that the assets of the local building and loan associations of the United States amount to \$629,344,257, or \$20,000,000 more than shown by the report of the prior year. The \$29,000,000 more than shown by the report of the prior year. total membership in the 5,264 associations is reported at 1,642,127, an increase of a little over 11,000 for the year. The returns sub-mitted relate to 4,239 associations located in the 21 States named and 1,025 combined under the head "Other States." The report states that there has been a continuous growth since 1901, and that during the four years following 1901 an increase in membership of over 100,000 and nearly \$64,000,000 in assets occurred. The largest gain in assets made during the past year was in Ohio, where the increase was \$7,162,519. Pennsylvania gained \$4,604,467; New Jersey, \$3,296,361; Massachusetts, \$3,111,034; Illinois, \$1,921,665; California, \$1,280,829; Indiana, \$1,084,142, and Nebraska, \$1,051,947. Three States show less assets than for the preceding years—Missouri, \$201,410; Tennessee, \$187,306, and Kentucky, \$2,265,848. The large decrease in Kentucky is explained as due to the liquidation of two large associations in that State.

The following table shows, by States, the number of associations, total membership, and total assets in 1905, together with increase or decrease in assets and membership over the year 1904:

a Decrease.

Net increase in assets, \$29,001,671. NOTE.—Apparent decrease of 20,311 in membership in Ohio results from clerical errors made by the State Department in compilation of figures of last year, being given as 320,215, whereas the correct figures were 301,340; actual decrease, 1,436.

The foregoing statistics, the secretary states, relate exclusively to local building and loan associations. National building and loan associations to the number of 60, with estimated assets of \$20,000,000, are stated to have been in existence on January 1, 1906.

SCHOOL SAVINGS BANKS.

Statistics relating to the operation of school savings banks of the United States, in existence on January 1, 1906, have been received through the courtesy of J. H. Thiry, of Long Island City, N. Y. From Mr. Thiry's report it appears that the school savings bank system is now in operation in 1,023 schools of 122 cities of 25 States, and the pupils of these schools have deposited \$4,864,575.98, of which \$3,641,015.66 have been withdrawn, leaving a balance of \$1,223,560.32 due depositors on January 1, 1906.

MONEY IN THE UNITED STATES.

The stock of money in the United States on June 30, 1906, amounted to \$3,069,900,000, of which \$2,162,000,000 was in coin (including bullion in the Treasury) and \$907,000,000 in United States notes and The coin, bullion, and paper currency in the national bank notes. Treasury as assets amounted to \$325,400,000, the remainder, \$2,744,-500,000, being in circulation. The estimated population of the country on that date was 84,622,000, giving an average circulation per capita of \$32.42, against a per capita of \$31.08 for 1905 and \$21.10 in The amount of money held by national and other reporting 1896. banks in the United States, shown by reports nearest to June 30, 1906,

was 1,010,700,000, which leaves 1,733,800,000 in circulation, exclusive of money in the Treasury and in banks, being a gain of 3133,-700,000 over the amount in circulation in 1905, outside of the banks and the Treasury. The money in the Treasury on June 30, 1906, represented 10.60 per cent of the stock; in reporting banks 32.92 per cent, and elsewhere 56.49 per cent. The per capita unaccounted for in 1906 appears to be 20.48, an increase of 1.26 over the per capita estimated for 1905 and a gain of 6.83 in the per capita of money estimated to be in circulation ten years ago.

The monthly circulation statements issued from the Treasury Department show the general stock of money in the United States, the amount held in Treasury as assets of the Government, the money in circulation, and disclose the amount of each class of coin or paper currency. At the close of the fiscal year ended June 30, 1896, the stock of money in the country was \$1,799,900,000 and consisted of \$599,600,000 in gold, \$627,700,000 silver, \$346,681,016 legal-tender notes, and \$226,000,547 national-bank notes. At the close of the last fiscal year, June 30, 1906, the stock of money was \$3,069,884,640, an increase in the ten-year period of \$1,269,900,000. The increase in the stock of gold was \$873,395,000, silver \$60,200,000, and national-bank circulation \$335,111,813. No change occurred in the amount of legal-tender notes. During the decade in question the gold coinage amounted to \$900,768,352, and in this period the exports of gold exceeded the imports by approximately \$50,000,000, the imports aggregating \$166,728,891 and the exports \$216,652,337. In the years 1897 and 1898 the imports of gold exceeded the exports by \$66,300,000, but annually thereafter to the current year the exports largely exceeded imports. In 1905 the exports were \$54,409,014, as against imports of \$2,236,399. The imports for the current fiscal year were \$35,251,921, as against exports of \$20,573,572, the imports exceeding the exports by nearly \$15,000,000.

Of the coin and other money in the United States at the close of the fiscal year ended June 30, 1906, \$1,016,448,222 was held by national and other banks, including those in the island possessions, the details of which are set forth in the accompanying table:

a \$12,567,265, b \$10,125,909, c \$9,240,801, d \$7,620,304, f \$6,301,890, and g \$5,661,868, in banks of island possessions not included in these returns.

In 1896 the then Comptroller had compiled and published in his annual report statistics showing by States the cash held by national and other reporting banks on July 1 of that year. For this report a similar statement has been prepared showing the amount of gold and other money held by national banks on June 18, 1906, and by other reporting banks and bankers on or about the same date, which will be found in Table No. XIV of the appendix to the report of the Comptroller of the Currency.

Upon reference to the table it will be seen that on or about June 30, 1906, the sum of \$1,016,448,222 was in 17,905 banks of the country, \$5,661,868 of the amount being in 28 banks located in the island possessions. Three-fifths of the stock of money consisted of specie and the remaining two-fifths of paper currency and unclassified cash, as follows:

Specie (gold and silver)	\$633, 048, 675
Paper currency (including Philippine currency)	301, 827, 866
Not classified.	81, 571, 681
Total	1,016,448,222

Gold represents over 48 per cent of the cash in bank; silver dollars, fractional and unclassified specie 14 per cent; legal tenders and national-bank notes about 29 per cent; the balance, 9 per cent,

being unclassified.

.381

The following classification of the currency held by the banks in 1896 and 1906 is presented for the purpose of comparison, the sum in banks in the island possessions not being included:

•	1896.	· 1906.	-	
Currency.	9,469 banks.	17,877 banks.	Increase.	
Gold coin. Gold certificates. Silver dollars. Silver, fractional.	51,720,400 13,717,838 5,619,454	\$156, 699, 578 329, 982, 467 22, 888, 827 11, 357, 041	\$7,439,147 278,262,067 9,170,989 5,737,587	
Silver certificates. Legal tender notes. National bank notes. Fractional paper, currency, nickels, and cents	. 29,495,375 . 189,078,207 . 17,444,746	$\begin{array}{r}101,277,029\\260,433,306\\37,599,418\\1,992,978\end{array}$	71, 781, 654 71, 355, 099 20, 154, 672 993, 551	
Unclassified specie Unclassified cash	. 2, 413, 485	7,027,629 81,528,081	4,614,144 9,420,931	
Total	531,856,513	1,010,786,354	478, 929, 841	

In July, 1896, 9,469 banks reported individual deposits of \$4,945,124,423, and cash holdings of \$531,856,513, the cash being 10.72 per cent of deposits. The individual deposits of all reporting banks in the United States on or about June 30 of the present year amounted to \$12,196,029,486, and the cash on hand of these banks was \$1,010,786,354, or about 8.3 per cent of deposits. The following table shows deposits and cash holdings and percentage of cash to deposits of the several elasses of reporting banks:

Banks.	Individual de- posits.			Ratios of cash to deposits.	
National banks State banks Savings banks. Private banks. Loan and trust companies	3,299,544,601 109,947,509	\$681,163,987 226,547,594 26,129,931 6,761,156 70,183,686	Per cent. 8.30 .79 6.15 3.49	Per cent. 16.30 4.04	
All banks	12,196,029,486	1,010,786,354	·····	8.29	

The percentage of cash to deposits held by banks other than national appears to be less than one-fourth the percentage held by national banks, such holdings being 16.80 per cent by national banks and an average of 4.04 per cent by all other banks.

The geographical distribution of money in banks of the United States in 1896, 1900, 1904, and 1906 is shown in the following table:

•	1896	1896. 1900.		1904.		1906.		
Division.	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.

Total	531.8	100.00	749.9	100.00	982.9	100.00	1,010.8	100.00

382

Classifying the total cash holdings of the reporting banks geographically, the Eastern States had in their banks on or about June 30, 1906, \$461,997,552; the Middle Western States, \$280,545,761; the Southern States, \$78,419,709; Pacific States, \$75,061,035; New England States, \$61,768,022; Western States, \$52,994,275, and island The banks of the Eastern States, together posessions, \$5,661,868. with those of the Middle Western States, held 73 per cent of the money in banks, 45.7 per cent being in banks of the Eastern States and 27.7 in banks of the Middle Western States. Of the \$462,000,000, approximately, in the banks of the Eastern States, nearly \$352,000,000, or over 76 per cent, was in banks of New York (State and city). The banks of New York, including the city of New York, held on June 30, 1906, over 34 per cent of the total bank holdings of money. Banks in the borough of Manhattan alone had over \$319,000,000 in their vaults, being 31.5 per cent of the available cash resources in the banks of the United States and over 10 per cent of the total stock of money of the country.

Referring again to the table of cash holdings by States, it will be noted that exactly 40 per cent of the cash in banks of the Middle Western States was in Illinois banks, Missouri and Ohio being next in order, with 17.6 and 13.4 per cent, respectively.

In the Southern States, which are third in the geographical divisions as to cash holdings in the banks, Texas is first, with \$16,300,000 of the \$78,400,000, or 20.7 per cent; Kentucky is next, with \$10,140,000, or 12.9 per cent, Tennessee being third, with \$7,600,000, or about 9.7 per cent. The Pacific States are fourth in the geographical order as to cash holdings, \$75,000,000 being in the vaults of the banks in this section. California banks hold over two-thirds of this amount, or \$51,000,000; Washington banks have a little less than \$10,000,000, or 13 per cent, and Oregon banks \$5,300,000, or 7 per cent. The banks of the New England States hold \$61,768,022 in their vaults, over two-thirds of this sum being in Massachusetts banks. Connecticut banks have \$7,300,000 and Rhode Island banks \$5,000,000 in their vaults. Banks in the Western States hold approximately \$53,000,000, Colorado banks holding about 29 per cent of this amount, Nebraska and Kansas being next, in the order named, with 21.5 and 20.6 per cent, respectively.

For the purpose of comparison, the following statement, showing the geographical distribution of money in the United States on or about June 30, 1905 and 1906, is submitted:

	1905.	1906.	Increase.	Decrease.

Pacific States]	75.1	15.3	11.8

Comparing the figures showing cash in banks with those for 1905, it appears that there has been a net increase of \$23,000,000. Reports of the New England banks show a loss of \$2,100,000 and those of the Eastern States a loss of \$9,700,000. During the same period the banks of the Pacific States gained \$15,300,000; those of the Middle Western States \$8,700,000; Western States, \$7,900,000; and Southern States, \$2,900,000.

Approximately \$9,000,000 of the gain in cash in banks of the Pacific slope should be credited to the California banks. The statements showing the condition of California State, private, and savings banks furnished for this report were of April 14, 1906, prior to the earthquake, and show a loss compared with 1905 of about \$1,225,000 in available cash. The reports of condition of national banks of California, on the other hand, made at the close of business June 18, show an increase of \$10,151,000 over the aggregate cash holdings at close of business on May 29, 1905.

As shown by reports of condition as of June 18, 1906, there were national-bank notes outstanding to the amount of \$510,860,726, being a gain of \$65,405,000 since May 29, 1905. Of this \$65,000,000 gain, approximately \$24,000,000 went to banks of the Middle Western States, \$16,400,000 to banks of the Eastern States, \$12,100,000 to Southern banks, and the remaining \$12,500,000 to the other three sections of the country. This, however, is not necessarily an accurate indication of the distribution, as there is no way of determining how much of the amount named remained in the sections to which sent. It is known that nearly 50 per cent of the national-bank notes received at the Treasury for redemption comes from banks in the city of New York.

As an indication of the amount of money in circulation in the various States, the per capita of the bank holdings will be of interest. The per capita of cash in banks of the United States on June 30, 1906, was \$11.96. New York had a per capita of cash in bank of \$43.36, Nevada being next with \$35.49, and California third among the States with \$31.05. Geographically, the per capita for the Eastern States is \$24.22, the Pacific States \$21.23, Middle Western States \$11.05, New England States \$10.15, Western States \$9.23, Southern States \$3.19. The average per capita bank holdings in the Hawaiian Islands is \$8.83, and in Porto Rico, \$1.63.

FOREIGN BANKS OF ISSUE.

The following table exhibits the principal items of resources and liabilities of foreign banks. So much of the table as relates to the European banks of issue, excepting capital stock of all banks, and the deposits and loans of the banks of Scotland and Ireland, is taken from the August number of the Bulletin de Statistique. To these data have been added returns from other foreign banks, and the statistics presented are assumed to be complete and accurate with respect to the items indicated.

a Figures for New South Wales and Tasmania relate to Dec. 31; figures for the other States to June 30.
 b Figures for postal savings banks relate to the end of the calendar year 1904; figures for the other savings banks to the end of 1903.
 c Deposits with the State-controlled Caisse Générale d'Epargne. Includes savings deposits with post-offices. Moreover, accounts are published in the Annuaire Statistique of four municipal and five private savings banks for the year 1904. At the end of that year these nine institutions had 42,279 depositors, credited with \$9,379,623 worth of deposits.
 d Exclusive of data for the "special savings banks," the total deposits in which, on June 30, 1904, amounted to \$23,063,143. The total deposits with all savings banks mount thus to \$85,221,593, making the average deposit per inhabitant \$15.21. This total does not include the savings deposits in the chartered banks ("deposits payable after notice or on a fixed day"), which, on Aug. 31, 1906, were \$35,027,505.

chartered Danks ("deposits payable after notice or on a fixed day"), which, on Aug. 31, 1906, were \$385,027,505. # Figures for the two savings banks in Santiago and Valparaiso. # Includes all savings institutions. Figures for savings banks proper, exclusive of branches of ordinary banks, were 996,615 (number of depositors) and \$160,621,194 (total deposits plus interest due on said deposits at the end of the year). # Not included in the grand total. # Exclusive of population in native states. Data for postal savings banks only. # Exclusive of 132,009,802 lire of savings deposits with the so-called "Società ordinarie di credito" and 313,407,272 lire with the "Società cooperative di credito" at the end of 1903. No data are given with regard to number of depositors in these institutions. # Data for postal savings banks and the five principal private savings banks. Figures for the former

With regard to number of depositors in these institutions. *i* Data for postal savings banks and the five principal private savings banks. Figures for the former are for the calendar year 1905; figures for the latter are for the calendar year 1904. *k* Figures for the "Casa de economie" only. *i* Preliminary data for all Government savings banks as published by the Viestnik Finansov, No. 37, 1906, exclusive of securities held for depositors, the nominal value of which, on December 31, 1905, was \$115,431,000.

SAVINGS BANK RETURNS, BRITISH COLONIES-Continued.

a Government Savings Banks.

 ^b Post-Office Savings Banks.
 ^c In the original accounts £75,828 and 1,445,326 Spanish pesetas, which latter were converted at the rate of 71 d. per peseta.

By reference to the first of the foregoing series of tables relating to savings banks it will be seen that the United States leads both in aggregate amount of deposits and average deposit account. The savings deposits in the United States during the current year reached \$3,482,137,198, nearly 30 per cent of the deposits in all savings banks of the world. The average deposit account is \$433.79. The German Empire is second in the list, with deposits of \$2,639,590,400, the average deposit, however, being but \$158.89. The United Kingdom, Austria, and France are third, fourth, and fifth in the list, with deposits of \$996,827,464, \$979,282,787, and \$890,398,872, respectively. The average deposit account in the United Kingdom is \$85.24, in Austria \$183.90, and in France \$75.66. Germany, including Prussia, leads in number of depositors, namely, 16,612,771, followed by France, with 11,767,772; United Kingdom, 11,694,918; Japan, 10,279,598; United States being fifth, with 8,027,192. In the order of highest average deposit per capita Denmark is foremost with \$81.47, followed by Switzerland with \$62.26; German Empire, \$45.07; Norway, \$42.55; and the United States, \$41.13.

The second table in the series relates to postal savings banks. Including the colonies it appears that the postal savings banks of the British Empire hold over 52 per cent of the deposits in all postal savings institutions—that is, \$932,697,906 out of \$1,783,066,322. Postal savings deposits in France amount to \$229,862,136; Italy, \$206,224,600; and in Belgium, \$116,052,662.

Under date of May 24, 1906, a law was enacted by the Philippine Commission establishing an institution to be known as "The Philippine Postal Savings Bank," and it was placed under the control and management of the director of the posts. The law provides that immediately upon its passage postal savings banks shall be estab-The law provides that lished at Manila, Iloilo, and Cebu, authority being conferred upon the director, subject to approval of the secretary of commerce and police, to establish postal savings banks in other cities, towns, and villages as rapidly as practicable. So far no returns have been received relating to the operations of these postal savings banks.

COMPTROLLER OF THE CURRENCY.

BANKING POWER OF THE WORLD.

The banking power of the United States in 1906, as represented by capital, surplus, other profits, deposits, and circulation of national and other reporting banks, together with estimated amount of funds of this character in nonreporting banks, is shown to be \$16,462,470,465. The items composing this fund are stated in the accompanying table:

Classification.	No.	Capital.	Súrplus, etc.	Deposits.	Circulation.	Total.

a Includes Government deposits.

b Estimated capital, etc., based on reports received from private banks.

From the latest and most reliable data obtainable, the banking power of the foreign countries is estimated at \$21,952,500,000, the details being set forth in the following table:

Banks.	Capital.	Surplus.	Deposits.	Circula- tion.	Total.
Principal European and other foreign banks Foreign savings banks			\$7,642.7 8,245.9	\$4, 111. 8	\$13, 706. 6 .8, 245. 9
Total	1, 364. 7	587.4	15, 888. 6	4,111.8	21,952.5

a Estimated.

Mulhall estimated the world's banking power in 1890 at \$15,985,-000,000, the United States being credited with about one-third of that amount. Since that year the banking power of the United States has increased to the extent of \$11,312,400,000, or over 219 per cent; that of the foreign countries \$11,117,500,000, or 102.6 per cent, and the combined banking power \$22,429,900,000, or 140.3 per cent. The statement following relating to the banking power of the world

The statement following relating to the banking power of the world in 1890 and 1906 shows also the amounts and percentages of increase in 1906 over 1890:

H. Doc. 9, 59-2-26

MONETARY SYSTEMS AND STOCK OF MONEY IN THE PRINCIPAL COUNTRIES OF THE WORLD.

Statistics have been recently compiled by the Director of the Mint relating to the monetary systems and stock of money in the principal countries of the world on December 31, 1905, and which relate to 47 countries, including dependencies of the British Empire, their aggregate population being 1,324,400,000. Gold is the monetary standard in all of the countries with the exception of the Straits Settlements, the Malay States, Ceylon, Johare, Bolivia, the Central American States (exclusive of Costa Rica and British Honduras), and China, wherein silver is the standard. The stock of money is stated at \$13,215,400,000, composed of \$6,483,500,000 gold, \$3,176,000,000 silver, and \$3,555,900,000 uncovered paper currency. Nearly 75 per cent of the gold is held by the following-named countries and in the amounts stated:

United States, \$1,420,800,000; France, \$1,032,600,000; Germany, \$917,400,000; Russia, \$854,900,000; United Kingdom, \$559,100,000, The per capita of gold holdings in these countries is as follows: France. \$26.41; United States, \$16.91; Germany, \$15.14; United Kingdom, \$12.79; Russia, \$5.96. Fifty per cent of the stock of silver is held by the same countries, the amount and per capita being as follows: United States \$686,800,000, per capita \$8.18; France, \$411,100,000, per capita \$10.51; Germany \$209,700,000, per capita \$3.46; United Kingdom \$111,900,000, per capita \$2.56; Russia \$81,900,000, per capita \$0.57. In connection with the stock of silver it is noted that nearly one-third of the aggregate is held in India and China, the amounts being \$603,800,000 and \$350,000,000, respectively.

One-third, approximately, of the uncovered paper currency is in the following countries: United States, \$582,100,000; Germany, \$213,900,000; France, \$118,200,000; United Kingdom, \$116,600,000, the per capita therein being as follows: United States, \$6.93; Germany, \$3.53; France, \$3.02; United Kingdom, \$2.67. Nearly one-half of the uncovered paper currency of the world, which amounts to \$3,555,900,000, is in the South American States, the exact amount being \$1,437,300,000. Consolidating the gold, silver, and uncovered paper currency in all countries, it is shown that the per capita is greatest in France, namely, \$39.94. The amount per capita in the United States is \$32.02; in Germany, \$22.13; in the United Kingdom, \$18.02, and in Russia, \$6.53.

Japan's stock of money is reported at \$211,500,000, and the per capita \$4.15. The stock of gold in the Empire amounts to \$69,900,000; silver, \$43,300,000, and uncovered paper currency, \$98,300,000.

CLEARING-HOUSE EXCHANGES.

Revised returns to Manager Sherer of the New York Clearing House show that the amount of exchanges of the clearing houses of the United States for the year ended September 30, 1905, was \$140,612,554,199. The aggregate clearings for the year ended September 30, 1906, were \$157,749,328,913, a net increase of \$17,136,774,714. With the exception of six cities, reporting a decrease in the amount of clearings of \$10,584,882, there was an increase in the amount of transactions of the associations in the 112 cities in which clearing-house associations are in existence.

Nearly 70 per cent of the clearings of the country were effected through the New York Clearing House, the amount of exchanges handled in that city during the past year being \$103,754,100,091. Chicago is second on the list with \$10,873,546,251, followed by Boston with \$8,149,377,513, Philadelphia with \$7,553,273,999, St. Louis \$2,934,576,620, and Pittsburg \$2,630,996,408. The other cities with exchanges exceeding \$1,000,000,000 are San Francisco, Baltimore, Cincinnati, and Kansas City.

The New York Clearing House has a membership of 55, representing capital of \$118,150,000. The average daily clearings in New York during the year were \$342,422,773. The settlement of balances of the transactions for the year were effected by the payment in money of \$3,832,621,024, or 3.69 per cent of the aggregate volume of clearings. Practically the entire balances were paid in gold, i. e., 99.99 per cent. In 1896 only 0.01 per cent of the balances were settled in gold.

The clearing-house transactions of the Assistant Treasurer of the United States at New York for the year ended September 30, 1906, aggregated \$447,344,424, of which \$422,025,604 represented exchanges received and \$25,318,820 balances received from the clearing house.

The clearing-house transactions of the whole country from 1900 to 1906, inclusive, were as follows:

1900	· · · · · · · · · · · · · · · · · · ·		 \$84,000,000,000
1901			 114,000,000,000
1902		[.]	 115,000,000,000
1906		••••••••	 157, 000, 000, 000

There will be found in the appendix to the report of the Comptroller of the Currency a table relating to the exchanges of the clearing houses of the United States for each year from 1900 to 1906, inclusive, geographically arranged.

A condensed statement is given herewith of the transactions, in millions of dollars, by geographical sections, for the years ended September 30, 1900, and 1906, together with the amount and percentage of increase.

	1900.		Increase.

REPORT ON THE FINANCES.

THE ANNUAL REPORT.

The Comptroller's unabridged report is published in one volume, as was the case last year. The individual statements made by the banks under date of September 4 appear in condensed form at the end of the report. The principal items of resources and liabilities are given as reported; bonds, exclusive of United States bonds, other similar investments, and real estate are consolidated; also amounts due from banks, exchange, and other cash items, as well as all liabilities other than capital, surplus and profits, circulation, individual deposits, deposits of the Government and of United States disbursing officers.

DIGEST OF BANK CASES.

Following the text of this report will be found a compilation of decisions in bank cases rendered by the Federal courts and published in the United States Supreme Court Reports and Federal Reporter since the publication of the 1905 edition of the Digest of National Bank Decisions.

The most important questions of general interest which appear in the compilation are the following:

Powers of States in relation to legislation affecting national banks; enforcement of liability of stockholder of national bank in voluntary liquidation; rights and liabilities of national bank on indorsement or transfer of negotiable paper; powers, etc., of officers of national bank; criminal and civil liability of officers of national banks; misapplication of funds of and false entries in books of national banks; national banks subject to control of Congress; ultra vires acts; assessment on stock of insolvent national bank; liability of shareholders determined by Federal not State statute; right of shareholders to inspect books.

AMENDMENTS TO THE NATIONAL-BANK ACT.

Section 5146 of the Revised Statutes provides in part that every director of a national banking association must own in his own right at least ten shares of the capital stock of the bank of which he is a director. Under date of February 28, 1905, this section was amended to provide that a director of a national bank with capital not in excess of \$25,000 shall own in his own right at least five shares of such capital stock.

Under date of December 21, 1905, an act was approved, supplemental to the act entitled "An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans," providing as follows:

That the two per cent bonds of the United States authorized by section eight of the act * * * approved June twenty-eighth, nineteen hundred and two, shall have all the rights and privileges accorded by law to other two per cent bonds of the United States, and every national banking association having on deposit, as provided by law, such bonds issued under the provisions of said section eight of said act approved June twenty-eighth, nineteen hundred and two, to secure its circulating notes, shall pay to the Treasurer of the United States, in the months of January and July, a tax of one-fourth of one per cent each half year upon the average amount of such of its notes in circulation as are based upon the deposit of said two per cent bonds; and such taxes shall be in lieu of existing taxes on its notes in circulation imposed by section fifty-two hundred and fourteen of the Revised Statutes.

0

The recommendations of the present and prior Comptrollers with respect to an amendment of section 5200, relating to the limit to the amount of loans which may be granted by national banking associations, received consideration by the last Congress, and on June 22, 1906, an act was approved amending that section to read as follows:

The total liabilities to any association, of any person, or of any company, corporation, or firm, for money borrowed, including in the liabilities of a company or firm the liabilities of the several members thereof shall at no time exceed one-tenth part of the amount of the capital stock of such associations, actually paid in and unimpaired and one-tenth part of its unimpaired surplus fund: *Provided, however*, That the total of such liabilities shall in no event exceed thirty per centum of the capital stock of the association. But the discount of bills of exchange drawn in good faith against actually existing values, and the discount of commercial or business paper actually owned by the person negotiating the same shall not be considered as money borrowed.

No other legislation affecting national banks was enacted by the last Congress except the act approved June 25, 1906, amending the code of the District of Columbia, providing for the examination of and reports from savings banks, savings companies, trust companies, and other banking institutions organized by virtue of the laws of any of the States of the Union, and having an office or banking house located in the District of Columbia where deposits or savings are received.

The second proviso to section 713 of the code, as amended, reads as follows:

That all publications authorized or required by section fifty-two hundred and eleven of the Revised Statutes, and all other publications authorized or required by existing law to be made in the District of Columbia, shall be printed in two or more daily newspapers of general circulation, published in the city of Washington, one of which shall be a morning newspaper.

SAVINGS BANKS IN THE DISTRICT OF COLUMBIA.

In my annual report for 1905 attention was called to the necessity for legislation regulating banking in the District of Columbia, in order to secure to depositors in banks organized under authority of State laws and doing business in the District the same measure of protection that is afforded depositors in banks and trust companies organized under Federal laws.

In line with this suggestion and the recommendation of the Commissioners of the District of Columbia, an act was passed and approved June 25, 1906, placing under the supervision of the Comptroller of the Currency all savings banks, savings companies, trust companies, and other banking institutions organized under any act of Congress or by virtue of the laws of any of the States, having an office or banking house in the District of Columbia for the receipt of deposits or savings.

Previous to this enactment the only banking institutions in the District of Columbia under official supervision were the national banks and trust companies organized under acts of Congress. Banking institutions doing business in the District but organized under authority of State laws were subject practically to no official supervision whatever, Federal, State, or District.

When the act of June 25, 1906, went into effect there were 14 institutions of this class operating in the District of Columbia. Six of these were incorporated under the laws of Virginia, six under the laws of West Virginia, one under the laws of Connecticut and one under the code of laws for the District of Columbia, as amended by the act of June 30, 1902.

On September 4, 1906, the date of their first report of condition made to the Comptroller under the above-mentioned act, 13 of these institutions showed individual deposits aggregating \$4,191,738. Banking institutions having offices or banking houses in foreign countries as well as in the District of Columbia, being required by the act mentioned to make and publish semiannual reports only, no report was received from the International Banking Corporation, the only institution of this class having a banking house in the District.

All of these institutions were examined during the past few months by a national bank examiner. Two of them were found to be insolvent and were immediately closed and placed in the charge of receivers, namely, the Aetna Banking and Trust Company and the Peoples Savings Bank.

The first-named company was organized under the laws of West Virginia May 14, 1901. Its principal office was located in Butte, It operated a branch in Washington, D. C., and was reported Mont. as maintaining another in New York City. An examination of the Washington branch disclosed a condition of hopeless insolvency, and immediately upon its being closed by the Comptroller the parent bank at Butte suspended business. A receiver was placed in charge of each bank by the Comptroller. No books or assets whatever were found at the New York office. The liquidation of this concern has not progressed far enough to enable an accurate statement to be What disposition was made of the funds or who is responsible made. for their disappearance has not yet been determined, but apparently the bank has been looted by its officers, and the prospects for any material returns to the depositors and other creditors are very discouraging.

The failure of this bank affords a striking illustration of the urgent necessity for more adequate legislation regulating banks of this class operating in the District of Columbia, and providing for the punishment of offenses committed against the banking laws.

The supervisory powers conferred upon the Comptroller over institutions of this kind by the act of June 25, 1906, are insufficient, as they only give him authority to require them to make and publish sworn reports of condition, to cause an examination to be made into their affairs whenever he may deem it necessary, and to take possession of and appoint a receiver for any such institution for the same reasons that he is authorized to take possession of and appoint a receiver for a national bank.

If the capital stock of any such bank becomes impaired by losses or otherwise, he has the power to require the impairment to be made good within a stated time under the alternative penalty of liquidation or receivership. If an examination discloses a condition of insolvency, he may close the bank's doors, take possession of the institution, and appoint a receiver to wind up its affairs; but there is no law, Federal or District, regulating the conduct of the bank's business or empowering the Comptroller to correct abuses or dangerous practices which jeopardize the safety of the institution and ultimately result in insolvency and irreparable loss to depositor's.

The provisions of the national banking laws covering crimes and

misdemeanors do not apply to these banks, and no adequate laws of this nature are provided by the District Code.

The remedy recommended for this condition of affairs is the enactment of a law requiring banks and banking companies of this class to incorporate in the District of Columbia, instead of permitting them in the absence of such a statute to operate under charters obtained from neighboring States, which do not appear to retain any control or to exercise any supervision over them. All institutions of this kind in operation in the District of Columbia at the time of the approval of the proposed act should be required to reincorporate under its provisions within a stated time or to cease doing business in the District.

The Code of Laws for the District, approved March 3, 1901, should also be amended to provide for the punishment of offenses against banking institutions operating therein by an enactment similar to that which provides for offenses against the national banking laws, as follows:

Every president, director, cashier, teller, clerk or agent of any savings bank, or savings company, or trust company, or other banking institution, organized under authority of any act of Congress to do business in the District of Columbia, or organized by virtue of the laws of any of the States of this Union and having an office or banking house located within the District of Columbia where deposits or savings are received, who embezzles, abstracts or willfully misapplies any of the moneys, funds or credits of the bank, company or institution; or who, without authority from the directors, issues or puts forth any certificate of deposit, or draws any order or bill of exchange, makes any acceptance, assigns any note, bond, draft, bill of exchange, mortgage, judgment or decree; or who makes any false entry in any book, report or statement of the bank, company or institution, with intent, in either case, to injure or defraud the bank, company or institution, or any other company, body politic or corporate, or any individual person, or to deceive any officer of the bank, company, or institution; and any person who, with like intent, aids or abets any officer, clerk or agent in violation of this section, shall be deemed guilty of a misdemeanor and shall be imprisoned not less than five years nor more than ten years.

BANK EXAMINATIONS.

The Comptroller would again respectfully call the attention of Congress to the necessity of a change in the system of bank examinations, and renew his recommendation made in the report for 1905, that the bank examiners be paid salaries, by the day, instead of fees, as at present.

This is a matter of very great importance in the interest of good administration, and the effective supervision of national banks. Every Comptroller of the Currency has agreed in this opinion, and has recommended that this change be made. The examination and supervision of national banks will never be what it should be, until this recommendation is carried out.

CURRENCY REFORM.

The Comptroller again most respectfully and earnestly calls the attention of Congress to the necessity of a change in the national currency and renews the recommendations made in his report of December 1, 1902, that the national banks be authorized to issue a portion of their circulation as uncovered notes, as the best means of adding to this circulation the greatly needed quality of elasticity. It is recommended, therefore, that the laws be amended so as to allow of the following changes:

All national banks which have been in operation for not less than two years, and which have an unimpaired surplus of not less than 20 per cent of their capital stock, to be permitted to issue not to exceed 50 per cent of the amount of their bond-covered notes in notes uncovered by bond deposits.

To protect these notes the banks shall carry the same reserves as against deposits, in gold or its equivalent; in reserve banks this would be 25 per cent, and in all others 15 per cent of the outstanding notes.

These notes to be further protected by a guaranty fund of 5 per cent, to be deposited by the issuing bank with the Treasurer of the United States before any are issued.

Out of this guaranty fund all such gold reserve notes to be redeemed on demand.

The guaranty fund to be kept good by a graduated tax on the gold reserve notes, beginning at a rate of not over $2\frac{1}{2}$ per cent per annum.

Every bank issuing gold reserve notes to be required to provide means of redemption for such notes, in every reserve and central reserve city, and also such other points as may be designated.

These points to be so numerous and convenient as to put every national bank within twenty-four hours of a redemption center.

The provision limiting the retirement of the present bond-secured notes to \$3,000,000 per month, not to apply to gold reserve notes, and this limit to be repealed or greatly extended, at the discretion of the Secretary of the Treasury, in its application to bond-secured notes.

There are several special reasons why elasticity is very necessary to our currency system. There is no other country where there is such a great variation in the amount of currency needed for current cash transactions, owing to the vast extent of our territory, our varied interests and enormous business, and the great value of crops and products which have to be moved at certain seasons, calling for very large and varying amounts of cash. There is no good way to provide this needed elasticity but by means of bank notes, if they can be made quickly available when and where needed and as quickly redeemed and retired when the work is done and the demand for them ceases.

In our system all the elasticity must be supplied by the bank notes. There is and can be no periodical variation in the amount of coin and coin certificates in circulation which can in any way respond to variations in demand. The volume of our Government legal-tender notes is absolutely fixed by statute and can not be varied to meet changing conditions. Since all the elasticity in our supply of currency must come from the bank notes, it is therefore of vital importance that they be given this quality in the highest degree possible consistent with safety. This should be done with the greatest possible care, in order that the essential qualities of safety and uniformity in value which our bank notes have always had in so marked a degree shall not be lost or impaired, but if this currency can be made more elastic without danger of losing these qualities it should be done at once.

The autumn of each year makes more apparent the urgent neces-

sity of some additional facility or means by which the demand for crop-moving funds can be supplied to the people without derangement of all the business and financial affairs of the country. There is no possibility that this can be supplied except by Congressional legislation. It is a question which involves the welfare and prosperity of every section of our land, and every man, woman, and child in the United States.

As has been so often said, there is no flexibility or elasticity in our currency. The necessity for this is always most acutely felt in the late summer and early autumn, or at the crop-moving time. The two ways in which the demand for funds then manifests itself are in a demand for an increase of deposits requiring more reserve money, and for cash or currency to make cash payments. This latter demand has to be largely met by money which would otherwise be available for reserve. The withdrawal of this reserve money reduces the reserves when they should increase, and after it is no longer needed for cash payments, the money returns to reserves and tends to inflate loan credits and induce speculation.

The real solution of the problem is to enable the banks to supply for the cash transactions bank notes not available for reserves, and which therefore do not contract loans when paid out and do not inflate them when they return.

Considering for the moment the supply of crop-moving funds, which is the real critical point in this question: When the harvests first begin in the South and Southwest, the banks at once feel two demands; first for loans to the people who must provide funds to buy the products of the farm and plantation; second, for currency to pay the wages of labor and to pay for such products as must be paid for in actual cash, and not by a transfer of credits by check. This demand for loans to be kept on deposit makes more reserve money necessary for the banks to hold, and at the same time they must supply more currency for cash transactions. It would seem, therefore, perfectly axiomatic and apparent to anyone that the best way to meet the situation would be to keep in the banks all the money which can properly be used for reserve and to supply for cash transactions, currency which will answer all necessary requirements, be just as safe, just as convenient, and just as good in every way, but which is not available as bank reserves. This can be done simply, easily, and automatically by the proper use of the right kind of bank notes, and in no other way.

The increase in credits necessary for crop-moving is perfectly legitimate, as well as necessary. To supply such credits is one of the prime functions of a bank, and among the greatest services it can perform. There could be no better basis of credit than the production of such enormous wealth as our people gather every year from our wonderfully productive lands. This is the ideal business for banks, and the ideal way for such business to be done for the people is through a good system of banks with facilities for granting credits and making the value of the products immediately available to those who have produced them, either in deposits to be checked against, or in currency for cash payments, at the option of the people, not of the banks.

For such advances as are made by the banks, there is a prompt and sure pay day, as there is an immediate cash market for everything which is produced. The people who have raised the products, those who want to buy and trade in them, and those who wish to procure and store them for future use, are entitled to these credits, and are entitled to such a banking system as will supply them as needed, without friction or delay, and with the least possible derangement of the other business of the country.

There should be no limit to the amount of credits created for crop moving but the judgment of each bank as to the credit it shall give to its customers, subject to the limitations of the banking laws and the amount of reserve money it can provide to safeguard its deposits and maintain its legal reserve. This is true not only of the banks in the farming communities directly in communication with the crop movement, but also those in all the larger cities designated as reserve and central reserve cities. The whole volume of the deposit credits of the country should be, and is, limited only by the total amount of reserve money available, and the amount granted by each bank is limited only by the judgment of its officers and the amount of its There is no urgent need of present legislation on the cash reserve. subject of this reserve money. The ideal reserve would be gold or gold certificates immediately convertible into gold, but our business is now all adjusted to the use of what is termed in the statutes "lawful money," and as our various kinds of lawful money are now kept as good as gold, they may all properly be used as bank reserves and considered practically as gold reserves.

As we have seen, then, the banks are free, as they should be, to increase and reduce their deposit credits up to the limit of their available reserves. If they were also at liberty to either increase or reduce their bank-note credits, within safe limits and under proper regulations, so they could supply the varying amount of currency needed by their customers for cash transactions, the whole financial machinery for supplying the crop moving funds would be complete.

In considering these questions, there are a few fundamental principles which should be clearly kept in mind: They are not new--few, if any, good financial ideas are; novelty is one of the least desirable qualities in currency plans. We are apt, however, to lose sight of these principles or confuse their application.

THERE ARE TWO GENERAL USES FOR MONEY OR CURRENCY IN MODERN BUSINESS.

The first is for bank reserves, against deposits or note circulation, and for this use gold or its equivalent only should be employed.

The second is for daily cash transactions. This is the proper field for the use of bank notes.

THERE IS NO ESSENTIAL DIFFERENCE BETWEEN A BANK-DEPOSIT CREDIT AND A BANK-NOTE CREDIT.

They should be kept as nearly identical as possible by legislation. It should be the free option of the customer of the bank to use either one, and it should, as far as possible, be made a matter of indifference to the bank as to which one the customer does use. This may be practically accomplished by requiring the same reserve for note credits as deposit credits, and by providing for such redemption that the two classes of credits may be daily interchangeable. This latter is the vital principle of the whole matter, and if we can so change our national currency laws that the banks are still free to expand or contract their credits in response to the demands of their customers and the amount of reserves available and can then supply these credits to their customers either as note credits or deposit credits instantly convertible from one to the other at the convenience of the customer without danger to either the customer or the banks, the main problem of our currency will be solved.

The credit system, with all necessary machinery for deposit credits, is already in satisfactory operation. We need only to add to it proper facilities for note credits. The question is, Can it be safely done, and if so, how? Unless its safety can be fully demonstrated it would be very unwise to make any change in our national currency, for whatever their faults are or may have been our bond-covered national-bank notes have always had the prime requisite of absolute safety and uniformity in value.

GOLD RESERVE BANK NOTES.

The Comptroller is of the opinion, however, and believes it can be absolutely demonstrated, that such a change as is necessary can be made without any danger whatever, and the necessary elasticity added to our bank-note currency by allowing the banks to issue a portion of their notes uncovered by a bond deposit, protecting them by other methods which will insure their being just as good and safe in the hands of the note holders and allow of such daily expansion or contraction as will make the total volume of our currency responsive to the needs of trade, with great resulting benefit and no corresponding disadvantage to our currency system.

In any plans for making this change it is necessary to utilize the present bond-secured currency. We should not if we could do anything to radically change or do away with the present notes. The most conservative and practicable plan seems to be to make no change whatever in the present national-bank circulation, but to allow the national banks to issue in addition to the present notes a certain percentage of notes uncovered by bond deposits, but against which the banks should be required to hold in gold or its equivalent the same reserves as are now held against deposits, and at the same time to so add to the laws and regulations in regard to redemption as to provide very ample requirements and means for redemption and retirement.

This redemption machinery can be made so complete, and the redemption centers can be so numerous and convenient, as to compel constant and frequent redemption of the uncovered gold reserve notes. It should also be part of this plan to provide a guaranty fund for the payment of these uncovered gold reserve notes. Each bank should be required to pay into this fund 5 per cent of its uncovered notes before they are issued. This fund should be maintained by a tax on the uncovered circulation. Forty or 50 per cent of the amount of the bond-covered notes might be ultimately issued as uncovered gold reserve notes with entire safety. The Comptroller would suggest, however, that the authorization be gradual, at the rate, say, of 20 per cent, the first year, and an increase of 10 per cent each year until 50 per cent of the bond-covered notes is reached.

Under this plan, the safeguards to take the place of the bond deposit, are, first, the guaranty fund, deposited before the notes are issued, and maintained by a tax on the notes; next, the reserve to be held by the banks, in gold or its equivalent, in the same proportion as now required against deposits. In addition to this, there is added safety in the fact that the notes are limited by law to a maximum percentage of the notes of the bank of issue, and would be further limited by such ample facilities for redemption that the total amount of uncovered gold reserve notes, at any time in circulation, would be exactly the amount the people require, and will keep in their hands for cash transactions.

Any change in the law should apply uniformly to all national banks in good standing, except that the uncovered gold reserve notes should only be issued by banks which have been organized and in operation for at least two years, and have an unimpaired surplus of at least 20 per cent of their capital stock. Authority should also be given to the Comptroller of the Currency, with the approval of the Secretary of the Treasury, to veto the issue of any such notes by any one or all of the banks.

Any bank which was known to be in bad condition could thus be prevented from issuing the notes, and the issue confined to good solvent banks, which could properly be trusted to protect them.

REDEMPTION.

The essential feature in any good system of bank notes is constant and frequent redemption. Under our present bond-secured system we have practically no inducement for redemption, and no real redemption at all. The notes come to the Treasury and are reissued or replaced with new notes about once every two years, but this is no real redemption, such as is contemplated in this plan.

If the uncovered gold reserve notes are authorized, every national bank issuing them should be required to have a redemption agent in every reserve city and at enough points in addition to those now designated as reserve cities, to insure that any bank on the line of a railway, with ordinary mail facilities, could reach a redemption center within twenty-four hours. The result of this would be that whenever any bank received the note of another, unless there was a demand for it that day, from its customers for current cash in addition to the demand for its own notes, the note would be sent to be redeemed and made available as reserve.

The notes on reaching the redemption center could be cleared like checks through a clearing house, and the balances either remitted as currency or transferred for credit in reserve or central reserve cities. Each bank which issued uncovered gold reserve notes would thus have to face every day the redemption of some of its notes and be prepared for it. Self-interest as well as the law would compel them to carry the necessary reserves. The advantage of keeping its own notes in circulation would make each bank alert to pay out only their own, as long as they had them on hand, and to send notes of other banks to the nearest redemption center for the credit of their account against their own notes which would be presented there. The number and location of the redemption centers would insure that every gold reserve note as soon as there was any decrease in the demand for it for current cash transactions, would at once start on its way for In this way the net results of the transactions of each redemption.

bank with its own customers would immediately be felt, and the amount of the uncovered gold reserve notes in circulation would be exactly determined by the demand for them for current cash transactions. If the people wanted notes and would keep them in circulation, they would stay out; if they no longer needed them, and began to turn them into the banks, they would at once be redeemed. The volume of notes in circulation would be immediately and exactly responsive to the demands of the people, and the needs of business.

This is the only way to accomplish this result, and it will result in a far better regulation of the amount of circulating notes needed than any tax or any arbitrary regulation, either by law or the discretion of any executive officer. This is the result of experience everywhere such a system has been tried, and a careful study of all the elements and forces involved makes it clear that the requirement of a gold reserve and prompt and constant redemption would make the proposed gold-reserve notes quickly and exactly responsive to the demands of business, and the national banks could and would thus supply such notes as are needed just when and where they are needed.

In the discussion in regard to elastic bank notes, it is frequently urged that the redemption of the notes of the national banks would be interfered with and possibly be made insufficient to accomplish the results claimed for it, by the fact that many of the notes would soon come into the possession of State and private banks, which would have no inducement to forward them for redemption, and would therefore not sort them out for that purpose, but carry them in their own reserves.

This difficulty could be met by allowing all banks, whether national or not, to have the same privilege of forwarding notes to redemption centers, and receiving credit for them there, which they might have transferred for credit at the different subtreasuries, or in the reserve or central reserve cities. There would be no practical difficulty in the way of making this arrangement, which would result in State and private banks having the same inducement to sort out the notes and to forward them for redemption as national banks would have. This would make the redemption perfectly complete and automatic and accomplish just exactly the result which is desired from it.

Another impediment to redemption which has been suggested is the holding of national-bank notes by State banks and trust companies between which and the national banks whose notes were held there was some community of ownership or some arrangement in regard to the holding of notes. This might be done in some cases, but we must give the managers of such banks and trust companies credit for good business judgment and prudence, and assume that the reserves to be held by them are for the purpose of protecting their No prudent or careful banker would, therefore, hold as any banks. considerable part of his reserve notes which in case of any trouble or crisis would simply be a liability of the bank in which he was interested which would add to their difficulties in time of trouble, instead of being a source of strength. While there might be occasional instances where the gold-reserve notes would be so held, the aggregate amount can not possibly be enough to seriously interfere with the scheme of redemption, or prevent its working as outlined, as a whole, with entire satisfaction.

REPORT ON THE FINANCES.

SAFETY OF GOLD RESERVE NOTES.

The ample redemption of the uncovered gold-reserve notes and the prohibition of their use for bank reserves, insures that the people and not the banks shall determine what quantity of them shall be kept in circulation. A full and fair consideration of these provisions with the fundamental principles of banking and credits thoroughly understood, will demonstrate beyond any doubt that such gold reserve notes can be issued by the banks with absolute safety to the note holder and the banks as a whole. The guaranty fund will make the note holder as safe as the holders of the notes which have been in circulation for more than forty years, without the loss of one dollar. The provisions for gold reserves held against the notes and for frequent redemption will make the note credits as safe to the bank as their present deposit credits.

The records of the national-bank failures for over forty-three years show that the 5 per cent guaranty fund is ample to insure safety. A 5 per cent fund in the year 1893 would have paid the notes of all the 65 banks which failed almost five times over if there had been no. assets in the banks and no dividends to creditors, and in the year of the panic of 1873 it would have paid about seven times the amount of the notes of the banks which failed. These were the years of the worst panics we have ever had. A tax of less than one-fourth of 1 per cent on the circulation of active national banks would have provided for the redemption of the circulation of all banks which have failed during the existence of the system, so that a 5 per cent fund is more than twenty times enough to cover the average note losses, without taking credit for any dividend from the insolvent banks. The national banks which have been finally liquidated since their failure paid on the average 78 per cent to creditors, so that if the reserve fund is made an ordinary creditor it will be reimbursed for at least 75 to 80 per cent of the losses, as stated above. There can not therefore be the least possibility that notes will not be perfectly secure with a 5 per cent fund, as it would be sufficient to pay the average net losses for one hundred years.

Five per cent on the present amount of national-bank notes is enough to pay every note of every national bank which has failed in forty-three years. These figures, which are based on the experience of forty-three years, should surely be conclusive and absolutely remove all doubt as to the sufficiency of the guaranty fund to make every note good in the hands of the holder.

The figures also show that there is no necessity for making these gold-reserve notes a first lien on the assets of a bank, but that they can safely be put on the same basis as the deposit credits, thus maintaining consistently the similarity and equality of the note and the deposit credit. One of the strong objections to uncovered notes, that they would be an element of danger and a menace to depositors, would thus be completely met. Every holder of an uncovered gold-reserve note would be protected by the guaranty fund which would immediately pay his note. This would eliminate all possibility of loss to the public.

In case of failure the guaranty fund would look for its reimbursement to the receiver of the insolvent bank and stand in the same relation as the other creditors. This would result in the collection of

0.1

about 78 per cent of all losses. The depositor or other creditor would be fairly treated by receiving the same dividends as the guaranty fund, and the credit notes, instead of being a menace and a danger to the depositor, would add to his safety. They would enable the individual banks and all the banks as a whole to meet the seasonable demands and also many sudden demands for currency from their depositors with gold-reserve notes without reducing the amount of their reserve money. This would in most, if not all, instances prevent the necessity for the calling or collection of loans on short notice, thus adding greatly to the stability and safety not only of all the banking business, but of all other enterprises and undertakings in any way dependent on bank accommodations, as practically all modern business is.

Objection is frequently heard to a great number of small banks, widely scattered, issuing uncovered notes. On thorough consideration this objection does not seem to be serious, and there are some counterbalancing advantages. The notes being furnished by the Government, there is no danger of fraudulent overissue. The proportion of uncovered notes to the capital of the bank proposed is not large, and the regulations could be made such as to remove the temptation to organize the banks for the note issue only. The constant redemption spoken of so often would check this. These small banks are now allowed to take unlimited deposits. The notes will be safer than the deposits on account of the guaranty fund. If the banks are fit to take unlimited deposits, they are fit to issue a limited quantity of notes, protected by a gold reserve. One chief advantage of the issue by the great number of banks is that the gauge of the quantity needed by widely scattered banks, each in close touch with its own customers and community, would be the best possible way to determine the proper amount required. They would feel and supply the demand more quickly and collect and retire the notes more promptly, quietly, and with less disturbance when no longer needed in circulation.

Although the small banks authorized under the law of 1900 have not yet gone through the test of a panic, the figures given elsewhere in this report show that the proportion of failures among them has been for six years rather less than among the larger banks, and as far as this goes it is an indication that their management is up to the average of all the banks.

GRADUATED TAXATION OF NOTES.

Carrying out the principle of keeping the note credit as nearly as possible the same as the deposit credit, the rate of taxation should be low on the greater part of the uncovered notes; that is, not over $2\frac{1}{2}$ per cent per annum on at least the first half of the uncovered notes. Behind this we should have for special emergencies further notes with a rapidly increasing tax, some at 4, some at 5, and the last at 6 per cent per annum. This would insure that there should be some reserve elasticity; that we should have several lines of reserve which would come into action one at a time, in emergencies, as they are needed.

The bulk of the variation, however, would be, and must be, in the first or lower taxed notes. The tax of $2\frac{1}{2}$ per cent would about correspond with the interest paid on reserve deposits and maintain the equality of notes and deposits in this respect. The gold reserve and frequent redemption would make these notes vary exactly in accordance with the demand of the people for current cash transactions. They would supply the variations due to differences in the seasons and the ordinary course of business. They might be increasing in one part of the country, where currency is needed, and decreasing in another, where the demand is less. The business of each bank with its customers would supply just the amount needed for each community. If the banks are compelled to carry a gold reserve and to furnish daily redemption for what are not needed, it will result in far better regulation of the quantity of circulation of currency than would be brought about by any tax, official supervision, or arbitrary control through any currency commission or clearing house. It will be better than any other system which is not automatic and controlled by the composite result of the relations with his bank of every bank customer in the United States.

This result can only be accomplished, however, with a considerable proportion of the notes moderately taxed. The notes at the higher rate could only come out in times of special stress or emergencies. Instead of helping the banks and people to keep off a crisis, they would and could only be used after the crisis had become manifest. The mere issue of such notes would be the sure sign of it. The hightaxed notes would only rarely be used, and every bank would avoid the confession of weakness by issuing them to the last minute possible. They might answer a very good purpose if we had a great central bank with government or semigovernment ownership and control, which could, in the public interest, take out notes at 5 or 6 per cent and loan them even at a lower rate, as is sometimes done by the banks in Europe, but it is not reasonable or sensible to expect the necessary concert of action and disinterestedness to do this, from our thousands of scattered and independent banks. In times of great emergency, when conditions are widespread and well known, they might act together, but it would then be too late to prevent much of the harm which comes from such conditions. A great central or government bank might do with perfect safety many things it would be folly for any individual bank to attempt.

A circulation to be used in emergencies may be very useful and proper, but what is much more necessary is a circulation which will always tend to prevent, and in most cases really prevent, the conditions which give rise to or make the emergency necessary. This the lower taxed gold reserve notes would do, and the higher taxed alone would not. The lower taxed notes would be in circulation to a greater or less extent all the time. Most of the banks would at once take them out and be prepared to use them whenever their depositors wished to change their deposit credits for note credits. In this way any increase in the demand for currency would be met by bank notes without any change in the total volume of credits, or any withdrawal of reserve money making a contraction of loans necessary. All the uncovered gold reserve notes, at whatever rate of taxation, should be exactly alike in appearance, so no one would know as to the tax rate a note bore.

The lower taxed notes being always more or less in circulation, increasing or decreasing as the demand dictated, the people would be used to them and expect all the banks to use them. Then, if there came a time when the notes at the higher rate were needed, the banks could and would use them without making it a signal of danger, and without anyone knowing the quantity at each rate in circulation. The higher taxed notes might in this way be a final reserve in case of emergency, but without a considerable proportion of notes ordinarily and commonly in use the high-taxed emergency notes would be a source of danger rather than safety.

As for notes with a high rate of taxation, without any gold reserve, they would not answer the purpose at all, with our system of small, independent banks. The reserve is a far better protection than the tax, and under no circumstances should the notes be permitted without ample reserves. In Germany, where the Imperial Bank makes what is known as an overissue of notes taxed 5 per cent, the bank must have a reserve in cash of one-third the amount of the notes, and have the other two-thirds covered by discounted paper.

The issue of uncovered notes without reserves would be inflation of credits pure and simple, without any safeguards, and would do far more harm than good. Reserves and redemptions are what we must depend on to make the notes safe and regulate their amount. Taxation will not and can not do either.

With the gold reserves, however, and a graduated tax, or at least two rates of tax, one of them low enough to allow of a considerable use of notes in normal times, we should have the great advantage of having note credits and deposit credits quickly and easily interchangeable. With proper laws and regulations there can be no possible harm or danger from this, and its benefits and advantages are very great.

This is all there is to the whole proposition. There can be no harm in making such a change. It will greatly benefit every industry and every line of business in the United States. This simple and correct principle introduced into our currency system will make it thoroughly adequate and well adapted to the business of our people. Until this is done in some way it can not be either theoretically sound or practically efficient.

NO DANGER OF INFLATION OR SPECULATION.

A natural inquiry, perhaps, will be whether the issue of these uncovered gold reserve notes may not lead to inflation and possibly to the promotion of speculation in stocks, lands, and many commodities to a dangerous degree. It certainly could not promote stock speculation or furnish any funds for such purposes. Such speculation is not done with currency at all. There is seldom, if ever, a dollar of actual cash used. It is all done through loans and checks against deposits. The change in the law proposed will not add to the loans or make any addition to the possible credits, because the reserve requirements are the same for notes and deposits. The change from one form of credit to another will add no facilities for stock exchange or grain speculation and little or none for land speculation. In fact it seems certain that such notes as are contemplated will not be used to as great an extent by the large city banks as by the banks in the country and small cities.

Assuming that the gold reserve notes might all be kept in circulation all the time and be made the basis of loans at 6 per cent per annum to the full extent of their issue (this is a condition which could never possibly exist—but assume that it should), the profit to the issuing bank in a central reserve city would be about 1.7 per cent; in

H. Doc. 9, 59–2–––27

a reserve city about 1.9 per cent, and in a nonreserve city a little under 2.5 per cent on the notes taxed at $2\frac{1}{2}$ per cent. Under the present system of notes about 49 per cent of the redemptions come from New York City alone and 86 per cent come from 8 cities composed of the central reserve cities and 5 of the largest reserve cities. The almost certain probability therefore is that the difficulty of keeping the gold reserve notes in circulation in New York, and especially the large eastern cities, and the lower interest rate than 6 per cent which usually prevails, will cut down the above estimated profits fully one-half, so that it will probably be less than on the bond covered notes at present. Under these conditions the gold reserve notes will not be used by the large city banks, except for that portion of the year when there is a demand from the country and only after the country banks have supplied their depositors to their legal limit or the limit of their reserves.

If there should be one or two hundred millions of dollars issued in the uncovered notes or their issue should vary between these limits, they would take the place of about that quantity of reserve money, which would find its way into bank reserves. Except as this would be required for reserves for the gold reserve notes, that money could become the basis for a corresponding amount of loans and deposits. A part of this would naturally come to the reserve cities and in all probability some of it would be loaned on call and used on the stock, grain, and cotton exchanges. It could hardly be such an amount, however, as would lead to any speculative boom. After the first readjustment, which would come gradually, the amount would be more constant and less fluctuating than it is now or has been, and the result would be that the speculation which we can not prevent would be done on more uniform rates, and would be in consequence less dangerous.

The main advantage to the banks in the central reserve and large reserve cities of these gold reserve notes would be that the balances of their banking customers would be more stable and uniform. The country banks would meet demands from their depositors with their own notes, as far as they could, before drawing on their reserves, and if there should come a demand on the reserve bank for currency it could to a large extent supply this with their gold reserve notes. This could not fail to make conditions more stable and money rates not only lower but more uniform in the reserve cities and all over the country, with great resulting benefit to all.

There need be no fear of inflation of credits from the issue of bank notes against which the same reserves are required as against deposits, and for which there is sure and prompt and compulsory redemption. The reserve requirement makes it impossible for the total of note and deposit credits to be more than the possible deposit credits are now. There is just so much reserve now available. This is the limit of deposits and consequently of loans. The total amount of loans must stay on deposit in the banks, however much it may be transferred by check from one bank to another. Even when cash currency is taken from one bank for any use, it before long finds its way back to another bank, and the amount or proportion of cash in circulation is in the end quite constant.

Referring to the table on page 381, giving the distribution of money in the United States, it will be seen that the percentage of the money in the country held by the banks remains very closely around $33\frac{1}{3}$ per cent, going below 30 per cent only in the years 1893 and 1896, when there were special reasons for this variation, and going over 35 per cent only once in fifteen years.

There is no objection to the increase of deposits as long as there is ample reserve against them. What objection can there be to the change of the deposit credit to a note credit, as long as the reserve remains the same, and the total of the deposit and note credits remains constant, which the reserve requirement makes sure it will?

As has been seen and stated repeatedly, the issue of these goldreserve notes is simply changing one form of credit into another for the convenience of the customer of the bank. There is no inflation or increase of the whole volume of credits as the result of this opera-There is now a demand for every dollar of the available tion. reserve money in the world. Business not only in the United States. but all over the world, has so increased in volume that it is taxing all kinds of facilities to the utmost. This activity is based on sound conditions: Abundant yields of field and mine and forest. Labor is employed at the highest wages ever known. Everyone is busy and The only possible danger is that there may be some prosperous. sudden event or calamity which will call for widespread liquidation, with the resulting panic. There is nothing in the industrial, commercial, or agricultural situation to produce this. If it comes, it must be from financial or money trouble. At a time when there is a most persistent demand for all the bank reserves possible, we are wasting our reserves by withdrawing them from the banks and money centers to send them to the farms, and we continue to take the same risks year after year in spite of all warning.

Would it not be far better to keep the reserve in the banks when needed and send bank notes, protected by ample reserves, where they are needed for cash transactions? There is in circulation in the country, not in the banks or Treasury of the United States, about \$1,700,000,000. At least \$1,000,000,000 of this might be used for reserves, as it is lawful money. If the uncovered gold reserve notes are authorized, the national banks could issue as against their present bond-covered notes about \$200,000,000. This is just about the amount of currency it is estimated must be shipped from the reserve centers to move the crops. Instead of thus wastefully employing this reserve money, deranging all business and contracting loans and deposits, would it not be infinitely better and more sensible to allow the banks to transform that amount of deposit credits into note credits, which are really the same thing, and thus meet the demand for crop-moving funds without altering the total volume of credits at all? It could be done with perfect safety to all, and every business interest, every line of trade, and every citizen of the country would be the gainer from it.

If authorized to issue the gold reserve notes, the banks could daily and hourly meet the demands from the depositors for currency for their cash transactions. The day there was no further use for a note it would return to some bank, wherever it was, and at once be sent for redemption. Within twenty-four hours it would be redeemed and within a few days the note credit would be changed back to a deposit credit. This transformation back and forth from notes to deposits, and deposits to notes, would go on automatically, and the business public, not the banks, would decide what portion of the bank credits of the country they needed in notes and what in deposits. The banks would not only be compelled to obey the demand, but be glad to do so, for it would make for the prosperity of their customers and business. The season of harvest would be then one of general satisfaction for the bounty of the yield, not of apprehension lest an abundance of wealth produced should bring with it a demand upon business facilities, the strain of which would be so great as to produce panic and ruin instead of security and prosperity.

This is not a question in which the banks alone are interested. Except so far as they are affected by the general welfare of their customers, the banks have rather less direct pecuniary interest in the matter than the people who need the money, or the business man whose calculations and enterprises are interfered with by financial disturbances. When money is scarce and interest rates rise to unusual figures, it is a matter of greater concern to the borrower than to the lender. There can be no argument as to the fact that our banking laws are very defective in the note facilities which they enable our banks to furnish the people, and the reform of these laws is one of the most urgent and important problems to which the attention and effort of Congress can be devoted. The same situation with its dangers presents itself every year, and the Comptroller would most respectfully but most emphatically urge that Congress give this problem most prompt and careful attention.

The fact that the demand for crop-moving funds creates a disturbance in the money market and raises rates for money adds just so much to the cost of carrying and handling the crops, and reduces the price at which farm products are sold by the producers. The farmer thus has a direct pecuniary interest in the proper solution of this question. Any man who is engaged in any other business and who finds his plans for raising money interfered with or his rates raised, pays the penalty for our imperfect system with no advantage to anyone, unless it is the banker, who charges him more on his For these reasons the question is of more importance by far loan. to the general public than it is to the bankers themselves. For their own purposes and profits the banks are entitled to no additional facilities or privileges. Unless it can be shown to be in the interest of all the people, no change in the currency should be made. A study of the question, however, will show that the interest of all kinds of business demands an improvement in our banking currency, and on that account, far more than on the account of the banks, it is so strongly urged.

WM. B. RIDGELY, Comptroller of the Currency.

The Speaker of the House of Representatives.

REPORT OF THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT, OFFICE OF THE REGISTER, Washington. D. C., August 31, 1906.

SIR: I have the honor to make the following report of the business transacted in this office during the fiscal year ended June 30, 1906:

The duties of the Register of the Treasury are thus defined: Signs and issues all bonds of the United States, the District of Columbia, the sundry loans of the Philippine Islands, the City of Manila, and the Spanish indemnity, and transmits to the Treasurer of the United States schedules showing the name of every individual, corporation, etc., holding registered bonds and entitled to receive interest thereon. He receives, examines, and registers coupon bonds exchanged for registered bonds or redeemed, and registered bonds transferred and finally redeemed. He receives, examines, arranges, and registers all redeemed United States notes, gold certificates, silver certificates, Treasury notes, fractional currency notes, detached interest coupons, interest checks on registered bonds, and all other United States securities redeemed and destroyed. Also all customs, internal-revenue, and postage stamps condemned for imperfections and destroyed. He is represented on the committee having in charge the destruction, by maceration, of certain of the United States securities, etc., mentioned He signs all the correspondence of the office. The work is herein. performed in two divisions, as follows:

DIVISION OF LOANS.

The division has charge primarily of the interest-bearing debt of the United States. To this has been added the care of loans authorized by Congress for the District of Columbia, the Government of the Philippine Islands, and the City of Manila. It also is intrusted with the care of the Spanish indemnity loan, an amount due from the Kingdom of Spain to certain American citizens.

The principal duties of this division are as follows: The receipt of new coupon and registered bonds after they have been prepared by the Bureau of Engraving and Printing, together with the custody of the same; the preparation of registered and coupon bonds for issue, including the inscription of the names of the owners on registered bonds, and signing the same; writing the letter which accompanies each package or lot; preparing the receipt to be signed by consignees, and delivering the bonds for transmittal. Full records are kept of all issues of bonds, of the transfer of registered bonds from one owner to another, and of canceled bonds which have been purchased, refunded, or have been redeemed at maturity. Accounts are opened with each holder of registered bonds.

Quarterly schedules are prepared for the payment of interest on all United States registered bonds, on the three Philippine issues, and on the Manila sewer and water bonds. The schedules on the 3.65 per cent bonds of the District of Columbia are prepared semiannually, and those on the Spanish indemnity certificates annually. These schedules show the amount of registered bonds of each loan standing in the name of every owner; the amount due at each date of payment, and the address to which the Treasurer of the United States is to forward checks for interest.

The assignments of all registered bonds presented for transfer to other parties or for redemption are carefully examined. The assignments of much the larger part of the values involved are made by attorneys, executors, administrators, guardians, and representatives of banks and other corporations, and it is necessary that the papers showing the authority of such agents shall be examined, indexed, and filed for instant reference. No inconsiderable labor is involved by the errors and omissions of owners who present bonds for transfer.

The following table shows the number and amount of new bonds received during the year:

Loan.	Class.	Number of im- pres- sions.	Amount.
Funded loan of 1907, 4 per cent. Loan of 1925, 4 per cent. Consols of 1930, 2 per cent. District of Columbia, fifty-year funded loan of 1924, 3.65 per cent. FOUR PER CENT BONDS, FUNDED LOAN OF 1907, AND 3 PER CENT BONDS, LOAN OF 1908-1918, REFUNDED AT 2 PER CENT.

On September 28, 1905 (Circular No. 100), the Secretary of the Treasury gave notice to the owners of coupon and registered bonds of the 4 per cent funded loan of 1907 and the 3 per cent loan of 1908–1918, that after October 2, 1905, bonds of these issues would be received for refunding into the 2 per cent consols of 1930. The amounts received and canceled under this circular were as follows:

Funded loan of 1907, 4 per cent	\$3, 198, 850 36, 643, 650
Loan of 1908–1918, 3 per cent	2, 167, 760 11, 022, 140
Total	53, 032, 400
In exchange for the foregoing, bonds of the 2 per cent 1930 were issued as follows:	consols of
Coupon	\$2, 126, 500 50, 905, 900
- Total	

LOANS OF THE PHILIPPINE ISLANDS.

At the date of the previous report of this office there had been issued three series of 4 per cent Philippine bonds under acts of Congress approved March 8, 1902, July 1, 1902, and March 2, 1903, and acts of the Philippine Commission approved by the President of the United States February 20, 1905, and January 25, 1906.

These issues were:

Philippine loan of 1914-1934, land purchase.	\$7,000,000
Philippine loan of 1915–1935, public improvements	2,500,000
City of Manila, sewer and water	1,000,000

By agreement between the Secretary of the Treasury and the Secretary of War it had been arranged that the issues and transfers of these bonds should be made in this office, the interest being paid by the Treasurer of the United States on schedules prepared by this office. REGISTER.

During the last year an additional issue of \$1,000,000 in bonds of the Philippine government was made, the proceeds to be used for public improvements, which bonds are redeemable at the pleasure of the Philippine government after February 1, 1916, and payable February 1, 1936.

It has been necessary to issue each of the four series of Philippine bonds before it was possible to prepare engraved bonds. Blank forms for temporary use were printed on an ordinary printing press and used until permanent engraved bonds could be prepared. During the year the public-improvement issues of 1915–1935 and of 1916–1936, as well as the Manila issue of 1915–1935, have all been reissued in engraved bonds, with the exception of \$27,000 of the first issue of public-improvement bonds. The land-purchase bonds had been previously reissued.

DESTRUCTION OF SURPLUS BONDS.

As the period expires for which bonds of the various loans have been issued, there is necessarily left on hand a surplus of unissued bonds. It is impossible to foresee how many will be required of each denomination, and, besides, the printing of engraved bonds is a process requiring considerable time to secure perfect work.

Prior to this year the last destruction of surplus bonds was under instructions of the Secretary of the Treasury dated June 18, 1901.

On May 12, 1906, the following-described surplus bonds were, on order of the Assistant Secretary of the Treasury, delivered to the destruction committee of the Treasury Department:

Loan.	Class.	Number of bonds.	Amount.
Loan of 1908-1918, 3 per cent. Loan of 1904, 5 per cent. Philippine loan of 1914-1934, land purchase, 4 per cent, tempo-	Registered		\$16,510,000 2,763,200 12,659,000
rary. Philippine loan of 1915-1935, public improvements, 4 per cent, interim.	do	919	1,540,000
Philippine loan of 1916-1936, public improvements, second series, 4 per cent, interim.	do	1,063	1,990,000
City of Manila, sewer and water, 4 per cent, interim	do	1,627	5,497,000
		39,517	40,959,200

SURPLUS BONDS DELIVERED FOR DESTRUCTION.

Of the above number one bond of each denomination, 15 bonds in all, amounting to \$46,770, was (after cancellation) returned for preservation in the specimen book of this office, and the remainder was destroyed. A very full record of the transaction was made on the book devoted to this purpose.

During the last fiscal year schedules have been prepared in the office and delivered to the Treasurer of the United States for the payment of interest on registered bonds as shown in the following table:

REPORT ON THE FINANCES.

SPANISH INDEMNITY CERTIFICATES.

These certificates represent debts due from the Kingdom of Spain to American citizens amounting to \$599,850.16, being the amount awarded said citizens under the treaty of February 17, 1834. No payment has been made on the principal, but about once a year the sum of \$28,500 is received from Spain and divided among the present holders of the certificates. The United States assumes no responsibility except to see that the money reaches those to whom it may be due.

The sixty-fifth installment was paid August 24, 1905. There are at present 108 holders of these certificates.

The following table shows the transfer of Spanish indemnity certificates from one owner to another during the last ten years:

FILES.

The whole filing system of this division was overhauled, rearranged, relabeled, and cataloged during the past year, thereby gaining considerable filing space and affording great relief from the heretofore overcrowded and congested condition of the files, making the 125,833,108 valuable redeemed public-debt vouchers on file at the close of the year readily accessible. Being so conveniently located in numerical order and placed in numbered case sections under proper classifications, any individual voucher can be furnished on the shortest notice. This work has involved much time and tedious labor, but the test of experience will fully demonstrate the fact, that the work done in this line will give the division a model files system which will meet all demands of the public service in the future.

RECOMMENDATIONS.

I respectfully recommend that the salaries of the two chiefs of division of this office be increased from \$2,000 to \$2,250 per annum, and thus make their salaries more nearly on a par with the salaries of chiefs of division doing work in other bureaus of the Department involving no greater responsibility nor more exacting duties than the chiefs of division of this office.

The custodian of the vault in the division of loans in this office receives for his regular work \$1,800 per annum; in addition he has control of the Government securities amounting to many millions of dollars. I would respectfully recommend that his salary be increased \$100, which would make it more nearly conform to that of other vault keepers in the Department.

I believe it to be but fair and just that the principal bookkeeper be given a like increase. He would even then be receiving less than is now paid bookkeepers in other branches of the service.

I also respectfully recommend that the office be given two additional clerks of class 4, in place of a like number of class 3. Such recommendation provides a just remuneration for deserving and efficient employees in the office. At the same time its adoption would enable the restoration to that grade of clerks who were reduced under

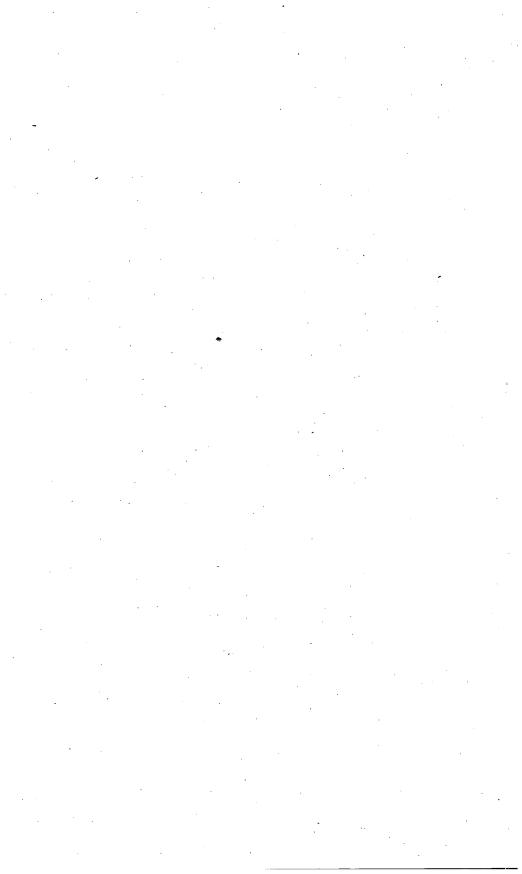

what is known as "the Dockery Act," and who are now doing the identical work performed by them at the time of their reduction.

I also respectfully recommend that the nine counters who are now paid \$720 per annum be made expert money counters of Class D, with salaries of \$900. This will place them on an equality in compensation with other employees doing similar work, and will be a slight promotion to a deserving and faithful force of counters.

Respectfully submitted.

W. T. VERNON, Register.

The Secretary of the Treasury.

REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,

OFFICE OF COMMISSIONER OF INTERNAL REVENUE, Washington, D. C., November 12, 1906.

SIR: I have the honor to make report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1906, accompanied with a statement, as required by law, of the receipts from the several sources of internal revenue for the months of July, August, and September of the current fiscal year.

RECEIPTS.

The receipts of this Bureau for the past fiscal year were \$249,102,-738, being an excess of \$14,914,761.63 over the collections for the preceding year.

The receipts for the first three months of the current year show an increase in collections of \$4,661,131.34, as compared with the same months of the past fiscal year.

In making the estimate of the receipts from all sources of internal revenue for the fiscal year ending June 30, 1907, and in view of this steady increase, it would be safe to say that the total receipts would be \$260,000,000 were it not for the fact that the Congress on June 7, 1906, enacted a law entitled "An act for the withdrawal from bond, tax free, of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials." This law becomes effective January 1, 1907, and therefore the Bureau will operate under its provisions for six months of this fiscal year. There will be doubtless some reduction of revenues by reason of the provisions of this legislation; yet, notwithstanding this fact, the business conditions of the country are such, and its movements of a magnitude, as to lead me to believe the total revenues will aggregate \$260,000,000.

The objects of internal-revenue taxation producing the largest amount of revenue are distilled spirits, fermented liquors, and tobacco.

During the past fiscal year there was collected from the tax on distilled spirits, \$136,965,911.49; on fermented liquors, \$54,651,636.63; on tobacco, \$48,422,997.38.

RECEIPTS IN LARGE TAX-PAYING STATES AND DISTRICTS.

The leading States in the payment of internal-revenue taxes for the past year are Illinois, \$52,471,405.87; New York, \$29,758,630.59; Indiana, \$25,342,602.15; Kentucky, \$24,469,083.68; Pennsylvania, \$21,049,515.30; Ohio, \$20,572,711.19. Among the States paying the smallest amounts are Idaho, Maine, Mississippi, Nevada, North Dakota, Vermont, and Wyoming.

Of the 66 collection districts in the territory of the United States subject to internal-revenue laws the Fifth district of Illinois reported the largest collections, \$33,587,653.93.

In 1905 the total production of distilled spirits was 153,259,379 gallons; in 1906, 150,110,197. In 1905, in round numbers, 117,700,000 gallons of tax-paid spirits were withdrawn; in 1906, 124,500,000. There has been an increase in the amount of tobacco and snuff manufactured and in the production of beer.

The four States having the largest production of distilled spirits during the past fiscal year are Illinois, 42,754,966 gallons; Kentucky, 29,645,335 gallons; Indiana, 21,874,221 gallons; Ohio, 11,780,386 gallons. The two collection districts having the largest output of distilled spirits are Fifth district of Illinois, 32,774,790 gallons, and the Fifth district of Kentucky, 14,174,770 gallons.

The four States which made the largest quantity of fermented liquor are New York, 12,346,947 barrels; Pennsylvania, 6,961,277 barrels; Illinois, 5,196,920 barrels, and Wisconsin, 4,569,523 barrels. The two districts which produced the largest quantity of fermented liquor are the Third district of New York, 4,847,244 barrels, and the First district of Illinois, 4,354,144 barrels.

The four States producing the greatest number of cigars weighing more than 3 pounds per thousand, and the production of each during the year, are as follows: Pennsylivania, 1,839,820,669; New York, 1,361,086,110; Ohio, 649,463,743, and New Jersey, 442,728,520.

The two districts showing the largest production of cigars are the Ninth Pennsylvania, 763,702,018, and Third New York, 698,153,671.

The States showing the greatest production of little cigars (weighing less than 3 pounds per thousand) are: Virginia, 374,574,100; Maryland, 303,960,281, and New York, 110,774,585.

The greatest production by districts is as follows: Maryland, 303,960,281; Second district Virginia, 207,227,880; Sixth district Virginia, 167,346,220, and Second district New York, 63,970,790.

The States of New York, Virginia, Louisiana, North Carolina, and California, in the order named, show the greatest production of cigarettes weighing less than 3 pounds per thousand. New York produced 2,206,606,527; Virginia, 832,982,590; Louisiana, 328,894,720; North Carolina, 123,170,000, and California, 79,035,040.

The two districts showing the greatest production of little cigarettes are the Second New York, which produced 1,397,152,325, and the Second Virginia, which produced 805,931,090.

New York State produced the greatest number of large cigarettes, showing a production of 6,433,793, of which number 4,052,283 were manufactured in the Third District, and 2,365,160 in the Second District.

The States of North Carolina, Missouri, Kentucky, Ohio, and Virginia, in the order named, were the largest producers of both chewing and smoking tobacco, the quantity produced being as follows: North Carolina, 67,638,840 pounds; Missouri, 65,306,072 pounds; Kentucky, 47,639,909 pounds; Ohio, 28,311,659 pounds, and Virginia, 26,720,169 pounds.

The First, Missouri district produced the largest quantity, the

returns showing the manufacture of 65,001,521 pounds during the year, the next largest being the Fifth Kentucky, which produced 42,857,308 pounds.

COST OF COLLECTING THE INTERNAL REVENUES AND RECOMMEN-DATIONS CONCERNING SAME.

The cost of collecting the internal revenues for the past fiscal year was 1.90 per cent, which is a reduction of cost as compared with the last fiscal year, when the percentage was 2.01.

The average cost since the creation of the Bureau is 2.76 per cent.

FIRST.

Last year I called attention to the amount of work done by the Bureau without any corresponding increase of revenue therefrom. This type of work was termed "free work."

Especial attention was directed to the large cost to the Government of gauging spirits at rectifying houses, and the furnishing stamps by the Government for rectified spirits and wholesale liquor dealers' packages.

The gauging is done at governmental expense, and the stamps are furnished free of cost to rectifiers and wholesale liquor dealers.

The annual expenditures on these two accounts amount, at the least, to \$500,000.

This office recommended last year the enactment of legislation under which a charge of 20 cents per stamp be made for each stamp issued to rectifiers or wholesale liquor dealers for use upon packages prepared and sent out by them.

It is believed that if this recommendation be enacted into law, a revenue of some \$750,000 would be derived thereunder, and in this way the total cost to the Government of this work would be met, with a small surplus resulting.

I again call attention to this subject and repeat the recommendation of last year.

SECOND.

Attention was also called in the report of the preceding year to the fortification of sweet wines thru the use of grape brandy withdrawn free of tax.

Without considering the loss of revenue, following the remission . of internal-revenue tax upon this brandy, it was clearly shown that the actual cost to the Government of doing the work made necessary under existing legislation was \$50,000 or \$60,000 a year.

I recommended that a charge of 25 cents per gallon be imposed upon all brandy withdrawn for fortification purposes.

At the last session of the Congress, legislation was enacted under a bill approved June 7, 1906, whereby a charge of 3 cents a gallon was laid upon each taxable gallon of brandy used in the fortification of wines. This legislation will produce about \$100,000 per annum, which will cover the expenses incurred by the Government in this work, which will be larger hereafter than heretofore, by reason of the employment of more subordinate officials stationed at wineries engaged in fortification.

NEW LEGISLATION.

The most important legislation of the last session of the Congress, with regard to internal-revenue laws, was the enactment of what is commonly called the "free alcohol bill." This act was approved June 7, 1906, and provides for the withdrawal from bond, tax free, of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials.

The law provides:

That from and after January first, nineteen hundred and seven, domestic alcohol of such degree of proof as may be prescribed by the Commissioner of Internal Revenue, and approved by the Secretary of the Treasury, may be withdrawn from bond without the payment of internal-revenue tax, for use in the arts and industries, and for fuel, light, and power, provided said alcohol shall have been mixed in the presence and under the direction of an authorized Government officer, after withdrawal from the distillery warehouse, with methyl alcohol or other denaturing material or materials, or admixture of the same, suitable to the use for which the alcohol is withdrawn, but which destroys its character as a beverage and renders it unfit for liquid medicinal purposes.

This work is to be done under proper regulations prepared by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury.

After broad and continued study of the conditions existing in this country, and also of the laws and regulations of foreign countries in connection with the use of denatured alcohol, the regulations were prepared, approved, and published on the 29th day of September, 1906.

Thru the enactment of this legislation cheap alcohol can be and will be furnished for purely domestic uses, and also for what might be termed industrial domestic purposes—heat, light, and power and also to manufacturers who use alcohol in the operation of their plants and the production of their output.

The alcohol will be withdrawn at a proof or strength of not less than 180°. The present tax on same is \$1.98 per wine gallon. This charge being entirely removed, it is hoped that after proper denaturing materials have been added to alcohol the same will be sold to the consumer at a price ranging from 35 to 40 cents per gallon. This marked decrease in price will insure its broad use, and it will supplant largely wood alcohol, now so commonly utilized by manufacturers and others.

It is confidently believed that great benefit will be derived by the people at large from this legislation, and few public measures have ever received in the Congress such hearty and unanimous support.

The alcohol will be produced at distilleries under governmental supervision, as heretofore, but it is thought most probable that, instead of this production being, as now, confined to large distilleries, within the course of a brief period small cooperative distilleries will be constructed thruout the country, operated under governmental supervision, but eventually producing alcohol at a cheaper price and, perhaps, from cheaper substances than is the rule at present. In preparing the regulations of the Department it was essential to adopt rules that would prohibit, as far as possible, perpetration of fraud against the revenues of the Government by the reclamation and repurification of untaxpaid denatured alcohol.

The work may be done by the unscrupulous and dishonest thru redistillation and other processes, removing the denatured ingredients and restoring the alcohol to its original condition, fit for beverage and potable purposes.

It will be difficult of accomplishment, yet it is necessary to use articles for denaturing that are the hardest to separate from pure alcohol by chemical or other processes.

The effort has been to secure ingredients possessing this quality, and also to use them in such quantity and of such character as will not increase the price beyond what is proper, and allow the denatured product to pass into the hands of the consumer at as low a figure as can be secured.

There will be two classes of denatured alcohol, first, that styled "completely denatured," which it is believed will pass into general use for general consumption and which can be purchased at retail or wholesale houses virtually without limiting regulations as against the private consumer, and, second, "specially denatured," in which materials demanded by the needs of manufacturing interests will be regarded and with such limitations on the use of this class of the product as will confine it to the special manufacturing purposes for which it is prepared. This specially denatured alcohol will be under strict surveillance and governmental supervision. These special denaturing agents will be approved by the Department when it is made perfectly apparent that the industrial interests involved can not use the completely denatured product by reason of the presence therein of wood, or methyl, alcohol and benzine, which have been determined upon as the denaturing ingredients for the completely denatured article. In such case some other denaturing agents which will accomplish the purposes of destroying, as far as possible, the beverage qualities of the alcohol, and at the same time adapt the denatured article to the special needs desired, will be determined on.

Manufacturers will furnish a statement of the denaturing ingredients necessary for their uses. These formulæ will be past upon by the Department, and, if possessing proper denaturing qualities, will be approved.

Every effort has been made in the direction of liberality in formulating regulations controlling the production and use of this new product, while due and necessary provision has been made to protect against frauds on the revenue.

The benefits of cheap alcohol to the people and industries of Great Britain, Germany, France, and other countries are apparent to the most casual observer, and these benefits become clearer, more interesting, and decisive as a closer study of the subject is made.

Foreign officials are following with broad interest the new conditions that will arise in this country by virtue of the passage of this law, and are considering its effects upon their own home industries.

An official of Canada was here a few days ago, and indicated in the course of conversation that the enactment of this legislation would require changes to be made in the present Canadian system controlling the preparation and use of denatured alcohol.

BUREAU EMPLOYEES.

It is a matter of pleasure, and I think a duty, to give expression to my appreciation of the fidelity and industry of the great majority of the employees of this Bureau, whether employed in this office or on duty in the 66 collection districts of the country.

RECEIPTS FOR FIRST THREE MONTHS, CURRENT FISCAL YEAR.

The following table shows the receipts from the several objects of taxation for the first three months of the fiscal years ending June 30, 1906 and 1907. A comparison of the receipts for the two periods is also given:

For expense of detecting and punishing violations of internal-revenue	
laws	95,007.24
For salaries of officers, clerks, and employees in the Office of the Com- missioner of Internal Revenue.	317, 989. 41
Total amount expended	4, 727, 170. 11

H. Doc. 9, 59–2––29

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1908, as follows:

Office of Commissioner of Internal Revenue: For salaries of officers, clerks, and subordinate officers.	\$324, 460. 00
Salaries and expenses of collectors of internal revenue: For salaries and	4021 , 100, 00
expenses of collectors of internal revenue, and deputy collectors and surveyors, and clerks in internal-revenue offices	2 075 000 00
Salaries and expenses of agents and subordinate officers of internal rev-	2,010,000.00
enue: For salaries and expenses of 40 revenue agents provided for by	
law, and fees and expenses of gaugers, salaries and expenses of store- keepers and storekeeper-gaugers	2, 310, 000, 00
Miscellaneous expenses, Internal-Revenue Service: For rent of offices	2,010,000.00
outside of the District of Columbia, telephone service, and other mis-	0F 000 00
cellaneous expenses incident to the collection of internal revenue Denatured alcohol, act of June 7, 1906	85, 000. 00 250, 000. 00
Paper for internal-revenue stamps: For paper for internal-revenue	ŕ
stamps, including freight. Punishment for violation of internal-revenue laws: For detecting and	70, 000. 00
bringing to trial and punishment persons guilty of violating the inter-	
nal-revenue laws, or conniving at the same, including payments for	
information and detection of such violations	100, 000. 00
- Total	5, 214, 460.00
Salaries, Office of Commissioner of Internal Revenue (reimbursable):	
For salaries of two stamp agents and one counter	3,400.00

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1908, the sum of \$324,460 as salaries for the following officers, clerks, and employees in this Bureau:

-	
1 Commissioner of Internal Revenue	. \$6,000.00
1 Deputy Commissioner.	4,000.00
1 Deputy Commissioner.	
1 chemist	1
2 heads of divisions (at \$2,500 each).	
6 heads of divisions (at \$2,250 each)	
1 superintendent of stamp vault	2,000.00
1 private secretary	1,800.00
28 clerks of class 4	. 50, 400.00
25 clerks of class 3	. 40,000.00
36 clerks of class 2	
37 clerks of class 1	. 44, 400.00
30 clerks (at \$1,000 each)	
47 clerks (at \$900 each)	42, 300, 00
2 messengers (at \$840 each)	
19 messengers (at \$720 each)	
20 laborers (at \$660 each)	. 13, 200. 00
	·
01 0	004 400 00

258

324, 460.00

I also recommend the appropriation of the sum of \$3,400 as salaries for two stamp agents, one at \$1,600, one at \$900, and one counter at \$900, the same to be reimbursed by the stamp manufacturer, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualifications that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of	Salary.
\$25,000 or less	$\begin{array}{c} 2,125\\ 2,250\\ 2,375\\ 2,500\\ 2,625\\ 2,750\\ 2,875\\ 3,000\\ 3,125\end{array}$	\$375,001 to \$425,000. 425,001 to 475,000. 475,001 to 550,000. 550,001 to 625,000. 625,001 to 700,000. 700,001 to 775,000. 850,001 to 850,000. 850,001 to 825,000. 925,001 to 1,000,000. 1,000,001 and upward.	3,500 3,625 3,750 3,875 4,000 4,125 4,250 4,375

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed \$4,500. (See secs. 3148 and 3314, Rev. Stats.)

OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1906, in the various districts thruout the United States, as reorganized under the Executive order of May 21, 1887, was-66 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.
	\$4,500 4,375 4,250 4,125 4,000 3,875 3,750	1 2 1 4 1	\$3, 62 3, 500 3, 37 3, 12 3, 000 2, 875

There were also employed 1,104 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
32. 3. 37. 25. 1. 39. 5. 132. 47. 32. 33. 34. 35. 37. 37. 38. 39. 39. 39. 39. 39. 30. 47. 47. 47. 47. 47. 47. 47. 47	. 1,900 . 1,800 . 1,700 . 1,600 . 1,550 . 1,500 . 1,450 . 1,400	248	\$1, 200 1, 150 1, 100 1, 000 950 900 850 800 750 720	9	\$700 600 500 480 400 360 360 300 200 100 60

There were also employed in the offices of the different collectors 134 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
2 4 8 38 	\$1,600 1,500 1,400 1,300 1,200	4 11	\$1,150 1,100 1,000 900	13 2 1 2	\$800 750 700 600

Also 11 messengers and 2 janitors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1	\$800	3	\$480	1	\$400
5	600	1	450	2	300

At the close of the fiscal year ended June 30, 1906, 259 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was \$317,989.41.

STOREKEEPERS, GAUGERS, ETC.

There were also employed 225 gaugers, who received fees not to exceed \$5 per day; 104 storekeepers, whose pay did not exceed \$4 per day; 1,793 storekeeper-gaugers, whose pay ranged from \$2 to \$5 per day; and 5 distillery surveyors. All the employees above enumerated were paid only when actually employed.
