## OFFICE OF INTERNATIONAL FINANCE

George H. Willis.....	Acting Director, Office of International Finance, and Chief, European Division.
Vacant.....	Deputy Director.
Charles Dillon Glendinning.....	Acting Secretary, National Advisory Council, and Chief, British Commonwealth and Middle East Division.
Morris J. Fields.....	Chief, Commercial Policy and United Nations Division.
Arthur W. Stuart.....	Chief, Far Eastern Division.
Robert J. Schwartz.....	Acting Chief, International Statistics Division.
John S. deBeers.....	Chief, Latin American Division.
George A. Eddy.....	Chief, Stabilization Fund, Gold and Silver Division.
Chester L. Callander.....	Executive Assistant to the Director.
Mary C. Hall.....	Administrative Assistant to the Director.

DIVISION OF TAX RESEARCH

Vacant.....	Director of Tax Research.
L. L. Ecker-Racz.....	Assistant Director.
F. Newell Campbell.....	Assistant Director.
Richard E. Slitor.....	Assistant Director.
Robert B. Bangs.....	(Acting) Assistant Director.

U. S. SAVINGS BONDS DIVISION

Vernon L. Clark.....	National Director, U. S. Savings Bonds Division.
Leon J. Markham.....	Director of Sales.
Bill McDonald.....	Executive Officer.

BUREAU OF ACCOUNTS (IN THE FISCAL SERVICE)

Robert W. Maxwell.....	Commissioner of Accounts.
Gilbert L. Cake.....	Associate Commissioner.
Paul D. Banning.....	Chief Disbursing Officer, Division of Disbursement.
Harold R. Gearhart.....	Deputy Commissioner.
Joseph Greenberg.....	Assistant Commissioner.
Edmund C. Nussear.....	Executive Assistant.
Wallace E. Barker, Jr.....	Administrative Assistant.
George E. Jones.....	Chief Accountant.
Harry L. Stoudt.....	Chief Auditor.
Harold A. Ball.....	Technical Planning and Advisory Staff.

BUREAU OF THE PUBLIC DEBT (IN THE FISCAL SERVICE)

Edwin L. Kilby.....	Commissioner of the Public Debt.
Donald M. Merritt.....	Associate Commissioner.
Ross A. Heffelfinger, Jr.....	Deputy Commissioner, Washington.
Charles D. Peyton.....	Deputy Commissioner, Chicago.

OFFICE OF THE TREASURER OF THE UNITED STATES (IN THE FISCAL SERVICE)

William A. Julian.....	Treasurer of the United States.
Marion G. Banister.....	Assistant Treasurer.
Michael E. Slindee.....	Deputy and Acting Treasurer.
Frederick L. Church.....	Assistant Deputy Treasurer.
Grover C. Emerson.....	Special Assistant to the Treasurer.

BUREAU OF ENGRAVING AND PRINTING

Alvin W. Hall.....	Director, Bureau of Engraving and Printing.
Clark R. Long.....	Associate Director.
Thomas F. Slattery.....	Assistant Director (Production).

OFFICE OF THE COMPTROLLER OF THE CURRENCY

Preston Delano.....	Comptroller of the Currency.
C. B. Upham.....	Deputy Comptroller.
R. B. McCandless.....	Deputy Comptroller.
J. L. Robertson.....	Deputy Comptroller.
W. P. Folger.....	Chief National Bank Examiner.

BUREAU OF NARCOTICS

Harry J. Anslinger.....	Commissioner of Narcotics.
Will S. Wood.....	Deputy Commissioner.
Malachi L. Harney.....	Assistant to the Commissioner.

BUREAU OF INTERNAL REVENUE

George J. Schoeneman.....	Commissioner of Internal Revenue.
Fred S. Martin.....	Assistant Commissioner.
Daniel A. Bolich.....	Assistant Commissioner.
T. C. Atkeson.....	Assistant to the Commissioner.
Eldon P. King.....	Special Deputy Commissioner.
E. I. McLarney.....	Deputy Commissioner, Income Tax Unit.
Clifford W. Stowe.....	Assistant Deputy Commissioner, Income Tax Unit.
A. H. Cross.....	Deputy Commissioner, Accounts and Collections Unit.
Victor H. Self.....	Deputy Commissioner, Employment Tax Unit.
D. Spencer Bliss.....	Deputy Commissioner, Miscellaneous Tax Unit.
Carroll E. Mealey.....	Deputy Commissioner, Alcohol Tax Unit.
Aubrey R. Marrs.....	Head, Technical Staff.
William H. Woolf.....	Chief, Intelligence Unit.
Henry J. Merry.....	Chairman, Excess Profits Tax Council.

## BUREAU OF CUSTOMS

Frank Dow.....	Acting Commissioner of Customs.
William R. Johnson.....	Deputy Commissioner, Tariff and Marine Administration.
A. Sidney Johnson.....	Deputy Commissioner, Fiscal Administration.
Edson J. Shamhart.....	Deputy Commissioner, Investigations.
Glenn H. Griffith.....	Assistant Deputy Commissioner.
William E. H. Higman.....	Assistant Deputy Commissioner.
Henry E. Sweet.....	Assistant Deputy Commissioner.
Charles Stevenson.....	Supervisor of Appraisers.
John F. Williams.....	Chief of Division of Laboratories.

## BUREAU OF THE MINT

Nellie Tayloe Ross.....	Director of the Mint.
Leland Howard.....	Assistant Director.

## BUREAU OF FEDERAL SUPPLY

Clifton E. Mack.....	Director, Bureau of Federal Supply.
J. D. Tompkins.....	Assistant Director.
A. J. Walsh.....	Assistant Director.
H. M. Kurth.....	Assistant Director.
W. M. B. Freeman.....	Deputy Director, Purchase Branch.
S. A. Snyder.....	Deputy Director, Stores Branch.
Willis S. MacLeod.....	Deputy Director, Standards Branch.
J. L. Chambers.....	Deputy Director, Fiscal Branch.
Paul King.....	Deputy Director, Administration.
J. W. Flatley.....	Chief, Governmental Requirements.
H. F. Riley.....	Chief, Investigating and Examining Division.
C. W. Eichelberger.....	Chief, Renegotiation Rebate Division.

## UNITED STATES COAST GUARD

Admiral Joseph F. Farley.....	Commandant, U. S. Coast Guard.
Rear Admiral Merlin O'Neill.....	Assistant Commandant.
Rear Admiral Ellis Reed-Hill.....	Engineer-in-Chief.

## UNITED STATES SECRET SERVICE

James J. Maloney.....	Chief, U. S. Secret Service.
John J. McGrath.....	Assistant Chief.
Harry E. Neal.....	Executive Aide to the Chief.

## CONTRACT SETTLEMENT

Stephen J. Spingarn.....	Deputy Director.
Lawrence E. Hartwig.....	Chairman, Appeal Board.

## STANDING DEPARTMENTAL COMMITTEES

## COMMITTEE ON EMPLOYEE AWARDS

# DEPARTMENT OF THE TREASURY

November 15, 1948

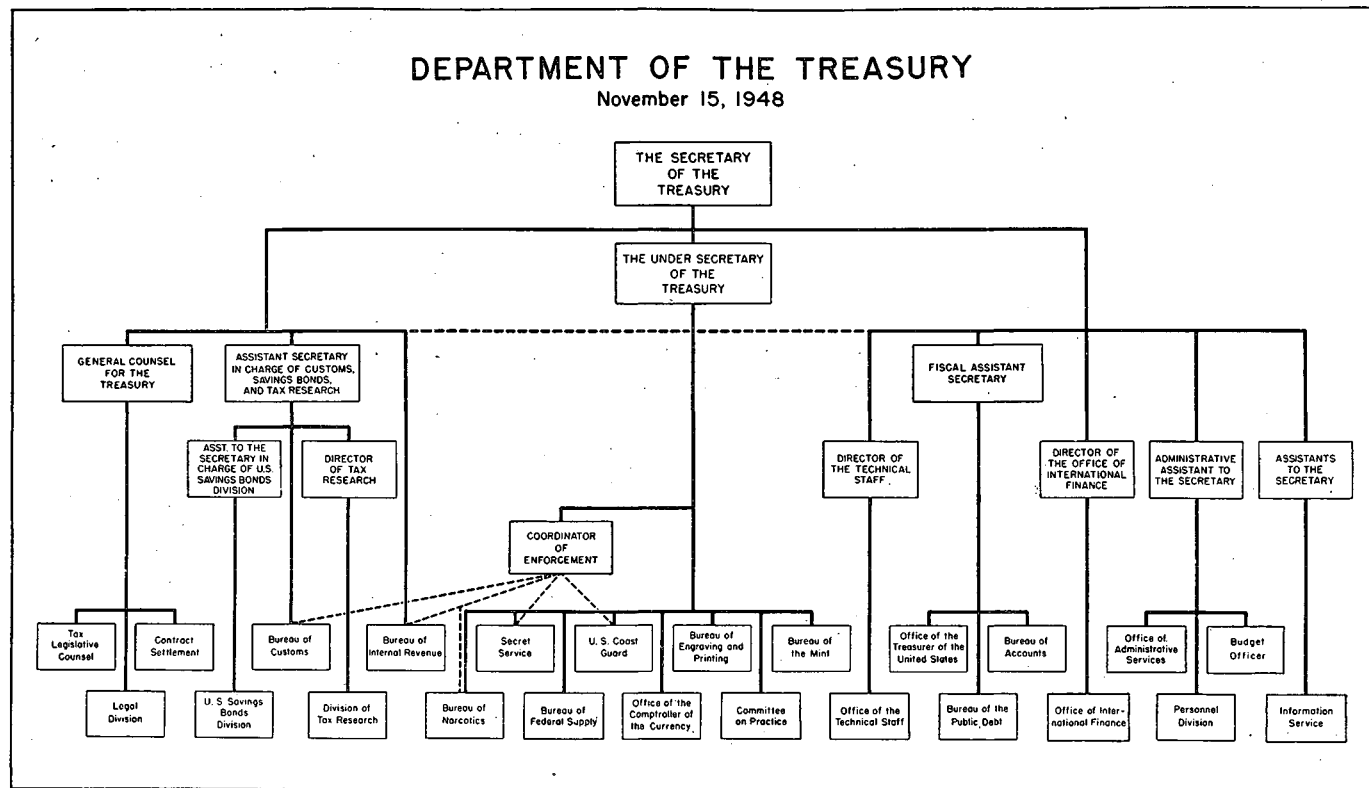

CHART 1.

# ANNUAL REPORT ON THE FINANCES

TREASURY DEPARTMENT,  
*Washington, D. C., January 13, 1949.*

SIR: I have the honor to make the following report on the finances of the Federal Government for the fiscal year ended June 30, 1948.

The fiscal year 1948 was the most prosperous in the history of the Nation. Industry, commerce, and agriculture all set new records of peacetime output. Business and personal incomes reached unprecedented levels, and living standards during the year were unequalled in our history or in the history of any other country. The record output and the record employment which accompanied it were the result of an active demand for nearly all of the products that could be turned out by our farms, factories, mines, and service industries operating at capacity rates.

The demand for most consumers' goods and for many essential materials continued to outrun available supplies, with the result that prices in nearly all lines continued to move upward. As the President pointed out in his message to the 80th Congress on July 27, 1948, "even with full employment, full use of available materials, and practically full use of plant capacity—all of which we have today—prices are still climbing much faster than production. It is obvious that we cannot rely solely on more production to curb high prices. Instead, we must attack inflation directly."

The Treasury's part in the direct attack on inflation involved the full use of the measures available for reducing the money supply. The most important of these measures was a reduction in the public debt through the use of funds available to the Government as a result of an excess of budget receipts over expenditures. This excess, or budget surplus, amounted to \$8.4 billion during the fiscal year 1948, of which \$6.0 billion was used during the year to reduce the Federal debt. While the fiscal year 1948 was the second year since the war in which the Government closed its operations with a surplus, it was the first postwar year in which a substantial reduction in the Federal debt was accomplished entirely by means of the budget surplus. In April 1948, however, the Congress reduced taxes. This eliminated prospects for a surplus in the fiscal year 1949, and thus put an end to the current debt reduction program of the Treasury.

The anti-inflationary effects of the debt reduction operations were supplemented by a general program designed to make credit less attractive to borrowers in order to reduce incentives to further expansion in the money supply. As a part of this program there was a gradual upward revision in the wartime structure of interest rates on short-term Federal securities, commencing in July 1947.

### PUBLIC DEBT

During the fiscal year 1948, the debt of the Federal Government was reduced by \$6.0 billion, from \$258.4 billion on June 30, 1947, to \$252.4 billion on June 30, 1948. At the same time there was a decrease of \$5.9 billion in the debt held by the commercial banking system, a reduction which has particular significance, of course, in an inflationary period. These reductions were part of a debt reduction program started on March 1, 1946, which reduced the total public debt by \$27.4 billion and the bank-held debt by \$30.7 billion in the 28 months ended June 30, 1948.

The \$30.7 billion reduction which the Treasury brought about in the Federal security holdings of commercial and Federal Reserve Banks, while at the same time maintaining stable conditions in the Government bond market, was made possible by three developments: First, the availability of surplus funds for debt repayment; second, the transfer of \$3.3 billion of Federal securities from bank to nonbank ownership during the course of the debt reduction program; and, third, the flexibility of action which the Treasury experienced in consequence of its previous policy of limiting commercial bank purchases of Federal securities largely to short-term issues.

The funds available to the Treasury for debt reduction came from two sources. From March 1, 1946, to the close of that calendar year, the debt was reduced \$20.3 billion through the application of funds in the cash balance, which stood at \$26.0 billion at the end of February 1946. With the end of the war, rapidly reduced expenditures and continued high revenues made it possible and desirable for the Government to get along with a much smaller working balance in the Treasury. By the end of December 1946, the wartime portion of the cash balance had been used; the subsequent debt reduction of \$7.1 billion, therefore, had to come from a budget surplus.

The net transfer of \$3.3 billion of Federal securities from bank to nonbank ownership between the end of February 1946 and the end of June 1948, reflected many shifts in ownership which took place during the period. It is worth particular attention that one of these shifts was an increase of \$4.6 billion in the total of savings bonds outstanding. This increase was the result, in part, of the Treasury's policy

of vigorously promoting the sale of savings bonds during the postwar period, which directly combatted inflationary pressures and also acted indirectly against inflation by providing funds for reducing bank-held debt.

During the course of the debt management operations since February 1946, the Treasury and the Federal Reserve System have cooperated in open-market activities in order to maintain stability in the Government bond market. The necessity for a watchful attitude on this account is a legacy of the war situation, when, in a few short years, the public debt increased more than fivefold. The result of this development is that the money and capital markets have come to be dominated by the public debt, and the responsibilities of the Federal Government in the financial markets have increased proportionately.

Stability in the Government bond market during the postwar period has made a significant contribution to the achievement of our present unprecedented prosperity. This stability will continue to be of the utmost importance in maintaining prosperity. But it also has more widespread implications because of the political and economic unsettlement in the world today. The rehabilitation, reconstruction, and recovery of most of the friendly nations of the world is founded upon, and is being built upon, the financial and economic strength of this country. Confidence in the credit of the United States Government—which is reflected in the condition of the market for our Government securities—has become the keystone upon which rests the economic structure of the world.

#### FOREIGN FINANCIAL POLICY

The United States program of financial assistance to and cooperation with foreign countries was advanced considerably in the course of the fiscal year. In addition to the loans and credits extended by Government agencies under earlier legislation, special interim aid of \$595 million was provided for China, Austria, France, and Italy. Under the Foreign Assistance Act of 1948, administered by the Economic Cooperation Administration, in consultation with other agencies of the Government, and a subsequent appropriation act, funds aggregating over \$7 billion were provided by the Congress for grants, loans, and guaranties to European countries and China, for programs of civilian aid under the military establishment and for other relief programs for Greece, for international refugees, and the International Children's Emergency Fund of the United Nations. The European Recovery Program involves close cooperation by the participating countries with each other and with the United States looking toward

the common objective. Significant progress has been made during the first months of this program.

These extraordinary steps have been essential to deal with the post-war situation; but governmental aid on this scale is expected to be of limited duration. The long-run international financial program of the United States looks toward the development of private investment in foreign countries, and the establishment of monetary and exchange stability so as to make possible the expansion of multilateral world trade, which is important for the economic interests of the United States as well as the economic and political stability of the world as a whole. The International Monetary Fund and the International Bank for Reconstruction and Development were in part established to promote the adoption by their member governments of policies looking toward these ultimate objectives. In the course of the year considerable progress has been made by these institutions in establishing and developing their policies. The Fund has worked toward the adoption of desirable modifications in foreign exchange policies of its members, while the Bank, in addition to its reconstruction loans, has begun making loans for developmental purposes.

The National Advisory Council on International Monetary and Financial Problems has been enlarged by the addition of the Administrator for Economic Cooperation to its membership. As required by statute, it has coordinated the foreign financial operations of Federal agencies and has advised and consulted with the United States representatives on the international financial organizations to bring about a consistent program. It has made recommendations to the President and to the Congress on the financial aspects of United States policies in the international field.

#### TREASURY OPERATIONS

There follows a detailed discussion of receipts and expenditures, public debt operations, taxation and monetary developments, and other Treasury operations during the fiscal year.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

To the SPEAKER OF THE HOUSE OF REPRESENTATIVES.

---

---

## REPORT ON OPERATIONS

---

---

## SUMMARY OF FISCAL OPERATIONS

Federal Government budget receipts in the fiscal year 1948 exceeded expenditures by \$8.4 billion, as compared with a budget surplus during the preceding year of \$0.8 billion.

Net budget receipts of \$44.7 billion were higher than in any other year except 1945 and exceeded receipts in the fiscal year 1947 by \$1.5 billion. Budget expenditures amounted to \$36.3 billion in the fiscal year 1948, or less than in any year since 1942. Expenditures in the fiscal year 1948 were \$6.2 billion less than the 1947 total.

The record budget surplus in the fiscal year 1948 enabled the Federal Government to reduce the public debt from \$258.3 billion to \$252.3 billion during the year. The Government's cash balance in the general fund was increased during the year from \$3.3 billion on June 30, 1947, to \$4.9 billion a year later.

A summary of budget results, changes in the public debt, and changes in the general fund balance for the last two fiscal years is shown in the table following. Corresponding figures for earlier years are shown in table 1 in the section of tables in the back of the report. The figures are on the basis of daily Treasury statements.

	1947	1948
	In billions of dollars	
Budget results:		
Net receipts.....	43.3	44.7
Expenditures.....	42.5	36.3
Surplus.....	0.8	8.4
Less:		
Increase, or decrease (-), in general fund balance.....	-10.9	1.6
Trust accounts, etc., net expenditures <sup>2</sup> .....	.5	1.8
	-10.4	2.4
Equals: Net decrease in public debt.....	11.1	6.0

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Figures exclude effect of transfer of \$3.0 billion to the Foreign Economic Cooperation trust fund. Section 114 (f) of the Economic Cooperation Act of 1948 required that the sum of \$3.0 billion be transferred to this trust fund, to be "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949. This bookkeeping transfer has no effect on the actual timing of any expenditures or receipts.

<sup>2</sup> Includes clearing account for outstanding checks and telegraphic reports from Federal Reserve Banks.

## BUDGET RECEIPTS

Total budget receipts in the fiscal year 1948 amounted to \$46,361.7 million and were \$1,643.4 million greater than in 1947. Receipts attained a near record level in 1948, having been exceeded by receipts of \$47,766.5<sup>1</sup> million in the war year 1945 only. Net budget receipts, which consist of total budget receipts less the appropriation to the old-age and survivors insurance trust fund, amounted to \$44,745.5 million in 1948, an increase of \$1,486.7 million over 1947.

Receipts in the fiscal years 1947 and 1948, on the daily Treasury statement basis, are compared by major sources in the following table. Chart 2 shows receipts by major sources for the fiscal years 1942 through 1948.

Source	1947	1948	Increase, or decrease (—)	
			Amount	Percent
		In millions of dollars		
Individual income tax.....	19,628.8	20,996.6	1,367.7	7.0
Corporation income and excess profits taxes.....	9,676.8	10,174.4	497.7	5.1
Total income and excess profits taxes.....	29,305.6	31,171.0	1,865.4	6.4
Miscellaneous internal revenue.....	8,049.5	8,301.4	251.9	3.1
Employment taxes <sup>1</sup> .....	2,038.5	2,395.7	357.1	17.5
Customs.....	494.1	421.7	—72.4	—14.6
Miscellaneous receipts.....	2 4,830.7	4,072.0	—758.7	—15.7
Total budget receipts.....	2 44,718.3	46,361.7	1,643.4	3.7
Deduct: Appropriation to Federal old-age and survivors insurance trust fund.....	1,459.5	1,616.2	156.7	10.7
Net budget receipts.....	43,258.8	44,745.5	1,486.7	3.4

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> Includes railroad unemployment insurance contributions.

<sup>2</sup> Revised; for explanation, see footnote 3, table 5.

All major tax sources with the exception of customs contributed to the excess of 1948 receipts over those of 1947. Income and excess profits taxes accounted for 67.2 percent of total receipts in 1948 as compared with 65.5 percent in 1947, and were mainly responsible for the increase in total budget receipts. The increase of \$1,865.4 million in receipts from income and excess profits taxes was greater than the gain in total budget receipts, but declines in customs and miscellaneous receipts were sufficient to offset part of the increase in income and excess profits taxes as well as the entire increase in receipts from employment taxes and miscellaneous internal revenue.

<sup>1</sup> Revised; for explanation, see footnote 3, table 5.

# RECEIPTS, CLASSIFIED BY MAJOR SOURCES FISCAL YEARS 1942 THROUGH 1948

CHART 2.

NOTE.—Total receipts. See table on p. 8.

## RECEIPTS FROM INCOME AND EXCESS PROFITS TAXES

Receipts from income and excess profits taxes amounted to \$31,171.0 million in 1948 as compared with \$29,305.6 million in 1947. Both individual and corporation tax receipts increased, but the individual income tax contributed the major share of the increase.

## INDIVIDUAL INCOME TAXES

For the fifth consecutive year the individual income tax was the most important source of receipts, accounting for \$20,996.6 million, or 45.3 percent, of total budget receipts in 1948 as compared with 43.9 percent in 1947.

The details of the yield of the individual income tax are shown in the following table.

Source	1947	1948	Increase, or decrease (-)	
			Amount	Percent
	In millions of dollars			
Withheld (daily Treasury statement basis).....	10,013.1	11,436.1	1,423.0	14.2
Not withheld:				
Current (collection basis).....	8,950.3	8,847.5	-102.8	-1.1
Back (collection basis).....	551.0	616.8	65.8	11.9
Total not withheld (collection basis).....	9,501.3	9,464.3	-37.0	-.4
Adjustment to daily Treasury statement basis <sup>1</sup> .....	+114.5	+96.2	-18.3	-----
Total not withheld (daily Treasury statement basis).....	9,615.7	9,560.5	-55.3	-.6
Total individual income tax.....	19,628.8	20,996.6	1,367.7	7.0

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> See footnote 3, table 103.

Individual income taxes withheld by employers increased as a result of the rise in the level of salaries and wages subject to withholding. Receipts from current individual income taxes other than those withheld decreased slightly. The increase in receipts from back individual income taxes reflects the high level of individual income tax liability of the last several years.

## CORPORATION INCOME AND EXCESS PROFITS TAXES

Receipts from corporation income and excess profits taxes increased from \$9,676.8 million in 1947 to \$10,174.4 million in 1948, and accounted for 21.9 percent of total budget receipts in 1948 as compared with 21.6 percent in 1947.

The details of receipts from this source, on a collection basis, are shown in the following table.

Source	1947	1948	Increase, or decrease (—)	
			Amount	Percent
	In millions of dollars			
Current taxes:				
Income.....	5,441.8	8,864.3	3,422.5	62.9
Excess profits.....	3,076.4	66.3	—3,010.1	—97.8
Declared value excess profits.....	36.7		—36.7	—100.0
Back taxes <sup>1</sup> .....	1,121.9	1,243.8	121.9	10.9
Total corporation income and excess profits taxes...	9,676.8	10,174.4	497.7	5.1

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> Unjust enrichment tax classified as income tax prior to 1948, and in 1948 included with all repealed taxes in miscellaneous internal revenue.

The increase of 5.1 percent in corporation income and excess profits tax receipts in 1948 followed a decline of 22.9 percent in 1947, and a decline of 21.7 percent in 1946.

The increase of \$497.7 million in corporation income and excess profits tax receipts in 1948 was the result of (1) an increase of \$121.9 million in back tax receipts and (2) an increase of \$375.7 million in current tax receipts resulting primarily from the rising trend of corporate profits in 1945, 1946, and 1947, which was more than sufficient to offset the progressive disappearance of receipts from the excess profits tax and the declared value excess profits tax, both of which were repealed by the Revenue Act of 1945.

## RECEIPTS FROM ALL OTHER SOURCES

### MISCELLANEOUS INTERNAL REVENUE

Receipts from the major groups of taxes included in this category are shown in the following table.

Source	1947	1948	Increase, or decrease (—)	
			Amount	Percent
		In millions of dollars		
Estate and gift taxes.....	779.3	899.3	120.1	15.4
Liquor taxes.....	2,474.6	2,255.3	—219.3	—8.9
Tobacco taxes.....	1,237.8	1,300.3	62.5	5.1
Stamp taxes.....	80.0	79.5	— .5	— .6
Manufacturers' excise taxes.....	1,425.2	1,649.2	224.0	15.7
Retailers' excise taxes.....	514.2	469.9	—44.3	—8.6
Miscellaneous taxes (including repealed) <sup>1</sup> .....	1,552.8	1,657.5	104.7	6.7
Total (collection basis).....	8,063.9	8,311.0	247.1	3.1
Adjustment to daily Treasury statement basis <sup>2</sup> .....	—14.4	—9.6	4.8	.....
Total miscellaneous internal revenue.....	8,049.5	8,301.4	251.9	3.1

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> See footnote 1 in preceding table.

<sup>2</sup> See footnote 3, table 103.

*Estate and gift taxes.*—Estate and gift tax collections increased, reflecting the increased value of property transferred.

*Excise taxes.*—Total collections from excise taxes amounted to \$7,411.7 million in the fiscal year 1948 and were \$127.1 million or 1.7 percent in excess of collections in 1947. Collections from tobacco taxes, manufacturers' excise taxes, and miscellaneous excise taxes increased as a result of larger consumer incomes, greater available supplies of goods and services, and higher prices. However, collections from liquor taxes and retailers' excise taxes decreased.

The greatest increase occurred in collections of manufacturers' excise taxes which amounted to \$1,649.2 million in 1948, an increase of 15.7 percent over 1947. The production of most of the commodities in this group was curtailed drastically during the war and demand continued at a very high level. A high level of demand continued for most of the goods and services included in the miscellaneous tax group, collections from which amounted to \$1,657.5 million, an increase of 6.7 percent over 1947. Collections from small cigarettes, reflecting the long-term upward trend in consumption and higher consumer incomes, accounted for the increase of 5.1 percent in tobacco taxes, to \$1,300.3 million in 1948.

Collections from liquor taxes decreased 8.9 percent from \$2,474.6 million in 1947 to \$2,255.3 million in 1948. Small increases occurred in collections from fermented malt liquor and wine but collections from the tax on distilled spirits, the most important single excise tax, decreased substantially from the record levels of 1946 and 1947. Inventory accumulation at wholesale and retail levels was a nonrecurring factor in 1947 collections, and consumption decreased to some extent in 1948.

Retailers' excise taxes decreased as the slackening of the abnormal demand for commodities included in this group, which had resulted from war-induced shortages of durable goods, more than offset the effect of higher levels of income.

#### EMPLOYMENT TAXES

The yields of the various employment taxes, on the daily Treasury statement basis, are shown in the following table.

Source	1947	1948	Increase	
			Amount	Percent
			In millions of dollars	
Federal Insurance Contributions Act.....	1,459.5	1,616.2	156.7	10.7
Federal Unemployment Tax Act.....	184.8	207.9	23.1	12.5
Railroad Retirement Tax Act.....	380.1	557.1	177.0	46.6
Railroad unemployment insurance contributions <sup>1</sup> .....	14.2	14.5	.3	2.4
Total employment taxes.....	2,038.5	2,395.7	357.1	17.5
Deduct: Appropriation to Federal old-age and survivors insurance trust fund.....	1,459.5	1,616.2	156.7	10.7
Net employment taxes.....	579.1	779.5	200.4	34.6

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> Not classified as an employment tax under Internal Revenue Code.

Total receipts from employment taxes and railroad unemployment insurance contributions amounted to \$2,395.7 million in the fiscal year 1948 and were \$357.1 million, or 17.5 percent, greater than in 1947. Each separate tax contributed to the increase, and total receipts from this source were larger in 1948 than in any previous fiscal year.

The increase of \$156.7 million in receipts under the Federal Insurance Contributions Act resulted from an increase in taxable wages. The increase of \$177.0 million in receipts under the Railroad Retirement Tax Act (Carriers Taxing Act prior to January 1, 1946) in 1948 resulted from larger taxable railroad pay rolls and higher tax rates. Receipts for the first three quarters of the fiscal year 1947 were based on a tax rate of 3½ percent each on employers and employees, while receipts for the last quarter of the fiscal year 1947 and for the entire fiscal year 1948 were based on a tax rate of 5¼ percent.

#### CUSTOMS

Customs receipts in the fiscal year 1948 amounted to \$421.7 million and were \$72.4 million, or 14.6 percent, lower than in the fiscal year 1947. This decline in receipts resulted primarily from the rate reductions which were initiated by the Geneva agreement of October 30, 1947, and which were made effective as of January 1, 1948, by the Presidential Proclamation of December 16, 1947.

#### MISCELLANEOUS RECEIPTS

Miscellaneous receipts in the fiscal year 1948 amounted to \$4,072.0 million and were \$758.7 million less than miscellaneous receipts of \$4,830.7 <sup>1</sup> million in the previous fiscal year. A decrease of \$957.0 million in proceeds from sales of surplus property was responsible.

<sup>1</sup> Revised; for explanation, see footnote 3, table 5.

## BUDGET EXPENDITURES

Budget expenditures amounted to \$36.3 billion in the fiscal year 1948, of which 60 percent was accounted for by national defense, international finance and aid, and veterans' expenditures. Interest on the public debt and refunds of taxes and duties accounted for another 20 percent.

The principal purposes for which expenditures were made during 1947 and 1948 are shown, on the daily Treasury statement basis, in the table which follows. Further details on expenditures for these and earlier years are available in chart 3, and in tables 1 through 6 in the section of tables in this report.

Year	National defense and re- lated ac- tivities	Interna- tional finance and aid	Veterans	Interest on the public debt	Refunds of taxes and duties	All other	Total
	In billions of dollars						
1947.....	17.3	4.4	7.3	5.0	3.0	5.5	42.5
1948.....	11.5	4.0	6.5	5.2	2.3	6.8	36.3

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Excludes \$3.0 billion transfer to Foreign Economic Cooperation trust fund (see footnote 1 to table on page 7 for further explanation).

Total expenditures of \$11.5 billion for national defense and related activities were \$5.8 billion or one-third less than in 1947. They were 32 percent of all expenditures in 1948 as compared with 41 percent in 1947. Expenditures by the Departments of the Air Force, Army, and Navy together decreased from \$12.4 billion in 1947 to \$10.4 billion in 1948. Budget expenditures under the Armed Forces Leave Act, declined by \$1.7 billion from their 1947 peak, and outlays for the United Nations Relief and Rehabilitation Administration declined by \$1.2 billion.

International finance and aid expenditures were \$4.0 billion in 1948, or 10 percent less than in 1947. In both years they were about one-tenth of all expenditures. The completion of initial United States expenditures under the Bretton Woods Agreements Act, combined with reduced outlays by the Export-Import Bank and smaller expenditures for the extension of credit to the United Kingdom, resulted in a decline for these programs of \$2.2 billion. On the other hand, increases in other programs, principally Greek-Turkish assistance, relief to war-devastated countries, government and relief in occupied areas, and interim aid (preliminary to enactment of the Economic Cooperation Act) amounted to \$1.8 billion. Expenditures under the Economic Cooperation Act during 1948 (exclusive of the transfer of \$3.0 billion

# EXPENDITURES, BY MAJOR CLASSIFICATIONS FISCAL YEARS 1942 THROUGH 1948

to the Foreign Economic Cooperation trust fund) amounted to only \$0.1 billion.

Expenditures for veterans declined for the first time since 1942. The decline of \$0.8 billion from the peak in 1947 brought veterans' expenditures to \$6.5 billion for 1948, which was nearly 18 percent of total expenditures. A reduction in the Government's contribution to the national service life insurance fund accounted for all but \$0.1 billion of the decrease in veterans' expenditures in 1948. There were also decreases in benefits paid under the Servicemen's Readjustment Act, which provides primarily for the education program and unemployment and other readjustment allowances, but these were almost offset by increases in expenditures for pensions, medical costs, and other services.

Interest paid on the public debt totaled \$5.2 billion for the fiscal year 1948, and was 14 percent of all expenditures. The amount was \$0.3 billion more than that paid in 1947, reflecting in large part continued increases in discount accruals on savings bonds and larger interest payments to Government trust funds and investment accounts as their investments increase.

Refunds of taxes and duties in the fiscal year 1948 totaled \$2.3 billion as compared with \$3.0 billion in 1947. In both years, the refunds of income taxes and other internal revenue taxes accounted for nearly the entire amount. Excessive prepayments of the individual income tax, which result from overwithholding or overdeclarations of estimated tax, constituted the largest class of internal revenue refunds, amounting to \$1.6 billion in 1948, approximately the same amount as in 1947.

The remaining budget expenditures totaled \$6.8 billion. These include the outlays for domestic programs such as aid to agriculture, social security, public works, and housing and home finance, which accounted for over half of the expenditures in this group. They also include the running expenses of the Government, such as expenditures for executive departments not reflected elsewhere and for legislative and judicial functions; Government contributions to Federal employees' retirement; atomic energy; aids to education, labor, finance, commerce, and industry; Civil Aeronautics; and the Post Office deficiency. These remaining expenditures increased by \$1.3 billion from 1947 to 1948, with a large part of the increase accounted for by public works expansion, increased transfers to the railroad retirement account, and larger expenditures for atomic energy

**TRUST ACCOUNTS, ETC., RECEIPTS AND EXPENDITURES**

Certain accounts are maintained with the Treasurer of the United States for the benefit of individuals or classes of individuals. Receipts in these accounts are expended for purposes specified in the trust. These receipts and expenditures are not included in the budget receipts and expenditures, but are shown in the daily Treasury statement under the title "Trust accounts, etc."

The Government's payments from general fund appropriations to various trust accounts, such as employees' retirement funds and the national service life insurance fund, are shown under budget expenditures as transfers to trust accounts, and under the various trust accounts as receipts.

During the fiscal year 1948 the Foreign Economic Cooperation trust fund was established, in accordance with the provisions of section 114 (f) of the Economic Cooperation Act of 1948, approved April 3, 1948 (see exhibit 44), which required that \$3 billion be transferred to this trust fund and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The law further provided that "The first expenditures made out of the appropriations authorized under this title in the fiscal year 1949 shall be made with funds requisitioned by the Administrator [for Economic Cooperation] out of the trust fund until the fund is exhausted, at which time such fund shall cease to exist." The effect on the budget of this transfer to the Foreign Economic Cooperation trust fund is explained in footnote 1 to the table on page 7 of this report.

A summary of the net transactions in trust accounts, etc., for the fiscal years 1932-48 will be found in table 1; and receipts in and expenditures from trust accounts, etc., by major classifications, for the fiscal years 1940-48 will be found in table 6, and details by months for 1948 in table 4.

**GENERAL FUND**

The general fund represents all moneys of the Government deposited with and held by the Treasurer of the United States.

The assets in the general fund include gold, silver, currency, coin, and unclassified collection items, etc., and deposits to the credit of the Treasurer of the United States in Federal Reserve Banks, special depositories (war loan accounts), national and other bank depositories, foreign depositories, and the treasury of the Philippine Islands.

The liabilities of the general fund include outstanding Treasurer's checks, deposits of certain Government officers composed of balances to the credit of the Post Office Department, the Board of Trustees

of the Postal Savings System, and postmasters' disbursing accounts, etc., uncollected items, and exchanges.

The difference between total assets and total liabilities is the general fund balance. On the basis of the daily Treasury statement, the general fund cash balance at the close of the fiscal year amounted to \$4,932 million, an increase of \$1,624 million during the year. Deposits with special depositaries on account of deposits of withheld taxes and sales of Government securities (war loan accounts) increased from \$962 million on June 30, 1947, to \$1,772 million on June 30, 1948, an increase of \$810 million.

The net change in the balance of the general fund during the fiscal year is accounted for as follows:

Balance June 30, 1947.....		\$3, 308, 136, 929. 36
Add:		
Budget receipts, net.....		44, 745, 542, 076. 64
Trust accounts, etc., receipts <sup>1</sup> .....		6, 515, 230, 080. 67
		<hr/> 54, 568, 909, 086. 67
Deduct:		
Budget expenditures, includ- ing wholly owned Govern- ment corporations <sup>1</sup> .....	\$36, 326, 072, 232. 83	
Trust accounts, etc., expendi- tures.....	6, 809, 572, 742. 28	
Clearing account for out- standing checks and tele- graphic reports from Fed- eral Reserve Banks.....	507, 106, 038. 81	
Net decrease in gross public debt.....	5, 994, 136, 595. 68	49, 636, 887, 609. 60
		<hr/> 4, 932, 021, 477. 07
Balance June 30, 1948.....		4, 932, 021, 477. 07

<sup>1</sup> Excludes transfer of \$3,000,000,000 to Foreign Economic Cooperation trust fund.

A comparative analysis of the assets and liabilities of the general fund is shown as of June 30, 1947 and 1948, in table 46.

#### PUBLIC DEBT OPERATIONS

The \$6.0 billion reduction in the public debt during the fiscal year brought the total down to \$252.3 billion on June 30, 1948. During the same period the guaranteed obligations held outside the Treasury were reduced by \$16 million, from a total of \$90 million to \$73 million.

The public debt operations during the year were directed toward implementing the Treasury's anti-inflation program. Application of a large share of the budget surplus to the retirement of the debt (chiefly bank-held debt) and the raising of interest rates on short-term securities constituted the two principal measures of the program.

Curtailment of the amount of the public debt in the fiscal year 1948 was begun moderately in November 1947 with 6 consecutive weekly retirements of 91-day Treasury bills. Most of the \$6.0 billion curtail-

ment, however, was made in the first four calendar months of 1948, out of the budget surplus accumulated from December through March. Proceeds of sales of savings bonds and the sales of a new nonmarketable investment bond limited to nonbank investors contributed to the funds used to pay off securities held by the commercial banking system.

Through retirement and refunding operations, the outstanding Treasury bills were reduced during the year by \$2.0 billion, the 1-year certificates of indebtedness by \$2.7 billion, and the bank-eligible Treasury bonds by \$6.9 billion. Offsetting these decreases was an increase in Treasury notes of \$3.2 billion. The net result of these operations was a net decrease in the marketable debt of \$8.4 billion. Outstanding nonmarketable issues increased by \$0.5 billion, while special issues of trust and other funds increased by \$2.8 billion. Chart 4 shows the public debt and guaranteed obligations outstanding since June 30, 1941, and the accompanying table shows their distribution by classes of securities at the close of each of the last two fiscal years.

*Public debt and guaranteed obligations outstanding June 30, 1947 and 1948, by classes*

NOTE.—Dollar figures are rounded and will not necessarily add to totals. For details of public and guaranteed debt outstanding June 30, 1948, see tables 20 and 21.

\* Less than \$500,000, or 0.05 percent.

<sup>1</sup> If 1 percent 13½-month and 1½ percent 13-month Treasury notes outstanding June 30, 1948, which resemble certificates of indebtedness more closely than they do other series of Treasury notes, were reclassified as certificates, these two lines in the table would read:

Certificates of indebtedness.....	\$25,296	\$30,215	\$4,919	9.8	12.0
Treasury notes.....	8,142	3,748	—4,395	3.2	1.5

<sup>2</sup> Bank-restricted issues are those which commercial banks (banks accepting demand deposits) are not permitted to acquire prior to a specified date. (See footnote 5, table 102.)

## MARKETABLE ISSUES

*Bonds, notes, and certificates of indebtedness.*—A total of \$36.6 billion of marketable securities, exclusive of Treasury bills, matured or were called during the fiscal year 1948. More than one-sixth of the matured and called securities, over \$6.3 billion, was paid in cash. The securities exchanged for new issues amounted to \$30.2 billion. The \$6.3 billion redeemed for cash included holdings of the Federal Reserve Banks amounting to \$2.9 billion.

The matured securities consisted of 11 issues of ⅜ percent 1-year certificates of indebtedness maturing monthly except May, and totaled \$25.3 billion; two issues of Treasury notes which matured September 15, bearing interest at 1½ percent and 1¼ percent, respectively, and totaled \$4.4 billion; and five issues of Treasury bonds which totaled \$6.9 billion. Only one issue was retired in full, the 4¼ percent Treasury bonds of 1947–52, which amounted to \$759 million. The other bond

CHART 4.

issues, the 2 percent bonds due December 15, 1947, the 2 percent bonds of 1948-50 (dated March 15, 1941) and the 2¾ percent bonds of 1948-51 called for redemption on March 15, 1948, and the 1¾ percent bonds of 1948 due June 15, 1948, were refunded.

In exchange for the \$30.2 billion of securities not paid in cash, there were offered three issues of ¾ percent certificates of indebtedness maturing in 1 year, 11 months, and 10 months, respectively; two issues of 1 percent certificates maturing in 1 year and 11 months, respectively; five issues of 1½ percent 1-year certificates; one issue of 1 percent 11½-month Treasury notes; and one issue of 1½ percent 13-month notes.

The public offerings and the disposition of matured or redeemable issues, exclusive of bills, are shown in the two tables which follow.

<sup>1</sup> Excludes armed forces leave bonds, depository bonds, postal savings bonds, special notes of United States, and guaranteed obligations.

<sup>2</sup> Beginning with November 1947 operation, arrangements were made between Treasury and Federal Reserve System whereby all or part of System's holdings of certain maturing and called securities would be presented for cash redemption.

<sup>3</sup> Includes tax and savings notes in amount of \$1,331 million surrendered in payment of taxes.

**Treasury bills.**—Offerings of 91-day Treasury bills were made weekly during the year. In furtherance of the Treasury policy of retiring debt held by the commercial banking system, \$2,000 million of bills were retired for cash.

Full exchange offerings for maturing bills were made weekly through October 1947. Beginning with the bills dated November 6, however, through those dated December 11, weekly cash retirements of \$100 million were made. Retirements during this period totaled \$600 million. After four intervening weeks when maturities were refunded in full, cash retirements were begun again with the bills dated January 15. For 13 consecutive weeks ending with April 8, weekly retirements were made which totaled \$1,400 million. Each retirement was for \$100 million, except the issue dated March 18, when \$200 million were retired. The 13 issues outstanding at the end of the fiscal year 1947 totaled \$15,775 million; the 13 issues outstanding at the end of the fiscal year 1948 totaled \$13,757 million.

Early in July 1947 the rate on 91-day Treasury bills, which had been held at  $\frac{3}{8}$  of 1 percent during the entire war period, was allowed to rise. The bills dated July 10 were accepted at an average interest rate of 0.594 percent, and throughout the year the rates were gradually increased until by the end of June 1948 the average rate was close to 1 percent. The interest rate on 1-year certificates, which had been  $\frac{7}{8}$  of 1 percent for the entire war period, was gradually increased to  $1\frac{1}{8}$  percent.

The 52 issues of Treasury bills offered during the year were sold at an average rate of discount ranging gradually upward from 0.376 percent to 0.998 percent. Bids on a fixed price basis averaged about \$35 million a week and amounted in the aggregate to about 3 percent of all bids accepted.

Further information concerning Treasury bills is found in exhibits 5 through 7, and in table 27.

#### NONMARKETABLE ISSUES

Sales of nonmarketable securities<sup>1</sup> during the fiscal year totaled \$10.0 billion and redemptions totaled \$8.4 billion. Sales of savings bonds Series E, F, and G totaled \$6.9 billion, including accrued discount, and of Treasury savings notes, \$2.1 billion. Subscriptions to the new nonmarketable Treasury bonds, investment series, on sale

<sup>1</sup> Sales and redemptions as summarized in this paragraph exclude armed forces leave bonds, depository bonds, postal savings bonds, and special notes of the United States.

briefly in the autumn of 1947, were nearly \$1.0 billion. Redemptions of savings bonds, Series A-G, totaled \$5.1 billion; of tax and savings notes, \$3.3 billion; and of Treasury bonds, investment series, \$11 million.

*United States savings bond sales and redemptions.*—Sales of United States savings bonds (including discount accruals) exceeded redemptions during the year by \$1,926 million. Sales amounted to \$6,235 million, issue price. As of June 30, 1948, the value of unmatured savings bonds outstanding, at current redemption value, amounted to \$53,274 million. This amount was 21.2 percent of the total public debt and guaranteed obligations outstanding, as compared with 19.9 percent a year earlier. The amount of savings bonds issued, with accruals added, since inception was \$78,891 million. Redemptions totaled \$25,559 million, and as of June 30, 1948, there were 67.6 percent of the savings bonds issued still outstanding.

Nearly 65 percent of the savings bonds sold in 1948 were Series E bonds. Sales of this series were only slightly less than in 1947, and their leveling off was in marked contrast to the sharp declines in sales which took place in the two years following the August 1945 victory.

Since the peak in March 1946, savings bond redemptions have declined, with the net result that the amount of savings bonds outstanding is still rising. Redemptions of all savings bonds during 1948 amounted to \$5,113 million, including accrued discount. The matured A, B, and C bonds continued to increase the redemption total, and F and G bond redemptions during the year were somewhat greater than in 1947. More than offsetting these increases, however, was a sharp decline in E bond redemptions, which were \$566 million less than in 1947.

Monthly redemptions as a percentage of the amount outstanding of all series of savings bonds declined in 1948. The ratio of 0.69 percent, which was the lowest in three years, was reached in November 1947 and again in February 1948.

The redemption experience of savings bonds by yearly series is summarized in the following table. An analysis of these data by denominations is given in table 38.

*Percent of savings bonds sold in each year redeemed through each yearly period thereafter<sup>1</sup>*

[On basis of Public Debt accounts, see p. 393]

NOTE.—The percentages shown in this table are the proportions of the value of the bonds sold in any calendar year which are redeemed before July 1 of the next calendar year, and before July 1 of succeeding calendar years. Both sales and redemptions are taken at maturity value. The average percentages shown above are simple averages of the percentages for the applicable annual series.

<sup>1</sup> Percentages by denominations may be found in table 38.

Detailed information on savings bonds from March 1935, when savings bonds were first offered, through June 1948 is contained in tables 33 through 38.

*Treasury notes, tax series and savings series.*—Treasury savings notes were sold during the fiscal year 1948 in the face amount of \$2,144 million. Redemptions of tax and savings notes totaled \$3,303 million. Of the total amount redeemed, \$1,331 million were applied in payment for taxes and \$1,972 million were paid in cash. At the end of the year, there were outstanding \$4,394 million of unmatured Series C savings notes compared with \$5,560 million a year earlier. (See table 39.)

*Treasury bonds, investment series.*—A new nonmarketable bond, announced on August 18, was offered in response to investor demand for a greater supply of long-term bonds. The bonds, designated 2½

percent Treasury bonds, Investment Series A-1965, are dated October 1, 1947, and will mature October 1, 1965. Subscriptions to the bonds were accepted from September 29 through October 8, 1947. The amount of the offering was not specifically limited, and subscriptions totaled \$970 million.

The bonds may not be called for redemption before maturity, but holders may redeem them on the first of any calendar month at fixed redemption values. Details of the offering, including the table showing investment yields and redemption values by six months' periods, are shown in exhibit 8.

*Armed forces leave bonds.*—The Armed Forces Leave Act of 1946 was amended by Public Law 254, approved July 26, 1947, to make the armed forces leave bonds redeemable in cash after September 1, 1947, at the option of the holder. Accordingly, arrangements were made by the Treasury with banks and other financial institutions throughout the country, which qualified as official paying agents of the Treasury, to cash the bonds without cost to the owners. Bonds presented for payment are cashed at their face value plus accrued interest of  $2\frac{1}{2}$  percent.

The bonds had been issued to members and former members of the armed forces of the United States under authority of the Armed Forces Leave Act, approved August 9, 1946, in settlement and compensation of accumulated leave. Under the act, bonds were made payable 5 years from issue date, but were acceptable in payment of United States Government life insurance or national savings life insurance, and were subject to immediate payment in event of death of the owners.

During the fiscal year 1948, there were \$234 million leave bonds issued and \$1,463 million retired. Since the beginning of the program, \$2,081 million leave bonds have been issued and \$1,517 million retired, leaving a total of \$564 million outstanding.

Amendments to the regulations governing the issuance and redemption of armed forces leave bonds, approved September 2, 1947, appear as exhibit 14.

*Special issues.*—During the year the Treasury continued to issue special series of interest-bearing securities for trust and other funds deposited in the Treasury. The amount of obligations outstanding increased by \$2,845 million, and the total outstanding as of June 30, 1948, amounted to \$30,211 million. Details will be found in table 20.

*Special notes of the United States.*—Special noninterest-bearing notes of the United States were issued in the amount of \$1,782 million as a part of the payment made in February 1947 by the United States of its subscription to the International Bank for Reconstruction and Development and the International Monetary Fund (see annual

report for 1947, page 48). During the fiscal year 1948, the International Bank redeemed \$350 million of the special notes that had been issued to it, leaving \$66 million outstanding and held by the Bank. Of the special notes issued to the International Monetary Fund, \$563 million were redeemed, leaving \$1,161 million outstanding. In accordance with the treatment of such payments and repayments as public debt transactions of the United States, the debt bearing no interest was reduced by the amount of \$913 million.

#### CUMULATIVE SINKING FUND

Credits accruing to the sinking fund amounted to \$603 million which, added to the unexpended balance of \$6,113 million brought forward from the previous year, made available \$6,716 million for the fiscal year 1948. Of this amount, \$747 million was used toward the retirement of the 4½ percent Treasury bonds of 1947-52, which were called during the year. The unexpended balance of \$5,969 million was carried forward to the fiscal year 1949.

Tables 30 and 31 show the transactions on account of this fund since its inception on July 1, 1920.

#### SECURITIES ISSUED BY CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES OF THE GOVERNMENT

The Treasury continued during the year the policy announced in October 1941 under which funds needed by Government corporations are provided by the Treasury instead of by the sale of guaranteed securities in the open market. The Congress incorporated this policy into law with respect to the Reconstruction Finance Corporation (Public Law 132, approved June 30, 1947), which requires that Corporation to issue its obligations to the Secretary of the Treasury. Several subsequent laws enacted contain similar requirements with respect to both corporations and agencies.

Section 303 (a) of the Government Corporation Control Act of 1945 (Public Law 248, approved December 6, 1945) requires that all bonds, notes, debentures, and other similar obligations issued subsequent to the enactment of this law by any wholly owned or mixed-ownership Government corporation, and offered to the public, be subject to such conditions as have been or may be approved by the Secretary of the Treasury.

During the fiscal year 1948 the Treasury, in accordance with the President's recommendation in his 1948 Budget Message, adjusted the interest rates on advances to Government corporations and certain agencies to bring such rates more nearly in line with the interest cost to the Treasury on its borrowings. In most cases the interest rates

now in effect are based upon the average rate on outstanding marketable obligations of the United States. As a matter of practice the interest rates charged the corporations and agencies are stated in terms of the nearest  $\frac{1}{8}$  of 1 percent under such average rate. On June 30, 1948, the computed average interest rate on outstanding marketable obligations of the United States was 1.942 percent, resulting in a rate of  $1\frac{7}{8}$  percent for the corporations and agencies involved. In other instances where the advances by the Treasury are of a short-term character, lower rates have been established, taking into consideration the interest cost to the Treasury of its short-term borrowings.

Table 74 shows, by corporations and agencies, the amounts of obligations authorized to be outstanding, the amounts actually outstanding, and the holders of these securities, as of June 30, 1948.

#### GUARANTEED OBLIGATIONS NOT HELD BY THE TREASURY

Obligations fully guaranteed by the United States were held by the public on June 30, 1948, in the amount of \$73 million, which includes both matured and unmatured obligations. The guaranteed obligations held by the public on June 30, 1938-48, classified by issuing agencies, are shown in table 16; and a description of these obligations outstanding June 30, 1948, is given in table 21.

During the fiscal year 1948, the amount of mortgages that could be insured under title VI of the National Housing Act, as amended, was increased from \$3.8 billion to \$6.1 billion, by acts approved August 5 and December 12, 1947, and March 31, 1948. The aggregate amount of principal obligations of all mortgages insured by the Federal Housing Administration under titles II and VI was limited to \$10.1 billion as of June 30, 1948, and upon approval by the President may be increased with respect to title II by an amount not exceeding \$1 billion. The unused mortgage insurance authorizations for these two titles amounted to \$1.6 billion at the end of the fiscal year 1948. In addition, the Commissioner of the Federal Housing Administration was authorized to incur total liabilities of \$165 million under title I of the National Housing Act, as amended, for insured renovation and modernization loans.

#### OBLIGATIONS HELD BY THE TREASURY

Obligations issued by corporations and certain other business-type activities of the Government and held by the Treasury on June 30, 1938-48, are shown in table 17, and a description of these obligations outstanding June 30, 1948, is shown in table 22.

The Congress, by Public Law 266, approved July 30, 1947, authorized the Administrator of the Rural Electrification Administration to borrow funds amounting to \$225 million from the Secretary of the Treasury in accordance with the provisions of section 3 (a) of the

Rural Electrification Act of 1936, as amended. Public Law 519, approved May 10, 1948, increased this authorization to \$400 million, which together with the loans of \$510.8 million and the undisbursed commitments of \$329.3 million transferred from the Reconstruction Finance Corporation pursuant to Public Law 266, approved July 30, 1947, allowed gross borrowing of \$1,240.1 million. Repayments amounting to \$12.1 million have reduced this amount, as of June 30, 1948, to \$1,228.1 million.

Under the provisions of Public Law 363, approved August 5, 1947, the Federal Deposit Insurance Corporation was authorized to borrow from the Secretary of the Treasury not exceeding in the aggregate \$3 billion outstanding at any one time.

The Virgin Islands Company was authorized to issue its notes to the Secretary of the Treasury for its 1948 budget program in the amount of \$250 thousand, and by act of June 30, 1948 (Public Law 860), another authorization of \$500 thousand was given and appropriation made therefor.

Public Law 472, approved April 3, 1948, provided for the establishment of the Economic Cooperation Administration. Under section III (c) (2), the Administrator for Economic Cooperation was authorized to issue notes from time to time for purchase by the Secretary of the Treasury in an amount not exceeding in the aggregate \$1 billion, for the purpose of allocating funds to the Export-Import Bank of Washington in connection with loans made under the provisions of this act, and also for carrying out the guaranties made under the act. (See exhibit 44.) No allocations had been made as of June 30, 1948.

Under the provisions of Public Law 820, approved June 29, 1948, the Secretary of the Army was authorized to issue notes from time to time for purchase by the Secretary of the Treasury not to exceed in the aggregate \$150 million outstanding at any one time. The proceeds of these notes shall be used by the Secretary of the Army as a revolving fund for the purpose of purchasing certain materials produced in the United States, transporting such materials to occupied areas for processing, and selling products obtained from such processing. The proceeds from the sale of such products are to be returned to the revolving fund, and the Secretary of the Army is required to make a complete report to the Congress annually with respect to the status of the fund.

Pursuant to Public Law 860, approved June 30, 1948, the borrowing authority of the Federal Farm Mortgage Corporation was reduced from \$2 billion to \$500 million outstanding at any one time. While the Congress in this instance did not restrict the issuance of bonds to the Secretary of the Treasury, the Treasury's policy of financing corporations where authorized will continue in effect.

Public Law 132, effective July 1, 1947, amending the Reconstruction Finance Corporation Act, authorized future borrowings from the Secretary of the Treasury in an amount outstanding at any one time sufficient to carry out its functions. As a result of the large cancellations pursuant to acts of Congress (see table on page 104), there were no Reconstruction Finance Corporation obligations outstanding as of June 30, 1948.

### INTEREST ON THE PUBLIC DEBT

Interest payments on the public debt during the year amounted to \$5,211 million, compared with \$4,958 million (daily Treasury statement basis) in 1947. The increase of \$253 million in interest payments during 1948 does not include a full year's interest saving resulting from the debt retirements, because the bulk of the retirements were made in the second half of the fiscal year, in the first four calendar months of 1948. The saving from this source, however, will be offset in part by the increase in short-term interest rates. The increase in the rates on certificates of indebtedness will not be reflected in interest payments until their maturity in 1949.

Interest payments by classes of securities are summarized in the following table.

*Interest paid in the fiscal years 1947 and 1948 on outstanding public debt, by class of security*

[In millions of dollars. On basis of Public Debt accounts, see p. 393]

Security class	Interest paid		
	1947	1948	Increase, or decrease(—)
Marketable:			
Bills.....	63	132	69
Certificates of indebtedness.....	247	202	—45
Notes.....	190	87	—103
Bonds.....	2,763	2,740	—22
Subtotal.....	3,264	3,161	—102
Nonmarketable:			
Armed forces leave bonds.....	2	67	65
Savings bonds.....	1,000	1,150	149
Tax and savings notes.....	81	63	—18
Treasury bonds, investment series.....	—	12	12
Depository bonds.....	7	6	—1
Adjusted service bonds.....	2	1	—1
Subtotal.....	1,092	1,298	206
Special issues.....	602	728	126
Total.....	4,958	5,188	

NOTE.—Figures are rounded and will not necessarily add to totals. Only the discount currently accruing on savings bonds is included in interest payments. On the other hand, interest on armed forces leave bonds and savings notes is paid only at time of redemption.

# YIELDS OF OBLIGATIONS OF THE UNITED STATES BASED ON CLOSING PRICES

CHART 5.

NOTE.—Partially tax-exempt securities with fixed maturities and wholly tax-exempt securities are omitted because they are too few in number and too small in outstanding amount to permit drawing a significant curve.

All bank-restricted issues are callable and all partially tax-exempt issues are bank-eligible.

Bank-eligible 2½'s of 1967-72 have been omitted from chart in order to avoid undue complexity.

The computed average rate on the total interest-bearing debt outstanding on June 30, 1948, was 2.182 percent, compared with 2.107 percent a year earlier. This increase was due principally to the rise in rates on short-term securities and the continued issuance of non-marketable and special issues at higher than average rates. The term structure of interest rates on Government securities as of June 30, 1947 and 1948, is compared in chart 5.

#### STATUTORY LIMITATION ON THE PUBLIC DEBT AND GUARANTEED OBLIGATIONS

Section 21 of the Second Liberty Bond Act, as amended by the Public Debt Act of June 26, 1946, limits the amount of obligations issued under authority of the act to \$275 billion outstanding at any one time. This limitation applies to the public debt and to those obligations of Government corporations and other business-type activities which are fully guaranteed by the United States (except such obligations held by the Treasury).

As of June 30, 1948, the unused borrowing authorization was \$23.5 billion. The balance issuable at the end of the fiscal year 1948 and an analysis of the public debt and guaranteed obligations outstanding as affected by the debt limitation are shown in table 24.

#### OWNERSHIP OF FEDERAL SECURITIES<sup>1</sup>

During the fiscal year 1948 the gross Federal debt declined from \$258½ billion to \$252½ billion. These levels compare with a peak of debt of \$280 billion reached at the end of February 1946.

The banking system—that is, commercial banks and the Federal Reserve Banks—together held \$86 billion of Federal securities on June 30, 1948, as compared with \$92 billion a year earlier and almost \$117 billion at the peak of debt. Nonbank investors in the aggregate have shown practically no change in their holdings of Federal securities during the last fiscal year, with ownership of \$166½ billion both at the beginning and end of the period. Nonbank investment in Federal securities increased by more than \$3 billion between the peak of debt and June 30, 1948.

Since the debt retirement program began, a major objective of Treasury debt management has been to reduce holdings of securities by the banking system as an anti-inflationary measure. This program was reflected in the decline in bank-held debt from February 28, 1946, through June 30, 1948, of \$30½ billion, as compared with a decline in total debt of \$27½ billion. On June 30, 1948, the banking system held only 34 percent of total debt outstanding as compared with 42 percent at the peak of debt and 39 percent on June 30, 1941.

<sup>1</sup> Gross public debt, and guaranteed obligations of Federal Government held outside of Treasury.

The figures on bank and nonbank ownership, along with further detail on the holdings of Federal securities by various investor classes, are shown in the table following.

*Ownership of Federal securities by investor classes<sup>1</sup> for selected dates, 1941-48*

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Comprises gross public debt, and guaranteed obligations of Federal Government held outside of Treasury.

<sup>2</sup> Peak of debt.

<sup>3</sup> Includes partnerships and personal trust accounts.

<sup>4</sup> Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international accounts in this country.

Individuals are the largest nonbank holders of Federal securities, with \$67 billion (or more than a quarter of the total debt) on June 30, 1948. Nearly \$47 billion of their holdings were in savings bonds, with two-thirds in Series E bonds. The remaining \$20 billion of individual holdings were concentrated in long-term marketable securities.

Holdings of Federal securities by insurance companies amounted to \$23 billion at the end of June 1948, with more than \$17 billion in bank-restricted bonds. Life insurance companies accounted for

\$18½ billion of Federal securities and fire, casualty, and marine insurance companies, \$4½ billion. Life insurance companies' holdings of Federal securities on June 30, 1948, had an average length to first call or maturity of a little over 15 years.

Mutual savings banks' holdings of Federal securities amounted to \$12 billion on June 30, 1948, with \$8½ billion in bank-restricted bonds. The average length to first call or maturity of Federal securities held by mutual savings banks as of June 30, 1948, was approximately 12 years, or a little less than in the case of life insurance companies.

Holdings of Federal securities by the other corporation and association group amounted to almost \$21 billion on June 30, 1948. Non-financial corporations themselves held approximately \$12½ billion in Federal securities on this date. Of the remaining \$8½ billion, about one-third was accounted for by holdings of securities by the International Bank for Reconstruction and Development, the International Monetary Fund, and the investment of foreign balances in the United States. Nonprofit institutions (fraternal benefit associations, credit unions, endowments, pension and welfare funds, labor organizations, etc.) are estimated to account for a little over one-third with a little less than one-third reflecting holdings by dealers and brokers and savings and loan associations. About \$3½ billion of the holdings of the other corporation and association group was in savings notes and \$4½ billion in savings bonds. About \$1 billion was in noninterest-bearing notes issued to the International Bank and Monetary Fund and the remaining \$12 billion was in marketable securities.

Holdings of Federal securities by State and local governments on June 30, 1948, amounted to almost \$8 billion, largely concentrated in marketable securities. Federal Government investment accounts held \$35.7 billion of Federal securities on June 30, 1948, all but \$5.5 billion of which was invested in special issues. Social security and military insurance funds accounted for the bulk of these investments.

Commercial banks held \$64½ billion of Federal securities at the end of the fiscal year 1948. About \$44 billion was invested in bank-eligible bonds, 80 percent of which were due or callable within 5 years. Commercial banks also held \$17½ billion of bills, certificates, and notes. The average length to first call or maturity of securities held by all commercial banks in the country amounted to slightly less than 4 years as of June 30, 1948. Federal Reserve Bank holdings of Federal securities of \$21.4 billion on June 30, 1948, consisted of \$6.2 billion of bonds, \$6.6 billion of certificates and notes, and \$8.6 billion of bills.

## CHANGES IN OWNERSHIP OF FEDERAL SECURITIES DURING 1948

Holdings of Federal securities by commercial banks and the Federal Reserve Banks declined by \$5.9 billion during the fiscal year 1948 and accounted for all but \$0.1 billion of the \$6.0 billion decline in total debt.

Marketable debt declined by \$8.4 billion during the year, with nearly three-fourths of the decline reflected in bank holdings. The decline of \$6.0 billion in bank holdings of marketables was almost exactly equal to the total reduction in bank-held debt during the year. Nonbank investors in the aggregate reduced their holdings of marketables by \$2.3 billion during 1948 but they approximately offset the decline by adding to their holdings of special issues to Government investment accounts, savings bonds, and other nonmarketable securities.

The detail on changes in holdings of various types of Federal securities by nonbank investors, by commercial banks, and by the Federal Reserve Banks is shown in the following table.

*Estimated changes in bank vs. nonbank ownership of Federal securities by type of issue, fiscal year 1948<sup>1</sup>*

\*Less than \$50 million.

<sup>1</sup> Gross public debt, and guaranteed obligations of Federal Government held outside of Treasury.

Purchases of special issues, savings bonds, and other nonmarketable securities from the Treasury (there were no cash offerings of marketables during the year) amounted to approximately \$13 billion in the fiscal year 1948. As partial offsets to these sales the Treasury redeemed \$11 billion of securities other than marketables. These transactions affected almost entirely ownership by nonbank investors.

Treasury cash maturities of marketables during the year amounted to \$8.4 billion. Three-fourths of these pay-offs were made on securities held by banks, principally Federal Reserve Banks. The amounts of these pay-offs of bank-held securities by the Treasury were approximately equal to the net decline in bank holdings of marketables, since on net balance the banking system sold only \$0.1 billion in the market during the year.

The net market transactions of only \$0.1 billion between the banking system and nonbank investors as a group, however, obscure rather significant purchases and sales in the market. Nonbank investors sold 60 percent of the nearly \$6 billion of Treasury bonds which Federal Reserve Banks purchased in the market during the year, with the other 40 percent coming from commercial banks. On the other hand, nonbank investors as a group replaced these bond holdings by roughly equivalent purchases of shorter-term issues. Nonbank investors picked up 30 percent of the \$4 billion of certificates and notes liquidated in the market by commercial banks during this period. In addition, nonbank investors purchased about 60 percent of the \$4 billion market sales of bills by the Federal Reserve Banks.

Insurance companies had net sales of \$2.0 billion of Federal securities in the market during 1948 with \$2.3 billion sales of bonds and a small increase in bills, certificates, and notes. Mutual savings banks and individuals both showed small net sales during the year. The other corporation and association group added an estimated \$1.4 billion to its holdings through market purchases, largely short-term issues, while State and local governments bought \$0.9 billion.

The figures for transactions in Federal securities for each of the nonbank investor classes as well as for commercial banks and the Federal Reserve Banks are shown in the following table.

*Estimated transactions in Federal securities by investor classes, fiscal year 1948<sup>1</sup>*

(In billions of dollars)

	Transactions with Treasury			Total change in ownership
	Purchases	Redemptions and cash maturities (-) <sup>2</sup>	Net market transactions

NOTE: Figures are rounded and will not necessarily add to totals. Special issues and Treasury bills are included in figures on purchases and redemptions on basis of net changes in amounts outstanding (rather than gross issuances and retirements).

\* Less than \$50 million.

<sup>1</sup> Gross public debt, and guaranteed obligations of Federal Government held outside of Treasury.

<sup>2</sup> Net decline in Treasury bills outstanding is allocated to Federal Reserve Banks, with all other changes in bill holdings considered to represent activity in the market.

<sup>3</sup> Includes partnerships and personal trust accounts.

<sup>4</sup> Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international accounts in this country.

The preceding table shows that although nonbank investment in Federal securities changed insignificantly during the year as far as aggregates are concerned the trends of investment among the various investor classes differed rather widely. Federal Government investment accounts invested \$2.8 billion in special issues during 1948, reflecting the continued accumulation of individuals' savings in social insurance funds during periods of high employment. There was also a sizable increase in holdings of Federal securities by State and local governments amounting to \$0.7 billion during the year. Although individuals redeemed \$1.2 billion of armed forces leave bonds during 1948, their estimated holdings of all securities decreased by only \$0.1 billion, principally as a result of continued purchases of savings bonds.

Fire, marine, and casualty insurance companies added \$0.6 billion to their holdings of Federal securities during the year, while life insurance holdings declined by \$2.4 billion as new investment opportunities appeared through new corporate security flotations and mortgage financing. Mutual savings banks reduced their holdings by \$0.2 billion during 1948. The other corporation and association group showed a decline of \$1.5 billion during the year, but about half of this was accounted for by the redemption of securities by the International Bank and Monetary Fund. Holdings of Federal securities

by nonfinancial corporations continued to decline, but at a rate far below liquidations in the two preceding years when funds were needed to facilitate the financing of early postwar readjustment and expansion.

The decline of 10 percent in Federal debt since the end of the war has been more than offset by an expansion in the private debt of the Nation. Nevertheless Federal securities still constitute more than half of the over-all debt in the country and still represent the most important single asset in the aggregate balance sheets of the large financial institutional groups in the Nation. In June 1948, Federal securities accounted for over 55 percent of the earning assets of commercial banks; they accounted for 40 percent in 1939. Almost 60 percent of mutual savings bank assets are now in Federal securities as against less than 30 percent before the war. For insurance companies the prewar percentage of a little under 20 percent is now double. Federal securities constitute one-third of the liquid assets held by individuals (assets in the form of currency, checking accounts, savings accounts of all types, and Federal securities) as compared with about one-sixth before the war. At the same time nonfinancial corporations have 10 percent of their current assets (including inventories and receivables) in Federal securities as compared with less than 5 percent in 1939. Savings and loan associations had 1 percent of their prewar assets in Federal securities; now the figure is almost 15 percent.

The table following summarizes the net changes in ownership of Federal securities for each of the last 8 fiscal years.

*Changes in ownership of Federal securities by investor classes<sup>1</sup> for selected dates, fiscal years 1941-48*

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Comprises gross public debt, and guaranteed obligations of Federal Government held outside of Treasury.

<sup>2</sup> Includes partnerships and personal trust accounts.

<sup>3</sup> Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international accounts in this country.

The slowing up of nonbank investment in Federal securities during the last year was characteristic of other forms of liquid assets as well. Total liquid assets of nonbank investors in the aggregate increased by only \$1 billion in 1948. Checking accounts held by nonbank investors as a group increased by only \$0.7 billion during the year and there was an increase of \$1.0 billion in nonbank holdings of savings accounts in commercial banks. On the other hand, there were declines of \$0.6 billion in currency and \$0.1 billion in Federal securities. Expansion in all types of liquid assets was, of course, retarded by the impact of the record Treasury surplus during the fiscal year.<sup>1</sup>

**SECURITIES OWNED BY THE UNITED STATES GOVERNMENT AND  
PROPRIETARY INTEREST IN CORPORATIONS AND CERTAIN OTHER  
BUSINESS-TYPE ACTIVITIES OF THE UNITED STATES GOVERN-  
MENT**

**SECURITIES OWNED**

Securities owned by the United States Government on June 30, 1948, consisted principally of capital stock, bonds, and notes of Government corporations; securities evidencing loans made to farmers, railroads, home owners, foreign governments, etc.; and notes evidencing United States subscriptions to the International Bank for Reconstruction and Development and to the International Monetary Fund. The net face value of these securities amounted to \$13,249 million, exclusive of \$12,660 million of principal obligations of foreign governments arising out of World War I.

A statement of the securities owned by the Government on June 30, 1948, other than foreign government obligations of World War I, is shown in table 48, together with an explanation of the increase or decrease in these securities during the fiscal year 1948.

Pursuant to legislation enacted on June 30, 1947, and subsequent legislation, the Secretary of the Treasury during the fiscal year 1948 canceled obligations of the Home Owners' Loan Corporation amounting to \$128 million, and of the Reconstruction Finance Corporation amounting to \$10,049 million, as shown in the tables on pages 104 and 105.

**PROPRIETARY INTEREST IN CORPORATIONS AND CERTAIN OTHER  
BUSINESS-TYPE ACTIVITIES OF THE UNITED STATES GOVERNMENT**

In order to show the status of the Government's interest in Government corporations and certain other business-type activities, the Treasury Department compiles balance sheets from reports received from such corporations and activities which are published quarterly in the daily Treasury statement. Such balance sheets as of June 30,

<sup>1</sup> For a brief statement on the relationship between Federal fiscal operations and the Nation's financial structure during the years 1941-48, see table 99.

1948, will be found in table 76 of this report. These balance sheets show the amount and classification of the assets, liabilities, and net worth of the various corporations and activities.

The net worth is divided between that owned by the United States Government and that owned by private sources. During the year the Federal Deposit Insurance Corporation stock owned by the Federal Reserve Banks was liquidated pursuant to Public Law 363, approved August 5, 1947. As of June 30, 1948, the banks for cooperatives and the Federal home loan banks were the only corporations having private capital in addition to the investment of the United States.

## INTERNATIONAL FINANCIAL AND MONETARY DEVELOPMENTS

### ECONOMIC ASSISTANCE PROGRAM

The outstanding development in the field of international finance in the fiscal year 1948 was the inauguration of a program of increased United States economic assistance to Europe and the formation of an organization of European countries to develop a coordinated program of economic reconstruction through the joint efforts of the European nations themselves and the aid provided by the Congress. As early as 1945 it had been realized that the reconstruction of Europe and of the war-torn countries of Asia would be extremely difficult without special assistance from the United States, and, accordingly, various steps were taken to facilitate recovery. The war had involved the destruction of large amounts of capital equipment in the form of transportation facilities and industrial plant, while stocks of raw materials had been depleted. Normal capital replacements could not be made in view of the scarcity of goods during the war and immediate postwar periods. There were serious shortages of food in many countries. Foreign countries thus required more in goods and services from the United States to supply their immediate needs and to provide capital for reconstruction than they could obtain by the sale of goods and services to the United States. Part of the difficulty in Europe lay in the scarcity of raw materials which reduced levels of production and limited exports. The disorganization of internal production and international trade contributed to the severity of the crisis. In this period, however, production in the United States had expanded rapidly so that the economy was in a position to provide assistance to foreign countries without making serious inroads on domestic levels of consumption.

Economic assistance to foreign countries in the postwar period took a variety of forms. Direct relief to the needy populations was provided through UNRRA, about 70 percent of whose cost was financed

by the United States, and through special grants for civilian supplies in areas occupied by our armed forces. Surplus property was also made available to foreign countries, partly on a credit basis. Direct loans were made to the United Kingdom and the Philippine Republic in accordance with special congressional authorizations, while the Export-Import Bank made foreign loans in increased amounts. In the period from July 1, 1945, to December 31, 1947, approximately \$18 billion of aid in the form of grants or loans was made available by United States Government agencies. This earlier assistance program of the United States is reviewed in the Report of the National Advisory Council for the period October 1, 1947, to March 31, 1948 (see exhibit 20).

In 1947 it became apparent that the resources currently available to foreign countries would not be adequate to maintain the degree of recovery attained at this time, nor to permit the accelerated pace of reconstruction which appeared desirable in the interests of economic and political stability. The credits previously made available were for the most part used up because of the great need for goods from the United States economy. Foreign countries had used \$5.2 billion of their gold and dollar balances in the years 1946 and 1947. The Western European countries had lost more than a fourth of their reserves, which in some of the countries had reached the minimum levels necessary for normal trade and monetary reserves, thus increasing the dangers of inflation. It was evident that to maintain the existing levels of production, imports would have to continue and that these imports could practically not be financed without further United States assistance. (See exhibit 20, table A.) Thus, the National Advisory Council in its report covering the period from October 1, 1946, to March 31, 1947, stated:

"As of March 31, 1947, almost all United States governmental resources authorized for foreign financial assistance, excluding United States participation in the International Monetary Fund and the International Bank for Reconstruction and Development, had been committed to foreign countries. It has during the period under review become increasingly clear that such resources as remain available will not, by reason either of their amount or of the nature of developing needs abroad, prove adequate for the accomplishment of the purposes for which foreign financial assistance has been provided. The question of the extent to which this country will need to provide additional assistance to foreign countries cannot be readily answered. The agencies represented on the National Advisory Council are giving continued consideration to this matter." (See Annual Report of the Secretary of the Treasury for 1947, p. 204.)

In the summer of 1947 the President and the Secretary of State

indicated that the Administration would consider programs of further aid to Europe if it became clear that the assistance so provided would be used economically and efficiently for reconstruction and that the participating nations would make increased efforts toward self-help. This would involve active cooperation on the part of the countries receiving aid both in the realm of economic policy and in the actual exchange of goods which could be produced within the European economy. A conference of the European countries (Committee for European Economic Cooperation) met in Paris in July 1947 and drew up a program for economic cooperation extending over a 4-year period and indicating the extent of the expected deficit in the international accounts of the participating countries, assuming an increase in the levels of production and a gradual recovery of Europe. Several countries of eastern Europe, which had been invited to attend the original conference and which had sent delegates, did not join in the final report and so do not participate in the benefits of the European Recovery Program.

The program as outlined by the European Committee was carefully studied by the constituent agencies of the National Advisory Council and other agencies of the United States Government. The objective of these studies was to determine the need for assistance and the availabilities in the United States economy with due regard for the consequences of an extended assistance program on the domestic economy, including its possible inflationary effects. While this work was in progress Congress made available \$595 million to provide for interim aid to Austria, France, Italy, and China. During the consideration of the Administration's program by the Congress, the Secretary of the Treasury, as Chairman of the National Advisory Council, presented to the congressional committees the Council's recommendations on the basic financial policies of the program. The Congress passed the Foreign Assistance Act of 1948 (approved April 3, 1948) and subsequently provided appropriations. Under this legislation over \$7 billion was made available for grants, loans, and guaranties to the European countries, China, the special programs for Greece and Turkey, and for other measures of assistance; the International Refugee Organization; and the International Children's Emergency Fund of the United Nations. The Economic Cooperation Administration was established by the act and the Administrator became a member of the National Advisory Council, thus assuring coordination of the assistance under the European program with the other foreign financial policies of the United States.

In connection with the congressional presentation of the European Recovery Program, the Secretary of the Treasury indicated an intention to assist the participating countries in locating the dollar assets

of their nationals, so that these assets or the income therefrom could be used for national purposes by these governments, if it was decided so to use them. Under this program assets not unblocked before a deadline date, through certification by the governments concerned in accordance with established procedures and so unblocked, would be transferred to the jurisdiction of the Office of Alien Property in the Department of Justice. A census of the blocked assets would be taken and information supplied to governments receiving aid. Assets uncertified at the deadline date and not identified thereafter would be vested as enemy property. (See exhibits 22 and 23 and discussion under Foreign Funds Control, p. 47.)

#### THE ANGLO-AMERICAN FINANCIAL AGREEMENT

Among the obligations of the Government of the United Kingdom under the Anglo-American Financial Agreement were, speaking in general terms, commitments to impose no restrictions after July 15, 1947, on payments for current transactions. By the required date, the Government of the United Kingdom had assumed these obligations except with respect to fourteen countries with which agreements had not yet been negotiated. The Secretary of the Treasury agreed that the obligations of the United Kingdom might be postponed for a period of two months in the cases of these fourteen countries.

The drain upon the gold and dollar reserves of the United Kingdom increased rapidly following this institution of convertibility of sterling, until, in August 1947, it reached a rate of \$185 million per week. On August 20, 1947, the Government of the United Kingdom informed the Secretary of the Treasury that immediate, stringent measures were necessary to counter this excessive drain on the country's dollar resources and that, unless this drain were checked at once, the Government of the United Kingdom would be unable to pursue the international monetary and economic policy set forth in the Anglo-American Financial Agreement. The Government of the United Kingdom proposed an emergency and temporary action, within the intentions and purposes of the Financial Agreement, modifying the system which had been established for implementing the convertibility obligation. At the same time, the Government of the United Kingdom indicated that consultations would probably become necessary concerning the applicability of clauses in the Agreement providing that, in exceptional cases and when the governments agreed, the obligation need not apply. The Government of the United Kingdom also stated that it did not propose to notify any further withdrawals from the line of credit until consultations had been held with the Government of the United States, with a view toward the adoption of a constructive policy which would be best suited to changes in the situation as they

might appear, and which would lead toward the objectives laid down in the Anglo-American Financial Agreement and the International Monetary Fund Agreement.

A series of consultations between the two Governments followed, and on December 4, 1947, drawings against the line of credit were resumed after the Chancellor of the Exchequer had again reaffirmed the intention of the Government of the United Kingdom to adhere as closely as possible to the objectives of the Agreement at all times and to implement these objectives fully at the earliest possible time.

Consultations between the two Governments on the actions of the Government of the United Kingdom in implementing the objectives of the Agreement continued throughout the remainder of the fiscal year.

#### THE INTERNATIONAL MONETARY FUND AND THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

These international institutions have made considerable progress toward attaining their objectives. During the period under review the International Bank made loans or commitments to the Netherlands, Denmark, Luxembourg, and Chile. The loan commitment to Chile represents a significant advance in the direction of loans for developmental purposes, which probably will assume a more important role in the Bank's operations in the future, as the immediate needs for reconstruction decrease with the progress of recovery in the war-torn countries. The Bank also floated two issues of its own securities amounting to \$250 million in the United States capital market.

The International Monetary Fund sold dollars in exchange for the currencies of Belgium, Chile, Denmark, France, India, Mexico, the Netherlands, Norway, Turkey, and the United Kingdom, as well as Belgian francs in exchange for Netherlands guilders and Norwegian kroner. During this year the Fund also took important steps in the formulation of its policy with regard to exchange rates in the case of France and Italy, and discussed the exchange problems of other countries in Europe and in Latin America with the governments concerned. A number of countries modified their exchange practices in conformity with the Fund's objectives. The Fund also issued a statement requesting the member governments to restrain international transactions in gold at premium prices. The Fund has recognized that changes in the exchange policies and exchange rates of the member countries would be required by circumstances, and has continued to study these problems and to consult with the governments concerned.

The National Advisory Council on May 18, 1948, submitted to the Congress its First Special Report on the Operations and Policies of

these international institutions, which discusses more fully the basic questions of policy and the position which the United States has taken with regard to these matters. (See exhibit 19.)

#### OTHER ACTIVITIES OF THE NATIONAL ADVISORY COUNCIL

The Council continued its function of coordinating the policies and operations of the representatives of the United States on the international financial organizations with the activities of other agencies of the Government participating in making foreign loans or engaging in foreign financial exchange and monetary transactions. Reports of its activities are given below. (See exhibits 18, 19, and 20.)

#### GERMAN CURRENCY REFORM

On June 18, 1948, a comprehensive currency reform was instituted in the three Western Zones of Germany occupied by the United States, the United Kingdom, and France, respectively. This currency reform involved a sharp reduction in the volume of currency and bank deposits. This was accomplished through the required surrender of the existing reichsmark currency holdings and the reporting of reichsmark accounts with financial institutions. These currency holdings and accounts were revalued in a new deutsche mark currency, initially at a rate approximating 1 new unit for 20 of the old. The rate of conversion was chosen with a view to preserving substantially the existing level of official prices, and after the currency conversion there was a progressive relaxation of formal price and rationing controls. There resulted immediately a sharp increase in the volume of consumer goods available in normal commercial channels, representing partly supplies accumulated in anticipation of currency reform, and partly a diversion of goods from black markets. As had been anticipated, confidence in the new currency, together with the severe reduction in the monetary overhang, greatly stimulated the willingness to work and diminished the number engaged in black market activities.

A special problem arose with respect to the City of Berlin. Since Berlin is under quadripartite control, the three Western Powers sought agreement with the Soviet Government to establish a new uniform currency for the City to replace the existing reichsmark currency. These negotiations failed, and separate currency reforms were undertaken for the Western Sectors and for the Russian Sector of Berlin.

#### GOLD

In the course of the year there was no change in the basic gold policy of the United States. The Treasury continued its policy of buying and selling gold for the settlement of international balances.

A statement of Treasury purchases and sales of gold in the years 1945, 1946, and 1947 was published by the National Advisory Council (see exhibit 20, table B). The Treasury also continued to enforce the Gold Declaration of February 22, 1944. By the close of the fiscal year additional settlements regarding looted gold were agreed upon. Recoveries of looted gold are placed in the "gold pool" for distribution by the Tripartite Gold Commission, composed of France, the United Kingdom, and the United States. The Gold Commission distributed more than \$250 million in gold to countries whose gold had been seized by Germany.

On June 24, 1947, the Secretary of the Treasury, as Chairman of the National Advisory Council on International Monetary and Financial Problems, released a statement on transactions in gold at premium prices which the International Monetary Fund had sent to all of its members. This statement recommended that each member of the Fund take effective action to prevent transactions in gold at premium prices with other countries or with the nationals of other countries. On July 18, 1947, the Secretary of the Treasury and the Board of Governors of the Federal Reserve System issued a joint statement requesting American nationals to refrain from encouraging and facilitating international transactions in gold at premium prices. Subsequently, the Secretary of the Treasury, with the approval of the President, amended the regulations issued under the Gold Reserve Act of 1934. Under the amended regulations licenses are no longer issued for the private export of fine bar gold, and licenses for the export of gold refined from imported gold-bearing materials are issued only where the American refiner does not participate in the sale of the gold. Licenses for export are also subject to the requirement that the gold-bearing material has been exported from the country of origin and that the refined gold is imported into the country of destination in accordance with the laws and regulations of the respective countries.

### FOREIGN FUNDS CONTROL

During the fiscal year 1948 Foreign Funds Control took steps under a program directed toward terminating the Foreign Funds Control functions within the Treasury Department and resolving the following three residual problems: (1) the discovery of enemy property concealed in blocked accounts of persons in certain foreign countries, (2) the disposition of blocked assets of those countries and their nationals for which no unblocking procedure has yet been provided, and (3) the control of United States securities which disappeared from European countries during their occupation by the Germans. In addition, since the European financial and economic situation became

acute during the fiscal year and the European Recovery Program was developed, it was determined that the termination of Foreign Funds Control should also be directed toward assisting the governments of countries which were to receive aid under the European Recovery Program in locating the blocked dollar assets of their resident citizens.

#### DESCRIPTION AND EXECUTION OF TERMINATION PROGRAM

The termination program of Foreign Funds Control to carry out the above objectives was described in a letter of February 2, 1948, from the National Advisory Council to Senator Vandenberg, Chairman of the Foreign Relations Committee. (For text of this letter see exhibit 22.) In essence the program provided that public notice would be given stating that at the end of three months assets remaining blocked, including assets not certified by the appropriate foreign government as free of enemy taint, would be transferred to the jurisdiction of the Office of Alien Property in the Department of Justice. To permit this Government and the foreign governments concerned to concentrate on the areas where important results were likely to be obtained, accounts containing not more than \$5,000 were to be unblocked without requiring certification or other formalities except where a known German, Japanese, Hungarian, Rumanian, or Bulgarian interest existed. The Office of Alien Property was to take a new census of the assets which remained blocked as of the deadline date. In order effectively to help the recipient countries obtain control of the blocked assets of their resident citizens, the Office of Alien Property was to carry out the following policies:

"(a) To deal with the directly held assets by making available to governments of recipient countries the information from the new census of blocked assets of their citizens, including juridical persons, residing in their territories which remain uncertified as of the public deadline date referred to above. Each country receiving such information will be required to investigate the beneficial ownership of property held in the names of its citizens for the purpose of discovering any enemy interest. Pending a reasonable period for such investigations, such property will not be vested but will remain blocked under the jurisdiction of the Office of Alien Property. If these investigations show that the assets are owned by residents of the country receiving the information the assets will be released.

"(b) To deal with indirectly held assets by a vesting program with respect to accounts which remain uncertified after the deadline date. Processing of uncertified assets in Swiss and Liechtenstein accounts for vesting under applicable law as enemy property will be started immediately after the receipt of the census information by the Office of Alien Property. The vesting program will also be applied to un-

certified assets held indirectly through recipient countries where the program described in (a) above does not result in disclosure to the beneficial owner's government (e. g., French assets held through the Netherlands). In the absence of definite evidence of non-enemy ownership, full weight will be given to the presumption of enemy ownership arising from the failure to obtain certification. Evidence of non-enemy ownership or interest offered either before or after vesting will be checked in accordance with the usual investigative procedures of the Office of Alien Property. These procedures involve disclosure to the governments of the countries of which persons claiming legal or beneficial interests are residents. Of course, any vested assets which are proved to be non-enemy may be returned under existing law applicable to the return of vested property."

The public notice called for by the program, the text of which is set forth in exhibit 23, was issued jointly by the Department of Justice and the Treasury Department on March 1, 1948, and called for the transfer of jurisdiction over the remaining blocked funds to the Department of Justice as of June 1, 1948. However, for administrative convenience, the transfer to the Department of Justice was postponed from June 1 to October 1, 1948. Accordingly, Foreign Funds Control took the census called for by the program and the necessary licensing steps to implement the program during the extended period.

#### PROGRESS IN LIFTING BALANCE OF CONTROLS

During the fiscal year 1948 the privileges of General License No. 95, which provides for the unblocking procedure through certification, were extended to Italy. Moreover, machinery was established for unblocking the assets of Trieste under control of Allied Military Authorities. Considerable progress was made toward resolving the problem of blocked assets of Yugoslavia. In addition, controls were also lifted from the blocked assets of Spain and the privileges of General License No. 94 were extended to Spain, permitting uncontrolled current transactions between the United States and Spain.

As of the close of the fiscal year assets of the following countries are the only ones for which no unblocking procedures have been established: Germany, Japan, Bulgaria, Hungary, Rumania, Yugoslavia, Portugal, Estonia, Latvia, and Lithuania.

Controls with respect to importation of securities were lifted for all securities except with respect to those reported to this Government as having disappeared in Europe during German occupation. The lifting of these controls was effected by the amendment of General Ruling No. 5 on July 25, 1947.

Closely related to the work of Foreign Funds Control was the study of foreign-owned assets in the United States and of American-owned

assets in foreign countries. In December 1947 the Treasury Department published in bulletin form a report of the "Census of American-Owned Assets in Foreign Countries" taken in May 1943. Thus for the first time comprehensive data were made available on American investments and other assets in foreign countries.

### TAXATION DEVELOPMENTS

The Revenue Act of 1948, enacted April 2, 1948, was the principal revenue measure that became law during the fiscal year 1948. This act provided substantial reductions in individual income taxes by a combination of rate and exemption changes, income splitting, and a number of minor provisions. It also provided for estate and gift tax reduction by repealing the 1942 amendments relating to transfers of property in community-property States and by adopting estate and gift "splitting" for noncommunity property. This act is summarized in section I, which follows. Legislation affecting the level and scope of the social security taxes is summarized in section II. Legislation providing for the revision of the Internal Revenue Code, which passed the House but was not considered by the Senate, is described in section III. The Treasury Department's views on proposals to modify or repeal the oleomargarine taxes are summarized in section IV. Miscellaneous revenue legislation taking effect during the fiscal year is listed in exhibit 35.

#### I. REVENUE ACT OF 1948

The Revenue Act of 1948, which was a sequel to H. R. 1 and H. R. 3950 passed by both Houses during the First Session of the Eightieth Congress and vetoed by the President, was introduced as H. R. 4790 by the Chairman of the House Ways and Means Committee on December 18, 1947, and hearings on the bill were begun on January 16, 1948. Secretary of the Treasury Snyder appeared as the first witness and opposed the tax reduction features of the bill on the grounds that economic conditions, budget considerations, inflationary pressures, and debt management problems required the preservation of governmental revenues at adequate levels. This accorded with the President's policy of maintaining a balanced budget, including provision for the Marshall Plan and for substantial payments on the public debt. The Secretary supported the President's recommendation for the \$40 per capita tax credit to relieve many families with low incomes on whom the high cost of living was imposing real hardship, and for the re-enactment of the wartime excess profits tax on corporations, suitably modified, to make up the revenue loss resulting from the cost-of-living adjustment. (See exhibit 27.)

The Senate Committee on Finance began hearings on the bill on March 1, 1948. In a written statement, the Secretary again advised against adoption of H. R. 4790 on the grounds that it would conflict with the preservation of the strength of the revenue system at a level adequate to finance necessary Government services and to provide funds for servicing and reducing the national debt. He stated that while desirable basic structural changes in the tax system which would involve large revenue losses could not be undertaken safely this year, it was possible to make many technical revisions which would improve the tax system. He urged the Committee to make such administrative and technical revisions as would clarify present laws and correct some of the inequities without any substantial loss of revenue. (See exhibit 28.)

The bill was passed by the Senate on March 22, 1948, but the President returned it to the House of Representatives on April 1 without his approval because he was "convinced that to reduce the income of the Government by \$5 billion at this time would exhibit a reckless disregard for the soundness of our economy and the finances of our Government." (See exhibit 29.) The bill was passed over the President's veto on April 2, 1948, and became the Revenue Act of 1948.

*Provisions of the act.*—The Revenue Act of 1948 reduced individual income tax rates at all income levels. Before its enactment the actual tax rate started at 19 percent for taxable incomes under \$2,000 and increased to 86.45 percent for taxable incomes over \$200,000. Under the new law, the actual rates range from 16.6 percent to 82.1 percent with a maximum effective rate limitation of 77 percent.

The 1948 act retained the per capita system of personal exemptions, which were increased from \$500 to \$600 for a single person with no dependents, from \$1,000 to \$1,200 for a married couple with no dependents, and from \$500 to \$600 for each dependent. An additional \$600 exemption was granted individuals or their spouses who are blind or who will be 65 years of age or older by the end of the taxable year. The exemption for the blind replaces the special \$500 deduction allowed the blind under prior law.

A new feature of the 1948 act is the provision that married couples filing joint returns may divide their combined incomes in computing their income taxes. This is intended to abolish a long standing income tax discrimination against married couples residing in noncommunity-property States by reducing their tax liabilities to the level paid by residents of community-property States. The tax liability prescribed for married couples filing joint returns is twice the tax on half the couple's combined taxable income after exemptions and deductions. To eliminate any further advantages from the filing of separate returns, the limit on the standard deduction for married couples filing

joint returns and for single persons is increased to \$1,000 or 10 percent of the adjusted gross income, whichever is less. The limit for married persons filing separate returns is retained at \$500. By a parallel provision the maximum medical expense deduction is raised to \$5,000 in the case of joint returns of married couples but remains at \$2,500 on separate returns of married couples and single persons.

These changes affect the tax liabilities of taxpayers, according to their marital status. For single persons with no dependents, taxes are reduced 100 percent for net incomes between \$500 and \$600, 17 percent at the \$2,500 level, 12 percent at \$5,000, and less than 10 percent above \$10,000. For married persons with no dependents (where the spouse has no income), the tax reduction is 100 percent for net incomes between \$1,000 and \$1,200, 24 percent at the \$2,500 level, 21 percent at \$5,000, 26 percent at \$10,000, 35 percent at \$25,000, 26½ percent at \$100,000, and less than 10 percent above \$500,000.

With respect to estate and gift taxes, the Revenue Act of 1948 in effect universalized the situation prevailing in community-property States prior to 1942, when at the death of a spouse only one-half of the community property was subject to estate tax irrespective of whether such property was accumulated by that spouse. In the case of gifts of community property, one-half of the gift was taxable to the husband and the other half was taxable to the wife. In noncommunity-property States the entire amount of the property accumulated by the spouse was taxable under the estate and gift tax.

The Revenue Act of 1942 sought to equalize estate and gift taxes between residents of community- and noncommunity-property States. It provided that, even in the case of community property, property transfers were fully taxable to the decedent or donor to the extent that the property was attributable to his personal services.

The Revenue Act of 1948 repealed the 1942 estate and gift tax provisions relating to community property with the result that transfers of such property are now generally taxable under the pre-1942 law. In addition, transfers of noncommunity property may be split for purposes of the estate and gift taxes. Where property is transferred to a surviving spouse the estate is reduced for estate tax purposes by the amount of the property transferred to the spouse, but the reduction may not exceed one-half of the estate. Where a gift is made from one spouse to another only one-half of the gift is taxable; and in the case of a gift to a third person each spouse may elect to be taxed on one-half of the gift.

The Revenue Act of 1948 reduced individual income tax and estate and gift tax liabilities in the full year of operation (assuming personal

income of \$200 billion) by about \$5 billion, divided among the separate provisions as follows:

	Amount: <sup>1</sup> (in millions)
Per capita exemption increase.....	\$1,744.7
Additional exemption for the aged.....	268.3
Additional exemption for the blind.....	.3
Income splitting.....	803.5
Increased standard deduction.....	93.8
Rate reduction.....	1,827.1
Revenue loss from all individual income tax provisions.....	4,737.7
Revenue loss from estate and gift tax provisions.....	250.0
Total revenue loss.....	4,987.7

<sup>1</sup> The revenue effect of each provision is estimated consecutively, with allowance for the cumulative effect of the other provisions.

## II. SOCIAL SECURITY TAXES

Public Law 379, approved August 6, 1947, continued the 1 percent tax rate imposed on employers and employees under the Federal Insurance Contributions Act for two additional calendar years, 1948 and 1949. It provided further for an increase in these rates to 1½ percent in 1950 and 1951, and to 2 percent after 1951.

Two measures enacted during the fiscal year restricted the coverage of the social security program and the application of the social security taxes.

Public Law 492, which was enacted April 20, 1948, over the President's veto, excludes from the Social Security Act and related provisions of the Internal Revenue Code services performed in the sale of newspapers and magazines, where, instead of by salary or commission, the employee is compensated by means of a purchase and sale arrangement, and regardless of any minimum guarantee for the privilege of returning unsold items at cost.

Public Law 642, passed on June 14, 1948, over the President's veto, prescribed that common-law rules should continue to be used to determine whether a person is an "employee" for purposes of the Social Security Act and related provisions of the Internal Revenue Code. This measure is estimated to exclude from the old age and survivors insurance and unemployment insurance systems, and from the corresponding tax provisions, up to 750,000 employees and their employers. The excluded workers consist of a substantial portion of those working as commission salesmen, life insurance salesmen, piece workers, truck drivers, taxicab drivers, miners, journeymen tailors, and others.

The President withheld approval from the last two measures in the belief that they would open the social security structure to piecemeal attacks and overturn the present sound principle, unanimously

approved by the Supreme Court, that employment relationships under the social security laws should be determined in the light of realities rather than on the basis of technicalities. He pointed out that this legislation enables employers, desiring to do so, to avoid the payment of taxes which serve as the basis for their employees' social security benefits by establishing artificial and legal arrangements governing their relationships with employees. (See exhibits 30 and 31.)

### III. PROPOSED REVISIONS OF THE INTERNAL REVENUE CODE

The hearings on general tax revision, which were begun by the House Ways and Means Committee on May 19, 1947, continued intermittently through the first half of the fiscal year 1948. Testimony was received on individual income tax, corporation income tax, and excise tax problems, on community property and family partnerships, and on tax-exempt organizations. Secretary Snyder, who appeared as the first witness, made no recommendations for specific tax revision, but outlined some twenty major matters requiring attention in any comprehensive revision of the tax system. (His statement appears in the Annual Report of the Secretary of the Treasury for 1947, as exhibit 34.)

On November 4, 1947, Under Secretary of the Treasury Wiggins outlined to the Committee the results of the Department's study of farmers' marketing and purchasing cooperatives and discussed alternative ways of taxing them. (See exhibit 32.) On February 26, 1948, the Under Secretary transmitted for the consideration of the House Ways and Means Committee a partial list of the items which the Department believed desirable to have enacted into law during the Second Session of the Eightieth Congress. (See exhibit 33.) On June 19, 1948, the House passed H. R. 6712 relating to income, estate, and gift tax matters, including some items from the Department's list and some which the Department opposed. The Senate referred the bill to the Committee on Finance.

### IV. OLEOMARGARINE TAXES

During the year the Congress considered several legislative proposals to modify or repeal the excise and occupational taxes on the manufacture and distribution of oleomargarine.

The Under Secretary of the Treasury presented the Department's views on these proposals to the House Committee on Agriculture on March 8, 1948, and to the Senate Committee on Finance on May 17. He explained that the revenue laws were no longer needed for regulating the manufacture and distribution of oleomargarine and that

the Bureau of Internal Revenue might well be freed of this responsibility. He said that if the Congress deemed it to be necessary to continue the use of oleomargarine taxes for regulatory purposes, this end would be fully served if the existing punitive tax rates were replaced by token tax requirements.

The Under Secretary stated that revenue considerations were not involved and that the oleomargarine taxes unnecessarily burden the consumers far in excess of the amount paid in taxes. He stated also that although, in view of State-imposed taxes and prohibitions, oleomargarine would continue to be unavailable to consumers in many parts of the country even in the absence of Federal taxes, repeal of the Federal taxes would eliminate one instance of overlapping Federal-State taxation and would directly benefit consumers in the majority of the States. (See exhibit 34.) H. R. 2245 providing for the repeal of the tax on oleomargarine was passed by the House on April 28, 1948, reported favorably by the Senate Committee on Finance on June 1, 1948, but was not considered by the Senate.

### ESTIMATES OF RECEIPTS

(On the basis of existing legislation)

The Secretary of the Treasury is required each year to prepare and submit in his annual report to the Congress estimates of the public revenue for the current fiscal year and for the fiscal year next ensuing (Public No. 129, February 26, 1907). The estimates of receipts from taxes and customs are now made by the Treasury Department in December of each year on the basis of legislation existing at the time of making the estimates. The estimates of miscellaneous receipts are prepared in general by the agency depositing the receipts in the Treasury.

The definition of "net budget receipts" used in these estimates differs from that used in previous estimates in that (1) "refunds of receipts" are deducted in deriving "net budget receipts" whereas in previous estimates refunds were included in expenditures and (2) miscellaneous receipts exclude payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings. Such payments are also excluded from expenditures. Where used for comparative purposes actual net budget receipts of previous years have been adjusted for these two changes. The term "net budget receipts" as used in this report is the same as the term "budget receipts" used in the Budget document.

The details of estimated and actual receipts are shown in table 103, which includes receipts under proposed legislation. Throughout the

tables shown in this section the figures are rounded and will not necessarily add to totals.

### TOTAL AND NET RECEIPTS

Net budget receipts are estimated in the amounts of \$39,580.3 million in the fiscal year 1949 and \$40,903.6 million in the fiscal year 1950. A decrease of \$2,630.5 million is therefore expected in the fiscal year 1949 from actual net budget receipts in 1948 followed by an estimated rise of \$1,323.3 million in 1950. The decrease in 1949, despite higher estimated levels of income, is caused by changes in the tax laws which are discussed in detail in the Taxation Developments section of this report. The rise in receipts in 1950 reflects slightly higher income levels affecting 1950 receipts as compared with those affecting receipts in 1949 and the effect of tax law changes in reducing 1949 receipts below normal expectations.

Total receipts are estimated to be \$44,043.7 million in the fiscal year 1949, a decline of \$2,055.1 million from actual 1948 receipts of \$46,098.8 million. In 1950, total receipts are estimated to be \$45,420.7 million.

Percentage distributions, by sources of estimated total receipts in 1949 and 1950 and actual receipts in 1947 and 1948, are shown in the following table.

Source	Actual, 1947	Actual, 1948	Estimated, 1949	Estimated, 1950
	Percent			
Individual income tax.....	44.1	45.5	42.1	42.1
Corporation income and excess profits taxes.....	21.7	22.1	26.6	27.0
Miscellaneous internal revenue.....	18.1	18.0	19.3	18.8
Employment taxes <sup>1</sup> .....	4.6	5.2	5.9	7.4
Customs.....	1.1	.9	.9	.8
Miscellaneous receipts.....	10.4	8.3	5.2	3.9
Total receipts.....	100.0	100.0	100.0	100.0

<sup>1</sup> Includes Railroad Unemployment Insurance Act receipts.

Collections from the individual income tax are estimated to decrease in the fiscal year 1949 from the record level attained in 1948 and to remain below that level although increasing in 1950. Although less in absolute amount and relative importance this source remains the most important major source by a considerable margin. Miscellaneous receipts are estimated to decrease significantly in 1949 and 1950. The fiscal year 1950 represents the third consecutive year of decline from the record receipts of 1947 from this source. Customs are estimated to decrease in 1949 and remain at that level in 1950. Continuing increases are estimated for corporation income and excess profits taxes, the second most important source of revenue; for miscel-

laneous internal revenue, the third most important; and for employment taxes, which displace miscellaneous receipts as the fourth most important source in 1949.

## FISCAL YEAR 1949

Actual receipts in the fiscal year 1948 and estimated receipts in 1949 are compared by major sources in the following table.

Source	Actual, 1948	Estimated, 1949	Increase, or decrease (—)
	In millions of dollars		
Individual income tax.....	20,996.6	18,530.0	—2,466.6
Corporation income and excess profits taxes.....	10,174.4	11,709.0	1,534.6
Miscellaneous internal revenue.....	8,301.4	8,512.0	210.6
Employment taxes <sup>1</sup> .....	2,395.7	2,610.0	214.3
Customs.....	421.7	407.0	—14.7
Miscellaneous receipts.....	3,809.1	2,275.7	—1,533.4
Total budget receipts.....	46,098.8	44,043.7	—2,055.1
Deduct:			
(a) Appropriation to Federal old-age and survivors insurance trust fund.....	1,616.2	1,754.0	137.8
(b) Refunds of receipts.....	2,271.9	2,709.4	437.5
Net budget receipts.....	42,210.8	39,580.3	—2,630.5

<sup>1</sup> Includes Railroad Unemployment Insurance Act receipts.

Net budget receipts in the fiscal year 1949 are estimated to amount to \$39,580.3 million, a decrease of \$2,630.5 million from actual net budget receipts in the fiscal year 1948 but all items do not contribute to the over-all decrease. Substantial decreases in receipts from the individual income tax, miscellaneous receipts, and the larger amount of the deduction item, refunds, and the small decrease in customs together exceed increases in receipts from corporation income and excess profits taxes, miscellaneous internal revenue, and employment taxes.

*Individual income taxes.*—The details of the yield of the individual income tax are shown in the following table.

Source	Actual, 1948	Estimated, 1949	Increase, or decrease (—)
	In millions of dollars		
Withheld.....	11,436.1	10,414.0	—1,022.1
Not withheld.....	8,943.6	7,446.0	—1,497.6
Back taxes.....	616.8	670.0	53.2
Total individual income tax.....	20,996.6	18,530.0	—2,466.6

Receipts from the individual income tax in the fiscal year 1949 are estimated to decrease by \$2,466.6 million as compared with 1948.

The reduction in tax liabilities under the Revenue Act of 1948 causes receipts to decrease despite the higher levels of income reflected in 1949 receipts and the withholding of taxes for the first time from the pay of the armed forces effective January 1, 1949.

Current payments other than withheld decrease because of the large overpayments in the first half of the calendar year 1948 which will be partially offset by reduced payments made in the fiscal year 1949 on declarations and final returns for calendar year 1948 incomes. The overpayments arose because the tax reductions contained in the Revenue Act of 1948 were applicable to the entire calendar year 1948 although the act was not passed until April 2, 1948, and reduced rates of withholding did not go into effect until May 1, 1948.

Back taxes are estimated to increase slightly.

*Corporation income and excess profits taxes.*—The details of the taxes from this source appear in the table below.

Source	Actual, 1948	Estimated, 1949	Increase
	In millions of dollars		
Income and excess profits taxes.....	8,930.6	10,354.0	1,423.4
Back income and excess profits taxes.....	1,243.8	1,355.0	111.2
Total corporation income and excess profits taxes.....	10,174.4	11,709.0	1,534.6

Corporation income and excess profits tax receipts in the fiscal year 1948 reflect incomes and tax provisions of the calendar years 1946 and 1947, while receipts in the fiscal year 1949 reflect incomes and tax provisions of the calendar years 1947 and 1948. The rising trend of corporate income during the calendar years 1946, 1947, and 1948 is responsible for the increase in estimated receipts. It is estimated that back tax receipts will rise also and consequently that total receipts from corporation income and excess profits taxes will be higher in the fiscal year 1949 than in 1948.

*Miscellaneous internal revenue.*—Receipts from this source by major groups are listed in the following table.

Source	Actual, 1948	Estimated, 1949	Increase, or decrease (—)
	In millions of dollars		
Estate and gift taxes.....	899.3	797.0	—102.3
Liquor taxes.....	2,255.3	2,333.0	77.7
Tobacco taxes.....	1,300.3	1,341.0	40.7
Stamp taxes.....	79.5	76.0	—3.5
Manufacturers' excise taxes.....	1,649.2	1,753.0	103.8
Retailers' excise taxes.....	469.9	467.0	—2.9
Miscellaneous taxes.....	1,657.5	1,745.0	87.5
Adjustment to daily Treasury statement basis.....	—9.6	.....	9.6
Total miscellaneous internal revenue.....	8,301.4	8,512.0	210.6

Estate and gift taxes are the only major tax source included in miscellaneous internal revenue which are expected to decline appreciably in the fiscal year 1949 as compared with actual receipts in 1948. Reduced collections are estimated from this source because of the Revenue Act of 1948 which allowed special treatment of transfers between spouses for both the estate and gift taxes, substantially reducing tax liabilities. The changes made by the Revenue Act of 1948 will not be fully effective for some time because of the fifteen months' lag between the date of death and the date of filing the return which is permissible under estate tax laws.

Collections from most of the excise taxes are estimated to increase in the fiscal year 1949 as compared with actual receipts in 1948, reflecting an estimated increase in disposable personal income.

*Employment taxes.*—The yields of the various employment taxes are shown below.

Source	Actual, 1948	Estimated, 1949	Increase, or decrease (—)
	In millions of dollars		
Federal Insurance Contributions Act.....	1,616.2	1,754.0	137.8
Federal Unemployment Tax Act.....	207.9	229.0	21.1
Railroad Retirement Tax Act.....	557.1	616.0	58.9
Railroad Unemployment Insurance Act <sup>1</sup> .....	14.5	11.0	—3.5
Total employment taxes.....	2,395.7	2,610.0	214.3
Deduct: Appropriation to Federal old-age and survivors insurance trust fund.....	1,616.2	1,754.0	137.8
Net employment taxes.....	779.5	856.0	76.5

<sup>1</sup> Not classified as an employment tax under the Internal Revenue Code.

The estimated increase in receipts in the fiscal year 1949 over 1948 is based on higher industrial and railroad pay rolls and on an increase in the tax rate under the Railroad Retirement Tax Act. The rate change from 5½ percent to 6 percent each on the carriers and on their employees beginning on January 1, 1949, will be reflected in receipts under this act beginning with the last quarter of the fiscal year 1949. Because of a provision of Public Law 379, approved August 6, 1947, the rates of tax under the Federal Insurance Contributions Act remain at 1 percent each on the employer and employee during the period reflected in the receipts.

The slight decrease in receipts under the Railroad Unemployment Insurance Act is a consequence primarily of Public Law 744, approved June 23, 1948, which reduced receipts allocable to this account, for the period under consideration, from three-tenths to two-tenths of one percent of pay rolls (not in excess of \$300 per month per employee). Although the credit, established in favor of the railroads at the beginning of the fiscal year 1949 by the retro-

active feature of the act, was sufficient to offset all payments that otherwise would have been made in the fiscal year 1949 and part of those that would have been made in the first quarter of the fiscal year 1950 on account of railroad unemployment insurance contributions for administrative expenses, such offsets will be compensated by equivalent transfers from the railroad unemployment insurance trust fund.

*Customs.*—Customs receipts are estimated to be \$407.0 million in the fiscal year 1949 or \$14.7 million less than in the fiscal year 1948. This decrease is due primarily to the rate concessions which were made by the United States under the Geneva Trade Agreement of October 30, 1947, and which became effective on January 1, 1948, by virtue of the Presidential Proclamation of December 16, 1947. These rate concessions were reflected in customs receipts for only the last half of the fiscal year 1948, but will be reflected in such receipts for the entire fiscal year 1949.

*Miscellaneous receipts.*—The estimated decrease in miscellaneous receipts from the fiscal year 1948 to 1949 is due in large part to the tapering off of the surplus property disposal program and other war-connected activities.

*Refunds of receipts.*—Refunds of receipts are estimated to amount to \$2,709.4 million in the fiscal year 1949 as compared with actual refunds of \$2,271.9 million in 1948. Amounts withheld under the individual income tax in the first four months of the calendar year 1948 were based on rates which were reduced retroactively to January 1, 1948. The consequent large amounts of excess withholdings are reflected in refunds to be made in 1949.

### FISCAL YEAR 1950

Estimated receipts in the fiscal years 1949 and 1950 are compared by major sources in the following table.

Source	Estimated receipts		Increase, or decrease (—)
	1949	1950	
In millions of dollars			
Individual income tax .....	18,530.0	19,135.0	605.0
Corporation income and excess profits taxes .....	11,709.0	12,252.0	543.0
Miscellaneous internal revenue .....	8,512.0	8,553.0	41.0
Employment taxes <sup>1</sup> .....	2,610.0	3,324.0	714.0
Customs .....	407.0	407.0	—
Miscellaneous receipts .....	2,275.7	1,749.7	—526.0
Total budget receipts .....	44,043.7	45,420.7	1,377.0
Deduct:			
(a) Appropriation to Federal old-age and survivors insurance trust fund .....	1,754.0	2,420.0	666.0
(b) Refunds of receipts .....	2,709.4	2,097.1	—612.3
Net budget receipts .....	39,580.3	40,903.6	1,323.3

<sup>1</sup> Includes Railroad Unemployment Insurance Act receipts.

Net budget receipts in the fiscal year 1950 are estimated to amount to \$40,903.6 million, an increase of \$1,323.3 million over estimated net budget receipts in 1949. A large part of this increase is caused by the estimated decrease of \$612.3 million in refunds of receipts. The increase in net budget receipts excluding the change in refunds is \$711.0 million. Increases are estimated in receipts from all tax sources with the exception of customs which remain unchanged, but the total increase from tax sources is offset to a considerable extent by the large decrease estimated in miscellaneous receipts, which consist for the most part of receipts from nontax sources.

*Individual income tax.*—The details of the yield of the individual income tax are shown in the following table.

Source	Estimated receipts		Increase, or decrease (—)
	1949	1950	
	In millions of dollars		
Withheld.....	10,414.0	10,680.0	266.0
Not withheld.....	7,446.0	7,807.0	361.0
Back taxes.....	670.0	648.0	—22.0
Total individual income tax.....	18,530.0	19,135.0	605.0

Receipts from individual income taxes in the fiscal year 1950 are estimated to increase \$605.0 million over 1949. This increase results from the estimated rise in incomes reflected in 1950 receipts and from the fact that payments of current income taxes other than withheld are estimated to be abnormally low in 1949 as a result of the Revenue Act of 1948.

Withholding receipts are estimated to increase as a result of the estimated rise in salaries and wages subject to withholding. The pay of members of the armed forces will be subject to withholding for the full fiscal year as compared with one-half year in the fiscal year 1949.

Current payments other than withheld increase \$361.0 million in the fiscal year 1950 principally because payments in the fiscal year 1949 from this source will be reduced by overpayments on calendar year 1948 liabilities made in the last half of the fiscal year 1948 prior to the enactment of the Revenue Act of 1948 which reduced tax rates and base retroactively to January 1, 1948.

Back taxes are estimated to decrease slightly.

*Corporation income and excess profits taxes.*—The details of the receipts from this source appear in the following table.

Source	Estimated receipts		Increase
	1949	1950	
	In millions of dollars		
Income tax.....	10,354.0	10,756.0	402.0
Back income and excess profits taxes.....	1,355.0	1,496.0	141.0
Total corporation income and excess profits taxes.....	11,709.0	12,252.0	543.0

The combined income level for the calendar years 1948 and 1949 is estimated to be greater than the combined income level for the calendar years 1947 and 1948 and current income tax receipts accordingly are estimated to be greater in the fiscal year 1950 than in the fiscal year 1949. Back tax receipts, which are estimated to be slightly greater in the fiscal year 1950 than in the fiscal year 1949, reflect primarily the rising trend of incomes during the calendar years 1946, 1947, and 1948.

*Miscellaneous internal revenue.*—Receipts from the major groups of taxes included in this source are listed in the following table.

Source	Estimated receipts		Increase, or decrease (—)
	1949	1950	
	In millions of dollars		
Estate and gift taxes.....	797.0	653.0	—144.0
Liquor taxes.....	2,333.0	2,419.0	86.0
Tobacco taxes.....	1,341.0	1,368.0	27.0
Stamp taxes.....	76.0	75.0	—1.0
Manufacturers' excise taxes.....	1,753.0	1,763.0	10.0
Retailers' excise taxes.....	467.0	478.0	11.0
Miscellaneous taxes.....	1,745.0	1,797.0	52.0
Total miscellaneous internal revenue.....	8,512.0	8,553.0	41.0

No appreciable change is anticipated in collections in the fiscal year 1950 from the major excise tax groups included in miscellaneous internal revenue, as income levels are expected to be about the same in both of the fiscal years 1949 and 1950. Estate and gift tax collections are estimated to decrease further because of the impact of the Revenue Act of 1948 which will become fully effective for the great bulk of the returns filed in the fiscal year 1950.

*Employment taxes.*—The yields of the various employment taxes, under existing legislation, are as follows:

Source	Estimated		Increase
	1949	1950	
In millions of dollars			
Federal Insurance Contributions Act.....	1,754.0	2,420.0	666.0
Federal Unemployment Tax Act.....	229.0	239.0	10.0
Railroad Retirement Tax Act.....	616.0	654.0	38.0
Railroad Unemployment Insurance Act <sup>1</sup> .....	11.0	11.0	.....
Total employment taxes.....	2,610.0	3,324.0	714.0
Deduct: Appropriation to Federal old-age and survivors insurance trust fund.....	1,754.0	2,420.0	666.0
Net employment taxes.....	856.0	904.0	48.0

<sup>1</sup> Not classified as an employment tax under the Internal Revenue Code.

The estimated increase in employment tax receipts in the fiscal year 1950 over 1949 is based on higher industrial and railroad pay rolls, on changes in the tax rates, and on a prospective change in the method of collection of taxes under the Federal Insurance Contributions Act. The rate change under the Railroad Retirement Tax Act from 5½ percent to 6 percent each on the carriers and on their employees beginning on January 1, 1949, will be reflected in receipts for the last quarter only of the fiscal year 1949 but for all four quarters of the fiscal year 1950. The rate change under Public Law 379, approved August 6, 1947, amending the Federal Insurance Contributions Act, from 1 percent to 1½ percent each on the employer and employee beginning on January 1, 1950, would be reflected under the present method of collections in receipts beginning with the last quarter of the fiscal year 1950; and the prospective regulation which will place the collection of most of the tax imposed by the Federal Insurance Contributions Act on a monthly instead of a quarterly basis with respect to wages paid after June 30, 1949, will further increase the receipts under this act in the fiscal year 1950.

*Customs.*—Customs receipts are estimated to be \$407.0 million in the fiscal year 1950, continuing at the same level estimated for 1949.

*Miscellaneous receipts.*—Estimated receipts from this source are expected to decrease in the fiscal year 1950, principally because of the continuing decline in receipts from the disposal of surplus property.

*Refunds of receipts.*—Refunds are estimated to be \$2,097.1 million in the fiscal year 1950 or \$612.3 million less than the abnormally large refunds estimated for 1949.

## ESTIMATES OF EXPENDITURES

Actual expenditures for the fiscal year 1948 and estimates for the fiscal years 1949 and 1950 are summarized in the following table. Further details will be found in table 103. The estimates are based upon figures submitted to the Congress in the Budget for 1950.

*Actual budget expenditures for the fiscal year 1948 and estimated expenditures for 1949 and 1950<sup>1</sup>*

[In millions of dollars. On basis of 1950 Budget document]

Adjustment to daily Treasury statement basis.....	-388.0		
Total budget expenditures.....	33,791.3	40,180.0	41,857.8

<sup>1</sup> These figures are taken from the 1950 Budget document. They are based upon the Treasury's Combined Statement of Receipts, Expenditures, and Balances, and therefore differ from figures published in the daily Treasury statement.

The figures exclude refunds of receipts (now reported as deductions from receipts) and payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings.

The figures exclude transfer in 1948 of \$3 billion to the Foreign Economic Cooperation trust fund pursuant to sec. 114 (f) of the Economic Cooperation Act of 1948. Budget expenditures estimated for 1949 include expenditures made out of the Foreign Economic Cooperation trust fund.

## ADMINISTRATIVE REPORTS

---

---

65

## GENERAL ADMINISTRATION

The general administrative picture throughout the Treasury has been high lighted this year by the installation of general Treasury programs, such as management studies of various bureaus, cash awards for employee suggestions, and work simplification, as well as specific organizational changes.

The management studies authorized by the Congress for the Bureau of Customs and the United States Coast Guard, conducted by the McKinsey & Company management firm and Ebasco Services, Inc., respectively, were main developments in general administration. Both of these studies were implemented through steering committees, which were made up of officials from the interested bureaus and the Office of the Secretary. Just prior to the end of the fiscal year, the Secretary established a committee to direct management studies of the Bureau of Internal Revenue.

More than 3,000 suggestions were received by the Treasury at departmental level under the cash awards program. For 305 of these suggestions, awards aggregating \$7,660 were authorized. The estimated first-year savings resulting from the suggestions totaled \$221,257.

Work simplification, initiated in the Bureau of Internal Revenue first, has since been applied to the Fiscal Service (consisting of the Bureaus of Accounts and the Public Debt and the Office of the Treasurer of the United States), the Bureau of Federal Supply, Secret Service, and Office of Administrative Services. The program eventually will include the entire Treasury.

The Office of Administrative Services was established, effective October 1, 1947, under Treasury Department Order No. 93, dated September 26, 1947. (See exhibit 43.) This office is composed of three divisions—Office Services, Treasury Buildings, and Treasury Space Control—which perform the general administrative functions of the Department. The functions, duties, and authorities of the Chief Clerk of the Treasury were delegated to the Director of Administrative Services. The Office as now constituted includes all of the following functions: Office of Chief Clerk; Office of the Superintendent of Treasury Buildings; the Space Control staff, formerly in the Office of the Secretary; and after July 1, 1948, the Printing Section, formerly in the Bureau of Federal Supply. Operating functions of the Printing Section, such as the preparation of copy and the reading of proof, were decentralized to the several Bureaus, but the policy and liaison work were retained in the Printing Section. At the same time, the Bureau of Internal Revenue and the United States Coast Guard were given authority to deal directly with the Government Printing Office.

BUREAU OF THE COMPTROLLER OF THE CURRENCY<sup>1</sup>

The Bureau of the Comptroller of the Currency is responsible for the execution of laws relating to the supervision of national banking associations. Duties of the office include those incident to the formation and chartering of new national banking associations, the establishment of branch banks, the consolidation of banks, the conversion of State banks into national banks, the issuance and retirement of preferred stock, and the issuance of Federal Reserve notes.

## CHANGES IN THE CONDITION OF ACTIVE NATIONAL BANKS

The total assets of the 5,004 active national banks in the United States and possessions on June 30, 1948, amounted to \$85,341 million, an increase of \$1,928 million since June 30, 1947. The deposits of the banks in 1948 totaled \$79,000 million, which was \$1,603 million more than in 1947. The loans and securities totaled \$63,844 million, an increase of \$656 million during the year. Capital funds of \$5,546 million were \$237 million more than in the preceding year.

The assets and liabilities of the active national banks are shown in the following statement.

**SUMMARY OF CHANGES IN NUMBER AND CAPITAL STOCK OF NATIONAL BANKS**

The authorized capital stock of the 5,006 national banks in existence on June 30, 1948 (including 2 banks that had discontinued business although not in formal liquidation as of that date), consisted of common stock aggregating \$1,781 million, an increase during the year of \$38 million; and preferred stock aggregating \$24 million, a decrease during the year of \$5 million. The total net increase of capital was \$33 million. During the year, charters were issued to 16 national banks having an aggregate capital of \$1.6 million of common stock only. There was a net decrease of 15 in the number of national banks in the system during the year by reason of voluntary liquidations and statutory consolidations:

More detailed information regarding the changes in the number and capital stock of national banks during the year is given in the following table.

*Organizations, capital stock changes, and liquidations of national banks, fiscal year 1948*

	Number of banks	Capital stock	
		Common	Preferred
<b>Increases:</b>			
Charters issued.....	16	\$1,550,000

Charters in force June 30, 1948, and authorized capital stock.....	5,006	1,781,086,357	24,109,977

<sup>1</sup> This figure differs from that shown in the preceding table. Banks that have discontinued business although not in formal liquidation do not submit reports of condition but are included in this table.

## BUREAU OF CUSTOMS

The principal functions of the Bureau of Customs are to enter and clear vessels; supervise the discharge of cargo; ascertain the quantities of imported merchandise, appraise and classify such merchandise, and assess and collect the duties thereon; control the customs warehousing of imports; inspect international traffic by vessel, highway, railway, and air; review protests against the payment of duties; determine and certify for payment the amount of drawback due upon the exportation of articles produced from duty-paid or tax-paid imports; prevent smuggling, undervaluations, and frauds on the customs revenue; issue documents and signal letters to vessels and prepare publications and reports in connection therewith; apprehend violators of the customs and navigation laws; enforce the Antidumping Act; and perform certain duties under the Foreign Trade Zones Act.

## REVENUE COLLECTIONS

The total revenue collected by Customs in the fiscal year 1948 was \$542,078,499 as compared with \$623,234,450 in 1947, a decrease of 13 percent. These totals include items collected for other governmental agencies such as internal revenue taxes for the Bureau of Internal Revenue and head taxes for the Immigration Service. Actual collections from duties, fines, penalties, forfeitures, etc., amounted to only

\$425,825,969, a decrease of 14 percent from the previous year's total of \$497,533,914.

The downward trend of collections which began during the last five months of the fiscal year 1947 continued at a lessened rate during 1948, with the result that the collections for each month of 1948 were smaller than for the corresponding month of the previous fiscal year. In only one month, October 1947, did the customs collections exceed forty million dollars whereas in each of the first seven months of the previous year the collections were above that point. The types of collections during the last two years are shown in table 8.

The bulk of customs collections consists of duties paid by the importers at the time of the entry of the merchandise or when withdrawn from warehouse for consumption. The decline in collections, therefore, indicates a somewhat lower volume of merchandise than during the peak months of the previous year when large quantities of goods which had long been absent from the American market had been imported. A part of the decrease in customs collections was due to the lower rates of duty provided on many commodities under the terms of the Geneva Trade Agreement. An illustration of the effect of these lower rates is found in the imports of distilled liquors, of which there were 12,427,000 gallons during 1948 as compared with 13,505,000 gallons in 1947, a decrease of 8 percent. Duties collected on such imports, however, amounted to only \$24,674,000 in 1948 as compared with \$32,445,000 in the previous year, a decrease of 24 percent.

The largest single source of customs revenue during recent years has been from duties on imports of unmanufactured wool. But in 1948 the quantity of such wool which was entered or withdrawn from warehouses for consumption was only 457 million pounds as compared with 525 million pounds during the previous year, and a corresponding reduction in the revenue resulted.

On the other hand, imports of sugar, another important source of customs revenue, exceeded those in 1947 and yielded greater revenue by approximately \$6 million.

The many changes in commodity classifications and rates of duty resulting from the Geneva Trade Agreement, a large part of which became effective on January 1, 1948, with subsequent changes as others of the signatory nations complied with the terms of the Agreement, have made it impossible to compute duty collections by tariff schedules and by countries since January 1, 1948. The tables usually appearing in this report covering duty collections by countries have been omitted, therefore, this year and the collections by tariff schedules are carried only through December 1947. The latter data appear in table 85.

The largest amount of revenue continues to be collected at New York City where \$179 million, or 42 percent of the total collected in all districts, was turned over to the Treasury. This constitutes a decrease of almost 7 percent from the total collected in New York during the previous year. Most of the other customs districts where substantial collections are made underwent an even greater decline in income. At Boston, where approximately three-fourths of the collections are the result of duties on imports of wool, collections were less than two-thirds as large as in 1947. Increased collections were recorded in only 14 of the 44 customs districts and of these the only

ones of much importance from the revenue viewpoint were New Orleans, Maryland, and San Francisco. Customs collections by districts are shown in table 83.

The decrease in customs collections was accompanied by an increase in the value of dutiable imports which rose from \$2,098 million in 1947 to \$2,491 million in 1948, an increase of almost 19 percent. Increases in unit costs accounted to a considerable extent if not entirely for the greater value of dutiable imports despite a decrease in revenue derived therefrom. Normally 70 percent of customs revenue is derived from specific duties based on the quantity rather than on the value of the merchandise, and only 30 percent from goods dutiable at ad valorem or compound rates where the increased value might effect an increase in revenue. It is evident that the rise in unit costs has only a limited relationship to the total customs collections and, since many of the ad valorem as well as specific rates of duty were reduced after January 1, 1948, the decline in revenue, even though accompanied by an increase in the value of the merchandise from which that revenue was derived, is entirely explicable.

#### MOVEMENT OF PERSONS BY VESSELS, TRAINS, AIRPLANES, AND AUTOMOTIVE VEHICLES

Almost eighty-two million persons arrived at this country's seaports or crossed the land borders during the fiscal year 1948, an increase of three million over the previous year. For the seventh consecutive year the number of automobiles crossing the Canadian and Mexican borders showed an increase. More than sixteen million automobiles and busses cleared customs in 1948 bringing in fifty-one million passengers. The number of persons using passenger trains to reach the United States continued the decline in evidence since the close of the war. Slight declines were also recorded in the number of persons arriving by small undocumented vessels and in the number of pedestrians crossing the border. The number of persons arriving on ocean-going vessels, ferries, aircraft, streetcars, and other vehicles in every case exceeded the number using these means of transportation in 1947. Tables 87 and 88 show the volume of traffic into the United States in 1947 and 1948.

#### DRAWBACK TRANSACTIONS

Drawback amounting to 99 percent of customs duties paid at the time the goods were entered is allowed on the export of merchandise manufactured from imported materials. The total drawback allowed in 1948 was \$10,430,065, a decrease of 3 percent from the total allowed in the previous year. The more important items used in manufacturing the exported products during 1948 were sugar, wool, aluminum, tobacco, copper, and petroleum. Tables 89 and 90 show the drawback transactions for 1947 and 1948 and the principal commodities on which drawback was paid.

#### PROTESTS AND APPEALS

Partly as a hold-over from the large volume of imports during 1947, the number of protests filed by importers against the rate or amount

of duty assessed or other action by the collector showed a sharp increase in 1948. Appeals for reappraisal filed by importers who did not agree with the appraiser as to the value of the merchandise, however, remained approximately the same as during the previous year. The following table shows the number of protests and appeals filed and acted on in 1947 and 1948:

Status	1947	1948	Percentage increase, or decrease (-)
Protests:			
Filed with collectors by importers.....	6,960	9,567	37.5
Allowed by collectors.....	497	422	-15.0
Denied by collectors and forwarded to customs court.....	6,663	7,660	15.0
Appeals for reappraisal filed with collectors.....	5,091	5,156	1.3

### APPRAISEMENT OF MERCHANDISE

Although all types of entries of merchandise were more numerous in 1948 than in the previous year, there were fewer examinations of merchandise at appraisers' stores than in 1947. The invoices handled, on the other hand, showed an increase of approximately 8 percent. This increase in paper work was absorbed without an increase in personnel but at the expense of careful review.

Fewer mail packages were examined than in 1947, because of a further decline in the number of gift and other packages sent by Army personnel overseas. Since there were more mail entries than in 1947, the decrease in mail packages examined may not indicate any lessening of commercial importations of small size through the mails.

During the early part of the year a rather strange situation developed regarding shipments from Italy. Either in response to rumors spread throughout Italy that the American people were suffering from lack of food or to a feeling of gratitude for our aid to that country, large numbers of packages of Italian olive oil, food, and fruit began arriving in this country, causing great congestion at the appraisers' stores where all such packages had to be examined. Much of the meat and fresh fruits were prohibited items since they were infested with the Mediterranean fruit fly, the pink cotton bollworm, and other pests, and untold damage would have resulted in Florida and California if the contents had not been destroyed. Steps were taken to stop these shipments just as similar arrangements were made to discontinue gift shipments from Greece in 1947.

### CUSTOMS INFORMATION EXCHANGE

The Customs Information Exchange, located in New York, N. Y., is a central clearing house for information with respect to the classification and valuation of merchandise by the Customs appraisers. The reports received and records maintained are designed to provide uniformity of decision among the various appraisers throughout the Customs Service. The work of the Customs Information Exchange was maintained at about the same level as in 1947, as shown in the following table.

Activity	Number, 1947	Number, 1948	Percentage increase, or decrease - (-)
Appraisers' reports of value or classification received .....	29,320	28,648	-2.3
Differences in classification reported .....	3,153	2,569	-18.5
Differences in value reported .....	3,763	4,118	9.4
Requests for foreign investigations .....	476	629	32.1

### LABORATORIES

The nine Customs laboratories, maintained for the purpose of testing representative samples of sugar, wool, metals, and other merchandise to aid in determining the correct assessment of duties, tested 73,001 samples, or an increase of more than 20 percent over 1947.

In addition to its regular assignments, laboratory work continued to be performed for the Bureau of Federal Supply on the testing of governmental purchases of strategic materials.

### LAW ENFORCEMENT ACTIVITIES

The law enforcement activities of the Customs Service consist of the seizure of merchandise which has been fraudulently declared or illegally introduced into this country and of the investigation of violations discovered after the entry of merchandise. Merchandise seizures were more numerous and had a slightly larger value than during the previous year. Many of the seizures covered articles for personal use, such as jewelry, watches, furs, and other wearing apparel. The increased value of such seizures indicated the greater volume of tourist travel.

Seizures of narcotics were more numerous than in 1947 and resulted in the seizure of a larger quantity of narcotic drugs than in the previous year. As compared with only 1,267 ounces in 1947, 4,505 ounces of raw opium were seized in 1948. This was largely of Iranian, Indian, and Turkish origin. The quantity of Mexican opium seized was much less than in 1947 as a result of the vigorous opium poppy destruction campaign conducted in Mexico. Almost double the quantity of marihuana was seized during 1948 as during the previous year. There were fewer seizures of distilled liquors and wines than in 1947 but the gallons and value of these seizures were much greater. There was a large increase in the seizure of other prohibited articles primarily because of the seizure at Laredo, Tex., of lottery tickets valued at more than one and one-half million dollars.

Fewer automobiles, trucks, and boats were seized than in 1947; but in connection with the illicit landing of merchandise, 7 airplanes were seized as compared with 2 in 1947.

Seizures for violations of the customs laws are shown in tables 91 and 92.

### INVESTIGATIVE AND PATROL ACTIVITIES

The investigative arm of the Customs Service, the Customs Agency Service, investigates all important criminal cases covering the violations of Customs laws and also conducts many other examinations where expert investigative ability is needed. Although fewer investigations were conducted in 1948 than during the previous year, many

important recoveries were effected as a result of the investigations. In one case diamonds valued at more than one hundred thousand dollars, which had been smuggled from Belgium, were found buried on the shore of a small lake in New Jersey. In another case, alcohol invoiced at \$390,000 was found to be valued at \$1,350,000.

After the abolishment, as an economy measure, of the Canadian Border Patrol as of June 28, 1947, the question of discontinuing the mobile patrol officers along the Mexican border was considered. It was finally decided as of June 30, 1948, that the Mexican Border Patrol should be discontinued. The personnel previously assigned to this work who wished to remain in the Customs Service were transferred to other duties.

In the course of their regular duties Customs personnel often discover violations of other than Customs laws. During 1948, 13,301 seizures were made for other governmental agencies, 13,049 of which were for the Department of Agriculture. In addition, 199 persons were apprehended, of whom 169 were for the Immigration and Naturalization Service.

Table 93 summarizes the investigation activities during the last 2 years.

#### FOREIGN TRADE ZONES

Foreign Trade Zone No. 1 in New York continued its operations on Staten Island.

Foreign Trade Zone No. 2 in New Orleans which began operations on May 1, 1947, received 22,571 tons of merchandise during the fiscal year 1948 valued at almost \$9,000,000 and collected more than \$171,000 in duties on goods released for entry into Customs territory.

#### LEGAL PROBLEMS AND PROCEEDINGS

Of special importance during the fiscal year 1948 was the issuance of instructions for the conversion of certain currencies for which two or more rates of exchange had been certified by the Federal Reserve Bank of New York. These instructions made possible the disposition of a large number of cases in which appraisement had been withheld and liquidation suspended because multiple exchange rates were involved.

Action was initiated in collaboration with the Department of Justice to secure the disposition of a large number of customs inspectors' overtime cases pending in the Court of Claims on the basis of the case of *O'Rourke v. United States* (109 Ct. Cls. 33), which extended the doctrine laid down by the Supreme Court in the case of *Myers v. United States* (320 U. S. 561, 321 U. S. 750) to services performed at public bridges, highways, and other free facilities.

During the second year of the administration of the Federal Tort Claims Act of 1946, 12 claims involving \$2,134.19 were submitted, of which 7 involving \$423.06 were allowed and the balance disallowed.

#### MISCELLANEOUS

*Changes in customs ports and stations.*—Customs stations at Morgan City, La.; Bremerton and Port Orchard, Wash.; Taku Inlet, Alaska; Estcourt, Quebec; and Boquillas, Tex., were established during the

year; and those at Quebec, Canada, and Perry's Mill, N. Y., were discontinued. No changes were made in any customs ports of entry.

*Cost of administration.*—During the fiscal year 1948, the Customs Service incurred expenses of \$32,262,856 for collecting the revenue and for printing. This was \$1,065,399 less than during the previous year. This saving was a result of the discontinuance of the Canadian Border Patrol officers and of many of the port patrol officers who had been employed for special wartime services. The expenses do not include salaries paid to Customs personnel for overtime and other services authorized by law for which reimbursement was made to the appropriation by parties interested. Even with the reduced expenditures, the reduction in collections caused the cost of collecting \$100 revenue to rise from \$5.35 in 1947 to \$5.95 during 1948. A summary of the collections and expenditures for 1948 will be found in table 94.

### BUREAU OF ENGRAVING AND PRINTING

The Bureau of Engraving and Printing designs, engraves, and prints currency, bonds, certificates, stamps, and various other official documents and forms. Deliveries of finished work during the fiscal year 1948 amounted to 574,505,065 sheets, an increase of 15,052,792 sheets, or 2.7 percent, in comparison with the quantity delivered during the previous fiscal year.

A comparative statement of deliveries of finished work in the fiscal years 1947 and 1948 follows:

Class	Sheets		Face value, 1948
	1947	1948	
<b>Currency:</b>			
United States notes.....	3,470,000	3,605,000	\$175,260,000

Canal Zone, Series 1948.....	½, 1½, 25
Canal Zone Biological Area 25th Anniversary Commemorative, Series 1948.....	10

New dies and plates were prepared for United States savings bonds, military certificates, revenue stamps for snuff and tobacco, migratory-bird hunting stamps, and miscellaneous certificates, commissions, diplomas, invitations, and letterheads for various governmental agencies.

Engraving was begun on a new \$20 uniform currency back showing a revised vignette of the White House. The revision depicts the edifice in a slightly larger size than on the old currency, and incor-

porates structural alterations of the building and changes in the surrounding landscape which have been made in recent years.

Under arrangements made through the Department of State, orders were executed for Cuban silver certificates and Philippine Treasury certificates. These currencies were produced from plates which had been engraved by the Bureau and used for previous orders.

In September 1947, a special committee appointed by the Secretary of the Treasury began the audit and destruction, by incineration, of the surplus stocks of allied military lira currency which remained on hand from orders placed by the Department of the Army. Later, authority was received to release for destruction the surplus stocks of \$10 military certificates, also produced for that agency. The project was completed in January 1948.

In November 1947, air mail stamps were processed for the first time in coil form. The work was produced from 170-subject plates by the rotary printing method and delivered in coils of 500 stamps each.

Effective December 28, 1947, the physical custody of unissued Federal Reserve notes was transferred from the joint custody of the Director of the Bureau and the Secretary of the Treasury to the joint custody of the Federal Reserve Issue and Redemption Division of the Bureau of the Comptroller of the Currency and the Secretary of the Treasury. The employees engaged in the custody and shipment of this currency were transferred to the Bureau of the Comptroller of the Currency. This action was taken in accordance with Treasury Department Order No. 95, dated December 29, 1947, and resulted in the abolishment of the Federal Reserve Vault Division of this Bureau.

The total personnel at the beginning of the fiscal year comprised 5,909 employees. During the year, 777 appointments were made and 835 employees were separated from the service, leaving 5,851 employees on the rolls at the end of the year.

Expenditures amounted to \$24,089,161.24, an increase of \$3,990,080.93, or 19.9 percent, as compared with the previous year. The following statement shows the appropriations, reimbursements, and expenditures for the fiscal years 1947 and 1948.

	1947	1948	Increase or decrease (—)
<b>Appropriations:</b>			
Salaries and expenses.....	\$12,689,400.00	\$13,250,000.00	\$560,600.00
Printing and binding.....	5,500.00	5,000.00	—500.00
Reimbursements to appropriations from other bureaus for work completed: <sup>1</sup>			
Salaries and expenses.....	7,450,855.42	10,929,197.68	3,478,342.26
Printing and binding.....	5,500.00	6,000.00	500.00
<b>Total.....</b>	<b>20,151,255.42</b>	<b>24,190,197.68</b>	<b>4,038,942.26</b>
<b>Expenditures:</b>			
Salaries and expenses.....	20,088,421.25	24,078,602.12	3,990,180.87
Printing and binding.....	10,659.06	10,559.12	—99.94
<b>Total.....</b>	<b>20,099,080.31</b>	<b>24,089,161.24</b>	<b>3,990,080.93</b>
<b>Unexpended balance.....</b>	<b>52,175.11</b>	<b>101,036.44</b>	<b>48,861.33</b>

<sup>1</sup> Additional amounts of \$50,065.59 for 1947 and \$23,287.69 for 1948 were received from employees for Government property lost or damaged, for refunds of terminal leave compensation, from reimbursements for jury service, for overpayment of salary due to excess leave, etc., and to correct discrepancies in paper accounts of Bureau; from firms for empty drums returned by Bureau; and from refunds by employees and firms and reimbursements for work done for various agencies. These amounts were deposited in appropriate accounts.

## BUREAU OF FEDERAL SUPPLY

The Bureau of Federal Supply procures and distributes supplies, materials, equipment, and services for Federal establishments; stores and inspects the items procured; and determines the policies, methods, and purchasing standards required for these procedures.<sup>1</sup> The Bureau maintains facilities for technical operations allied to supply, such as traffic management and public utilities. At the direction of the Munitions Board, the Bureau purchases and inspects strategic and critical materials for inclusion in the national stock pile. The Bureau also conducts other special purchasing programs as directed by Congress.

## PROCUREMENT

Specialists in procurement and marketing of the Bureau of Federal Supply enter into contracts for the purchase of supplies, materials, and equipment for Federal agencies' departmental and field services and also perform the same services for special programs. Liaison is maintained with other Government agencies and, in the case of special programs, through the State Department with officials of foreign nations.

Contracting and purchasing by the Bureau for regular governmental requirements are generally effected in accordance with section 3709 of the Revised Statutes, as amended, requiring advertising for bids, public bid openings, and award of contract to lowest responsible bidders.

Two types of contracts are used: Indefinite quantity (sometimes called open-end or term), which have been made for approximately 40,000 items listed in the Federal Supply Schedule; and definite quantity contracts, which are made for items not covered by the schedule.

The following table shows the dollar volume of purchases made by the Bureau of Federal Supply during the fiscal years 1947 and 1948:

Purpose	1947	1948
Regular activities.....	\$46, 173, 933	\$56, 778, 062
Greek-Turkish assistance (Public Law 75, May 22, 1947).....		12, 762, 094
Relief in war-devastated countries (Public Law 84, May 31, 1947).....		5, 681, 739
Foreign aid (Public Law 389, Dec. 17, 1947).....		2, 201, 930
China aid (Public Law 393, Dec. 23, 1947).....		537, 089
Economic Cooperation Administration (Public Law 472, April 3, 1948).....		308, 107
Strategic and critical materials (Public Law 520, July 23, 1946).....	68, 888, 533	252, 901, 412
Lend-lease.....	42, 676, 468	
United Nations Relief and Rehabilitation Administration.....	162, 220, 315	
American Red Cross.....	2, 871	
Coal program for certain foreign countries.....	28, 504, 859	
Total purchases.....	348, 466, 979	331, 170, 433
Purchases by other agencies from Federal Supply Schedule.....	84, 000, 000	88, 926, 428

## PRINTING

In addition to the preceding purchases, the Bureau, through its printing section, placed orders with Government and commercial services totaling \$4,949,957.

<sup>1</sup> The Bureau's basic authorities derive from Executive Order 6166 and Reorganization Act of 1933 (47 Stat. 1517).

## GOVERNMENT REQUIREMENTS

The Government Requirements Division coordinates the various functions of the Bureau of Federal Supply with similar functions in other Federal agencies. Surveys and studies made by this Division form the bases upon which procurement policies and methods are established.

During the fiscal year 1948 the Division participated in a Joint Property Accountability Survey Project (with the Bureau of the Budget and the General Accounting Office), for simplifying and installing more uniformly effective inventory control and property accountability systems. During the year, twenty-seven supply installations in ten agencies were studied for the purpose of increasing efficiency and economy in supply operations. One example of the economies achieved was the merger of the supply functions of the Alaska-Seattle Service Office of the Interior Department with the supply operations of the Bureau of Federal Supply at Seattle, which serves the entire Government in that area.

## STORES OPERATIONS

The stores operations are conducted on a self-supporting reimbursable basis; therefore the principles of operation are substantially like those of a private enterprise, except that the objective is to recover costs as distinguished from the profit motive of commercial concerns.

During the fiscal year 1948 the Bureau of Federal Supply operated supply centers in Washington, D. C. (Central Warehouse), Boston (Branch Center), New York, Cleveland, Chicago, Atlanta, Fort Worth, Kansas City, Denver, San Francisco, Seattle, and Los Angeles (Branch Center). These supply centers constitute the Bureau's national system for the procurement, storage, and issue of supplies in common use by the Federal and the District of Columbia Governments.

These operations are financed by the general supply fund, which is a revolving fund established pursuant to the act of February 27, 1929 (45 Stat. 1341), as amended, and is available to finance purchases by the Bureau of Federal Supply of stock, consolidated supplies, and services. All expenditures are made from the fund and all collections are credited to it. Expenses are recovered by service charges representing estimated handling costs. When expenses for handling are less than estimated, surpluses go into the general supply fund, and after the yearly audit by the General Accounting Office are credited to miscellaneous receipts of the Treasury.

During the year the total value of warehouse stock issues was \$22,353,925, a decrease of \$576,075 from fiscal year 1947, but an increase of \$6,516,315 over 1946.

The total sales in all activities of the general supply fund during the year amounted to \$63,566,772, as compared with \$46,173,933 during the previous year, an increase of 37.7 percent. Warehouse and Shop Services sales declined 2.5 percent and 7.3 percent, respectively. The increase in sales in the Direct Delivery class, in which deliveries are made directly to agencies rather than to Bureau supply centers, is due primarily to the automotive equipment purchase

program, in which sales totaled nearly \$20,000,000. Used automotive equipment sold, the proceeds of which were applied as part payment for new equipment, totaled 3,691 units with a sales value of \$1,775,150.

Operating income exceeded operating costs by \$186,237 during the year. This amounts to only 0.0029 percent of sales, and indicates the accuracy of the plan to recover costs, but not to make profits. The excess for the fiscal year 1947 was \$181,379, or 0.0039 percent of sales. Under Public Law 640, approved June 14, 1948, the capital of the general supply fund was increased by \$1,500,000 to a total of \$9,520,196.

A statement of the assets and liabilities of the general supply fund as of June 30, 1948, follows:

Assets	Amount	Liabilities and capital	Amount
Current assets:		Current liabilities:	
Cash.....	\$7,561,025.11	Accounts payable.....	\$15,460,388.18
Accounts receivable.....	10,681,832.53	Unearned income.....	854,927.20
Postage.....	5,520.39		
Inventories (at cost).....	7,092,163.22		
Total.....	24,740,541.25	Total.....	16,315,315.38
Fixed assets:		Capital and surplus:	
Equipment.....	388,415.24	Capital.....	8,020,196.07
		Donated capital.....	28,482.02
		Surplus.....	221,826.10
Total.....	388,415.24	Total.....	8,270,504.19
Total assets.....	25,128,956.49	Reserve for contingencies.....	543,136.92
		Total liabilities and capital.....	25,128,956.49

### UTILITY SERVICES

The Public Utilities Division of the Bureau of Federal Supply performs the technical work required for efficient procurement and utility service for Federal agencies in Washington and in the field. These utilities include electric, gas, steam, telephone, teletypewriter, telegraph, and cable services. During the year the Division reduced the Washington, D. C., Government telephone bill by approximately \$75,000 annually through the introduction of a dial interdepartmental switching system.

### INTERDEPARTMENTAL TRAFFIC COMMITTEE

Liaison is maintained with all agencies, including the National Military Establishment, through the Interdepartmental Traffic Committee, which was created by the Bureau of Federal Supply for the purpose of conducting continuing studies of transportation rates and services as they affect the shipment of property on which charges are paid and borne by the United States. During 1948 the Bureau's Central Traffic Services Division was instrumental in effecting a savings of approximately \$5,000,000 through reduced rates negotiated by the Division. The Division furnished 33 Government agencies with 22,283 items of rates and related information requiring 42,834 computations.

## STANDARDIZATION

The Bureau of Federal Supply, which is responsible for the standardization of materials, equipment, and supplies used by the Federal establishments, maintains a Standards Branch, charged specifically with the identification, classification, and cataloging of items of supply; with the development of Federal and Bureau of Federal Supply specifications; and with the inspection and testing of supplies purchased by the Bureau or by other agencies under the Federal Schedule of Supply term contracts.

During the year, the Bureau continued to discharge its basic responsibilities for maintenance of the Federal Standard Stock Catalog and for the development of the Federal Catalog System. Approximately 30,000 item identifications were prepared; and 86 new Federal Specifications were published, 78 were revised, and 64 amended. Nearly one million copies of Federal Specifications were furnished Government and industry; and, in addition, the Government Printing Office supplied over one and one-half million copies to the National Military Establishment.

The Bureau of Federal Supply maintains an inspecting service in the District of Columbia for inspection and testing of incoming warehouse stock, investigation of complaints of receipt of apparently inferior materials delivered on Bureau contracts, the coordination of routine inspection and testing services in the Federal Government, and the inspection in Washington and in the field of strategic and critical materials and materials for relief and assistance to foreign countries. As an additional service, a room is maintained where standard samples of articles on purchase under Federal Supply contracts are displayed for examination by representatives of Government agencies. During the year samples on display averaged 26,000.

## BLIND-MADE PRODUCTS

Under the act of June 25, 1938 (41 U. S. C. 46-48), known as the Wagner-O'Day Act, nonprofit agencies for the blind sold to the Government during the year \$1,810,549 of products made by the blind. The products sold came from 48 workshops for the blind, which gave employment to 2,412 blind persons.

## FORFEITED, SEIZED, AND ABANDONED PROPERTY

Forfeited, seized, and abandoned property totaling \$2,044,647 in appraised valuation was reported during the year to the Bureau of Federal Supply, for transfer to other Government agencies or eleemosynary institutions.

## STRATEGIC AND CRITICAL MATERIALS

In accordance with the provisions of the Strategic and Critical Materials Stock Piling Act (Public Law 520, approved July 23, 1946), the Bureau of Federal Supply, operating under directives of the Munitions Board, purchases strategic and critical materials essential in time of national emergency to industrial and military needs.

Funds in the amount of \$123,871,685 were obligated for the purchase of strategic and critical materials prior to July 1, 1947; and, during the fiscal year 1948, additional obligations amounted to \$252,-901,412, making a total of \$376,773,097.

In addition to the purchases from appropriations, the stock pile has been augmented by \$325,000,000 of strategic and critical materials declared surplus by the Reconstruction Finance Corporation and other Government agencies, and accepted by the Munitions Board. These surplus materials are being moved into permanent stock pile locations as rapidly as transportation and storage facilities permit.

### FISCAL OPERATIONS

During the year the Fiscal Branch maintained the accounts, audited the vouchers for contract payments, and prepared appropriate financial and statistical reports on the several programs being conducted by the Bureau of Federal Supply.

*Lend-lease.*—In the lend-lease program, all defense aid appropriations lapsed as of June 30, 1948. Public Law 785, approved June 25, 1948, extended, for expenditure purposes only, \$25,000,000 for the payment of obligations incurred prior to June 30, 1946, of which \$12,000,000 will be expended by the Bureau of Federal Supply. The principal obligations outstanding consist of an estimated 30,000 claims being filed by approximately sixty American railroads for the differential between commercial and land grant transportation rates on lend-lease materials. Other unliquidated obligations in this program are as follows: \$1,750,000 for claims submitted to the General Accounting Office for direct settlement; \$800,000 for supplemental freight bills; and \$750,000 for miscellaneous unpaid obligations due contractors.

Expenditures for the year totaled \$14,254,052 while collections credited to the appropriation totaled \$19,487,015, resulting in a credit of \$5,232,963.

In addition, liquidation of the lend-lease program required the termination of lend-lease contracts as follows:

	Number	Contract price of items canceled
Contracts terminated.....	2	\$333, 064
Contracts settled without cost.....	1	15, 000
Claims filed.....	2	333, 064
Claims settled.....	8	2, 729, 119

During the year, gross payments to contractors amounted to \$262,093.

*United Nations Relief and Rehabilitation Administration.*—The United Nations Relief and Rehabilitation program, except for liquidation purposes, was brought to a close on June 30, 1947. During the year unliquidated obligations were reduced from \$52,368,670 to \$97,858. Net expenditures for the year amounted to \$33,277,250, bringing the accumulated expenditures for the program to \$461,765,361.

*Other programs.*—Another program brought to a close was the "Cash Reimbursement" arrangement with foreign governments, under which funds were advanced by them for the procurement of materials and supplies. Unliquidated obligations were reduced from \$1,078,915 to a balance of \$344,979. The accumulated expenditures as of June 30, 1948, amounted to \$127,597,928.

Deposits to and disbursements from the special deposit account (suspense) were heavy during the year, primarily because of the deposit of guarantees by prospective purchasers of equipment sold by the Bureau. The account receives such deposits accompanying bids and returns deposits of unsuccessful bidders. At the beginning of the fiscal year there were in the account 255 items totaling \$287,421. During the year, 2,323 additional items were added totaling \$3,258,151 deposited. After the clearance of 1,473 items totaling \$1,445,428, the account's balance at the year end was 1,105 items totaling \$2,100,143. The increase in remaining deposits is due to the large program of selling used cars.

### FISCAL SERVICE

The Fiscal Service, at the head of which is the Fiscal Assistant Secretary, was established on June 30, 1940. The Fiscal Assistant Secretary is appointed by the Secretary of the Treasury in accordance with civil service laws. The Fiscal Service consists of the Office of the Fiscal Assistant Secretary, the Bureau of Accounts, the Bureau of the Public Debt, and the Office of the Treasurer of the United States. The work of the Fiscal Service is concerned largely with the day to day fiscal transactions of the Treasury Department. As the titles of the several offices and bureaus imply, this work has to do with the Treasury's financing, accounting, and disbursing; public debt operations; and the receipt, custody, and distribution of the public funds.

### ORGANIZATION

*Office of the Fiscal Assistant Secretary.*—The Fiscal Assistant Secretary, under the direction of the Secretary, supervises the administration of Treasury financing operations, the administration of the functions and activities of the units of the Fiscal Service, and through the Commissioner of Accounts the accounting procedures of all bureaus, divisions, and offices of the Treasury Department. The Fiscal Assistant Secretary serves as liaison between the Secretary and other agencies of the Government with respect to their financial operations in order to coordinate such operations with those of the Treasury; directs the performance of the fiscal agency functions of the Federal Reserve Banks; prepares periodic estimates of the future cash position of the Treasury for use in connection with the financing program; prepares calls for the withdrawal of funds from special depositories to meet current expenditures; directs the transfer of Government funds between Federal Reserve Banks; coordinates surveys of the constituent units of the Fiscal Service in the interest of economy and efficiency; and handles foreign exchange transactions.

*Bureau of Accounts.*—The Bureau of Accounts, under the Commissioner of Accounts, is responsible for a variety of fiscal functions and administrative matters. These include (a) maintaining the official receipt and appropriation accounts of the Government, (b) preparing annually the Combined Statement of Receipts, Expenditures, and Balances of the United States Government, (c) preparing annually the Digest of appropriations for the support of the Government of the United States for use by all departments and agencies of the Government, (d) performing the disbursing function for all executive

departments and agencies, except the military establishments, the Postal Service, certain Government corporations, the District Government, clerks of United States Courts, and United States marshals, (e) performing general supervision, under the direction of the Fiscal Assistant Secretary, over the accounting functions and activities of all the bureaus, divisions, and offices of the Treasury, (f) developing improved financial reporting systems for the Government as a whole, under the provisions of Executive Order 8512, approved August 13, 1940, as amended, (g) supervising the administration of the Federal depository system, (h) administering the Government's self-insurance fund under the Government Losses in Shipment Act, (i) performing the administrative work in connection with the investment of trust funds by the Secretary of the Treasury, and (j) performing, for the Secretary, the administrative work in the fixing of underwriting limitations of surety companies authorized to do business with the United States.

Other functions include the annual appraisal of the assets and liabilities of the Commodity Credit Corporation; the liquidation of the fiscal affairs of the Lend-Lease Administration and a number of other war agencies; certain administrative duties relating to the granting of authority to disbursing officers to carry cash at personal risk and waiving delinquencies in the rendition of disbursing officers' accounts; handling of judgments and claims for submission to Congress, through the Bureau of the Budget, and to the General Accounting Office for settlement; and reporting expenditures on a checks-issued basis and warrants-issued basis for inclusion in the Daily Statement of the United States Treasury.

*Bureau of the Public Debt.*—The Bureau of the Public Debt, under the Commissioner of the Public Debt, exercises general supervision over public debt operations. It (a) prepares offering circulars and instructions relating to each offering of public debt securities, (b) directs the handling of subscriptions and making of allotments, (c) prepares regulations governing public debt securities, (d) issues public debt securities and conducts or directs all transactions in the security issues of the United States, and in those of the insular governments and of the Government-owned corporations for which the Treasury acts as agent, (e) supplies issuing agents with securities and maintains reserve stocks, (f) maintains individual accounts with owners of registered securities and pays interest thereon by check, (g) supervises the activities relating to public debt matters of fiscal agents and agencies authorized to issue and pay savings bonds and armed forces leave bonds, (h) handles claims on account of lost, stolen, destroyed, mutilated, or defaced securities, (i) procures and supervises the manufacture of distinctive paper for printing securities and paper currency and maintains reserve stocks of such paper, (j) determines the requirements and orders the production of securities and paper currency, (k) audits securities and retired United States paper currency, and supervises the destruction of the currency and certain securities, (l) certifies to the Comptroller General the account of the Treasurer of the United States covering securities and coupons for which payment has been made, (m) maintains general accounts covering public debt issues, (n) maintains control accounts over currency and distinctive paper in process of printing at the Bureau of Engraving and

Printing, (o) maintains administrative accounts of all debt transactions conducted by the Bureau of the Public Debt, Federal Reserve Banks, Treasurer of the United States, and other official agencies, (p) maintains records of securities issued, (q) maintains files of retired securities, (r) compiles the Circulation Statement of United States Money, and (s) examines and counts mutilated and imperfect work resulting from operations of the Bureau of Engraving and Printing and supervises its destruction.

*Office of the Treasurer of the United States.*—The Treasurer of the United States is the official custodian of the public funds. All public moneys are required to be deposited to the credit of his account in Federal Reserve Banks and other designated Government depositories. He renders a monthly account of all receipts and disbursements to the Comptroller General for audit and settlement. The Office of the Treasurer (a) maintains the accounts of the sales and redemptions of public debt securities and the accounts relating to the assets and liabilities of the Treasurer's general account, a separate account being maintained for the various classifications of receipts and expenditures and with each Federal Reserve Bank and general depository, (b) maintains approximately 6,000 checking accounts of Government disbursing officers, corporations, postmasters, and agencies, and advances funds to the officers for credit in their disbursing accounts as authorized by accountable warrants, (c) maintains the accounts for the issue and redemption of United States paper currency, and for the redemption of Federal Reserve notes, Federal Reserve Bank notes, and national bank notes, and directs the shipment of currency and coin between the United States Mints, Federal Reserve Banks, etc., (d) examines and redeems public debt securities presented for redemption either direct to the Treasurer or through the various Federal Reserve Banks, (e) acts as special agent for the payment of the principal of and interest on the obligations of Government corporations and agencies and maintains the accounts to show such payments, (f) examines and redeems paper currency, (g) maintains a Cash Division in the Treasury building which receives and pays out money locally, (h) issues checks in payment of claims settled by the General Accounting Office, and (i) prepares the Daily Statement of the United States Treasury showing the assets and liabilities of the general fund and the receipts and expenditures classified under various categories, the monthly statement of the public debt, the monthly statement of the classified receipts and expenditures of the Government, and the monthly statement of paper currency outstanding by kinds and denominations. The Treasurer of the United States is Treasurer of the Board of Trustees of the Postal Savings System, custodian of other trust funds, and custodian of certain miscellaneous securities.

#### IMPROVEMENTS IN OPERATING PROCEDURES AND ACCOUNTING

The procedural staffs and operating personnel of the Office of the Fiscal Assistant Secretary and the three bureaus comprising the Fiscal Service are constantly working to develop more efficient operating procedures and better accounting and reporting methods.

Some of the more important accomplishments during the fiscal year 1948 are described in the following paragraphs.

*Government Accounting System.*—In January 1948 the Comptroller General of the United States created a new division in the General Accounting Office to deal with the prescription of accounting systems under section 309 of the Budget and Accounting Act of 1921. At the same time the Comptroller General requested the Secretary of the Treasury and the Director of the Bureau of the Budget to join with him in attacking on a broad front the problem of improving the Government's accounting system in the light of the respective responsibilities and fundamental interests of the three agencies. The Treasury, represented by the Fiscal Service, is cooperating fully in this undertaking.

*Daily Statement of the United States Treasury.*—Effective July 1, 1947, classifications of budget expenditures were rearranged almost entirely on an organizational basis without regard to programs. This rearrangement was in the interest of simplicity.

Commencing August 1, 1947, cash working balances of the Treasury with the Federal Reserve Banks were shown on the basis of telegraphic reports. Formerly, such balances were published in the daily Treasury statement on the basis of daily mail reports received from the Federal Reserve Banks. This improvement in reporting resulted in bringing the account "Deposits in Federal Reserve Banks: Available Funds," as shown in the daily Treasury statement in agreement with the related account balances shown on the books of the Federal Reserve Banks as of the date of the daily Treasury statement.

Beginning with the last issue of the daily Treasury statement for the month of November 1947, a monthly statement of appropriations, expenditures, and balances was included for the purpose of assembling expenditures in their relationship to appropriation acts.

Effective July 1, 1948, through the use of teletype facilities, expenditures of the several departments and establishments serviced by the Division of Disbursement, Treasury Department, will be reported in the daily Treasury statement as of the day on which checks are issued in payment of obligations; heretofore, such expenditures were shown in daily Treasury statements as of the dates on which reports were received by mail. Expenditures not made through the Division of Disbursement, Treasury Department, are reported on the basis of checks paid by the Treasurer of the United States, as heretofore.

*Savings bonds.*—Federal Reserve branch bank operations, previously performed in connection with savings bond issuing agent and paying agent activities, were centralized in the parent Reserve Banks with the exception of the Los Angeles, Detroit, and New Orleans Branches. During the process of centralization, tabulating equipment installations, formerly maintained separately for issuing agent activities in certain banks, were consolidated to provide a single installation in each bank. It is estimated that an annual saving of more than a million dollars has been realized through these changes.

The revision of procedure for redeeming and reissuing savings bonds of Series F and G and Series A-E resulted in a large reduction in personnel in these operations. The new procedure eliminates certain

repetitive examinations between the Federal Reserve Banks and various operating units in the Department by permitting the Federal Reserve Banks to redeem and reissue certain classes of bonds. It also provides a more economical basis for final posting of redemptions in that postings can be made from listings instead of from the bonds themselves.

*Inscribing of internal revenue refund checks by transfer posting procedures.*—The Fiscal Service has worked in close collaboration with the Bureau of Internal Revenue in developing a plan for utilizing mechanical equipment to inscribe income tax refund checks. This involves inscribing this class of checks with the name and address of the payee by direct transfer process from the voucher prepared by the collector. Study indicates that the adoption of such a procedure will result in substantial savings. A number of collectors' offices prepared refund vouchers by this method during 1948. If this experiment proves satisfactory, it will be extended to other collection districts.

*Settlement of checks.*—Checks drawn on the Treasurer of the United States, which are lost or stolen after endorsement, have in the past been referred to the Comptroller General for determination of settlement. Effective September 10, 1947, the Comptroller General authorized the Treasurer to make settlement in such instances. This authorization not only expedited settlements, but also resulted in saving money.

*Work simplification program.*—The work simplification program was adopted by the Fiscal Service in the latter part of the fiscal year. Program directors were selected and instructed and training materials adapted to meet the specific needs of the bureaus of the Fiscal Service. Although the program was still in its initial stages, by the close of the fiscal year, 342 supervisors had been trained, 170 recommendations for improvements had been submitted, and 89 of the recommended improvements had been made. Installation of these improvements makes possible the saving of 42,000 man-hours each year. It is planned to carry this program to all of the 818 first-line supervisors of the Fiscal Service by the end of the fiscal year 1949.

#### DEPOSITARIES OF PUBLIC FUNDS

The Treasurer of the United States is the official custodian of moneys of the United States Government. These funds are held in the form of gold and silver bullion, currency, and deposits in Federal Reserve Banks, national banks, and other designated domestic or foreign banks.

*Gold bullion.*—On June 30, 1948, on the basis of the daily Treasury statement, the Treasury Department held 672,355,965.9 ounces of gold bullion, which, at \$35 an ounce, was valued at \$23,532,458,806.18, an increase during the year of 64,745,877.6 ounces valued at \$2,266,105,714.30. This increase represents net acquisitions by mints and assay offices valued at \$2,265,932,947.08; noncurrent gold coin acquired at the price of \$20.67+ an ounce amounting to \$102,040.39 under regulations dated December 28, 1933, and the increment resulting from the revaluation of gold contained in these coins to \$35 an ounce, amounting to \$70,726.83.

Against this gold were liabilities of \$22,459,051,043.45, consisting of \$18,826,727,721.98 in the gold certificate fund of the Board of Governors of the Federal Reserve System and \$3,632,323,321.47 in special currency reserves. A balance of \$1,073,407,762.73 of gold remained in the general fund.

*Silver bullion.*—The silver holdings of the Treasury were valued on June 30, 1948, on the basis of the daily Treasury statement, at \$2,391,819,302.85, an increase of \$13,781,695.47 during the year.

These holdings included \$1,955,072,479.81 in bullion at monetary value, \$91,228,918.51 in bullion at cost, \$321,141.78 in bullion at recoinage value, \$334,598,786.00 in silver dollars, and \$10,597,976.75 in subsidiary coin.

Against the \$2,289,671,265.81 representing bullion held at monetary value and silver dollars were liabilities of \$2,258,934,263 for outstanding silver certificates and \$1,146,166 for outstanding Treasury notes of 1890, leaving \$29,590,836.81 in silver at monetary value in the general fund in addition to the amounts of bullion held at cost or recoinage value and the subsidiary coin as set forth above.

*Deposits.*—Public moneys on deposit to the credit of the Treasurer of the United States on June 30, 1948, on the basis of the daily Treasury statement, in designated Government depositories amounted to \$4,075,276,100.57 including items in transit. During the fiscal year 1948, 1,122 transfers aggregating \$873,648,934 were required to establish, increase, or restore the Treasurer's balances with depositories.

*Depositories for unemployment compensation funds.*—Under existing arrangements between the Treasury and the Social Security Administration and with the Veterans' Administration, certain depository and financial agents of the Government have been allotted Treasury balances and 2 percent depository bonds as a basis for servicing State Unemployment Compensation Benefit Payment and Clearing Accounts and Veterans Unemployment Compensation Benefit Payment Accounts.

As of June 30, 1948, such arrangements had been made with 71 banks to which Treasury balances totaling \$36,700,000, invested in 2 percent depository bonds, had been allotted. In addition, these banks purchased \$13,880,000 2 percent depository bonds with their own funds, making a total of \$50,580,000 2 percent depository bonds allotted for this purpose.

*Banking facilities at military and other Government installations.*—Upon request of the respective governmental agencies, the Treasury Department has continued the designation of depositories to provide banking facilities at certain Army posts, naval stations, veterans' hospitals, and other Government installations. As of VJ-day in August 1945 there were 361 such banking facilities in operation, the largest number during the war period. By June 30, 1946, this number had been reduced to 98, and by June 30, 1948, to 71. The following statement shows the number and classes of limited banking facilities

at military, naval, and other Government installations at the peak of operations and on June 30, 1948:

Location of facilities	Facility authorizations in force	
	In August 1945	As of June 30, 1948
Army posts and camps.....	123	9
Army air fields.....	117	4
Army hospitals.....	49	7
Total Army facilities.....	289	20
Navy yards and stations.....	51	28
Navy hospitals.....	5	3
Marine Corps activities.....	7	5
Total Navy facilities.....	63	36
Veterans' hospitals.....		11
Other Government installations.....	9	4
Total facilities.....	361	71

*Depositories of the United States.*—On June 30, 1948, there were 13,269 banks designated as depositories of public moneys and holding funds on deposit for credit to the Treasurer of the United States and other Government officers. This number included 1,725 general and limited depositories with which accounts to the credit of these officers were maintained, and 10,722 special depositories which held the proceeds of sales of United States securities. There were 9,579 banks qualified as depositories for withheld taxes, of which 636 held time deposits for credit to the Treasurer of the United States. The depository facilities available June 30, 1948, are shown by classes in the following table:

Class	Number of facilities	Deposits to the credit of the Treasurer, U. S., June 30, 1948 <sup>1</sup>
Federal Reserve Banks.....	12	\$2,050,509,513.80
Other banks in continental United States:		
General depositories.....	701	182,575,817.24
Limited depositories.....	992	
Special depositories, withheld taxes and sales of United States securities.....	10,722	1,772,641,417.23
Depositories for withheld taxes, time deposits.....	636	8,276,500.00
Insular and territorial depositories.....	32	22,232,437.41
Foreign depositories.....	174	39,040,414.89
Total.....	13,269	4,075,276,100.57

<sup>1</sup> Excludes amounts held in the names of other Government officers.

In respect to the general and limited depositories, 65 new designations were made during the year and the designations of 55 depositories were discontinued. In 281 cases the amount of the balances to the credit of Government officers which the depositories had qualified to maintain was increased, and in 383 cases this amount was decreased. There were also 319 miscellaneous changes in the status of designations.

*Depository bonds.*—Department Circular No. 660, dated May 23, 1941, as amended, prescribes the regulations of the Treasury governing

the issuance of 2 percent depositary bonds. These bonds are allotted to banks designated as depositaries and financial agents of the Government. The interest on such bonds provides an income to the banks which offsets the cost incurred by them in handling Government business.

Department Circular No. 714, dated June 25, 1943, prescribes the regulations of the Treasury governing the issuance of the second series of depositary bonds to the various qualified depositaries for withheld taxes.

Amounts of depositary bonds issued and redeemed since their inception are shown as follows:

2% depositary bonds	Issued	Redeemed	Outstanding June 30, 1948
First Series—General depositary and fiscal agency operations..	\$612, 154, 750	\$399, 801, 250	\$212, 353, 500
Second Series—Operations incident to withheld taxes.....	137, 579, 500	33, 579, 000	104, 000, 500
Total.....	749, 734, 250	433, 380, 250	316, 354, 000

*Federal home loan banks.*—The Federal home loan banks furnish funds to member savings and loan associations of the Federal Home Loan System through advances secured by mortgages or Government securities. These funds are derived from capital stock initially subscribed by the Treasury, from capital stock subscribed by members, and from the sale of their bonds and notes in the market. Pursuant to the provisions of section 14 of the Federal Home Loan Bank Act, as amended, the Treasury agreed to make deposits in the Federal home loan banks up to an aggregate amount of \$25,000,000. Deposits were made in such banks in such amounts and at such times as requested by the Home Loan Bank Board in the total amount of \$10,500,000 for all banks. These deposits were subject to the payment of interest by the banks at the rate of 1½ percent per annum, payable on June 30 and December 31. As of June 30, 1948, the total amount of \$10,500,000 had been repaid together with interest amounting to \$7,621.94.

#### COLLECTION AND DEPOSIT OF FUNDS

Collections representing funds due the United States are required to be deposited promptly with the Treasurer of the United States. This may be done by delivering the funds (1) to a bonded accountable officer who will make the deposit, (2) to an authorized depositary for credit to the account of the Treasurer of the United States, or (3) to the cash room of the Treasurer of the United States in Washington. The deposit of receipts is evidenced by a certificate of deposit issued by the depositary, which serves as the basis upon which the Treasury Department issues a warrant formally covering the funds into the Treasury.

During 1948 the Division of Disbursement received, deposited, and accounted for 6,813,240 collection items, amounting to more than \$9 billion. Commercial checks, drafts, postal express money orders, etc., aggregating 3,061,221 items were deposited by Government officers with the Treasurer of the United States for collection. This

does not include collection items deposited direct with authorized depositaries by collectors of internal revenue and other collecting officers. During the year net budget receipts exceeded \$44.7 billion and receipts of trust accounts exceeded \$6.5 billion (excluding \$3 billion transferred to the Foreign Economic Cooperation trust fund).

*Federal savings and loan associations.*—On June 30, 1948, the Federal Home Loan Bank System reported to the Treasury Department that 1,478 Federal savings and loan associations were eligible to qualify as fiscal agents under Department Circular No. 568, dated September 15, 1936, for the purpose of collecting delinquent accounts arising out of insurance and loan transactions of the Federal Housing Commissioner. Of this number, 64 had qualified for this purpose, either by the pledge of collateral security or the filing of an acceptable surety bond.

*Withheld taxes.*—The Current Tax Payment Act of 1943 provides for the collection at the source of income taxes on salaries and wages. Under regulations issued by the Treasury, most of the accumulated funds are deposited monthly by employers in certain designated depositary banks which issue their receipts to the employers. These receipts are transmitted with quarterly tax returns filed with collectors of internal revenue. Amounts deposited are promptly remitted to the Federal Reserve Banks for credit in the Treasurer's account; or, if the banks designated to receive deposits of withheld taxes so elect, they may transfer withheld taxes to the war loan deposit accounts on their books in accordance with Department Circular 92, as amended March 11, 1948. This alternative method permits a more even flow of funds into the Treasury. During 1948 approximately \$11 billion in withheld taxes was collected.

#### PAYMENT OF PUBLIC CREDITORS

Under Executive Order 6166 dated, June 10, 1933, the Treasury Department, through the Division of Disbursement, provides disbursing facilities for all executive departments and establishments of the Government with the exception of the Postal Service, United States marshals, the Panama Canal, the military establishments, and certain Government corporations. In addition to a central office in Washington, D. C., and 22 regional offices in the continental United States, the Treasury Department maintains 21 other disbursing offices, of which 4 are in outlying Territories of the United States and 17 are in foreign countries. During the year an office in the Dominican Republic was closed.

Employees of the Coast Guard functioned as assistants to the Chief Disbursing Officer in 65 subregional offices until February 29, 1948. On March 1, 1948, the 65 subregional offices were reduced to 19. Employees of the 46 offices formerly operating as subregional offices now function as agent cashiers through the 19 subregional offices. On June 30, 1948, there were 64 employees of the State Department functioning as disbursing officers by delegation of authority made pursuant to Executive Order 6166, and rendering accounts in their own name for the State Department and other agencies for which they provide disbursing facilities abroad.

During the year 161,713,254 payments by check and 772,019 payments in cash were made through the Division of Disbursement.

These payments were supported by 10,857,188 pay rolls and other vouchers. Of the checks issued, 160,341,886 were in the form of tabulating card-checks payable by Federal Reserve Banks as agents of the Treasurer of the United States.

During the year \$33,767,870,423 was advanced to disbursing officers of the United States by accountable warrant. These funds were credited to checking accounts on the books of the Treasurer. Over 236 million checks were paid and charged to these checking accounts. Of this number nearly 176 million were paid for the Treasurer by Federal Reserve Banks acting as his agent. The total number of checks paid during 1948 decreased by 9.15 percent from 1947, and the number of payments by Federal Reserve Banks decreased by 3.28 percent.

Balances to the credit of Government disbursing officers, corporations, and agencies declined from \$8.9 billion to \$8.5 billion during the fiscal year 1948. The number of checking accounts decreased from 7,588 to 5,192 during the same period.

During the year 47,461 substitute checks were requested by payees or endorsees to replace original checks which had been lost, stolen, mutilated, defaced, or destroyed.

There were 209 cable transfers, totaling over \$19.5 million, to Government officers located in 17 different foreign countries, and 1,943 drafts in the currencies of 53 foreign countries were purchased at a cost of \$437,607.

Public Law 318, approved August 1, 1947, provides for the orderly transaction of the public business in the event of the death, resignation, or separation from office of regional disbursing officers of the Treasury Department. In view of such law, it is proposed that regional disbursing officers will cease disbursing and rendering accounts in the name of the Chief Disbursing Officer, effective at the close of business December 31, 1948. Regional disbursing officers will disburse and render accounts in their own names effective January 1, 1949. The Chief Disbursing Officer will act as a funding officer to whom will be advanced all funds requisitioned by the administrative agencies for which the Treasury makes disbursements. The Chief Disbursing Officer will transfer funds as needed to the regional disbursing officers upon request of the appropriate administrative agency. The Chief Disbursing Officer will render his monthly account for such advances and transfers, while each regional officer will render an account in his own name covering transfers and collections received and taking credit for vouchers paid, transfers to other disbursing officers, and other appropriate items.

*Bonding of certifying officers.*—Public Law 389, approved December 29, 1941, provided for the bonding of officers and employees authorized to certify vouchers for payment by disbursing officers in the executive branch of the Government except the military services. On June 30, 1948, there were approximately 7,082 bonded certifying officers certifying vouchers under the act.

*Agent cashiers.*—There are approximately 1,603 bonded employees of Government agencies who have been designated as agent cashiers of the Chief Disbursing Officer of the Treasury Department. Most of these agent cashiers are located in the United States, making emergency payments in cash in cases in which it is impractical to make

payments through the regional disbursing offices of the Treasury. Others are on duty in various parts of the world in connection with various governmental operations.

*Payments in foreign countries.*—Creditors abroad may be paid by any of the following methods: (a) Through State Department representatives in foreign countries who function as disbursing officers by delegation of authority from the Division of Disbursement, and who make payments in local currency acquired either by purchase with a check drawn on the Treasurer of the United States or by sale of a draft drawn on the Secretary of State, (b) in countries other than Germany or Japan by dollar checks issued in the United States and mailed to payees, (c) through the transmission of United States dollar checks to the Department of the Army with the request that Army finance officers abroad make payment in local currency, and (d) in local currency drawn from balances held for the account of the Treasurer of the United States in foreign depositories.

*Withheld foreign checks.*—Payment by means of dollar checks has been resumed in all countries except Germany and Japan. Payments to persons in these two countries are still restricted by Department Circular No. 655, dated March 19, 1941, as amended.

A total of \$26,844,294.06 has been deposited in the special deposit account entitled "Secretary of the Treasury, Proceeds of Withheld Foreign Checks." Of this amount, \$8,714,880.55 has been paid to individual claimants, \$787,978.81 has been returned to the appropriation from which the payments were originally made, and \$10,340,838.29 has been covered into the Treasury as miscellaneous receipts. As of June 30, 1948, a balance of \$7,000,596.41 remained in the special deposit account to the credit of approximately 10,659 payees.

Under Public Law 622, approved August 7, 1946, provision was made for paying claims on account of withheld checks involving payments to veterans or their beneficiaries out of the current appropriations of the Veterans' Administration. The Veterans' Administration is reimbursed from the special deposit account for payments made to the extent such funds are held on deposit in the special deposit account.

*Settlement of the account of fiscal officers.*—Public Law 72, approved May 19, 1947, establishes a limit of three years from the date of receipt of the accounts in which the General Accounting Office shall make final settlement of the accounts of any disbursing, accountable, or certifying officer of the Government. No further charges or debts shall be raised in the accounts thereafter, except as to moneys which have been or may be lost to the United States as a result of fraud or criminality on the part of the officer. The law will take effect three years after the date of its enactment.

#### PUBLIC DEBT OPERATIONS

The gross public debt and guaranteed obligations outstanding on June 30, 1948, amounted to \$252,365,707,331.46, a decrease of \$6,010,195,962.37 during the year. Issues of public debt securities during the year amounted to \$121,289,682,653.50 and redemptions totaled \$127,283,819,249.18, a net reduction in the public debt of

\$5,994,136,595.68. Outstanding guaranteed obligations of certain corporations and agencies, excluding the obligations owned by the Treasury, amounted to \$73,460,818.47 on June 30, 1948, a decrease of \$16,059,366.69.

*United States savings bonds.*—During the fiscal year 1948, both sales and redemptions of Series E savings bonds continued at high levels. Approximately 61 million stubs representing issued bonds of Series E were received in the Chicago office of the Bureau of the Public Debt for registration, as compared with 77 million stubs for the previous fiscal year. Over 95 million Series E bonds were redeemed and audited during the year, as compared with 113 million in 1947.

In the Chicago office, permanent records of the sales and redemptions by serial number and name of owner are maintained. The establishment of these records consists of first sorting the stubs by serial number according to series and denomination (numerical file) and microfilming. Later the stubs are sorted by name of owner according to series (alphabetical file) and microfilmed, and it is upon the completion of these operations that the stubs are destroyed. These operations are accomplished through the media of registration stubs in the form of standard punch cards, each of which carries an exact description, including inscription, of the particular bond issued. These punch cards permit the various processes involved in the registration to be conducted largely through machine assortment of the cards. From 1941, when Series E bonds were first issued, through the fiscal year 1948 the total number of stubs of Series E bonds received in the Chicago office amounted to 1,180.8 million. Although stubs always have been numerically sorted and microfilmed almost as rapidly as received, some of the alphabetical sorting and microfilming operations had to be postponed for several years during the war because of the inability to recruit and train the number of employees required for the work. Since then the backlog has been largely eliminated and by June 30, 1949, it is expected that these operations will be current. The unprocessed stubs on hand at the close of the year totaled 34.4 million, as compared with 45.7 million stubs at the close of 1947.

The registration records of saving bonds of Series F and G are maintained in the same manner as those for Series E, except that in the case of G bonds it is necessary to establish accounts for payment of semiannual interest. During the year, 265 thousand stubs of issued Series F bonds and 1,398 thousand stubs of issued Series G bonds were received. More than 267 thousand new accounts were established during the year bringing the total number of accounts on June 30, 1948, to over 4.1 million. Approximately 8.3 million interest checks were issued to holders of Series G savings bonds.

There were 37,490 applications during the year for the issue of duplicates of lost, stolen, or destroyed United States savings bonds, in addition to 5,046 such cases on hand at the beginning of the year. In 10,080 cases the bonds were recovered, and in 20,186 cases the issuance of duplicate securities was authorized; 9,223 credit cases were referred to the Washington office. On June 30, 1948, only 3,047 cases remained unsettled.

Over 99 million savings bonds were redeemed and audited during the year. The audit of redeemed savings bonds is conducted principally through five regional offices of the Register of the Treasury. In accordance with Department regulations, savings bonds after being microfilmed will be destroyed. Early in December 1947 the microfilming of savings bonds was commenced in the regional offices of the Register, thus providing the Department with a permanent record of the redeemed securities. At the close of the fiscal year more than 52 million of the 236 million bonds received had been microfilmed.

In connection with the voluntary payroll allotment plan for the purchase of United States savings bonds by Federal employees, the Chief Disbursing Officer is the bond issuing officer for the departments and agencies served by the Division of Disbursement. During the year the Division of Disbursement collected \$64,573,994.00 through withholdings from salaries of Federal employees on account of bond allotments; received \$579,237.39 on account of cash sales made for agencies serviced by the Division of Disbursement; and received \$693,268.75 on account of cash sales made for the Reconstruction Finance Corporation and Federal Deposit Insurance Corporation, which are not otherwise serviced by the Division of Disbursement. Under this program, there were 2,257,138 savings bonds issued, for which \$67,376,364.75 was covered into the Treasury as public debt receipts during the fiscal year. The excess of issues over withholdings and cash sales is due to the purchase of certain of these bonds partially by payroll deductions made in the preceding fiscal year. Pursuant to Department Circular No. 687, dated May 29, 1942, the Treasury Department also prepared 121,644 bond issuance schedules for the Federal agencies participating in the voluntary payroll allotment plan.

*Armed forces leave bonds.*—The provisions of the Armed Forces Leave Act of 1946 provided that bonds issued in accordance therewith would mature in five years but would be payable upon the death of the registered owner or upon assignment to the Veterans' Administration in payment of premiums on Government life insurance policies. Through June 30, 1948, armed forces leave bonds aggregating \$2,081,112,550 in face value had been issued.

Public Law 254, approved July 26, 1947, amended the Armed Forces Leave Act of 1946 thereby permitting the holders to redeem bonds on and after September 1, 1947. By June 30, 1948, armed forces leave bonds aggregating \$1,519,368,350 in face value had been redeemed.

*Registered marketable issues.*—The Treasury Department maintains individual accounts for owners of registered marketable securities of the United States and various Government corporations and credit agencies, and pays periodic interest thereon. On June 30, 1948, there were 402,956 individual accounts covering registered securities aggregating about \$45 billion in principal amount. There were 402,892 accounts covering publicly held public debt issues, of which 389,161 accounts were for interest-bearing loans and 13,731 were for matured loans no longer bearing interest. The remaining accounts included those for special issues and for the securities of various Government corporations and credit agencies.

During the year, 24,469 new accounts were opened, 53,033 were closed, and 6,495 were reduced in amount. Over 795 thousand interest checks were issued to owners of record.

*Interest on the public debt.*—On the basis of the daily Treasury statement, \$5,211,101,865.47 was paid as interest on the public debt, as shown in the following table:

Class of interest payment	Amount
Interest coupons paid.....	\$2,481,922,496.64
Registered interest checks paid.....	1,100,412,333.41
Discount on Treasury bills sold.....	132,249,796.26
Accrued interest paid in cash on obligations at redemption.....	481,498,252.34
Discount accrued on United States savings bonds.....	804,363,290.51
Interest paid on obligations, special series (transfer-counter warrant transactions).....	231,009,496.64
Total payments.....	5,231,455,665.80
Less repayments.....	20,353,800.33
Net payments.....	5,211,101,865.47

*Servicing of securities for other agencies.*—In accordance with agreements between the Secretary of the Treasury and the several Government corporations and agencies and insular governments, the Treasurer of the United States acts as special agent for the payment of principal of and interest on their securities. The amounts of such payments during the fiscal year 1948, on the basis of the daily Treasury statement, were as follows:

Name	Principal	Interest paid in cash	Registered interest	Coupon interest
Federal home loan banks.....	\$175,535,000.00	\$79,574.22	-----	\$1,750,134.40
Federal farm loan bonds.....	1,404,200.00	1,267.13	\$16,150.88	10,540,385.94
Federal Farm Mortgage Corporation.....	687,200.00	2,412.52	-----	32,713.09
Federal Housing Administration.....	11,352,550.00	132,295.01	834,416.14	-----
Home Owners' Loan Corporation.....	933,800.00	305.00	-----	60,625.37
Reconstruction Finance Corporation.....	3,000.00	-----	-----	41.25
Philippine Islands.....	360,000.00	3,600.00	398,436.25	1,533,287.50
Puerto Rico.....	546,100.00	1,590.00	106,325.00	370,297.50
Total.....	190,821,850.00	221,043.88	1,355,328.27	14,287,485.05

### PAPER CURRENCY

The following table, on the basis of the Monthly Statement of Paper Currency Outstanding, shows the value of paper currency issued and redeemed during 1948, and the amounts outstanding at the beginning and end of the fiscal year:

Class	Outstanding June 30, 1947	Issued during the year	Redeemed during the year	Outstanding June 30, 1948	
				In Treasury	Outside Treasury <sup>1</sup>
Gold certificates.....	\$2,864,068,319	-----	\$2,639,470	\$825,910	\$2,860,602,939
Silver certificates.....	2,244,372,704	\$1,688,480,000	1,657,542,450	16,299,500	2,259,010,754
United States notes.....	346,681,016	179,092,000	179,092,000	3,680,154	343,000,862
Treasury notes of 1890.....	1,148,608	-----	1,212	1,230	1,146,166
Federal Reserve notes.....	24,780,494,655	5,066,063,000	5,343,216,440	45,320,985	24,468,010,230
Federal Reserve Bank notes.....	409,443,011	-----	51,122,236	1,452,555	356,868,220
National bank notes.....	107,322,550	-----	6,964,474	505,480	99,852,596
Total.....	30,753,530,863	6,933,625,000	7,240,578,282	68,085,814	30,378,491,767

<sup>1</sup> Includes holdings of Federal Reserve Banks.

Paper currency outstanding on June 30, 1948, including amounts held by Federal Reserve Banks, is shown by series, class, and denomination in the following table:

	Old series (issued prior to 1929)	New series (issued after 1929)	Total
CLASS			
United States notes.....	\$25,029,047	\$321,651,969	\$346,681,016

\$100,000.....	11.10	9.57	9.10	9.14	9.23
Total.....	100.00	100.00	100.00	100.00	100.00
Total amount of currency outstanding...	\$25,316,087,512	\$29,378,363,847	\$30,889,819,087	\$30,753,530,863	\$30,446,577,581

Receipts, issues, and stocks of distinctive paper for use in the manufacture of paper currency were as follows during the year:

Kind	On hand July 1, 1947	Received	Issued	On hand June 30, 1948
Sheets of 12 subjects				
United States currency and Federal Reserve notes.....	11,695,330	133,088,057	126,476,225	18,307,162
Philippine currency.....	716,232		549,600	166,632
Cuban currency.....		1,317,100	1,316,930	170
Total.....	12,411,562	134,405,157	128,342,755	18,473,964

United States paper currency shipped during the year from the Treasury in Washington to Federal Reserve Banks and branches and to others amounted to \$1,809,584,000, an increase of \$19,147,107 over the previous year.

The proceeds of currency received into the Treasurer's cash by the Currency Redemption Division of the Treasurer's Office during the year amounted to \$490,723,108, of which \$345,986,145 was in Federal Reserve notes, \$52,049,334 in Federal Reserve Bank notes, \$7,201,969 in national bank notes, and \$85,485,660 in United States currency.

Canceled Federal Reserve notes amounting to \$4,931,882,350 were received from Federal Reserve Banks and branches for credit of Federal Reserve agents.

The Destruction Committee supervised the incineration of redeemed canceled currency as follows:

Class of currency	Pieces	Value
Gold certificates.....	109,830	\$2,602,320.00
Silver certificates.....	1,168,655,295	1,675,376,925.00
United States notes.....	45,716,476	181,726,011.00
Treasury notes.....	184	962.00
Federal Reserve notes.....	412,267,330	5,012,126,640.00
Federal Reserve Bank notes.....	3,006,251	51,765,236.00
National bank notes.....	472,152	6,964,474.00
Total dollar currency.....	1,630,227,518	6,930,562,568.00

#### DISTRIBUTION OF COINS

During the year shipments of current silver and minor coins between the United States Treasury, the United States mints, and the Federal Reserve Banks and branches were as follows:

Kind	Shipments from Treasury to Federal Reserve Banks and branches	Shipments from mints and assay offices to Treas- ury and Federal Reserve Banks and branches	Shipments be- tween Federal Reserve Banks and branches
Silver:			
Standard dollars.....		\$7,230,000.00	\$1,845,000.00
Half dollars.....	\$330,000.00	6,131,103.50	5,130,000.00
Quarter dollars.....		13,431,500.50	2,095,000.00
Dimes.....		19,752,600.20	2,475,000.00
Minor:			
5-cent coins.....	275,000.00	7,628,200.10	1,470,000.00
Cents.....		6,735,320.02	118,000.00
Total.....	605,000.00	60,908,724.32	13,133,000.00

Shipments and transfers of gold coin and bullion and of uncurrent silver and minor coins to the mints from the Treasury and the Federal Reserve Banks and branches were authorized during the year in the amounts of \$170,217.73 and \$2,683,002.69, respectively.

### SECURITIES HELD IN SAFEKEEPING

The Treasurer is custodian of securities pledged for the safekeeping and prompt payment of Government deposits in bank depositaries, of postal savings funds in depositaries designated to receive such funds, and, under provisions of law or by direction of the Secretary of the Treasury, of various trust funds comprised of bonds and other obligations and of securities placed in safekeeping by various Government executive departments and bureaus. The face value of such securities held on June 30, 1947, and June 30, 1948, classified according to the purpose for which held, is shown in the following table:

Purpose for which held	June 30, 1947	June 30, 1948
To secure deposits of public moneys in depositary banks.....	\$275,835,150	\$255,118,700
To secure deposits of postal savings funds.....	5,845,450	6,510,950
For District of Columbia:		
Teachers' retirement and annuity fund <sup>1</sup> .....	11,882,050	13,808,850
Water fund.....	1,773,000	1,773,000
Other.....	17,591,170	17,586,670
United States savings bonds held for various depositors.....	59,302,440 <sup>2</sup>	56,795,350
For the Board of Trustees, Postal Savings System.....	2,699,908,490	2,498,624,100
For the Secretary of the Army.....	13,165,230	6,895,480
For the Secretary of the Treasury:		
Foreign obligations (World War I).....	12,072,130,757	12,072,034,757
Obligations on account of sales of surplus property.....	46,737,095	46,737,095
Capital stock and obligations of Government corporations and agencies.....	14,081,502,815	14,795,898,044
Other.....	4,399,515	11,037,007
For Federal Deposit Insurance Corporation.....	887,151,100	806,000,000
For Attorney General <sup>2</sup> .....	20,861,207	21,071,070
Miscellaneous.....	173,245,592	131,644,333
Total.....	30,371,329,061	30,741,535,406

<sup>1</sup> The securities held for the District of Columbia teachers' retirement fund were, in accordance with the act approved August 7, 1946, transferred to and held subject to the instructions of the Secretary of the Treasury.

<sup>2</sup> Noninterest-bearing participating certificate for funds deposited in the German special deposit account (see p. 102).

*Securities and funds, Philippine invasion.*—As of June 30, 1948, there had been settled more than 97 percent of all cases involving the custody of valuables delivered to the United States High Commissioner to the Philippine Islands for safekeeping during the emergency due to the Japanese invasion.

Cases settled cover \$236,448.61 in United States Treasury checks, \$268,025 in United States Treasury bonds, \$2,559,201 in United States currency, 319 bars of gold valued in excess of \$2,296,000, and 45 containers of jewelry, securities, and other valuables.

Cases pending or dormant cover \$200 in United States Treasury checks, \$550 in United States Treasury bonds, \$4,780 in United States currency, and two bars of gold.

*Undelivered savings bonds and cash refunds.*—In connection with the operation of the payroll savings system for the purchase of savings bonds by employees of private contractors performing work for the Government, arrangements have been made for the safekeeping by the Treasury Department of undelivered bonds and unclaimed payroll

deductions. These bonds and funds, which belong to persons whose whereabouts are unknown, are received by the Treasury under arrangements with the various departments and establishments having jurisdiction over the contracts, and, in many cases, direct with the employers. The bonds and funds are held subject to reclaim by employees upon proper identification. Under present arrangements, undelivered bonds are forwarded by contractors to the Division of Loans and Currency in Chicago. Unclaimed bond deductions not sufficient to buy bonds are forwarded to the Division of Investments of the Bureau of Accounts at Washington, D. C. As of June 30, 1948, funds amounting to \$574,705.97 had been received, covering deductions in 117,923 cases, and \$23,579.06 in 2,216 cases had been returned, leaving a balance of \$551,126.91 unclaimed in 115,707 cases.

### INVESTMENT OF FUNDS

*Trust and special funds invested by the Treasury Department.*—Under various provisions of law creating trust and special funds, the Secretary of the Treasury or the Treasurer of the United States is authorized to invest such portions of the funds as are not required to meet current withdrawals. The following statement shows the amount of Government and other securities held in these funds at the close of the fiscal year. Further details on each of these funds are shown in tables 52 through 73.

#### *Securities held as investments in trust and special funds, June 30, 1948*

[Par values in thousands of dollars]

Fund	Government securities	Other securities	Total
Adjusted service certificate fund	\$5,800		\$5,800
Ainsworth library fund, Walter Reed General Hospital	10		10
Alaska Railroad retirement and disability fund	3,070		3,070

*District of Columbia teachers' retirement and annuity fund.*—Pursuant to Public Law 624, approved August 7, 1946, the District of Columbia teachers' retirement and annuity fund has been established in the Treasury. Amounts deducted from salaries and voluntary contributions by teachers in the public school system of the District of Columbia are deposited into the fund. Under the act, the District of Columbia

teachers' retirement fund was abolished and the amounts in that fund and in the related Government reserve fund were transferred to the new fund. The act provides that the new fund shall be held and invested by the Secretary of the Treasury. (See table 57.)

*Unemployment compensation disability payments.*—Section 416 of Public Law 719, approved August 10, 1946, amends the Federal Unemployment Tax Act by providing that the States may withdraw amounts deposited in the unemployment trust fund on account of employee contributions for the purpose of paying unemployment compensation disability payments. The States of California, New Jersey, and Rhode Island have passed legislation in connection with the Federal act and have made withdrawals from the unemployment trust fund for the purpose of paying disability benefits.

*Alien property trust fund.*—A statement of the alien property trust fund as of June 30, 1948, follows:

*Alien property trust fund, June 30, 1948*

Credits (net):		Amount
Trusts.....		\$37, 242, 114. 56

June 20, 1947.....	100, 000, 000		
July 1, 1947.....	150, 000, 000	Total.....	3, 750, 000, 000

*Federal Farm Mortgage Corporation.*—The Federal Farm Mortgage Corporation retired capital stock in the amount of \$990,000 by repayment during the fiscal year 1948 which, together with the repayment of \$100,000,000 for capital stock made in 1941, \$50,000,000 made in 1946, and \$49,000,000 made in 1947, reduced the outstanding capital stock of the Corporation to \$10,000 on June 30, 1948.

During 1948, no appropriations were approved and no payments were made to the Federal Farm Mortgage Corporation on account of reduction in interest rate on mortgages.

*Federal home loan banks.*—During the fiscal year 1948, the Treasury acquired by transfer from the Reconstruction Finance Corporation \$122,672,200 in capital stock of the various Federal home loan banks. The stock has been reduced by repayments during the year totaling \$2,881,000, reducing the stock held by the Treasury on June 30, 1948, to \$119,791,200, as follows:

Bank	Stock held June 30, 1948	Dividends re- ceived covering fiscal year 1948
Boston.....	\$12,467,500.00	\$124,675.00
Chicago.....	14,173,900.00	212,608.50
Cincinnati.....	11,143,700.00	201,326.13
Des Moines.....	7,298,700.00	110,202.00
Indianapolis.....	4,783,300.00	102,026.00
Little Rock.....	8,772,400.00	109,655.00
New York.....	18,963,200.00	189,632.00
Pittsburgh.....	11,146,300.00	83,597.25
San Francisco.....	15,927,900.00	199,098.75
Topeka.....	7,333,600.00	73,336.00
Winston-Salem.....	7,780,700.00	69,061.50
Total.....	119,791,200.00	1,475,218.13

<sup>1</sup> Dividends declared annually on December 31 of each year.

*Federal Crop Insurance Corporation.*—The Department of Agriculture Appropriation Act, 1948, approved July 30, 1947, appropriated \$10,000,000 for the subscription and payment by the Secretary of the Treasury of capital stock of the Federal Crop Insurance Corporation. Subscription and payment were effected during the fiscal year 1948, bringing the total outstanding capital stock of the Corporation to \$100,000,000 on June 30, 1948.

*Federal Deposit Insurance Corporation.*—In accordance with the provisions of Public Law 363, approved August 5, 1947, the Corporation paid to the Secretary of the Treasury during the year \$266,695.-250.41, for retirement of its capital stock. This was sufficient to retire all the stock held by Federal Reserve Banks aggregating \$139.-299,556.99 and \$127,395,693.42 of the stock owned by the Treasury. The balance of capital stock held by the Secretary of the Treasury on June 30, 1948, amounted to \$22,604,306.58.

*Reconstruction Finance Corporation.*—During the fiscal year 1948, note obligations of the Reconstruction Finance Corporation were canceled in an amount aggregating \$10,048,931,299.32. This amount includes cancellations of \$510,848,903.98 and \$40,367,816.15 on account of transfer to the Secretary of the Treasury of note obligations in like amounts of the Rural Electrification Administrator and the Secretary of Agriculture under the provisions of the Department of Agriculture

Appropriation Act, 1948 (Public Law 266, approved July 30, 1947); cancellation of \$122,672,200.00 on account of transfer to the Secretary of the Treasury of stock in like amount of Federal home loan banks under the provisions of Public Law 132, approved June 30, 1947; cancellation of \$9,735,561.99 representing the value of buildings transferred to the United States under Public Law 268, approved July 30, 1947; and cancellations totaling \$9,365,306,817.20 in accordance with Public Law 860, approved June 30, 1948. The following summarizes cancellations during the fiscal year 1948 and shows the total of all cancellations through June 30, 1948:

	<i>Amount</i>
Obligations canceled through June 30, 1947-----	1 \$2, 785, 673, 280. 61
Obligations canceled during fiscal year 1948:	
For capital stock of Federal home loan banks transferred to Treasury (Public Law 132, approved June 30, 1947)-----	122, 672, 200. 00
For amount equal to unpaid principal of loans to Secretary of Agriculture, transferred to Treasury (Farmers' Home Administration program) (Public Law 266, approved July 30, 1947)-----	40, 367, 816. 15
For amount equal to unpaid principal of loans to Administrator of Rural Electrification Administration, transferred to Treasury (Public Law 266, approved July 30, 1947)-----	510, 848, 903. 98
For transfer of buildings to Federal Works Agency (Public Law 268, approved July 30, 1947)-----	9, 735, 561. 99
For unrecovered costs of the Reconstruction Finance Corporation as of June 30, 1947, in national defense, war, and reconversion activities (Public Law 860, approved June 30, 1948)-----	\$9, 313, 736, 531. 00
For accrued interest on above costs paid to Treasury since June 30, 1947 (Public Law 860, approved June 30, 1948)-----	46, 005, 553. 04
For costs incurred subsequent to June 30, 1947, for handling, storing, processing, and transporting critical materials to stock piles (Public Law 860, approved June 30, 1948)-----	5, 564, 733. 16
	9, 365, 306, 817. 20
Total cancellations fiscal year 1948-----	10, 048, 931, 299. 32
Grand total cancellations through June 30, 1948--	12, 834, 604, 579. 93

<sup>1</sup> For details of cancellations, see annual reports for 1947, p. 47; 1946, p. 81; 1945, p. 93; 1944, p. 94; 1943, p. 113; 1942, p. 41; 1941, p. 51; and 1940, pp. 114-115.

*Home Owners' Loan Corporation.*—During the year bonds of the Corporation held by the Treasury were canceled in the amount of \$128,154,108.91 including \$2,972,358.93 representing the value of a building owned by the Corporation, which was transferred to the United States under Public Law 268, approved July 30, 1947, and \$125,181,749.98 on account of the transfer to the Treasury of stock of the Federal Savings and Loan Insurance Corporation under Public Law 860, approved June 30, 1948. The following summarizes can-

cancellations during the fiscal year 1948 and also shows amount of cancellations prior to that year:

	<i>Amount</i>
Obligations canceled through June 30, 1947.....	\$18,000.00
Obligations canceled during fiscal year 1948:	
For transfer of a building to Federal Works Agency (Public Law 268, approved July 30, 1947).....	2,972,358.93
For capital stock of Federal Savings and Loan Insurance Corporation (Public Law 860, approved June 30, 1948)...	100,000,000.00
For accrued dividends on above stock equal to computed average interest cost incurred by Home Owners' Loan Corporation on its total borrowings during each respective year.....	25,181,749.98
Total cancellations fiscal year 1948.....	128,154,108.91
Grand total cancellations through June 30, 1948.....	128,172,108.91

*Rural Electrification Administration and Farmers' Home Administration.*—The Department of Agriculture Appropriation Act, 1948 (Public Law No. 266, approved July 30, 1947), authorized the Secretary of the Treasury in lieu of the Reconstruction Finance Corporation to make loans within limits approved by the Congress to the Administrator of the Rural Electrification Administration to carry out the provisions of the Rural Electrification Act of 1936, as amended, and to the Secretary of Agriculture in connection with activities of the Farmers' Home Administration. The Reconstruction Finance Corporation was directed to transfer to the Secretary of the Treasury all such loans outstanding as of the close of June 30, 1947, and the Secretary of the Treasury was authorized to cancel notes of the Reconstruction Finance Corporation in an amount equal to such loans. There were transferred to the Secretary of the Treasury under this authority note obligations of the Administrator of the Rural Electrification Administration in the amount of \$510,848,903.98 and note obligations of the Secretary of Agriculture in the amount of \$40,367,816.15. The note obligations of the Secretary of Agriculture on account of Farmers' Home Administration were paid in full during the fiscal year.

*The Virgin Islands Company.*—Public Law No. 268, approved July 30, 1947, authorized the Secretary of the Treasury to lend not exceeding \$250,000 to the Virgin Islands Company for the purpose of carrying out programs of the Company set forth in the budget for the fiscal year 1948. Under this authority, the Secretary of the Treasury loaned the Virgin Islands Company \$250,000, with interest at 1½ percent, which was in line with the average rate of interest on outstanding marketable obligations of the United States.

*Advances to Federal Reserve Banks for industrial loans.*—Advances to Federal Reserve Banks for industrial loans were authorized by the act approved June 19, 1934 (48 Stat. 1105), which amended the Federal Reserve Act, as amended, by adding section 13 (b). The provisions under which the Secretary of the Treasury makes these advances were described on pages 184 and 185 of the annual report for 1940.

No advances were made to the banks during the fiscal years 1939 through 1948, the latest advance having been made October 14, 1937. Amounts received by the Treasury during the year aggregated \$35,105.68. The following statement summarizes the transactions through June 30, 1948, in connection with these advances to Federal Reserve Banks.

Federal Reserve Bank	Advances by Treasury		Payments received by Treasury	
	Maximum authorized	Total advances through June 30, 1948	During fiscal year 1948	Total through June 30, 1948
Atlanta.....	\$5,272,031.55	\$756,934.44	\$87.84	\$79,263.82
Boston.....	10,230,236.88	2,875,115.98	-----	280,843.94
Chicago.....	19,748,516.70	1,417,701.33	426.82	151,045.26
Cleveland.....	14,146,863.66	1,015,571.33	-----	82,929.94
Dallas.....	4,359,338.10	1,251,788.08	83.01	102,083.18
Kansas City.....	4,131,276.30	1,145,717.73	11.48	64,212.70

New York.....	42,529,210.65	7,752,044.63	24,808.42	369,115.87
Philadelphia.....	14,620,883.52	4,198,400.60	7,059.42	722,406.56
Richmond.....	5,808,291.43	3,420,662.05	1,992.35	172,493.46
St. Louis.....	5,093,112.25	547,832.83	400.97	7,463.83
San Francisco.....	9,850,328.30	2,156,795.01	235.37	101,421.87
Total.....	139,299,556.99	27,546,310.97	35,105.68	2,188,895.27

*Railroad obligations.*—By Executive Order 8533, dated September 6, 1940, as amended by Executive Order 9543, dated April 23, 1945, the Reconstruction Finance Corporation was designated as the agency to act with respect to the bonds, notes, and other securities acquired by the United States in connection with loans made to the Seaboard Air Line Railway Company and the Seaboard-Bay Line Company under section 210 of the Transportation Act of 1920. During the fiscal year, after the securities had been released to the Reconstruction Finance Corporation, the companies were reorganized and the Reconstruction Finance Corporation received cash and securities in payment for accrued interest and in exchange for the old securities. Also during the fiscal year, the Reconstruction Finance Corporation sold certain of the securities received in the reorganization. Total cash receipts from the reorganization and the sales, amounting to \$4,773,779.99, were transmitted by the Reconstruction Finance Corporation to the Treasury and deposited. In addition, the Treasury received earnings on other securities held under section 210 and section 207, amounting to \$17,676.00, making a total of \$4,791,455.99 receipts during the year on account of realization on railroad securities acquired under the Transportation Act, as amended.

A summary of the transactions in railroad obligations held by the Government as of June 30, 1948, by classes, is shown in the following table.

Class	Principal amount originally held	Principal amount held June 30, 1948	Losses and principal written off on account of reorganizations	Total cash collections	
				Principal	Interest
Transportation Act:					
Sec. 207.....	\$282,712,837.36	\$3,707,000.00	<sup>1</sup> \$1,260,669.46	\$277,745,167.90	\$54,391,653.90
Sec. 210.....	290,800,667.00	2,052,000.00	<sup>2</sup> 22,020,945.32	266,727,721.68	94,879,604.96
Federal Control Act:					
Equipment trust notes.....	346,556,750.00	-----	-----	346,556,750.00	45,338,918.25
Sec. 7.....	98,401,755.00	-----	-----	98,401,755.00	23,100,562.27
Sec. 12.....	62,103,453.28	-----	-----	62,103,453.28	4,248,171.96
Total.....	1,080,575,462.64	5,759,000.00	23,281,614.78	1,051,534,847.86	221,958,911.34

<sup>1</sup> Includes (a) loss on account of the sale on the market of Kansas, Oklahoma & Gulf Ry. Co. stock, \$10,669.46, and (b) principal of Minneapolis & St. Louis R. R. Co. written off on account of reorganization, \$1,250,000.

<sup>2</sup> Includes (a) losses on account of sales pursuant to the provisions of act of Aug. 13, 1940; notes of the Des Moines & Central Iowa (formerly the Interurban Railway Co.), Wichita Northwestern Ry. Co., Virginia Blue Ridge Ry., and the Wilmington Brunswick & Southern R. R. Co., \$1,042,093.09; (b) principal written off on account of reorganizations: Fort Dodge, Des Moines & Southern R. R. Co., \$200,000; Minneapolis & St. Louis R. R. Co., \$1,382,000; Alabama, Tennessee & Northern R. R. Corp., \$124,965; Seaboard Air Line Railway Co., \$14,438,827.01; Seaboard Bay-Line Co., \$347,550.22; total \$16,493,342.23 (securities of Seaboard Air Line and Seaboard Bay-Line were administered by Reconstruction Finance Corporation under provisions of Executive Orders 8533 of September 6, 1940, and 9543 of April 23, 1948); and (c) principal written off on loans to carriers whose assets when completely liquidated were not sufficient to meet these claims: Gainesville Northwestern R. R. Co., \$75,000; Missouri & North Arkansas Ry. Co., \$3,500,000; Salt Lake & Utah R. R. Co., \$872,600; and Virginia Southern R. R. Co., \$38,000; total \$4,485,600.

The obligations acquired under the provisions of section 207 of the Transportation Act of 1920, as amended, and held on June 30, 1948, are shown in the following table.

Carrier	Principal amount of promissory note or of directly held security	Collateral (face amount)	Class of collateral or of directly held security	Principal in default	Interest in default
Chicago, Milwaukee, St. Paul & Pacific R. R. Co.	\$3,207,000	( <sup>1</sup> )	5% noncumulative preferred stock of carrier.	-----	-----
Waterloo, Cedar Falls & Northern Ry. Co.	500,000	\$625,000	Temporary general mortgage, 7% bonds of carrier.	\$500,000	\$604,931.50
Total.....	3,707,000	-----	-----	500,000	604,931.50

<sup>1</sup> Securities directly held.

The following statement shows the amount of obligations held on June 30, 1948, on account of loans to carriers under section 210 of the Transportation Act of 1920, as amended, and the principal and interest in default.

Carrier	Loans outstanding <sup>1</sup>	Principal in default	Interest in default
Georgia & Florida Ry. (receiver) <sup>2</sup> .....	\$792,000.00	\$792,000.00	\$919,120.00
Waterloo, Cedar Falls & Northern Ry. Co.....	1,260,000.00	1,260,000.00	1,950,855.71
Total.....	2,052,000.00	2,052,000.00	2,869,975.71

<sup>1</sup> Does not include loans amounting to \$4,485,600 for which the assets of the carriers have been completely liquidated, and which were insufficient to meet the claims, or loans amounting to \$1,733,500 adjusted on account of reorganizations.

<sup>2</sup> By Executive order, the Reconstruction Finance Corporation has been designated to act in connection with securities for these loans.

The following table shows the status of the securities received in reorganization of railroads and held by the Treasury Department and the Reconstruction Finance Corporation, June 30, 1948.

Securities received in reorganizations		Principal proceeds	Interest and dividends
Held June 30, 1948	Sold		
Treasury, under section 210			
Alabama, Tennessee & Northern R. R. Co.: \$124,900 general mortgage, Series A, 4½% income bonds.	\$65 scrip certificate, on general mortgage, Series A, 4½% income bonds.	\$34.70	\$22,482.00
Fort Dodge, Des Moines & Southern Ry. Co.: \$160,000 income mortgage bonds, Series B, 4%.			8,800.00
10,000 shares of common stock.			
Minneapolis & St. Louis Ry. Co.: 8,384.80 shares of common stock.	(1)		29,346.80
Reconstruction Finance Corporation, under section 210			
Seaboard Air Line R. R. Co.:	\$3,346,400, 1st mortgage, 4% bonds, Series A, due Jan. 1, 1996.	3,346,400.00	162,114.49
\$5,785,800 general mortgage, 4½% income bonds, Series A, due Jan. 1, 2016.			260,361.00
\$72 scrip certificate on above.			
9,543.19/100 shares of preferred stock.			23,857.50
Voting trust certificate for 102,273 9/100 shares of common stock.			
Treasury, under section 207			
Minneapolis & St. Louis Ry. Co.: 5,291.20 shares of common stock.	(1)		18,519.20
Total		3,346,434.70	525,480.99

<sup>1</sup> Sold as of Oct. 19, 1948.

*Federal savings and loan associations.*—Under the act of June 13, 1933 (48 Stat. 133), as amended April 27, 1934 (48 Stat. 645), the Secretary of the Treasury was authorized on behalf of the United States to subscribe for preferred shares and full-paid income shares in Federal savings and loan associations upon request of the Federal Home Loan Bank Board. An appropriation of \$50,000,000 to enable the Secretary of the Treasury to purchase such shares was reduced by an allocation of \$700,000 to the Federal Home Loan Bank Board. The details concerning the provisions of law under which these subscriptions were made and the appropriations are contained in the annual report for 1940, pages 176 and 177.

The Home Owners' Loan Corporation also was authorized to purchase full-paid income shares of Federal savings and loan associations after the funds available to the Secretary of the Treasury for the purchase of such shares had been exhausted. The funds available to the Secretary of the Treasury were exhausted on October 25, 1935.

During the fiscal year 1948 the sum of \$617,600.00 was received on account of shares repaid, making the total shares repaid to June 30, 1948, \$48,979,100.00.

The following statement shows the transactions in connection with

the subscriptions by the Secretary of the Treasury to preferred and full-paid income shares in these associations through June 30, 1948.

	Preferred shares	Full-paid income shares	Total
Par value of shares			
Total shares subscribed and paid.....	\$637, 800	\$48, 662, 200	\$49, 300, 000. 00
Shares held on June 30, 1947.....		938, 500	938, 500. 00
Less shares repaid during 1948.....		617, 600	617, 600. 00
Shares held on June 30, 1948.....		320, 900	320, 900. 00
Dividends received on preferred and full-paid income shares:			
Through June 30, 1947.....			10, 527, 393. 45
During 1948.....			15, 965. 75
Through June 30, 1948.....			10, 543, 359. 20

*Obligations of foreign governments, World War I.*—The United States received during the year payments from the Government of Finland amounting to \$424,024.48 on account of its indebtedness, \$113,673.91 of which applied on principal due and \$310,350.57 on interest. A statement showing the amounts which became due and payable during the fiscal year 1948 will be found in table 50. The principal of the funded and unfunded indebtedness of foreign governments to the United States, the accrued and unpaid interest thereon, and payments on account of principal and interest through November 15, 1948, are set forth in table 49.

#### FOREIGN CURRENCIES

In order to provide a central fiscal control over the custody of excess foreign currencies representing the proceeds from the sale of lend-lease goods, disposal of surplus property, and collections by United States departments and agencies, accounts have been established in the name of the Treasurer of the United States with various foreign banks. Such accounts are maintained on the books of the Treasurer of the United States in terms of foreign currencies, on a custodial basis without responsibility as to the ultimate amount of dollars realized upon disposition of the foreign currencies.

Up to June 30, 1948, foreign currencies deposited were equivalent to approximately \$101,835,382. Disposals amounted to approximately \$76,811,264, practically all of which was sold to other departments and agencies against payment of the United States dollar equivalent. The remaining foreign currencies valued at approximately \$25,024,118 on the basis of exchange rates as of June 30, 1948, comprise the following:

Currency	Approximate dollar value	Currency	Approximate dollar value
Indian rupees.....	\$12, 735, 959	Japanese yen.....	\$429, 904
Iranian rials.....	2, 382, 876	German marks.....	335, 675
Iraqi dinars.....	2, 358, 282	Colombian pesos.....	232, 000
French francs.....	2, 127, 970	Chilean pesos.....	179, 438
Egyptian pounds.....	1, 944, 617	Bolivian bolivianos.....	122, 507
Palestine pounds.....	887, 045	All others.....	334, 974
Burmese rupees.....	516, 539		
Lebanese pounds.....	436, 332	Total.....	25, 024, 118

During the fiscal year 1948 the Treasury delivered to the Department of State, without payment of the United States dollar value, the equivalent of Chinese currencies in the amount of \$83,000 and Philippine currencies in the amount of \$200,000 for the purposes authorized under the provisions of section 32 (B) (2) of the Surplus Property Act of 1944, as amended, in connection with educational programs conducted in the respective countries.

#### FISCAL RELATIONSHIPS WITH THE PHILIPPINE ISLANDS

*Deposits of the Philippine Government.*—The authority of the Secretary of the Treasury, contained in the act of June 11, 1934 (48 Stat. 929), to accept deposits of public moneys of the Philippine Government and to pay interest thereon at not in excess of 2 percent per annum, was continued to July 1, 1951, by Public Law 654, approved August 7, 1946.

Two interest-bearing accounts are being carried currently under this authority: an account maintained at \$55,000,000 since December 10, 1934, bearing 2 percent interest; and an account established at \$100,000,000 on March 8, 1946, and increased on October 31, 1947, to \$200,000,000 at the request of the Philippine Government, which bears interest at 1 percent.

*Settlement of prewar depositary account.*—In connection with the reconstruction of the account of the Treasurer of the United States with the Philippine Treasury, a balance of \$525,705.09 was resolved from records available to the Treasury Department. Additional information, based on records of the Treasury of the Philippine Islands as audited by the General Auditing Office of the Philippine Government, was obtained, which indicated a balance of \$422,674.11. After taking into consideration certain transactions which were known to the Treasury a balance of \$433,060.57 due the Philippine Treasury was determined. The Comptroller General has approved a settlement with the Philippine Government on this basis. A residual balance of \$157,689.70 representing the net excess of unidentified credits over unidentified payments will be placed in a special deposit account of the Secretary of the Treasury, where these funds will be held until such time as the General Accounting Office has completed the audit and reconciliation through December 31, 1941, of the accounts of those disbursing officers who customarily used the Treasury of the Philippines as a depositary. If this audit identifies any further amounts as having been reported as deposits in the accounts of the disbursing officers, but not specifically identified in the reconstructed depositary account, an amount equivalent to the suspension in the disbursing officer's account will be withdrawn from the special deposit account for reimbursement to the disbursing officer's checking account, thus clearing the suspension.

*Bonds of the Philippines.*—Extensive study and conferences with representatives of the Philippine Government which had been carried on during 1946 and 1947 with respect to arrangements required by the Philippine Independence Act, as amended, were completed early in the fiscal year 1948. This act, also known as the Tydings-McDuffie Act (Public Law 127, approved March 24, 1934, as amended by Public Law 300, approved August 7, 1939), required that all bonds of the Philippines, its provinces, cities, and municipalities, issued

prior to May 1, 1934, under authority of acts of Congress, which were held in sinking funds of such outstanding bond issues as of July 4, 1946, should be delivered to the Secretary of the Treasury for destruction. It also required that all other assets of sinking funds maintained by the Philippine Government for pre-1934 bonds, together with proceeds of the supplementary sinking fund which had been established for such bonds in the United States Treasury under the provisions of the same act, should be deposited in a special trust account in the name of the Secretary of the Treasury for the payment of future principal and interest on pre-1934 Philippine Government bonds.

The physical delivery of securities to the Secretary of the Treasury was delayed as a result of the war with Japan and the necessity of reconciling Philippine accounts after the reoccupation of Manila. However, the Philippine securities representing sinking fund assets had been held by United States agencies in custody subject to the sole order of the Secretary of the Treasury since July 4, 1946, pending the determination, from available records, of the specific securities to be delivered to the Secretary.

Upon the completion of the necessary determinations the Philippine Government, on July 7, 1947, delivered to the Secretary of the Treasury pre-1934 Philippine Government bonds totaling \$13,150,500, United States Government bonds totaling \$6,269,750 par value, and 862 shares of stock of the Bank of the Philippine Islands having a par value of 100 pesos per share. The Philippine Government bonds were destroyed, as required by the Tydings-McDuffie Act, reducing the outstanding Philippine Government debt on account of bonds issued prior to May 1, 1934, to \$23,958,350 as of June 30, 1948.

The United States Treasury bonds and the stock of the Bank of the Philippine Islands, together with the assets of the supplementary sinking fund for the payment of Philippine bonds which had been maintained by the Secretary of the Treasury under the provisions of section 6 (g) (1) of the act of August 7, 1939, were deposited in a special trust account established in the name of the Secretary of the Treasury for the payment of future principal and interest on pre-1934 Philippine Government bonds as provided in section 6 (g) (4) of the above-mentioned act.

The Philippine Government is also making annual payments to the special trust account in the name of the Secretary which will ultimately provide a balance in this account sufficient to enable the Secretary of the Treasury, in accordance with the provisions of section 6 (g) (5) of the act, to pay future interest and principal on all outstanding Philippine Government bonds issued prior to May 1, 1934. Such payments into the special trust account by the Philippine Government during the fiscal year 1948 amounted to \$4,095,589.37.

In addition to these annual payments the Philippine Government is continuing to provide the necessary funds for the current servicing and redemption of maturing pre-1934 bonds, as provided by the act of August 7, 1939, until the balance in the special trust account is sufficient to enable the Secretary of the Treasury to pay future interest and principal on all outstanding Philippine Government bonds issued prior to May 1, 1934.

The following statement shows the status, as of June 30, 1948, of

the special trust account for the payment of bonds of the Philippines, its provinces, cities, and municipalities, issued prior to May 1, 1934, under authority of acts of Congress.

NOTE.—This statement does not include 862 shares of stock in Bank of the Philippine Islands formerly held in Philippine sinking fund, and transferred to this account under Public Law 300, approved August 7, 1939.

## INTERNATIONAL CLAIMS OF AMERICAN NATIONALS, ETC.

*Expropriation of petroleum properties by Mexico.*—During the fiscal year 1948 the Treasury completed distribution of \$29,137,700.84

to thirteen American oil companies. The amount was received from the Government of Mexico by agreement with the Government of the United States in the settlement of the claims of the companies whose rights and properties had been affected by expropriation by the Mexican Government.

*Settlement of Mexican Claims Act of 1942.*—In accordance with the provisions of the Settlement of Mexican Claims Act of 1942, as amended, the Secretary of the Treasury authorized distributions to June 30, 1948, totaling 52.5 percent of the principal amount of awards and appraisals certified for payment by the Secretary of State or the American Mexican Claims Commission. The status of compensation for claims handled under the convention between the United States and Mexico dated November 19, 1941, is set forth in the following table:

<i>Amounts paid into the fund as of June 30, 1948</i>		<i>Amount</i>
Under the agrarian claims agreement of 1938.....		\$3, 000, 000. 00
Paid on exchange of ratifications of the agreement.....		3, 000, 000. 00
Annual installments due from Government of Mexico through November 1947.....		15, 000, 000. 00
Appropriated by the Government of the United States covering amount of awards and appraisals made on behalf of Mexican nationals.....		533, 658. 95
Total.....		<u>21, 533, 658. 95</u>

*Claims certified for payment*

<i>By the Secretary of State:</i>		
Decisions rendered by the General Claims Commission.....		\$201, 461. 08
Appraisals agreed upon by the Commissioners designated by Governments of the United States and Mexico, pursuant to the general claims protocol between the United States and Mexico signed Apr. 24, 1934.....		2, 599, 166. 10
Total.....		<u>2, 800, 627. 18</u>
<i>By the American Mexican Claims Commission:</i>		
Decisions under the provisions of secs. 4 (b), 4 (c), and 5 (d) of the act.....		37, 948, 200. 05
Grand total of claims certified.....		<u>40, 748, 827. 23</u>

*Status of the fund as of June 30, 1948*

<i>Credits:</i>		
Payments received from Government of Mexico under agreement of Nov. 19, 1941.....		\$21, 000, 000. 00
Appropriation made by Government of the United States on account of awards and appraisals made on behalf of Mexican nationals.....		533, 658. 95
Total.....		<u>21, 533, 658. 95</u>
<i>Less amount paid to American claimants:</i>		
Fiscal year 1943.....	\$637, 036. 24	
Fiscal year 1944.....	6, 333, 636. 13	
Fiscal year 1945.....	1, 443, 226. 94	
Fiscal year 1946.....	4, 993, 915. 36	
Fiscal year 1947.....	3, 076, 040. 35	
Fiscal year 1948.....	4, 354, 144. 31	
		<u>20, 837, 999. 33</u>
Unexpended balance to the credit of the Chief Disbursing Officer June 30, 1948.....		695, 659. 62

Of the unexpended balance of \$695,659.62, the amount of \$555,134.97 is obligated for payment within the distributions totaling 52.5 percent authorized to date. The balance of \$140,524.65 is available for further distribution on the principal amounts of awards and appraisals.

*Special Mexican Claims Commission, United States and Mexico.*—The following table sets forth the status of claims of American nationals against Mexico taken up under the convention between the United States and Mexico dated April 24, 1934:

*Statement of awards made by Special Mexican Claims Commission, United States and Mexico, as of June 30, 1948*

Amount of final awards to claimants after application of sec. 4 of the act approved Apr. 10, 1935.....	Amount \$5, 210, 108. 92
Amount available for distribution to claimants out of \$200,581.70 interest collected from Mexico account of interest on deferred payments.....	196, 943. 61
	<u>5, 407, 052. 53</u>
Amount received from Government of Mexico:	
Through June 30, 1944, \$5,000,000 principal and \$196,101.50 interest.....	\$5, 196, 101. 50
Jan. 5, 1945, \$448,020.14 principal and \$4,480.20 interest.....	452, 500. 34
Total through June 30, 1948.....	5, 648, 601. 84
Less amount transferred to miscellaneous receipts to cover the expenses of the Commission.....	241, 549. 31
Available for payment to claimants.....	5, 407, 052. 53
Amount paid to claimants:	
Fiscal year 1939.....	\$2, 087, 193. 47
Fiscal year 1940.....	678, 717. 90
Fiscal year 1941.....	537, 124. 56
Fiscal year 1942.....	516, 380. 29
Fiscal year 1943.....	505, 672. 15
Fiscal year 1944.....	484, 399. 06
Fiscal year 1945.....	358, 567. 76
Fiscal year 1946.....	138, 293. 74
Fiscal year 1947.....	5, 086. 92
Fiscal year 1948.....	62, 323. 21
Total through June 30, 1948.....	5, 373, 759. 06
Balance due claimants, for which vouchers have not been received.....	33, 293. 47

*Settlement of War Claims Act of 1928, World War I claims.*—The Settlement of War Claims Act of 1928 (45 Stat. 254) authorized the Secretary of the Treasury to make payments on account of claims arising out of World War I: (1) awards of the Mixed Claims Commission, United States and Germany, for claims of American nationals against the Government of Germany, (2) awards of the War Claims Arbitrator for claims of German, Austrian, and Hungarian nationals

against the Government of the United States, and (3) awards of the Tripartite Claims Commission for claims of American nationals against the Governments of Austria and Hungary. For a more detailed discussion of these awards and payments see pages 123 to 128 of the annual report for 1941.

Public Law 375, approved August 6, 1947, amends the Settlement of War Claims Act of 1928 by changing the order of priority of payment to make possible a further distribution to the holders of Class III awards of the Mixed Claims Commission. Payment under the act is made from funds certified by the Office of Alien Property for deposit in the German special deposit account. The act provides that for the purpose of accumulating further interest, the principal amount of each award shall be reduced by the amount paid on account of interest accrued. During the fiscal year 1948, the Office of Alien Property certified \$6,750,000 to the German special deposit account and the Secretary of the Treasury determined that the amount was sufficient to authorize a distribution of ten percent on account of interest accrued on Class III awards (in excess of \$100,000). As of June 30, 1948, \$6,307,654.38 of the amount had been paid.

The following table sets forth the status of awards of the Mixed Claims Commission.

*Status of awards of Mixed Claims Commission in favor of American nationals through June 30, 1948<sup>1</sup>*

Awards certified	Total number of awards	Total amount
1. Amount due on account: Principal of awards.....	7,026	\$181,698,235.30
Less amounts paid Alien Property Custodian and others.....		187,226.85
		181,511,008.45
Interest to Jan. 1, 1928, at rates specified in awards.....		81,465,086.36
Interest thereon to date of payment or through June 30, 1948, if unpaid, at 5 percent per annum as specified in the Settlement of War Claims Act of 1928.....		131,646,887.91
Total due claimants.....		394,622,982.72
2. Payment made on account through June 30, 1948:		
Principal of awards.....	6,671	152,406,977.39
Interest to Jan. 1, 1928, at rates specified in awards.....		8,938,824.97
Interest at 5 percent per annum from Jan. 1, 1928, to date of payment as directed by the Settlement of War Claims Act of 1928.....		8,589,730.22
Total payments through June 30, 1948.....		169,935,032.58
Less one-half of 1 percent deduction from each payment.....		849,675.64
Net payments made to claimants through June 30, 1948.....		169,085,356.94
3. Balance due on account:		
Principal of awards.....	355	101,622,748.31
Interest to Jan. 1, 1928, at rates specified in awards.....		7,544.14
Accrued interest at 5 percent per annum from Jan. 1, 1928, through June 30, 1948, on unpaid balance of total amount payable as of Jan. 1, 1928.....		123,057,657.69
Balance due claimants through June 30, 1948.....		224,687,950.14

<sup>1</sup> Includes payments on account of Private Law 509, approved July 19, 1940.

Under the Settlement of War Claims Act of 1928, it was the duty of the War Claims Arbiter, within certain limitations, to hear the claims of German, Austrian, and Hungarian nationals and to determine the fair compensation to be paid by the United States for ships seized, patents sold or used by the United States, and a radio station sold to the United States during World War I.

The Treasury has made payment up to June 30, 1935, of 50 percent of the amount of all awards made by the War Claims Arbiter in favor of German nationals as required by paragraph 7 of section 4 (c) of the Settlement of War Claims Act of 1928. No payments were made on these awards subsequent to that date.

The following summary shows the number and amount of awards in favor of German nationals certified to the Treasury for payment, the payments made on account, and the balance due thereon, as of June 30, 1948.

*Status of awards of War Claims Arbiter in favor of German nationals through June 30, 1948*

Awards certified	Total (315 awards)	Ships (27 awards)	Patents and radio station (288 awards)
1. Amount due on account:

Private Law 509.....	164, 227. 80	
	\$162, 809, 240. 83	
Interest payment in accordance with Public Law 375, approved August 6, 1947.....		6, 276, 116. 11
Awards of War Claims Arbitrer:		
For ships.....	\$37, 126, 205. 21	
For patents and one radio station.....	6, 242, 694. 03	
		43, 368, 899. 24
One-half of 1 percent deducted from Mixed Claims pay- ments covered into Treasury.....		810, 152. 84
One-half of 1 percent deducted from Mixed Claims pay- ments on account of awards entered under agreement of Dec. 31, 1928 (act of June 21, 1930), and paid to Germany (\$14,466.95 withheld but not paid).....		24, 150. 09
One-half of 1 percent deducted on account of Private Law 509 withheld and covered into the Treasury.....		905. 76
Advances to special fund, expenses of administration of the Settlement of War Claims Act of 1928 (Office of the Secretary of the Treasury).....		96, 175. 00
Expenses of administration, War Claims Arbitrer account of German nationals.....		113, 624. 20
Total payments.....		213, 499, 264. 07
Cash balance in German special deposit account.....		639, 554. 55

The awards entered by the Tripartite Claims Commission against Hungary, in favor of American nationals, amounted to \$199,975.57. During the fiscal year 1948 no payments were made on account of such awards. As of June 30, 1948, awards aggregating \$7,257.35 had not been paid because claimants had not filed applications as required by law.

*Claims of American nationals against Turkey.*—The Special Claims Commission, United States and Turkey, established under the agreement of December 24, 1923 (see page 196 of the annual report for 1940 for further details of this agreement), made awards in 33 cases aggregating \$899,338.09, which was reduced by \$70,891.06 on account of expenses incurred by the United States, leaving net awards amounting to \$828,447.03 payable from funds received from the Republic of Turkey. Under the provisions of the act of February 27, 1896 (29 Stat. 32), these awards were certified on August 19, 1937, by the Secretary of State to the Secretary of the Treasury for payment. During the fiscal year 1945 the final installment of payment was received from the Republic of Turkey, and made available for payment to the claimants.

As of June 30, 1948, \$825,611.81 had been paid to claimants, leaving a balance of \$2,835.22 against which applications for payments have not been received.

#### APPRAISALS OF ASSETS AND LIABILITIES OF THE COMMODITY CREDIT CORPORATION

The act approved March 8, 1938 (52 Stat. 107), as amended by the act approved April 12, 1945 (59 Stat. 50), requires the Secretary of the Treasury to make an appraisal as of June 30 of each year of the assets and liabilities of the Commodity Credit Corporation to determine the net worth of the Corporation. In the event that any such appraisal shall establish that the net worth of the Corporation is less than

\$100,000,000 the Secretary of the Treasury is to submit an estimate and recommend that the Congress appropriate the funds necessary to restore the capital impairment. In the event that any appraisal shall establish that the net worth of the Corporation is in excess of \$100,000,000, such excess shall be deposited by the Corporation in the Treasury as miscellaneous receipts. The act approved February 28, 1944 (58 Stat. 105), requires the Comptroller General to make an annual audit of the financial transactions of the Corporation beginning with the fiscal year 1945 and to furnish a copy of each audit report to the Secretary of the Treasury for consideration in appraising the assets and liabilities for determining the net worth of the Corporation in accordance with the provisions of the act of March 8, 1938, as amended.

Appropriations were made directly to the Treasury for the restoration of the Corporation's impaired capital through June 30, 1944. Subsequent to June 30, 1944, the Congress effected restorations of impaired capital by authorizing and directing the Secretary of the Treasury to discharge indebtedness of the Corporation to the Treasury by canceling the Corporation's notes for an amount equivalent to the capital impairment.

The appraised value of the assets of the Commodity Credit Corporation on June 30, 1947, exceeded the liabilities, the unexpended balance of an appropriation held in reserve for postwar price support of agriculture, and the capital stock by \$17,693,492.14. The surplus of \$17,693,492.14 was paid into the Treasury as miscellaneous receipts on April 28, 1948, making the net charge against the Treasury for the impairment of capital from inception of the Corporation \$1,946,310,554.14.

The payments and cancellations of corporate notes are as follows:

Appropriations:

Act of June 25, 1938 (appraisal as of Mar. 31, 1938, H. Doc. 670, 75th Cong.)	\$94, 285, 404. 73
Act of Aug. 9, 1939 (appraisal as of Mar. 31, 1939, H. Doc. 317, 76th Cong.)	119, 599, 918. 05
Act of July 3, 1941 (appraisal as of Mar. 31, 1941, H. Doc. 248, 77th Cong.)	1, 637, 445. 51
Act of Apr. 25, 1945 (appraisal as of Mar. 31, 1944, H. Doc. 48, 79th Cong.)	<sup>1</sup> 256, 764, 881. 04

Total appropriations	472, 287, 649. 33
----------------------	-------------------

Cancellation of obligations of the Corporation held by the Treasury:

Act of July 20, 1946 (appraisal as of June 30, 1945, H. Doc. 54, 79th Cong.)	\$921, 456, 561. 00
Act of May 26, 1947 (appraisal as of June 30, 1946, H. Doc. 186, 80th Cong.)	641, 832, 080. 64
	1, 563, 288, 641. 64
	2, 035, 576, 290. 97

Less amount returned to Treasury:

Appraisal as of Mar. 31, 1940	43, 756, 731. 01
Appraisal as of Mar. 31, 1942	27, 815, 513. 68
Appraisal as of June 30, 1947	17, 693, 492. 14
	89, 265, 736. 83

Net payments to Corporation to restore impairment of capital	1, 946, 310, 554. 14
--	----------------------

<sup>1</sup> Includes \$39,436,884.93 appropriated for capital impairment, applicable to Mar. 31, 1943, appraisal.

## LIQUIDATION OF FEDERAL AGENCIES

*Lend-lease fiscal operations.*—Pursuant to Executive Order 9726, dated May 17, 1946, the Treasury Department assumed control over fiscal records on lend-lease and reciprocal aid, effective at the close of business on May 31, 1946. Two major operations are involved in the work taken over: (1) Accounting and reporting on appropriations, allocations, and transfers to foreign governments, and (2) billing and collecting for reimbursable supplies and services furnished to foreign governments.

In most lend-lease transactions the United States Government furnished defense articles or services required for the successful prosecution of the war, with the understanding that all articles not destroyed, lost, or consumed are subject to recapture by the United States. In the language of the Lend-Lease Act, "the benefit to the United States may be payment or repayment in kind, or property or any other direct or indirect benefit which the President deems satisfactory."

In addition, there were agreements to furnish articles through lend-lease procurement facilities. Financial arrangements required (1) payment in advance of procurement, (2) immediate payment upon rendition of a bill, or (3) credit arrangements. In the first instance, lend-lease facilities were made available only where procurement through normal commercial channels was not feasible. In the second instance, foreign governments were permitted to submit lend-lease requisitions calling for cash payment with the understanding that immediate cash settlement would be made after delivery on the basis of actual billings.

In cases involving credit arrangements, agreements of several types were concluded with foreign governments. Treaty agreements made early in the war with 18 American republics provided that repayment for a certain percentage of the cost of defense articles and services supplied under the Lend-Lease Act would be made over a period of years according to the financial capacity of each country.

A second type of agreement was concluded with certain governments providing that articles and services contracted for prior to the cessation of hostilities would be delivered and the foreign governments would pay for such articles and services over a period of years with interest.

In some cases, final settlements were agreed to, providing, in most cases, for interest and principal payments over a period of years. Some of these final settlements provided offset of debts or claims in specified categories with or without transfer of funds. Such agreements may cover lend-lease transactions only or may include sales of surplus materials and other types of financial transactions.

Under the Lend-Lease Act, defense articles and services under all agreements were provided to the amount of \$50,205,229,788.16 between March 11, 1941, and March 31, 1948. Reverse lend-lease, consisting of articles and services furnished by foreign governments to the United States up to September 2, 1945, amounted to \$7,819,322,790.90. Between March 11, 1941, and June 30, 1948, funds received from foreign governments amounted to \$1,700,279,438.43. Of this amount a total of \$1,208,865,869.45 has been covered into the United States Treasury as miscellaneous receipts.

*Other war agencies.*—Under Executive Order 9471 of August 25, 1944, the Division of Central Administrative Services of the Office of Emergency Management was abolished and its functions were transferred to the various constituent agencies of that office. On December 1, 1944, the Bureau of Accounts took over the liquidation of the residual affairs of the Division. The work of liquidation relates mainly to winding up fiscal matters, including such action as examining and certifying outstanding obligations for payment, making administrative recommendations on claims under expired appropriations, answering exceptions taken by the General Accounting Office to prior payments, collecting moneys due the United States, closing out appropriation and fund accounts, and preparing permanent records for transfer to the National Archives. Aside from the fiscal work certain other incidental functions are performed, such as disposing of surplus property, placing or separating excess personnel, and handling general administrative matters arising out of prior transactions.

Similar arrangements were effected by the President for other war agencies as follows:

Name of agency	Authority for liquidation	Liquidation commenced
Office of Civilian Defense.....	Executive Order 9562.....	July 1, 1945
War Refugee Board.....	Executive Order 9614.....	Sept. 16, 1945
Office of Censorship.....	Executive Order 9631.....	Nov. 16, 1945
Office of War Information.....	Executive Order 9608.....	Jan. 1, 1946
Committee on Fair Employment Practice.....	President's letter of May 18, 1946.....	May 18, 1946
Price Decontrol Board.....	President's letter of June 30, 1947.....	June 30, 1947

In anticipation of the ultimate liquidation of the Office of Defense Transportation created by Executive Order 8989 of December 18, 1941, arrangements were made whereby the Bureau of Accounts undertook to perform the fiscal functions required for that agency on a reimbursable basis commencing as of January 1, 1946. Such services include the maintenance of appropriation and fund accounts, the performance of incidental audit work, preparation of pay rolls, and the preparation of financial reports.

As of June 30, 1948, the work of liquidating the other war agencies is practically completed. There remain to be processed a few claims, exceptions, etc., from the General Accounting Office, and the Office of Civilian Defense property accounts. These will all be completed and closed out by June 30, 1949.

*Tennessee Valley Associated Cooperatives, Inc.*—Public Law 268, approved July 30, 1947, directed that appropriate steps be taken to secure the final dissolution and liquidation of the Tennessee Valley Associated Cooperatives, Inc., at the earliest practicable date, and that such dissolution and liquidation be under the supervision and direction of the Secretary of the Treasury.

The Board of Directors in existence at the time the act was passed resigned and a new Board was appointed at the request of the Secretary of the Treasury, consisting entirely of officers of the Treasury Department. At the first meeting of the new Board the following officials of the Treasury Department were elected officers:

Edward F. Bartelt, Fiscal Assistant Secretary, President and Chairman.

Robert W. Maxwell, Commissioner of Accounts, Secretary-Treasurer and Director.

Norman O. Tietjens, Assistant General Counsel, Counsel and Director.

Gilbert L. Cake, Associate Commissioner of Accounts, Assistant Treasurer.

At the time the liquidation of the Corporation was undertaken under the supervision of the Secretary of the Treasury, its principal assets consisted of cash, receivables from other cooperatives against which the General Accounting Office in its audit of the affairs of the Corporation had established substantial reserves for losses, and investments in preferred stock of other cooperatives. By the end of the fiscal year all assets of the Corporation had been liquidated or were in the final stages of liquidation except investments in preferred stock. The property sold was disposed of under competitive bidding.

During the year total receipts amounted to \$32,961 and expenditures amounted to \$1,661. The amount of \$50,000 from funds of the Corporation was deposited in the Treasury as miscellaneous receipts.

Public Law 860, approved June 30, 1948, provides that the Secretary of the Treasury shall take appropriate steps to secure the final dissolution and liquidation of the Corporation at the earliest practicable date and contains authority for the Board of Directors to transfer to the Secretary of the Treasury title to assets (other than real property) of the Corporation upon certification of the president of the Corporation that such transfer is to the interest of the Government of the United States. The Secretary of the Treasury is authorized to dispose of assets transferred at such times and in such manner as he may determine.

There follows a comparative balance sheet of the Corporation reflecting its financial condition as of July 30, 1947, and June 30, 1948, and a cash receipts and expenditures statement covering the period of July 30, 1947, to June 30, 1948.

*Tennessee Valley Associated Cooperatives, Inc., comparative balance sheets as of July 30, 1947, and June 30, 1948*

Total balances.....	26,615.43	25,795.11
Total expenditures and balances.....	107,835.49	31,938.83

### SURETY BONDS

The Secretary of the Treasury, under the act of Congress approved August 13, 1894 (28 Stat. 279), as amended by the act approved March 23, 1910 (36 Stat. 241), issues through the Section of Surety Bonds, Bureau of Accounts, certificates of authority to corporate surety companies to qualify as acceptable sureties on bonds and other obligations in favor of the United States.

On June 30, 1948, there were 95 companies holding certificates of authority, qualifying them as sole sureties on recognizances, stipulations, bonds, and undertakings permitted or required by the laws of the United States, to be given with one or more sureties. During the year five certificates of authority were issued to companies qualifying them as sole sureties on bonds in favor of the United States. There were also 8 companies holding certificates of authority authorizing them to act only as reinsurers on bonds in favor of the United States.

The Section of Surety Bonds reviews the financial statements of surety companies authorized to transact business with the United States; determines their underwriting limitations; makes examinations into their financial condition at their home offices, when necessary; and performs other duties to determine whether the companies observe the requirements of Federal law and the regulations of the Secretary of the Treasury issued pursuant thereto.

The Section of Surety Bonds has custody of all fidelity bonds in favor of the United States, except those filed with the Post Office Department and the Federal courts, and notifies the accounting officers of the receipt and filing of such bonds. It examines and approves as to corporate surety all fidelity and surety bonds with a few exceptions as referred to above.

During the year 46,542 bonds and consent agreements cleared through the Section for approval as to corporate surety.

## FINANCIAL REPORTING

In accordance with the requirements of title 5, section 264, United States Code, a Combined Statement of Receipts, Expenditures, and Balances of the United States Government is transmitted to the Congress each year, designating the amounts of receipts, whenever practicable, by ports, districts, and States, and the expenditures by each separate head of appropriation. This report, which is required to be submitted to the Congress on the first day of the regular session in each year, is also printed for public distribution.

Other financial statements, pertaining to the receipts, appropriations, and expenditures of the Government and its various agencies are prepared periodically during the year for inclusion in the daily Treasury statement and the monthly Treasury Bulletin. Also, quarterly reports are prepared and submitted to the Congress on war contract terminations and settlements, pursuant to the Contract Settlement Act of 1944 (58 Stat. 651; 41 U. S. C. 104).

A summary report is compiled monthly from financial data submitted by the departments and agencies under Budget-Treasury Regulation No. 1 (Executive Order 8512, as amended). This summary report consists of a series of tables showing the current status of appropriations and contract authorizations available to each agency of the Government during the current fiscal year.

Quarterly balance sheets of corporations and certain other business-type activities of the United States Government, and other data relating to the financial condition of such corporations and other business-type activities are compiled from financial data submitted by the corporations and other business-type activities under Budget-Treasury Regulation No. 3 (Executive Order 8512, as amended) for inclusion in published reports. A statement of guaranteed and contingent liabilities of the United States is also published in the daily Treasury statement on the first day of each month. These statements, as of June 30, 1948, will be found as tables 76, 21, and 23.

## OTHER FUNCTIONS

*Refunds under Renegotiation Act.*—The Supplemental Appropriation Act, 1948, approved July 30, 1947, appropriated \$7,500,000, from which the Congress authorized transfers amounting to \$1,312,000, leaving an available appropriation of \$6,188,000. This act authorizes the Secretary of the Treasury to make the refunds as provided by section 403 of the Renegotiation Act, and to refund any amount finally determined to have been collected erroneously by the United States. In accordance with the act, refunds are paid by the Secretary of the Treasury on the basis of certificates made by the War Contracts Price Adjustment Board. Through June 30, 1948, a total of 259 claims had been paid, aggregating \$8,952,941.97.

*Colorado River Dam fund.*—The Colorado River Dam fund was established under the act of December 21, 1928 (43 USC 617). The Annual Report of the Secretary of the Treasury for 1946 (p. 119)

sets forth the background of the fund. Its present status is as follows:

*Status of Colorado River Dam fund as of close of each operating year, 1933-48*

Operating year ended May 31	Charges <sup>1</sup>				Credits		Accumulated balance due at end of each operating year
	Advances	Interest on advances	Interest on amount out- standing	Total	Payment of interest and repayment of advances <sup>2</sup>	Credit on interest charges on amount outstand- ing

<sup>1</sup> Excludes \$25,000,000 of advances allocated to flood control, repayment of which is deferred to June 1, 1987.

<sup>2</sup> Repayments deposited are applied first to net interest charge, second to advances.

<sup>3</sup> Includes repayment of advances, \$6,267,609.35.

<sup>4</sup> Includes repayment of advances, \$1,076,408.77.

<sup>5</sup> Includes overpayment of advances, \$825,902.82.

<sup>6</sup> Includes overpayment of advances, \$1,329,439.66.

*Government losses in shipment.*—Prior to July 1937, shipments of money, bullion, securities, documents, and the like, made by Government departments and agencies, were in most instances protected while in course of shipment by insurance provided under contracts with private companies. The Government Losses in Shipment Act (50 Stat. 479), which became effective July 1, 1937, provided for the establishment of an insurance plan within the Government under which the United States would assume the risks on its shipments of valuables, thereby obviating the necessity of purchasing insurance from private companies to cover such shipments. This self-insurance plan has resulted in a substantial monetary saving to the Government. The act is administered by the Treasury Department, and the Secretary of the Treasury has prescribed regulations governing the shipment of valuables by Government departments and agencies under coverage of the act. Also, the Secretary has declared, in accordance with the provisions of the act, what articles, things, or representatives of value may be considered to be "valuables" within the meaning of that term as used in the act. This list of valuables includes items which are of, or similar to, the classes or kinds of articles or things or representatives of value which it had been the practice of the United States before July 1937 to insure, as the insured party, against loss, destruction, or damage in shipment.

Under authority of the act a revolving fund was set up in the Treasury from which payments are made for valuables lost, destroyed, or damaged while in course of shipment. The act authorized an initial appropriation of \$500,000 to the fund, and it further authorized annual appropriations of \$200,000 to be made to the fund, beginning with the fiscal year 1939 and ending with the fiscal year 1948, and from time to time such additional amounts as might be necessary to carry out the provisions of the act. However, to June 30, 1948, only \$602,000 had actually been appropriated to the fund. The balance of \$91,803.13 in the securities trust fund was transferred to this fund, as provided in the amendment to the act approved August 10, 1939 (53 Stat. 1358), making a total of \$693,803.13 available for payment of losses under the act. In addition, all recoveries and repayments effected in connection with the operation of the fund are deposited currently to the credit of the fund and may be used for payment of losses.

Originally the payments which could be made out of the fund were restricted to reimbursement for losses which resulted from the shipment of valuables; however, subsequent legislation has made the fund available for the payment of other types of losses, as follows:

(a) Payments may be made out of the fund for losses arising from the agency functions performed by the Post Office Department for the Treasury, regardless of the manner in which the losses occur, in connection with the sale by post offices throughout the country of United States savings bonds, United States savings stamps, etc. Such losses may occur as a result of a fire, theft, embezzlement, flood, tornado, shipment of securities and funds, burglary or robbery of a post office, and similar contingencies.

(b) The Secretary of the Treasury is authorized by the amendment to the act approved August 10, 1939, to issue agreements of indemnity for the purpose of enabling Government departments and agencies to obtain the replacement of any instrument or document, such as a bank draft, cashier's check, certified check, warehouse receipt, and the like, received by the United States or by any of its agents in their official capacity, which, after having been so received, became lost, destroyed, or mutilated to such an extent as to impair its value. Any losses sustained by the Government in connection with these agreements of indemnity may be charged to the fund.

(c) Under the provisions of section 22 (i) of the Second Liberty Bond Act, as amended by the Public Debt Act of 1943 (Public Law 34) and further amended by the Public Debt Act of 1945 (Public Law 28), several types of financial institutions may qualify as paying agents of United States savings bonds, and the fund is available for the replacement of any losses resulting from payments made in connection with the redemption of such bonds.

(d) Section 6 (e) of the Armed Forces Leave Act of 1946, as amended by Public Law 254, approved July 26, 1947, makes the fund available for the replacement of any losses resulting from payments made in connection with the redemption of armed forces leave bonds.

Section 3 of the Government Losses in Shipment Act, as amended, provides that when the Secretary of the Treasury determines that

replacement of a loss can be made by credit in the account of the Government department or agency presenting the claim, without actual or ultimate injury to the United States, settlement may be made in that manner; therefore, in such a settlement no payment is made out of the fund on account of the loss. The Comptroller General of the United States is accordingly notified by the Treasury when a claim is settled in such manner, in order that he may allow credit for the amounts involved in his settlement of accounts of the Government officer concerned.

Treasury regulations promulgated pursuant to the Government Losses in Shipment Act, as amended, require Government departments and agencies to render to the Division of Deposits of the Treasury Department monthly consolidated reports of their shipments of valuables made under coverage of the act. During the period from July 1, 1937, the effective date of the act, through June 30, 1948, Government departments and agencies reported shipments of valuables in an aggregate amount of \$2,703,532,620,859 as having been made under the provisions of the act. This amount, however, does not include all the shipments of valuables which have been made under the act as the Secretary of the Treasury has in a few instances waived the requirement of reporting such shipments. For example, the Home Owners' Loan Corporation at its request was exempted from the requirement of reporting shipments of valuable loan papers, such as mortgages, mortgage loan docketts, certificates of deposit, checks, assignments, mortgage notes, etc.; and as an aid to the successful prosecution of World War II, the officers of the Departments of the Army and Navy were exempted from the requirement of reporting shipments of valuables during that war and for six months thereafter. The foregoing total includes shipments amounting to \$1,160,291,744,156 of the classes of valuables which were covered by the Treasury's contracts with private companies prior to the enactment of the act. It is estimated that the Government saved more than \$24,657,000 in insurance premiums on the shipments included in this latter amount. This estimation is based on the lowest rates in effect during the fiscal year 1938 under the insurance contract system. The remainder of the shipments, namely \$1,543,240,876,703, is composed of other classes of valuables which the Government did not, as a general practice, insure prior to July 1, 1937, and consequently these shipments were not included in the calculation of estimated insurance premium savings. From the inception of the act through June 30, 1948, the payments made out of the fund on account of losses total \$605,602.91, of which amount \$135,075.75 has been returned to the fund in the form of recoveries and repayments, leaving a net expenditure of \$470,527.16 for losses.

The following tables contain information concerning the operations of the revolving fund established pursuant to the Government Losses in Shipment Act and show the Government's experience in its operation of the self-insurance plan.

*Reported value of shipments made by or for the account of Government departments and agencies under coverage of the Government Losses in Shipment Act, as amended*

[In millions of dollars]

Fiscal year	Total shipments	Classification No. 1 (currency, coin, bullion, specie)	Classification No. 2 (negotiable securities)	Classification No. 3 (canceled coupons)	Classification No. 4 (all other)
1938.....	\$29,188	\$2,339	\$4,743	\$739	\$21,367

	723, 833. 14	105, 045. 74	828, 878. 88

II. FUND ASSETS

	June 30, 1947	Decrease (-), fiscal year 1948	June 30, 1948
Unexpended balances:			
To the credit of the disbursing officer.....	\$50, 336. 41	-\$21, 211. 16	\$29, 125. 25
On the books of the Division of Bookkeeping and Warrants.....	368, 720. 72	-174, 570. 00	194, 150. 72
Total fund assets.....	419, 057. 13	-195, 781. 16	223, 275. 97

<sup>1</sup> Includes payments in an approximate total amount of \$15,000 to settle losses of stamps (unissued documentary internal revenue stamps and motor vehicle use tax stamps which were completely destroyed, and redeemed United States savings stamps) which do not represent an actual monetary loss to the Government.

*Uncurrent checks.*—In accordance with the provisions of Public Law 171, approved July 11, 1947, the amounts of checks drawn on the Treasurer of the United States may be paid by him at any time within ten years from the date of issue. After ten years from issue dates, checks other than those issued on account of public debt obligations and transactions regarding the administration of banking and currency laws cannot be paid by the Treasurer of the United States, but the amounts thereof may be paid to parties entitled on the basis of claim settlements by the General Accounting Office. A check drawn on the Treasurer of the United States, which has not been presented for payment prior to the close of the fiscal year next following the fiscal year in which issued, is known as an "uncurrent" check. Its amount is withdrawn from the account of the drawer and deposited in a special deposit account in the name of the Secretary of the Treasury, denominated the uncurrent check account. The uncurrent check account is charged with payments of "uncurrent" checks made by the Treasurer of the United States and payments on claims settlements of the General Accounting Office designated as being payable from such account.

Checks issued on account of public debt obligations and transactions regarding the banking and currency laws are payable as before the enactment of the act of July 11, 1947, without limitation of time.

A statement of transactions in the uncurrent check account during the fiscal year 1948 follows.

	Number of checks	Amount
Deposits.....	204,945	\$29,645,620.74
Withdrawals:		
Payments by Treasurer, U. S.....	82,128	8,520,159.60
Payments on settlements by General Accounting Office.....	21,606	1,285,917.93
Total.....	103,734	9,806,077.53
Balance June 30, 1948.....	101,211	19,839,543.21

<sup>1</sup> Includes \$22,953,294.20 transferred from outstanding liabilities trust fund; number of checks is not available.

*Surplus earnings of Federal Reserve Banks.*—As a result of essential operations in connection with Government financing, and operations necessary to meet the needs of business and the public for credit and currency, the earnings of the Federal Reserve Banks in recent years have been high. At the close of 1946 the surplus of each Federal Reserve Bank was equal to its subscribed capital, and in April 1947 the Board of Governors of the Federal Reserve System decided to invoke the authority granted to it under section 16 of the Federal Reserve Act to levy an interest charge on Federal Reserve notes in circulation. The amounts deposited into the Treasury in the fiscal years 1947 and 1948 by the Federal Reserve Banks as interest for this account are set forth in the following table:

Federal Reserve Banks	Deposits	
	Fiscal year 1947 <sup>1</sup>	Fiscal year 1948
Boston.....	\$960,683.70	\$6,700,507.33
New York.....	3,528,219.21	24,286,055.55
Philadelphia.....	1,134,944.56	7,369,832.86
Cleveland.....	1,296,184.36	9,575,478.48
Richmond.....	921,511.00	6,457,451.97
Atlanta.....	783,626.22	5,215,864.57
Chicago.....	2,701,961.59	13,278,254.09
St. Louis.....	577,202.93	5,124,016.79

<sup>1</sup> Covers period Jan. 1, 1947, to Mar. 31, 1947.

### BUREAU OF INTERNAL REVENUE

The Bureau of Internal Revenue is responsible for the assessment and collection of all taxes imposed by any law providing internal revenue. It also has responsibilities under statutes which, while not imposing taxes, relate to internal revenue. Among these are the Federal Alcohol Administration Act, the Liquor Enforcement Act of 1936, the Federal Firearms Act, and the Stabilization Act of 1942.

Certain of the major functions of the Bureau are described herein. A more detailed description will be found in the Annual Report of the Commissioner of Internal Revenue for the fiscal year 1948.

### COLLECTIONS

Internal revenue collections for the fiscal year 1948 totaled \$41,864,535,791, which was 7.0 percent more than for the preceding year. The collections in which the principal increases occurred were individual and corporation income taxes and employment taxes. The principal decreases occurred with respect to liquor taxes and retailers' excise taxes.

A comparison of collections from the principal sources of tax revenue for the fiscal years 1947 and 1948 follows.

Source	Fiscal year 1947	Fiscal year 1948	Percent increase, or de- crease (—)
	In thousands of dollars		
Income and profits taxes:			
Individual (including withheld).....	19,343,297	20,997,781	8.6
Corporation.....	19,676,459	10,174,410	5.1
Total income and profits taxes.....	19,019,756	31,172,191	7.4
Employment taxes.....	2,024,365	2,381,342	17.6
Estate and gift taxes.....	779,291	899,345	15.4
Liquor taxes <sup>2</sup> .....	2,474,756	2,255,320	-8.9
Tobacco taxes.....	1,237,768	1,300,280	5.1
Stamp taxes.....	79,978	79,466	-0.6
Manufacturers' excise taxes.....	1,425,260	1,649,234	15.7
Retailers' excise taxes.....	514,227	469,923	-8.6
Other taxes <sup>2</sup> .....	1,552,873	1,657,434	6.7
Total collections <sup>2</sup> .....	39,108,273	41,864,536	7.0

<sup>2</sup> Revised.

<sup>1</sup> Beginning with 1948, unjust enrichment tax collections are included in "Other taxes"; data for 1947 have been adjusted accordingly.

<sup>2</sup> Excludes collections for credit to trust accounts.

## ENFORCEMENT ACTIVITIES

During the fiscal year 1948 the strengthening of enforcement operations continued to be a major objective of the Bureau. However, efforts in this direction were hampered by personnel reductions, and the enforcement revenue for the year failed to show the sharp increases which had marked the years 1946 and 1947.

Additional assessments resulting from enforcement operations in 1948 totaled nearly \$1.9 billion which represented a slight decrease from the preceding year. Distraint warrant collections continued to increase, however, and reached a total of \$280 million for the year. A comparison of the 1948 totals with earlier years is shown below.

Fiscal year	Additional assessments	Distraint warrant collections <sup>1</sup>	Fiscal year	Additional assessments	Distraint warrant collections <sup>1</sup>
	In thousands of dollars	In thousands of dollars		In thousands of dollars	In thousands of dollars
1942.....	438, 441	62, 572	1946.....	1, 280, 218	198, 731
1943.....	566, 058	73, 127	1947.....	1, 928, 610	209, 455
1944.....	730, 974	83, 339	1948.....	1, 897, 015	280, 184
1945.....	922, 428	166, 488			

<sup>1</sup> Distraint warrant collections represent primarily collections of undisputed amounts which taxpayers have failed to pay when due. Occasionally it becomes necessary to collect additional assessments by distraint warrant, but these cases represent only a small portion of the total distraint warrant collections.

Audits and investigations of income and profits tax cases accounted for nearly 89 percent of the additional assessments made in 1948. To a large extent, these assessments were made as the result of errors and omissions discovered in the routine audit of returns. Not counting special fraud investigations, 2,971,113 returns of all kinds—including 2,360,228 individual income tax returns and 218,299 corporation income and profits tax returns—were examined or investigated under procedures involving direct contact, either personal or by correspondence, with taxpayers. The number of returns subjected to these enforcement processes was approximately the same as in the preceding year. Additional tax was assessed in about half of these cases. However, this proportion would not hold true if all returns were investigated, since the examined returns were selected by special procedures designed to segregate the returns most likely to need correction.

There remains a large backlog of cases covering the war years which require prompt examination in order that the Government may recover taxes properly due, before statutory limitations intervene. To this group there have been added many millions of returns relating to the postwar years which, by reason of the continuing high income levels and high tax rates, are productive of substantial amounts of revenue upon audit.

In addition to the foregoing examinations, 3,806 fraud investigations were made, resulting in prosecution recommendations against 1,348 individuals. Numerous investigations were made also under the Federal Alcohol Administration Act and other regulatory statutes. Cash penalties of a civil nature were assessed in many of the cases which did not warrant criminal prosecution.

The increase in the number of persons convicted on tax evasion charges furnishes an additional indication of the effectiveness of enforcement efforts. The record of convictions, beginning with the fiscal year 1945, is as follows:

<i>Fiscal year</i>	<i>Individuals convicted</i>
1945.....	65
1946.....	149
1947.....	182
1948.....	315

### WORK-LOAD

The work-load of the Bureau in the fiscal year 1948 was slightly greater than in 1947 in both service and enforcement tasks. More than half of the Bureau's employees were engaged full time in providing necessary facilities and services for the more than 50 million taxpayers who settle their accounts voluntarily. Among the service tasks performed were (1) receipt, control, and filing of more than 200,000,000 tax returns and related documents; (2) assessment of the taxes reported thereon, and accounting for the funds paid in, (3) computation of income tax liability for more than 23 million individuals filing returns on Form W-2, and (4) scheduling of income tax refunds for nearly 31 million individuals whose prepayments exceeded their liabilities.

The number of returns of all types awaiting action by the enforcement groups at the beginning of the year was 78,892,062. Returns filed with the Bureau or reopened during the year totaled 88,465,725 (approximately the same number as the preceding year), and the number of returns disposed of was 82,707,318 (a decrease of 16.4 percent from 1947). Thus, there remained a backlog of 84,650,469 returns awaiting action at the close of the year—an increase of 7.3 percent as compared with the number at the beginning of the year. All but 345,719 of the returns awaiting action on June 30, 1948, were income or profits tax cases.

While these statistics give a broad view of the enforcement work-load, it must be understood that tax returns vary widely in the amount of attention they require and that, in fact, many returns are disposed of after only superficial examination. In many cases the expenditure of investigative resources would be uneconomical. On the other hand, a sizable number of cases, worthy of investigation, cannot be investigated at this time because of the lack of sufficient personnel. Thus, of the 82,707,318 returns of all types disposed of during the year, 79,736,205 were disposed of without audit or investigation. The remaining 2,971,113 returns were subjected to audit as described in the "Enforcement Activities" section of this report.

In addition to the large number of returns which must be processed, the work-load also includes many thousands of claims for adjustments based on section 722 and the various "carry-back" provisions of the Internal Revenue Code. While these cases are not nearly so numerous as the returns to be processed, their complexity and importance

necessitate the diversion of a large percentage of the best trained technicians in the Bureau. Under the provisions of section 722, which allows relief from excess profits tax for corporations under certain circumstances, there had been filed as of the close of the year more than 51,000 applications for excess profits tax reductions totaling nearly \$5.6 billion, of which 25,000 claims totaling \$4.5 billion were still pending.

"Carry-back" allowances of \$471 million were made during the year under the "quick refund" provisions of the Tax Adjustment Act of 1945.

#### IMPROVEMENTS IN ORGANIZATION AND PROCEDURES

During 1948 a number of changes in organization and procedures were adopted with a view to promoting efficiency and economy. More than 100 improvements were recommended as the result of a critical analysis of the Bureau's organization made by key officials of the field service in October 1946, and nearly all have now been placed in effect. To provide more adequate tools for handling the complicated and highly technical administrative problems of the Bureau, steps were taken to expand the Commissioner's management staff. The use of punch-card tabulating equipment in the computation of income tax liability on Form W-2 returns was tested in one collection district with favorable results and is to be extended to several other districts in the coming year. A work simplification program and a "cash awards for suggestions" program were inaugurated as means for searching out and eliminating nonessential activities. Noteworthy economies were achieved through improved procedures, such as (1) the microfilming of records to reduce the space and equipment required for their storage, and (2) the use of preassembled secondary forms in preparing collectors' office records.

#### PERSONNEL

The number of employees on Bureau rolls at the close of the year was 52,143, consisting of 4,662 employees in the departmental service and 47,481 in the field service. At the close of the preceding year, the number of persons employed totaled 52,830, comprised of 4,771 departmental employees and 48,059 field employees.

A substantial number of trained enforcement officers were dismissed at the beginning of the year as the result of a reduction in the funds appropriated to cover administrative expenditures in 1948, and these forces were further depleted in the course of the year through numerous resignations and retirements.

Changes during the year in the personnel employed in the various branches of the Internal Revenue Service are shown in the following table:

*Summary of personnel, Bureau of Internal Revenue, June 30, 1947 and 1948*

Branch of service	Number on pay roll as of—		Increase, or decrease (—)
	June 30, 1947	June 30, 1948	
Departmental service.....	4, 771	4, 662	— 109
Field service:			
Offices of collectors of internal revenue.....	30, 891	30, 692	— 199
Supervisors of accounts and collections.....	77	71	— 6
Internal revenue agents' forces:			
Income, profits, estate, and gift taxes.....	9, 616	8, 398	— 1, 218
Miscellaneous and sales taxes.....	86	80	— 6
Alcohol Tax Unit:			
Offices of district supervisors.....	4, 773	4, 054	— 719
Field inspection force.....	13	14	1
Intelligence Unit.....	1, 351	1, 286	— 65
Technical Staff.....	532	528	— 4
Excess Profits Tax Council.....	71	84	13
Office of the Chief Counsel.....	356	370	14
Salary Stabilization Unit.....	15		— 15
Processing Division.....	278	1, 904	1, 626
Total field service.....	48, 059	47, 481	— 578
Grand total.....	52, 830	52, 143	— 687

## INVESTIGATIONS BY CONGRESSIONAL COMMITTEES

Early in the fiscal year 1948, the Joint Committee on Internal Revenue Taxation made a study of the enforcement of the internal revenue laws with a view to ascertaining the number of deputy collectors, revenue agents, and other personnel, who should be employed by the Bureau of Internal Revenue in order to insure the maximum net return from taxes imposed by such laws. This investigation was authorized in the Treasury and Post Office Departments Appropriation Act for 1948.

The Appropriations Committee of the House of Representatives, under authority of section 202 (b) of the Legislative Reorganization Act of 1946, also made a complete investigation into the affairs of the Bureau in the early part of the year.

The investigators, in reports to the respective committees, set forth their findings and made recommendations covering many phases of the Bureau's operations, including suggestions for strengthening the central administrative organization and for increasing the over-all enforcement activities. Comments on the proposals were furnished by Treasury officials indicating the areas where specific changes are feasible and the points on which further study is believed necessary. The reports were considered in connection with the appropriation of funds for 1949 and, on the basis of the investigators' findings, the Bureau's appropriation was increased by \$5,584,000 for the purpose of strengthening enforcement operations.

## COST OF ADMINISTRATION

The entire cost of the Bureau's operations during the year, including salaries, equipment, travel, supplies, etc., but exclusive of amounts refunded to taxpayers, was \$183,731,060. The amount appropriated for this purpose was \$188,000,000; thus, there was an unexpended

balance of \$4,268,940. The cost of collecting \$41,864,536,000 during the year was approximately 44 cents per \$100 of revenue, compared with 52 cents per \$100 in the previous year, when collections were smaller and expenditures were higher.

Data on the annual cost of administration, although of interest and value for certain purposes, can not be relied upon either as a guide to the proper scale of administrative activity or as a measure of relative efficiency of operation from year to year. An annual ratio of cost to collections is determined by many factors, most of which have no relationship to these objectives. To illustrate, one such factor is the nature of the tax system. The higher the level of tax rates and the more numerous the levies that are inherently economical to collect the lower will be the average cost ratio. Another factor is the prevailing level of salaries paid to Bureau personnel. A third factor is the volume of essential services performed for taxpayers, such as computation of tax liability, and the volume of investigative activity required with respect to refund claims, both of which have expanded markedly during recent years.

#### REFUNDS

Refunds of internal revenue taxes and the interest thereon, as required by law, are paid out of an appropriation separate from that covering the Bureau's administrative expenses. The total amount of these payments for the fiscal year 1948 was \$2,297,542,291 as compared with \$2,882,735,904 in the preceding year. The decrease was due principally to a reduction in the amount of income and profits tax refunds resulting from carry-backs and from the respread of amortization. Interest payments on refunds increased from \$49,605,704 in 1947 to \$56,530,924 in 1948.

#### SETTLEMENT OF DISPUTES

In a large proportion of the tax disputes arising from the Bureau's investigative operations, settlements are reached through conferences with taxpayers, thereby avoiding expensive and time-consuming litigation. Of 57,748 income, profits, estate, and gift tax returns in which taxpayers had protested the examiners' findings, 51,231 were settled by the Bureau and 6,517 were appealed to the Tax Court. As a result of further hearings conducted by the Bureau in cases pending before the Tax Court, an additional 4,216 returns were settled by stipulation, thereby reducing substantially the number of cases to be tried.

#### OFFICE OF INTERNATIONAL FINANCE

The Office of International Finance was established by order of the Secretary of the Treasury effective July 15, 1947 (see exhibit 43, Order No. 86). The functions, duties, and personnel of the former Division of Monetary Research in the Office of the Secretary of the Treasury, and Foreign Funds Control, were transferred to the new Office.

The Director of the Office advises and assists the Secretary of the Treasury in the formulation and execution of policies and programs in international financial and monetary matters. The Director is

assisted by a Deputy Director, advisers on financial policy, and a staff organized into divisions corresponding to geographic areas or to the functional activities of the Office. These divisions are: National Advisory Council Secretariat; Stabilization Fund, Gold and Silver Division; International Statistics Division; Commercial Policy and United Nations Division; European Division; British Commonwealth and Middle East Division; Latin American Division; and Far Eastern Division. The Office also maintains Treasury representatives in several foreign countries.

By direction of the Secretary, the Office of International Finance is responsible for the Treasury's activities in matters of international financial and monetary policy and programs. Among these are: international monetary and exchange problems, including gold and silver policy; the Bretton Woods Agreements Act and the operations of the International Monetary Fund and the International Bank for Reconstruction and Development; foreign lending and assistance programs; the activities of the National Advisory Council on International Monetary and Financial Problems; the Anglo-American Financial Agreement; and the United States Exchange Stabilization Fund.

The Office makes continuing studies of the flow of capital funds into and out of the United States and of the international accounts of foreign countries with special attention to transactions in gold and dollars. In carrying out its functions, the Office also studies the legislation and policy of foreign countries relating to finance, gold and silver, exchange rates and exchange controls, and other relevant matters.

The Office also provides economic analyses of the customs activities of the Department and advises the Secretary in matters pertaining to his responsibilities under the Tariff Act. The Office acts for the Treasury on the financial aspects of international treaties, agreements, and organizations in which the United States participates. It also participates in negotiations with foreign governments with regard to matters included within its responsibilities.

The Office of International Finance represents the Treasury in the work of the National Advisory Council on International Monetary and Financial Problems (of which the Secretary of the Treasury is Chairman) and its subordinate organs. The Deputy Director of the Office is the Secretary of the National Advisory Council and Chairman of its Staff Committee. Professional personnel of the Office perform staff and secretariat functions of the Council. (See exhibits 18, 19, and 20.)

The Office of International Finance advises Treasury officials and other departments and agencies of the Government concerning exchange rates and other financial problems encountered in operations involving foreign currencies. In particular, it advises the State Department and the National Military Establishment in financial matters related to their normal operations in foreign countries and the special financial problems arising from military operations and in areas occupied by United States forces. The Treasury representatives in foreign countries act as financial advisers to the diplomatic missions and to the missions of the Economic Cooperation Administration in those countries.

## FOREIGN FUNDS CONTROL

Under section 5(b) of the Trading with the Enemy Act, as amended, and Executive Orders 8389, as amended, and 9193, as amended, the Treasury Department, through Foreign Funds Control, formulates and administers controls over foreign-owned property and regulates certain international financial transactions.

Over 15,000 applications for licenses to effect transactions otherwise prohibited by the act and Executive orders were reviewed during the fiscal year 1948 by Foreign Funds Control and the Federal Reserve Bank of New York acting as field agent. This is to be compared with some 54,000 applications reviewed during the preceding year.

During the current fiscal year Foreign Funds Control neared the completion of its liquidation. The Washington staff was reduced from a total of 53 as of June 30, 1947, to 15 as of June 30, 1948. Field operations for Foreign Funds Control during this period were carried out by the Federal Reserve Bank of New York.

A further discussion of Foreign Funds Control activities during the fiscal year will be found on page 47 of this report.

## LEGAL DIVISION

The General Counsel is by statute the chief law officer of the Department and is directly responsible to the Secretary of the Treasury for the work of the Legal Division. He performs such duties in respect to the legal activities as may be assigned to him by the Secretary from time to time, or are required by law.

The functions of the General Counsel include supervision and coordination of the work done by the bureaus which have their own legal staffs, such as the Bureaus of Internal Revenue, Customs, Federal Supply, Public Debt, Narcotics, and Comptroller of the Currency, Office of International Finance, and United States Coast Guard. In addition, the Office of the General Counsel performs the legal services required by the Secretary and his immediate Office, Office of Administrative Services, Office of the Technical Staff, Bureau of Engraving and Printing, Bureau of the Mint, United States Secret Service, Bureau of Accounts, Office of the Treasurer of the United States, United States Savings Bonds Division, and Committee on Practice. The General Counsel is also charged with the functions of the Secretary of the Treasury under the Contract Settlement Act.

The activities of the Legal Division embrace all legal questions arising in connection with the administration of the duties and functions of the various bureaus, divisions, and other branches of the Department. These activities also include consideration of legal problems relating to broad financial, economic, and social programs and problems with respect to international cooperation in the monetary and financial fields. A more complete description of the scope of the activities of the Legal Division is to be found in the various administrative reports of bureaus and divisions of the Department contained elsewhere in this report.

In addition, the legal staff in the Office of the General Counsel handles legal matters relating to legislation, including the drafting of legislation and preparation of reports to committees of Congress and the Bureau of the Budget; appears before congressional committees; prepares and reviews Executive orders and proclamations and departmental rules and regulations; prepares formal and informal opinions and memoranda for the guidance of the administrative officers of the Department; drafts or approves contracts and amendments to contracts; performs legal work arising in connection with Treasury participation in the activities of the National Advisory Council on International Monetary and Financial Problems which coordinates the foreign financial and lending operations of the United States Government, including the policies and operations of the United States representatives on the International Monetary Fund and the International Bank for Reconstruction and Development; handles legal problems pertaining to gold and silver transactions and the administration of the stabilization fund; conducts the legal work in connection with railroad securities held by the Secretary of the Treasury pursuant to loans under the Transportation Act of 1920; performs the necessary pretrial work in litigation involving Treasury activities and conducts litigation before the Tax Court of the United States; coordinates all aspects of the settlement of tort claims pursuant to the Federal Tort Claims Act; passes upon legal questions arising in the payment of Mexican claims and payments to holders of awards of the Mixed Claims Commission; makes recommendations to the Secretary in matters relating to compromise settlement of general claims of the United States; performs the legal work in connection with licensing and disbarment of practitioners before the Treasury Department and of customhouse brokers; handles all legal work in connection with the Treasury Loyalty Board, which was set up to administer the loyalty program outlined in Executive Order No. 9835, dated March 22, 1947; and supervises legal matters relative to inventions and patent rights of Treasury employees, to claims of Treasury employees for personal losses sustained in connection with assignments abroad, and to disclosure of official information.

During the fiscal year 1948, among the many special legal problems handled by the Legal Division were those relating to the collection of the revenues and related problems; the issuance of public debt obligations; legal work in connection with the President's anti-inflation program; the study and preparation of recommendations relating to the financing and the inflationary aspects of proposed housing legislation; legal aspects of problems arising in connection with the National Security Resources Board, of which the Secretary of the Treasury is a member; legal work in the development of the internal security program of the National Security Council; the drafting of legislation to bring about the proposed transfer of the Bureau of Federal Supply to the Federal Works Agency as recommended by the President in his message of March 5, 1948; the liquidation of the residual affairs of various war agencies; the settlement of terminated war contracts and claims arising therefrom; claims under section 17 of the Contract

Settlement Act of 1944 (defective, informal, and quasi contracts); the determination of renegotiation rebates; the legal aspects of stockpiling of strategic materials pursuant to Public Law 520, Seventy-ninth Congress; termination and repeal of statutes granting emergency and wartime powers; hearings involving public utility rates and other proceedings resulting in considerable savings to the United States; drafting of financial, fiscal, and foreign exchange aspects of the legislation to carry out the European Recovery Program and assistance with other legal problems arising in connection with the program; interpretation of the Financial Agreement with the United Kingdom and handling other legal questions relating to the carrying out of that agreement; amendment of the Gold Regulations to control United States participation in international gold transactions at premium prices; advising on legal aspects of financial and monetary problems arising in foreign areas occupied by United States forces; participation in drafting and negotiation of the charter of the International Trade Organization.

The General Counsel also has supervision over the Tax Legislative Counsel, who advises the Secretary of the Treasury on technical and legal aspects of tax policy and tax legislation. The Tax Legislative Counsel represents the Department before the committees of Congress with respect to the technical aspects of tax legislation; assists the legislative counsels of the House of Representatives and the Senate in the drafting of revenue measures and of committee reports thereon; prepares reports on bills relating to revenue for the committees of Congress and the Bureau of the Budget; aids in the negotiation of treaties for the prevention of international double taxation and for administrative cooperation, treaties on friendship, commerce and navigation, and consular conventions; advises the United States delegate to the United Nations Fiscal Commission regarding international tax problems; receives and studies proposals from the general public, members of Congress, and interested members of the tax bar for amending the tax laws, as well as suggestions from the Bureau of Internal Revenue for the improvement of tax administration; reviews all proposed closing agreements and compromises with taxpayers; participates in the periodic revision of forms necessary to the administration of the revenue laws; and reviews Treasury decisions amending existing regulations on internal revenue taxation, where circumstances require a revision or the establishment of new regulations for the interpretation of new legislation.

During the fiscal year 1948, the Office of Tax Legislative Counsel, in cooperation with the Staff of the Joint Committee on Internal Revenue Taxation and the legislative counsels of the House and Senate, rendered technical assistance to congressional committees on the Revenue Act of 1948, which introduced the "income splitting" and "marital deduction" concepts into the income and estate tax laws, respectively; assisted the Congress and advised the Secretary concerning the general revenue revision bill dealing with some 80 separate items, legislation relating to the social security and railroad retirement programs, and a number of miscellaneous revenue bills;

and assisted in the negotiation of tax conventions with the Governments of France, Belgium, the Netherlands, New Zealand, Mexico, Union of South Africa, and Venezuela.

### BUREAU OF THE MINT

The principal functions of the Bureau of the Mint consist of the manufacture of domestic and foreign coins; the acquisition of gold and silver, payments for which are made on the basis of mint assays; the safeguarding of the Government's holdings of the monetary metals, including coins in processing stages until finished and issued; the refining of gold and silver; the issuance of Treasury licenses for the acquisition, ownership, possession, and use of gold for industrial, professional, and artistic purposes; and the production of medals and other decorations.

The Office of the Director of the Mint in Washington administers all activities of the Bureau of the Mint. During the fiscal year 1948 seven field institutions were in operation: Coinage mints in Philadelphia, San Francisco, and Denver; assay offices at New York City and Seattle; gold bullion depository at Fort Knox, Ky.; and silver bullion depository in West Point, N. Y., which operates as an adjunct of the New York Assay Office. Electrolytic refineries are maintained in San Francisco, Denver, and New York City. The Medal Department is located in Philadelphia. At the close of the fiscal year 1948 the personnel of the departmental and field institutions totaled 1,283 compared with 1,783 at the beginning of the year.

The operations of the field institutions during the fiscal year 1948, and the report of this Bureau upon the production and consumption of gold and silver in the United States for the calendar year 1947, are summarized herein. Further detailed information is contained in the Annual Report of the Director of the Mint for the fiscal year 1948.

### OPERATIONS OF THE MINTS, ASSAY OFFICES, AND BULLION DEPOSITORIES

*Domestic coinage.*—Production of United States coins during the fiscal year 1948 is shown in the following statement:

Denomination	Number of pieces produced	Face value
Half dollars.....	17,388,666	\$3,694,333
Quarter dollars.....	50,222,400	12,555,600
Dimes.....	144,774,000	14,477,400
5-cent pieces.....	124,252,000	6,212,600
1-cent pieces.....	476,285,000	4,762,850
Total.....	802,922,066	41,702,783

<sup>1</sup> Includes 360,066 Booker T. Washington commemorative half dollars.

*Foreign coinage.*—Coins produced for other governments during the fiscal year were as follows:

Government	Number of pieces produced
Dominican Republic.....	3,000,000
Ecuador.....	13,821,000
El Salvador.....	8,000,000
Ethiopia.....	14,127,367
Philippines.....	300,000
Saudi Arabia.....	5,000,000
Syria.....	7,000,000
Total.....	51,248,367

*Issue of United States coins.*—The number and value of United States coins issued by the mints during the fiscal year were as follows:

Denomination	Number of pieces issued	Face value
Silver dollars.....	7,235,412	\$7,235,412.00
Half dollars.....	13,040,693	6,520,346.50
Quarter dollars.....	54,148,236	13,537,059.00
Dimes.....	198,096,672	19,809,667.20
5-cent pieces.....	152,966,202	7,648,310.10
1-cent pieces.....	676,689,502	6,766,895.02
Total.....	1,102,176,717	61,517,689.82

*Stock of coins.*—The stock of coins in the United States as of June 30, 1948, is estimated at \$1,804,904,867, comprising standard silver dollars in the amount of \$493,100,146; subsidiary silver coins, \$952,298,876; and minor coins, \$359,505,845.

*Medals.*—The output of service medals and other distinguishing devices for the United States Navy, Marine Corps, Coast Guard, Maritime Commission, and other Government departments amounted to approximately 8,000,000 pieces during the fiscal year. In addition, there were 438 private medals made and 5,677 commemorative medals sold to the public from regular stock.

*Bullion deposit transactions.*—Bullion deposit transactions at the mints and assay offices during the fiscal year 1948 totaled 11,209, including 42 intermint transfers. These transactions required 23,396 assay determinations, including 970 determinations for the intermint transfers.

*Acquisitions of gold.*—Receipts of gold during the fiscal year are summarized as follows:

	Value
Purchases at \$20.67+ per ounce.....	\$5,180
Increment to \$35 per ounce.....	3,346
Purchases at \$35 per ounce.....	3,234,618,173
Domestic coin transferred (melted).....	147,320
Intermint transfers.....	20,852,393
Total value at \$35 per ounce.....	3,255,626,412

*Acquisitions of silver.*—During the fiscal year receipts of silver aggregated 129,203,527 fine ounces with the following classification:

Class of bullion	Number of fine ounces received
Newly mined domestic silver:	
Purchases at \$0.7111+ per ounce.....	40, 059
Purchases at \$0.905 per ounce.....	33, 443, 746
Silver contained in gold deposits, etc.....	304, 231
Silver received in exchange for Government-stamped bars.....	315, 921
Recoinage bullion from uncurrent subsidiary coin.....	1, 852, 056
Recoinage bullion from uncurrent silver dollars.....	271, 124
Intermint transfers of silver.....	154, 323
Deposits of silver in trust by foreign governments.....	8, 422, 430
Redeposits.....	84, 138, 304
Return of lend-lease silver.....	261, 333
Grand total.....	129, 203, 527

<sup>1</sup> Consists of Treasury stock previously on loan to Office of Defense Plants of Reconstruction Finance Corporation, etc.

*Refinery production of gold and silver.*—During the fiscal year 1948 the refineries produced 2,629,403 fine ounces of gold and 1,999,351 fine ounces of silver by the electrolytic process. In addition, 2,228,465 fine ounces of gold and 59,113 fine ounces of silver were subject to fire process only.

*Issue bars manufactured.*—During the year, 170,711 issue bars containing 59,863,942 fine ounces of gold and 964 issue bars containing 229,692 fine ounces of silver were manufactured at the mint institutions.

*Stock of unrefined bullion.*—At the close of the fiscal year the stock of unrefined bullion, in terms of the assayed fine gold and silver content, amounted to 1,488 tons.

*Monetization of silver bullion.*—Silver certificates in the amount of \$31,159,596 were issued by the Treasury against 24,100,000 fine ounces of silver bullion valued at \$1.29+ per fine ounce, the statutory monetary value of silver. The difference between the cost and the monetary value of the silver was \$9,521,010, which constituted seigniorage.

*Sales of gold and silver for industrial use.*—Sales of gold bars to licensed purchasers for use in industry and the arts totaled \$50,371,332 during the fiscal year 1948. Sales of silver under the act of July 31, 1946, amounted to 1,728 fine ounces.

*Stock of monetary bullion.*—The total United States stock of gold bullion in custody of mint institutions was valued at \$23,532,345,730 and the stock of silver bullion totaled 963,375,836 fine ounces on June 30, 1948. The Office of Defense Plants of the Reconstruction Finance Corporation, etc., held 728,333,460 fine ounces of Treasury silver on the same date.

## PRODUCTION AND CONSUMPTION OF GOLD AND SILVER IN THE UNITED STATES

Production of gold and silver refined from ores mined in the United States and Alaska during the calendar year 1947 was as follows:

Gold, 2,165,318 fine ounces with a value of \$75,786,130; and silver, 38,587,069 fine ounces. Distribution of production by State of origin appears in the annual Mint report for the fiscal year 1948.

Gold issued for use in the industrial arts in the United States during the calendar year 1947 aggregated \$98,129,578, with a return from industrial use of old jewelry, plate, scrap, etc., amounting to \$49,229,578, giving a net consumption of new gold amounting to \$48,900,000.

Silver issued for use in arts and industry in the United States during the calendar year 1947 aggregated 126,366,359 fine ounces, with a return from industrial use of old silverware, scrap, etc., amounting to 27,866,359 fine ounces, giving a net consumption of new silver amounting to 98,500,000 fine ounces.

BUREAU OF NARCOTICS<sup>1</sup>

The Bureau of Narcotics is charged with the investigation, detection, and prevention of violations of the Federal narcotic and marihuana laws and of the Opium Poppy Control Act of 1942, and related statutes. It issues permits for importation of the crude narcotic drugs and for exportation and in-transit movements of narcotic drugs and preparations, and has authority to issue licenses, under certain conditions, for the production of opium poppies and manufacture of opium products therefrom. It cooperates with the Department of State in the discharge of the international obligations of the United States concerning the traffic in narcotic drugs and with the several States in the suppression of the abuse of narcotic drugs and marihuana in their respective jurisdictions.

During the fiscal year 1948 the Bureau of Narcotics directed its activities toward the suppression of the illicit traffic in narcotic drugs and marihuana and the control of the legitimate manufacture and distribution of narcotics through the customary channels of trade. The total quantity of narcotic drugs seized in the internal illicit traffic amounted to 844 ounces in comparison with 1,200 ounces seized in 1947. Seizures of marihuana amounted to 964 pounds bulk, 13 pounds seeds, 14,140 cigarettes, and 800 growing plants as compared with 700 pounds bulk, 7 pounds seeds, 10,011 cigarettes, and 845 growing plants in 1947.

The table following shows for the fiscal year the number of violations of the narcotic and marihuana laws by persons registered with collectors of internal revenue to engage in legitimate narcotic and marihuana activities and by persons who have not qualified by registration to engage in such activities, as reported by Federal narcotic enforcement officers.

<sup>1</sup> Further information concerning narcotic drugs is available in separate report of the Commissioner of Narcotics.

*Number of violations of the narcotic and marihuana laws reported during the fiscal year 1948, with their dispositions and the penalties*

<sup>1</sup> Federal cases are made by Federal officers working independently while joint cases are made by Federal and State officers working in cooperation.

<sup>2</sup> Represents 80 cases which were compromised in the sum of \$14,279.

The importation, manufacture, and distribution of opium and its derivatives, as heretofore, were subject to a system of quotas and allocations designed to secure their proper distribution for medical needs. Additional quantities of opium were imported during the year. Coca leaf imports were sufficient for medicinal purposes, and additional supplies were available for the manufacture of nonnarcotic flavoring extracts.

Exports of narcotic drugs increased as compared with 1947, and remained considerably above the prewar level. Manufacture of opium derivatives continued high to meet export requirements and the increased medical use of codeine.

The number of thefts and quantities of narcotics stolen dropped

somewhat below the 1946 level and were about one-half of the 1947 figures.

Registrations under the narcotic and marihuana laws during the year are shown by classes in the following table.

*Registrations under the Federal narcotic and marihuana laws, Jan. 1, 1948*

	Narcotic law	Marihuana law
Importers, manufacturers, producers, and compounders.....	148	8
Importers, manufacturers, and compounders.....		530
Producers (growers).....		104
Dealers.....		
Wholesale.....	1,189	
Retail.....	47,848	
Practitioners.....	185,981	336
Dealers in and manufacturers of untaxed preparations.....	167,123	87
Users for purposes of research, instruction, or analysis.....	154	
Total.....	402,443	1,065

<sup>1</sup> Includes registrations for which payment of occupational tax is not required under law, because also registered in some other class.

### COMMITTEE ON PRACTICE

The Committee on Practice receives and acts upon applications of attorneys and agents for admission to practice before the Treasury Department. It makes inquiries, holds hearings, and in general acts as the administrative and advisory agency in all matters pertaining to practice, makes recommendations to the Secretary of the Treasury, and performs other duties prescribed by Department Circular 230, revised May 27, 1947.

The Committee also receives and acts upon applications of individuals, corporations, associations, and partnerships for customhouse brokers' licenses, issues customhouse brokers' licenses, makes recommendations to the Secretary of the Treasury, and performs other duties as prescribed by Department Circular 559, revised May 1, 1947.

The following statement summarizes the work of the Committee for the fiscal year 1948:

Attorneys and agents:	<i>Number</i>
Applications for enrollment approved.....	5,599
Applications for enrollment disapproved.....	17
Applications withdrawn on advice of Committee.....	80
Complaints disposed of pursuant to section 5-B of the Administrative Procedure Act:	
Resignations submitted, in order to evade proceedings in disbarment, and accepted by the Committee; names ordered stricken from the roll.....	18
Formal complaints against enrolled persons:	
Pending July 1, 1947.....	8
Filed during the year.....	0
Pending June 30, 1948.....	8
Customhouse brokers:	
Applications for licenses approved.....	97
Applications withdrawn.....	17
Licenses canceled.....	22

Since the organization in 1921 of the Committee on Practice, 82,360 applications for enrollment have been approved and 818 disapproved, 256 practitioners have been disbarred from further practice before the Treasury Department, 140 have been suspended from practice for various periods, 184 have been reprimanded, and 18 resignations have been accepted.

#### DIVISION OF TAX RESEARCH

The Division of Tax Research assembles the facts and prepares the economic, statistical, and technical analyses needed (1) to aid the Secretary in the formulation of Treasury tax policy, and (2) to provide information on various tax matters, as requested, for the President, Members of Congress, various Government officials, and the public. The Division provides, on behalf of the Secretary, material to aid the Ways and Means Committee of the House of Representatives, the Finance Committee of the Senate, and the Joint Committee on Internal Revenue Taxation in their consideration of tax proposals and legislation. In its work, the Division consults with the Bureau of Internal Revenue on administrative matters and with the Office of the Tax Legislative Counsel on legal matters.

The Division's functions include the preparation of basic surveys of the tax problems of the Federal Government, the devising of alternative methods of meeting revenue requirements, and the development of methods of adjusting the tax system to changing economic conditions. The tax system is analyzed with a view to obtaining revenue yields large enough to meet prospective revenue requirements and to making adjustments which will be fair to taxpayers and will avoid undesirable economic effects. Individual taxes are studied (1) to determine their effects on particular groups of taxpayers, (2) to avoid inequity among taxpayers within a given group, (3) to ascertain and develop methods of meeting administrative and compliance problems, and (4) to devise ways of integrating particular taxes with the tax system as a whole. These studies require economic analyses of the effects of each tax; technical analyses of the more complicated problems inherent in various tax measures; and statistical analyses of the distribution of the burden of specific taxes, the total Federal tax load, and the combined Federal, State, and local burden.

The interrelationships of Federal, State, and local taxes are studied with a view to possible improvements in intergovernmental fiscal relations. Specific State and local taxes are also examined to determine the combined effect of such taxes and Federal taxes and to assure the Federal Government of the benefit of State and local tax experience. Likewise, to gain the benefit of foreign experience and to compare policies, studies are made of foreign taxes.

The Division is also charged with general responsibility respecting the assembling and publication of statistics pertaining to Federal taxation. Correspondence relating to matters of taxation not involving legal questions is handled by the Division. The Division also participates in conferences with taxpayers who call special problems to the attention of the Treasury Department.

During the fiscal year 1948 the Division continued to work primarily on the problems of Federal tax revision. The Division prepared

factual material and analyzed various proposals for tax revision which were considered by the Congress. Studies of a number of major tax items were carried on in the fields of business taxes, individual income taxes, excise taxes, estate and gift taxes, and social security taxes. (For a list of the major tax studies released, see exhibit 36.)

#### OFFICE OF THE TECHNICAL STAFF

The Office of the Technical Staff in the Office of the Secretary serves as a technical staff for policy-forming officials of the Department on matters relating to Treasury financing, public debt management, and various general economic problems arising in connection with Treasury activities.

For the use of the Secretary in making his financing decisions and in formulating debt management policies, a variety of analyses is prepared. The Office draws up alternative plans in detail for each financing operation. It analyzes the results of the operation in order to gauge its effectiveness and secure guidance for future planning. Estimates of the income and savings position of different classes of investors are prepared, together with information on the amounts of the outstanding public debt already held by these investors. The Office analyzes the relative desirability of cash pay-offs to and additional borrowing from each class, and the type of security best suited to the requirements of each class. The outlook for financing requirements during an appropriate period ahead is reviewed and various financing programs which would take care of these requirements are suggested. The Office recommends terms for the particular securities which might be offered, covering such characteristics as rate of interest, maturity, call period, negotiability, eligibility as collateral, redemption privileges accorded to holders, and restrictions as to the amount of purchases or holdings by different classes of investors. It analyzes the relation of these securities to the maturity schedule and interest costs of the public debt, the effect of their issuance upon the market prices and ownership distribution of outstanding Government securities, the impact of the Treasury's public debt operations on the credit structure and general economy of the country, and the long-range effects on the economy of present financing decisions.

In connection with its work in Treasury financing, the Office is charged with the duty of keeping policy-forming officials of the Department posted on the outlook for Federal receipts. In addition, the facilities of the Staff are utilized by the Secretary for the preparation of official estimates of Government receipts for incorporation in the President's Annual Budget Message and in intervening budget revisions. Similarly, estimates of the revenue effects of proposed and pending legislation are prepared; these are requested both by Treasury officials and by committees of Congress.

Technical mathematical analyses needed in connection with financing and public debt problems are also prepared. This work is under the supervision of the Government Actuary, who is an Assistant Director of the Office of the Technical Staff. He is responsible for reports on actuarial matters involved in Treasury operations, and prepares actuarial estimates required by statute with respect to the operations of several Government trust funds. The Secretary of the

Treasury is charged with the duty of handling the investments and other operations for most of these funds.

The Office of the Technical Staff was established by Treasury Department Order No. 92, dated September 23, 1947, superseding the Division of Research and Statistics which was abolished.

### UNITED STATES COAST GUARD

The functions of the Coast Guard embrace, in general terms, maritime law enforcement; saving life and property; providing navigational aids to maritime commerce and to air commerce over the ocean; promoting the efficiency and safety of the American merchant marine; and military readiness.

The integration of the personnel of the former Bureau of Marine Inspection and Navigation into the regular military organization was effected pursuant to the act of Congress approved July 23, 1947 (Public Law 219), and the Service thus had a single unified organization to carry forward the correlated duties which prior to 1939 were divided among three different Federal agencies—the Coast Guard, Light-house Service, and Bureau of Marine Inspection and Navigation.

Limited appropriations made it necessary to reduce complements aboard ships and stations, to deactivate a number of vessels, and to defer some construction projects. Moreover, the Service was unable to proceed with a widening field of postwar duties particularly in the fields of ocean weather observations, search and rescue coverage, and navigational aids to maritime commerce and air commerce over the ocean.

Pursuant to a provision contained in the Second Supplemental Appropriation Act, 1948, an outside agency designated by the Secretary of the Treasury and Chairmen of the Committees on Appropriations of the House of Representatives and Senate made a comprehensive study of the administrative management, and fiscal policies and affairs of the Coast Guard. The report of this agency was submitted to the House and Senate Appropriations Committees in January 1948. The report contained numerous recommendations ranging from minor suggestions to proposals involving major programs. Each recommendation has been or is being thoroughly explored by the Coast Guard. The report also served as an impartial viewpoint on the needs of the Service for additional legislation and additional appropriations for adequate and efficient conduct of Service duties, and was considered by the congressional appropriation committees in acting upon the 1949 Coast Guard budget.

### SAFETY AT SEA CONFERENCE

Culminating three years of work by the Commandant of the Coast Guard undertaken on behalf of the State Department, and assisted by committees representing interested Government agencies and the maritime industry, many proposals of the United States Government for revision of the 1929 International Convention for the Safety of Life at Sea were adopted at the Conference convened in London, England, on April 23, 1948. The Commandant was appointed by the President as Chairman of the United States group which comprised two delegates, 33 advisers, and seven technical experts. The

new revised Convention, to which the principal maritime nations of the world are parties, embodies safety standards markedly in advance of those contained in the 1929 Convention for vessels of the United States and other maritime nations.

#### ASSISTANCE OPERATIONS

The assistance rendered by Coast Guard stations, vessels, and aircraft during the year is reflected in the following statistics:

Number of instances of major assistance.....	5, 923
Value of vessels assisted.....	\$157, 430, 859
Value of cargoes of vessels assisted.....	\$12, 555, 679
Lives saved or persons rescued from peril.....	5, 399
Number of instances of minor assistance.....	4, 152

The term "major assistance" includes the rescue of persons from water or from drifting ice, the removal of persons from endangered vessels, the towing to safety of vessels on which personnel are endangered, and, during floods, the removal of persons to safety when danger of drowning threatens. When Coast Guard aircraft are employed, "major assistance" includes open-sea landings and take-offs under abnormally hazardous conditions.

Outstanding among the assistance operations of the Coast Guard was the rescue by the cutter *Bibb* on October 14-15, 1947, of 68 passengers and crew from the American flying boat *Bermuda Sky Queen*. This airplane, en route from Ireland to Newfoundland, ran out of fuel and was unable to reach Newfoundland. The plane reversed its direction, returned to the position of the *Bibb* which was occupying an ocean weather station, and made an emergency landing in the open sea. Rescue operations by means of small boats and rafts were successfully carried on for many hours under difficult conditions.

In collaboration with other governmental agencies, the Red Cross, and local authorities, the Coast Guard rendered extensive assistance in evacuating citizens and salvaging property during the floods which occurred in the valleys of the Mississippi, Ohio, and Columbia Rivers.

At the beginning and close of the navigation season considerable assistance was furnished to marine commerce on the Great Lakes in the breaking of ice for the passage of vessels. The Coast Guard icebreaker *Mackinaw*, in company with the cutter *Acacia*, opened a passage for 12 ice-locked ships at Buffalo on March 17-18, 1948, and assisted them to the westward. This was the earliest known date in over 50 years for the movement of shipping from Buffalo. Three additional cutters, together with a helicopter attached to the *Mackinaw*, continued icebreaking activities in Great Lakes harbors and through the Straits of Mackinac.

#### INTERNATIONAL ICE PATROL

The International Ice Patrol for the season of 1947 which was in progress at the beginning of the fiscal year was discontinued on July 23, 1947.

Aerial ice observation flights were inaugurated in February 1948

by planes based at Argentia, Newfoundland. On April 26, the Ice Patrol for the season of 1948 was established, utilizing two surface vessels augmented by planes from the Argentia base. By July 2 ice no longer menaced the United States-Europe trans-Atlantic lane routes, and the Ice Patrol was accordingly discontinued for the season. The program of scientific studies, carried on before World War II as a part of this international service of ice observation and ice patrol, was reestablished this season through the assignment of the cutter *Evergreen* to duty as oceanographic vessel.

#### BERING SEA PATROL

The Bering Sea Patrol, which was discontinued during World War II, was resumed in May 1948 with the assignment of the cutter *Northwind* to duty under the 13th Coast Guard District. This patrol has for its purpose the protection of life and property; protection of the seal herds and other wild life; law enforcement and transportation of a floating court in the administration of justice; and the furnishing of medical and dental assistance to natives and others in remote localities in the areas contiguous to the Bering Sea and Arctic Ocean.

#### OCEAN WEATHER STATIONS

Since 1940 the Coast Guard, at the direction of the President, has been maintaining ocean weather stations as a joint Weather Bureau-Coast Guard operation. During the fiscal year two such stations were maintained in the North Atlantic Ocean and one in the Pacific Ocean between the United States and Hawaii. The number of stations has been limited by the available funds and also by the lack of basic legislative authority.

Congress by the act of June 22, 1948 (Public Law 738), authorized the operation of floating ocean stations for the purpose of providing search and rescue, communication, and air-navigation facilities, and meteorological services in such ocean areas as are regularly traversed by aircraft of the United States. Provision was also made for funds to increase the number of ocean stations in the Atlantic Ocean to 7½ (the "½" applicable to one station maintained jointly by the United States and Canada) and in the Pacific Ocean to two. For this purpose 17 additional vessels will be manned. At the close of the year arrangements had been consummated for the loan and activation of 15 vessels from the Navy reserve fleet and two from the Coast Guard reserve fleet. It is expected that these vessels will be in service by June 30, 1949, thus enabling the Coast Guard to implement on behalf of the United States the international agreement for the maintenance of certain ocean weather stations.

#### AIDS TO NAVIGATION

On June 30, 1948, the Coast Guard maintained 36,284 aids to navigation in the navigable waters of the United States, its Territories and possessions. These aids consisted of many different devices, ranging from simple unlighted wooden spar buoys to light stations, lightships, and complex loran (electronic long-range aids to

navigation) networks. During the year, 1,848 new aids were established and 2,029 aids were discontinued, resulting in a decrease of 181 compared with the total number maintained on June 30, 1947. This decrease was due to readjustments to peacetime needs.

In addition to loran stations in the United States, others are located in widely separated and isolated localities (Greenland, Labrador, Newfoundland, Alaska, the Philippines, and the islands of the Pacific) providing networks covering the North Atlantic and North Pacific Oceans. The use of loran, by which navigators on or over the sea can determine their position accurately and quickly through the medium of radio signals transmitted from stations of known position, and which during the war was restricted to combatant vessels and aircraft, is rapidly increasing in civil aviation and maritime commerce. Although located at distant and isolated points, these loran stations are provided frequent logistic service by cutters and aircraft.

In order to implement the expanded postwar activities of the Coast Guard in the field of aids to navigation, Congress provided legislative authority by Public Law 786, approved June 26, 1948, for the Coast Guard to establish and operate maritime aids for the armed forces, and loran stations essential for the armed forces and maritime and air commerce of the United States.

#### AVIATION

During the fiscal year 79 aircraft, including eight helicopters, were maintained in operational status. In addition to conducting many searches for distressed craft and affording transportation and medical aid in emergencies at sea, these airplanes were successfully used in collaboration with surface craft in ice-breaking activities on the Great Lakes; for flood relief in the valleys of the Mississippi, Ohio, and Columbia Rivers; for ice observation in the North Atlantic; and in logistic support of remote loran stations. One converted B-17 airplane was temporarily assigned to the Coast and Geodetic Survey for the entire year to assist in photographic work in the continental United States and Alaska. Airplanes were also assigned, as usual, to assist personnel of the Alcohol Tax Unit in law enforcement duties.

#### MARINE INSPECTION AND SAFETY MEASURES

Included in the duties which the Coast Guard performed in promoting safety in the merchant marine and on navigable waters were approval of plans for the construction, repair, and alteration of vessels; approval of materials, equipment, and appliances; issuance of certificates of inspection, and of permits indicating approval of vessels for operations which may be hazardous to life or property; administration of loadline requirements; licensing and certificating of officers, pilots, and seamen; investigation of marine casualties; enforcement of manning requirements, citizenship requirements, and requirements for the mustering and drilling of crews; control of log books, shipment, discharge, protection and welfare of merchant seamen; promulgation and enforcement of rules for lights, signals, speed, steering, sailing, passing, anchorage, movement and towlines of vessels; numbering of

undocumented vessels; prescription and enforcement of regulations for outfitting and operation of motorboats; licensing of motorboat operators; and the regulation of regattas and marine parades.

A digest of certain phases of the marine inspection activities follows:

	Number of vessels	Gross tonnage of vessels
Annual inspections completed <sup>1</sup> .....	7, 513	23, 259, 608
Drydock examinations.....	7, 361	31, 690, 281
Reinspections.....	2, 667	7, 376, 508
Special surveys (passenger vessels).....	141	-----
Special examinations by traveling inspectors on passenger vessels and ferries.....	210	-----

<sup>1</sup> Includes 78 vessels, totaling 1,515,314 gross tons, which were conversions or new construction completed during year.

There were 3,166 marine casualties investigated, including 130 accidents which resulted in the loss of 299 lives, only one of which was that of a passenger on an inspected and certificated vessel. The most serious casualty was the stranding and loss of the U. S. Army transport *Clarksdale Victory* on November 24, 1947, which resulted in the death of 49 of the 53 seamen on board. There were nine seagoing vessels and one inland passenger vessel of over 1,000 gross tons lost as a result of marine hazards.

The Interagency Committee appointed by the Secretary of the Treasury, as a result of the Texas City disaster, continued its studies of the characteristics of ammonium nitrate fertilizer and safe handling measures.

A total of 13,069 merchant vessel plans and blue prints were processed for approval; and 365 stability, fire, and equipment tests were made in the field. When the T2 tanker *Ponaganset* broke in two while at an outfitting pier in December 1947, the program for fitting crack arrestor straps on T2 tankers was less than one-quarter completed. Acceleration of this program to effect completion prior to the 1948 winter season has been undertaken. A revised approval record system for items of equipment requiring Coast Guard approval for use on merchant vessels was completed.

#### MERCHANT MARINE PERSONNEL

The licensing and certificating of merchant marine personnel covered the issuance of 137,017 documents, of which 44,201 were issued to men who had not previously served in the merchant marine. In the process of regulating the orderly conversion of the merchant marine from wartime to peacetime operation, 16,483 waivers of manning requirements were issued and 2,568 crew shortage reports were received. Shipping commissioners supervised the execution of 20,940 sets of shipment and discharge shipping articles.

Merchant Marine Investigating Units in major domestic ports and Merchant Marine Details in certain foreign ports continued to investigate marine casualties and to administer discipline in the merchant marine as required by Revised Statutes 4450, as amended (46 U. S. C. 239). Merchant Marine Details in London, Bremerhaven, Naples, Trieste, and Piraeus operated throughout the year. During the year 10,184 investigations of cases involving negligence,

incompetence, and misconduct were made. These investigations resulted in the preferment of charges in 993 cases. No hearings could be held on these charges because of the lack of hearing examiners required by the Administrative Procedure Act. However, funds to hire such examiners were made available as of July 1, 1948.

### PERSONNEL

On June 30, 1948, the military personnel strength of the Coast Guard on active duty consisted of 1,854 commissioned officers (1,616 Regular, 138 temporary service, 100 Reserve), 668 chief warrant and warrant officers (265 Regular, 397 temporary service, 6 Reserve), 261 cadets, and 17,080 enlisted men.

The authorized force of civilian employees at Coast Guard Headquarters, Washington, D. C., on June 30, 1948, numbered 650. In the field service there were 1,150 salaried personnel, 1,836 wage board employees, and 677 lamplighters.

The graduation in June of 52 members of the Coast Guard Academy Class of 1948 marked the completion of the first full four-year course by a class since 1941. During the year, 750 candidates took the entrance examination for the Academy and 165 were expected to enter in July as the Class of 1952. The summer training cruise was made aboard the cutters *Campbell* and *Eagle* which left New London, Conn., in June 1948, with visits scheduled at Ponta Delgada, Azores; London, England; Tenerife, Canary Islands; and Hamilton, Bermuda.

Training activities continued on the same scale as during the previous year in an attempt to overcome shortages in trained personnel. During the year 45 officers completed advanced and post-graduate training in various specialties and 17 were assigned to such training; 77 officers completed short refresher courses of various kinds; over 230 officers completed various off-duty and educational courses; 2,117 men received recruit training; and 1,785 men were graduated from the various Coast Guard and Navy petty officer training schools.

The Coast Guard Institute enrolled 4,089 new students as compared with 2,977 in the previous year. Enrollment at the end of the year was 5,008. The preparation of many new courses for officers and enlisted men was begun.

Of the 20,665 men who applied for enlistment in the Coast Guard, 4,811 were enlisted, 5,612 were rejected for physical reasons, 8,287 were rejected for other reasons, and 1,955 were accepted but failed to enlist. Starting late in the fiscal year, enlistments in the Coast Guard Reserve were opened to former Coast Guard and Coast Guard Reserve members meeting certain qualifications.

For rendering medical service, guarding the health of Coast Guard personnel, and conducting physical examinations, the Public Health Service had detailed to Coast Guard vessels and shore stations on June 30, 1948, 24 medical officers, 31 dental officers, eight nurse officers, and one scientist officer. Three of the medical officers completed the course of flight training at the Naval Air Training Center, Pensacola, Fla., and were designated flight surgeons and detailed to Coast Guard aviation.

## COAST GUARD AUXILIARY

Membership in the Coast Guard Auxiliary—a nonmilitary organization composed of owners of motorboats, yachts, aircraft, and radio stations, and of persons especially qualified for duty in the Auxiliary, to assist the Coast Guard on a voluntary basis in promoting maritime safety and in emergencies—numbered 13,195 on June 30, 1948, embracing the affiliation of 5,031 boats, 164 airplanes, and 169 radio stations.

Valuable assistance was rendered to the Coast Guard and to the boating public, with Auxiliary units participating in hurricane and flood relief operations and in the patrol of regattas and marine parades. In the conduct of the Courtesy Motorboat Inspection program, 4,170 motorboats were inspected, and a new program was inaugurated for affording practical instruction in basic small boat seamanship to nonmembers.

## DISTRICTS, FACILITIES, AND EQUIPMENT

The 10th Coast Guard District was abolished on March 31, 1948. This district comprised the Panama Canal Zone; all of the island possessions of the United States pertaining to Puerto Rico and the Virgin Islands; and all United States naval reservations in the islands of the West Indies and on the north coast of South America, with district headquarters at San Juan, Puerto Rico. The functions, responsibilities, and facilities of this district were transferred to and combined with the Seventh Coast Guard District, with headquarters at Miami, Fla. This amalgamation reduced the number of Coast Guard districts from 12 to 11.

On June 30, 1948, the floating units in active commission consisted of 160 cutters of various types, 59 patrol boats, 37 lightships, 40 harbor tugs, and nine buoy boats. In addition there were 171 motor lifeboats, 1,466 motorboats, and 2,357 nonpowered small craft in operation.

Authorized shore units as of June 30, 1948, included nine air stations, four air facilities, ten bases, 172 lifeboat stations, 446 light stations, 73 light attendant stations, and 20 radio stations.

One yard at Curtis Bay, Md., 41 depots, and two supply depots afforded maintenance facilities to the vessel, aircraft, and shore establishments.

During the year surplus vessels with an acquisition value of \$49,656,722 and other surplus property with an acquisition value of \$15,136,182 were disposed of.

## CONSTRUCTION AND DEVELOPMENT

Construction activities during the year were confined principally to maintenance and modernization of existing structures. Construction of permanent loran station buildings in the Aleutian Islands was started, as was also a concrete base building at the Coast Guard Base, Causeway Island, Miami, Fla.

To effect economies in operating costs, four steam-powered lightships were converted to Diesel ships, and seventy-two 38-foot cabin picketboats and four 83-foot patrol boats were converted from gasoline propulsion to Diesel installations.

With the purpose of obtaining information for improving the design and structural and operational efficiency of icebreaking types of vessels in general, tests were conducted on the ice-breaker *Mackinaw* on the Great Lakes. It was a joint undertaking in which various governmental and industrial agencies participated.

A continuing program of development was carried on in perfecting, improving, and adding to the efficiency of various appliances and equipment used by the Coast Guard in performance of its duties. Illustrative examples were development of a remote controlled unattended lightship radio-beacon vessel to be moored offshore to serve as a marine aid to navigation, and of a new standard type of trihedral radar buoy reflector affording greater range of detection.

Engineering tests were inaugurated on a considerable number of new electronic devices for more effectively performing Service missions without requiring additional manpower. Notable developments in this field included extensions and improvements in automatic synchronizing equipment for loran shore stations to further decrease manpower requirements at these stations; a new radiobeacon alarm device to permit attendants to safely leave the immediate vicinity of the radiobeacon equipment; and a new radio-telegraph automatic call signal receiving alarm. Work was started on planned tests for new types of high frequency radio direction finders which can be utilized by existing shore radio stations without additional manning personnel; and on tests of new radiophone direction finders for search work involving radio-phone-equipped yachts and small boats.

The Ship Structure Committee, which is a cooperative effort comprised of members from the Army, Navy, Coast Guard, Maritime Commission, and American Bureau of Shipping, achieved several significant results on the improvement of hull structures of ships. The objectives of the Committee are being achieved through the coordination of the research efforts of the member agencies and private industry and by the establishment of specific research projects in Federal and university laboratories.

#### FUNDS AVAILABLE, OBLIGATIONS, AND BALANCES

During the fiscal year 1948 the sum of \$1,089,100 was expended under the provisions of the Mustering Out Payment Act of 1944. The Coast Guard Terminal Leave Unit paid \$4,012,489 to 23,510 claimants in settlement of unused leave under the Armed Forces Leave Act of 1946.

The following table shows the amounts available for the Coast Guard during the fiscal year 1948, and the amount of obligations and unobligated balances:

	Funds available	Net total obligations	Unobligated balances
Current operating appropriation:			
Salaries, office of Commandant.....	\$2,000,000	\$1,980,584	\$19,416
Pay and allowances.....	64,281,225	63,522,513	758,712
Civilian employees (field).....	3,629,293	3,545,778	83,515
General expenses.....	24,548,888	24,115,414	433,474
Subtotal.....	94,459,406	93,164,289	1,295,117
Retired pay.....	10,858,589	10,831,567	27,022
Acquisition, construction, and improvements:			
Allocation from 1948 appropriation.....	732,005	665,538	66,467
Prior year unobligated balances:			
Acquisition of vessels and shore facilities, Coast Guard.....	2,715,839	303,504	2,412,335
Emergency construction, vessels and shore facilities, Coast Guard.....	78,870		78,870
Establishing and improving aids to navigation, Coast Guard.....	2,915,452	2,151,906	763,546
Special projects, aids to navigation, Coast Guard.....	245,144	34,802	210,342
Subtotal.....	6,687,310	3,155,750	3,531,560
Total appropriated funds.....	112,005,305	107,151,606	4,853,699
Miscellaneous funds:			
Payments, Armed Forces Leave Act of 1946 (allotment to Treasury, Coast Guard).....	12,062,565	4,012,489	8,050,076
Administrative expenses, payments, Armed Forces Leave Act of 1946 (allotment to Treasury, Coast Guard), 1947 and 1948.....	67,932	63,887	4,045

## UNITED STATES SAVINGS BONDS DIVISION

The United States Savings Bonds Division is charged with the responsibility of promoting the sale of United States savings bonds. The purpose of the sale of savings bonds is twofold. On the part of the investor, the financial security of the individual is furthered by regular investment of funds periodically available. On the part of the Government, the funds so absorbed aid in the program designed to reduce bank holdings of Government securities as much as possible. In this way savings bonds will be substituted for a part of the bank-held debt. As a result, the ownership of the debt is widened, the structure of the debt is improved, and a contribution is made to the control of inflationary pressures.

Activities of the Division during the fiscal year 1948 were keyed to the Treasury's anti-inflation and debt management policies. Sales efforts were intensified to draw into savings as great a sum as possible from the current income stream, both to lessen pressure on prices directly and to provide funds for retirement of other public debt obligations of a potentially inflationary character. A major objective was to obtain wider distribution of the national debt.

The Security Loan drive to increase the sales of savings bonds was conducted from April 1 through July 15, 1948. In addition to the sales to individuals, Series F and G bonds were sold to certain classes of institutional investors and certain commercial and industrial banks during the period from July 1 through 15, when a special offering of these issues was made.

In addition to the Security Loan, the Division engaged in two intensive promotional programs. The first, begun in June 1947 and carried through July 1947, inaugurated the bond-a-month plan for regular savings bond investments through the banks. During January and February 1948 a campaign was conducted to increase participation in the payroll savings plan for regular investments for salary and wage earners.

Promotion of the payroll savings plan continues to be a major activity of the Division. The Payroll Savings Division works closely with private concerns and assists State field offices in payroll plan promotion. The Federal Payroll Savings Section cooperates with the Interdepartmental Savings Bond Committee in promoting savings bond sales to Federal employees.

The Savings Bonds Division is headed by a National Director who is also an Assistant to the Secretary of the Treasury, and serves without compensation. The national organization consists of a Director of Sales, under whom function divisions of Publicity and Promotions; Advertising; Payroll Savings; Agriculture; Community Activities; Banking and Investments; Education; and Labor Organizations. The administrative structure is headed by the Office of the Executive Director. The field organization operates through a small Sales Coordination Staff and Directors in each State.

Sales activities of the Division are assisted by a Nation-wide organization of volunteers, serving without compensation, headed by advisory committees in each State, and operating through county and local committees.

Promotional costs of the savings bond program are held to a minimum through contributions of advertising by radio, newspapers, and other media and by many national and local advertisers. Savings bond advertising and promotion material is prepared and donated by the advertising agencies of The Advertising Council, Inc., for Treasury distribution to media and advertisers.

Sales of savings bonds of all series during the fiscal year 1948 totaled \$6,234,694,000. Details of sales, redemptions, and amounts outstanding will be found on pages 25 to 26 and 520 to 532.

#### UNITED STATES SECRET SERVICE

The principal functions of the Secret Service are the protection of the President of the United States and members of his family, of the President-elect, of the White House, the Treasury Building, and other buildings housing Treasury Department activities, and of the currency and other obligations and securities of the United States in production, storage, and transit. The Secret Service is also charged with the suppression of counterfeiting, forging, and alteration of obligations and securities of the United States and foreign countries, and of counterfeiting of coins; and with investigations of forged

endorsements on, or the fraudulent negotiation of, United States Treasury checks and bonds, of loss of valuables in shipments by Government agencies, and of applicants for positions in certain agencies of the Treasury Department.

### PROTECTIVE AND SECURITY ACTIVITIES

Security plans were executed successfully during the President's visit to the Virgin Islands and Puerto Rico. Enthusiastic cooperation was extended to the Secret Service by police departments in various localities incident to the President's journey to the West in June 1948.

The White House was open to the public throughout the year, and 538,650 visitors were shown through the parlors.

The Uniformed Force of the Secret Service protected over \$190 billion in currency, stamps, and other obligations in transit, and quantities of securities in production and storage.

### ENFORCEMENT ACTIVITIES

During the year Secret Service agents seized \$3,094,230.01 in counterfeit bills and coins, the largest amount of seizures in the 83 years of the agency's existence. These record seizures were due largely to the counterfeiting of United States money abroad. Of the 51 new counterfeit note issues which appeared during the year, 35 were of foreign origin. Counterfeit coins seized totaled \$8,473.56.

Seizures of counterfeits of foreign origin totaled \$2,346,796.00, of which only \$42,566.00 reached circulation in the United States. Near Marseilles, France, United States Secret Service agents and French police smashed a huge counterfeiting ring in September 1947. Officers captured \$2,145,200.00 in fake bills and arrested 11 counterfeiters who, at the close of the year, were awaiting trial.

Domestic counterfeiting also increased, but not to any alarming extent. Of the total of \$747,434.01 in domestic bills and coins captured in the United States, \$102,648.91 reached circulation.

There were 158 arrests and 90 convictions for violations of the counterfeiting laws, arrests having increased 71.7 percent compared with 1947.

Nine men in Florida and Georgia, arrested for counterfeiting, were discovered also to be stolen-car racketeers. Secret Service agents captured nearly \$60,000 in counterfeit \$20 notes, together with a quantity of stolen New Jersey automobile registration certificates. The men were sentenced to terms ranging from three to seven years.

The year also brought the solution to a 15-year-old Secret Service riddle. Since 1932 more than 5,000 counterfeit \$1 bills were passed in New York City. Agents finally traced the maker to a small apartment there, and seized negatives and plates for the counterfeits, together with a printing press and photographic equipment. They arrested the 72-year-old counterfeiter who, at the close of the year, was under indictment and awaiting trial.

The largest domestic counterfeiting seizure was in Chicago, Ill., where agents, in December 1947, rounded up a gang of former counterfeiters of ration stamps and charged them with manufacturing more than half a million dollars in counterfeit \$5, \$10, \$20, and \$50 bills.

Agents seized \$365,000 and determined that almost an equal amount had been burned. The seven offenders were sentenced June 2, 1948, to terms ranging from two to ten years.

The greatest enforcement problem of the Secret Service involved thefts and forgeries of Government checks and savings bonds. There were 32,283 forged checks and 11,019 forged bonds received for investigation during the year. Agents completed investigation of 28,004 checks totaling \$1,953,186.04 and 12,174 bonds with a value of \$579,909.19. There were 15,458 cases of both types pending June 30, 1948.

A record for fast action was made in one case involving a marine who stole five blank Government checks from the Marine Base at San Diego, Calif., March 24, 1948, three of which he negotiated. With police cooperation the Secret Service issued alarms which resulted in the capture of the offender in Nevada less than 12 hours after the theft occurred. He will be court-martialed by the Marine Corps.

Of the 1,732 persons arrested for check forgery, 1,590 were convicted. There were 232 arrests for bond forgery and 245<sup>1</sup> convictions. Fines in criminal cases totaled \$70,331.51 and jail sentences totaled about 2,091 years, with additional sentences of 2,585 years suspended or probated.

The Secret Service closed 43,540 criminal cases and 2,081 non-criminal cases, making a total of 45,621 investigations completed during the year.

The following tables constitute a statistical summary of Secret Service activities for 1948:

*Counterfeit money seized, fiscal years 1947 and 1948*

	1947	1948	Increase, or decrease (—)

## PUBLIC DEBT

### TREASURY CERTIFICATES OF INDEBTEDNESS, TREASURY NOTES, AND TREASURY BONDS

#### Exhibit 1.—Offering of $\frac{7}{8}$ percent certificates of Series G-1948<sup>1</sup>

[Department Circular No. 810. Public Debt]

TREASURY DEPARTMENT,  
Washington, July 21, 1947.

#### I. OFFERING OF CERTIFICATES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par, from the people of the United States, for certificates of indebtedness of the United States, designated  $\frac{7}{8}$  percent Treasury certificates of indebtedness of Series G-1948, in exchange for Treasury certificates of indebtedness of Series G-1947, maturing August 1, 1947.

#### II. DESCRIPTION OF CERTIFICATES

1. The certificates will be dated August 1, 1947, and will bear interest from that date at the rate of  $\frac{7}{8}$  percent per annum, payable with the principal at maturity on July 1, 1948. They will not be subject to call for redemption prior to maturity.

2. The income derived from the certificates shall be subject to all taxes now or hereafter imposed under the Internal Revenue Code, or laws amendatory or supplementary thereto. The certificates shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The certificates will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer certificates will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000 and \$1,000,000. The certificates will not be issued in registered form.

5. The certificates will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States certificates.

#### III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve Banks and branches and at the Treasury Department, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of certificates applied for, and to close the books as to any or all subscriptions at any time without notice; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

<sup>1</sup> Department Circular No. 809, dated June 23, 1947, covering the offering of certificates of Series F-1948, will be found in the 1947 annual report on p. 158.

## IV. PAYMENT

1. Payment at par for certificates allotted hereunder must be made on or before August 1, 1947, or on later allotment, and may be made only in Treasury certificates of indebtedness of Series G-1947, maturing August 1, 1947, which will be accepted at par, and should accompany the subscription.

## V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for certificates allotted, to make delivery of certificates on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive certificates.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

---

**Exhibit 2.—Details of certificate issues and allotments**

Circulars pertaining to issues of Treasury certificates of indebtedness during the fiscal year 1948 are similar in form to the circular shown in exhibit 1, and therefore are not reproduced in this report. However, the essential details regarding each issue are summarized in the following table, and the final allotments of new certificates in exchange for maturing or called securities are shown in the succeeding table.

*Summary of information contained in circulars pertaining to Treasury certificates of indebtedness issued during the fiscal year 1948*

<sup>1</sup> Full year's interest on certificates surrendered was paid to subscriber following acceptance of certificates.

<sup>2</sup> Beginning with November 1947 operation, arrangements were made between Treasury and Federal Reserve System whereby all or part of System's holdings of certain maturing and called securities would be presented for cash redemption.

<sup>3</sup> Called on Nov. 14, 1947, for redemption on Mar. 15, 1948.

<sup>4</sup> In case of called bonds in coupon form, payment of accrued interest on new certificates from Mar. 1 to 15, 1948 (\$0.43151 per \$1,000), was made when subscription was tendered. In case of maturing registered bonds, accrued interest was deducted from amount of check issued in payment of final interest on bonds surrendered. Final interest due Mar. 15 on bonds surrendered was paid, in case of coupon bonds, by payment of Mar. 15, 1948, coupons, which were detached by holders before presentation of bonds, and in case of registered bonds, by checks drawn in accordance with assignments on bonds surrendered.

<sup>5</sup> Subscription books closed May 21, 1948, except for receipt of subscriptions from holders of \$25,000 or less of maturing bonds. For the latter class, the subscription books closed May 25, 1948.

<sup>6</sup> In case of maturing bonds in coupon form, payment of accrued interest on new certificates from June 1 to 15, 1948 (\$0.43151 per \$1,000), was made when subscription was tendered. In case of maturing registered bonds, accrued interest was deducted from amount of check which was issued in payment of final interest on bonds surrendered. Final interest due June 15 on bonds surrendered was paid, in case of coupon bonds, by payment of June 15, 1948, coupons, which were detached by holders before presentation of bonds, and in case of registered bonds, by checks drawn in accordance with assignments on bonds surrendered.

**Exhibit 3.—Offerings of 1 percent Treasury notes of Series B-1948 and 1½ percent Treasury notes of Series A-1949, and allotments**

SERIES B-1948 (DEPARTMENT CIRCULAR NO. 813. PUBLIC DEBT)

TREASURY DEPARTMENT,  
*Washington, September 2, 1947.***I. OFFERING OF NOTES**

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par, from the people of the United States for notes of the United States, designated 1 percent Treasury notes of Series B-1948, in exchange for 1½ percent Treasury notes of Series A-1947, or 1¼ percent Treasury notes of Series C-1947, both maturing September 15, 1947.

**II. DESCRIPTION OF NOTES**

1. The notes will be dated September 15, 1947, and will bear interest from that date at the rate of 1 percent per annum, payable with the principal at maturity on October 1, 1948. They will not be subject to call for redemption prior to maturity.

2. The income derived from the notes shall be subject to all taxes, now or hereafter imposed under the Internal Revenue Code, or laws amendatory or supplementary thereto. The notes shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The notes will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer notes will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000 and \$1,000,000. The notes will not be issued in registered form.

5. The notes will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States notes.

**III. SUBSCRIPTION AND ALLOTMENT**

1. Subscriptions will be received at the Federal Reserve Banks and branches and at the Treasury Department, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of notes applied for, and to close the books as to any or all subscriptions at any time without notice; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

**IV. PAYMENT**

1. Payment at par for notes allotted hereunder must be made on or before September 15, 1947, or on later allotment, and may be made only in Treasury notes of Series A-1947, or in Treasury notes of Series C-1947, both maturing September 15, 1947, which will be accepted at par, and should accompany the subscription.

**V. GENERAL PROVISIONS**

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for notes allotted, to make delivery of notes on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive notes.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

## SERIES A-1949 (DEPARTMENT CIRCULAR NO. 819. PUBLIC DEBT)

TREASURY DEPARTMENT,  
Washington, November 19, 1947.

## I. OFFERING OF NOTES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions from the people of the United States for notes of the United States, designated 1½ percent Treasury notes of Series A-1949, in exchange for ½ percent Treasury certificates of indebtedness of Series L-1947, maturing December 1, 1947, or 2 percent Treasury bonds of 1947, maturing December 15, 1947. Exchanges will be made par for par in the case of the maturing certificates, and at par with an adjustment of interest as of December 15, 1947, in the case of the maturing bonds.

## II. DESCRIPTION OF NOTES

1. The notes will be dated December 1, 1947, and will bear interest from that date at the rate of 1½ percent per annum, payable with the principal at maturity on January 1, 1949. They will not be subject to call for redemption prior to maturity.<sup>1</sup> \* \* \*

## IV. PAYMENT

1. Payment for notes allotted hereunder must be made on or before December 1, 1947, or on later allotment. Payment of the principal amount may be made only in Treasury certificates of indebtedness of Series L-1947, maturing December 1, 1947, or in Treasury bonds of 1947, maturing December 15, 1947, which will be accepted at par and should accompany the subscription. The full year's interest on the certificates surrendered will be paid to the subscriber following acceptance of the certificates. In the case of the maturing bonds in coupon form, payment of accrued interest on the new notes from December 1, 1947, to December 15, 1947 (\$0.43151 per \$1,000), should be made when the subscription is tendered. In the case of maturing registered bonds, the accrued interest will be deducted from the amount of the check which will be issued in payment of final interest on the bonds surrendered. Final interest due December 15 on bonds surrendered will be paid, in the case of coupon bonds, by payment of December 15, 1947, coupons, which should be detached by holders before presentation of the bonds, and in the case of registered bonds, by checks drawn in accordance with the assignments on the bonds surrendered.

## V. ASSIGNMENT OF REGISTERED BONDS

1. Treasury bonds of 1947 in registered form tendered in payment for notes offered hereunder should be assigned by the registered payees or assignees thereof to "The Secretary of the Treasury for exchange for Treasury notes of Series A-1949 to be delivered to -----", in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange, and thereafter should be presented and surrendered with the subscription to a Federal Reserve Bank or branch or to the Treasury Department, Division of Loans and Currency, Washington, D. C. The bonds must be delivered at the expense and risk of the holder.

## VI. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions.<sup>1</sup> \* \* \*

JOHN W. SNYDER,  
*Secretary of the Treasury.*

<sup>1</sup>Omitted portion similar to corresponding sections of Department Circular No. 813, preceding.

**Exhibit 4.—Call, November 14, 1947, for redemption on March 15, 1948, of two issues of Treasury bonds (press release November 14, 1947)**

The Secretary of the Treasury announced today that the bonds of two outstanding issues which may be redeemed at the option of the United States on March 15, 1948, are called for redemption on that date. These issues are the 2 percent Treasury bonds of 1948-50, dated March 15, 1941, and the 2½ percent Treasury bonds of 1948-51, dated March 16, 1936. There are now outstanding \$1,115,367,900 of the 2 percent bonds and \$1,223,495,850 of the 2½ percent bonds.

The texts of the formal notices of call are as follows:

**TWO PERCENT TREASURY BONDS OF 1948-50 (DATED MARCH 15, 1941)**

*To Holders of 2 Percent Treasury Bonds of 1948-50 (Dated March 15, 1941), and Others Concerned:*

1. Public notice is hereby given that all outstanding 2 percent Treasury bonds of 1948-50, dated March 15, 1941, are hereby called for redemption on March 15, 1948, on which date interest on such bonds will cease.

2. Holders of these bonds may, in advance of the redemption date, be offered the privilege of exchanging all or any part of their called bonds for other interest-bearing obligations of the United States, in which event public notice will hereafter be given and an official circular governing the exchange offering will be issued.

3. Full information regarding the presentation and surrender of the bonds for cash redemption under this call will be found in Department Circular No. 666, dated July 21, 1941.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

**TWO AND THREE-QUARTERS PERCENT TREASURY BONDS OF 1948-51 (DATED MARCH 16, 1936)**

*To Holders of 2½ Percent Treasury Bonds of 1948-51 (Dated March 16, 1936), and Others Concerned:*

1. Public notice is hereby given that all outstanding 2½ percent Treasury bonds of 1948-51, dated March 16, 1936, are hereby called for redemption on March 15, 1948, on which date interest on such bonds will cease.

2. Holders of these bonds may, in advance of the redemption date, be offered the privilege of exchanging all or any part of their called bonds for other interest-bearing obligations of the United States, in which event public notice will hereafter be given and an official circular governing the exchange offering will be issued.

3. Full information regarding the presentation and surrender of the bonds for cash redemption under this call will be found in Department Circular No. 666, dated July 21, 1941.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

**TREASURY BILLS**

**Exhibit 5.—Inviting tenders for Treasury bills dated July 3, 1947 (press release June 27, 1947)**

The Secretary of the Treasury, by this public notice, invites tenders for \$1,300,000,000, or thereabouts, of 91-day Treasury bills, for cash and in exchange for Treasury bills maturing July 3, 1947, to be issued on a discount basis under competitive and fixed-price bidding as hereinafter provided. The bills of this series will be dated July 3, 1947, and will mature October 2, 1947, when the face amount will be payable without interest. They will be issued in bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

Tenders will be received at Federal Reserve Banks and branches up to the closing hour, two o'clock p. m., eastern standard time, Monday, June 30, 1947. Tenders will not be received at the Treasury Department, Washington. Each tender must be for an even multiple of \$1,000, and the price offered must be ex-

pressed on the basis of 100, with not more than three decimals, e. g., 99.925. Fractions may not be used. It is urged that tenders be made on the printed forms and forwarded in the special envelopes which will be supplied by Federal Reserve Banks or branches on application therefor.

Tenders will be received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Immediately after the closing hour, tenders will be opened at the Federal Reserve Banks and branches, following which public announcement will be made by the Secretary of the Treasury of the amount and price range of accepted bids. Those submitting tenders will be advised of the acceptance or rejection thereof. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders, in whole or in part, and his action in any such respect shall be final. Subject to these reservations, tenders for \$200,000 or less from any one bidder at 99.905 entered on a fixed-price basis will be accepted in full. Settlement for accepted tenders in accordance with the bids must be made or completed at the Federal Reserve Bank on July 3, 1947, in cash or other immediately available funds or in a like face amount of Treasury bills maturing July 3, 1947. Equal treatment will be accorded all tenders, whether the bidders offer to exchange maturing bills or to pay cash for the new bills bid for. Cash adjustments will be made for differences between the par value of maturing bills accepted in exchange and the issue price of the new bills.

The income derived from Treasury bills, whether interest or gain from the sale or other disposition of the bills, shall not have any exemption, as such, and loss from the sale or other disposition of Treasury bills shall not have any special treatment, as such, under Federal tax acts now or hereafter enacted. The bills shall be subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which Treasury bills are originally sold by the United States shall be considered to be interest. Under sections 42 and 117 (a) (1) of the Internal Revenue Code, as amended by section 115 of the Revenue Act of 1941, the amount of discount at which bills issued hereunder are sold shall not be considered to accrue until such bills shall be sold, redeemed or otherwise disposed of, and such bills are excluded from consideration as capital assets. Accordingly, the owner of Treasury bills (other than life insurance companies) issued hereunder need include in his income tax return only the difference between the price paid for such bills, whether on original issue or on subsequent purchase, and the amount actually received either upon sale or redemption at maturity during the taxable year for which the return is made, as ordinary gain or loss.

Treasury Department Circular No. 418, as amended, and this notice, prescribe the terms of the Treasury bills and govern the conditions of their issue. Copies of the circular may be obtained from any Federal Reserve Bank or branch.

**Exhibit 6.—Acceptance of tenders for Treasury bills dated July 3, 1947 (press release July 1, 1947)**

The Secretary of the Treasury announced last evening that the tenders for \$1,300,000,000, or thereabouts, of 91-day Treasury bills to be dated July 3 and to mature October 2, 1947, which were offered on June 27, 1947, were opened at the Federal Reserve Banks on June 30.

The details of this issue are as follows:

Total applied for..... \$1, 841, 142, 000.  
 Total accepted..... \$1, 302, 515, 000 (includes \$13,707,000 entered on a fixed price basis at 99.905 and accepted in full).  
 Average price..... 99.905 + Equivalent rate of discount approximately 0.376% per annum.

Range of accepted competitive bids:

High—99.907 Equivalent rate of discount approximately 0.368% per annum.

Low—99.905 Equivalent rate of discount approximately 0.376% per annum.  
 (70 percent of the amount bid for at the low price was accepted.)

Federal Reserve district	Total applied for	Total accepted
Boston.....	\$15, 370, 000	\$10, 870, 000
New York.....	1, 567, 531, 000	1, 102, 561, 000
Philadelphia.....	16, 368, 000	13, 368, 000
Cleveland.....	1, 780, 000	1, 780, 000
Richmond.....	3, 859, 000	3, 259, 000
Atlanta.....	625, 000	618, 000
Chicago.....	141, 904, 000	99, 904, 000
St. Louis.....	17, 290, 000	12, 460, 000
Minneapolis.....	17, 865, 000	12, 825, 000
Kansas City.....	21, 070, 000	17, 380, 000
Dallas.....	2, 770, 000	2, 380, 000
San Francisco.....	34, 710, 000	25, 110, 000
Total.....	1, 841, 142, 000	1, 302, 515, 000

**EXHIBIT 7.—Summary of Treasury bill information contained in press releases**

Press releases pertaining to Treasury bill issues during the fiscal year 1948 were similar in form to exhibits 5 and 6 and are, therefore, not reproduced here. The essential details regarding each issue are summarized in the following table.

Summary of information contained in press releases <sup>1</sup> pertaining to Treasury bills issued during the fiscal year 1948

## TREASURY BONDS, INVESTMENT SERIES

**Exhibit 8.—Offering of 2½ percent Treasury bonds, Investment Series A-1965, and allotments**

[Department Circular No. 814. Public Debt]

TREASURY DEPARTMENT,  
Washington, September 22, 1947.

## I. OFFERING OF BONDS

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, beginning September 29, 1947, at par and accrued interest, through the Federal Reserve Banks, for non-transferable bonds of the United States, designated 2½ percent Treasury bonds, Investment Series A-1965. The amount of the offering is not specifically limited.

2. These bonds will be available for subscription only by or for account of the following organizations and funds doing business in the United States, its Territories and possessions:

1. Insurance companies
2. Savings banks
3. Savings and loan associations and building and loan associations, and cooperative banks
4. Pension and retirement funds, including those of the Federal, State, and local governments
5. Fraternal benefit associations
6. Endowment funds
7. Credit unions
8. Commercial and industrial banks holding savings deposits or issuing time certificates of deposit in the names of individuals, and of corporations, associations, and other organizations not operated for profit.

3. Subscriptions from or for account of such investors (except commercial and industrial banks) will be limited to an amount (adjusted to the next higher multiple of \$5,000) not in excess of 25 percent of the increase in the amount of net assets<sup>1</sup> between December 31, 1946, and June 30, 1947, as shown by the financial statements of the subscribers, or \$250,000, whichever is greater. Copies of the financial statements, certified to by a public accountant or by a responsible officer of the subscriber, must accompany each subscription for more than \$250,000, or should be furnished to the agency to which the subscription will be presented prior to the submission of such subscription.

4. Subscriptions from commercial and industrial banks eligible to subscribe hereunder will be limited to an amount (adjusted to the next higher multiple of \$5,000) not in excess of 25 percent of the increase in the combined amount of time certificates of deposit (but only those issued in the names of individuals, and of corporations, associations, and other organizations not operated for profit), and of savings deposits, between December 31, 1946, and June 30, 1947, as certified by an officer of the subscribing bank, or \$25,000, whichever is greater.

5. In addition to the bonds issued to the above classes of subscribers, the Secretary of the Treasury reserves the right to issue these bonds to Government investment accounts.

## II. DESCRIPTION AND TERMS OF BONDS

1. The bonds will be dated October 1, 1947, and will bear interest from that date at the rate of 2½ percent per annum, payable semiannually. They will mature and be payable at face value on October 1, 1965. The bonds may not be called for redemption by the Secretary of the Treasury prior to maturity. They may be redeemed prior to maturity, on and after April 1, 1948, at the owner's option, on the first day of any calendar month, on one month's notice in writing, at fixed redemption values, as shown in the table at the end of this circular. They will not be redeemable at par prior to maturity. Interest will be paid by check drawn to the order of the registered owner. Interest will cease

<sup>1</sup> Net assets, for this purpose, means the amount of total assets less outstanding indebtedness for borrowed money, and total assets of insurance companies means the total admitted assets calculated in accordance with the laws of the States in which the company is organized or licensed.

at maturity, or, in case of redemption before maturity, at the end of the interest period next preceding the date of redemption. A table of redemption values appears on each bond, and the difference between the face amount of the bond and the redemption value fixed for any period represents an adjustment (or refund) of interest. Accordingly, if the owner exercises his option to redeem a bond prior to maturity, the investment yield will be less than the interest rate on the bond.

2. The income derived from the bonds shall be subject to all taxes now or hereafter imposed under the Internal Revenue Code, or laws amendatory or supplementary thereto. The bonds shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The bonds will not be acceptable to secure deposits of public moneys. They will not be entitled to any privilege of conversion. They will not be transferable, and will be payable only to the owner named thereon except as otherwise provided in the regulations governing Treasury bonds, Investment Series. Accordingly, they may not be sold, discounted, hypothecated as collateral for a loan, or pledged as security for the performance of an obligation or for any other purpose.

4. The bonds will be issued only in registered form, and in denominations of \$5,000, \$10,000, \$100,000, and \$1,000,000 (maturity values). Partial redemption in multiples of the minimum denomination, at current redemption value, will be permitted. In case of partial redemption the remainder will be reissued in authorized denominations.

5. The bonds will be subject to the regulations of the Treasury Department, now or hereafter prescribed, governing Treasury bonds, Investment Series. The current regulations are contained in Treasury Department Circular No. 815.

### III. SUBSCRIPTION, ALLOTMENT AND PAYMENT

1. Subscriptions will be received at the Federal Reserve Banks and branches and at the Treasury Department, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies. Subscriptions must be accompanied by payment in full for the amount of bonds applied for, as well as by financial statements where required, unless such statements have been previously filed by the subscriber. Payment must be made at par and accrued interest, if any, on or before October 1, 1947, or on later allotment. One day's accrued interest is \$0.06831 per \$1,000. Any qualified depository will be permitted to make payment by credit for bonds allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of bonds applied for, and to close the books as to any or all subscriptions at any time without notice; and any action he may take in these respects shall be final. Subject to these reservations, and to the limitations on subscriptions prescribed in section I of this circular, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

### IV. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for bonds allotted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive bonds.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

A. L. M. WIGGINS,  
*Acting Secretary of the Treasury.*

*2½ percent Treasury bonds, Investment Series A-1965—table of redemption values and investment yields*

Table showing: (1) How 2½ percent Treasury bonds, Investment Series A-1965 (paying a current return at the rate of 2½ percent per annum on the purchase price, payable semiannually) change in redemption value, by denominations, during successive half-year periods following issue; (2) the approximate investment yield on the purchase price from issue date to the beginning of each half-year period; and (3) the approximate investment yield on the current redemption value from the beginning of each half-year period to maturity. Yields are expressed in terms of rate percent per annum, compounded semiannually.

Maturity value.....	\$5,000.00	\$10,000.00	\$100,000	\$1,000,000	(2) Approximate investment yield on purchase price from issue date to beginning of each half-year period	(3) Approximate investment yield on current redemption value from beginning of each half-year period to maturity

## Exhibit 9.—Regulations, September 22, 1947, governing Treasury bonds, investment series

[Department Circular No. 815. Public Debt]

TREASURY DEPARTMENT,  
Washington, September 22, 1947.

## To Owners of Treasury Bonds, Investment Series, and Others Concerned:

Pursuant to section 1 of the Second Liberty Bond Act, as amended (31 U. S. C. 752), the following regulations applicable to Treasury bonds, Investment Series, are promulgated by the Secretary of the Treasury. Regulations governing other United States bonds (including United States savings bonds) are not applicable to Treasury bonds, Investment Series, except as otherwise specifically provided in this circular.

## SUBPART A. REGISTRATION AND RESTRICTIONS

Sec. 326.1. *General*.—Treasury bonds, Investment Series, are issued only in registered form in substantially the forms of registration set forth in section 326.3. The name and post office address of the owner will be inscribed thereon at the time of issue. No designation of an attorney, agent, or other representative to request or receive payment on behalf of the owner, nor any restriction on the right of such owner to receive payment of the bond, other than as provided in these regulations, may be made in the registration or otherwise.

Sec. 326.2. *Restrictions*.—

(a) *Eligible investors*.—The bonds may be issued upon subscription only to the following organizations and funds doing business in the United States, its Territories and possessions:<sup>1</sup> (1) Insurance companies, (2) savings banks, (3) savings and loan associations and building and loan associations and cooperative banks, (4) pension and retirement funds including those of the Federal, State, and local governments, (5) fraternal benefit associations, (6) endowment funds, (7) credit unions, (8) commercial and industrial banks (but only to such extent and under such conditions as may be provided specifically in official circulars governing the offering of these securities).

(b) *Limitation on amounts*.—Subscriptions will be limited as specified in the official circulars governing each offering of the bonds.

Sec. 326.3. *Forms of registration*.—Substantially the following forms of regis-

<sup>1</sup> The Secretary of the Treasury reserves the right to issue these bonds to Government investment accounts.

tration are suggested and should ordinarily be used in requesting the issue of the bonds:

(a) *Organizations (corporations and unincorporated associations).*—In the name of any eligible organization using in each case the full legal name of the organization<sup>2</sup> without mention of any officer or member by name or title, followed by the words "an unincorporated association", or "a \_\_\_\_\_ corporation"

(place of incorporation)

(as the case may be). The reference to the place of incorporation may be omitted for organizations incorporated under Federal law, for example, national banks, and when the place of incorporation is part of the organization's legal name.

(b) *Endowment funds.*—Where the endowment funds consist in whole or in part of the general funds of the organization the bonds may be registered in accordance with the provisions of subsection (a), except that the place of incorporation need not be designated in the case of schools, colleges, and universities. The parenthetical reference "(\_\_\_\_\_ Endowment Fund)" should be inserted in the registration in such case. In the case of an endowment fund held in trust for a special purpose the provisions of subsection (c) should be followed.<sup>3</sup>

(c) *Private pension and retirement funds, and endowment funds held in trust.*—In the name and title of the trustee, or in the names and title of all the trustees if there are more than one (accompanied by an adequate identifying reference to the trust) except that (1) registration in the title alone of the trustees is permitted, if they are authorized to act only as a board, for example: "Board of Trustees of Western College in trust for the Library Endowment Fund under article III of its charter" and (2) all of the trustees need not be named if they are too numerous to be designated in the inscription by names and title, for example: "John H. Schneider, Second National Bank, et al., trustees under indenture dated July 2, 1942, for the Employees' Retirement Fund of the Acme Manufacturing Company, a Delaware Corporation". Wherever the name of a corporation appears in the registration the place of incorporation should be included.

(d) *Public pension and retirement funds.*—In the full title of the fund as adopted under the applicable State law, city ordinance, or other authority constituting the fund or in a short title for the fund (if desired) as shown, respectively, by the following examples: "Board of Trustees of the Public School Retirement System of Missouri", or "Missouri Teachers' Retirement System". If a public officer holds legal title to the fund in trust the following form of registration is preferred "Treasurer, Green City, Wisconsin, in trust for the Police and Firemen's Pension Fund".

#### SUBPART B. LIMITATION ON TRANSFER AND JUDICIAL PROCEEDINGS

Sec. 326.4. *Not transferable.*—The bonds are not transferable, and are payable only to the owners named thereon except in the case of authorized reissue or as otherwise specifically provided in these regulations. They may not be sold, discounted, hypothecated as collateral for a loan, or pledged as security for the performance of an obligation or for any other purpose.

Sec. 326.5. *Judicial proceedings (judgment creditors, trustees in bankruptcy, receivers of insolvents' estates, etc.).*—A claim against an owner of a bond will be recognized when established by valid judicial proceedings and payment (but not reissue) will be made upon presentation and surrender of the bond, except as follows:

(1) No such proceedings will be recognized if they would give effect to an attempted voluntary transfer inter vivos of the bond.

(2) Those acquiring bonds under this section, with the exception of a trustee in bankruptcy or a receiver of an insolvent's estate, will be limited to payment at the redemption value current 30 days after the termination of the judicial proceedings or current at the time the bond is surrendered for redemption, whichever is smaller.

Sec. 326.6. *Evidence necessary.*—To establish the validity of judicial proceedings there must be submitted a certified copy of a final judgment or decree of court and of any necessary supplementary proceedings. A trustee in bankruptcy should submit proof of his authority in the form of a certificate from the referee showing that he is the duly elected and qualified trustee, together with a certificate from the clerk of the United States District Court of the particular district, under seal, showing the incumbency of the referee and authenticating his signature.

<sup>2</sup> Except that where title to the property of an organization is vested in trustees the bonds may be registered in the title of the trustees or board of trustees (as the case may be) if desired, for example: "Trustees of Jamestown Lodge No. 1000, Northeastern Fraternal Benefit Association."

<sup>3</sup> Where the endowment fund as such is incorporated, registration may be in the form prescribed in subsection (a) as in the case of any other corporation.

## SUBPART C. LOST, STOLEN, MUTILATED, DEFACED, OR DESTROYED BONDS

Sec. 326.7. *Relief in case of loss, theft, mutilation, defacement, or destruction.*—Under the provisions of sec. 8, 50 Stat. 481, as amended (U. S. C. 1940 Ed., title 31, sec. 738a) and the regulations in Treasury Department Circular No. 300, as amended, relief either by the issue of a substitute bond or by payment may be given in case of the loss, theft, mutilation, defacement, or destruction of a bond. In any such case immediate notice of the facts, with a full description of the bond, should be given to the Treasury Department, Division of Loans and Currency, Washington 25, D. C.

## SUBPART D. INTEREST

Sec. 326.8. *Interest.*—Each bond bears interest at a specified rate computed on the face amount of the bond and payable semiannually beginning six months from the date of the bond. Interest will be paid on each interest payment date by check drawn to the order of the registered owner in the same form as the inscription on the bond. Full advantage of interest at the rate specified may be secured only if the bond is held to maturity. If the bond is redeemed before maturity, the difference between the face or full maturity value and the current redemption value then payable in accordance with the table printed on each bond will represent an adjustment of interest to the rate appropriate for the shorter term, as set forth in the table attached to the circular announcing the offering of the bonds.

(a) *Change of address.*—An owner should promptly notify the Treasury Department, Division of Loans and Currency, Washington 25, D. C., of any change in the address for delivery of interest checks. The notice should refer to all bonds for which it is desired that the address be changed and should describe each bond by date, series, serial number, maturity value, and inscription appearing on the face of the bond.

(b) *Reissue during interest period.*—If a bond is reissued between interest payment dates, interest for the entire period will be paid on the next interest payment date to the owner in whose name the bond is reissued. Ordinarily, if a bond is received for reissue less than one month prior to an interest payment date, reissue cannot be effected until after such interest payment date.

(c) *Termination of interest.*—In case of redemption prior to maturity, interest will cease on the last day of the interest period next preceding the date of redemption. For example, if a bond on which interest is payable on April 1 and October 1 is redeemed on December 1, 1948, interest will cease on October 1, 1948, and no adjustment will be made on account of the failure to receive interest for the period from October 1 to December 1, 1948. In case of authorized reissue, the interest on the original bond will cease on the last day of the interest period next preceding the date of reissue and interest on the new bond will begin on the following day. The same rules shall apply in case of partial redemption or partial reissue with respect to the amount redeemed or reissued.

(d) *Loss or nonreceipt of check.*—If an interest check is not received within a reasonable time after an interest payment date or is lost after receipt, the Treasury Department, Division of Loans and Currency, Washington 25, D. C., should be notified of the facts and should be given information concerning the amount, number and inscription of the bond, as well as a description of the check, if possible, in case of loss after the check is received. Appropriate instructions will then be given.

## SUBPART E. GENERAL PAYMENT AND REDEMPTION PROVISIONS

Sec. 326.9. *Payment, redemption, partial redemption.*—

(a) *Payment at maturity.*—Pursuant to its terms a bond of the Investment Series will be paid at or after maturity at its full face or maturity value, but only following presentation and surrender of the bond for that purpose.

(b) *Redemption before maturity.*—A bond may not be called for redemption by the Secretary of the Treasury prior to its maturity but may be redeemed in whole or in part on one month's notice in writing on the first day of any month not less than six months from the issue date at the appropriate redemption value as shown in the table printed on the bond. The owner's option to redeem may be shown by a signed request for payment or express written notice and payment will be made as of the first day of the first month following by at least one full calendar month the date of receipt of notice by the Treasury Department, Division of Loans and Currency, Washington 25, D. C., or by a Federal Reserve Bank. If express

notice is given, the bond must be surrendered to the same agency to which the notice is given not less than 20 days before the effective redemption date.

(c) *Partial redemption.*—Partial redemption in multiples of the minimum denomination, at current redemption value, will be permitted upon presentation and surrender of the bond to a Federal Reserve Bank or to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., all in accordance with this subpart. In any case in which partial redemption is desired the request for payment should be modified by adding to the first sentence thereof the words "to the extent of \$----- (maturity value) and reissue of the remainder." In case of partial redemption the remainder will be reissued in authorized denominations of the original date.

Sec. 326.10. *Form and execution of requests for payment.*—Unless otherwise authorized in a particular case a request for payment of a bond whether made prior to, at, or after maturity must be executed on the form appearing on the back of the bond to be surrendered and ordinarily will not be accepted if executed more than six months before the date of the receipt of the bond for redemption. The request must be executed by the registered owner or by such other person as may be entitled to request payment under the provisions of these regulations. The signature must be affixed in the presence of one of the officers authorized to certify requests, who should thereafter complete the request by signing over his official title in the appropriate place and impressing the required seal and giving the date of execution.

(a) *Certifying officers.*—The following officers are authorized to certify requests for payment:

(1) *At banks, trust companies and branches.*—Any officer of any bank or trust company incorporated in the United States or its organized Territories, or domestic or foreign branch of such bank or trust company including those doing business in the organized Territories or insular possessions of the United States and the Canal Zone under Federal charter or organized under Federal law; any officer of a Federal Reserve Bank or branch, a Federal land bank and Federal home loan bank. Certification by any of these officers should be authenticated by a legible impression of the corporate seal of the bank or trust company.

(2) *United States officials.*—Judges, clerks and deputy clerks of United States courts, including United States courts for the organized Territories, insular possessions and the Canal Zone.

(3) *Treasury Department.*—Certain officers of the Treasury Department at Washington, D. C.

(b) *Instructions to certifying officers.*—Certifying officers should require positive identification of persons signing requests for payment and will be held fully responsible therefor. In all cases a certifying officer must affix to the certification his official signature, title, address, and seal and the date of execution. If a certifying officer does not possess an official seal that fact should be made known and attested. An officer of a bank or trust company who executes the request for payment in behalf of the bank or trust company should not certify his own signature. It should be certified by another officer.

(c) *Presentation and surrender.*—After the request for payment has been duly signed by the owner and certified as above provided, the bond should be presented and surrendered to a Federal Reserve Bank or to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., at the risk and expense of the owner, and for such owner's protection the bonds should be forwarded by registered mail if not presented in person. Payment will be made by check drawn to the order of the registered owner or person shown to be entitled to the bond and mailed to the address given in the request for payment.

Sec. 326.11. *Nonreceipt or loss of checks issued in payment.*—If a check issued in payment of a bond surrendered for redemption is not received within a reasonable time, or in case such check is lost after receipt, notice should be given to the same agency to which the bond was surrendered for payment with information concerning the amount, number and inscription of the bond, as well as a description of the check, if possible, in case of loss after the check is received. Appropriate instructions will then be given.

#### SUBPART F. GENERAL REISSUE AND DENOMINATIONAL EXCHANGE

Sec. 326.12. *Reissue.*—

(a) *When permitted.*—Reissue of a bond in a different name or in a different form of registration will be made only in the following instances:

(1) To correct an error in the original issue upon appropriate request supported by satisfactory proof of such error;

(2) To show a change in the name of an owner upon the owner's request supported by satisfactory proof of the change of name;

(3) As otherwise specifically provided in these regulations.

(b) *Requests for reissue.*—Requests for reissue should be made on appropriate forms, which may be obtained from any Federal Reserve Bank or from the Treasury Department, Division of Loans and Currency, Washington 25, D. C., and should be signed by the persons authorized under these regulations to make such requests. A request for reissue must be signed in the presence of and be certified by an officer authorized under Subpart E to certify requests for payment.

(c) *Date of bonds on reissue.*—The new bonds will be of the same series, will bear the same date, and will have the same rights and privileges as the bonds surrendered.

Sec. 326.13. *Denominational exchange.*—Exchange as between authorized denominations will not be permitted except in cases of partial redemption or authorized reissue.

#### SUBPART G. PAYMENT AND REISSUE TO ORGANIZATIONS, FUNDS, AND TRUSTEES

Sec. 326.14. *Payment to corporations or unincorporated associations.*—A bond registered in the name of a corporation or an unincorporated association will be paid to such corporation or unincorporated association upon request for payment on its behalf by a duly authorized officer thereof. The signature to the request should be in the form, for example, "Horizon Life Insurance Company, by William A. Smith, President", or "Weatherton Fraternal Benefit Association by John Jones, Treasurer". A request for payment so signed and duly certified will ordinarily be accepted without further proof of the officer's authority.

Sec. 326.15. *Reissue or payment to successors of corporations, unincorporated associations and funds.*—*Dissolution.*—

(a) *Reissue or payment to successors.*—A bond registered in the name of a corporation or an unincorporated association or fund which has been succeeded by another corporation or unincorporated association or fund by operation of law or otherwise, as the result of merger, consolidation, reincorporation, conversion, reorganization, or in any manner whereby the business or activities of the original organization or fund are continued without substantial change, will be paid to, or reissued in the name of, the successor upon appropriate request on its behalf and satisfactory proof of lawful successorship.

(b) *Dissolution.*—If the organization or fund has been dissolved before redemption of the bonds, the persons acquiring title to the assets of the organization or fund including the bonds will be entitled only to the redemption value of the bonds current 30 days after the date of dissolution, or at the time the bonds are presented and surrendered for redemption, whichever is smaller. In most cases it will be simpler for the organization or fund to present the bonds for redemption prior to dissolution.

Sec. 326.16. *Payment to trustees.*—A bond registered in the name of a trustee, or otherwise belonging to a trustee in his capacity as such, will be paid to the trustee upon his request. A request for payment before maturity must be signed by all acting trustees unless, by express statute or decree of court or by the terms of the instrument under which they are acting, some one or more of them may properly execute the request. A request for payment at maturity signed by any one or more acting trustees will be accepted, but payment will be made to all. If the bond is registered in the names of trustees who are still acting, no further evidence of authority will be required. In other cases the request for payment must be supported by evidence as specified below:

(a) *Trustees—by title only.*—If the bond is registered in the titles without the names of the trustees, satisfactory proof of their incumbency must be furnished, except in the case of public officers.

(b) *Succeeding trustees.*—If the trustees in whose names the bonds are registered have been succeeded by other trustees, satisfactory proof of successorship must be furnished.

(c) *Boards, public bodies, etc.*—If the trustees consist of a board or public body, or are otherwise empowered to act as a unit, a request for payment before maturity must be signed in the name of the board or other body by an authorized officer or agent thereof or by all members of the board or other body. A request executed by an officer or agent must be supported by a duly certified copy of a resolution

of the board or other body authorizing such action or by a duly certified copy of the trust instrument or excerpt therefrom showing the authority for such action, except that in the case of a public board or other public body a request signed in its name by an authorized officer thereof and duly certified will ordinarily be accepted without further proof of his authority. A request signed by all members of a private board or other private body acting as trustee must be supported by a duly executed certificate of incumbency.

(d) *Corporate trustees.*—If a public or private corporation or a political body, such as a State or county, is trustee, a request for payment must be signed in the name of the corporation or other body as trustee by an authorized officer thereof. A request for payment so signed and duly certified will ordinarily be accepted without further proof of the officer's authority.

Sec. 326.17. *Reissue in the name of a succeeding trustee.*—If a trustee in whose name a bond is registered has been succeeded by another, the bond will be reissued in the name of the succeeding trustee upon appropriate request and satisfactory proof of successorship.

#### SUBPART H. PROCEDURAL RULES

Sec. 326.18. *Explanation.*—Rules of a procedural nature pertaining to payment or reissue and relief on account of loss, theft, etc., have been set forth in the foregoing subparts with the substantive rules to which they apply. Other procedural rules are set forth in the following sections.

Sec. 326.19. *Correspondence, certificates, notices, and forms.*—The Treasury Department, Division of Loans and Currency, Washington 25, D. C., is charged with all matters concerning Treasury bonds, Investment Series. In the same connection the Federal Reserve Banks, as fiscal agents of the United States, and their branches, are utilized. Correspondence regarding transactions within the scope of these regulations, certificates of court and other certificates required hereunder, notices of intention to redeem and the like (which must be in writing) and any other appropriate forms or documents should be addressed accordingly (and where necessary the bonds should be presented and surrendered therewith), except that any specific instructions given elsewhere in this circular for addressing particular transactions should be observed. Notices or documents not so submitted, or on file in the Treasury Department elsewhere than with the Division of Loans and Currency, Washington 25, D. C., will not be recognized. Appropriate forms for use in connection with transactions may be obtained from any Federal Reserve Bank or from the Treasury Department, Division of Loans and Currency, Washington 25, D. C.

(a) *Additional proof—Bond of indemnity.*—The Secretary of the Treasury in any case arising under these regulations may require such additional proof as he may consider necessary or advisable in the premises; and may require a bond of indemnity with satisfactory sureties, or an agreement of indemnity, in any case where he may consider such a bond or agreement necessary for the protection of the interests of the United States.

(b) *Federal Reserve Banks.*—Usually transactions will be expedited by the use of the Federal Reserve Banks,<sup>4</sup> as fiscal agents of the United States, and their branches.

#### SUBPART I. FURTHER PROVISIONS

Sec. 326.20. *Supplements, amendments, or revisions.*—The Secretary of the Treasury may at any time or from time to time prescribe additional, supplemental, amendatory, or revised rules and regulations governing Treasury bonds, Investment Series.

A. L. M. WIGGINS,  
Acting Secretary of the Treasury.

<sup>4</sup> The Federal Reserve Banks are located at Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco.

## UNITED STATES SAVINGS BONDS AND ARMED FORCES LEAVE BONDS

**Exhibit 10.—Amendments to Department Circular No. 530, Sixth Revision, prescribing regulations governing United States savings bonds**

FIRST AMENDMENT, JULY 25, 1947

TREASURY DEPARTMENT,  
Washington, July 25, 1947.*To Owners of United States Savings Bonds and Others Concerned:*

Pursuant to section 22 (a) of the Second Liberty Bond Act, as amended (55 Stat. 7, 31 U. S. C. and Sup. 757c), which authorizes the Secretary of the Treasury to issue United States savings bonds "in such manner and subject to such terms and conditions . . . including any restrictions on their transfer, as the Secretary of the Treasury may from time to time prescribe," sections 315.14 of Subpart D, 315.23 of Subpart H, Subpart N, and section 315.50 of Subpart O of Department Circular No. 530, Sixth Revision, dated February 13, 1945 (31 C. F. R. 1945 Supp., 315), are hereby revised to read as follows:

Sec. 315.14. *Evidence necessary.*—To establish the validity of judicial proceedings there must be submitted a certified copy of a final judgment or decree of court and of any necessary supplementary proceedings. If the judgment or decree of court was rendered more than six months prior to presentation of the bond there must also be submitted a certificate from the clerk of the court, under the court's seal and dated within six months of the presentation of the bond, showing that the judgment or decree is in full force and effect. A trustee in bankruptcy should submit proof of his authority in the form of a certificate from the referee showing that he is the duly elected and qualified trustee, together with a certificate from the clerk of the United States District Court of the particular district, under seal, showing the incumbency of the referee and authenticating his signature.

Sec. 315.23. *Redemption before maturity.*—Pursuant to its terms, a savings bond may not be called for redemption by the Secretary of the Treasury prior to maturity, but may be redeemed in whole or in part at the option of the owner, prior to maturity, under the terms and conditions set forth in the offering circular of each series and in accordance with the provisions of these regulations following presentation and surrender as provided in this subpart.

(a) *Series A, B, C, D, and E.*—A bond of Series A, B, C, D, or E will be redeemed in whole or in part at any time after 60 days from the issue date without advance notice, at the appropriate redemption value as shown in the table printed on the bonds.

(b) *Series F and G.*—A bond of Series F or G will be redeemed in whole or in part, on or after six months from the issue date, at the appropriate redemption value as shown in the table printed on the bond, on one month's notice in writing to the Treasury Department, Division of Loans and Currency, Merchandise Mart, Chicago 54, Illinois, or a Federal Reserve Bank. Such notice may be given separately or by presenting and surrendering the bond with a duly executed request for payment thereof. Payment will be made as of the first day of the first month following by at least one full calendar month the date of receipt of notice. For example, if the notice is received on June 1, payment will be made as of July 1, but if notice is received between June 2 and July 1, inclusive, payment will be made as of August 1. If notice is given separately, the bond must be presented and surrendered with a duly executed request for payment to the same agency to which the notice is given not less than twenty days before the date on which payment is to be made. For example, if the notice is received on June 15, the bond should be received not later than July 12. (See section 315.21 for provisions as to interest in case current income bonds are redeemed prior to maturity.)

(c) *Series G.—Redemption at par before maturity.*—A bond of Series G (but not of Series F) will be redeemed at par before maturity in whole or in part, in amounts corresponding with authorized denominations, not less than six months from the issue date, (1) upon the death of an owner or coowner, if a natural person, or (2) upon the termination of a trust or other fiduciary estate by reason of the death of any person, if held by the trustee or other fiduciary, except that if the trust or fiduciary estate is terminated only in part, redemption at par will be made to the extent of not more than the pro rata portion of the trust or fiduciary estate so terminated. Redemption will be made only following actual receipt of written notice of intention to redeem at par. Such notice must be given in time to be

received in the ordinary course of mail by the Treasury Department, Division of Loans and Currency, Merchandise Mart, Chicago 54, Illinois, or a Federal Reserve Bank within six months after the date of death of the owner or coowner or person whose death results in the termination of the trust or other fiduciary estate, unless the period within which notice must be received is extended in accordance with the provisions of this subsection. Proof of the date of death must be furnished and the bond must be surrendered to the same agency to which notice of intention to redeem at par is given, but they need not accompany such notice. Ordinarily, payment will be made as of the first day of the first month following by at least one full calendar month the date of receipt of notice, but payment may be postponed, upon request of the person presenting the bond, to the second interest payment date following the date of death, except as follows: if the period within which notice must be received is extended beyond such interest payment date, in accordance with the provisions of this subsection, and notice received thereafter is accepted, payment may, upon request, be postponed to the next interest payment date following the date of receipt of notice. The period within which notice must be received may be extended in any particular case upon presentation of satisfactory proof that notice could not seasonably be given by reason of litigation or delay in the appointment of a legal representative of the estate or in the receipt of notice of death.

(d) *Withdrawal of request for redemption.*—An owner who has presented and surrendered a savings bond to the Treasury Department or a Federal Reserve Bank for payment with an appropriate request for payment may withdraw such request if notice of intent to withdraw is given to and received by the same agency to which the bond was presented, prior to the issuance of the check in payment. Under these same conditions an executor or administrator may withdraw a request for redemption executed by the owner and presented and surrendered to the Treasury Department or a Federal Reserve Bank prior to the owner's death, except where the presentation and surrender of the bond has cut off the rights of survivorship under the provisions of Subpart L or Subpart M. The terms "presented and surrendered" as used in this subsection mean the actual receipt of the bond by the Treasury Department or a Federal Reserve Bank during the lifetime of the owner.

#### SUBPART N. DECEASED OWNERS

Sec. 315.47. *Payment or reissue on death of owner.*—Upon the death of the owner of a savings bond who was not survived by a coowner or designated beneficiary and who had not during his lifetime presented and surrendered the bond to a Federal Reserve Bank or the Treasury Department for an authorized reissue, the bond will be considered as belonging to his estate and will be paid or reissued accordingly, as hereinafter provided, except that reissue under the provisions of this subpart will not be made to a creditor. In any case, reissue will be restricted to a form of registration permitted by the regulations in effect on the date of original issue of the bond, but the person entitled to the bond may hold it without change of registration and will have the right to payment before or at maturity. The provisions of this section shall also apply to savings bonds registered in the names of executors or administrators, except that proof of their appointment and qualification may not be required. Established forms for use in such cases and for requests for payment or reissue may be obtained from any Federal Reserve Bank or from the Treasury Department, Division of Loans and Currency, Merchandise Mart, Chicago 54, Illinois, and should be used in every instance.

(a) *In course of administration.*—If the estate of the decedent is being administered in a court of competent jurisdiction, the bond will be paid to the duly qualified representative of the estate or will be reissued in the names of the persons entitled to share in the estate, upon request of the duly appointed and qualified representative of the estate and compliance with the following conditions:

(1) Where there are two or more legal representatives, all must unite in the request for payment or reissue, unless by express statute or decree of court, or by testamentary provision, some one or more of them may properly execute the request.

(2) The request for payment or reissue should be signed in the form, for example: "John A. Jones, administrator of the estate (or executor of the will) of Henry W. Jones, deceased," and must be supported by proof of the representative's authority in the form of a court certificate or a certified copy of the representative's letters of appointment issued by the court having jurisdiction. The certificate, or the certi-

fication to the letters, must be under seal of the court, and, except in the case of a corporate representative, must contain a statement that the appointment is in full force and should be dated within six months of the date of presentation of the bond, unless the certificate or letters show that the appointment was made within one year immediately prior to such presentation.

(3) In case of reissue the personal representative should certify that the persons named are entitled to share in the estate to the extent specified for each and have consented to such reissue. A request for reissue by an individual legal representative should be made on Form PD 1455 and a request by a corporate representative should be made on Form PD 1498. If a person in whose name reissue is requested desires to name a coowner or beneficiary, such person should execute an additional request for that purpose, using Form PD 1787.

(b) *After settlement through court proceedings.*—If the estate of the decedent has been settled in a court of competent jurisdiction, the bond will be paid to or reissued in the name of the person entitled thereto as determined by the court. The request for payment or reissue should be made by the person shown to be entitled and supported by duly certified copies of the representative's final account and the decree of distribution or other pertinent court records, supplemented, if there are two or more persons having an apparent interest in the bonds, by an agreement executed by them.

(c) *Without administration.*—If no legal representative of the decedent's estate has been or is to be appointed and the amount of savings bonds belonging to the estate does not exceed \$250 (maturity value), or if it is established to the satisfaction of the Secretary of the Treasury that the gross value of the personal estate of the decedent does not exceed \$500 or that administration of the estate is not required in the State of the decedent's last domicile, the bond will be paid to or reissued in the names of the persons entitled, pursuant to an agreement and request by all persons entitled to share in the estate, executed on the form prescribed by the Treasury Department and supported by the evidence called for by such form. Application for the appropriate form to be used hereunder may be made to any Federal Reserve Bank or to the Treasury Department, Division of Loans and Currency, Merchandise Mart, Chicago 54, Illinois. The applicant should state whether or not the amount of bonds belonging to the decedent's estate is in excess of \$250 (maturity value). If any of the persons entitled are minors or incompetents payment or reissue of a bond will not be permitted without administration, except to them or in their names unless their interests are otherwise protected to the satisfaction of the Secretary of the Treasury.

Sec. 315.50. *Reissue or payment to person entitled.*—(a) *Distribution of trust estate in kind.*—A savings bond to which a beneficiary of a trust estate has become lawfully entitled in his own right or in a fiduciary capacity, in whole or in part, under the terms of the trust instrument, will be reissued in his name to the extent of his interest as a distribution in kind upon the request of the trustee or trustees and their certification that such person is entitled and has agreed to reissue in his name. If the form in which the bond is registered does not show that it belongs to a trust estate, the request for reissue must be supported by satisfactory proof of ownership.

(b) *After termination of trust estate.*—If the person who would be lawfully entitled to a savings bond upon the termination of a trust does not desire to have such distribution to him in kind, as provided in the next preceding subsection, the trustee or trustees should redeem the bond in accordance with the provisions of section 315.48 before the estate is terminated. If, however, the estate is terminated without such payment or reissue having been made, the bond will thereafter be paid to or reissued in the name of the person lawfully entitled upon his request and satisfactory proof of ownership, supplemented, if there are two or more persons having any apparent interest in the bond, by an agreement executed by all such persons.

(c) *Upon termination of guardianship estate.*—A savings bond registered in the name of a guardian or similar legal representative of the estate of a minor or incompetent, if the estate is terminated during the ward's lifetime, will be reissued in the name of the former ward upon the representative's request and certification that the former ward is entitled and has agreed to reissue in his name, or will be paid to or reissued in the name of the former ward upon his own request, supported in either case by satisfactory proof that his disability has been removed. Certification by the representative that a former minor has attained his majority, or that the legal disability of a female ward has been removed by marriage, if

the State law so provides, will ordinarily be accepted as sufficient, but if the disability is removed by court order a duly certified copy of the order will be necessary. Upon the death of the ward a bond registered in the name of his guardian or similar representative will be reissued in accordance with the provisions of Subpart N as though it were registered in the name of the ward alone.

A. L. M. WIGGINS,  
*Acting Secretary of the Treasury.*

[Second amendment, Dec. 31, 1947, and third amendment, Mar. 18, 1948, are omitted here. They were superseded by the fourth amendment, which follows.]

#### FOURTH AMENDMENT, JUNE 25, 1948

TREASURY DEPARTMENT,  
*Washington, June 25, 1948.*

##### *To Owners of United States Savings Bonds and Others Concerned:*

Pursuant to section 22 (a) of the Second Liberty Bond Act, as amended (55 Stat. 7, 31 U. S. C. and Supp. 757c), Subpart C of Department Circular No. 530, Sixth Revision, dated February 13, 1945 (31 CFR 1945 Supp., 315), as amended, is hereby further amended<sup>1</sup> and revised to read as follows:

#### SUBPART C. LIMITATION ON HOLDINGS

Sec. 315.8. *Amount which may be held.*—As provided by section 22 of the Second Liberty Bond Act, as added February 4, 1935 (U. S. C. 1946 Ed., title 31, section 757c), and by regulations prescribed by the Secretary of the Treasury pursuant to the authority of that section, as amended by the Public Debt Act of 1941, 55 Stat. 7, the amounts of savings bonds of the several series issued during any one calendar year that may be held by any one person at any one time are limited as follows:

(a) *Series A, B, C, and D.*—\$10,000 (maturity value) of each series for each calendar year.

(b) *Series E.*—\$5,000 (maturity value) for each calendar year up to and including the calendar year 1947, and \$10,000 (maturity value) for each calendar year thereafter.

(c) *Series F and G.*—\$50,000 (issue price) for the calendar year 1941, and \$100,000 (issue price) for each calendar year thereafter, of either series or of the combined aggregate of both, except that, in the case of commercial banks authorized to acquire such bonds in accordance with section 315.5, the limitation shall be such as may have been or may hereafter be provided specifically in official circulars governing the offering of other Treasury securities, but in no event in excess of \$100,000 (issue price) for any calendar year.

(d) *Special limitation for Series F and G bonds purchased by institutional investors and commercial banks from July 1 through July 15, 1948.*—\$1,000,000 (issue price) of either series or of the combined aggregate of both for institutional investors holding savings, insurance and pension funds and \$100,000 (issue price) of either series or of the combined aggregate of both for commercial and industrial banks holding savings deposits or issuing time certificates of deposit in the names of individuals and of corporations, associations, and other organizations not operated for profit, subject to the following conditions:

(1) For the purposes of this subsection the classes of institutional investors will be limited to: (i) insurance companies, (ii) savings banks, (iii) savings and loan associations and building and loan associations, and cooperative banks, (iv) pension and retirement funds, including those of the Federal, State, and local governments, (v) fraternal benefit associations, (vi) endowment funds, and (vii) credit unions.

<sup>1</sup>The second and third amendments are hereby withdrawn from circulation. They were issued, respectively, to provide for the purchase of savings bonds of Series E outside of the limitation under certain conditions and to increase the Series E limitation from \$5,000 to \$10,000. The pertinent provisions are set forth in sections 315.8 (b) and 315.9 (d) (4) of this amendment.

(2) Any bonds of Series F-1948 and Series G-1948 purchased under this special limitation, including any bonds in excess of \$100,000 (issue price) purchased by eligible institutional investors, must be purchased during the period from July 1 through July 15, 1948.

The regulations set forth in this circular are hereby modified to accord with the provisions of subsection (d) of this section.

**Sec. 315.9. Calculation of amount.**—In computing the amount of savings bonds of any one series issued during any one calendar year held by any one person at any one time for the purpose of determining whether the amount is in excess of the authorized limit as set forth in the next preceding section, the following rules shall govern:

(a) The term "person" shall mean any legal entity, including but not limited to an individual, a partnership, a corporation (public or private), an unincorporated association or a trust estate, and the holdings of each person, individually and in a fiduciary capacity, shall be computed separately.

(b) In the case of bonds of Series A, B, C, D, and E, the computation shall be based upon maturity values. In the case of bonds of Series F and G the computation shall be based upon issue prices.

(c) Except as provided in subsection (d), there must be taken into account: (1) all bonds originally issued to and registered in the name of that person alone; (2) all bonds originally issued to and registered in the name of that person as co-owner or reissued, at the request of the original owner, to add the name of that person as coowner or to designate him as coowner instead of as beneficiary under the provisions of this circular, except that the amount of bonds of Series E held in coownership form may be applied to the holdings of either of the coowners, but will not be applied to both, or the amount may be apportioned between them; and (3) all bonds acquired by him before March 1, 1941, upon the death of another or the happening of any other event.

(d) There need not be taken into account: (1) bonds of which that person is merely the designated beneficiary; (2) those in which his interest is only that of a beneficiary under a trust; (3) those to which he is entitled as surviving designated beneficiary upon the death of the registered owner, as an heir or legatee of the deceased registered owner, or by virtue of the termination of a trust or the happening of any other event, unless he became entitled to any such bonds in his own right before March 1, 1941; or (4) with respect to bonds of Series E, those purchased with the proceeds of matured bonds of Series A and Series C-1938, where the Series A or Series C bonds were presented by an individual (natural person in his own right) owner or coowner for that purpose and the Series E bonds are registered in his name in any form of registration authorized for that series.

(e) Nothing herein contained shall be construed to invalidate any holdings within or, except as provided in subsection (c) above, to validate any holdings in excess of, the authorized limits, as computed under the regulations in force at the time such holdings were acquired.

**Sec. 315.10. Disposition of excess.**—If any person at any time acquires savings bonds issued during any one calendar year in excess of the prescribed amount, the excess must be immediately surrendered for refund of the purchase price, less (in the case of Series G bonds) any interest which may have been paid thereon, or for such other adjustment as may be possible.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

**Exhibit 11.—First amendment, March 18, 1948, to Department Circular No. 653, Second Revision, relating to Series E savings bonds**

TREASURY DEPARTMENT,  
*Washington, March 18, 1948.*

Pursuant to section 22 (a) of the Second Liberty Bond Act, as amended (55 Stat. 7, 31 U. S. C. and Supp. 757c), section IV, paragraph 1, of Department Circular No. 653, Second Revision, dated August 31, 1943 (31 CFR 1943 Supp., 316), as supplemented, is hereby amended to read as follows:

**IV. LIMITATION ON HOLDINGS**

1. The amount of bonds of Series E originally issued during any one calendar year to any one person that may be held by that person at any one time shall not

exceed \$5,000 (maturity value) for each calendar year up to and including the calendar year 1947, and \$10,000 (maturity value) for each calendar year thereafter, computed in accordance with the provisions of the regulations governing United States savings bonds. If any person at any time acquires savings bonds issued during any one calendar year in excess of the prescribed amount, the amount of such excess should immediately be surrendered for refund of the issue price.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

**Exhibit 12.—Third amendment, June 25, 1948, to Department Circular No. 654, Second Revision, relating to Series F and G savings bonds**

TREASURY DEPARTMENT,  
*Washington, June 25, 1948.*

Section IV and section V of Department Circular No. 654, Second Revision, dated January 1, 1944, as amended, are hereby further amended to read as follows:

**IV. LIMITATION ON HOLDINGS**

1. The amount of United States savings bonds of Series F, or of Series G, or the combined aggregate amount of both series originally issued during any one calendar year to any one person, including those registered in the name of that person alone, and those registered in the name of that person with another named as coowner, that may be held by that person at any one time shall not exceed \$100,000 (issue price), except as provided in paragraph 2. Commercial banks (which are defined for this purpose as those accepting demand deposits) are not authorized to acquire savings bonds of Series F or Series G, except as provided in paragraph 2, or (in accordance with the provisions of V, 1 (2) hereof) in official circulars governing the offering of other Treasury securities.<sup>1</sup>

2. For the period from July 1, 1948, through July 15, 1948, there is hereby provided for certain classes of institutional investors, and for certain commercial and industrial banks, a special limitation on holdings as follows:

(1) The limitation will be \$1,000,000 (issue price) of United States savings bonds of Series F or Series G or the combined aggregate of both for institutional investors holding savings, insurance and pension funds, and \$100,000 (issue price) of either series or of the combined aggregate of both for commercial and industrial banks holding savings deposits or issuing time certificates of deposit in the names of individuals and of corporations, associations and other organizations not operated for profit.

(2) For the purposes of this special limitation the classes of institutional investors will be limited to: (i) insurance companies, (ii) savings banks, (iii) savings and loan associations and building and loan associations, and cooperative banks, (iv) pension and retirement funds, including those of the Federal, State, and local governments, (v) fraternal benefit associations, (vi) endowment funds, and (vii) credit unions.

(3) Any bonds of Series F-1948 and Series G-1948 purchased under this special limitation, including any bonds in excess of \$100,000 (issue price) purchased by eligible institutional investors, must be purchased during the period from July 1 through July 15, 1948.

3. Any bonds acquired on original issue which create an excess must immediately be surrendered for refund of the issue price, as provided in the regulations governing savings bonds.

**V. AUTHORIZED FORMS OF REGISTRATION**

1. United States savings bonds of Series F and Series G may be registered only in one of the following forms:

(1) In the names of natural persons (that is, individuals), whether adults or minors, in their own right, as follows: (a) In the name of one person; (b) in the names of two (but not more than two) persons as coowners; and (c) in the name of one person payable on death to one (but not more than one) other designated person.

<sup>1</sup> Circulars heretofore issued making provisions for subscription to Series F and Series G bonds by commercial banks are numbered as follows: 729 and 740, offering 2½% Treasury bonds of 1965-70; 730, offering 2¼% Treasury bonds of 1956-59; 741 and 756, offering 2% Treasury bonds of 1952-54; 755, offering 2¼% Treasury bonds of 1966-71; 770, offering 1½% Treasury bonds of 1950; 776, offering 2½% Treasury bonds of 1967-72; and 777, offering 2¼% Treasury bonds of 1959-62.

(2) In the name of an incorporated or unincorporated body in its own right; but may not be registered in the names of commercial banks, which are defined for this purpose as those accepting demand deposits, except as provided in IV, 2 of this circular or to such extent and under such conditions as may have been or may hereafter be provided specifically in official circulars governing the offering of other Treasury securities.

(3) In the name of a fiduciary (except where the fiduciary would hold the bonds merely or principally as security for the performance of a duty or obligation).

(4) In the name of the owner or custodian of public funds.

2. *Restrictions.*—Only residents (whether individuals or others) of the United States (which for the purposes of this section shall include the Territories, insular possessions, and the Canal Zone), citizens of the United States temporarily residing abroad and nonresident aliens employed in the United States by the Federal Government or an agency thereof may be named as owners, coowners, or designated beneficiaries of savings bonds originally issued on or after April 1, 1940, or of authorized reissues thereof, except that such persons may name as coowners or beneficiaries of their bonds American citizens permanently residing abroad or nonresident aliens who are not citizens of enemy nations. American citizens permanently residing abroad and nonresident aliens who become entitled to bonds under these regulations, by right of survivorship or otherwise upon the death of another, will have the right only to receive payment either at or before maturity.

3. Full information regarding authorized forms of registration will be found in the regulations currently in force governing United States savings bonds.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

**Exhibit 13.—Second revision, August 1, 1947, of Department Circular No. 751, prescribing regulations for replacement out of fund established by Government Losses in Shipment Act of losses resulting from redemptions of United States savings bonds and armed forces leave bonds**

TREASURY DEPARTMENT,  
*Washington, August 1, 1947.*

Department Circular No. 751, Revised, dated June 30, 1945 (31 C. F. R. 1945 Supp. 322), is hereby amended in order to include armed forces leave bonds. That circular is issued as a Second Revision to read as follows:

#### SUBPART A. REGULATIONS PRESCRIBED

Sec. 322.1. *Application of regulations.*—Pursuant to the authority of section 22 (i) of the Second Liberty Bond Act, as amended (59 Stat. 47, 31 U. S. C. and Supp. 757c (i)), and the Armed Forces Leave Act of 1946, as amended by Pub. Law No. 254, 80th Cong., the following regulations are hereby prescribed for the replacement out of the fund established by the Government Losses in Shipment Act, as amended, of any losses to the United States resulting from payments made in connection with the redemption of United States savings bonds and armed forces leave bonds, and shall apply to losses resulting from payments made (1) by the Treasurer of the United States, (2) by any Federal Reserve Bank or branch, as fiscal agent of the United States, and (3) by any bank or other financial institution duly qualified as a paying agent pursuant to Treasury Department Circulars No. 750, Revised, or No. 811.

#### SUBPART B. REPORTS OF LOSSES

Sec. 322.2. *Loss to the United States.*—A loss to the United States may result from an erroneous (or unauthorized) payment in connection with the redemption of the bonds.

Sec. 322.3. *Erroneous payments reported to or discovered by Federal Reserve Banks.*—If a financial institution, qualified to pay savings bonds or armed forces leave bonds, finds an erroneous payment to have been made, either before or after the bonds have been forwarded to the Federal Reserve Bank, immediate report thereof should be made to the Federal Reserve Bank. Any such erroneous payments so reported, and any other erroneous payments found by a Federal Reserve Bank of bonds received from a duly qualified paying agent shall, so far as possible,

be adjusted between the Federal Reserve Bank and the paying agent concerned.

Sec. 322.4. *Report to Treasury of cases involving erroneous payments.*—Any such erroneous payments which cannot be adjusted by a Federal Reserve Bank and any other erroneous payments found after the account of the Treasurer of the United States has been charged shall immediately be reported by the Federal Reserve Bank to the Treasury Department, Division of Loans and Currency, Merchandise Mart, Chicago 54, Illinois, in the case of savings bonds or, in the case of armed forces leave bonds, to the Division of Loans and Currency, Washington 25, D. C.

#### SUBPART C. FINAL DETERMINATION OF LOSSES

Sec. 322.5. *Reported erroneous payment, general action by Treasury.*—Following receipt of the report of an erroneous payment, the Treasury Department will appropriately advise the paying agent concerned, unless such action is unnecessary. The Department shall determine whether or not appropriate adjustment may be effected with the persons concerned in the erroneous payment and in this connection will expect the cooperation of the paying agent, if necessary.

(a) If it is determined that no loss to the United States will occur the paying agent will be so advised.

(b) If it is determined that a final loss to the United States has occurred, the paying agent will be given every opportunity to present the full facts relating to the payment for consideration of the Secretary of the Treasury. If the Secretary shall determine that the final loss resulted from no fault or negligence on the part of the paying agent, notice to that effect will be given the paying agent and he will be relieved from liability to the United States. If, however, the Secretary of the Treasury is unable to find that the loss resulted from no fault or negligence on the part of the paying agent, notice to that effect will be given such paying agent, who will be expected to make prompt restitution.

Sec. 322.6. *Restitution by paying agents.*—In no case will the Treasurer of the United States, a Federal Reserve Bank (including any of its branches), or the financial institution qualified as a paying agent, whichever made the erroneous payment, be called upon to make restitution unless and until the Secretary has determined that a final loss has occurred as a result of an erroneous payment, and is unable to find that such loss resulted from no fault or negligence on the part of the paying agent.

#### SUBPART D. REPLACEMENT OF LOSSES OUT OF FUND

Sec. 322.7. *Replacement and recovery in connection with losses.*—When it is established to the satisfaction of the Secretary of the Treasury that a loss has resulted from a payment made in connection with the redemption of a United States savings bond or an armed forces leave bond, the loss shall be subject to immediate replacement out of the fund established by the Government Losses in Shipment Act, as amended. Any recovery or repayment on account of any such loss as to which replacement shall have been made out of the fund, shall be credited to the fund.

#### SUBPART E. INVESTIGATION OF LOSSES

Sec. 322.8. *Use of United States Secret Service.*—The Treasury Department, and, in appropriate cases, Federal Reserve Banks, as fiscal agents of the United States, may request the Secret Service to investigate losses and assist in the recovery of improper payments. The Treasurer of the United States, the Federal Reserve Banks, and qualified paying agents should cooperate with the Secret Service to the fullest extent in facilitating investigations and making recoveries and they will be expected to take such actions as may be necessary on their part to complete such investigations and recoveries.

#### SUBPART F. SUPPLEMENTS, AMENDMENTS, ETC.

Sec. 322.9. *Supplements, amendments, etc.*—The Secretary of the Treasury may at any time or from time to time supplement, amend, or withdraw, in whole or in part, the provisions of this circular, or of any amendments or supplements thereto, information as to which will be furnished promptly to the Federal Reserve Banks and to eligible financial institutions qualified to make payments of savings bonds or armed forces leave bonds under the provisions of Treasury Department Circulars No. 750, Revised, and No. 811, respectively.

This revision will become effective on September 2, 1947.

A. L. M. WIGGINS,  
Acting Secretary of the Treasury.

**Exhibit 14.—First revision, August 1, 1947, of Department Circular No. 793, prescribing regulations governing armed forces leave bonds<sup>1</sup>**

TREASURY DEPARTMENT,  
Washington, August 1, 1947.

*To Members and Former Members of the Armed Forces of the United States and Others Concerned:*

Armed forces leave bonds are issued pursuant to the Armed Forces Leave Act of 1946, as amended,<sup>2</sup> (hereinafter referred to as the act) to living members and living former members of the armed forces of the United States in settlement and compensation of accumulated leave under the conditions set forth in the act. In accordance with the terms of the act these bonds are issued under authority and subject to the provisions of the Second Liberty Bond Act, as amended. Pursuant to authority contained in said acts, Department Circular No. 793, dated November 12, 1946 (31 CFR 1946 Supp., 324), which contains the regulations governing armed forces leave bonds, is hereby amended and issued as a First Revision to read as follows:

I. SUBSTANTIVE REGULATIONS

324.1. *Designation.*—The bonds issued for the above purpose are designated "armed forces leave bonds".

324.2. *Issue and inscription.*—Armed forces leave bonds are issued by the Secretary of the Treasury (hereinafter referred to as the Secretary) acting through the Army, Navy, Marine Corps, and Coast Guard, which are designated as issuing agents. They are inscribed only in the names of living members or living former members of the armed forces. In each case a single bond in the highest appropriate multiple of \$25 is issued where the amount due is \$50 or more.<sup>3</sup> The name and serial or service number of the owner will be inscribed on the bond and at the option of the issuing agent the address may also be inscribed. No exchange will be permitted for bonds of lower denomination, for example, if a bond for \$275 is issued to a particular owner he may not exchange that bond for a bond in the amount of \$200 and a bond in the amount of \$75.

324.3. *Date and maturity of bond, and interest.*—The issue date of a bond will be the first day of the quarter-year period (January 1, April 1, July 1, or October 1) next following the date of discharge from the armed forces of the former member whose name is to be inscribed thereon, provided he was discharged on or after January 1, 1943, and prior to September 1, 1946, or in case a member of the armed forces was still on active duty on September 1, 1946, his bond will be dated October 1, 1946. Each bond will mature five years from its issue date, but shall be redeemable in cash at any time after September 1, 1947, at the option of the owner, at full face value plus accrued interest. Interest will accrue at the rate of 2½% per annum from the issue date to the date of maturity or to the last day of the month in which payment is made, whichever may be earlier. Interest will be paid only with the principal sum.

324.4. *Transfer and pledge.*—The bonds are nontransferable by sale, exchange, assignment, pledge, hypothecation or otherwise, except that they may be assigned by the owner to the Administrator of Veterans' Affairs for redemption by such Administrator, for the purpose of paying premiums or the difference in reserve in case of conversion to insurance on another plan or a policy loan made prior to July 31, 1946, on a United States Government life insurance policy or a national service life insurance policy under such regulations as may be prescribed by the Administrator of Veterans' Affairs. No claims by attempted transferees or by persons loaning money on the security of the bonds will be recognized.

324.5. *Claims of creditors.*—By the terms of the act the bonds are exempt from claims of creditors, including any claim of the United States, and shall not be subject to attachment, levy, or seizure by or under any legal or equitable process whatever. Accordingly, no claims of creditors, assignees for the benefit of creditors, trustees or receivers in bankruptcy or equity will be recognized, and no pay-

<sup>1</sup> Section 324.13 hereof relates to payment of armed forces leave checks to survivors.

<sup>2</sup> Pub. Law 704, 79th Cong. Amendatory act is Pub. Law 254, 80th Cong.

<sup>3</sup> Except that upon request settlement and compensation will be made entirely in cash to any applicant who has not made application for settlement and compensation and who makes application to the Secretary after July 26, 1947, the date of enactment of the Amendatory Act. The term "Secretary" as used in this footnote means in the case of personnel of the Army, the Secretary of War; in the case of personnel of the Navy and Marine Corps, the Secretary of the Navy; and in the case of personnel of the Coast Guard, the Secretary of the Treasury, and the designated representatives of each such Secretary.

ment of the bonds to any such persons will be made, either during the lifetime of the person whose name is inscribed on the bonds or after his death.

324.6. *Assignment to the Administrator of Veterans' Affairs.*—Any registered owner of an armed forces leave bond who desires to use his bond in payment of premiums or other payments in connection with United States Government life insurance or national service life insurance policies should mail or deliver his bond to the Office of the Veterans' Administration to which he pays his premiums. The bond should be accompanied by a completed VA Form 9-1625, "Directions for use of Proceeds of Armed Forces Leave Bonds", obtainable at any Veterans' Administration Office. Before submitting the bond to the Veterans' Administration the assignment form printed on the bottom of the back of the bond should be signed by the owner exactly as his name appears on the face of the bond. No certification or witness to the signature of the owner on such assignment form will be required.

324.7. *General payment and redemption provisions.*—Armed forces leave bonds may be redeemed before, at, or after maturity, in accordance with the terms of this circular at face value plus accrued interest to the date of maturity or to the last day of the month in which payment is made whichever may be earlier. Only payment of the entire amount will be permitted. No partial payment and no reissue of the bond in part may be made. No power of attorney to request payment in behalf of the registered owner will be recognized.

324.8. *Payment to registered owner (general).*—At any time after September 1, 1947, an owner whose name is inscribed on the face of an armed forces leave bond may at his option redeem such bond at full face value plus accrued interest upon (1) presentation of the bond (unless marked "Duplicate") to any incorporated bank or trust company or other organization qualified as a paying agent under the provisions of Department Circular No. 811 or any amendment thereto, (2) establishing his identity (preferably through use of original separation papers bearing his description and witnessed signature) to the satisfaction of the paying agent, and (3) signing the request for payment exactly as his name is inscribed on the face of the bond and adding his home or business address. Even though the request for payment has been signed or signed and certified prior to the presentation of the bond, nevertheless, the paying agent is required to establish to its satisfaction the identity of the owner requesting payment and such paying agent may require the owner to sign again the request for payment. No charge will be made to the owner.

324.9. *Payment to registered owner (other cases).*—Registered owners to whom qualified paying agents are not readily accessible and those who have bonds marked "Duplicate" should sign the request for payment of their bonds in the presence of and have their signatures thereto duly certified by an authorized certifying officer and should present and surrender their bonds to the appropriate Federal Reserve Bank<sup>4</sup> or to the Treasurer of the United States, Washington 25, D. C., except that bonds marked "Duplicate" should be forwarded to the Division of Loans and Currency, at the same address.

(a) *Certification of request.*—After the request for payment has been signed the certifying officer should complete and sign the certificate appearing at the end of the form for request for payment.

(b) *Certifying officers.*—The following officers are authorized to certify requests for payment of armed forces leave bonds:

(1) *Designated officers.*—Certain designated officers in the Treasury Department in Washington;

(2) *Banks, trust companies and branches.*—Any officer of any bank or trust company incorporated in the United States or its organized territories, or domestic or foreign branch of such bank or trust company, including those doing business in the organized Territories or insular possessions of the United States under Federal charter or organized under Federal law, Federal Reserve Banks, Federal land banks, and Federal home loan banks; any employee of any such bank or trust company expressly authorized by the corporation for that purpose, who should sign over the title "Designated Employee"; and Federal Reserve agents and assistant Federal Reserve agents, located in the several Federal Reserve Banks;

(3) *Veterans' home or hospital or other facility.*—The officer in charge of any home, hospital, or other facility of the Veterans' Administration (only for patients and members of such facilities);

<sup>4</sup> The Federal Reserve Banks are located at Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco.

(4) *Foreign countries.*—United States diplomatic and consular representatives; notaries public, if their official character and jurisdiction are certified by a United States diplomatic or consular officer over an impression of his rubber stamp, or by his certificate over his seal which should be transmitted with but should not be impressed on the bond itself. (See also (5) hereof);

(5) *Armed forces.*—Commissioned officers of the Army, Navy, Marine Corps, and Coast Guard of the United States for members of their establishments or civilian employees (and [the families of such members or employees] under their jurisdiction, persons in countries in which there are no United States diplomatic or consular representatives and persons who are in areas remote from such representatives;

(6) *Issuing agents for savings bonds of Series E.*—Any officer of a corporation which is a duly qualified issuing agent for savings bonds of Series E may certify a request for payment of an armed forces leave bond. All certifications by such officers must be authenticated by a legible imprint of the issuing agent's dating stamp;

(7) *Special provisions.*—The Commissioner and Associate Commissioner of the Public Debt, the Chief of the Division of Loans and Currency, or a Federal Reserve Bank is authorized to make special provision for certification in any particular case in which none of the officers authorized to certify requests for payment of armed forces leave bonds is readily accessible.

(c) *Instructions to certifying officers.*—Certifying officers should require positive identification of the person signing a request for payment.

324.10. *Right to payment on death of owner.*—Upon the death of an owner of an armed forces leave bond the bond becomes payable only to his survivors in the following order:

(a) Surviving wife or husband and children, if any, in equal shares;

(b) If such owner leaves no surviving spouse or children, then in equal shares to such owner's surviving parents, if any. If there are no such survivors the bond will be retired and the amount covered into the general fund of the Treasury. Accordingly, payment will not be made to an executor or administrator of the estate of a deceased registered owner, and if a bond should come into the possession of such an executor or administrator, or other person not a survivor, following the death of the owner it should be immediately delivered to one of the survivors, if any; otherwise forwarded to the Division of Loans and Currency, Washington 25, D. C., with a signed statement that there are no known survivors.

324.11. *Payment to survivors.*—Survivors of a deceased registered owner in the order provided in the preceding section are entitled to receive payment of an armed forces leave bond at their option and upon application to the Secretary of the Treasury at any time following the death of such registered owner, whether before, upon or after maturity of the bond. Application for such payment should be made on Form PD 2066, copies of which may be obtained from any Federal Reserve Bank. See section 324.15 for instructions as to filing the application.

(a) *Definition of survivors.*—Survivors are defined in the act as follows:

(1) "Spouse" means a lawful wife or husband;

(2) "Children" include

(a) a legitimate child;

(b) a child legally adopted;

(c) a stepchild, if, at the time of death of the member or former member of the armed forces, such stepchild is a member of the deceased's household;

(d) an illegitimate child, but in the case of a male member or former male member of the armed forces only if he has been judicially ordered or decreed to contribute to such child's support; has been judicially decreed to be the putative father of such child; or has acknowledged under oath in writing that he is the father of such child; and

(e) a person to whom the member or former member of the armed forces at the time of death stands in loco parentis and so stood for not less than twelve months prior to the date of death;

(3) "Parent" includes father and mother, grandfather and grandmother, stepfather and stepmother, father and mother through adoption, and persons who, for a period of not less than one year prior to the death of the member or former member of the armed forces, stood in loco parentis to such member or former member: *Provided*, That not more than two parents may receive the benefits provided under this act, and preference shall be

given to the parent or parents, not exceeding two, who actually exercised parental relationship at the time of or most nearly prior to the date of the death of such member or former member of the armed forces.

(b) *Payment only.*—Only payment of the entire amount of the bond will be permitted. No partial payment and no reissue of the bond in part may be made. Payment in all cases will be made by separate checks drawn in the proper amounts to the individual survivors, except that in the case of a survivor under 17 years of age or under mental disability, the check will be drawn either to the guardian of such survivor, if the Secretary has received notice of the appointment of such guardian, or in the absence of such notice, to a proper person selected by the Secretary, for the use and benefit of such survivor, without the necessity of resorting to judicial proceedings for the appointment of a legal representative.

(c) *All survivors must join.*—Since no partial payment or reissue may be made, all survivors of the class entitled to receive payment must unite in the application, except that in the case of survivors under 17 years of age or under mental disability, legally qualified guardians, if any, may sign in their behalf, and in the absence of such legal guardians, such proper persons as the Secretary may select to act on behalf of such survivors.

(d) *Time of vesting of survivors' rights.*—A survivor's right to receive payment becomes fixed upon the date of the death of the owner. If a survivor dies before receiving payment the right to receive payment of his or her share of the bond passes to the estate of such survivor. For example, if the registered owner dies and leaves a widow and two children and the widow dies prior to receipt of payment, her share passes to her estate and payment of the bond will be made one-third to the widow's representative and one-third to each of the surviving children. If no executor or administrator is appointed for the estate of a deceased survivor, settlement may be made in the same manner as provided for the settlement without administration of estates of deceased owners of United States registered bonds.

324.12. *Loss, theft, destruction, mutilation, or defacement of bonds.*—If an armed forces leave bond is lost, stolen, destroyed, mutilated or defaced, relief may be granted before maturity by the issue of a substitute bond to be marked "Duplicate", or at or after maturity by payment of the bond in accordance with the provisions of section 8 of the Government Losses in Shipment Act (U. S. C. 1940 Ed., title 31, sec. 738a). Relief in such cases will be governed by the regulations contained in Department Circular 300, as amended. In any such case immediate notice of the facts, together with a complete description of the bond (including name and address of owner, bond serial number, amount, and issue date), should be given to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., which will forward appropriate forms for requesting relief, together with full instructions. Usually such relief will be granted without requiring a bond of indemnity.

#### 324.13. *Checks.*—

(a) Payment to survivors of checks issued to the registered owner (1) in full settlement of leave, (2) in payment of bonds, or (3) in payment of the odd amount due the member or former member of the armed forces over and above the bond issued in settlement of leave, will be made to the persons entitled as provided in the above regulations relating to bonds. Accordingly, such checks received by executors or administrators of deceased registered owners should not be deposited for collection but should be turned over to the survivors or returned to the issuing office with a statement of the facts.

(b) In the case of a survivor entitled to payment who dies before receiving and collecting the check issued in the name of the survivor, payment will be made to his estate.

## II. PROCEDURE

324.14. *Presentation and surrender of bonds.*—Presentation and surrender of an armed forces leave bond should be made in accordance with the applicable provisions of this circular. The use of registered mail is suggested if the owner does not present and surrender the bond in person. Bonds marked "Duplicate" issued in lieu of lost, stolen, destroyed, mutilated, or defaced bonds should be submitted to the Treasury Department, Division of Loans and Currency, Washington 25, D. C.

324.15. *Payment to survivors.*—Survivors applying for payment under section 324.11 hereof should forward the bonds, accompanied by the applications on Form PD 2066, to the appropriate Federal Reserve Bank or to the Treasury Department, Division of Loans and Currency, Washington 25, D. C. Usually payment

will be expedited by the use of the Federal Reserve Banks. The form must be accompanied in each case by (1) a death certificate for the registered owner, (2) an explanation of any discrepancy between the name as given on the face of the bond and the name as given in the death certificate, and (3) in case of an application by parents other than the actual father and mother still living together, a signed and sworn statement giving the basis for the claim of parental relationship as defined in the act (see 324.11 hereof). The right is reserved to require other and further evidence in cases where such action appears desirable. Federal Reserve Banks as fiscal agents of the United States are authorized to make payment to survivors upon applications in accordance with these regulations, but may submit any doubtful or unusual cases to the Treasury Department, Division of Loans and Currency, for final decision.

324.16. *Designation of agents to make determination.*—The various Federal Reserve Banks as fiscal agents of the United States, the Fiscal Assistant Secretary of the Treasury, the Assistant to the Fiscal Assistant Secretary, the Commissioner and Associate Commissioner of the Public Debt, and the Chief of the Division of Loans and Currency are designated to make determinations on behalf of the Secretary as provided in the act.

### III. GENERAL

324.17. *Taxation.*—Under the act all amounts paid or payable under section 6 in cash, bonds or both (except interest in the case of bonds) shall be exempt from taxation.

324.18. *Address for communications.*—All inquiries after issue in connection with the payment of or transactions in armed forces leave bonds should be addressed to the Federal Reserve Bank of the district in which the owner resides, or to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., except that any inquiries regarding the use of such bonds in connection with Government life insurance or national service life insurance payments should be addressed to the Office of the Veterans' Administration to which the assured has been paying premiums, or to the Director of Insurance Accounts Service, Veterans' Administration, Washington 25, D. C.

324.19. *Additional regulations.*—The Secretary of the Treasury may at any time, or from time to time, prescribe additional, supplemental, amendatory or revised rules and regulations governing armed forces leave bonds.

This revision will become effective on September 2, 1947.

A. L. M. WIGGINS,  
*Acting Secretary of the Treasury.*

## **Exhibit 15.—Regulations, August 1, 1947, governing payments by banks and other financial institutions in connection with the redemption of armed forces leave bonds**

[Department Circular No. 811. Public Debt]

TREASURY DEPARTMENT,  
*Washington, August 1, 1947.*

Pursuant to the authority of the Second Liberty Bond Act, as amended, the following regulations are hereby prescribed to govern payments by banks and other financial institutions in connection with the redemption of armed forces leave bonds.

### SUBPART A. AUTHORITY TO ACT

Sec. 325.1. *Financial institutions authorized to act.*—Commercial banks, trust companies, savings banks, savings and loan associations, building and loan associations (including cooperative banks), credit unions, cash depositories, industrial banks, and similar financial institutions which (a) are incorporated under Federal law or under the laws of a State, Territory or possession of the United States or the District of Columbia; (b) in the usual course of business accept, subject to withdrawal, funds for deposit or the purchase of shares; (c) are under the supervision of the banking department or equivalent authority of the jurisdiction in which incorporated; (d) maintain regular offices for the transaction of their business; and (e) are open daily and observe regular business hours, are eligible to become paying agents of armed forces leave bonds and, upon qualification in

accordance with section 325.2 hereof, are hereby authorized to make payments in connection with the redemption of armed forces leave bonds (hereinafter referred to as bonds), subject to the provisions of this circular and any instructions issued hereunder.

Sec. 325.2. *Application and qualification.*—Federal Reserve Banks, as fiscal agents of the United States, are authorized to qualify eligible institutions hereunder, and to terminate any such qualification as hereinafter provided. Any financial institution qualified as a paying agent of United States savings bonds is authorized hereunder to act as a paying agent of armed forces leave bonds. The institution will not be required to effect a new formal Application-Agreement for the purpose. The act of payment of an armed forces leave bond by a qualified paying agent of savings bonds will qualify it as a paying agent of armed forces leave bonds and will render it subject to the terms and conditions applicable to the payment of such bonds and subject to the same terms and conditions as are set forth in the Application-Agreement entered into by it as a paying agent of savings bonds. Any other eligible institution not now qualified to pay savings bonds but possessing adequate authority under its charter that desires to qualify, to make payments in connection with the redemption of the bonds should make application to the Federal Reserve Bank of the Federal Reserve district in which it is located<sup>1</sup> on Application-Agreement Form PD 2125, copies of which may be obtained from the appropriate Federal Reserve Bank. If the application is approved, the Federal Reserve Bank will forward to the applicant a Notice of Qualification Form PD 2126, establishing that it is qualified to make payments in connection with the redemption of the bonds. If the application is not approved, the applicant will be so advised in writing by the Federal Reserve Bank of the district.

Sec. 325.3. *Termination of an agent's qualification to pay bonds.*—The Secretary of the Treasury or under authority of the Secretary the appropriate Federal Reserve Bank, as fiscal agent of the United States, may, by written notice, at any time and without previous demand or notice, terminate the qualification of any paying agent hereunder. A duly qualified paying agent may discontinue making payments at any time upon written notice to the Federal Reserve Bank, and its qualification shall thereupon cease.

#### SUBPART B. GENERAL

Sec. 325.4. *Meaning of terms in this circular.*—For the purpose of this circular, unless otherwise indicated specifically, or by context, the terms:

(a) "Paying agent(s)" or "agent(s)" shall mean any eligible financial institution duly qualified pursuant to the provisions of this circular to make payments in connection with the redemption of armed forces leave bonds including such branches located within the United States (including its Territories and possessions and the Canal Zone) and the Republic of the Philippines, as it may wish to utilize. For the purpose of this circular the term "branches" shall include any bank facilities which may be established with the specific approval of the Treasury Department at Army and Navy installations and other places.

(b) "Bond(s)" shall include only armed forces leave bonds unless otherwise indicated specifically or by context.

(c) "Owner(s)" shall mean the living member or former member of the armed forces whose name is inscribed in his or her own right on a bond.

(d) "Federal Reserve Bank" includes each Federal Reserve Bank and any branch thereof authorized by the parent Federal Reserve Bank to conduct any of the transactions in connection with which the term is used in this circular.

Sec. 325.5. *Reimbursement of agents' costs.*—(a) Each paying agent shall be entitled to receive reimbursement for its service for all bonds paid and accounted for by it during the period from September 1, 1947, through December 31, 1947, at the rate of

15 cents each for the first 1,000 bonds  
10 cents each for all over 1,000 bonds.

Thereafter the number of armed forces leave bonds paid will be combined with the number of savings bonds paid in computing reimbursement. In other words,

<sup>1</sup> For the purpose of this circular, eligible institutions in Puerto Rico, the Virgin Islands and the Canal Zone shall be considered as being within the Second Federal Reserve District and shall make application to the Federal Reserve Bank of New York, and eligible institutions in Alaska, Hawaii and Guam shall be considered as being within the Twelfth Federal Reserve District and shall make application to the Federal Reserve Bank of San Francisco.

paying agents will be entitled to receive 15 cents each for the first 1,000 armed forces leave bonds and savings bonds combined paid and accounted for in each calendar quarter, and 10 cents each for all over 1,000 bonds of either kind paid and accounted for in that quarter. Each Federal Reserve Bank is authorized to establish a definite and regular closing time for determining those paid bonds to be considered as accounted for in a reimbursable period. Such closing time may be based upon a time that the paid bonds are forwarded to, or received by, the Federal Reserve Bank and shall be uniformly applied throughout the district of such Bank. The scale of rates shall be applicable separately to the agent and to each of its branches utilized in making payments under this circular, if the bonds paid by each are separately scheduled and accounted for. The payment of such amount as the agent is entitled to receive shall be made by the Federal Reserve Bank on behalf of the Treasury Department.

(b) Paying agents shall not make any charge whatever to the owners of the bonds in connection with payments hereunder.

Sec. 325.6. *Announcements, etc., of authority to pay bonds.*—Any announcement of or any reference to an agent's authority to pay bonds may be made only in a form or manner or contain such statements or substance as may be approved by the Secretary of the Treasury or, under authority of the Secretary, by the Federal Reserve Bank of the district, as fiscal agent of the United States.

#### SUBPART C. SCOPE OF AUTHORITY OF PAYING AGENTS

Sec. 325.7. *General.*—Only one armed forces leave bond has been or will be issued to any one living member or former member of the armed forces discharged under honorable conditions and otherwise entitled to receive a payment in such form (except for a very few instances where adjustments have been necessary after payment was made). That bond will be inscribed only in such member's name. The lowest denomination bond authorized for issuance is \$50 (except for \$25 adjustment bonds) and higher denomination bonds are issued only in multiples of \$25. The bonds are issued pursuant and subject to the terms of Treasury Department Circular No. 793. The bonds are not transferable by sale, exchange, assignment, pledge, hypothecation or otherwise except as they may be assigned to the Administrator of Veterans' Affairs pursuant to the Armed Forces Leave Act of 1946, as amended, and regulations prescribed by that Administrator pursuant thereto. No claims by attempted transferees or by persons loaning money on the security of the bonds will be recognized. By the terms of the Armed Forces Leave Act of 1946, as amended, the bonds are exempt from claims of creditors, including any claim of the United States, and shall not be subject to attachment, levy, or seizure by or under any legal or equitable process whatever. Accordingly, no claims of creditors, assignees for the benefit of creditors, trustees or receivers in bankruptcy or equity will be recognized, and no payment of the bonds to any such persons will be made, either during the lifetime of the person whose name is inscribed on the bond or after his death. Upon the death of an owner of a bond the bond becomes payable only to his survivors as defined in the Armed Forces Leave Act. It is of the utmost importance that payment of the appropriate redemption value of the bonds be made only to and received by the persons entitled and strictly under the terms and conditions of the bonds and applicable regulations.

Sec. 325.8. *Payments—to owner named on bond.*—Subject to the terms of the bonds and to the provisions of the regulations governing them and the provisions of this circular, an agent may make payment of a bond only to the individual whose name is inscribed as the owner in his own right on the bond: *Provided*, That such individual presents the bond to the agent for payment and that the individual is known to the agent or establishes his identity to the complete satisfaction of the agent. This authority shall be held to include the payment of bonds to a person whose name as inscribed on the bond has been changed by marriage (but not otherwise). Both names must be shown, for example—"(*Miss*) Mary T. Jones, now by marriage Mrs. Mary J. Smith."

Sec. 325.9. *Specific limitations of payment authority.*—An agent is not authorized to pay a bond:

(a) If the bond is presented for payment prior to September 2, 1947. Payment in any form or manner to a bond owner before that date is not authorized in any circumstance.

(b) If the agent does not know or cannot establish to its complete satisfaction the identity of the person requesting payment as the owner of the bond.

(c) If the owner requesting payment (form for which appears on the back

of each bond) does not sign his name in ink exactly as it is inscribed on the face of the bond and show his home or business address. (See also sec. 325.10 (d).)

(d) If the bond appears to bear a material irregularity, for example, an altered, illegible, incomplete or unauthorized inscription or issue date; or if a bond appears to be altered, or is mutilated or defaced in such a manner as to create doubt or arouse suspicion with respect to the bond or any essential part thereof.

(e) If the bond is marked "Duplicate." (An owner of a bond marked "Duplicate" must submit it to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., after completing the request for payment and having it duly certified by an authorized certifying officer.)

(f) If the owner is deceased, incompetent or under legal guardianship or the owner's name as inscribed on a bond is changed for any reason other than marriage, or if it is known to the agent that the owner has been declared, in accordance with law, incompetent to manage his estate.

(g) If partial redemption is requested. (Only payment of the entire amount of principal and interest due may be made and under no circumstances will an exchange be permitted for bonds of a lower denomination.)

Attention is directed to sec. 325.17 hereof for handling bonds of the foregoing classes of cases which may not be paid by agents.

#### SUBPART D. PAYMENT AND ACCOUNTING

Sec. 325.10. *Examination of bonds presented for payment.*—Before making payment of bonds presented hereunder the agent:

(a) Shall determine that the person requesting payment as the "owner" (as defined in this circular) is known or his identity is established to the satisfaction of the agent.

(b) Shall examine the bond and determine that it is a bond which the agent is authorized to pay under the provisions of this circular.

(c) If the request for payment on the back of the bond is already executed, shall determine that the request is properly signed by the registered owner presenting the bond and that his home or business address is shown.

(d) If the request for payment on the back of the bond has not been executed or has been improperly executed by the owner presenting the bond, shall require such owner to properly sign the request and show his home or business address.

Sec. 325.11. *Certification of requests for payment.*—In view of the provisions of this circular governing the payment of the bonds and the requirements as to the data to be endorsed on each bond, under sec. 325.12, an agent will not be required in the case of any bond paid by it to complete the certification form at the end of the request for payment, nor determine the authenticity of any certification which may appear on the bond at the time it is presented for payment: *Provided, however,* That each agent submitting paid bonds shall be understood by such submission to have represented and certified that the identity of the owner requesting payment has been duly established by one of its officers or by an employee duly authorized by the agent.

Sec. 325.12. *Determination of redemption values and payment of bonds.*—The redemption value of a bond is determined according to the number of months that it has been outstanding. The Federal Reserve Bank of the district will furnish each agent monthly with a table of redemption values from which it will be possible, after determining the month and year of issue of any bond, to establish its current value. After establishing such value, payment thereof to the owner requesting payment shall be made in cash. No objection will be made to an arrangement between the owner and the agent under which the owner accepts in lieu of cash, a credit to his checking, savings or share account with the agent, or a check or similar instrument payable to his order. Each agent shall place in the upper left-hand portion on the face of each bond paid by it the word "Paid," the amount and date of payment and the name, location and code number assigned to the agent by the Federal Reserve Bank. Other data pertinent to the payment procedure of an agent may be included if approved by the Federal Reserve Bank of the district. Each paying agent of savings bonds acting also as a paying agent of armed forces leave bonds should use the same payment stamp for both activities. The Federal Reserve Bank will furnish any additional rubber stamps necessary for this purpose, or, in lieu thereof, will approve suitable stamps in the possession of or prepared by an agent. The affixation of such data shall be construed by and between the agent and the Treasury Department to be a certification by the paying agent that the bond has been paid in accordance with the terms and requirements of this circular and the Armed Forces Leave Act of 1946,

as amended, and regulations issued pursuant thereto, and that payment of the proceeds of the bond has been made to the owner.

Sec. 325.13. *Forwarding paid bonds to the Federal Reserve Bank.*—After payment, the bonds shall be forwarded to the Federal Reserve Bank of the district in accordance with instructions issued by such Federal Reserve Bank.

Sec. 325.14. *Redemption of paid bonds by Federal Reserve Banks.*—Upon receipt of the paid bonds the Federal Reserve Bank will make immediate settlement with the paying agent for the total amount of payments made on such bonds; however, such settlement shall be subject to adjustment if any discrepancies are discovered at a later date.

Sec. 325.15. *Losses resulting from payments.*—The amendment to the Armed Forces Leave Act of 1946, Public Law No. 254, enacted July 26, 1947, provides in sec. 4 thereof that the provisions of subsection (i) of section 22 of the Second Liberty Bond Act, as amended, shall apply with equal force to payments of armed forces leave bonds. The said subsection provides:

"(i) Any losses resulting from payments made in connection with the redemption of savings bonds shall be replaced out of the fund established by the Government Losses in Shipment Act, as amended, under such regulations<sup>2</sup> as may be prescribed by the Secretary of the Treasury. The Treasurer of the United States, any Federal Reserve Bank, or any qualified paying agent authorized or permitted to make payments in connection with the redemption of such bonds, shall be relieved from liability to the United States for such losses, upon a determination by the Secretary of the Treasury that such losses resulted from no fault or negligence on the part of the Treasurer, the Federal Reserve Bank, or the qualified paying agent. \* \* \* The provisions of section 3 of the Government Losses in Shipment Act, as amended,<sup>3</sup> with respect to the finality of decisions by the Secretary of the Treasury shall apply to the determinations made pursuant to this subsection. \* \* \*

(a) *Consideration of facts concerning loss.*—In any case in which a loss occurs, the paying agent shall be afforded ample opportunity to present all of the facts pertaining to the circumstances of the payment for consideration by the Secretary.

Sec. 325.16. *Preservation of rights.*—Nothing contained in these regulations shall be construed to limit or restrict any existing rights which holders of bonds may have acquired under the Armed Forces Leave Act or the regulations prescribed thereunder.

Sec. 325.17. *Redemption of bonds not payable by agents.*—Any bonds which an agent is not authorized to pay pursuant to the provisions of this circular should be forwarded by the owner, or his agent, after certification of the requests for payment, to the Federal Reserve Bank or branch of the district for redemption except that in the case of bonds marked "Duplicate" the bonds should be sent to the Treasury Department, Division of Loans and Currency, Washington 25, D. C. If an agent should undertake to forward such unpaid bonds at the request and in behalf of the person entitled to payment, such bonds must be sent separate and apart from bonds which the agent has paid.

Sec. 325.18. *Functions of Federal Reserve Banks.*—The Federal Reserve Banks, as fiscal agents of the United States, are authorized to perform such duties, and prepare and issue such forms and instructions, as may be necessary to the fulfillment of the purpose and requirements of this circular. The Federal Reserve Banks, when authorized by the Treasury Department, may utilize any or all of their branches in the performance of these duties.

Sec. 325.19. *Supplements, amendments, etc.*—The Secretary of the Treasury may at any time or from time to time revise, supplement, amend, or withdraw, in whole or in part, the provisions of this circular, or any revisions, supplements or amendments thereto, information as to which will be furnished promptly to the Federal Reserve Banks and to the agents qualified hereunder.

The regulations set forth in this circular will become effective immediately, the requirements of sec. 4 (c) of the Administrative Procedure Act being dispensed with to facilitate the redemption of armed forces leave bonds by the owners thereof after September 1, 1947, in accordance with Public Law 254, 80th Congress.

A. L. M. WIGGINS,  
Acting Secretary of the Treasury.

<sup>2</sup> Regulations governing replacement of losses resulting from payments made in connection with the redemption of armed forces leave bonds are set forth in Treasury Department Circular No. 751, Second Revision.

<sup>3</sup> The provisions of section 3 of the Government Losses in Shipment Act, as amended, with respect to the finality of decisions by the Secretary of the Treasury are:—"Notwithstanding any provision of law to the contrary, the decision of the Secretary of the Treasury that such loss, destruction, or damage has occurred or that such shipment was made substantially in accordance with such regulations shall be final and conclusive and shall not be subject to review by any other officer of the United States."

## SECURITIES GUARANTEED BY THE UNITED STATES

## Exhibit 16.—Partial redemption, before maturity, of 2½ percent war housing insurance fund debentures, Series H

## SECOND CALL

[Department Circular No. 817. Public Debt]

TREASURY DEPARTMENT,  
Washington, September 25, 1947.*To Holders of 2½ Percent War Housing Insurance Fund Debentures, Series H:*

## I. NOTICE OF SECOND CALL FOR PARTIAL REDEMPTION, BEFORE MATURITY, OF 2½ PERCENT WAR HOUSING INSURANCE FUND DEBENTURES, SERIES H

The Federal Housing Commissioner, with the approval of the Secretary of the Treasury, has issued the following notice of call for partial redemption and offer to purchase with respect to 2½ percent war housing insurance fund debentures, Series H: °

"Pursuant to the authority conferred by the National Housing Act (48 Stat. 1246; U. S. C., title 12, sec. 1701 et seq.) as amended, public notice is hereby given that 2½ percent war housing insurance fund debentures, Series H, of the denominations and serial numbers designated below, are hereby called for redemption, at par and accrued interest, on January 1, 1948, on which date interest on such debentures shall cease:

*2½ percent war housing insurance fund debentures, Series H*

Denomination:	Serial numbers (all numbers inclusive)
\$50.....	508 to 534.
\$100.....	1,850 to 2,104.
\$500.....	609 to 629.
\$1,000.....	2,681 to 2,966.
\$5,000.....	54 to 56.
\$10,000.....	149 to 1,073.

"The debentures first issued as determined by the serial numbers were selected for redemption by the Commissioner, Federal Housing Administration, with the approval of the Secretary of the Treasury.

"No transfers or denominational exchanges in debentures covered by the foregoing call will be made on the books maintained by the Treasury Department on or after October 1, 1947. This does not affect the right of the holder of a debenture to sell and assign the debenture on and after October 1, 1947, and provision will be made for the payment of final interest due on January 1, 1948, with the principal thereof to the actual owner, as shown by the assignments thereon.

"The Commissioner of the Federal Housing Administration hereby offers to purchase any debentures included in this call at any time from October 1, 1947, to December 31, 1947, inclusive, at par and accrued interest, to date of purchase.

"Instructions for the presentation and surrender of debentures for redemption on or after January 1, 1948, or for purchase prior to that date will be given by the Secretary of the Treasury."

## II. TRANSACTIONS IN SECOND-CALLED DEBENTURES

1. The debentures included in the foregoing notice of call for partial redemption on January 1, 1948, are hereby designated second-called 2½ percent war housing insurance fund debentures, Series H, and are hereinafter referred to as second-called debentures.

2. Transfers and denominational exchanges in second-called debentures will terminate at the close of business on September 30, 1947.

## III. REDEMPTION OR PURCHASE

1. Holders of second-called debentures will be entitled to have such debentures redeemed and paid at par on January 1, 1948, with interest in full to that date,

at the rate of \$12.50 per \$1,000. Interest on second-called debentures will cease on January 1, 1948.

2. Holders of second-called debentures have the privilege of presenting such debentures at any time from October 1 to December 31, 1947, inclusive, for purchase at par and accrued interest, at the rate of \$0.067935 per \$1,000 per day from July 1, 1947, to date of purchase.

#### IV. RULES AND REGULATIONS GOVERNING REDEMPTION AND PURCHASE

1. The United States Treasury Department is the agent of the Federal Housing Commissioner for the redemption and purchase of second-called debentures. In accordance with regulations adopted by the Federal Housing Commissioner and approved by the Secretary of the Treasury, the assignment, redemption, and purchase of second-called debentures will be governed by the general regulations of the Treasury Department with respect to United States bonds and notes, so far as applicable, except as otherwise provided herein.

2. Second-called debentures presented for redemption on January 1, 1948, or for purchase from October 1 to December 31, 1947, inclusive, must be assigned by the registered payee or assignee thereof or by their duly constituted representatives in the form indicated in paragraph 3 of this section, and should thereafter be presented and surrendered to any Federal Reserve Bank or to the Division of Loans and Currency, Treasury Department, Washington 25, D. C., accompanied by appropriate written advice. (Use Form PD 2132.) The debentures must be delivered at the expense and risk of the holders. (See paragraph 8 of this section.) In all cases checks in payment of principal and final interest will be mailed to the address given in the form of advice accompanying the debentures when surrendered.

3. If the registered payee or an assignee holding under proper assignment from the registered payee desires that payment be made to him, the debentures should be assigned by such payee or assignee or by a duly constituted representative to "The Federal Housing Commissioner for redemption" or to "The Federal Housing Commissioner for purchase," according to whether the debentures are to be presented for redemption on January 1, 1948, or for purchase prior to that date. If it is desired for any reason that payment be made to some other person without intermediate assignment, the debentures should be assigned to "The Federal Housing Commissioner for redemption (or purchase) for the account of -----," inserting the name and address of the person to whom payment is to be made.

4. An assignment in blank or other assignment having similar effect will be recognized, but in that event payment will be made to the person surrendering the debenture for redemption or purchase since, under such an assignment, the debenture becomes in effect payable to bearer. Assignments in blank or assignments having similar effect should be avoided, if possible, in order not to lose the protection afforded by registration.

5. Final interest on any second-called debentures, whether purchased prior to or redeemed on or after January 1, 1948, will be paid with the principal in accordance with the assignments on the debentures surrendered.

6. All assignments must be made on the debentures themselves unless otherwise directed by the Treasury Department. Detached assignments will be recognized and accepted in any particular case in which the use of detached assignments is specifically authorized by the Treasury Department. Any assignment not made upon the debenture is considered a detached assignment.

7. A second-called debenture registered in the name of, or assigned to, a corporation, will be paid to such corporation on or after January 1, 1948, upon an appropriate assignment for that purpose executed on behalf of the corporation by a duly authorized officer thereof. An assignment so executed and duly attested in accordance with Treasury Department regulations will ordinarily be accepted without proof of the officer's authority. In all cases coming under this provision payment will be made only by check drawn to the order of the corporation. Proof of the authority of the officer assigning on behalf of a corporation will be required, in accordance with the general regulations of the Treasury Department, in the case of assignments for purchase prior to January 1, 1948, and in case of assignments for redemption on or after January 1, 1948, for the account of any person other than the corporation.

8. Debentures presented for redemption or purchase under this circular must be delivered to a Federal Reserve Bank or to the Division of Loans and Currency,

Treasury Department, Washington 25, D. C., at the expense and risk of the holder. Debentures bearing restricted assignments may be forwarded by registered mail, but debentures bearing unrestricted assignments should be forwarded by registered mail insured or by express prepaid.

9. In order to facilitate the redemption of second-called debentures on January 1, 1948, any such debenture may be presented and surrendered in the manner herein prescribed in advance of that date but not before December 1, 1947. Such early presentation by holders will insure prompt payment of principal and interest when due.

#### V. GENERAL PROVISIONS

1. Any further information which may be desired regarding the redemption of second-called debentures under this circular may be obtained from any Federal Reserve Bank or from the Division of Loans and Currency, Treasury Department, Washington 25, D. C., where copies of the Treasury Department's regulations governing assignments may be obtained.

2. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to perform any necessary acts under this circular. The Secretary of the Treasury may at any time or from time to time prescribe supplemental and amendatory rules and regulations governing the matters covered by this circular, which will be communicated promptly to the registered owners of second-called debentures.

A. L. M. WIGGINS,  
*Acting Secretary of the Treasury.*

#### Exhibit 17.—Summary of information contained in circulars pertaining to calls for partial redemption, before maturity, of insurance fund debentures

During the fiscal year 1948 there were three calls for partial redemption, before maturity, of insurance fund debentures. The essential details contained in the circulars covering these calls are summarized in the following table. The first circular, covering the second call for partial redemption of Series H war housing insurance fund debentures, is shown as exhibit 16. The other two circulars have been omitted, but the general rules and regulations contained in the omitted circulars are, with the exception of the applicable dates, the same as those shown in exhibit 16.

	2½% war housing insurance fund debentures, Series H		2¾% housing insurance fund debentures, Series D, fifth call

Presentation for purchase prior to call date:			
Period.....	Oct. 1-Dec. 31, 1947.....	Apr. 1-June 30, 1948.....	Apr. 1-June 30, 1948.
Amount paid.....	Par and accrued interest at rate of \$0.067935 per \$1,000 per day from July 1, 1947, to date of purchase.	Par and accrued interest at rate of \$0.068681 per \$1,000 per day from Jan. 1, 1948, to date of purchase.	Par and accrued interest at rate of \$0.075549 per \$1,000 per day from Jan. 1, 1948, to date of purchase.

## MONETARY DEVELOPMENTS

**Exhibit 18.—Report of activities of the National Advisory Council on International Monetary and Financial Problems, April 1 to September 30, 1947**

[House Document No. 501, 80th Congress, 2d session]

## LETTER OF TRANSMITTAL

*To the Congress of the United States:*

I transmit herewith a report of the National Advisory Council on International Monetary and Financial Problems covering its operations from April 1, 1947, to September 30, 1947, and describing, in accordance with section 4 (b) (5) of the Bretton Woods Agreements Act, the participation of the United States in the International Monetary Fund and the International Bank for Reconstruction and Development for the above period.

Previous reports of the National Advisory Council were transmitted to the Congress on March 1, 1946, March 8, 1946, January 13, 1947, and June 26, 1947, respectively. Previous reports on the participation of the United States in the International Monetary Fund and the International Bank were included in the reports of January 13, 1947, and June 26, 1947, respectively.

HARRY S. TRUMAN.

THE WHITE HOUSE, January 19, 1948.

**REPORT OF ACTIVITIES OF THE NATIONAL ADVISORY COUNCIL ON INTERNATIONAL MONETARY AND FINANCIAL PROBLEMS, APRIL 1, 1947, TO SEPTEMBER 30, 1947**

## 1. ORGANIZATION OF THE COUNCIL

## Statutory basis

The National Advisory Council on International Monetary and Financial Problems was established by the Congress in the Bretton Woods Agreements Act (59 Stat. 512, 22 U. S. C. 286b), approved by the President on July 31, 1945. The statute directs the Council to coordinate the policies and operations of the representatives of the United States on the International Monetary Fund and the International Bank for Reconstruction and Development, the Export-Import Bank of Washington, and all other agencies of the Government "to the extent that they make or participate in the making of foreign loans or engage in foreign financial, exchange or monetary transactions." The Council is also directed to advise and consult with the President and the United States representatives on the Fund and the Bank on major problems arising in the administration of the Fund and the Bank; and to recommend to the President general policy directives for the guidance of the representatives of the United States on the Fund and Bank. Portions of the statute stating the duties and powers of the Council are presented in appendix A [omitted here].

## Reports

Since its first meeting on August 21, 1945, the Council has submitted four formal reports which were transmitted by the President to the Congress on March 1, 1946 (H. Doc. No. 489, 79th Cong., 2d sess.; subsequently included as appendix B to H. Doc. No. 497, 79th Cong., 2d sess.); March 8, 1946 (H. Doc. No. 497, 79th Cong., 2d sess.); January 13, 1947 (H. Doc. No. 53, 80th Cong., 1st sess.); and June 26, 1947 (H. Doc. No. 365, 80th Cong., 1st sess.), respectively.

The present report covers the activities of the Council from April 1 to September 30, 1947. This section discusses the organization and procedures of the Council. Part II covers general activities of the Council, particularly as they relate to the Anglo-American Financial Agreement, the Philippine loan, and credits extended by the Export-Import Bank, United States Maritime Commission, and War Assets Administration. Part III constitutes the third report by the Council on participation of the United States in the International Bank for Reconstruction and Development and in the International Monetary Fund during the period from April 1 to September 30, 1947. Part IV covers activities of the Council in relation to the early planning and developmental phases of the European Recovery Program.

## Membership

The members of the Council, according to law, during the period under review, were the following:

The Secretary of the Treasury, John W. Snyder, Chairman.

The Secretary of State, George C. Marshall.

The Secretary of Commerce, W. Averell Harriman.

The Chairman of the Board of Governors of the Federal Reserve System, Marriner S. Eccles.

The Chairman of the Board of Directors of the Export-Import Bank, William McChesney Martin, Jr.

By agreement, the following served as alternates:

Andrew N. Overby, Special Assistant to the Secretary of the Treasury (to July 15, 1947). Frank A. Southard, Jr., Director of the Office of International Finance, Treasury Department, succeeded Mr. Overby on July 15, 1947.

William L. Clayton, Under Secretary of State for Economic Affairs. (Willard L. Thorp replaced Mr. Clayton after the period covered by this report.)

Thomas C. Blaisdell, Jr., Assistant to the Secretary of Commerce.

J. Burke Knapp, Assistant Director of Research and Statistics, Board of Governors of the Federal Reserve System.

Herbert E. Gaston, Vice Chairman of the Board of Directors of the Export-Import Bank.

Harold Glasser, Assistant Director of the Office of International Finance in the Treasury Department, was the Secretary of the Council.

The United States Executive Directors on the International Monetary Fund and on the International Bank for Reconstruction and Development, Andrew N. Overby and Eugene R. Black, regularly attended the meetings of the Council.

#### Procedure

The Council ordinarily meets each week and holds such special meetings as are required. Joint meetings with the President's Committee for Financing Foreign Trade have been held at approximately monthly intervals. In the period under review the Council also met (during the week of August 18-22) with representatives of the United Kingdom to consider problems arising in conjunction with the implementation of the Anglo-American Financial Agreement.

The Council in discharging its functions makes use of the services of the existing personnel of its five member agencies. Its Staff Committee consists of technical representatives of member agencies and a representative of the Securities and Exchange Commission. The Alternate United States Executive Directors on the International Monetary Fund and the International Bank generally attend meetings of the Staff Committee. The Staff Committee collects and analyzes information and prepares reports and recommendations for the Council. This procedure has enabled the Council to maintain the close interagency liaison essential for successful performance of its coordinating functions in the most economical manner. Secretariat functions are performed by personnel of the Treasury Department.

#### II. ACTIVITIES OF THE COUNCIL FROM APRIL 1, 1947, TO SEPTEMBER 30, 1947 (OTHER THAN THOSE RELATING TO THE INTERNATIONAL MONETARY FUND AND THE INTERNATIONAL BANK)

##### The Anglo-American Financial Agreement

The Anglo-American Financial Agreement of December 6, 1945, which the Secretary of the Treasury is delegated to carry out in consultation with the National Advisory Council, provided for a credit of \$3,750,000,000 to the Government of the United Kingdom, and for the assumption by that Government of certain obligations to liberalize the use of sterling as an instrument of non-discriminatory multilateral world trade.

The gradual extension of the area in which sterling could be freely used for current trading purposes had been begun in December 1946, as set forth in the report of the activities of the National Advisory Council from February 28, 1946, to March 31, 1947 (H. Doc. No. 365, 80th Cong., 1st sess., p. 4). Throughout the period following April 1, 1947, the Government of the United Kingdom continued this policy of implementing the convertibility clauses of the Financial Agreement in anticipation of the date on which the convertibility provisions became effective (July 15, 1947). Consequently, at the beginning of July 1947, the United Kingdom was prepared to state that the obligations in question were already being implemented with respect to many countries, and would be implemented by July 15 with respect to most other important countries. The Government of the United Kingdom requested, however, that the provisions

permitting postponement in exceptional circumstances be applied in the case of fourteen countries with which appropriate arrangements could not be completed by July 15, 1947, with the understanding that the obligations would become effective retroactively to July 15, upon the date of completion of the arrangements. The National Advisory Council recommended that the requested postponements be granted, and this was confirmed by an exchange of letters between the Secretary of the Treasury and the Chancellor of the Exchequer. (This exchange of letters appears as appendix B to this report.) By July 15, 1947, the British Government had instituted a system providing for the free availability of current accruals of sterling for current payments by all countries, except the fourteen for which postponement had been granted.

This system of convertibility of sterling, however, could not be maintained. The period covered by this report was characterized by increasing maladjustments in the British and world economies. During 1946 the British had incurred a balance-of-payments deficit which was much lower than had been anticipated during the Washington negotiations. During 1947, however, the continuing rise in world prices tended to increase the British balance-of-payments deficit, and this adverse trend was not compensated by a reduction in the volume of imports or an increase in the volume of exports. On the contrary, the volume of exports in the first half of the year was substantially below the target, due to the winter crisis, and the volume of imports rose, near the middle of the year, to the highest postwar level. In addition, Government expenditures overseas remained at a higher level than had been expected.

These developments occurred at a time when most of the countries with which the United Kingdom trades were also suffering depletion of their gold and dollar reserves. Hence, as soon as the convertibility provisions of the Financial Agreement became effective, these countries tended to make maximum use of their convertibility privileges in order to meet their dollar payments. The net current sterling receipts of such countries tended to become a drain on British dollar resources, and the use, in some cases, of sterling balances previously accumulated, further contributed to the drain.

It was the cumulative effect of these factors which caused the drawings under the credit to increase rapidly. In the third quarter of 1946 the United Kingdom had drawn \$400,000,000; in the fourth quarter, \$200,000,000; and in the first quarter of 1947, \$500,000,000. The rate of drawings accelerated to \$950,000,000 in the second quarter of 1947 and to \$1,300,000,000 in the 2 months of July and August, leaving an undrawn balance on August 31, 1947, of \$400,000,000.

On August 18, a delegation from the United Kingdom Treasury, headed by Sir Wilfred Eady, arrived in Washington and began consultations with the National Advisory Council. In the course of these discussions, it was ascertained that the drain on the British dollar resources had risen to a level which would soon unduly deplete the British gold and dollar reserves. The National Advisory Council, meeting in emergency sessions during the 3 days, August 18 to August 20, came to the conclusion that the fundamental purposes of the Anglo-American Financial Agreement could not be fulfilled if this excessive drain of British dollar reserves were permitted to continue. Therefore, it was agreed between the representatives of the two Governments that the free convertibility of sterling should be temporarily suspended, and that the British Government should be given an opportunity to revise its system of international payments with a view to carrying out the basic objectives of the Anglo-American Financial Agreement.

The British agreed that in the construction of an alternative system they would be guided by the principles of the Financial Agreement, having due regard to the necessity of conserving the British dollar resources. These understandings were set forth in an exchange of letters of August 20, 1947, between the Secretary of the Treasury and the Chancellor of the Exchequer. (This exchange of letters appears as appendix C to this report.) [Appendix C omitted here.] It was agreed in these letters that frequent consultations would be held between the two Governments with a view to arriving at the most feasible method of implementing the principles of the Financial Agreement, and that during the interim period while the British were revising their payments arrangements with third countries, no withdrawals would be notified against the amount remaining in the line of credit.

During the course of the negotiations in Washington and in London in August and September 1947 questions were raised concerning the interpretation of section 9 of the Financial Agreement, which provides that quantitative import restrictions imposed by either country should be administered "on a basis which does not discriminate against imports from the other country in respect of any product".

The United States Government agreed that in its interpretation of the British obligation under section 9, it would take into consideration the unusual aspects of the financial position of the United Kingdom.

### Export-Import Bank credits

During the period under review the Council continued to work closely with the Export-Import Bank in order to coordinate the Bank's policies with those of other agencies concerned with foreign lending. New credits authorized by the Bank during this period included \$50,000,000 to Mexico, \$13,000,000 to Austria, \$3,162,000 to the Netherlands, \$5,600,000 to Egypt, and \$15,650,000 to Brazil. The Council offered no objection to consideration by the Export-Import Bank of an allocation of up to \$19,000,000 for the purpose of financing cotton exports to Germany out of the \$100,000,000 which had been set aside by the Bank for financing cotton exports to European countries.

The total net credits authorized from July 1, 1945, to September 30, 1947, by the Board of Directors of the Export-Import Bank amounted to \$2,358,000,000. The following table shows the distribution of the credits by country and object of financing:

*Net credits authorized by the Export-Import Bank,<sup>1</sup> July 1, 1945, to September 30, 1947*

<sup>1</sup> Cancellations and expirations deducted. Numerous small exporter-importer loans extended by the Bank, July 1, 1945, through Sept. 30, 1947, are excluded. Also excluded are Mexican authorizations of \$30,000,000 and Peruvian authorization of \$400,000 approved prior to June 30, 1945, recorded on Export-Import Bank books subsequent to June 30, 1945.

<sup>2</sup> Credits extended by the Export-Import Bank under general approval of the Council. Hungarian credit of \$7,000,000 canceled Apr. 2, 1947.

<sup>3</sup> Revolving credits.

<sup>4</sup> For financing tobacco purchases.

<sup>5</sup> For financing food purchases.

<sup>6</sup> Excludes \$93,000,000 participation by private banks through Sept. 30, 1947, and \$4,500,000 cancellation.

In January 1947 the Council approved consideration by the Export-Import Bank of credits to Italy totaling not more than \$100,000,000. The Bank earmarked this amount for the extension during 1947 of credits for the purpose of financing imports from the United States and, thereby, assisting specific parts of Italian industry in the restoration and expansion of export markets. As of September 30, 1947, the Export-Import Bank had approved credits (guaranteed by the Italian Government) totaling \$23,000,000 in favor of the Istituto Mobiliare Italiano, an Italian public credit institution, for three projects involving industrial financing.

As previously reported, in March 1946 the Council approved consideration by the Bank of the extension to Chinese Government agencies and private enterprises of credits aggregating \$500,000,000 for the purchase in the United States of materials, equipment, and services to assist in the rehabilitation and development of the Chinese economy. The Bank earmarked this amount for the extension of credits for specific projects submitted to the Bank and approved by it prior to June 30, 1947. On June 27 the Bank announced that after the expiration of the earmark of this amount on June 30 it would be willing to consider loans for specific projects in China on the same basic principles as apply to its loan activities throughout the world.

As of September 30, 1947, the unutilized lending capacity of the Bank was \$818,900,000.

#### The Philippine loan and the Joint Philippine-American Finance Commission

Congress by Public Law 656 (79th Cong.), approved August 7, 1946, authorized the Reconstruction Finance Corporation to extend credits during the fiscal year 1947 to the Philippine Government of not more than \$75,000,000 upon such terms as that agency, after consultation with the National Advisory Council, should deem to be warranted by the financial position of the Philippine Government. The initial advance of \$25,000,000 under this authorization was covered in the preceding report of the Council.

In accordance with recommendations contained in an interim report of the Joint Philippine-American Finance Commission, established at the recommendation of the National Advisory Council to study the financial and budgetary situation of the Philippine Government, the Council approved consideration by the Reconstruction Finance Corporation of an additional \$45,000,000 loan out of the remaining line of credit available under Public Law 656, provided that \$10,000,000 would become repayable before September 30, 1947, if Philippine Government revenues for the fiscal year 1947 exceeded a stipulated amount. In fact, this condition was satisfied and following extension of the \$45,000,000 loan by the Reconstruction Finance Corporation, \$10,000,000 was repaid by the Philippine Government by June 30, 1947. The total amount outstanding on September 30, 1947, was therefore \$60,000,000, consisting of the initial advance of \$25,000,000 and a net additional advance of \$35,000,000. Both advances bear interest at 2 percent per annum; the maturity date of the former is January 1, 1952, and of the latter July 1, 1953.

The final report and recommendations of the Joint Philippine-American Finance Commission were submitted to the President by the Chairman of the National Advisory Council on June 7, 1947, and have been printed as House Document No. 390 (80th Cong., 1st sess.). The report outlined a comprehensive and integrated financial, monetary, fiscal, and trade program to achieve economic recovery and development in the Philippines and the establishment of sound governmental financial policies and practices suited to postwar conditions and the independent status of the Philippine Government. The report stressed the full utilization of available Philippine resources for these purposes.

#### United States Maritime Commission foreign credits

Under the Merchant Ship Sales Act of 1946, the United States Maritime Commission was authorized, with certain limitations, to sell war-built vessels to non-citizens at not less than the statutory sales price and upon terms and conditions not more favorable than those extended to United States citizens.

During the 6-month period under survey the National Advisory Council agreed to consideration by the Maritime Commission of \$37,400,000 of credits for the purchase of war-built vessels by foreign governments or nationals. As reported previously, the Maritime Commission after consultation with the Council had extended \$97,000,000 of credits as of March 31, 1947. Credits utilized by pur-

chasers between April 1 and September 30, 1947, of \$63,700,000 (including credits previously considered by the National Advisory Council) brought the total of credits for which contracts had been signed as of September 30, 1947, to \$160,700,000.

The following table indicates the status of merchant ship sales as of September 30, 1947, showing credits made available by the United States Maritime Commission and credits utilized by purchasers.

*Status of merchant ship sales to foreign countries as of Sept. 30, 1947*

[Millions of dollars]

	Credits made available by U. S. Maritime Commission	Credits utilized by purchasers
Brazil.....	9.4	9.4
China.....	9.4	7.0
Finland.....	.8	.8
France.....	42.1	42.1
Greece.....	41.3	41.3
Italy.....	41.7	41.7
Netherlands.....	11.4	0.0
Norway.....	27.9	11.5
Peru.....	4.1	4.1
Turkey.....	6.0	2.8
Total.....	194.1	160.7

Ships for which mortgage contracts were not yet signed as of September 30, 1947, have also been delivered to Norway under special custody agreements.

**War Assets Administration foreign credits**

The Council in consultation with the War Assets Administration considered the credit terms that would be appropriate for sales of domestic surplus to foreign governments. The Council recommended that while the terms on such credits should, if practicable, conform to those granted by the War Assets Administration to domestic buyers, the War Assets Administration give consideration in its negotiations with foreign governments to credit terms conforming in general to those extended by the Export-Import Bank on reconstruction and development loans, except where the Surplus Property Act of 1944 may otherwise require. The Council also recommended that each request for credit, with preliminary credit terms discussed by the War Assets Administration, be reported to the Council for such action as may be required.

During the period under review, the War Assets Administration entered into credit agreements with the Government of Finland and the Government of the Philippines covering credits of a maximum of \$10,000,000 in each instance. As of September 30, 1947, a \$25,000,000 credit was being negotiated with the Kingdom of the Netherlands. In conformity with the recommendation of the Council the terms agreed upon in each case were 3 percent interest per annum with serial payments over a 15-year period, with, however, payment in full in 3 years on those items subject to statutory limitations (i. e., raw materials, consumer goods and small tools, hardware and nonassembled articles which may be used in the manufacture of more than one type of product). The Council also approved in principle the extension of credits by the War Assets Administration to domestic exporters to be secured by a guaranty by the appropriate governmental authority of the foreign country in which the goods are sold. The Council recommended that the amounts involved in such credit arrangements be charged, with the agreement of the country concerned, against the over-all amount specified in any War Assets Administration surplus property line of credit made available to a particular country.

In addition to the three contracts mentioned above, several foreign applications for credits for the purchase of United States domestic surplus property have been acted on by the Council but had not resulted in the negotiation of firm contracts by September 30, 1947.

## Other Council activities

The National Advisory Council approved consideration by the United States Treasury Department of a Mexican request for renewal of the United States-Mexican stabilization agreement. Accordingly, on May 13, 1947, a new stabilization agreement between the two countries was executed. Under the terms of this agreement the United States Stabilization Fund undertook for a period of 4 years commencing July 1, 1947, to purchase Mexican pesos, on request by the Mexican Government, to an amount equivalent to \$50,000,000 for the purpose of stabilizing the United States dollar-Mexican peso rate of exchange.

This agreement extended and enlarged the stabilization agreement of 1941 which had been twice extended for 2-year periods and which was scheduled to expire on June 30, 1947. It was pointed out that the stabilization agreement was consistent with the aims and purposes of the International Monetary Fund, of which both countries are members, and would in fact serve to supplement the efforts of that international organization to stabilize the rates of exchange between all the member countries.

Other requests for stabilization agreements were considered during the period under review but no new agreements were executed.

The President's Committee for Financing Foreign Trade, appointed on June 26, 1946, continued to advise and consult with the National Advisory Council on problems of foreign trade and international finance.

### III. ACTIVITIES OF THE COUNCIL FROM APRIL 1 TO SEPTEMBER 30, 1947, RELATING TO THE INTERNATIONAL MONETARY FUND AND THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

The National Advisory Council, in accordance with statutory authority, continued to coordinate the activities of the United States representatives of the Fund and Bank with those of other agencies of the Government by giving them advice and assistance in carrying out their duties. In this period the Fund and Bank made a number of important policy decisions and the United States participated fully in these matters.

#### United States subscriptions to the Fund and Bank

On May 23, 1947, the United States completed payment of the required 20 percent of its subscription to the International Bank. Total payments in cash to the Bank amounted to \$69,215,000. The amount of \$565,785,000 was paid in the form of noninterest-bearing, nonnegotiable notes, in accordance with the Articles of Agreement of the Bank and the Bretton Woods Agreements Act. The remaining 80 percent of the subscription to the Bank will not be called unless required to meet the Bank's obligations. The payment of the United States subscription to the Fund had been completed in February 1947. As of September 30, 1947, the International Bank had redeemed \$250,000,000 of the special notes of the United States that had been issued to it, leaving \$315,785,000 outstanding in the hands of the Bank. Of the special notes issued to the International Monetary Fund \$203,000,000 had been redeemed, leaving \$1,579,000,000 outstanding.

#### Second annual meeting of the Fund and Bank

The Boards of Governors of the Fund and Bank held their second annual meeting in London, September 11-17, 1947. The Secretary of the Treasury, John W. Snyder, as United States Governor of both institutions, and the Under Secretary of State for Economic Affairs, William L. Clayton, as Alternate Governor, attended. The Executive Directors also participated at these meetings. The advisers to the Governor included the United States Ambassador to the United Kingdom, the Chairman of the Board of Directors of the Export-Import Bank, the Chairman of the Securities and Exchange Commission, the President of the Federal Reserve Bank of New York, and representatives of the constituent agencies of the Council.

At these meetings the terms of the agreements between the Fund and the Bank and the United Nations were ratified by the Governors, the application of Finland for membership was approved, changes in quotas and capital subscriptions were approved, and various bylaws of the organizations were amended. The Boards of Governors received the annual reports of the two institutions, and the report

of the audit. At the closing session the Governor of China was elected as Chairman for the coming year, and the Governors of France, India, the United Kingdom, and the United States were elected as Vice Chairmen. It was decided to hold the third annual meeting in Washington in the month of September 1948.

#### Agreements of the Fund and Bank with the United Nations

Soon after the inception of the United Nations Organization, steps were taken to bring the Fund and the Bank into relationship with the United Nations, in accordance with the charter and the provisions of the Articles of Agreement, which provided for cooperative arrangements with other international organizations (Fund agreement, art. X; Bank agreement, art. V, sec. 8). Draft agreements were approved by the Economic and Social Council of the United Nations on August 16, 1947, and by the Executive Directors of the Bank and Fund on August 20, 1947. The agreements were ratified by the Boards of Governors on September 16-17, 1947, and by the General Assembly of the United Nations on November 15, 1947. The two agreements are identical except for one clause relating to the Bank's loans. They provide for reciprocal representation at meetings, exchange of information, coordination in the collection of statistical data, and consultation on problems of mutual interest. The agreements further provide that proposed budgets of the Fund and Bank will be submitted to the United Nations for information only. The Bank agreement contains the following special clause (art. IV, sec. 3):

"The United Nations recognizes that the action to be taken by the Bank on any loan is a matter to be determined by the independent exercise of the Bank's own judgment in accordance with the Bank's Articles of Agreement. The United Nations recognizes, therefore, that it would be sound policy to refrain from making recommendations to the Bank with respect to particular loans or with respect to terms or conditions of financing by the Bank. The Bank recognizes that the United Nations and its organs may appropriately make recommendations with respect to the technical aspects of reconstruction or development plans, programmes or projects."

#### Membership changes in the Fund and Bank

In the period under review, four countries were admitted to membership in the Fund and Bank: Syria, Lebanon, Australia, and Finland. The decision of the Fund and Bank to admit Syria and Lebanon had been taken at the first annual meeting, in September 1946. Membership was accepted by these countries on April 10 and April 14, 1947, respectively, in accordance with the conditions previously stipulated. Syria's quota in the Fund and subscription to the Bank were each \$6,500,000, while Lebanon's quota and subscription were each \$4,500,000. Australia had participated in the Bretton Woods Conference, but had not accepted membership in the Fund within the period permitted for the original signatories. Subsequently Australia applied for membership and the application was approved in May 1947 by the Boards of Governors without a meeting by a telegraphic vote in accordance with the bylaws of the Fund and Bank. Australia completed acceptance on August 5, 1947. Australia's quota in the Fund was \$200,000,000 and its subscription to the Bank was likewise \$200,000,000.

In the case of Finland, the Board of Executive Directors recommended admission to the Fund with a quota of \$38,000,000 and that admission to the Fund be made contingent upon application for stock of the Bank in an amount equal to the assigned quota. This recommendation was approved by the Boards of Governors at the London meeting. Membership is open to Finland until March 15, 1948.

On September 30, 1947, 45 countries were members of the Fund and Bank. The members with their quotas and capital subscriptions as of September 30, 1947, are listed in appendix D [omitted here].

#### Additional executive directors

In accordance with Resolution No. 10 of the Savannah Conference, Mr. Guido Carli of Italy was elected thirteenth Executive Director of the Fund in May 1947, and Mr. Constantino Bresciani-Turroni of Italy was elected thirteenth Executive Director of the Bank in August 1947. The Boards of Governors, at the London meetings, also provided for the election of a fourteenth director to represent the countries which will not have participated in elections prior to December 31, 1947. The additional directors will hold office until the second regular election in 1948.

## The Fund

*Par values.*—In July the Fund accepted a par value for Syria and Lebanon, which have a common currency, at 45.6313 cents for the Syro-Lebanese pound. The Fund also accepted a par value of 29.850746 cents for the Venezuelan bolivar, and 35.7143 cents for the Turkish lira.

*Quotas.*—At the second annual meeting in London the Governors agreed to increase the quota of Iran from \$25,000,000 to \$35,000,000, and of Egypt from \$45,000,000 to \$60,000,000, conditional upon proportional increases in their Bank subscriptions. The payment of the increased subscriptions had not been made as of September 30, 1947.

*Gold sales at premium prices.*—The Fund considered the problem arising from transactions in gold in various countries at prices above monetary parities. While in many instances, these transactions in gold took place illegally, in others they occurred in legal open markets or tolerated black markets. The Executive Directors of the Fund realized that exchange stability might be undermined "by continued and increasing external purchases and sales of gold at prices which directly or indirectly produce exchange transactions at depreciated rates." Since these transactions also involved a loss to monetary reserves when the gold moved into private hoards the Fund was of the opinion that such transactions were not conducive to the objectives for which the Fund had been established. The Fund accordingly issued a statement on June 18, 1947, deprecating international transactions in gold at premium prices and recommended that all of its members take effective action to prevent such transactions with other countries or with the nationals of other countries (appendix E). [Appendix E omitted here, see Appendix A, page 240.]

The Fund at this time also took action under article IV, section 2, of the Agreement which provides that—

"The Fund shall prescribe a margin above and below par value for transactions in gold by members, and no members shall buy gold at a price above par value plus the prescribed margin, or sell gold at a price below par value minus the prescribed margin."

The Executive Directors set this margin at one-fourth of 1 percent exclusive of minting and transport and transfer charges. The practice of the United States Treasury in gold transactions fully complies with these requirements.

The National Advisory Council fully agreed with the position taken by the Fund with regard to gold sales at premium prices. Accordingly, on July 18, 1947, the Secretary of the Treasury and the Board of Governors of the Federal Reserve System issued a joint statement requesting American banks, business enterprises, and individuals to refrain from encouraging and facilitating traffic in gold at premium prices (appendix F). [Appendix F omitted here, see Appendix B, page 241.] To implement the Fund's request and this joint statement of policy, the Treasury Department gave notice in the Federal Register of July 31, 1947, that it was considering amendments to the regulations issued under the Gold Reserve Act of 1934. After holding a public hearing, the Secretary of the Treasury issued a number of amendments to the regulations, which were approved by the President and became effective on November 24, 1947.

*Fund exchange transactions.*—The Fund's first exchange transaction occurred on May 8, 1947, when France purchased \$25,000,000 from the Fund in exchange for francs. Total sales of foreign exchange by the Fund to September 30, 1947, are summarized in the following table:

[In millions]

Country	Sales of—	
	United States dollars	Pounds sterling
France.....	100.0	.....
United Kingdom.....	60.0	.....
Mexico.....	22.5	.....
Netherlands.....	18.0	1.5
Chile.....	2.5	.....
Total.....	203.0	1.5

*Transitional exchange arrangements.*—Under article XIV, section 3, of the Fund Agreement, each member is required to notify the Fund whether the member intends to avail itself of the transitional arrangements provided in article XIV, section 2, or whether it is prepared to accept the obligations of article VIII, sections 2, 3, and 4 relating to convertibility and freedom of payments and transfers for current international transactions.

In response to the Fund's request as to whether they were willing to accept the obligations of article VIII, sections 2, 3, and 4, the following countries signified their willingness: El Salvador, Guatemala, Mexico, Panama, and the United States. All other countries which are members of the Fund have signified their intention of invoking the transitional period clauses of article XIV, section 2, permitting the retention of restrictions on international payments.

*Organizational changes.*—Mr. Harry D. White's resignation as the United States Executive Director on the Fund became effective on June 1, 1947. The National Advisory Council wishes here to record its appreciation of the valuable services rendered by Mr. White to the United States in the cause of international economic cooperation.

On June 12, 1947, with the advice and consent of the United States Senate, the President of the United States appointed Mr. Andrew N. Overby as United States Executive Director on the Fund. Mr. Overby took office on July 1, 1947.

### The Bank

In the period under review the International Bank made its first loans and also issued its first securities on the American market. Both the loans made and the securities issued involved complex questions of policy and law, to which the Council gave extended consideration.

*Loans.*—On May 9, 1947, the Bank granted a loan of \$250,000,000 to the Credit National, a quasi-public French corporation created in 1919, to assist in financing the reconstruction and development of the French economy. This loan is fully guaranteed by the Government of the French Republic. The loan is for 30 years, with amortization over a 25-year period beginning 1952. The amortization schedule is arranged so as to permit smaller payments of principal in the earlier years than in the later years, when some shorter-term credits previously received will have been fully repaid and the French balance of payments may be expected to provide the necessary repayment more easily. The rate of interest is  $3\frac{3}{4}$  percent plus a commission of 1 percent per annum which, in accordance with the Bank's Articles of Agreement, will be set aside in a special reserve fund. While the French Government had applied for a loan of \$500,000,000, the Bank considered it necessary to limit its commitment at the time though stating that it would be willing to consider an additional loan subsequently. The proceeds of the loan will be used to finance reconstruction in France, including the purchase of capital equipment and raw materials.

On August 7, 1947, the Bank also granted a loan of \$195,000,000 to the Kingdom of the Netherlands. The loan is for 25 years with amortization beginning in 1952. On this loan, also, the schedule of amortization payments provides for relatively larger repayment in the later years. The rate of interest is  $3\frac{3}{4}$  percent, plus the commission of 1 percent per annum, which is to be set aside as a special reserve against loss by the Bank. The loan proceeds are to be used exclusively for the reconstruction of productive facilities in metropolitan Netherlands. While the Netherlands Government had applied originally for a loan of \$535,000,000 to cover its reconstruction program for a 3-year period beginning in 1947, the Bank limited the loan to 1947 requirements. It will consider extending further credits in 1948 and 1949 in the light of the situation then prevailing.

The third loan was made in August to the Kingdom of Denmark. This loan of \$40,000,000 is for 25 years with amortization beginning in 1953, with increasing annual payments in the later years. This loan is also at  $3\frac{3}{4}$  percent with the additional 1 percent commission. The Danish loan will be expended for agricultural and textile machinery, machine tools, trucks, steel products, textiles, and chemicals. These supplies of materials and equipment will contribute greatly to the restoration of the Danish economy, whose greatest need is for materials of this type.

The Bank also extended a loan of \$10,000,000 in dollars and the equivalent of \$2,000,000 in Belgian francs in August to the Duchy of Luxembourg. This loan bears interest and commission at the same rate as the other loans of the Bank, and will run for 25 years, with amortization over a 23-year period beginning in

July 1949. This loan will be used for the purchase of locomotives, rolling stock, and railway equipment, and for the purchase of equipment for the steel industry. It should be noted that this is the first loan of the Bank providing, in part, funds in currencies other than dollars. The Belgian Government authorized the use of the equivalent of \$2,000,000 of the Belgian paid-in subscription for the purpose of this loan.

The Bank received loan applications from other members: Poland, Czechoslovakia, Iran, Mexico, and Chile. As of September 30, 1947, these requests for assistance were still under consideration by the Bank.

*Borrowing operations of the Bank.*—On June 30, 1947, the Bank filed a registration statement with the Securities and Exchange Commission and on July 15 made its first public offering of securities. This consisted of \$100,000,000 in 10-year 2½ percent bonds, due July 15, 1957, and \$150,000,000 in 25-year 3 percent bonds, due July 15, 1972. The issue, sold at par, was substantially oversubscribed. It is expected that further issues of the Bank's securities will be offered when the Bank needs additional funds.

Before these bonds could be placed on the market, a number of steps had to be taken to facilitate their sale and to assure conformity with the laws applicable thereto.

The National Advisory Council agreed to the issue of these securities in the United States market at the time, and also granted permission to the Bank to buy and sell its securities after issue in accordance with the Articles of Agreement. This permission was necessary since the Bank's Articles require the consent to such transactions of the government in whose markets its funds are raised. It was also agreed that dollar funds not currently needed by the Bank for other purposes might be held in the form of United States Government obligations. In order to assure that the Bank's transactions in these securities will not conflict with United States monetary and credit policies, the Bank is to consult with the Federal Reserve Bank of New York, as agent for the Federal Open Market Committee. The United States Treasury Department will also be kept fully informed.

The Bank also made a number of interpretations of, and decisions on, its Articles of Agreement at the request of the Executive Director for the United States in connection with the issue of the Bank's securities. The Bank held that if it is necessary to call part of the 80 percent of the member countries' subscriptions to the Bank in order to meet the Bank's obligations, the failure of any member to pay its share of a call does not excuse failure on the part of other members to make their payments. If the amount realized from a call is not sufficient to cover the Bank's obligations, successive calls may be made on the members, up to the limit of their subscriptions, until the aggregate paid in by them on the calls is sufficient to meet the Bank's obligations. Moreover, the Bank may make capital calls in anticipation of the maturity of its own obligations or to meet payments required as the result of a default on loans made, participated in, or guaranteed by the Bank. The Bank's Executive Directors also decided that article IV, section 2 (c), of the Agreement empowers the Bank, without restriction by members, to use currency paid to it as repayment of principal for the repurchase of the Bank's obligations, or to amortize or to anticipate amortization payments on the Bank's obligations.

Although the sale in the United States of the bonds of the International Bank remains subject to the Securities Acts, the Securities and Exchange Commission granted certain qualified exemptions which had been requested by the Bank with the support of the National Advisory Council. These exemptions relieved brokers and dealers from underwriters' liabilities under the Securities Act of 1933 in the distribution of the Bank's securities; from registering with the Commission as over-the-counter brokers and dealers under the Securities Exchange Act of 1934 in connection with this distribution; and from the provisions of the latter act relating to membership in "National Securities Associations." The Commission also permitted the trading of the Bank's bonds on a when-issued basis on the New York Stock Exchange so that the bonds automatically qualified for sale under the "blue sky laws" of a number of States. Finally the Commission concurred in the opinion of counsel for the Bank that an exemption was available under the Trust Indenture Act of 1939.

*Encouragement of private foreign lending by the Bank.*—During the period under review the National Advisory Council approved a proposal that the International Bank encourage private foreign lending by making stand-by commitments. The stand-by commitments would be assumed in connection with the offering in the

private capital market of obligations of foreign governments which are members of the Bank. Where the terms of such obligations would be more favorable to the borrower than those generally applicable to loans from the Bank, the Bank would not enter into such stand-by commitments for more than 50 percent of any issue. As of September 30, 1947, there were no foreign private loans issued in which the Bank made a stand-by commitment.

*Establishment of Advisory Council to Bank.*—Upon nomination by the President of the Bank, the Board of Governors at the London meeting approved the following members for the Bank's Advisory Council, organized in accordance with article V, section 6, of the Bank's Articles of Agreement:

Name	Nationality	Representation
Sir Arthur Salter.....	United Kingdom.....	Chairman.
Edward E. Brown.....	United States.....	Banking.
Herbert Hoover.....	do.....	Commerce.
R. Dickson Harkness.....	Canada.....	Industry.
Leon Jouhaux.....	France.....	Labor.
Pedro Beltran.....	Peru.....	Agriculture.
Sir C. V. Raman.....	India.....	Science.
Lionel Robbins.....	United Kingdom.....	Economist.
S. K. Alfred Sze.....	China.....	Other activities.

#### IV. THE EUROPEAN RECOVERY PROGRAM AND INTERIM AID

The end of the war found Europe in a state of destitution and the United States in a position of major importance in world affairs. The United States Government adopted measures designed to meet its new position. Goods under lend-lease and large quantities of surplus property were turned over to foreign countries on generous terms. The United States financed about 70 percent of the operations of UNRRA, which transferred large quantities of food, fuel, and industrial materials to devastated countries. Increased lending authority of the Export-Import Bank provided for the extension of rehabilitation loans. The special problems of the United Kingdom in the transitional postwar period resulted in the extension of a loan of \$3,750,000,000 in July 1946. The National Advisory Council, however, in surveying the postwar foreign financial assistance extended by the United States Government, in its report for the period ending March 31, 1947, stated:

"It has during the period under review become increasingly clear that such resources as remain available will not, by reason either of their amount or of the nature of developing needs abroad, prove adequate for the accomplishment of the purposes for which foreign financial assistance has been provided."

This conclusion was based on studies which indicated that substantial set-backs to European recovery had occurred, that existing commitments for financial assistance by the United States would soon be exhausted, and that the gold and dollar resources of western European countries were being rapidly depleted.

#### Set-backs to European recovery, 1946-47

The European countries, with the exception of Germany, made considerable progress toward recovery after the war. Transportation systems were rebuilt, industrial output was revived, and export markets were partly restored. Considerable progress in the restoration of productive resources was made during 1946. But the prolonged and severe winter of 1946-47, especially in Great Britain, the following drought, and the depletion of financial resources contributed to retard further recovery. It was evident that substantial progress could not take place without continued assistance from the United States and fundamental readjustments in European industry and trade.

After July 1, 1946, no new substantial commitments of United States aid to European countries were authorized. The existing commitments were largely drawn down by July 1, 1947. Total loans and credits made available to European countries from July 1, 1945, to June 30, 1947, amounted to slightly less than \$8,000,000,000, while total loans and credits utilized were approximately \$5,500,000,000. Of the approximately \$2,500,000,000 not utilized by July 1, 1947, \$1,300,000,000 was drawn by the United Kingdom by the end of August. (The data on total United States loans and credits available to Europe, July 1, 1945, to June 30, 1947, are given in appendix G.) [Appendix G omitted here.]

The depletion of gold and dollar resources, June 30, 1945, to June 30, 1947

In extending financial assistance to foreign countries, the United States Government had always given consideration to their capacity to pay for imports with their own gold and dollar resources. As a consequence, from July 1945 through June 1947 most of the European countries which took part in the Paris Conference liquidated part of their gold and dollar resources and tapped other sources as follows:

(In millions of dollars)	
Declines in gold reserves.....	1, 925
Declines in dollar balances.....	990
Liquidation of dollar securities.....	215
Short-term credits from United States commercial banks.....	140
Dollar purchases from International Monetary Fund.....	50
Total.....	3, 320

During the same period a few of the countries participating in the Paris Conference registered gains in their gold and dollar position which, in the aggregate, amounted to approximately \$1,000,000,000. However, the gains of these countries did not compensate for the losses suffered by the other participants.

Nearly half of the total of \$3,320,000,000 was accounted for by France, which during the 2-year period disposed of \$1,215,000,000 from her gold stocks, drew her dollar balances down by \$260,000,000, borrowed on short-term \$20,000,000 from United States commercial banks, and purchased \$50,000,000 from the Fund. With the gradual exhaustion of the funds made available by the United States, few countries have been able to avoid similar depletion. During the 5-month period July–November 1947, losses of gold and dollar balances on the part of countries participating in the European Recovery Program have been estimated at \$925,000,000 and their purchases of dollars from the Fund have totaled \$347,000,000. In addition, France, Netherlands, and Luxembourg drew \$267,000,000 on their loans from the International Bank for Reconstruction and Development between the beginning of June and the end of November 1947.

It was clear that it would be impossible for the western European countries to continue to draw on their gold and dollar balances at the rate prevailing during the summer of 1947. Only Portugal, Switzerland, and Turkey had holdings of gold and dollars in excess of estimated minimum needs for monetary reserves and foreign trade requirements. The other countries had insufficient reserves to cover their total monetary and trade requirements. The gold and dollar holdings of several of these countries were close to the estimated minimum levels of working balances needed for foreign trade purposes, without any allowance being made for reserves against domestic monetary circulation. (Detailed tables on gold and dollar assets of foreign countries are attached as appendix H.) [Appendix H omitted here.]

The rapid decline of the gold and dollar holdings of these countries which had followed shortly after the sharp contraction of United States financial assistance and had gathered momentum during the spring of 1947 forced them to impose increasingly drastic exchange and trade restrictions. As a result, the standard of living and the production level of industry declined. In particular, France and Italy during the summer and early fall of 1947 were forced to suspend their purchases of all but the most essential commodities, such as wheat and coal, with the result that there was danger that the pipe line of industrial materials would begin to run dry.

#### Policy developments, June to September 30, 1947

Secretary of State Marshall's speech at Harvard on June 5, 1947, may be considered as the starting point of the formal European Recovery Program. In this speech Secretary Marshall pointed out that—

"Europe's requirements for the next 3 or 4 years of foreign food and other essential products—principally from America—are so much greater than her present ability to pay that she must have substantial additional help, or face economic, social, and political deterioration of a very grave character."

Secretary Marshall pointed out that before the United States Government could proceed further in its efforts to assist Europe on the road to recovery there must be agreement among the countries of Europe as to their foreign requirements and the extent of self-help to be provided in order to give proper effect to

whatever assistance would be rendered by the United States. As a result of Secretary Marshall's statement of objectives, the Foreign Ministers of Great Britain and France arranged for a conference to which 16 European countries sent delegates. At this conference, the Committee of European Economic Cooperation was formed.

On September 22, 1947, the Committee of European Economic Cooperation completed and sent to the United States Government a report consisting of a general statement of the problems pertaining to European economic recovery, and outlined a plan of the 16 participating countries to meet these problems. An estimate of the external assistance which these countries believed necessary to restore their economic position was submitted along with a statement dealing in detail with the position and prospects of these countries and western Germany. Meanwhile, in June 1947, the President created three committees to study and report to him on the relationship between foreign aid and the United States domestic economy. Two governmental committees under the direction of the Secretary of the Interior and the Council of Economic Advisers undertook to conduct studies on the impact of foreign aid upon our national economy. The third committee, consisting of representatives from various fields of industry and finance under the chairmanship of the Secretary of Commerce, undertook to analyze the character and quality of United States resources available for foreign aid, to advise the President on the limits within which such aid might be safely and wisely planned, and to consider the relation between foreign aid and the domestic economy.

The necessity for interim financial assistance to France, Italy, and Austria prior to the inauguration of a full-scale European recovery program became apparent as a result of the drains upon their limited reserves of gold and dollars to finance import requirements. The crisis was intensified by very serious crop failures in France and Italy during 1947, the depletion of existing credits at a more rapid rate than had been previously anticipated, and the absence of assurance that additional long-term financial assistance would become available. By September 30, 1947, it had been generally agreed within the Government that interim aid to France, Italy, and Austria should receive consideration in advance of the long-range European Recovery Program.

The financial and monetary problems raised by the European Recovery Program have been under continuing study by the National Advisory Council and its constituent agencies. As of September 30, 1947, the National Advisory Council was giving detailed consideration to various points which had been raised by the Committee of European Economic Cooperation in connection with the long-range program.

## APPENDIX B

CORRESPONDENCE OF JULY 14-15, 1947, RELATING TO THE POSTPONEMENT IN CERTAIN CASES OF THE OBLIGATIONS UNDER SECTIONS 7, 8 (ii), AND 10 OF THE ANGLO-AMERICAN FINANCIAL AGREEMENT

JULY 14, 1947.

Rt. Hon. HUGH DALTON,  
*Chancellor of the Exchequer,  
Treasury Chambers, London, England.*

MY DEAR CHANCELLOR: As a result of recent consultations between representatives of your Government and representatives of the United States Government and in accordance with the request of your Government, the United States Government has agreed to the postponement until September 15, 1947, if necessary, of the obligations of your Government under the Anglo-American Financial Agreement in the case of Austria, Bulgaria, China, Denmark, France, Greece, Hungary, Paraguay, Poland, Rumania, Siam, Turkey, the Union of Soviet Socialist Republics, and Yugoslavia, with the understanding that upon the date of completion of necessary arrangements with these countries, all sterling accruing to them after July 15, 1947, will become freely available for current payments in accordance with the Anglo-American Financial Agreement.

It is my understanding that with the exception of the temporary extensions to which the United States Government has agreed in the case of the countries mentioned in the preceding paragraph, the British Government will carry out fully its obligations under sections 7, 8 (ii), and 10 of the Anglo-American Financial Agreement. I should appreciate your Government's confirmation of this understanding.

Sincerely yours,

JOHN W. SNYDER,  
*Secretary of the Treasury.*

JULY 15TH, 1947.

Hon. JOHN W. SNYDER,  
*Secretary of the Treasury, Washington, D. C.*

DEAR MR. SECRETARY: Thank you for your letter of July 14, 1947, regarding the execution of the Anglo-United States Financial Agreement, dated December 6, 1945.

In reply I confirm your understanding that, with the exception of the temporary extensions to which the United States Government has agreed in the case of the countries mentioned in the first paragraph of your letter, the British Government is fully carrying out its obligations under sections 7, 8 (ii), and 10 of the Anglo-American Financial Agreement.

Yours sincerely,

HUGH DALTON.

**Exhibit 19.—First special report of the National Advisory Council on the operations and policies of the International Monetary Fund and the International Bank for Reconstruction and Development**

[House Document No. 656, 80th Congress, 2d session]

**LETTER OF TRANSMITTAL**

*To the Congress of the United States:*

In accordance with section 4 (b) (6) of the Bretton Woods Agreements Act, there is transmitted herewith the first special report on the operations and policies of the International Monetary Fund and the International Bank for Reconstruction and Development, covering the first 2 years of operations of these institutions.

HARRY S. TRUMAN.

THE WHITE HOUSE, May 17, 1948.

SPECIAL REPORT OF THE NATIONAL ADVISORY COUNCIL OF INTERNATIONAL  
MONETARY AND FINANCIAL PROBLEMS ON THE OPERATIONS AND POLICIES OF  
THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT AND  
THE INTERNATIONAL MONETARY FUND

CHAPTER I. INTRODUCTION

The International Monetary Fund and the International Bank for Reconstruction and Development began operations in the spring of 1946. The major part of their transactions, however, began in 1947. The postwar international situation, as it has developed, has been quite different from that which had been anticipated when the institutions were projected at the Bretton Woods Conference in 1944. The postwar period has been characterized by economic and trade dislocation of an unprecedented order, and monetary and financial conditions have been scarcely conducive to the most effective operation of the Bank and the Fund.

The war left enormous areas of destruction in Europe and Asia. The parts of the economy which had not been destroyed were sadly run down during the war. Stocks of raw materials and fuel were exhausted. The whole delicate organization of production and trade within countries and of the interchange of goods between countries was dislocated.

While Europe and Asia suffered heavy damage, many countries in other parts of the world greatly increased their productive capacity during the war. Production in the United States, for example, rose in 1946 to 165 percent of the 1935-39 average and to 176 percent in 1947.

Although some countries increased their productive capacity, their resources had been diverted to production for war, and the end of the war left these countries with large unfulfilled needs for consumer goods and for repairs and replacements to consumer goods industry. The rapid shift in world productive capacity resulting from the war and the process of reconversion to peace production all over the world set up new stresses and strains. Inevitably, time was required for the structure of world trade and finance to become adjusted to the needed shifts in production.

Recovery in production was rapid in the war-torn countries, due in large part to the provision of rehabilitation supplies through UNRRA and the initial United States postwar assistance, but this proved to be insufficient to bring about world recovery in the short period since the end of the war. With help needed for reconstruction and readjustments all over the world, the resources available were insufficient to complete the job in a few years. Foodstuffs were in short supply in Europe, and in parts of Asia as well, thus putting an unprecedented drain on Western Hemisphere production and raising food prices throughout the world. The scarcity of equipment from Europe and the United States impeded increases in production in Latin America of products for Europe. The disruption of the usual trade channels contributed to scarcities of materials formerly supplied by some foreign areas to others, so that the demands on the American economy increased.

Rising prices also contributed to the severity of the dollar crisis which appeared in 1947. Wholesale prices in the United States had almost doubled between 1939 and 1947, with the most rapid increases occurring after 1945. Consequently the cost of obtaining supplies in the United States in the postwar period rose correspondingly. Inflation in some other countries has been more serious in distorting production and retarding recovery. Conspicuous illustrations are Hungary, Greece, China, Italy, and France. In the countries of the British Commonwealth of Nations, on the other hand, prices have generally remained at levels comparable to those in the United States. In Latin America, even though the countries had not suffered war damage and had experienced considerable increases in production during the war, price rises also were significant. Changes in relative prices contributed significantly to the disorganization of the normal trade relations of the world.

Most countries have found it necessary or desirable to impose fairly rigid controls over foreign exchange movements, partly to prevent the flight of capital and partly to assure that the limited supplies of foreign exchange available would be used for the purchase of commodities deemed most essential to the national economy. As a result of such controls, which were almost inevitable in this situation, the currencies of the world have generally not been convertible into gold or dollars. Currency inconvertibility, particularly of sterling except for a

short period, has had serious consequences for the world economy in strengthening the trend toward bilaterally balanced trade. Hence bilateral payments and clearing agreements and special bilateral trade agreements assumed a dominant role in world trade. While these agreements permitted the resumption of trade, the mutual credits provided under the agreements have not been adequate to permit an expanding volume of trade. Moreover the trade which has taken place has not been as mutually advantageous as it would have been had trade been governed purely by economic considerations.

Postwar conditions in Europe and Asia thus served to accentuate the balance of payments problem of other countries with respect to the United States. Relatively greater need for dollars, in proportion to the dollars available, existed than before the war. The United States has for many years exported more than it has imported. In the prewar period the difference was made up in part by excess payments from the United States to other countries for shipping services, tourist expenditures, remittances, and so on, while prior to the great depression of the thirties there had been a considerable flow of capital from the United States to other countries. During the war the shortage of many types of goods entering international trade and the existence of lend-lease obscured some of the underlying balance-of-payments difficulties which became more apparent after the war. In 1946 foreign countries received 15.3 billion dollars in goods and services from the United States, while they earned only 7.1 billion dollars from the sale of goods and services to this country. In 1947 our surplus on current international account reached 11.3 billion dollars, with total exports of goods and services amounting to 19.6 billion dollars.

The postwar current account deficit of foreign countries was in part covered by the reduction of their dollar balances and the sale of gold to the United States, to the amount of 5.3 billion dollars between June 30, 1945, and December 31, 1947. The remainder of the deficit was covered by loans and credits extended by United States agencies, United States contributions to UNRRA, the provision of supplies by United States agencies in occupied areas and elsewhere, liquidation of foreign investments in the United States, private investments abroad, remittances, and, to some extent, by the operations of the Fund and Bank. Of the total loans, credits, and grants extended by the United States, foreign countries utilized 14.6 billion dollars during this period, and on December 31, 1947, the unutilized balances amounted to 3.6 billion dollars.

In terms of the dollar aid extended to foreign countries, the operations of the International Bank and the International Monetary Fund appear relatively small. The total purchases of dollars from the Fund amounted to \$600,000,000 (as of April 30, 1948), and the loans extended by the International Bank, to \$513,000,000. The importance of these institutions, however, is not to be measured in terms of the dollars made available but rather in their significance as organizations for international cooperation. The International Monetary Fund, as shown in the third chapter, has contributed significantly to the formulation and adoption of desirable exchange policies, while the Bank has begun lending operations which it is hoped will assume far greater importance for the development of the world economy in future years.

The people and the Congress of the United States have fully recognized the need for American assistance to foreign countries at this time. In addition to the grants, loans, and credits previously authorized, the Congress has authorized additional expenditure of 5.3 billion dollars for the recovery of Europe. This aid will be given partly in the form of grants and partly in the form of loans, depending upon the estimated ability of the recipient countries to repay in the future. Congress has also voted aid to China and made additional appropriations for special aid programs in Greece, Turkey, and Trieste and the occupied areas. The President has also requested Congress to increase the lending capacity of the Export-Import Bank of Washington by \$500,000,000. This would enable the Export-Import Bank to give greater assistance in the development of Latin-American countries. These measures of special United States assistance are not intended to supersede the activities of the International Monetary Fund and the International Bank, which will continue to operate along the lines originally laid down.

#### CHAPTER II. INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

The International Bank for Reconstruction and Development is an institution designed to promote mutual assistance among the member countries in the reconstruction and development of their territories, the long-range growth of

international trade, and the maintenance of equilibrium in the balances of payments of members, by making loans and encouraging private foreign investment. The Bank and the International Monetary Fund at present have 46 member countries, of which 40 participated in the Bretton Woods Conference. Four countries represented at Bretton Woods (Haiti, Liberia, New Zealand, and the Soviet Union) have not become members of the Fund and the Bank.

### I. Capitalization

The subscribed capital of the Bank was \$8,263,100,000 as of April 30, 1948, of which the United States share is \$3,175,000,000 or 38.4 percent. Subscribed capital is divided into three parts: (1) 2 percent, or \$165,262,000, paid in gold or dollars (of this amount, the payment of \$4,915,000 by formerly enemy-occupied countries was postponed until 1951, in accordance with the Articles of Agreement); (2) 18 percent, or \$1,487,358,000, paid in the local currency of the member country; and (3) 80 percent, or \$6,610,480,000, not paid in, and not available for use in the lending operations of the Bank, but in the nature of a guaranty fund, subject to call and use only if required to meet the Bank's obligations. Of the \$1,647,705,000 paid-in capital, \$731,847,000 represents gold or United States dollars, \$635,000,000 provided by the United States, and the remainder by means of the 2 percent capital subscriptions of other members.

Under the Articles of Agreement, the Bank's operations may be financed in three ways:

#### (a) FROM THE BANK'S OWN FUNDS

The Bank may make direct loans out of the receipts of the 20 percent capital stock subscribed for this purpose. This has been the principal source of its loanable funds to date. Of the 20 percent, the original 2 percent paid in gold or dollars by all members may be freely used by the Bank for any purpose. The remaining 18 percent, however, may not be loaned or exchanged for other currencies without the consent of the member whose currency is used. Under the Bretton Woods Agreements Act, the National Advisory Council has the duty of determining whether to give or withhold such consent on behalf of the United States, and on April 10, 1947, the Council agreed to permit the Bank to utilize this 18 percent of the United States capital subscription. Through April 30, 1948, Belgium is the only other member which has consented to loan or exchange its currency, and such consent is limited to the equivalent of \$2,000,000 of Belgian francs. There have not been any requests for loans in other currencies.

#### (b) LOANS FROM BORROWED FUNDS

Although the Bank's paid-in capital is the equivalent of over a billion and one-half dollars, more than half of this amount consists of currencies other than the dollar. During the past two years the only significant demand has been for loans in dollars, and, for this reason, the Bank has entered the United States private investment market to secure additional loanable dollars. Furthermore, there are few countries other than the United States that are at present in a position to export capital; i. e., export their products without having to obtain other goods in exchange to meet their current needs. In most of the European nations, the physical disruption caused by World War II was enormous, and adequate recovery will require the full use and retention of all available production for a number of years. Under such circumstances, few of these countries are expected soon to be in a position to produce and export larger amounts of goods and services than they themselves require for domestic reconstruction and development. At least for the present, therefore, the United States will remain the principal source of funds for capital export, including capital exports financed by the Bank.

#### (c) GUARANTEED LOANS

In addition to its power to make loans from subscribed capital or from borrowed funds, the Bank is also authorized, under the Articles of Agreement, to guarantee foreign loans made by private investors. The Bank's international character and financial strength place it in a position where it may assume this role of guarantor of a part of new foreign private investment. Through April 30, 1948, no loans had been guaranteed by the Bank.

## II. The Bank's loan policy

According to its charter, the Bank's loans may not be granted for relief or for political purposes; they must be for either reconstruction or development and must show reasonable prospects of repayment. The project or program to be financed must be recommended, after study of the proposal, by a competent committee appointed by the Bank, and the borrower must be unable to obtain the loan elsewhere under conditions considered by the Bank to be reasonable. When a loan made or guaranteed by the Bank is not made directly to a member government, it must be fully guaranteed either by the member government or by its central bank, or some comparable agency of the member government which is acceptable to the Bank.

The Bank's first emphasis has been on reconstruction, because in that field not only is there great urgency but also great opportunity for rapid improvement in productivity, and, with it, improvement in world trade among all the members of the Bank. Except in the case of Chile, all loans to date have been for reconstruction of countries suffering direct damage from World War II. The Chilean loan is a developmental loan, and was made specifically to provide foreign exchange for the purchase of equipment and supplies which are required for the development of electric power, water facilities, and agricultural resources.

Through April 30, 1948, the Bank had made five loans amounting to \$513,000,000, against which disbursements to March 31, 1948, totaled \$402,813,713:

*Status of loans as of Mar. 31, 1948*

[Expressed in United States dollars]

Borrower	Loan commitment	Disbursement	Unused balance of commitment
Credit National (France).....	\$250,000,000	\$250,000,000	-----
Kingdom of the Netherlands.....	195,000,000	138,459,092	\$56,540,908
Kingdom of Denmark.....	40,000,000	7,322,104	32,677,896
Republic of Chile.....	16,000,000	-----	16,000,000
Grand Duchy of Luxembourg.....	12,000,000	7,032,517	4,967,483
Total.....	513,000,000	402,813,713	110,186,287

All of the Bank's loans have been made since May 9, 1947, and all have been in dollars, with the exception of \$2,000,000 worth of Belgian francs made available out of its subscribed capital by Belgium to cover the purchase of railroad equipment by Luxembourg.

The Council, as directed by the Bretton Woods Agreements Act, has kept closely in contact with all of the policy activities of the Bank. Prior to the granting of each loan, the Council was consulted by the United States Executive Director on the policy to be followed. Careful consideration was given to the amount of the loan, with particular regard to its appropriateness for achieving the desired purposes. The Council also considered the borrower's prospects for economic recovery and development and the prospects of the loan's contributing to a broader revival of world productivity and trade, as well as possible alternative sources of financing and the potential requests of other member countries.

The United States Executive Director has consulted the Council about the Bank's policies on interest and commission charges. The interest rate charged by the Bank has been such as to enable the Bank to meet the cost of borrowing and still leave a sufficient margin to cover operating expenses and to build up appropriate reserves. A commitment fee has been charged from the date on which the Bank undertakes a firm commitment up to the time of disbursement. The Articles of Agreement stipulate that during the first 10 years of the Bank's operations the commission rates on loans made from borrowed funds shall not be less than 1 percent and not greater than 1½ percent per annum. This commission, which has been fixed at 1 percent, is to be set aside in a special reserve to meet the obligations of the Bank in the event of default on its loans.

The Council believes that the Bank has adhered to the terms of its charter in making loans to date. The statement of purposes prescribes that the Bank shall—

"arrange the loans made or guaranteed by it in relation to international loans through other channels so that the more useful and urgent projects, large and small alike, will be dealt with first."

Through April 30, 1948, the largest part of the Bank's loans has been for reconstruction rather than development purposes. However, much greater emphasis is expected on the developmental phase of its operations in the coming months.

Coordination of lending policy between the Export-Import Bank and the United States representatives on the International Bank will continue through the Council, and will be guided by the particular circumstances in each case. Frequent consultations between officials of the two Banks will continue as in the past. In general, long-term development projects are referred to the International Bank in the first instance. The Export-Import Bank makes loans which have a special and important United States interest, for example, because the project is designed to open up an additional supply of essential imports into the United States, or because it requires United States equipment and services of kinds which it is especially desirable to export. Such interest may also exist because the project is being sponsored and financed in part by private United States interests, or because it covers a field in which the Export-Import Bank already has participated financially, or because the applicant country is not yet a member of the International Bank.

#### THE BANK AND THE EUROPEAN RECOVERY PROGRAM

The Bank has a definite role in the European Recovery Program, but it can be expected to carry only a small part of the total burden. Conservative estimates of the requirements of the war-torn nations now indicate that their needs will aggregate many billions of dollars, far exceeding the total that the Bank is in a position to borrow in the American private capital market. The Bank may be expected to finance some of the dollar capital requirements of the European countries, particularly where they require permanent additions to their equipment. It does not seem likely, however, that it will be in a position to assume the risks involved for more than a small portion of that part of the program which will be placed on a loan basis. To the extent that the program satisfies the needs of the participating countries for foreign exchange with which to purchase foods, feedstuffs, clothing, fuel, and raw materials, it will improve their balance of payments positions and make it easier for the Bank to negotiate long-term loans with such countries, which, in turn, will assist in the successful outcome of the European Recovery Program.

### III. Flotation of Bank securities

As previously noted, the Bank's primary source of loanable funds is to be the private investment market. In this respect, the Bank has been termed "a bridge" between government and private financing in the international banking field. During the winter of 1946-47, the United States Executive Director on the Bank discussed with the Council various problems connected with the flotation of the Bank's securities in the United States. The Council advised the United States Executive Director that this Government approved the Bank's selling an initial issue of securities in this market and subsequently gave its formal consent to the sale of these securities in accordance with article IV, section 1, of the Bank's charter, and section 4 (b) (4) of the Bretton Woods Agreements Act. Accordingly, the first public offering of International Bank bonds appeared on July 15, 1947. It consisted of \$100,000,000 10-year 2½ percent bonds due July 15, 1957, and \$150,000,000 25-year 3 percent bonds due July 15, 1972. Both issues were favorably received.

Since the long-term success of the Bank is contingent upon its ability to obtain private loanable funds, the Council has assisted the Bank in its efforts to secure the widest possible distribution of its securities. In this connection, the Comptroller of the Currency issued a statement that International Bank debentures were qualified for purchase by national banks up to the legal limit of 10 percent of their capital and surplus. Although the Council has given its consent to the Bank's buying and reselling its own bonds in the United States for market stabilization purposes, to date the Bank has not supported the market price of its securities.

As the economies of the war-torn nations tend to revive, the risk factor on loans to many potential borrowers will decline. Under such conditions, the Bank would be in a better position than at the present time to expand its loan portfolio. As stated in the Articles of Agreement, investors in the Bank's securities have, as a guaranty, in addition to the assets in the Bank's portfolio, the obligations of the member governments on the 80-percent uncalled portion of their capital subscriptions, of which \$2,540,000,000 is a commitment of the United States Government.

As of April 30, 1948, the Bank's obligations aggregated only \$250,000,000. As the investing community becomes more familiar with the Bank's securities, the Council believes that the Bank will be in a position to borrow larger amounts in the United States market and thus to make further loans of such sizes and types as private investors are unable or unwilling to undertake.

#### IV. Fiscal operations

As of March 31, 1948, the Bank had an accumulated net profit of \$1,200,000 from operations in addition to having \$2,000,000 in its special reserve (as provided in the Articles of Agreement) to meet possible losses. At the end of September 1947, the organizational expenses of the Bank, plus those entailed in the flotation of its securities, had resulted in a deficit of about \$2,000,000. Since that time the income from the Bank's loans and other investments has been more than sufficient to wipe out this deficit.

#### V. Conclusion and recommendations

In the drafting of the Bretton Woods Agreements almost four years ago, it was impossible to foretell with any degree of accuracy the extent to which the economies of the nations of the world would be disrupted at the conclusion of World War II and in the immediate postwar period. The unfavorable postwar situation abroad, both politically and economically, has made the problem of finding suitable investments very difficult and has done much to curtail the Bank's activities. Severe war destruction, followed by postwar inflation, has made it imperative that most nations of the world use all of their available resources for reconstruction and development at home. Few countries, other than the United States, are in any position to export capital to satisfy the needs of the rest of the world. As a consequence, the Bank must look to the United States as the prime supplier of loanable funds.

Since the Bank's resources are limited in relation to the demands made upon it, first consideration to date has been given to the most urgent needs, such as the elimination of bottlenecks and the restoration and expansion of productive facilities that will contribute most effectively to the healthy revival of the world economy. As economic conditions in foreign nations are raised from their wartime and postwar levels, the Bank may be expected to assume a greater role in international finance. When the most urgent needs of foreign countries have been met, and sound currency and fiscal policies adopted, many requests for loans for the development of economic resources may be expected. Throughout the world much of the wartime destruction and deterioration has yet to be made good. After completion of reconstruction, large sums will be required for capital improvements and expansion, principally in industry, agriculture, transportation, mining, hydroelectric, and harbor projects. The gradual revival of commerce and world trade should do much to alleviate the present hesitancy of American investors to engage materially in large-scale overseas enterprises and should also permit the Bank to borrow loanable funds in other markets.

The Council does not, at this time, propose any changes in the Bank's capital structure or amendments to the Articles of Agreement. It has recommended the amendment of the Securities Act of 1933 and the Securities Exchange Act of 1934 so as to exempt International Bank securities from those acts, and the amendment of section 5136 of the Revised Statutes to permit dealing in these securities by member banks of the Federal Reserve System (subject to existing limitations on the total amount of securities of any one obligor that a member bank may hold at any one time). The Council has also recommended that the Congress enact legislation which would permit insurance companies organized in the District of Columbia to invest in the Bank's securities. This would follow legislation already enacted by many State legislatures with respect to insurance companies and savings institutions. The Council believes that these measures are justified, in view of the nature of the Bank, and the need for broadening the market for its securities.

Future activities of the Bank will depend, to a considerable extent, on economic and political developments throughout the world, as well as on the speed with which reconstruction can be carried out and economic stability established in the war-torn countries. With a general improvement in economic conditions abroad, it is to be hoped that trade barriers will decline and that a freer flow of international capital will occur into the most economic markets. The Bank, in the opinion of the Council, will have an increasingly important role in this future development and expansion of the international capital markets.

## CHAPTER III. THE INTERNATIONAL MONETARY FUND

The International Monetary Fund was established by international agreement to promote monetary cooperation and to facilitate the expansion of world trade by the promotion of exchange stability and the maintenance of orderly exchange arrangements. The Fund provides a continuing organization for consultation with and among the members on the problems of international payments and related questions of foreign exchange practices and policies. As a specialized agency concerned primarily with balances of payments, foreign exchange questions, and the monetary policies of its members, the Fund cooperates with the International Bank for Reconstruction and Development and other international organizations in the economic field in matters of mutual interest. It shares with these other organizations the common objective of the improvement of economic conditions throughout the world, particularly through the attainment of a high level of international trade and investment.

The Fund's resources are available to assist members in carrying out policies in conformity with the Fund's objectives, i. e., to provide financial assistance to overcome temporary disequilibria in their balances of payments and so to help them to avoid policies restrictive of trade or detrimental to the welfare of the international economy as a whole. The Fund's currency operations are limited in general by the Articles of Agreement—

“to transactions for the purpose of supplying a member, on the initiative of such member, with the currency of another member in exchange for gold or for the currency of the member desiring to make the purchase.”

These currency transactions are for the purpose of giving temporary assistance in financing balance-of-payments deficits on current account for monetary stabilization operations. The Fund is not designed to make long-term loans. Currencies acquired by the Fund from member countries are to be repurchased by them with convertible currencies or gold, within a reasonable period of time.

#### I. Par values and exchange stability

##### (a) PROVISIONS OF THE FUND ARTICLES

One of the primary objectives of the Fund is “to promote exchange stability, to maintain orderly exchange arrangements among members, and to avoid competitive exchange depreciation.” Exchange stability implies that the market prices of foreign exchange do not fluctuate except within a narrow range. Accordingly, the Fund Agreement provides that each member currency shall have a par expressed in terms of gold or United States dollars of the weight and fineness in effect on July 1, 1944, and that the minimum or maximum rates of exchange between currencies may not differ more than 1 percent above or below the par value in the case of spot transactions. A larger margin may be established by the Fund for other exchange transactions. The members agree to collaborate with the Fund in promoting exchange stability, to maintain orderly exchange arrangements with other members, and to avoid competitive exchange alterations. A member country, such as the United States, whose monetary authorities in fact freely buy and sell gold for the settlement of international transactions within the limits prescribed by the Fund, is deemed to be fulfilling its obligations with respect to the maintenance of exchange stability.

The Fund Articles recognize that par values once established need not be permanent and so provide a mechanism for orderly change in the par values by agreement with the Fund. Proposals to change par values must be initiated by the member and may be made only after consultation with the Fund. The Fund may not raise an objection to a proposed change in par value if the change, when taken in conjunction with previous alterations, does not exceed 10 percent of the initial par value agreed with the Fund. If a member proposes a change which does not exceed 20 percent of the initial par, the Fund may concur or object but is required to give its decision within 72 hours, if the member so requests. For larger changes the Fund may accept or reject the proposal but is entitled to have a longer period for consideration. These provisions do not apply in case the Fund proposes a uniform change in the par values of all currencies. Moreover, the Fund is required to concur in a proposed change “if it is satisfied that the change is necessary to correct a fundamental disequilibrium.” If a member, despite the objection of the Fund, changes its par value, it becomes ineligible to use the resources of the

Fund unless the Fund determines otherwise; and if, after a reasonable period, the Fund and the member cannot agree on the par value, the member may be required to withdraw from the Fund.

(b) THE DETERMINATION OF INITIAL PAR VALUES

In accordance with the Articles, the Fund on September 12, 1946, announced that it would "shortly be in a position to begin exchange transactions" and requested each member to communicate the par value of its currency based on the rates of exchange prevailing on October 28, 1945; i. e., the sixtieth day before the entry into force of the agreement. The par values communicated were to be accepted for the purposes of the Fund, unless the member notified the Fund that it regarded the par as unsatisfactory or unless the Fund notified the member that in its opinion the par value could not be maintained without "recourse to the Fund on the part of that member or others on a scale prejudicial to the Fund and to members." Acceptance by the Fund of a par value is a condition for making the member eligible to draw upon the Fund's resources. In the case of countries which had been occupied by the enemy, the member could postpone the declaration of a par value.

Most of the members communicated their current par values under this clause and requested the Fund to agree to them for the purposes of the Fund Agreement. Canada and France, however, had changed their par values in the period between October 28, 1945, and September 12, 1946, and accordingly requested acceptance of their new par values.

The Fund on December 18, 1946, accepted the parities proposed by 32 members and announced that exchange transactions would begin on March 1, 1947. The determination of par values was postponed in nine cases, Brazil, China, Dominican Republic, Greece, Poland, Uruguay, Yugoslavia, France in respect of French Indochina, and the Netherlands in respect of the Netherlands Indies. Subsequently par values were agreed for the Dominican Republic, and for Venezuela, Turkey, Syria, Lebanon, and Australia, which were not yet members at the time the initial parities were established. Par values have not yet been agreed with the Fund (as of May 1, 1948) for Brazil, China, Finland, Greece, Italy, Poland, Uruguay, Yugoslavia, French Indochina, and the Netherlands Indies.

It was recognized by both the Fund and the member countries that the acceptance of par values was tentative and that some of the rates would need modification in time. The Executive Directors in their first annual report issued in September 1946 had stated that—

"In some cases the initial par values that are to be established may later be found incompatible with the maintenance of a balanced international payments position at a high level of domestic economic activity \* \* \*. When this occurs, the Fund will be faced with new problems of adjustment and will have to recognize the unusual circumstances under which the initial par values were determined. It is just at such times that the Fund can be most useful in seeing that necessary exchange adjustments are made in an orderly manner and competitive exchange depreciation is avoided."

The Fund realized that the rates of exchange prevailing at the close of 1946 were in some instances out of line with relative wage and price levels in the various member countries. Limited production in the postwar period, and the great need for imports which the member countries could not finance without external assistance, would make it almost impossible to bring about equilibrium in the balance of payments of the members by mere changes in the parities of their currencies. Moreover, devaluation of currencies at that time might have accentuated existing inflationary forces and so tended to add to the instability of the situation. Accordingly, the Fund properly felt that—

"the major significance of the present step is not in the particular rates of exchange which are announced, but in the fact that the participating nations have now fully established a regime wherein they are pledged to promote exchange stability, to make no changes in the par value of their currencies except in accordance with the Fund Agreement, and to assist each other in attaining the general objectives of the Fund."

The National Advisory Council had given careful attention to the problem of the initial parities before the Fund's action was taken. The Council was in agreement with the position taken by the Fund, since it too recognized that any action taken at the time could be only tentative, and that the time was not ripe

for bringing about some of the adjustments in the exchange rates which would ultimately be required if the member countries were to carry on their international trade without considerable external assistance.

The Council has the exchange rate policy of the Fund and the members under continual study, and it believes that some adjustments in exchange rates may have to be made in the near future. Any action in Europe must, however, be related to the provision of American assistance under the European Recovery Program and in all instances must also be related to the steps taken toward the internal stabilization of the economic and financial situations of the member countries. The adjustment of exchange rates cannot be made simultaneously for all countries, since they will attain the requisite degree of internal stability at different periods and their balances of payments will more closely approach equilibrium at varying times, depending upon the circumstances affecting the trade of the various countries with the rest of the world. The Council is of the opinion that the Fund provides a most satisfactory means of dealing with this problem in conjunction with the European Recovery Program, and it has outlined to the Congress a proposal for utilizing the Fund's mechanism for this purpose. Under this proposal, whenever the Council believes that a country's exchange rate is imposing an unjustifiable burden on its balance of payments, the United States Government would, after discussion with the Government of the country concerned, require that country (if a member of the Fund) to raise the problem with the Fund and to use the Fund's procedures for making an orderly adjustment.

#### (c) MODIFICATIONS OF EXCHANGE RATES

Difficult problems have arisen in connection with the exchange rates of several member countries. At the time that Italy was admitted to the Fund (March 1947), Italy had a system of multiple fluctuating exchange rates whereby exporters to certain areas were required to sell half of their foreign exchange receipts at an official rate and might sell the other half on the open market. Importers of some goods purchased their exchange at the free market rates, which were considerably higher than the official rate, and importers of other goods purchased their exchange at the official rate. Considering the Italian economic situation, the Fund approved the request of Italy to defer agreement on a par value for the lira. In November 1947 Italy proposed a modification of its exchange system which reduced the number of effective rates, almost eliminated the spread between import and export rates, and brought many cross rates into line with the official rates. The Fund believed that this new system eliminated some of the objectionable features of the Italian system and was a step in the right direction. Although the Fund recognized as a general principle that any system of fluctuating exchange rates is not in accord with the long-run objectives of the Fund, it also recognized that extraordinary measures might be required to meet temporary situations. The Fund accepted the Italian Government's assurance that it would work in the direction of fixed and stable exchange rates and that the fluctuating rate system was merely a temporary expedient to be used until such time as the internal situation of Italy and its balance of payments would make possible the establishment of a rate consonant with the Fund's objectives.

In January 1948 the French Government proposed to modify its exchange system to include multiple rates and to change the par value of the franc, which had been agreed with the Fund. The official par was to be changed from approximately 119 to 214 francs to the dollar. The exchange rates for currencies other than the dollar and other convertible currencies were to be based on the official cross rate with the dollar, although dollar transactions would take place largely at a "free market" rate. French exporters receiving dollars or other convertible currencies would be permitted to sell half of the proceeds on a "free market," while the other half would be sold at the official rate. The free market would also receive the exchange from invisible transactions. While certain commodities could be imported at the official rate of exchange, particularly certain prime necessities, other items could be imported only by securing exchange on the free market. Purchase of exchange, however, was restricted to licensed transactions, so that the French authorities still retained considerable control over the operations in the free market.

The French Government presented its proposal to the Fund and engaged in full consultation with it. The Fund fully agreed that a change in the rate of the franc was desirable and was prepared to concur in a devaluation of the franc to a realistic rate which would be applicable to all member currencies. It decided,

however, that it could not accept the exchange system proposed by France. While the Fund recognized the special difficulties of France, it was unable to agree to a system which involved the inclusion in a market—

“with fluctuating rates of any part of the proceeds of exports, as in its judgment this entailed the risk of serious adverse effects on other members of the Fund, without being necessary to achieve the trade objectives sought by the French authorities.

“The Fund felt that there would be scope for competitive depreciation in the application by one country of a fluctuating rate on exports to one area while other rates remained stable and other countries maintained the parities agreed by the Fund. Such a system, operating in an important trading country, would encourage trade distortions and might cast unwarranted doubt on the real strength of many currencies through the apparent discount applied to them in the French system.”

The Fund also believed that the adoption of a system as proposed by France might lead to the adoption of similar systems by other countries so that there would be uncertainty and instability in the exchange rates of a large part of the world. This disorderly exchange situation would have adverse effects upon all the members of the Fund. Despite the Fund's objections, France put this system into effect on January 25, 1948. While this action disqualified France from using the Fund's resources, it did not require France's withdrawal from membership. The French Government and the Fund have continued discussions subsequently in the hope of bringing about a modification of the French exchange system which would meet the special requirements of France, while at the same time not endangering exchange stability or operating to the economic disadvantage of other members of the Fund. France, in agreement with the Fund, has subsequently unified the effective import and export rates applicable to many of the transactions with convertible currency countries, thus reducing the number of multiple rates to this extent. The French Government has indicated that its present system is a temporary device and that it is its intention to return to a unitary rate system when circumstances permit.

The Council has kept the Italian and French exchange systems under close and extensive study, and through the United States Executive Director actively supported the positions taken by the Fund. The Council and the Fund share the desire to have stable exchange rates established without discriminatory features as soon as this is practicable. The Council strongly favors the adoption by all member countries of policies consistent with the Fund's objectives. While it recognizes that some concessions must be made to meet the requirements of particular countries, it believes that temporary action to meet immediate situations should not be such as to prejudice the attainment of exchange stability.

## II. Exchange restrictions and multiple currency practices

One of the ultimate objectives of the Fund is the establishment of a multilateral system of payments for international transactions and the elimination of exchange restrictions on current transactions. Members accepting the obligations of article VIII, section 2, of the Agreement agree not to impose restrictions on payments and transfers for current international transactions without the prior approval of the Fund. Similarly, under article VIII, section 3, the members may not engage in discriminatory currency arrangements or multiple currency practices unless authorized by the Agreement or approved by the Fund. Since many discriminatory exchange practices were in existence at the time the Fund Articles came into effect, the members agreed to consult with the Fund as to their progressive removal. The Articles recognized, however, that in the postwar transitional period the retention of exchange restrictions would be essential to the economies of many member countries and so, under article XIV, gave the members great latitude in retaining and adapting these arrangements to changing circumstances without prior approval of the Fund. Moreover, countries which had been occupied by the enemy were permitted to introduce restrictions which had not been in effect previously. After three years of the Fund's existence the members must report on such restrictions as are still in force under the Articles, and after five years the members may retain such restrictions only with the consent of the Fund. At that time the Fund will consult with the member and give it an opportunity to state its position. If the member persists in retaining these restrictions despite the Fund's objection, the member may be compelled to withdraw from the Fund.

The foreign exchange systems of the member countries have a great variety of controls over current transactions, and many of the systems provide for multiple rates and, in some cases, fluctuating rates. The arrangements vary greatly from country to country. They sometimes are relatively new devices introduced in the years preceding the outbreak of the war, or later, for the specific purpose of protecting the exchange resources of the members under war conditions. In other countries the multiple currency practices and exchange controls have become deeply imbedded in the financial institutions of the country and are used as a matter of trade policy, as well as a means of providing the government with special revenues through exchange taxes or discriminatory exchange rates. Business practices as well as the pattern of trade in these countries, particularly in Latin America, have been adjusted to the system of controls so that it would be scarcely feasible to eliminate them rapidly.

The Fund has undertaken a study of the exchange restrictions and multiple currency practices now in force in all of the member countries, and it has, on request of governments, sent missions to discuss with the members ways and means of bringing their exchange policies in closer conformity with the Fund objectives. While countries must be dealt with separately because of the complexities of their systems, the Fund has nevertheless stated its position with regard to the principal types of discriminatory exchange arrangements. The Fund has held that even during the transitional period its jurisdiction extends to the introduction or modification of exchange arrangements, when these involve changes in exchange rates. Moreover, members by the agreement undertake to collaborate with the Fund to promote exchange stability and orderly exchange arrangements, and the Fund believes that members must pay due regard to this obligation in their administration of multiple currency practices. Under article XIV, section 4, the Fund is empowered to make representations to a member that conditions are favorable for the withdrawal of particular restrictions. This power may be exercised "in exceptional circumstances" during the transitional period so that the Fund is given considerable discretion in dealing with this question. In practice, it has approached the problem realistically and has recognized that abrupt changes in the foreign exchange policies of the members might have undesirable consequences for their economies and might have further repercussions on the economic well-being of other countries. In its advice to the member countries it has consistently attempted to eliminate as many of the restrictions as practicable and has tried to induce them to work toward uniform exchange rates.

In accordance with article XIV, section 3, each member, before it becomes eligible to purchase currencies from the Fund, must notify the Fund as to whether it intends to avail itself of the transitional arrangements or whether it is prepared to accept the obligations of article VIII, sections 2, 3, and 4, which prohibit the member from imposing restrictions on current payments without the agreement of the Fund and which require the member to eliminate discriminatory currency arrangements or multiple currency practices. These sections also require a member to convert its currency into other currencies at the request of other members. Thus a member accepting the obligation of article VIII, section 4, agrees, with certain exceptions, to buy balances of its currency held by another member either with gold or with the other member's currency, provided that these balances have arisen as the result of recent current transactions or that the conversion of the balance is necessary for making payments for current transactions.

On November 8, 1946, the Fund requested the members to inform it whether they intended to avail themselves of the transitional arrangements or whether they were willing to accept the obligations of article VIII, sections 2, 3, and 4. The United States Government, acting through the Council, notified the Fund on December 10, 1946, that it was ready to assume the obligations of article VIII, sections 2, 3, and 4. The only other countries which are now accepting these obligations are El Salvador, Guatemala, Mexico, and Panama. All other members availed themselves of the privileges of the transitional period, either because they had exchange restrictions in effect at the time which would be contrary to article VIII, sections 2 and 3, or because they were unable in their present position to assure the convertibility of their own currency into other member currencies, or into gold if requested by the other members.

The Fund discussions with members regarding their exchange practices and related financial policies are carried on for the most part on an informal confidential basis, since these discussions may result in important legislative or ad-

ministrative acts on the part of the country concerned. In a few instances, however, the Fund and the member concerned have made public announcement of the steps taken. Thus Ecuador requested the Fund's advice about means of conserving its foreign exchange resources and suggested a new system of allocation of its foreign exchange receipts. Ecuador was induced to modify its system of exchange, and the Fund withdrew objections to the proposed Ecuadorian system, despite its introduction of new multiple currency practices. The system was accepted only as a temporary device for two years under the transitional period provisions. By that time it was believed that Ecuador could bring about a sufficient degree of equilibrium in its balance of payments and an adjustment of prices and costs, as well as other domestic monetary and credit reforms, which would ultimately enable it to make foreign exchange available for all current transactions at a single uniform rate.

In January 1948 the Fund agreed with Chile on a program for the progressive simplification of its multiple exchange rate system in the course of 1948. As a first step, the compensation system, whereby Chilean importers and exporters directly matched imports and exports, was to be eliminated and exchange transactions were to be effected through normal banking channels. Chile also took steps toward financial stability. Discussions with the Fund are continuing, and it is expected that in 1949 the bulk of Chile's foreign exchange transactions will take place within a revised system with a new rate of exchange to be established at a more realistic level than the prevailing rates.

The National Advisory Council is aware of the difficulties which the Fund faces in trying to bring about the rapid adoption of unified stable exchange rate systems. A series of steps must be taken by the various member countries to simplify their exchange rates and to eliminate the discriminatory features now existing. The Council is of the opinion that the Fund's policy with regard to exchange restrictions is directed toward the purposes for which the Fund was created and believes that the Fund has made some significant advances in the right direction. The Council believes that greater efforts must be made by the Fund and by the member countries to eliminate multiple currency practices, so that at the end of the transitional period as many countries as possible will be able to undertake the obligations of convertibility of their currencies and the avoidance of restrictions, which have in practice operated to the detriment of world trade. In this connection the Council notes with satisfaction the provisions of the International Trade Organization Charter completed on March 25, 1948, which assign an important role to the Fund in the determination of the circumstances under which it is permissible for a country to impose import restrictions for the purpose of maintaining its external financial position and equilibrium in its balance of payments. It is the hope of the Council that the combined activities of the ITO and the Fund will eventually bring about the freedom of exchange and trade which is desirable in the interests of expanding world trade and the development of the economies of the member countries.

### III. Gold policy

The gold purchase and sales policies of member countries are closely allied to the maintenance of exchange stability. For some time the United States Government and the Fund have been greatly concerned over the existence of markets for gold in some of the member countries, in which gold was sold in international transactions at prices considerably in excess of the gold values of the currencies of the members as determined by their par values accepted by the Fund. Some of this gold moved into private hoards and some was used to make international payments in contravention of the relevant exchange regulations. Trading in gold also sometimes involved dollar payments and to a degree may have affected exchange operations in the dollar. Such transactions have a tendency to undermine confidence in officially established parities.

Article IV, section 2, of the Fund Agreement authorizes the Fund to prescribe a margin above and below par value for transactions in gold by members and prohibits members from buying gold at a price above the par value, plus the margin, or selling gold at a price below par value, minus the margin. To implement the provisions, the Fund on June 10, 1947, adopted a regulation which prescribed the permissible margin as one-fourth of 1 percent, exclusive of the cost of converting the gold into good delivery bars, or the cost of transporting the gold to the place where it is sold, or to the country whose currency is used in the purchase of the gold, and other incidental charges necessary for making the transfer. The United

States Treasury Department's practice in gold sales and purchases is fully in accord with this rule, since the Treasury buys gold delivered to the mints or assay offices at \$35 per fine ounce, less one-fourth of 1 percent and other mint charges, and sells gold at \$35, plus one-fourth of 1 percent and other incidental charges.

On June 18, 1947, the Fund issued a statement to its members deprecating international transactions in gold at premium prices—i. e., at prices exceeding the prescribed margins—and requested the members to take the steps necessary to stop such transactions. The text of the Fund's statement is given in appendix A. On June 24, 1947, the National Advisory Council published the Fund's statement and announced to the press that it was in full agreement with it. A month later the Secretary of the Treasury and the Board of Governors of the Federal Reserve System issued a joint statement requesting American individuals and firms to refrain from engaging in premium gold transactions. This statement is given in appendix B.

To implement these two statements of policy the Treasury Department announced on July 31, 1947, that it was considering the amendment of the regulations under the Gold Reserve Act. After a public hearing the regulations were amended by the Secretary, with the approval of the President, and became effective on November 24, 1947. The amended regulations provided that after their effective date licenses would not be issued for the export of gold in bar form for industrial, artistic, or professional purposes and that gold produced from imported gold-bearing materials could be exported only to the consignor or to his order, provided that the license request showed that the export from the country of origin and the import into the country of destination were in accord with the regulations of the countries concerned. United States nationals were prohibited from exporting gold obtained from imported gold-bearing materials on their own account and were prohibited from engaging in the sale of such gold at premium prices for the account of others.

On November 17, 1947, the Canadian Government announced a project for a subsidy to gold production intended to prevent further decline in Canadian gold mining as a consequence of increased operating cost and to increase production so as to obtain dollar exchange. The Canadian Government began consultations with the Fund and with the United States Government, which, as the principal buyer of gold, was greatly concerned about the matter. The Fund took the position in the course of these discussions that a subsidy of a fixed amount per ounce of gold produced was in violation of article IV, section 2, of the Fund Agreement, which prohibits the members from buying gold at a price above par value, plus the agreed margin. In deference to the Fund's objection, the Canadian Government revised its proposal so that the subsidy would be used to defray part of the increased cost of production and would vary with the costs of individual producers.

On December 11, 1947, the Fund issued a policy statement which emphasized the necessity of member consultation with the Fund in all matters relating to gold subsidies, since gold subsidies might threaten to undermine exchange stability or change the par values of currencies as expressed in gold. The Fund also believed that such subsidies were objectionable, for example, "if subsidies were to cast widespread doubt on the uniformity of the monetary value of gold in all member countries." The Fund stated that it would deal with each particular case as it arose, and it determined "that in the present circumstances" the proposed Canadian action was not inconsistent with the policies stated by the Fund. On the following day the Secretary of the Treasury, on behalf of the National Advisory Council, issued a statement approving of the position taken by the Fund. The United States, as the principal gold-buying country, has a special interest in all matters of gold production. The Secretary stated:

"In particular, the United States would view with disfavor any tendency for countries to become dependent on subsidized gold production as a solution to the problem of arriving at and maintaining equilibrium in their balances of international payments."

The Secretary also announced that the Council did not believe there was any reason for granting a subsidy to gold production in the United States.

#### IV. Use of the Fund's resources

One of the major problems of policy confronting the Fund during its first year of operations was the formulation of appropriate policies relating to the use of the Fund's resources by the member countries. The United States, which con-

tributed \$2,750,000,000 to the financial resources of the Fund, had a particular interest in this matter, especially since the Fund's exchange operations have been confined almost entirely to the sale of dollars.

The Articles of Agreement specify in general terms the conditions under which member countries may purchase currencies from the Fund. The Fund's resources are to be used to meet temporary foreign exchange deficits arising from current international transactions. Article XIV, section 1, explicitly provides that the Fund's resources are not to be used for relief or reconstruction. It was clearly the intent of the Agreement not to bar countries from using the Fund's resources during the postwar reconstruction period, but these resources were to be used only for the purposes of the Fund and not contrary to its Articles. The Fund was anxious to make a contribution toward the reestablishment of international trade and the maintenance of exchange stability in the postwar period. It was faced, nevertheless, with the possibility that under the abnormal conditions prevailing some requests for currency might involve such a substantial element of "relief" or "reconstruction" as to be contrary to the agreement. Therefore the Fund, while aiding the war-torn countries by the sale of dollars to them, was required to exercise careful judgment, and its sales of currency have been made only after careful study of the economic and financial conditions of the members applying.

There was a very real danger that, if the Fund's resources were used in large part by countries in process of reconstruction, or by countries carrying on programs of economic development which might require foreign dollar exchange to meet capital requirements, the long-range purposes of the Fund would be lost sight of and that its resources would be quickly exhausted before the date at which the Fund could become fully effective in maintaining exchange stability and preventing discriminatory exchange practices. The United States Executive Director, with the approval of the Council, has consistently opposed the view that the use of the Fund's resources was automatic. The Fund has tried to strike a balance between the extreme of conserving its resources entirely for the post-transitional period and the use of its resources to deal with the pressing exchange needs of the members at the present time.

To carry out section 13a of the Bretton Woods Agreements Act, the United States Governor and Executive Director of the Fund took steps at its inaugural meeting to obtain—

"an official interpretation by the Fund as to whether its authority to use its resources extends beyond current monetary stabilization operations to afford temporary assistance to members in connection with seasonal, cyclical, and emergency fluctuations in the balance of payments of any member for current transactions, and whether it has authority to use its resources to provide facilities for relief, reconstruction, or armaments, or to meet a large or sustained outflow of capital on the part of any member."

On September 26, 1946, the Board of Executive Directors made an interpretation, which was accepted by the Board of Governors, to the effect that the use of the Fund's resources was—

"limited to use in accordance with its purposes to give temporary assistance in financing balance of payments deficits on current account for monetary stabilization operations."

In the opinion of the Council, this interpretation is fully responsive to the requirements of the Bretton Woods Agreements Act, so that it believes that no amendment of the Fund's Articles is necessary to satisfy the mandate of the Congress. Moreover, this interpretation, requested by the United States, has become the basic criterion in the determination by the Fund whether individual requests to purchase currency from the Fund should be granted.

The United States representatives on the Fund have urged that the Fund must continually examine the economic and financial situation of the member countries to determine whether their use of the Fund's resources would be consistent with the Fund Agreement. This policy, fully supported by the Council, is intended to conserve the Fund's resources so that they may be used most effectively to achieve the objectives for which the Fund was created. It is recognized that considerable flexibility in the Fund's operations is required because of the changing circumstances of particular countries or of the general international economic situation. In dealing with this question, the most desirable procedure would clearly be for the member country and the Fund both to

understand in advance the conditions under which requests for currency would meet with the Fund's approval. Unanticipated rejections of requests would be disturbing to the member involved, while, on the other hand, an automatic use of the Fund's resources would defeat its purposes. Accordingly, on June 7, 1947, the Fund sent all members a memorandum on its policy regarding the use of its resources. The Fund made it clear that it would consider carefully all requests for currency in the light of existing circumstances and that their requests for foreign exchange could be challenged by the Fund in cases where it had reason to question the correctness of the declaration. The Fund indicated that it would study the situation in the member countries before, rather than after, the request for the purchase of exchange, and that unless the member had been informed to the contrary it could promptly purchase exchange from the Fund in moderate amounts. In this way the member would have access to the Fund's resources as a second line of reserve. On the other hand, the members were informed that where the Fund felt that members should have no access to the Fund's resources, or only limited access, the matter would usually be handled informally in advance so that the member could avoid submitting requests which might be rejected.

A number of countries have been informally advised that the Fund did not regard it as desirable for them to use the Fund's resources under prevailing circumstances, and these countries have refrained from making requests for exchange. In certain instances after conditions in a given country have improved, the Fund has subsequently informed it that it might purchase currencies from the Fund. By these informal and confidential arrangements, possible misunderstanding has been avoided. The United States representatives on the Fund, with the agreement of the Council, have strongly urged this position in the Fund Board, and the representatives of the other countries have generally supported policies best suited to the long-run interests of the fund as an institution for promoting exchange stability and the expansion of world trade. In the opinion of the Council, this practice of continuous consultation in the Fund Board has helped to develop a wider appreciation among the member countries of the problems of the other countries and has influenced the policy of many of the member countries in the proper direction.

The exchange operations of the Fund have been moderate despite the widespread and acute need for dollars by most of the member countries during this period. Approximately \$500,000,000 of the Fund's resources was used by members, largely the European countries, in the first year of operations. But these countries have also, at the same time, used up large parts of their gold and dollar resources and the lines of credit extended to them by agencies of the United States Government. The European Recovery Program will have considerable effect on the course of the Fund's operations during the life of the program. The participating countries will receive aid from the United States, designed to cover a large part of their dollar requirements which they are not able to finance from other resources hitherto available, and in estimating these resources no allowance has been made for drawings from the Fund. The participating countries should have little occasion to require United States dollar assistance from the Fund except under unforeseen and exceptional circumstances. Non-European countries will also benefit from the recovery program, since dollars will become available to them for goods procured outside of the United States for the purposes of the program. Consequently, aid under this program will make it easier to preserve the resources of the Fund for the post-transitional period, when they can be used more directly and effectively for the attainment of exchange stability and the elimination of discriminatory currency practices.

#### V. Conclusion and recommendations

The National Advisory Council believes that the Fund has made considerable progress toward achieving its objectives, despite the existence of serious obstacles to its success. In the first two years of its operations the Fund has created a satisfactory mechanism for the establishment, maintenance, and modification of exchange rates. The member countries have submitted their exchange rates to the scrutiny of an international body and have consulted with it about the basic problems involved in the maintenance of exchange stability. In the opinion of the Council, the Fund has given valuable advice to the member countries about their financial and exchange policies. The Council believes that the existing pattern of exchange rates is not by any means satisfactory for all countries, but

it is fully cognizant of the difficulties in establishing rates which can be maintained by the member countries without undue recourse to the Fund under the circumstances prevailing in the world today.

The postwar financial crisis has proved to be far more serious than was anticipated at the time the Fund was established. The disruption of the economies of the countries involved in the war, along with the unfavorable conditions affecting their crops and their industrial production, have increased their need for dollars. Despite the large amount of aid and credit extended by the United States Government, the countries of the world, particularly in Europe, have been unable to return to normal economic conditions within three years after the war. The Congress has recognized the need for special assistance to the European countries and to China. This aid should materially contribute to the restoration of levels of production and international trade which will make the realization of the Fund's purposes more probable. In the opinion of the Council, the exchange rates of some of the European countries will require adjustment during the life of the European Recovery Program. It believes that the Fund provides a satisfactory means for critical evaluation of exchange policies, as well as orderly procedure for their modification.

The Council believes that the Fund can make a significant contribution to economic recovery by its advisory activities with regard to foreign exchange problems and related fiscal and monetary policies. This advisory function will be a useful supplement to the consultative work of the Economic Cooperation Administration in the case of countries participating in the European Recovery Program. The Fund's advice should prove particularly valuable in matters of foreign exchange, monetary stabilization, or other matters related to its specialized interest.

Among the objectives of the Fund has been the progressive removal of exchange controls and the elimination of multiple currency practices. The great shortage of foreign exchange in most countries has prevented them from removing more or less rigid control over the foreign exchange transactions of their nationals. The dangers of capital flight are considerable, while exchange resources might be dissipated in unessential purchases if there is not careful husbanding of exchange by public authorities. Moreover, the multiple currency practices of some of the countries have been so firmly established in their economic and financial systems that time will be needed to secure their eventual removal in line with the Fund's policies. Despite these handicaps, the Fund has succeeded in some cases in obtaining modifications of exchange systems in accordance with its purposes. The Council believes that the Fund should be able to secure additional changes in the coming years.

The Council also believes that the Fund has succeeded in steering the proper course in the use of its resources in the course of the last year. The Fund has endeavored to reconcile the use of its assets for the purposes for which the Fund was created with the practical exigencies of this disordered period in world finance.

The National Advisory Council is of the opinion that there has been entirely satisfactory coordination of the policies and operations of the United States representatives on the Fund with the activities and policies of the United States Government. The United States Executive Director on the Fund and his alternate have regularly attended the Council's meetings and have participated in the work of its staff committee and special working groups. The Executive Director has submitted regular reports to the Council and has given special reports as needed. The Council has been kept fully informed of actions taken and matters under consideration by the Fund. The Council has also supplied the United States Executive Director with the information and studies available to the United States agencies represented in the Council.

The Council and the United States representatives on the Fund Executive Board have been in agreement with the policies pursued by the Fund. The United States Executive Director and his alternate have been fully apprised of United States policies affecting their work. All important matters have been referred to the Council by the Executive Director, and the Council has given him advice and direction. As the result of this policy, the decisions taken by the Fund Board have been in harmony with the views of the Council.

The Fund has made considerable forward strides, and it is the expectation of the Council that further progress will be made in the next few years. While it may be necessary in the future to suggest amendments to the Articles of Agreement, it is the opinion of the Council that amendment of the Articles at this time would be unwise, since the experience of the last two years indicates that the

objectives can be achieved by proper application of the existing agreement. The Council also at this time does not recommend any change in the amount of the United States subscription to the Fund.

The Council believes that the objectives of the Fund parallel those of the United States in the field of international finance. The maintenance of exchange stability, the orderly adjustment of exchange rates, and the progressive removal of controls over current exchange operations are accepted objectives of United States international policy now, as they were in 1944, when this Government took the lead in the establishment of the Fund. The Council recognizes that the unusual conditions prevailing in the postwar period have delayed the realization of these objectives, but it also realizes that more rapid progress was scarcely possible under existing conditions. It believes that the Fund can more fully achieve its purposes in the future years and that it will have an especially important function in conjunction with the European Recovery Program and other measures which the Congress may see fit to adopt to assist in the economic recovery of the world.

The existence of the Fund as an international consultative body is of great importance to the United States. The Council believes that the international financial policies of the United States can be furthered most effectively through continued participation in an international body of this kind. In the opinion of the Council, the Fund may be expected to make an increasingly important contribution toward maintaining conditions of international economic stability, which are vital to the well-being of the United States.

#### APPENDIX A

##### TRANSACTIONS IN GOLD AT PREMIUM PRICES

The following statement was communicated by the Fund to all members in a letter of June 18, 1947:

"The International Monetary Fund has given consideration to the international gold transactions at prices substantially above monetary parity which have been taking place in various areas of the world. Because of the importance of this matter, the Fund has prepared this statement of its views.

"A primary purpose of the Fund is world exchange stability, and it is the considered opinion of the Fund that exchange stability may be undermined by continued and increasing external purchases and sales of gold at prices which directly or indirectly produce exchange transactions at depreciated rates. From information at its disposal, the Fund believes that unless discouraged this practice is likely to become extensive, which would fundamentally disturb the exchange relationships among the members of the Fund. Moreover, these transactions involve a loss to monetary reserves, since much of the gold goes into private hoards rather than into central holdings. For these reasons, the Fund strongly deprecates international transactions in gold at premium prices and recommends that all of its members take effective action to prevent such transactions in gold with other countries or with the nationals of other countries.

"It is realized that some of these transactions are being conducted by or through non-member countries or their nationals. The Fund recommends that members make any representations which, in their judgment, are warranted by the circumstances to the governments of non-member countries to join with them in eliminating this source of exchange instability.

"The Fund has not overlooked the problems arising in connection with domestic transactions in gold at prices above parity. The conclusion was reached that the Fund would not object at this time to such transactions unless they have the effect of establishing new rates of exchange or undermining existing rates of other members, or unless they result in a significant weakening of the international financial position of a member which might affect its utilization of the Fund's resources.

"The Fund has requested its members to take action as promptly as possible to put into effect the recommendations contained in this statement."

#### APPENDIX B

#### STATEMENT BY THE SECRETARY OF THE TREASURY AND THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM ON GOLD TRANSACTIONS AT PREMIUM PRICES, JULY 18, 1948

It is well known that active speculative markets in gold exist in various foreign countries. For the most part, these markets are illegal, though in a few instances importation or sale of gold is legal or is tolerated. Under present circumstances gold is traded in many foreign centers, often against United States dollars, at prices above monetary parities. The premiums differ from one center to another, so that speculators can make large profits by purchasing gold in one foreign market and selling it in another.

The International Monetary Fund recently issued a statement deprecating international dealings in gold at premium prices, and requesting member countries to take such action as they can within their jurisdictions to prevent such dealings. The Fund emphasized that these transactions tend to undermine exchange stability and cause gold to flow into private hoards rather than into monetary reserves. Furthermore, in countries where the gold is sold, payment is often made with dollars illegally acquired or held. Moreover, foreign exchange which otherwise could be used for sorely needed imports is diverted to the purchase of gold for private hoards.

In view of these circumstances, and on general grounds of the national policy, the Treasury Department and the Board of Governors of the Federal Reserve System request American individuals, banks, and business enterprises to refrain from encouraging and facilitating this traffic and in particular to refrain from extending the use of their facilities and funds for the carrying out of such transactions.

#### Exhibit 20.—Report of activities of the National Advisory Council on International Monetary and Financial Problems, October 1, 1947, to March 31, 1948

[House Document No. 737, 80th Congress, 2d session]

#### LETTER OF TRANSMITTAL

*To the Congress of the United States:*

I transmit herewith a report of the National Advisory Council on International Monetary and Financial Problems, covering its operations from October 1, 1947, to March 31, 1948, and describing, in accordance with section 4 (b) (5) of the Bretton Woods Agreements Act, the participation of the United States in the International Monetary Fund and the International Bank for Reconstruction and Development for the above period.

Previous reports of the National Advisory Council were transmitted to the Congress on March 1, 1946, March 8, 1946, January 13, 1947, June 26, 1947, January 19, 1948, and May 17, 1948, respectively. In addition to the First Special Report on the Operations and Policies of the International Monetary Fund and the International Bank for

Reconstruction and Development, submitted on May 17, 1948, previous reports on the participation of the United States in the International Monetary Fund and the International Bank were included in the reports of January 13, 1947, June 26, 1947, and January 19, 1948, respectively.

HARRY S. TRUMAN.

THE WHITE HOUSE, *August 3, 1948.*

---

REPORT OF ACTIVITIES OF THE NATIONAL ADVISORY COUNCIL ON INTERNATIONAL MONETARY AND FINANCIAL PROBLEMS, OCTOBER 1, 1947, TO MARCH 31, 1948

I. ORGANIZATION OF THE COUNCIL

Statutory basis

The National Advisory Council on International Monetary and Financial Problems was established by the Congress in the Bretton Woods Agreements Act (59 Stat. 512, 22 U. S. C. 286b), approved July 31, 1945. The statute directed the Council to coordinate the policies and operations of the representatives of the United States on the International Monetary Fund and the International Bank for Reconstruction and Development, the Export-Import Bank of Washington, and all other agencies of the Government "to the extent that they make or participate in the making of foreign loans or engage in foreign financial, exchange or monetary transactions." The Council was also directed to advise and consult with the President and the United States representatives on the Fund and the Bank on major problems arising in the administration of the Fund and the Bank; and to recommend to the President general policy directives for the guidance of the representatives of the United States on the Fund and Bank. The Bretton Woods Agreements Act was amended by section 106 of the Foreign Assistance Act of 1948 (62 Stat. 169; 22 U. S. C. 286b (a)), approved April 3, 1948, to include the Administrator for Economic Cooperation as a member of the Council for the duration of the program. The Council was also given certain additional duties with regard to the economic assistance program. The relevant portions of the Bretton Woods Agreements Act and of the Foreign Assistance Act of 1948 are presented in appendix A.

Reports

Since its first meeting on August 21, 1945, the Council has submitted six formal reports which were transmitted by the President to the Congress on March 1, 1946 (H. Doc. No. 489, 79th Cong., 2d sess.; subsequently included as appendix B to H. Doc. No. 497, 79th Cong., 2d sess.); March 8, 1946 (H. Doc. No. 497, 79th Cong., 2d sess.); January 13, 1947 (H. Doc. No. 53, 80th Cong., 1st sess.); June 26, 1947 (H. Doc. No. 365, 80th Cong., 1st sess.); January 19, 1948 (H. Doc. No. 501, 80th Cong., 2d sess.); and May 17, 1948 (H. Doc. No. 656, 80th Cong., 2d sess.).

The present report covers the activities of the Council from October 1, 1947, to March 31, 1948. This report supplements the report of

May 17, 1948, which was the first of the special biennial reports required by section 4 (b) (6) of the Bretton Woods Agreements Act on the activities and policies of the International Monetary Fund and the International Bank. In the sections which follow, an effort will be made to describe, in broad outline, the financial assistance the United States Government has rendered to the various nations of the world during the period of postwar reconstruction.

### Membership

The members of the Council, according to law, during the period under review, were the following:

The Secretary of the Treasury, John W. Snyder, Chairman.

The Secretary of State, George C. Marshall.

The Secretary of Commerce, W. Averell Harriman.

The Chairman of the Board of Governors of the Federal Reserve System, Marriner S. Eccles.

The Chairman of the Board of Directors of the Export-Import Bank, William McChesney Martin, Jr.

By agreement, the following served as alternates:

Frank A. Southard, Jr., Director of the Office of International Finance, Treasury Department.

Willard L. Thorp, Assistant Secretary of State for Economic Affairs.

Thomas C. Blaisdell, Jr., Assistant to the Secretary of Commerce.

J. Burke Knapp, Assistant Director of Research and Statistics, Board of Governors of the Federal Reserve System.

Herbert E. Gaston, Vice Chairman of the Board of Directors of the Export-Import Bank.

John W. Gunter, Deputy Director of the Office of International Finance in the Treasury Department, was the Secretary of the Council.

The United States Executive Directors on the International Monetary Fund, Andrew N. Overby, and on the International Bank for Reconstruction and Development, Eugene R. Black, or their alternates, regularly attended the meetings of the Council.

### Procedure

The Council ordinarily meets each week and holds such special meetings as are required. Joint meetings with the President's Committee for Financing Foreign Trade have also been held during the period.

The Council in discharging its functions makes use of the services of the existing personnel of its member agencies. Its Staff Committee consists of technical representatives of member agencies and a representative of the Securities and Exchange Commission. The Alternate United States Executive Directors on the International Monetary Fund and the International Bank generally attend meetings of the Staff Committee. The Staff Committee collects and analyzes information and prepares reports and recommendations for the Council. This procedure has enabled the Council to maintain the close inter-agency liaison essential for successful performance of its coordinating functions in the most efficient manner. Secretariat functions are performed by personnel of the Treasury Department.

## II. THE UNITED STATES FOREIGN ASSISTANCE PROGRAM

## The postwar problem of reconstruction

By the middle of 1945 it became clear that many of the countries of Europe and Asia would urgently need foreign assistance for the reconstruction of their economies. There had been widespread physical damage in some areas so that industrial and transportation equipment would have to be replaced in order to bring production up to prewar levels. There was also a serious shortage of foodstuffs and raw materials. Even where the physical damage was unimportant, the war had produced serious economic dislocations. The normal channels of trade had been disrupted, while the financing of current requirements had become increasingly difficult in view of the insistence upon payment in dollars or other hard currencies on the part of those countries which were in a position to supply needed commodities.

Europe occupied a central position in the postwar problem as the principal supplier of manufactured goods to large areas and as the principal purchaser of basic raw materials. European countries particularly depended upon extensive international trade so that the financial difficulties of carrying on normal trade relations assumed great importance. Moreover, in the attempt to deal with the postwar problem, the European countries had made bilateral trade and payments agreements which, though they permitted the resumption of a considerable part of the trade, tended nonetheless to restrict it to well-defined channels and to limit it in amount.

The postwar situation tended to increase the balance-of-payments difficulties of many countries with the United States. The United States had had for many years a commodity export surplus with the rest of the world, and with Europe in particular, though the United States imported more from Asia than it exported. The European countries, on the other hand, purchased more from the United States than they sold to it, and obtained some of the dollars for meeting this deficit from their exports of goods and services to other parts of the world. In part, the trade deficit with the United States had been met with surpluses on European earnings from the "invisible items" in the balance of payments, e. g., tourist expenditures, remittances, and payments for services such as shipping. To some degree the deficit had been financed by American investments abroad.

In the postwar period, however, the current account deficit of foreign countries with the United States increased enormously. Thus, in 1946, the United States supplied \$15,300,000,000 in goods and services to other countries while it received only \$7,100,000,000 in goods and services from them, resulting in a surplus of \$8,200,000,000. In 1947 our surplus on international account reached \$11,300,000,000, with total exports of goods and services reaching the high point of \$19,600,000,000. This situation was the result of the favorable economic position in which the United States found itself at the termination of active hostilities, and the difficulties caused by the war in other areas. During the war our productive capacity had expanded while the continuance of a high level of employment raised production and the national income of the United States to new high

levels. While many of the European countries were able to increase their production in the immediate postwar period to levels comparable to their prewar output, this result was in part made possible by assistance given by the United States. A large part of this production was for reconstruction purposes and was not available to consumers.

In the period between July 1, 1945, and December 31, 1947, foreign countries received \$41,600,000,000 in goods and services from the United States. As shown by chart I [omitted here], they paid for these goods by exports of goods and services to the United States amounting to \$19,200,000,000, and by the use of gold and dollar reserves paid to the United States amounting to \$5,300,000,000. United States foreign-aid programs of various sorts provided \$14,600,000,000, and the balance of \$2,500,000,000 consisted mainly of changes in private American investments abroad, foreign investments in the United States, and private gifts and other unilateral transfers.

### Decline in foreign gold and dollar resources

In their attempt to obtain needed supplies from the United States and other countries which expected payment in dollars, those countries of the world which had gold and dollar resources used a considerable portion to pay for their international deficits. Thus foreign countries in 1945 had gold and short-term dollar assets amounting to \$23,000,000,000, whereas at the end of 1947 these resources were reduced to \$17,800,000,000. The gold and dollar resources of the foreign countries at the end of 1945, 1946, and 1947 are given in the following table. The European countries participating in the Paris Committee for Economic Cooperation lost reserves during this period amounting to \$2,800,000,000 (more than one-fourth of their total reserves), of which \$1,800,000,000 was in gold.

*Gold and short-term dollar resources of foreign countries, December 1945 to December 1947*

[In billions of dollars]

Area	Total			Gold			Dollar balances		
	1945	1946	1947	1945	1946	1947	1945	1946	1947
Total all areas.....	23.0	21.7	17.8	16.0	15.7	13.0	7.0	6.0	4.8
Total Europe.....	13.6	13.2	11.2	10.6	10.5	9.1	3.0	2.7	2.1

Canada.....	1.8	1.4	.7	.4	.5	.3	1.4	.9	.4
Other countries.....	3.8	3.4	3.0	2.2	2.1	1.9	1.6	1.3	1.1

NOTE.—For details for December 1947, see table A, appendix B.

<sup>1</sup> Includes estimates for Union of Soviet Socialist Republics' gold holdings. Figures also include gold to be distributed by the Tripartite Commission for the Restitution of Monetary Gold to claimant countries, including ERP countries, in accordance with the Paris Reparations Agreement.

The consequence of this decline in gold and dollar balances was that most countries of the world in 1948 had inadequate resources in gold and foreign exchange to maintain working balances in foreign exchange and gold or foreign exchange reserves for their note issues. In the appendix are included statements of the gold transactions of foreign countries with the United States, and estimates of the gold and dollar resources of these countries as of December 31, 1947.

#### United States foreign assistance

Confronted with the problems of postwar reconstruction throughout the world, the United States took measures designed to meet its new responsibilities. In accordance with their statutory authority, agencies of the United States made loans, extended credits, or made available grants and other financial assistance to various foreign countries. These agencies included the Treasury Department, the Export-Import Bank, the Office of Foreign Liquidation Commissioner, the Maritime Commission, the War Assets Administration, the Reconstruction Finance Corporation, the Commodity Credit Corporation, the U. S. Commercial Company, and various branches of the military establishment.

Loans were made chiefly by the Export-Import Bank and by the Treasury Department. In 1945 the Congress increased the lending authority of the Export-Import Bank from \$700,000,000 to \$3,500,000,000. The Bank used a large part of this authority to make rehabilitation loans, principally to the western European countries. These loans were, as a general rule, made to finance the purchase of materials or equipment available in the United States and to a small extent for the technical services of American nationals. To deal with the special problems of the United Kingdom in the transitional postwar period, the Congress authorized the Treasury Department to make a loan of \$3,750,000,000 to assist that country in meeting its postwar deficit on current account. The loan was intended also to assist the United Kingdom to make sterling accruing on current transactions convertible into dollars or other currencies.

Various credit arrangements were entered into by United States agencies charged with the responsibility for disposing of property of the Government not needed for domestic purposes. Thus agreements were made with foreign countries for financing over a long period goods which had been requested by the foreign governments on lend-lease account prior to VJ-day but which had not yet been delivered to them. The Office of Foreign Liquidation Commissioner at the end of hostilities had surplus materials which had an original cost of some \$10,000,000,000. It disposed of these materials, which were located in foreign countries, to foreign governments, so that the total unsold surplus remaining at the end of 1947 amounted (at cost) to about \$1,200,000,000. The War Assets Administration was charged with the disposal of surplus property located in the United States. While the bulk of this property was sold to Americans, a part was sold to foreign governments on credit. The Maritime Commission similarly sold surplus shipping to foreign governments in accordance with the authorization of the Congress. The Commodity Credit Corporation and the U. S. Commercial Company supplied raw cotton and other

materials on credit to Germany and Japan. In accordance with a special act of Congress, a loan to the Philippines was made by the Reconstruction Finance Corporation.

The Council has constantly reviewed the foreign-aid programs considered by it during the postwar period. Pertinent statistical information prepared by the Clearing Office for Foreign Transactions of the Department of Commerce, for the Council, has been summarized in appendixes C and D and presented graphically in charts 2, 3, 4A, and 4B [charts omitted here]. The course of United States foreign aid in the 2½-year period between July 1, 1945, and December 31, 1947, is presented in these charts and statistical tables.

A net total of \$18,200,000,000 of United States assistance was made available during the period July 1, 1945, through December 31, 1947. The average rate of expenditure of the \$14,600,000,000 of United States aid utilized during the 2½-year period was about \$500,000,000 per month. With \$3,600,000,000 unutilized as of December 31, 1947, a projection of this rate of expenditure for the early part of 1948, indicated a rapid exhaustion of the amount of funds available. The unutilized funds were unevenly distributed as of December 31, 1947, since several of the participating countries had by that date almost completely exhausted the aid extended to them. These funds, therefore, appeared barely sufficient to meet the existing need for aid until the start of the proposed European Recovery Program.

During the first phase of United States postwar aid extending from July 1, 1945, to June 30, 1946, the bulk of assistance utilized was in the form of grants, including UNRRA and military-civilian supplies for "disease and unrest" programs. In the second phase of United States postwar aid between July 1, 1946, and March 31, 1948, the bulk of assistance utilized was in the form of loans and property credits, including the loan to the United Kingdom, Export-Import Bank loans, and property credits extended by the Office of Foreign Liquidation Commissioner. Up to December 31, 1947, slightly more than one-half of all aid was rendered in the form of loans and property credits, while the remainder was in the form of grants, including relief to war-devastated areas.

Toward the end of the fiscal year 1947 it had become clearly apparent that continued foreign assistance on a large scale by the United States would be necessary if there was not to be a serious setback in the recovery of European countries. While they had been able to attain a high level of production, they were still dependent upon the United States economy for a large part of their supplies and needed equipment. The foreign loans and credits which had previously been extended by the United States were largely exhausted. The Export-Import Bank had lent the bulk of the funds available to it, the United Kingdom had used up a large part of its credit, while other countries were clearly in need of assistance to meet their balance-of-payments deficits with the Western Hemisphere. It was clear that only the United States could, in practice, provide assistance to the extent required. In a special message to the Congress in December 1947, the President requested authorization of a program of assistance to Europe and to China. The European Recovery Program for the period April 1, 1948, to June 30, 1952, was expected to require \$17,000,000,000. The President recommended an appropriation of

\$6,800,000,000 for the initial period of 15 months. The Foreign Assistance Act, approved April 3, 1948, authorized appropriations of \$4,300,000,000 and debt transactions of \$1,000,000,000 for the European Recovery Program for the 1-year period following enactment of the act. (The appropriation approved June 28, 1948, made available until June 30, 1949, a total of \$6,030,710,228 for foreign aid, including \$4,000,000,000 for the European Recovery Program. The act gives the President authority on the advice of the Administrator for Economic Cooperation to expend the funds for the European program in a 12-month period if he deems it necessary.)

To provide assistance in the period before the expected passage of the act, the President requested interim aid for France, Italy, and Austria, countries whose immediate situation was most acute. The Congress appropriated \$522,000,000 for this interim aid program. In March 1948 the Congress also appropriated an additional sum of \$55,000,000 for further interim aid for the period until funds became available under the Economic Cooperation Act.

### III. ACTIVITIES OF THE COUNCIL FROM OCTOBER 1, 1947, TO MARCH 31, 1948 (OTHER THAN THOSE RELATING TO THE INTERNATIONAL MONETARY FUND AND THE INTERNATIONAL BANK)

#### The Anglo-American Financial Agreement

Previous reports of the National Advisory Council have traced developments under the Anglo-American Financial Agreement up to the suspension of the convertibility of sterling and cessation of notification of withdrawals under the line of credit, both effective August 20, 1947. Up to the date of the temporary cessation of withdrawals against the line of credit, the British Government had obtained the following amounts:

1946—Third quarter.....	\$400, 000, 000
Fourth quarter.....	200, 000, 000
1947—First quarter.....	500, 000, 000
Second quarter.....	950, 000, 000
Third quarter.....	1, 300, 000, 000
Total through third quarter of 1947.....	3, 350, 000, 000
Remaining line of credit.....	400, 000, 000
Total line of credit.....	3, 750, 000, 000

Consultations between the two Governments continued and, in an exchange of letters with the Chancellor of the Exchequer, the Secretary of the Treasury, on December 5, 1947, agreed that it was appropriate for the United Kingdom to resume withdrawals against the line of credit. In reviewing the events leading to this exchange of letters, the Secretary of the Treasury recalled that withdrawals against the credit were temporarily discontinued in August on the basis of mutual agreement between the two Governments. The action had been taken simultaneously with the institution of emergency steps by the United Kingdom to stop the unanticipated and excessive drawing on its resources following the granting of free convertibility of sterling in July 1947. In his statement to the press, the Secretary of the Treasury pointed out, however, that while progress had been made toward

working out a satisfactory agreement dealing with the convertibility of sterling, serious economic conditions existing in the world would delay for some time the restoration of full convertibility. In this connection, he noted that there were, in general, no restrictions on the convertibility of sterling held on current account by United States residents.

Drawings against the remaining line of credit were as follows:

Balance on hand at beginning of fourth quarter, 1947-----	\$400, 000, 000
Drawings:	
Dec. 8, 1947-----	100, 000, 000

### Export-Import Bank credits

During the period under review, the Council continued to work closely with the Export-Import Bank in order to coordinate the Bank's policies with those of other agencies concerned with foreign lending. New credits authorized by the Bank during this period totaled \$372,500,000, including \$300,000,000 to Canada and \$50,000,000 to Belgium.

In October 1947 the Canadian Government applied to the Export-Import Bank for a credit of \$300,000,000 for the purpose of assisting Canada to continue importing essential equipment and industrial raw materials from the United States, with a view to maintaining a high level of production in Canada. Canada in 1947 experienced a substantial loss of gold and dollar reserves as a result of a deficit in its trade with the United States, while it had a surplus in its trade with European countries. Without credit assistance from the United States, the Canadian Government probably would have been obliged to impose drastic and possibly discriminatory restrictions on imports from the United States in order to halt the loss of gold and dollar reserves. With limited credit assistance it was possible to meet the situation with much less drastic and entirely nondiscriminatory trade restrictions.

The Council noted that Canada has consistently supported the United States policy aimed at the reduction of trade barriers and the resumption of multilateral trade, that the extension of credits by Canada has helped to reduce the foreign financing burden of the United States, and that Canada was likely to continue extending such credits and thus to aid the United States in financing the European Recovery Program. The Council also noted that Canada's difficulty appeared to be temporary, and therefore approved consideration by the Export-Import Bank of a credit to Canada in an amount up to \$300,000,000.

On November 12, 1947, the Export-Import Bank set aside for this purpose \$300,000,000 of its uncommitted funds. An agreement covering a line of credit of \$300,000,000 to Canada was signed on January 8, 1948. The agreement provided that the credit would be available until December 31, 1948, and that interest at the rate of 2½ percent per annum would be paid on amounts outstanding. The Canadian Government agreed to pay one-half of 1 percent during the

life of the credit on any portion not utilized. The agreement also provided that if during the availability of the line of credit Canada borrowed funds for a term of 5 years or less from the private capital market in the United States such funds would be applied to the reduction of the line of credit.

The application of the Belgian Government for a loan to the National Bank of Belgium was based on the temporary need of that country for assistance in maintaining purchases of essential raw materials and equipment in the United States, with a view to making possible the continuance of a high level of industrial production. The Belgian Government anticipated that banks and other private investors in the United States might participate or take a portion of the credit requested. The Council approved consideration by the Export-Import Bank of a loan to Belgium in an amount up to \$50,000,000. On November 26, 1947, the Export-Import Bank announced that it was prepared to extend a credit of \$50,000,000, this credit to be available until December 31, 1948, at a rate of interest to be determined in accordance with the policy of the Bank not to compete with private capital. This was followed by the announcement of March 15, 1948, that the Export-Import Bank and seven United States commercial banks had made the sum of \$50,000,000 available to Belgium through the purchase of promissory notes of the Government of Belgium unconditionally guaranteed by the Banque Nationale de Belgique. The notes bear interest at the rate of 3½ percent per annum and mature semiannually over a period of 5 years. The commercial banks purchased \$18,000,000 of the \$50,000,000, and the Export-Import Bank purchased the remaining \$32,000,000.

In the case of several other countries which had applied to the Export-Import Bank for loans, the Council did not recommend consideration.

In February 1948 the Export-Import Bank asked the advice of the Council concerning a loan request of the Lockheed Aircraft Corp. for assistance in financing the sale to the British Overseas Airways Corp. of aircraft and related equipment. The Export-Import Bank had been requested to participate in the amount of \$22,500,000 representing 75 percent of the purchase price of \$30,000,000, and the Council approved consideration by the Bank of this request.

In March 1948 the Export-Import Bank and the State Department requested consideration by the Council of a proposal for an increase of \$500,000,000 in the lending authority of the Bank. This increase was proposed primarily in the light of the pressing need of Latin America for financial assistance in carrying forward its economic development. It was pointed out that although private capital and the International Bank could supply substantial amounts of such assistance, they might not be able to meet the entire need. It was also pointed out that it would be in the national interest of the United States to help to develop nearby sources of raw materials which are regularly imported or are becoming increasingly scarce in our domestic economy. However, the Bank could not consider Latin America to the exclusion of all other areas, and prudent management required the maintenance of a substantial uncommitted balance. In utilizing the proposed additional lending authority, the Bank contemplated no departure from the criteria generally applied in the consideration of

loan applications. In view of these considerations the Council supported the proposal to increase the lending authority of the Bank by \$500,000,000.

As of March 31, 1948, the resources of the Export-Import Bank were distributed as follows:

Total lending authority ----- \$3, 500, 000, 000

Loans outstanding ----- 2, 098, 000, 000  
Undisbursed commitments ----- 870, 000, 000  
Unutilized lending authority ----- 532, 000, 000

The following table shows the distribution of net credits authorized by country and object of financing:

<sup>1</sup> Cancellations and expirations deducted. Numerous small exporter-importer loans extended by the Bank, July 1, 1945, through Mar. 31, 1948, excluded. Also excluded are Mexican authorizations of \$30,000,000 and a Peruvian authorization of \$400,000 approved prior to June 30, 1946, recorded on Export-Import Bank books subsequent to June 30, 1945.

<sup>2</sup> Credits extended by Export-Import Bank under general approval of the Council. Hungarian credit of \$7,000,000 canceled Apr. 2, 1947.

<sup>3</sup> Excludes participation by private banks.

<sup>4</sup> For financing tobacco purchases.

<sup>5</sup> For financing food purchases.

<sup>6</sup> Revolving credits (of \$1,300,000 shown for Austria, \$800,000 is revolving).

## United States Maritime Commission foreign credits

Under the Merchant Ship Sales Act of 1946, the United States Maritime Commission was authorized, with certain limitations, to sell war-built vessels to foreign purchasers on credit terms. The authority of the Maritime Commission to sell war-built vessels to noncitizens, on credit terms or otherwise, expired March 1, 1948. In the 5 months between September 30, 1947, and March 1, 1948, the Council considered new credits of \$5,700,000 to Uruguay and \$300,000 to Peru. These amounts were in addition to previous unused authorizations to these countries. The Council indicated that it had no objection to consideration by the Maritime Commission of these additional credits.

*Merchant ship sales on a credit basis to foreign nationals and governments as of Mar. 31, 1948*

<sup>1</sup> The sizable difference between the credits approved by the Commission and those utilized by the Netherlands Government is in part attributable to contract settlements on a cash basis.

## War Assets Administration foreign credits

During the period under review the War Assets Administration entered into credit agreements with Austria, the Netherlands, Norway, and Haiti. The line of credit to Austria amounted to \$10,000,000, to Norway \$12,000,000, to the Netherlands \$25,000,000, and to Haiti \$255,000. In conformity with the recommendation of the Council, the agreements with Austria, Norway, and the Netherlands provided for serial payments over a 15-year period, with, however, payment in full in 3 years on those items which are subject to statutory limitations. The agreement with Haiti provided for serial payments over a 6-year period, with the same restrictions on statutory items.

Other credit requests received were from the Italian Government

for a credit of \$5,000,000, the Iranian Government for a credit of \$10,000,000, and the Government of Pakistan for a credit of \$10,000,000. The Council approved for the consideration of the War Assets Administration the granting of these lines of credit, but as of March 31, 1948, negotiation of firm contracts had not been completed. Several other countries have applied to the War Assets Administration for surplus-property credits. In some instances the Council did not approve the applications for consideration by the War Assets Administration and in others action has been deferred or is still pending.

#### Economic assistance to China

The Foreign Aid Act of 1947 authorized assistance to China. During January 1948 the State Department submitted for consideration of the Council a proposal for authorization by Congress of an economic assistance program for China. The purpose of this program was to provide immediate aid urgently needed by the people of China in the form of supplies of raw materials, foodstuffs, and equipment for which the Chinese Government's dwindling foreign-exchange reserves were inadequate. In effect, the objective of the proposal would be to help China arrest the progress of deterioration in her economy and to provide a respite during which the Chinese Government could initiate measures necessary to rebuild her economy.

It was contemplated that under the program a bilateral agreement between the United States and the Chinese Government would provide for the most effective use of the aid possible under the circumstances prevailing in China. Without this program China would be faced with complete exhaustion of her foreign-exchange assets during 1948 and would not be able to maintain minimum import requirements. It was the opinion of the Council that while the program would not necessarily prevent a further deterioration in the Chinese economic situation, it would help to stave off economic disaster and give China the opportunity, under favorable circumstances, to undertake the needed measures of self-help. In no sense was the China aid program to be considered as an economic recovery program comparable to the European Recovery Program.

The needs of China were considered by the Congress in conjunction with its consideration of the European Recovery Program, and the Foreign Assistance Act of 1948, as approved April 3, 1948, contained authorizations for assistance to China to a maximum amount of \$463,000,000.

#### German financial questions

During October 1947 representatives of the United States and United Kingdom Governments met to review the financial provisions of the bizonal fusion agreement of December 2, 1946. At these discussions British representatives proposed that the United Kingdom be relieved of the burden of providing dollars for German imports. It was estimated that this burden would amount to \$150,000,000 in the first 6 months of 1948, and to an additional \$65,000,000 if the United Kingdom did not provide any more dollars during the remainder of 1947. The United States delegates to this conference agreed that this question should be referred to the Council.

Because of the critical international financial position of the United Kingdom, the Council agreed that favorable consideration should be given to proposals for relieving the United Kingdom of the burden of dollar expenditures for civilian supplies for the bizonal area of Germany. It was agreed, however, that if new circumstances and developments arose, the financial arrangement would be reconsidered.

During the fall of 1947 the Council considered the financial terms of a proposed sale of United States Army surplus property located in Germany. It was proposed to transfer to Germany (Bizonal Economic Council), by means of a bulk sale, all of the remaining surplus property of the United States Army located in Germany, whether already declared surplus or to be declared surplus in 1948, except certain property not permitted to the German economy such as aircraft, vessels, and nondemilitarized combat material.

Of the total \$875,000,000 original cost of the property, it was proposed that Germany pay 21 percent, or approximately \$184,000,000. The surplus material included general- and special-purpose vehicles, construction equipment and materials, and clothing.

The Department of the Army was of the opinion that the bulk of the unsold surpluses in Germany could not be moved out of the country during the winter of 1947-48 because of inadequate transportation facilities. Moreover, the reduced strength of the occupational forces had imposed serious difficulties with respect to the care and custody of surplus property, and sale to Germany would terminate large expenditures necessary for the care, custody, handling, packing, and shipping of surplus property. Finally, this surplus property, if injected into the German economy, would reduce the amount of United States appropriations required for the purposes of occupation.

The Council therefore approved for the consideration by the Office of Foreign Liquidation Commissioner the financial terms in connection with this proposed bulk transfer of surplus property. It was agreed that the contract with the Bizonal Economic Council, amounting to \$184,000,000, would be a deferred charge repayable from the future proceeds of German exports and that the assumption of this obligation would be approved by the United States and United Kingdom military governments:

#### Interim aid

In October 1947 the State Department requested the Council to consider a proposal for an appropriation by Congress for interim assistance to France, Italy, and Austria. This request was based upon analyses of data submitted by the French and Italian Governments and by the United States military authorities in Austria.

The necessity for interim financial assistance prior to action by Congress on the European Recovery Program arose when it became apparent that the three countries under consideration would not be able to finance their import requirements needed to maintain recovery levels without unduly depleting their limited reserves of gold or dollars. Various special factors had contributed to the depletion of their dollar resources at a more rapid rate than had been previously anticipated. The most significant factors had been the inability to convert sterling

into dollars or gold since August 1947, the increase in dollar prices, and the serious crop failures in western Europe in 1947.

Interim aid was advocated not only on the basis of the immediate need of certain European countries for assistance, in preventing cold and hunger during the winter of 1947-48, but also of preventing a further deterioration in the economy of certain European countries in order to preserve the foundation on which a carefully considered recovery program could be based.

The Council was of the opinion that the State Department's request for the interim European supply program for France, Italy, and Austria was appropriate and justified in the light of the foreign financial policy of the United States Government. The Foreign Aid Act of 1947, approved December 17, 1947, authorized appropriations for assistance to these countries, and the Congress subsequently appropriated \$540,000,000—to Austria, France, and Italy \$522,000,000, and to China \$18,000,000. An additional sum of \$55,000,000 was appropriated by the Congress in March 1948 for further interim aid for the period until funds became available under the Economic Cooperation Act.

#### Financial aspects of the European Recovery Program

As pointed out by the National Advisory Council in its report of activities from April 1 to September 30, 1947, the financial and monetary problems raised by the European Recovery Program had been under continuing study by the Council and its constituent agencies since the inception of the program. The views and recommendations of the Council on these matters were summarized by its Chairman, the Secretary of the Treasury, in his statements before the Senate Committee on Foreign Relations on January 14, 1948, and the House Committee on Foreign Affairs on January 21, 1948. The text of the former statement (the content of which was substantially identical with the statement before the House committee) is given below: [Statement omitted here, see exhibit 26.]

#### Mobilization of foreign private dollar assets

The problem of tracing the private dollar assets in the United States of nationals of countries receiving aid under the European Recovery Program had been under review by the Council during the fall of 1947 and a program relating to this matter was presented by the Council to the Congress in February 1948. The Council believed that all reasonable assistance should be given to the participating countries to enable them to locate dollar assets of their nationals in the United States so that, if the participating governments so decided, these assets or the income therefrom could be used to assist in the financing of European requirements.

In the public discussion of the program it had been also argued that the participating countries should pay for part of the program by utilizing their gold and dollar assets in the United States and by liquidating the American investments of their own citizens. Moreover, it had been asserted that American taxpayers were being called upon to make substantial contributions to European recovery and

that liquidation of these assets would therefore constitute a means of relief to the American taxpayer. The Council pointed out, however, that it would be unwise for the United States to force European countries to use their gold and dollar balances to the point where they would not have adequate funds to finance their international trade through ordinary commercial channels. The dissipation of gold and dollar balances would also add a further element of instability to the monetary systems of these countries. Moreover, investments in the United States earn an income which can be used to defray part of the cost of European requirements during the life of the program and in subsequent years. To force the liquidation of invested assets would weaken the balance-of-payments positions of the participating countries in the future. Accordingly, the Council took the position that the liquidation of dollar assets should not be a condition precedent to aid under the European Recovery Program but that assistance should be given to the participating countries in obtaining control of these assets.

The problem of locating private dollar assets of foreign nationals stemmed from the fact that some individuals had for many years concealed their assets in the United States from their governments, despite the fact that the foreign-exchange laws of the recipient countries required that foreign-exchange assets be declared. Some persons held property directly in their own names, while others held property indirectly through intermediaries in third countries, notably Switzerland.

It is essential to distinguish between the categories of blocked assets and free assets. Blocked assets are those which were frozen in the United States under the Foreign Funds Control of the Treasury Department. In October 1945 machinery was put into effect to unblock these assets if the government of the country where the beneficial owner of the funds resided certified to the private American custodian holding the assets that there was no enemy interest. The procedure was designed to find concealed enemy property. However, not all of the blocked assets of the nationals of these countries were certified and, as a result, Foreign Funds still controlled a substantial amount of blocked assets. Free assets include all of the dollar assets owned by the nationals of Great Britain, Turkey, and Ireland, previously blocked assets which have been unblocked, and assets accruing to nationals of the recipient countries after December 1945. Free assets are for the most part known to the governments of the recipient countries and are not part of the particular problem involved in locating assets.

Precise figures on the amount of the blocked assets held directly in the names of citizens of recipient countries and indirectly through Swiss accounts were not available. According to best estimates, there was approximately \$700,000,000 of blocked assets in a form readily available for meeting the balance-of-payments deficits of recipient countries. Of this amount, it was estimated that about \$400,000,000 was held in the United States directly in the name of resident citizens, and the balance of about \$300,000,000 was held indirectly through Switzerland.

The Council believed that, in view of the extraordinary circumstances prevailing, the United States should assist the recipient coun-

tries to obtain control of the dollar assets of their nationals. The Council doubted that under ordinary circumstances this Government should assist in enforcing the foreign-exchange laws of other countries, but it recognized that European countries needed these funds and had requested the assistance of the United States in obtaining control. The Council concluded that no action should be taken with respect to free assets, but that the following program should be adopted in the case of assets now blocked:

(1) Public notice would be given that at the end of 3 months, assets remaining blocked, including assets not certified by the appropriate foreign government as free from enemy taint, would be transferred to the jurisdiction of the Office of Alien Property in the Department of Justice.

(2) In order to concentrate on areas where important results were likely to be obtained, accounts containing small amounts of property of less than \$5,000 would be unblocked without requiring certification or other formalities, except where a known former enemy interest existed.

(3) A new census of the assets which remained blocked as of the deadline date would be taken and the information from this census would be made available to governments of recipient countries.

(4) Assets indirectly held would be dealt with by a vesting program. Assets uncertified by the deadline date, whether in Swiss and Liechtenstein accounts or in accounts held through the nationals of recipient countries, would after receipt of the census information be vested under law as enemy property by the Office of Alien Property.

In implementation of the program outlined to the Congress, the Secretary of the Treasury announced on February 27, 1948, that freezing controls had been removed from blocked accounts up to \$5,000 held for persons residing in any country except Germany, Japan, Bulgaria, and Rumania, and on March 1, 1948, he announced that effective June 1, 1948, the Treasury Department would cease to have jurisdiction of blocked foreign funds. The details of the program were as previously outlined. The governments of the countries participating in the European Recovery Program were requested to give their residents public notice of the action which would be taken by the United States on June 1, 1948. (On April 27, 1948, it was announced that countries would have until September 1, 1948, to complete action on applications filed for certification as of June 1, 1948, and that the Treasury Department would, for administrative convenience, retain jurisdiction over blocked funds until September 1, 1948.)

#### Other Council activities

The Council, in view of the Swedish foreign-exchange difficulties developing in the first quarter of 1948, authorized the State, Treasury, and Commerce Departments to negotiate suitable modifications of the existing agreements with Sweden so as to recognize the necessity for Sweden temporarily to delay payments to United States nationals for current transactions.

In the spring of 1948, the Council considered a proposal of the State Department for an appropriation in the amount of \$20,000,000 for

the relief of the United States-United Kingdom zone of Trieste during the period from April 1 to June 30, 1948, through amendment of the Foreign Aid Act of 1947. The Council expressed the opinion that the State Department's request was appropriate and justified in the light of the foreign financial policy of the United States Government. The Economic Cooperation Act of 1948, while contemplating that Trieste would qualify as a participating country, provided for the amendment of the Foreign Aid Act of 1947 to authorize not more than \$20,000,000 of assistance until such time as Trieste became eligible for assistance under the Economic Cooperation Act as a participating country.

The Council considered and made recommendations with respect to the draft basic agreement for international economic cooperation which was referred to the Ninth International Convention of American States, held at Bogota, Colombia. The Council recommended that the United States delegation to the Bogota Conference not support proposals to set up a new inter-American intergovernmental financial institution since organizations already in existence would be capable of handling appropriate international financing. As pointed out in the section on the Export-Import Bank, the Council supported the proposal to increase the lending authority of the Export-Import Bank in order to place the Bank in a position to extend additional credits to Latin America.

The Council took negative action on various other matters relating to foreign finance referred to it by agencies of the United States Government. Where favorable consideration of the applications of foreign governments was recommended by the Council its conclusions are reported here. The Council has followed the practice generally of not publicly reporting actions recommending against the extension of loans, credits, or other financial transactions with foreign governments, since it is of the opinion that the best interests of the United States would not be served by public disclosure of adverse actions which may affect the foreign relations of the United States with other friendly countries.

During the period under review, the National Advisory Council met with the President's Committee for Financing Foreign Trade. Particular attention was devoted to the European Recovery Program, and the Council gave careful consideration to the views and recommendations of the President's Committee for Financing Foreign Trade on the administration and financial aspects of the program.

During the period the Council also submitted to the Senate Committee on Finance a report on foreign assets and liabilities of the United States and its balance of international transactions. The National Advisory Council had undertaken to submit this material when the committee had under consideration Senate Resolution No. 103, requesting information relative to loans and commitments to foreign governments and other financial statistics. The report was published as a committee print (80th Cong., 1st sess.) by the Senate Committee on Finance.

IV. ACTIVITIES OF THE COUNCIL FROM OCTOBER 1, 1947, TO MARCH 31, 1948, RELATING TO THE INTERNATIONAL MONETARY FUND AND THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

Pursuant to statutory authority, the National Advisory Council continued to coordinate the activities of the United States representatives of the Fund and the Bank with those of other agencies of the Government by furnishing advice and assistance to facilitate the carrying out of their various functions. The United States Executive Directors of both the Fund and the Bank, or their alternates, have regularly attended the Council's meetings, and have participated continuously in the work of its Staff Committee.

Membership changes in the Fund and Bank

In the period under review, one new country, Finland, was admitted to membership in the Fund and the Bank. At the recommendation of their Boards of Directors, the Governors of the two institutions, at the second annual meetings held in London in September 1947, approved the admission of Finland to the Fund with a quota of \$38,000,000, contingent upon a subscription for an equal amount in the Bank. Finland formally became the forty-sixth member of both the Fund and the Bank on January 14, 1948. The Council on March 25, 1948, approved of the admission of Austria to the Fund and to the Bank. The Boards of Governors by subsequent vote, without a meeting, approved the Austrian membership application, providing for a quota in the Fund of \$50,000,000, and a like amount as a subscription to the Bank. Membership is open to Austria until August 31, 1948. The increase in Egypt's quota from \$45,000,000 to \$60,000,000, which had been approved at the second annual meetings, became effective during the month of March 1948, when Egypt notified her consent to the change and her application for a proportionate change in her subscription to the Bank. A list of member countries, with their quotas and capital subscriptions as of March 31, 1948, is included in appendix E.

Additional Executive Directors

At the London meetings of the Boards of Governors of the Fund and Bank in 1947, it was decided to provide for the election of a fourteenth Executive Director by those members who, as of December 31, 1947, were not entitled to appoint a Director, and who had not voted in an election for any Director. This Director was to hold office until the next regular election in 1948. Pursuant to this, an election was held and, on February 5, 1948, announcement was made of the election of an Executive Director to both the Fund and the Bank representing Australia, Syria, and Lebanon.

### The Fund

In the 6-month period under review the Council gave consideration to various policy questions, all of which have been discussed in the First Special Report of the National Advisory Council on the Operations and Policies of the International Monetary Fund and the International Bank for Reconstruction and Development (H. Doc. No. 656, 80th Cong., 2d sess., pp. 10-17).

#### FUND EXCHANGE TRANSACTIONS

In the 6 months, October 1, 1947, to March 31, 1948, the Fund sold a total of \$391,100,000 in exchange for their own currencies to member countries. The sales of exchange for the respective periods and the countries purchasing exchange are indicated in the table below:

*Currency sales of the International Monetary Fund, Mar. 1, 1947, to Mar. 31, 1948*

[In millions of dollars]

### The Bank

#### LOANS AND DISBURSEMENTS

During the period under review the Bank entered the field of development loans when the Board of Executive Directors approved two loans to Chile, totaling \$16,000,000, bringing the total of loans approved as of March 31, 1948, to \$513,000,000.

Disbursement on loans in the 6-month period amounted to \$170,000,000, bringing the total disbursed by the Bank as of March 31, 1948, to \$403,000,000. France has withdrawn the entire amount of

her \$250,000,000 loan, the Netherlands has utilized \$138,000,000 of her \$195,000,000 loan, Denmark \$7,000,000 of her \$40,000,000 loan, and Luxembourg \$7,000,000 of her \$12,000,000 loan.

The loans to Chile consisted of \$13,500,000 for hydroelectric development and \$2,500,000 for the purchase of agricultural machinery. Both loans are guaranteed by the Chilean Government. The \$13,500,000 loan, at an interest rate of 3½ percent, is for a term of 20 years, with amortization payments beginning in the sixth year calculated to retire the full amount by maturity. The \$2,500,000 loan, at an interest rate of 2¼ percent, is for a term of 6½ years, with amortization payments beginning in the third year calculated to retire the full amount by maturity. In accordance with its Articles of Agreement, the Bank will also charge a commission of 1 percent annually to be set aside in the Bank's special reserve fund.

In accordance with previous loan agreements made by the Bank, the contracts with Chile provide that the Bank shall be furnished with full information showing that the funds to be disbursed will be used for the purposes specified in the agreements, and that representatives of the Bank shall have full opportunity to check the end use to which all purchases are put.

#### LEGISLATION

In this period the bonds of the Bank have become legal investments for life insurance companies in Massachusetts, Kentucky, and Virginia by action of the legislatures of these States. The action in Massachusetts was particularly important: first, because Massachusetts is often accepted as a pattern or guide by other States; and, second, because Massachusetts was the most important remaining State in the insurance field in which the Bank's bonds were not legal investments for insurance company assets. The great bulk of investment funds represented by the assets of insurance companies, banks, and trusts is now eligible to buy the bonds of the Bank.

#### FISCAL OPERATIONS

During the 6-month period the Bank reported a net income in excess of \$3,000,000 exclusive of \$1,500,000 paid into its special reserve. As of March 31, 1948, the entire deficit incurred in the Bank's organizational period had been written off, and the Bank reported an accumulated net profit of \$1,200,000 from operations, plus \$2,000,000 in its special reserve.

#### FUTURE LENDING

The Bank is expected to continue financing part of the European reconstruction effort. As economic recovery of the war-devastated countries proceeds, accelerated through the stimulus of United States direct aid, it is felt that the Bank will be afforded an opportunity to finance a number of projects, particularly those calling for permanent

additions to capital equipment. The Bank, as indicated by its recent loan to Chile, will concurrently consider developmental projects in Latin America and other areas which it now has under study.

#### APPENDIX A

##### SECTIONS OF THE BRETTON WOODS AGREEMENTS ACT RELATING TO THE NATIONAL ADVISORY COUNCIL

(59 Stat. 512; 22 U. S. C. 286b)

[For sections 4 and 14 of the act, omitted here, see the full text of the act in the Annual Report of the Secretary of the Treasury for 1945, beginning on page 382 ]

##### SECTIONS OF THE FOREIGN ASSISTANCE ACT OF 1948 RELATING TO THE NATIONAL ADVISORY COUNCIL

(62 Stat. 169; 22 U. S. C. 286b (a), 1509, 1513)

SEC. 106. Section 4. (a) of the Bretton Woods Agreements Act (59 Stat. 512, 513) is hereby amended to read as follows:

"SEC. 4. (a) In order to coordinate the policies and operations of the representatives of the United States on the Fund and the Bank and of all agencies of the Government which make or participate in making foreign loans or which engage in foreign financial, exchange or monetary transactions, there is hereby established the National Advisory Council on International Monetary and Financial Problems (hereinafter referred to as the 'Council'), consisting of the Secretary of the Treasury, as Chairman, the Secretary of State, the Secretary of Commerce, the Chairman of the Board of Governors of the Federal Reserve System, the Chairman of the Board of Directors of the Export-Import Bank of Washington, and during such period as the Economic Cooperation Administration shall continue to exist, the Administrator for Economic Cooperation."

SEC. 111. (c) (1) The Administrator may provide assistance for any participating country, in the form and under the procedures authorized in subsections (a) and (b), respectively, of this section, through grants or upon payment in

cash, or on credit terms, or on such other terms of payment as he may find appropriate, including payment by the transfer to the United States (under such terms and in such quantities as may be agreed to between the Administrator and the participating country) of materials which are required by the United States as a result of deficiencies or potential deficiencies in its own resources. In determining whether such assistance shall be through grants or upon terms of payment, and in determining the terms of payment, he shall act in consultation with the National Advisory Council on International Monetary and Financial Problems, and the determination whether or not a participating country should be required to make payment for any assistance furnished to such country in furtherance of the purposes of this title, and the terms of such payment, if required, shall depend upon the character and purpose of the assistance and upon whether there is reasonable assurance of repayment considering the capacity of such country to make such payments without jeopardizing the accomplishment of the purposes of this title.

(2) When it is determined that assistance should be extended under the provisions of this title on credit terms, the Administrator shall allocate funds for the purpose to the Export-Import Bank of Washington, which shall, notwithstanding the provisions of the Export-Import Bank Act of 1945 (59 Stat. 526), as amended, make and administer the credit on terms specified by the Administrator in consultation with the National Advisory Council on International Monetary and Financial Problems.

[Section 115 (b) provides for the establishment of bilateral and multilateral agreements between the United States and the various recipient countries. Such agreements shall] provide for the adherence of such country to the purposes of this title and shall, where applicable, make appropriate provision, among others, for— . . .

[Subsection] (6) placing in a special account a deposit in the currency of such country, in commensurate amounts and under such terms and conditions as may be agreed to between such country and the Government of the United States, when any commodity or service is made available through any means authorized under this title, and is furnished to the participating country on a grant basis. Such special account, together with the unencumbered portions of any deposits which may have been made by such country pursuant to section 6 of the joint resolution providing for relief assistance to the people of countries devastated by war (Public Law 84, Eightieth Congress) and section 5 (b) of the Foreign Aid Act of 1947 (Public Law 389, Eightieth Congress), shall be held or used within such country for such purposes as may be agreed to between such country and the Administrator in consultation with the National Advisory Council on International Monetary and Financial Problems, and the Public Advisory Board provided for in section 107 (a) for purposes of internal monetary and financial stabilization, for the stimulation of productive activity and the exploration for and development of new sources of wealth, or for such other expenditures as may be consistent with the purposes of this title, including local currency administrative expenditures of the United States incident to operations under this title, and under agreement that any unencumbered balance remaining in such account on June 30, 1952, shall be disposed of within such country for such purposes as may, subject to approval by Act or joint resolution of the Congress, be agreed to between such country and the Government of the United States . . .

NOTES.—*Gold*: Data represent total holdings of governments and central banks without regard to location. *Short-term balances*: Composed principally of deposits in American banks and holdings of U. S. Government Treasury bills and certificates. Where December figures were not available, short-term dollar balances as of Sept. 30, 1947, were used.

Source—Treasury Department and Board of Governors of the Federal Reserve System.

<sup>1</sup> Official gold holdings: For countries whose holdings have not been published, available estimates have been used, or the figures as of June 30, 1947, shown in the previous report have been carried forward.

<sup>2</sup> Excludes holdings of the International Monetary Fund, the International Bank for Reconstruction and Development, and other international organizations. Total gold and short-term balances of international organizations on this date were \$3,740,000,000; consisting of \$1,391,000,000, in gold, and \$2,349,000,000 in short-term dollar balances.

<sup>3</sup> Based upon estimate of \$390,000,000 for June 30, 1947, adjusted for subsequent sales of gold to the United States.

<sup>4</sup> Less than \$500,000.

<sup>5</sup> Includes gold to be distributed by the Tripartite Commission for the Restitution of Monetary Gold to claimant countries, including European Recovery Program countries, in accordance with the Paris Reparations Agreement.

<sup>6</sup> Excluding sterling area countries and dependencies of European countries.

<sup>7</sup> Includes approximately \$82,000,000 in gold which other countries claim Japan held on earmark for them.

NOTE.—Minus figures indicate a net sales by the United States to the foreign country within the period. Figures will not necessarily add to totals because of rounding.

<sup>1</sup> Less than \$50,000.

## APPENDIX C

## STATISTICAL SUMMARY TABLES ON UNITED STATES GOVERNMENT FOREIGN LOANS, CREDITS, AND GRANTS

EXPLANATORY NOTES<sup>1</sup>

The statistical tables presented in this appendix relate to grants and credits extended during the postwar period by the United States Government to foreign countries, both to governmental and to private entities. They also include special programs of advances to the military governments for Germany and Japan of raw materials, principally cotton. Because the data are readily available only on a quarterly basis, and there were some credits of a peacetime character between June 30, 1945, and VJ-day, a beginning date of June 30, 1945, has been adopted for the postwar period. The tables presented in this appendix and appendix D were prepared by the Clearing Office for Foreign Transactions, Office of Business Economics, of the Department of Commerce, on the basis of the latest information currently available covering the period July 1, 1945, through December 31, 1947. Items which are necessarily based on estimates, particularly some lend-lease and surplus-property credits, have been adjusted on the basis of all information received to the date of preparation of these tables, and are subject to future adjustments.

Foreign aid has in some instances been extended subject to future settlement which may ultimately result in repayments in one form or another. Although aid rendered on this basis is included as grants in this appendix, the amounts involved are shown separately in table L of appendix D.

Short-term credits (less than 6 months with respect to the Office of the Foreign Liquidation Commissioner and War Assets Administration; 90 days or less with respect to all other agencies; and the revolving special exporter-importer credits of the Export-Import Bank) and advance payments on commodity-procurement contracts are excluded.

Sales of surplus property for foreign currencies, performance of services, or transference of property are considered cash, not credit transactions when, at the time of sale, the currencies have been paid to the account of the United States, the services have been performed, or title to the other property has been transferred. On the other hand, sales for foreign currencies, services, or property, which are to be paid, performed, or transferred upon request of the United States Government, are considered credit transactions to the extent that request has not been made and satisfied.

All tables include totals of amounts utilized or disbursed in the 30-month period combined with amounts unutilized as of the end of the period. Such totals, therefore, exclude credit commitments or grant authorizations which have expired or been canceled in the period. Moreover, the amount of loans and property credits utilized does not take into account repayments. While the coverage of foreign loans and other credits of the United States Government is identical with that in earlier reports of the National Advisory Council, the data for grants includes for the first time all assistance in the form of grants by the United States Government in the postwar period. Grants, and particularly lend-lease, are shown before the deduction of offsetting items included in war-account settlements, such as reciprocal aid in the form of reverse lend-lease. The cumulative total of reverse lend-lease for both the war and postwar periods amounted to \$7,800,000,000. This method of statement is deemed to be the best measure of actual assistance rendered by the United States Government, but does not reflect aid rendered to the United States Government by foreign countries in the period covered. This aid was substantial in the case of the United Kingdom, France, Belgium, and the Netherlands.

Table C presents a summary of both credits and grants, whereas tables D and E contain more detailed data for credits and grants, respectively.

<sup>1</sup> All figures are to the nearest \$1,000,000; therefore, in certain instances components will not necessarily add to totals because of rounding.

## DEFINITIONS

Because of the wide variety of transactions and differences in the accounting procedures of the lending agencies, it is not possible to prepare simple definitions applicable to all cases, but the classifications used are as consistent in principle as possible.

1. *Loans*.—These represent cash loans anticipating repayment in cash of principal plus interest. Commitments reported by the Export-Import Bank represent authorizations resulting from approval of loans by the Board of Directors. These included, as of December 31, 1947, certain loans which had not been formalized by credit agreements. Included are direct loans by the Export-Import Bank and other Government agencies and loans of agent banks fully guaranteed by the Export-Import Bank.

2. *Property credits*.—These represent credits extended in connection with (a) disposal of surplus property, including merchant ships and (b) settlement for lend-lease articles and services. Collections of principal and interest may be in the form of United States dollars or real estate and services and foreign currency. Some of the amounts shown for the Office of Foreign Liquidation Commissioner and lend-lease credits are estimates subject to later adjustments.

## CREDITS UTILIZED

(a) *Maritime Commission*: The principal amount of mortgages received from foreign purchasers of merchant ships.

(b) *Lend-lease fiscal operations* (Treasury Department): Billings presented to foreign governments for goods delivered.

(c) *Office of Foreign Liquidation Commissioner* (State Department): Credits arising as the result of bulk sales of surplus property have been considered utilized as of the dates agreements were signed.

Corresponding utilization and commitment figures have been used in the belief that ultimate deliveries under bulk-sale agreements will approximate the amount of the original commitments. In all cases other than bulk sales, utilization is based upon the full amount involved in sales contracts signed, regardless of the time of delivery of the property.

3. *Commodity programs*.—These are included with property credits and represent credits resulting from commodity shipments by the United States Government to the military governments for western Germany and Japan. Included are the following amounts: Western Germany, credit utilized \$36,876,003; Japan, credit utilized \$185,624,908, and credit unutilized \$1,091,281. Raw materials have been shipped to these countries for manufacture into finished goods, a part of which is retained by the occupied areas as a processing fee. The remainder of the finished goods is exported in return for dollar proceeds, which are used to reimburse the United States Government for the cost of the raw materials, the handling charges, and the administrative expenses incurred.

4. *Lend-lease grants*.—These reflect the *estimated* value of such aid furnished on a grant basis (often referred to as "lend-lease"). This estimate is derived by reduction of the gross lend-lease aid totals by the amount of—

(a) Lend-lease aid furnished on a credit basis, including the amount of credit retroactively determined in settlements;

(b) The amount of cash received in lend-lease settlements;

(c) Lend-lease aid originally furnished on a cash basis; and

(d) The military civilian supplies program for Italy.

The grant totals include silver and ships and other goods to be returned to the United States Government. Lend-lease *estimates* are broken down by requisitioning governments and are shown only against the United Kingdom for the British Commonwealth, against France for all French areas, etc. Hence, the grant-data totals in tables C and E, and particularly the figures for individual countries, are arithmetic sums including an *estimate* and must be interpreted in the light of these qualifications.

5. *Civilian supplies*.—These include principally supplies furnished by the United States Army for civilian use abroad; sales and issues of civilian supplies by the Navy Department on the Pacific islands; and supplies financed by lend-lease appropriations and furnished to the War Department for Italian relief program. Unutilized balances for the Army Department are estimated.

6. *Relief (other than civilian supplies)*.—These include supplies, services, and funds furnished by the United States Government to international or national agencies for relief abroad or directly by the United States Government to a recipient area. Records in the United States for United Nations Relief and Rehabilitation Administration shipments show only the immediate country of destination; for example, aid shown going to the United Kingdom, Switzerland, and Norway was in replacement for commodities shipped to third countries. Relief utilized includes—

UNRRA aid.....	\$2, 524, 000, 000
Post UNRRA.....	230, 000, 000
Interim aid.....	12, 000, 000
American Red Cross aid from Government appropriations.....	10, 000, 000

and in unallocable Europe, \$4,000,000 transferred to the Intergovernmental Committee on Refugees, \$15,000,000 transferred to International Children's Emergency Fund from post United Nations Relief and Rehabilitation Administration funds, and \$15,000,000 in funds and \$2,000,000 in goods transferred to the International Refugee Organization. Unutilized includes only unutilized appropriations, not unutilized authorizations, and excludes the portion of the United Nations Relief and Rehabilitation Administration program not yet recorded as utilized although already furnished. The unallocable item includes administrative costs, unclassified shipments, and contributions in dollars given United Nations Relief and Rehabilitation Administration for use wherever needed.

7. *Other grants*. These include—

- (a) Aid in cultural and economic programs for the American Republics;
- (b) Financial aid to China under Public Law 442, approved February 7, 1942;
- (c) Aid under the first three titles of the Philippine Rehabilitation Act of 1946; and
- (d) Aid to Greece and Turkey under Public Law 75, approved May 22, 1947.

The unutilized amount of \$147,000,000 shown for the Philippines includes only the unutilized portion of appropriations and surplus property available under the rehabilitation program. It does not take into account additional authorizations which, under the act, may exceed \$350,000,000 over a 4-year period.

<sup>1</sup> Less than \$500,000.

<sup>2</sup> Unutilized balance of loans to United Kingdom at Dec. 31, 1947, includes \$35,000,000 of the credit extended by the Reconstruction Finance Corporation on a collateral loan in 1941 and \$300,000,000 of the special \$3,750,000,000 loan authorized by a joint resolution of Congress on July 15, 1946. As of Mar. 1, 1948, the remaining \$300,000,000 of the special loan had been completely utilized, withdrawals of \$100,000,000 each having been made on the following dates: Jan. 2, Feb. 4, and Mar. 1, 1948.

<sup>3</sup> Represents unallotted portion of the Export-Import Bank special cotton credits for Europe.

## SERIES A-1949 (DEPARTMENT CIRCULAR No. 819. PUBLIC DEBT)

TREASURY DEPARTMENT,  
Washington, November 19, 1947.

## I. OFFERING OF NOTES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions from the people of the United States for notes of the United States, designated 1½ percent Treasury notes of Series A-1949, in exchange for ½ percent Treasury certificates of indebtedness of Series L-1947, maturing December 1, 1947, or 2 percent Treasury bonds of 1947, maturing December 15, 1947. Exchanges will be made par for par in the case of the maturing certificates, and at par with an adjustment of interest as of December 15, 1947, in the case of the maturing bonds.

## II. DESCRIPTION OF NOTES

1. The notes will be dated December 1, 1947, and will bear interest from that date at the rate of 1½ percent per annum, payable with the principal at maturity on January 1, 1949. They will not be subject to call for redemption prior to maturity.<sup>1</sup> \* \* \*

## IV. PAYMENT

1. Payment for notes allotted hereunder must be made on or before December 1, 1947, or on later allotment. Payment of the principal amount may be made only in Treasury certificates of indebtedness of Series L-1947, maturing December 1, 1947, or in Treasury bonds of 1947, maturing December 15, 1947, which will be accepted at par and should accompany the subscription. The full year's interest on the certificates surrendered will be paid to the subscriber following acceptance of the certificates. In the case of the maturing bonds in coupon form, payment of accrued interest on the new notes from December 1, 1947, to December 15, 1947 (\$0.43151 per \$1,000), should be made when the subscription is tendered. In the case of maturing registered bonds, the accrued interest will be deducted from the amount of the check which will be issued in payment of final interest on the bonds surrendered. Final interest due December 15 on bonds surrendered will be paid, in the case of coupon bonds, by payment of December 15, 1947, coupons, which should be detached by holders before presentation of the bonds, and in the case of registered bonds, by checks drawn in accordance with the assignments on the bonds surrendered.

## V. ASSIGNMENT OF REGISTERED BONDS

1. Treasury bonds of 1947 in registered form tendered in payment for notes offered hereunder should be assigned by the registered payees or assignees thereof to "The Secretary of the Treasury for exchange for Treasury notes of Series A-1949 to be delivered to -----", in accordance with the general regulations of the Treasury Department governing assignments for transfer or exchange, and thereafter should be presented and surrendered with the subscription to a Federal Reserve Bank or branch or to the Treasury Department, Division of Loans and Currency, Washington, D. C. The bonds must be delivered at the expense and risk of the holder.

## VI. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions.<sup>1</sup> \* \* \*

JOHN W. SNYDER,  
*Secretary of the Treasury.*

<sup>1</sup>Omitted portion similar to corresponding sections of Department Circular No. 813, preceding.

## APPENDIX D

## STATISTICAL TABLES ON UNITED STATES GOVERNMENT FOREIGN LOANS, CREDITS, AND GRANTS

EXPLANATORY NOTES<sup>1</sup>

Tables F through K present by *lending agency*, a detailed break-down of loans and property credits summarized in tables C and D of appendix C.

## DEFINITIONS

*Total utilized and unutilized* represents the unutilized balance of authorizations as of June 30, 1945, plus new authorizations from July 1, 1945, through December 31, 1947, less expirations or cancellations of authorizations from July 1, 1945, through December 31, 1947.

*Unutilized balances as of June 30, 1945*, represent loans or credits authorized but not used, expired, or canceled prior to June 30, 1945.

*Unutilized balances as of December 31, 1947*, represent the unutilized balances as of June 30, 1945, plus new authorizations from July 1, 1945, through December 31, 1947, less amounts utilized, expired or canceled from July 1, 1945, through December 31, 1947.

*Expirations or cancellations* represent all expirations and cancellations of authorizations occurring during the period from July 1, 1945, through December 31, 1947, regardless of whether the loan or credit was authorized prior or subsequent to July 1, 1945.

*New authorizations* represent the gross amount of all loans and credits authorized or committed, as well as any increases in prior authorizations or commitments, during the period from July 1, 1945, through December 31, 1947. This includes all loans and credits approved by the responsible officials of the lending agencies from available funds even if they had not been formalized by signed credit agreements. Because the lack of formal agreement may become important in some instances, the amounts in this category included in tables F and I have been shown by footnotes.

*Utilized* represents—

(a) For loans: The amounts disbursed under the terms of the agreements. Included are direct loans by the Export-Import Bank and other Government agencies and agent banks disbursed loans fully guaranteed by the Export-Import Bank.

(b) For surplus-property credits by the Office of the Foreign Liquidation Commissioner: The full amount of bulk-sale credit agreements plus the amounts involved in contracts signed under other credit agreements, regardless of the time of delivery of the property.

(c) For lend-lease credits: The inventories of lend-lease goods in the hands of civilian agencies of recipient governments at VJ-day and/or billings to foreign governments for post-VJ-day shipments under pipe-line agreements, less, in some cases, offsets. Expenditures reported by the Navy Department to the Treasury Department, are the basis for determining utilization under the Liberian agreement.

(d) For ship-sale credits by the Maritime Commission: The principal of mortgages received by the Commission from foreign purchasers. The Ship Sales Act of 1946 provided that vessels could be sold for 25 percent cash down payment and the balance on credit terms.

(e) For commodity programs for western Germany and Japan: The value of the raw material shipped by the Commodity Credit Corporation and the U. S. Commercial Company, plus shipping and other costs.

*Repayments* represent payments on principal only. They are exclusive of repayments on debts arising out of World War I. Provisions governing the collection of principal vary and may call for payment in the form of different combinations of United States dollars, real property, services, commodities, and foreign currency. Repayments reported do not include all undertakings of the foreign governments and usually lag behind actual deliveries of real property and foreign currencies.

*Outstanding indebtedness* represents the net of utilized less repayments. The data in table K necessarily include the results of transactions taking place before July 1, 1945, but exclude indebtedness arising out of World War I.

<sup>1</sup> All figures are to the nearest \$100,000; therefore, in certain instances components will not necessarily add to totals because of rounding.

<sup>1</sup> For important qualifications affecting this table and for definitions of terms, see the explanatory notes.<sup>2</sup> Relates to Export-Import Bank balances, unless indicated otherwise as a footnote.<sup>3</sup> See table G for agency break-down.<sup>4</sup> Certain loans authorized by the Board of Directors of the Export-Import Bank which as of June 30, 1945, had not been formalized by credit agreements are included, amounting to: Total, \$66,800,000; Brazil, \$2,500,000; Ecuador, \$8,000,000; Mexico, \$30,800,000; Peru, \$500,000; miscellaneous Latin America, \$25,000,000.<sup>5</sup> Certain loans authorized by the Board of Directors of the Export-Import Bank which, as of Dec. 31, 1947, had not been formalized by credit agreements are included, amounting to: Total, \$83,800,000; China, \$4,200,000; Netherlands Indies, \$100,000,000; Saudi Arabia, \$15,000,000; Turkey, \$20,200,000; Austria, \$1,200,000; Belgium, \$50,000,000; Finland, \$7,700,000; Italy, \$6,600,000; unallotted Europe (unallotted cotton credits), \$24,400,000; Argentina, \$200,000; Brazil, \$18,600,000; Colombia, \$1,500,000; Ecuador, \$2,700,000; Mexico, \$53,800,000; miscellaneous Latin America, \$25,000,000; Canada, \$300,000,000; various countries, \$2,500,000.<sup>6</sup> War Assets Administration is the lending agency.<sup>7</sup> Lend-lease contract.<sup>8</sup> The exact amount of the Office of Foreign Liquidation Commissioner credit will depend on the proceeds received from the resale of surplus property by the foreign government. The figures shown for authorizations (and for credit utilized in table H), are based upon the best estimates of these amounts currently available.<sup>9</sup> New sales under credit suspended: Czechoslovakia, Sept. 13, 1946; Hungary, June 3, 1947. Both of these Office of Foreign Liquidation Commissioner authorizations expired Dec. 31, 1947, in accordance with the original terms, and the unutilized balance is shown under "Expirations and cancellations."<sup>10</sup> Includes Commodity Credit Corporation raw cotton shipped to Germany, in the amount of \$34,200,000, and the operating expenses (including freight and insurance costs), of the U. S. Commercial Company, amounting to \$1,800,000, incurred under an arrangement similar to that described in footnote 17 for Japan. In addition, there is included \$8,800,000 authorized to be expended by the U. S. Commercial Company, under an agreement between the U. S. Commercial Company and the Office of Military Government for Germany (United States Zone), for the procurement of raw materials needed to develop 6 specific export programs in the combined Anglo-American Zone of occupation. These programs had expired as of Dec. 31, 1947, with only \$800,000 of the credit utilized, and the unutilized portion, in the amount of \$7,900,000, is shown under "Expirations and cancellations." Repayments are being made to the U. S. Commercial Company from 50 percent of the proceeds of exports under these 6 programs.<sup>11</sup> Less than \$50,000.<sup>12</sup> Reconstruction Finance Corporation is the lending agency.<sup>13</sup> Treasury Department is the agency administering the loan.<sup>14</sup> The Institute of Inter-American Affairs (State Department) is the lending agency.<sup>15</sup> Lend-lease mutual-aid agreements have been signed with all the Latin American republics, except Argentina and Panama. Data with respect to them are shown in Miscellaneous Latin America. Unutilized Latin American lend-lease as of June 30, 1945, was approximately \$52,400,000.<sup>16</sup> Based on a sale of surplus property by the Army Department, amount estimated.<sup>17</sup> Includes Commodity Credit Corporation (Department of Agriculture) raw cotton being shipped in the amount of \$175,000,000, and the operating expenses (including freight and insurance costs) of the U. S. Commercial Company (Reconstruction Finance Corporation) amounting to \$11,700,000, incurred under an arrangement whereby the cotton is being shipped to Japan by the U. S. Commercial Company and turned over to the military authorities for manufacture into textiles. Payments to the Commodity Credit Corporation for the raw cotton and to the U. S. Commercial Company for out-of-pocket expenses have been made from the proceeds realized from the sale of a portion of the finished textiles; the balance of the textiles are being retained for use in Japan.<sup>18</sup> Reconstruction Finance Corporation is the lending agency in the amount of \$70,000,000 and War Assets Administration in the amount of \$10,000,000.

<sup>1</sup> For important qualifications affecting this table and for definition of terms, see the explanatory notes. All expirations and cancellations of authorizations occurring during the period are included regardless of whether the credit was authorized prior or subsequent to July 1, 1945.

<sup>2</sup> Less than \$50,000.

<sup>3</sup> U. S. Commercial Company (Reconstruction Finance Corporation), is the lending agency. See footnote 10 to table F.

<sup>4</sup> \$48,000,000 is the net indebtedness established by the war-account settlement agreement signed May 28, 1947. \$65,000,000 was the unutilized credit reported as of June 30, 1945, which represented credit extended for post-VJ-day transfers, including pipe-line shipments. The difference of \$17,000,000 has been shown as a cancellation of authorized credit.

<sup>1</sup> For important qualifications affecting this table and for definition of terms, see the explanatory notes.<sup>2</sup> See footnote 8 to table F.<sup>3</sup> Commodity programs, see footnote 10 to table F. Commodity Credit Corporation is the lending agency in the amount of \$34,200,000 and U. S. Commercial Company in the amount of \$2,700,000.<sup>4</sup> The \$178,000,000 shown as utilized by Italy will be adjusted downward due to a substantial deficiency in deliveries under the first bulk-sale agreement, dated Sept. 9, 1946. Eventual total credit utilized by Italy will not exceed \$160,000,000. Italy is currently authorized to purchase additional surplus property on credit, which purchases are being used to help offset the deficiency.<sup>5</sup> See footnote 4 to table G.<sup>6</sup> Treasury Department is the agency administering the loan. See also footnote 6 to table I.<sup>7</sup> Reconstruction Finance Corporation is the lending agency.<sup>8</sup> Less than \$50,000.<sup>9</sup> The Institute of Inter-American Affairs (State Department) is the lending agency.<sup>10</sup> Lend-lease mutual-aid agreements have been signed with all the Latin-American Republics except Argentina and Panama. Data with respect to them are shown in Miscellaneous Latin America.<sup>11</sup> Based on a sale of surplus property by the Army Department. Amount estimated.<sup>12</sup> Commodity programs, see footnote 17 to table F. Commodity Credit Corporation (Agriculture Department) is the lending agency in the amount of \$173,900,000, and U. S. Commercial Company (Reconstruction Finance Corporation) in the amount of \$11,700,000.

<sup>1</sup> For important qualifications affecting this table and for definition of terms, see the explanatory notes. Repayments reported do not include all undertakings of the foreign government and usually lag behind the actual deliveries of real property, services, commodities and foreign currencies.

<sup>2</sup> Commodity programs. See footnote 10 to table F. As of Dec. 31, 1947, repayments on principal totaled \$3,500,000, of which \$900,000 had been paid or was available for payment to the Commodity Credit Corporation (Department of Agriculture), and \$2,600,000 had been paid to the U. S. Commercial Company (Reconstruction Finance Corporation).

<sup>3</sup> As of Dec. 31, 1947, payments from the United Kingdom under the joint war-account settlement agreement had been received by the Foreign Liquidation Commissioner (State Department), in the aggregate amount of \$6,000,000 (real estate), and by Lend-Lease Fiscal Operations (Treasury Department), in the aggregate amount of \$2,600,000 (foreign currency). However, the proper allocation of the items between Office of Foreign Liquidation Commissioner and Lend-Lease Fiscal Operations has not been determined. Consequently, these collections are shown as reported by Office of Foreign Liquidation Commissioner and Lend-Lease Fiscal Operations.

<sup>4</sup> Reconstruction Finance Corporation is the lending agency.

<sup>5</sup> Does not include \$6,900,000 held in a sinking fund for payment of principal.

<sup>6</sup> Includes a portion of one loan by the U. S. Commercial Company (Reconstruction Finance Corporation) to an individual in Bolivia, amounting to \$388,987, written off as uncollectible.

<sup>7</sup> Less than \$50,000.

<sup>8</sup> The Institute of Inter-American Affairs (State Department) is the lending agency.

<sup>9</sup> Lend-Lease mutual-aid agreements have been signed with all the Latin-American Republics except Argentina and Panama. Data with respect to them are shown in Miscellaneous Latin America.

<sup>10</sup> Commodity programs. See footnote 17 to table F. As of Dec. 31, 1947, repayments on principal totaled \$116,300,000, of which \$104,600,000 had been paid or was available for payment to the Commodity Credit Corporation (Department of Agriculture) and \$11,700,000 had been paid to the U. S. Commercial Company (Reconstruction Finance Corporation).

TABLE K.—*Outstanding indebtedness<sup>1</sup> of foreign countries on loans and credits by the U. S. Government, as of June 30, 1945, and Dec. 31, 1947, by country and by lending agency*

[In millions of dollars]

<sup>1</sup> For important qualifications affecting this table and for definition of terms, see the explanatory notes. Provisions governing the collection of principal and interest vary and may call for payment in the form of various combinations of United States dollars, real property, services, commodities, and foreign currency.

<sup>2</sup> The column "Total Outstanding, June 30, 1945," is included to show readily the net change in indebtedness that has taken place as a result of postwar transactions. The items in this column which are not specifically identified otherwise by footnotes relate to Export-Import Bank credits.

<sup>3</sup> Amount partly estimated. See footnote 8 to table F.

<sup>4</sup> Commodity programs. See footnote 10 to table F. Commodity Credit Corporation (Department of Agriculture) is the lending agency in the amount of \$33,300,000, and the U. S. Commercial Company (Reconstruction Finance Corporation) in the amount of \$100,000.

<sup>5</sup> See footnote 4 to table H.

<sup>6</sup> See footnote 4 to table G.

<sup>7</sup> Includes loans delinquent 90 days or more, as follows: (a) Export-Import Bank, \$241,759 in the following countries—Angola, \$35,481; Poland, \$3,492; Brazil, \$142,980; Uruguay, \$59,806; and (b) U. S. Commercial Company (Reconstruction Finance Corporation), \$1,511,208 in the following countries—Bolivia, \$1,032,816; Brazil, \$30,612; British Honduras, \$443,901; and Ecuador, \$3,879.

<sup>8</sup> Reconstruction Finance Corporation is the lending agency.

<sup>9</sup> See footnote 3 to table J.

<sup>10</sup> \$3,450,000 under the loan administered by the Treasury Department, and \$177,600,000 under the loan by the Reconstruction Finance Corporation.

<sup>11</sup> Does not include \$888,987 of a loan to an individual in Bolivia, written off as uncollectible by the U. S. Commercial Company (Reconstruction Finance Corporation). See footnote 6 to table J.

<sup>12</sup> Includes participation by another agency of \$7,000,000 in loans of Export-Import Bank to Brazil.

<sup>13</sup> Less than \$50,000.

<sup>14</sup> \$94,164 under a loan by the Reconstruction Finance Corporation, and \$4,879,228 under credits by the Export-Import Bank.

<sup>15</sup> \$115,727 under a loan by the Institute of Inter-American Affairs (State Department) and \$11,035,478 under credits by the Export-Import Bank.

<sup>16</sup> The Institute of Inter-American Affairs (State Department) is the lending agency.

<sup>17</sup> Lend-lease mutual-aid agreements have been signed with all the Latin-American Republics except Argentina and Panama. Data with respect to them are shown in Miscellaneous Latin America.

<sup>18</sup> \$43,569,862 under lend-lease credits (see footnote 17) and \$59,140 under credits of the Export-Import Bank.

<sup>19</sup> Based on a sale of surplus property by the War Department. Amount estimated.

<sup>20</sup> Commodity programs. See footnote 17 to table F. Commodity Credit Corporation (Department of Agriculture) is the lending agency.

<sup>21</sup> Lend-lease credit.

## OTHER POSTWAR UNITED STATES FOREIGN ASSISTANCE

EXPLANATORY NOTES <sup>1</sup>

Tables L, M, and N show information on other postwar foreign assistance by the United States Government. Table L is limited to assistance which was subject to settlement as of December 31, 1947, and is comparable with tables [of the same number] appearing in earlier reports of the National Advisory Council. Table M is a new table providing data on assistance, the terms of which had been settled as of December 31, 1947, or which was not at any time subject to settlement. The data presented in tables L and M, when combined, are equivalent to information on utilized grants presented in tables C and E of appendix C. Table 7, appendix G, of the National Advisory Council Report of September 30, 1947, has been discontinued, and data formerly appearing in that table are now included under "Other assistance" in table M, appendix D of this report, as well as in tables C and E of appendix C.

Table N presents information on assistance rendered through the United Nations Relief and Rehabilitation Administration. Unlike all of the preceding tables, it is based in part on non-United States Government data. The first column was obtained largely from a report of the United Nations Relief and Rehabilitation Administration, whereas the second column is derived from State Department fiscal records. The data obtained from the United Nations Relief and Rehabilitation Administration are based on the cost of the merchandise to be distributed. The cost of shipping, and field and administrative expenses can only be estimated. The share of the United States in the total program is approximately 70 percent. Data from State Department fiscal records represent the cost of commodities and services purchased with funds supplied by the Government of the United States, adjusted to include the estimated shipping cost distributed by country. The contribution to administrative and other expenses and to free funds is shown separately. The data in the second column of table N are also included in the column headed "Relief" of table M, to the extent that they apply to the postwar period.

TABLE L.—Other postwar U. S. Government foreign assistance subject to settlement, July 1, 1945, through Dec. 31, 1947, by country and by type

[In millions of dollars]

Area and country	Total	Civilian supplies <sup>1</sup>	Lend-lease <sup>2</sup>	Other

Total, Africa: Ethiopia.....	.9	.4
Special programs.....	\$ 32.0	.....
Unclassified.....	.....	<sup>10</sup> 118.4

<sup>1</sup> Based on State Department fiscal records. A small part of this total was provided before July 1, 1945.

<sup>2</sup> Estimated (see footnote 4).

<sup>3</sup> The total available contributions of the U. S. Government amounted to \$2,700,000,000, of which \$40,200,000 was recorded as unutilized on the State Department fiscal records as of Dec. 31, 1947. It is estimated that approximately \$25,000,000 of this amount will not be utilized, and will revert to the U. S. Treasury.

<sup>4</sup> Estimated at \$800,000,000 on the basis of total United Nations Relief and Rehabilitation Administration resources chargeable to program of operations reported in the Twelfth Report to Congress on Operations of United Nations Relief and Rehabilitation Administration, and exclusive of approximately \$300,000,000 contributions received from private and other sources.

<sup>5</sup> Exclusive of shipping expenses which have been distributed by country.

<sup>6</sup> Source: United Nations Relief and Rehabilitation Administration, Final Operational Report.

<sup>7</sup> Less than \$50,000.

<sup>8</sup> Includes Byelorussian Soviet Socialist Republic.

<sup>9</sup> Includes special projects and displaced persons camps.

<sup>10</sup> Includes countries in which the United Nations Relief and Rehabilitation Administration special projects and displaced persons camps operated; also, countries of initial destination from which goods may have been transhipped, with or without processing, or to which goods may have been delivered as repayment for stocks previously received by United Nations Relief and Rehabilitation Administration.

**Exhibit 21.—Joint memorandum, January 22, 1948, by Secretary of the Treasury Snyder and Attorney General Clark, relating to the termination of the residual blocking operations of Foreign Funds Control**

JANUARY 22, 1948.

The Departments of Justice and Treasury have discussed the ways and means by which the residual blocking operations of Foreign Funds Control could be terminated as rapidly as possible consistent with achieving this Government's objectives of (1) discovering enemy assets concealed in blocked accounts and (2) assisting European governments which receive financial assistance under the European Recovery Program (referred to hereafter as recipient countries) to locate, control or otherwise obtain the benefit of the blocked assets in the United States of their resident citizens. To this end, the program set out below has been formulated by and has the approval of the two Departments.

Three-months public notice will shortly be given, after which assets then remaining blocked, including assets not certified by the appropriate foreign governments as free of enemy taint, will be transferred to the jurisdiction of the Office of Alien Property in the Department of Justice. That Office will take a new census of the assets which remain blocked as of the deadline date. In order effectively to help the recipient countries, the Office of Alien Property will then promptly carry out the following policies:

(a) To deal with the directly held assets by making available to the governments of such countries the information from the new census of blocked assets of their citizens, including juridical persons, residing in their territories which remain uncertified as of the public deadline date referred to above. Each country receiving such information will be required to investigate the beneficial ownership of property held in the names of their citizens for the purpose of discovering any enemy interest, so that enemy property will not escape this Government. Pending a reasonable period for such investigations, such property will not be vested but will remain blocked under the jurisdiction of the Office of Alien Property. If those investigations show that the assets are owned by residents of the country receiving the information, the assets will be released.

(b) To deal with indirectly held assets by a vesting program with respect to accounts which remain uncertified after the deadline date. Processing of uncertified assets in Swiss and Liechtenstein accounts for vesting under applicable law as enemy property will be started immediately after the receipt of the census information by the Office of Alien Property. The vesting program will also be applied to uncertified assets held indirectly through recipient countries where the program described in (a) above does not result in disclosure to the beneficial owner's government. In the absence of definite evidence of nonenemy ownership, full weight will be given to the presumption of enemy ownership arising from the failure to obtain certification. Evidence of nonenemy ownership or interest offered either before or after vesting would be checked in accordance with the usual investigative procedures of the Office of Alien Property. These procedures involve disclosure to the governments of the countries of which persons claiming legal or beneficial interests are residents. Of course, any vested assets which are proved to be nonenemy may be returned under existing law applicable to the return of vested property.

To permit both ourselves and the recipient countries to concentrate on the areas where important results are likely to be obtained, accounts containing small amounts of property, say up to \$5,000, will be unblocked in the near future without requiring certification or other formalities except where a known German, Japanese, Hungarian, Bulgarian, or Rumanian interest exists. So far as private assets of recipient countries are concerned, it is estimated that this action will eliminate about 50 percent of the accounts involved, but will release less than 5 percent of the blocked assets which are unknown to the recipient countries.

The President has authority under the Trading with the Enemy Act to put the above program into effect. Because of the serious policy considerations involved, the Congress will be informed during the hearings on the European Recovery Program of our intention, unless the Congress objects, to carry out the information and vesting policies described above.

JOHN W. SNYDER,  
*Secretary of the Treasury.*  
TOM C. CLARK,  
*Attorney General.*

**Exhibit 22.—Letter, February 2, 1948, to Senator Arthur H. Vandenberg, Chairman of the Senate Foreign Relations Committee, from Secretary Snyder as Chairman of the National Advisory Council, relating to the termination of the blocking operations of the Treasury Department in relation to the European Recovery Program**

MY DEAR SENATOR: You will recall that when I appeared before the Senate Foreign Relations Committee to discuss the financial aspects of the European Recovery Program I indicated that I would soon be ready to report the results of the National Advisory Council's consideration of the extent to which this Government should assist countries likely to receive financial assistance under the European Recovery Program in locating the assets of their nationals concealed in the United States.

On that occasion I discussed the extent to which the dollar and gold holdings of the participating countries could be integrated with the European Recovery Program. In that connection I stated:

"Some people have argued that the participating countries should pay for part of the program by using up their gold and dollar assets in the United States, and by liquidating the American investments of their own citizens. I need not labor the point that the European countries must have some gold and dollar reserves to finance their international trade if they are to return to normal operations after 1952. It should be kept in mind that the European Recovery Program is not intended to cover the entire import requirements of these countries. It would be folly on our part to force the European countries to use up their gold and dollar balances to a point where they would not have adequate funds to operate through ordinary commercial and financial channels. By insisting that the participating countries exhaust their gold and dollar balances, we would merely add further instability to their monetary systems. As a matter of fact, all of the participating countries except Switzerland, Turkey, and Portugal have already reduced their dollar balances to or below the amount which would normally be regarded as safe.

"When we turn to the possibility of liquidating European investments in the United States, we must also look at the problem in terms of its long-run consequences. These investments annually earn a dollar income, which will be used to cover part of the cost of the program, and which will be used in the future to meet part of the cost of imports after the program ends. Without these investments, the balance-of-payments situation of the participating countries will be worse in the future. I doubt very much that it would be wise policy for the United States to force European countries as a general rule to liquidate the property owned in the United States by their nationals as a condition for receiving aid from this Government.

\* \* \* \* \*

"Some of the governments, however, will decide to liquidate some or all of their holdings so as to pay for imports. In practice this may be an alternative to borrowing from the United States. \* \* \*

I emphasize again that, in the judgment of the National Advisory Council, it would not be wise to force countries likely to receive financial aid from the United States (referred to hereafter as "recipient countries") to liquidate the private holdings of their nationals as a condition to receiving such aid. But the problem of assisting these countries in locating the private assets of their nationals is separate and distinct. It is this problem which the National Advisory Council and the Executive Departments concerned have been studying for some time.

The problem stems from the fact that nationals of some recipient countries have for many years followed the practice of concealing their assets in the United States. Some hold property directly in their own names; others hold indirectly through intermediaries in third countries, notably Switzerland. These assets are concealed in this country despite the fact that the foreign exchange laws of the recipient countries typically require that foreign exchange assets be declared; some also require the turning over of liquid dollar holdings in exchange for local currency; practically all require that licenses be obtained for the expenditure of foreign exchange assets.

It is important to distinguish between two categories of assets: blocked assets and free assets. By blocked assets we mean those which are frozen in the United States under the Foreign Funds Control of the Treasury Department. It will be recalled that as a wartime measure the President, pursuant to section 5 (b) of the Trading with the Enemy Act, blocked, under control of the Treasury, the private and public holdings in the United States of all of the European countries

except the United Kingdom, Eire, and Turkey. Beginning in October 1945, machinery has been put in effect which provides for the unblocking of assets of persons in most of the formerly enemy-occupied and neutral countries if the government of the country where the beneficial owner of funds resides certifies to the private American custodian holding the assets that there is no enemy interest in such assets. The primary purpose of this procedure is to find concealed enemy property. The procedure is now applicable to all the recipient countries whose assets were blocked. However, not all the nationals of these countries have availed themselves of this procedure, which has the incidental effect of disclosing to their respective governments the ownership of assets in the United States. As a result the Treasury through Foreign Funds Control is still controlling a fairly substantial amount of blocked assets.

Free assets include all the dollar assets owned by nationals of Britain, Turkey, and Eire, for these assets, to repeat, were never blocked. In addition, free assets have accrued in the United States on behalf of residents of the other recipient countries since December 1945 when controls were lifted from all current transactions between the United States and nationals of these countries.

It is obviously impossible to ascertain accurately the amount of private dollar assets owned by resident citizens of recipient countries which are unknown to their governments despite the reporting requirements of such governments. Moreover, we have no controls which require complete and continuous reporting of foreign-owned assets. However, we have made certain estimates based on an analysis of the best facts and figures available to this Government.

As far as the free assets are concerned, we have concluded, as a result of investigations and consultation with the various governments, that they are for the most part known to the governments of the recipient countries. We have estimated that as of June 30, 1947, private persons, including noncitizens, residing in the recipient countries, had free assets in the United States approximating \$4.3 billion. Of this amount \$2.3 billion represents holdings of nationals of the United Kingdom, which has adequate information respecting these assets. In addition, from Foreign Funds Control operations we know that about \$1.3 billion represents assets of residents of recipient countries which have been certified for unblocking and hence are known to those governments. The balance includes proceeds from the liquidation of securities which has taken place in the United States with the knowledge of the appropriate governments; accruals from current transactions which are subject to control by the governments of the recipient countries; and assets of noncitizens resident in these countries. Some free assets may have accumulated here unknown to the respective governments, but we consider that the amounts are probably insignificant.

We come now to the question of the blocked assets held directly in the names of citizens of recipient countries and indirectly for their benefit through Swiss intermediaries. These assets are for the most part unknown to the respective governments; otherwise the appropriate unblocking certifications would have by now been obtained and the identity of the respective owners disclosed. Precise figures on the amount of these blocked assets are not available. Under the existing certification procedure, as has already been indicated, the certification is made directly by the foreign government to the private American custodian holding the assets and no report is made to the Treasury other than general summaries which have been obtained from the countries concerned. To have maintained current records on changes in blocked accounts would have subjected American financial institutions and the Government to unjustifiable costs and difficulties.

According to our best estimates resident citizens of recipient countries hold in the United States approximately \$700 million of blocked assets which are in a form readily available for meeting the balance-of-payment problems of the recipient countries. Of this amount, about \$400 million are held here directly in the names of the resident citizens; the balance of about \$300 million is held indirectly through Switzerland. In addition, resident citizens of recipient countries hold blocked investments in controlled enterprises, in estates and trusts, etc., which cannot readily be liquidated, although most of them are valuable sources of current dollar income. We estimate that they hold directly in this nonliquid form of investment about \$400 million and an additional small but unascertainable amount indirectly through Switzerland.

It appears that so far as the recipient countries are concerned the resident citizens of France have in the United States the largest amount of concealed

private blocked assets in a form which could be used in meeting balance-of-payment problems or to supplement official reserves. We estimate that the amount of the directly held assets in this form of investment would run between \$100 million to \$150 million. The French Ministry of Finance has estimated that these assets amount to about \$150 million. In addition, French resident citizens hold indirectly through Switzerland liquid assets of probably between \$200 and \$250 million.

The policy we should adopt with respect to assisting the recipient countries in obtaining control of the private dollar assets which are hidden in this country by their citizens has been a subject of much discussion in recent months. Representatives of financial institutions have urged that it is fundamental to our free private enterprise system and, in particular to our capital market, to respect private property whether or not it is held by foreign nationals. Some felt that the United States Government should not adopt the policy of cooperating with foreign countries in the enforcement of their exchange control laws. Finally, it was argued that to adopt measures having the effect of forcing the disclosure to foreign governments of private property held by their citizens in the United States would put this Government in the position of supporting partial confiscation of private property. This last point relates to those cases where foreign countries require the surrender of dollar assets, against reimbursement in local currency at unrealistic rates of exchange.

The National Advisory Council gave serious consideration to these views. The Council doubted that under ordinary conditions this Government should assist foreign governments in enforcing their foreign exchange laws. However, these are not ordinary times. Some European countries are in dire need of dollars to permit their survival as free nations. American taxpayers are being called upon to make substantial contributions to European recovery. Moreover, most of the foreign governments have repeatedly asked our assistance in obtaining control of the holdings of their citizens, who have concealed them contrary to the laws and national interest of their countries. It is these circumstances, I am sure, which have inspired marked public interest in the problem and have produced various legislative proposals for action, such as the Kunkel bill (H. R. 4576) and the Norblad resolution (H. J. Res. 268).

The Council studied in detail many alternative proposals for dealing with this problem in an effort to arrive at a solution which would assist recipient countries to obtain the use of concealed private assets in the United States without doing violence to the traditional status of private property. None of these alternatives promised at the same time actually to protect the private interests of foreign nationals, to assist the recipient countries to mobilize the concealed dollar assets of their resident citizens, and to prevent the escape of concealed enemy assets.

The Council concluded that no action should be taken regarding free assets because the amounts which are unknown to the governments of recipient countries are probably insignificant, and in any event serious practical difficulties would be involved. Effectively to search out and take control of these free assets would require exchange controls and other measures which would do maximum violence to our position as a world financial center and to our policy of keeping the dollar substantially free of restrictions.

The Council also concluded, however, that this Government should assist the recipient countries to obtain control of the blocked assets in the United States of their resident citizens. Accordingly, it was agreed that the program described below, which has been developed by the Justice and Treasury Departments, should be put into operation promptly. In the opinion of the Council this program is the most effective way to accomplish the above objective and to prevent the escape of enemy assets.

The program provides that public notice will shortly be given that at the end of three months assets remaining blocked, including assets not certified by the appropriate foreign government as free of enemy taint, will be transferred to the jurisdiction of the Office of Alien Property in the Department of Justice. To permit this Government and the foreign governments concerned to concentrate on the areas where important results are likely to be obtained, accounts containing small amounts of property, say up to \$5,000, will be unblocked in the near future without requiring certification or other formalities except where a known German, Japanese, Hungarian, Rumanian, or Bulgarian interest exists. The Office of Alien Property will take a new census of the assets which remain blocked as of the deadline date. In order effectively to help the recipient countries obtain control

of the blocked assets of their resident citizens, the Office of Alien Property will then promptly carry out the following policies:

(a) To deal with the directly held assets by making available to governments of recipient countries the information from the new census of blocked assets of their citizens, including juridical persons, residing in their territories which remain uncertified as of the public deadline date referred to above. Each country receiving such information will be required to investigate the beneficial ownership of property held in the names of its citizens for the purpose of discovering any enemy interest. Pending a reasonable period for such investigations, such property will not be vested but will remain blocked under the jurisdiction of the Office of Alien Property. If these investigations show that the assets are owned by residents of the country receiving the information the assets will be released.

(b) To deal with indirectly held assets by a vesting program with respect to accounts which remain uncertified after the deadline date. Processing of uncertified assets in Swiss and Liechtenstein accounts for vesting under applicable law as enemy property will be started immediately after the receipt of the census information by the Office of Alien Property. The vesting program will also be applied to uncertified assets held indirectly through recipient countries where the program described in (a) above does not result in disclosure to the beneficial owner's government (e. g., French assets held through the Netherlands). In the absence of definite evidence of nonenemy ownership, full weight will be given to the presumption of enemy ownership arising from the failure to obtain certification. Evidence of nonenemy ownership or interest offered either before or after vesting will be checked in accordance with the usual investigative procedures of the Office of Alien Property. These procedures involve disclosure to the governments of the countries of which persons claiming legal or beneficial interests are residents. Of course, any vested assets which are proved to be nonenemy may be returned under existing law applicable to the return of vested property. The Attorney General has informed the Council that there is adequate authority under the Trading with the Enemy Act, as amended, to carry out all aspects of the above program.

The vesting aspect of this program appears under the circumstances to be the most effective means of rendering help to countries with regard to indirectly held assets. There is no satisfactory alternative to a procedure which will compel foreign nationals either to disclose their concealed dollar assets to their respective governments or to forfeit them to the United States. To date the certification procedure, which applies to Swiss and Liechtenstein accounts, as well as to accounts of recipient country nationals, has not been utilized by many citizens of recipient countries to obtain the unblocking of accounts in the United States. This is so with regard to assets held through Switzerland for resident citizens of recipient countries because the owners of these assets know that Switzerland cannot, under the existing procedure, certify their assets without securing a cross-certification from the government of the country where they reside thus disclosing their identity to their government. Actually, however, there is no effective way to ascertain whether property held in Swiss accounts is Swiss-owned, enemy-owned, or owned by resident citizens of recipient countries, except to rely on the Swiss and other interested governments.

It must be recognized that resident citizens of recipient countries who hold their assets through third countries and who have not revealed such assets to their own government may choose not to declare their assets to their own governments for certification, notwithstanding the announced program to vest these assets and even notwithstanding any amnesty which countries may offer. These persons would, in effect, choose to forfeit their indirectly held assets to the United States rather than to disclose them to their governments. If this proves to be the case, consideration could be given at a later date to the allocation by appropriate congressional action of the vested assets among the recipient countries.

In conclusion, I want to call your attention to the fact that this program also provides for the orderly termination of Treasury's blocking operations. This follows from the fact that, in addition to specifying the treatment to be accorded the uncertified assets in recipient country accounts and Swiss and Liechtenstein accounts, the program calls for the transfer to the jurisdiction of the Office of Alien Property of all other assets remaining blocked as of the public deadline date. Thus German and Japanese assets will be transferred and vested. Hungarian, Rumanian, and Bulgarian assets will be transferred and will remain blocked until a settlement of war claims with these countries is made. Finnish, Polish, and Czechoslovakian blocked assets, which do not exceed \$5 million, will be trans-

ferred and remain blocked for the time being. Yugoslavian, Estonian, Latvian, and Lithuanian blocked assets will also be transferred to the Office of Alien Property and remain blocked until various current problems have been resolved. Spanish and Portuguese assets are still blocked pending the completion of the current negotiations with Spain and Portugal covering looted gold and German assets. If these negotiations are successfully completed before the public deadline date, arrangements can promptly be made for the unblocking of these assets; on the other hand, if the negotiations are not completed by that date, these assets would likewise be covered in the transfer to the Office of Alien Property and would remain blocked pending the conclusion of the negotiations.

It is the intention of the Treasury and Justice Departments to proceed promptly to carry out the above program.

Sincerely yours,

JOHN W. SNYDER,  
*Chairman, National Advisory Council on  
International Monetary and Financial Problems.*

HONORABLE ARTHUR H. VANDENBERG,  
*Chairman, Senate Foreign Relations Committee,  
United States Senate, Washington, D. C.*

**Exhibit 23.—Joint announcement, March 1, 1948, of Secretary of the Treasury Snyder and Attorney General Clark, relating to the transfer of jurisdiction of blocked foreign funds to the Office of Alien Property in the Department of Justice**

Secretary of the Treasury Snyder today announced that effective June 1, 1948, the Treasury Department will cease to have jurisdiction of blocked foreign funds. On that date, the jurisdiction over the remaining blocked assets will be transferred from Foreign Funds Control in the Treasury Department to the Office of Alien Property in the Department of Justice. Attorney General Clark joined Secretary Snyder in urging that persons whose assets may be unblocked under the certification procedure provided by Treasury's General License No. 95 avail themselves of this procedure before June 1, 1948. After that date, outstanding licenses authorizing withdrawals or changes in the assets will become inoperative.

The Attorney General stated that immediately upon transfer he will take a census of all assets remaining blocked. In line with this Government's decision to assist countries which receive financial aid under the European Recovery Program in locating assets of their resident nationals held in the United States, the information concerning the names and assets of such nationals as disclosed by the new census will be given to the governments of the appropriate countries.

In addition, the Attorney General stated that in order to prevent the escape of enemy assets from this Government's control and to implement further this Government's objective to assist countries which receive financial aid under the European Recovery Program, the Office of Alien Property, immediately after receipt of the census information, will begin to process for vesting the assets remaining blocked and held in Swiss and Liechtenstein accounts. The vesting program will also be applied to uncertified assets held indirectly through recipient countries where the census information does not disclose the beneficial owner. Assets, either before or after vesting, may be released upon a showing of nonenemy interest. In such cases, the Office of Alien Property will consult with the government of the country of which the alleged beneficial owner is a resident. It was pointed out that claims for the return of property vested in the Attorney General must be filed within two years after the date of vesting.

Secretary Snyder added that Treasury, Justice, and State Department representatives are currently engaged in discussions with representatives of the Swiss Government concerning certain aspects of the program. It was pointed out that Switzerland is not a country which is to receive financial assistance under the European Recovery Program.

The governments of the European Recovery Program countries included in General License No. 95 are being requested to give their residents public notice of the action which will be taken by the United States on June 1, 1948, and to urge their residents to apply to them immediately for the certification of their assets held in the United States if the assets qualify for certification. Secretary Snyder suggested that persons in the United States holding blocked assets of

foreign nationals immediately inform such nationals of today's announcement.

Treasury officials stated that this announcement in no way affects its control over importation of securities specified on the list attached as a part of General Ruling No. 5.

**Exhibit 24.—Announcement, August 20, 1947, of Secretary of the Treasury Snyder and Acting Secretary of State Lovett, concerning the emergency action taken by the United Kingdom Government to stop the excessive drains on its dollar reserves**

Secretary of the Treasury Snyder and Acting Secretary of State Lovett announced today that consultations which have taken place between the Governments of the United States and the United Kingdom have resulted in an understanding between the two Governments concerning emergency action being taken by the United Kingdom Government to stop the excessive drains to which its dollar resources have been subjected in recent weeks. This understanding is embodied in the attached letters exchanged by the Rt. Hon. Hugh Dalton, Chancellor of the Exchequer, and Secretary of the Treasury John W. Snyder:

TREASURY CHAMBERS,  
*Great George St., London, S. W. 1, August 20, 1947.*

DEAR MR. SECRETARY: H. M. Government have to inform the United States Government that they have found it necessary to take immediate stringent measures to counter the recent excessive drain on their dollar resources. Unless this drain is checked at once H. M. Government will be unable to pursue the objectives of the international monetary and economic policy of which the Anglo-American Financial Agreement is a signal expression. Accordingly the system of transferable accounts will be modified at the close of business today, August 20, so as to make it possible effectively to control dollar outpayments.

This action is of an emergency and temporary nature which H. M. Government consider to be within the intentions and purposes of the Financial Agreement and which they hope will enable them to take appropriate action to assure that the limited dollar resources of the United Kingdom are available for the purposes contemplated by the Financial Agreement and are not diverted to other ends. H. M. Government wish to indicate, however, that developing circumstances will probably make necessary consultations between the two Governments concerning the application of section 8 (ii) of the Financial Agreement in certain cases in which exceptional features exist.

By these means H. M. Government believe that it will be possible to work out in consultation with the United States Government and within the framework of the Financial Agreement and of the International Monetary Fund agreement a constructive policy which will be best suited to changes in the situation as they appear and which will lead towards the objectives laid down in both those agreements.

The restrictions now contemplated should not be interpreted as in any degree indicating a modification of H. M. Government's oft-expressed view as to the desirability of maintaining full and free convertibility of sterling. As a long-run objective, such convertibility is an indispensable element in British financial policy. The steps presently being taken are to be regarded as purely emergency in character.

H. M. Government also wish to state that payments between the United Kingdom and the United States will not be affected by the action which is being taken.

H. M. Government appreciate that in the circumstances which have arisen, provision is made in section 8 (ii) (b) of the Financial Agreement for consultation prior to agreement if the Governments of the United Kingdom and the United States are to continue to invoke the provisions of article XIV section 2 of the Articles of Agreement of the International Monetary Fund. H. M. Government would not propose to notify any further withdrawals, beyond those already notified, from the line of credit, until the consultation contemplated as above has been carried out.

Yours sincerely,

HUGH DALTON.

HONORABLE JOHN W. SNYDER,  
*Secretary of the Treasury, Washington, D. C.*

AUGUST 20, 1947.

MY DEAR CHANCELLOR: The United States Government acknowledges the United Kingdom Government's letter of August 20 and takes sympathetic note of the grave drains to which its dollar resources are currently being subjected. These drains have run at a rate greatly in excess of the normal flow of current transactions with consequent peril to the re-creation of the multilateral payments system which is a major objective of the Anglo-American Financial Agreement.

It is appreciated that the action described in the first paragraph of your letter is of an emergency and temporary nature, and is deemed by you essential to afford the United Kingdom Government an opportunity for instituting measures to protect the system of convertibility from abuses which endanger its survival.

The United States Government notes with satisfaction the assurance of the United Kingdom Government that it will be possible to work out the proposed action within the framework of the Financial Agreement. It also notes with satisfaction the intention of the United Kingdom Government to consult with this Government respecting any action which it may propose in accordance with section 8 (ii) of the Financial Agreement.

The United States Government notes the statement in the final paragraph of your letter.

Sincerely yours,

JOHN W. SNYDER,  
*Secretary of the Treasury.*

RIGHT HONORABLE HUGH DALTON,  
*Chancellor of the Exchequer, Treasury Chambers, London, England.*

**Exhibit 25.—Letters exchanged between Secretary of the Treasury Snyder and Sir Stafford Cripps, Chancellor of the Exchequer of the United Kingdom, relative to the resumption of withdrawals by the United Kingdom against the credit established by the Anglo-American Financial Agreement (release December 6, 1947)**

Secretary Snyder today released an exchange of letters between himself and Sir Stafford Cripps, the Chancellor of the Exchequer of the United Kingdom, whereby it is agreed that it is now appropriate for the United Kingdom to resume withdrawals against the line of credit established by the Anglo-American Financial Agreement of December 6, 1945.

In reviewing the events leading to this exchange of letters, Secretary Snyder recalled that withdrawals against the credit were temporarily discontinued in August on the basis of a mutual agreement between the two Governments. The action was taken simultaneously with the instituting of emergency steps by the United Kingdom to stop an unanticipated and excessive drain on her resources which followed the granting of free convertibility of sterling in July.

Secretary Snyder cautioned however that while progress had been made toward the working out of a satisfactory program dealing with the convertibility of sterling, the serious economic conditions existing in the world would delay for some time the restoration of full convertibility. In this connection he pointed out that there are, however, no restrictions on the convertibility of sterling held in current accounts of United States residents.

Secretary Snyder stated that the resumption of drawings against the line of credit at this time would permit the United Kingdom to continue the purchases in the United States necessary to maintain its present austerity program and hence would not add to inflationary pressures in this country.

Attached are the texts of letters exchanged by Secretary Snyder and Chancellor Cripps.

TREASURY CHAMBERS,

*Great George Street, London, S. W. 1, 4th December, 1947.*

MY DEAR MR. SECRETARY: I refer to the exchange of letters of August 20, 1947, between our two Governments and to the discussions pertaining thereto whereby it was agreed that for a temporary period His Majesty's Government would not notify any further withdrawals against the line of credit established under the Anglo-American Financial Agreement, and it was contemplated that consultation would be undertaken with respect to a constructive program which

would be best calculated to achieve the objectives of the Agreement and at the same time to conserve British dollar resources in this critical period.

As you know, representatives of our two Treasuries have been in frequent consultation and considerable progress has been made toward these ends. Accordingly it now appears to me appropriate for His Majesty's Government to resume drawings against the line of credit.

I should like to take this opportunity to reaffirm the intention of His Majesty's Government to adhere as closely as possible to the objectives of the Agreement at all times and to implement these objectives fully at the earliest possible time.

Yours sincerely,

STAFFORD CRIPPS,  
*Chancellor of the Exchequer.*

HONORABLE JOHN W. SNYDER,  
*Secretary of the Treasury, Washington 25, D. C.*

DECEMBER 5, 1947.

MY DEAR CHANCELLOR: I have your letter of December 4, 1947, advising me of the desire of His Majesty's Government to resume withdrawals against the line of credit established under the Anglo-American Agreement of December 6, 1945. The frequent consultations between the representatives of our two Treasuries lead me to confirm your understanding that, as contemplated in the August 20 exchange of letters between our two Governments and the discussions pertaining thereto, it is now appropriate for your Government to resume drawings against the line of credit.

I am pleased to receive your reaffirmation of the intention of your Government to implement fully at the earliest possible time the principles embodied in the Anglo-American Agreement and to adhere to them as closely as possible at all times.

Sincerely yours,

JOHN W. SNYDER,  
*Secretary of the Treasury.*

RIGHT HONORABLE SIR STAFFORD CRIPPS, P. C., M. P.,  
*Chancellor of the Exchequer, Treasury Chambers, London, England.*

**Exhibit 26.—Statement, January 14, 1948, of Secretary of the Treasury Snyder before the Senate Foreign Relations Committee, on financing the European Recovery Program**

The President, in his message, has laid before you the administration's proposal for a European Recovery Program and in greater detail the Secretary of State has described the need for assistance to Europe and the manner in which, and extent to which, it is recommended that American assistance be given. The financial aspects of the program have been carefully considered by the National Advisory Council on International Monetary and Financial Problems. This is a program for the economic recovery of Europe; it is not merely a relief program. The Council throughout has approached the foreign financial policy issues involved to determine what specific lines of action would most effectively contribute to this basic objective of economic recovery. As Chairman of the Council, I welcome this opportunity to set forth the conclusions reached by the Council and then to comment on the financing of the program.

First, I shall review the principal financial aspects of the program, then say something about the measures which we shall expect the European countries themselves to take, and finally comment briefly on the financing of the aid program.

**LOANS VERSUS GRANTS**

The first matter which I wish to take up is the question of the form in which aid should be extended to Europe. This assistance should be provided as a combination of grants-in-aid and loans. The criterion for selecting one or the other form should be the capacity of the participating countries to earn, in the years to come, the dollars which would be needed to pay interest and principal. We must keep in mind that these countries have already incurred an obligation for large annual payments of interest and amortization arising from the dollar loans

extended to them over a period of years by the United States Government or the United States private capital market. We should take care not to insist that these countries contract additional dollar debts which will absorb so much of their dollar earnings as to operate to the disadvantage of future trade and private investment. If the entire aid for European countries were to be on a loan basis, it would be practically impossible for them to meet the additional annual charges from their earnings of dollars, even after trade and investment return to normal. The proportion of total aid which can prudently be provided on a loan basis must depend on the estimate of the borrowing country's capacity to repay in dollars and also on the degree of flexibility which can be introduced into the terms of repayment.

The International Bank may be expected to finance part of the capital requirements of the European countries, particularly where they require the financing of permanent additions to their equipment. It does not seem likely, however, that the Bank will be able to carry the whole, or even the major, part of the program which properly ought to be put on a loan basis. We propose, therefore, that when the Administrator for Economic Cooperation decides, after consulting the National Advisory Council, that it is desirable to extend aid on a credit basis, he will allocate the funds to the Export-Import Bank of Washington, which will then make the loan as directed and on terms specified by the Administrator in consultation with the National Advisory Council. This procedure will enable the Administrator to draw upon the broad experience of the Export-Import Bank in the making of foreign loans. Incidentally, this is one example of the manner in which the National Advisory Council would perform its customary role of coordination of United States foreign financial policy. I shall be glad to describe this role in greater detail if the members of the committee wish me to do so.

#### GUARANTIES

It is also important that the American business enterprises be given opportunity to participate in the recovery program by making new investments abroad, or by expanding existing facilities where the program calls for additional capital equipment. In this way they will contribute to the restoration of Europe, while at the same time they will be carrying out their own programs for expansion abroad. But we must recognize that new investments would be made at a time of great uncertainty and that investors may anticipate encountering difficulty in converting their earnings or their original principal into dollars. To facilitate private investment, therefore, it will probably be necessary for the Government to guarantee the convertibility into dollars of local currency earned by the investment or available for the repatriation of the original investment. While we may expect that the participating countries will try to make dollars available, it is possible that they will not have adequate dollars to permit conversion. The Economic Cooperation Administration should not be expected to guarantee American companies making these investments against normal risks, but merely to give them a transfer guaranty. We propose that not more than 5 percent of the funds appropriated by Congress for the program should be obligated for these guaranties, and that the guaranties themselves should not exceed the amount of the original investment and should not be extended more than 10 years from the termination of the 4-year program.

#### LIQUIDATION OF FOREIGN ASSETS

Some people have argued that the participating countries should pay for part of the program by using up their gold and dollar assets in the United States, and by liquidating the American investments of their own citizens. I need not labor the point that the European countries must have some gold and dollar reserves to finance their international trade if they are to return to normal operations after 1952. It should be kept in mind that the Economic Recovery Program is not intended to cover the entire import requirements of these countries. It would be folly on our part to force the European countries to use up their gold and dollar balances to a point where they would not have adequate funds to operate smoothly through ordinary commercial and financial channels. By insisting that the participating countries exhaust their gold and dollar balances, we would merely add further instability to their monetary systems. As a matter of fact, all of the participating countries, except Switzerland, Turkey, and Portugal, have already reduced their dollar balances to or below the amount which would normally be regarded as safe.

When we turn to the possibility of liquidating European investments in the United States, we must also look at the problem in terms of its long-run consequences. These investments annually earn a dollar income, which will be used to cover part of the cost of the program, and which will be used in the future to meet part of the cost of imports after the program ends. Without these investments, the balance-of-payments situation of the participating countries will be worse in the future. I doubt very much that it would be wise policy for the United States to require European countries as a general rule to liquidate the property owned in the United States by their nationals as a condition for receiving aid from this Government.

Even if these countries could liquidate all of the property owned by their citizens in the United States, they could not pay for more than a small part of the program. We estimate that as of last June 30, the dollar assets held by persons in the recipient countries amounted to about \$4,800,000,000. Of this amount \$1,500,000,000 consisted of direct investments, and a considerable part of the remainder also consists of holdings which would be difficult to liquidate. Some of these assets are already pledged for loans, while for many of the countries involved the amounts held here are negligible.

Some of the governments, however, will decide to liquidate some or all of their holdings so as to pay for imports. In practice this may be an alternative to borrowing from the United States. We certainly will not object to the governments using these funds. The question of policy for us to decide is the extent to which we can help these countries in obtaining control of these assets. In the case of unblocked assets, the only way the European governments can get control of them under present circumstances is through the compliance of their citizens with local laws. In fact, a considerable portion of the assets formerly blocked in the United States had been unfrozen as a result of such action. While we do not have exact data on unblocked assets, we believe the amount is comparatively small.

A large part of the blocked assets are still blocked because their owners have not obtained from their own governments the certification that there is no enemy interest in their assets, which is required by the United States Treasury before the assets are unblocked. The National Advisory Council and the executive departments concerned with this matter are giving very careful study to this problem. We hope to reach a final view as to the most satisfactory solution of this problem very shortly, and I should like at that time to appear before you again to outline our program.

#### OFFSHORE PROCUREMENT

It will not be possible to obtain all the goods needed for the recovery program in the United States, nor would it be desirable to attempt to do so. Some commodities are in short supply here, and purchasing abroad would leave more available for our own population and would in many instances reduce the net cost of the program. The needed amounts of food cannot be obtained in the United States. A large percentage of the requirements of grain, fats and oils, meat, and other agricultural products can be procured only in other countries of the Western Hemisphere. In this manner we can make it possible for countries in the Western Hemisphere to supply larger amounts of foods and materials to Europe and at the same time maintain essential imports from the United States.

It is the opinion, therefore, of the National Advisory Council that the Economic Cooperation Administrator should be authorized to expend funds for the procurement of supplies for the recovery program outside of the United States. This would relieve pressure upon goods and services in short supply in the United States, and would in some instances have the further effect of assisting third countries in maintaining needed imports from the United States. We definitely would not permit the use of dollars to buy goods abroad where the supplies available in the United States at reasonable prices are adequate for our needs as well as for the requirements of foreign countries. In any case, all purchases would be made according to an agreed program, and the administering agency would control the use of the funds appropriated by Congress. In addition to purchases in the Western Hemisphere, there are special instances where it may be in our interest to procure certain essential products in one participating country for delivery to another, making payment in dollars. For example, we might buy steel or coal in one participating country for delivery to another. The dollars which are received would then be used by the supplying country to pay for imports from the United States, thus reducing the need for direct expenditures by the United States for aid to the supplying country.

**MONETARY STABILIZATION**

If the recovery program is to be successful, adequate measures for monetary stabilization must be taken promptly and with vigor by the European countries. At the Paris meeting the 16 participating countries undertook "to apply any necessary measures leading to the rapid achievement of internal financial, monetary and economic stability while maintaining in each country a high level of employment." They have recognized that recovery is not possible as long as inflation continues, and unless production is increased. The measures which should be taken must vary somewhat from country to country, but the general outline is clear. Budgets should be brought into balance rapidly, so that the necessary expenses of government can be met without increasing the public debt and without increasing direct inflationary pressures. In most countries modifications in tax structures and control of expenditures will be needed. As determined steps are taken, the trend toward budgetary balances, increased production, and steadying prices will all interact upon one another to facilitate stabilization.

**BILATERAL AGREEMENTS**

The administration proposes that each country receiving aid from the United States shall enter into a separate agreement with this Government, which will cover the terms on which aid will be given. The European signatories will undertake to adopt the financial and monetary measures which are necessary to stabilize their currencies and to maintain and establish proper rates of exchange. These agreements will also cover such matters as cooperation with other countries, the proper use of the goods supplied, and the establishment of a separate account for the local currency equivalent to the aid supplied in the form of grants. Moreover, each country would agree to supply the United States Government with full information about any pertinent aspect of the recovery program and to give a report on the program to its own people. On the basis of the information which the cooperating countries will give us, and also from the reports of our own missions in these countries, we can be informed about the situation and so be in a position to discuss with the country the measures which it has taken, or ought to take, to contribute to the recovery of Europe and its own stability.

**LOCAL CURRENCY EQUIVALENT OF GRANTS**

We have a direct interest in assuring that the aid we provide to Europe makes a maximum contribution to the reduction of inflationary pressures and the restoration of stability. To this end we propose that each participating country will deposit in a special account the local currency equivalent at an agreed rate of exchange to the dollar cost to this Government of the goods supplied through grants-in-aid. These accounts should be drawn upon only for constructive, stabilizing purposes. In many instances it will probably be best either to let the accounts remain idle or to authorize the use of this local currency to effect a net reduction in the government's debt. There may be instances, however, in which it might also be used for reconstruction or development, or other purposes which would contribute to the increase of production in the country. In the view of the National Advisory Council, such expenditure should be undertaken only in agreement with this Government.

I wish to make it clear that the National Advisory Council, in considering the financial measures which the European countries should take, had very much in mind the necessity of preserving the spirit of free and friendly cooperation between this Government and the European governments. I am sure this country does not wish to dictate to these friendly countries either the particular measures they should take, or the exact manner in which they should be taken.

**EXCHANGE RATES**

The adjustment of some exchange rates may be expected in the course of European recovery. Inflation in Europe in certain instances has given rise to exchange rates which result in an overvaluation of the currencies in relation to the dollar. This state of affairs has tended to hinder the exports of such countries and, at the same time, to make imports relatively cheap in terms of local currency. In some cases countries have resorted to export subsidies, by means of special exchange rates or have used other measures in conflict with our own long-range international economic program.

The determination of an appropriate exchange rate is a very complex matter, involving the widest range considerations relating to prices, costs, and balances of payments. The difficulties in setting exchange rates under present conditions are such that, although the rates of some of the participating countries will

certainly have to be adjusted, the timing of these adjustments will vary from country to country. Accordingly, it would not be good policy for us to insist upon an across-the-board modification of exchange rates before we extend aid. The revision of rates of individual countries should instead be considered as a part of a developing program of internal and external stabilization in conjunction with United States assistance. To insure that these revisions will be undertaken where necessary, the recipient countries will be asked to agree that when, in the opinion of the United States Government, their exchange rates are imposing an unjustifiable burden on their balances of payments, they will consult with the International Monetary Fund about revision. Countries which are not members of the Fund would be expected to consult directly with the United States Government. The National Advisory Council is making continual studies of the exchange rate problem and is the agency directed by Congress to coordinate policy in this matter.

#### STABILIZATION LOANS

After progress has been made toward internal stabilization in the European countries by balancing budgets, increasing production, and expanding trade, the time will arrive when it may be appropriate to make stabilization loans which would give greater assurance to the people of the participating countries that the stabilization will be permanent. There is greater confidence in the stability of money if there is gold or dollars in the hands of the central bank. At the appropriate point in the program it would be well worth while to give countries this additional assurance by extending a loan to provide monetary reserves. If the loan is given prematurely, the reserves might be dissipated through balance-of-payments deficits. A stabilization loan to be effective should come when there is reasonable assurance that the internal situation of the country concerned is satisfactory, and that it will be able to maintain its exchange rate at a stable level for a considerable period of time. It is not likely that this situation will be reached immediately, but it is possible that in the course of 1948, and probably in 1949, some countries will be in a position to use stabilization loans effectively. At the appropriate time Congress may then be requested to appropriate additional funds to be used by the United States Stabilization Fund to make these loans.

#### FINANCIAL REQUIREMENTS

Before I conclude my remarks on this phase of the European Recovery Program, I should like to comment briefly on the amount needed to carry it out. The President has recommended that \$6,800,000,000 be appropriated to support the program during the 15 months ending June 30, 1949. The National Advisory Council has carefully reviewed the procedures which have been used by the interdepartmental committees of experts in arriving at this figure. These procedures involved a critical examination of European needs and of availabilities in the United States and in other major supplying areas, and careful estimates of European dollar income and resources. The National Advisory Council believes that this approach is sound and has concluded that the recommended amount is needed to achieve the objectives of the program.

Finally, I should like to make a brief comment concerning the financing of the program. It would serve no good purpose to ask the European countries to put their own houses in order if we, ourselves, adopted methods which might accentuate inflation in the United States or upset our own economic stability. It is my firm opinion that we should finance the European Recovery Program within a balanced budget. I am confident that, so long as we pursue a sound fiscal policy, we shall be able to cover the cost of the European Recovery Program out of current revenues.

---

#### TAXATION DEVELOPMENTS

**Exhibit 27.—Statement of Secretary of the Treasury Snyder before the House Ways and Means Committee, January 16, 1948, on H. R. 4790, a bill to reduce individual income tax payments**

I am glad to have this opportunity to appear before the Ways and Means Committee to discuss the issues raised by H. R. 4790.

I am sure that this committee fully appreciates the great responsibilities I have as Secretary of the Treasury in pursuing a sound fiscal policy. The financial integrity of our Government must always be my first consideration. Its founda-

tion must rest upon a revenue system that will provide the cost of maintaining Government and financing its necessary functions, with provision for funds to manage, service, and reduce the national debt.

I can make no other approach to our tax problems than through a realistic appraisal of the hard facts of the current situation. It is not a question of what we would like to have at the moment, but what in the long run is in the national interest. Nor is it a matter of what would be desirable and proper under different circumstances but what is the proper action to take under the conditions which now prevail.

The cold facts are that present economic conditions, budgetary considerations, inflationary pressures, and debt management problems require the maintenance of Government revenues at present level.

It is from these viewpoints that I wish to discuss the issues raised by H. R. 4790.

This bill would reduce individual income tax liabilities by \$6.2 billion for a full year of operation. In addition, estate and gift tax liabilities under the provisions at present in the bill would be reduced by \$60 million. If this bill were to be enacted, effective for calendar year 1948 incomes and withholdings at the lower rates were to start April 1, the surplus of \$7.5 billion estimated in the President's budget for the fiscal year 1948 would be reduced by \$1.1 billion. But in the fiscal year 1949 receipts would decrease \$6.5 billion and refunds would increase \$0.4 billion. The estimated surplus of \$4.8 billion in fiscal 1949 would be converted into a deficit of \$2.1 billion, thereby increasing the public debt.

Under current conditions, it is my firm conviction that a tax reduction of the magnitude involved in H. R. 4790 would constitute a major threat to the Nation's financial integrity and economic stability. I cannot conceive of any considerations under existing conditions that would justify a tax policy or program that would fail to balance the budget in the fiscal year 1949 and also make provision for the adequate retirement of the public debt.

Our progress in debt retirement since the peak of \$279.8 billion, which was reached on February 28, 1946, to the present level of \$257 billion has been effected largely by drawing down the large Treasury cash balances from a wartime to a peacetime level. Only in this last fiscal year of 1947 were we able to make a substantial reduction from surplus tax revenues. We have now reached a position where the anticipated surplus for fiscal year 1948 will make possible a substantial debt reduction which provides one of the most effective anti-inflationary weapons possessed by the Government.

Treasury debt retirement and debt management policies have been continuously directed against the inflationary monetary pressures. Not only are we able to follow the sound principle of reducing the public debt during a period of prosperity in order to maintain financial integrity, but at the same time we are able to maintain a wholesome pressure against inflation.

The gross public debt has been reduced by over \$23 billion since its peak was reached in February 1946. Not only has this entire amount been taken out of the debt held by the banks, commercial banks and the Federal Reserve Banks, but through the sale of Government securities to nonbank holders, including individuals and trusts, an additional \$2 billion has been moved out of the banking system.

The effect of the reduction of commercial-bank-held Government securities is to reduce bank deposits and the money supply. I need not point out to this committee the importance to our economy to continue this effective program.

It is clear that the present inflationary pressures in our economy require that the revenue loss resulting from any tax adjustments should be offset by upward revisions in other taxes. There must be no reduction in aggregate revenue. In view of my responsibilities for the sound management of the Federal finances, I cannot endorse a bill which would reduce revenues when income and employment are at peak levels and which would result in a deficit in fiscal year 1949.

#### ECONOMIC CONDITIONS

Last spring, when your committee was considering H. R. 1, a bill which would have reduced our tax revenues very substantially, it was urged that such a reduction was necessary to forestall a decline in production and business activity. Subsequent developments have shown that this apprehension was not well-founded.

Since the President's veto of H. R. 1, national income, production, and employment have all made new record peacetime highs. Inflationary pressures have also

continued strong. Production has continued virtually at capacity levels; and there is every reason to believe that if a tax reduction bill had been enacted over the President's veto, the result would have been, not more production, but even higher prices.

The same considerations which impelled the President to veto H. R. 1—and also to veto its successor bill, H. R. 3950—are controlling today. As the President said in his veto message on H. R. 1:

"Ample evidence points to the continuation of inflationary pressures. Tax reduction now would increase them."

This has proved to be a sound conclusion.

#### THE NEED FOR A TAX ADJUSTMENT

From June 1946 to November 1947, consumer food prices rose 39 percent; all consumer prices rose 24 percent. (See table B, p. 314, in statement submitted to Senate Committee on Finance.)

The high cost of living has brought real hardship to many families with low incomes. Price increases have made Federal taxes unduly burdensome for these taxpayers. It is for this reason that the President has recommended a cost-of-living adjustment in the individual income tax.

The President's suggested adjustment is in the form of a tax credit of \$40 per capita. Its effect is to increase the exemptions from \$500 to a little over \$700 per capita at the bottom of the income scale and by amounts which gradually decrease for taxpayers in the higher brackets, where there is less pressing need for a cost-of-living adjustment. It is estimated that this would drop 10.3 million taxpayers with the lowest incomes from the income tax rolls. It would cost \$3.2 billion of revenue in a full year. Ninety-three percent of this relief would go to taxpayers with net incomes under \$5,000. (See table J, p. 319.)

As the President recommended, the revenue loss resulting from the cost-of-living adjustment should be made up by increasing the tax on corporate profits. Taxes on corporations have been considerably reduced since the war years. The corporation excess profits tax was repealed, as was the declared-value capital stock tax. The corporation income tax was reduced. Since that time and under the inflationary conditions which have persisted, many corporations now realize profits greatly in excess of those ever realized in a stabilized peacetime economy. Under existing conditions, the fairest way of levying a tax on corporate profits which the President recommended would be to reenact the excess profits tax, with a few modifications. The small corporations should be exempted by providing a specific exemption of \$50,000 of excess profits for all corporations. The rate should be reduced from the 85.5 percent in effect for 1945 to 75 percent and the standards for normal profits—both the average earnings and invested capital credits—should be raised by 35 percent. With these modifications the tax would still yield the \$3.2 billion needed to offset the revenue loss resulting from the individual income tax cost-of-living adjustment. The tax would apply only to 22,000 corporations with the largest excess profits, out of a total of 360,000 taxable corporations. The imposition of a corporate excess profits tax to compensate in revenue for the cost-of-living tax adjustment is the most equitable way of maintaining the Federal revenues at their present strength and with the least adverse effect on our economy.

Under the President's proposal, we will maintain a balanced budget, including provision for the Marshall plan, and make substantial payments on our public debt. His proposal makes only a temporary change in our tax system leaving basic structural changes to a more appropriate time when our entire tax structure can be revised on an equitable basis.

#### COMMENTS ON H. R. 4790

I turn now to specific comments on H. R. 4790. I have appended to my statement a number of statistical tables to aid the committee in its consideration of the bill. (Tables omitted. See tables in statement submitted to Senate Committee on Finance, pp. 314 to 325.)

H. R. 4790 includes the following tax reducing provisions: An increase in the per capita exemption from \$500 to \$600, resulting in a revenue loss of \$1,744.7 million; a special additional exemption of \$600 to all persons 65 years of age and over, resulting in a revenue loss of \$268.2 million; a special exemption of \$600 for

the blind to replace the present deduction of \$500, resulting in a revenue loss of \$300,000; the equal division of incomes of husbands and wives for tax purposes resulting in a revenue loss of \$803.5 million; an increase in the standard deduction for single persons and married couples filing joint returns with adjusted gross incomes of over \$5,000, resulting in a revenue loss of \$93.8 million; a reduction in tax rates ranging from 30 percent for taxpayers with net incomes after exemptions of \$1,000 or less to 10 percent for amounts of net income after exemptions in excess of \$4,000, resulting in a revenue loss of \$3,334.4 million; and repeal of the 1942 amendments relating to the estate and gift taxes as they apply in community-property States, resulting in a revenue loss of \$60 million. The total revenue loss from the reduction of both income and estate tax would be \$6,305 million in a full year.

The revenue loss from all the individual income tax provisions amounts to \$6.2 billion for a full year. The estimates of revenue loss from each of the individual income tax changes are given by net income tax classes in table L, p. 321.

Under present law there would be 52.1 million income taxpayers in 1948. The bill would remove 6.3 million from the tax rolls. Of the total number dropped, the \$100 increase in the per capita exemption accounts for 5.3 million and the special exemptions for the aged and the blind for 1 million.

#### INCREASE IN EXEMPTIONS

The individual income tax exemptions were lowered several times during the period after 1939 to increase the Federal revenues in support of the defense and war effort. Millions of individuals were added to the tax rolls, the number of taxable returns increasing from 4 million in 1939 to almost 43 million in 1945. (See table R, p. 325.)

The first postwar change in exemptions was made effective in 1946 by the Revenue Act of 1945. The normal tax exemption of \$500 was revised to take into account marital and dependency status. This was done by making the \$500 per capita system which since 1944 was applicable only to the surtax also applicable to the normal tax.

The present exemptions which had their origin in the wartime emergency would be too low under peacetime conditions even if there had been no price increases. However, consumer prices increased 31 percent from 1944 to November 1947 alone.

For these reasons the President on several occasions has stated that the millions of taxpayers with low incomes should have high priority for relief from their wartime tax burdens. It is for these reasons that he has recommended in his State of the Union Message the tax credit of \$40 per capita as a cost-of-living adjustment. Although the economic and budgetary situation does not permit a reduction in total taxes, the Federal tax system should, nonetheless, be adjusted in a manner which would bring relief to the millions of hard-pressed taxpayers with the lowest incomes. This can best be done under the President's recommended taxpayer credit which would completely relieve 10.3 million low-income taxpayers from income tax this year.

H. R. 4790 would increase the exemptions from \$500 to \$600 per capita. This increase is inadequate in the light of the very substantial increase in the cost of living.

#### INCOME SPLITTING

The bill contains a provision which would permit married couples filing joint returns to divide their combined incomes equally between them in computing their income taxes. This is designed to eliminate a long-standing tax discrimination against married couples residing in noncommunity-property States. I do not question the importance of the problem to which this provision is addressed because several common-law States have, in recent years, adopted community-property laws designed primarily to give their residents the tax advantages previously enjoyed only in the original community-property States. The subject is one which should be given a high priority among the structural changes in the Federal tax system. I believe, however, that it would be unwise to make this or any other major structural change in the current situation which would result in a substantial revenue loss. As previously indicated, splitting the incomes of husbands and wives would result in a loss of \$803.5 million, 97.5 percent of which would go to individuals with net incomes in excess of \$5,000.

## RATE REDUCTIONS

H. R. 4790 would make a substantial reduction in individual income tax rates. It would reduce the normal tax and surtax rates by 30 percent for taxpayers whose net incomes after personal exemptions are \$1,000 or less, and by percentages ranging from 30 to 20 in the notch area between \$1,000 and \$1,400. For net incomes after exemptions between \$1,400 and \$4,000, the reduction would be 20 percent. For amounts of income in excess of \$4,000, the reduction would be 10 percent. The effect of these rate changes on the combined normal tax and surtax bracket rates is shown in table M, p. 322.

Under this bill 23.7 million taxpayers would get a 30 percent rate reduction; 7.9 million would get a rate reduction ranging from 30 to 20 percent; 12.5 million taxpayers would get a 20 percent reduction. The remaining 1.7 million would get reductions ranging from 20 percent down to approximately 10 percent. (See table N, p. 322.)

As I have already stated, any tax adjustment at this time should be concentrated at the bottom of the income scale. The most efficient way of doing this is through the cost-of-living tax adjustment credit recommended by the President. I cannot endorse any general reductions in tax rates under present circumstances. As soon as the inflationary forces have been checked, as I have previously said, it will be proper to fit rate reductions into a well-balanced tax revision program designed to maintain incentives and broad consumer markets.

## EXEMPTIONS FOR THE AGED AND THE BLIND

The bill provides an additional \$600 exemption for persons over 65 years of age. It also provides a similar exemption for the blind. The exemption for the blind is not a new feature of the tax law. It merely makes a technical revision of the present allowance and increases the amount by \$100. These as well as other low-income groups and disabled persons have been hard-pressed by rising prices and the high cost of living. It is my view that the cost-of-living adjustment recommended by the President is the most equitable way of providing tax relief for the aged, the disabled, and low-income taxpayers generally.

## INCREASE IN THE STANDARD DEDUCTION

H. R. 4790 would increase the standard deduction for single persons and married couples filing joint returns if they have incomes above \$5,000. The increase in the deduction is from \$500 to 10 percent of adjusted gross income for those with incomes between \$5,000 and \$10,000 and \$500 to \$1,000 for those with incomes of \$10,000 or more.

The increase in the standard deduction for married taxpayers is apparently intended as a necessary part of the split-income provision. It is designed to equalize the standard deduction allowed to residents of common-law States with that now allowed to residents of community-property States. The increase in the standard deduction for single persons is not, however, related in any way to the split-income provision. It would reduce the taxes of single persons with incomes in excess of \$5,000 if they elected to use the standard deduction. I can see no justification for this provision.

## REPEAL OF 1942 ESTATE AND GIFT TAX AMENDMENTS

The 1942 estate and gift tax amendments were in general designed to equalize the tax treatment of gifts and transfers of property at death in community-property and common-law States. The amendments have been tested in the Supreme Court and held to be constitutional. H. R. 4790 would repeal these amendments and again give the residents of community-property States the benefits of splitting property for gift and estate tax purposes. Moreover, it is my understanding that it is contemplated that the bill in later form will include a provision which would exempt transfers between husband and wife under the gift tax to the extent of 50 percent and completely exempt such transfers under the estate tax up to 50 percent of the net estate.

If all married couples took full advantage of this provision, the combination of such estate and gift tax changes would involve a loss in revenue amounting to \$245 million, or 30 percent of the yield of these taxes. As I have already stated, this is not the proper time to make such major structural changes in the tax system involving a significant loss of revenue.

## THE PRESIDENT'S PROGRAM COMPARED WITH H. R. 4790

The benefits to individuals are distributed more equitably under the President's cost-of-living adjustment than under H. R. 4790. H. R. 4790 removes 6.3 million from the tax rolls. The President's program removes 10.3 million. In addition, taxes would be lower under the President's program for single persons with net incomes—before personal exemptions—up to \$968, or gross incomes up to \$1,050; for married persons with no dependents up to \$1,937, or gross incomes up to \$2,125; for married persons with two dependents up to \$3,874, or gross incomes up to \$4,300, et cetera. Altogether, the President's program provides greater relief to 13 million taxpayers with the lowest incomes. These are the taxpayers who are in the most urgent need of relief from the burdens of the present high cost of living.

Under the President's individual income tax adjustment, of \$3.2 billion, 93 percent would go to individuals with net incomes under \$5,000. This compares with 66.3 percent under H. R. 4790.

It is also true that H. R. 4790 reduces the taxes of individuals with net incomes in excess of \$5,000 by \$2.1 billion as against \$0.2 billion under the President's recommendation. It is clear that H. R. 4790 goes far beyond the requirements of a cost-of-living adjustment especially with respect to the \$2.1 billion relief given to individuals with incomes in excess of \$5,000.

## CONCLUSION

In the light of all the facts, the conclusion is inescapable. I must oppose H. R. 4790 because it is neither in the interest of sound fiscal management of the Government nor in the public interest. It is unbelievable that any tax proposal would be seriously promoted that would produce a budget deficit and an increase in the public debt of \$2.1 billion in the fiscal year of 1949.

I must repeat, that in the present circumstances, there should be no general tax reduction. As the President has recommended, any revenue loss from tax adjustments to relieve taxpayers from the impact of high cost of living should be recouped by increasing the taxes on corporate profits.

The tax system is being called upon to play a major role in this country's struggle against inflation. We have preserved our financial strength. Let us not undermine it at the critical time when it can serve us best.

In his State of the Union Message, the President said:

"When the present danger of inflation has passed we should consider tax reduction based upon a revision of our entire tax structure.

"When we have conquered inflation, we shall be in a position to move forward toward our chosen goals."

On my appearance before this committee last year I indicated what I conceive to be our chosen goal in taxation. It is the revision of the tax system on the basis of fundamental principles. In that revision, we should seek to correct existing inequities. I quote from my statement of last May:

"I believe that a sound tax system should meet the following essential tests. The tax system should produce adequate revenue. It should be equitable in its treatment of different groups. It should interfere as little as possible with incentives to work and to invest. It should help maintain the broad consumer markets that are essential for high-level production and employment. Taxes should be as simple to administer and as easy to comply with as possible. While the tax system should be flexible and change with changing economic conditions, it should be possible to achieve this flexibility without frequent revisions of the basic tax structure. A stable tax structure, with necessary flexibility confined largely to changes in tax rates and exemptions, will make it easier for business and Government to plan for the future."

I have a firm conviction that pursuing these principles we can together build a peacetime system of taxation that will play an important role in keeping this country prosperous.

#### Exhibit 28.—Statement of Secretary of the Treasury Snyder submitted to the Senate Committee on Finance, March 1, 1948, on H. R. 4790, a bill to reduce individual income tax payments

I am glad to have an opportunity to present to this committee my views on the House bill, H. R. 4790. I shall confine my remarks to the more important issues raised by the bill.

The committee fully appreciates, I am sure, the compelling considerations which require me, as Secretary of the Treasury, to place the protection of the financial integrity of our Government above all other objectives. A sound financial structure is the essential cornerstone of the Nation's economy. Wise management of the Government's fiscal affairs will insure a continued contribution to lasting prosperity, to further industrial growth and expansion, and to higher standards of living. This requires that in considering tax reduction and tax revision we never lose sight of the paramount importance of preserving the strength of the revenue system at a level adequate to finance necessary Government services and to provide funds for servicing and reducing the national debt.

I want to stress the importance of gearing any tax bill to the needs of the Government's basic financial policy. The Federal tax system must produce large amounts of revenue if essential domestic governmental services are to be maintained, the public debt reduced, our foreign commitments fulfilled. Premature weakening of our revenue system will involve serious consequences both for our domestic prosperity and for the peace of the world.

I recognize that postponement of tax reduction requires an unusual measure of self-denial. Each of us would welcome relief from the high taxes necessitated by the cost of the war. However, the financial consequences of the war are still with us. In addition to the normal expenses of running the Government there are heavy demands on the budget for national defense, the care of veterans, the servicing of the war debt, and the rehabilitation of war-torn countries.

#### THE BUDGETARY SITUATION

The present tax system, in combination with high levels of employment and national income, resulted in a surplus of \$754 million during the fiscal year ending June 30, 1947. In the current fiscal year the surplus will for the first time reach substantial proportions. This affords an opportunity to make a significant reduction in our large public debt. In his Budget Message, the President estimated that in fiscal year 1948 it will be possible to apply \$7½ billion to debt reduction. During the past 4 months, which included, of course, some of our best tax collection periods, we have used more than \$4 billion of the surplus to apply to debt reduction. This debt reduction would have been impossible had tax reduction proposed in H. R. 1 become effective last year.

For the fiscal year 1949, the anticipated decline in nontax receipts, coupled with the increased expenditures projected in the President's budget will reduce the surplus available for debt reduction in that year to \$4.8 billion. (Table A, p. 314.) I believe that this amount of debt reduction is desirable under present conditions of full employment and general prosperity. We must ever bear in mind the fact that the public debt of this country is in excess of \$250 billion. If we continue to make the very best use of our opportunities, it will still take many years to make an appreciable dent in the size of the public debt. We must make sizable payments on the debt in good years for we know that there may be years in the future when no payments can be made.

#### A COST-OF-LIVING TAX ADJUSTMENT

Under current economic conditions it is essential to maintain the present level of Government receipts. This, however, does not preclude some readjustment in the distribution of the tax load. On the contrary, the persistence of high prices makes some readjustment imperative. During the second half of 1947 wholesale prices rose at an annual rate of 21 percent and consumers' prices, 13 percent. By the first of this year, wholesale prices were 45 percent and consumers' prices 25 percent higher than in June 1946. (Table B, p. 314.)

Although the Nation is operating at peak levels and the country is enjoying higher standards of living than ever before, some groups in the population are suffering real hardship. These include not only families with relatively small fixed incomes but also others whose incomes have not kept pace with the increase in the cost of living. The problem, of course, is most serious for those in the lower-income groups who have no appreciable savings to fall back on as a cushion against high prices.

Estimates of what people spend in relation to their incomes graphically illustrate the hardship suffered by low-income groups. It has been estimated that in 1946 about a third of the families with incomes below \$3,000 spent more than their income. (Table C, p. 315.) They financed consumption by dissipating accumulated savings and by going into debt. Under present conditions the taxes

paid by the lowest-income groups reduce the already inadequate incomes available for minimum living standards. Tax reduction alone cannot provide adequate relief to this group. But the right kind of tax adjustment can make some contribution to the relief of the plight of low-income people. Since fiscal and economic considerations preclude any reduction in the over-all strength of our tax system, relief to this group should be provided by appropriate increases in other taxes.

The President recognized that inflation has brought real hardship to millions of families with low incomes and recommended a cost-of-living adjustment in the form of a tax credit of \$40 per capita. He recommended also that the revenue loss resulting from this adjustment should be made up by increasing the tax on corporate profits. As I indicated in my statement before the Ways and Means Committee:

"Under existing conditions, the fairest way of levying a tax on corporate profits which the President recommended would be to reenact the excess profits tax, with a few modifications. The small corporations should be exempted by providing a specific exemption of \$50,000 of excess profits for all corporations. The rate should be reduced from the 85.5 percent in effect for 1945 to 75 percent and the standards for normal profits, both the average earnings and invested capital credits, should be raised by 35 percent. With these modifications the tax would still yield the \$3.2 billion needed to offset the revenue loss resulting from the individual income tax cost-of-living adjustment. The tax would apply only to 22,000 corporations with the largest excess profits, out of a total of 360,000 taxable corporations. The imposition of a corporate excess profits tax to compensate in revenue for the cost-of-living tax adjustment is the most equitable way of maintaining the Federal revenues at their present strength and with the least adverse effect on our economy."

We cannot escape the obligation to find a source of replacement revenue to compensate for that lost by providing tax relief to low-income groups. The President's program accomplishes this through the excess profits tax. In view of the record earnings of some corporations, this appears to be a sound solution both on equity and economic grounds. I do not know of any other course of replacement revenue that measures up to the required tests.

#### COMMENT ON H. R. 4790

I now turn to an examination of the principal provisions of H. R. 4790. These provisions can be briefly stated.

The bill would increase personal exemptions from \$500 to \$600; would permit husbands and wives to divide their incomes equally for tax purposes; and would reduce tax rates by percentages ranging from 30 percent for taxpayers with small incomes to 10 percent for those with large incomes. In addition, the bill would grant a special \$600 exemption, and would increase the standard deduction for single persons and married couples filing joint returns with adjusted gross incomes of over \$5,000. The bill also would reduce estate and gift taxes. For residents of community-property States the reduction would be achieved by restoring the law in effect prior to 1942. For residents of common-law States comparable reductions are achieved by permitting deductions for transfers of property between husbands and wives.

To assist the members of the committee in their consideration of the bill, I have appended to my statement some statistical materials bearing on its provisions. (Pp. 314 to 325.)

#### H. R. 4790 RESULTS IN EXCESSIVE REDUCTIONS AND A DEFICIT FOR FISCAL YEAR 1949

The bill would reduce individual income tax liabilities by an estimated \$6.2 billion in a full year of operation, or by almost 30 percent of the \$21.2 billion total individual income tax liability under present law. (Tables K and L, pp. 320 and 321.) In addition, estate and gift tax liabilities would be reduced by \$250 million, which is also about 30 percent of the estimated \$820 million estate and gift tax liabilities under present law.

If H. R. 4790 were enacted the surplus of \$7.5 billion estimated in the President's budget for the fiscal year 1948 would be reduced by \$1.1 billion. In the fiscal year 1949 receipts would be decreased by \$6.6 billion and refunds increased by \$400 million. This would convert the estimated surplus of \$4.8 billion in fiscal year 1949 into a deficit of \$2.2 billion, necessitating an increase in the public debt. (Table A, p. 314.)

None of the developments which have occurred since the transmission of the President's Budget Message, either those in the field of domestic prices or those in the field of international affairs, or otherwise, warrant changing the President's estimates of either receipts or expenditures to show a more favorable budget picture. No one can say with certainty what any future level of income will be. With relatively full employment and with our present production facilities running at virtual capacity, it would not seem prudent to predicate estimates of receipts on a level of personal income higher than the \$200 billion level of personal income utilized in preparing the estimates contained in the President's Budget Message. The level of personal income in calendar year 1947 was \$197 billion.

Members of this committee will undoubtedly agree that there can be no justification for a tax program which would prevent adequate provision for a substantial retirement of the public debt in fiscal year 1949. This alone is sufficient reason for rejecting H. R. 4790.

#### H. R. 4790 WOULD NOT INCREASE CURRENT PRODUCTION

The proponents of H. R. 4790 claim that it would, by providing substantial individual income tax reduction, overcome capital shortages and improve business incentives. I would be the first to recommend tax incentives if there were a present need to accelerate capital expansion. The fact is, however, that capital formation is at a high level and the number of businesses is increasing. In 1947, gross private domestic investment accounted for \$27.8 billion or 12.1 percent of the gross national product. This rate of investment compares with an average of 11.5 percent for the interwar period from 1919 to 1941. Outlays for producers' durable equipment accounted for almost 8 percent of the gross national product in 1947, a record rate, even including the 1920's. (Tables D and E, pp. 315 and 316.) Moreover, the number of businesses has continued to increase since the low point reached during the war. By the end of 1947 they totaled almost 3,900,000, compared with the prewar peak of 3,400,000 and the wartime low of 2,800,000. (Table F, p. 316.) These figures suggest that under current conditions there is no lack of business incentives.

There are times when tax incentives can play an important role in stimulating production. This fact should be recognized in the revision of the tax system for peacetime needs. Its potentialities should not be dissipated by poor timing. Today tax reduction is almost certain to raise prices by increasing consumer and investor competition for the limited supplies; it holds little promise of increasing production above the 1948 goals set in the President's Economic Report.

#### H. R. 4790 GIVES INADEQUATE TAX RELIEF FOR THE LOWEST-INCOME TAXPAYERS: THE RELIEF IS INEQUITABLY DISTRIBUTED

Another argument advanced in support of H. R. 4790 is that it gives adequate and correctly distributed relief. Under this bill, personal exemptions are increased by \$100 to compensate for a calculated \$100 decline in the purchasing power of the average income after taxes during the past 2 years.

These calculations do not provide an adequate measure of the need for tax relief in the lower-income groups. Under the stress of war needs, personal exemptions were reduced to emergency levels. It was then recognized that the \$500 per capita exemption system would endanger the health and living standards of large segments of the population if retained for many years. Fiscal and economic considerations do not yet permit exemptions to be raised to a level compatible with long-term living standards, just as they preclude general tax reduction at this time. The national interest nonetheless requires sufficient immediate relief for those in greatest need to help tide them over this difficult period. In this respect H. R. 4790 stands in sharp contrast with the President's cost-of-living adjustment plan. (Tables G, H, and I, pp. 317 and 318.)

H. R. 4790 would exempt 6.3 million from income taxation in comparison with the 10.3 million exempted under the President's program. Moreover 13 million additional taxpayers with the lowest income would receive more tax reduction under the President's program than under H. R. 4790. These are the groups most urgently in need of relief from the high cost of living.

Under the President's program, 93 percent of the income tax reduction would go to individuals with net incomes under \$5,000. This compares with 66.3 percent under H. R. 4790. (Tables J, K, and L, pp. 319 to 321.)

The pending bill would reduce the taxes of those with net incomes in excess of \$5,000 by \$2.1 billion as against \$225 million under the President's plan. It is my belief that we cannot go beyond a cost-of-living adjustment at this time.

The \$2.1 billion tax reduction provided high-income taxpayers under H. R. 4790 goes far beyond this requirement.

The pending bill would also provide additional relief to the aged and the blind in the form of special exemptions. These and other low-income groups and disabled persons are hard-pressed by high prices. The cost-of-living adjustment recommended by the President is the most equitable way of providing tax relief to all these groups.

**H. R. 4790 EQUALIZES INCOME TAXES IN COMMUNITY-PROPERTY AND COMMON-LAW STATES AT THE COST OF SUBSTANTIAL REVENUE BUT DOES NOT EQUALIZE ESTATE AND GIFT TAXES**

The bill under consideration contains proposals designed to equalize income, estate, and gift tax liabilities among taxpayers in community-property and common-law States.

With reference to the personal income tax, the bill contains a provision which would permit married couples filing joint returns to divide their combined incomes equally in computing their income taxes. This is designed to eliminate a long-standing tax discrimination against married couples residing in noncommunity-property States.

This provision is addressed to a problem which has acquired importance in recent years. Several common-law States have adopted community-property laws designed primarily to give their residents tax advantages previously enjoyed only in the original community-property States. As you know, I believe that this subject should be given a high priority among the structural changes in the Federal tax system. In the current situation, however, it would be unwise to make this or other major structural changes which would result in substantial revenue losses. Splitting the incomes of husbands and wives would result in a loss of \$803.5 million, 97.5 percent of which would go to individuals with net incomes in excess of \$5,000. (Table L, p. 321.)

With reference to the estate and gift taxes, the bill would repeal the 1942 estate and gift tax community-property amendments. This would decrease the liabilities of married residents of those States by a relatively substantial amount. However, it is also proposed to provide similar relief for residents of common-law States, by amendments which it is hoped will produce relatively equal treatment with community-property States.

Prior to 1942, residents of community-property States paid relatively less estate and gift taxes than residents of other States. The 1942 act, in recognition of fundamental similarities in the family ownership of property in all the States, sought to correct this discriminating situation by equalizing the effects of the law under the different concepts of property ownership. It increased the transfer tax liabilities of community-property residents to approximately the level paid by residents of other States and generally succeeded in equalizing transfer tax liabilities among residents of all States.

This bill would replace the plan adopted in 1942 with a system which is apparently intended to establish equality by reducing the transfer tax liabilities of all persons to the level paid by community-property residents before 1942. It is my view that there is no valid basis for this change. While some differences in the impact of transfer taxes on residents of different States remain, these do not appear to be of major significance. However, they could be further narrowed by relatively simple amendments within the framework of the present structure. The proposal, on the other hand, would create new areas of inequality and administrative problems that outweigh those remaining under present law.

The estate and gift tax provision, it has been said, is related to the split-income plan considered for purposes of income taxation. Any such relationship, if it exists at all, is superficial. The problems are not analogous or comparable.

In the income tax field, residents of community-property and common-law States are not treated equally. The income-splitting plan is designed to remedy this situation by providing a single system of taxation applicable to all married residents of every State without exception. Moreover, it is also intended to go beyond removing the discrimination between community-property and common-law States by equalizing the now unequal tax treatment of family income from earnings and investments in all States.

An entirely different situation prevails in the estate and gift tax field. Present law already achieves substantial equality of treatment between common-law and community-property States.

This bill would reduce the revenue yield of the estate and gift taxes by as much

as \$250 million. Economic and fiscal requirements compel us to postpone urgently needed reductions in many sectors of our tax system. It is also necessary to require a large segment of the population to bear tax burdens which impinge upon their living standards. Under these conditions the transfer tax provisions of H. R. 4790 conflict with fairness and sound fiscal policy. Any structural revision in the system to remove inequities should be accomplished in a way calculated not to weaken or further complicate the transfer taxes.

In view of the technical complexity of the estate and gift tax provision of H. R. 4790, I am submitting for the use of the committee a memorandum discussing the problems involved in greater detail. (Pp. 310 to 313.)

#### H. R. 4790 WOULD PREJUDICE MUCH NEEDED TAX REVISION

It is clear that many of the tax revisions required to modernize the American tax system will result in a reduction of revenue. If the revenue system is prematurely weakened, our opportunities to improve it would be dissipated.

In his State of the Union Message, the President said:

"When the present danger of inflation has passed, we should consider tax reduction based upon a revision of our entire tax structure."

On several occasions I have outlined the basic principles of taxation as follows:

"I believe that a sound tax system should meet the following essential tests. The tax system should produce adequate revenue. It should be equitable in its treatment of different groups. It should interfere as little as possible with incentives to work and to invest. It should help maintain the broad consumer markets that are essential for high-level production and employment. Taxes should be as simple to administer and as easy to comply with as possible. While the tax system should be flexible and change with changing economic conditions, it should be possible to achieve this flexibility without frequent revisions of the basic tax structure. A stable tax structure, with necessary flexibility confined largely to changes in tax rates and exemptions, will make it easier for business and Government to plan for the future."

While we cannot safely undertake this year the basic structural changes that will ultimately be desirable due to the large losses in revenue that are entailed, we can adopt many technical revisions which would move in the direction of an improved tax system. I urge upon the committee the desirability of undertaking the steps necessary to make such administrative and technical revisions as will clarify present tax laws and correct some of the existing inequities without any substantial loss of revenue. This can and should be done at an early date. Specific proposals along these lines have already been submitted by the Treasury Department to the House Committee on Ways and Means.

#### CONCLUSION

I am confident that sound tax policy can contribute in an important measure to the continued prosperity of this country. I am also confident that your committee will give full consideration to the financial requirements and obligations of this Government. These considerations counsel against the adoption of H. R. 4790.

#### ANALYSIS OF THE ESTATE AND GIFT TAX PROVISIONS OF H. R. 4790

Enactment of the estate and gift tax provisions of H. R. 4790 would be undesirable. Apart from causing unjustified revenue losses (involving a large portion of the total revenues from these taxes), these provisions would not establish the equality of transfer tax treatment of community property and noncommunity property which is said to justify the revenue loss; they would open the door to tax avoidance; they would create new administrative problems and complexities; and they would lead to disruption and distortion of well-established methods of property disposition in common-law States. Moreover, these amendments are not required as the counterpart of the proposed income-splitting provisions for husbands and wives under the income tax. The following discussion will amplify these objections.

#### DISCRIMINATION

It is the principal purpose of the estate and gift tax amendments in the bill to restore the pre-1942 treatment of community property under which each spouse is recognized as owning one-half of the community property regardless of

its source. Since mere repeal of the 1942 amendments governing the estate and gift tax treatment of community property would revive the former discrimination existing in favor of such property and against noncommunity property, the highly complicated provisions of sections 361 and 372 of the bill have been added in an attempt to provide equality of treatment for both types of property; i. e., it is intended to permit husbands and wives in common-law States to divide their property equally with equivalent estate and gift tax results. To accomplish this, section 361 provides, in general, that there may be deducted from the gross estate of a deceased spouse the value of certain interests in property passing to the surviving spouse, but not to exceed one-half of the gross estate reduced by claims and similar deductions. Where, however, the estate of a spouse includes only his one-half interest in community property, no marital deduction would be allowed. Section 372 of the bill provides what is intended to be comparable gift tax treatment.

An analysis of these sections of the bill reveals that they not only fail to bring about equality of treatment, but in fact produce inequalities not present under existing law. Thus, where in a common-law State the estates of husband and wife are substantially equal and one dies, leaving his property to the survivor, an estate tax would, by reason of the marital deduction, be payable on only one-quarter of the family wealth, i. e., on one-half of the decedent's half. However, in the corresponding situation in which the family wealth consists of community property earned by both spouses, an estate tax would be payable on the death of the first spouse to die with respect to one-half of the family wealth. Under these circumstances, a similar discrimination would result as to gifts made by one spouse to the other by reason of the gift tax marital deduction. This discrimination under both the estate and gift taxes is inherent in the approach to equalization set forth in the bill.

To take another example, a husband in New York who has earned all the family wealth may give half to his wife by gift, and, under the bill, pay gift tax on one-quarter. At death, he may leave his remaining half to the wife and pay estate tax on one-quarter. A husband in the same situation in Texas would pay no gift tax but would pay an estate tax on one-half at death. The sum of the gift tax on one-quarter and the estate tax on one-quarter in the case of the New York husband would be less than the estate tax on one-half in the Texas case, because of the lower brackets, lower gift tax rates and two sets of exemptions. Thus, in this type of situation, community property would be discriminated against; there would continue to be inequality of treatment. On the other hand, where the New York husband gives one-half the family property to his wife during life, and the remaining half to his children at death, he would pay a gift tax on one-quarter and an estate tax on one-half of the property. The total taxes paid by the New York husband would exceed the estate tax payable by the Texas husband who left his half of the community property to his children and who was not required to pay gift tax on the half acquired by his wife by operation of law. In this case, the discrimination would run in the opposite direction, i. e., against common-law property.

Discrimination may also occur where the wife dies first. If the wife in Texas leaves to her surviving husband her half interest in community property earned solely by the husband, she would pay an estate tax on such half and the husband, at his death, would pay estate tax on the entire property. The New York wife would pay no tax at her death, an estate tax on the whole estate being payable upon the husband's subsequent death. In this situation, the total taxes paid by the spouses in Texas would be greater than the total taxes imposed with respect to the New York spouses' property. Conversely, the Texas family would have the advantage if the wife left her half of the community property to the children. In that case, the total taxes payable by the spouses owning community property would be an estate tax on the wife's half plus an estate tax on the husband's half, as compared with a tax, computed at higher progressive rates and with but a single exemption, on all the property of the New York husband.

These examples serve to demonstrate that the estate and gift tax amendments in the bill will not produce equality in the transfer tax treatment of community and noncommunity property. Furthermore, a comparison of the tax consequences under the bill with those of the present law shows that the bill will produce inequalities where they do not exist under the present law.

## EFFECT ON ESTATE PLANNING

The method by which equalization is sought is inherently defective because the amount of the proposed marital deduction would depend on the amount of property going from the New York decedent or donor to his spouse. Thus, if only one-third of his property goes to his spouse, the amount of the deduction would be equal to the value of such one-third. In the case of community property, however, each spouse acquires title to one-half by operation of law. Equality, therefore, would be obtained under the system of taxation proposed in the bill only in the event the deceased or donor gives his spouse one-half of his property. Since it is a frequent practice in common-law States for a wealthy husband to give his wife a life interest in his estate with remainders to his children or other beneficiaries, equality of treatment would be achieved only by interfering to a large extent with this long-established pattern of family dispositions. No such criticism may properly be directed against the 1942 amendments.

## ESTATE AND GIFT TAX PROVISIONS NOT NECESSARY TO INCOME SPLITTING

The estate and gift tax treatment of community and noncommunity property provided in H. R. 4790 is not, as has been suggested, a proper adjunct of the income-splitting provisions of the bill. The proposed system for income splitting by husbands and wives constitutes a single, Nation-wide plan for taxing income from all sources, whether derived from earnings or investments or from separate or community property. Such a plan is not concerned with local rules of ownership of income. Instead, it overrides such rules and sets forth a uniform concept for determining the tax on family income. The estate and gift tax provisions of the bill, however, do not create a single, over-all plan for taxing transfers of family wealth. On the contrary, the bill provides one method for taxing transfers of community property, based on the local rules of property ownership peculiar to such property, and another method for taxing noncommunity property, based on the local rules of property ownership peculiar to the latter property. The bill disregards the fact that by according full recognition to the formal distinctions between the two systems of property ownership, disparities of tax treatment necessarily arise. It then attempts, as a means of obtaining equality in the taxation of transfers of both types of property, to conform transfers of noncommunity property to the pattern of transfers peculiar to the community-property system, through the use of a marital deduction. Equality of taxation cannot be successfully achieved through a hybrid tax system, such as that created by H. R. 4790, which implements rather than disregards the formalities and technicalities of local rules of property ownership.

## TERMINABLE INTERESTS

The hybrid plan for taxing transfers contained in the bill is fundamentally defective in another important respect. Sections 361 and 372 disallow a marital deduction with respect to certain terminable interests in property passing to a surviving spouse, or transferred by gift. Typical examples of terminable interests which are not deductible are life estates or annuities given to a spouse, where remainder interests pass to other beneficiaries. Thus, where a decedent leaves property in trust, providing for the payment of the income from the trust to his wife for life with remainder to his children, no marital deduction may be taken. The apparent purpose of this rule is to insure that all the property of the family is included in either the estate of the husband or of the wife.

The difficulty is that the husband may easily avoid this rule by use of other types of terminable interests which are deductible under the bill. The bill permits the deduction of terminable interest purchased by the donor or decedent or by the executor at the direction of the decedent. This creates a wide avenue for avoidance of tax upon either spouse. Thus a person who wishes to provide a life income for his spouse with remainder to his children without losing the benefit of the marital deduction need only purchase, or direct his executor to purchase, a life annuity for his spouse with part of his estate and to hold the balance in trusts for the children. The value of such annuity would be a marital deduction from the decedent's gross estate, and would not thereafter be includible in his spouse's gross estate. The value of the annuity would thus completely escape taxation. Tax could similarly be avoided in the case of other purchased terminable interests, such as leases and insurance proceeds payable in installments.

On the other hand, if the marital deduction were not allowed as to any terminable interest, so that there would be deductible only such property transferred to a spouse as would be subject to transfer tax in her estate, a further large area of inequality of treatment as between common-law and community-property States would be created, in view of the fact that terminable interests may be held as community property. This dilemma appears to be inherent in the "equalization" plan of the bill. The 1942 amendments present no such problem.

#### TRACING OF PROPERTY

One of the chief arguments advanced by proponents of the repeal of the 1942 amendments governing community property is the supposed difficulty in some instances in tracing such property to its source. While the existing problem does not in fact appear to be serious, this bill itself substitutes some new tracing requirements.

Sections 361 and 372 of the bill properly provide that no marital deduction may be taken as to separate property which was at any time acquired in exchange for or through partition of community property. It is apparent that, under these provisions, it will frequently be necessary to trace separate property passing between spouses back to its original source. Accordingly, to the extent that the criticisms of the 1942 amendments based on tracing difficulties may be valid, H. R. 4790 is open to the same type of criticism.

#### BASIS

In addition to the difficulties in the estate and gift tax treatment of spouses, the plan incorporated in the bill also gives rise to income tax problems involving basis for gain or loss. Under existing law the basis of property acquired by a surviving wife by bequests, devise, or inheritance from her deceased husband would be its value at time of his death. The bill makes no change in the rule, even though the marital deduction taken by the husband results in exclusion of the property from his taxable estate. In the case of community property, however, the surviving wife's basis for her half of the community property would be its cost to the community, since such half was not acquired by bequest, devise, or inheritance. Where the property has appreciated in value this operates disadvantageously to community property.

In determining the appropriate policy respecting basis, consideration must be given to the relationship between noncommunity property qualifying for a marital deduction and the surviving spouse's interest in community property. The plan of estate taxation embodied in H. R. 4790 treats property passing to a surviving spouse and qualifying for a marital deduction as the equivalent of a surviving spouse's interest in community property. Accordingly, it may be presumed that similar basis treatment should be given to both types of property. Similar treatment, however, cannot be achieved if the estate tax plan of H. R. 4790 is not accompanied by a change in the present provisions of law governing basis. The bill fails to deal with this question.

If, in spite of their fundamental and serious defects, the estate and gift tax provisions of this bill should be enacted, it would appear that a satisfactory basis for determining gain or loss could only be established by eliminating entirely the provisions of existing law which permit the basis of inherited property to be determined by reference to the value of the property at the time of death. This type of treatment would provide equality for income tax purposes of both community and noncommunity property.

#### OTHER TECHNICAL DEFECTS

The bill in its present form does not deal with a number of troublesome technical problems which must be resolved and presumably will be by amendment. These involve matters relating to proper allowance of credit for gift tax in the case of property subject to the marital deduction, cases of disclaimers of legacies and other matters. However, even assuming that these problems are satisfactorily disposed of, it must be recognized that their solution will unquestionably lengthen and further complicate the estate and gift tax provisions of the bill, which already are far more lengthy and complex than can be justified by the tax results they achieve.

Grand total.....			\$86,108.4	100.00	21,056.2	100.00

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Internal Revenue Code, as amended by the Revenue Act of 1945.

<sup>2</sup> Normal tax and surtax were obtained separately by applying the appropriate rates to normal tax and surtax net income. Since normal tax net income is somewhat less than surtax net income, these amounts will differ slightly from the result obtained by applying the combined rates to surtax net income.

<sup>3</sup> Less than 0.005 percent.

<sup>4</sup> Excludes amounts subject to the alternative tax.

TABLE Q.—*Estimated number of taxable income recipients under present law,<sup>1</sup> their net income before exemptions, surtax net income and total tax, distributed by net income classes, in calendar year 1948 (assuming personal income of \$200 billion)*

Source.—Data for 1916-45 from Statistics of Income.

<sup>1</sup> Not available. The total number of taxable and nontaxable returns filed were as follows: 1913, 357,598; 1914, 357,515; and 1915, 336,652.<sup>2</sup> Receipts (including fines, penalties, additional assessments, etc.) for the fiscal year ended June 30 immediately following as shown in annual reports of the Commissioner of Internal Revenue.<sup>3</sup> Not available.<sup>4</sup> Includes war excess profits taxes of \$101,249,781 on individuals and \$103,887,984 on partnerships.<sup>5</sup> Tax base for taxable returns with net incomes of \$2,000 and over. There were 1,591,518 taxable returns with net incomes of \$2,000 and over, for which the tax amounted to \$675,249,450.<sup>6</sup> Amount after the 25 percent reduction provided by sec. 1200 (a), Revenue Act of 1924.<sup>7</sup> Excludes additions to liability under the Current Tax Payment Act of 1943 amounting to \$2,555,894,000.<sup>8</sup> Obtained from collectors' monthly report to Commissioner of returns filed.<sup>9</sup> Estimated.

**Exhibit 29.—Message from the President, April 1, 1948, returning without approval the bill (H. R. 4790) to reduce individual income tax payments, and for other purposes**

[House Document No. 589, 80th Congress, 2d Session]

*To the House of Representatives:*

I return herewith, without my approval, H. R. 4790, entitled "An act to reduce individual income tax payments, and for other purposes."

It is a matter of deep regret to me that I am compelled to take this action. If I could conscientiously approve tax reductions, I would gladly do so. But I am convinced that to reduce the income of the Government by \$5,000,000,000 at this time would exhibit a reckless disregard for the soundness of our economy and the finances of our Government.

All of us are aware that the world situation is one of uncertainty and, indeed, of danger. The United States, in common with other free nations, is taking positive action on many fronts to preserve conditions of peace with justice against the forces of dissension and chaos. In this endeavor, as I stated in my address to the Congress on March 17, 1948, "the United States has a tremendous responsibility to act according to the measure of our power for good in the world."

Under these conditions, the primary test which I must apply in considering this bill is whether or not it would contribute to the strength of the United States. My fundamental objection to the bill is that it would not strengthen, but instead would weaken, the United States.

This is true for two reasons.

First, the bill would reduce Government revenues to such an extent as to make likely a deficit in Government finances, at a time when responsible conduct of the financial affairs of this Nation requires a substantial surplus in order to reduce our large public debt and to be reasonably prepared against contingencies.

Second, the bill would greatly increase the danger of further inflation, by adding billions of dollars of purchasing power at a time when demand already exceeds supply at many strategic points in the economy, and when Government expenditures are necessarily rising.

The estimates of Government expenditures for the fiscal year 1949 which I submitted to the Congress in January totaled 39.7 billion dollars. Receipts were estimated at 44.5 billion dollars, leaving a surplus of 4.8 billion dollars for debt retirement and contingencies.

It has since become apparent that despite the most stringent efforts toward economy, there will be several important increases in expenditures above the January estimates. Legislation has been enacted increasing payments to veterans. Larger amounts will be required for assistance to certain foreign countries. Legislation to increase the salaries of Federal employees is being considered. It has been necessary to recommend substantial additional appropriations to the Congress to bring our armed forces to a proper strength.

Altogether these increases, after taking due account of appropriation actions by the Congress to date and of the additional tax refunds which would occur under this bill, involve additional expenditures for the fiscal year 1949 of at least 3.5 billion dollars above the January estimates. In the fiscal year 1950 these additional programs would increase expenditures by another 2 billion dollars, or by a total of 5.5 billion dollars. It is clear that, if this bill which reduces taxes by 5 billion dollars were to become law, there would in fact be a deficit in the fiscal year 1949 even under the more optimistic estimates of revenue used by the congressional committees.

The Congress proposes to extricate itself from this situation by charging \$3,000,000,000 of the 1949 expenditures under the European Recovery Program against the 1948 revenues. This might avoid a deficit in 1949. But the facts cannot be obscured by the fiscal sleight-of-hand by which a prospective deficit in 1949 is made to appear as a surplus. Actually the surplus available for debt retirement for the 2 years 1948 and 1949 would not be affected in the slightest by such a shift in accounting.

The public debt is \$253,000,000,000. I repeat what I have so often said before—if we do not reduce the public debt by substantial amounts during a prosperous period such as the present, there is little prospect that it will ever be materially reduced.

I am aware that some hold the view that it would be proper to reduce taxes now, and that it will be time enough to restore adequate Federal revenues when

the full extent and cost of our commitments are more definitely determined. I cannot subscribe to such an erratic and vacillating tax policy. We already know enough about the Government's financial outlook to demonstrate the serious effects of reducing revenues now by \$5,000,000,000. The additional expenditures which are in prospect, although not exactly determined as to amount, are of sufficient size to make clear the shortsightedness of cutting taxes at the very time our obligations are increasing. If I endorsed tax reduction now, knowing that to do so would in all likelihood mean increased taxes next year, I would not be dealing fairly with the American people.

This bill would undermine the soundness of our Government finances at a time when world peace depends upon the strength of the United States.

It would also gamble with the dangers of further inflation. I have urged on many occasions that steps be taken to relieve the distressing effects of high prices. Since these steps have not been taken, the most important force restraining inflation has been the Government surplus and the use of this surplus to reduce the public debt. This bill would reduce or eliminate this important weapon against inflation.

It has been argued that tax reduction now would furnish incentives for more active investment and business enterprise and, consequently, more production. The plain facts show that neither funds nor profit incentives are lacking for investment and business enterprise at present tax rates.

Industrial expenditures for new plant and equipment reached the record level of more than \$16,000,000,000 in 1947, contrasted with \$12,000,000,000 in 1946 and \$8,000,000,000 in 1941. Preliminary estimates indicate that industrial expenditures for new plant and equipment during the first quarter of 1948 ran much higher than the average for 1947.

Corporate profits were at extraordinary levels during 1947, reaching 17.3 billion dollars after taxes, contrasted with a previous peak of 12.5 billion dollars in 1946. Preliminary estimates indicate that corporate profits during the first quarter of 1948 have substantially maintained the very high level of 1947.

The national income is at a record level. Employment is at a record level. Production is at a record peacetime level. The resources and labor force of this country are fully employed. Under these circumstances, tax reduction could only result in higher prices—not in higher production.

From the viewpoint of the average family which spends most of its income to buy the necessities of life, the kind of tax reduction which this bill provides would be an evil in disguise. Inflation is still here and the cost of living has not descended to reasonable levels. The consumers' price index, which was 159 for 1947 as a whole, was 167.5 in February 1948, and preliminary figures indicate that it was even higher in March. A large tax reduction at this time would help to drive the cost of living still higher.

With wise and careful planning the American tax system can make an important contribution to economic progress. But if we dissipate the strength of our revenue system by ill-timed tax reduction, we shall sacrifice for many years our opportunities to lay a solid foundation for a more effective tax system. Major reforms are needed in all important areas of the Federal tax system—excise taxes, corporate taxes, individual income taxes, and estate and gift taxes. The enactment of H. R. 4790 would, by prematurely weakening the tax system, not only aggravate our immediate problems but also constitute a serious obstacle in the path of realizing many urgently needed fundamental tax reforms.

The tax reduction provided by this bill is inequitable as well as untimely.

In the case of the income tax, nearly 40 percent of the reduction would go to individuals with net incomes in excess of \$5,000, who constitute less than 5 percent of all taxpayers.

In the case of the estate and gift taxes, nearly all of the \$250,000,000 annual reduction would go to only about 12,000 of the most wealthy families. The discovery that it is possible to make very substantial savings in the gift and estate taxes by dividing a family's wealth between husband and wife has brought forth much ingenious argument to the effect that the provisions in this bill are needed to equalize the application of these taxes in community-property and common-law States. In fact, this equalization was in all essential respects achieved by legislation enacted by the Congress in 1942.

For the reasons I have set forth, H. R. 4790 is not compatible with the requirements of the critical international situation. It is not compatible with sound domestic economic and debt management policies. If enacted, it would ma-

terially weaken this Nation's efforts to maintain peace abroad and prosperity at home.

It is bad policy to reduce taxes in a manner which would encourage inflation and bring greater hardship, not relief, to our people. It is bad policy to endanger the soundness of our national finances at a time when our responsibilities are great in an unsettled world.

I am confident that the men and women of our country prefer the maintenance of our national strength to a reduction in taxes under the present circumstances.

I consider it my clear duty, therefore, to return H. R. 4790 without my approval.

HARRY S. TRUMAN.

THE WHITE HOUSE, April 1, 1948.

**Exhibit 30.—Message from the President, June 14, 1948, returning without approval the joint resolution (H. J. Res. 296) to maintain the status quo in respect of certain employment taxes and social security benefits**

[House Document No. 711, 80th Congress, 2d session]

*To the House of Representatives:*

I return herewith, without my approval, House Joint Resolution 296, to maintain the status quo in respect of certain employment taxes and social security benefits pending action by Congress on extended social security coverage.

Despite representations to the contrary, sections 1 and 2 of this resolution would exclude from the coverage of the old-age and survivors insurance and unemployment insurance systems up to 750,000 employees, consisting of a substantial portion of the persons working as commission salesmen, life insurance salesmen, pieceworkers, truck drivers, taxicab drivers, miners, journeymen tailors, and others. In June 1947 the Supreme Court held that these employees have been justly and legally entitled to social security protection since the beginning of the program in 1935. I cannot approve legislation which would deprive many hundreds of thousands of employees, as well as their families, of social security benefits when the need for expanding our social insurance system is so great.

Furthermore, if enacted into law, this resolution would overturn the present sound principle that employment relationships under the social security laws should be determined in the light of realities rather than on the basis of technical legal forms. In so doing, it would make the social security rights of the employees directly excluded, and many thousands of additional employees depend almost entirely upon the manner in which their employers might choose to cast their employment arrangements. Employers desiring to avoid the payment of taxes which would be the basis for social security benefits for their employees could do so by the establishment of artificial legal arrangements governing their relationship with their employees. I cannot approve legislation which would permit such employers at their own discretion to avoid the payment of social security taxes and to deny social security protection to employees and their families.

It has been represented that the issue involved in this resolution is whether or not the legislative branch of the Government shall determine what individuals are entitled to social security protection. This is not the issue at all. The real issue is whether the social security coverage of many hundreds of thousands of individuals should be left largely to the discretion of their employers. On this issue the proper course is obvious.

The expressed purpose of the sponsors of this resolution is to exclude from the coverage of the Social Security Act persons who have the status of independent contractors, rather than that of employees. But no legislation is needed to accomplish this objective. Under present law, as interpreted by the Supreme Court, only persons who are bona fide employees are covered by our social security system.

When all of the considerations regarding sections 1 and 2 of the resolution are sifted, two basic facts remain unrefuted. Hundreds of large employers are assured of an exemption from social security taxes, while hundreds of thousands of employees and their families are equally assuredly prevented from receiving the social security protection which the Supreme Court in June of last year clearly indicated

was justly theirs. These two facts were minimized by the sponsors of the resolution, who would have us believe, for example, that a traveling salesman who devotes full working time in the service of one company and depends completely upon that company for his livelihood is not an employee of that company but is an independent businessman and does not need social security protection.

Instead of clarifying the distinction between independent contractors and employees, which is a difficult legal issue in many cases, this resolution would revive the confusion which has plagued the administration of the Social Security Act for so many years. Benefits which are now payable to thousands of persons would have to be withheld pending final determination of the new and complex legal problems raised by this resolution.

Moreover, the resolution purports to preserve the past coverage of employees who have already made contributions under this system. But in fact, under the terms of the Social Security Act, such coverage would expire in a few years, and previous contributions would be made worthless.

It has been asserted that it would be difficult for employers to keep the necessary records and meet other requirements of the law with respect to the employees affected by this resolution. This is reminiscent of the objections made in opposition to the original Social Security Act in 1935. If such objections had prevailed in 1935, our social security program never would have been enacted. To allow them to prevail now would threaten the very foundation of the system. I cannot believe that the mere convenience of employers should be considered more important than the social security protection of employees and their families.

It has also been urged that without this resolution some persons would receive credit toward old-age and survivors benefits for 3 or 4 past years during which contributions were not collected. If the elimination of these credits had been the real purpose of the resolution, it could readily have been achieved without permanently excluding anyone from social insurance protection.

If our social security program is to endure, it must be protected against these piecemeal attacks. Coverage must be permanently expanded, and no employer or special group of employers should be permitted to reverse that trend by efforts to avoid a tax burden which millions of other employers have carried without serious inconvenience or complaint.

Section 3 of this resolution contains provisions—completely unrelated to sections 1 and 2—for additional public assistance of \$5 per month to the needy aged and blind and \$3 per month to dependent children.

These changes fall far short of the substantial improvements in our public assistance program which I have recommended many times. Nevertheless, I am strongly in favor of increasing the amount of assistance payments. Were it not for the fact that the Congress still has ample opportunity to enact such legislation before adjournment, I would be inclined to approve the resolution in spite of my serious objections to sections 1 and 2. Speedy action on public assistance legislation is clearly possible. I note that section 3 of this resolution was adopted as an amendment on the floor of the Senate and passed by both Houses in a single afternoon. Accordingly, I am placing this matter before the Congress in adequate time so that the public assistance program will not suffer because of my disapproval of this resolution.

At the same time, I urge again that the Congress should not be satisfied at this session merely to improve public assistance benefits—urgent as that is. There are other equally urgent extensions and improvements in our social security system which I have repeatedly recommended. They are well understood and widely accepted and should be enacted without delay.

Because sections 1 and 2 of this resolution would seriously curtail and weaken our social security system, I am compelled to return it without my approval.

HARRY S. TRUMAN.

THE WHITE HOUSE, June 14, 1948.

**Exhibit 31.—Message from the President, April 5, 1948, returning without approval the bill (H. R. 5052) to exclude certain vendors of newspapers or magazines from certain provisions of the Social Security Act and the Internal Revenue Code**

[House Document No. 594, 80th Congress, 2d Session]

*To the House of Representatives:*

I am returning herewith, without my approval, H. R. 5052, a bill to exclude certain vendors of newspapers or magazines from certain provisions of the Social Security Act and the Internal Revenue Code.

This bill is identical with H. R. 3997, which I declined to approve in August 1947. This legislation has far greater significance than appears on the surface. It proposes to remove the protection of the social security law from persons now entitled to its benefits. Thus, it raises the fundamental question of whether or not we shall maintain the integrity of our social security system.

H. R. 5052 would remove social security protection from news vendors who make a full-time job of selling papers and who are dependent on that job for their livelihood. Many vendors of newspapers are excluded even at present from coverage under the Social Security Act because they are not employees of the publishers whose papers they sell. But some vendors work under arrangements which make them bona fide employees of the publishers and, consequently, are entitled to the benefits of the Social Security Act.

If enacted into law, this bill would make the social security rights of these employees depend almost completely upon the form in which their employers might choose to cast their employment contracts. Employers desiring to avoid the payment of taxes which would be the basis for social security benefits for their employees could do so by the establishment of artificial legal arrangements governing their relationships with their employees. It was this sort of manipulation which the Supreme Court effectively outlawed in June of 1947 when the Court unanimously declared that employment relationships under the social security laws should be determined in the light of realities rather than on the basis of technical legal forms. I cannot believe that this sound principle announced by the Court should be disregarded, as it would be by the present bill.

The principal consideration offered in support of the bill appears to be a concern for the administrative difficulties of certain employers in keeping the necessary records and in collecting the employee contributions required by the social security system. In appraising these difficulties, it should be recognized that the employers have control over the form of the employment contracts and the methods by which their salesmen are compensated. The salesmen are dependent upon the employers, and whatever remittances or reports are required for withholding and reporting purposes should be within each employer's reach. Certainly, the difficulties involved are not so formidable as to warrant the exclusion of these employees from coverage in the social security system and the consequent destruction of their benefit rights and those of their dependents.

It is said that the news vendors affected by this bill could more appropriately be covered by the social security law as independent contractors, when and if coverage is extended to the self-employed. Whether that is true or not, surely they should continue to receive the benefits to which they are now entitled until the broader coverage is provided. It would be most inequitable to extinguish their present rights pending a determination as to whether it is more appropriate for them to be covered on some other basis.

In withholding my approval from H. R. 3997 last August, I expressed my concern that such a bill would open our social security structure to piecemeal attack and to slow undermining. That concern was well founded. The House of Representatives has recently passed a joint resolution which would destroy the social security coverage of several hundred thousand additional employees. As in the case of H. R. 5052, the joint resolution passed by the House is directed toward upsetting the doctrine established by the Supreme Court last summer that employment relationships should be determined on the basis of realities. The present bill must be appraised, therefore, as but one step in a larger process of the erosion of our social security structure.

The security and welfare of our Nation demand an expansion of social security to cover the groups which are now excluded from the program. Any step in the

opposite direction can only serve to undermine the program and destroy the confidence of our people in the permanence of its protection against the hazards of old age, premature death, and unemployment.

For these reasons, I am compelled to return H. R. 5052 without my approval.

HARRY S. TRUMAN.

THE WHITE HOUSE, April 5, 1948.

**Exhibit 32.—Statement of Under Secretary of the Treasury Wiggins before the House Ways and Means Committee, November 4, 1947, on the taxation of farmers' cooperative associations**

I am glad to have the opportunity to appear before this committee to discuss a subject in taxation which has received considerable attention in recent years: The taxation of farmers' cooperative associations.

From the letter which I received from the chairman I am aware that your committee desires to hear testimony on the much broader subject of the treatment of all tax-exempt organizations. We have in process a study extending over the wide range of subjects encompassed by section 101 of the code. To date, however, because of our limited and reduced staff, the Treasury Department has been able to complete only one segment of this study—that relating to farmers' marketing and purchasing cooperatives. We released this part of the study on October 31, 1947, and have made it available to each member of this committee, and with your permission I would like to offer this for the record.

I propose to confine my statement today to the one aspect of the general problem of tax-exempt organizations which we have been able to investigate up to this time. However, some of the remarks which I shall make on farm cooperatives are also applicable in principle to other types of cooperatives, such as urban purchasing cooperatives, mutual insurance companies, mutual irrigation cooperatives, cooperative telephone companies, credit unions, and the like.

I should also state at the outset that I am not prepared to make specific suggestion for the revision of the tax treatment of farm marketing and purchasing cooperatives pending completion of our study of other tax-exempt organizations. But more important, I do not feel that it is wise to reach firm conclusions with respect to this part of the postwar tax structure before we have had an opportunity to review the entire tax system. As this committee knows, the Treasury Department is currently engaged in a comprehensive review of the Federal tax system. When this study and review is completed we hope to have the opportunity to submit our full recommendations to this committee.

It is important that the tax treatment of the business income of tax-exempt organizations be articulated with the general treatment of the business income of both incorporated and unincorporated businesses. Since we have not yet formulated our views respecting business income which is now taxable, it would be premature to recommend a tax treatment for business income which is now exempt under the various subsections of section 101 relating to tax-exempt organizations.

**THE IMPORTANCE OF FARMERS' COOPERATIVE ASSOCIATIONS**

There are at the present time about 10,150 farmers' cooperative marketing and purchasing associations in active operation in the United States. They are for the most part local associations confining their operations to a relatively small area and are controlled by the farmers whom they serve. They are spread widely throughout the United States but their operations are of most importance in such States as Minnesota, Wisconsin, Iowa, Illinois, and California. These cooperatives have a long history, running back a hundred years or more. They grew out of economic necessity. Handicapped by their isolation, inadequate knowledge of market conditions, lack of capital and weak bargaining position, farmers sought through cooperative group action, aided by financial and other assistance from the Federal Government, to improve their economic position. Today, 1 out of every 3 farmers is said to be a member of at least one cooperative.

Although about 94 percent of the farmers' marketing and purchasing cooperatives are small local organizations, there are a number of large-scale regional cooperatives, operating over a larger area than can be served by a local asso-

ciation. There are, in addition, a number of federated cooperative associations which serve principally their constituent cooperative organizations.

In the 1944-45 marketing season, the ten-thousand-odd farm cooperatives did an aggregate business of over \$5.6 billion, the bulk of which represented the marketing of farm products. Only about 19 percent of their business involved the purchase of farm supplies. At some stage in the marketing process these cooperatives handled 60 percent of the citrus fruits and cranberries, 50 percent of fluid and dried skim milk, 40 percent of the creamery butter and 20 percent of the livestock moving through commercial markets. These were their most important fields of operation, but they also handled vegetables, cotton, tobacco, and other products. I have appended to my statement a table (table A, p. 341), giving detailed information on the amount of business done by the marketing cooperatives in various agricultural commodities. The purchasing activities of farm cooperatives are of greatest significance in connection with feed, fertilizer, and automotive fuels and lubricants.

A large proportion of the marketing is done by the large regional and federated cooperatives. In 1942-43, over 40 percent of the cooperative marketing was handled by 48 associations, each with a business volume of more than \$10 million. There was a similar concentration in purchasing activities. Ten cooperatives, each with an annual business volume of over \$10 million, accounted for 35 percent of the cooperative purchasing volume in 1942-43.

These facts tend to be substantiated by the Treasury Department's tabulation of information returns filed by tax-exempt farmers' cooperative marketing and purchasing associations for the calendar year 1943 and for fiscal years beginning in 1943. To complete the factual information at your disposal, I have appended to this statement tables (tables B and C, p. 342) showing the distribution of these returns by size of gross income and receipts and by size of total assets. Subject to the reservations noted in the technical description of these tables, they indicate that although the great majority of tax-exempt farm cooperatives are comparatively small organizations, a large portion of the business done by tax-exempt cooperatives and of the assets held by such organizations is in the hands of a relatively few large organizations. A similar situation exists in the case of ordinary corporations.

The large-scale cooperatives frequently carry their marketing activities beyond the initial stages, sometimes establishing direct contact with the ultimate consumer. To process the agricultural commodities produced by their members they operate creameries, cotton gins, canning plants, flour mills, wineries, and other types of processing establishments. Purchasing cooperatives on the other hand sometimes extend their operations to the point of manufacturing the products required by their members and operate feed and fertilizer plants, sawmills, oil refineries, and paint factories. In 1943, marketing cooperatives operated nearly 2,800 plants, about two-thirds of which were engaged in processing milk and milk products. Cotton gins and canning factories are the other principal types of plants owned by the marketing cooperatives. (Table D, p. 343.) Despite the wartime growth in cooperative canning operations, their economic significance is still small. In the canning of such important products as peas, tomatoes, and corn, they account for 1 to 3 percent of the total pack. Only in citrus fruit juices, cherries, pears, and berries do they handle as much as 10 percent of the total pack.

The purchasing cooperatives operated about 1,700 plants in 1943. The three largest groups of plants, aggregating nearly 1,500, were grain elevators grinding feed, oil wells, and machine repair shops. The remaining plants were devoted to a variety of purposes, as listed in table E (p. 343), attached to this statement.

Much of the criticism of the tax treatment of cooperatives apparently stems from a belief that the operations of cooperative associations have grown at a rapid rate in recent years relative to those of other types of organizations. And the conclusion frequently reached is that during these years, when income tax rates have been high, the tax exemption of cooperatives has given them an important advantage over taxable enterprises and is responsible for the difference in growth. I consider this aspect of the problem in later portions of my statement, but in passing I want to caution against any sweeping conclusions.

In some of the industries where plants operated by cooperatives are of substantial importance, the greatest growth took place before tax rates reached current levels. In the processing of milk into butter and cheese, the productive capacity of cooperatives is of long standing. Only dry skim milk facilities are of recent origin. Most of the expansion in cotton ginning took place during the depression years 1930 to 1940. The greatest relative advance in fertilizer production was

made in 1938-39 and 1940-41. Most of the present feed facilities were constructed or acquired before the high tax period. Expansion into petroleum refining, on the other hand, is a new development. I have had prepared a table which compares over the years the changes in the volume of marketing operations conducted by cooperatives, with the change in total farm marketing (table F, p. 344). These data show that the value of cooperative farm marketing has indeed grown since the prewar years, but it has grown no faster than the total value of all farm marketing. In other words, farmers' marketing cooperatives have just about held their own compared with the other types of enterprise marketing agricultural commodities. If the entire period since 1930 is taken into account, it appears that marketing cooperatives have been losing some ground to other organizations. I am also submitting a similar table covering the operations of cooperative purchasing organizations (table G, p. 345). In this area, the share of business done by cooperatives, though small in the aggregate, appears to have increased more or less steadily since 1930, but the greatest relative growth took place during the early part of the period.

#### HOW FARM COOPERATIVES OPERATE

Farm cooperatives exist for the primary purpose of enlarging their members' profits by increasing receipts from the sale of farm products and by lowering the cost of producing farm products. They function in diverse ways. They lower the cost of farm supplies by purchasing in bulk and taking advantage of trade discounts. They protect members against inferior merchandise and assist in the selection of those supplies which are best suited to the needs of particular farms. They time their purchases to take advantage of favorable markets and exercise a wider choice in the selection of sources of supply.

Marketing cooperatives may increase receipts from the sale of farm products by providing members with more efficient and economical sales services. Products may be stored, graded, and further processed to increase their salability. Competition among farmers in a particular area may be reduced and their bargaining position in the principal markets for their products improved; trade-marks or trade names may be established and advertised and the quality of products may be improved.

The individual member is ordinarily both an investor in and a patron of the cooperative association. As an investor in the association, he is promised a limited return on his equity in the association. As a patron, he is promised his proportionate share in the savings made possible by his contribution to the pooling of purchases or sales and in any income which the association may derive from its activities. However, his share as patron in the success of the cooperative association may or may not be reflected in the size of his patronage dividend at the close of the year. The size of the patronage dividend is determined not only by the association's efficiency in buying and selling but by its pricing methods as well.

There appear to be three distinct types of pricing policies. One is the so-called Rochdale type of pricing policy, under which the cooperative sells to the farmer at going market prices. Patronage dividend payments in this case may be said to represent the difference between such prices and the necessary expenses of the association. A second type covers situations where, due perhaps to a lack of competition, there may be no clearly established market price, and the prices paid by a marketing association may be more or less arbitrary. Final payments to patrons in such cases are an adjustment which does not accurately measure the gain from cooperative buying and selling. A third policy is reflected in those cases where a purchasing association sells at cost plus estimated expenses or where a marketing association pays a price based on sales value minus estimated cost of operation. Under this policy patronage dividends will be paid infrequently if at all. Whatever benefits the patron derives from the association will be reflected currently in the higher prices he receives for his product or the lower prices he pays for his supplies.

In practice, it appears that a large proportion of cooperatives return the benefits of cooperation to their members without the use of patronage dividends. The prevailing-price-patronage-dividend technique originated among the purchasing cooperatives and has not been universally adopted by marketing associations.

The typical marketing cooperative operates under a marketing contract in which the association undertakes to pay the farmer the entire proceeds from the sale of his product less certain deductions for handling expenses and for capital contributions. In some cases, the farmer receives the full going price upon de-

livery to the cooperative, but more often he gets only a down payment, the balance to be paid in successive installments as the crop is sold. The size of the down payment is determined by custom or by the financial condition of the association and does not represent what the farmer could have received had he sold his product outright to private buyers. The sum of the installments represents the net or adjusted price of the product after all or most of the cooperative's expenses have been deducted.

The most recent information we have on the extent to which the different price policies are utilized by farm cooperatives is from a study in 1936. About 32 percent of the marketing associations and 54 percent of the purchasing associations in that year reported patronage dividends. These figures which are not weighted to the volume of business are not conclusive, however, because they do not give sufficient weight to the large associations.

#### PRESENT TAX TREATMENT

The present tax treatment of farm cooperatives has been in effect since the early years of the Federal income tax. Express statutory exemption from income tax was granted, under certain conditions, to marketing associations in 1916 and to purchasing associations in 1921. In the Revenue Act of 1926, Congress incorporated various administrative rulings which had previously been promulgated into statutory law and at the same time established clear-cut tests of eligibility for the exemption. These statutory provisions have remained virtually intact to the present day.

Although there is no express statutory provision for the exclusion of patronage dividends from the income of the cooperatives, the Treasury and the courts have interpreted the law as permitting cooperatives to exclude or deduct from their taxable income patronage dividends or refunds paid in accordance with a contractual or other definite obligation.

I would like now to turn to a more detailed consideration of the two aspects of the present tax treatment accorded farm cooperatives: exemption of income and exclusion of patronage dividends.

#### TAX EXEMPTION

The eligibility of farmers' cooperative associations for income tax exemption is conditioned on their being organized and operated on a cooperative basis. It is further restricted to those which either (a) market the products of members or other producers and return to them the proceeds of sales less necessary marketing expense on the basis of the quantity or value of the products furnished, or (b) purchase supplies and equipment for their members or others at cost plus necessary expenses.

The statutes and regulations require, in the case of both marketing and purchasing associations, that there shall be no discrimination between members and nonmembers in the refund of net proceeds. In other words, the members of exempt cooperatives are not allowed to make a profit out of the business done with nonmembers. Moreover, the statute specifically provides that the exemption shall be lost if less than half of the association's marketing or purchasing is for the account of its members. Purchasing associations lose their exemption if more than 15 percent of their purchases are for persons who are neither members nor producers.

The methods of financing open to exempt cooperatives are also prescribed. If capital is raised by the sale of stock, substantially all the stock must be held by farmers. Moreover, dividend rates must be limited to no more than 8 percent or the legal rate of interest in the State of incorporation, whichever is greater. In other words, in order to enjoy tax exemption, cooperative associations must be controlled by their farmer patrons and must do most of their business with them.

If the exemption were repealed, exempt cooperatives would lose certain benefits. They would become subject to tax on income used to pay dividends on capital stock, on income retained in certain reserves, and on their nonoperating income.

The best information that we have indicates that most cooperatives were organized with capital stock, but there appears to be a tendency toward the non-stock type of association. Although the exemption statute permits cooperatives to pay a higher rate of interest, the rate actually paid on the average today is probably between 3 and 5 percent. In the absence of the exemption, that portion of the net earnings which cooperatives distribute to their stockholders as dividends on stock would be taxable as income of the association.

Cooperatives accumulate reserves in two ways: (1) by retaining part or all of their net cash proceeds and issuing, in fulfillment of their obligations, noncash patronage dividends, and (2) by retaining a part of their annual net proceeds as reserves before computing the amounts which must be returned as patronage dividends. Under a recent court decision, exempt cooperatives are required to allocate on their books to current-year patrons pro rata shares in such reserves, so that member patrons will not gain at the expense of nonmember patrons upon dissolution of the association. However, the mere fact of allocation does not make such reserves equivalent to noncash patronage dividends, and the Bureau of Internal Revenue has continued to distinguish between allocated reserves and noncash patronage dividends.

Noncash patronage dividends are not taxable to either exempt or nonexempt cooperatives. However, the patronage dividends, whether in cash or not, do enter into the taxable incomes of patrons. Under the exemption, eligible cooperatives pay no tax on income retained as allocated reserves, and, in the absence of the exemption, such income would be taxable to the cooperative. With or without the exemption, income retained as reserves would not be taxable to patrons.

Reserves are set up for a variety of purposes. Section 101 (12) expressly permits exempt cooperatives to accumulate the general contingency reserves which cooperatives are required to build up by provisions of most State laws. Additions to such reserves are sometimes limited by the State statutes to a percentage of the net margin for the year, and usually the total reserve which must be accumulated is limited to a percentage of total capitalization.

In addition to the mandatory general reserves, cooperatives are also allowed to accumulate reserves for specific purposes. In practice, reasonable and necessary nonmandatory reserves appear to be of two distinct types.

First. There are specific contingency reserves; that is, reserves for foreseeable losses or expenses which are properly chargeable in whole or in part to the current accounting period.

Second. There are "reasonable and necessary" reserves for expansion purposes. The regulations provide that—

"the accumulation and maintenance of a reserve \* \* \* to provide for the erection of buildings and facilities required in the business or for the purchase and installment of machinery and equipment or to retire indebtedness incurred for such purposes will not destroy the exemption."

Consequently, it is possible under existing law for an exempt cooperative association to reinvest a substantial portion of its earnings and plant and equipment without either the association or the patron being taxable thereon.

The exemption statute contains other advantages for cooperatives in addition to allowing tax-free reserve accumulations and payments on capital stock. Their nonoperating income, such as interest on bank deposits or on investments, dividends, and capital gains, escapes taxation. However, the amounts of such income are small. Certain additional advantages grow out of special treatment accorded income derived from buying or selling commodities on behalf of the United States Government and from the handling of nonfarm products marketed in small quantities where such items are essential to the efficient operation of the exempt cooperative or the handling of products purchased for the purpose of fulfilling delivery contracts or for other emergency purposes.

I have indicated the advantages which tax exemption bestows on farm cooperatives. It should be noted, however, that the exemption involves certain disadvantages for cooperatives. This may explain why only about half of the farm cooperatives attempt to meet the statutory requirements. One of the most important disadvantages is the requirement that exempt associations must not discriminate against nonmembers in paying patronage dividends. Another disadvantage in the case of marketing cooperatives is the prohibition against dealing with nonproducers. Similarly, the restriction of nonfarmer purchasing to 15 percent of total purchasing has been said to act as a limitation on the growth and expansion of some of the most successful cooperative units.

#### PATRONAGE DIVIDEND EXCLUSION

Under present law, farm cooperative associations are authorized to exclude patronage dividends from gross income. This, however, is not the exclusive privilege of cooperative associations. The privilege is available to any corporation which makes payments to its customers under the conditions prescribed by the Commissioner of Internal Revenue and the courts. It should be noted, how-

ever, that in the case of cooperatives, unlike the case of the typical ordinary corporation, patrons receiving rebates are also the owners of the business.

The conditions under which cooperative associations are permitted to exclude from their gross income refunds made to their patrons can be briefly summarized. First, there must have existed at the time of the transaction with the patrons a contractual or other definite obligation on the part of the cooperative to return any net proceeds to him in proportion to patronage without further corporate action. Second, if only members of the association are eligible to receive patronage dividends exclusion is not allowed on that portion of such distribution which represents profits from transactions with nonmembers. It is immaterial whether refunds are distributed in the form of cash, stock, certificates of indebtedness, or credit notices. All such forms of payment are regarded as the equivalent of cash distributions in the hands of patrons, the theory being that they are cash payments automatically reinvested under provisions of the charter, bylaws, or other contracts previously agreed to by the patrons.

The benefits that farm cooperatives derive from the exclusion of patronage dividends from their taxable incomes depend on the nature of these payments. To the extent that patronage dividends represent the owner-patron's share in the association's net operating margin, the exclusion gives cooperatives the advantages of the partnership treatment. It frees them of the so-called double taxation imposed on the distributed income of ordinary corporations. To the extent, however, that patronage dividends represent nonincome elements—items analogous to selling expenses of ordinary businesses or evidences of capital contributions of patrons—their exclusion from the taxable income of the cooperatives confers no special tax advantage. In view of the problems involved in separating patronage dividends into their components, it is difficult to appraise in quantitative terms the benefit of this exclusion.

#### ANALYSIS OF PRESENT TREATMENT

The present tax treatment of farm cooperatives has been criticized, particularly as it affects the competitive position of the cooperatives. The main import of the criticism is that the complete or virtual exemption of farm cooperatives from income tax has given these associations an unfair competitive advantage over their corporate competitors. It is contended that, as a result of their more favorable tax treatment, cooperatives have been able to pay larger refunds and so attract more patronage than they could otherwise command; also that, by retaining a larger percentage of their earnings, they have been able to expand more rapidly than would be possible if their income were fully taxable.

The cooperatives deny that their favorable tax status has had any material effect upon their volume of business. They contend that any advantages they enjoy over ordinary business firms, either as buyers of farm products or as sellers of farm supplies, flow from the cooperative nature of their enterprise.

The role of tax exemption in the competitive position of cooperatives is difficult to appraise. Cooperatives do not appear to have used their tax immunity as an instrument of price warfare. It would be difficult for them to do so, since the more they cut prices, the smaller is their economic income and, consequently, the worth of their tax advantage. Where both cooperatives and their corporate competitors sell at cost, the tax advantage entirely disappears. Moreover, there are indications that in many markets where cooperative associations compete most directly with ordinary corporations they make no attempt to outbid their competitors; as a general rule they charge the same prices. On the other hand, it is undoubtedly true that the prospect of patronage dividends has been a significant factor in building up the membership of farm cooperatives. To the extent that the special tax status of cooperative associations has permitted payment of larger patronage dividends, it may have been a factor in the growth of their membership. In this connection, however, the cooperatives argue that patronage dividends are used mainly as a matter of convenience and that the same results could be closely approximated by other methods of sharing benefits which do not depend on the exemption or exclusion.

The charge that, as a result of their favored tax status, farm cooperatives have been able to expand more rapidly out of earnings than their corporate competitors, and that they have been able to plow back earnings to finance acquisition of plant and equipment, has been strongly pressed in recent years.

The cooperatives contend that noncash patronage dividends are not analogous to the retained earnings of ordinary corporations; that they represent the patrons'

capital contribution to the enterprise. They also contend that any tax advantage which they may enjoy as the result of the exclusion of their retained net proceeds from gross income merely serves to offset their great disadvantages in obtaining equity capital. Since dividends on their stock are limited, cooperative associations cannot issue any securities which compare with the common stock of an ordinary corporation. Moreover, the market for the type of securities they can issue is small, composed largely of farmers who, at least prior to the war, had always been a poor source of equity capital.

In the current discussion of the tax advantage enjoyed by cooperatives, much emphasis is placed on the alleged rapid growth of these associations in recent years. Data contained in the Treasury's study, which I summarized in the early part of my statement, indicate that while the dollar volume of business done by farm cooperatives increased more than two and one-half times since 1939, the cooperatives as a whole do not appear to have expanded their relative share of the market at the farm level. From 1936 to 1941 the trend was downward. In 1941, 1942, and 1943, the share of cooperative marketing was actually less than in the period 1935-39, and did not reach the 1935-39 level until 1944.

#### FARMERS' COOPERATIVES IN CANADA AND GREAT BRITAIN

By way of comparison with our treatment, the committee might be interested in the tax procedure adopted by Canada and Great Britain.

Farmers' cooperatives in Canada are similar to those of the United States in many significant respects, including their relative economic status. The bulk of their business is in the marketing sphere, farmer participation is roughly comparable, and the cooperatives' over-all share in the market is about the same in the two markets. With the exception of large western grain and seed associations (western wheat pools), these cooperatives conform in size and activity to those in the United States. The marketing cooperatives are estimated to have handled about one-fourth of the principal farm products entering into commercial trade channels.

Until last year, the Canadian tax treatment of farm cooperatives was more or less the same as ours. As in the United States, considerable public discussion developed as to the most desirable tax treatment of such cooperatives. A royal commission was appointed late in 1944 to look into the problem and to make recommendations. About a year later, a report was rendered, and in 1946 the Canadian Parliament revised the tax treatment of cooperatives.

The principal recommendations of the commission were—

(1) To allow all business enterprises a deduction from income for patronage dividends, paid in cash or its equivalent within a limited period after the close of the year, provided patronage payments are made to members and nonmembers alike; and

(2) To grant tax exemption to newly organized cooperatives for the first 3 years.

The Canadian Government accepted these recommendations of the commission, but felt that no company or association should be permitted through the payment of patronage dividends to reduce its taxable income to an amount below a reasonable return on the capital invested in the business. Accordingly, the legislation provided that patronage dividends may not reduce taxable income below an amount equivalent to 3 percent of the total capital invested in the enterprise including borrowed capital, less the interest paid on borrowed capital. That, in essence, is the treatment accorded all associations, including farmers' cooperatives under Canadian law today.

The British cooperative movement has developed principally in urban centers in the form of purchasing associations. Farmers' cooperatives developed much later, and consistent with the relatively minor importance of agriculture in the British economy, represented a small segment of the cooperative movement. It has been estimated that prior to the war farmers' cooperatives in Great Britain served one farm in every four. The activity of British farm cooperatives is more or less evenly divided between purchasing and marketing, both as to number and the volume of business.

The British treatment of cooperatives is in form similar to our tax treatment of nonexempt cooperatives. That is to say, they are subject to tax in the same manner as ordinary corporations. In computing taxable income, they are permitted to deduct any discounts, rebates, or dividends paid to members or other persons, provided such payments are based upon their transactions with the cooperative and not by reference to their share or interest in the capital of the

company. In other words, patronage refunds are exempt from tax, while ordinary dividends on capital are taxed. However, it should be noted that the tax on corporations in Great Britain is in the nature of a withholding tax, so that the cooperative as such bears a tax burden only with respect to undistributed earnings.

#### SUGGESTIONS WHICH HAVE BEEN MADE FOR TAX REVISION

In the course of the discussion of farm cooperatives, several possibilities for revising the present tax treatment have been advanced. However, among those who believe that farm cooperatives might be more heavily taxed, there is no agreement on how this should be accomplished.

Some would merely repeal the exemption. Others would require the inclusion of all patronage dividends in the gross income of the association; others would continue the exclusion of patronage dividends but would require the inclusion of noncash patronage dividends. Still others would subject these organizations to a special tax in lieu of the income tax. I shall now describe some of these alternatives and indicate how they might operate.

#### REPEAL PRESENT EXEMPTION

It has been suggested that there is no basis for the present exemption of farm cooperatives and that it should be terminated. Those holding this view say that cooperatives perform the same economic function as ordinary companies, that they are organized as corporations with the same powers and obligations as ordinary corporations, and that they are organized and operated for the purpose of making profit.

These antiexemption views have to be balanced against the contention that cooperative associations operate in the public interest, that they are not profit-making institutions, and that they are more nearly analogous to partnerships than to ordinary corporations.

Advocates of continued exemption maintain that the special tax treatment accorded farm cooperatives is a return for services rendered to the public; that in improving the economic conditions of farmers and in raising the grade and quality of products for public consumption, farm cooperatives have made substantial contributions to the general welfare.

They contend further that farm cooperatives should be differentiated from ordinary corporations because it is both their intent and practice to do business at cost.

They add that, despite the fact that cooperative associations are in legal form corporations, they more nearly resemble partnerships than ordinary corporations. The application of the corporation income tax to cooperatives would result in an undesirable extension of the area of so-called double taxation of business income at a time when many believe that the existing double taxation of distributed profits of ordinary corporations should be reduced or eliminated.

Continued exemption of cooperatives has also been defended by the contention that the amount of revenue involved is not large enough to justify the trouble and expense of its collection. So long as no attempt is made to tax patronage dividends, the Government would gain little from repeal of the exemption. This is countered by pointing out that most tax-exempt organizations, including cooperatives, are now required to file annual information returns (Form 990), and that the recent tabulation of these returns by the Bureau of Internal Revenue shows that, while the revenue involved may be small in relation to total Federal revenue, it is not negligible. In this connection, I might add that our rough estimates indicate that for 1943 the 5,600 exempt cooperatives, in the absence of the exemption, would have paid between \$10 million and \$20 million in taxes on earnings devoted to dividends on stock and reserves.

In my view, the issue involved in the proposal to repeal the exemption hinges on the question whether farm cooperative associations perform services of such great value to the public that they should be relieved of the tax burdens imposed on other corporate entities. This is not an easy issue to resolve. While farm cooperatives are operated primarily in the interest of their farmer patrons, they have undoubtedly contributed to the general welfare. However, there are few businesses which could not make some claim to having served public as well as private interest.

I believe that the presumption is always against any tax exemption and in favor of uniform taxation. An exemption can be justified only by a clear preponderance of evidence in favor of the social desirability of the objective and the effectiveness of the exemption in promoting desirable ends without undesirable collateral effects. In addition, in deciding whether the exemption should be repealed or retained, considerations of revenue and equity must be weighed against the advantages which it affords to the economy as a whole.

Short of full repeal, it has been suggested that the exemption should be confined to small local cooperatives. This, however, would raise a difficult problem of fairly determining eligibility for the exemption. The definition of a "small" cooperative is a matter of judgment, and any statutory or administrative definition would have to be essentially arbitrary. Moreover, particular cooperatives might move in and out of the exempt area because of year-to-year fluctuations in business or membership. Large cooperatives might split into several small units to qualify for the exemption. These are some of the considerations which argue against classification on the basis of size.

Another possible way of revising the present tax treatment of farmers' cooperatives would confine the exemption to local cooperatives dealing directly with individual farmers. The exemption would be eliminated for federated or centralized regional cooperatives that have members other than individual farmers. Such farmers' cooperatives would be granted no special exemption.

#### TERMINATE THE EXCLUSION OF ALL PATRONAGE DIVIDENDS

It has also been suggested that the exclusion of patronage dividends from the gross income be discontinued. This proposal has been criticized on several grounds: First, that patronage dividends are price rebates and as such do not constitute income to the cooperative association within the meaning of the sixteenth amendment; second, that cooperatives are acting merely as agents of patrons and have no interest in the net proceeds of their operations; and third, that even if patronage dividends could be constitutionally taxed to the cooperatives, they should not be so taxed because it is impossible to determine to what extent they represent distributions of income.

I will not comment on the argument of constitutionality beyond noting that it has been used by both sides and is not likely to be finally decided unless Congress specifically presents it to the courts by discontinuing the exclusion.

A successfully operated farm cooperative will ordinarily produce some economic income over a period of years, especially if it uses any significant amount of capital and assumes any significant degree of risk. It does not necessarily follow that this economic income should be taxed to the cooperative, as distinguished from its patrons and members.

For sundry reasons, it would be difficult to employ patronage dividends as the base for the assessment of income tax on cooperatives. Patronage dividends do not measure the economic income produced by cooperatives. Many cooperatives so conduct their business that no patronage dividends are needed to return benefits to patrons. In other cases, patronage dividends overstate the income earned by cooperatives because they merely take the place of special services, such as free delivery and credit, which would give rise to allowable cost deductions in the case of ordinary businesses. In still other cases, marketing cooperatives deliberately set prices below those paid on the market, or purchasing cooperatives set prices charged above the market, in order to accumulate capital. In these cases, patronage dividends are paid in noncash form as evidence of patrons' capital contributions and do not represent solely the economic income produced by the cooperative.

Moreover, the success of the cooperative association is not measured in terms of its own income, or of the size of its patronage dividends. Therefore, the inclusion of patronage dividends in the gross income of the cooperatives might merely induce more of the associations to set their prices so as to minimize their patronage dividends. These considerations make it impracticable to estimate the revenue effect of terminating the exclusion of patronage dividends from gross income.

## TAX NONCASH PATRONAGE DIVIDENDS

Some recommend that the exclusion of cash patronage dividends be continued but that cooperative associations be required to include in their gross income patronage dividends paid in scrip or other noncash forms. Those who favor this approach argue that most patrons have little real choice as to the form in which they receive their patronage dividends, and that noncash patronage dividends cannot be readily converted into cash. They conclude that these payments therefore cannot be regarded as true rebates but should be considered a part of the income of the cooperative. Dissenters from this conclusion emphasize that membership in a cooperative is voluntary and that members actively participate in decisions with respect to payment of patronage dividends.

If noncash patronage dividends were included in the taxable income of cooperatives, while cash patronage dividends were excluded, most of the associations might still be able to build up substantial amounts of capital out of earnings not taxed to the association. This could be done by such devices as giving patrons the option to receive cash or stock, which would probably be held by the courts to be equivalent to a cash distribution and hence excludable. It would also be possible for many cooperatives to make wider use of direct assessments on patrons in proportion to cash patronage dividends received.

## TREAT FARM COOPERATIVES LIKE PARTNERSHIPS

Some have recommended that the present exemption for farmers' cooperatives be eliminated and that the income of the cooperatives be made taxable to the individual patrons in the same way that the income of partnerships, whether or not distributed, is now taxable to the partners. This would involve the allocation and taxation of the income retained as reserves to the patrons. It would eliminate the favorable treatment which is not accorded farmers' cooperatives by comparison with partnerships by taxing as income to the patrons not merely the patrons' dividends but also the income retained by the cooperative. It has also been suggested that to make this treatment effective it would be necessary to require the cooperatives to file information returns indicating the amounts of income allocated to each of the patrons.

## IMPOSITION OF SPECIAL TAXES IN LIEU OF INCOME TAX

The difficulties that would be encountered in attempting to include patronage dividends of farm cooperatives in the corporation income tax base has led to the suggestion that it might be well to abandon the thought of taxing them under the income tax and to subject them to another type of tax instead.

One such alternative would be a tax based on gross receipts or sales. The burden imposed by a gross receipts tax would bear no necessary relationship to income. The amount of net income earned on a dollar of gross sales varies widely among manufacturers, wholesalers, and retailers in different lines and among firms in the same line.

Another alternative would be to assess the tax on the basis of invested capital. As in the case of a gross receipts tax, the selection of a rate that would approximate a tax on net income would be difficult, if not impossible. Moreover, a tax on invested capital would bear more heavily on weak cooperatives than on strong and successful associations. Also, as experience under the excess profits tax has shown, the valuation of invested capital is always a complex problem difficult to solve under the best circumstances.

This brief summary of some possible alternative ways of taxing farm cooperatives indicates, I think, that the choice is not an easy one to make. The basic questions at issue are (1) whether the income of cooperatives should be taxed in a manner more nearly comparable with the taxation of the income of ordinary corporations, or whether the income should be taxed mainly or exclusively at the individual level, as in the case of partnership income; and (2) whether as a matter of public policy farmers' cooperatives perform functions which should be encouraged by special tax treatment.

TABLE A.—Farmers' marketing and purchasing cooperative associations<sup>1</sup> in the United States, 1944-45 marketing season<sup>2</sup>

Type of association	Number of associations		Estimated membership <sup>3</sup>		Estimated business <sup>4</sup>	
	Number	Percent	Number (in thousands)	Percent	Value (in millions of dollars)	Percent

<sup>1</sup> Includes independent local associations, federations, large-scale centralized associations, sales agencies, independent service-rendering associations, and subsidiaries whose businesses are distinct from those of the parent organizations.

<sup>2</sup> A marketing season includes the period during which the farm products of a specified year are moved into channels of trade. Marketing seasons overlap.

<sup>3</sup> Includes members, contract members and shareholders, but does not include patrons not in these categories.

<sup>4</sup> Includes the value of commodities for which associations render essential services, either in marketing or purchasing and the value of commodities sold by associations, whether on a commission or a brokerage basis, and also some intraassociation transactions.

<sup>5</sup> After making adjustment for the purchasing business of marketing associations and the marketing business of purchasing associations, it is estimated that the total purchasing business was approximately \$1,095 million and the total marketing, \$4,550 million.

TABLES B AND C: DISTRIBUTION OF RETURNS OF TAX-EXEMPT FARMERS' COOPERATIVE MARKETING AND PURCHASING ASSOCIATIONS BY SIZE OF GROSS INCOME AND RECEIPTS, AND BY SIZE OF TOTAL ASSETS, 1943

These tables show available information on the size distribution of tax-exempt farmers' cooperative marketing and purchasing associations. They are based on tabulations of information from 4,397 returns of such organizations filed on Form 990 for the calendar year 1943 or for fiscal years beginning in 1943. These 4,397 returns include all returns received in the Bureau of Internal Revenue through December 31, 1944. They do not include the 1,198 returns of tax-exempt farmers' cooperative marketing and purchasing associations received in the Bureau of Internal Revenue between December 31, 1944, and September 1, 1945. Among these latter returns only those of organizations with total gross income and receipts in excess of \$50,000 were tabulated by size groups, and they are not included in the tables. Information drawn from the returns of tax-exempt farmers' cooperatives and other tax-exempt organizations was published by the Treasury Department, November 1, 1945, as a Supplement to Statistics of Income for 1943, Part 2.

In using the data presented in tables B and C, it should be remembered that it is impossible to say how complete their coverage is. Although it is believed that most organizations required to file an information return did so, it is not possible at this time to determine how many cooperatives may have failed to file a return for 1943. Furthermore, it is not certain how the distributions shown in tables B and C would have been affected if it had been possible to include

returns not received in the Bureau of Internal Revenue until after December 31, 1944. Finally, it is not known whether the size distribution of taxable farmers' cooperatives differs significantly from that of the tax-exempt organizations. It has not been possible to separate the tax returns of taxable farm cooperatives from those of ordinary corporations.

TABLES F AND G: RELATIVE GROWTH OF COOPERATIVE MARKETING AND PURCHASING ASSOCIATIONS, 1935-43

## SOURCES OF DATA AND THEIR LIMITATIONS

The value of products marketed by cooperatives (valued at the farm level) is closely approximated by the series on the dollar volume of business of cooperatives computed by the Farm Credit Administration. This, however, is not altogether true in the case of processed products, which include the value of the raw product to the producer, together with handling and processing expenses. Limited amounts of service charges at terminal markets are included in some instances. The Farm Credit Administration estimates are based on financial statements and other reports from associations. Duplications resulting from interorganization turnover are eliminated insofar as possible. Inclusion of such handling and processing expenses, however, impairs the usefulness of the index only to the extent that there has been a significant change in the relative importance of these expenses. Total farm sale proceeds may be represented by the series on cash receipts from farm marketings, compiled by the Bureau of Agricultural Economics.

There are, however, certain limitations of these data when used for the purposes of measuring relative growth of cooperatives. In the first place, the results apply to cooperatives as a whole whereas ideally it would also be advisable to have data on the basis of individual commodities (and even on various regions so that any specific area of rapid growth or decline could be distinguished). In the second place, the two primary series are not strictly comparable. The cash marketing series reflects the influence of a number of commodities, notably hay, not handled to any extent by cooperatives. Moreover, the bulk of cooperative marketing is concentrated in a relatively few commodities, some of which are less heavily weighted proportionately in the cash receipts index. Nevertheless, for a study such as this one, where the interest is primarily in broad trends, it is believed that sufficiently reliable results can be obtained.

Another difficulty arises from the fact that the data compiled by the Farm Credit Administration are presented in terms of marketing seasons which spread over portions of 2 years, whereas the cash receipts totals are on a calendar year basis. For purposes of these tables, the first year of a given marketing season has been taken as the link to the other series (i. e., marketing season 1943-44 corresponds to calendar year 1943).<sup>1</sup>

Measurement of the relative growth in cooperative purchasing at the farm level also involves certain difficulties. There is no series on the total volume of farm purchases. It is known, however, that the principal products handled by cooperatives are feed, fertilizer, and gasoline, oil and other automotive supplies.<sup>2</sup> Annual totals of farm expenditures on these items are published by the Department of Agriculture.

While an index based on these totals is perhaps the best available, it obviously suffers from a very serious limitation, arising out of its implicit overweighting of feed and underweighting of gasoline, oil, etc., as compared with the index of cooperative purchasing.<sup>3</sup> Since changes in the value of feed expenditures by farmers were substantial, the effect may be to understate any uptrend in the adjusted index.<sup>4</sup>

TABLE F.—*Relative growth of cooperative marketing, 1930-44*

[Base all indexes, 1935-39]

Year	Index of cooperative farm marketing	Index of total cash receipts from farm marketing	Index of relative growth of cooperative marketing (column 1+ column 2)	Year	Index of cooperative farm marketing	Index of total cash receipts from farm marketing	Index of relative growth of cooperative marketing (column 1+ column 2)
	(1)	(2)	(3)		(1)	(2)	(3)
1930.....	126	113	112	1938.....	97	96	101
1931.....	100	80	125	1939.....	94	99	95
1932.....	69	59	117	1940.....	105	105	100

1936.....	108	105	103	1944.....	262	248	106
1937.....	113	111	102				

Source.—U. S. Department of Agriculture: Farm Credit Administration and Bureau of Agricultural Economics.

<sup>1</sup> There is less error in this procedure than in the opposite approach since about 90 percent of the returns submitted to the FCA are on a calendar rather than fiscal year basis.

<sup>2</sup> In 1936, these products accounted for about 60 percent of total purchasing by all cooperatives (Statistical Handbook of Farmers' Cooperatives, p. 94). A study of 16 large regional cooperatives in 1944 showed that the proportion for these organizations was nearly 85 percent, but recent figures reflect wartime shortages of many other items customarily handled by cooperatives.

<sup>3</sup> Moreover, the data on expenditures for the operation of motor vehicles are not strictly comparable with cooperative purchase of motor-vehicle supplies. The former includes such things as cost of registration, insurance expenses, and labor for repairs. In addition, only 40 percent of the cost of operating automobiles is included.

<sup>4</sup> On the other hand, construction of an aggregate index for feed, gas, and oil, and fertilizer with weights of 5, 3, and 1, respectively, and 4, 2, and 1, did not produce noticeably different results.

TABLE G.—*Relative growth of cooperative purchasing, 1930-44*

Source.—U. S. Department of Agriculture: Farm Credit Administration and Bureau of Agricultural Economics.

<sup>1</sup> Operation of motor vehicles includes expenditures for gasoline, oil, tires, and labor for repairing tractors, and gasoline, oil, tires, and replacement parts, labor for repairs, registration fees and insurances for automobiles and trucks. Only 40 percent of the total operating costs of automobiles is included as a production expense.

**Exhibit 33.—Letter of Under Secretary of the Treasury Wiggins, February 26, 1948, transmitting, for consideration of the House Ways and Means Committee, a list of technical tax legislative revisions**

FEBRUARY 26, 1948.

MY DEAR MR. CHAIRMAN: As you know, Secretary Snyder has urged in appearances before your Committee the desirability of undertaking at the earliest possible opportunity the steps necessary to eliminate from the tax structure its inequities and administrative and other defects. Under present conditions we cannot safely undertake this year some of the basic structural changes that will ultimately be desirable due to the large losses in revenues they might entail. I am confident, however, that we can adopt many revisions which would move in the direction of a much improved postwar tax system.

To assist in accomplishing this purpose, there is transmitted herewith, for consideration of your Committee, a list of some of the items which this Department believes desirable to have enacted into law during the present session of the Congress.

There is now in course of preparation a further list which I hope to submit to you as soon as it is completed. These lists by no means constitute a complete statement of desirable amendments to the tax law. They include items with respect to which our consideration and study have progressed sufficiently to enable the Department to make specific and definite recommendations. As to many of them, tentative legislative drafts have already been completed. In this connection it should be understood that the brief descriptive explanations of the items in the attachment are intended only to present the general outlines of the recommended revisions.

In the interest of expeditious legislative action, I am not now suggesting a number of controversial or complex matters which the Department believes need attention. These items will require our joint study and consideration before they could be made ready for legislative action. I am hopeful that by persistent cooperative work of the technical staffs of the Joint Committee on Internal Revenue Taxation and this Department many of these more controversial and complex items can be disposed of as soon as agreement can be reached on their solution.

Sincerely yours,

A. L. M. WIGGINS,  
Under Secretary of the Treasury.

HONORABLE HAROLD KNUTSON,  
Chairman, Committee on Ways and Means,  
House of Representatives, Washington, D. C.

## TECHNICAL TAX LEGISLATIVE REVISIONS RECOMMENDED FOR ENACTMENT IN 1948

## 1. NET OPERATING LOSS DEDUCTION

It is recommended that the present system of a two-year carry-back and a two-year carry-over of net operating losses be revised so as to provide for a one-year carry-back and a five-year carry-over of such losses. In connection with this revision, it is also recommended that the present rules with respect to the determination of the amount of the net operating loss and of the carry-over and carry-back be retained, that the rules for determining the applicable law in computing the amount of the loss to be carried over be clarified, and that certain technical errors in the present law be corrected.

## 2. STOCK OPTIONS

It is recommended, where an employer grants to an employee an option to purchase stock, that if the option price is substantially less than the fair market value of the stock at the time the option is granted, the amount of the difference be included in the income of the employee as compensation in the year in which the option is granted. In the case of an exercise of the option to purchase stock, the excess of the fair market value at the time of the exercise over the option price (or the fair market value of the stock at the time the option was granted if that is substantially greater than the option price) would be treated as ordinary income to the employee in the year of exercise of the option, but the tax computed on such income would be payable only in the year of disposition (whether by sale, gift, or bequest) of the stock by the employee. Moreover, in any case where the option had been held for a period of three years or longer, the tax would be determined by spreading the amount of the income over the period during which the option was held. The employer would be permitted in the year in which the option is exercised an expense deduction to the extent of the difference between the option price and the fair market value of the stock at such time, subject to the usual rules applicable to such deductions.

## 3. TAX ON SMALL CORPORATIONS

It is recommended that there be explored the question of whether the tax rate structure with respect to corporations with incomes below \$50,000 can be revised so as to substitute for the present notch rate of 53 percent on that portion of the corporate income between \$25,000 and \$50,000 a more desirable relationship between the lower rates on smaller incomes and the ordinary corporate rate of 38 percent.

## 4. CAPITAL GAINS

(a) It is recommended that the existing loopholes through which short term capital gains may be converted into long term capital gains, and through which fictitious losses are used to offset real gains, be closed by providing, in effect, for (1) nonrecognition of any gain or loss attributable to fluctuations in the market price of securities and commodities which occur during a period when the taxpayer holds both long and short positions in substantially similar commodities and securities, and (2) exclusion of such period from the "holding period". The statutory provisions should be made broad enough to apply to simultaneous long and short positions in different futures of the same commodity and different securities of the same corporation. Such a statute would eliminate most of the abuses arising under present law from the use of the short sale device. However, experience thereunder may indicate that even broader treatment is necessary to provide adequate protection for the revenue.

(b) It is recommended that the provisions of section 117 (f) of the Code, treating amounts received upon retirement of certain securities as capital gains, be made inapplicable to securities which do not meet the requirements of the section at the time of their issuance.

(c) It is recommended that in computing the holding period of a capital asset, there be disregarded the holding period of a noncapital asset which is exchanged for such capital asset.

## 5. INCOME OF ESTATES AND TRUSTS

It is recommended that the present treatment of the income of estates and trusts under section 162 of the Code be revised. The principal purpose of this revision would be to eliminate the so-called "65-day rule" and "12-month rule" now used in measuring the portion of any distribution by a trust or estate which is to be taxed in the year of distribution to the recipient. Under the proposed revision,

distributions would, generally speaking, be taxed to the recipient to the extent of the current year's income of the estate or trust. It would also overrule certain Circuit Court decisions treating as income to a beneficiary certain distributions which do not constitute income to the estate or trust.

#### 6. WAR LOSS RECOVERIES

It is recommended that the present income tax treatment of war loss recoveries be revised and that there be substituted a rule under which the tax upon recovery of property for which a deduction was taken should be equal to the tax saving that resulted from the related deduction. In the interest of administrative simplicity, the recommended revision would also eliminate the present rule requiring all property recovered to be aggregated in determining the tax upon recovery and would provide that recovered property be taken in either at its former adjusted basis or the fair market value, at the election of the taxpayer.

#### 7. INCOME FROM ANNUITIES

It is recommended that the present rule, under which three percent of the cost to the taxpayer of an annuity is included in income each year until there has been a tax-free recovery of cost, be replaced by a system under which the taxpayer would be permitted an annual tax-free recovery of cost based upon a proration of the total cost over the expected period of the annuity.

#### 8. INCOME FROM PROCEEDS OF LIFE INSURANCE PAID IN INSTALLMENTS

It is recommended that where the proceeds of life insurance paid by reason of the death of the insured are paid in the form of an annuity (whether for a fixed period or for life), the interest element should be taxed annually upon the same basis as in the case of an annuity. Under existing law, the entire proceeds have been held by the courts to be exempt even though paid as an annuity.

#### 9. POWERS OF APPOINTMENT

It is recommended that the present provisions with respect to the application of the estate and gift tax to powers of appointment be revised in accordance with the provisions of H. R. 3533 (80th Congress, 1st Session). To the extent possible, it would be desirable to re-examine the provisions of this bill with a view to simplifying its terms. Under this revision, the time for tax-free release of powers should be extended to July 1, 1949.

#### 10. INCOME OF SURVIVING PARTNERS AND ESTATES OR BENEFICIARIES OF DECEASED PARTNERS

It is recommended that in cases where, under the terms of a partnership agreement, the surviving partners for a period of time pay to the estate or beneficiary of a deceased partner a share in the partnership income, such payments shall not be included in the taxable income of the surviving partners and shall be included in the income of the estate or beneficiary, with a proper adjustment for the estate tax upon the value of the right to such payments in the estate of the deceased partner. This recommendation should be applied only to personal service partnerships. Under present law, the tax treatment of this type of case is not clear.

#### 11. INCOME OF LIFE INSURANCE COMPANIES

It is recommended that the present method of computing the taxable income of life insurance companies under sections 201, 202 and 203 of the Code be revised so as to more clearly and equitably reflect the taxable income of such companies. A detailed proposal for carrying this recommendation into effect is now in course of preparation.

#### 12. TREATMENT OF INVOLUNTARY CONVERSIONS

It is recommended that the present provisions with respect to the tax treatment of involuntary conversions of property contained in section 112 (f) of the Code be amended to permit the same treatment to apply in the case of acquisitions of property made in anticipation of involuntary conversion or the receipt of proceeds from such conversion. At the present time, the provisions of section 112 (f) are, in general, confined to cases where the converted property or its proceeds can be traced into subsequently acquired property.

#### 13. CERTAIN DISTRIBUTIONS OF CORPORATE ASSETS

It is recommended that, in order to prevent inequity and tax avoidance upon distribution and sale of corporate assets, the appreciation in value of corporate assets distributed in kind to the stockholders of the corporation be taxed as a gain to the corporation.

**14. DIVIDENDS RECEIVED CREDIT**

(a) It is recommended, with respect to dividends of certain foreign corporations, that the present dividends received credit be extended so as to apply to dividends received by domestic corporations from foreign corporations at least fifty percent of whose gross income is from sources within the United States; the credit would be limited to such portion of the dividends as the domestic income bears to the total corporate income.

(b) It is recommended that a technical error in section 15 (a) of the Code, resulting from an amendment to that section by the Revenue Act of 1945, be corrected. This error affects the computation of the dividends received credit where the receiving corporation has partially tax-exempt interest.

**15. PENSION TRUSTS**

(a) It is recommended that the period after the close of the taxable year, provided under section 23 (p) (1) (E) of the Code, in which a taxpayer on the accrual basis is deemed to have made a payment on the last day of the taxable year, be extended from 60 days to 75 days.

(b) It is recommended, in lieu of the present provision in section 165 (b) of the Code treating certain lump sum distributions of pension trusts as long-term capital gains, that such distributions be treated as ordinary income for the year of payment, and accorded treatment similar to that now provided for compensation earned over a period of time by section 107 of the Code. This treatment should also be extended to distributions from nontrusteed annuity plans.

(c) It is recommended that the personal liability of a trustee for the estate tax of a deceased beneficiary be made inapplicable in the case of trustees of pension trusts.

**16. FOREIGN TAX CREDIT FOR ESTATE TAX PURPOSES**

It is recommended that there be allowed against the estate tax a credit for foreign estate or inheritance taxes paid in respect of property included in the gross estate, which would be comparable to the foreign tax credit now allowed for income tax purposes.

**17. PUERTO RICAN ESTATES**

It is recommended that in the case of the estate tax imposed upon the estates of citizens of the United States who were residents of Puerto Rico at the time of their deaths, a credit be allowed for the amount of the Puerto Rican estate tax. It is also recommended that property located in the United States of citizens of Puerto Rico be made subject to the Federal estate tax in the same manner as property of nonresident aliens.

**18. INSTALLMENT OBLIGATIONS**

It is recommended that where a decedent has elected to report income from installment obligations upon the installment basis provided in section 44 of the Code, a proper allowance for estate tax imposed upon the value of such obligations be allowed to the estate or beneficiary of the decedent who elects to continue to report such income upon the installment basis.

**19. DEDUCTIONS BY RELATED TAXPAYERS**

It is recommended that section 24 (c) of the Code be amended to eliminate a technical error which results in certain cases in the loss of a corporate deduction for compensation or interest payable to the stockholders of the corporation, even though the recipient is required to include such amounts in his taxable income within the limited period specified in this section.

**20. DEDUCTIONS FOR WORK CLOTHES**

It is recommended that the long-established administrative practice of the Bureau of Internal Revenue, with respect to the allowance of deductions for the cost of work clothes, be confirmed by specific legislation disallowing such deductions except as to work clothes which are especially adapted to a particular occupation, and which do not substitute for, or relieve the taxpayer from providing himself with, ordinary working or wearing apparel.

**21. CORPORATE REORGANIZATIONS**

It is recommended that pending a complete study and review of the present law with respect to corporate reorganizations, and without prejudice to any recommendations that might result therefrom, the definition of reorganization under section 112 (g) be amended so as to include within such definition a trans-

fer of substantially all the assets of one corporation to another corporation in exchange solely for voting stock of a corporation owning all of the voting stock of the acquiring corporation. This type of reorganization does not appear to differ substantially from the type of reorganization now included in the definition in which the assets of the transferor corporation are transferred in exchange for the stock of the acquiring corporation. The transaction also appears to be substantially similar to the case now within the reorganization definition where one corporation acquires all the stock of another corporation in exchange for part of its own stock.

## 22. MORTGAGE FORECLOSURES

It is recommended that the present rules with respect to the income tax treatment of mortgage foreclosures be revised to treat the foreclosure as a recovery of the amount of the indebtedness up to the fair market value of the property at the time of foreclosure, and to treat the final disposition of the property foreclosed as a completion of the transaction. This, among other things, would eliminate the holding of the *Midland Life Insurance* case under which the bid price at the foreclosure is used as the measure of taxability. Upon final disposition, if the property is sold for less than its fair market value at the time of foreclosure, there would be a further bad debt deduction. If sold for more, there would be a bad debt recovery, except that any amount received in excess of the indebtedness would be deemed a capital gain.

## 23. SURTAX ON PERSONAL HOLDING COMPANIES

(a) It is recommended that the present provisions applicable to the liquidation of a personal holding company be amended so as to prevent the imposition of the personal holding company surtax in any case where all the assets of the personal holding company have been distributed in liquidation.

(b) It is recommended that the alternative capital gains tax be made inapplicable as an alternative to the personal holding company surtax.

(c) It is recommended that the deduction allowed for worthless stock of a subsidiary under section 23 (g) (4) (B) be extended to include a deduction for worthless stock of an operating subsidiary with investment income, even though ten percent or more of its income may be from royalties, rents, dividends, etc.

## 24. FOREIGN TAX CREDIT

(a) It is recommended that the present provision of section 131 (f) (1) of the Code be amended so as to permit a foreign tax credit to a domestic corporation with respect to taxes paid by a foreign subsidiary, even though the domestic corporation owns less than a majority of the voting stock of the foreign corporation, provided that it owns at least twenty percent of the stock of such corporation and provided also that the business of the foreign subsidiary is a direct and integral part of the domestic corporation.

(b) It is recommended that a period of limitation of seven years (in lieu of the present shorter period) be allowed to a taxpayer claiming a foreign tax credit, in which to claim an increased credit by reason of an increase in the amount of the foreign tax.

## 25. GOVERNMENT PERSONNEL IN U. S. POSSESSIONS

It is recommended that the present exemption for earned income under section 251 of the Code be revised so that it will not apply to the salaries of civilian or military personnel of the United States Government stationed in the possessions.

## 26. RECIPROCAL EXEMPTION FOR INTERNATIONAL AIRCRAFT

It is recommended that the income of foreign airlines operating partly within the United States be extended income tax exemption similar to that applicable in the case of foreign shipping corporations under section 231 (d) of the Code. This exemption is provided on a reciprocal basis.

## 27. EXTENSION OF BUSINESS BAD DEBT DEDUCTION

It is recommended that a bad debt resulting from an obligation which arose in the course of a taxpayer's business be treated as a business bad debt even though the taxpayer has terminated the business at the time the debt becomes worthless.

## 28. STATUTE OF LIMITATIONS

It is recommended that the following amendments be adopted with respect to the statute of limitations applicable in certain cases:

(a) *Estate tax*.—The period of limitations under section 874 be extended to

five years where more than 25 percent of the gross estate has been omitted from the return. The present period is three years.

(b) *Gift tax*.—Section 1016 be amended to extend the period of limitations to five years where the donor has omitted more than 25 percent of the total gifts made in one year. The present period is three years.

(c) *Waiver by a transferee or fiduciary*.—Section 322 be amended to extend the period of limitations for refunds where a waiver of the statute of limitations has been executed by a transferee or fiduciary.

(d) *Extension for assessment of deficiencies*.—An amendment be made to give the Commissioner additional time in which to assess a deficiency where the taxpayer has filed a claim for refund.

(e) *Transferee liability*.—The additional time for assessment in the case of a transferee for income tax purposes be limited to cases where the transfer has taken place prior to the expiration of the statute of limitations in the case of the transferor.

(f) *Valuation of gifts*.—The gift tax provisions be amended to provide that the value of property in respect of which a taxable gift tax return has been filed may not be revised, for the purposes of computing the tax on subsequent gifts, after the expiration of the statute of limitations applicable to a prior gift.

#### 29. TECHNICAL ERRORS IN REPEAL OF EXCESS PROFITS TAX IN 1945

(a) It is recommended that for the purposes of the application of section 102 of the Code to fiscal years beginning in 1945 and ending in 1946, the credit under section 26 (e) be properly adjusted.

(b) It is recommended that the treatment of installment income from long-term contracts received after the repeal of the excess profits tax be amended to prevent the imposition of normal tax and surtax in addition to the excess profits tax.

#### 30. ESTATE TAX DEDUCTION FOR SUPPORT OF DEPENDENTS

It is recommended that the deduction for estate tax purposes for payments made in support of dependents be repealed.

#### 31. WITHHOLDING TAXES ON WAGES

It is recommended that a civil penalty be imposed upon employers for failure to make a timely payment of withholding taxes collected from employees.

#### 32. CHARITABLE CONTRIBUTIONS

It is recommended that the provisions under the estate, gift and income taxes with respect to gifts made to charities be put upon a comparable basis.

#### 33. WAGES TO DEPENDENTS

It is recommended that amounts paid by a taxpayer as wages to a dependent for whom he claims an exemption be made not deductible for income tax purposes. Because of the limitation upon allowance of credits for dependents, this recommendation would only affect cases where the wages and other income of the dependents are less than \$500.

#### 34. DIVIDENDS ON PREFERRED STOCK OF PUBLIC UTILITIES

It is recommended that a technical omission in the Revenue Act of 1943 be supplied to provide that the dividends received credit shall not be reduced in cases where the dividends on the preferred stock did not give rise to the dividends paid credit, under section 26 (h) of the Code.

#### 35. EXEMPTION FROM STAMP TAX FOR LOANS OF BONDS

It is recommended that loans of corporate bonds be exempted from the transfer tax imposed by section 3481 of the Code in the same manner that loans of corporate stocks are exempted.

#### 36. STANDARD DEDUCTION

It is recommended that permission be granted to revoke the election with respect to the standard deduction at any time within the statute of limitations.

#### 37. STATISTICAL REPORTS

It is recommended that the provisions of the Code be amended to eliminate the requirement that the Bureau of Internal Revenue report to the Congress small refunds and the requirement that corporations report to the Bureau of Internal Revenue salaries in excess of \$75,000.

## 38. 52-WEEK YEAR

It is recommended that permission be granted taxpayers in appropriate cases and subject to the Commissioner's regulations to compute their income on the basis of the so-called 52-week year.

## 39. NOTARIZATION OF RETURNS

It is recommended that authority be given to the Commissioner, with the approval of the Secretary, to eliminate the requirement of the oath from all returns.

## 40. WITHHOLDING OF TAX ON NONRESIDENT ALIENS

It is recommended that the date for the filing of returns under section 143 be adjusted to conform with the date for payment of the tax.

## 41. DELINQUENT GOVERNMENT EMPLOYEES

It is recommended that the Federal Government be authorized to withhold compensation from its employees who are delinquent in income taxes.

## 42. DISTRAINT ON SALARIES

It is recommended that a continuing distraint on salaries be permitted for the purposes of collecting delinquent taxes.

## 43. FIDUCIARY RETURNS

It is recommended that a fiduciary having custody of the property or the business of a corporation be required to include all income of such corporation in the return to be filed by him.

## 44. COMPROMISES

It is recommended that the requirement of the Secretary's approval of compromises relating to cases where tax liability is less than \$500 be eliminated, and authority be given to the Commissioner to delegate to his agents the right to compromise such cases.

## 45. DOBSON RULE

It is recommended that the rule of the *Dobson* case, giving a greater degree of finality to decisions of the Tax Court than to decisions of the District Courts, be eliminated.

## 46. ADMINISTRATIVE PROCEDURE ACT

It is recommended that the Tax Court be specifically excluded from the provisions of the Administrative Procedure Act.

## 47. TECHNICAL AMENDMENTS WITH RESPECT TO TAX COURT PROCEDURES

It is recommended that certain minor technical amendments be made with respect to procedures governing the Tax Court of the United States.

## 48. U. S. COURT FOR CHINA

It is recommended that the provisions in the Code relating to the U. S. Court for China be eliminated in view of the fact that such Court no longer exists.

## 49. TRAVEL ALLOWANCES FOR FIELD AGENTS

It is recommended that specific authority be included in the Internal Revenue Code for travel in the case of revenue agents, as in the case of deputy collectors, under section 3600.

**Exhibit 34.—Statement of Under Secretary of the Treasury Wiggins before the Senate Committee on Finance, May 17, 1948, on the Treasury Department's views on proposals to modify or repeal the oleomargarine taxes**

I am very glad to appear before your committee to present the Treasury Department's view on the tax aspects of the pending proposals which would modify or repeal the excise taxes and occupational taxes on the manufacture and distribution of oleomargarine.

## LEGISLATIVE HISTORY

At present oleomargarine is subject to tax of 10 cents per pound if it is yellow in color and to a rate of one-fourth cent per pound if it is uncolored. Imported oleomargarine, whatever its color, is taxed at a rate of 15 cents per pound. In

addition, annual occupational taxes are imposed on the manufacturers and distributors of oleomargarine. The manufacturers' occupational tax is \$600 a year. Wholesalers are subject to a tax of \$480 if they distribute colored oleomargarine and \$200 if they handle only the uncolored product. At the retail level, the occupational tax is \$48 for the distribution of yellow oleomargarine and \$6 for the distribution of uncolored oleomargarine.

Although this schedule of tax rates has been in effect since 1902, the origin of the taxes goes back to 1886.

#### REGULATORY ASPECTS

The legislative history of these taxes and the considerations advanced in their defense during their long history indicate that their origin was associated with an effort to prevent the widespread, fraudulent sale of oleomargarine as butter. Toward the close of the past century there was apparently need for using the Government's taxing power as a regulatory measure. The taxing power was also brought into use in connection with the regulation of the production or distribution of a number of other commodities, such as narcotics and firearms. The imposition of a tax on the production, sale, or importation of a commodity, the distribution of which the Government finds it necessary to regulate, enables the Government to establish rules, regulations, and reporting requirements with which manufacturers or distributors must comply. Failure to conform to such regulations constitutes a violation of the revenue laws and provides a vehicle for regulatory purposes.

The use of a taxing power for this purpose is justified in the public interest when the regulatory ends cannot be achieved effectively in other ways. However, these ends require only the imposition of a token tax, sufficient to establish liability for reporting and for a tax obligation under the revenue laws but nothing more. Originally the tax was 2 cents per pound on all domestic oleomargarine. In 1902 the rate was reduced to one-fourth cent per pound on uncolored and raised to 10 cents on colored oleomargarine. From the viewpoint of regulating the sale of oleomargarine, this schedule of tax rates goes far beyond such requirements.

A further consideration is the fact that there appears to remain little, if any, need for the use of these taxes for regulatory purposes. Since their enactment, the effectiveness of the Government's administrative agencies as regulatory bodies has been substantially developed and improved. With special reference to safeguarding the public health where affected by interstate commerce, the Congress has created the Pure Food and Drug Administration. This organization is daily engaged in the task of insuring the maintenance of high food and medicinal standards and in safeguarding the consumer against fraudulent representation of commodities marketed in interstate commerce. Moreover, the development of the Government's administrative agencies has been paralleled by a decline in the need for regulation as standards of business conduct and self-imposed business standards have improved.

This conclusion is borne out by the recent experience of the Bureau of Internal Revenue with this tax. In 1947, almost 275,000 taxpayers paid the special taxes on manufacturers of and dealers in oleomargarine (table A, p. 355). A search of the Bureau's records indicates that during the decade since 1938, it found it necessary to refer only four cases to the Department of Justice for prosecution for violations of the labeling, marketing, and handling provisions of the oleomargarine tax laws. This does not include a number of violations of a technical character which did not involve fraud or misrepresentation.

The effective development of public agencies charged specifically with regulatory duties suggests that there is no longer any need for the Bureau of Internal Revenue continuing in the field of oleomargarine regulation. Its facilities could be more usefully devoted to the discharge of its basic responsibilities in tax collection. However, if the Congress considers that there continues to be need for the use of the Government's tax-collecting agency for the regulation of the marketing of oleomargarine, this objective could be served by the retention of only a nominal tax at the rate of, say, one-tenth or one-fourth of 1 cent per pound, and correspondingly reduced occupational taxes.

I should like to emphasize, however, that it is the Treasury's view that as a general rule excise taxes should be used only for revenue purposes. As revenue taxes, careful consideration should be given to the rates and the tax base to make sure that the producers affected are not being placed at an undue competitive disadvantage or that the tax does not unduly burden low-income consumers. In

a few cases, it may be desirable to use excises to prevent fraud or the use of deleterious products. In such cases, however, we should be sure that there is a real need for such regulation and should be alert to changing conditions which might not only remove the need for regulation but might make regulation undesirable.

#### TAX COLLECTIONS

The revenue produced by the taxes on oleomargarine is relatively little. Collections in the current and the next fiscal year are estimated at \$7 million each. Throughout most of the thirties, annual collections ranged around \$2 million. In fiscal year 1947 they were less than \$6 million and in 1946 about \$5 million. Until recently virtually all of the revenue was accounted for by uncolored oleomargarine. With the increased use of colored margarine in the postwar years, the share of the colored product in total collections has risen to about 40 percent (table B, p. 355).

#### TAX BURDEN

The oleomargarine taxes belong to that category of punitive consumption levies the burden of which increases as tax collections decrease. The tax may be said to impose a maximum burden when it yields no revenue at all because in such cases it effectively prohibits consumption and diverts demand to substitute products. The Federal oleomargarine taxes, in combination with State legislation, which I will describe later, approach this result. The combined effect of these taxes is to place a burden on consumers which falls with particular weight upon low-income groups.

For the majority of the population, the direct tax burden represented by the oleomargarine taxes is small because they consume only the uncolored product which is subject to the nominal one-quarter cent per pound. Ninety percent of margarine consumption falls in this category (table C, p. 356). Those individuals who consume colored margarine bear a serious tax burden in paying a 10-cent-per-pound tax, but their number is small. The direct effect of the occupational taxes on consumers is also small. In 1947 combined tax collections from Federal excise and occupational taxes equalled about 1 cent per pound of margarine sold.

The direct tax burden, however, is the lesser part of the cost of these taxes to consumers. The more important cost results from the fact that the public is deterred from exercising its normal preferences. Many consumers are in effect prevented from purchasing less expensive oleomargarine and are obliged to buy more expensive butter or to forego table fats altogether. The public prefers yellow table spreads and has an aversion to the uncolored product. The improved coloring facilities supplied by manufacturers of uncolored margarine has not overcome consumers' resistance to uncolored table fats. The weight of the indirect burden resulting from the oleomargarine taxes cannot be calculated but might be illustrated. The reluctance of distributors to become involved with the machinery of oleomargarine tax enforcement, together with the impediments imposed by many State laws, frequently preclude consumers from effectively exercising a choice between competing products. Where consumers with equal preference for the two products are unable to purchase 40-cent oleomargarine and are obliged to pay 90 cents for butter, the indirect burden of these taxes approximates the 50 cents difference between the selling price of those items.

It should be noted that the indirect burdens imposed by these taxes on consumers have substantially increased with the widening of the differential between the price of oleomargarine and butter in recent years. During the prewar period, when the price differential between yellow oleomargarine and butter was not more than 10 cents, the indirect burden was substantially less than it is today. Unhappily, this is also a period of high living costs. While the imposition of these burdens through taxation is always undesirable, it is especially objectionable at times when high prices threaten the living standards of large groups in the population.

#### EFFECT ON USE OF RESOURCES

I would like to emphasize that the views of the Treasury Department are concerned only with the tax aspects of the legislation before you. It may be appropriate nonetheless to observe that the oleomargarine taxes may interfere with the optimum utilization of our resources. It has been forcefully argued before this and other committees of Congress, for instance, that the national diet would be improved if more milk were consumed in fluid form and if the

table fat requirements of the Nation were obtained to a greater degree from oleomargarine. The Treasury is not in a position to appraise the validity of this argument, but I mention it only because it illustrates the dangers involved in utilizing the taxing power as a punitive instrument in channeling consumption in the direction for some products and away from others. It suggests that we should exercise great restraint in the use of the tax system for such purposes, except where the objective is clearly in the public interest and cannot otherwise be secured.

#### STATE REGULATION

In addition to the Federal taxes, large segments of American consumers bear also the burden of State regulation. Today the sale of colored oleomargarine is prohibited in 22 States. Three additional States impose a tax of 10 cents a pound on the colored product. In 23 States the sale of colored oleomargarine is unfettered by excises or State prohibitions.

Uncolored margarine is available without tax in all but 19 States. Seven of the 19 States impose taxes ranging from 5 to 15 cents a pound. In the other 12 the exemption of oleomargarine made of domestic oils and fats or with a specific minimum of animal fats renders the tax ineffective. As a result of this factor and the overlapping between States which tax colored and uncolored oleomargarine, approximately one-half of the States impose effective restrictions on the sale of oleomargarine.

License fees for the manufacture or sale of margarine are required in 14 States. Annual fees for manufacturers and wholesalers vary from \$1 to \$1,000, and for retailers from 50 cents to \$400 (table D, p. 357).

State taxes have been more onerous in the past than they are now, and the trend toward less State regulation of oleomargarine continues both by legislative and judicial action. Less than a month ago the State of New Jersey repealed its law which prohibited the manufacture and sale of colored oleomargarine in that State. A bill to repeal a similar prohibition has recently passed both the House and the Senate in the Commonwealth of Massachusetts and is now in the hands of the conferees of the two chambers. However, State taxes are still widespread and repeal of the Federal taxes would make some contribution to intergovernmental tax integration by removing one of the all too many instances of overlapping Federal and State taxes.

#### CONCLUSION

In summary, it is the Treasury Department's view that there is no longer need for the use of revenue laws to regulate the manufacture and distribution of oleomargarine and that the Bureau of Internal Revenue might well be freed of this responsibility. The oleomargarine taxes unnecessarily burden consumers far in excess of the amount paid in taxes and interfere with the optimum utilization of national resources. Revenue considerations are not involved.

State imposed taxes and prohibitions are so far reaching that even in the absence of Federal taxes oleomargarine would continue to be unavailable to consumers in many parts of the country. Nonetheless, it is the Treasury's view that the Federal taxes should be repealed. Such action would eliminate one instance of overlapping Federal and State taxation and would directly benefit consumers in the majority of the States. In the event, however, that the Congress deems it to be necessary to continue the use of the tax instrument for regulating the production and distribution of oleomargarine, this end would be fully served if the present punitive tax rates were replaced by token tax requirements.

<sup>1</sup> Manufacture or sale of colored margarine prohibited.<sup>2</sup> Tax applies to oleomargarine (colored or uncolored) not made from oils and fats (specifically named by the statute) that are largely derived from domestic materials.<sup>3</sup> Idaho also prohibits the manufacture or sale of colored margarine.<sup>4</sup> Minnesota's tax applies to oleomargarine not containing a minimum percentage (65 percent) of animal fats, as well as that made of foreign materials. Wyoming's tax applies only to vegetable oleomargarine (containing 20 percent or less of animal fats).<sup>5</sup> The license is for 2 years.<sup>6</sup> Tennessee's tax applies to all colored margarine, regardless of ingredients. Uncolored margarine is exempt if made from domestic oils and fats.**Exhibit 35.—Miscellaneous revenue legislation enacted during the fiscal year 1948**

Public Law 185, July 14, 1947, amended section 3179 (b) of the Internal Revenue Code to authorize a drawback upon the exportation of distilled spirits and wines packaged and bonded in the United States especially for export, and upon which tax has been paid.

Public Law 186, July 14, 1947, amended section 2801 (e) (4) of the Internal Revenue Code to permit a vermouth department to have interior communication with other departments of bonded winery premises and permit the manufacture of other aperitif wines in a bonded winery in the same manner as vermouth. Section 3043 (a) of the Internal Revenue Code was amended to permit the fermentation of grape wine retsina with resin on bonded winery premises. Section 3044 (b) of the Internal Revenue Code was amended to permit the juice of grapes to be fermented in certain instances above 13 per centum of alcohol. Section 3045 of the Internal Revenue Code was amended to permit the amelioration of loganberry, currant, and gooseberry wines with up to 60 per centum sugar and water solution without so indicating on the label.

Public Law 187, July 14, 1947, amended section 2801 (e) of the Internal Revenue Code to authorize fruit brandies distilled from the same kind of fruit at not more than 170 degrees of proof to be mixed or blended with each other, or with any such mixture or blend, by the distiller thereof in any internal revenue bonded warehouse operated by him exclusively for the storage of brandy or wine spirits.

Public Law 189, July 15, 1947, provided that the net operating losses and the unused excess profits credits of railroad corporations in bankruptcy or receivership proceedings shall be available as carry-overs to an acquiring railroad corporation organized or made use of to effectuate a plan of reorganization approved by the Court in such proceeding.

Public Law 226, July 24, 1947, amended section 1602 of the Internal Revenue Code to provide that a State law may permit certain voluntary contributions to be used in the computation of reduced rates for the purposes of the Federal Unemployment Tax Act.

Public Law 310, August 1, 1947, amended section 251 of the Internal Revenue Code to provide that citizens taken as prisoners of war or interned while serving in a possession of the United States and confined in a place not a possession shall be considered as being confined in a possession, and compensation received in the United States by such citizen attributable to the period of confinement shall be deemed to be compensation received outside of the United States.

Public Law 356, August 4, 1947, extended until December 31, 1948, the period of time within which claims may be filed for credit or refund based upon an overpayment of tax as a result of the failure to take a deduction for a war loss relating to any taxable year beginning in 1941 or 1942.

Public Law 367, August 5, 1947, amended section 421 of the Internal Revenue Code to provide that, in the event of the death prior to January 1, 1948, of an individual while serving as a member of the armed forces, the income tax shall not be imposed with respect to any taxable year ending on or after December 7, 1941, during any part of which the decedent was a member of the armed forces; and if the tax has been collected, it shall be credited or refunded as an overpayment.

Public Law 384, August 8, 1947, was concerned with the termination of wartime revenue and customs provisions. Termination dates were provided for numerous such provisions which had been tied to the duration of the emergency. The more important of these were: January 1, 1949, was set as the termination date for the special income tax exclusions now allowed to members of the armed forces and it was provided that the pay of service personnel shall after that date be subject to withholding. December 31, 1947, was set as the termination date for several provisions of law which permit, because of circumstances connected with the war, postponement of the time for performing various acts in connection with Federal tax liabilities. The wartime provisions for special treatment under the admissions tax for members of the armed forces and for activities operated on War and Navy Department reservations were terminated as of December 31, 1947, which date was also set for termination of the exemption from transportation tax available to members of the armed forces and others traveling on furlough tickets. March 31, 1948, was considered as the date of the termination of the war for the purposes of the proviso of section 511 (h) of the Merchant Marine Act of 1936 permitting further extension by the Maritime Commission of the period for the performance of certain acts with respect to ship construction reserve funds. The special relief accorded taxpayers using the last-in first-out inventory method for income tax reporting, whose inventories were depleted by involuntary liquidation because of circumstances related to the War, was made applicable only where the involuntary liquidation occurred in a taxable year beginning prior to January 1, 1948, and the replacement occurred in a taxable year ending prior to January 1, 1951. The wartime provision for percentage depletion for certain minerals was made permanent and extended to certain additional minerals.

Public Law 387, August 8, 1947, amended section 1802 (a) of the Internal Revenue Code so as to limit the stamp tax on issues of capital stock and similar interests; in cases where new and additional capital is introduced to the capital stock account, to an amount calculated on the basis of the earned surplus or other capital which for the first time is dedicated to capital. Section 1802 (b) of the Internal Revenue Code was amended to limit the stock transfer tax in cases of transfers of interests in a partnership owning shares or certificates of stock to an amount equal to that percentage of a tax computed on the transfer of all such shares or certificates owned by the partnership as the interest transferred bears to the total interests in the partnership of all the partners, and to exempt from

such tax mere loans of stock. Section 3481 (a) of the Internal Revenue Code was amended to afford the same treatment in cases of transfers of interests in a partnership owning bonds as is afforded by the amendment of section 1802 (b).

Public Law 439, March 11, 1948, provided in section 3 that for the purposes of the Federal income, estate, and gift taxes any gift, devise, or bequest to any of the Secretaries of the Armed Services or the Secretary of the Treasury for schools, hospitals, libraries and other institutions under the jurisdiction of such Secretaries shall be deemed a gift to or for the use of the United States.

Public Law 514, May 4, 1948, amended sections 212 (b) and 231 (d) of the Internal Revenue Code, effective retroactively to taxable years beginning after December 31, 1945, so as to provide that earnings of nonresident alien individuals and foreign corporations derived from the operation of aircraft registered under the laws of a foreign country will be excluded from their gross income if such foreign country grants an equivalent exemption to citizens of the United States and corporations organized in the United States.

Public Law 635, June 12, 1948, amended sections 403 (d) (3) and 452 (e) of the Revenue Act of 1942 to extend through June 30, 1949, the time within which certain powers of appointment may be released without incurring estate or gift tax liability, and provides that for the purposes of these sections a power to appoint created by a will executed on or after October 21, 1942, shall be considered a power created on or before that date if the person executing the will dies before July 1, 1949, without having republished the will, by codicil or otherwise, after October 21, 1942. By an amendment to section 710 (a) (5) of the Internal Revenue Code (relating to deferment of excess profits tax payment in case of abnormality) the period during which taxes deferred under that section may be assessed was extended until one year after the final determination upon the application for relief under section 722 of the Internal Revenue Code.

Public Law 706, June 19, 1948, amended section 1700 (a) (1) of the Internal Revenue Code to exempt from the admissions tax hospitalized servicemen or veterans when they are admitted free of charge.

Public Law 744, June 23, 1948, provided by amendments to the Railroad Retirement Act and the Unemployment Insurance Act for a uniform 20 percent increase in all annuities and pensions under the Railroad Retirement Act (other than certain survivors annuities); a guaranteed return was provided, with respect to lump sum death benefits, slightly in excess of the contributions paid by the deceased employee; and a sliding scale of rates under the Railroad Unemployment Insurance Act was provided ranging from one-half of 1 percent to 3 percent depending upon the balance in the Railroad Unemployment Insurance Account as of September 30 of the preceding calendar year.

Public Law 773, June 25, 1948, in codifying Title 28 of the United States Code entitled "Judicial Code and Judiciary" amends section 1141 (a) of the Internal Revenue Code to permit the various Circuit Courts of Appeals to review Tax Court decisions to the same extent as decisions of the District Courts in civil actions tried without a jury.

Public Law 828, June 29, 1948, extended until December 31, 1949, the period of time within which claims may be filed for credit or refund based upon an overpayment of tax as a result of the failure to take a deduction for a war loss relating to any taxable year beginning in 1941 or 1942.

Public Law 857, June 30, 1948, amended section 3150 (a) of the Internal Revenue Code so as to make imported fermented malt liquors subject to the same internal revenue tax as that imposed upon domestic fermented malt liquors.

Public Law 869, July 1, 1948, amended section 812 (e) (1) (G) of the Internal Revenue Code so that the proceeds of insurance upon the life of a decedent payable to his surviving spouse will qualify for a marital deduction for estate tax purposes irrespective of whether the proceeds are payable in installments or are held by the insured subject to an agreement to pay interest thereon or both, if the first payment is payable not later than thirteen months after the decedent's death, if the surviving spouse has the power to appoint the proceeds to herself or the power to appoint to her estate all amounts payable after her death, and if, where a person other than the surviving spouse has a power to appoint the proceeds, such power is exercisable only in favor of such spouse.

Public Law 899, July 3, 1948, amended section 3154 of the Internal Revenue Code to require the Commissioner to make refund or allow credit to a brewer in the amount of the tax paid by such brewer on any fermented malt liquor manufactured by him which was lost in the bottling house through breakage or leakage or in the process of filling, capping, pasteurizing, or labeling, limiting the losses

allowable to  $2\frac{1}{2}$  percent of the tax paid. Section 3404 (d) of the Internal Revenue Code relating to manufacturers' excise tax on musical instruments was also amended to exempt from the tax imposed thereunder musical instruments sold for the use of any religious or nonprofit institution for exclusively religious or educational purposes.

### Exhibit 36.—The Treasury Department's tax studies released by July 19, 1948

#### 1. POSTWAR CORPORATION TAX STRUCTURE

Analyzes various proposals that have been made for the elimination or reduction of the present so-called double taxation of dividend income (released December 6, 1946).<sup>1</sup>

#### 2. TAX TREATMENT OF FAMILY INCOME

Deals with various methods of taxing family incomes, such as compulsory joint returns, elimination of community-property privileges, and splitting of incomes equally between husbands and wives (released June 18, 1947).<sup>1</sup>

#### 3. EXCISE TAXES ON COMMUNICATIONS

Examines the excise taxes on long distance communications services, on local telephone services, and on wire and equipment services (released July 21, 1947).<sup>1</sup>

#### 4. FEDERAL-STATE TAX COORDINATION

Describes Federal and State overlapping in the several categories of taxation and considers a near-term program for coordination (released August 4, 1947).<sup>1</sup>

#### 5. FEDERAL ESTATE AND GIFT TAXES

Deals with the integration of the estate and the gift tax and the correlation of these taxes with the income tax (released September 10, 1947).<sup>1</sup>

#### 6. FEDERAL RETAIL EXCISE TAXES

Deals with the Federal excise taxes on furs, jewelry, luggage, and toilet preparations (released October 6, 1947).<sup>1</sup>

#### 7. BUSINESS LOSS OFFSETS

Deals with the adequacy of the present 2-year carry-back and 2-year carry-forward of net operating losses (released October 24, 1947).<sup>1</sup>

#### 8. TAXATION OF SMALL BUSINESS

Examines the impact of the present tax laws on small incorporated and unincorporated business and analyzes a variety of proposals that have been made for the special benefit of small business (released October 29, 1947).<sup>1</sup>

#### 9. TAXATION OF FARMERS' COOPERATIVE ASSOCIATIONS

Analyzes (a) the present tax treatment of income from farmers' cooperative associations in comparison with that of other forms of business organizations and (b) proposed changes in the present treatment (released October 31, 1947).<sup>1</sup> (See exhibit 32.)

#### 10. TAX TREATMENT OF EARNED INCOME

Analyzes the bases for an earned income credit from both the equity and incentive viewpoints, and presents two methods of giving earned income credits. It gives the history of an earned income credit in this country and reviews the experience of certain foreign countries (released November 21, 1947).<sup>1</sup>

#### 11. EXTENSION OF OLD-AGE AND SURVIVORS INSURANCE TO AGRICULTURAL AND DOMESTIC SERVICE WORKERS AND TO THE SELF-EMPLOYED

Explores the feasibility of extending old-age and survivors insurance to groups now excluded, with particular regard to agricultural and domestic employees and self-employed individuals (released December 1, 1947).

#### 12. INCOME TAX TREATMENT OF PENSIONS AND ANNUITIES

Examines the basis of the exclusion of certain pensions under present law and

<sup>1</sup> Published in *Hearings before House Committee on Ways and Means, 80th Cong., 1st sess., on Revenue Revisions, 1947-48.*

analyzes the present and alternative methods of taxing annuities (released December 3, 1947).<sup>1</sup>

### 13. FEDERAL EXCISE TAXES ON TRANSPORTATION

Deals with the taxes on passenger and freight transportation (released December 19, 1947).

### 14. INDIVIDUAL INCOME TAX EXEMPTIONS

Examines the adequacy of the \$500 per capita exemption and the alignment of the allowances for single persons and for married couples with different numbers of dependents (released December 22, 1947).<sup>2</sup>

### 15. CONSOLIDATED RETURNS AND INTERCORPORATE DIVIDENDS

Considers the 2 percent additional tax on consolidated returns and the 85 percent credit for intercorporate dividends received (released January 9, 1948).

### 16. FEDERAL EXCISE TAXES ON TOBACCO

Deals with the taxes on cigarettes, cigars, manufactured tobacco, and cigarette papers (released February 27, 1948).

### 17. FEDERAL EXCISE TAXES ON ALCOHOLIC BEVERAGES

Deals with the taxes on distilled spirits, beer, and wine, and the rectification taxes (released July 19, 1948).

## STATEMENTS AND SPEECHES

### Exhibit 37.—Statement by Secretary of the Treasury Snyder before the congressional Joint Committee on the Economic Report, November 28, 1947, on inflation control

Mr. Chairman and members of the Committee: I appreciate your invitation to appear before this Committee to discuss certain phases of the program for controlling inflation outlined in the President's Message of November 17.

As you know, I appeared before the House Banking and Currency Committee and discussed this subject with them for several hours on Tuesday. Only one business day has intervened since my appearance before that Committee, and the statement that I wish to make before you today, therefore, consists mainly of a restatement of the points that I made before the House Committee.

It is of the utmost importance that we extend early aid to the Western European countries in order to assure that people will not go hungry and cold this winter and to assure their continued participation as free nations in the world economy. It is equally necessary that this aid be extended without subjecting our economy to the strain of further inflation.

Both of these things are essential if we wish to maintain a national environment and a world environment in which peace and freedom can continue to develop. If we fall short of our goal in foreign aid, our own freedom could be threatened by external forces; and, if we fall short of our goal in controlling inflation, we will be threatened by the danger of economic collapse at home. We must avoid both dangers.

I am directing my remarks this morning to one phase of the anti-inflation program. Testimony in support of the emergency program for European assistance has been presented by representatives of the Departments of State, Commerce, and Agriculture.

The President outlined three types of measures for the control of inflation: one, measures to relieve monetary pressures; two, measures to channel scarce goods into the most essential uses; and, three, measures to deal directly with specific high prices.

It is to the first of these measures that I will give attention, as other representatives of the Administration have been invited to discuss items two and three.

Anti-inflationary measures which may be taken in the monetary field are of course but a segment of the whole program, and could not, by any means, solve the problem alone. But such steps as can be taken when related to those in other fields will of course be helpful in the over-all solution.

<sup>1</sup> Published in *Hearings* before House Committee on Ways and Means, 80th Cong., 1st sess., on Revenue Revisions, 1947-48.

<sup>2</sup> Published in *Hearings* before Subcommittee of Senate Committee on Post Office and Civil Service, 80th Cong., 2nd sess., Salaries of Federal Government Employees.

The President is greatly disturbed in regard to price inflation, which threatens our whole economic structure, and he is convinced that the Congress is equally concerned.

The President has laid special emphasis on voluntary actions on the part of businessmen, labor leaders, farmers and consumers to hold prices down. Intensified efforts will be continued to obtain voluntary restraint. Certain powers are necessary, however, to fortify the voluntary efforts.

The President has suggested that consideration be given to the following monetary measures: one, that consumer credit controls should be restored and some restraint should be placed on inflationary bank credit; two, legislation should be provided to prevent excessive speculation on the commodity exchanges; three, intensified activity in the sale of savings bonds.

The last item is the only one of those suggested which comes completely under the jurisdiction of the Treasury Department; and I shall devote my time principally to a discussion of that particular item. I shall touch but briefly upon the first two as they are primarily the concern of other Government departments and are being discussed by representatives of those departments as they appear and testify.

As to item one, restoration of consumer credit controls and restraint on inflationary bank credit, these matters have been discussed by Federal Reserve officials. As to consumer credit controls, I am in favor of their restoration.

The most effective types of credit control are those which strike at the individual forms of credit extension which are contributing to inflationary pressures. The most important single form of such credit extension at the present time is in consumer credit.

Total consumer credit outstanding at the end of September reached an all-time peak of \$11.4 billion. At the end of 1945, it amounted to only \$6.6 billion. Prior to December 1946, total consumer loans outstanding at any one time had never reached the \$10.0 billion level.

This increased use of consumer credit in the present period of inflationary pressures can only add to those pressures. As we all know, the curtailment of the production of consumer goods during the war period gave rise to a tremendous deferred demand for such goods. As we all know, despite the fact that industrial production during 1947 has reached the highest level ever attained during peacetime, we have not yet been able to produce enough goods to satisfy this deferred demand. There still exist many important shortages of goods. But with production near capacity levels, purchasing power made available by consumer loans can be used only to bid up prices of consumers' goods, not to purchase more goods. It is imperative, therefore, that efforts be made to restrain the demand for scarce goods until supply approaches demand.

Money market interest rates form a small part of the total cost of consumer credit, and changes in such rates are almost powerless to limit its extension. It is necessary to cover specifically by regulation such matters as minimum down payments and the maximum periods over which payments may be spread on installment purchases of consumers' goods in order to restrain this type of inflationary credit.

In reference to the second part of item one "Some restriction should be placed on inflationary bank credit," this is a matter under the jurisdiction of the Board of Governors of the Federal Reserve System which has the responsibility for over-all bank credit control. Mr. Eccles has discussed this matter with you in considerable detail. He and I have discussed it together on a number of occasions and we are entirely in agreement that the objective is fundamental to the inflation control program. I do not believe, however, that the specific proposal that he has made will accomplish the objective in question.

I would like to point out that I have a positive feeling that the major objective at this time is to maintain the fiscal soundness of the Government and the continued confidence of the public in Government obligations. I feel that the attack on the problem can best be handled by the application of a substantial budget surplus to the reduction of the public debt in the manner which will extinguish an equivalent amount of bank-held Government securities. Since the end of the war, the Treasury has conducted its program of debt management in such a way as to reduce inflationary pressures whenever possible by paying off bank-held securities.

The public debt reached its peak of \$280 billion on February 28, 1946. During the following ten months, it was reduced over \$20 billion, reflecting the reduction in the cash balance in the Treasury from a wartime to a peacetime level. Almost

all of the reduction in the debt during this period took place in the holdings of Government securities by commercial and Federal Reserve Banks. Since the end of 1946, the debt has remained substantially constant, reflecting the approximate balance of the budget during this period. Holdings of Federal debt by commercial and Federal Reserve Banks have nevertheless continued to be reduced and fell by over \$6 billion in the first ten months of the year, with holdings by nonbank investors increasing correspondingly.

The concentration of debt reduction during 1946 on securities held by banks and the transfer of over \$6 billion of debt thus far in 1947 from bank to nonbank hands have been, in large part, the consequence of the public debt policies of the Treasury and of the restrictive credit policies of the Federal Reserve System. These policies have contributed substantially to the fight against inflation, and will be continued as long as they are appropriate. I should like to note in this connection that a sizable reduction in the public debt will be possible during the early months of 1948—during which months will occur most of the excess of Government receipts over Government expenditures predicted for the entire fiscal year.

To minimize bank credit expansion, restrictive measures have been applied to the money market by the Federal Reserve System and the Treasury. This has been reflected by a rise in interest rates and a better balance between short- and long-term rates.

The average rate on 90-day Treasury bills has increased from  $\frac{1}{2}$  of 1 percent in early July to nearly 1 percent at the present time; while the rate on 1-year Treasury certificates of indebtedness has risen from  $\frac{1}{2}$  of 1 percent to  $1\frac{1}{2}$  percent in the same period. During this time the yield on the longest-term Treasury bonds—those issued in the Victory Loan—has risen from a little over 2.30 percent to about 2.43 percent.

The entire debt management policies of the Treasury since February 1946 have been of an anti-inflationary character. First, there was the paying off of bank-held Government debt out of excess cash balances; second, there has been a payment on bank-held debt out of funds derived from (a) budget surplus, (b) trust funds, and (c) the sale of savings and investment bonds to the public; third, pressure on the money market with slightly higher interest rates. Through the payment and calling of maturing bonds and refunding them into short-term issues, it has been possible to create an interest pressure on the money market without an increase in the net cost of the market debt to the Government.

In making our decisions with respect to public debt management, we must constantly weigh the restrictive effect of any proposed debt management action against its cost in added interest burden on the taxpayer. An increase of  $\frac{1}{2}$  of 1 percent in the average cost of carrying the public debt, for example, would mean an added burden of \$1 $\frac{1}{4}$  billion a year on the taxpayer.

At the present time, as you know, the interest cost on our public debt amounts to more than \$5 billion per annum. This is a large figure and may increase in the future if a larger proportion of our debt is carried in longer-term securities requiring higher coupon rates of interest. It is, therefore, imperative that during these times of great prosperity we should continue to collect adequate revenues over and above a balanced budget to provide for a systematic reduction of the debt total. A reduction in the debt through a substantial budget surplus is the most anti-inflationary measure that can be taken in the fiscal field.

In the field of commercial bank loan credits, the Treasury Department, through the Comptroller of the Currency, has been very active in studying trends and taking steps to induce a restraint in inflationary bank loans.

A few weeks ago, we had the District Chief National Bank Examiners in for a conference, at which time the credit situation was discussed at some length. The Chief Examiners were instructed to have their examiners, during the course of examination of banks, counsel with and caution bankers against speculative lending policies.

More recently, the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Executive Committee of the National Association of Supervisors of State Banks have collectively taken steps to urge the curtailment of all loans either to individuals or businesses for speculation in real estate, commodities, or securities. In a joint statement<sup>1</sup> issued last Tuesday by these agencies all bankers are urged

<sup>1</sup>See exhibit 40.

to confine the current extension of bank credit to the greatest extent possible under existing conditions to financing that will help production rather than increase consumer demand.

Item two: Secretary of Agriculture Anderson has presented testimony to this Committee on legislation that should be provided to prevent excessive speculation on the commodity exchanges.

Item three makes recommendations for the intensification of activity of savings bond sales as an anti-inflationary action.

As the President said in his message of November 17:

"Another effective weapon against inflation is increased savings by the public. Every dollar that is saved instead of spent is a dollar fighting against inflation. In order to encourage additional savings, the Government should intensify its vigorous efforts to sell savings bonds."

Since the war, as an economy measure, the Treasury Department has curtailed enormously the organization of the Savings Bonds Division, and has resorted primarily to those programs for which the voluntary cooperation of individuals and businesses could be recruited. While this procedure has been eminently successful and has produced most satisfactory results in maintaining bond sales in excess of bond redemptions, it still has its limitations.

Up to now the day-to-day efforts of the Treasury savings bond sales organization have been to maintain the popularity of the payroll savings plan among American workers and to sell to the American people the idea of investing regularly for their own good. This program has formed an important part in the Treasury's fiscal policy.

During the war, it was obvious to people why we needed the savings bond program. Everyone could see that the Government needed dollars—over and above taxes—to buy munitions and pay wages and subsistence for our armed forces. Each of us had someone—son, daughter, brother, sister, loved one—in service and therefore had a direct interest. And, in addition, everyone could understand that savings bonds helped to absorb inflationary dollars which were accumulating at a rapid rate because incomes were growing while goods and services available for purchase were not increasing accordingly due to the fact that war goods were using up materials and labor.

But now that the war is over many people do not understand the importance of the savings bond program today.

The savings bond program absorbs excessive purchasing power in the hands of individuals. This cuts down spending pressures. For this reason, emphasis is being placed—and will continue to be placed—on the payroll savings plan for workers and on bond programs for individuals, and especially farmers. The important funds to obtain are the small amounts invested regularly by millions and millions of people. It is the money which is more likely to go on a spending spree that is the most important to get invested in savings. The investor we want most is the individual—the worker with good income and the farmer whose income is at a high level.

Bond sales of this character are important from a fiscal point of view even if we have a balanced budget, for they widen the ownership of the debt and provide a sounder debt structure. At the same time the sale of these savings bonds makes an important contribution to the control of inflationary pressures.

It withdraws funds in the hands of the individual from the spending stream thus providing funds which enables the Treasury to retire bank-held debt. This in turn results in a reduction of the money supply in the economy.

In order to increase the sale of United States savings bonds, however, we have an intensive selling job to do.

The Treasury Department is ready to move right away on an enlarged savings bond sales activity. But this increased sales activity will require additional funds over those earmarked for this purpose in the budget for fiscal 1948. We are therefore asking the Congress to give approval to the use of additional funds for the savings bond program over and above those approved in the budget.

The present greatly reduced staff in Washington and in the field can be expanded immediately. With additional personnel and funds for promotion, the number of purchasers on payroll savings plans can be greatly increased and the sales of savings bonds materially multiplied.

Incidentally, I think that you would be interested to know that total sales of savings bonds are continuing to exceed redemptions and the volume outstanding has reached a new high—nearly \$52 billion. In E bonds alone there are \$30,894 million outstanding; this volume is today within one-quarter of 1 percent of the

peak volume of E bonds outstanding at the close of the Victory Loan nearly two years ago. We have been able, in other words, to increase the savings bond total and to sustain the volume of E bonds outstanding throughout this period of postwar readjustment.

This has been a tremendous accomplishment. There were those, you remember, who predicted that the termination of the war would be followed by wholesale cashing of savings bonds and the liquidation of much of the effect of the wartime savings bond sales effort. The truth is that this just didn't happen. The redemption record of United States savings bonds is a cause for considerable gratification for all of us. It is a tribute to the people who sold the bonds during the war and to the people who purchased them. I am confident that with the additional effort that will be provided by additional funds, good results can be obtained.

I have with me today representatives of the Treasury Savings Bonds Division who are prepared to present, with your approval, some interesting statistics in this field.

**Exhibit 38.—Address by Under Secretary of the Treasury Wiggins before the Academy of Political Science, New York City, April 1, 1948, on fiscal policy and debt management**

My discussion tonight will be devoted primarily to debt management as a part of fiscal policy. Over-all fiscal policy is concerned with the desirable amount and sources of Government revenue and the amount and uses of expenditures of the Federal Government, on the basis not only of financial but of economic considerations as well.

However, in actual practice, the amount of receipts is often determined as much by a consideration of what it is feasible to collect as it is by a broad consideration of consumer and business incomes and the amount of goods available for purchase. The total amount of the Federal Government's expenditures is often determined by other than economic considerations. Our huge war expenditures were made in order to win the war and not because the economy needed them; and this is also true of the proposed expenditures for the European Recovery Program.

It was not deemed feasible nor desirable for total receipts during the war years to equal total expenditures. On the other hand, when national income and production are high, employment full, and inflationary pressures strong, economic considerations should control, so as to produce a budget surplus that may be applied toward economic stability and debt reduction.

The determination of the total amounts and the balance of receipts and expenditures of the Federal Government that is most conducive to a healthy domestic economy should be the basic consideration of fiscal policy in peacetime.

The condition of the American economy since VJ-day indicated a fiscal policy of seeking to keep expenditures as low as compatible with the discharge of our domestic and international obligations and of seeking to keep receipts as high as is consistent with a vigorously functioning private enterprise economy and a reasonable untaxed minimum standard of living for persons in the lower-income brackets. These objectives continue to call for the maintenance of the present aggregate level of Federal tax revenues.

We would be blind to the stern realities of the hour if we failed to recognize that rapidly changing world events are generating new variables and new problems which will have a profound effect on our entire national economy and on fiscal policy. However, the limits of my time do not permit a discussion of tax policy nor questions of expenditures as basic elements in the determination of fiscal policies. I shall limit my discussion to the area of public debt management.

The number one constant in the equation of debt management is a present Federal debt in excess of \$250 billion. The importance of this debt is not merely its size but its proportion to the total of all debt, the impact of its management on all interest rates, the cost of servicing the debt, and proper provision for its retirement.

In the 1920's, the public debt, both Federal and State and local, amounted to a little over \$30 billion and was less than 20 percent of the total public and private debt. Today, the total public debt, Federal and local, is about \$270 billion and constitutes some 60 percent of the total of all debt. In the 1920's, Government securities constituted about 12 percent of the total assets of member banks; while today they constitute about 50 percent of total assets. In the 1920's, the rate of interest on the public debt was largely influenced by current financial and business conditions and the rate on private debt; whereas today, the size and the

proportion of the Federal debt to the total of all debt makes it the dominating factor in determining interest rates on private debt and the return on investments. In the 1920's, the public debt was only about  $\frac{1}{4}$  of a year's gross national product; whereas, in 1947, the public debt exceeded the gross national product for the year.

These figures and comparisons are unmistakable evidence of the importance of public debt management and of the compelling necessity for such management to be directed not merely to the financial considerations of Government itself, as important as they may be, but to the effect of such management on our entire economy. No matter how jealous we may be of the freedoms of private enterprise, nor how abhorrent to our concept of such freedom that control and management by central government may be, the hard facts are that the management of our large public debt is such a dominant factor in the financial and economic life of the Nation that it is imperative that firm control of debt management be exercised by the Federal Government. This must continue as long as the public debt continues at its present relative size and proportions. However, financial and business leadership should be constantly alert and fully cooperative in seeing that the exercise of that power is, at all times, directed toward the broad objective of the national welfare.

In February 1946, at the highest point, the total Federal debt, direct and guaranteed, was \$280 billion. Cash balances of the Treasury amounted to \$26 billion. The wartime interest pattern of the debt ranged from  $\frac{1}{4}$  of one percent on 90-day Treasury bills to  $2\frac{1}{2}$  percent on long-term Treasury bonds. The distribution of the debt was \$117 billion held by the commercial banking system, \$65 billion held by individuals, \$28 billion held in Government trust accounts, and \$70 billion held by other investors. For the remaining months of that fiscal year, to June 30, 1946, there was a further deficit in the Federal budget of over \$1 $\frac{1}{2}$  billion. There was a growing inflationary pressure in our economy.

With these factors, the correct policy of debt management was clear. It was to utilize the excess cash balance beyond budget needs for the retirement of the debt. The proper place for such retirement was in the commercial banking field. This policy was followed, with the result that by the end of December 1946, when cash balances had been brought down to a peacetime working level, the total debt had been reduced by over \$20 billion, of which \$19 billion were taken out of the commercial banking system.

We then moved into the second phase of postwar debt management. From January 1, 1947, through June 30, 1947, there was a budget surplus of approximately \$ $\frac{3}{4}$  billion. This represented the reduction of the public debt which it was possible to achieve during this six-month period from an excess of receipts over expenditures. However, during this same period, it was possible to reduce the holdings of the commercial banking system by \$6 billion through the application of this surplus, through the use of the proceeds from the sale of savings bonds to the public, and through the use of the excess of the cash operating surplus over the budget surplus. The inflationary pressures had increased during this period and, therefore, the economic objective of an anti-inflationary debt management policy was paramount.

For the fiscal year ending June 30, 1948, there is an indicated budget surplus of \$7.5 billion. This surplus has been, and is being, used for debt retirement. The Treasury also will receive about \$1 $\frac{1}{2}$  billion from the net sales of savings bonds and from other sources, making a total of approximately \$9 billion which will be available for the retirement of the marketable debt. During this period, inflationary pressures have continued high. Therefore, in the interest of stabilizing the economy, the use of these funds has been directed toward a reduction of bank-held debt, with particular emphasis on the retirement of debt held by the Federal Reserve Banks.

Offsetting the impact of this program to a considerable extent has been the nonbank selling of Government securities to the Federal Reserve Banks and the inflow of gold. These factors have diminished the full anti-inflationary effect of the debt management policy this year. However, this policy has been of substantial effect on the credit structure, particularly on long-term interest rates of private and municipal credits, and in encouraging a greater degree of caution in the lending field.

The present budgetary surplus as of the end of March is greater than the net surplus indicated on June 30 next. However, an excess of expenditures in the fourth quarter of the current fiscal year above receipts will reduce this amount to the \$7.5 billion indicated in the budget estimates. The deficit for this three-

month period can be more than offset, however, with withdrawals from the Government's war loan deposits in commercial banks now approximating \$2 billion. These withdrawals, together with cash receipts from the sale of savings bonds and net receipts from trust funds, will be available for debt management purposes and will be used to continue the pressure on the money markets.

Throughout the current fiscal year, recognition has been given to the wartime artificiality of the low rates on short-term Government securities. The task was to remove the rigidities of these artificial wartime rates without serious disturbance to the money markets. Through the cooperation of the Treasury and the Federal Reserve System, the rates on 90-day bills were permitted to move up, beginning with the issue of July 10, 1947. Through the issue of  $\frac{3}{4}$  percent certificates on August 1, 1947; for an eleven-month maturity, an adjustment of the certificate rate was begun. These adjustments have continued until the 90-day bill rate is now approximately 1 percent and the one-year certificate rate is  $1\frac{1}{2}$  percent. The effect of these adjustments in rates has been consistent with the over-all debt management policy of the past year.

I have indicated that the budget surplus has been the most potent weapon in debt management for the anti-inflationary objective. This leads to a brief discussion of the outlook for the fiscal year ending June 30, 1949. We start with the President's budget estimate of a surplus for fiscal '49 of \$4.8 billion. In view of world conditions, we would be unrealistic if we failed to recognize the possibility that this surplus may be considerably reduced through increased expenditures. Furthermore, a tax bill has passed the Congress which, if it becomes law, will reduce the total revenues of the Federal Government by more than 10 percent. Under this legislation, revenues during the fiscal year ending June 30, 1948, will be reduced by only about \$600 million; but revenues for the fiscal year ending June 30, 1949, will be reduced by about \$5 billion. Adding to this \$500 million, which will be paid out in additional tax refunds, the proposed tax reduction, based on present budget estimates, would convert the expected surplus of \$4.8 billion into a deficit of \$700 million.

Even on the earlier budget estimates, without consideration of reduced receipts that will result from the proposed tax reduction and without any consideration of increased expenditures beyond original budget estimates for military and economic preparedness, there is indicated no further budget surplus between April 1st and December 31, 1948. The next period of substantial surplus will be in the first quarter of calendar 1949.

For the full fiscal year 1949, with the currently proposed tax reduction and without any net increase in expenditures, there will be a rise in the public debt of \$700 million, and the only funds available for debt management will be the cash receipts from trust funds and the receipts from sales of savings bonds in excess of the budget deficit. If, therefore, inflationary pressures continue through fiscal 1949, and if debt management policy is to be continued with an anti-inflationary objective, the ammunition will be severely limited. It is, therefore, highly important in the year ahead that a maximum effort should be devoted to the sale of savings bonds to nonbank holders, so as to provide the greatest possible amount of funds to be used in maintaining reasonable pressure on the credit situation.

Recognizing the strategic value of the sale of savings bonds to individuals as a dual purpose weapon against inflation that will divert cash from the spending stream and, at the same time, provide funds which may be used in retiring bank reserves and deposits of commercial banks, the Treasury Department is instituting a new and accelerated Security Savings Bond Campaign, beginning April 15th. Enthusiastic support for the program by industrial concerns, labor organizations, bankers, retailers, insurance companies, the entire advertising industry, and many others assures an all-out effort.

I have used the President's budget estimates as the basis of all the figures I have given. Here and there, questions have been raised as to whether these estimates, in some cases, may be too low or too high. The answer is that all estimates of the future are necessarily estimates; they cannot be proven facts. They are as scientifically prepared as is possible, by as competent group of technicians as can be assembled, and are based upon all known facts and the judgment of those in the best position to form a sound judgment in the financial field, in the business field, and in government. What the national income will be, what the personal incomes for the Nation will total, what the national gross product will be between July 1, 1948, and June 30, 1949, is not a slide rule determination on January 1, 1948. Yet a determination had to be made at that time of a base

on which to estimate Government revenues for the period six to eighteen months in advance. With a Government budget equal to about 20 percent of total personal incomes and with the Government revenues determined largely by the total of such incomes, any variation in the base necessarily affects the actual revenue receipts. With many new factors continuously arising that affect the base, the surprise is not in how much the difference is between actual receipts and estimates but how little.

Revenue estimates for the fiscal year 1949 are based on personal incomes of \$200 billion for that period. This is \$3 billion more than the total for the calendar year 1947 and is \$11 billion less than the rate at which such income payments ran in the month of January 1948. I am fully convinced that the base of \$200 billion is as realistic and as uncolored by desires or objectives as reasonable men, using all available material and the most scientific technique, can determine.

On the expenditure side, costs that are products of war and defense constitute 79 percent of the President's budget. There are few areas in this group where expenditures may be reduced, but, on the other hand, there appear to be potentials in which substantial increases may become the price of self preservation. In the other areas of the cost of government, the American people have shown little disposition to deny themselves services that multiply the cost of government. There are some areas in which economies may be, and are being, effected, but, so long as the American people demand of the Federal Government vast operations and services, subsidies and guarantees, substantial reductions in the cost of government cannot be had.

It has been suggested that, in order to improve the budget picture for fiscal 1949, the sum of \$3 billion for the foreign recovery program be earmarked and charged against the 1948 budget and credited to the 1949 budget. The result is merely a bookkeeping transaction that would not affect the time of receipt by the Government of a dollar of income nor the time of payment of a dollar of expenditure. From the standpoint of debt management, there would be no effect at all.

In the field of interest rates, there is but a limited area in which debt management policy can operate. Present rates on long-term Government bonds are practically at the coupon level of 2½ percent. During the months of March, April, and May, 1947, there was an incipient boom in the bond market with heavy pressures on the long-term rate. It was recognized, in the interest of our national economy, that it was undesirable for long-term money to become worth less and less. There was a demand for the issuance of new Government securities to meet investment demand. In order to meet this situation, the Treasury Department, over a period of six months, sold long-term bonds from some of its investment accounts to a net amount of \$1.5 billion. In September 1947, the Treasury Department offered a nonmarket G-type bond to institutional investors under a limited formula, resulting in sales of approximately \$1 billion. The effect of these operations was to take the pressure off the market and create the conditions under which prices declined and interest rates moved up. Thus was averted the boom market in long-term securities.

Following this period, the market pressures reversed themselves and there developed instead an increasing downward pressure on prices and upward pressure on rates. The 2½ percent long-term rate was then stabilized through purchases in the market by the Treasury and the Federal Reserve Banks. At present, there appears to be a relative equilibrium in the long-term market.

It should be well recognized that there is no question of the financial adequacy of the Federal Reserve System and the Treasury to maintain the market and the rate and to buy all of the securities that may be required for that purpose. The total amount of marketable Government bonds with a final maturity date of ten years or more presently outstanding is only \$64 billion out of the total debt of more than \$250 billion.

There are several considerations that argue for the maintenance of the long-term 2½ percent rate on Government securities.

Whether this rate is the correct one in terms of long-range worth of long-term money or not, it was the rate used in financing the war. That rate, and the market for securities based on that rate, and the liability of institutions that have acquired those assets based on that rate, have been integrated into the financial structure of both public and private institutions throughout the Nation. Commercial bank holdings of Government securities are about seven times their capital funds; the holdings of Government securities by mutual savings banks are about six times their reserves. The holdings of Government securities by life insurance companies equal more than five times their capital funds. The

average maturity of Government securities held by commercial banks is four years, by mutual savings banks is thirteen years, and by life insurance companies, fifteen years. Any rise in interest rates of Government securities, with a consequent decline in market value, would create a book loss against capital funds of these institutions, multiplied by the ratio of Government bonds to capital assets. A small rise in the interest rate of long-term Government securities would result in a market decline of all long-term securities that would create a book loss on assets held by many such institutions equal to the total of their capital and capital reserves. While such book losses would not be actually sustained, the existence of such market valuation shrinkage in large proportions might threaten the stability of many institutions.

An aggregate of \$46 billion savings bonds are held by millions of individuals. These securities bear an interest rate to maturity from  $2\frac{1}{2}$  percent to 2.9 percent. These bonds are payable upon presentation and demand. A rise in interest rates would be a wholesale invitation for cashing these bonds and would undermine the confidence of the owners in their original investment.

The interest cost to Government on the public debt is \$5.2 billion per year, or \$100 million per week. This item represents 14 percent of the Federal budget for the fiscal year 1948. Unless there is a substantial reduction in the debt, the total interest cost will continue to rise. There are two reasons for this. One involves savings bonds. The interest rate on E savings bonds, if held to maturity, is 2.9 percent, but the interest charge on these bonds is carried in the budget on the basis of the actual accrual each year. The bracket rates for accrual are graduated and they run up to 4.76 percent. This top rate will be reached on the largest blocks of savings bonds outstanding during the next two or three fiscal years. Second, the continued accumulation of trust funds is invested, under statutory requirements, at an interest cost to the Government up to 4 percent. To the extent that these funds are used to retire short-term, low rate securities, the interest cost on the total debt will rise. It is of considerable importance to the taxpayer that the interest cost of the debt be held to a minimum.

With interest rates on the Government debt the dominant factor in influencing all interest rates, any rise in long-term rates on Government securities would disturb private business in its long-term planning.

No one can predict today what the financing needs of Government may be in the years ahead. To destroy the integrity of the long-term rate with which World War II was financed would multiply the difficulties in any large scale financing that might be needed in the years ahead. Nor should we overlook the fact that, with the present debt, more than \$50 billion must be refunded each year.

It has been argued that long-term interest rates should be allowed to seek their "natural" level. What is sometimes meant by the natural level is the determination made by the investment and money markets. But this use of the term "natural" adds little to the discussion, as the determinations made by the money market are, for the most part, merely reflections of the underlying credit policies of the monetary authorities.

However, monetary authorities are not omnipotent. In the long run, there is a real natural rate of interest, and a departure from this rate will collect its own toll. The natural rate of interest in this sense is that rate which is high enough to hold down the amount of capital formation to the currently accruing savings of the economy, yet low enough to permit the savings made at a high level of employment to be fully invested.

A too-low rate of interest will, in the long run, encourage more capital formation than can be financed by the current savings of the community. The difference will then be made up by an expansion of bank credit with a consequent upward pressure on prices sufficient to compress consumption enough to release the necessary resources.

On the other hand, a too-high interest rate will not permit as much capital formation as the real savings of the community would make possible. As a consequence, the community will not secure the benefits of all the investments which it could otherwise have, and the labor and capital which would have gone into creating these investments will be unemployed.

It is necessary, therefore, that the monetary authorities recognize the long-run economic limitations upon their powers.

It should be fairly recognized that if selling pressures by holders of long-term bonds are offset by no substantial demand except that provided by the Federal Reserve System and the Treasury, the maintenance of the  $2\frac{1}{2}$  percent long-term

rate will provide no flexibility for the use of long-term rates as an important factor in credit control. This brings us back to the big constant in the equation, the size of the public debt, the cost of carrying it, its widespread ownership among millions of individual owners, and its preponderant proportion in the assets of commercial banks, savings banks, trust funds, insurance companies, and other institutions. These considerations must continue to control the determinations of public debt management policy.

In the short-term interest field, there is some greater latitude. In that area, financial and economic considerations permit a reasonable adjustment of that rate up or down as the needs develop. It is a delicate mechanism with vast potentials and should be used with great prudence and keen understanding of the effect of every move.

In conclusion, I revert to basic considerations of fiscal policy as they relate to receipts and expenditures. Broad economic considerations should have first place. It is inconceivable that we would take the risk of placing on top of the inflationary pressures growing out of the financing of the war new inflationary pressures that will grow out of deficit financing. The dangers are too great. The alternatives are clear. We must either make up any difference between receipts and expenditures through further taxation or resort to the strait-jacket of rigid controls of our economy. Even with such controls, sound fiscal policy dictates that any deficits be financed through mobilizing the savings of the country, and particularly of individuals, insofar as that is possible. If resort must be had to the banks, the borrowing should be through short-term, low yield obligations, such as bills and certificates, which would be appropriate both from the standpoint of the cost to the Government and their place in bank portfolios.

The task ahead in the administration of a sound and effective fiscal policy is not an easy one. To meet the current and the new situations that may develop, we shall need skill and wisdom. More than that, we shall need restraint on the part of the business and banking community, on the part of labor, on the part of Government, and on the part of the consuming public. And all of us will need and should seek divine guidance.

In our efforts to provide economic stability at home and abroad and to utilize our resources for the high purposes of promoting world peace and world prosperity, a common sacrifice lies ahead to protect this Nation from any weakening of its economy and to guarantee that our great strength, which is the hope of mankind, shall be preserved.

---

**Exhibit 39.—Address by Secretary of the Treasury Snyder before the annual conference of the National Association of Mutual Savings Banks, Atlantic City, N. J., May 24, 1948, on mutual savings banks and the public debt**

Our common obligation today is to encourage production and general business health. Millions of people everywhere are looking to the United States to safeguard the tangibles of decent, human living. We are making every effort to reduce the extent of economic disorder and political disturbance wherever we can. The next few months will be extremely significant ones. They should determine the success of these efforts. For this reason, we must not allow domestic partisanship and disagreements, normal to an American election period, to endanger our greater aims. For, if the American economy is to gain the necessary growth and advancement, we must have genuine cooperation between management, labor, farming, and government—and have it under the normal processes of our free enterprise system. And the first requirement to such cooperation is a keenly interested and alert citizenry, deeply conscious of the Nation's need for economic solidarity.

Some people insist that the government should keep completely aloof from the economic system of the Nation—that it should confine its role virtually to one of keeping the peace and carrying the mails. This is not my idea of the role of government, nor of the relationship that ought to exist between government and business in our ever expanding economic development. Good government can and should provide what we can call "rules of the game", and enforce such rules; it can encourage economic development; it can provide safeguards against depression and assist in recovery should depression nevertheless develop; and it can take the lead in mitigating the dread of personal insecurity in an industrial society.

As a public official, I regard as especially important the close relationship of business to government, and the methods by which our inter-dependent operations may achieve the most beneficial results. As in the case of other governmental departments, the Treasury is constantly seeking the counsel and active assistance of various business organizations throughout the Nation. A financial cross section of the country is represented in our advisory committees, which include industrialists, life insurance groups, Government security dealers, and bankers in the investment, commercial and savings fields. And I want to say here, that I, personally, have had no more valuable counsel than that given me by members of consulting committees on Government borrowing, in the course of their periodic visits to the Treasury. My several meetings with your own committee, functioning under the chairmanship of Mr. Bruere, have been most beneficial. The Treasury is fully aware of the extent of the assistance which has been rendered by your banks. And we are assured, because of your long impressive history as owners of Federal securities as well as your interest in the financial welfare of your depositors, that we may count upon your continued active help.

There is one particular form of assistance offered the Treasury by banks in general which, because of its wide importance, I should like to mention here. I refer to your cooperation in certain of our efforts to protect the integrity of the Federal revenues. You of course know that the solvency of this Government depends upon the fair and proper collection of the internal revenue. Evasion of the taxation laws, if permitted to go unchecked, could easily become disastrous. For this realistic reason, the banks and other financial institutions were called upon to accept with the Treasury their equal responsibility in tax enforcement.

One specific request was for Treasury Currency Reports to be supplied, through the Federal Reserve System, in the case of unusual currency transactions. On the whole, the plan has accomplished worthwhile results. For while it has not disturbed healthy and legitimate banker-customer relationships, it has resulted in the disclosure of a large number of tax fraud cases and the collection of extensive amounts of revenue which tax evaders sought to withhold. It is very important that you bankers fully realize the significance of these TCR reports to the Treasury, for our tax collection work in this division would be far more complicated if this special information were not made available to us. Two instances alone will give you the measure of the importance of these reports to the Treasury in tracking down tax evaders. In one instance, a midwestern business man had converted his profit into large currency holdings which were detected through one of your reports, thus resulting in accumulating evidence that led to a quarter of a million dollars in tax assessments, plus recommendation for criminal prosecution. Another case was that of an operator of a large chain of restaurants in an eastern city who was reported to have been making large currency deposits. This disclosure led to evidence that resulted in the collection of \$7 million in taxes, as well as prison sentences for several persons. So in asking that you continue your essential participation in this tax enforcement division, we are only protecting your own millions of depositors and assisting you to discharge your obligation to them.

The National Association of Mutual Savings Banks represents the custodians of \$18 billion of savings by the American public. You, the custodians, are assembled here 132 years after the founding of the first mutual savings institution ever to open its doors in this country. This occasion, then, is another milestone in your history—a history of long and successful guardianship over the financial affairs of the average citizen. I am happy indeed to have the privilege of addressing a company with so distinguished a record of public service.

When mutual savings banks were first organized in the years following 1816, many of their charters provided that their investments could be only in United States Government securities and in the securities of the State in which they were organized. But then, as now, the problem of securing an adequate return was paramount in portfolio management, and the banks soon found it necessary to ask that their charters be broadened to permit investment in mortgages and other securities. As legendary as covered wagons and coonskin caps are some of the early techniques of savings banking—techniques that appear engagingly simple compared with those of the present. It is improbable today that any of you would deem it advisable to restrict depositors to "widows, orphans, single women, and minors", as one of the oldest institutions felt obliged to do at one time. Likewise, it is doubtful that any of your trustees would emulate the savings bank of long

years ago that decided to attract customers by paying a one percent higher rate to depositors who were about to be married. And it has been a good many years since a savings bank has offered to present new accounts with a one dollar free start.

Although the early problems of savings institutions were different from today's problems, they were nonetheless very real, and it was an earnest, conscientious lot of pioneers who grappled with them, and who laid the foundations of a mutual savings bank system which has become one of the important factors behind our successful modern economy. By the time of the Civil War, the mutual savings banks felt strong enough to offer substantial support to the Federal Government, as they have in all critical periods since. We learn from the records of those years that officials of the New York savings banks met in 1861 to determine the amounts in new Federal issues for which they would subscribe. In the words of their historian, the trustees of one large bank observed with cogent logic that "the public was looking to conservative savings banks for an expression of confidence in these Government securities." This same bank, it might be noted, subsequently followed up its own hint and increased its holdings of Federal securities to nearly half of its total deposits at that time. By 1890, a quarter of a century later, all savings banks, including stock savings banks, held approximately \$140 million or 20 percent of the total interest-bearing debt of the United States in their portfolios. And, in a number of other years for which data are available, they accounted for similarly large proportions of the total amount of Federal obligations.

Today, many of your banks have as much as three-fourths of their assets invested in Federal securities, while your combined ownership of \$12 billion is four times as great as it was before the war. Mutual savings banks now hold about 5 percent of the total public debt, which stands at \$252 billion. Consequently, factors which affect the field of Government securities and public debt management will sharply affect the situation of the banking institutions represented here. This is, of course, likewise true of other financial institutions. And, in a much broader sense, it is also true of individuals. Individual citizens directly own more than \$66 billion of Federal securities. In addition, they have an indirect stake in a much larger portion of the public debt securities outstanding because of their savings and deposits in mutual savings banks, commercial banks, insurance companies, and other financial institutions which own Federal securities. This widespread distribution of the public debt gives every person in the United States a vital interest in the debt and in its proper management. It gives every individual an immediate and personal incentive for seeing that the financial affairs of the Government are handled wisely. And it places upon the Federal Government a grave responsibility for proper debt management and for the sound conduct of all of its financial affairs.

I should like to review the history of the management of the debt since the debt reached a peak of \$280 billion in February 1946. The Victory Loan of two months earlier had been our last great drive for funds. War costs had begun to taper off, and we no longer needed a Treasury cash balance of the proportions for which the emergencies of the preceding years had called. A debt pay-off program was therefore inaugurated. It has brought the debt down to the current total of \$252 billion. This pay-off program which we have carried out fell into three periods. From the end of February 1946 to the close of the year, the debt was reduced by \$20 billion through the application of cash funds received from the Victory Loan. During the calendar year 1947, the next phase of the pay-off program, we were able to cut the debt by \$2.5 billion. The cash left over from the Victory Loan had been expended by this time, so that debt reduction during 1947 had to come from the budget surplus—and was, in fact, just about equal to that surplus. The third phase of the debt pay-off program occurred during the first four months of this year. In those few months, we reduced the debt by \$4.7 billion—almost twice the reduction for the entire calendar year 1947. The money for this program came from our budget surplus of \$6 billion accumulated since January 1, 1948. The rest of the surplus has been added temporarily to the cash balance. Part of this remainder may eventually be used for debt reduction—although some of it will be needed to meet new requirements for national defense and international aid during the months to come.

As bankers, I am sure that all of you are familiar with the policy behind the debt pay-off program as it has been conducted. Increasing inflationary pressures in the economy during the past two years have made it imperative that fiscal and monetary policy be directed to combating further increases in price. The very fact that the Treasury was receiving more money in taxes than it was paying

out through its expenditures was of major anti-inflationary importance. Hand in hand with this development has been our Treasury policy, during the period, of aiming at a reduction in the Federal security holdings of the commercial banking system. In seeking to achieve this objective, we have found that our wartime program of fitting securities to the needs of the various investors has paid dividends. You will remember that during the war we issued a large volume of short-term bills and certificates to the banking system. As a result, our job of paying off the debt held by banks has been considerably simplified. It is gratifying to us that, since the peak of the debt, nonbank holdings of Federal securities have gone up by about \$3 billion, so that the reduction in holdings by commercial and Federal Reserve Banks has actually been greater than the reduction in total public debt. On February 28, 1946, commercial and Federal Reserve Banks held \$117 billion of Federal securities. At the present time, they hold \$86 billion. This decline of \$31 billion represents a reduction of more than 25 percent in commercial and Federal Reserve Bank portfolios of Government securities in just a little over two years. This is a substantial achievement. We could hardly have laid out, and we certainly would not have dared forecast, a program as successful as this when we stood at the threshold of debt pay-offs back in 1946.

Now, in May 1948 our debt has been reduced by nearly \$28 billion. However, due to certain United States commitments and possible requirements of the near future, the outlook for debt reduction can not now be accurately estimated. The European Recovery Program is just getting under way. Large national defense expenditures will have to be undertaken. The success of these programs is of paramount importance to all of us. Undoubtedly, with a view to sound fiscal management, these expenses should have been financed within a balanced budget. And certainly, if we are to continue to pay off portions of the public debt accumulated during the war, we must do it during a prosperous period such as prevails at the present time. But unfortunately, the combination of tax reduction and increased expenditure probably spells the end of debt reduction from budget surplus during the next year. However, even if over-all debt reduction comes to a halt during the months ahead, it may still be possible for us to shave somewhat further the volume of the marketable debt. As you know, only a portion of the \$252 billion of Government indebtedness is in the form of marketable obligations. The remainder is in the form of savings bonds, savings notes, special issues to Government trust funds, and other nonmarketable obligations. This nonmarketable part of the debt may go up by something like \$3 billion during the year ahead, thus permitting a reduction in the total of the marketable debt. This is due primarily to the intensity with which we are pressing—and will continue to press—our savings bond campaign. It is also because of the further accumulation of social security money and other Government trust fund receipts.

I should like now to touch briefly on your own position with respect to Government securities. During most of 1947, it was the policy of the Treasury to liquidate some Government trust fund holdings of long-term securities in its program of monetary controls designed to prevent Government bond prices from rising too rapidly. We sold a considerable number of long-term bonds to the various investor classes. Mutual savings banks, as a group, were among the larger purchasers. Since then, mutual savings banks have sold some long-term bonds, on balance; but their total holdings of Federal securities are now only about \$100 million less than they were at their all-time peak last summer. All in all, you have added \$1 billion to your Government security portfolios during the last two years—mostly in long-term securities. And, a most interesting fact is that this billion dollar increase in Governments has been matched by a billion dollar increase in mortgage loans and other investments. The fact that mutual savings bank assets, as a reflection of deposits, have continued to increase in such volume since the end of the war represents an exceptional expression of public confidence in the services of your institutions. The 1947 increase in mutual savings deposits may seem low as compared with the wartime increases, but it comprises a larger proportion of the total new savings of individuals than was the case during the war. As a matter of record, nearly 10 percent of new individual savings during 1946 and 1947 flowed into mutual savings banks, as against an average of 4 percent for the war years, and only a little more than that for the entire period 1935 through 1940.

Some of you may feel that the Treasury is competing, through the sale of United States savings bonds, for the very same dollars that you are endeavoring to obtain as savings deposits for your banks. When you come right down to it,

however, total savings do not have a ceiling figure, with each of us trying to get as much of the total as possible. Savings have been at a high level during 1946 and 1947, particularly in comparison with the prewar years. But, as long as the danger of inflation is with us, we hope that totals for 1948 and 1949 will prove even larger. Our job of selling savings bonds, your job in expanding mutual savings bank deposits and the jobs of our associates in life insurance and other savings fields are really one and the same. Nothing would please us more, for example, than to see the major part of the benefits which taxpayers are receiving from tax reduction invested in increased personal savings, rather than being spent to add fuel to the inflationary fires. We are all keenly aware of our united responsibility of impressing upon the public the need for saving a larger share of current income.

The whole tenor of the United States Security Loan drive is directed towards the encouragement of personal savings in any practical form. We are not acting in competition with other savings institutions. The Government's primary purpose in promoting such savings is twofold. First, we are endeavoring to cut down consumer demand for goods in short supply, and to absorb generally those inflationary dollars which are a potent danger in our economy. Second, we must secure as widespread an ownership in Government securities as is possible, in order to facilitate the management of our national debt and insure a strong fiscal position. I therefore have no hesitancy in asking that you bankers continue the fine support which you have rendered the savings bond program in the past—support which I well realize has been many times freely given at considerable inconvenience. The present campaign will undoubtedly prove harder to carry on than those of the war years, and definitely will require greater efforts and activities of people in every field of national endeavor. Here, then, is a challenge—one which you, as savings bankers, are particularly qualified to meet.

In the 132 years since the first mutual savings bank was founded in this country, your institutions have played a constructive role in securing to the American citizens his enviable standards of living. Your organizations have grown steadily in size and in importance, until today, with a total of 533 banks throughout the United States, with depositors numbering 18 million, and with total assets of over \$20 billion, your position is one of unquestioned influence. Since their inception, the mutual savings banks have actively participated in the fiscal affairs of this Government, and have outstandingly contributed to the financial welfare of the individual. This record of your splendid past achievements is indisputable proof that you will equal and excel your previous efforts toward the progress and development of this Nation.

---

**Exhibit 40.—Joint statement, November 24, 1947, by the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Executive Committee of the National Association of Supervisors of State Banks, on bank credit policy during the inflation**

Our country is experiencing a boom of dangerous proportions. The volume of bank credit has been greatly inflated in response to the needs for financing the war effort. Domestic and foreign demands for goods and services are exerting a strong upward pressure on prices in spite of the high volume of our physical production. These demands would be inflationary without any further increase in the use of bank credit, but the demand is being steadily increased through continued rapid expansion in bank loans, in addition to other factors outside the control of the banking system.

A substantial increase in production, agricultural as well as industrial, would be highly beneficial. However, increases can only take place slowly and to a limited degree. In industry, they are dependent upon corresponding increases in the available supply of basic raw materials, plant capacity, and the number and productivity of the labor force. Therefore a further growth of outstanding bank credit tends to add to the already excessive demand and to make for still higher prices.

The Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Executive Committee of the National Association of Supervisors of State Banks are unanimously of the view that present conditions require the bankers of the country to exercise extreme caution in their lending policies. It is at times such as these that bad loans are made and future losses become inevitable.

It is recognized that a continued flow of bank credit is necessary for the production and distribution of goods and services. The banks of the country have adequately met this important need in the reconversion period. Under existing conditions, however, the banks should curtail all loans either to individuals or businesses for speculation in real estate, commodities, or securities. They should guard against the over-extension of consumer credit and should not relax the terms of installment financing. As far as possible extension of bank credit under existing conditions should be confined to financing that will help production rather than merely increase consumer demand.

The bank supervisory authorities strongly urge directors to see that their banks follow these policies and maintain adequate capital in relation to risk assets.

---

**Exhibit 41.—Correspondence between Secretary of the Treasury Snyder and Mr. Joseph M. Dodge relative to the voluntary credit control program of the American Bankers Association (press release July 19, 1948)**

Secretary Snyder today made public the following correspondence between himself and Mr. Joseph M. Dodge, President of the American Bankers Association:

JULY 2, 1948.

DEAR MR. DODGE: This letter is to express my appreciation for the voluntary credit control program of the American Bankers Association and to outline the circumstances, familiar to both of us, which now require that the effort under this program be continued without relaxation.

The American Bankers Association credit control program began the first of this year and has been pushed actively and aggressively by the Association through pamphlets and printed material, group meetings, and by word-of-mouth of the leaders of the banking fraternity. Bankers in all parts of the country have been influenced by the program and have screened their loan applications with added vigilance. The results have been well worth the effort. During the first five months of this year, the total loans of all commercial banks advanced by only \$1,350 million, while their investments fell by \$3,250 million. As a consequence, there was a substantial decline in the money supply of the country during the period, contributing materially to containing inflationary pressures.

As you know, inflationary pressures still continue serious; but the Government will no longer be able to contribute substantially to their control by means of an excess of receipts over expenditures. In the fiscal year which just closed, we had such an excess of \$8.4 billion. On the other hand, in the fiscal year just commencing, as a result of increased defense and foreign-aid expenditures due to the tense international situation, combined with the recent tax cut, we shall probably be unable to avoid an actual excess of expenditures over receipts.

As a consequence, the Government will no longer be able to retire bank-held debt on the scale maintained during the last fiscal year; and bankers can no longer look to a decline in their investments to offset an increase in their loans. A much larger share of the total burden of controlling inflation must henceforth lie with the banks.

Bearing this in mind, and with full realization of the seriousness of the situation, I am taking the liberty of asking you to reexamine your efforts in this field, and wherever possible to increase them. The final responsibility, and it is a grave one, must rest with the self-discipline of each individual bank. Your effort to impress this upon the banking fraternity will be a real contribution to the cause of economic stability.

Sincerely yours,

JOHN W. SNYDER,  
*Secretary of the Treasury.*

MR. JOSEPH M. DODGE,  
*President, American Bankers Association,  
12 East 36th Street, New York 16, New York.*

JULY 7, 1948.

THE HONORABLE JOHN W. SNYDER  
*Secretary of the Treasury, Washington, D. C.*

DEAR SECRETARY SNYDER: Thank you for your letter of July 2 about the need for continued effort on the part of the banks to control credit expansion. Your comment about the voluntary program of the American Bankers Association is much appreciated.

I will see that your letter is brought to the direct attention of the appropriate officers of the banks of the country.

We have had the complete cooperation and support of the State Bankers Associations in carrying this program to the individual banks through State, group, and other local meetings. The scope of their work has been tremendous, and it has been made effective by the ready acceptance of the principles by the individual bank managements.

However, I am sure we all realize that the emphasis of the spring meeting period is over. The first six months of this calendar year have passed and now we are going into the second six months, which is the first half of the 1948-1949 fiscal year. We can not fail to recognize the substantial change in the fiscal picture, which is mentioned in your letter, and that the period ahead of us will present a test of whether inflationary forces can be controlled and checked. Certainly recent events and forecasts suggest that the longer-term outlook can be dangerously inflationary.

The American Bankers Association and the banks will continue and intensify their cooperative action to control the proper use and expansion of credit, and will continue to stimulate increased savings.

Again I am urging the banks to scrutinize credit carefully to the effect that its use will be restricted to that which stimulates immediate production and avoids increasing the pressures on consumption, except in areas of free supply. Under present conditions the extension of credit in the commercial, agricultural, or consumer fields undoubtedly requires continued emphasis on selectivity, and restriction to sound the necessary purposes.

In particular I am asking the banks not to contribute to rising prices, fictitious values, or false standards of living from the use of credit; to maintain a general and consistent pressure for loan liquidation and the fulfillment of payment commitments; to watch the inventory and accounts receivable accumulations of borrowers; to scrutinize the terms under which borrowers themselves extend credit; to relate mortgage loans to sound and realistic values; and to make consumer credit loans on conservative terms. In all cases the total obligations of borrowers should be held well within their capacities to pay.

Also, I am asking the banks to use every effort to encourage investment in Government savings bonds and in savings deposit accounts. Savings are particularly important because the more saved now, the more people will have—and the less they spend, the greater will be the future purchasing power of their savings and incomes.

Everyone knows that the further prices and debts get out of line, the greater the probability of a drastic correction which will bring severe penalties, particularly to the over-extended borrower. Individuals, businesses, and the Nation all need stability as much as or more than they need prosperity. This is a time in which we can not afford personal or business deficits any more than we can afford Government budget deficits.

Our stability can only be maintained by a combination of good judgment and a deliberate restraint. The fundamentally sound and flexible financial position of borrowers and banks is the basic protection for all unexpected future economic changes.

Of course there is no way the banks can undo the inflationary forces already in effect or which may come into effect from other sources. Also the present level of our economic activity and prices requires substantial uses of credit. But bankers acknowledge the fundamental responsibility to maintain sound assets and a substantial liquidity, and to avoid credit abuses.

You can be assured of our continued cooperation in meeting the inflationary problem.

Sincerely yours,

JOSEPH M. DODGE.

## ORGANIZATION AND PROCEDURE

## Exhibit 42.—Supervision of bureaus, offices, and divisions of the Treasury Department, February 16, 1948

[Department Circular No. 244, Revised]

TREASURY DEPARTMENT,  
Washington, February 16, 1948.*To Heads of Bureaus, Offices, and Divisions, Treasury Department:*

1. The following assignments of bureaus, offices, and divisions of the Treasury Department are hereby ordered:

## Under Secretary:

1. Bureau of Internal Revenue
2. Bureau of Customs
3. Office of the Technical Staff
4. Division of Tax Research
5. United States Savings Bonds Division

## Assistant Secretary:

1. United States Coast Guard
2. United States Secret Service
3. Bureau of Federal Supply
4. Bureau of the Mint
5. Bureau of Engraving and Printing
6. Bureau of Narcotics
7. Chief Coordinator, Treasury Enforcement Agencies
8. Comptroller of the Currency
9. Committee on Practice

## Fiscal Assistant Secretary:

1. Bureau of Accounts
2. Bureau of the Public Debt
3. Office of the Treasurer of the United States

## Administrative Assistant to the Secretary:

1. Office of Administrative Services
2. Division of Personnel
3. Budget Division

## General Counsel:

1. Legal Division
2. Office of the Tax Legislative Counsel
3. Office of Contract Settlement, Appeal Board, and Contract Settlement Advisory Board

## Director, Office of International Finance:

1. Office of International Finance (including Foreign Funds Control)

2. The following Treasury officials shall report directly to the Secretary:

- (a) The Under Secretary
- (b) The Assistant Secretary

- (d) The Assistants to the Secretary
- (e) The Administrative Assistant
- (f) The General Counsel
- (g) The Director, Office of International Finance
- (h) The Director of Public Relations

3. An Assistant to the Secretary, also known as National Director, will supervise the United States Savings Bonds Division and will report to the Secretary through the Under Secretary.

4. In case of the absence or sickness of the Secretary, the Under Secretary will act as Secretary of the Treasury. In case of the absence or sickness of the Secretary and the Under Secretary, the senior Assistant Secretary present will act as Secretary. In case of the absence or sickness of the Secretary, the Under Secretary, and the Assistant Secretaries, the General Counsel for the Department will act as Secretary.

5. In case of the absence or sickness of the Fiscal Assistant Secretary, or a vacancy in that office, the Under Secretary will act as Fiscal Assistant Secretary. In case of the absence or sickness of both the Under Secretary and the Fiscal Assistant Secretary, or of vacancies in those offices, the senior Assistant Secretary present will act as Fiscal Assistant Secretary.

6. This circular supersedes Treasury Department Circular No. 244, dated July 15, 1943.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

**Exhibit 43.—Treasury Department orders relating to organization and procedure**

No. 86, JULY 10, 1947, ESTABLISHING THE OFFICE OF INTERNATIONAL FINANCE

1. By virtue of the authority vested in me by section 161 of the Revised Statutes and as Secretary of the Treasury, I hereby establish in the Treasury Department the Office of International Finance which shall have separate administrative status subject to the usual departmental controls. The Office will function under the immediate supervision of the Director, Office of International Finance, who will report directly to the Secretary of the Treasury.

2. The Director, Office of International Finance, shall be responsible for advising and assisting the Secretary of the Treasury in the formulation and execution of policies and programs relating to the responsibilities of the Treasury Department in the international financial and monetary field, including in particular the policies and programs arising in connection with:

- A. The Bretton Woods Agreements Act, the National Advisory Council on International Monetary and Financial Problems, the International Monetary Fund, the International Bank for Reconstruction and Development and all other matters related to foreign lending, financial, monetary, or exchange activities;
- B. The Anglo-American Financial Agreement and other international loans and financial assistance programs of this Government;
- C. The administration of Foreign Funds Control pursuant to sections 3 and 5(b) of the Trading with the Enemy Act, as amended, and any proclamations, orders, regulations, or rulings that have been or may be issued thereunder;
- D. Administration and operation of the United States exchange stabilization fund;
- E. Statutes and regulations relating to gold, silver, exchange rates, exchange stabilization operations and agreements, acquisition and disposition of foreign currencies, international capital movements, monetary policy, the position of the dollar in relation to foreign currencies, and international trade and commercial policy, including trade agreements, anti-dumping measures, and countervailing duties;
- F. The financial aspects of international treaties, agreements, organizations, or operations in which the United States Government participates;
- G. Foreign areas controlled or administered by the United States Government;
- H. Obtaining current information concerning the financial position and exchange and other controls of foreign countries and developments in their financial and economic life having a bearing upon the United States financial or monetary policy, and preparing analyses and recommendations based thereon;
- I. Conducting negotiations with foreign governments with respect to the foregoing responsibilities;
- J. Maintaining such Treasury representatives abroad as may be required to assist in discharging the foregoing responsibilities, and directing and coordinating their activities.

The Director shall also be responsible for acting as liaison with foreign governments and with the State Department and other interested United States Government departments and agencies with respect to the foregoing responsibilities.

3. The functions, duties, and personnel of the Division of Monetary Research in the Office of the Secretary of the Treasury are hereby transferred to the Office

of International Finance, and the Division of Monetary Research is hereby abolished.

4. Foreign Funds Control, with its functions, duties, and personnel, is hereby transferred to the Office of International Finance.

5. This order shall be effective July 15, 1947.

6. This order revokes Treasury Department Order No. 70, dated August 20, 1946, and to the above extent modifies Treasury Department Orders No. 18, dated March 25, 1938, and No. 47, dated September 22, 1942. This order shall not affect the existing procedures, functions, duties, or responsibilities of any other organization within the Treasury Department.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

---

NO. 87, JULY 10, 1947, APPOINTING THE DIRECTOR AND ASSISTANT DIRECTORS  
OF THE OFFICE OF INTERNATIONAL FINANCE

Mr. Frank A. Southard, Jr., is hereby appointed Director, Office of International Finance, established under the provisions of Treasury Department Order No. 86, dated July 10, 1947.

The following are hereby appointed Assistant Directors, Office of International Finance:

Mr. Harold Glasser  
Mr. John S. Richards  
Mr. Orvis A. Schmidt

In addition to performing his duties and responsibilities as Assistant Director, Office of International Finance, Mr. Richards will continue to serve as Director of Foreign Funds Control, in which capacity he will report to the Director, Office of International Finance.

The foregoing appointments shall be effective July 15, 1947.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

---

NO. 88, JULY 10, 1947, CONTINUING THE DUTIES OF THE SPECIAL ASSISTANT TO  
THE SECRETARY

Mr. Andrew N. Overby shall continue to serve as Special Assistant to the Secretary, reporting directly to the Secretary, and shall perform such functions and duties as may be assigned from time to time.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

---

NO. 89, AUGUST 1, 1947, DESIGNATING THE GENERAL COUNSEL OF THE TREASURY  
DEPARTMENT

Effective August 2, 1947, Mr. Thomas J. Lynch is hereby designated to act as the General Counsel.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

---

NO. 90, AUGUST 12, 1947, MEMBERSHIP OF COMMITTEE ON TREASURY RECRUIT-  
MENT POLICY

On December 18, 1946, the Secretary of the Treasury appointed a permanent Committee on Treasury Recruitment Policy. The functions of the Committee are to act as a policy group in connection with the Treasury's long-range recruitment program and to keep the Secretary of the Treasury advised of progress made. Effective immediately the membership of the Committee shall be the following:

E. H. Foley, Jr., Assistant Secretary—Chairman  
E. F. Bartelt, Fiscal Assistant Secretary  
Thomas J. Lynch, Acting General Counsel  
William W. Parsons, Administrative Assistant to the Secretary  
James H. Hard, Director of Personnel

The members of the Committee may appoint delegates and form a working group or groups to assist it with the various detailed programs.

This order amends the memorandum addressed to Assistant Secretary Foley by the Secretary of the Treasury on December 18, 1946, with reference to the appointment of the Committee.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

No. 91, AUGUST 29, 1947, APPOINTING THE DEPUTY DIRECTOR OF CONTRACT SETTLEMENT

Pursuant to Reorganization Plan No. 1 of 1947 and section 4 (d) of the Contract Settlement Act of 1944 (58 Stat. 651; 41 U. S. C. 104), I hereby appoint Stephen J. Spingarn as Deputy Director of Contract Settlement, effective September 2, 1947.

Treasury Department Order No. 84 is hereby revoked.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

No. 92, SEPTEMBER 23, 1947, ESTABLISHING THE OFFICE OF THE TECHNICAL STAFF

By virtue of the authority vested in me by section 161 of the Revised Statutes and as Secretary of the Treasury, I hereby establish in the Office of the Secretary of the Treasury the Office of the Technical Staff, which will function under the immediate supervision of the Director of the Technical Staff.

The Director of the Technical Staff has the responsibility of providing technical assistance for the Secretary, the Under Secretary, and other Treasury officials on matters relating to Treasury financing, public debt management, and other Treasury matters, including in particular the following:

1. Developments in the outlook for the fiscal and budgetary position of the Treasury, and proposals concerning the size and character of Treasury borrowing operations, both cash and refundings;
2. The impact of Treasury financing and public debt operations on the credit structure and general economy of the country, and the development of fiscal policy and debt management objectives suitable for current economic conditions;
3. The investment position and needs of the various investor classes, their current holdings of Federal securities, and the types of securities suited to the needs of different types of investors;
4. The terms of proposed securities to be offered in Treasury financings, and their probable effects upon the market price and ownership distribution of outstanding Government securities;
5. The relationship of new securities to the Federal debt structure and interest costs thereon;
6. The interest rate structure of the country, and current trends in the money markets and in the banking position;
7. Financing operations of Government corporations and credit agencies;
8. Trends in Treasury receipts from different sources, and estimates for specific periods of time;
9. Probable effects of proposed legislation upon Treasury receipts;
10. Actuarial matters involved in Treasury financing and other Treasury operations, including actuarial estimates for Federal trust funds required by statute;
11. Other matters, including general considerations of the effects of Treasury operations on business conditions, credit conditions, employment, and the financial structure of the country, which may be involved in requests to the Director of the Technical Staff from Treasury officials.

The Office of the Technical Staff supersedes the Division of Research and Statistics in the Office of the Secretary, which is hereby abolished, and Treasury Orders No. 8, dated September 17, 1934, and No. 18, dated March 25, 1938, are modified accordingly. This order shall not affect the existing procedures, functions, duties, or responsibilities of any other organization within the Treasury Department.

Accordingly, the title of the Director of Research and Statistics is changed to Director of the Technical Staff.

A. L. M. WIGGINS,  
*Acting Secretary of the Treasury.*

## No. 93, SEPTEMBER 26, 1947, ESTABLISHING THE OFFICE OF ADMINISTRATIVE SERVICES

By virtue of the authority vested in me by section 161 of the Revised Statutes and as Secretary of the Treasury, I hereby establish, effective October 1, 1947, in the Office of the Secretary of the Treasury the Office of Administrative Services, which shall function under the immediate supervision of the Director of Administrative Services.

The Office of Administrative Services shall be composed of the following three Divisions: (1) Division of Office Services; (2) Division of Treasury Buildings; (3) Division of Treasury Space Control. These Divisions shall function under the supervision of the following three officials, each assigned to the respective Divisions: (1) Chief, Division of Office Services; (2) Superintendent, Division of Treasury Buildings; (3) Chief, Division of Treasury Space Control.

All functions, duties, and authorities formerly assigned or delegated to the Chief Clerk, or exercised by him, are hereby transferred, assigned, and delegated to the Director of Administrative Services. The Chief and Assistant Chief of the Division of Office Services are hereby authorized to perform all such functions, duties, and authorities under the supervision and by the direction of the Director of Administrative Services.

There are hereby transferred to the Office of Administrative Services all of the functions and duties formerly assigned to the following:

- (1) Office of the Chief Clerk.
- (2) Office of the Superintendent of Treasury Buildings.
- (3) Space Control Staff in the Office of the Secretary, which under the direction of the Administrative Assistant to the Secretary exercised the authority delegated to the latter official to manage and coordinate the assignment and utilization of all space occupied by Treasury organizations in Washington and in the field in federally or commercially owned buildings.
- (4) Such other administrative service functions as the Administrative Assistant to the Secretary shall determine from time to time, in the interest of economy and efficiency, should be assigned to the Office of Administrative Services. The Director of Administrative Services, with the approval of the Administrative Assistant to the Secretary, shall assign these latter functions to the appropriate divisions in the Office of Administrative Services.

All funds available for the operation of the Office of the Chief Clerk, Office of the Superintendent of Treasury Buildings, and the Space Control Staff in the Office of the Secretary shall continue to be available, under the supervision of the Director of Administrative Services, to carry out the functions and purposes for which such funds were appropriated.

The personnel assigned to the Office of the Chief Clerk, the Office of the Superintendent of Treasury Buildings, and the members of the Space Control Staff in the Office of the Secretary are hereby transferred to the Office of Administrative Services, effective October 1, 1947.

The Office of the Chief Clerk, the Office of the Superintendent of Treasury Buildings, and the Space Control Staff in the Office of the Secretary are hereby abolished effective October 1, 1947.

The Director of Administrative Services shall report to the Administrative Assistant to the Secretary.

Treasury Department Orders No. 4, dated December 26, 1933, No. 16, dated May 20, 1937, No. 27, dated November 30, 1939, and No. 59, dated March 3, 1945, are hereby amended and superseded accordingly. Any other Treasury orders or circulars in conflict with this order are hereby revoked.

A. L. M. WIGGINS,  
*Acting Secretary of the Treasury.*

No. 94, NOVEMBER 14, 1947, ESTABLISHING POSITION OF DEPUTY DIRECTOR,  
OFFICE OF INTERNATIONAL FINANCE

1. The Director, Office of International Finance, shall be assisted in discharging his responsibilities and duties, as outlined in Treasury Department Order No. 86, dated July 10, 1947, by a Deputy Director, Office of International Finance. The Deputy Director, in addition to his other duties, shall serve as Secretary of the National Advisory Council on International Monetary and Financial Problems.

2. The Director of Foreign Funds Control shall continue to supervise the operations of Foreign Funds Control and shall report to the Director, Office of International Finance.

3. Treasury Department Order No. 87, dated July 10, 1947, except with reference to the appointment of the Director, Office of International Finance, is hereby superseded and revoked.

4. This order shall be effective November 17, 1947.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

No. 94, REVISED, FEBRUARY 20, 1948, ESTABLISHING POSITION OF DEPUTY  
DIRECTOR, OFFICE OF INTERNATIONAL FINANCE

Treasury Department Order No. 94, dated November 14, 1947, is hereby revised to read as follows:

1. The Director, Office of International Finance, shall be assisted in discharging his responsibilities and duties, as outlined in Treasury Department Order No. 86, dated July 10, 1947, by a Deputy Director, Office of International Finance.

2. The Deputy Director, in addition to his other duties, shall serve as Secretary of the National Advisory Council on International Monetary and Financial Problems, and in the absence of the Director, Office of International Finance, shall serve as Acting Director.

3. The Director, Office of International Finance, shall also serve as the Director of Foreign Funds Control, and in this capacity shall supervise the operations of Foreign Funds Control. In the absence of the Director, Office of International Finance, the Chief, Enforcement Division, Foreign Funds Control, shall serve as Acting Director of Foreign Funds Control.

4. Treasury Department Order No. 87, dated July 10, 1947, except with reference to the appointment of the Director, Office of International Finance, is hereby superseded and revoked.

5. The provisions of this order shall be effective March 1, 1948.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

No. 95, DECEMBER 29, 1947, CHANGING THE PHYSICAL CUSTODY OF UNISSUED  
FEDERAL RESERVE NOTES

Effective December 28, 1947, it is hereby ordered and directed that the physical custody of unissued Federal Reserve notes be transferred from the joint custody of the Director, Bureau of Engraving and Printing, and the Secretary of the Treasury to the joint custody of the Federal Reserve Issue and Redemption Division of the Bureau of the Comptroller of the Currency and the Secretary of the Treasury.

Such employees of the Bureau of Engraving and Printing as are now engaged in the physical handling of Federal Reserve notes for deposit and shipment shall be transferred from the Bureau of Engraving and Printing to the Bureau of the Comptroller of the Currency. On and after December 28, 1947, the effective date of this transfer, the salaries of these employees shall be paid from the funds in the Federal Reserve Issue and Redemption Account.

E. H. FOLEY, Jr.,  
*Acting Secretary of the Treasury.*

No. 96, JANUARY 29, 1948, AUTHORIZING CERTAIN OFFICERS TO AFFIX THE SEAL OF THE TREASURY DEPARTMENT TO DOCUMENTS, ETC.

By virtue of the authority vested in me by section 161 of the Revised Statutes and as Secretary of the Treasury, it is hereby ordered:

1. The following officers are authorized to affix the seal of the Treasury Department to books, records, papers, writings, and documents of the Department:

- (a) Director of Administrative Services
- (b) Chief, Division of Office Services
- (c) Records Administration Officer, Division of Office Services

2. The above-named officers are authorized to certify and to authenticate originals or copies of books, records, papers, writings, and documents of the Treasury Department.

3. Custody of the seal of the Treasury Department is assigned to the Director of Administrative Services.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

No. 97, APRIL 6, 1948, CONFIDENTIAL STATUS OF EMPLOYEE LOYALTY RECORDS AND INFORMATION

1. PURPOSE:

The President of the United States issued a directive, dated March 13, 1948, to all officers and employees in the Executive Branch of the Government concerning the confidential status of employee loyalty records and information. The directive is as follows:

"The efficient and just administration of the Employee Loyalty Program, under Executive Order No. 9835 of March 21, 1947, requires that reports, records, and files relative to the program be preserved in strict confidence. This is necessary in the interest of our national security and welfare, to preserve the confidential character and sources of information furnished, and to protect Government personnel against the dissemination of unfounded or disproved allegations. It is necessary also in order to insure the fair and just disposition of loyalty cases.

"For these reasons, and in accordance with the long-established policy that reports rendered by the Federal Bureau of Investigation and other investigative agencies of the executive branch are to be regarded as confidential, all reports, records, and files relative to the loyalty of employees or prospective employees (including reports of such investigative agencies), shall be maintained in confidence, and shall not be transmitted or disclosed except as required in the efficient conduct of business.

"Any subpoena or demand or request for information, reports, or files of the nature described, received from sources other than those persons in the executive branch of the Government who are entitled thereto by reason of their official duties, shall be respectfully declined, on the basis of this directive, and the subpoena or demand or other request shall be referred to the Office of the President for such response as the President may determine to be in the public interest in the particular case. There shall be no relaxation of the provisions of this directive except with my express authority.

"This directive shall be published in the Federal Register."

2. PROCEDURE:

(a) Any officer or employee on whom such a subpoena, demand, or request is served shall decline to comply, giving as authority therefor the directive of the President. He shall then immediately inform the Chairman of the Treasury Loyalty Board, and shall refer to him the subpoena, demand, or request (if in writing).

(b) The Chairman of the Treasury Loyalty Board will be responsible for advising the Secretary of the Treasury and the General Counsel of the receipt of such subpoena, demand, or request, and for thereafter transmitting such subpoena, demand, or request (if in writing) to the Office of the President.

E. H. FOLEY, Jr.,  
*Acting Secretary of the Treasury.*

## No. 98, MAY 25, 1948, AUTHORIZING CERTAIN OFFICERS TO SIGN STANDARD MOTOR VEHICLE CERTIFICATES OF RELEASE

1. By virtue of the authority vested in me by section 161 of the Revised Statutes and as Secretary of the Treasury, I hereby delegate to the following officials<sup>1</sup> of the Treasury Department authority to sign certificates of release (Standard Form No. 97) for the transfer of the title of a Government-owned motor vehicle from the Federal Government to a private purchaser:

Administrative Assistant to the Secretary  
Director of Administrative Services  
Commissioner of Accounts  
Commissioner of Customs  
Director, Bureau of Engraving and Printing  
Commissioner of Internal Revenue  
Director of the Mint  
Commissioner of Narcotics  
Commissioner of the Public Debt  
Treasurer of the United States  
Commandant, U. S. Coast Guard  
Chief, U. S. Secret Service  
National Director, U. S. Savings Bonds Division

2. Subject to the approval of the Administrative Assistant to the Secretary, the officials<sup>1</sup> listed in paragraph 1 are authorized to redelegate the authority to sign certificates of release to officials and employees under their supervision. The heads of the bureaus, offices, and divisions to whom this authority is delegated shall be responsible for advising the proper State motor vehicle administrators of the names and titles of the officials and employees in their organization who are authorized to exercise this authority.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

## No. 99, JUNE 11, 1948, ABOLISHING THE DIVISION OF PUBLIC RELATIONS AND TRANSFERRING FUNCTIONS TO AN ASSISTANT TO THE SECRETARY

Effective June 1, 1948, the Division of Public Relations in the Office of the Secretary of the Treasury is hereby abolished, and the responsibility for supervising all matters involving information and press matters in the Treasury Department is assigned to an Assistant to the Secretary.

The authority, functions, and duties heretofore vested in and directed by the Director of Public Relations are hereby transferred and assigned to such Assistant to the Secretary as the Secretary of the Treasury may designate to exercise this authority and perform these functions and duties. The staff formerly assigned to the Division of Public Relations shall also be assigned to the supervision of such Assistant to the Secretary.

This order supersedes and amends all orders and circulars previously issued with reference to the supervision of information and press matters in the Treasury Department.

JOHN W. SNYDER,  
*Secretary of the Treasury.*

<sup>1</sup> Supplement No. 1, June 1, 1948, authorizes Director, Bureau of Federal Supply, to sign certificates of release.

## MISCELLANEOUS

**Exhibit 44.**—Portions of the act to promote world peace and the general welfare<sup>1</sup> national interest, and foreign policy of the United States through economic, financial, and other measures necessary to the maintenance of conditions abroad in which free institutions may survive and consistent with the maintenance of the strength and stability of the United States (Public Law 472, approved April 3, 1948)

## TITLE I. ECONOMIC COOPERATION ACT OF 1948

\* \* \* \* \*

## NATIONAL ADVISORY COUNCIL

SEC. 106. Section 4 (a) of the Bretton Woods Agreements Act (59 Stat. 512, 513) is hereby amended to read as follows:

"SEC. 4. (a) In order to coordinate the policies and operations of the representatives of the United States on the Fund and the Bank and of all agencies of the Government which make or participate in making foreign loans or which engage in foreign financial, exchange or monetary transactions, there is hereby established the National Advisory Council on International Monetary and Financial Problems (hereinafter referred to as the 'Council'), consisting of the Secretary of the Treasury, as Chairman, the Secretary of State, the Secretary of Commerce, the Chairman of the Board of Governors of the Federal Reserve System, the Chairman of the Board of Directors of the Export-Import Bank of Washington, and during such period as the Economic Cooperation Administration shall continue to exist, the Administrator for Economic Cooperation."

\* \* \* \* \*

## NATURE AND METHOD OF ASSISTANCE

SEC. 111. (a) The Administrator may, from time to time, furnish assistance to any participating country by providing for the performance of any of the functions set forth in paragraphs (1) through (5) of this subsection when he deems it to be in furtherance of the purposes of this title, and upon the terms and conditions set forth in this title and such additional terms and conditions consistent with the provisions of this title as he may determine to be necessary and proper.

(1) Procurement from any source, including Government stocks on the same basis as procurement by Government agencies under Public Law 375 (Seventy-ninth Congress) for their own use, of any commodity which he determines to be required for the furtherance of the purposes of this title. As used in this title, the term "commodity" means any commodity, material, article, supply, or goods necessary for the purposes of this title.

(2) Processing, storing, transporting, and repairing any commodities, or performing any other services with respect to a participating country which he determines to be required for accomplishing the purposes of this title. The Administrator shall, in providing for the procurement of commodities under authority of this title, take such steps as may be necessary to assure, so far as is practicable, that at least 50 per centum of the gross tonnage of commodities, procured within the United States out of funds made available under this title and transported abroad on ocean vessels, is so transported on United States flag vessels to the extent such vessels are available at market rates.

(3) Procurement of and furnishing technical information and assistance.

(4) Transfer of any commodity or service, which transfer shall be signified by delivery of the custody and right of possession and use of such commodity, or otherwise making available any such commodity, or by rendering a service to a participating country or to any agency or organization representing a participating country.

(5) The allocation of commodities or services to specific projects designed to carry out the purposes of this title, which have been submitted to the Administrator by participating countries and have been approved by him.

(b) In order to facilitate and maximize the use of private channels of trade, subject to adequate safeguards to assure that all expenditures in connection with such procurement are within approved programs in accordance with terms and

conditions established by the Administrator, he may provide for the performance of any of the functions described in subsection (a) of this section—

(1) by establishing accounts against which, under regulations prescribed by the Administrator—

(i) letters of commitment may be issued in connection with supply programs approved by the Administrator (and such letters of commitment, when issued, shall constitute obligations of the United States and monies due or to become due thereunder shall be assignable under the Assignment of Claims Act of 1940 and shall constitute obligations of applicable appropriations); and

(ii) withdrawals may be made by participating countries, or agencies or organizations representing participating countries or by other persons or organizations, upon presentation of contracts, invoices, or other documentation specified by the Administrator under arrangements prescribed by the Administrator to assure the use of such withdrawals for purposes approved by the Administrator.

Such accounts may be established on the books of the Administration, or any other department, agency, or establishment of the Government specified by the Administrator, or, on terms and conditions approved by the Secretary of the Treasury, in banking institutions in the United States. Expenditures of funds which have been made available through accounts so established shall be accounted for on standard documentation required for expenditures of Government funds: *Provided*, That such expenditures for commodities or services procured outside the continental limits of the United States under authority of this section may be accounted for exclusively on such certification as the Administrator may prescribe in regulations promulgated by him with the approval of the Comptroller General of the United States to assure expenditure in furtherance of the purposes of this title.

(2) by utilizing the services and facilities of any department, agency, or establishment of the Government as the President shall direct, or with the consent of the head of such department, agency, or establishment, or, in the President's discretion, by acting in cooperation with the United Nations or with other international organizations or with agencies of the participating countries, and funds allocated pursuant to this section to any department, agency, or establishment of the Government shall be established in separate appropriation accounts on the books of the Treasury.

(3) by making, under rules and regulations to be prescribed by the Administrator, guaranties to any person of investments in connection with projects approved by the Administrator and the participating country concerned as furthering the purposes of this title (including guaranties of investments in enterprises producing or distributing informational media: *Provided*, That the amount of such guaranties in the first year after the date of the enactment of this Act does not exceed \$15,000,000), which guaranties shall terminate not later than fourteen years from the date of enactment of this Act: *Provided*, That—

(i) the guaranty to any person shall not exceed the amount of dollars invested in the project by such person with the approval of the Administrator and shall be limited to the transfer into United States dollars of other currencies, or credits in such currencies, received by such person as income from the approved investment, as repayment or return thereof, in whole or in part, or as compensation for the sale or disposition of all or any part thereof: *Provided*, That, when any payment is made to any person under authority of this paragraph, such currencies, or credits in such currencies, shall become the property of the United States Government;

(ii) the Administrator may charge a fee in an amount determined by him not exceeding 1 per centum per annum of the amount of each guaranty, and all fees collected hereunder shall be available for expenditure in discharge of liabilities under guaranties made under this paragraph until such time as all such liabilities have been discharged or have expired, or until all such fees have been expended in accordance with the provisions of this paragraph; and

(iii) as used in this paragraph, the term "person" means a citizen of the United States or any corporation, partnership, or other association created under the law of the United States or of any State or Territory and substantially beneficially owned by citizens of the United States.

The total amount of the guaranties made under this paragraph (3) shall not exceed \$300,000,000, and as such guaranties are made the authority to realize funds from the sale of notes for the purpose of allocating funds to the Export-Import Bank of Washington under paragraph (2) of subsection (c) of this section shall be accordingly reduced. Any payments made to discharge liabilities under

guaranties issued under paragraph (3) of this subsection shall be paid out of fees collected under subparagraph (ii) of paragraph (3) of this subsection as long as such fees are available, and thereafter shall be paid out of funds realized from the sale of notes which shall be issued under authority of paragraph (2) of subsection (c) of this section when necessary to discharge liabilities under any such guaranty.

(c) (1) The Administrator may provide assistance for any participating country, in the form and under the procedures authorized in subsections (a) and (b), respectively, of this section, through grants or upon payment in cash, or on credit terms, or on such other terms of payment as he may find appropriate, including payment by the transfer to the United States (under such terms and in such quantities as may be agreed to between the Administrator and the participating country) of materials which are required by the United States as a result of deficiencies or potential deficiencies in its own resources. In determining whether such assistance shall be through grants or upon terms of payment, and in determining the terms of payment, he shall act in consultation with the National Advisory Council on International Monetary and Financial Problems, and the determination whether or not a participating country should be required to make payment for any assistance furnished to such country in furtherance of the purposes of this title, and the terms of such payment, if required, shall depend upon the character and purpose of the assistance and upon whether there is reasonable assurance of repayment considering the capacity of such country to make such payments without jeopardizing the accomplishment of the purposes of this title.

(2) When it is determined that assistance should be extended under the provisions of this title on credit terms, the Administrator shall allocate funds for the purpose to the Export-Import Bank of Washington, which shall, notwithstanding the provisions of the Export-Import Bank Act of 1945 (59 Stat. 526), as amended, make and administer the credit on terms specified by the Administrator in consultation with the National Advisory Council on International Monetary and Financial Problems. The Administrator is authorized to issue notes from time to time for purchase by the Secretary of the Treasury in an amount not exceeding in the aggregate \$1,000,000,000 (i) for the purpose of allocating funds to the Export-Import Bank of Washington under this paragraph during the period of one year following the date of enactment of this Act and (ii) for the purpose of carrying out the provisions of paragraph (3) of subsection (b) of this section until all liabilities arising under guaranties made pursuant to such paragraph (3) have expired or have been discharged. Such notes shall be redeemable at the option of the Administrator before maturity in such manner as may be stipulated in such notes and shall have such maturity as may be determined by the Administrator with the approval of the Secretary of the Treasury. Each such note shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the issuance of the note. Payment under this paragraph of the purchase price of such notes and repayments thereof by the Administrator shall be treated as public debt transactions of the United States. In allocating funds to the Export-Import Bank of Washington under this paragraph, the Administrator shall first utilize such funds realized from the sale of notes authorized by this paragraph as he determines to be available for this purpose, and when such funds are exhausted, or after the end of one year from the date of enactment of this Act, whichever is earlier, he shall utilize any funds appropriated under this title. The Administrator shall make advances to, or reimburse, the Export-Import Bank of Washington for necessary administrative expenses in connection with such credits. Credits made by the Export-Import Bank of Washington with funds so allocated to it by the Administrator shall not be considered in determining whether the Bank has outstanding at any one time loans and guaranties to the extent of the limitation imposed by section 7 of the Export-Import Bank Act of 1945 (59 Stat. 529), as amended. Amounts received in repayment of principal and interest on any credits made under this paragraph shall be deposited into miscellaneous receipts of the Treasury: *Provided*, That, to the extent required for such purpose, amounts received in repayment of principal and interest on any credits made out of funds realized from the sale of notes authorized under this paragraph shall be deposited into the Treasury for the purpose of the retirement of such notes.

\* \* \* \* \*

## AUTHORIZATION OF APPROPRIATIONS

SEC. 114. (a) Notwithstanding the provisions of any other law, the Reconstruction Finance Corporation is authorized and directed, until such time as an appropriation shall be made pursuant to subsection (c) of this section, to make advances not to exceed in the aggregate \$1,000,000,000 to carry out the provisions of this title, in such manner, at such time, and in such amounts as the President shall determine, and no interest shall be charged on advances made by the Treasury to the Reconstruction Finance Corporation for this purpose. The Reconstruction Finance Corporation shall be repaid without interest for advances made by it hereunder, from funds made available for the purposes of this title.

\* \* \* \* \*

(f) In order to reserve some part of the surplus of the fiscal year 1948 for payments thereafter to be made under this title, there is hereby created on the books of the Treasury of the United States a trust fund to be known as the Foreign Economic Cooperation Trust Fund. Notwithstanding any other provision of law, an amount of \$3,000,000,000, out of sums appropriated pursuant to the authorization contained in this title shall, when appropriated, be transferred immediately to the trust fund, and shall thereupon be considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures. The Secretary of the Treasury shall be the sole trustee of the trust fund and is authorized and directed to pay out of the fund such amounts as the Administrator shall duly requisition. The first expenditures made out of the appropriations authorized under this title in the fiscal year 1949 shall be made with funds requisitioned by the Administrator out of the trust fund until the fund is exhausted, at which time such fund shall cease to exist. The provisions of this subsection shall not be construed as affecting the application of any provision of law which would otherwise govern the obligation of funds so appropriated or the auditing or submission of accounts of transactions with respect to such funds.

## BILATERAL AND MULTILATERAL UNDERTAKINGS

SEC. 115. (a) The Secretary of State, after consultation with the Administrator, is authorized to conclude, with individual participating countries or any number of such countries or with an organization representing any such countries, agreements in furtherance of the purposes of this title. The Secretary of State, before an Administrator or Deputy Administrator shall have qualified and taken office, is authorized to negotiate and conclude such temporary agreements in implementation of subsection (b) of this section as he may deem necessary in furtherance of the purposes of this title: *Provided*, That when an Administrator or Deputy Administrator shall have qualified and taken office, the Secretary of State shall conclude the basic agreements required by subsection (b) of this section only after consultation with the Administrator or Deputy Administrator, as the case may be.

(b) The provision of assistance under this title results from the multilateral pledges of the participating countries to use all their efforts to accomplish a joint recovery program based upon self-help and mutual cooperation as embodied in the report of the Committee of European Economic Cooperation signed at Paris on September 22, 1947, and is contingent upon continuous effort of the participating countries to accomplish a joint recovery program through multilateral undertakings and the establishment of a continuing organization for this purpose. In addition to continued mutual cooperation of the participating countries in such a program, each such country shall conclude an agreement with the United States in order for such country to be eligible to receive assistance under this title. Such agreement shall provide for the adherence of such country to the purposes of this title and shall, where applicable, make appropriate provision, among others, for—

\* \* \* \* \*

(6) placing in a special account a deposit in the currency of such country, in commensurate amounts and under such terms and conditions as may be agreed to between such country and the Government of the United States, when any commodity or service is made available through any means authorized under this title, and is furnished to the participating country on a grant basis. Such special account, together with the unencumbered portions of any deposits which may have been made by such country pursuant to section 6 of the joint resolution providing for relief assistance to the people of countries devastated by war (Public Law 84, Eightieth Congress) and section 5 (b) of the Foreign Aid Act of 1947

(Public Law 389, Eightieth Congress), shall be held or used within such country for such purposes as may be agreed to between such country and the Administrator in consultation with the National Advisory Council on International Monetary and Financial Problems, and the Public Advisory Board provided for in section 107 (a) for purposes of internal monetary and financial stabilization, for the stimulation of productive activity and the exploration for and development of new sources of wealth, or for such other expenditures as may be consistent with the purposes of this title, including local currency administrative expenditures of the United States incident to operations under this title, and under agreement that any unencumbered balance remaining in such account on June 30, 1952, shall be disposed of within such country for such purposes as may, subject to approval by Act or joint resolution of the Congress, be agreed to between such country and the Government of the United States;

**Exhibit 45.—Letter of the Postmaster General to the Secretary of the Treasury certifying extraordinary expenditures contributing to the deficiencies of postal revenues for the fiscal year 1948**

WASHINGTON, D. C., December 2, 1948.

THE HONORABLE THE SECRETARY OF THE TREASURY.

DEAR MR. SECRETARY: Pursuant to the provisions of the act of June 9, 1930 (39 U. S. C. 793), embodied in section 260, Postal Laws and Regulations, the amounts set forth below with respect to certain mailings during the fiscal year ended June 30, 1948, as determined under our present system of estimating, are certified to you in order that they may be separately classified on the books of the Treasury Department:

(a) The estimated amount which would have been collected at regular rates of postage on matter mailed during the year by officers of the Government (other than those of the Post Office Department) under the penalty privileges, including registry fees:

Postage.....	\$53, 195, 697	
Registry fees, including surcharges.....	23, 412, 641	
		\$76, 608, 338

(b) The estimated amount which would have been collected at regular rates of postage on matter mailed during the year by:

1. Members of Congress under the franking privilege.....	\$1, 171, 489	
2. By others under the franking privilege.....	31, 493	
		1, 202, 982

(c) The estimated amount which would have been collected during the year at regular rates of postage on publications going free in the country.....

772, 837

(d) The estimated amount which would have been collected at regular rates of postage on matter mailed free to the blind during the year.....

90, 929

(e) The estimated difference between the postage revenue collected during the year on mailings of newspapers and periodicals published by and in the interests of religious, educational, scientific, philanthropic, agricultural, labor, and fraternal organizations, and that which would have been collected at zone rates of postage.....

459, 129

(f) The estimated excess during the year of the cost of aircraft service over the postage revenues derived from air mail.....

17, 088, 124

Total.....	96, 222, 339
------------	--------------

It has not been the practice to include in item (f) the total cost of handling and transporting air mail. Under the system of estimating used in prior years the cost of the items considered amounted to \$94,490,593 for the fiscal year 1948. This estimate includes only payments to air carriers, personnel costs at air mail fields, and the extra transportation cost involved in getting mail to and from air mail fields. Preliminary figures for the fiscal year 1948 indicate that the total cost of handling and transporting air mail, as determined by Cost Ascertainment procedure, amounted to \$131,300,000. The combined revenue from foreign and domestic air mail was \$77,402,469.

Sincerely yours,

J. M. DONALDSON,  
Postmaster General.

## TABLES

---

---

## EXPLANATION OF BASES USED IN TABLES

Figures in the following tables are shown on various bases, namely: (1) daily Treasury statements, (2) Public Debt accounts, (3) warrants issued, (4) checks issued, and (5) collections reported by collecting officers.

**Daily Treasury statements.**—The figures shown in the Daily Statement of the United States Treasury are compiled from the latest daily reports received by the Treasurer of the United States from Government depositories and Treasury offices holding Government funds. The daily Treasury statement, therefore, is a current report compiled from latest available information, and, by reason of the promptness with which the information is obtained and made public, it has come into general use as reflecting the receipts and expenditures of the Government covering a given period and the condition of the Treasury as it is ascertainable from day to day. The current assets and liabilities of the Treasurer's accounts are also shown. The figures as shown in current daily Treasury statements are the basis for the budget estimates of receipts and expenditures, public debt, and condition of the Treasury submitted to Congress by the President. Effective with the beginning of the fiscal year 1947 expenditures of the several departments and establishments serviced by the Division of Disbursement, Treasury Department, are reported in the daily Treasury statement on the basis of checks issued. A clearing account is provided to take care of outstanding checks. Beginning July 1, 1948, such expenditures are reported as of the day on which checks are issued in payment of obligations, through the use of teletype facilities.

**Public Debt accounts.**—On account of the distance of some of the Treasury offices and depositories from the Treasury, it is obvious that the reports from all offices covering a particular day's transactions cannot be received and assembled in the Treasury at one time without delaying for several days the publication of the daily Treasury statement. It is not practicable to delay the publication of the daily Treasury statement in order to include the latest reports. It is necessary, therefore, in order to exhibit the actual public debt receipts and expenditures for any given fiscal year, to take into consideration those reports covering the transactions toward the end of the fiscal year concerned which have not been received in the Treasury until the succeeding fiscal year, and to eliminate receipts and expenditures relating to the preceding fiscal year. After taking into consideration these reports the revised figures indicate the status of the public debt on the basis of actual transactions during the period under review as reflected by the Public Debt accounts. This is known as "the basis of Public Debt accounts."

**Warrants issued (receipts).**—Section 305 of the Revised Statutes provides that receipts for all moneys received by the Treasurer of the United States shall be endorsed upon warrants signed by the Secretary of the Treasury, without which warrants, so signed, no acknowledgment for money received into the Public Treasury shall be valid. The issuance of warrants by the Secretary of the Treasury, as provided by law, represents the formal covering of receipts into the Treasury.

Certificates of deposit covering actual deposits in Treasury offices and depositories, upon which covering warrants are based, cannot reach the Treasury simultaneously, and for that reason all receipts for a fiscal year cannot be covered into the Treasury by warrants of the Secretary immediately upon the close of that fiscal year. It is necessary to have all certificates of deposit before a statement can be issued showing the total receipts for a particular fiscal year on a warrant basis. The figures thus compiled and contained in this report are on a warrants issued basis. Table 2 for years prior to 1916 shows receipts on this basis.

**Warrants issued (expenditures).**—The Constitution of the United States provides that no money shall be drawn from the Treasury but in consequence of appropriations made by law. Section 305 of the Revised Statutes requires that the Treasurer of the United States shall disburse the moneys of the United States upon warrants drawn by the Secretary of the Treasury. As the warrants are issued by the Secretary they are charged against the appropriate appropriations provided by law. Some of these warrants do not represent actual pay-

ments to claimants, but are merely advances of funds to be placed to the credit of disbursing officers of the Government with the Treasurer of the United States for the payment of Government obligations. The disbursing officer then issues his check on the Treasurer in payment of such obligations. As far as the appropriation accounts are concerned, the warrants issued and charged thereto constitute expenditures, but it will be observed that such expenditures necessarily include unexpended balances to the credit of the disbursing officers.

**Checks issued (expenditures).—**This basis, more than any other, reflects the real expenditures of the Government. Expenditures for a given fiscal year on the basis of checks issued differ from the corresponding figures on the basis of warrants in that the former include expenditures made by disbursing officers from credits granted during the previous fiscal year, and exclude the amount of unexpended balances remaining to their credit at the end of the fiscal year. A detailed explanation of the basis of checks issued will be found on page 89 of the Secretary's report for 1927.

**Collections reported by collecting officers (receipts).—**Statements showing receipts on a collection basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as collectors of internal revenue and collectors of customs. These reports cover the collections actually made by these officers during the period specified. The collections are then deposited in a designated Government depository to the credit of the Treasurer of the United States, which depository renders a report to the Treasurer. The reports of the collecting officers and the depositaries do not, of course, coincide, for the reason that the collecting officers make collections during the last few days of the fiscal year which are not deposited until after the close of the fiscal year. For this reason the two reports do not agree. The receipts are reported on a collection basis merely for statistical purposes and to furnish information as to detailed sources of revenue. Classification of such items on the basis of deposits has been found to be impracticable and uneconomical. Table 7 shows receipts on a collection basis.

#### DESCRIPTION OF ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the general fund of the Treasury from which all expenditures are made. Receipts and expenditures, however, are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as contrasted with those effected through trust accounts. This classification was first shown for the warrants and checks-issued bases and on the daily Treasury statements beginning with the July 1, 1933, issue, in order to conform to the practice of the Bureau of the Budget. In some tables in this report, however, transactions in the three types of accounts are combined for purposes of historical comparison. A brief general explanation of the three classes of accounts is presented below.

**General accounts.**—The principal sources of general account receipts are income taxes, miscellaneous internal revenue, social security taxes, taxes upon carriers and their employees, and customs duties. In addition, a large number of miscellaneous receipts come under this head, including such items as proceeds of Government-owned securities (except those which are applicable to public debt retirement), sale of surplus and condemned property, Panama Canal tolls, fees (including consular and passport fees), fines, penalties, forfeitures, rentals, royalties, reimbursements, immigration head tax, sale of public land, seigniorage on coinage of subsidiary silver and minor coins, etc. Moneys represented in the general accounts may be withdrawn from the Treasury only in pursuance of appropriations made by Congress. There are five classes of appropriations payable through the general accounts of the Treasury, namely: (a) Annual, which are available for incurring obligations only during a specified fiscal year; (b) multiple-year, which are available for incurring obligations for a definite period in excess of one fiscal year; (c) continuing (no year), which are available for incurring obligations until exhausted or until the object for which appropriated has been accomplished; (d) permanent-specific, which are fixed amounts provided for each of a series of years by permanent legislation, without annual action of Congress; and (e) permanent-indefinite, which are indefinite amounts (so much as may be necessary) provided by permanent legislation without annual action

of Congress, such as the indefinite appropriation to cover interest on the public debt.

A statement of general account receipts and expenditures is, therefore, in the nature of a general operating statement, and gives a picture of the relationship between the general revenues of the Government and the operating expenditures (including capital outlays and fixed charges) chargeable against them.

**Special accounts.**—Special account receipts may be generally defined as funds received under special authorizations of law which may be expended only for the particular purposes specified therein. Special account receipts may not be used for the general expenditures of the Government. The more important items of receipts included under this heading, from the standpoint of amounts other than those applicable to the retirement of the public debt are the reclamation fund, Alaska Railroad fund, and Mineral Leasing Act under the Department of the Interior; and the national forest funds under the Department of Agriculture. There are many other special account receipts of lesser importance. Details of these accounts, which are summarized under miscellaneous receipts in table 103, are given in the Combined Statement of Receipts and Expenditures, and Balances.

**Trust accounts.**—Trust account receipts represent moneys received by the Government for the benefit of individuals or classes of individuals and are used for purposes specified in the trust. Moneys held in trust, being payable to or for the use of beneficiaries only, are not available for general expenditures of the Government. There are several classes of trust account receipts, the beneficiaries under which may be either individuals or groups of individuals. The accounts may represent (a) moneys received directly from or for account of individuals, as in the case of moneys received from foreign governments or other sources in trust for citizens of the United States or others under the act of February 27, 1896; (b) moneys collected as revenues and held in trust, such as the proceeds of sales of Indian lands which are held as interest-bearing funds for the benefit of Indian tribes; (c) proceeds of grants from the general accounts of the Treasury in pursuance of treaty or other obligations such as the perpetual trust fund created for the Ute Indians under section 5 of the act of June 15, 1880; (d) deposits, donations, or contributions for specified purposes, such as funds received for the purchase of lands in the national parks; and (e) deposits to be held until appropriate disposition thereof can be made, such as proceeds from the redemption of bonds found and whose owners are unknown.

**Checking accounts of Government corporations.**—Commencing with the fiscal year 1947, the practice of reporting net operations of wholly owned Government corporations and certain other business-type agencies on page 3 of the daily Treasury statement was discontinued and thereafter such transactions (except sales or redemptions of their obligations in the market) have been reflected on page 2 of the daily Treasury statement and are included in budget expenditures. Expenditures for corporations, the disbursements of which are not handled by the Division of Disbursement, Treasury Department, are reflected in the daily Treasury statement on the basis of checks paid by the Treasurer of the United States.

## FEDERAL FISCAL

market (net); increment on gold; seigniorage on silver; and miscellaneous funds and accounts. Figures exclude retirement of national bank notes chargeable against increment on gold (fiscal years 1935-39).

<sup>2</sup> Clearing account for outstanding checks and telegraphic reports from Federal Reserve Banks; excess of receipts, or expenditures (-).

<sup>3</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.

## RECEIPTS AND

TABLE 2.—Receipts and expenditures,

[On basis of warrants issued from 1789 to 1915, and on basis of daily Treasury statements for 1916 and sub 1930. Trust accounts excluded for 1931 and subse

NOTE.—For postal receipts and expenditures, see table 11. Figures are rounded to nearest dollar and will not necessarily add to totals.

<sup>1</sup> From 1789 to 1842 the fiscal year ended Dec. 31; from 1844 to date, on June 30. Figures for 1843 are for a half year, Jan. 1 to June 30.

<sup>2</sup> Comprises railroad unemployment insurance contributions, proceeds of Government-owned securities, Panama Canal tolls, etc., proceeds from sales of surplus property (act Oct. 3, 1944), deposits resulting from renegotiation of war contracts (see table 5), seigniorage, and other miscellaneous. For details of Panama Canal receipts, see table 10.

<sup>3</sup> Beginning in 1937, consists of total receipts less deduction for appropriation to Federal old-age and survivors insurance trust fund (net receipts under title VIII of Social Security Act).

<sup>4</sup> Excludes civil expenditures under War and Navy Departments in Washington through 1915. Department of the Army expenditures include rivers and harbors and Panama Canal. For details of Panama Canal expenditures, see table 10.

<sup>5</sup> Includes civil expenditures under War and Navy Departments in Washington through 1915; expenditures of Office of Secretary of Defense for 1948; unavailable funds charged off under act of June 3, 1922 (42 Stat. 1592); and expenditures for "Government corporations (wholly owned), etc. (net)" for 1932-48.

<sup>6</sup> Receipts and public debt retirements for 1921 exclude \$4,842,066.45 written off the public debt Dec. 31, 1920. See footnote 2, table 29.

<sup>7</sup> Beginning with 1932, tonnage tax has been covered into Treasury as miscellaneous receipts included in "Other receipts."

<sup>8</sup> Figures for 1940-47 have been revised to give effect to present classification of receipts for Federal old-age and survivors insurance trust fund. See footnote 3, table 5.

<sup>9</sup> Title was changed pursuant to act of July 26, 1947. Figures for Department of the Army include expenditures of Department of the Air Force from funds made available prior to fiscal year 1949. Expenditures for Office of the Secretary of Defense are included in "All other".

<sup>10</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.

<sup>11</sup> The practice of including statutory debt retirements in budget expenditures was discontinued effective with fiscal year 1948. Table 29 shows details of statutory debt retirements.

TABLE 3.—Budget receipts and expenditures, in detail, monthly for fiscal year 1948 and totals for 1947 and 1948

[On basis of daily Treasury statements, see p. 393]

TABLE 3.—Budget receipts and expenditures, in detail, monthly for fiscal year 1948 and totals for 1947 and 1948—Continued

	Fiscal year 1948						
	July 1947	August 1947	September 1947	October 1947	November 1947	December 1947	January 1948
Budget surplus, or deficit (—), excluding transfer to F. E. C. trust fund <sup>20</sup>	—\$1,271,954,816.57	—\$523,802,402.00	\$1,939,506,231.59	—\$55,115,560.33	\$548,915,478.04	\$1,021,641,751.51	\$1,395,818,432.40
Budget surplus, or deficit (—), including transfer to F. E. C. trust fund <sup>20</sup>	—1,271,954,816.57	—523,802,402.00	1,939,506,231.59	—55,115,560.33	548,915,478.04	1,021,641,751.51	1,395,818,432.40

	Fiscal year 1948					Total fiscal year 1948	Total fiscal year 1947
	February 1948	March 1948	April 1948	May 1948	June 1948		
Budget surplus, or deficit (—), excluding transfer to F. E. C. trust fund <sup>20</sup>	\$1,934,334,680.01	\$2,788,326,000.17	—\$302,067,193.94	\$102,772,733.44	\$841,094,509.49	\$8,419,469,843.81	\$753,787,660.28
Budget surplus, or deficit (—), including transfer to F. E. C. trust fund <sup>20</sup>	1,934,334,680.01	2,788,326,000.17	—302,067,193.94	102,772,733.44	—2,158,905,490.51	5,419,469,843.81	753,787,660.28

<sup>a</sup> Counter-entry receipts (deduct).

<sup>b</sup> Excess of credits (deduct).

<sup>1</sup> Includes \$143,027,000 representing proceeds of sale of the war emergency pipe lines by the War Assets Administration.

<sup>2</sup> Includes \$360,000,000 in December 1947, \$150,000,000 in February 1948, \$70,000,000 in March 1948, \$50,000,000 in April 1948, and \$120,000,000 in June 1948 representing proceeds of ship sales finally allocable to surplus property receipts, which have been carried in trust accounts pending final determination.

<sup>3</sup> Includes adjustment in the amount of \$70,368,844.13 representing collections by Farmers' Home Administration of principal and interest on loans, which were formerly classified as reductions of expenditures under "Agriculture Department: Farmers' Home Administration: Farmer's crop loans, etc." and are now classified as "Other miscellaneous receipts: Proceeds of Government-owned securities: Other."

<sup>4</sup> See footnote 3, table 5.

<sup>5</sup> Includes \$209,827,810.45 on account of accumulated earnings of War Damage Corporation. Since this amount was merely a transfer of money from the account of Reconstruction Finance Corporation to miscellaneous receipts account of Treasury, a corre-

in previous expenditures of Commodity Credit Corporation. Similar payments during 1947 amounted to \$17,875,601.67, \$32,000,000 and \$230,388,000 of these payments were repaid by Commodity Credit Corporation during 1948 and 1947, respectively, through May to lend-lease funds of Agriculture Department.

<sup>11</sup> Includes \$500,000 subscription to paid-in surplus of Federal Intermediate Credit Bank, Columbia, S. C., from revolving fund provided therefor by Farm Credit Act as amended.

<sup>12</sup> Obligations of War Shipping Administration, incurred prior to January 1, 1947, are paid by Secretary of the Treasury pursuant to Public Law 299, approved July 31, 1947.

<sup>13</sup> Expenditures of Department of the Air Force are currently being made from Army appropriations, pending transfer of funds pursuant to act of July 26, 1947.

<sup>14</sup> Administrative expenses in carrying out provision of act are included under "Other."

<sup>15</sup> Represents expenditures from appropriation for fiscal year 1948. Expenditures for this activity from prior years appropriations are included in classification "Department of the Army: Military Functions: Other."

<sup>16</sup> Includes transactions on account of Federal National Mortgage Association, Office of Defense Plants, Office of Defense Supplies, Office of Metals Reserve, Office of Rubber

spending amount appears as expenditures of Reconstruction Finance Corporation, below.

<sup>6</sup> Includes \$60,000,000 allocable to sales of surplus property which has been carried in special deposit accounts pending final determination.

<sup>7</sup> Includes \$266,695,250.41 on account of retirement of capital stock, Federal Deposit Insurance Corporation.

<sup>8</sup> Includes \$17,693,492.14 representing deposits of excess capital by Commodity Credit Corporation based upon appraisal of its assets and liabilities as of June 30, 1947.

<sup>9</sup> Expenditures are "net," after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into Treasury. When such credits exceed expenditures the items are indicated by the prefix "b." Sales and redemptions in market of obligations of Government corporations are shown in table 4.

<sup>10</sup> Payments of \$1,453.05 have been made during fiscal year 1948 through May 31 by Agriculture Department to Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with lend-lease program and reflected

Reserve, RFC Mortgage Company (prior to July 1, 1947), U. S. Commercial Company, and War Damage Corporation.

<sup>17</sup> Does not include expenditures from direct appropriations for expenses of disposal in foreign areas.

<sup>18</sup> The accounts for which special issues are held are shown in the Monthly Public Debt Statement, appearing on pages 5, 8, and 9 of the Daily Statement of the United States Treasury, for the first business day of each month. Some of such accounts also hold marketable obligations, the interest on which is included in public issues on the line above.

<sup>19</sup> Exclusive of statutory debt retirements from sinking fund. Such retirements amount to \$746,379,700 in 1948.

<sup>20</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.

TABLE 4.—Trust accounts, etc., monthly receipts and expenditures, in detail, for fiscal year 1948 and totals for 1947 and 1948

[On basis of daily Treasury statements, see p. 393]

<sup>1</sup> Counter-entry receipts (deduct).

<sup>2</sup> Excess of redemptions (deduct).

<sup>3</sup> Excess of credits (deduct).

<sup>4</sup> Represents appropriations equal to "Social security—employment taxes" collected and deposited as provided under sec. 201 (a) of Social Security Act Amendments of 1939. See also footnote 3, table 5.

<sup>5</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.

<sup>6</sup> This item of seigniorage represents difference between cost value and monetary value of silver bullion revalued and held to secure silver certificates issued on account of silver acquired under Silver Purchase Act of 1934.

<sup>7</sup> See footnote 1, table 6.

<sup>8</sup> Represents reimbursement for certain administrative expenses which are not paid directly from trust fund but are met out of general fund appropriations.

<sup>9</sup> Includes accrued interest purchased on investments.

<sup>10</sup> Includes \$365,000 transferred to Federal Security Agency to cover penalty mail costs.

<sup>11</sup> Includes repayments on account of interest on bonds at time of purchase.

<sup>12</sup> See footnote 2, table 3.

<sup>13</sup> See footnote 6, table 3.

<sup>14</sup> This clearing account for outstanding checks and telegraphic reports is used to enable the Treasurer to charge budget expenditures immediately upon receipt of advices concerning the issuance of checks by various disbursing officers of Treasury Department, and also to enable the Treasurer to reflect transactions in his cash assets on basis of telegraphic reports received from Federal Reserve Banks. When Bank transcripts are received, the items concerned are cleared from this account.

NOTE.—Figures are rounded and will not necessarily add to totals.

\* Less than \$500,000.

<sup>1</sup> Expenditures exclude statutory debt retirements; and include net expenditures of Government corporations (wholly owned), etc., under appropriate classifications, instead of separately as in 1947 annual report.<sup>2</sup> Includes so-called voluntary returns.<sup>3</sup> Figures for 1940-47 have been revised in accordance with present classification of these items in daily Treasury statements. Reimbursements for those administrative expenses which are not paid directly from Federal old-age and survivors insurance trust fund (cost of collecting employment taxes, etc.) are now classified as trust fund expenditures rather than the former treatment as a deduction from trust fund receipts. Total budget receipts are increased by this revision since reimbursements for administrative expenditures are reflected in miscellaneous receipts. Net receipts are unaffected, however, since appropriation to Federal old-age and survivors insurance trust fund is now stated on a gross basis rather than net after reimbursement.<sup>4</sup> Effective September 1, 1946, expenditures of War Shipping Administration are included with expenditures of U. S. Maritime Commission.<sup>5</sup> Expenditures of Reconstruction Finance Corporation and affiliates for activities other than for national defense and related activities are included under "Other expenditures: Miscellaneous". National defense and related activities expenditures for 1948 are not segregated from other expenditures.<sup>6</sup> Beginning July 1, 1946, consists of expenditures for Office of Selective Service Records; beginning March 1948, expenditures for Office of Secretary of Defense are also included.<sup>7</sup> Comprises Department of Agriculture expenditures, except those for UNRRA, surplus property disposal, other national defense and related activities prior to July 1947; international finance and aid; and forest roads and trails, included under "Public works", in this table.<sup>8</sup> Comprises budget expenditures under Social Security, Railroad Retirement, and Railroad Unemployment Insurance Acts. Refunds of taxes collected under provisions of these acts are included in "Refunds of taxes and duties" above.<sup>9</sup> Comprises expenditures of Federal Works Agency except those for surplus property disposal, other national defense and related activities prior to July 1947, and assistance to Greece and Turkey. Includes also forest roads and trails, rivers and harbors and flood control, reclamation projects, and Tennessee Valley Authority.<sup>10</sup> Comprises expenditures of Civil Works Administration, Work Projects Administration, National Youth Administration, and Civilian Conservation Corps.<sup>11</sup> Includes expenditures for executive departments not included elsewhere and for legislative and judicial functions; Government contributions to Federal employees' retirement; Civil Aeronautics; Panama Canal, except war expenditures; Post Office deficiency; and other miscellaneous.<sup>12</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.<sup>13</sup> Includes expenditures of Department of the Air Force for 1948.

NOTE.—Figures are rounded and will not necessarily add to totals.

\* Less than \$500,000.

<sup>1</sup> Figures have been revised in accordance with classifications in daily Treasury statement beginning Dec. 1, 1947. Reimbursements for those administrative expenses which are not paid directly from Federal old-age and survivors insurance trust fund (cost of collecting employment taxes, etc.) are now classified as trust fund expenditures rather than the former treatment as deductions from trust fund receipts.

<sup>2</sup> Consists of Alaska Railroad, Canal Zone, civil service, and foreign service retirement funds.

<sup>3</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.

<sup>4</sup> Comprises District of Columbia, Indian tribal funds, insular possessions, increment resulting from reduction in weight of gold dollar, seigniorage on silver, etc.

<sup>5</sup> Revised, see footnote 1.

<sup>6</sup> Comprises District of Columbia, Indian tribal funds, expenditures chargeable against increment on gold, etc.

NOTE.—Figures for 1935 and subsequent years exclude trust fund collections with the exception noted in footnote 3. Figures are rounded to nearest dollar and will not necessarily add to totals.

<sup>1</sup> For figures for 1863-1915, see 1929 annual report, p. 419; and for 1916-28, see 1947 annual report, p. 310.

<sup>2</sup> Includes collections from Victory tax.

<sup>3</sup> Includes income tax on Alaska Railroad except for 1935, 1936, and 1937, when these collections were credited to trust accounts.

<sup>4</sup> Includes unjust enrichment tax through 1947; for 1948, included under "Miscellaneous taxes: All other".

<sup>5</sup> Originally schedule A, act of Oct. 22, 1914; now includes also foreign insurance policies and passage tickets (the latter repealed Apr. 1, 1947).

<sup>6</sup> Includes taxes on sales under act of Oct. 22, 1914; manufacturers', consumers', and

dealers' excise taxes under war revenue and subsequent acts; and for 1932 and subsequent years, manufacturers' excise taxes under act of 1932, as amended. Soft drink taxes are included under "Miscellaneous taxes: All other".

<sup>7</sup> Any differences between figures in this column and those published elsewhere on the same basis are due to different classifications of repealed taxes and other minor items.

<sup>8</sup> Includes collections from sources other than the miscellaneous taxes shown, and also (a) certain delinquent taxes collected under repealed laws, except automobile taxes for 1929 and 1930 which are included under "Manufacturers' excise taxes: All other", and capital stock taxes for 1929 and 1930 which are shown under "Capital stock"; (b) internal revenue collected through customs offices for 1929-33; subsequently such collections are included with "Distilled spirits"; (c) dividend and soft drink taxes; (d) taxes paid by manufacturers of and dealers in adulterated and process or renovated butter, mixed flour, and filled cheese; and (e) for 1948, unjust enrichment tax, formerly included with excess profits taxes.

The current tables on internal revenue collections by States and on expenses of the Internal Revenue Service, published heretofore in the Secretary's annual report, will be found in the Annual Report of the Commissioner of Internal Revenue.

TABLE 8.—*Customs collections<sup>1</sup> and refunds, fiscal years 1947 and 1948*

Total, refunds of taxes.....	73,648,593.65	8,826,575.59	7,614,218.03	10,90,089,387.27
Transfers to trust accounts:				
Federal old-age and survivors in- surance trust fund (salaries and expenses).....		375,000.00	700,000.00	1,075,000.00
Railroad retirement account <sup>4</sup> .....	1,717,601,000.00	298,463,000.00	758,488,498.50	2,774,552,498.50
Railroad Unemployment Insur- ance Administration fund trans- fers to unemployment trust fund (act of Oct. 10, 1940).....	47,648,850.00	9,214,985.00	9,650,100.00	66,513,935.00
Railroad unemployment insur- ance account: <sup>5</sup>				
Advance (act of June 25, 1938).....	15,000,000.00			15,000,000.00
Repayment of advance.....	15,000,000.00			15,000,000.00
Total, transfers to trust ac- counts.....	1,765,249,850.00	308,052,985.00	768,838,598.50	2,842,141,433.50
Total expenditures.....	6,135,989,202.22	1,074,583,501.15	1,626,328,192.56	8,836,900,895.93

<sup>1</sup> Excess of credits (deduct).<sup>2</sup> Revised, see footnote 3, table 5.<sup>3</sup> Relates to old-age insurance benefits.

<sup>4</sup> Second Deficiency Appropriation Act, fiscal year 1938, approved June 25, 1938, carried an appropriation of \$40,561,886.43 pursuant to authorization of Aug. 24, 1937, for making refund to certain States of portions of Federal employees' tax for 1936 collected under Social Security Act. Also Railroad Unemployment Insurance Act, approved June 25, 1938, appropriated to Railroad Unemployment Insurance Administration fund amounts collected or to be collectible with respect to calendar years 1936-39, from carriers subject to the act under sec. 901 of Social Security Act.

<sup>5</sup> Relates to unemployment insurance benefits.

<sup>6</sup> These contributions represent 10 percent of amounts collected under sec. 8 of Railroad Unemployment Insurance Act, which, in addition to other collections referred to in footnote 2, are appropriated to Railroad Unemployment Insurance Administration fund for administrative expenses of Railroad Retirement Board in administering act.

<sup>7</sup> Represents appropriations equal to "Social security employment taxes" collected and deposited as provided under sec. 201 (a) of Social Security Act Amendments of 1939.

<sup>8</sup> Includes amounts for administrative expenses reimbursed to general fund of Treasury under sec. 201 (f) of Social Security Act, as amended, and beginning July 1, 1940, also includes expenses for administration of Wagner-Peyser Act.

<sup>9</sup> Includes expenditures from appropriations made specifically for administrative expenses, relating to Social Security and Railroad Retirement Acts. Does not include administrative expenses payable from other appropriations. Principal agencies in latter group are Bureau of Internal Revenue of Treasury Department and Public Health Service and Office of Education of Federal Security Agency (see also footnote 10).

<sup>10</sup> Under Labor-Federal Security Appropriation Act, 1947, salaries and expenses for Bureau of Old-Age and Survivors Insurance are payable directly from Federal old-age and survivors insurance trust fund. Prior to July 1, 1946, such payments were included under this caption with reimbursement therefrom from trust fund to general fund of Treasury.

<sup>11</sup> Includes expenditures under Social Security Act by Department of Labor through July 31, 1946.

<sup>12</sup> Amounts are net of reimbursement for administrative expenses under sec. 201 (f) of Social Security Act, as amended.

<sup>13</sup> See explanation in footnotes 2 and 4.

<sup>14</sup> Includes expenditures made directly by Federal Government beginning Jan. 1, 1942, for maintenance of public employment offices.

<sup>15</sup> Beginning July 1, 1945, payments previously made under Social Security Act were discontinued and thereafter made under provisions of Public Health Service Act of 1944.

<sup>16</sup> Classified as "Executive Office: Office for Emergency Management, War Manpower Commission" through July 31, 1946.

<sup>17</sup> These classifications were effective January 1940; figures are shown on basis of checks issued as reported by Bureau of Internal Revenue.

<sup>18</sup> Includes interest refunded as follows: Employment taxes, \$1,242,066.45; taxes on employers of 8 or more (refunds to others), \$1,043,096.43; refunds of taxes upon carriers and their employees, \$241,839.10.

TABLE 10.—Panama Canal receipts and expenditures, fiscal years 1903–48

<sup>0</sup> Excess of credits (deduct).<sup>1</sup> Beginning with the fiscal year 1924, the amounts in this column include the sums received as dividends on capital stock of the Panama Railroad owned by the United States.<sup>2</sup> The amounts shown in this column include the payments to the Government of Panama under the treaty of Nov. 18, 1903, of \$250,000 per annum, the first payment being made during the fiscal year 1913, and similar payments continuing each year since that date until 1940, when the amount was increased to \$430,000 per annum, and also include for 1940 the amount of \$2,580,000 for payments from 1934 to 1939, inclusive, at the rate of \$430,000 per annum pursuant to the treaty of Mar. 2, 1936; but do not include the payment to the Government of Colombia growing out of the construction of the Panama Canal of \$5,000,000 per annum during the fiscal years 1923 to 1927, inclusive, an aggregate sum of \$25,000,000 as provided for under the treaty of Apr. 6, 1914. Includes expenses of civil government, Panama Canal and Canal Zone.<sup>3</sup> Includes expenditures made from specific appropriations for fortifications of the Canal but no expenditures from general appropriations that may have been for this purpose.<sup>4</sup> For details for the fiscal years 1903 through 1920 see annual report for 1944, p. 585.

NOTE.—Figures are rounded to nearest dollar and will not necessarily add to totals.

<sup>1</sup> For figures from 1789 through 1910, see Secretary's annual report for 1946, p. 419.

<sup>2</sup> Postal expenditures include adjusted losses, etc.—postal funds and expenditures from postal balances, but are exclusive of departmental expenditures in Washington, D. C., to the close of fiscal year 1922, and amounts transferred to the civil service retirement and disability fund, fiscal years 1921 to 1926, inclusive. For 1927 and subsequent years salary deductions are included in "Postal expenditures," the deductions having been paid to and deposited by disbursing clerks for credit of the retirement fund.

<sup>3</sup> See explanation in exhibit 45.

<sup>4</sup> On basis of warrants issued for 1914 and 1915, and on basis of daily Treasury statements from 1916 to date.

<sup>5</sup> On basis of warrants issued prior to 1922 and on basis of daily Treasury statements for 1922 and thereafter. Represents advances from the general fund of the Treasury to the Postmaster General to meet deficiencies in the postal revenues. These figures do not include any allowances for offsets on account of extraordinary expenditures or the cost of free mailings contributing to the deficiency of postal revenues certified to the Secretary of the Treasury by the Postmaster General pursuant to the act of Congress approved June 9, 1930. Excludes amounts transferred to the civil service retirement and disability fund under act of May 22, 1920 (41 Stat. 614), and amendments thereto on account of salary deductions of 2½ percent, as follows: 1921, \$6,519,683.59; 1922, \$7,899,006.28; 1923, \$8,284,081.00; 1924, \$8,679,658.60; 1925, \$10,266,977.00; and 1926, \$10,472,289.59. See note 2. Actual advances from general fund are reduced by repayments from prior year advances which are carried to surplus.

<sup>6</sup> Exclusive of general fund payments from the appropriation "Additional compensation, Postal Service" under authority of the act approved Nov. 8, 1919. In the amounts of \$35,698,400, \$1,374,015, and \$6,700 for 1920, 1921, and 1922, respectively.

<sup>7</sup> Repayment of unexpended portion of prior years' advances.

TABLE 12.—*Receipts from sales of public lands, and expenditures for Indians and veterans' pensions, fiscal years 1789-1948*

(On basis of warrants issued from 1789 to 1930, and on basis of checks issued for 1931 and subsequent years, see p. 393)

<sup>1</sup> From 1789 to 1842 the fiscal year ended Dec. 31; from 1844 to date, on June 30. Figures for 1843 are for a half year, Jan. 1 to June 30.

<sup>2</sup> Excludes interest accounts which are included in trust fund expenditures.

<sup>3</sup> Represents expenditures under appropriation "Army and Navy pensions," administered by Veterans' Administration.

# PUBLIC DEBT, GUARANTEED OBLIGATIONS, CONTINGENT LIABILITIES, ETC.

Outstanding public debt, guaranteed obligations, contingent liabilities, etc.

TABLE 13.—Principal of the public debt, June 30, 1853-1948 <sup>1</sup>

[On basis of Public Debt accounts from 1853 through 1919, and on basis of daily Treasury statements from 1920 to date, see p. 393.]

June 30	Interest-bearing <sup>2</sup>	Matured	Noninterest-bearing <sup>3</sup>	Total gross debt	Gross debt per capita

<sup>1</sup> Revised in accordance with Bureau of the Census estimated population for continental United States as of July 1.

<sup>2</sup> Figures for 1853 through 1885, are taken from "Statement of receipts and expenditures of the Government from 1855 to 1885 and principal of public debt from 1791 to 1885," compiled from the official records of the Register's office. From 1886 through 1919 figures are taken from the monthly debt statements and revised figures published in the annual reports of the Secretary of the Treasury. (See table 24, p. 507, in 1942 report). From 1920 to date, figures are taken from the Preliminary Statement of the Public Debt published in the daily Treasury statements.

<sup>3</sup> Exclusive of the bonds issued to the Pacific railways (provision having been made by law to secure the Treasury against both principal and interest) and the Navy pension fund (which was in no sense a debt, the principal being the property of the United States).

<sup>4</sup> Includes old demand notes; United States notes (gold reserve deducted since 1900); postal currency and fractional currency less the amounts officially estimated to have been destroyed; deposits held by the Treasury for the retirement of Federal Reserve Bank notes, and for national bank notes of national banks failed, in liquidation, and reducing circulation, which prior to 1890 were not included in the published debt statements; and also special notes of U. S. issued to International Bank for Reconstruction and Development and International Monetary Fund. Does not include gold, silver, or currency certificates, or Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

TABLE 14.—Public debt and guaranteed obligations, June 30, 1934-48

June 30	Gross public debt	Guaranteed obligations <sup>1</sup>			Total gross public debt and guaranteed obligations

NOTE.—Gross public debt on basis of daily Treasury statements. Guaranteed obligations from 1934 through 1939 on basis of Public Debt accounts, and for 1940 and subsequent years on basis of daily Treasury statements. Figures, except per capita, are rounded to nearest dollar and will not necessarily add to totals.

<sup>1</sup> Consists of obligations issued by certain Government corporations and credit agencies, obligations which are guaranteed by the United States as to both principal and interest. They were first authorized in 1932, but no such obligations were outstanding at the end of the fiscal years 1932 and 1933. Excludes guaranteed obligations held by the Treasury.

<sup>2</sup> Based on Bureau of the Census estimated population for continental United States as of July 1 of each year.

NOTE.—Figures are rounded and will not necessarily add to totals. For information on composition of public debt beginning June 30, 1916, see 1947 annual report, p. 361.

<sup>1</sup> Less than \$500,000.

<sup>2</sup> For explanation, see footnote 5, table 102.

<sup>2</sup> Sales of these stamps commenced May 1, 1941, as a special defense series of postal savings stamps, which were obligations of Postal Savings System. Beginning Oct. 1, 1942, this special series was replaced by a Treasury issue of United States war savings stamps, and all outstanding stamps became public debt obligations.

Less gold reserve.....	346,681,016.00		346,681,016.00
National bank notes (redemption account) (The act of July 14, 1890 (26 Stat. 289), provides that balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks and all deposits thereafter received for like purpose shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption, and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public debt statement as debts of the United States bearing no interest. Authorized to be outstanding at one time, indefinite)			150,039,430.93
Thrift and Treasury savings stamps, unclassified sales, etc			458,678,851.50
Total debt bearing no interest.....			3,726,082.50
			1,949,241,870.10

Gross debt (including \$2,788,924,354.98 debt incurred to finance expenditures of Government corporations for which obligations of such corporations are held by the Treasury)			252,308,769,920.09
Guaranteed obligations not owned by the Treasury			68,000,085.32
Total gross public debt and guaranteed obligations			252,376,770,005.41

<sup>1</sup> Sept. 24, 1917, as amended.

<sup>2</sup> Aug. 5, 1909, Feb. 4, 1910, and Mar. 2, 1911.

<sup>3</sup> June 25, 1910.

<sup>4</sup> Various.

<sup>5</sup> Treasury bills are noninterest-bearing and are sold on a discount basis on competitive bids for each issue. Average sale price of these series gives an approximate yield on a bank discount basis (360 days a year) as indicated opposite each issue of bills. This yield differs slightly from yield on true discount basis (365 days a year) which is shown in table 19.

<sup>6</sup> Redeemable, at par and accrued interest, to date of payment, at any time upon death of owner at option of the duly constituted representative of the deceased owner's estate, provided entire proceeds of redemption are applied to payments of Federal estate taxes due from deceased owner's estate.

<sup>7</sup> Amounts issued and retired for Series C to F, inclusive, include accrued discount; amounts outstanding are stated at current redemption values. Amounts issued, retired, and outstanding for Series G are stated at par value.

<sup>8</sup> Deduct.

<sup>9</sup> For detailed information and amounts outstanding June 30, 1929, see table 24 in 1929 annual report, p. 456.

<sup>10</sup> Includes amounts authorized to be outstanding at present time and amounts issued on deposits including reissues.

<sup>11</sup> After deducting amounts officially estimated to have been lost or irrevocably destroyed.

<sup>12</sup> For summary on basis of daily Treasury statement, see table 19.

#### TAX EXEMPTIONS:

\* Any income derived from Treasury bills, whether interest or gain from their sale or other disposition, does not have any exemption, as such, and loss from the sale or other disposition of any such bills does not have any special treatment, as such, under the Internal Revenue Code or laws amendatory or supplementary thereto. Bills are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which bills are originally sold by the United States is to be considered to be interest.

\* Income derived from these securities is subject to all Federal taxes now or hereafter imposed. Securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. The following is applicable to savings bonds only: For purposes of taxation, any increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at or before maturity) shall be considered as interest.

\* Exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds authorized by the act approved Sept. 24, 1917, as amended, the principal of which does not exceed in the aggregate \$5,000 owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above. The following is applicable to savings bonds only: For purposes of determining taxes and tax exemptions the increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at or before maturity) shall be considered as interest.

\* Exempt from the payment of all taxes or duties of the United States, as well as from all taxation in any form by or under State, municipal, or local authority. (The Supreme Court has held that this exemption does not extend to estate or inheritance taxes imposed by Federal or State authority.)

\* Interest on these bonds is subject to all Federal taxes now or hereafter imposed. Principal is exempt from taxation.

\* These issues, being investments of various Government funds and payable only for the account of such funds, have no present tax liability.

**In hands of foreign holders—Applicable only to securities issued prior to Mar. 1, 1941:** Bonds, notes, and certificates of indebtedness of the United States, shall, while beneficially owned by a nonresident alien individual, or a foreign corporation, partnership, or association, not engaged in business in the United States, be exempt, both as to principal and interest from any and all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority.

#### MEMORANDUM RELATING TO OTHER OBLIGATIONS

Obligations of the United States payable on presentation:	Amount
Matured interest obligations outstanding	\$151,787,910.79

Total based on guarantees						<sup>10</sup> 73,460,818.47	464,610.98	73,925,429.45

- <sup>1</sup> Obligations listed are unconditionally guaranteed as to principal and interest.
- <sup>2</sup> For obligations held by Treasury and reflected in the public debt, see table 22.
- <sup>3</sup> Does not include accrued interest.

<sup>4</sup> Income derived from these securities is subject to all Federal taxes, now or hereafter imposed. Securities are subject to surtaxes, estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on principal or interest thereof by any State, municipality, or local taxing authority.

<sup>5</sup> Represents drafts and invoices as of May 31, 1948, paid by commercial banks for account of Commodity Credit Corporation.

<sup>6</sup> National Housing Act as amended by National Housing Act Amendments of 1938, approved Feb. 3, 1938, reads in part as follows: "Such debentures as are issued in exchange for property covered by mortgages insured under sec. 203 or sec. 207 prior to the date of enactment of the National Housing Act Amendments of 1938 shall be subject only to such Federal, State, and local taxes as the mortgages in exchange for which they are issued would be subject to in the hands of the holder of the debentures. \* \* \* Such debentures as are issued in exchange for property covered by mortgages insured after the date of enactment of the National Housing Act Amendments of 1938 shall be exempt, both as to principal and interest from all taxation (except surtaxes, estate, inheritance, and gift taxes) now or hereafter imposed by the United States, by any Territory, dependency, or

possession thereof, or by any State, county, municipality, or local taxing authority." Under Public Debt Act of 1941 interest upon and gain from sale of debentures shall have no exemption under Federal tax acts now or hereafter enacted, except such debentures as may be issued on contracts entered into prior to Mar. 1, 1941.

<sup>7</sup> With reference to debentures issued prior to Mar. 1, 1941, in name of housing insurance fund, the National Housing Act Amendments of 1938, approved Feb. 3, 1938, states that "Such debentures as are issued in exchange for mortgages insured after the date of enactment of the National Housing Act Amendments of 1938 shall be exempt, both as to principal and interest, from all taxation (except surtaxes, estate, inheritance, and gift taxes) now or hereafter imposed by the United States, by any Territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority." Under Public Debt Act of 1941 interest upon and gain from sale of debentures shall have no exemption under Federal tax acts now or hereafter enacted, except such debentures as may be issued on contracts entered into prior to Mar. 1, 1941.

<sup>8</sup> Redeemable on any interest day or days, on 3 months' notice.

<sup>9</sup> Funds have been deposited with Treasurer of the United States for payment of outstanding matured principal and interest.

<sup>10</sup> Amount outstanding on basis of Public Debt accounts is shown in table 19.]

OTHER OBLIGATIONS								
Federal Reserve notes (face amount), act of Dec. 23, 1913, as amended. <sup>7</sup>								\$23,054,407,368.46

<sup>1</sup> Does not include contingent liability on guaranteed and insured loans to veterans which, as of June 30, 1947, amounted to \$2,216,908,899.45; also does not include contingent liability on war production and contract termination guaranteed loans of the Department of the Army which, as of May 31, 1948, amounted to \$1,599,329.45, the latest figures available for inclusion in the June statement published in the July 1, 1948, daily Treasury statement.

<sup>2</sup> The faith of the United States is solemnly pledged to payment of deposits made in postal savings depository offices with accrued interest thereon.

<sup>3</sup> Under Public Debt Act of 1941, income derived from deposits made subsequent to Mar. 1, 1941, is subject to all Federal taxes.

<sup>4</sup> Interest payable quarterly from first day of month next following date of deposit.

<sup>5</sup> Figures are as of Mar. 31, 1948, the latest available for inclusion in the June statement published in the July 1, 1948, daily Treasury statement. Offset by cash in designated depository banks amounting to \$5,759,730.90, which is secured by pledge of collateral as provided in Regulations of the Postal Savings System, having face value of \$5,890,950; cash in possession of System amounting to \$178,570,799.30; Government securities with face value of \$3,344,558,210; and other net assets of \$18,999,601.18.

<sup>6</sup> Figures are as of May 31, 1948, the latest available for inclusion in the June statement published in the July 1, 1948, daily Treasury statement. Offset by cash on hand and in depository banks amounting to \$9,779.97; Government securities with face value of \$9,850,000; and other assets.

<sup>7</sup> Federal Reserve notes are obligations of the United States and shall be receivable by all national and member banks and Federal Reserve Banks and for all taxes, customs, and other public dues. They are redeemable in lawful money on demand at the Treasury Department, in Washington, D. C., or at any Federal Reserve Bank.

<sup>8</sup> Figures are as of May 31, 1948, the latest available for inclusion in the June statement published in the July 1, 1948, daily Treasury statement. In actual circulation, exclusive of \$620,723,531.54 redemption fund deposited in the Treasury and \$771,549,805 of their own Federal Reserve notes held by issuing banks. Collateral security for Federal Reserve notes issued consists of \$13,229,000,000 in gold certificates and in credits with Treasurer of the United States payable in gold certificates, \$11,225,000,000 face amount of United States Government securities, and \$97,368,000 face amount of commercial paper. Notes issued by a Federal Reserve Bank are a first lien against the assets of such bank.

TABLE 24.—Statutory limitation on the public debt and guaranteed obligations, June 30, 1948

[In millions of dollars]

## PART I. STATUS UNDER LIMITATION, JUNE 30, 1948

	Amount
Maximum amount of securities which may be outstanding at any one time, under limitations imposed by section 21 of the Second Liberty Bond Act, as amended.....	275,000
Amount of securities outstanding subject to such statutory debt limitation:	
U. S. Government securities issued under the Second Liberty Bond Act, as amended.....	251,468
Guaranteed obligations (excluding those held by the Treasury).....	73
Total amount of securities outstanding subject to statutory debt limitation.....	251,542
Balance issuable under limitation.....	23,458

## PART II. APPLICATION OF LIMITATION TO PUBLIC DEBT AND GUARANTEED OBLIGATIONS OUTSTANDING JUNE 30, 1948

Class of security	Subject to statutory debt limitation	Not subject to statutory debt limitation	Total outstanding
Public debt:			
Interest-bearing securities:			
Marketable:			
Treasury bills.....	13,757		13,757
Certificates of indebtedness.....	22,588		22,588
Treasury notes.....	11,375		11,375
Treasury bonds—bank-eligible.....	62,826		62,826
Treasury bonds—bank-restricted.....	49,636		49,636
Postal savings and Panama Canal bonds.....		164	164
Total marketable.....	160,182	164	160,346
Nonmarketable:			
U. S. savings bonds (current redemption value).....	53,274		53,274
Treasury savings notes.....	4,394		4,394
Depository bonds.....	316		316
Armed forces leave bonds.....	563		563
Treasury bonds, investment series.....	959		959
Total nonmarketable.....	59,506		59,506
Special issues to Government agencies and trust funds.....	30,211		30,211
Total interest-bearing securities.....	249,899	164	250,063
Matured debt on which interest has ceased.....	275	5	280
Debt bearing no interest:			
United States savings stamps.....	58		58
Excess profits tax refund bonds.....	9		9
Special notes of the United States:			
International Monetary Fund series.....	1,161		1,161
International Bank for Reconstruction and Development series.....	66		66
United States notes (less gold reserve).....		191	191
Deposits for retirement of national bank and Federal Reserve Bank notes.....		459	459
Other debt bearing no interest.....		6	6
Total debt bearing no interest.....	1,294	655	1,949
Total public debt.....	251,468	824	252,292
Guaranteed obligations (excluding those held by the Treasury):			
Interest-bearing.....	69		69
Matured.....	5		5
Total guaranteed obligations.....	73		73
Total public debt and guaranteed obligations.....	251,542	824	252,366

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Issues which commercial banks may not acquire prior to a specified date (with minor exceptions). See footnote 5, table 102.

<sup>1</sup> On basis of daily Treasury statements, supplemented by special statements on public debt issues, redemptions, and exchanges by Bureau of the Public Debt.

<sup>2</sup> For Treasury bills, average rates on bank discount basis are shown; for United States savings bonds, approximate yield to maturity is shown.

<sup>3</sup> For United States savings bonds of Series C to F not currently on sale, amounts represent accrued discount plus issue price of bonds in adjustment cases; for Series E and F currently on sale, amounts represent issue price plus accrued discount; and for Series G, amounts represent issue price at par.

<sup>4</sup> For United States savings bonds of Series C to F, amounts represent current redemption value (issue price plus accrued discount); and for Series G, amounts represent redemption value at par.

<sup>5</sup> Includes securities of certain issue months which have matured.

<sup>6</sup> Deduct. Represents excess of amounts transferred from unclassified sales and redemptions to sales and redemptions of a designated series over amounts received as unclassified sales and redemptions.

<sup>7</sup> Deduct.

## SUMMARY OF CHANGES IN THE PUBLIC DEBT, FISCAL YEARS 1916-48

[In millions of dollars]

Increase in debt on account of—		
Excess of expenditures in certain years.....	265,745.1	
Net increase in general fund balance.....	4,773.9	270,519.0
Decrease in debt on account of—		
Statutory debt retirements.....	9,097.7	
Retirements from surplus receipts in certain years.....	10,320.6	19,418.3
Net increase in debt since June 30, 1915.....		251,100.8
Public debt:		
As of June 30, 1915.....	1,191.4	
As of June 30, 1948.....	252,292.2	
Net increase, as above.....		251,100.8

NOTE.—Figures are rounded and will not necessarily add to totals.

\* Less than \$50,000.

† During 1948, statutory debt retirements were not included in budget expenditures in the daily Treasury statement. Such expenditures have been included in this table for comparable purposes.

TABLE 29.—Statutory debt retirements, fiscal years 1918-48

[In thousands of dollars. On basis of par amounts and of daily Treasury statements through 1947, and on basis of Public Debt accounts for 1948; see p. 393]

Fiscal year	Cumulative sinking fund	Repayments of foreign debt	Bonds and notes received for estate taxes	Bonds received for loans from Public Works Administration	Franchise tax receipts, Federal Reserve Banks	Payments from net earnings, Federal intermediate credit banks <sup>1</sup>	Commodity Credit Corporation capital repayments	Miscellaneous gifts, forfeitures, etc.	Total

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Act of Mar. 4, 1923 (42 Stat. 1456, sec. 206 (b)), requiring division of net earnings, was amended by act of May 19, 1932 (47 Stat. 159, sec. 3). Act of Aug. 19, 1937 (50 Stat. 715, sec. 30), provides for franchise tax.

<sup>2</sup> Includes \$4,842,066.45 written off the debt Dec. 31, 1920, on account of fractional currency estimated to have been lost or destroyed in circulation.

<sup>3</sup> Beginning with 1947, bonds acquired through gifts, forfeitures, and estate taxes are redeemed prior to maturity from regular public debt receipts.

<sup>4</sup> Represents payments from net earnings, War Damage Corporation.

TABLE 30.—*Cumulative sinking fund, fiscal years 1921-48*

[In millions of dollars. On basis of Public Debt accounts, see p. 393]

NOTE.—Figures are rounded and will not necessarily add to totals. Details by months from May 1941 for Series E, F, and G bonds (and from May 1935 for Series A–D bonds) will be found in 1943 annual report, p. 604, and in corresponding tables in subsequent reports. Series A–D sales and redemptions during 1948 will be found in table 33 of this report.

\* Less than \$50,000.

<sup>1</sup> Includes sales of F and G bonds to commercial banks. During calendar year 1940 commercial banks were permitted to purchase limited amounts of Series F and G bonds for investment of savings deposits (for details as to limitations, see pp. 44 and 47 of 1944 annual report); and they were again permitted to make such purchases from June 18 through June 30, 1945 (see pp. 50 and 51 of 1945 annual report), and from Dec. 3 through Dec. 8, 1945 (see p. 38 of 1946 annual report).

<sup>2</sup> Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than sales re-

ported as unclassified in daily Treasury statement. The greater part of that item consists of sales for which information is available as to series but not year of issue. On basis of that information such sales are included in this table according to series. Prior to June 1947 it was possible to distribute by series all sales reported as unclassified in daily Treasury statement.

<sup>3</sup> Series E redemptions include small amounts of unclassified Series A–D redemptions beginning with October 1944, and small amounts also of unclassified Series F and G redemptions beginning with June 1947.

<sup>4</sup> Estimated, except for Series G.

<sup>5</sup> Estimated. Figures represent increment in value.

<sup>6</sup> Amounts outstanding are at current redemption values, except Series G bonds which are stated at par. Unclassified bonds shown in daily Treasury statement have been classified by series in this table.

TABLE 35.—Sales of Series E, F, and G savings bonds, by denominations, fiscal years 1941-48 and monthly 1948

[On basis of daily Treasury statements and reports of sales]

Fiscal year or month	Total all denominations	\$10 <sup>1</sup>	\$25	\$50	\$100	\$200 <sup>2</sup>	\$500	\$1,000

NOTE.—Figures are rounded and will not necessarily add to totals. Details of amounts of sales by months beginning May 1941 will be found in the 1943 annual report, p. 611, and in corresponding tables in subsequent reports.

\* Less than \$50,000.

<sup>1</sup> Sale of \$10 denomination Series E bonds was authorized beginning June 1944 for sale to armed forces only.

<sup>2</sup> Sale of \$200 denomination Series E bonds began in October 1945.

<sup>3</sup> Sale of \$25 denomination Series F bonds was authorized in December 1941.

Adjustment to daily Treasury statement.....	+61,574	+243,757	-8,008	+14,851	+43,516	+61,704
Total.....	4,026,051	50,426,019	2,208,626	21,462,697	4,340,718	18,706,891

NOTE.—Figures are rounded and will not necessarily add to totals. Sales from May 1941 through June 1946, by months, fiscal years, and calendar years, will be found in 1943 annual report, pp. 614 and 618, and in corresponding tables in subsequent reports. Redemptions, by months, during 1946, calendar year 1945, and fiscal year 1946 will be found in 1946 annual report, p. 532. Sales and redemptions, by months, for subsequent periods may be found at intervals in *Treasury Bulletin*. Data on redemptions by States are not available prior to October 1944.

<sup>1</sup> State redemption figures are not necessarily comparable with State sales data, inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, redemptions in this table are based on current redemption values, whereas sales are shown at issue price.

<sup>2</sup> Includes sales through March 1947.

<sup>3</sup> State figures exclude sales of Series F and G bonds to commercial banks. Commercial banks were permitted to purchase these bonds under certain conditions (see footnote 1, table 34).

TABLE 38.—*Percent of savings bonds sold in each year redeemed through each yearly period thereafter, by denominations*

NOTE.—The percentages shown in this table are the proportions of the value of the bonds sold in any calendar year which are redeemed before July 1 of the next calendar year and before July 1 of succeeding calendar years. Both sales and redemptions are taken at maturity value. The average percentages shown above are simple averages of the percentages for the applicable annual series.

<sup>1</sup> June 1, 1944, is the earliest issue date for bonds of the \$10 denomination.

<sup>2</sup> Oct. 1, 1945, is the earliest issue date for bonds of the \$200 denomination.

<sup>3</sup> Series G savings bonds are not available in denominations of \$25.

TABLE 39.—Sales and redemptions of Treasury notes, tax and savings series, August 1941–June 1948<sup>1</sup>

[Par values. On basis of daily Treasury statements, see p. 393]

Series and period	Sales (including exchanges)	Redemptions (including exchanges)			Amount outstanding	
		Total	For cash	For taxes	Matured debt	Interest-bearing debt
Cumulative August 1941 through June 30, 1948:						
Series A.....	\$406,920,750	\$403,856,550	\$65,808,250	\$338,048,300	\$3,064,200	-----

<sup>1</sup> All series originally issued as "Treasury notes—tax series." However, designation of Series C was changed to "Treasury savings notes, Series C" on June 23, 1943. For description of all series, see 1943 annual report, p. 533, and p. 458 of this report. Sales and redemptions from inception, August 1941, will be found in 1943 annual report, pp. 638 and 640, and in corresponding tables in subsequent reports.

## Interest on public debt and guaranteed obligations

TABLE 40.—Amount of interest-bearing public debt outstanding, the computed annual interest charge, and the computed rate of interest, June 30, 1916–48, and at the end of each month during 1948<sup>1</sup>

[On basis of Public Debt accounts through June 1937, and subsequently on basis of daily Treasury statements, see p. 393]

June.....	250,063,348,379	5,455,475,791	2.182

<sup>1</sup> For monthly data back to June 30, 1916, see annual reports for 1929, p. 509; for 1936, p. 442; and corresponding tables in subsequent reports.<sup>2</sup> Interest-bearing debt includes discount on Treasury bills from June 30, 1930, the amount being deducted from interest-bearing debt before calculation of average interest rate. Savings bonds of Series A–F are included in interest-bearing debt at their current redemption value from March 1935. Treasury tax and savings notes, beginning August 1941, are included at face amount. Face value of savings bonds and tax and savings notes of any yearly series maturing from month to month which are not currently presented for retirement is shown as interest-bearing debt until all bonds or notes of yearly series have matured. Thereafter, total amount outstanding is shown as matured debt upon which interest has ceased. In computing average rate of interest, the rates used for both savings bonds and tax and savings notes are based upon annual yield on such obligations if held to maturity.

TABLE 41.—*Interest on the public debt, payable, paid, and outstanding unpaid, by security classes, fiscal year 1948*

(On basis of Public Debt accounts, see p. 393)

Issue	Outstanding unpaid June 30, 1947	Due and payable during 1948	Payments during 1948	Outstanding unpaid June 30, 1948

<sup>1</sup> For bonds selling above par and callable at par before maturity, the yields are computed on the basis of redemption at first call date; while for bonds selling below par, yields are computed to maturity. Monthly averages are averages of daily figures. Each daily figure is an unweighted average of the yields of the individual issues. Prior to Sept. 1941, yields were computed on the basis of the day's closing price on the New York Stock Exchange except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Stock Exchange. Commencing Sept. 1941, yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market. For average yields by months from January 1919 through December 1929, see p. 662 of the annual report for 1943.

<sup>2</sup> From July 17, 1925, through Nov. 29, 1935, yields are based on all outstanding partially tax-exempt Treasury bonds neither due nor callable for 12 years; from Nov. 30, 1935, through Dec. 14, 1945, yields are based on all outstanding partially tax-exempt Treasury bonds neither due nor callable for 15 years. This index was discontinued as of Dec. 15, 1945, because there were no longer any bonds of this classification due or callable in 15 or more years.

<sup>3</sup> Average of all taxable Treasury bonds neither due nor callable for 15 years. Taxable bonds are those on which the interest is subject to both the normal and surtax rates of the Federal income tax. This average commenced Oct. 20, 1941.

TABLE 45.—Prices and yields of marketable public debt issues, June 30, 1947 and 1948, and price ranges since first traded <sup>1</sup>

<sup>1</sup> Prices on June 30, 1947 and 1948, are closing bid and ask quotations in over-the-counter market as compiled by Federal Reserve Bank of New York. Prices in range columns are mean of closing bid and ask quotations in over-the-counter market except that Treasury bond prices prior to Oct. 1, 1939, are closes on New York Stock Exchange. "When issued" prices are included in price range beginning Oct. 1, 1939. Dates of highs and lows, in case of recurrence, are latest dates. Yields are percent per annum. For description and amount of each issue outstanding on June 30, 1948, see table 20. For description and amount of each issue outstanding on June 30, 1947, see table 20, p. 335, in 1947 annual report. Treasury bills are excluded.

<sup>2</sup> Called on June 13, 1947, for redemption on Oct. 15, 1947.  
<sup>3</sup> Called on Nov. 14, 1947, for redemption on Mar. 15, 1948.  
<sup>4</sup> No market quotations for postal savings bonds.  
<sup>5</sup> Quoted on yield basis; range not shown for securities so quoted.  
<sup>6</sup> Quoted on price basis on June 30, 1947.  
<sup>7</sup> Not quoted.  
<sup>8</sup> Quoted on "when issued" basis.  
<sup>9</sup> Quoted on "when issued" basis. For description, see exhibit 2.

<sup>1</sup> Corporation functions, assets, and liabilities have been transferred for liquidation to R. F. C., and ownership of stock by Treasury consists of stock certificate of \$24,000,000 indorsed for \$18,243,104.96 representing payment by R. F. C. Treasury has not canceled this stock certificate because there is no authority to do so.

<sup>2</sup> In addition to these repayments there were also deposited in Treasury during 1948, funds amounting to \$139,299,556.99 representing value of stock owned by Federal Reserve Banks, which was retired by Corporation.

<sup>3</sup> Capital stock of Federal home loan banks in amount of \$122,672,200 was transferred by R. F. C. to Treasury. Treasury canceled R. F. C. notes in like amount.

<sup>4</sup> Reconstruction Finance Corporation funds.

<sup>5</sup> Capital stock of Federal Savings and Loan Insurance Corporation was transferred by Home Owners' Loan Corporation to Treasury in accordance with provisions of Government Corporations Appropriation Act, 1949. Treasury canceled H. O. L. C. bonds to cover principal and dividends thereon.

<sup>6</sup> Net of return to Treasury of excess capital funds amounting to \$21,523.37 in 1947 and \$74,890.34 in 1948. Check for latter was dated June 29, 1948, but not deposited in Treasury until July 8, 1948.

<sup>7</sup> Exclusive of net payments from Treasury, or transfer of assets authorized by law, for which no formal receipts or other evidences of payment are held by Secretary of the Treasury in the following:

Stock corporations:	Amount
Commodity Credit Corporation.....	\$1,946,310,554.14
Inland Waterways Corporation.....	12,298,188.84
Public Housing Administration.....	114,833,900.25
Regional Agricultural Credit Corporation of Washington, D. C.....	9,460,000.00
Tennessee Valley Associated Cooperatives, Inc.....	249,000.00
Warrior River Terminal Company, Inc. (merged with Inland Waterways Corporation).....	
Nonstock corporations:	
Federal Prison Industries, Inc.....	4,849,507.35
Institute of Inter-American Affairs.....	6,504,306.10
Inter-American Educational Foundation, Inc. (merged with Institute of Inter-American Affairs).....	
Pennradio, Inc.....	32,581.46
Tennessee Valley Authority.....	41,106,707.91
Total.....	2,135,644,746.05

<sup>8</sup> Includes net cash borrowings of \$82,790,448.93 from Treasury and cancellation of R. F. C. notes in the amount of \$10,048,931,299.32. Cancellations consist of \$551,216,720.13 under provisions of Public Law 266 (61 Stat. 545, 547) to cover transfer of Secretary of Agriculture's obligations to Treasury; \$122,672,200 under provisions of Public Law 132 (61 Stat. 208) to cover transfer of capital stock of Federal home loan banks to Treasury; \$9,735,561.99 by authority of Public Law 268 (61 Stat. 584) for transfer of title to buildings to the United States, and \$9,365,306,817.20 by authority of Public Law 860 (62 Stat. 1187), which authorized cancellation of R. F. C. notes in amount of \$9,313,736,531 plus interest accrued thereon subsequent to June 30, 1947. The foregoing stated amount represents unrecovered costs to the Corporation as of June 30, 1947, in its national defense, war, and reconversion activities.

<sup>9</sup> Includes net borrowing directly from Treasury of \$207,225,451 and Rural Electrification Administration notes amounting to \$510,348,903.98 transferred to Treasury by R. F. C. in accordance with provisions of Public Law 266 (61 Stat. 547). Treasury canceled R. F. C. notes in like amount. See footnote 8.

<sup>10</sup> This repayment was made under requirements of Public Law 268, July 30, 1947. A repayment in like amount is required to be made not later than June 30 of each calendar year hereafter.

<sup>11</sup> Created pursuant to Public Law 731, approved Aug. 14, 1946. All assets and liabilities of Emergency Crop and Feed Loan Section of Farm Credit Administration and assets and liabilities of Farm Security Administration were transferred to this activity as of Oct. 31, 1946.

<sup>12</sup> Excludes \$718,074,354.98, shown under bonds and notes in preceding part of this table. This sum represents funds borrowed from Treasury which, together with funds appropriated to Rural Electrification Administration are available for advances to cooperatives, States, and private utilities.

<sup>13</sup> Latest reports available to Treasury on U. S. Maritime Commission functions, and on War Shipping Administration functions relating to lend-lease and UNRRA activities, are as of March 31, 1947. Latest available reports on remainder of War Shipping Administration functions are as of February 28, 1947. Data derived from these reports were last published in annual report of Secretary of the Treasury for 1947. Publication of current data on U. S. Maritime Commission will be resumed when available.

<sup>14</sup> Reserves amounting to \$369,100,693.56 have been established against these securities.

**TABLE 49.—Principal of the funded and unfunded indebtedness of foreign governments to the United States arising from World War I, the accrued and unpaid interest thereon, and payments on account of principal and interest, as of November 15, 1948**

<sup>1</sup> Payments of governments which have funded were made prior to date of funding agreements.

<sup>2</sup> German Government has been notified that U. S. Government will look to German Government for discharge of indebtedness of Government of Austria to U. S. Government.

<sup>3</sup> Includes additional bonds aggregating \$3,489,482.75 received July 23, 1937, in exchange for bonds aggregating \$1,207,742 and annuities aggregating \$69,534.46, payable on Jan. 1, 1933, 1934, and 1935, but postponed as provided by agreements of May 8, 1930, and Sept. 14, 1932.

<sup>4</sup> Increase over amount funded due to exercise of options with respect to payment of interest due on original issue of bonds of debtor governments.

<sup>5</sup> United States held obligations in principal amount of \$289,898.78, which, together with accrued interest thereon, were canceled on Oct. 6, 1939, pursuant to agreement of Apr. 14, 1938, between United States and Republic of Nicaragua, ratified by United States Senate on June 13, 1938.

<sup>6</sup> Does not include payment of \$100,000 by Rumanian Government on June 15, 1940, which was made as "a token of its good faith and of its real desire to reach a new agreement covering" Rumania's indebtedness to United States.

<sup>7</sup> Represents proceeds of liquidation of financial affairs of Russian Government in this country. (Copies of letter dated May 23, 1922, from Secretary of State and of reply of Secretary of the Treasury dated June 2, 1922, in regard to loans to Russian Government and liquidation of affairs of the latter in this country appear in Annual Report of the Secretary of the Treasury for 1922, as exhibit 79, p. 283, and in combined annual reports of World War Foreign Debt Commission as exhibit 2, p. 84.)

<sup>8</sup> Includes balances of amounts postponed under provisions of joint resolution of Dec. 23, 1931. (For amounts postponed see Annual Report of the Secretary of the Treasury for 1932, p. 35.)

June 30, 1952.....	374,000.00	1,784,000.00	2,158,000.00
June 30, 1953.....		352,000.00	352,000.00
Total investments.....	2,435,238,000.00	359,373,000.00	2,794,611,000.00
<b>Unexpended balances:</b>			
To credit of disbursing officers.....	30,049,211.80	—9,914,512.18	20,134,699.62
On books of the Division of Bookkeeping and Warrants.....	<sup>3</sup> 13,476,569.32	—4,034,912.48	<sup>4</sup> 9,441,656.84
Total assets.....	2,478,763,781.12	345,423,575.34	2,824,187,356.46

<sup>1</sup> Under Public Law 411, approved Jan. 24, 1942, it was provided that after June 30, 1942, there would be deducted and withheld from basic salary, pay, or compensation of any officer or employee to whom the Civil Service Retirement Act applies a sum equal to 5 per centum of such officer's or employee's basic salary, pay, or compensation in lieu of 3½ per centum deduction previously in effect.

<sup>2</sup> Comprises \$244,000,000.00 appropriated from general fund to cover liability of United States and \$1,530,000.00 appropriated from revenues of District of Columbia to cover its liability in connection with financing of fund.

<sup>3</sup> Excludes \$3,217,157.62 representing July prior deposits appropriated as of June 30, 1947, and includes July prior transfer-counter warrants (net) of \$440,020.68. Also excludes adjustment of \$6,999.44 to be made by Treasurer's Office in 1948.

<sup>4</sup> Excludes \$3,946,864.93 representing July prior deposits appropriated as of June 30, 1948, and excludes July prior repayments in amount of \$791.13. Also excludes adjustment of \$6,999.44 to be made by Treasurer's Office.

TABLE 57.—*District of Columbia teachers' retirement and annuity fund—Assets held by the Treasury Department, June 30, 1948*

[Public Law 624, approved Aug. 7, 1946 (60 Stat. 875), created this fund as successor to the District of Columbia teachers' retirement fund established under the act of Jan. 15, 1920, as amended, effecting the consolidation of the deductions fund and the Government reserve fund as of July 1, 1946]

Secretary of the Army.....	150				
Tennessee Valley Authority.....	54	54	54		
Virgin Islands Company, The.....	1	(*)	(*)		
Subtotal.....	15,457	2,835	2,789	42	5
II. Agencies issuing obligations only in payment of defaulted and foreclosed insured mortgages:					
Federal Housing Administration.....	<sup>9</sup> 10,265	27		27	
U. S. Maritime Commission.....	<sup>10</sup> 200				
Subtotal.....	10,465	27		27	
Total.....	25,922	2,862	2,789	69	5

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Less than \$500,000.

<sup>2</sup> Excludes matured interest, all agencies, in amount of \$0.5 million.

<sup>3</sup> Funds have been deposited with Treasurer of the United States for payment of all obligations guaranteed by the United States, representing outstanding matured principal of \$5 million and interest of \$0.5 million.

<sup>4</sup> Administrator is authorized to issue notes for purchase by Secretary of the Treasury.

<sup>5</sup> Authorized to issue obligations to Secretary of Treasury only, which are not guaranteed by the United States.

<sup>6</sup> Net of repayments by borrowers to Public Housing Administration and net of retired bond issues of Home Owners' Loan Corporation, exclusive of refunding. This is a limitation on issues, and amount may be increased only by amount of issues for refunding purposes.

<sup>7</sup> Corporation is authorized to issue to Secretary of the Treasury obligations in an amount outstanding at any one time sufficient to carry out its functions pursuant to amendment to the Reconstruction Finance Corporation Act, Public Law 132, approved June 30, 1947. No notes outstanding as of June 30, 1948. See table 32.

<sup>8</sup> Administrator is authorized to issue notes, not guaranteed by United States as to principal and interest, to Secretary of the Treasury for loans and undisbursed commitments authorized by R. F. C. as of June 30, 1947, plus the congressional authorization of \$225 million for 1948, pursuant to Public Law 266, approved July 30, 1947. This amount was increased to \$400 million in Public Law 519, approved May 10, 1948.

<sup>9</sup> Secretary of Agriculture is authorized to issue notes, not guaranteed by United States as to principal and interest, to Secretary of the Treasury for all outstanding loans made by and undisbursed commitments authorized by R. F. C. at the close of June 30, 1947, pursuant to Public Law 266, approved July 30, 1947. All outstanding loans have been paid and the limit of borrowing authority represents the amount of undisbursed commitments.

<sup>10</sup> Represents \$10,100 million limit of authority to insure mortgages and \$165 million limit of liability on insured loans, which liability may be increased by amount of collections of insurance premiums and decreased by amount of claims paid. The authority to insure mortgages under title II may be increased by \$1,000 million upon approval of the President. Unused mortgage insurance authorizations on June 30, 1948, amounted to \$1,555 million. Debentures may be tendered and issued only in exchange for insured property acquired through foreclosure.

<sup>11</sup> Limit which may be outstanding at any one time with respect to the insuring of ship mortgages.

TABLE 75.—Comparative statement of the combined net investment of the United States with respect to Government corporations and certain other assets and liabilities pertaining to business-type activities, as of June 30, 1939-48

[In thousands of dollars. Classifications for 1944 and prior years have been reconstructed to conform to classifications prescribed in Budget-Treasury Regulation No. 3.]

NOTE.—Prior to 1945, valuation reserves were reported as "other liabilities" rather than suspended credits to the respective asset accounts.

<sup>1</sup> Includes \$1,250,000 thousand temporary borrowings by Commodity Credit Corporation from Secretary of the Treasury.

<sup>2</sup> Revised to include loans made by Secretary of the Treasury.

<sup>3</sup> Included in "land, structures, and equipment" classification.

<sup>4</sup> Revised to include stock of banks for cooperatives owned by Farm Credit Administration.

<sup>5</sup> Contra interagency assets and liabilities included for those agencies not reporting in statement prior to 1945.

<sup>6</sup> Decrease from 1945 caused in part by elimination of interagency assets and liabilities of merged R. F. C. affiliates effective July 1, 1945, and establishment of valuation and depreciation reserves.

<sup>7</sup> Decrease from 1947 caused in part with respect to (1) assets: exclusion of assets of U. S. Maritime Commission and War Shipping Administration functions (latest reports

available to Treasury for these agencies relating to lend-lease and UNRRA activities as of Mar. 31, 1947, and the remainder of War Shipping Administration functions as of Feb. 28, 1947) amounting to \$11,367,847 thousand and decrease of \$9,365,307 thousand by cancellation (Public Law 860, approved June 30, 1948) of Treasury loans to R. F. C. for which no assets were acquired by Treasury except right of future recoveries from non-lending net assets; (2) liabilities: exclusion of liabilities of U. S. Maritime Commission and War Shipping Administration functions (see parenthetical statement in item (1) above) amounting to \$1,160,232 thousand, and decrease in R. F. C. liabilities to Treasury of \$9,365,307 thousand referred to in item (1) above; and (3) United States interest other than interagency: exclusion of proprietary interest in U. S. Maritime Commission and War Shipping Administration functions (see parenthetical statement in item (1) above) amounting to \$10,207,553 thousand.

<sup>8</sup> Represents only accrued interest; other accrued liabilities included in "all other liabilities."

<sup>9</sup> Included in "all other liabilities."

NOTE.—Figures are rounded and will not necessarily add to totals. Negative figures are shown in italics.

\* Less than \$50 thousand.

<sup>1</sup> Excludes unexpended balances of appropriated funds.

<sup>2</sup> Includes \$17.2 million guaranteed loans held by lending agencies.

<sup>3</sup> Includes real estate sales contracts.

<sup>4</sup> Includes notes for short-term borrowings.

<sup>5</sup> Represents guaranteed obligations arising from drafts and invoices paid by commercial banks. This amount does not agree with that published in daily Treasury statement of Aug. 2, 1948, because of amended report.

<sup>6</sup> Includes \$1,563.3 million representing amounts of notes canceled by Secretary of the Treasury for restoration of capital impairment; and is net after payment by Commodity

Credit Corporation to U. S. Treasury of \$17.7 million on Apr. 27, 1948, as a result of Treasury appraisal.

<sup>7</sup> Surplus is not available by law for dividend distribution and is considered by Corporation as a reserve for future deposit insurance losses and related expenses with respect to insured banks.

<sup>8</sup> Surplus is considered by Corporation as available for future insurance losses and related expenses with respect to insured institutions.

<sup>9</sup> Includes \$0.2 million deposits to "Guaranty fund".

<sup>10</sup> As shown above as a liability of each corporation or agency.

<sup>11</sup> As shown as an asset of U. S. Treasury under "Other" business-type activities.

<sup>12</sup> Represents R. F. C. and Agricultural Marketing Act revolving fund proprietary interests in Government corporations.

TABLES

583

Footnotes through 12 on p. 581.

<sup>13</sup> Reorganization Plan No. 3 of 1947, which became law July 27, 1947, established the Housing and Home Finance Agency in lieu of National Housing Agency, with three constituent agencies, Home Loan Bank Board, Federal Housing Administration, and Public Housing Administration. Figures for Public Housing Administration represent activities under U. S. Housing Act, as amended. War housing and other operations of Administration are reflected in "Other" business-type activities.

<sup>14</sup> Includes merged war affiliates, the last of which to be merged was U. S. Commercial Company which was dissolved in fiscal year 1948. Does not include Federal National Mortgage Association and War Damage Corporation (in liquidation), which are included under "Other" corporations.

<sup>15</sup> Consists of corporations listed in footnote 5, table 78, with exception of U. S. Spruce Production Corp.

<sup>16</sup> Includes Bureau of Community Facilities and Public Works Administration (in liquidation).

<sup>17</sup> See footnote 7, table 78.

<sup>18</sup> See footnote 5, table 77.

<sup>19</sup> Represents obligations of Government corporations and agencies as shown under "Bonds, debentures, and notes payable—U. S. Treasury".

<sup>20</sup> Includes \$436.1 million representing value of nonending net assets of war affiliates relating to programs for national defense and reconversion for which there is accountability to the U. S. Treasury for deposit to miscellaneous receipts of proceeds of liquidation, in accordance with provisions of Public Law 860, approved June 30, 1948.

<sup>21</sup> R. F. C. obligations in amount of \$9,313.7 million plus interest accrued thereon subsequent to June 30, 1947, were canceled by Secretary of the Treasury in accordance with Public Law 860, approved June 30, 1948. This amount represents unrecovered costs to R. F. C. as of June 30, 1947, in its national defense, war, and reconversion activities.

<sup>22</sup> Includes \$136.7 million reserves for contingent losses, expenses, and other charges.

<sup>23</sup> Consists of net income from power operations of \$109.2 million and net expense of nonincome-producing programs of \$104.7 million.

NOTE.—Figures are rounded and will not necessarily add to totals. Negative figures are shown in italics.

\* Revised.

\* Less than \$500.

\* Figures represent activities under U. S. Housing Act, as amended. War housing and other operations of Administration are reflected in classification "Other" under "Certain other business-type activities".

\* See footnote 5, table 78.

\* Consists of Bureau of Community Facilities and Public Works Administration (in liquidation).

\* See footnote 7, table 78.

\* Consists of Agricultural Marketing Act revolving fund; Federal Security Agency—loans to students; Department of the Interior—Indian loans and Puerto Rico Reconstruction Administration; Department of the Navy—guaranteed loans (World War II) and sale of surplus supplies (World War I); Public Housing Administration—Farm Security Administration program; homes conversion program; public war housing program, and veterans' re-use housing program; Treasury Department—miscellaneous loans and certain other assets; Veterans' Canteen Service; and Department of the Army—guaranteed loans (World War II).

Footnotes 1 to 5 on p. 585.

\* Includes \$46,006 thousand for which R. F. C. obligations were canceled.

7 Government Corporations Appropriation Act, 1949, approved June 30, 1948 (62 Stat. 1187), authorized Secretary of the Treasury to cancel R. F. C. notes in amount of \$9,313,737 thousand plus interest accrued thereon subsequent to June 30, 1947, the foregoing stated amount representing unrecovered costs to Corporation as of June 30, 1947, in its national defense, war, and reconversion activities.

8 Represents net income during 1948 from power operations.

9 Figures revised to include U. S. Commercial Co. with "Merged war affiliates" instead of "Other".

10 Adjusted to allow for operating reserve referred to in footnotes to table 76, "Balance sheets as of June 30, 1948."

11 Includes \$316,310 thousand deficit of Agricultural Marketing Act revolving fund, \$49,169 thousand deficit of Department of the Interior—Indian loans and Puerto Rico Reconstruction Administration, and excludes \$754,710 thousand deficit of emergency crop and feed loan activities and Farm Security Administration which was not assumed by Farmers' Home Administration; also includes revisions which increase the June 30, 1947, deficits of public war housing program, homes conversion program, and Farm Security Administration by \$20,616 thousand.

12 Deposits to miscellaneous receipts of Treasury, consisting of \$209,909 thousand earnings of War Damage Corp. and \$37 thousand surplus of U. S. Spruce Production Corp.

13 Includes adjustment of cumulative deficit by cancellation of notes due Treasury Department and write-off of paid-in surplus and expended appropriations.

Footnotes 1 to 5 on p. 589.

\* Consists of Bureau of Community Facilities and Public Works Administration (in liquidation).

† Latest reports available to Treasury on U. S. Maritime Commission functions, and on War Shipping Administration functions relating to lend-lease and UNRRA activities are as of Mar. 31, 1947. Latest available reports for remainder of War Shipping Administration functions are as of Feb. 28, 1947. Data derived from such reports were last published in annual report of Secretary of the Treasury for 1947. Publication of current data on U. S. Maritime Commission will be resumed when available.

§ See footnote 5, table 77.

§ Includes \$1,700,000 thousand payments out of credit to United Kingdom.

§ Includes a payment of \$75 thousand by Institute of Inter-American Transportation by check dated June 29, 1948, but not deposited in the Treasury until July 8, 1948.

§ Includes \$10,177,085 thousand representing cancellation of \$10,048,931 thousand of notes of R. F. C. and \$128,154 thousand of bonds of Home Owners' Loan Corporation.

## STOCK AND CIRCULATION OF MONEY IN THE UNITED STATES

TABLE 79.—*Stock of money, money in the Treasury, in the Federal Reserve Banks, and in circulation, by kinds, June 30, 1948*

[In millions of dollars, except per capita figures]

Kind of money	Stock of money	Money held in the Treasury					Money outside of the Treasury

January 1, 1879.....	1,007	212	22	100	-----	91	816	-----	816	16.76

NOTE.—For a description of security held, see footnote 2, table 81. Rounded figures will not necessarily add to totals.

<sup>1</sup> Revised.

<sup>1</sup> Money in circulation includes any paper currency held outside continental limits of United States.

<sup>2</sup> Based on Bureau of the Census estimated population for continental United States as of July 1 of each year.

<sup>3</sup> Does not include gold other than that held by Treasury.

<sup>4</sup> Excluded from total stock, since gold or silver held as security against gold and silver certificates and Treasury notes of 1890 is included under gold, standard silver dollars, and silver bullion, respectively.

<sup>5</sup> Excluded from total in Treasury (see footnote 4).

<sup>6</sup> Includes credits with Treasurer of the United States payable in gold certificates in (1) gold certificate fund—Board of Governors, Federal Reserve System, in amount of \$16,513,733,547, and (2) redemption fund for Federal Reserve notes in amount of \$709,924,022.

<sup>7</sup> Includes \$170,000,000 lawful money deposited as reserve for Postal Savings deposits.

<sup>8</sup> The amount of gold and silver certificates and Treasury notes of 1890 should be deducted from this amount before combining with total money held in Treasury to arrive at stock of money in United States (see footnote 4).

TABLE 80.—*Stock of money, money in the Treasury, in the Federal Reserve Banks, and in circulation, June 30, 1913-48*<sup>1</sup>

NOTE.—Rounded figures will not necessarily add to totals.

<sup>1</sup> Revised.

<sup>2</sup> Figures differ slightly from monthly circulation statements for following reasons: (a) Beginning June 30, 1922, form of circulation statement was revised so as to include in holdings of Federal Reserve Banks and agents, and hence in stock of money, gold bullion and foreign gold coin held by Federal Reserve Banks and agents, and to include in holdings of Federal Reserve Banks and agents, and hence exclude from money in circulation, all forms of money held by Federal Reserve Banks and agents, whether as reserve against Federal Reserve notes or otherwise. For sake of comparableness, figures in this table for earlier years include these changes. For full explanation of this revision, see 1922 annual report, p. 433. (b) The form of circulation statement was revised again beginning Dec. 31, 1927, so as to exclude earmarked gold coin from stock of money, and hence from money in circulation; to include in holdings of Federal Reserve Banks and agents, and hence in stock of money, gold held abroad for account of Federal Reserve Banks; and to include in all categories, minor coin (1-cent piece and 5-cent piece). Beginning Dec. 31, 1927, circulation statement is dated for end of month instead of beginning of succeeding month, as was practice theretofore, and figures on revised basis for "Money held in the Treasury" are used. For sake of comparableness, figures in this table for earlier years

include these changes. For full explanation of this revision, see 1928 annual report, pp. 70-71. For figures for all years from 1880 through 1934, see 1947 annual report, pp. 478-481. Changes, minor in amount, are made in some figures in the June 30 circulation statements for use in these annual report tables.

<sup>3</sup> Excludes gold and silver certificates and Treasury notes of 1890 outside Treasury. Beginning with 1934, excludes amount (gold certificates) held for Federal Reserve Banks and agents. These items are excluded since gold and silver held as security against them are included. Composition of the stock of money is shown in table 81.

<sup>4</sup> From 1934 to date, amount (gold certificates) held for Federal Reserve Banks and agents is excluded from total money in Treasury, see footnote 2.

<sup>5</sup> Composition of money in circulation is shown in table 82.

<sup>6</sup> Based on Bureau of Census estimated population for continental United States as of July 1 of each year.

<sup>7</sup> On February 26, 1947, gold in amount of \$1,800,000,000 held for account of exchange stabilization fund was used as follows: (1) \$687,500,000.11 was paid to International Monetary Fund; (2) \$275,224,999.89 was transferred to gold certificate fund, Board of Governors, Federal Reserve System; and (3) \$837,275,000 was transferred to general fund of Treasury (and remains in this column).

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> See footnote 1, table 80. For figures for all years from 1860 through 1934, see 1947 annual report, pp. 482-484.<sup>2</sup> Part of gold and silver included in stock of money is held as reserve against other kinds of money, as follows: (1) As reserve for United States notes and Treasury notes of 1890—gold bullion (gold coin and bullion prior to gold conservation actions of 1933 and 1934) varying in amount from \$150,000,000 to \$156,039,431 during years included in this table; (2) also as security for Treasury notes of 1890 (these notes are being canceled and retired on receipt)—an equal dollar amount in standard silver dollars; (3) as security for outstanding silver certificates—silver in bullion and standard silver dollars of monetary value equal to face amount of such silver certificates; and (4) as security for gold certificates—gold bullion and bullion before gold actions of 1933 and 1934) of value at legal standard equal to face amount of such gold certificates. Federal Reserve notes are secured by deposit by Federal Reserve Banks with Federal Reserve agents of like amount of gold certificates (gold prior to actions of 1933 and 1934) or of gold certificates and such discounted or purchased paper as are eligible under terms of Federal Reserve Act, as amended, or (from Feb. 27, 1932) of direct obligations of United States. Federal

Reserve Banks must maintain reserves in gold certificates (gold for 1933 and prior years) of at least 25 percent (40 percent prior to passage of act of June 12, 1945) including redemption fund which must be deposited with Treasurer of United States, against Federal Reserve notes in actual circulation ("Gold certificates" as herein used for 1934 and subsequent years include credits with Treasurer of United States payable in gold certificates). Federal Reserve notes are obligations of United States and first lien on all assets of issuing Federal Reserve Bank. Federal Reserve Bank notes at time of issuance were secured by direct obligations of United States or commercial paper; however, lawful money has been deposited with Treasurer of United States for their redemption and they are in process of retirement. National bank notes at issuance were secured by direct obligations of United States; lawful money has been deposited with Treasurer for their redemption and they are being retired.

<sup>3</sup> Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Revised.<sup>2</sup> See footnote 1, table 80. For figures for all years from 1860 through 1934, see 1947 annual report, pp. 485-487.<sup>3</sup> For description of reserves held against various kinds of money, see footnote 2, table 81.<sup>4</sup> Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

## CUSTOMS STATISTICS

NOTE.—Figures are rounded to nearest dollar and will not necessarily add to totals.

<sup>1</sup> Customs receipts, on basis of reports of collecting officers, are credited to districts in which collections are made. Receipts in the various districts do not indicate the tax burden of the respective districts, since taxes may be eventually borne by persons in other districts. Customs duties and sale of insular government property for Puerto Rico (\$3,278,706) are deposited to credit of Government of Puerto Rico.

<sup>2</sup> Virgin Islands.

<sup>3</sup> Customs Bureau, patrol, and foreign expenses.

TABLE 84.—*Estimated customs duties, value of imports entered for consumption, and ratio of duties to value of dutiable imports and to value of all imports, calendar years 1938-47 and monthly, July 1946-December 1947*<sup>1</sup>

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Revised.<sup>1</sup> Amount of customs duties is calculated on basis of reports of Bureau of the Census showing quantity and value of merchandise imported. Figures back to 1867 can be found in annual reports for 1930, p. 523; 1932, p. 382; and corresponding tables in subsequent reports.

TABLE 85.—*Estimated customs duties, value of dutiable imports, and ratio of estimated duties to value of dutiable imports, by tariff schedules, for the calendar years 1938-47 and monthly July 1946-December 1947*<sup>1</sup>

[Dollars in thousands]

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> Amount of customs duties is calculated on basis of reports of Bureau of the Census, showing quantity and value of merchandise imported. Total estimated duties and total value of dutiable imports will be found in table 84. For figures back to 1890 see annual reports for 1930, p. 525; 1932, p. 383; and corresponding tables in subsequent reports.<sup>2</sup> Taxes collected on dutiable commodities under revenue acts and Sugar Act of 1937 are included in appropriate schedules.

TABLE 86.—*Number of entries of merchandise, fiscal years 1947 and 1948*

Type	1947	1948	Percentage increase, or decrease (—)
Consumption entries.....	497,019	528,876	6.4
Warehouse and rewarehouse entries.....	44,815	47,932	7.0

NOTE.—This table does not include Federal payments to State and local governments for State and local taxes or in lieu of such taxes on federally owned property as follows: Housing under supervision of Public Housing Administration, including (a) Defense and war housing constructed under Lanham Act (42 U. S. C. 1521) and other acts; (b) resettlement and rehabilitation authorized by act of June 29, 1936 (40 U. S. C. 431); and (c) certain low-rent housing authorized by U. S. Housing Act of 1937, as amended (42 U. S. C. 1401); and housing and other property owned by Tennessee Valley Authority and certain other Government agencies. Figures are rounded and will not necessarily add to totals.

<sup>1</sup> Comprises \$8,790,582 under forest fire cooperation and \$303,650 under farm and other private forestry cooperation.

<sup>2</sup> Includes \$13,425,123, value of commodities distributed to schools.

<sup>3</sup> Reported on basis of total cost to Government of commodities as delivered during 1948 to distributing agencies.

<sup>4</sup> Includes \$49,217 payments to school funds, Arizona and New Mexico.

TABLE 96.—Expenditures made by the Government as direct payments to States under cooperative arrangements and expenditures within States which provided relief and other aid, fiscal year, 1948—Continued

TABLE 97.—Number and amount of awards of the Mixed Claims Commission, United States and Germany, in favor of American nationals certified to the Secretary of the Treasury by the Secretary of State and the amount paid and balance due, through June 30, 1948—Continued

	Total number of awards	Total amount	Class I		Class II		Class III		Private Law 509, approved July 19, 1940		United States Government	
			Number of awards	Awards on account of death and personal injury	Number of awards	Awards of \$100,000 and less	Number of awards	Awards over \$100,000	Number of awards	Amount	Number of awards	Amount
2. Payments made on account through June 30, 1948—Continued												
Interest at 5% from Jan. 1, 1928, to date of payment as directed by the Settlement of War Claims Act of 1928		\$8,589,230.22		\$236,195.75		\$2,045,380.09		\$6,291,554.66		\$16,099.72		
Total payment through June 30, 1948		169,935,032.58		5,203,537.70		28,065,971.34		136,484,370.76		181,152.78		
Less 1/4 of 1% deduction from each payment:												
Agreement of Aug. 10, 1922	(3)	808,881.80		22,249.66		121,173.14		665,459.00				
Agreement of Dec. 31, 1928		39,888.08		3,767.97		19,156.68		16,963.43				
Private Law 509	(3)	905.76								905.76		
Net payments made to claimants through June 30, 1948		169,085,356.94		5,177,520.07		27,925,641.52		135,801,948.33		180,247.02		
3. Balance due on account:												
Principal of awards:												
Agreement of Aug. 10, 1922	327	100,559,942.10			13	17,150.69	310	39,298,671.78			4	\$61,244,119.63
Agreement of Dec. 31, 1928	27	1,003,859.27			20	1,917.23	7	1,001,942.04				
Private Law 509	1	58,946.94							1	58,946.94		
Interest to Jan. 1, 1928, at rates specified in awards:												
Agreement of Aug. 10, 1922		6,769.78				6,769.78						
Agreement of Dec. 31, 1928		774.36				774.36						
Accrued interest at 5% per annum from Jan. 1, 1928, on total amount payable as of Jan. 1, 1928, through June 30, 1948		123,057,657.69				\$16,218.78		60,125,268.85		149,314.12		62,766,855.94
Balance due claimants through June 30, 1948		224,687,950.14				42,830.84		100,425,882.67		208,261.06		124,010,975.57

<sup>1</sup> Includes payments on account of interest to Jan. 1, 1928, on Class III awards and Private Law 509. Payments on this class of awards are first applied on account of total amount payable as of Jan. 1, 1928, as directed by Settlement of War Claims Act of 1928 until total of all payments on 3 classes equals 80 percent of amount payable Jan. 1, 1928. Payment of accrued interest since Jan. 1, 1928, on this class of claims deferred in accordance with act.

<sup>2</sup> Payment made in accordance with Public Law 375, approved Aug. 6, 1947.

<sup>3</sup> Represents deductions from payments under agreement of Aug. 10, 1922, and Private Law 509, that have been covered into Treasury as miscellaneous receipts.

<sup>4</sup> Interest accrued from Jan. 1, 1928, to Mar. 11, 1940, on \$26,612.06 representing awards plus interest to Jan. 1, 1928. No applications filed by claimants. Time for filing applications expired Mar. 11, 1940.

NOTE.—Figures are rounded and will not necessarily add to totals.

\* Less than \$50 million.

<sup>1</sup> Operations of Foreign Economic Cooperation trust fund have been considered as budget, rather than trust fund, operations for purposes of this table.

<sup>2</sup> Includes net expenditures of clearing account for outstanding checks and telegraphic reports from Federal Reserve Banks; excludes changes in guaranteed securities outstanding.

<sup>3</sup> Gross public debt, and guaranteed securities of Federal Government held outside Treasury.

<sup>4</sup> Data on gross national product and its components are from Department of Commerce.

<sup>5</sup> Includes expenditures for interest, veterans' pensions and benefits, tax refunds, grants-in-aid to State and local governments, loans to foreign governments, loans by Government corporations, etc.

<sup>6</sup> Comprises net excess of (1) items such as sales of surplus property and tax refunds over (2) social insurance contributions not entering into budget receipts and excess of corporate tax liabilities over corporate tax payments to Treasury.

<sup>7</sup> Also includes corporate inventory valuation adjustment, excess of Government enterprise surplus over subsidies, and statistical discrepancy adjustment.

<sup>8</sup> Reflects principally changes in items in process of collection (net).

<sup>9</sup> Currency held outside commercial banks; excludes those currency items which constitute a part of noninterest-bearing debt of Federal Government.

<sup>10</sup> Total deposits exclusive of Federal Government and commercial bank interbank deposits.

## OWNERSHIP OF GOVERNMENTAL SECURITIES

NOTE.—Figures are rounded and will not necessarily add to totals.

\* Less than \$50 million.

• Revised.

<sup>1</sup> Figures represent par values with the following exceptions: (1) The holdings of commercial and mutual savings banks of securities of Federal instrumentalities not guaranteed by the United States and of State and local governments, Territories, and possessions are book values, (2) the holdings of these securities by individuals are residuals, and so deviate from par values in those cases where the figures for commercial and mutual savings banks are book values, (3) in the case of data which include United States savings bonds Series A-D, E, and F, the figures for these bonds represent current redemption values.

<sup>2</sup> Includes partnerships and personal trust accounts.

<sup>3</sup> Includes savings and loan associations, dealers and brokers, and investments of foreign balances in this country.

<sup>4</sup> Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.

<sup>5</sup> Data on daily Treasury statement basis. Since data exclude noninterest-bearing debt, they differ slightly from those in discussion of debt ownership. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by the Treasury, and transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in the statement published in the daily Treasury statement for the end of the fiscal year.

<sup>6</sup> Excludes obligations of the Philippine Islands after June 30, 1946.

NOTE.—Figures are rounded and will not necessarily add to totals. For data for 1913 through 1936, see 1946 annual report, p. 664.

\* Less than \$50 million.

n. a. Not available.

<sup>1</sup> The "total amount outstanding" of securities of the several issuers differs from the gross indebtedness of these issuers in that the former excludes noninterest-bearing debt. The "total privately held securities" differs from the net indebtedness of the borrowers in several additional respects. The former is derived by deducting from the total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness, on the other hand, is derived by deducting from the gross indebtedness an amount equivalent to the total volume of sinking fund assets of the respective borrowers, but makes no allowance for any other public assets.

<sup>2</sup> In the case of data which include United States savings bonds, Series A-D, E, and F, the figures for these bonds represent current redemption values.

<sup>3</sup> On basis of daily Treasury statements. Excludes transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in the statement published in the daily Treasury statement for the end of the fiscal year. Guaranteed securities consist of Commodity Credit Corporation notes, Home Owners' Loan Corporation bonds (including those guaranteed as to interest only), Reconstruction Finance Corporation notes, Tennessee Valley Authority bonds, Federal Public Housing Authority (formerly United States Housing Authority) notes, Federal Farm Mortgage Corporation bonds, and Federal Housing Administration debentures. Excludes stocks, interagency loans, and securities held by the Treasury.

<sup>4</sup> Includes Electric Home and Farm Authority notes, Federal intermediate credit bank debentures, Federal land bank bonds (both those issued by the individual banks and the consolidated series), Federal National Mortgage Association notes, home loan bank debentures, War Finance Corporation bonds (World War I), and joint stock land bank bonds. Excludes stocks and interagency loans.

<sup>5</sup> Securities the income from which is exempt from both the normal rates and surtax rates of the Federal income tax.

<sup>6</sup> Securities the income from which is exempt only from the normal rates of the Federal income tax. In the case of partially tax-exempt (1) Treasury bonds and (2) United States savings bonds, interest derived from \$5,000 aggregate principal amount owned by any one holder is exempt from the surtax rates as well as the normal rates of the Federal income tax.

<sup>7</sup> Securities the income from which is subject to both the normal rates and the surtax rates of the Federal income tax.

<sup>8</sup> Special issues to Federal agencies and trust funds.

<sup>9</sup> Excludes obligations of the Philippine Islands after June 30, 1946.

<sup>10</sup> Excludes Federal Reserve Banks. Includes individual Indian trust funds.

NOTE.—Figures are rounded and will not necessarily add to totals.

<sup>\*</sup> Less than \$500,000.

<sup>1</sup> Banks and insurance companies covered in Treasury survey of ownership of securities issued or guaranteed by U. S. Government account for approximately 95 percent of amount of such securities owned by all banks and insurance companies in United States. Details as to each issue of security are available in *Treasury Bulletin* (a) monthly for above investors and (b) quarterly through September 1947 Bulletin and semiannually thereafter for commercial banks classified by membership in Federal Reserve System.

<sup>2</sup> Includes trust companies.<sup>3</sup> Securities held in trust departments are excluded.<sup>4</sup> Includes banks and insurance companies which are not covered in Treasury survey (see footnote 1).

<sup>5</sup> Issues which commercial banks (banks accepting demand deposits) are not permitted to acquire prior to specified dates, with three exceptions: (1) Concurrently with Fourth, Fifth, and Sixth War Loans and Victory Loan, commercial banks were permitted to subscribe for limited investment of their savings deposits; (2) commercial banks may temporarily acquire such issues through forfeiture of collateral; and (3) commercial banks may hold a limited amount of such issues for trading purposes. Bank-restricted issues as of June 30, 1947 and 1948, and the earliest dates on which commercial banks may own them are as follows:

Bank-restricted issue of Treasury bonds	Earliest date on which commercial banks may own bonds	Bank-restricted issue of Treasury bonds	Earliest date on which commercial banks may own bonds
2½%, June 15, 1959-62...	June 15, 1952	2½%, Dec. 15, 1964-69...	Sept. 15, 1953
2½%, Dec. 15, 1959-62...	Dec. 15, 1952	2½%, Mar. 15, 1965-70...	Feb. 1, 1954
2½%, June 15, 1962-67...	May 5, 1952	2½%, Mar. 15, 1966-71...	Dec. 1, 1954
2½%, Dec. 15, 1963-68...	Dec. 1, 1952	2½%, June 15, 1967-72...	June 15, 1962
2½%, June 15, 1964-69...	Apr. 15, 1953	2½%, Dec. 15, 1967-72...	Dec. 15, 1962

<sup>6</sup> Excludes guaranteed obligations held by Treasury.

<sup>7</sup> U. S. savings bonds other than Series G are included at current redemption values. They were reported at maturity value by banks and insurance companies covered in Treasury survey and have been adjusted to current redemption value for this table.

<sup>8</sup> Commodity Credit Corporation demand obligations in amounts of \$45 million on June 30, 1947, and \$42 million on June 30, 1948, are all held by commercial banks and are

TABLE 103.—*Budget receipts and expenditures, actual for the fiscal year 1948 and estimated for 1949 and 1950—Continued*

	Actual, <sup>1</sup> fiscal year 1948	Estimated, fiscal year 1949	Estimated, fiscal year 1950
<b>Budget expenditures <sup>11</sup>—Continued</b>			
Post Office Department (general fund).....	\$307,010,608	\$531,369,940	\$156,669,796
Department of State.....	676,293,826	436,895,644	312,065,421
Treasury Department:			
Interest on the public debt.....	5,187,849,708	5,325,000,000	5,450,000,000
Other.....	2,395,856,579	1,092,733,215	1,140,255,666
District of Columbia (United States share).....	12,012,655	12,019,328	12,000,000
Reserve for contingencies.....		45,000,000	150,000,000
Adjustment to daily Treasury statement basis.....	-388,009,683		
<b>Total budget expenditures <sup>12</sup>.....</b>	<b>33,791,300,649</b>	<b>40,180,017,813</b>	<b>41,857,777,869</b>
<b>Budget surplus, or deficit (-).....</b>	<b>8,419,469,844</b>	<b>-599,706,231</b>	<b>-873,132,522</b>

<sup>1</sup> Excess of credits (deduct).

<sup>2</sup> Details of income taxes other than withheld and miscellaneous internal revenue on collection basis with adjustment to daily Treasury statement basis; details of employment taxes on warrants-issued basis with adjustments to daily Treasury statement basis; details of miscellaneous receipts on warrants-issued basis adjusted to include reimbursement to general fund from Federal old-age and survivors insurance trust fund for administrative expenses with total adjusted to daily Treasury statement basis; customs and refunds of receipts on warrants-issued basis with adjustments to daily Treasury statement basis. Railroad Unemployment Insurance Act receipts on daily Treasury statement basis. Figures have been adjusted from those appearing in the daily Treasury statement (1) to show refunds of receipts as a deduction from receipts rather than as an expenditure, and (2) to exclude, from both receipts and expenditures, payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings.

<sup>3</sup> Includes collections under Vinson Act.

<sup>4</sup> Because of the time required for payments reported as tax collections toward the end of each month to clear through the banks and become available for expenditures on the daily Treasury statement basis, an adjustment from the collection basis to the daily Treasury statement basis is necessary. A positive adjustment indicates that during the given period more tax receipts on the daily Treasury statement basis have been received than are reported as collections, and a negative adjustment indicates the reverse situation. The adjustment for total income and excess profits taxes other than withheld is arbitrarily assigned to the individual income tax.

<sup>5</sup> Collections for credit to trust funds are not included.

<sup>6</sup> Includes collections from: Taxes on narcotics, taxes imposed under the National Firearms Act, and the tax on hydraulic mining, all of which are effective currently. In addition, includes collections from excise taxes repealed or suspended prior to and including the Revenue Act of 1945 (consisting primarily of rubber articles, electric signs, optical equipment, washing machines, vacuum cleaners, and manufacturers' tax on luggage); collections from the liquor, tobacco, matches, tires and tubes floor stocks taxes imposed by the Revenue Acts of 1941, 1942, and 1943; collections from the tax under the Bituminous Coal Act of 1937 which expired Aug. 24, 1943; collections from the unjust enrichment tax; collections from the capital stock tax repealed with respect to years ending after June 30, 1945; and collections from the use tax on motor vehicles and boats repealed by the Revenue Act of 1945 with respect to the period after June 30, 1946.

<sup>7</sup> Based on the scheduled increase from 1 percent to 1½ percent each on employers and employees effective Jan. 1, 1950 (Internal Revenue Code, sec. 1400 (2), as amended by Public Law 379, approved Aug. 6, 1947). The estimate also assumes change in the method of collection requiring, with certain exceptions, that tax payments be deposited in designated depositories in the first month following the month of liability. Under present regulations tax payments are due on the last day of the first month following the end of the quarter in which the liabilities accrued.

<sup>8</sup> These estimates assume that tax payments will be deposited in designated depositories in the first month following the month of liability.

<sup>9</sup> Represents transfers from unemployment insurance trust fund to provide for administrative expenses plus very small amounts of back taxes.

<sup>10</sup> Represents transfers from unemployment insurance trust fund to provide for administrative expenses together with current tax receipts.

<sup>11</sup> Deduct, result of adjustment of classification of prior years' receipts.

<sup>12</sup> Classified by organization unit as published in table 2 of the 1950 Budget document. The figures are based upon the Treasury's Combined Statement of Receipts, Expenditures, and Balances, and therefore differ from figures published in the daily Treasury statement.

<sup>13</sup> Excludes transfer in 1948 of \$3 billion to the Foreign Economic Cooperation trust fund pursuant to sec. 114 (f) of the Economic Cooperation Act of 1948. Budget expenditures estimated for 1949 include expenditures made out of the Foreign Economic Cooperation trust fund.

<sup>14</sup> Expenditures, except under proposed legislation, are shown under the various agencies to which funds are allocated.

TABLE 104.—Trust accounts, etc., receipts and expenditures, actual for the fiscal year 1948 and estimated for 1949 and 1950<sup>1</sup>
