Since the last report to Congress statements of condition have been received from national banking associations on five dates as hereinbefore set forth. On September 15, 1902, reports were submitted by 4,601 associations, with aggregate resources of \$6,113,928,912.50. The loans of the associations, representing over 50 per cent of their resources, amounted to \$3,280,127,480.69. The amount of bonds on deposit as security for circulation was \$324,253,760. Bonds on deposit as security for public funds aggregated \$124,685,150, and the banks held in their vaults other securities of a like character to the amount of \$8,008,100. The investments in other bonds, stocks, and securities aggregated \$493,109,726.57; bank premises, furniture, and fixtures, \$92,652,268.87; funds on deposit with approved reserve agents, \$465,640,578.36; with other national banks, \$264,616,195.02, and with State banks and bankers, \$89,993,517.55. In addition to specie,

amounting to \$366,236,120.02, legal tenders, \$141,757,618, bills of other banks, \$22,861,873, the associations held exchanges for clearing houses to the amount of \$327,762,581.07.

Capital stock paid in aggregated \$705,535,417, surplus and undivided profits \$326,393,953.66 and \$169,216,512.03, respectively. The outstanding note issues were \$317,991,809. Funds to the credit of depositors reached the highest point in the existence of the system, \$3,209,273,893.93. United States deposits and deposits of U. S. disbursing officers were \$117,097,769.59 and \$6,846,033.85, respectively. There was due to approved reserve agents, other national banks, State banks and bankers, trust companies, and savings banks, \$1,200,341,233.39. The liabilities on account of notes and bills rediscounted and bills payable were \$9,041,080.58 and \$24,859,807.78, respectively.

LOANS AND DISCOUNTS.

In the Appendix, Table No. 71, will be found a classification of the loans and discounts made by national banks in the reserve cities and in the States and Territories on September 15 last. The aggregate volume is \$3,280,127,480, classified as follows:

On demand, paper with two or more individual or firm names, \$237,322,021; on demand, secured by stocks, bonds, etc., \$706,854,833; on time, paper with two or more individual or firm names, \$1,176,416,533; on time, single-name paper (one person or firm), \$517,149,077; on time, secured by stocks, bonds, mortgages, etc., \$642,385,016.

The loans and discounts of the national banks in the city of New York on September 15 aggregated \$607,058,485.12, of which \$6,207,375.80 was demand paper with one or more individual or firm names; \$263,775,891 demand paper secured by stocks, bonds, etc.; \$118,235,347.96 time paper with two or more individual or firm names; \$86,119,928.46 time single-name paper, and \$132,719,941.90 on time, secured by stocks, bonds, mortgages, etc.

The average monthly rates for money in New York, January to October, 1902, were as follows:

Month.	Call loans.	Prime commercial paper.
	<i>Per cent.</i>	<i>Per cent.</i>
January.....	3 <sup>7</sup> / <sub>8</sub> @ 4 <sup>1</sup> / <sub>8</sub>	4 <sup>1</sup> / <sub>2</sub> @ 5 <sup>3</sup> / <sub>8</sub>

RESERVE.

The deposits on which reserve was required amounted to \$3,844,365,538.57. The banks held in cash with reserve agents and in redemption fund \$989,433,995.26, but the available reserve—that is, the proportion of deposits with reserve agents, not exceeding the percentage of reserve required after deducting the redemption fund and

cash on hand—amounted to \$804,333,904.09, which was \$17,563,177.76 in excess of the legal requirement, being an average reserve of 20.92 per cent. The banks located in the central reserve cities, New York, Chicago, and St. Louis, held a reserve of \$250,684,716.24 on deposits amounting to \$1,040,587,878.79, an average of 24.09 per cent. The average reserve of New York City banks was 24.70, of Chicago banks 21.89, of St. Louis 24.15. The banks located in other reserve cities held \$258,045,769.41 against deposits of \$1,060,571,076.74, the average reserve being 24.33 per cent. Banks located outside of the reserve cities held reserve funds to the amount of \$295,603,418.44, or 16.91 per cent, on deposits aggregating \$1,743,206,583.04.

While there has been no change in the method of calculating the reserve of any individual bank, the form of reporting the reserve in the abstracts issued subsequent to each call was changed, beginning with the April 30 statement. Prior to that date the percentage of legal reserve held to deposits was not shown, but merely the percentage of cash in bank, redemption fund, and amount due from approved correspondents. Corresponding information is still shown in the reserve tables, but the percentage of legal reserve held is based on the amount of specie and legal tenders in bank, the redemption fund and the amount on deposit with reserve agents, not in excess of the legal limit available. As illustrating the difference resulting from the change, it is shown that while banks in reserve cities, exclusive of central reserve cities, by the former method of computation, held a reserve of 27.64 per cent, their legal reserve was but 24.33 per cent.

From September 30, 1901, to September 15, 1902, there was an increase of \$418,581,617.54 in the aggregate resources of the reporting banks, the principal items of increase being, loans and discounts, \$261,511,562.29; U. S. bonds, \$12,570,520; due from national and other banks, \$35,217,372.29. There was an increase in capital stock of \$50,193,537, in surplus and other profits of \$65,048,357.81, and in individual deposits of \$271,520,660.60.

Comparing conditions on September 30, 1892, with those shown in the last report, it will be seen that the number of active associations has increased from 3,773 to 4,601, or a net increase of 828. The aggregate resources of the associations increased during the decade \$2,603,834,015; loans and discounts, \$1,109,086,393; bonds on deposit as security for circulation, \$160,978,460, and specie and legal-tender notes, \$157,119,741 and \$37,489,673, respectively. While the capital of the associations increased only to the extent of \$18,962,402, the surplus and undivided profits are now greater than in 1892 by \$155,086,287. The volume of individual deposits increased from \$1,765,422,984 to \$3,209,273,894, or nearly 82 per cent. While the outstanding circulation has increased \$174,568,511, or about 122 per cent, there was no material increase until subsequent to March 14, 1900, the date of the act authorizing the issue of circulation to the par value of bonds on deposit.

#### BONDS AND CIRCULATION.

At the close of March 13, 1900, the day preceding the approval of the act authorizing the issue of national bank circulating notes to the par value of bonds on deposit, the Treasurer held securities for that purpose to the amount of \$243,651,420; on October 31, 1901, he held \$329,833,930; on October 31, 1902, \$338,352,670, of which approximately 95 per cent were in 2 per cent consols of 1930.

The amounts of each class of bonds on deposit to secure circulation on dates named from March 13, 1900, are shown in the following table:

Class.	Mar. 13, 1900.	Oct. 31, 1900.	Oct. 31, 1901.	Oct. 31, 1902.
Loan of 1908-1918, 3 per cent.....	\$56,164,820	\$7,756,580	\$3,983,780	\$6,056,720
Funded loan of 1907, 4 per cent.....	130,302,250	13,544,100	6,032,000	8,248,450
Loan of 1925, 4 per cent.....	14,697,850	7,503,350	2,911,100	2,208,600
Loan of 1904, 5 per cent.....	21,996,350	1,293,000	268,900	1,100,900
Funded loan of 1891, 2 per cent.....	20,490,150	1,019,950	12,500	.....
Consols of 1930, 2 per cent.....	.....	270,006,600	316,625,650	320,738,000
Total.....	243,651,420	301,123,580	329,833,930	338,352,670

During the year 1902 circulating notes were issued to new associations, to replace redemptions, and to banks increasing their issues, in the sum of \$133,309,440, of which notes of the denomination of \$5 amounted, approximately, to \$25,000,000; \$10, \$57,000,000; \$20, \$38,000,000; \$50, \$4,000,000, and \$100, \$8,000,000.

The amount of each denomination outstanding at the close of the year and on prior dates indicated is shown in the following table:

Denominations.	Mar. 13, 1900.	Oct. 31, 1900.	Oct. 31, 1901.	Oct. 31, 1902.
Ones.....	\$348,275.00	\$347,552.00	\$346,729.00	\$345,984.00

One thousands.....	27,000.00	27,000.00	25,000.00	25,000.00
Unredeemed fractions.....	32,409.00	33,085.00	34,315.00	35,431.50
Total.....	254,026,230.00	331,613,268.00	359,832,715.00	380,398,109.50
Circulation secured by lawful money.....	38,004,155.00	32,784,203.00	31,634,101.00	44,614,920.50
Circulation secured by bonds.....	216,022,075.00	298,829,065.00	328,198,614.00	335,783,189.00

The volume of circulating notes issued from December, 1863, to October 31, 1902, was \$2,630,795,575, of which \$2,250,397,465 has been redeemed. During the past year there was received for redemption at the redemption agency of the Department notes amounting approximately to \$175,000,000, of which \$57,000,000 were in good condition and returned to the banks of issue, and the balance redeemed and destroyed. Of the total amount sent to the Department for redemption, \$145,000,000, or over 80 per cent, came from the cities of New York, Boston, Chicago, Philadelphia, and St. Louis, and nearly 50 per cent (\$85,000,000) from the city of New York alone. The cost of assorting this volume of notes, including transportation charges, was 92.444 cents per \$1,000. The aggregate cost of redemptions for the year was \$153,796.33. In addition to this expense, the banks paid \$1,633,309.15 semiannual duty on circulation, \$57,625 for plates from which notes were printed, and \$307,296.63 examiners' fees, and \$1,833,430.79 tax on capital and surplus, making a total expense of \$3,985,457.90.

At the close of the report year there were 11 banking associations in operation, with an aggregate capital of \$5,660,000, and with bonds deposited with the Treasurer to the amount of \$340,000, which had not

issued circulating notes. Included in the number are some associations which never have availed themselves of the privilege of issuing notes.

#### ORGANIZATION OF NATIONAL BANKS.

The act of 1863 provided for the organization of national banking associations to continue in operation for the period named in their articles of association, but not for a longer period than twenty years from February 25 of that year. Under the provisions of this act 488 associations were organized, of which 273 are still in existence.

On June 3, 1864, the national-bank act of 1863 was repealed and reenacted with certain important amendments. Associations under this act have been incorporated to the number of 5,173, of which 3,607 are in active operation.

The act of 1870 authorized the organization of banks whose notes were redeemable in gold. Only 10 associations of this character were organized, 7 of which are still in operation, but were converted into currency banks under authority of the act of February 14, 1880. Three of these associations were closed by liquidation.

The last amendment affecting the organization of national banking associations formed a portion of the act of March 14, 1900, and empowered the Comptroller of the Currency to authorize the organization of banks with minimum capital of \$25,000 in places having population not exceeding 3,000. From the date of the passage of the act to October 31 last there has been organized 805 associations with capital less than \$50,000, generally with \$25,000, the minimum amount authorized under that act. One of the banks of this class was placed in charge of a receiver and 13 in voluntary liquidation, leaving 791 in active operation.

Organizations, liquidations, failures, and number of banks in active operation at the close of the report year are shown in the following table:

Act of—	Organized.	In voluntary liquidation.	Insolvent.	Active.
1863 .....	488	180	35	273
1864 .....	5,173	1,215	351	3,607
1870 .....	10	3	.....	7
1900 .....	805	13	1	791
Total .....	6,476	1,411	387	4,678

From March 14, 1900, to October 31, 1902, there were organized 1,212 associations, with total capital of \$70,159,500, and bond deposit as security for circulation of \$17,321,550. Banks to the number of 407, with capital of \$49,060,000, were organized under the provisions of the act of 1864, and 805, with capital of \$21,099,500, under the act of March 14, 1900.

Organizations by classes, States, and geographical divisions during the period named are shown in the following table:

NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, TO OCTOBER 31, 1902.

States, etc.	Capital, less than \$50,000.		Capital, \$50,000 or over.		Total organizations.		Bonds deposited.

Section 5154 of the Revised Statutes of the United States provides, in part, that any bank incorporated by special law or organized under a general law of any State may become a national banking association upon execution of articles of association and organization certificate by a majority of the directors of the State bank, upon authority of shareholders representing two-thirds of the stock. During the period covered by the foregoing table, 158 State banks, with capital of \$11,490,000, were converted into national banking associations, of which 107, with capital of \$2,835,000, were of the class authorized by the act of March 14, 1900, and 51, with capital of \$8,655,000, under authority of the prior act. While the act cited provides that the capital of any State bank converted into a national bank shall be the same as it existed immediately before conversion, the law is construed as prohibiting conversion with a less amount of capital than that required by a bank of primary organization.

Where a bank with capital less than the necessary amount desires to convert, it is required to increase the capital to the requisite amount under the laws of the State, prior to the execution of the articles of association and organization certificate. When a State institution, to be converted, has filed with the Comptroller all the papers incident thereto and deposited the requisite amount of bonds as security for circulation, an examination is ordered to determine whether the assets are of a character which a national-banking association can lawfully hold. If assets, the holding of which contravenes the provisions of the national-banking law, are found, their disposition is required prior to the issue of certificate authorizing the beginning of business. It is frequently found advisable to place the State bank in liquidation and organize anew, as is required in the case of the organization of a bank to succeed an unincorporated bank. This course has many advantages in that it enables the organizers to obtain more desirable shareholders, more choice assets, and to begin business with the amount of capital required by law actually paid in cash.

State or private banks reorganized as national banking associations since March 14, 1900, numbered 363, with aggregate capital of \$20,935,000. Of these banks, 242, with capital of \$6,715,000, were with individual capital of less than \$50,000, and 121, with capital of \$14,220,000, of the larger class.

Banks of primary organization numbered 691, with total capital of \$37,734,500, of which 456, with capital of \$11,549,500, were of the class authorized by the act of March 14, 1900, and 235, with capital of \$26,185,000, with individual capital of \$50,000 or over.

In the following table is given a summary of national-bank organizations from March 14, 1900, to October 31, 1902:

Classification.	Conversions.		Reorganizations.		Primary organization.		Total.	
	No.	Capital.	No.	Capital.	No.	Capital.	No.	Capital.
Capital less than \$50,000 ...	107	\$2,835,000	242	\$6,715,000	456	\$11,549,500	805	\$21,099,500
Capital \$50,000 or more....	51	8,655,000	121	14,220,000	235	26,185,000	407	49,060,000
Total.....	158	11,490,000	363	20,935,000	691	37,734,500	1,212	70,159,500

In the year ended October 31, 1902, 470 banks were chartered, with \$31,130,000 capital, of which 302, with capital of \$7,905,000, were of the smaller class, and 168, with capital of \$23,225,000, with individual capital of \$50,000 or over. There was an average of one and a half banks organized on every secular day of the year.

On October 31, 1901, the authorized capital stock of national banking associations in active operation was \$663,224,195, and on October 31, 1902, \$713,435,695. The net increase was, therefore, \$50,211,500, which, however, includes \$365,000, the capital of banks in liquidation whose bonds have not been withdrawn and the stock account closed.

The increase of capital by newly organized associations was \$31,715,000, including the capital of new banks, which increased their capital subsequent to organization and by old associations increasing their capital \$43,506,500. During the year 72 associations were closed by voluntary liquidation or expiration of charter, the capital of the banks being \$22,190,000. Banks liquidated under section 5220, United States Revised Statutes, numbered 63 with capital of \$21,025,000, and expirations of corporate existence, 9 with capital of \$1,165,000. The reduction of capital by the action of shareholders of active associations amounted to \$3,135,000, and by insolvent banks, \$50,000.

#### SHAREHOLDERS OF NATIONAL BANKS.

In Table No. 10 of the Appendix is shown the number of shareholders and shares of stock held by shareholders in banks located in each State and geographical division, as appears from the copies of lists of shareholders filed in this office as of the first Monday of July last. The number of shareholders was 330,124 and the number of shares of stock 8,001,433. In the case of a limited number of banks which were conversions of State institutions, the par value of shares ranges from \$10 to \$200. The par value of stock of banks of primary organization is uniformly \$100, and this also is the value of the stock of a majority of the converted banks.

#### VOLUNTARY LIQUIDATION.

##### EXPIRATION OF CORPORATE EXISTENCE AND REORGANIZATION.

Within a period of three years subsequent to the establishment of the national banking system, 14 associations had been placed in voluntary liquidation under the provisions of section 5220 of the Revised Statutes of the United States—that is, by vote of shareholders owning two-thirds of capital stock. Of the number, however, 3 were reorganized under similar titles and 1 was absorbed by another association.

During the existence of the system, year ended October 31, 1902, 1,288 associations, with aggregate capital of \$210,065,060, were liquidated under authority conferred by the act cited, of which, however, 136, with capital of \$38,555,000, were reorganized under similar titles. It is understood that some of the banks which were placed in liquidation were absorbed by other associations, but the records of this office do not contain sufficient information on this point to enable even an approximate estimate to be made of the number.

Under the provisions of the act of February 25, 1863, 98 banks were organized, whose corporate existence ran for a period of but 19

years, in consequence of which, their charters expired in 1882. Up to the close of the report year, 1902, 123 banks, with aggregate capital of \$18,979,500, reached the termination of their corporate existence and were closed under the provisions of section 7 of the act of July 12, 1882. Of the number, 75, with capital of \$12,557,900, reorganized under similar titles. Summarizing the foregoing, it appears that, under the provisions of both acts cited, 1,411 banks, with capital aggregating \$229,044,560, passed out of the system.

#### LIQUIDATION AND CONSOLIDATION.

The national currency act, which follows closely the material features of the banking law of the State of New York, contains no statutory provision authorizing the consolidation of banking associations in the manner provided by the New York law. The law of that State empowers shareholders owning at least two-thirds of the capital stock of the interested corporations to consent in writing to consolidation, and authorizes the directors of each corporation to enter into an agreement for consolidation, prescribing the terms and conditions, the name of the new or consolidated bank, the directorate, term of charter, manner of converting shares of the old into shares of the new or consolidated bank. When such agreement has been filed with and approved by the State superintendent of banks, the consolidated corporations become a single corporation, with the same franchises, rights, liabilities, etc., of the constituent corporations.

The act provides that dissenting shareholders shall be paid the value of their stock, and the stock so surrendered held and disposed of by the new corporation for its own benefit.

The only reference to the subject of consolidation in the national-bank act appears in the act approved July 14, 1870 (U. S. Rev. Stat., sec. 5223), and is to the effect that any association closing its affairs (by voluntary liquidation), under authority of law, for the purpose of consolidating with another association, shall not be required to deposit lawful money to provide for its outstanding circulation, but its assets and liabilities shall be reported by the association with which it is in process of consolidation.

By implication, this provision would appear to authorize the assignment of bonds on deposit with the Treasurer of the United States to secure the circulation of the liquidating bank to the absorbing association, and require the maintenance of a redemption fund for the outstanding issues of the bank which has gone into liquidation. With the redemption of issues of the closed bank would follow the issue of a like amount of notes of the absorbing association. As a matter of fact, this permissive feature in full has never been availed of by an association absorbing the business of one placed in liquidation, as it has been found more advantageous to deposit lawful money to redeem the notes of the liquidated bank and to simultaneously issue new notes of their own on bonds deposited.

Consolidation therefore can only be effected by one of the following methods:

First. Without an increase of capital the directors of the absorbing bank may enter into a contract with the directors or agents of the liquidated association to purchase its assets, assume liabilities to depositors and other creditors, and to pay to shareholders for their

stock the value of assets purchased in excess of liabilities to depositors and other creditors, less any expenses incident to liquidation.

Second. By increasing the capital stock of the absorbing bank to an amount equal to that of the liquidated bank, the additional shares may be sold to stockholders of the latter, consent thereto having been previously obtained from shareholders of the absorbing association. As the law is construed as requiring the payment of capital, original or on account of increase, in money, and not in "evidences of debt," the right to accept assets representing stock of the closed bank, and to issue therefor certificates in the continuing bank is not recognized. In every such case shareholders of the closed association are paid the value of their stock, the proceeds being available in payment of shares to which they may be entitled in the absorbing corporation.

The preemptive right of shareholders to participate pro rata in an increase is well recognized, and it is generally incorporated in the articles of association. In order to avoid possible litigation, the course usually pursued is to secure waivers of right to participate from shareholders of record. Provision having thus been made for shareholders of the closed bank, the directors of the continuing bank are at liberty to contract for the purchase of assets and the assumption of liabilities to depositors and other creditors of the liquidated bank.

Third. The remaining method, and one occasionally pursued, is to place the interested banks in voluntary liquidation, under section 5220 of the United States Revised Statutes, organize anew, and acquire, in the manner hereinbefore outlined, the business of the liquidating associations. This enables the incorporators to place the stock as they may determine.

In view of the foregoing it is recommended that section 5223 of the Revised Statutes of the United States be amended to provide, in effect, for consolidation of national banks on the lines of the law of the State of New York, except that the corporate existence of the closing bank shall be terminated as provided by section 5220, and that where the capital stock of the absorbing bank is increased for the purpose in conformity with the provisions of section 5142 that the new stock may be issued to shareholders of the closing association upon surrender and cancellation of their old shares at the book value of the stock of the absorbing bank, but not less than par. It is also suggested that in the event of the acquirement of business of a closed national banking association by another association, but without the consolidation of shareholders' interests, that upon increase of the capital stock of the absorbing bank for the purpose, directors of the association shall be authorized by vote of shareholders representing two-thirds of the stock to sell the additional shares as the interests of the association may demand, regardless of the recognized preemptive right of shareholders to participate pro rata when an increase is effected for purposes other than of consolidation.

The consolidation of business interests, in general, throughout the country has had its counterpart in the banking business, as evidenced by liquidations of national banks during the past year for consolidation either with institutions of the same class or State banks or trust companies. Of the total number of liquidations effected the business of 46 associations was absorbed by other national banks, 11 by State banks or trust companies, and but 15 closed to go out of business. All of the banks liquidated in New York City, Chicago, St. Louis,

Albany, Boston, Baltimore, Cleveland, Detroit, Omaha, Newark, N. J., and Lowell, Mass., were absorbed by other national banks. The two associations closed in the city of New Orleans were absorbed by trust companies.

In New York City the National Commercial Bank was absorbed by the Broadway National, and the Ninth National by the Citizens' National. The Merchants' National and Albany City National, of Albany, were absorbed by the National Commercial Bank. In Chicago the Merchants' National was absorbed by the Corn Exchange National, and the Metropolitan National by the First National. The Continental National Bank of St. Louis was absorbed by the National Bank of Commerce. In Boston six associations were closed, the National Shawmut absorbing the Third and the National Bank of the Commonwealth; the National Suffolk, a reorganization of the old Suffolk National, acquired also the business of the Washington National; the State National absorbed the National Hide and Leather, and the National Bank of Redemption the business of the Shoe and Leather National.

In the city of Lowell, Mass., the First, the Merchants, and the Railroad were liquidated and reorganized as the Union National. There was but one liquidation in the city of Baltimore, the Continental National, the business of which was absorbed by the National Bank of Commerce. The Century and the Metropolitan National banks of Cleveland were liquidated, the former being absorbed by the Colonial National and the latter by the American Exchange National. The Preston National Bank of Detroit was closed for the purpose of amalgamation with the Commercial National. The Omaha National Bank acquired the business of the National Bank of Commerce of that city. The Second and the Newark City National banks of Newark, N. J., were closed, the business of the former being absorbed by the Union National and that of the latter by the National Newark Banking Company.

As a result of some of the amalgamations the stock of the absorbing bank was increased for the purpose of providing for the shareholders of the closed institutions, but as the evidence of increase in the capital of an association is confined to report of action by shareholders and payment of additional capital, it is not known to what extent increased capital has been sold to those interested in the associations which were closed for consolidation.

#### EXTENSION OF CORPORATE EXISTENCE OF NATIONAL BANKING ASSOCIATIONS.

The act of July 12, 1882, provided that any national banking association organized under the act of February 25, 1863, or subsequent acts, may at any time within two years next previous to the date of expiration extend its corporate existence for a term of not more than twenty years by amending the articles of association; that the amendment shall be authorized by the consent, in writing, of shareholders owning not less than two-thirds of the capital stock; that the board of directors shall cause such consent to be certified to the Comptroller of the Currency accompanied by an application for approval of the amendment; that such amended articles shall not be valid until the Comptroller shall

give his certificate that the association has complied with all the provisions required to be complied with; that upon receipt of the application and certificate of the association a special examination shall be made to ascertain the condition of the association, and that if the condition is shown to be satisfactory, by the special examination or otherwise, certificate of approval of extension shall be granted.

Section 5 of the act provides that any shareholder not assenting to amendment for extension shall give notice in writing to the directors within thirty days from date of the certificate of approval of his desire to withdraw, in which case he shall be entitled to receive from the bank the value of the shares so held by him, to be ascertained by an appraisal.

The act cited is construed as conferring discretion upon the Comptroller as to the date on which he shall issue certificate approving extension of the corporate existence of a national banking association which has complied with the provisions of law in relation to the amendment of the articles; that is, while the act apparently authorizes the issue of a certificate at any time within two years prior to the date of expiration of corporate existence, it is held that the approval of the extension must be based upon the condition of the association as shown from the report of an examination made a short time prior to expiration of the original charter, and that, as the right of a shareholder to give notice of intention to withdraw is required to be made within thirty days from date of granting of extension, the certificate of extension is issued on or about the date of expiration of charter.

There is nothing in the law relating to extension which requires a meeting of stockholders or the giving of notice to them of the date of termination of corporate existence. The position is taken that shareholders are presumed to know the limit of the corporate existence of the association in which they are interested, and that they will conclude that their right of dissent to extension begins to run from the date of issue of certificate of extension; that is, from the date of termination of the original charter. Under the law as it exists, without the initiative is taken by the board of directors or shareholders desiring to effect an extension, the corporate existence of an association will expire by limitation without action by stockholders.

It is within the power of directors controlling a two-thirds interest to effect the necessary amendment for extension without advising the minority of their purpose, and were the Comptroller's certificate to be issued at a long time (within two years) prior to the date of expiration, minority shareholders might have no knowledge of the conditions and thus forfeit their rights to give notice of intention to withdraw. The law does not require the publication of notice of extension of charter, although it has been the policy of the office to require the publication of the certificate for a period of at least thirty days from date of issue.

In the interest of stockholders of national banks the acts of July 12, 1882, and April 12, 1902, should be amended to provide for amendment of articles of association in relation to extension in the same manner as other amendments of the articles are effected; that is, by calling a meeting of shareholders, notice to be given by publication or mail thirty days in advance, unless otherwise provided by the articles

of association or the by-laws, and the adoption of a resolution to extend for an additional period of twenty years. Such an amendment to the acts might also well be supplemented by a provision for publication of certificate of extension, and that the certificate shall not be issued until the day on which the old corporate existence ends, except in the event of termination of charter on Sunday or holiday, in which event the certificate should be issuable on the day prior.

The condition of an association proposing to extend can be satisfactorily ascertained only by an examination made within two or three months prior to termination of charter. Immediately upon receipt of report of examination the office is able to determine whether certificate of extension will be issued and to advise the bank in interest of that fact. An association which has been in operation for a period of twenty years is occasionally found to have acquired a certain amount of undesirable assets, some of which may be held in contravention of the provisions of the banking law. Losses and assets of the character referred to are, as a rule, required to be disposed of prior to approval of request for extension of charter.

On and after July 14, 1902, the corporate existence of existing associations organized in 1863 and extended under the act of July 12, 1882, terminated by limitation. On April 12, 1902, the act was approved empowering the Comptroller to issue certificates of extension to associations reaching the termination of their second corporate existence, which amended their articles of association in the manner provided for extensions under the act of July 12, 1882. From July 14 to October 31, 1902, certificates approving extension for a second period were issued to 24 banks, with capital stock of \$3,665,000. The corporate existence of one bank in this class expired by limitation. The bank was succeeded by an association organized for the purpose, under another title. During the next year—that is, from November 1, 1902, to October 31, 1903, 248 associations will reach the termination of their second corporate existence, all of which, with the exception of 19, occur on February 24, 1903.

Under the act of July 12, 1882, up to October 31, 1902, the corporate existence of 1,961 associations, with capital of \$455,395,365, was extended. The charters of 169 banks, with capital of \$30,469,000, were extended during the last report year. The corporate existence of one association, organized in 1863, and of eight organized in 1882, terminated by expiration. Seven of these associations, however, were succeeded by newly organized associations with similar titles. During the year ending October 31, 1903, the charters of 174 associations will expire unless extended in conformity with the provisions of the act of July 12, 1882.

#### INSOLVENT NATIONAL BANKS.

The Comptroller reports with satisfaction that fewer national banks have failed during the current year than during any similar period within the past thirteen years. Not only have there been fewer failures, but the total liabilities were much less.

During the year covered by this report only two failures of national banks occurred, and one bank, which went into voluntary liquidation May 20, 1897, was placed in the hands of a receiver for the purpose of collecting an assessment from the stockholders to cover a deficiency in assets the liquidation of which did not yield sufficient to pay the claims of creditors in full.

The aggregate liabilities of the two banks closed during the year were \$369,943.55 and the unsatisfied claims against the liquidating bank placed in the hands of a receiver amounted to \$138,492.82.

From April 15, 1865, to October 31, 1902, 406 banks have been placed in the hands of receivers, with aggregate liabilities amounting to \$186,731,459, against which claims were settled amounting to \$144,272,471, or 71.91 per cent. Compared with results in this respect, as shown by the report of the preceding year, there was a decrease of 3.44 per cent in the percentage of claims paid. This is largely to be attributed to the closing of the receiverships of the Spring Garden and Keystone national banks of Philadelphia, Pa., during the year. The percentage of claims paid by these trusts to liabilities was considerably below the average.

During the year the affairs of 22 receiverships were finally closed, leaving in operation on November 1, 1902, 78 trusts, of which 24 are on the inactive list awaiting the disposition, principally, of pending litigation before they can be finally terminated. The liabilities of the 22 receiverships closed during the year aggregate \$12,187,916, on which payments have been made amounting to \$7,588,730, or 62.26 per cent.

The claims proved by creditors of the 310 trusts finally closed since April 15, 1865, amounted to \$92,419,880, on which payments have been made amounting to \$66,274,058, or 71.71 per cent, the loss to creditors being approximately 28 per cent. Dividends at the rate of 100 per cent and interest in full or in part were paid by 208 banks, and the average rate of dividends paid by the total number of banks liquidated through receiverships since the beginning of the national system including offsets and loans paid is 78.15 per cent.

Geographically, the greatest number of failures of banks which have been liquidated (80) occurred in the Western States, followed by the Middle Western States with 67, the Eastern States with 59, the Southern States with 58, the Pacific States with 30, and the New England States with 16. Creditors of banks which failed in the New England States sustained an average loss of less than 11 per cent; in the Middle Western States, 15.20 per cent; the Eastern States, 24.26 per cent; the Pacific States, 31.37 per cent; the Western States, 22.45 per cent, and the Southern States, 32.27 per cent.

The liquidation of insolvent banks, including receivers' salaries, legal expenses, etc., has been effected at an average cost of about 8.9 per cent of the total collections.

Special effort has been directed during the year to the termination of receiverships, the payments of dividends, and the reduction of expenses, and the following table shows the number that were finally closed since the date of the last report, and their capital stock, liabilities, liabilities paid, and percentage of claims paid to total liabilities.

## INSOLVENT NATIONAL BANKS CLOSED DURING THE YEAR.

Title and location of bank.	Capital stock.	Liabilities.	Liabilities paid.	Percentage of liabilities paid.
First National Bank, Austin, Tex. <sup>a</sup> .....	\$100,000			
Union National Bank, Denver, Colo.....	500,000	\$1,711,731	\$1,774,052	103.64
Bankers and Merchants National Bank, Dallas, Tex.....	500,000	159,952	109,758	68.62
Dover National Bank, Dover, N. H.....	100,000	174,629	182,827	104.69

State National Bank, Vernon, Tex.....	100,000	64,452	34,815	54.02
Total.....	4,850,000	12,187,916	7,588,730	62.26

<sup>a</sup>Restored to solvency and resumed business.

An examination of the reports relating to the liquidation of insolvent national banking associations develops the fact that the total amount of claims proved against all trusts placed in the charge of receivers, from the date of the first failure in 1865 to October 31, 1902, aggregated \$139,389,202, and that the approximate loss was \$37,956,941. Practically the affairs of every bank which failed prior to 1892 have been finally liquidated, and in calculating the total amount of loss it has been assumed that trusts still open will be finally liquidated at an average loss not greater than 25 per cent.

For the purposes of comparison there is submitted herewith a statement of the annual (average) deposits in active national banking associations, and the ratio of annual loss sustained by creditors of insolvent national banks to the average deposits, together with the amount of claims proved and aggregate and average loss sustained by creditors.

Annual (average) deposits in active national banks, 1865-1902.....	\$1,202,871,178
Total claims proved against insolvent national banks.....	139,389,202
Total loss to creditors (actual, 1865-1892, and estimated at 25 per cent of claims, 1893-1902).....	37,956,941
Average annual loss.....	998,867
Average rate per cent of loss on claims.....	27.23
Average (annual) rate per cent of loss based on average deposits in active national banks.....	0.083

In the Appendix will be found tables containing information in detail in regard to the failure and liquidation of each bank placed in the hands of a receiver since the beginning of the national-banking system.

During the past year there have been two notable instances of the resumption of banks which had been closed by the Comptroller and placed in the hands of a receiver. The First National Bank of Austin, Tex., closed August 3, 1901. Its total liabilities amounted to \$638,958.60, among which was the claim of \$358,208.89 for money deposited by the treasurer of the State of Texas. Through the efforts of friends of the bank the sum of \$133,000 was paid in, the bank

reorganized and taken out of the hands of the receiver. The creditors, including the State treasurer, were all paid in full and the bank restored to a solvent condition.

On June 27, 1901, the Seventh National Bank of New York was closed by the Comptroller and a receiver appointed. A reorganization was effected after a thorough investigation of the affairs of the bank, a sufficient sum of money was paid in to increase the unimpaired capital to \$1,700,000, and on November 12, 1901, the bank was reopened for business, all of the claims of the creditors being paid in full, with interest.

The Comptroller takes great satisfaction in reporting the very favorable termination of the affairs of the Chestnut Street National Bank, of Philadelphia, Pa. When this bank failed in December, 1897, its affairs were found in a very unfavorable and involved condition, and it was estimated that even with the collection of 100 per cent of the stockholders' liability, the assets of the bank would come far short of paying its liabilities in full. After the failure of the bank, through the efforts of the Comptroller of the Currency and the receiver of the bank, the former president of the bank was induced to assign to the receiver his equity in a large portion of the stock and bonds of the Philadelphia Record in the hope that something might in this way be saved to the creditors of the bank. Since the date of this assignment the affairs of the Philadelphia Record have been practically managed by the receiver of the Chestnut Street National Bank and his associate assignee of the Chestnut Street Trust Company.

In addition to managing the affairs of this property so ably and well that its earnings have been fully maintained and its value greatly increased, these two officers advanced at their own risk, without any hope or chance for profit to themselves, a very large sum of money to pay off the original indebtedness underlying the claim of the bank, thus preserving the equity belonging to the creditors.

On May 15, 1902, the Record securities held by the receivers were sold at public auction for the sum of \$2,874,800. From the proceeds of this sale the receiver of the Chestnut Street National Bank has received the full amount of the claim of the bank, amounting to over \$1,190,000, with interest. The sum thus realized has increased the assets of the receivership so that not only will all the creditors of the insolvent bank be paid in full with interest, but the assessment paid by the stockholders will be returned to them and there will probably be a further sum realized from this and the other assets of the bank.

This is such an unusually satisfactory result of the liquidation of an insolvent bank that the Comptroller feels justified in thus calling attention to it, and wishes to commend the efficient action of his predecessor, Hon. Charles G. Dawes, Comptroller of the Currency, and particularly the ability and rare fidelity to their trusts shown by Mr. George H. Earle, jr., receiver of the Chestnut Street National Bank and assignee of the Chestnut Street Trust Company, and Mr. Richard Y. Cook, his associate assignee of the Chestnut Street Trust Company.

Though opposed by bitterly contested litigation by many of the very people whose true interests they were protecting, these men have not only steadfastly performed their duty, but have personally assumed great risks for the protection of their official trusts. The final result so fully vindicates their course that no further comment is necessary, but the Comptroller feels it is due to them to thus place the facts of the case on official record.

## CIRCULATING NOTES OF INSOLVENT NATIONAL BANKS.

- At the suggestion of and on forms submitted by Hon. Charles N. Fowler, chairman of the Committee on Banking and Currency, whose careful study and investigation of currency problems have added so much to the information gathered on this subject, there was prepared in this office a table giving in detail the essential statistics in regard to the notes of insolvent national banks. This table is given in report No. 1425, H. R. 13363, Fifty-seventh Congress, but to render this information accessible in connection with the Comptroller's report it is reproduced in the Appendix, Table No. 101.

## THE NATIONAL BANKING SYSTEM.

On February 25, 1903, the national banking system will have been in existence forty years.

The principal objects had in view by the framers of the creative law were the making of a market for the loans which the Government was making and the furnishing of bank-note currency secured by bonds which would circulate at par with Government issues and supplant the heterogeneous mass of currency then in circulation, worth par to a certain extent, but in many instances only a fraction of the nominal value.

Prior to 1863 such issues represented a large proportion of the currency of the country and from 1810 to 1842 ranged from a minimum of 48.27 per cent in 1810 to a maximum of 75.06 per cent in 1832, the average for the entire period exceeding 60 per cent. In 1843 the volume of money in the country amounted to \$148,563,608, of which \$58,563,608 represented bank notes. The percentage of bank notes on that date was 39.39, a fall from 51.13 in the year prior. From 1844 to 1863 a very nearly uniform ratio of bank notes to total money of the country was maintained, the percentage of the former averaging approximately 45. At the close of the fiscal year ended June 30, 1863, the total money in the country amounted to \$674,867,283, of which \$238,700,000 was in State bank notes, \$411,167,283 Government issues, and the balance specie.

The first issue of national-bank circulation was in December, 1863. In 1865 State-bank notes were legislated out of existence by the imposition of a prohibitive tax on their circulation. In 1867 national-bank notes formed 41.08 per cent of the money in the country, and continued at that rate, approximately, until 1871, when it rose to 43.74 per cent, amounting to about 44.71 per cent in 1872 and nearly 45 per cent in 1873. From the latter date there was a rapid annual decline to 1890, when such issues represented only a slight amount in excess of one-tenth of the circulating medium of the country. In 1893 the percentage was 12; in 1896, 13.02; declined to 11 in 1898 and 1899, but rose to 14.17 in 1900, to 14.49 in 1901, and to 14.84 in 1902. At the close of the last fiscal year, of the total money in the country, \$2,563,266,958, but \$380,476,334 was in bank-note currency.

National-bank notes do not appear to have formed as large a proportion of the circulating medium of the country as was anticipated, the primary causes being:

(1) The volume of greenbacks (legal tenders) issued, the extensive use of instruments of credit, and enormous coinage of gold and silver. The coinage from bullion and worn and mutilated coins, from January 1, 1863, to October 31, 1902, aggregated \$2,554,798,487.42, of which \$1,777,738,637.50 was gold, \$741,024,759.50 silver dollars and subsidiary silver, and \$36,035,090.42 minor coins. The recoinage from 1863 to 1873 was very limited, but information as to the exact amount is not available. The records in the office of the Director of the Mint show, however, that from 1873 to 1902, inclusive, recoinage of gold amounted to \$58,296,863.74; of silver, \$64,199,671.12; of minor coins, \$3,652,216.15, an aggregate of \$126,148,751.01, or a fraction less than 5 per cent of the total coinage from 1863 to 1902.

(2) Restriction on issues of notes of the denomination of \$5 to one-third of the amount issuable by any association subsequent to March 14, 1900. The evident intent of Congress in incorporating this restriction of the act of March 14, 1900, was to limit the total issues of notes of that denomination to one-third of the aggregate amount issued. As a matter of fact, this proportion has not been exceeded since 1874. The year prior to the passage of the act notes of this denomination amounted to but 31 per cent of the total, declined in 1900 to 21, to 16.2 in 1901, and to 16.1 in 1902.

(3) Inelasticity, by reason of the monthly limit of the amount which may be withdrawn from circulation by depositing lawful money therefor.

Section 9 of the act approved July 12, 1882, limits the amount of lawful money which may be deposited with the Treasurer of the United States by national banks reducing their circulation to \$3,000,000 during any calendar month.

The repeal of this provision is respectfully recommended, as its removal from the statute would, it is believed, add to the elasticity of national-bank circulation. It has served its purpose, and there does not appear to be any good reason why it should continue longer in force.

The principal causes which led to this enactment were the following:

Banks reducing their circulation were not subject to assessment for the cost of transportation and redemption of their notes covered by a deposit of lawful money, there being no means of charging reducing banks with the expense of redeeming their notes until their deposit of lawful money was exhausted. The effect of this was that many banks apparently took advantage of the unrestricted privilege of reducing their circulation for the purpose of escaping the expense and trouble of redeeming their notes through the medium of the 5 per cent redemption fund, thereby unjustly imposing upon the Government and the other banks the entire burden of redeeming their notes, and after depositing lawful money to reduce their circulation immediately proceeded to increase it in a like amount, thus, while deriving the full benefit of their circulation, bore none of the expenses incident to its redemption.

The act of June 20, 1874, which conferred upon the banks the privilege of retiring their note issues at will, contemplated that such reductions would be made during periods of redundancy only and not for the purpose of throwing upon the Government and the other banks the burden of redeeming their notes.

This abuse was one of the causes which led to the adoption of the three-million limitation in the act of July 12, 1882, and also to the incorporation in the same act of the provision that "all national banks which have heretofore made or shall hereafter make deposits of lawful money for the redemption of their circulation shall be assessed \* \* \* for the cost of transporting and redeeming their notes redeemed from such deposits subsequent to June 30, 1881."

The effect of this latter provision was to materially reduce the average rate of assessment for redemptions of all the national banks since the passage of the act of July 12, 1882, and to place it beyond the power of reducing banks to make the Government and the other banks bear the expense of redeeming their notes.

Another reason for the adoption of the limitation referred to was that the lawful money deposited by reducing banks for the redemption of their circulation was required to be held as a trust fund by the Treasurer of the United States, available only for redemption of notes of the banks when presented which made the lawful money deposit.

The practical operation of this law was to withdraw from circulation and lock up in the Treasury of the United States lawful money equal to the amount of national-bank notes covered by the deposit thereby contracting the currency to that extent, as none of such deposit could be liberated until the national-bank notes were presented for redemption. On a number of occasions during the period this deposit was required to be carried as a trust fund it reached the sum of over \$100,000,000.

Subsequent legislation, however, provided a remedy for this evil. Section 6 of the act of July 14, 1890, authorized the covering into the Treasury, as a miscellaneous receipt, all balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made or thereafter received to redeem their circulating notes, and provided for the redemption of such notes from the general cash in the Treasury, the Government assuming liability therefor.

Thus it will be seen that two of the principal reasons which contributed to the restrictive legislation referred to no longer prevail as a necessity for continuance of this limitation provision in the statute, leaving but one other cause then advanced as an argument for this enactment to be considered in connection with its repeal, namely, the danger and possibility of too great a contraction of bank-note currency by reason of the temptation offered the banks to avail themselves of the greater profit to be derived through withdrawal and sale of their bonds held as security for circulation, by the prevailing high premium on bonds, particularly at a time when the legitimate business needs of the country demanded an increase rather than a reduction of circulation.

Subsequent experience, however, has demonstrated that there were very slight grounds for this apprehension.

When circulation was limited by law to 90 per cent of the par of the bonds deposited, the market value of the bonds and the 10 per cent margin over note issues were incentives to the banks to curtail their circulation whenever the premium on the bonds became exceptionally high, or whenever they needed more loanable funds, as more money was at their disposal after reducing their circulation and selling their bonds by 10 per cent plus the premium on the bonds than they had before.

The act of March 14, 1900, however, minimized the temptation to operations of this character by increasing the issue of circulation to par of the bonds, thereby giving to the banks dollar for dollar of their bond deposit. Since this enactment, therefore, the only incentive for banks to operate in the securities of the Government is the premium on the bonds. The volume of circulation, however, does not appear to have been materially affected by transactions of this character, either before or since the adoption of the three million limitation in the act of July 12, 1882, either in periods of stringency or redundancy of national-bank circulation.

The act of June 3, 1864, provides for the surrender by the banks of their own notes in sums of not less than \$1,000 and the return to them of a like amount of their bonds. While it was and still is within the power of the banks under authority of this provision to retire the whole amount of their note issues which may come into their possession, notwithstanding the three-million limitation in the act of July 12, 1882, the reduction of circulation through this source has been inconsiderable.

The act of June 20, 1874, provided for a reduction of circulation by a deposit of lawful money with the Treasurer of the United States equal to the amount of the notes to be retired. While this act contained no limitation as to the amount of the lawful money which could be deposited in any one month, the records of the Comptroller's office show that during the period from June 20, 1874, to July 12, 1882, on which latter date the act was approved, limiting lawful money deposits for reduction of circulation to three million a month, this limit was not exceeded except on six occasions. In February, 1876, the lawful money deposited for this purpose amounted to \$3,739,547; in March, 1876, to \$5,000,259; in January, 1880, to \$3,375,000; in February, 1881, to \$13,954,749; in March, 1881, to \$5,740,035; and in April, 1882, to \$3,852,970, and these deposits, with the single exceptions of February and March, 1876, appear to have been due to causes other than a desire on the part of the banks to avail themselves of the premium on the bonds.

The large deposits of lawful money in February and March, 1876, may be attributed partly to a call for redemption of the 5 per cent bonds and partly to the high premium on the bonds at that time.

The large deposit of lawful money in January, 1880, was principally due to the purchase by the Government in open market of over 100 millions of 5 and 6 per cent bonds for cancellation which had previously been refunded into 4 per cents.

The \$19,694,784 of lawful money deposited in February and March, 1881, was induced by a bill under consideration in Congress to provide for the refunding of a large portion of the public debt bearing interest at the rate of 5 and 6 per cent, which matured on or about July 1 of that year. The national banks held \$210,000,000 of these maturing bonds, and this refunding bill provided that after May 1, 1881, the date of the maturity of the 5 per cent bonds, the proposed new 3 per cent bonds would be the only securities receivable for circulation, and that bonds on deposit as security for circulation upon which interest had ceased should be withdrawn within thirty days from the date interest ceased or the bank might be placed in the hands of a receiver. Other features of this bill were equally severe upon the

banks, and the only alternative left them appeared to be to deposit lawful money to retire their circulation and reduce their bond deposit to the minimum. Alarmed by this proposed legislation, 141 banks deposited lawful money to reduce their circulation in order to withdraw their bonds before the bill became a law. This bill passed both houses of Congress, but was vetoed by the President on March 3, 1881.

The \$3,852,970 deposit of lawful money in April, 1882, was the result principally of the refunding operations of the Government. In 1881 the 5 or 6 per cent bonds were extended at  $3\frac{1}{2}$  per cent, and in 1882 these latter bonds were changed into 3 percents. The banks held \$259,000,000 of these bonds.

The restriction against an increase in circulation within six months from the date circulation was last reduced was repealed by the act of March 14, 1900.

The limitation against a reduction of circulation in excess of \$3,000,000 a month should also be repealed.

Bank-note circulation secured by bonds should be unrestricted except as to limiting the maximum amount of such issues to the capital of the respective banks as now provided by law. The volume of circulation should be governed by the business needs of the country. If the banks are expected to increase their note issues to meet unusual and temporary demands for more money in their respective communities, they should be as free to promptly retire the whole or any portion of such issues when the demand for money has subsided. Many banks refrain from increasing their circulation during such periods of commercial activity because of their inability to promptly retire it upon a return to normal business conditions.

A repeal of the three million limitation, it is believed, will contribute materially to the elasticity of the currency.

(4) Insufficient profit, as evidenced by the comparatively limited amount of circulation issued subsequent to the removal of restrictions by legislative enactments on July 12, 1882, and March 14, 1900.

The act of February 25, 1863, as amended by the acts of June 3, 1864, and July 12, 1870, limited the amount of national-bank circulation issuable to \$354,000,000, to be apportioned to associations in the States and Territories according to representative population. Each association with capital not exceeding \$500,000 was entitled to issue notes on the security of bonds to 90 per cent of its capital; banks with capital exceeding \$500,000, and less than \$1,000,000, 80 per cent; with capital exceeding \$1,000,000, but not exceeding \$3,000,000, 75 per cent; and with capital exceeding \$3,000,000, 60 per cent.

The act of June 20, 1874, authorized an additional issue of circulating notes to the amount of \$55,000,000, but it was not until 1882 that all banks were placed on the same basis with respect to the amount of circulation issuable on bonds. By the act of July 12, 1882, every association was entitled to receive from the Comptroller and to issue circulating notes to the extent of 90 per cent of the bonds deposited, the amount of the bond deposit being limited to 100 per cent of capital. The act of March 14, 1900, authorized issues to the par value of bonds deposited not exceeding the capital stock.

The subjoined table gives the paid-in capital stock of the national banks from 1863 to 1874, inclusive, and authorized capital from 1875

to 1902; the outstanding circulation, 1863 to 1902; the percentage of the circulation to capital from 1863 to 1874, inclusive; and the percentage of circulation outstanding to the maximum amount issuable from 1882 to 1902. In 1865 the capital of the associations in existence was \$393,200,000; circulation outstanding, \$204,600,000, or 52.03 per cent of the capital. In 1866 the circulation had increased to 70.54 per cent of the capital, and, with slight variations, continued at that rate until 1874. From 1875 to 1881 the percentage varied from 63.62 to 76.96.

The year 1882 witnessed a material reduction in the public debt, large importations of coin in excess of exports, increase of capital stock of national banks, and their note issues, which resulted in a material increase in the stock of money in the country. From October 31, 1881, to October 31, 1882, the capital stock of national banking associations was increased about \$25,300,000, and circulating notes outstanding to 81.6 per cent of the maximum amount issuable on bonds deposited. Notwithstanding a further increase during the following year of about \$25,000,000 in capital, the percentage of circulation outstanding to the maximum issuable fell to 75.48 per cent. From that date to October 31, 1892, there was a rapid decline in outstanding circulation to 27.54 per cent, a trifle in excess of one-fourth of the amount which might have been issued. In 1893 the percentage of outstanding issues increased to 33.31 and in 1899 to 44.37. The act of March 14, 1900, resulted in a substantial increase, but in October of that year the issues amounted to but 52.42 per cent of the amount issuable; on October 31, 1901, were 54.25 per cent, and on October 31, 1902, fell to 53.32 per cent.

The capital, circulation outstanding, and relation of the latter to capital and to maximum amount of circulation issuable, respectively, as indicated, are shown in the following table:

Year.	Capital. <sup>a</sup>	Circulation.		Year.	Capital. <sup>a</sup>	Circulation.	
		Amount.	Per cent. <sup>b</sup>			Amount.	Per cent. <sup>b</sup>
	<i>Millions.</i>	<i>Millions.</i>			<i>Millions.</i>	<i>Millions.</i>	
1863	7.2			1883	516.6	350.8	75.48

1882	491.6	361.0	81.60	1902	713.4	380.5	53.32

<sup>a</sup> Paid-in capital stock 1863 to 1874; authorized capital 1875 to 1902.

<sup>b</sup> Percentage of circulation to capital stock 1863 to 1881; to 90 per cent of capital 1882 to 1899 and to capital, 1900 to 1902.

## PROFIT ON CIRCULATION.

The profit on national-bank circulation, secured by \$100,000 of bonds of various classes available for that purpose, at the market price of securities on October 31, 1899 to 1902, as calculated by the Government actuary, is shown in the table following. In the computation money is assumed to be worth 6 per cent per annum.

On October 31, 1902, consols of 1930 were quoted at 110.087. The profit on circulation secured by that class of bonds, in excess of 6 per cent on the investment, is shown to be \$684.40, or 0.622 of 1 per cent. The profit on circulation secured by 3 per cent bonds, loan of 1908, is 0.163 per cent, and on security of 4 percents of 1907 is 0.185 per cent. By reason of the high premium on the loan of 1925, namely, 36.3859, and the short time the loan of 1904 has to run, there is no profit over 6 per cent on the amount invested in bonds on circulation covered by these two classes of securities.

The table referred to is as follows:

PROFIT ON NATIONAL-BANK CIRCULATION, BASED ON A DEPOSIT OF \$100,000 BONDS, ON OCTOBER 31, 1899, 1900, 1901, AND 1902.

[Prepared by the Government Actuary.]

1899.

a This profit was somewhat greater than shown, but indeterminate, owing to uncertainty of date of maturity.

b Loss.

## TAXES AND OTHER EXPENSES.

From 1863 to 1902 the banks have paid to the Government, in tax on circulation, over \$90,000,000; on capital and deposits, from 1863 to 1883, nearly \$69,000,000; on capital and surplus, under the war revenue act of 1898, about \$7,000,000. In addition to these taxes, the banks paid over \$4,500,000 for the redemption of their circulation from 1874, the year the national bank redemption agency was established, to June 30, 1902, and from 1883 to 1902 about \$630,000 for plates from which circulating notes were printed, or an aggregate, approximately, of \$171,000,000.

The expenses of the office of the Comptroller of the Currency from 1863 to the close of the fiscal year 1902 were \$9,353,482.87, and including contingent expenses not paid by the Comptroller, but from the general appropriation for contingent expenses of the Treasury Department, the amount did not exceed, it is estimated, \$19,000,000, which is about one-ninth of the taxes paid and other expenses hereinbefore enumerated.

## STATE BANKS, PRIVATE BANKS, AND TRUST COMPANIES.

In obtaining statistics relating to the condition of banks and banking institutions in the country organized and operating under authority of the laws of the States, the usual course has been followed in calling upon the officers of States having supervision of institutions of that character for abstracts or copies of reports filed therewith. From States having no laws providing for the submission and compilation of reports, requests were addressed to each incorporated and private bank for a statement of condition, of date June 30, 1902.

From official sources and from banks direct returns have been received relating to the condition of 7,889 incorporated and private banks and bankers, with aggregate resources of \$7,355,110,843. Reports were received from 5,397 commercial banks, 417 loan and trust companies, 1,036 savings banks, of which 657 were of the mutual class, i. e., without capital stock, and from 1,039 private banks and bankers.

The capital stock of the State banks is \$276,991,398 and individual deposits \$1,698,185,287. The number of reporting banks of this character is 414 greater than in 1901, and there is shown an increase in assets of approximately \$149,000,000.

In 1901 reports were received from 334 loan and trust companies having aggregate resources of \$1,614,981,605. For the current year reports have been received from 417 corporations of this character, having assets of \$1,983,214,707.

Returns were obtained from 1,039 private banks and bankers against 917 in 1901. The assets of banks of this character, on the latter date, were \$149,104,346, and in 1902 they were \$169,364,435.

## SAVINGS BANKS.

Following the established custom of the office, returns relating to the condition of savings banks of the country are divided into two classes:

(1) Mutual institutions—that is, those without capital stock and operated by trustees for the benefit of depositors; and

(2) Stock savings institutions, the depositors being paid an agreed rate of interest on their accounts, the shareholders participating in the profits, as in the case of commercial banks.

Reports relating to the condition of 1,036 banks of both classes have been received, showing deposits of \$2,750,177,290 to the credit of 6,666,672 depositors. Included in the deposits in banks of this character are the amounts to the credit of depositors in savings departments of commercial banks located in the State of Illinois, the general returns from the Illinois State banks having savings departments being incorporated in the abstract of State bank reports. The average amount to the credit of each depositor in savings institutions in the country is \$412.53 as compared with an average deposit of \$408.30 in 1901.

Table IV in the Appendix is an abstract of the reports of condition of both mutual and stock savings institutions. The returns show that there are in operation 657 mutual institutions, all of which, with the exception of 1 in West Virginia, 4 in Ohio, 5 in Indiana, 1 in Wisconsin, and 11 in Minnesota, are located in the New England and Eastern States. The deposits in banks of this class aggregate \$2,380,200,804. The deposits in savings banks in New England States aggregate \$1,000,175,255, an average of \$380.72. Deposits in the Eastern States amount to \$1,307,630,523, or nearly 50 per cent of the deposits in all savings banks in the country. The number of depositors in banks in this geographical division is 3,044,148 and the average account \$429.55. The average amount to the credit of depositors in States with the highest averages are as follows: Rhode Island, \$519.64; New York, \$471.68; Ohio, \$465.94; Connecticut, \$454.07; New Hampshire, \$407.29. The maximum average deposit to the credit of depositors in stock savings banks is shown in California, the amount being \$703.55. The deposits in the stock savings banks are but a slight amount in excess of 10 per cent of the total in all savings institutions.

The principal items of resources of savings banks, both mutual and stock, are as follows: Loans secured by real estate, \$994,639,330; loans on other securities, \$281,679,772; United States bonds, \$58,140,124; State, county, and municipal bonds, \$481,568,530; railroad bonds and stocks, \$375,623,513; bank stocks, \$34,520,802; other stocks, bonds, etc., \$411,631,200. These institutions carry but a relatively small amount of cash in bank, namely, \$30,877,338, but they have to their credit with other banking institutions \$121,396,971.

The following table is a comparative statement of number of depositors, amount of deposits, and average deposit account in the savings banks of the United States in each State and geographical division for the years 1900-1901 and 1901-2.

NUMBER OF SAVINGS DEPOSITORS, AGGREGATE SAVINGS DEPOSITS, AND AVERAGE AMOUNT DUE TO DEPOSITORS IN SAVINGS BANKS IN EACH STATE IN 1900-1901 AND 1901-1902.

α Estimated.

b Partially estimated. 55 banks, with \$96,890,262 savings deposits, report 269,038 depositors.

ε Savings deposits in State institutions having savings departments; abstract of reports included with State banks.

A careful examination has been made of the returns submitted by State officials and banks with respect to the rates of interest paid on savings accounts. By reference to the following table it will be observed that the maximum rate is 4½ per cent and the minimum 2¼ per cent. It is impossible to state with exactness the average rate, but it would appear to approximate 3½ per cent. The table referred to is appended.

AVERAGE RATE OF INTEREST PAID DEPOSITORS IN SAVINGS BANKS.

State.	Rate.	State.	Rate.
Maine <sup>a</sup> .....	3.27	West Virginia <sup>c</sup> .....	4
New Hampshire <sup>a</sup> .....	3.40	North Carolina: <sup>c</sup>

<sup>a</sup> From official report.

<sup>b</sup> 1901.

<sup>c</sup> Unofficial.

In Table IX in the Appendix is shown the growth of savings banks in the United States, as indicated by the number of depositors, amount of deposits, and average deposit for the years 1820, 1825, 1830, 1835, 1840, and 1845 to 1902, inclusive. From 1883, with the exception of the year 1894, there is shown to have been a steady increase in the volume of deposits in institutions of this character. The statement of volume of money in the country and the average per capita, issued by the Treasury Department in June last, gives the per capita of money in circulation as \$28.53. The savings bank returns show that if the deposits were distributed each inhabitant would be entitled to \$34.89, or \$6.36 per capita more than the average per capita circulation.

CONSOLIDATED RETURNS FROM STATE SAVINGS BANKS AND TRUST COMPANIES.

For purposes of comparison there is given herewith a table showing the principal items of resources and liabilities of banks other than national in the years 1897 to 1902, inclusive:

Items.	1897.	1898.	1899.	1900.	1901.	1902.
Loans .....	\$2,231,013,262	\$2,480,874,360	\$2,100,940,630	\$3,013,449,827	\$3,444,377,672	\$3,942,592,907
Bonds .....	1,248,150,146	1,304,890,322	1,521,395,160	1,723,830,351	1,935,625,964	2,094,496,729
Cash .....	193,094,029	194,913,450	210,884,047	220,667,109	240,145,951	250,815,787
Capital .....	380,090,778	370,073,788	368,746,648	403,192,214	430,401,557	499,621,208
Surplus and undi- vided profits ..	382,436,990	399,706,497	418,798,087	490,195,787	538,866,278	614,509,805
Deposits .....	3,324,254,807	3,664,797,296	4,246,500,852	4,780,893,692	5,518,804,859	6,005,847,214
Resources .....	4,258,677,065	4,631,328,357	5,196,177,881	5,841,658,820	6,681,567,334	7,355,110,843

In the following table are shown the principal items of resources and liabilities of national banks on July 16, 1902, of other banks and banking institutions on or about June 30, and consolidated returns from all reporting banks:

	4,535 national banks.	7,889 other banks.	12,424 banks.
Loans .....	\$3,246,516,854	\$3,942,592,907	\$7,189,109,761
United States bonds .....	459,973,034	63,273,580	523,246,564
Other bonds .....	484,956,796	2,031,223,199	2,516,179,995
Cash .....	597,287,908	250,815,787	848,103,695
Capital .....	701,990,554	499,621,208	1,201,611,762
Surplus and profits .....	482,377,442	614,509,805	1,096,887,247
Deposits .....	3,222,841,897	6,005,847,214	9,228,689,111
Aggregate resources .....	6,008,754,975	7,355,110,843	13,363,865,818

There will be found in the Appendix, Table XII, information obtained with respect to the capital, amount, and average rate per cent of dividends paid by State banks and by loan and trust companies submitting information of that character for the year ended on or about June 30, 1902. Reports covering the subject were received from 2,160 banks, with capital of \$122,874,222, showing the payment of dividends to the amount of \$10,941,669, or an average of 8.9 per cent, and from 337 of the loan and trust companies, the dividends paid amounting to \$12,407,163, on capital stock of \$138,348,992, or an average rate of 8.97 per cent.

## STATE AND PRIVATE BANK FAILURES.

Mr. Frank Green, managing editor of Bradstreet's, has courteously furnished a summary of the information obtained by the Bradstreet agency relating to the number of State and private banks which failed during the year ended June 30, 1902, accompanied by a statement of the total liabilities and assets. The number of failures was 43, the assets of the banks being \$4,323,737 and the liabilities \$10,332,666. Included in the number of failures were 12 State banks, 10 savings banks, 20 private banks, and 1 trust company. Without recourse to the reports of receivers or assignees, presumed to be filed with the court appointing the liquidating agent, it is impossible to ascertain the results of liquidation of the affairs of banks of this character.

## BUILDING AND LOAN ASSOCIATIONS.

From the report of proceedings of the annual meeting of the United States League of Local Building and Loan Associations held at Put in Bay, Ohio, in July last is taken the following information relating to associations of that character for the year 1902 and the year prior.

The returns show that the number of associations in existence has declined during the past year from 5,356 to 5,302, and the aggregate assets from \$571,366,628 to \$565,387,069. The number of members, however, has increased from 1,495,136 to 1,539,593. The total expense of operating the associations during the year was slightly in excess of \$5,000,000, or about 1 per cent of the assets.

The following table exhibits the comparative condition of the association in the past two years:

States.	1900-1901.			1901-2.		
	Number of associations.	Total membership.	Total assets.	Number of associations.	Total membership.	Total assets.
1. Pennsylvania .....	1,115	281,980	\$110,493,510	1,168	299,573	\$110,817,281
2. Ohio .....	763	293,717	105,502,111	757	300,315	105,374,306
3. Illinois .....	572	85,000	47,896,148	546	80,850	43,684,289
4. New Jersey .....	326	97,115	45,554,964	327	100,700	46,599,451
5. New York .....	293	89,998	36,499,754	283	86,042	34,996,485
6. Indiana .....	408	103,812	29,637,826	403	112,822	29,292,668
7. Massachusetts .....	126	71,965	27,721,748	128	74,771	28,674,207
8. California .....	148	37,456	18,935,883	138	40,561	17,881,576
9. Missouri .....	174	33,000	11,448,394	148	27,000	9,394,372
10. Michigan .....	66	32,677	10,118,876	63	31,787	9,386,764
11. Iowa .....	79	20,000	5,170,247	63	18,000	4,645,046
12. Connecticut .....	16	13,147	4,157,804	16	13,082	4,245,648
13. Nebraska .....	60	15,000	3,697,356	59	17,926	4,314,744
14. Wisconsin .....	48	13,000	3,580,125	50	12,975	3,462,629
15. Maine .....	33	8,064	2,862,178	34	8,073	2,865,380
16. Kansas .....	40	10,000	2,814,138	40	9,974	2,807,966
17. Tennessee .....	23	4,339	2,665,631	20	4,157	2,428,450
18. Minnesota .....	34	5,000	2,278,510	15	2,300	1,191,720
19. New Hampshire .....	16	4,800	1,830,162	16	4,800	1,853,092
20. North Dakota .....	6	1,966	393,263	6	2,000	428,684
21. Louisiana .....				32	20,885	5,943,208
Other States .....				990	271,000	95,100,000
Total .....	1,010	273,100	98,108,000	990	271,000	95,100,000
Total .....	5,356	1,495,136	571,366,628	5,302	1,539,593	565,387,966

A statement of the aggregate receipts and disbursements of the building and loan associations for the year ended January 1, 1902, is herewith appended.

RECEIPTS, 1901.		DISBURSEMENTS, 1901.	
Cash on hand Jan. 1, 1901 .....	\$29,800,592	Mortgage loans.....	\$124,334,192
Paid-up stock.....	13,986,736	Pass-book loans.....	16,671,808
Weekly dues.....	122,395,856	Withdrawals stock and dividends...	124,863,792
Deposits.....	31,156,368	Withdrawals paid-up stock.....	29,525,200
Loans repaid.....	125,975,952	Withdrawal deposits.....	28,291,232

<b>Total.....</b>	<b>395,987,216</b>	<b>Total.....</b>	<b>395,987,216</b>

GROWTH OF BANKING IN THE UNITED STATES SINCE 1882.

The act of March 3, 1883, repealed the tax on capital and deposits of the banks imposed by section 5142 of the Revised Statutes of the United States. The following table shows the number of reporting banks, capital stock, and deposits, returns relative to which were received for the period ended May 31, 1882:

Class.	Number.	Capital.		Deposits.	
		Amount.	Per cent.	Amount.	Per cent.
National banks.....	2,239	\$477,200,000	67.01	\$1,131,700,000	39.7
State, etc.....	5,063	234,900,000	32.99	1,718,700,000	60.3
<b>Total.....</b>	<b>7,302</b>	<b>712,100,000</b>	<b>100.00</b>	<b>2,850,400,000</b>	<b>100.00</b>

From 1883 to the passage of the war-revenue act of 1898, taxing the capital and surplus of banks and bankers, official returns in full have only been obtainable with respect to the condition of State banking institutions located in States having officials charged with their supervision and the compilation of banking statistics. As a result, information relating to the banking business of the country in 1892 is not as complete as for 1882 and 1902.

In 1892 returns were received relating to 9,338 national and State banks and private banks and bankers, as follows:

Class.	Number.	Capital.		Deposits.	
		Amount.	Per cent.	Amount.	Per cent.
National.....	3,759	\$684,678,203	63.9	\$1,767,519,745	37.8
State, etc.....	5,579	386,394,845	36.1	2,911,594,571	62.2
<b>Total.....</b>	<b>9,338</b>	<b>1,071,073,048</b>	<b>100.00</b>	<b>4,679,114,316</b>	<b>100.00</b>

The increase in number of reporting banks over 1882 was 2,036; in capital, \$358,973,000, and in deposits, \$1,829,000,000; the increase in capital being 50 per cent, and in deposits 64.16 per cent.

In July, 1902, reports of condition were received from 4,535 national banks, and on approximate dates statements relating also to 7,889 State and private banks. Adding to these the number of banks making returns only of capital and surplus for taxation, the deposits of the

latter being estimated, it is shown that there are in active operation in the country 16,156 banks and bankers. In the following table the number, capital, and deposits are shown for the year 1902:

Class.	Number.	Capital.		Deposits.	
		Amount.	Per cent.	Amount.	Per cent.
National banks.....	4,535	\$701,990,554	52.4	\$3,222,841,898	33.2
State, etc.....	7,889	499,621,208	} 47.6	{ 6,005,847,214	} 66.8
Banks reporting for tax only.....	3,732	138,548,654			
Total.....	16,156	1,340,160,416	100.0	9,707,281,904	100.0

Since 1882 the number of banks has increased over 120 per cent, and since 1892, 73 per cent. During the first decade in question there was an increase of 50 per cent in capital, and from 1882 to 1902 of 88 per cent. From 1882 to 1892 deposits increased \$1,829,000,000, or 64 per cent, and from 1882 to 1902 the increase was \$6,857,000,000, or over 240 per cent.

In 1882 the capital stock of national banks represented 67.01 per cent of the capital of all banks; in 1892, 63.9 per cent, and in 1902, 52.4 per cent. The deposits in national bank associations in 1882 represented 39.7 per cent of the aggregate; in 1892, 37.8 per cent, and in 1902, 33.2 per cent. Eliminating, however, the deposits in mutual savings banks in each of the years mentioned, and basing the comparison on the deposits in national banks with capitalized State and private banks, it is shown that deposits in national associations represented, in 1882, 60 per cent of the total; in 1892, 54.9 per cent, and in 1902, 47 per cent. In number the national banks increased since 1882, 2,296, about 100 per cent, while State and private banks, excluding mutual savings institutions, increased from 4,434 to 10,964, or over 147 per cent.

#### MONEY IN THE COUNTRY.

Referring again to the statement with respect to the volume of money in the country, it is shown from the table compiled in the office of the Secretary of the Treasury that the volume of money represented by specie, bullion in the Treasury, United States and national-bank notes at the close of the last fiscal year aggregated \$2,563,200,000, the amount of coin, bullion, and paper money in the Treasury assets aggregating \$313,900,000, and in general circulation \$2,249,300,000. The amount of specie in circulation is admittedly not definitely known, but the figures presented are based upon the most careful estimate. The amount of gold and silver coin held by the national banks is shown by every report of condition filed with the Comptroller of the Currency. In calls upon State banks for reports of condition, a request is incorporated for a detailed statement of the character of money held, and while this information is generally given, reports frequently show merely the total specie or total cash on hand. In order to ascertain as nearly as possible the holdings of coin by banks located in States not reporting the exact amount, estimates have been made, based upon the holdings of national banks in such States. The results are incorporated in the following table:

GOLD, ETC., HELD BY NATIONAL BANKS ON JULY 16, 1902, AND BY OTHER BANKS AND BANKERS REPORTING TO THIS OFFICE ON OR ABOUT THE SAME DATE.

Classification.	National banks (4,535).	All other banks (7,889).	Total, all banks (12,424).
Gold coin.....	\$108,202,383	<i>b</i> \$106,152,188	\$214,354,571
Gold Treasury certificates.....	106,867,430		106,867,430
United States certificates for gold deposited.....	25,950,000		25,950,000
Gold clearing-house certificates.....	82,099,000		82,099,000
Silver dollars.....	10,379,556	<i>a b</i> 30,137,029	40,516,585
Silver, fractional.....	8,798,719		8,798,719

*a* \$12,567,265 and *b* \$10,125,909 in banks of island possessions not included in these returns.

TRANSACTIONS OF CLEARING HOUSES.

From reports made to the manager of the New York clearing house by the 97 clearing-house associations of the country for the year ended September 30, 1902, the volume of exchanges is shown to have amounted to \$116,021,618,003, compared with \$114,819,792,086 for the year 1901. The transactions of the New York Clearing House Association for the current year amounted to \$74,753,189,436, which was a decrease of \$2,267,483,058 as compared with the prior year. The clearings of the New York association amounted to 64.4 per cent of the total clearings reported. The settlements of exchanges of the

New York clearing house were effected by the use of only  $4\frac{1}{2}$  per cent of money—that is, approximately,  $3\frac{1}{3}$  billions in settlement of exchanges aggregating  $74\frac{1}{4}$  billions. In these settlements United States and clearing-house gold certificates to the extent of 99.97 per cent were used. The transactions of the assistant treasurer of the United States at New York with the clearing house during the year ended September 30 aggregated \$412,945,017.31.

#### COST OF OPERATION OF NATIONAL BANKING ASSOCIATIONS.

In May last a circular letter, of which the following is a copy, was addressed to every national banking association in operation on April 30, 1902:

TREASURY DEPARTMENT,  
OFFICE OF THE COMPTROLLER OF THE CURRENCY,  
Washington, D. C., May 28, 1902.

*To the Cashier:*

An investigation is now being undertaken to ascertain the relative cost of operation of national banking associations of various magnitudes; the average amount of loans and discounts and the average rate of interest received or discount charged on accommodations, as shown by the books and records of the banks during the year ended April 30, 1902. Accordingly I shall esteem it a favor to be furnished at your earliest convenience with information herewith requested relative to your bank, on the blank inclosed for the purpose.

“Cost of operation” should be confined to ordinary current expenses—that is, rent of banking premises, or, if the banking premises are owned, the amount representing interest on the investment at current rates; salaries and all incidental expenses except taxes, local or national. Do not include cost of banking house, furniture, and fixtures.

Please state, separately, the amount of taxes paid or to be paid for the last tax year as follows: (1) State, county, and local on realty (bank premises only) and on shares, by or for stockholders; (2) internal revenue on capital and surplus, act June 13, 1898, and (3) semiannual duty on circulating notes.

It is suggested that either the daily or weekly statements may be used in ascertaining the average amount of loans and discounts; if the former, the aggregate amount should be divided by the number of days during the year the bank was open for business; and, if the latter, the aggregate should be divided by 52.

The average rate of interest received on loans and discounts during the year in question should be calculated or carefully estimated.

The information submitted will be regarded as confidential and used solely in deducing general conclusions.

Respectfully,

WM. B. RIDGELY, *Comptroller.*

As the information desired was intended to cover the operations of banks which had been in existence for at least one year prior to April 30, in compiling the returns a number of reports from banks for fractional portions of the year have been excluded, as well as incomplete returns from a limited number of associations which had been in operation for a year or more. The available returns represent reports from 3,830 banks, classified as follows:

. Banks with capital of \$1,000,000 or over; \$500,000 and less than \$1,000,000; \$200,000 and over, but less than \$500,000; \$100,000 and over, but less than \$200,000; exceeding \$25,000, but less than \$100,000, and with capital of \$25,000.

In the Appendix, Tables Nos. 84 and 85 are given, showing:

First. The capital, cost of operation, etc., of each class of banks in the United States; and

Second. The same information, but classified by capital stock for each reserve city, State, and Territory.

In the following table is shown, by classes, the capital stock, cost of operation exclusive of taxes, average amount of loans and discounts, and percentage of cost of operation to loans, and average rates of interest received on loans and discounts.

Classification.	Number of banks.	Capital stock.	Cost of operation, exclusive of taxes.	Average amount of loans and discounts.	Percentage of cost of operation to loans and discounts.	Average rate of interest received on loans.	Excess of interest rate above expense rate.
Banks with capital of—						<i>Per ct.</i>	<i>Per ct.</i>
\$1,000,000 or over .....	102	\$167,205,700	\$13,991,128	\$1,051,957,949	1.33	5.17	3.84
\$500,000 or over .....	149	82,242,560	7,267,656	399,587,429	1.82	5.82	4.00
\$200,000 or over .....	551	140,001,800	12,595,602	618,101,337	2.04	6.26	4.22
\$100,000 or over .....	1,196	132,343,136	12,159,229	520,648,772	2.34	6.83	4.49
\$25,000 or over .....	1,541	83,142,820	8,526,600	307,221,685	2.78	7.40	4.62
\$25,000 .....	291	7,275,000	838,871	19,701,231	4.26	7.75	3.49
Total .....	3,830	612,211,010	55,379,086	2,917,218,403			

From the foregoing it appears that the cost of operation, based upon the average volume of loans and discounts, ranged from a minimum of 1.33 per cent for the largest class of banks, to a maximum of 4.26 per cent for banks with the minimum amount of capital stock. The average rates of interest received show a similar variation, but in inverse order.

In the following table is shown the amount of taxes paid to the General Government on capital and surplus under the war-revenue act of 1898, on circulating notes outstanding, and to the States, counties, etc., on shares of stock and banking premises. In relation to the State taxes it is to be said that the returns submitted do not show, in all cases, the amount of tax paid on banking premises in addition to that on shares of stock for the reason that the total tax assessed was represented by one amount. Of the \$14,485,804 taxes paid, \$11,310,787 represents the amount paid to the States, etc., and \$3,175,017 to the United States. The table relating to the amount of taxes paid is as follows:

## TAXES PAID.

Classification.	State taxes paid year 1901-2.			United States taxes paid year 1901-2.			Total of all taxes.
	On banking premises.	On shares.	Total.	On capital and surplus.	On circulation.	Total.	
Banks with capital of—							
\$1,000,000 or over .....	\$328,713	\$2,594,674	\$2,923,387	\$420,594	\$259,880	\$680,474	\$3,603,861
\$500,000 or over .....	175,248	1,331,518	1,506,766	239,138	173,024	412,162	1,918,928
\$200,000 or over .....	288,391	2,433,120	2,721,511	420,394	390,830	811,224	3,532,735
\$100,000 or over .....	223,353	2,458,499	2,681,852	393,918	402,403	796,321	3,478,173
\$25,000 or over .....	148,886	1,228,062	1,376,948	220,935	221,276	442,211	1,819,159
\$25,000 .....	11,473	88,850	100,323	15,768	16,857	32,625	132,948
Total .....	1,176,064	10,134,723	11,310,787	1,710,747	1,464,270	3,175,017	14,485,804

In the table following is shown the percentages based on capital stock of the cost of operation, exclusive of taxes; State and Government taxes, respectively; cost of operation, including all taxes, and

the amount and per cent of net earnings and dividends for the year ended March 1, 1902, of banks reporting cost of operation.

There, of course, is no question as to the greater relative expense of operating banks with the minimum amount of capital stock than of associations with the larger volume, but by comparing the percentage of cost of operation based on the average amount of loans and discounts with cost based on capital, it would appear that the higher rates of interest obtained by the smaller banks in a large measure offset the smaller relative cost of operation of the large banks. The cost of operation of the smallest class of banks, based on loans and discounts, is shown to be about three and one-fifth times greater than that of the largest class, while the cost of operation, exclusive of taxes based on capital stock of the smallest class of banks, is but 3.16 per cent greater than that of the largest class.

In connection with the cost of operation there is shown in the table referred to the amount of net earnings, dividends paid, and percentage of net earnings and dividends to capital for the year ended March 1, 1902, of banks reporting cost of operation. It will be observed that these percentages are not comparable with those relating to cost of operation, as the percentage of net earnings and dividends paid by banks with capital exceeding \$25,000 and less than \$100,000, generally \$50,000 and \$75,000, is shown to have been higher than any other class of banks.

The following tables contain a summary of the percentages of cost of operation, etc.:

	Percentages based on capital stock of—				Net earnings and dividends, year ended Mar. 1, 1902.			
	Cost of operation exclusive of taxes.	Taxes.		Cost of operation including taxes.	Earnings.		Dividends paid.	
		State.	United States.		Amount.	Per cent.	Amount.	Per cent.
Banks with capital of—								
\$1,000,000 or over....	8.37	1.75	0.40	10.52	\$22,277,175	13.32	\$13,603,715	8.14
\$500,000 or over.....	8.84	1.83	.50	11.17	9,806,638	12	6,232,525	7.58
\$200,000 or over.....	9.00	1.94	.58	11.52	17,575,010	12.55	11,641,593	8.32
\$100,000 or over.....	9.19	2.03	.60	11.82	16,124,902	12.18	11,050,182	8.35
\$25,000 or over.....	10.25	1.66	.53	12.44	11,801,664	14.19	7,488,749	9.01
\$25,000.....	11.53	1.38	.45	13.36	906,778	12.46	442,805	6.09

COST OF OPERATION OF LOAN AND TRUST COMPANIES IN THE DISTRICT OF COLUMBIA.

There are in operation in the District of Columbia four loan and trust companies, having united capital of \$4,450,000, the average volume of loans for the year ended April 30, 1902, aggregating \$11,011,349, on which interest was received at the rate of 4.73 per cent. The cost of operation for the year, exclusive of taxes, was \$226,122, or 2.05 per cent of the volume of loans. Taxes were paid to the District of Columbia, for all purposes, to the amount of \$8,786, and to the United States, on capital and surplus, \$11,259, or a total of \$20,045. The cost of operation, exclusive of taxes, based on capital stock, was 5.08 per cent, and including taxes, 5.53 per cent. The percentages of District and Government taxes to capital stock were one-fifth and one-fourth of 1 per cent, respectively. During the year in question the net earnings of these corporations aggregated \$364,838,

or 8.02 per cent. One of these institutions, having recently organized, has paid no dividends, but the remaining three paid \$201,250, or an average rate of 6.19 per cent.

#### BRANCH BANKS.

The inquiry is frequently submitted as to the right of a national bank to maintain a branch or agency, principally for the reception of deposits, elsewhere than at its banking house in the same or adjacent locality.

The only provision of law relating to branch banks, in the national-bank act, is found in section 5155, United States Revised Statutes, and reads as follows:

It shall be lawful for any bank or banking association, organized under State laws and having branches, the capital being joint and assigned to and used by the mother bank and branches in definite proportions, to become a national banking association in conformity with existing laws, and to retain and keep in operation its branches, or such one or more of them as it may elect to retain, \* \* \*

The granting of this special privilege to State banks and the absence of any similar provision in the law with respect to banks of primary organization have always been construed by the Comptroller to imply that banks of the latter class were not permitted to have branches. The section cited absolutely restricts branch banks of converted associations to such as have a definite proportion of the capital of the parent bank assigned to them, and it is not to be assumed that the law contemplated that associations of primary organization should be permitted to assign any portion of their capital to and operate branches.

This fact is further to be inferred from section 5138, United States Revised Statutes, which prohibits the formation of associations with less capital than \$200,000 in cities of population exceeding 50,000, and contains similar provision with respect to banks organized in places with less population than 50,000.

To permit the establishment of branch banks would not only render possible an evasion of the provisions of section 5138, but tend to discourage the organization of banking associations which, in the absence of such branches, might be formed.

Section 5134 provides in part that the organization certificate of a national bank shall show "the place where its operations of discount and deposit are to be carried on," and section 5190 that "the usual business of each national banking association shall be transacted at an office or banking house (not at offices or banking houses) located in the place (not places) specified in its organization certificate."

The word "place" and "at an office or banking house" have always been construed by the Comptroller to mean the legal domicile of the corporation, of which it can have but one, and this construction is sustained by the Solicitor of the Treasury in an opinion rendered August 10, 1899, on the question of the right of a national bank to establish and maintain an auxiliary cash room at some point distant from its banking house, for the purpose of receiving deposits and paying checks.

The Solicitor says:

This section (5190 U. S. R. S.) contemplates that the usual business of a national banking association shall be transacted at one office and banking house, and as receiving deposits and paying checks belong to the "usual business" of a bank, I am of the opinion that the statute does not authorize the establishment of an auxiliary cash room in a different part of the city for the purpose proposed. Besides, it may

be observed that if a national banking association can lawfully establish and maintain a separate office for receiving deposits and paying checks, it could as well establish as many of such auxiliary cash rooms in the city of its corporate residence as its business might require; and, indeed, the entire business of the bank may be parceled out and conducted in the same way all over the city.

The Supreme Court of the United States, in the case of *Armstrong v. Second National Bank*, 38 Fed. Rep., 886, involving, among other things, the question of the right of a national bank to cash a check elsewhere than at its banking house, held that—

Under this section (5190) it certainly would not be competent for a national bank to provide for the cashing of checks upon it at any other place than at its office or banking house.

If, therefore, it is unlawful for a national bank to cash a check elsewhere than at its banking house, it is likewise unlawful for it to discount notes or to receive deposits elsewhere, for one is as much a part of the "usual business" of a bank as the other.

While it is obviously impossible for a bank to transact its entire business within the four walls of any single building it is not held that the law contemplates that the "entire business," as distinguished from its "usual business," shall be transacted in its banking house.

In the case of *The Merchants' National Bank v. The State National Bank*, 10 Wall., 604, it was held in this connection that—

The provision requiring the "usual business" of the association to be transacted "at an office or banking house specified in its organization certificate" must be construed reasonably, and a part of the legitimate business of the association which can not be transacted at the banking house may be done elsewhere.

The question involved in this case was the right of the bank's officers to purchase gold elsewhere than at its banking house, and the court held that—

The gold must necessarily have been bought, if at all, at the buying or selling bank, or at some third locality. The power to pay was vital to the power to buy, and inseparable from it.

The "legitimate business" of a bank, therefore, which a reasonable construction of the law would permit to be done elsewhere than at its banking house would seem to be restricted to transactions similar in character to that involved in the decision quoted, and not the ordinary and usual business of receiving deposits and cashing checks.

The argument has been advanced that clearing-house associations are equivalent to branch banks, and the recognition by the national-bank act of the one affords warrant for the establishment of the other, but such argument has no apparent force, as the two institutions are entirely dissimilar in character and purpose. The principal object of the former is to facilitate exchange and to adjust balances between banks, while that of the latter is to transact the usual business of a bank with its customers.

While the national-bank act does not in express terms prohibit the establishment and maintenance of branch banks or agencies by associations of primary organization, the implication to that effect is clear, and the courts have held that what is implied is as effective as that which is expressed.

That the act does not contemplate the operation of branch banks by national banks of primary organization is evidenced by the fact that in 1892 a special act was approved authorizing the operation of a

branch by a Chicago national bank on the World's Fair grounds. In 1901 similar legislation was enacted by Congress in connection with the Louisiana Purchase Exposition, to be held in 1904.

## BRANCHES OF STATE BANKS.

With a view to ascertaining the extent to which branches are legally operative in the various States of the Union, a letter was addressed in August last to the proper State official in each State and Territory, in which information was requested as follows:

First. Whether or not branches or agencies are authorized by the banking laws of the State or the charter of the banks.

Second. If authorized, the regulations and provisions of law relative thereto.

Third. The names and location of banks operating branches and the number and location of the branches.

Replies have been very generally received to the request and hereinafter will be found a summary of the information submitted, arranged by States in their geographical order.

*Maine.*—There is no general provision of law authorizing State banks to establish branches. Trust companies created by special acts of the legislature have authority in their charters to establish branches, but the legislature of 1901 passed a general act which provides that no trust company shall establish a branch or agency until the same be authorized by a special act. This later legislation does not apply to trust companies already established and operating branches. The State banking department exercises supervising power over branches in conjunction with the corporation.

Trust companies having branches: Augusta Trust Company, at Winthrop; Waterville Trust Company, at Corinna, Dexter, Hartland, and Newport; Eastern Trust and Banking Company of Bangor, at Machias and Oldtown.

*New Hampshire.*—Bank Commissioner Baker states that there is no law directly authorizing the establishment of branches or agencies, but that he is not aware of any law which would prohibit such a practice within certain limits. No branches are in operation.

*Vermont.*—Branches or agencies are not authorized by the banking laws, nor by the charter of any bank.

*Massachusetts.*—There are no commercial banks other than national banks and trust companies in operation in the State.

The statute relating to the organization of banks of discount and deposit provides that they shall do business only at their banking house. This prohibition applies to savings banks.

By an act passed by the last legislature, chapter 365, section 2, the board of commissioners of savings banks have power to authorize, in writing, any trust company to maintain a branch office in the city or town in which its main office is located, for the purpose of receiving deposits, paying checks, and transacting a safe-deposit business.

The Old Colony Company and the State Street Trust Company of Boston have branches in operation in that city.

*Rhode Island.*—The General Laws, chapter 171, section 11, prohibit the establishment of branches except by authority of the general assembly.

The Industrial Trust Company of Providence has branches at Pawtucket, Newport, Woonsocket, Bristol, Pascoag, and Wickford; and the Manufacturers' Trust Company and the Union Trust Company at Providence, have, respectively, branches at East Greenwich and Olneyville.

*Connecticut.*—The law forbids the organization of any branch or agency, or the employing of any agent or person to make loans at any other place than the banking house.

*New York.*—Section 89 of chapter 689 of the laws of 1882, as amended by chapter 410 of the laws of 1898, permits a bank located in a city of over 1,000,000 inhabitants, with the approval, in writing, of the superintendent of banks, to open and keep one or more branch offices in such city for the receipt and payment of deposits and for making loans and discounts to the customers of such branch office, only providing that its certificate of incorporation shall so provide. No bank in this State has a charter which originally provided for branches; but a number of banks in the city of New York have amended their charters so as to include therein such provisions. Section 89 referred to provides in part that "before opening any branch office the approval, in writing, of the superintendent of banks shall be first obtained, and no discounts shall be made except such as may have been previously authorized by the board of directors." Penalty for violation of the act is \$1,000 for every violation.

The Bank of Jamaica (Long Island) has branches at Elmhurst, College Point, and Richmond Hill. The Brooklyn Bank has made arrangements for an office, but has not yet opened. The Corn Exchange Bank has 12 branches within the corporate limits of Greater New York. The Colonial Bank of New York has 5 branches. Far Rockaway Beach Bank has a branch at Rockaway Beach. The Hamilton Bank, The Mechanics Bank, The Mechanics and Traders Bank, The Twelfth Ward Bank, The Twenty-third Ward Bank, The Union Bank, and The Coney Island and Bath Beach Bank have each a branch in Greater New York; and The New York Produce Exchange Bank has 4 branches.

From the foregoing it is shown that 13 State banks located in New York are operating 33 branches.

*New Jersey.*—The laws of New Jersey are the most liberal, with respect to branches, of any State in the Union.

Section 7 of the general corporation act of 1896 provides that any corporation in this State may conduct branches in any other State or in foreign countries, and have one or more offices out of this State, and may hold, mortgage, and convey personal property out of such State, provided notice of such object is included in its certificate of incorporation. In 1889 an act was passed which provided that no corporation, bank, etc., should establish or maintain any branch or agency, nor have more than one place of business in the State without the approval of the board of bank commissioners. This act, however, was repealed in 1889. Prior thereto, however, The Asbury Park and Ocean Grove Bank had established a branch at Ocean Grove, and The People's Bank of East Orange a branch at South Orange.

*Pennsylvania.*—Branches or agencies of banks are not authorized by the laws of this State. One savings institution, in conformity with an amendment of its charter, obtained from the legislature an amendment having the approval of the court of common pleas of the county

in which the institution is located, and is endeavoring to establish a branch, but the question is now pending before the State attorney-general.

*Delaware.*—Banking privileges are not granted under general corporation law; nor are foreign corporations allowed to do banking business in the State. Banking powers in the State are only secured by special act of the legislature, in consequence of which each State banking institution is governed by the special creative act. The Farmers' Bank of the State of Delaware has branches at Wilmington, Dover, and Georgetown. The Sussex Trust and Safe Deposit Company is operating branches at Lewes, Georgetown, and Milton.

*Maryland.*—No provision for the operation of branches by State banks. (Report Comptroller Currency, 1896.)

*District of Columbia.*—The organization of banking institutions is confined to national banks and to loan and trust companies, under the act of October 1, 1890. Branches of national banks and trust companies are not authorized. There are a number of private banks, banking firms, and branches of saving banks doing business in the District without any special grant of authority other than the payment of an annual license tax to the District government.

*Virginia.*—Branches permissible, but none in operation. (Report Comptroller Currency, 1896.)

*West Virginia.*—Each bank must be operated under special charter in an independent way. State banks may hold stock in other banking corporations.

*North Carolina.*—There is no general law authorizing the establishment of branch banks. Most of the banks operate under special charters granted by the legislature, and in some instances the charters granted contain authority for the operation of branches.

*South Carolina.*—The Code of 1892 of the banking laws of State contains no authority for the establishment and operation of branches by State banking institutions.

*Georgia.*—Branches or agencies are not authorized, except in the charters of three banks. The banks referred to are as follows (location of branches not given): Bank of Southwestern Georgia at Americus, Farmers and Merchants' Bank of Senoia, and Oglethorpe Savings and Trust Company of Savannah.

*Florida.*—Banks are permitted to conduct branch offices. (Report Comptroller Currency, 1895.)

*Alabama.*—Section 1089 of the code of Alabama (1896), relating to the corporate powers of banks of discount and deposit organized in the State, provides in part that they (banks) "may fix and locate offices, agents, and agencies at pleasure in the State other than the principal place of business."

*Mississippi.*—Branches are authorized by the charters of the banks, not by any general banking law.

Banks having branches: Grenada Bank, Grenada, Miss., branches at Eupora and Ackerman; Hancock County Bank of Bay St. Louis, branch at McHenry; Tishomingo Savings Institution of Corinth, Miss., branch at Ripley; Oakland Bank, Oakland, Miss., branch at Charleston.

*Louisiana.*—Article 179, act 1902, allows, on the approval of two-thirds of the stock, the establishment of two branches, which must be in the same parish as the parent bank.

The Commercial Trust Company of New Orleans has two branches, but the location is not given.

*Texas.*—No State banks in operation. Prohibited by constitution.

*Arkansas.*—Governor states that “we have no banking laws in this State other than general banking laws, which have been established by custom and the law merchant.” Operation of branches discretionary with board of directors. (Report Comptroller Currency, 1895.)

*Tennessee.*—Under the law, branches of all corporations are permissible, the only requirement is that the charter be registered in the register’s office of the county where the branches are located. The law governing branches is the same as for the parent bank, and the branches are operated in all respects as the parent banks. No information submitted as to the banks operating branches.

*Kentucky.*—An examination of the corporation laws of the State indicates that there is no law authorizing the establishment of branch banks. The law is not construed as prohibitive. Banks operate branches, no specific information being submitted, however.

*Ohio.*—Branches are not authorized by law.

*Indiana.*—The law does not permit the operation of branches.

*Illinois.*—Branches are not authorized by law.

*Michigan.*—There is no law authorizing the establishment of branches. Agencies are permitted, which are restricted in their operations to the receiving and paying out of deposits and issuing exchange. Branches: “The Home,” “The Dime,” and “The Peninsula” savings banks of Detroit operate two branches each in that city. “The People’s Savings Bank of Detroit” has a branch, and also “The Lansing Savings Bank.”

*Wisconsin.*—Incorporated banks of Wisconsin can not, under the law, operate branches, except possibly in the large cities where the branches are located within the same municipality as the parent bank. The certificate of incorporation of a State bank must specify the particular city or town where the business of the bank is to be carried on. Branches: The Second Ward Savings Bank of Milwaukee operates two branches; the German American Bank of Milwaukee also operates a branch.

*Minnesota.*—No branch banking or branches, or any other financial institutions organized under State laws, can be permitted; nor can the banks of any other State establish branches in this State.

*Iowa.*—Neither State nor savings banks organized and transacting business under the present laws of the State are authorized to establish and maintain branches, either in the town or city where the banks are located or elsewhere. The law is construed as placing loan and trust companies, so far as their right to establish branches is concerned, upon the same footing as State and savings banks.

*Missouri.*—Specifically prohibited by statutory enactment.

*North Dakota.*—Branches or agencies not provided for by law.

*South Dakota.*—Branches or agencies not provided for by law.

*Nebraska.*—Neither the law nor the charters provide for branches.

*Kansas.*—Neither branches nor agencies provided for by law.

*Montana.*—Neither branches nor agencies provided for by law.

*Wyoming.*—The laws do not contemplate the establishment of branches or agencies.

*Colorado.*—No law authorizing the establishment of branches or agencies.

*New Mexico.*—The law has been held to prohibit the establishment of branches or agencies.

*Oklahoma Territory.*—No information submitted.

*Indian Territory.*—Section 8 of the act of Congress approved February 18, 1901, provides in part that any bank or trust company now or hereafter organized under the laws of Arkansas or any other State may transact such business in the Indian Territory as is authorized by its charter and is not inconsistent with the laws in force in the Indian Territory.

*Washington.*—The law neither authorizes nor prohibits branches.

*Oregon.*—There are no banking laws on the Oregon statute books, and there are, consequently, no parent or branch banks as recognized by the State in operation. The State issues no charters to banks nor has it on its statute books any laws pertaining to the operation of banks.

*California.*—Under special law, but covered by general agency law. The right of a bank to establish agencies has never been passed upon by the State supreme court. It is stated that "The law may permit agencies to be established within the county by the parent bank, but it certainly has no authority to conduct a general banking business." Foreign banking corporations have the right to establish agencies under the law, but have not greater corporate privileges than accorded State banks. Branches of foreign banks in operation in San Francisco: Anglo-California Bank, Comptoir National D'Escompte de Paris, London, Paris, and American Bank, Limited; Agency, Bank of British North America, Canadian Bank of Commerce, Wells, Fargo and Company's Bank, International Banking Corporation.

*Idaho.*—There is no law of the State in force in regard to banks or banking institutions operating branches or agencies.

*Utah.*—Laws of the State do not authorize corporate banks to conduct branches or agencies in the State. One private bank (name not given) has a branch.

*Nevada.*—Agents of foreign corporations doing business within the State must comply with local requirements relating to State and county license. Branches: The Bank of California, San Francisco, Cal., has a branch at Virginia City, Nev.; the State Bank and Trust Company of Carson City has a branch at Butler.

*Arizona.*—Branches and agencies appear to be authorized by section 140, title 1, chapter 7, of Revised Statutes, and also appear as one of the corporate powers. Foreign corporations must file certified copy of articles of association with the secretary of the State or Territory and county recorder of the county in which the principal office is located. The agent must be a bona fide resident of the county. Branches: The Bank of Arizona (Prescott), at Jerome; the Arizona Central Bank (Flagstaff), at Williams and Kingman; the Bank of Bisbee, at Naco; the Gila Valley Bank and Trust Company (Solomonville), at Morenci and Clifton.

#### BANKING IN THE NEW POSSESSIONS.

There are in operation in the Territory of Hawaii two national banking associations—one located at Honolulu and the other at Wailuku, on the island of Maui. The aggregate capital of these banks is \$525,000, their deposits \$646,938, and aggregate resources, \$1,489,319.

There are also in operation in the Territory, as shown by returns furnished to this office by the governor, three other incorporated banks, capitalized for \$850,000, and two private institutions with capital of \$1,300,000. The aggregate capital of all the banks relative to which information has been received is \$2,675,000; deposits, \$4,858,132; and total resources, \$8,755,641.

Subsequent to the passage of the act extending the laws of the United States over Porto Rico applications have been filed for authority to organize national banking associations at San Juan, P. R., and other places in the island. The question of authority for the organization of national banks in Porto Rico was submitted to the Attorney-General, who, under date of June, 1900, stated—

By letter of May 24 you [the Secretary of the Treasury] advised me that the Comptroller of the Currency is receiving applications for the granting of national-bank charters in the island of Porto Rico, and you request my opinion as to whether or not the national banking laws of the United States are now applicable to that island.

By the Paris treaty between the United States and Spain, Porto Rico was ceded to the United States and became subject to the jurisdiction of this Government. Before the ratification of the treaty of Paris the island had been in the occupation of the military forces of the United States, and the government of the same was carried on under the law of belligerent right by means of the military forces, under the direction of the President of the United States. This condition continued after the ratification of the treaty of peace until Congress, exercising the power to dispose of and make all needful rules and regulations respecting the territory belonging to the United States, passed the act entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," approved April 12, 1900. This act took effect on the 1st day of May, 1900.

Section 14 of said act is as follows:

"That the statutory laws of the United States not locally inapplicable, except as hereinbefore or hereinafter otherwise provided, shall have the same force and effect in Porto Rico as in the United States, except the internal-revenue laws, which, in view of the provisions of section 3, shall not have force and effect in Porto Rico."

By virtue of this provision, a broad extension of all the statutory laws of the United States, not locally inapplicable, is made to the island of Porto Rico, the only exception being the internal-revenue laws, which are excepted by name, and such other laws as are in the said act otherwise provided. This language is broad enough to extend to Porto Rico the laws relating to the organization and powers of national banks, unless there be in such laws something indicating that they are locally inapplicable to Porto Rico, or that they are so locally applicable to some other place or places of specific character as to make them practically inapplicable locally to Porto Rico. An examination of the various sections of the Revised Statutes and subsequent acts of Congress relative to national banks discloses no provisions which are locally inapplicable to Porto Rico. There seems to be in the structure of the national banking laws no general provisions which can not be carried into force and effect in Porto Rico equally with all of the various States and Territories to which the laws were originally applied. I can find no reason to hold that the statutes relative to the organization and powers of national banks have not, by section 14 of the Porto Rican act, above referred to, been extended to that island. The language of that section is broad enough, and in my opinion does authorize the organization and carrying on of national banks in Porto Rico.

As citizens of Porto Rico are not characterized as citizens of the United States by Congressional enactment, the position was taken that to effect the organization of a national bank would require at least five of the shareholders, to be elected as directors, to be citizens of the United States, and that at least three-fourths of the number, residents of the island for at least one year prior to their election and during their continuance in office. Pending the existence of conditions which would enable this provision of the law to be complied with, certain citizens of the United States organized The American Colonial Bank, under authority of a charter obtained from the State of West Virginia, which

institution has been in operation for some time. The application for authority to organize The First National Bank of Porto Rico at San Juan, by those interested in the bank named, was renewed from time to time, until in the early part of November, 1902, it was possible to comply with the conditions precedent to the organization of the association. The bank was chartered on November 10, with capital of \$100,000, and a board of directors elected, who are citizens of the United States, and the requisite proportion residents also of the island. It is understood to be the intention of the organizers to gradually liquidate The American Colonial Bank and transfer its business to The First National Bank of Porto Rico, and to increase the capital stock as conditions may demand.

Through the courtesy of the treasurer of Porto Rico the office has been placed in possession of reports relating to the eight incorporated banks in operation in the island, from which it appears that these institutions have a united capital of \$1,417,725, deposits of \$2,489,449, and assets of \$5,359,189.

The treasurer of the Philippine Archipelago has transmitted to this office copies of reports of condition of banks and banking institutions doing business therein. The last statements submitted were for the close of the year ended June 30, 1902, and relate to the condition of 11 banks, including branches. The reported capital was \$1,400,000, the deposits \$18,122,866, and the assets \$29,914,489. The cash holdings of these institutions were as follows:

United States gold, \$407,825; other gold coin, including bullion, \$22,886; United States silver dollars, \$88,680; United States fractional silver and other money not classified, \$73,027. United States notes to the amount of \$1,390,112 were held; Mexican pesos to the amount of \$4,364,066; Spanish-Filipino pesos and half pesos, \$1,531,106, and in other Mexican and Spanish-Filipino currency \$84,251.

The principal banking of the islands is conducted by the Hongkong and Shanghai Banking Corporation, the Chartered Bank of India, Australia, and China, and the Spanish-Filipino Bank. Since the date of reports transmitted to this office in 1901 the following corporations have engaged in business in these islands: The North American and Philippine Loan and Trust Company, the American Bank of Manila, the International Banking Corporation, the Guarantee Trust Company of New York. The savings bank and pawn shop is also still in operation at Manila. The individual statements of all of the reporting banks will be found in the appendix to this report.

#### FOREIGN BANKS OF ISSUE.

In publishing returns relating to foreign banks of issue special importance is placed on their holdings of specie, notes in circulation, and deposits, the latter including accounts current—funds due to other banks and bankers. The subjoined table, relative to the items mentioned, is reprinted from the Bulletin de Statistique. The data in the column headed "Capital" are from various sources, as indicated in the footnotes. It will be observed that the note issues of all the banks exceed the amount of specie, except in the case of the Bank of England, the Imperial Bank of Russia, and the Imperial Ottoman Bank. The excess of note issues over specie held is 3,521,700,000

francs. The liabilities of the banks on account of circulation, deposits, and accounts current aggregate 26,313,800,000 francs.

The following is the table referred to:

CAPITAL, SPECIE, CIRCULATION, ETC., OF THE PRINCIPAL FOREIGN BANKS OF ISSUE AT THE CLOSE OF THE FIRST QUARTER, 1902.

SAVINGS BANKS OF THE WORLD.

Statistics are hereinafter submitted relating to the number of depositors, amount of deposits, average deposit account, average deposit per inhabitant, and rate of interest paid to depositors by postal and other savings institutions in countries relative to which information has been obtained. It will be observed that returns submitted are for various dates from 1898 to 1902, inclusive.

Germany leads in the number of depositors, 13,854,927, the average deposit account being \$139.25 and the average deposit per inhabitant \$35.46. The number of depositors in savings banks in the United Kingdom and France is shown to be nearly equal, namely, 10,434,877 and 10,680,866, respectively. The average savings account in the banks of the United Kingdom is \$89.71, and of France, \$77.20. The per capita deposit, however, is more nearly equal, namely, \$22.53 in the United Kingdom and \$21.21 in France. The United States comes fourth in the number of savings depositors, having 6,666,672, the average account being \$412.53, and the per capita deposit, \$34.89.

The number of depositors in foreign savings banks is shown to be 66,383,587, with deposits to their credit of \$6,661,067,000. The deposits in foreign savings banks and those of the United States aggregate \$9,411,244,000, of which \$2,750,177,000, or over 29 per cent, represent the deposits in savings banks of the United States. The highest average deposit per inhabitant is \$72.45, in Denmark. The average deposit in Prussia is \$39.67, but when computation is based on all Germany the average is reduced to \$35.46. The deposit per capita in Australasia is \$38.82; in Norway, \$36.95; Belgium, \$34.61. Information relating to the rates of interest paid savings depositors is not complete, but so far as returns are received, it appears that there is but slight variation. The maximum rate is paid in Sweden, namely, 4 to 5 per cent; the German savings banks pay from 3 to 4 per cent; the English, French, and Australian, 2½ to 3 per cent; Canadian, 3 per cent; and United States, 2¼ to 4½ per cent, with an average of, approximately, 3½ per cent.

In the following table is shown the returns of the savings banks of the world:

NUMBER OF DEPOSITORS, AMOUNT OF DEPOSITS, AVERAGE DEPOSIT ACCOUNT, AVERAGE DEPOSIT PER INHABITANT AT THE END OF THE YEARS MENTIONED, AND RATES OF INTEREST ON DEPOSITS PAID BY POSTAL AND OTHER SAVINGS BANKS OF THE WORLD.

[From official sources.]

*a* Included with Germany, but not in total of the table.

*b* Post-office and Government savings banks only; \$19,125,097 additional deposited with special savings banks, exclusive of amounts deposited with the savings branches of the chartered banks.

Statistics relating to foreign postal savings banks, which are incorporated in the foregoing table, with like information relating to trustee and other savings banks, have been obtained with respect to fourteen countries, including dependencies of the United Kingdom. The number of depositors in the foreign postal savings banks at date of returns, from 1899 to 1901, inclusive, is 23,436,711, and the deposits

\$1,466,601,083, an average account of \$62.57. The returns relating to the postal savings banks are incorporated in the following table:

FOREIGN POSTAL SAVINGS BANK RETURNS.

[From official sources.]

<sup>a</sup> Data relating to the "Caisse Nationale d'e'pargne."

BANKING POWER OF THE WORLD.

The banking power of the world in 1890, that is, capital, surplus profits, note issues, and deposits, as stated by the late M. G. Mulhall, was £3,197,000,000, as follows:

United Kingdom, £910,000,000; continental Europe, £1,037,000,000; Australia, Canada, Cape Colony, Argentina, and Uruguay, £220,000,000, and United States, £1,030,000,000. In 1894 Mr. Maurice L. Muhleman calculated the banking power of the world at £3,915,000,000.

From statistics published by the London Chronicle, for June last, and incorporating therewith the most recent returns relating to the savings banks of the United Kingdom, the banking power of that country is shown to be £1,206,000,000, an increase of 32½ per cent since 1890. Assuming the same rate of increase in continental Europe, the English colonies, and Argentina and Uruguay, their power amounts to £1,374,000,000 and £292,000,000, respectively. The banking funds of Bulgaria, Greece, Roumania, Servia, and Turkey were not included in the Mulhall statement, but are given at £50,000,000 for the current year.

The capital, surplus profits, and circulation of all banks in the United States are definitely known and from reports obtained by the Comptroller of the Currency from national banks, State officials, and from the banks direct the deposits of over 77 per cent of banks in operation. The deposits of the remaining 23 per cent of the banks have been carefully estimated from data at command and give the aggregate banking power of the United States as £2,487,000,000, making the aggregate power of the world £5,409,000,000, or, say, \$27,045,000,000, an increase since 1890 of \$11,060,000,000, or 69.19 per cent.

The comparative statement for the two dates is given herewith:

Countries.	Year.		Increase.
	1890.	1902.	
United Kingdom.....	£910	£1,206	} Per cent. 82.52
Continental Europe.....	1,037	1,374	
Australia, Canada, Cape Colony, Argentina, Uruguay.....	220	292	
Bulgaria, Greece, Roumania, Servia, Turkey.....		50	
United States.....	1,030	2,487	
Total.....	3,197	5,409	69.19

The composition of the banking power of the United States, as shown by reports to the Comptroller of the Currency, supplemented by internal-revenue returns for the year 1902, appears in the following table:

Banks	Capital.	Surplus, etc., and deposits.	Circulation.	Total.
National banks.....	\$701,990,554	\$3,705,219,341	\$309,336,599	\$4,716,546,494
Mutual savings banks.....		2,587,780,802		2,587,780,802
All other banks.....	638,169,862	4,492,224,020		5,130,393,882
Total.....	1,340,160,416	10,785,224,163	309,336,599	12,434,721,178

#### BOND AND ASSET SECURED BANK CIRCULATION.

The most serious objection which has been urged against the national bank currency is its lack of elasticity; that it does not automatically respond to the demands of business, but is dependent upon the price of bonds and other considerations. The first requirement of any currency is safety and uniformity in value. Our bank notes have been from the first issue practically perfect in this respect. No note holder has ever lost a dollar except by loss or destruction of the notes which have always circulated at their face value in all parts of the United States, being used without discrimination for payments of all kinds, the same as the legal tender and Treasury notes and other forms of paper currency. Our people have grown so used to bank notes with this prime and essential quality of uniformity in value that they have an instinctive prejudice against any change for fear this quality may be lost or impaired. For more than a generation we have had no bank notes but those secured by more than their full value of bonds deposited with the Treasurer of the United States. They have been so secure, it is not surprising there is a strong feeling that they are the only kind of notes which are perfectly secure.

There can be no denial of the fact, and there is really none made, that the lack of elasticity is a serious defect in our bank notes, which greatly reduces their usefulness not only under normal business conditions, but when there is danger of financial difficulty. If this defect can be remedied or lessened without impairing the safety of the notes it should be done, and done at once.

All bank-note circulation is really asset currency, and depends for its value upon the assets of the issuing bank. In most countries the banks are allowed to keep the assets, maintaining a certain reserve in coin and using the remainder for loans, or in any other way. Our national

banks are required to use their assets, to the full amount of the circulation issued, in the purchase of bonds to be deposited with the Treasurer of the United States. This requires an amount of assets in excess of the circulation received. It makes a very safe circulation, but is a very wasteful use of the assets. The resulting notes fulfill none of the requirements of an efficient and satisfactory circulation but in their safety and uniformity in value.

If, in addition to the amount of notes they are now allowed to issue by law on bonds deposited in the Treasury, the national banks were allowed to issue an additional amount of uncovered notes, beginning with 20 per cent and gradually increasing to 50 per cent, it would make the circulation more expandible. A graduated tax on the amount issued, joined with ample provisions for their redemption and return to the issuing bank, would result in the necessary contraction when the circulation became redundant and the notes not needed in business. The safety of the notes can be made absolute by a reserve fund raised by a very small tax. During the almost forty years the national banking system has been in existence, the total amount of the notes of the banks which have failed, outstanding at the time of their failure, has been less than \$21,000,000. During this same period the banks have paid in taxes on circulation above \$90,000,000, or four and one-half times as much as would have been required to pay all these notes if the bonds had not done so. If there had been outstanding the full 50 per cent of uncovered notes suggested above, or \$10,000,000 above those covered by the bonds, the taxes which have been paid would have been nine times the amount required to pay them, if, as would of course have been the case, the bonds had paid for the covered notes.

It has been urged against the idea of a guarantee fund that the strong banks would not take out the notes and pay the taxes for the benefit of the weaker banks. If the inducements to issue notes in the past have been sufficient to secure nine times the amount of taxes required, it is certainly a safe calculation that they will be sufficient in the future. In further confirmation of these figures, it is shown in the table prepared in this office for Mr. Fowler, chairman of the Committee on Banking and Currency of the House of Representatives, and included in his able report on H. R. 13363, that a tax of 0.22 per cent would have been sufficient to pay the notes of all failed national banks if the bonds had been lost or destroyed. The safety of the notes should be further increased by provisions that only banks with a minimum of unimpaired capital and surplus could issue the uncovered notes, and that the Comptroller of the Currency, or the Comptroller and the Secretary of the Treasury, should have discretion to refuse any bank, or all the banks, authority to issue additional uncovered notes. The period covering the whole history of the national banks is long enough to have established reliable averages, which can be as safely counted upon as the averages upon which the vast insurance business of the world is done. Any unusual variation would be amply provided for by the factor of safety of nine, which the figures given above show in the taxes paid during this whole period.

The present capital of all the national banks would permit the issue of about \$140,000,000 of uncovered notes for the first issue of 20 per cent and the ultimate issue of \$350,000,000 if the amount was increased to 50 per cent. These maximum figures would probably be increased

by the increase in the number of national banks. By referring to the tables on pages 35 and 36 it will be seen that the tendency is for the increase of banks other than national both in the number and capital of banks and in the proportion of deposits held. An increase in the note-issuing privileges of the banks would doubtless check this gain of the outside banks if it did not turn the growth the other way.

The greatest demand for increased currency comes, of course, when it is required for moving crops in the farming States. If this can be supplied quickly and automatically as required by the banks in those States, and if, after performing its duty, it is returned to the banks and retired, it will mark a great advance in the improvement of our facilities for handling the vast and rapidly growing business of this country. The following tables show in a consolidated form the totals of the principal items in the bank statements in the farming States and of the United States, also the values of farm lands, farming implements, and live stock on the farms, with the value of all farm products for 1890 and 1900:

SUMMARY OF THE PRINCIPAL ITEMS OF RESOURCES AND LIABILITIES OF NATIONAL BANKS AND ALL OTHER BANKING INSTITUTIONS LOCATED IN THE SOUTHERN, MIDDLE WESTERN, WESTERN, AND PACIFIC STATES REPORTING TO THE COMPTROLLER OF THE CURRENCY IN 1892, 1897, AND 1902.

(In millions of dollars.)

SOUTHERN STATES.

	Loans.	Cash on hand.	Due from other banks.	Capital.	Individual deposits.
1892.....	307	44	50	136	233
1897.....	274	40	53	114	232
1902.....	504	54	126	137	481

MIDDLE WESTERN STATES.

	Loans.	Cash on hand.	Due from other banks.	Capital.	Individual deposits.
1892.....	980	145	197	288	924
1897.....	844	159	241	276	881
1902.....	1,743	231	475	339	1,930

WESTERN STATES.

	Loans.	Cash on hand.	Due from other banks.	Capital.	Individual deposits.
1892.....	182	24	44	79	155
1897.....	121	23	54	55	133
1902.....	263	33	105	60	316

PACIFIC STATES.

	Loans.	Cash on hand.	Due from other banks.	Capital.	Individual deposits.
1892.....	271	27	25	87	240
1897.....	215	29	34	67	237
1902.....	317	52	96	66	464

TOTAL FOR FOUR DIVISIONS NAMED ABOVE.

	Loans.	Cash on hand.	Due from other banks.	Capital.	Individual deposits.

Total 1890.....	13,279	494	2,309	2,460
Increase.....	3,395	267	769	2,279

In the latter half of each year the problem is presented to the banks to furnish currency needed to handle from 2,500 to 3,000 millions of bushels of grain, 8 to 10 million bales of cotton, and a corresponding quantity of other farm products. The total value of these products for the year 1902 will not be far from 5,000 millions of dollars. This calls for the use of a vast sum of money. Much of it is done on bank deposit credits, by means of checks, and the increased number of banks and better means of communication enable the people in country communities to handle more and more in this way, or we should not be able to transact such an amount of business at all. So much of it, however, must be handled with currency of some sort as to make a demand for currency in large amounts, and every year there is a great deal of anxiety, and often serious disturbance in business, until the crop season is over and the money returns to those who have had to furnish it. This is a matter of more importance to the man who needs the money than the man who furnishes it. When interest rates advance it is the man who pays the higher rate who suffers the most, not the man who has the money to lend.

The people in the country who do this enormous business and produce the great wealth are entitled to better service than they get, are in fact entitled to the very best facilities which can be devised and supplied to them. It can not be any undue inflation of credit to supply these people who have just raised such quantities of the most readily salable staples the money they require in that form of bank credits represented by circulating notes. As the tables show, these people own land worth 16,674 millions of dollars, farm implements worth 761 millions, live stock worth 3,078 millions, and raise over 4,000 million dollars worth of products. In the farming States there are banks with over 600 millions of capital and 70 millions of surplus. They have on hand in cash 370 million dollars, and due from other banks 802 millions. Here are agencies enough to perform this work and abundant basis for the credits if the law permitted it. We place no limit on the loans they may make but that supplied by reserve requirements on the deposits; why should they not supply a limited amount of notes secured by two-thirds their value in bonds and made absolutely safe to the note holder by the guarantee fund raised by the tax on circulation? Such a change in the currency would not only supply the needs for crop moving, but also the currency needed for other business.

Each bank could supply what it found was necessary for its own customers. The demand which generally begins in the late summer months would gradually be met as it came. In every community the supply would be in the hands of men who are familiar with local needs and conditions and the distribution would be made where and when needed without reference to conditions elsewhere or dependence on the money market in the reserve cities and financial centers. This would be of great benefit, not only to the people in farming districts and those handling farm products, but to the vast number of business men engaged in mining, manufacturing, mercantile and commercial lines. Instead of the whole business public dreading the approach of the crop-moving time for fear there might come some stringency in the money market to upset their calculations and interfere with their financial arrangements, the banks would be in position to furnish the

currency needed for the crops when and where it was to be used without disturbing business in other lines.

In times of panic the power to issue additional notes would be an element of great strength to the banks and not of weakness. It would enable the banks to protect themselves and their customers when protection is most needed. Panics or financial crises come generally very suddenly and as the result of fear which spreads among the people that they will not be able to get money to meet their payments and conduct their business. This spreads and forces liquidation of credits which otherwise would have remained outstanding. There never is a time when the liquidation of all credits or any large proportion of those outstanding is possible without producing a crisis. As long as there is confidence, and each individual feels secure that he can get what money he needs upon usual terms and security, there is no necessity for it. If our bank circulation can be made more automatically elastic so that the banks can supply more or less of circulation as needed, which is so safe and reliable that it is readily accepted and used for all business transactions, we will have a force at work in our financial affairs which will diminish the liability of a money panic, and will be an efficient aid when we shall have an actual condition of panic.

Without discussing the causes which led to the panic of 1893 and the depression which followed there is no question but that the actual shape the panic took was a sudden demand for currency. Referring to the table on page 37 giving the total money and currency of all kinds in circulation in the United States, the amounts held in the Treasury as assets and in the banks with the amount not in the Treasury or banks, that is, in use by the people, it will be seen that the proportions do not vary greatly in normal times. The greatest variation is in the amount in the Treasury as assets, which, from various causes, has ranged from 8 to 16 per cent in ten years. The amount held by the banks is ordinarily from 32 to 33 per cent. This ran down to 29 per cent during the panic year of 1893 and in 1896, when the silver question was involved in the election, and increased to 38 per cent in 1894 in the reaction following the panic. The amount of money outside, in circulation among the people, has run quite uniformly from 53 to 55 per cent, but during the panic year of 1893 this went up to 62 per cent, showing the withdrawal of coin and currency due to the panic. During the panic all sorts of substitutes for currency were resorted to, which were accepted and used for the time.

How much better prepared we would have been if the banks had been able to supply a large volume of good notes. It is not claimed that this would have prevented that panic or that panics may be prevented in the future by such means, but the tendency or liability to panics will be appreciably diminished if our banks have such a reserve power furnished them, and when panics occur we will be better prepared to meet them and mitigate their force and effect. This currency should be immediately and quickly available, so that the banks need not wait for serious trouble before they begin to issue it. The conditions of issue should not be such as to make it a confession or indication of weakness for a bank to issue the notes. They should be coming and going all the time, in accordance with the demands of business. Such notes would be much preferable to any form of clearing-house notes or emergency circulation issued by clearing houses or similar associations, because each bank could quickly issue its own

quota without waiting for the slow process of consultation, and the average result obtained by the independent action of banks in all parts of the country would more nearly respond to the actual demands and necessities.

The currency here outlined is what has come to be called in the recent discussions an emergency circulation. It would be better than this; it would be a currency which would prevent many emergencies from arising, or so diminish their seriousness that they would pass unnoticed. When emergencies did arise it would very greatly add to our equipment and ability to meet them.

This plan for the modification of the national-bank currency is not offered as anything new. It has been suggested often before, widely discussed, and bills embodying these general features have been before Congress for several years. It is not claimed that this plan would remedy all the defects in our currency system, but it is urged as a practical and simple method of improving the national-bank currency by giving it the much-needed quality of elasticity without impairing its safety. If we wait until there is agreement on all points before we make a change in our currency laws, we will never make any reform. If we make such changes from time to time as study and investigation convince us can be safely made and are advisable, we are much more apt to arrive at a satisfactory law than if we wait until it can all be reformed in one act.

The Comptroller therefore calls the attention of Congress to this subject, asks its careful consideration, and strongly recommends the passage of an act embodying the main features here outlined.

WM. B. RIDGELY,  
*Comptroller of the Currency.*

TO THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

## NO. 4.—EXPENSES OF THE OFFICE OF COMPTROLLER OF THE CURRENCY FOR THE YEAR ENDED JUNE 30, 1902.

For special dies, plates, printing, etc.....	\$102,771.53
For salaries.....	112,132.77
For salaries reimbursable by national banks.....	16,663.39
Total expenses of the Office of the Comptroller of the Currency from its organization, May, 1863, to June 30, 1902.....	9,353,482.87

The contingent expenses of the Bureau are not paid by the Comptroller, but from the general appropriation for contingent expenses of the Treasury Department. No separate account of them is kept.

## NO. 5.—NUMBER OF NATIONAL BANKS ORGANIZED, NUMBER NOW IN OPERATION, AND THE NUMBER PASSED OUT OF THE SYSTEM SINCE FEBRUARY 25, 1863.

Total number organized.....	6,476
Number now in operation.....	4,678
Number passed out of the system.....	1,798
The latter number is accounted for as follows:	
Passed into voluntary liquidation to wind up their affairs.....	1,159
Less number placed in the hands of receivers.....	17
	1,142
Passed into liquidation for purpose of reorganization.....	148
Passed into liquidation upon expiration of corporate existence.....	121
Placed in the hands of receivers.....	406
	1,817
Less number restored to solvency and resumed business.....	19
Total passed out of system.....	1,798

NO. 6.—NUMBER AND AUTHORIZED CAPITAL OF NATIONAL BANKS ORGANIZED AND THE NUMBER AND CAPITAL OF BANKS CLOSED IN EACH YEAR ENDED OCTOBER 31 SINCE THE ESTABLISHMENT OF THE NATIONAL BANKING SYSTEM, WITH THE YEARLY INCREASE OR DECREASE.

Years.	Organized.		Closed.				Net yearly increase.		Net yearly decrease.	
			In voluntary liquidation.		Insolvent.					
	No.	Capital.	No.	Capital.	No.	Capital.	No.	Capital.	No.	Capital.
1863.....	134	\$16,378,700					134	\$16,378,700		
1864.....	453	79,366,950	3				450	79,366,950		
1865.....	1,014	242,542,982	6	\$330,000	1	\$50,000	1,007	242,162,982

1902....	1,829,913,551	733,353,107	2,563,266,658	313,876,107	2,249,390,551	79,117,000	28.43

NOTE 1.—Specie payments were suspended from January 1, 1862, to January 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive.

NOTE 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning with that year.

NOTE 3.—The coinage of standard silver dollars began in 1878 under the act of February 23, 1878.

NOTE 4.—Specie payments were resumed January 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.

NOTE 5.—This table represents the circulation of the United States as shown by the revised statements of the Treasury Department for June 30 of each of the years specified.

122 REPORT OF THE COMPTROLLER OF THE CURRENCY.

No. 52.—STATE BANK NOTES OUTSTANDING, TOTAL MONEY IN UNITED STATES, AND PERCENTAGE OF BANK NOTES TO TOTAL MONEY, FROM 1800 TO 1863, INCLUSIVE.

NOTE.—Gold was first quoted at par on December 19, 1873.

The average rates of gold and currency for each month, as given in the above tables, was obtained as follows:

Four daily quotations of the rates of gold at New York, viz, the Opening, Closing, Highest, and Lowest, were recorded, from which a daily average was made, and the average rate for each month was prepared from these daily averages.

126 REPORT OF THE COMPTROLLER OF THE CURRENCY.

No. 57.—UNITED STATES BONDS ON DEPOSIT TO SECURE CIRCULATING NOTES OF NATIONAL BANKS ON JUNE 30 OF EACH YEAR FROM 1865 TO 1902, AND THE AMOUNT OWNED AND HELD BY THE BANKS FOR OTHER PURPOSES, INCLUDING THOSE DEPOSITED WITH THE TREASURER TO SECURE PUBLIC DEPOSITS.

b One bank restored to solvency.  
 c Eleven banks restored to solvency.  
 d Two banks restored to voluntary liquidation.  
 e Annual average amount failed national-bank notes outstanding.

NATIONAL BANKS, BY YEARS, 1863-1901; CAPITAL, ETC., OF INSOLVENT BANKS  
INSOLVENT BANKS THE AFFAIRS OF WHICH HAVE BEEN FINALLY CLOSED.

Number of insolvent national banks the affairs of which have been finally closed, their capital stock, amount realized from assets, bonds (at par) held to secure circulation, and national bank notes outstanding at date of failure, secured by bonds, by years, 1863-1901, inclusive.						Number of insolvent national banks, by years, whose circulating notes outstanding at date of failure were in excess of the amount realized from assets (eliminating bonds and premium) and percentage of such excess to circulation of active banks, by years.		
Number of banks.	Capital stock.	Amount realized from assets (dividends + off-sets + loans paid after failure).	Par value of bonds held at date of failure.	Total value of assets and bonds.	National bank notes outstanding secured by bonds.	Number of banks.	Excess of circulation over assets (bonds excluded).	Per cent of circulation, active banks.

<b>Total .....</b>	<b>23.5</b>	<b>24.2</b>

TABLE XIX.

RESOURCES AND LIABILITIES OF THE SECOND BANK OF THE UNITED STATES.

[Chartered by Congress in 1816, for twenty years; renewal of charter denied; in consequence, reorganization was effected by means of authority of the legislature of the State of Pennsylvania. The bank assigned in 1841, the affairs being finally liquidated in 1856, and resulted in the payment in full, interest and principal, of liabilities to depositors and note holders; the shareholders, however, received nothing on their investment in stock of the bank.]

[In millions of dollars.]
