## EIGHTY-SIXTH ANNUAL REPORT

OF THE
Comptroller of the Currency 1948

Treasury Department
Document No. 3161
Comptroller of the Currency

## LETTER OF TRANSMITTAL

> Treasury Department, Office of the Comptroller of the Currency, Washington, D. C., June 10, 1949.

Sirs: In accordance with the provisions of section 333 of the United States Revised Statutes, I have the honor to submit the following report covering the activities of the Bureau of the Comptroller of the Currency for the year 1948.

Respectfully,
Preston Delano, Comptroller of the Currency.
The President of the Senate.
The Speaker of the House of Representatives.

## ANNUAL REPORT

## OF THE

## COMPTROLLER OF THE CURRENCY

The Comptroller of the Currency has the honor to present herewith to the Congress of the United States his Annual Report for the calendar year 1948 .

In the pages that follow appear summaries of significant data regarding resources, liabilities, and operations of the National Banking System during 1948, as well as detailed tabulations of these and other related banking data. However, it is not inappropriate to mention specifically a few of these figures, which, in their own right and as contrasted with comparable figures for previous years, indicate major trends.

The National Banking System apparently has stabilized numerically, for the time being at least, the number of banks in the System having remained in the neighborhood of five thousand for some five years. (Branches in operation in December 1948 were somewhat less than two thousand.) Although these banks constituted, at the end of 1948, only 35 percent of the 14,200 commercial banks of the Nation, they continued to hold substantially over one-half of the commercial banking resources of the United States ( $\$ 88$ billion out of $\$ 156$ billion).

Total outstanding loans of national banks continued to increase during the year, rising from $\$ 21.5$ billion to $\$ 23.8$ billion. In order to provide available credit for this expansion in loans, national bank investment in United States government securities continued the downward trend of recent years, although at a somewhat slower rate-from $\$ 39$ billion to $\$ 35$ billion. Cash and balances with other banks rose from $\$ 22$ billion to $\$ 23$ billion, due to an increase of about $\$ 1.8$ billion in required reserves.

As in the preceding year, national banks' capital accounts (capital, surplus, undivided profits and capital reserves) increased by a little over $\$ 250$ million-from $\$ 5.4$ billion to $\$ 5.7$ billion. Outstanding preferred stock centinued its decline, being less than $\$ 25$ million (retirable value: $\$ 35$ million). In relation to total common stock of $\$ 1.8$ billion and total capital accounts of $\$ 5.7$ billion, the aggregate preferred stock is now a negligible amount. This is in accordance with our understanding of Congressional policy, and our administrative conviction, that it is most desirable for national banks to have a capital structure based solely upon a uniform type of common stock, and that issuance of preferred stock should be limited almost entirely to emergency situations, with retirement at as rapid a rate as is feasible.

Total deposits of all types in national banks, as well as the major
category of demand deposits, dropped slightly during the year 1948. Nevertheless, as indicated above, the capital cushion provided by the investment of stockholders, plus accumulated and undistributed earnings thereon, continued to increase, with the approval and encouragement of this bureau. This increase in capital accounts seemed to be called for primarily because of the increase of over $\$ 2$ billion in outstanding loans, previously commented upon. As indicated hereinafter, the changed picture of American banking in the past quarter century has made the ratio of capitalization to total deposits, formerly used as a rough rule-of-thumb, far less significant than the question of the amount of capital funds needed in view of the amount and character of so-called "risk assets" held by the particular bank.

In the Comptroller's Annual Report for the year 1944, attention was called to the great changes which had occurred during the years of World War II in the nature and functions of American banking. At that time national banks' holdings of Federal government securities were almost four times their oustanding loans, and many of the loans also were covered in whole or in part by government guaranties. It was pointed out at that time that the main functions of the National Banking System had become the handling of the Nation's current funds, the investment of those funds in government securities and government-guaranteed loans, the direct creation of credit for governmental use, and the performance of quasi-governmental services. In that Report, the Comptroller of the Currency strongly endorsed a vigorous and courageous policy for commercial banks-a policy which would meet all legitimate demands for credit accommodation without, however, moving into the basically risk sector of the economy.

It is gratifying to observe the extent to which the National Banking System has performed its major function as creator and distributor of credit during the post-war years. At the end of 1945, the last war year, United States government securities were still well over one-half of the resources of national banks; three years later such securities constituted less than 40 percent of all resources. Even more striking has been the increase in lending activities. In December 1945 loans accounted for barely 15 percent of national bank resources, but three years later 27 percent of those resources consisted of outstanding loans.

Paralleling these changes, and called for by them, there has been a substantial increase in capital funds, derived chiefly from the retention of earnings. Over the three-year period referred to, capitalization rose from 5.1 percent of all resources to 6.4 percent-in other words, an increase in the capital cushion of 25 percent, relative to the deposits and other liabilities protected thereby. Elsewhere in this discussion mention is made of the importance of determining the adequacy of capital structure in the light of the volume and quality of loans and comparable assets, rather than in relation to deposit liabilities, although the latter factor should not be disregarded in view of the potentialities it affords for future increase in "risk assets."

In our economy, a banking system-like any other economic organism -remains healthy only as long as it yields returns commensurate with the investment of its owners, and the degree of risk necessarily involved
in the undertaking. On the other hand, returns which seem patently excessive, when contrasted with returns in comparable sectors of the economy, may reflect an absence of the competitive factor which is also essential in an optimum economic climate. Consequently, it is appropriate to examine with care the sources, amount, and use of national bank earnings.

In 1948, for the first time since 1942, earnings from lending operations ( $\$ 890$ million) exceeded aggregate income from investments in government and other securities ( $\$ 690$ million), and did so by the wide margin of $\$ 200$ million. Operating expenses continued to increase, and many national banks adopted the reserve method of accounting for bad debt hazards, so that despite an increase over the preceding year of $\$ 175$ million in gross earnings, net profits before dividends actually were $\$ 30$ million less than in 1947. As a result, net profits amounted to 7.6 percent of capital funds, compared with 8.6 percent the previous year. Less than half of net profits was distributed as cash dividends, the remainder being retained to strengthen the capital position.

The facts thus briefly presented justify the conclusion that the National Banking System on the whole ended the year 1948 in sound condition. Nevertheless, it must be recognized that during the year and also presently, economic and political forces were at work, both at home and abroad, which could affect adversely both banks and the economy of the country generally.

The year witnessed readjustments in prices and corresponding changes of the purchasing power of the dollar, at a time when liquid assets at the disposal of the American people were at record levels. This is another way of saying that we are emerging from a sellers' into a buyers' market, a transition which is usually accompanied by increased competition, lower prices and profits, and increased unemployment.

This readjustment in our economy calls for the exercise of prudent judgment on the part of bankers and bank supervisors alike. Through its willingness to extend credit for productive purposes, the banking system of the Nation played an important part in expediting and easing this transition. During the post-war period the volume of bank loans increased approximately 76 percent, with many small banks experiencing increases ranging up to ten times pre-war volume. To an important degree business enterprises have relied upon bank borrowings for working capital and for expansion of plant facilities. Perhaps contrary to general opinion, the greater number of loans were made to borrowers with net worth of less than $\$ 50,000$. This evidences not only a willingness but an affirmative effort on the part of banks to aid small business.

The resurgence of commercial bank lending activities has required bank supervisors to reexamine previous concepts of the adequacy of bank capitalization. Up to less than a quarter century ago there was a general feeling that, subject to exceptions, a ratio of $\$ 1$ of capital structure to $\$ 10$ of deposits was about "right"--that a lower relative capitalization was dangerous and a higher capitalization usually unnecessary. It is believed that this principle was based on an economic system in which most of the available funds of commercial banks were
fully utilized, for substantial periods, in their lending activities. In other words, a 1-to-10 capital-deposit ratio might generally be tantamount to a 1-to-5 or 1-to-7, for example, ratio of capital to loans plus investments other than federal government obligations.

In the circumstances described, a capital-deposit ratio was a useful rule-of-thumb, for it was actually merely an indirect and rough method for gauging a relationship of a bank's capital cushion to the amount of its loans and investments necessarily and properly involving an element of banking risk. Today, capital-deposit ratios generally lack this validity and justification as tools for bank supervision. The rapidly changing character of bank assets, adverted to in this and previous reports, is such that the ratio of capital to deposits is not a reliable measure of the magnitude of the risk element in the banks' activities, and it is the function of the capital structure to protect the bank and its depositors from that element of risk. To take an example, a 1-to-10 capital-deposit ratio would be more than adequate for a bank with 90 percent of its resources in cash and United States government securities, whereas the same ratio might be dangerously insufficient for a bank with 70 percent of its deposits concentrated in a few high-risk loan fields.

For these reasons, our bureau in recent years has placed less stress upon the relationship between capital structure and deposits, emphasizing instead adequacy of capital in relation to several factors, particularly competence of management, and volume and quality of assets which necessarily involve some element of uncertainty, however slight. In order to expedite our procedures and perform our duties as efficiently as possible, we have adopted certain rules-of-thumb for preliminary screening. One of the most useful of these is a ratio of capital fundsto loans and investments other than United States government securities. When the capitalization of a particular bank, checked in this manner, apparently falls far short of the average, this is a signal for close analysis of relevant factors, such as the character of the Toans and investments, the ability of management, local and regional economic conditions and trends, and the like. Even if loans and investments appear high in relation to capital structure at first glance, no criticism or corrective action will follow if it is ascertained that loans and investments are of high quality under the supervision of careful and intelligent management, and appropriate in the economic situation in which the particular bank is operating.

An example of the principles which govern our action in these fields arises in the analysis of a bank's holdings of "revenue" obligations of municipalities and other governmental units. Our basic standard with respect to all securities is credit soundness. While there are both general obligations and special revenue obligations of governmental units which have a place in bank portfolios, neither type is universally suitable or unsuitable. Even the fact that "general obligations of any State or of any political subdivision thereof" are exempt from the usual statutory limitations and restrictions regarding investment securities of national banks does not mean that any and all such general obligations are appropriate bank investments.

The fact that Congress has evidenced confidence in such general obligations by exempting them from the statutory limitations upon amount is not equivalent to a blanket approval of investment in such securities without regard to their inherent qualities and their suitability for the investment portfolio of a particular bank. It has been necessary to stress these points to a small segment of banks with the suggestion that they fully evaluate all factors affecting quality before acquisition, including the effect of the supply-demand factor on liquidity and price structure.

General obligations do not submit readily to a simple clarifying formula designed to evaluate fully the favorable and adverse factors affecting such securities, but banks have been urged to procure and maintain the information necessary to determine the degree of protection existing in each issue held; also to study and relate the general character of such bonds to other earning assets and the composition of deposits in order to determine the suitability of a particular issue.

There has been a definite tendency on the part of many banks to place special revenue securities on the same plane with the general obligations of municipalities. Undoubtedly there are some special revenue obligations which are to be preferred over certain general obligations, but, broadly speaking, general obligations are inherently on a higher plane of credit soundness because they are supported by the full taxing power of the governmental unit rather than by the net operating revenue of a particular project. In other words, revenue obligations are substantially similar to corporate securities of comparable type, and the acquisition of such securities for the investment of bank funds should be based on their general suitability and credit soundness.

The credit soundness of obligations issued by a municipality to finance a public facility on a special revenue basis is no better than the fundamental financial and management soundness of the facilities which they have financed. There is only one way to determine credit soundness and that is by means of a careful appraisal of all relevant financial facts. To the extent the financial facts are not available, the weight of the intangibles increases. Consequently, national bankers are being urged to maintain and utilize the credit information necessary to enable them to acquire obligations on an informed and intelligent basis-obligations which are demonstrably sound.

Similar principles are applicable in the field of loans, and it is fitting to refer briefly to bank loans secured by real estate. Real-estate values today are at a very high level and the expansion in real-estate debt during the post-war period has been substantial. The rise in individual income, the increase in population, and the spreading out of families have combined forces to generate a real-estate demand unique in banking history. It has resulted in a high level of transfers of ownership and a substantial increase in unit debt. It has resulted also in a shift of realty "investment" from the realty owner to the lender, who is now assuming a proportion of the risk much greater than in the past. By adhering to the fundamental principles of realistic appraisals and adequate amortization, banks can with safety discharge their duties in a constructive program of adequate housing and economically sound home ownership.

The National Banking System, together with the other banks of the Nation, have resumed and aggressively strengthened their position as the leading source of credit and other services without which our economy inevitably would collapse. They have done this during a period of exceptional economic conditions, in circumstances which demanded judgment and courage tempered by prudence. With few exceptions, the banking fraternity has served the Nation during the post-war years in a manner which has satisfied all legitimate credit needs and other requirements, while at the same time it has served as a brake when the machine threatened to get out of control. American banking will deserve the Nation's respect and praise if it continues to bear its responsibilities with the same intelligence, foresight, and devotion to the general welfare.

A comparison of the assets and liabilities of the banks in the National Banking System as of December 31, 1947, April 12, June 30, and December 31, 1948, reported pursuant to calls for condition statements by the Comptroller of the Currency, is shown in the following table.

## Assets and liabilities of national banks on dates indicated

## EARNINGS, EXPENSES, AND DIVIDENDS OF NATIONAL BANKS FOR YEAR ENDED DECEMBER 31, 1948

The net operating earnings of national banks in the year ended December 31 , 1948, were $\$ 716,000,000$, an increase of $\$ 72,000,000$ over the amount reported for the preceding year.

Gross earnings were $\$ 1,900,000,000$. This was an increase of $\$ 176,000,-$ 000 over the gross earnings for the year 1947. The principal items of operating earnings in 1948 were $\$ 891,000,000$ from interest and discount on loans, an increase of $\$ 184,000,000$ over 1947, and $\$ 579,000,000$ from interest on United States Government obligations, a decrease of $\$ 42,000,000$ compared to the year 1947. Other principal items of operating earnings were $\$ 111,000,000$ from interest and dividends on securities other than United States Government obligations, an increase of $\$ 6,000,000$ over the previous year, and $\$ 98,000,000$ from service charges on deposit accounts, an increase of $\$ 14,000,000$. Operating expenses, excluding taxes on net income, were $\$ 1,184,000,000$ as against $\$ 1,081,-$

000,000 in 1947. Principal operating expenses were $\$ 576,000,000$ for salaries and wages of officers and employees and fees paid to directors, an increase of $\$ 55,000,000$ over 1947 , and $\$ 176,000,000$ expended for interest on time and savings deposits, an increase of $\$ 12,000,000$.

Adding to the net operating earnings of $\$ 716,000,000$ profits on securities sold of $\$ 37,000,000$ and recoveries on loans and investments, etc. (including recoveries of reserves previously charged out) of $\$ 124,-$ 000,000 , and deducting therefrom losses and charge-offs (including current charge-offs for reserve purposes) of $\$ 277,000,000$, and taxes on net income of $\$ 176,000,000$, the net profits before dividends for the year 1948 amounted to $\$ 424,000,000$, which amounts to 7.47 percent of capital funds. This is an apparent reduction in net profits before dividends of $\$ 29,000,000$ from the year 1947, but a comparison of the results of 1948 with the year 1947 and previous years is not practical because of reserve accounts amounting to $\$ 184,000,000$ charged out of current earnings in 1948, largely reserve for bad debts used by more than 2,000 national banks under the provisions of Mimeograph 6209 issued by the Bureau of Internal Revenue in December 1947.

Cash dividends declared on common and preferred stock in 1948 totaled $\$ 194,000,000$, in comparison with $\$ 184,000,000$ in 1947 . The rate of cash dividends was 3.50 percent of the average capital funds during the year. The cash dividends in 1948 were 46 percent of the net profits available for the year. The remaining 54 percent of net profits, or $\$ 230,000,000$, was retained by the banks in their capital funds.

Interest and dividends on securities was 36 percent of gross earnings in the year 1948, with the banks in Federal Reserve district No. 12 showing the smallest ratio of 26 percent and those in district No. 3 the largest ratio of 46 percent. Interest and discount on loans accounted for 47 percent, varying in ratio from 39 percent in district No. 7 to 58 percent in district No. 12. Salaries, wages, and fees were 30 percent, ranging from 28 percent in districts Nos. 3 and 4 to 32 percent in districts Nos. 1, 2 and 9 . The net operating earnings before income taxes were 38 percent of gross earnings, with averages ranging from 35 percent in district No. 1 to 41 percent in districts Nos. 10 and 11.

Interest and discount on loans to the average total of loans in the year was 4 percent and varied from 3 percent in district No. 2 to almost 5 percent in districts Nos. 10 and 12. Interest and dividends on securities was more than $11 / 2$ percent on average total securities held, the banks in district No. 10 showing the lowest ratio, nearly $11 / 2$ percent, while the banks in district No. 3 showed the highest ratio of 2 percent.

Net operating earnings before income taxes were 13 percent of average total capital accounts, the lowest ratio being 9 percent in district No. 1, and the highest ratio 21 percent in district No. 12. Net profits before dividends for the period were 8 percent of average capital accounts, the ratios ranging from 5 percent in district No. 1 to 12 percent in district No. 12.

Summaries of the earnings, expenses, and dividends of national banks for the years ended December 31, 1947, and December 31, 1948, are shown in the following table.

## Earnings, expenses, and dividends of national banks for years ended Dec. 31, 1947 and 1948

## STRUCTURAL CHANGES IN THE NATIONAL BANKING SYSTEM

The authorized capital stock of the 5,002 national banks in existence at the close of busincss on December 31, 1948, including 5 inactive banks, consisted of common capital stock aggregating $\$ 1,805,086,597$, a net increase during the year of $\$ 52,580,500$, and preferred capital stock aggregating $\$ 24,283,028$, a net decrease during the year of $\$ 3,763,265$.

During the year ended December 31, 1948, in addition to 18 applications with proposed capital stock of $\$ 1,810,000$ carried over from the previous year, 48 applications were received to organize national banks and to convert State banks into national banking associations, with proposed capital stock aggregating $\$ 7,405,000$. Of these applications, 22 with proposed capital stock aggregating $\$ 3,905,000$ were approved; 17 with proposed capital stock aggregating $\$ 1,965,000$ were rejected; and the remainder were still pending or had been abandoned on December 31, 1948. From the applications carried over from the previous period and the 22 applications approved during the current year, 21 national banking associations with common capital stock aggregating $\$ 3,420,000$ were authorized to commence business. Of the 21 charters issued, 4 with common capital stock aggregating $\$ 1,800,000$ were the result of the conversions of State banks; and 2 with common capital stock of $\$ 125,000$ were organized for the purpose of acquiring the business of 2 liquidating national banks.

During the year ended December 31, 1948, 12 national banks and 3 State banks were consolidated into 7 national banking associations, under authority of the act of November 7, 1918, as amended, the common capital stock of the consolidated banks being $\$ 12,900,000$, and the preferred capital stock being $\$ 1,500,000$. Additional assets of approximately $\$ 17,279,946$ were brought into the national banking system by reason of the 3 State banks consolidated with the national banks. Also, during this period national banks reported the purchase of the business of 15 State banks, with aggregate capital stock of $\$ 1,310,000$ and aggregate assets of approximately $\$ 48,945,870$. The latter figure does not include aggregate assets of $\$ 11,026,103$, which were brought into the system by the purchase of a State bank incident to the consolidation of two national banks.

During the year ended December 31, 1948, 27 national banks with common capital stock of $\$ 4,080,000$, among which were 2 with preferred capital stock aggregating $\$ 138,635$, went into voluntary liquidation in the manner provided by sections 5220 and 5221, United States Revised Statutes. Of these banks, 19 with common capital stock of $\$ 3,550,000$ and assets aggregating $\$ 150,829,121$, including 1 with preferred capital stock of $\$ 25,000$, were succeeded by other national banks; and 8 with common capital stock of $\$ 530,000$ and assets aggregating $\$ 24,490,075$, including 1 with preferred capital stock of $\$ 113,635$, were succeeded by State banks.

Changes in the number and capital stock of national banks during the year ended December 31, 1948, are shown in the following summary.

Organization, capital stock changes, and national banks closed as reported during the year ended Dec. 31, 1948

|  |  |  |
| :---: | :---: | :---: | :---: |

## BRANCHES

On December 31, 1948, 277 national banks were operating a total of 1,934 branches, including 4 seasonal offices.

During the year ended December 31, 1948, 108 branches were brought into the national banking system. Of the 108 branches, 48 were authorized to operate in places other than the city in which the parent bank is located. During the same period 14 branches were discontinued, 7 through actions of the boards of directors of the parent banks and 7 through voluntary liquidation of the parent banks.

Of the 108 branches authorized, 100 were operating on December 31, 1948. Seven branches authorized in 1947 did not begin operations until 1948. There was a net gain in the system of 93 operating branches in the year.

## NATIONAL BANK NOTES OUTSTANDING

There were as of December 31, 1948, $\$ 97,636,341.00$ of National Bank notes outstanding.

## DISTRIBUTION OF ALL BANKS

On December 31, 1948, there were 14,735 commercial and savings banks in the United States and possessions with deposits of $\$ 162,041,-$ 389,000 . Of these banks 13,612 , or 92 percent, with 95 percent of the
deposits, were insured banks. The 4,991 national banks, members of the Federal Reserve System, represented 34 percent of all banks and held 50 percent of the total deposits. The 532 mutual savings banks, of which 193 were insured banks, held $\$ 18,404,850,000$ of deposits.

${ }^{1}$ Includes 4 nonmemb $r$ insured nati, nal banks.
2 Includes 2 nonmember uninsured national banks.

## assets and liabilities of all banks in the united states and possessions

The total assets of all classes of active banks in the United States and possessions on December 31, 1948, amounted to $\$ 176,075,000,000$, an increase of $\$ 51,000,000$ since December 31, 1947.

The total deposits at the end of 1948 amounted to $\$ 162,041,000,000$, a decrease of $\$ 688,000,000$ since 1947. Included in the recent deposit figures are deposits of individuals, partnerships, and corporations of $\$ 136,521,000,000$, a decrease of $\$ 1,236,000,000$ in the year. Deposits of the United States Government, including postal savings deposits, were $\$ 2,521,000,000$, an increase of $\$ 982,000,000$, or 64 percent, since December 1947; deposits of States and political subdivisions amounting to $\$ 8,562,000,000$ showed an increase of $\$ 774,000,000$, or 10 percent, in the year, and deposits of banks of $\$ 12,285,000,000$ were $\$ 760,000,000$, or 6 percent, less than in December 1947.

Loans and discounts amounted to $\$ 48,453,000.000$ in December 1948 after deducting reserves of $\$ 638,000,000$ for possible future losses. The net loans were $\$ 5,222,000,000$, or 12 percent, over the amount reported as of the end of 1947. Commercial and industrial loans of $\$ 19,055,000$-000 at the end of 1948 were 4 percent greater than at the end of 1947 ; consumer loans of $\$ 6,960.000,000$ increased 20 percent in the year; real estate loans of $\$ 16,704,000,000$ were up 17 percent, and all other loans of $\$ 6,372,000,000$ increased 32 percent in the year.

The banks held obligations of the United States Government, direct and guaranteed, of $\$ 74,462,000,000$ in December 1948, a decrease of $\$ 7,175,000,000$, or 9 percent, since December 1947. Obligations of States and political subdivisions held amounted to $\$ 5,754,000,000$, an increase of $\$ 392,000,000$, and other securities held amounted to $\$ 5,717,000,000$, an
increase of $\$ 319,000,000$. The aggregate of all securities held at the end of December 1948 was $\$ 85,933,000,000$, and represented 49 percent of the banks' total assets. At the end of the previous year the ratio was 52 percent.

Cash and balances with other banks, including reserve balances, in December 1948 were $\$ 39,635,000,000$, a decrease of 3 percent since 1947.

Total capital accounts on December 31, 1948, were $\$ 12,554,000,000$, compared to, $\$ 11,997,000,000$ at the end of 1947 . The total of surplus, profits, and reserves at the end of 1948 was $\$ 9,131,000,000$, an increase of $\$ 476,000,000$, or 6 percent in the year.

In order to avoid duplication of work, an agreement was reached by the Comptroller's Office, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation in the early part of 1947 whereby a single tabulation of the assets and liabilities of all operating banks in the United States and possessions would be made semiannually by the Corporation beginning June 30, 1947, instead of following the practice pursued previously when each of these three Federal bank supervisory agencies tabulated such figures independently. Therefore, the assets and liabilities for all banks for 1948 published by the Comptroller in the current annual report have been supplied by the the Corporation. The figures for all banks published in subsequent annual reports will be obtained from the same source. The Comptroller's Office, however, will continue to tabulate the returns of national banks and make them available to the Corporation for inclusion in the all-bank figures.

A statement of the assets and liabilities of all classes of active banks in the country at the end of December 1947 and 1948 follows:

## REPORTS FROM BANKS

National banks in the continental United States, Alaska, the Territory of Hawaii, and the Virgin Islands of the United States were, in accordance with the provisions of section 5211 of the Revised Statutes, called upon to submit three reports of condition during the year ended December 31, 1948. Reports were required as of April 12, June 30, and December 31. Summaries from all condition reports, by States, are published in pamphlet form. National banks were also required by statute to obtain reports of their affiliates and holding company affiliates other than member banks as of the three dates for which condition reports of the banks were obtained and to submit such reports to the Comptroller.

Under the general powers conferred upon him by law, the Comptroller obtained from each national bank during the period indicated semiannual reports of earnings, expenses, and dividends; also reports of condition of foreign branches of national banks as of December 31, 1948.

National banking associations authorized to act in a fiduciary capacity were called upon to submit reports of their trust departments as of the close of business on December 31, 1948.
In accordance with section 298 of the Code of Law for the District of Columbia, banks other than national in the District were required to
make to the Comptroller condition reports and reports of earnings, expenses, and dividends identical with those obtained from national banks during the year. Building and loan associations and credit unions in the District of Columbia under the supervision of the Comptroller were required to submit reports of their assets and liabilities as of December 31, 1948, and reports of receipts and disbursements for the year ended December 31, 1948.

Detailed figures from reports of condition and earnings and dividends will be found in the appendix of this report.

## AFFILIATES AND HOLDING COMPANY AFFILIATES OF NATIONAL BANKS

The Federal statute requires each national bank to obtain and submit to the Comptroller periodically reports of its affiliates, as defined in sections 2(b) and (c) of the Banking Act of 1933, as amended, unless waived by the Comptroller. At the end of December 1948, 863 of the national banks reported 11,907 affiliates and holding company affiliates, of which 10,247 were duplications reported by 240 banks. The actual number of affiliates, or 1,660 , included 23 holding company affiliates which controlled 194 active national banks. The number of banks in each holding company group varied from 1 to 48 . At the end of 1947 there were 22 holding company affiliates which controlled 192 national banks, varying in number from 1 to 47 associations. Under the waiver of requirement for reports of affiliates, it was necessary for only 354 banks to submit and publish 393 reports of affiliates and holding company affiliates. Of the latter number 177 were duplieations of reports of affiliates and holding company affiliates by 177 banks.

## LIQUIDATION OF INSOLVENT NATIONAL BANKS

During the year ended December 31, 1948, there were no failures of national banks. The liquidation of three insolvent national banks was completed during the year, leaving a total of six receiverships in process of liquidation as of December 31, 1948. Of these six banks, three were in charge of the Federal Deposit Insurance Corporation as receiver and the remaining three banks were involved in litigation.

## ISSUE AND REDEMPTION OF NOTES

Nine hundred and seven shipments of Federal Reserve currency were made from Washington, D. C., during the year ended December 31, 1948, to Federal Reserve agents and Federal Reserve branch banks, aggregating $\$ 4,073,240,000$, and in addition, 20 deliveries were made to the Treasurer of the United States aggregating $\$ 78,580,000$.

Four thousand eight hundred and thirty-five lots of unfit Federal Reserve currency were received for verification and certification for destruction consisting of $426,973,899$ notes aggregating $\$ 5,265,080,510$.

Twenty-four lots of national bank notes were received for verification and certification for retirement and destruction consisting of 471,537 notes aggregating $\$ 7,069,459$.

One hundred fifty-two thousand three hundred and fifty-three fragments or charred Federal Reserve and national bank notes aggregating
$\$ 2,195,322$ were presented by the Treasurer of the United States for identification and approval.

## eXAMINATION OF NATIONAL BANKS

The National Bank Act requires that each national bank be examined at least twice each year in order that the Comptroller may be kept currently informed of its condition and require such corrections as are deemed necessary with a view to maintaining each bank in sound condition. In addition to the regular examinations, special examinations are conducted of banks the condition of which is regarded as unsatisfactory.

During the year ended December 31, 1948, 9,616 examinations of banks, 3,143 examinations of branches, 1,882 examinations of trust departments, and 81 examinations of affiliates were conducted. Thirteen State banks were examined in connection with conversions to or consolidations with national banks. Investigations were also conducted in connection with applications for 38 new charters and 140 new buanches.

## ORGANIZATION AND STAFF

The personnel of the Office of the Comptroller of the Currency on December 31, 1948, consisted of 1,086 persons. Two hundred and twelve were assigned to the Washington office, which included 24 in the Division of Insolvent National Banks and 31 in the Federal Reserve Issue and Redemption Division, which is an expense of the Federal Reserve banks. One hundred and twenty-six clerical employees were stationed in the 12 field offices located in the 12 Federal Reserve districts. There was a net decrease of 3 in the Washington office, and a net increase of 50 in the field force, the result of our effort to bring our examining staff up to present requirements.

During the year 13 national bank examiners and 64 assistant national bank examiners left the service. In the same period 25 assistant examiners were promoted to examiners, and 124 new assistants were appointed, leaving a total of 252 national bank examiners and 496 assistant examiners in the service at the year end.

## EXPENSES OF THE BUREAU

The expenses of the office incident to the supervision of national banks are met largely by fees assessed against the banks. Such expenses paid from these assessments for the calendar year 1948 aggregated $\$ 6,107,202.22$.

Expenses of the Division of Insolvent National Banks are paid from assessments against insolvent national banks in process of liquidation. Such expenses for the calendar year 1948 totaled $\$ 102,132.69$.

Expenses of the Federal Reserve Issue and Redemption Division are paid by the Federal Reserve banks. These expenses for the calendar year 1948 amounted to $\$ 90,388.10$.

## Notes

Act of Feb. 25, 1863, provided for reports of condition on the first of each quarter, before commencement of business.
Act of June 3, 1864-First Monday of January, April, July, and October, before commencement of business, on form prescribed by Comptroller (in addition to reports on first Tuesday of each month showing condition at commencement of business in respect to certain items; i. e., loans, specie, deposits, and circulation).
Act of Mar. 3, 1869, not less than 5 reports per year, on form prescribed by Comptroller, at close of business on any past date by him specified.

Act of Dec. 28, 1922, minimum number of calls reduced from 5 to 3 per year.
Act of Feb. 25, 1927, authorized a vice president or an assistant cashier designated by the board of directors to verify reports of condition in absence of president and cashier.

Act of June 16, 1933, requires each national bank to furnish and publish not less than 3 reports each year of affiliates other than member banks, as of dates identical with those for which the Comptroller shall during such year require reports of condition of the bank. The report of each affiliate shall contain such information as in the judgment of the Comptroller shall be necessary to disclose fully the relations between the affiliate and the bank and to enable the Comptroller to inform himself as to the effect of such relations upon the affairs of the bank.

Sec. 21 (a) of the Banking Act of 1933 provided, in part, that after June 16, 1934, it would be unlawful for any private bank not under State supervision to continue the transaction of business unless it submitted to periodic examination by the Comptroller of the Currency or the Federal Reserve bank of the district, and made and published periodic reports of condition the same as required of national banks under section 5211, U. S. R. S. Sec. 21 (a) of the Banking Act of 1933, however, was amended by section 303 of the Banking Act of 1935, approved Aug. 23, 1935, under the provisions of which private banks are no longer required to submit to examination by the Comptroller or Federal Reserve bank, nor are they required to make to the Comptroller and publish periodic reports of condition. (Five calls for reports of condition of private banks were made by the Comptroller, the first one for June 30, 1934, and the last one for June 29, 1935.)

Table No. 45.-Liquidation statement, 9 receiverships in liquidation during year ended December 31, 1948
Number of banks ..... 9
Collections:
Cash balances in hands of Comptroller and receivers at beginning of period ..... \$648,036
Collections from assets ..... 70,098
Collections from stock assessments ..... 284
Earnings collected ..... 11,589
Offsets allowed and settled (against assets) ..... 14,017
Total ..... 725,990
Disposition of collections:
Dividends paid by receivers to unsecured creditors ..... 123,327Dividends paid by receivers to secured creditorsPayments to secured and preferred creditors, other than throughdividends
Offsets allowed and settled (against liabilities) ..... 14,017
Disbursements for the protection of assets ..... 2,466
Payments of receivers' salaries, legal, and other expenses ..... 77,872
Cash balances in hands of Comptroller and receivers at end of period ..... 526,342
Total ..... 725,990Credit items (deductions) as reported by receivers.

## Table No. 46.-Liquidation statement, 3 administered national bank receiverships completely liquidated and finally closed, during year ended December 31, 1948

Number of banks 3
Total assets taken charge of by receivers ..... $\$ 2,405,895$
Disposition of assets:
Collections from assets ..... 1,771,076
Offsets allowed and settled (against assets) ..... 137,611
497,208
Total ..... 2,405,895
Collections:
Collections from stock assessments14,601
Earnings collected ..... 183,044
Offsets allowed and settled (against assets) ..... 137,611
Total ..... $2,106,332$
Disposition of collections:
Dividends paid by receivers to unsecured creditors ..... 1,644,222
Dividends paid by receivers to secured creditors ..... 24,288
Payments to secured and preferred creditors other than through dividends ..... 149,116
Offsets allowed and settled (against liabilities) ..... 137,611
Disbursements for the protection of assets ..... 1,727
Payments of receivers' salaries, legal, and other expenses ..... 149,368
Total ..... 2,106,332
Capital stock at date of failure ..... 250,000
United States bonds held at failure to secure circulating notes ..... 50,000
United States bonds held to secure circulation, sold and circulation redeemed ..... 50,000
Circulation outstanding at date of failure ..... 49,100
Amount of assessments upon shareholders ..... 75,000
Deposits at date of failure ..... 1,930,872
Borrowed money (bills payable, rediscounts, etc.) at date of failure ..... 97,089
Additional liabilities, established subsequent to date of failure ..... 60,432 ..... 60,432
Claims proved (both secured and unsecured) ..... 1,819,628
Average percent dividends paid to claims proved ..... 91.70
Average percent total payments to creditors to total liabilities estab- lished. ..... 93.62
Average percent total costs of liquidation to total collections including offsets allowed ..... 7.17
Average number of years required to complete liquidation ..... 8.00
Table No. 47.-Liquidation statement, 6 active receiverships as of December 31, 1948
Number of banks ..... 6
Total assets taken charge of by receivers ..... $\$ 25,273,975$
Disposition of assets:
Collections from assets ..... 16,896,849
Offsets allowed and settled (against assets) ..... 786,501
Losses on assets compounded or sold under order of court ..... 692,172
Total ..... 25,273,975
Collections:
Collections from assets ..... 16,896,849
Collections from stock assessments ..... 848,316
Earnings collected ..... 1,447,001
Offsets allowed and settled (against assets) ..... 786,501
Total $19,978,667$
Disposition of collections:
Dividends paid by receivers to unsecured creditors ..... $10,378,083$
Dividends paid by receivers to secured creditors ..... 53,246
Payments to secured and preferred creditors, other than through dividends ..... 6,666,955
Offsets allowed and settled (against liabilities) ..... 786,501
Disbursements for the protection of assets ..... 69,367
Payments of receivers' salaries, legal, and other expenses ..... 1,452,576
Payments of conservators' salaries, legal and other expenses ..... 45,597
Cash balances in hands of Comptroller and receivers ..... 526,342
Total ..... $19,978,667$
Capital stock at date of failure ..... 3,350,000
United States bonds held at failure to secure circulating notes ..... 100,000
United States bonds held to secure circulation, sold and circulation redeemed ..... 100,000
Circulation outstanding at date of failure
1,550,000
Amount of assessment upon shareholders ..... 13,539,564
Borrowed money (bills payable, rediscounts, etc.) at date of failure ..... 5,013,880
Additional liabilities established subsequent to date of failure ..... 640,810
Claims proved (both secured and unsecured) ..... 11,732,237
Average percent dividends paid to claims proved ..... 88.91
Average percent total payments to creditors to total liabilities estab- lished ..... 93.18
Average percent total costs of liquidation to total collections including offsets allowed ..... 7.50
