# EIGHTY-NINTH ANNUAL REPORT 

OF THE
Comptroller of the Currency
1951

# Treasury Department 

Document No. 3179
Comptroller of the Currency

For sale by the Superintendent of Documents, U. S. Government Printing Office Washington 25, D. C. - Price $\$ 1.25$ (cloth)

## LETTER OF TRANSMITTAL

> Treasury Department, Office of the Comptroller of the Currency, Washington, D. C., June 24, 1952.

Sirs: In accordance with the provisions of section 333 of the United States Revised Statutes, I have the honor to submit the following report covering the activities of the Bureau of the Comptroller of the Currency for the year 1951.

Respectfully,

> Preston Delano, Comptroller of the Currency.

The President of the Senate.
The Speaker of the House of Representatives.

## ANNUAL REPORT

OF THE

## COMPTROLLER OF THE CURRENCY

During 1951, the national banking system adjusted its operations to the degree necessary to accomodate the changing needs and direction of the national economy. The inflationary pressures that developed during the previous year abated in 1951, although an enormous volume of capital was invested in further expansion of our productive capacity, to a considerable extent designed for defense production. The level of wholesale prices receded, while the retail level-the cost of living-rose slightly, and probably would have risen further if the American people had not chosen to save an unprecedented volume of their income.

The shift of emphasis in national-bank activities from investment in Federal Government securities to the furnishing of credit for American industry and commerce continued through the year, although at a less rapid rate. At the end of the year, the 4,946 national banks had total resources of $\$ 103$ billion, which was slightly more than 50 percent of all banking resources in the hands of the Nation's 14,636 commercial and savings banks. Total deposits increased almost $\$ 5$ billion (from $\$ 89.5$ billion to $\$ 94.4$ billion). The greater part of this rise was due to an increase of more than $\$ 3$ billion-over 10 percent-in the volume of loans (from $\$ 29.3$ billion to $\$ 32.4$ billion), as contrasted with an increase of $\$ 5.3$ billion, or 22 percent, in 1950. Over 70 percent of this increase took place in commercial and industrial loans, which rose more than 17 percent (from $\$ 13.4$ billion to $\$ 15.7$ bilion), while real-estate loans increased moderately and consumer loans remained steady at $\$ 4.4$ billion.

Although the total volume of Federal Government obligations held by national banks at the end of 1951 was only slightly less than at the end of the previous year ( $\$ 35.2$ billion as compared with $\$ 35.7$ billion), the relative importance of this item in the balance sheet and income statement of the system continued to diminish. In addition, there was a noteworthy change in the maturity pattern of national-bank holdings of Government securities. Their total marketable bonds decreased from $\$ 21.0$ billion to $\$ 18.5$ billion and note holdings from $\$ 10.0$ billion to $\$ 6.7$ billion, while the aggregate of shorter-maturity obligations (bills and certificates) registered an increase of almost 150 percent (from $\$ 3.5$ billion to $\$ 8.7$ billion).

The capital structure of the national banking system continued its steady rise, increasing during the year from $\$ 6.3$ billion to $\$ 6.7$ billion. The negligible amount of national bank preferred stock still
outstanding was further reduced, and at the year's end totalled only $\$ 13$ million, retirable value. Reserves against loans rose from $\$ 388$ million to $\$ 470$ million, and now constitute about $1 \frac{1}{2}$ percent of the gross loans of the system. Needless to say, such reserves are not distributed uniformly in proportion to the volume of loans in each bank.
The total capital structure of the system, combined with $\$ 470$ million of reserves for bad debts, aggregated $\$ 7.1$ billion at the end of 1951. When considered in relation to approximately $\$ 103$ billion of assets, less $\$ 65$ billion of assets represented by cash or its equivalent, United States Government securities, and loans guaranteed or insured by Federal Government agencies, the national banking system held $\$ 1$ of capital funds and reserves for bad debts to protect the risk involved in each $\$ 5.36$ of its remaining loans, municipal and corporate bonds, and other assets. The generally excellent condition of national banks is disclosed by the fact that only $\$ 320$ million of assets (largely loans), or an amount less than the reserve for bad debts alone, were classified as "substandard" or "doubtful" by national bank examiners during their second round of examinations in 1951. Loans subject to less important elements of credit weakness were "especially mentioned" in examination reports in the somewhat increased amount of $\$ 805$ million, or 11.2 percent of capital structure and reserves, but normally only a small percentage of such loans retrogress to a point necessitating substandard, doubtful, or loss classifications.

During the year 1951, 23 State banks were absorbed into the national banking system; 10 by consolidation, 11 under contracts providing for the purchase of assets and assumption of liabilities, and 2 by conversion. National banks absorbed into State banking systems during the year numbered $22 ; 11$ by consolidation and 11 under purchase-and-assumption contracts. Nine national banks were absorbed by other national banks, and two were placed in voluntary liquidation with no designated successor bank.

The trend toward mergers is continuing and perhaps increasing, but equilibrium seems to be maintained with respect to the absorption of State banks into national banks and vice versa. In studying the individual cases involving consolidation or take-over under purchase-and-assumption agreements, and the reasons for the accelerated trend in this direction, motivating factors appear to be higher operating costs, lower profits from operations, difficulties incident to raising additional capital funds, and the desire on the part of shareholders to obtain for their stock an amount approximating its book value, which frequently is not obtainable on the open market. Another major factor influencing the increased trend toward mergers is the inability or neglect to attract or train adequate operating personnel for the higher executive levels. Still another influence appears to be the desire of some of the banks to grow in size and thus acquire increased prestige in their communities.

Applications for charters for new national banks numbered 30 during the year, 15 of which were approved. In connection with applications for new charters a variety of factors must be considered in each case, and their importance and impact vary greatly in different
communities. As an example, a small and economically poor community might not be able to provide support for even one bank because of the inadequate volume of deposits and profitable credit outlets, whereas a thriving and expanding community possessing considerable wealth, although no larger in population, might need and could amply support more than one bank. It is therefore the Comptroller's policy to weigh all pertinent information developed in relation to each individual application with a view to determining whether the needs of the community, and the prospects of successful operation of the proposed bank under the management selected, are such as to warrant favorable action.

We recognize the desirability of competition wherever possible, since we believe that sound and healthy competition between banks redounds to the public welfare through increased adequacy of credit facilities, fair rates of interest, and the prevention of undue concentration of monetary and economic power. Hence, in considering applications for new banking offices in communities having only one bank, we give considerable weight to this factor. In communities where competition already exists, the factor is given somewhat less weight, for excessive competition can result in such a weakening of existing banking institutions as to bring consequences so injurious to the welfare of the community as to outweigh any benefits to be anticipated from increasing the intensity of competition in such cases.

On December 31, 1951, 356 national banks were operating a total of 2,259 domestic branches and 8 seasonal agencies. A number of applications to establish new branches were pending at the beginning of 1951, and 218 applications were received during the year. Certificates authorizing the establishment of 153 new branches were issued during 1951, and 54 applications were rejected. The remaining applications either were still pending at the end of the year, or had been abandoned.

The foregoing summarization of the salient changes in the national banking structure during the year offers an appropriate occasion to comment upon the adequacy of banking facilities in general throughout the country. Despite the fact that the number of commercial banks today is only half the number a generation ago, it is believed that as a result of shifts of population to urban areas, improved transportation facilities, and more efficient banking methods, there are very few people in this country who do not have reasonably convenient access to banking facilities.

It is true that there are proportionately more bankless communities in States which prohibit branch banking than in those States in which branch systems are permissible. In this matter the Congress and the State Legislatures are confronted with the same problem as is encountered by bank supervisors-that is, they must decide between the relative advantages of encouraging independent local "unit" banks, or permitting operation of the generally more economical branches of a larger bank. It is obviously impossible to preserve the full ad vantages of both arrangements, so a choice often must be made between allowing a branch to be established (where legally permissible) or deciding that some small town must do without its own banking facilities. However, it should be emphasized that this problem
is not a major one; almost all citizens find adequate banking facilities reasonably accessible to them.

During the difficult period of the early 1930s, the sale of preferred stock, chiefly to the Reconstruction Finance Corporation, served a valuable purpose in strengthening the capital structure of the country's banking system. Prior to the Banking Act of 1933, national banks were not empowered to issue preferred stock. Nevertheless, by June 1935, more than 2,000 national banks (one-third of all national banks) had outstanding over $\$ 500$ million of preferred stock, which constituted 17 percent of the total capital structure of the system. Today, only 42 banks have preferred stock outstanding, and the aggregate amount of such preferred stock is only a minor fraction of 1 percent of the capital structure of the system.

As these figures indicate, preferred stock has been considered, and has functioned, almost entirely as an emergency method of nationalbank financing. Within recent years, however, it has been suggested with increasing frequency, in some quarters, that banks should be authorized to issue preferred stock even in times like the present, when no financial stringency exists. Accordingly, it is deemed appropriate to comment at some length on this subject, even though the topic was covered briefly in the Comptroller's Annual Report for 1949.

During the year 1951 the sharebolders of 190 national banks located throughout the country acted to consummate programs involving the sale of new common stock yielding over $\$ 150$ million for addition to capital and surplus accounts. Apart from 11 banks that entered the system during 1951, the total capital structures of 4,935 national banks increased more than $\$ 400$ million to a total of $\$ 6,667$ million at the year end. Slightly more than 36 percent of this increase in capital structure was achieved through the sale of new common stock. Moreover, these same banks added $\$ 88$ million to their reserves for bad debts, so the over-all strengthening of capital structures and reserves during 1951 amounted to more than $\$ 500$ million.

In the course of the year, 293 national banks declared and paid dividends payable in common stock aggregating $\$ 55$ million, the motives being, in the vast majority of instances, (1) to achieve a sounder relationship between the capital account and gross capital structure, and (2) to reduce the book value per share, and hence the market value, to a more moderate level, thereby fostering a broader market, and, to the extent permitted by dividend yield, a somewhat narrower spread between market price and book value. It is almost always true that the stock of a bank having a book value of several hundred dollars per share and upwards has a relatively narrow market, and is not likely to command as advantageous a market price in relation to book value, as stock with a lower book value. Many of the dividends paid in common stock during 1951 were for the express purpose of reducing book values, thereby facilitating the sale of new common stock at prices better calculated to attract the shareholders and broaden the market for the shares.

The success achieved by 190 national banks in marketing new common stock issues is at partial variance with the arguments of those who contend that the only answer to a need for additional bank
capital rests in the sale of preferred stock. However, recognition must be given to the fact that should the Comptroller decide to approve the sale of preferred stock by national banks, many of the present problems relating to inadequate bank capitalization could be solved with greater ease than is currently possible through the medium of common stock. The issuance of preferred stock with a fixed dividend rate normally would not dilute the earnings value of the existing common stock, nor would the factor of book value dilution in the common stock arise through the frequent necessity of marketing new common stock issues at prices below current book value. The net earnings before dividends of some banks have receded to some extent in relation to invested capital, and their managements are unwilling to further impair the earnings return by selling additional common stock, even though they would welcome a stronger capitalization in relation to business volume.

This problem has received and will continue to receive serious study. It is never feasible to attempt to arrive at an irrevocable decision on a two-sided problem of this character, but up to the present the Comptroller has been unwilling to authorize the issuance of preferred stock by national banks except as an emergency measure. While a change in this policy admittedly would solve, in part, some present recapitalization problems, it is believed that certain other problems would ensue through the issuance of preferred stock.

The Comptroller's main responsibility is to the depositors of national banks, but he also has a definite responsibility to the shareholders. The common stockholders would receive the advantage of nondiluted and possibly enhanced earnings through the issuance of preferred stock. As an offset to this, the increased weight of risk of an enlarged volume of business predicated on the newly acquired preferred capital would rest in the first instance on the common shareholders. The new preferred capital would justify an enlarged volume of risk assets, or more fully justify the existing volume of such assets, from the standpoint of depositor protection, but it must not be overlooked that the full weight of the increased risk would bear first on the common stockholders. Over a period of time this would inevitably result in the common stock of banks losing some and perhaps much of its present high standing as a sound investment. The sale of preferred stock would tend to become the general rule in bank recapitalization programs, and the sale of common stock much more difficult.

If preferred stock were to be approved as a medium of normal bank capitalization, it is obvious the Comptroller would have to establish sound policies relative to the proportion of preferred stock that could be issued by a bank in relation to its common capital stock or its over-all capital structure. Certainly it would be undesirable for a bank to have a capital structure top-heavy with nonvoting (except under certain conditions) preferred stock controlled by a thin layer of common stock. It is true the Comptroller could control this situation in initial instances, but if a bank issued preferred stock in reasonable proportion to its common stock and then by reason of growth or asset losses found it necessary again to raise additional capital, and this proved possible only through the issuance of more preferred stock, the Comptroller might be forced to choose between foregoing the additional capital protection needed by the bank's
depositors, or permitting the bank's capital structure to become topheavy with preferred stock. Naturally, in such a situation the additional preferred capital would be approved, with the result that the amounts of preferred stock issued by particular banks, over a period of time, would be dictated more by exigencies than by the sound policies initially established by the Comptroller.

One additional point is worthy of mention. If banks were to use the avenue of preferred stock for normal capital increases, it is easy to imagine the problems that would arise when some of those banks required emergency recapitalization. The two classes of stock already outstanding could very well necessitate adding a third class of stock outranking both the existing common and preferred stocks. While it can be argued, with some justification, that achieving adequate capitalization now, assuming this is possible through the medium of preferred stock, should reduce the number of possible future emergency recapitalization cases, it is disturbing to contemplate the complications that would ensue from three classes of stock with an almost infinite number of possible variations in preferences as to dividends, retirement, voting rights, voluntary and involuntary liquidation, and many others, which would give rise to conflicts of interest between the several classes of shareholders.

The decision in this matter must be based in part on the nature and the degree of urgency of the situation giving rise to the problem. In this instance, the basic cause is the existence of banks that are undercapitalized to an extent that requires correction through sale of additional capital stock.

A recent review of the reports of examination of all 4,946 national banks discloses that fewer than 300 are definitely undercapitalized when capital structure is studied in relation to (1) volume and character of assets involving some risk element, (2) volume of assets with credit weaknesses that are unwarranted or greater than normal, (3) ability and general policies of management, (4) past record of losses, (5) earning capacity, record of earnings retention in the past, and prospects for future retention of earnings, and (6) economic stability of the area in which the bank is located. In other words, about 5 percent of all national banks-for the most part relatively small institutions-are considered definitely undercapitalized.

To be sure, there are additional national banks, falling within what might be termed a border-line category, which could use additional capital to advantage, a fact recognized by both the bankers concerned and the Comptroller's office, but the scope of definite undercapitalizetion is restricted, fortunately, to a small percentage of national banks. That this is so reflects great credit on the directors and managers of the 726 national banks which recognized the need for additional capital and consummated 860 capital increase programs during the 6 -year period ending December 31, 1951.

While it is not intended to minimize the importance of definite undercapitalization, because 300 undercapitalized banks are 300 too many, it is nevertheless true that the record of corrections effected during recent years through the sale of common stock is persuasive evidence that such situations can be dealt with successfully without recourse to the issuance of preferred stock.

During 1951, a joint committee of Congress began an extensive study of the role of monetary policy and public debt management in achieving price stability and high-level employment. Participation in this study provided the occasion for reexamination of the manner in which our Bureau can contribute to the achievement of these objectives.

The Employment Act of 1946 declares it to be the policy of the Federal Government to utilize all its functions and resources to promote maximum employment, production, and purchasing power. In the formulation of its own policies and procedures, our Bureau has always borne in mind that it was created, and its functions assigned, for the purpose of advancing the general economic welfare of the people of the United States.

One aspect of this problem which has confronted the Bureau in recent years is whether bank examination should serve as an active direct tool in governmental programs intended to level off the peaks and valleys of economic cycles. It is our firm conviction that use of bank examination in this manner would pervert its true function and ultimately would be more harmful than beneficial.

Experience has demonstrated that comments, criticisms, and suggestions in the course of examinations, in examination reports, and in our communications to banks are perhaps the most effective influence our office can bring to bear in keeping banks on a desirable course or persuading them to abandon unsound policies. These beneficial effects of the examination process would be lost, to a considerable extent, if bankers' confidence in the trustworthiness of reports of examination were shaken, as it would be when they learned that examiners were forming their judgments not on the basis of existing conditions and facts, but rather with the deliberate purpose of affecting future conditions by encouraging banks to adopt generous or restrictive credit policies in accordance with the current economic program of the Federal Government.

It has been our conviction that the Bureau can make its greatest contribution to the general welfare, as well as to "maximum employment, production, and purchasing power," by concentrating its efforts upon the maintenance of a system of sound and well-managed banks, adequate in number, location, and resources to satisfy the Nation's needs for the services they perform. This attitude has been reexamined, during the past 5 years, in the light of the Congressional declaration of policy in the Employment Act of 1946, and our decision has been that the underlying purpose of that act and its declaration of policy would be best served by this office through a continuation of our traditional approach. In other words, our efforts are directed towatrd the improvement and maintenance of a great and powerful machine in good condition, but we believe that, over the long run and in the broadest sense, we would injure rather than advance the general welfare if we attempted to dictate also the details of the operation of this machine.

It is desirable to mention one current-day banking problem which is far from serious in its scope at the present time but which may become more important in the future. During recent years many banks have established employee pension fund trusts. In some instances, the bank's trust department acts as trustee under a pension fund agreement; in others, pension fund management and administration are in the hands of individual trustees who are appointed, usually on an annual basis, by the bank's board of directors. Regardless of the method employed, for all practical purposes the pension fund management ordinarily rests in the hands of the bank's board of directors.

The Comptroller's office is a strong advocate of retirement-pension plans for bank officers and employees, but some dark spots are beginning to develop. A few instances have arisen involving what might be regarded as an unwise use of the funds held in employee pension trusts, and as such funds continue to grow, this pattern may widen and become more serious. For example, in one or two cases an institution has sold its banking house (which is not suitable for any other use) to its pension fund on a contract basis. Such a pension fund, over a period of years, will end up with a banking house as its major asset, the basic value depending almost entirely on the continued use of the building by the bank-and the continued existence of the bank.

Pension-trust funds are being used in more than a few instances to purchase the bank's own stock as an investment. The bank directors in most cases indirectly control the pension trust and hence-through stock of the bank held in such trusts-will see the day arrive when they can perpetuate themselves in office through directing the vote of the stock. Such a development would be patently undesirable. Furthermore, when such banks need to raise additional capital, a large block of shares held in a pension trust without funds to purchase its proportionate part of the new issue would make it difficult to carry out successfully the recapitalization program.

It is believed that bank management must, in every instance, eliminate all selfish motives from the investment policies of employee pension funds. The basic criterion should be the interest and welfare of the officers and employees who properly expect to benefit upon retirement from the income derived from investments made by the trustees. Certainly, the purchase of parking lots for the use of the bank, or the purchase of special-purpose bank buildings, has no place in a sound pension-trust investment program. Likewise, for the reasons already stated, investment of pension funds in the bank's own stock is almo st never justifiable.

Up to the present, occurrences of this type have been comparatiwely rare, but if it becomes necessary the Comptroller will recommend appropriate corrective legislation.

Several legislative proposals directly relating to the national banking system were introduced into Congress during 1951, althouqh none
was enacted into law. Among these was S. 2128, providing for merger of national banks, or State and national banks, with the approval of the Comptroller, under an arrangement whereby cash "payoff" would be available only to dissenting shareholders of the absorbed bank, which is ordinarily the smaller. Another bill, S. 2252, was designed to achieve more equitable operation of the "two-way-street" law enacted in 1950, which provided for conversion of national banks into, and consolidation of national banks with, State banks, under State charter.

During the second session of the Eighty-second Congress, a bill has been introduced (S. 2938) which would eliminate the provision of section 5155 of the Revised Statutes (12 U. S. C. 36) that a national bank may not establish a branch beyond the limits of the place in which it is located unless it has a capital stock of at least $\$ 500,000$ (except that lesser minimums are applicable in certain States with population of less than one million). The proposed legislation is in accord with our experience that the specified minimum capital requirement is excessive in some cases, and prevents the establishment of needed banking facilities.

The Comptroller's office is in sympathy with the objectives of the above-mentioned bills, and recommends their enactment.

Also introduced during 1951 was H. R. 3175, which is identical with other bills introduced into Congress during recent years for the purpose of clarifying, and modifying in minor respects, section 5219 of the Revised Statutes (12 U. S. C. 548), relating to taxation of national banks by the several States. We do not make any recommendation regarding this proposal, since its subject-matter does not relate directly to the functions of our Bureau.

In the Comptroller's Annual Report for the year 1949, it was recommended that the Bureau's functions with respect to building associations and credit unions organized under provisions of the District of Columbia Code be transferred to the Home Loan Bank Board and the Federal Security Agency, respectively. With respect to building associations, this suggestion was effectuated by the enactment of Public Law 148, Eighty-second Congress, and it is hoped that reorganization plans now under consideration will result in the recommended transfer of supervisory powers with respect to District of Columbia credit unions. The centralization of Federal governmental authority over these groups of institutions may be onxpected to result in greater efficiency and uniformity of administration.

A comparison of the assets and liabilities of the banks in the National Banking System as of December 30, 1950, April 9, June 30, Octoher 10, and December 31, 1951, reported pursuant to calls for condition statements by the Comptroller of the Currency, is shown in the following table.

## FIDUCIARY ACTIVITIES OF NATIONAL BANKS

As of December 31, 1951, 1,773 national banks have been granted trust powers, either limited or full, for the administration of fiduciary accounts. Two hundred and sixty-one of these banks are not acting under any of their granted fiduciary powers. During the year ended December 31, 1951, 1,645 examinations were made of trust departments, including 1,582 trust examinations in unit or independent banks, and 63 trust examinations in branches.

While carrying values for trust assets have not been standardized throughout the country, there have been relatively few changes of system within individual organizations. Trust department assets totaled $\$ 36,137,000,000$ as of December 31, 1951, comparjed to $\$ 9,557,000,000$ as of June 30, 1941. Because of the relatively few changes of system, these figures are sufficiently comparable although
they do not reflect total current market values. Present-day totals also include a substantial amount of agency and custodianship assets which are under the supervision and administration of the trust department.

Gross trust department income of national banks totaled $\$ 74,741,000$ during 1951 compared to $\$ 32,714,000$ in the year ended June $30,1941$. Many banks make no record of expense or estimation of allocated overhead and no tabulation can be accomplished for net earnings of trust departments throughout the country. Losses to the national banks through trust department operations have been almost negligible.

## EARNINGS, EXPENSES, AND DIVIDENDS OF NATIONAL BANKS FOR YEAR ENDED DECEMBER 31, 1951

The net profits of national banks before dividends for the calendar year 1951 were $\$ 507,000,000$, which amounted to 7.79 percent of average capital funds. Net profits for the previous year were $\$ 538,000,000$ or 9 percent of average capital funds.

Net earnings from operations of $\$ 975,000,000$ showed an increase of $\$ 119,000,000$ over the previous year. However, after adding to net earnings from operations profits on securities sold of $\$ 40,000,000$ and recoveries on loans and investments, etc. (including adjustments in valuation reserves) of $\$ 56,000,000$, and deducting losses and chargeoffs (including current additions to valuation reserves) of $\$ 231,000,000$ and taxes on net income of $\$ 333,000,000$, the net profits of the banks before dividends for the year 1951 were $\$ 31,000,000$ less than for the year 1950 .

Gross earnings were $\$ 2,454,000,000$, an increase of nearly $\$ 262,000,000$ over the gross earnings for the year 1950. The principal items of operating earnings in 1951 were $\$ 1,341,000,000$ from interest and discount on loans, an increase of $\$ 237,000,000$ over 1950, and $\$ 569,000,000$ from interest on United States Government obligations, a decrease of $\$ 21,700,000$. Other principal items of operating earnings were $\$ 148,000,000$ from interest and dividends on securities other than United States Government obligations, an increase of nearly $\$ 16,000,000$ over the previous year, and $\$ 129,000,000$ from service charges on deposit accounts, an increase of $\$ 9,000,000$. Operating expenses, excluding taxes on net income, were $\$ 1,479,000,000$ as against $\$ 1,337,000,000$ in 1950 . Principal operating expenses were $\$ 746,000,000$ for salaries and wages of officers and employees and fees paid to directors, an increase of $\$ 82,000,000$ over 1950 , and $\$ 218,000,000$ expended for interest on time and savings deposits, an increase of $\$ 28,000,000$.

Cash dividends declared on common and preferred stock in 1951 totaled $\$ 248,000,000$ in comparison with $\$ 230,000,000$ in the previous year. The rate of cash dividends was 3.81 percent of the average capital funds during the year. The cash dividends in 1951 were 48.91 percent of the net profits available for the year. The remaining 51.09 percent of net profits, or $\$ 259,000,000$, was retained by the banks in their capital funds.

Interest and dividends on securities represented 29 percent of gross earnings for the year, with the banks in the Twelfth Federal Reserve District showing the lowest ratio at 21 percent, while the seventh district showed 37 percent for the highest ratio. Interest and discount on loans accounted for 55 percent of the banks' earnings, varying from 47 percent in the seventh district to 62 percent in the twelfth district. Salaries, wages, and fees took over 30 percent of gross earnings, ranging from 29 percent in the fourth district to 32 percent in the ninth district. Current operating earnings before income taxes were more than 40 percent of gross earnings, ranging from 37.6 percent in the twelfth district to 42.6 percent in the tenth district.

The rate of interest and dividends received on the average securities held during the year was 1.70 percent, and varied from 1.64 percent at the banks in the second district to 1.91 percent in the third district. On the average loans and discounts the rate of interest and discount varied from 3.55 percent in the second district to 4.94 percent in the twelfth district. The national average was 4.36 percent.

Current operating earnings before income taxes were 15 percent on the average total capital accounts, varying from 11 percent in the third district to 20 percent in the twelfth district. Net profits after income taxes but before dividends were, as noted above, 7.79 percent on the average capital accounts, ranging from 6.05 percent in the second district to 10.6 percent in the twelfth district.

Summaries of the earnings, expenses, and dividends of national banks for the years ended December 31, 1950, and 1951, are shown in the following table.

## STRUCTURAL CHANGES IN THE NATIONAL BANKING SYSTEM

The authorized capital stock of the 4,947 natıonal banks in existence on December 31, 1951, including 1 inactive bank, consisted of common capital stock aggregating $\$ 2,097,307,062$, a net increase during the year of $\$ 109,952,025$, and preferred capital stock aggregating $\$ 12,052,774$, a net decrease during the year of $\$ 3,360,881$.

In addition to 13 applications with proposed common capital stock of $\$ 1,700,000$ carried over from the previous year, 32 applications were received to organize national banks and to convert State banks into national banking associations with proposed common capital stock of $\$ 5,465,000$. Of these applications, 17 with proposed common capital stock of $\$ 2,640,000$ were approved; 6 with proposed common capital stock of $\$ 1,000,000$ were rejected, and the remainder had been abandoned or were still pending on December 31. From the applications carried over from the previous year and those approved during 1951, 11 national banking associations with common capital stock of $\$ 1,750,000$ were authorized to commence business. Of the charters issued, 2 with common capital stock of $\$ 350,000$ resulted from the conversions of State banks.

During the year, 10 State banks were consolidated with 10 national banks under authority of the act of November 7, 1918, as amended, resulting in the consolidated national banks having common capital stock of $\$ 26,350,000$. Approximately $\$ 234,226,000$ of assets were brought into the national banking system by reason of the 10 State banks being consolidated with national banks. In addition, national banks reported the purchases of 11 State banks, with capital stock and debentures of $\$ 983,750$ and assets of approximately $\$ 37,641,000$.

During the year, 22 national banks with common capital stock of $\$ 8,999,500,3$ of which also had $\$ 198,950$ of preferred capital stock, went into voluntary liquidation in the manner provided by sections 5220 and 5221 of the United States Revised Statutes. Of these banks, 9 with common capital stock of $\$ 1,975,000,1$ of which also had $\$ 98,950$ of preferred capital stock, and assets of $\$ 112,522,613$, were succeeded by other national banks; 11 with common capital stock of $\$ 6,899,500,1$ of which also had. $\$ 75,000$ of preferred capital stock, and assets of $\$ 230,995,853$, were succeeded by State banks, and 2 with common capital stock of $\$ 125,000,1$ of which also had $\$ 25,000$ of preferred capital stock, and assets of $\$ 2,939,578$, paid their depositors and quit business. Also, during the year, 11 national banks with common capital stock of $\$ 16,697,500$, 1 of which also had $\$ 25,000$ of preferred capital stock, and assets of approximately $\$ 703,300,000$, were merged or consolidated with State banks under the provisions of Public Law 706 and the laws of the States where the banks were located.

Changes in the number and capital stock of national banks during the year ended December 31, 1951, are shown in the following summary.

Organization, capital stock changes, and national banks closed as reported during the year ended Dec. 31, 1951

## BRANCHES

On December 31, 1951, 356 national banks were operating a total of 2,259 branches and 8 seasonal offices. In 9 of the States, namely, California, Massachusetts, Michigan, New Jersey, New York, Ohio, Oregon, Pennsylvania, and W ashington, there were 203 national banks operating 1,679 branches, which was 74 percent of the number of all branches at the end of the year.

During the year ended December 31, 1951, 153 branches were brought into the national banking system. Of the 153 branches, 59 were authorized to operate in places other than the city in which the parent bank is located. During the same period 47 branches, 2 of which were not in operation at the beginning of the year, were discontinued, 6 through action of the boards of directors of the parent banks, 19 through voluntary liquidation of the parent banks, and 22 through the merger or consolidation of the parent banks with State banks under the provisions of Public Law 706 and the laws of the States where the parent banks were located.

Of the 153 branches authorized, 152 were operating on December 31, 1951. Seven branches authorized in 1950 did not begin operations until 1951. There was a net gain in the system of 114 operating branches in the year.

## NATIONAL BANK NOTES OUTSTANDING

There were as of December 31, 1951, $\$ 80,211,173$ of national bank notes outstanding.

## DISTRIBUTION OF ALL BANKS

On December 31, 1951, there were 14,636 commercial and savings banks in the United States and possessions with deposits of $\$ 186,603,665,000$. Of these banks, 13,657 , or 93 percent, with 96 percent of the deposits, were insured banks. The 4,939 national banks, members of the Federal Reserve System, represented 34 percent of all banks and held 50 percent of the total deposits. The 529 mutual savings banks, of which 202 were insured, held $\$ 20,915,329,000$ of deposits.

Classification of all banks, Dec. 31, 1951

1 Includes 5 nonmember insured national banks.
${ }^{2}$ Includes 2 nonmember uninsured national banks.

## ASSETS AND LIABILITIES OF ALL BANKS IN THE UNITED STATES AND POSSESSIONS

The total assets of all classes of active banks in the United States and possessions on December 31, 1951, amounted to $\$ 203,863,000,000$, an increase of $\$ 11,622,000,000$ since December 30, 1950.

The total deposits at the end of 1951 amounted to $\$ 186,604,000,000$, an increase of $\$ 10,484,000,000$ over 1950. Included in the latter aggregate are deposits of individuals, partnerships, and corporations of $\$ 154,478,000,000$, an increase of $\$ 7,961,000,000$ in the year. Deposits of the United States Government, including postal savings deposits, were $\$ 3,728,000,000$, an increase of $\$ 659,000,000$ or 21 percent; deposits of States and political subdivisions smounting to $\$ 10,102,000,000$ showed an increase of $\$ 556,000,000$, or 6 percent, and deposits of banks of $\$ 15,104,000,000$ were $\$ 1,054,000,000$, or 8 percent, more than in 1950.

Loans and discounts amounted to $\$ 68,001,000,000$ in December 1951 after deducting reserves of $\$ 997,000,000$ for possible future losses. The net loans were $\$ 7,290,000,000$, or 12 percent, over the amount reported as of the end of 1950 . Commercial and industrial loans of $\$ 26,040,000,000$ were 18 percent more than the 1950 figure; consumer loans to individuals, including single-payment loans of $\$ 3,000$ and over, of $\$ 10,597,000,000$ increased 3 percent; real estate loans of $\$ 24,648,000,000$ were up 12 percent, and all other loans of $\$ 7,713,000,000$ increased 4 percent.

The banks held obligations of the United States Government, direct and guaranteed, of $\$ 71,595,000,000$ in December 1951, a decrease of $\$ 1,593,000,000$, or 2 percent in the year. Obligations of States and political subdivisions held amounted to $\$ 9,393,000,000$, an increase of $\$ 1,144,000,000$, and other securities held amounted to $\$ 6,598,000,000$, an increase of $\$ 30,000,000$. The total of all securities held at the end of 1951 was $\$ 87,586,000,000$, and represented 43 percent of the banks' total assets. At the end of the previous year the ratio was 46 percent.

Cash and balances with other banks, including reserve balances, in 1951 were $\$ 45,717,000,000$, an increase of 11 percent since 1950.

Total capital accounts were $\$ 14,706,000,000$, compared to $\$ 13,916$,000,000 at the end of 1950 . The total of surplus, profits, and capital reserves of $\$ 10,866,000,000$ increased $\$ 620,000,000$, or 6 percent, in the year.

A statement of the assets and liabilities of all classes of active banks at the end of December 1950 and 1951 follows:

Assets and liabilities of all banks in the United States and possessions, 1950 and 1951
[In millions of dollars]

## REPORTS FROM BANKS

National banks in the continental United States, Alaska, the Territory of Hawaii, and the Virgin Islands of the United States were, in accordance with the provisions of section 5211 of the Revised Statutes, called upon to submit four reports of condition during the year ended December 31, 1951. Reports were required as of April 9, June 30, October 10, and December 31. Summaries from all condition reports, by States, are published in pamphlet form. National banks were also required by statute to obtain reports of their affiliates and holding company affiliates other than member banks as of the four dates for which condition reports of the banks were obtained and to submit such reports to the Comptroller.

Under the general powers conferred upon him by law, the Comptroller obtained from each national bank during the period indicated semiannual reports of earnings, expenses, and dividends; also reports of condition of foreign branches as of December 31, 1951.

National banking associations authorized to act in a fiduciary capacity were called upon to submit reports of their trust departments as of the close of business on December 31, 1951.

In accordance with section 298 of the code of law for the District of Columbia, banks other than national in the District were required to make to the Comptroller condition reports and reports of earrings,
expenses, and dividends identical with those obtained from national banks during the year. Credit unions in the District of Columbia under the supervision of the Comptroller were required to submit reports of their assets and liabilities as of December 31, 1951, and reports of receipts and disbursements for the year ended December 31, 1951.

Detailed figures from reports of condition and earnings and dividends will be found in the appendix of this report.

Under Public Law 148, Eighty-second Congress, chapter 404, first session, approved September 15, 1951, 65 Stat., 323, the code of law for the District of Columbia was amended, transferring from the Comptroller to the Home Loan Bank Board all subsequent supervision and regulation of District of Columbia building and loan associations.

## AFFILIATES AND HOLDING COMPANY AFFILIATES OF NATIONAL BANKS

The Federal statute requires each national bank to obtain and submit to the Comptroller periodically reports of its affiliates, as defined in sections 2 (b) and (c) of the Banking Act of 1933, as amended, unless waived by the Comptroller. At the end of December 1951, 871 of the national banks reported 12,222 affiliates and holding company affiliates, of which 10,505 were duplications reported by 238 banks. The actual number of affiliates, or 1,717 , included 23 holding company affiliates which controlled 197 active national banks. The number of banks in each holding company group varied from 1 to 48. At the end of 1950 there were 23 holding company affiliates which controlled 196 national banks, varying in number from 1 to 48 associations. Under the waiver of requirement for reports of affiliates, it was necessary for only 364 banks to submit and publish 413 reports of affiliates and holding company affiliates. Of the latter number 180 were duplications of reports submitted by 180 banks.

## LIQUIDATION OF INSOLVENT NATIONAL BANKS

During the year ended December 31, 1951, no national banks were placed in receivership. No liquidations of insolvent national banks were completed during the year, leaving a total of two receiverships in process of liquidation as of December 31, 1951, both of which were involved in litigation.

## ISSUE AND REDEMPTION OF NOTES

One thousand five hundred and forty-four shipments of Federal Reserve currency were made from Washington, D. C., during the year ended December 31, 1951, to Federal Reserve agents and Federal Reserve branch banks, aggregating $\$ 7,947,940,000$, and, in addition, 27 deliveries were made to the Treasurer of the United States aggregating $\$ 124,800,000$.

Four thousand and forty-four lots of unfit Federal Reserve currency were received for verification and certification for destruction consisting of $790,223,312$ notes aggregating $\$ 9,875,015,380$.

There were received 49 lots of national bank notes for verification and certification for retirement and destruction consisting of 303,381 notes aggregating \$4,730,419.

One hundred seventy nine thousand and seven hundred fragments or charred Federal Reserve and national bank notes aggregating $\$ 3,495,272$ were presented by the Treasurer of the United States for identification and approval.

## EXAMINATION OF NATIONAL BANKS

The National Bank Act requires that each national bank be examined at least twice each year in order that the Comptroller may be kept currently informed of its condition and require such corrections as are deemed necessary with a view to maintaining each bank in sound condition. In addition to the regular examinations, special examinations are conducted of banks the condition of which is regarded as unsatisfactory.

During the year ended December 31, 1951, 9,377 examinations of banks, 4,194 examinations of branches, including 27 foreign branches, 1,645 examinations of trust departments, and 29 examinations of affiliates were conducted. Ten State banks were examined in connection with conversions to or consolidations with national banks. Investigations were also conducted in connection with applications for 21 new charters and 158 new branches.

## ORGANIZATION AND STAFF

On December 31, 1951 the Office of the Comptroller of the Currency had in its employ 1,126 persons. Of these, 205 were assigned to the Washington Office, including 33 in the Federal Reserve Issue and Redemption Division, which is an expense of the Federal Reserve banks. The total personnel in the Washington Office was increased by 12 during the year.
Twenty-one national bank examiners and 84 assistant national bank examiners left the service during the year. In the same period 21 assistants were commissioned national bank examiners and 115 new assistants were appointed, leaving a total of 258 examiners and 543 assistant examiners in the service at the end of the year. The 258 examiners have an average term of service, including service as assistants, in excess of 19 years. There were 120 clerks employed-in the 12 Federal Reserve districts at the end of the year. During the year 1951, 8 assistant national bank examiners were placed on military furlough. The total field force during the year decreased by one person.

On March 1, 1951, Mr. W. W. Taylor, a career employee who had served the office in various bank examining positions for approximately 26 years, was appointed Third Deputy Comptroller to fill the vacancy created through the retirement of Mr. R. B. McCandless, Second Deputy Comptroller, and the promotion of Mr. L. A. Jennings from Third Deputy Comptroller to Second Deputy Comptroller.

## EXPENSES OF THE BUREAU

The following is a summary of the operating expenses of the Bureau for the year ended December 31, 1951:

Funds used in payment of the bank supervision costs are derived primarily from assessments against the banks supervised. The cost of operating the Division which handles the currency issue and redemption functions is paid by the Federal Reserve Banks.

## Notes

Act of Feb. 25, 1863, provided for reports of condition on the first of each quarter, before commencement of business.
Act of June 3, 1864-First Monday of January, April, July, and October, before commencement of business, on form prescribed by Comptroller (in addition to reports on first Tuesday of each month showing condition at commencement of busincss in respect to certain items; i. e., loans, specie, deposits, and circulation).
Act of Mar. 3, 1869, not less than 5 reports per year, on form prescribed by Comptroller, at close of business on any past date by him specifled.
Act of Dec. 28, 1922, minimum number of calls reduced from 5 to 3 per year.
Act of Feb. 25, 1927, authorized a vice president or an assistant cashier designated by the board of directors to verify reports of condition in absence of president and cashier.
Act of June 16, 1933, requires each national bank to furnish and publish not less than 3 reports each year of affiliates other than member banks, as of dates identical with those for which the Comptroller shall during such year requise reports of condition of the bank. The report of each affliate shall contain such information as in the judgement of the Comptrolier shall be necessary to disclose fully the relations between the affliate and the bank and to enable the Comptroller to inform himself as to the effect of such relations upon the affairs of the bank.
Sec. 21 (a) of the Banking Act of 1933 provided, in part, that after June 16, 1934, it would be unlawful for any private bank not under State supervision to continue the transaction of business unless it submitted to periodic examination by the Comptroller of the Currency or the Federal Reserve bank of the district, and made and published periodic reports of condition the same as required of national banks under section 5211, U. S R.S. Sec. 21 (a) of the Banking Act of 1933, however, was amended by section 303 of the Banking Act of 1835, approved Aug. 23,1935 , under the provisions of which private banks are no longer required to submit to examination by the Comptroller or Federal Reserve bank, nor are they required to make to the Comptroller and publish periodic reports of condition. ( 5 calls for reports of condition of private banks were made by the Comptroller, the first one for June 30, 1934, and the last one for June 29, 1935.)

Notr.-Consolidated statement of the assets and liabilities of the above named branches as of Dec. 31, 1951, appears in the following table.
Table No. 26.-Consolidated staiement of assets and liabilities of foreign branches of national banks, Dec. 31, 1951
[In thousands of dollars]
Number of branches ..... 94
ASSETS
Loans and discounts, including overdrafts ..... 660, 043
Securities ..... 80, 424
Currency and coin ..... 61, 233
Balances with other banks and cash items in process of collection ..... 281, 234
Due from home office and branches ..... 776, 597
Real estate, furniture and fixtures ..... 10, 333
Customers' liability on account of acceptances ..... 33, 874
Other assets ..... 20, 683
Total assets 1,924, 421
LIABILITIES
Demand deposits of individuals, partnerships, and corporations ..... 1, 136, 070
Time deposits of individuals, partnerships, and corporations ..... 268, 792
Deposits of U.S. Government ..... 113, 793
State and municipal deposits ..... 24, 310
Deposits of banks ..... 94, 885
Other deposits (certified and cashiers' checks, etc.) ..... 38, 256
Total deposits ..... 1, 676, 106
Due to home office and branches ..... 152, 148
Bills payable and rediscounts ..... 30, 839
Acceptances executed by or for account of reporting branches and outstanding ..... 34, 217
Other liabilities ..... 28, 396
Total liabilities ..... 1, 921, 706
CAPITAL ACCOUNTS
Undivided profits, including reserve accounts ..... 2, 715
Total liabilities and capital accounts ..... 1, 924, 421Note.-For location of foreign branches see preceding table.

(Data relative to reopening and second final closing included in report for year ended Oct. 31,1941 .)
Table No. 49.-Liquidation statement, 2 receiverships in liquidation during year ended Dec. 31, 1951
Number of banks2
Collections:
Cash balances in hands of Comptroller and receivers at beginning of period ..... \$303, 496
Collections from assets ..... 229, 755
Total ..... 778, 406
Disposition of collections:
Disbursements for the protection of assets ..... 2, 321
Payments of receivers' salaries, legal and other expenses ..... 62, 354
Cash balances in hands of Comptroller and receivers at end of period ..... 713, 731
Total ..... 778, 406
Table No. 50.-Liquidation statement, 2 active receiverships as of Dec. 31, 19512 Number of banks
Total assets taken charge of by receivers ..... \$12, 377, 410
Disposition of assets:
Collections from assets ..... 8, 269, 965
Offsets allowed and settled (against assets) ..... 309, 485
Losses on assets compounded or sold under order of court ..... 203, 721
Total ..... 12, 377, 410
Collections:
Collections from assets ..... 8, 269, 965
Collections from stock assessments ..... 503, 777
Earnings collected ..... 1, 197, 797
Offsets allowed and settled (against assets) ..... 309, 485
Total ..... 10, 281, 024
Disposition of collections:
Dividends paid by receivers to unsecured creditors ..... 3, 567, 759
Payments to secured and preferred creditors, other than through dividends ..... 4, 932, 204
Offsets allowed and settled (against liabilities) ..... 309, 485
Disbursements for the protection of assets ..... 71, 541
Payments of receivers' salaries, legal and other expenses ..... 640, 707
Payments of conservators' salaries, legal and other expenses ..... 45, 597
Cash balances in hands of Comptroller and receivers ..... 713, 731
Total ..... 10, 2\&1, 024
Capital stock at date of failure ..... 1, 800, 000
Amount of assessment upon shareholders
Amount of assessment upon shareholders ..... 800,000 ..... 800,000
Deposits at date of failure ..... 4, 165, 850
Borrowed money (bills payable, rediscounts, etc.) at date of failure ..... 4, 406, 189
Additional liabilities established subsequent to date of failure ..... 324, 751
Claims proved (both secured and unsecured) ..... 3, 638, 730
Average percent dividends paid to claims proved ..... 98.05
Average percent total payments to creditors to total liabilities estab- ..... 99.02
Average percent total cost of liquidation to total collections including offsets allowed ..... 6. 68
