December 1952

NUMBER 12

RECENT CREDIT EXPANSION

Demand for credit has been large in 1952 and growth in the total of long-term and short-term credit outstanding has been substantial, particularly in recent months. Businesses and consumers have expanded their borrowing throughout the year to help finance large expenditures for plant and equipment, housing, and durable consumer goods. Business borrowing for seasonal and other purposes has also been large in the last half of the year, following a less than seasonal decline in the first half. Increased borrowing by State and local governments to finance capital improvements has added further to the demand for credit. Since midyear the Federal Government has also been a borrower.

To a considerable extent, credit expansion has been financed with funds accumulated by individuals in savings institutions. There has been a continuing large growth in savings deposits, savings and loan shares, insurance and pension reserves, and certain other savings forms. In addition, State, local, and foreign governments have supplied an increased amount of short-term funds to the money market, and since midyear non-financial corporations have bought large amounts of Treasury bills. Such funds have become available from cash reserves and temporarily idle working balances, from cash proceeds of financing operations completed in advance of actual disbursements for various capital projects, and, in the case of corpo-

rations, from balances accumulated for tax payments.

At commercial banks, loan expansion has been substantial in 1952. Commercial banks have also increased their portfolios of Government securities, although the level of their holdings has fluctuated considerably since midyear, increasing in connection with the major new financing operations of the Treasury but subsequently declining somewhat as banks sold short-term Government securities to other investors. The expansion in deposits of businesses and individuals which accompanied growth in bank credit in 1952 has been largely in the form of time deposits and only to a moderate extent in demand deposits—a development which contributed to sustained high level activity without further inflation.

To obtain the additional reserves required by total deposit expansion, member banks found it necessary to increase significantly their borrowing at the Federal Reserve Banks. Since borrowing from the Federal Reserve is only a temporary means of adjusting a bank's reserve position, the increase in such borrowing exerted a restraining influence on monetary expansion.

CREDIT DEMAND IN CAPITAL MARKETS

The capital markets have supplied an exceptionally large volume of funds in 1952. During the first nine months the increase in real estate mortgage indebtedness, together

with growth in long-term financing of business corporations and State and local governments, totaled an estimated 16.3 billion dollars—nearly one-fifth more than in the corresponding period last year. A smaller growth in real estate mortgage indebtedness this year was more than offset by greater increases in long-term corporate business and State and local government debt, as is shown in the chart. In the case of business corporations, the increase this year was nearly two-fifths greater than last, while growth in State and local government debt was more than twice that of 1951.

GROWTH IN LONG-TERM FINANCING SELECTED TYPES

NOTE.—Estimates by Federal Reserve on basis of data from Securities and Exchange Commission, *Bond Buyer*, Census Bureau, Home Loan Bank Board, and Department of Agriculture. Corporate business includes long-term debt and equity financing.

Corporate security issues. New capital raised by business through security issues in 1952 has been much greater in volume than in any recent year and may reach an all-time high. Public offerings and take-downs on

private placements with insurance companies for the first ten months of the year are estimated at 7.6 billion dollars, which exceeds the total for the full year 1950 or 1951.

A somewhat higher level of business expenditures for new plant and equipment, a marked decline in corporate funds retained from operations, and the funding by some companies of debt owed to commercial banks all contributed this year to an increased corporate demand for long-term financing, both debt and equity. Business expenditures for new plant and equipment, including those of unincorporated concerns, are expected to reach a record high of about 27 billion dollars for the year 1952.

While corporate funds retained from operations (profits before taxes plus current depreciation accruals, less Federal income tax and dividend payments) are estimated to have increased appreciably from the second to the third quarter, the total for the first nine months of 1952 was probably about one-third less than in the same period of 1951. Some further increase is expected for the fourth quarter, but the volume of funds available from internal sources for the full year will be somewhat less than in 1951.

Electric and gas utility companies have floated an especially large volume of securities this year, in part to place on a more permanent basis borrowing from banks for the initial financing of plant and equipment expenditures. Manufacturing concerns have also issued substantial amounts of securities. The principal issuers were in chemical, machinery, petroleum, and steel industries where facilities are being expanded in accordance with defense program objectives of increasing productive capacity for strategic materials and specialized equipment.

Relative costs have continued to favor debt financing over common and preferred stock

financing, although there have been increased efforts to obtain equity capital, particularly through issuance of debentures convertible into stock. The treatment of interest as a deductible expense for income tax purposes and the yield and underwriting differentials necessary to attract investment funds into equity shares continued to encourage borrowing as a source of funds. Moreover, institutional investors, such as life insurance companies, commercial and mutual savings banks, and pension and trust funds, invest primarily in debt obligations, and these institutions have continued to supply the greater part of external long-term funds for business. Direct placements with institutional investors, which have accounted for two-fifths of all corporate security issues during the postwar period, continued in about that proportion during the first three quarters of 1952.

State and local government borrowing. State and local governments accelerated expenditures for construction of schools, highways, and other public facilities in 1952. The bulk of such capital expenditures is financed out of borrowed funds rather than current revenues, and preliminary estimates for the year indicate that the amount of State and local government security issues may exceed 4.5 billion dollars, about one-third more than last year. The volume of prospective issues already announced, together with those approved by voters in the recent election, indicates a sustained large amount of State and local government financing in 1953.

Real estate mortgage credit. The number of new houses completed and sold during the first ten months of 1952 was somewhat smaller than in the same period of 1951, but transfers of existing properties were more numerous. In mortgage financing this was

reflected in a volume of new mortgage loans on small properties that was about one-tenth larger in the January-October period of 1952 than a year earlier.

Total outstanding mortgage debt, however, has been increasing less rapidly this year than in 1951. This reflects a much smaller volume of mortgages written on commercial and multi-family residential properties, as well as a larger volume of repayments on outstanding mortgage debt.

CONSUMER CREDIT

Consumer borrowing has risen sharply following the suspension of consumer instalment credit regulation on May 7. Expansion has been concentrated in instalment credit. With credit terms eased considerably, more durable goods purchases have been financed on credit, and more credit has been granted on individual purchases. As shown in the chart, the increase in instalment credit outstanding was rapid in May and June. It

CONSUMER INSTALMENT CREDIT

slackened somewhat in July and August, largely as a result of the prolonged steel strike, which curtailed production of automobiles and some other consumer durable goods. The increase since September has again been very large. The ratio of consumer instalment credit granted to expenditures for durable goods is now back to pre-war relationships.

FEDERAL TREASURY FINANCING

The Federal Government, which on a cash basis had a balanced budget in the fiscal year ending June 30, 1952, began in July to operate at a deficit. While the actual cash deficit for the current fiscal year cannot be gauged accurately at this stage, it may amount to several billion dollars. Seasonal patterns in tax collections will probably result in a cash deficit in the June-December 1952 period in excess of the deficit for the full fiscal year. During this half-year the Treasury will probably have borrowed from the public a net amount of about 7 billion dollars.

The first borrowing for the fiscal year 1953 was the sale on July 1 of over 4 billion dollars of fully marketable bonds. These bonds, which mature in 1958, were the largest Treasury issue for new money since 1945. They were initially allotted almost entirely to nonbank subscribers, some of whom financed their purchases through loans from commercial banks. In the period immediately following the offering, banks purchased a large amount of these bonds in the market.

The remainder of the Treasury's recent financing program has been accomplished by temporary borrowing through tax anticipation bills. Early in October the Treasury issued 2.5 billion dollars of such bills acceptable in payment for taxes next March 15

or redeemable for cash on March 18. This issue was sold at an average rate of 1.72 per cent. In November an additional 2 billion dollars of tax anticipation bills, acceptable for taxes on June 15 or redeemable for cash on June 19, was auctioned at an average rate of 1.85 per cent. Initially, both of the issues were acquired almost entirely by commercial banks, with subsequent distribution made in the market to corporations and other investors as they accumulated funds for tax payments due in March and June.

Some of the funds obtained through these recent security issues have been absorbed by cash redemptions of maturing marketable securities and the excess of redemptions over sales of savings securities. The volume of savings notes outstanding, after declining almost a billion dollars in the first half of the year, has since declined further, reflecting a shift by corporate investors to marketable securities, which under recent market conditions have yielded higher returns. Following a change in savings bond terms in May, sales and redemptions (valued at issue price) have come nearly into balance after a period of more than a year when redemptions exceeded sales, sometimes by large amounts. Since May there has been a small increase in the amount of savings bonds outstanding, reflecting the accrual of discount on bonds.

SOURCES OF LONG-TERM CREDIT

An increased proportion of the credit in 1952 has been supplied from savings accumulated by individuals. Financial assets of individuals have expanded greatly through deposits in savings accounts at commercial banks and mutual savings banks, additions to shares in savings and loan associations, and growth in life insurance company resources, as is shown in the chart. In the first ten months of 1952, this growth

RECENT CREDIT EXPANSION

totalled 9.2 billion dollars, as compared with 6.8 billion in the same period last year. In addition to making a substantial volume of funds available for investment by intermediary institutions, individuals have increased their direct purchases of corporate and State and local government securities.

The increased volume of savings accumulated at major savings institutions other than commercial banks has been used almost entirely to finance capital expenditures by businesses and consumers, with a particularly large amount of credit granted to business for plant and equipment outlays. In the first ten months of the year, these savings institutions expanded their holdings of corporate

GROWTH IN SAVINGS - SELECTED FORMS

NOTE.—Data from Institute of Life Insurance, Home Loan Bank Board, and Federal Reserve. Increase in savings and loan shares estimated by Federal Reserve on basis of data for January-September. Life insurance represents increase in total assets.

securities by about 3.3 billion dollars, as is shown in the table. This investment compares with 2.4 billion in 1951. Holdings of real estate mortgages by these institutions increased 4.9 billion dollars in 1952—somewhat less than last year.

To a large extent the greater attraction of institutional investor funds into corporate

securities reflected the higher yields on corporate obligations, as compared with yields on mortgages, particularly Government insured and guaranteed mortgages. Acquisitions of FHA-insured mortgages by life insurance companies, for example, have been one-fourth smaller this year than last, and acquisitions of VA-guaranteed mortgages have been two-thirds smaller. For conventional mortgages, on which interest terms are more flexible, acquisitions by life insurance companies have shown only a small decline.

BANK CREDIT EXPANSION

Total loans at commercial banks, excluding interbank loans, increased about 4 billion dollars during the first ten months of both 1951 and 1952. From the middle of this year through October, however, such loans rose about 2¾ billion dollars, considerably more than in the corresponding period of 1951. The recent loan expansion has been dominated by a large but essentially seasonal growth in loans to business enterprises and

a sharp expansion in consumer instalment credit. Real estate and agricultural loans have also increased.

Business borrowing from commercial banks has been large since midyear, as is shown in the chart, but the increase until recent weeks was about the usual seasonal volume. From June through October, business loans at weekly reporting banks increased about 1.7 billion dollars as compared with 1.4 billion during the same period of 1951 and 2.7 billion in 1950. In November, however, the expansion was considerably larger this year than last. Seasonal growth in business borrowing from banks usually begins about mid-July, quickens from about mid-August through mid-November, and then slackens through mid-December. This year the rise began later than usual, lagged in August, but picked up sharply thereafter.

BANK LOANS

NOTE.—Business includes agricultural loans. Latest data are for November 26.

The growth in bank loans to businesses from midyear through October was largely concentrated in those industries—food manufacturers, commodity dealers, and trade concerns—that customarily borrow in the fall. There was also an expansion in loans to petroleum and chemical companies and to sales finance companies, the latter reflecting the growth in consumer instalment credit. In the fall of 1951 there was a large growth in credit to concerns engaged in defense and defense-related activities, mainly metal and metal product manufacturing and public utilities. This year, loans to these concerns were fairly stable through October, but increased thereafter.

Consumer instalment loans at commercial banks have expanded rapidly since May when regulation of the terms of such borrowing was suspended. In the period May-October, consumer instalment credit at banks increased 1.2 billion dollars, about half of the rise in total instalment borrowing by individuals over this period. Banks have also financed consumer purchases indirectly through an increase in their lending to finance companies and retailers.

Real estate loans at commercial banks have increased more this year than last, but bank lending in this area continues to be less than in the early postwar period. Increases in real estate loans have been primarily at small and medium-sized banks.

Since midyear agricultural loans of banks have increased at a somewhat more rapid rate than a year ago. The rise has been primarily in Federally guaranteed loans made in connection with the price support program for wheat.

Commercial bank holdings of State and local government securities continued to increase through August at about 100 million dollars a month, approximately the rate of

growth shown over the last several years. Since August, however, total bank holdings of these securities have declined somewhat, reflecting primarily a contraction at New York City banks.

Commercial bank credit has played an important role in the new financing operations carried out by the Treasury since mid-1952, as is shown in the chart. Initially, banks bought Government securities and subsequently sold the same or other Government securities to nonbank investors. Of the $4\frac{1}{4}$ billion dollars of Treasury intermediate-term bonds issued in early July, commercial banks absorbed over half, largely through market purchases. In the three months July-September, however, the weekly reporting banks reduced sharply their holdings of short-term Government securities, so that their total portfolios at the end of September were smaller than at the end of June.

Treasury tax anticipation bills offered in early October and in late November were

originally taken up almost wholly by commercial banks, which find it profitable to subscribe for such offerings to obtain Treasury tax and loan deposits. As the borrowed funds have been drawn on by the Treasury, however, banks have been under pressure to sell these or other short-term securities. During October, as the chart shows, weekly reporting banks increased their holdings of Government securities when the tax anticipation bills were issued and thereafter sold securities in the market to other investors.

Total commercial bank holdings of Government securities have increased since June, largely at country banks. In the third quarter, Government security portfolios of these banks are estimated to have increased 800 million dollars, whereas holdings of New York City banks declined 600 million, and the portfolios of other large city banks showed little net change.

Expansion of bank credit and deposits in 1952 through November has not been accompanied by an increase in reserves supplied through Federal Reserve open market operations. Member banks have been obliged to borrow increasingly from the Federal Reserve Banks in order to maintain the reserve positions required by law. Member bank borrowing from the Federal Reserve outstanding in November averaged about 1.5 billion dollars, as compared with only about 350 million dollars a year ago and about 500 million in the spring of this year. From the standpoint of the individual bank, borrowing is only a temporary source of reserve funds. As such borrowing increases, banks have a growing need to make other adjustments that will restore their reserve positions. To make such adjustments, borrowing banks are under pressure to liquidate assets or at least to curtail further credit expansion.

BANK FINANCING OF U. S. GOVERNMENT

NOTE.—Latest data are for November 26.

RECENT CENTRAL BANKING DEVELOPMENTS IN SOUTHEAST ASIA

Postwar political changes in almost every Asian country have led to a variety of economic and financial reforms. Prominent among these is the establishment or modification of central banks. New central banks have been established in no less than five countries in the area extending from the Philippines to Pakistan, while in two other countries important changes affecting existing central banks have been made. In most of these countries it is still too early to tell how effective the central banks and the new powers of credit and monetary regulation will prove to be. The purpose of this article is primarily to review the changes which have taken place and to examine the types of laws and institutions adopted to meet the central banking needs of the nations in this area.¹

Most of the changes have resulted from the emergence of independent states and the redrawing of national boundaries. Thus, central banks have been set up for the first time in the Philippines, Ceylon, Burma, and Pakistan. Indochina, previously served by a bank of issue, has an entirely new institution created to meet the difficult problems arising from the establishment of the three Associated States of Indochina. In India and Indonesia existing central banks have been nationalized, and other important changes have either been introduced or are now under consideration.

THE PHILIPPINES

Before achieving independence in 1946, the Philippines had not developed a central monetary and banking authority. Broadly speaking, the Philippine peso was based on a 100 per cent U. S. dollar reserve, and the currency was issued principally by the Philippine Treasury. Variations in the size of the issue corresponded with the rise and fall in the country's U. S. dollar reserves, creating great difficulty in cushioning the domestic economy from the deflationary effects of adverse short-term fluctuations in the balance of payments. Such flexibility as existed was provided by the credit operations of the commercial banking system, which in turn were restricted in part by the banks' need to maintain

very high reserve ratios in the absence of central bank lending facilities. With the attainment of independence it was recognized that the stability, growth, and development of the domestic economy could be facilitated by the establishment of a more flexible credit and monetary system.

Establishment of a central bank. The Central Bank of the Philippines was one of the first of the new Asian central banks. Authorized by the Central Bank Act of June 15, 1948, it commenced operations early in 1949 as an entirely new institution, not a replacement or modification of any existing bank. The new Central Bank is a completely Government-owned and controlled institution with the statutory objective of maintaining monetary stability, preserving the international stability and convertibility of the peso, and promoting the orderly growth of production, employment, and real income. It performs banking operations only for other banks and the Government, and is authorized to deal directly with the public only in the course of its open market operations. In addition to sole responsibility for the note issue, the Bank has broad regulatory authority over the credit and exchange operations of the banking system and has the right to examine all banks periodically. It has responsibility for developing and maintaining a market for Government securities and serves as the Government's general fiscal agent and adviser on financial and economic matters.

Philippine central banking legislation gives considerable attention to the problem of attaining coordination of monetary and fiscal policies. The Secretary of Finance is a member of the seven-man Monetary Board which determines Central Bank policy and is authorized to preside at its meetings. The Governor of the Bank, also a member of the Monetary Board, is an *ex-officio* member of the National Economic Council. These arrangements derive from the idea that the Monetary Board should be in a position to influence Government policy.

The legal tie between the peso and the U. S. dollar was not entirely removed. Under the Executive Agreement between the United States and the Philippines, pursuant to the Philippine Trade Act of 1946, the approval of the President of the

¹ This article was written by Reed J. Irvine under the direction of Arthur C. Bunce, Chief of the Far East Section of the Board's Division of International Finance.

United States is required before the Philippines can alter the exchange rate, suspend convertibility, or restrict the transfer of funds to the United States. Nevertheless, the Philippine international reserve is no longer restricted to dollars, and no minimum ratio between the size of the reserve and the amount of currency in circulation is prescribed by law. The Republic is free to adjust the currency issue independently of balance-of-payments fluctuations.

The Philippines' balance of payments, which had been unfavorable in 1948, deteriorated very rapidly in 1949, despite the imposition of import controls early in the year. This was due to a drop in exports and a large capital outflow. To halt the alarming drain of foreign exchange reserves, the Philippine Congress passed legislation instituting exchange controls in December 1949. On March 28, 1951, a 17 per cent tax on sales of foreign exchange was put into effect. Both of these measures received the required approval of the President of the United States.

The Bank possesses a number of anti-inflationary weapons, including the power to conduct open market operations, using securities of its own issue for this purpose when necessary. It may vary the discount rate in accordance with the character and terms of the credit requested and the requirements of national monetary policy. It also has broad power to alter reserve requirements on commercial bank deposits. These may be varied within the range of 10 to 50 per cent against demand deposits and 5 to 25 per cent against time deposits. The reserves must ordinarily consist of deposits with the Central Bank, but the Monetary Board may permit part of the reserves to be held in the form of other assets. It has from the beginning permitted up to five-eighths of the required reserves to be held in the form of Government securities. When the Monetary Board sees fit, it may bar further credit expansion by requiring maintenance of reserves as high as 100 per cent against any further increase of deposits.

The Central Bank may also regulate specific types of credit. It may (a) set maximum rates of interest, commissions, and charges which banks may apply to different types of loans, (b) prescribe minimum cash margins for opening letters of credit, with authority to relate the size of the required margin to the nature of the transaction to be financed, (c) set maximum permissible maturities for bank loans and investments and indicate the

type and amount of security to be required, (d) set an upper limit on the total loans or investments a bank may hold, either in the aggregate or by specific categories, or limit the rate of increase of such assets within a specified period of time, and (e) require observance of minimum ratios of capital and surplus to volume of assets or specified categories of assets.

The Central Bank has the usual central bank authority to rediscount and lend against commercial paper. Paper having relatively long maturity may qualify as eligible for these purposes, the limit being 180 days for acceptable paper resulting from commercial transactions, and 270 days for bills related to processing and production. Advances may also be made against gold and securities for periods of 180 days. The maturity for advances secured by acceptable collateral may be extended to a maximum of one year under special circumstances. In periods of grave emergency the Monetary Board is authorized to make advances secured by any collateral approved by at least five of its seven members.

The Bank is permitted to make provisional short-term advances to the Government and its political subdivisions to finance authorized expenditures, but such advances may not exceed 15 per cent of the borrower's average revenues for the three preceding years and must be repaid before the end of the first quarter of the following fiscal year. The Bank is also authorized to make loans to the Rehabilitation Finance Corporation under special circumstances. With these exceptions, the Bank may purchase Government securities only for reasons of monetary policy. However, under authority that expired June 30, 1951, the Bank was permitted to make loans to the Government against the security of Government bonds having a maximum maturity of 15 years. The total of such loans could not exceed 200 million pesos and the uses to which the funds could be put were limited to productive and income-producing projects or the amortization of external debt.

Anti-inflationary measures. The Central Bank has made only moderate use of its anti-inflationary powers. The Bank publishes no discount rate, and it is not known what, if any, variations have been made in the rates it has charged. In general commercial banks have maintained substantial excess reserves, a condition which would operate to reduce the influence of both the discount rate and open market operations on their lending policy. Reserve:

requirements have remained at the level at which they were first set—18 per cent against demand deposits, 5 per cent against time deposits, and 10 per cent against deposit liabilities in foreign currencies.

In November 1949 the Bank imposed an 80 per cent margin requirement against letters of credit covering the import of specified nonessential goods, and banks were prohibited from granting credit facilities of any kind for financing such imports. These measures were directed toward strengthening import controls and curbing speculative credit expansion. In 1950 the Bank enjoined the Rehabilitation Finance Corporation from making further loans for residential construction. The Philippine National Bank, a Government-owned commercial bank, was ordered to halt the extension of credit to Government agencies and to make no loans to the public for speculative purposes. The Central Bank's advances to commercial banks were sharply contracted, but inflation, fed by a large budget deficit, did not abate.

In the latter part of the year, a policy of encouraging imports was adopted by the Government and the Central Bank encouraged credit expansion for this purpose. In the last half of 1951 the Bank adopted a more restrictive policy, especially with respect to letters of credit. It required that commercial banks have net foreign exchange holdings, excess reserves, cash in vaults, and securities in an amount equal to at least 70 per cent of their total letters of credit outstanding. Nevertheless, bank credit continued to expand until late in the first half of 1952.

The National Government ran budgetary deficits from 1949 to 1951, financed in part by Central Bank short-term credits. During this period the Central Bank also utilized the special authority described above to grant large long-term credits to both the Government and the Rehabilitation Finance Corporation. As a result, by the end of 1951 the Bank held 43 per cent of the total domestic public debt. In the 1952 fiscal year the budget was in balance and no further demands were made upon Central Bank credit for budgetary purposes. The Bank's holdings of Government obligations have been relatively stable since May 1951.

CEYLON

Legislation establishing the Central Bank of Ceylon was enacted in December 1949, and the Bank commenced operations on August 28, 1950. Previ-

ously, the Ceylonese monetary system had been under the supervision of a Currency Board, which maintained a 100 per cent foreign exchange reserve against the note issue. As in the Philippines, the domestic economy was unprotected from short-term adverse fluctuations in the balance of payments. Since the domestic banking system was underdeveloped and the interests of existing banks lay largely in the financing of foreign trade, it was felt that a modern central bank would assist in both the stabilization of the economy and the growth of banking and credit facilities necessary to the country's economic development. The background situation was very similar to that which existed in the Philippines, and the newly adopted central banking legislation resembled the Philippine Act in many respects.

The Bank is a State-owned institution, with overall responsibility for its management, operations, and policy centered in a three-man Monetary Board consisting of the Permanent Secretary to the Ministry of Finance and two members appointed by the Government, one of whom is the Governor of the Bank. The Governor is the only member expected to devote full time to the affairs of the Bank.

As in the Philippines, the 100 per cent foreign exchange currency reserve requirement has been eliminated as a feature of the monetary system. The Monetary Board determines whether or not there is actual or potential overexpansion of the currency or excessive drain on the foreign exchange reserves. The Board is required to watch certain economic indicators closely and to base its actions on their movements rather than on any prescribed legal reserve requirement.

Another important change in the monetary field is the redefinition of the value of the Ceylonese rupee in terms of gold, and the removal of its tie with the Indian rupee. The Central Bank may hold foreign exchange reserves in gold and unspecified foreign currencies, but the Act stipulates that the Bank should endeavor to hold at least a nuclear reserve in gold or in currencies freely convertible into gold. Previously, the reserves had been limited to Indian or sterling exchange.

The powers of the Central Bank of Ceylon to administer credit regulations, to provide credit for other banks, to examine banks, and to act as advisor as well as fiscal agent to the Government are generally parallel to those of the Philippine Central Bank. To promote monetary stability, it may ad-

just interest and discount rates, vary commercial bank reserve requirements within a range of 20 to 40 per cent for demand deposits and 5 to 20 per cent for time deposits, engage in open market operations, and apply selective credit regulations similar to those authorized in the Philippine Central Bank Act. As in the Philippines the maximum maturities for Central Bank loans against eligible securities are 180 days and 270 days, depending on the nature of the security, but extensions of up to one year may be granted in time of deflation.

The Bank's powers to lend to the Government are restricted. Provisional advances may not exceed 10 per cent of the estimated revenue of the Government for the fiscal year in which they are made and must be repaid within a maximum of six months. The Central Bank of Ceylon may not underwrite or subscribe to any issue of Government securities with the exception of Treasury bills, though it may purchase Government securities in the open market.

The Central Bank of Ceylon began operations in the midst of the post-Korean inflation, which was fed by both a substantial export surplus and a Government deficit. Although the Monetary Board did not at that time find that any significant volume of credit was being created for nonessential purposes, it cautioned the commercial banks against granting such credit as long as the inflationary danger persisted. The Central Bank also sought to retard the expansion of domestic credit by discouraging commercial banks from bringing their overseas balances to Ceylon. Total bank rupee reserves increased rapidly in the last quarter of 1950, reaching 210 per cent of required reserves in December. In order to reduce the risk of an unneeded expansion of credit, the Monetary Board raised the reserve requirements against demand deposits from 10 per cent to 14 per cent. This brought total reserves down to 147 per cent of the required minimum in January 1951.

The Bank expressed the view in its Annual Report for 1950 that the Government's fiscal policy had been seriously inflationary and strongly urged that it be changed. In 1951 the budget was very nearly balanced and inflationary pressure was reduced. At the same time the Central Bank endeavored to make more effective use of credit and monetary policies. The Bank requested that commercial banks refrain from subscribing to a long-term loan floated by the Government. The loan was completely taken up by nonbank buyers, and

the Government substantially reduced the floating debt held by commercial banks. The Central Bank conducted open market operations which were moderately disinflationary. On the other hand, the Bank imposed no new credit restrictions in 1951, and reversed its policy of discouraging the transfer of overseas balances to Ceylon. The Bank decided that inflation had largely run its course and that a long-run policy of encouraging the banks to invest in Ceylon could be safely inaugurated.

BURMA

The most recent central banking legislation adopted in Southeast Asia is that providing for the reorganization of the Union Bank of Burma, which went into effect July 1, 1952. This legislation follows the Philippine and Ceylonese pattern in many respects, but it has also been influenced by Indian practice.

Early postwar legislation. Before the war the Reserve Bank of India issued currency and performed other central banking functions for Burma. This arrangement was upset by the war, the postwar political and administrative changes resulting from Burma's attainment of independence and withdrawal from the British Commonwealth. The Currency and Coinage Act of 1946 entrusted the issue and management of the currency to a Currency Board, located in London, which was required to maintain a 100 per cent reserve in sterling against all notes and coins in circulation in Burma except for a limited fiduciary issue.

The Union Bank of Burma Act of 1947 provided new machinery to meet central banking needs. The Union Bank of Burma, established on January 4, 1948, served as a banker's bank and fiscal agent for the Government, but had no control over the currency issue and little effective influence over credit. It had power to make credit available to commercial banks in the form of advances against specified types of collateral or through purchase or rediscount of eligible commercial paper. Eligibility was narrowly limited, however, and there was little demand for this service. The Bank's powers to combat undesirable credit expansion were limited to varying the bank rate, which had little effect in view of the negligible demand for rediscount facilities. There was no provision for commercial bank reserve requirements or for selective credit regulation.

Extension of central banking functions. Legislation in 1952 reorganized the Union Bank of Burma

and greatly extended its powers. It combined control of the note issue with other central banking functions and expanded the Bank's powers to regulate the supply and cost of credit.

Responsibility for the note issue passed from the Currency Board to the Union Bank, and the currency reserve requirement was altered. The Bank must maintain an international reserve consisting of gold or specified assets in foreign currencies equal to an amount not less than 25 per cent of its liability on account of deposits and currency in circulation. Since the ratio at the present time is far above 25 per cent, this requirement will not restrict the operations of the Union Bank for the time being. Policy decisions therefore have to be based on the judgment of the authorities (as in the Philippines and Ceylon) rather than on the stated minimum figure.

The new Act liberalizes the eligibility requirements of commercial paper presented to the Union Bank for purchase, discount, or as collateral for loans. Maximum acceptable maturities have been increased from 90 to 180 days in the case of bills and notes related to domestic trade, and the Board of Directors of the Bank may suspend eligibility requirements in periods of emergency and make loans or advances against any collateral it deems sufficient. The Bank recently announced that its interest rate would be 2 per cent for advances against Government and Government-guaranteed securities and 3 per cent for loans secured by other types of collateral.

The new law places no specific limit on the Union Bank's holdings of Government bonds, but short-term budgetary advances to the Government are now limited to 15 per cent of the estimated revenue of the Government for the fiscal year in which the advance is made and must be repaid within six months. The Bank is not barred from underwriting issues of Government securities or subscribing to new issues, as is the Central Bank of Ceylon. The Bank has expressed the belief that its unrestricted power to deal in Government securities will facilitate the development of a substantial and expanding market for them. Minimum reserve requirements against commercial bank deposits have been imposed for the first time, and made applicable to all banks operating in Burma. The Union Bank may vary requirements between 8 per cent and 40 per cent against demand deposits, and between 3 per cent and 15 per cent against time deposits. Re-

serves must ordinarily be held as cash deposits with the Union Bank, but the Bank may at its discretion permit any part of the reserve to be held in the form of other assets.

The Bank also has several instruments of credit regulation which may be applied only with the approval of the President of the Union of Burma. They include authority to set (1) maximum rates of interest which commercial banks may charge for different types of loans and pay on various classes of deposits, (2) maximum maturities for loans and advances made by commercial banks and the types and amounts of collateral to be required, (3) limits on the rate of increase within specified periods of loans, advances, and investments of banks either in the aggregate or in any specified classes of such assets, and (4) minimum cash margins for opening letters of credit by banks.

Another new provision is that giving authority to the Union Bank to license banks and inspect them periodically. The Bank may revoke the license of any commercial bank which it finds to be no longer fulfilling the conditions under which it was licensed.

Under the new legislation the Union Bank may, with the approval of the President of Burma, require that each bank or class of banks hold assets payable in Burma equivalent to a specified minimum percentage of its total domestic liabilities. This provision takes account of a former complaint that banks tended to hold and invest too small a proportion of their funds in Burma, thus depriving the country of much needed capital.

Despite serious internal disorders, the Government of Burma has not incurred heavy budget deficits. Inflation has largely been avoided in the postwar period, and the Union Bank has not had occasion to invoke its anti-inflationary powers.

INDIA

Independence and partition of India brought a number of important changes in the ownership and powers of the Reserve Bank of India, which was established in 1934. The Bank was originally organized as a quasi-public institution. Its entire capital was privately subscribed. Responsibility for policy making and supervision of Bank operations rested with a Central Board of Directors having 16 members, half elected by the shareholders and half appointed by the Government. Profits in excess of approximately 6 per cent dividends to private shareholders went to the Central Government.

Nationalization of the Reserve Bank. In 1948 the Reserve Bank was nationalized by legislation providing for the transfer of all its stock to Government ownership. The Reserve Bank of India Act of 1934 was amended to take account of this change. The Central Board of Directors was reduced to 14 members, all appointed by the Government. The Government was authorized "to give such directions to the Bank as it may, after consultation with the Governor of the Bank, consider necessary in the public interest."

The Central Board of Directors is required to meet only six times a year, though meetings may be held more frequently. The day-to-day operation of the Bank is entrusted to the Governor. In addition to the Central Board there are four regional boards which may be called upon for advice or other assistance. Members of the regional boards are all Government appointees, and the law requires that appointments be made with regard to representation of the interests of the area, various economic groups, and the cooperative and indigenous banks. The Central Board determines the functions to be performed by the local boards.

Definition of the value of the rupee in terms of sterling was eliminated by amendment of the Reserve Bank Act in 1947. The Central Government was given full authority to determine and vary the exchange rate, subject to its obligations to the International Monetary Fund.

Responsibility for currency issue. The Reserve Bank is responsible for the issue of all India's currency. The note issue must be fully covered by a reserve, held in a separate Issue Department, composed of gold, foreign exchange, rupee coin, domestic securities, and eligible commercial paper. At least 40 per cent of this reserve must consist of gold and foreign exchange. The foreign exchange component, formerly limited to sterling, may now consist of specified assets denominated in the currency of any foreign country belonging to the International Monetary Fund. The Bank may permit its gold and foreign exchange holdings to fall below the required minimum with the prior approval of the Government, but it is subject to a penalty as long as the deficiency exists.

Instruments of credit regulation. Amendments to the Reserve Bank Act after 1948 somewhat expanded the authority of the Reserve Bank to extend credit to the Government and to other banks. Statutory limitation of the Bank's holdings of Gov-

ernment securities was eliminated in 1951. Power to grant loans to other banks in time of emergency was broadened by providing that such loans could be made against any security the Reserve Bank considered sufficient. The maximum maturity allowed for eligible paper derived from the financing of agricultural operations or the marketing of crops was increased from 9 to 15 months in 1951, but no change was made in the 90-day maturity requirement for other forms of eligible paper.

Having been drafted in a period of deflation, the Reserve Bank of India Act did not originally place the same emphasis upon restraint of inflation as do the postwar central banking acts of some other countries. The powers authorized in this Act which might be used to combat inflation were the adjustment of the bank rate and the conduct of open market operations. No provision was made for the more selective forms of credit regulation. The law required commercial banks to maintain cash reserves against their deposit liabilities, but the reserve ratios could be varied only by legislative action and applied only to designated banks.

The Reserve Bank's authority in this sphere was broadened with the passage of the Banking Companies Act of 1949. This Act empowers the Reserve Bank, if it deems it desirable from the standpoint of the public interest, to determine the policies in relation to advances to be followed by banks generally or by individual banks. This authority allows the Reserve Bank to determine the purposes for which advances may or may not be made, the margins to be maintained with respect to secured advances, and the rates of interest which may be charged on advances. A provision of this Act that became effective in March 1951 requires all banks to maintain liquid assets (cash, gold, or unencumbered approved securities) equivalent to not less than 20 per cent of their total demand and time liabilities in India. This did not supersede the existing cash reserve requirement of 5 per cent against demand and 2 per cent against time liabilities, which was extended to apply to all banks. The Reserve Bank is not given authority to vary required reserve ratios.

This Act also gives the Bank broad powers to examine and license all banks doing business in India. The Reserve Bank has made full use of this examining authority and has instituted a system of periodic examination of all banks.

The Reserve Bank has made relatively little use of its new powers to influence credit and has expressed the opinion that most banks have followed a cautious credit policy. Since September 1949, however, it has required commercial banks to submit reports on all new credits exceeding a specified figure, and in 1950 it issued directions designed to curb loans to speculators in jute and silver. In the summer of 1951 the volume of credit failed to follow the normal pattern of contraction and in the autumn, at the beginning of the next seasonal rise in the demand for funds, the bank revived the use of the traditional instruments of monetary regulation—bank rate and open market policy. In November 1951 the bank rate was raised from 3 per cent to 3.5 per cent and the Reserve Bank announced that it would not support Government securities except in special circumstances. These steps immediately increased the cost and reduced the availability of credit. The Indian banks had long followed the practice of buying Government securities in the slack season and selling them in the busy season. The Reserve Bank's withdrawal from the market and the consequent decline in bond prices led the banks to seek their needed funds by borrowing from the Reserve Bank, using their securities as collateral.

The Reserve Bank took advantage of the resulting credit stringency to introduce a plan designed to increase the elasticity of the Indian credit structure by encouraging the use of commercial bills as collateral for advances. Among other things, it set a preferential interest rate for advances against the security of eligible commercial paper at one-half of one per cent below the bank rate. The plan, initially experimental and limited to large banks, was considered sufficiently successful to be continued.

The result of all these measures appears to have been a smaller expansion of the credit and money supply than in the previous busy season and an earlier and more pronounced post-seasonal contraction. Monetary policy alone does not, of course, explain the decline in prices that India has experienced over the past year. The Reserve Bank has observed, however, that "by and large . . . the new monetary policy secured the objectives of preventing a large expansion of money supply during the busy season, and of enabling the Reserve Bank to have more effective control of the magnitude and purpose of bank advances."

PAKISTAN

The State Bank of Pakistan, established on July 1, 1948, follows the model of the Reserve Bank of India, with certain variations. The Government of Pakistan was required to subscribe a minimum of 51 per cent of the Bank's capital, but the remainder was taken up by private subscribers, who are entitled to a minority voice in the Bank's management. The Government is authorized to appoint the Governor, Deputy Governor, and six directors, one of whom must be a Government official. Other shareholders are given the right to elect three directors.

The Government has the right to supersede the entire Board of Directors if of the opinion that the Board is failing to carry out any of its obligations. The management of the Bank may then be entrusted to such agency as the Government may determine. The Government is not authorized, as in India, to give directions to the Bank, but it is in a position to influence the Bank's management.

The State Bank is the sole bank of issue in Pakistan. Its note issue must be backed fully by a reserve held in a separate Issue Department, at least 30 per cent of which must consist of gold, silver, and specified types of foreign exchange. The rest may consist of rupee assets. The foreign exchange reserve requirement may be suspended by the Government without penalty to the Bank.

The State Bank is authorized to make funds available to designated banks and to local authorities through purchase and rediscount of eligible commercial paper or through secured loans. Eligible commercial paper is strictly defined and maximum maturities are limited to 90 days except for bills and notes drawn for the purpose of financing agricultural operations, which must mature within nine months of their acceptance by the Bank. To meet emergencies, however, the Bank may at its discretion accept commercial paper not endorsed by a designated bank and may make loans to banks against any collateral it deems satisfactory.

Advances to central, provincial, and State governments may be made for three-month periods, with no restriction on amount. The volume of Government securities the Bank may hold at one time, however, is limited to the aggregate of its capital and reserve plus 60 per cent of its deposit liabilities. This total has not yet been approached.

The instruments of credit regulation originally available to the State Bank were limited to the traditional authority to determine the conditions on

which it would make credit available and to carry out open market operations. Commercial bank reserve requirements were at first fixed by the law at 5 per cent against demand and 2 per cent against time liabilities, but this was later amended to give the Bank authority to vary the requirements as it saw fit above these lower limits.

The Banking Companies (Control) Act of 1948 extended the State Bank's powers to include provision for more direct credit regulation. It also gave the Bank broad supervisory authority over the banking system.

This Act authorizes the State Bank to issue directives to other banks concerning the policy to be followed in making advances, the purposes for which advances may or may not be made, the margins to be maintained in respect of secured advances, and the rates of interest to be charged. Banks may be prohibited from entering into a transaction or class of transactions, or may be required to take such action as the State Bank may think fit. The State Bank may examine banks, grant or refuse licenses to operate, and order changes in the management of banking companies. In short, the Bank is in a position to exert very strong influence upon the policies and operations of Pakistan's banking system.

The State Bank has made little use of its powers to combat inflationary pressures in recent years, but it reports that in the fiscal year 1951 it closely examined the position of banks offering large blocks of securities for sale, and it has attempted to curb credit for imports by imposing high deposit requirements against letters of credit. As in India in the past, the seasonal expansion and contraction of commercial credit has been based largely on the Central Bank's purchases and sales of Government securities. The State Bank has appreciated the disadvantages of this system and has given much thought to encouraging the use of self-liquidating credit instruments for this purpose. It has recently announced a plan very similar to that adopted by the Reserve Bank of India earlier this year to increase the use of commercial bills as collateral for advances. It has not, however, indicated that its purchases of Government securities will be discontinued, although it appears that this step was an important factor in the success of the plan in India.

Disruption of the banking system at the time of partition created major problems for Pakistan. Faced with the withdrawal to India of the major part of the area's banks and banking personnel, the

State Bank has had to devote a large share of its efforts to the task of developing a sound banking system and to the consolidation of its own organization and the improvement of its services.

INDOCHINA

Division of French Indochina into three states, Viet Nam, Laos, and Cambodia, which are independent within the framework of the French Union, gave rise to a need for a new system of monetary regulation. The Bank of Indochina, a commercial bank, had held a monopoly of the note issue privilege for many years. This was withdrawn in January 1952, when the new Bank of Issue (Institut d'Emission) was established.

The powers of the Bank include the right to issue notes, deal in foreign exchange (subject to French exchange control regulations), serve as banker and fiscal agent for the three Associated States, and accept deposits from and grant advances to other banks. The Bank is under the control of a 12-man Board of Directors. The three Associated States and France appoint three directors each. One of the directors is selected as Chairman by mutual agreement of the Associated States and France. He serves as a full-time official and is responsible for the execution of the Board's decisions and the direction of the operations of the Bank. He may appoint a Director General to whom he may delegate all or part of his authority over the administration of the ordinary affairs of the Bank. In addition, provision is made for a committee of four inspectors, representing each of the Associated States and France, to supervise and check on all the operations of the Bank and make reports to their respective Governments.

As adviser and fiscal agent of the Associated States, the Bank's agreement to the terms of issue of State bonds is required. On request the Bank must assist in floating bond issues. It may cooperate with the States in deciding questions connected with the balance of payments and the movement of prices and may volunteer advice on such matters. The Bank also has responsibility for the administration of exchange controls.

The new Bank may open accounts for any banking institution, and it is permitted, as the economic situation may require, to grant banks advances against specified types of collateral, including designated public securities and negotiable instruments arising from foreign trade transactions and approved by the Chairman or Director General of the

Bank. Such advances are limited to 10 days and are renewable for two periods of the same duration. The Bank has no power to license other banks or to exercise direct supervision over them.

The currency may be issued in notes of different design for each of the Associated States. It is to be freely convertible into French francs at the official parity. A reserve equivalent to at least 50 per cent of the note issue must be maintained by the Bank in gold, French francs, or other foreign exchange. This reserve must be held in interest-paying blocked accounts with the French Treasury. Foreign exchange in excess of the amount required to carry on normal exchange operations must also be deposited with the French Treasury, with the exception of exchange received directly by the Associated States as gifts from foreign powers. The currency remains legally linked with the French franc, with the attendant absence of local control over exchange rates.

As the organization of the Bank indicates, the operation of a single central bank to serve three autonomous States involves a number of delicate problems. One of the most difficult promises to be the authorization of advances to the treasuries of the Associated States. The law limits the total of such advances to the equivalent of 33 per cent of the Bank's liability for currency in circulation during an undefined "initial period of operation." After this period, advances will be limited to 50 per cent of the Bank's gold and foreign exchange reserve. All advances must be secured by negotiable State bonds having a maximum maturity of three months and renewable for periods of the same length. No limit is placed on the number of renewals. Decision on applications for grants may be made by the Board of Directors or delegated to an *ad hoc* committee composed of the Chairman of the Board and two directors, one from the applicant State and one from a nonapplicant State. This committee's decisions are made by majority vote.

In addition to these advances the Bank may grant credits to the States for expenditures in France in pursuance of economic development programs. These credits are also authorized by an *ad hoc* committee, and are limited to a sum equal to 20 per cent of the largest annual exports of the applicant State for any year beginning with 1951. The Bank is also responsible for the administration of the Autonomous Fund for the Administration and Amortization of the Public Debt of the old Indo-chinese Treasury. The Bank may make advances

to this fund, subject to the unanimous approval of the directors.

Postwar inflation in Indochina has been fed principally by governmental budgetary deficits. The new Bank of Issue, in its position as adviser to the Governments of the Associated States, is concerned with the adoption of budgetary policies of less inflationary character. It is too early to judge whether the Governments of the States involved and their representatives on the Bank's Board of Directors will be able to overcome the obstacles they face.

INDONESIA

The Java Bank served as the sole bank of issue in the Netherlands East Indies from the time of its founding in 1828 until the transformation of that colony into the independent State of Indonesia in 1949. It carried on an extensive commercial banking business in addition to central banking functions. Although its shares were privately owned, the Government had authority to appoint the Bank's managing directors, supervise its operations, and share in its profits. The Bank could influence the cost and availability of credit through its own loans and discounts and its bank rate, but it had no direct power to control or supervise the policies and operations of other banks. Its own credit operations were limited by the statutory requirement that it maintain a gold reserve equal to a minimum of 40 per cent of its total demand liabilities.

The attainment of independence by Indonesia in December 1949 was followed by changes affecting the Java Bank, but its structure and powers have not yet been altered. Among the earlier developments were the replacement of a number of the Bank's Dutch officials, including the President, by Indonesians, and the lowering of the minimum gold reserve requirement against liabilities to 20 per cent in January 1951. In July 1951, the Government revealed its intention to nationalize the Bank and offered to pay 120 per cent of par value for all privately held shares. Within a few months the Government had acquired 97 per cent of the Bank's stock, and in November 1951 an act was passed authorizing the expropriation of the remaining shares at the same level of compensation.

It was recognized at that time that it would be necessary to redefine the relationship between the Bank and the Government and to revise the statutes governing the Bank. It was announced in October 1952 that a bill to accomplish this was under consideration.

CURRENT EVENTS AND ANNOUNCEMENTS

Federal Reserve Meetings

The Federal Advisory Council held a meeting in Washington on November 16-18, 1952, and met with the Board of Governors of the Federal Reserve System on November 18.

A meeting of the Chairmen of the Federal Reserve Banks, which was also attended by members of the Board of Governors, was held on December 4-5, 1952.

A meeting of the Presidents of the Federal Reserve Banks was held in Washington on December 7-9, 1952, and on December 9 the Presidents met with the Board of Governors.

On December 8 a meeting of the Federal Open Market Committee was held.

Election of Class B Director

The Federal Reserve Bank of Dallas on November 18, 1952, announced the election of Mr. D. A. Hulcy, Chairman of the Board and President, Lone Star Gas Company, Dallas, Texas, as a Class B director of the Bank for the unexpired portion of the term ending December 31, 1954, to succeed Mr. George H. Zimmerman, deceased. Mr. Zimmer-

man was Chairman of the Board and President, Wm. Cameron & Company, Waco, Texas.

Death of Director

Mr. Ernest H. Hahne, President, Miami University, Oxford, Ohio, who had served as a director of the Cincinnati Branch of the Federal Reserve Bank of Cleveland since January 1, 1949, died on November 25, 1952.

Admission of State Banks to Membership in the Federal Reserve System

The following State banks were admitted to membership in the Federal Reserve System during the period September 16, 1952 to November 15, 1952:

Colorado

Englewood—Englewood State Bank.

New York

Northport—Northport Trust Company.

Tennessee

Columbia—Farmers and Merchants Bank.

Wisconsin

Three Lakes—The Peoples State Bank.

NATIONAL SUMMARY OF BUSINESS CONDITIONS

[Compiled November 26 and released for publication December 1]

Industrial production in October and November was slightly above the sharply advanced September level. Average wholesale prices of industrial commodities remained steady, while prices of farm products and foods eased further. Consumers' prices showed little change in October at a level slightly below their summer high. Bank loans to business increased sharply after mid-October.

INDUSTRIAL PRODUCTION

Reflecting mainly continued gains in durable goods industries, the Board's index of industrial production rose 1 point further in October to 227 per cent of the 1935-39 average. In November a similar gain is likely. Since September, output at factories and mines has averaged about 3 per cent above the levels prevailing during 1951 and early 1952.

Steel ingot production in October and November was at a new record rate of 106 per cent of rated capacity as of the beginning of this year. Activity in most metal fabricating industries also advanced further. Television production rose to the near-record annual rate of about 10 million sets in late October and continued at this level in early November. Passenger automobile assemblies were maintained at the high September-October rates until mid-November but subsequently declined owing mainly to model changeovers. Aluminum produc-

tion was reduced further in October as a result of electric power shortages and was about 9 per cent below the very high August level.

Nondurable goods production showed a slight decline in October, as textile mill activity was reduced somewhat following marked recovery in the summer and early fall. Output of paper and paperboard, however, advanced further. Meat production was maintained in October and the first 3 weeks of November at levels well above those in the corresponding period a year ago. Output of most other nondurables continued at about the levels of the preceding month.

Minerals output declined in October and rose again in November, owing mainly to fluctuations in coal output. Crude petroleum production rose throughout the period and output of metals was maintained in large volume.

CONSTRUCTION

Value of new construction work put in place, seasonally adjusted, during October was larger than in other recent months. Value of contract awards was below the near-record September total, which included a large volume of atomic energy awards, but was about one-fourth larger than in October 1951. Housing starts in October rose to 101,000, as compared with 98,000 in September, and were at a seasonally adjusted annual rate of 1,156,000.

EMPLOYMENT

Seasonally adjusted employment in nonagricultural industries in October was maintained at the record September level of 47.2 million. Employment in manufacturing rose slightly to a new postwar peak of 16.2 million, and average hours of work and hourly and weekly earnings increased further. Unemployment declined again in October, to a new postwar low of 1.3 million.

DISTRIBUTION

Retail sales rose sharply further in October to a level 9 per cent above a year earlier. Both durable and nondurable goods shared in the October ad-

Federal Reserve indexes. Monthly figures, latest shown are for November.

NATIONAL SUMMARY OF BUSINESS CONDITIONS

vance, with the rise in automobile sales especially marked. Department store sales in the first half of November were running below their high October level, on a seasonally adjusted basis. Stocks at department stores are estimated to have continued little changed through October after seasonal adjustment.

COMMODITY PRICES

Wholesale prices continued to decline in November largely reflecting further decreases in prices of cotton, livestock, and meats. Cotton has declined to about 34 cents per pound since release in early November of a substantially larger crop estimate, and is now 8 cents below a year ago and 2 cents above the Federal support level. Prices of some industrial materials strengthened and prices of finished goods other than foods generally changed little.

The consumers price index was about unchanged in October. Small decreases in foods and textile products were offset by advances in rents, fuels, and services.

BANK CREDIT

Business borrowing from banks expanded sharply in late October and the first three weeks of November. This expansion was more widely distributed than the earlier rise which had been concentrated in such industries as food processing, commodity dealing, and trade where loans normally increase at this season of the year. Consumer and real estate loans

also continued to rise. The Treasury's issue of 2.5 billion dollars of tax anticipation bills in October was bought at first largely by banks, but subsequently was purchased in substantial volume by corporations. Most of a second issue of such bills amounting to 2 billion dollars in mid-November was also taken up initially by the banking system.

Member bank reserve positions tended to be fairly tight during the mid-October to mid-November period. Reserve drains resulted principally from a currency outflow and an increase in Treasury balances at the Reserve Banks. In addition, Federal Reserve System holdings of Government securities were reduced somewhat. The average level of member bank borrowings exceeded 1¼ billion dollars over the period.

SECURITY MARKETS

Common stock prices rose steadily in the first three weeks of November. Yields on high-grade corporate bonds receded to the levels of early September. Yields on Treasury bills and other short-term Government securities increased substantially. In addition to tax anticipation bills the Treasury announced the offering of an additional amount of 2 per cent certificates of indebtedness maturing August 15, 1953, in exchange for the 1.1 billion dollars of 1⅞ per cent certificates maturing December 1, 1952.

F. W. Dodge Corporation data for 37 Eastern States. Monthly figures, latest shown are for October.

Data for selected industries reported by over 200 of the largest weekly reporting member banks. "Metals" includes metal products, machinery, and transportation equipment. "Petroleum, etc." includes coal, chemicals, and rubber products. "Foods, etc." includes liquor and tobacco. Wednesday figures, latest shown are for November 19.

Tables on the following pages include the principal available statistics of current significance relating to financial and business developments in the United States. The data relating to the Federal Reserve Banks and the member banks of the Federal Reserve System are derived from regular reports made to the Board; index numbers of production are compiled by the Board on the basis of material collected by other agencies; figures for gold stock, money in circulation, Treasury finance, and operations of Government credit agencies are obtained principally from statements of the Treasury, or of the agencies concerned; data on money and security markets and commodity prices and other series on business activity are obtained largely from other sources. Back figures for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*; back figures for most other tables may be obtained from earlier BULLETINS.

¹ Preliminary.

² Includes industrial loans and acceptances purchased, which are shown separately in subsequent tables.

³ These figures are estimated.

Back figures.—See *Banking and Monetary Statistics*, Tables 101–103, pp. 369–394; for description, see pp. 360–366 in the same publication.

MAXIMUM RATES ON TIME DEPOSITS

[Per cent per annum]

	Nov. 1, 1933– Jan. 31, 1935	Feb. 1, 1935– Dec. 31, 1935	Effective Jan. 1, 1936
Savings deposits.....	3	2½	2½
Postal Savings deposits.....	3	2½	2½
Other deposits payable:			
In 6 months or more.....	3	2½	2½
In 90 days to 6 months.....	3	2½	2
In less than 90 days.....	3	2½	1

NOTE.—Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q. Under this Regulation the rate payable by a member bank may not in any event exceed the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Maximum rates that may be paid by insured nonmember banks as established by the F.D.I.C., effective Feb. 1, 1936, are the same as those in effect for member banks.

MARGIN REQUIREMENTS¹

[Per cent of market value]

Prescribed in accordance with Securities Exchange Act of 1934	Feb. 1, 1947– Mar. 29, 1949	Mar. 30, 1949– Jan. 16, 1951	Effective Jan. 17, 1951
Regulation T:			
For extensions of credit by brokers and dealers on listed securities.....	75	50	75
For short sales.....	75	50	75
Regulation U:			
For loans by banks on stocks.....	75	50	75

¹ Regulations T and U limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of the extension; the "margin requirements" shown in this table are the difference between the market value (100%) and the maximum loan value.

Back figures.—See *Banking and Monetary Statistics*, Table 145, p. 504, and BULLETIN for March 1946, p. 295, and February 1947, p. 162.

FEDERAL RESERVE BANK DISCOUNT RATES
[Per cent per annum]

Federal Reserve Bank	Discounts for and advances to member banks						Advances to individuals, partnerships, or corporations other than member banks secured by direct obligations of the U. S. (last par. Sec. 13)		
	Advances secured by Government obligations and discounts of and advances secured by eligible paper (Secs. 13 and 13a) ¹			Other secured advances [Sec. 10(b)]					
	Rate on Nov. 30	In effect beginning—	Previous rate	Rate on Nov. 30	In effect beginning—	Previous rate	Rate on Nov. 30	In effect beginning—	Previous rate

San Francisco.....	1½	Aug. 24, 1950	1½	2¼	Aug. 24, 1950	2	2½	² Oct. 28, 1942	4

¹ Rates shown also apply to advances secured by obligations of Federal intermediate credit banks maturing within 6 months.

² Certain special rates to nonmember banks were in effect during the wartime period.

NOTE.—*Maximum maturities.* Discounts for and advances to member banks: 90 days for discounts and advances under Sections 13 and 13a of the Federal Reserve Act except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not exceeding 6 months and 9 months, respectively, and advances secured by obligations of Federal intermediate credit banks maturing within 6 months are limited to maximum maturities of 15 days; 4 months for advances under Section 10(b). Advances to individuals, partnerships, or corporations under the last paragraph of Section 13: 90 days. *Back figures.*—See *Banking and Monetary Statistics*, Tables 115–116, pp. 439–443.

FEDERAL RESERVE BANK BUYING RATES ON ACCEPTANCES
[Per cent per annum]

Maturity	Rate on Nov. 30	In effect beginning— ¹	Previous rate
1–90 days.....	1½	Dec. 18, 1951	1½
91–120 days.....	2	Dec. 18, 1951	1½
121–180 days.....	2½	Dec. 18, 1951	2

¹ Dates effective at Federal Reserve Bank of New York.

NOTE.—Effective minimum buying rates on prime bankers' acceptances payable in dollars. *Back figures.*—See *Banking and Monetary Statistics*, Table 117, pp. 443–445.

FEDERAL RESERVE BANK RATES ON INDUSTRIAL LOANS AND COMMITMENTS UNDER SECTION 13B OF THE FEDERAL RESERVE ACT

Maturities not exceeding five years

[In effect November 30. Per cent per annum]

Federal Reserve Bank	To industrial or commercial businesses		To financing institutions		
	On loans ¹	On commitments	On discounts or purchases		On commitments
			Portion for which institution is obligated	Re-maining portion	
Boston.....	2¼–5	½–1½	(?)	(?)	½–1½
New York.....	2¼–5	½–1½	(?)	(?)	½–1½
Philadelphia.....	2¼–5	½–1½	(?)	(?)	½–1½
Cleveland.....	2¼–5	½–1½	(?)	(?)	½–1½
Richmond.....	2¼–5	½–1½	(?)	(?)	½–1½
Atlanta.....	2¼–5	½–1½	(?)	(?)	½–1½
Chicago.....	2¼–5	½–1½	2¼–5	2¼–5	½–1½
St. Louis.....	3–5	½–1½	1½–2¼	(?)	½–1½
Minneapolis.....	2¼–5	½–1½	(?)	(?)	½–1½
Kansas City.....	2¼–5	½–1½	(?)	(?)	½–1½
Dallas.....	2¼–5	½–1½	(?)	(?)	½–1½
San Francisco.....	2¼–5	½–1½	(?)	(?)	½–1½

¹ Including loans made in participation with financing institutions.

² Rate charged borrower less commitment rate.

³ Rate charged borrower but not to exceed ¼ per cent above the discount rate.

⁴ Charge of ¼ per cent per annum is made on undisbursed portion of loan.

Back figures.—See *Banking and Monetary Statistics*, Table 118, pp. 446–447.

MEMBER BANK RESERVE REQUIREMENTS

Jan. 25.....	24	20		
Feb. 1.....			14	
In effect Dec. 1, 1952 ⁴	24	20	14	6

¹ Demand deposits subject to reserve requirements, which beginning Aug. 23, 1935, have been total demand deposits minus cash items in process of collection and demand balances due from domestic banks (also minus war loan and series E bond accounts during the period Apr. 13, 1943–June 30, 1947).

² Requirement became effective at country banks.

³ Requirement became effective at central reserve and reserve city banks.

⁴ Present legal minimum and maximum requirements on net demand deposits—central reserve cities, 13 and 26 per cent; reserve cities, 10 and 20 per cent; country, 7 and 14 per cent, respectively; on time deposits at all member banks, 3 and 6 per cent, respectively.

¹ Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.

² Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.

³ Not covered by Federal Reserve Bank commitment to purchase or discount.

NOTE.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

¹ National series for which bank debit figures are available beginning with 1919.

² Weekly reporting member bank series. This series was revised beginning July 3, 1946, and the deposits and debits of the new series for the first six months in 1946 are partly estimated.

NOTE.—Debits to total deposit accounts, except interbank accounts, have been reported for 334 centers from 1942 through November 1947, 333 centers from December 1947 through December 1950, and for 342 centers beginning January 1951; the deposits from which rates of turnover have been computed have likewise been reported by most banks and have been estimated for others. Debits to demand deposit accounts, except interbank and U. S. Government, and the deposits from which rates of turnover have been computed have been reported by member banks in leading cities since 1935.

¹ Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States. Totals for other end-of-month dates are shown in table above and totals by weeks in the table on p. 1291.

² Includes \$156,039,431 held as reserve against United States notes and Treasury notes of 1890.

³ To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.

⁴ Because some of the types of money shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See note for explanation of these duplications. ⁵ Less than \$500,000.

NOTE.—There are maintained in the Treasury—(i) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (ii) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on receipt); (iii) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (iv) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such gold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or of direct obligations of the United States. Federal Reserve Banks must maintain a reserve in gold certificates of at least 25 per cent, including the redemption fund with the Treasurer of the United States, against Federal Reserve notes in actual circulation; gold certificates pledged as collateral may be counted as reserves. "Gold certificates" as herein used includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve Bank notes and national bank notes are in process of retirement.

CONSOLIDATED CONDITION STATEMENT FOR BANKS AND THE MONETARY SYSTEM

^p Preliminary.

¹ Treasury funds included are the gold account, Treasury currency account, and Exchange Stabilization Fund.

² Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection.

³ Excludes interbank time deposits; United States Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.

⁴ Prior to June 30, 1947, includes a relatively small amount of demand deposits. ⁵ Less than 50 million dollars.

NOTE.—For description of statement and back figures, see BULLETIN for January 1948, pp. 24-32. The composition of a few items differs slightly from the description in the BULLETIN article; stock of Federal Reserve Banks held by member banks is included in "Other securities" and in "Capital and miscellaneous accounts, net" and balances of the Postal Savings System and the Exchange Stabilization Fund with the U. S. Treasury are netted against the same item instead of against U. S. Government deposits and Treasury cash. Total deposits and currency shown in the monthly Chart Book excludes "Foreign bank deposits, net" and "Treasury cash." Except on call dates, figures are rounded to nearest 100 million dollars and may not add to the totals. See *Banking and Monetary Statistics*, Table 9, pp. 34-35, for back figures for deposits and currency.

² Preliminary.

* "All banks" comprise "all commercial banks" and "all mutual savings banks." "All commercial banks" comprise "all nonmember commercial banks" and "all member banks" with exception of three mutual savings banks that became members in 1941. Stock savings banks and nondeposit trust companies are included with "commercial" banks. Number of banks includes a few noninsured banks for which asset and liability data are not available. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

¹ Beginning June 30, 1942, excludes reciprocal balances, which on Dec. 31, 1942, aggregated 513 million dollars at all member banks and 525 million at all insured commercial banks.

For other footnotes see following two pages.

ALL BANKS IN THE UNITED STATES, BY CLASSES *—Continued

PRINCIPAL ASSETS AND LIABILITIES, AND NUMBER OF BANKS—Continued

[Figures partly estimated except on call dates. Amounts in millions of dollars]

* Beginning with December 31, 1947, the all bank series was revised as announced in November 1947 by the Federal bank supervisory agencies. At that time a net of 115 noninsured nonmember commercial banks with total loans and investments of approximately 110 million dollars was added, and 8 banks with total loans and investments of 34 million were transferred from noninsured mutual savings to nonmember commercial banks.

For other footnotes see preceding and opposite pages.

* These figures do not include data for banks in possessions of the United States. During 1941 three mutual savings banks became members of the Federal Reserve System; these banks are included in "member banks" but are not included in "all insured commercial banks." Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

¹ Beginning June 30, 1948, figures for various loan items are shown gross (i. e., before deduction of valuation reserves); they do not add to the total and are not entirely comparable with prior figures. Total loans continue to be shown net.

For other footnotes see opposite page.

ALL INSURED COMMERCIAL BANKS IN THE UNITED STATES, BY CLASSES*—Continued

RESERVES AND LIABILITIES

³ Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection.⁴ Monthly and weekly totals of debits to demand deposit accounts except interbank and U. S. Government accounts.⁵ Changes, particularly the increases in real estate loans and time deposits, are due in part to merger of nonreporting banks with a reporting bank in the Chicago District.Back figures.—For description of revision beginning July 3, 1946, see BULLETIN for June 1947, p. 692, and for back figures on the revised basis, see BULLETIN for July 1947, pp. 878-883; for old series, see *Banking and Monetary Statistics*, pp. 127-227.

¹ Sample includes about 210 weekly reporting member banks reporting changes in their larger loans; these banks hold nearly 90 per cent of total commercial and industrial loans of all weekly reporting member banks and about 70 per cent of those of all commercial banks. During April and May 1951 the coverage was smaller.

² Figures for other than weekly periods are based on weekly changes during period.

³ Net change at all banks in weekly reporting series.

¹ With suspension of the Voluntary Credit Restraint Program, coverage and classification of these data are being revised. Pending such revision, publication of the series is temporarily discontinued.

² Excludes business mortgage loans of less than \$100,000 each and foreign investments, which were not reported until September.

NOTE.—Data for 45 companies, which account for 85 per cent of the assets of all United States life insurance companies; they were initiated by the Life Insurance Association of America in accordance with the Program for Voluntary Credit Restraint.

¹ Excludes balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) of firms' own partners.

² Includes money borrowed from banks and also from other lenders (not including member firms of national securities exchanges).

³ As reported to the New York Stock Exchange. According to these reports, the part of total customers' debit balances represented by balances secured by U. S. Government securities was (in millions of dollars): August, 48; September, 39; October, 31.

NOTE.—For explanation of these figures see "Statistics on Margin Accounts" in BULLETIN for September 1936. The article describes the method by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

Back figures.—See *Banking and Monetary Statistics*, Table 143, pp. 501-502, for monthly figures prior to 1942, and Table 144, p. 503, for data in detail at semiannual dates prior to 1942.

¹ Monthly and weekly data are averages of daily figures, except for municipal bonds, which are based on figures for Wednesday.

² Beginning Apr. 1, 1952, series includes all fully taxable, marketable bonds due or first callable after 12 years. Prior to that date, only bonds due or first callable after 15 years were included.

³ Standard and Poor's Corporation.

⁴ U. S. Treasury Department.

⁵ Moody's Investors Service, week ending Friday. Because of a limited number of suitable issues, the industrial Aaa and Aa groups have been reduced from 10 to 6 issues, and the railroad Aaa and Aa groups from 10 to 5 and 4 issues, respectively.

Back figures.—See *Banking and Monetary Statistics*, Tables 128-129, pp. 468-474, and BULLETIN for May 1945, pp. 483-490, and October 1947, pp. 1251-1253.

¹ Monthly and weekly data are averages of daily figures, except for municipal and corporate bonds, preferred stocks, and common stocks (Standard and Poor's series), which are based on figures for Wednesday.

² Beginning Apr. 1, 1952, series includes all fully taxable, marketable bonds due or first callable after 12 years. Prior to that date, only bonds due or first callable after 15 years were included.

³ Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent 20-year bond.

⁴ Standard and Poor's Corporation. Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend.

⁵ Average daily volume of trading in stocks on the New York Stock Exchange.

Back figures.—See *Banking and Monetary Statistics*, Tables 130, 133, 134, and 136, pp. 475, 479, 482, and 486, respectively, and *BULLETIN* for May 1945, pp. 483-490, and October 1947, pp. 1251-1253.

¹ Includes publicly offered issues of Federal credit agencies, but excludes direct obligations of U. S. Treasury.

² Includes issues of noncontiguous U. S. Territories and Possessions.

³ These figures for 1947, 1950, 1951, September 1951, and May 1952 include 244 million dollars, 100 million, 150 million, 100 million, and 47 million, respectively, of issues of the International Bank for Reconstruction and Development.

⁴ Includes the Shell Caribbean Petroleum Company issue of 250 million dollars, classified as "foreign" by the *Chronicle*.

Source.—For domestic issues, *Commercial and Financial Chronicle*; for foreign issues, U. S. Department of Commerce. Monthly figures subject to revision. Back figures.—See *Banking and Monetary Statistics*, Table 137, p. 487.

¹ Estimates of new issues sold for cash in the United States.
² Gross proceeds are derived by multiplying principal amounts or number of units by offering price.
³ Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i. e., compensation to underwriters, agents, etc., and expenses.
⁴ Classifications for years 1938-47 are not precisely comparable with those beginning 1948, but they are believed to be sufficiently similar for broad comparisons. See also footnotes 5 through 8.
⁵ Prior to 1948 this group corresponds to that designated "Industrial" in the old classification.
⁶ Included in "Manufacturing" prior to 1948.
⁷ Includes "Other transportation" for which separate figures are available beginning in 1948.
⁸ Included in "Public utility" prior to 1948.
⁹ Includes issues for repayment of other debt and for other purposes not shown separately.
¹⁰ Retirement of securities only.
Source.—Securities and Exchange Commission; for compilation of back figures, see *Banking and Monetary Statistics*, Table 138, p. 491, a publication of the Board of Governors.

*Revised.

¹ Certain tax accruals for the first six months of 1950 and 1951, required by subsequent increases in Federal income tax rates and charged by many companies against third quarter profits, have been redistributed to the first and second quarters. Available information does not permit a similar redistribution of accruals charged against fourth quarter 1950 profits to cover 1950 liability for excess profits taxes.

² As reported.

NOTE.—*Manufacturing corporations.* Data are from published company reports, except sales for period beginning 1946, which are from reports of the Securities and Exchange Commission. For certain items, data for years 1939-44 are partly estimated. Assets are total assets as of the end of 1946.

Railroads. Figures are for Class I line-haul railroads (which account for 95 per cent of all railroad operations) and are obtained from reports of the Interstate Commerce Commission.

Electric power. Figures are for Class A and B electric utilities (which account for about 95 per cent of all electric power operations) and are obtained from reports of the Federal Power Commission, except that quarterly figures on operating revenue and profits before taxes are partly estimated by the Federal Reserve, to include affiliated nonelectric operations.

Telephone. Revenues and profits are for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Lines and General departments of American Telephone and Telegraph Company) and for two affiliated telephone companies, which together represent about 85 per cent of all telephone operations. Dividends are for the 20 operating subsidiaries and the two affiliates. Data are obtained from the Federal Communications Commission.

All series. Profits before taxes refer to income after all charges and before Federal income taxes and dividends. For description of series and back figures, see pp. 662-666 of the BULLETIN for June 1949 (manufacturing); pp. 215-217 of the BULLETIN for March 1942 (public utilities); and p. 908 of the BULLETIN for September 1944 (electric power).

* Revised, * Corrected.

¹ Certain tax accruals for the first six months of 1950 and 1951, required by subsequent increases in Federal income tax rates and charged by many companies against third quarter profits, have been redistributed to the first and second quarters. Available information does not permit a similar redistribution of accruals charged against fourth quarter 1950 profits to cover 1950 liability for excess profits taxes.

² Total includes 26 companies in nondurable goods groups not shown separately, as follows: textile mill products (10); paper and allied products (15); and miscellaneous (1).

³ Total includes 25 companies in durable goods groups not shown separately, as follows: building materials (12); transportation equipment other than automobile (6); and miscellaneous (7).

¹ Preliminary.

² Excess of receipts (+) or expenditures (-).

³ Excludes items in process of collection.

⁴ For description, see Treasury Bulletin for September 1947 and subsequent issues.

⁵ Prior to January 1952 represents income tax withheld, and employment taxes less amounts appropriated to Federal old-age and survivors insurance trust fund; beginning with January 1952, employment taxes withheld no longer separable.

⁶ Beginning with January 1952, includes social security taxes on self-employed persons.

⁷ These are appropriated directly to the Federal old-age and survivors insurance trust fund.

⁸ Composed of Atomic Energy Commission, maritime activities, and military assistance abroad.

⁹ Includes State Department.

¹⁰ Includes investments of Government agencies in public debt.

GOVERNMENT CORPORATIONS AND CREDIT AGENCIES

[Based on compilation by United States Treasury Department. In millions of dollars]

¹ Assets are shown on a net basis, i. e., after reserve for losses.

² Totals for each quarter include the United States' investment of 635 million dollars in stock of the International Bank for Reconstruction and Development and its subscription of 2,750 million to the International Monetary Fund.

³ See footnote 8.

⁴ Less than \$500,000. ⁵ Includes Disaster Loans, etc., Revolving Fund.

⁶ Assets representing unrecovered costs to the Corporation in its national defense, war, and reconversion activities, which are held for the Treasury for liquidation purposes in accordance with provisions of Public Law 860, 80th Congress.

⁷ Includes figures for Smaller War Plants Corp., which is being liquidated by the Reconstruction Finance Corp.

⁸ Includes the Treasury loan to the United Kingdom (3.7 billion dollars) and, beginning with the balance sheet for June 30, 1952, lending by the Mutual Security Agency (1.5 billion).

NOTE.—Statement includes figures for certain business-type activities of the U. S. Government. Comparability of the figures with those for earlier years has been affected by (1) the adoption of a new reporting form beginning Sept. 30, 1944, and (2) changes in activities included, that is, exclusion of the U. S. Maritime Commission beginning June 30, 1948 and inclusion of the Mutual Security Agency beginning June 30, 1952. For back figures see earlier issues of the BULLETIN and Banking and Monetary Statistics, Table 152, p. 517.

BUSINESS INDEXES

[The terms "adjusted" and "unadjusted" refer to adjustment of *monthly* figures for seasonal variation]

* Estimated; all estimates are those of the Federal Reserve.

† Preliminary.

‡ Revised.

* Average per working day.

† For indexes by groups or industries, see pp. 1320-1323.

‡ Three-month moving average, based on F. W. Dodge Corporation data. A description of the index may be obtained from the Division of Research and Statistics. For monthly data (dollar value) by groups, see p. 1327.

§ The unadjusted indexes of employment and payrolls, wholesale commodity prices, and consumers' prices are compiled by or based on data of the Bureau of Labor Statistics. Nonagricultural employment covers employees only and excludes personnel in the armed forces. The consumers' price index is the adjusted series, reflecting: (1) beginning 1940, allowances for rents of new housing units and (2) beginning January 1950, interim revision of series and weights.

¶ For indexes by Federal Reserve districts and for other department store data, see pp. 1330-1332.

Back figures in BULLETIN.—For industrial production, August 1940, pp. 825-882, September 1941, pp. 933-937, and October 1943, pp. 958-984; for department store sales, December 1951, pp. 1490-1515.

* Preliminary. * Revised.

¹ Methods used in compiling the iron and steel group index have been revised beginning October 1949. A description of the new methods may be obtained from the Division of Research and Statistics.

² Series included in total and group indexes but not available for publication separately.

³ Because of a reclassification of the basic data used to measure changes in production, the sulphate pulp and sulphite pulp series are no longer available separately. Individual indexes through June 1951 are shown in preceding BULLETINS.

^p Preliminary.

^r Revised.

¹ Methods used in compiling the iron and steel group index have been revised beginning October 1949. A description of the new methods may be obtained from the Division of Research and Statistics.

² Series included in total and group indexes but not available for publication separately.

³ Because of a reclassification of the basic data used to measure changes in production, the sulphate pulp and sulphite pulp series are no longer available separately. Individual indexes through June 1951 are shown in preceding BULLETINS.

* Revised.

NOTE.—Data include all full- and part-time employees who worked during, or received pay for, the pay period ending nearest the 15th of the month. Proprietors, self-employed persons, domestic servants, unpaid family workers, and members of the armed forces are excluded. October 1952 figures are preliminary. Back unadjusted data are available from the Bureau of Labor Statistics; seasonally adjusted figures beginning January 1939 may be obtained from the Division of Research and Statistics.

October	110,074	63,146	61,862	54,588	7,274	1,284	46,928

¹ The number of persons in the armed forces, previously included in the total noninstitutional population and total labor force items, is no longer available for reasons of security.

² Includes self-employed, unpaid family, and domestic service workers.

NOTE.—Details do not necessarily add to group totals. Information on the labor force status of the population is obtained through interviews of households on a sample basis. Data relate to the calendar week that contains the eighth day of the month. Back data are available from the Bureau of the Census.

¹ Net proceeds to borrowers.

² Includes mortgages insured in connection with sale of Government owned war housing and insured loans to finance the manufacture of housing. ³ Less than \$500,000.

⁴ Includes 6 million dollars of Class 3 loans (program terminated Feb. 28, 1950) and 1 million of Sec. 8 loans.

⁵ Includes defense housing as follows (in millions of dollars): January, 1; February, 0.3; March, 0.5; April, 2; May, 7; June, 8; July, 10; August, 13; September, 20; October 18.

NOTE.—Figures represent gross insurance written during the period and do not take account of principal repayments on previously insured loans. Figures include some reinsured mortgages, which are shown in the month in which they were reported by FHA. Reinsured mortgages on rental and group housing (Title II) are not necessarily shown in the month in which reinsurance took place.

¶ Preliminary. n.a. Not available.

NOTE.—Government underwritten units are those started under commitments of FHA or VA to insure or guarantee the mortgage. VA figures after June 1950 and all FHA figures are based on field office reports of first compliance inspections; VA figures prior to June 1950, estimates based on loans closed information. Other figures are estimated by Bureau of Labor Statistics on the basis of reports of building permits issued, reported starts of public units, and a sample of places not issuing permits.

* Preliminary.

* Revised.

¹ Figures for sales are the average per trading day, while those for stocks are as of the end of the month or the annual average.

NOTE.—For description and monthly indexes for back years, see BULLETIN for December 1951, pp. 1463-1515.

¹ The ratio of stocks to sales is obtained by dividing stocks at the end of the month by sales during the month and hence indicates the number of months' supply on hand at the end of the month in terms of sales for that month.

² The 1941 average of monthly sales for each department is used as a base in computing the sales index for that department. The stocks index is derived by applying to the sales index for each month the corresponding stocks-sales ratio. For description and monthly indexes of sales and stocks by department groups for back years, see BULLETIN for August 1946, pp. 856-858. The titles of the tables on pp. 857 and 858 were reversed.

³ For movements of total department store sales and stocks see the indexes for the United States on p. 1329.

⁴ Index numbers of sales and stocks for this department are not available for publication separately; the department, however, is included in group and total indexes. ⁵ Data not available.

NOTE.—Based on reports from a group of large department stores located in various cities throughout the country. In 1951, sales and stocks at these stores accounted for almost 50 per cent of estimated total department store sales and stocks. Not all stores report data for all of the departments shown; consequently, the sample for the individual departments is not so comprehensive as that for the total.

² Preliminary. ³ Revised.

¹ The first three ratios are of stocks and/or orders at the end of the month to sales during the month. The final ratio is based on totals of sales and receipts for the month.

² These figures are *not* estimates for all department stores in the United States. They are the actual dollar amounts reported by a group of department stores located in various cities throughout the country. In 1951, sales by these stores accounted for about 50 per cent of estimated total department store sales.

³ Receipts of goods are derived from the reported figures on sales and stocks. New orders are derived from receipts and reported figures on outstanding orders.

NOTE.—For description and monthly figures for back years, see BULLETIN for October 1952, pp. 1098-1102.

¹ Includes construction expenditures for crude petroleum and natural gas drilling.

² Consists of sales abroad and domestic sales of surplus consumption goods and materials.

³ Less than 50 million dollars.

⁴ Total wage and salary receipts, as included in "Personal income" is equal to total disbursements less employee contributions to social insurance. Such contributions are not available by industries.

⁵ Includes compensation for injuries, employer contributions to private pension and welfare funds, and other payments.

⁶ Includes business and professional income, farm income, and rental income of unincorporated enterprise; also a noncorporate inventory valuation adjustment.

⁷ Includes government social insurance benefits, direct relief, mustering out pay, veterans' readjustment allowances and other payments, as well as consumer bad debts and other business transfers.

⁸ Prior to 1952 includes employee contributions only; beginning January 1952, includes also contributions to the old-age and survivors' insurance program of the self-employed to whom coverage was extended under the Social Security Act Amendments of 1950. Personal contributions are not included in personal income.

⁹ Includes personal income exclusive of net income of unincorporated farm enterprise, farm wages, agricultural net rents, agricultural net interest, and net dividends paid by agricultural corporations.

NOTE.—Details may not add to totals because of rounding.

Source.—Department of Commerce.

^p Preliminary.

¹ Figures include only personal instalment cash loans and retail automobile direct loans shown on the following page, and a small amount of other retail direct loans not shown separately. Other retail direct loans outstanding at the end of October, amounted to 132 million dollars, and other loans made during October were 24 million.

² Figures include only personal instalment cash loans, retail automobile direct loans, and other retail direct loans. Direct retail instalment loans are obtained by deducting an estimate of paper purchased from total retail instalment paper.

³ Includes only loans insured by Federal Housing Administration adjusted by Federal Reserve to exclude nonconsumer loans.

Security prices .	1357

Tables on the following pages include the principal available statistics of current significance relating to gold, international capital transactions of the United States, and financial developments abroad. The data are compiled for the most part from regularly published sources such as central and commercial bank statements and official statistical bulletins, some data are reported to the Board directly. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Back figures for all except price tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*.

INTERNATIONAL CAPITAL TRANSACTIONS OF THE UNITED STATES

TABLE 1.—NET CAPITAL MOVEMENT TO UNITED STATES SINCE JANUARY 2, 1935, BY TYPES

[Net movement from United States, (-). In millions of dollars]

^p Preliminary.

¹ Certain of the movement figures in Table 1 have been adjusted to take account of changes in the reporting practice of banks (see BULLETIN for August 1951, p. 1030). Reported figures from banks, however, did not permit similar adjustments in Tables 2 and 3, representing outstanding amounts. Therefore changes in outstanding amounts as may be derived from Tables 2 and 3 will not always be identical with the movement of funds shown in Table 1.

² Represents funds held with banks and bankers in the United States by foreign central banks and by foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.), and also funds held in accounts with the U. S. Treasury.

³ Beginning with 1947, these figures include transactions of international institutions, which are shown separately in Tables 6 and 7. Securities of such institutions are included in foreign securities.

⁴ "Short-term liabilities" reported in these statistics represent principally demand deposits and U. S. Government obligations maturing in not more than one year from their date of issue, held by banking institutions in the United States. The term "foreigner" is used to designate foreign governments, central banks, and other official institutions (see footnote 2 above) as well as other banks, organizations, and individuals domiciled outside the United States, including U. S. citizens domiciled abroad and the foreign subsidiaries and offices of U. S. banks and commercial firms. (Footnote 1 above also applies to this table.)

⁵ Beginning January 1950, excludes Bank for International Settlements, included in "International institutions" as of that date.

⁶ Data for August 1950 include, for the first time, certain deposit balances and other items which have been held in specific trust accounts, but which have been excluded in the past from reported liabilities.

NOTE.—These statistics are based on reports by banks, bankers, brokers, and dealers. Beginning with the BULLETIN for September 1951, certain changes were made in the order and selection of the material published. An explanation of the changes appears on p. 1202 of that issue. For further explanation and information on back figures see BULLETIN for August 1951, p. 1030.

Gold production in USSR: No regular government statistics on gold production in USSR are available, but data of percentage changes irregularly given out by officials of the gold mining industry, together with certain direct figures for past years, afford a basis for estimating annual production as follows: 1934, 135 million dollars; 1935, 158 million; 1936, 187 million; 1937, 185 million; and 1938, 180 million.

¹ Estimates of United States Bureau of Mines.

² Beginning 1942, figures reported by American Bureau of Metal Statistics. Beginning 1944, they are for Gold Coast only.

³ Reported by American Bureau of Metal Statistics.

⁴ Includes Philippine production received in United States through 1945. Yearly figures are estimates of United States Mint. Monthly figures reported by American Bureau of Metal Statistics, those for 1951 having been adjusted by subtracting from each monthly figure \$297,000 so that the aggregate for the year is equal to the yearly estimate compiled by the United States Mint.

⁵ Gold exports reported by the National Bank of Nicaragua, which states that they represent approximately 90 per cent of total production.

NOTE.—For explanation of table and sources, see BULLETIN for June 1948, p. 731, and *Banking and Monetary Statistics*, p. 524. For annual estimates compiled by the United States Mint for these and other countries in the period 1910–1941, see *Banking and Monetary Statistics*, pp. 542–543.

¹ Preliminary.

² Includes reported gold holdings of central banks and governments and international institutions, unpublished holdings of various central banks and governments, estimated holdings of British Exchange Equalization Account based on figures shown below under United Kingdom, and estimated official holdings of countries from which no reports are received.

³ Includes gold in Exchange Stabilization Fund. Gold in active portion of this Fund is not included in regular statistics on gold stock (Treasury gold) used in the Federal Reserve statement "Member Bank Reserves, Reserve Bank Credit, and Related Items" or in the Treasury statement "United States Money, Outstanding and in Circulation, by Kinds."

⁴ Represents gold holdings of Bank of France (holdings of French Exchange Stabilization Fund are not included).

⁵ Figures are for following dates: 1946—Mar. 31, and 1947—Mar. 31.

⁶ Exchange Equalization Account holdings of gold, U. S. and Canadian dollars, as reported by British Government. (Gold reserves of Bank of England have remained unchanged at 1 million dollars since 1939, when Bank's holdings were transferred to Exchange Equalization Account.)

NOTE.—For description of figures, including details regarding special internal gold transfers affecting the reported data, see *Banking and Monetary Statistics*, pp. 524-535; for back figures through 1941 see Table 160, p. 526 and pp. 544-555, in the same publication and for those subsequent to 1941 see BULLETIN for April 1951, p. 464; February 1950, p. 252; and November 1947, p. 1433. For revised back figures for Argentina and Canada, see BULLETIN for January 1949, p. 86, and February 1949, p. 196, respectively.

¹ See footnote 2 on opposite page.

² Yearly figures are estimates of United States Mint. For explanation of monthly figures see p. 1345, footnote 4.

³ Change includes transfer of 687.5 million dollars gold subscription to International Monetary Fund.

⁴ Not yet available.

⁵ Gold held under earmark at the Federal Reserve Banks for foreign account, including gold held for the account of international institutions, amounted to 5,049.8 million dollars on Nov. 30, 1952. Gold under earmark is not included in the gold stock of the United States.

NOTE.—For back figures and description of statistics, see *Banking and Monetary Statistics*, Table 156, pp. 536-538, and pp. 522-523.

¹ As of Oct. 31, 1952, the Fund had sold 847.0 million U. S. dollars; in addition, the Fund sold to the Netherlands 1.5 million pounds sterling in May 1947 and 300 million Belgian francs in May 1948, sold to Norway 200 million Belgian francs in June and July 1948, and sold to Brazil 10 million pounds sterling in January 1951. Repurchases amounted to 180.1 million dollars. Currencies the net transactions in which amount to less than one million are reported under "All other."
² Excludes uncalled portions of capital subscriptions, amounting to 7,229 million dollars as of Sept. 30, 1952, of which 2,540 million represents the subscription of the United States.

¹ On June 9, 1945, the official buying price of the Bank of England for gold was increased from 168 shillings to 172 shillings and threepence per fine ounce, and on Sept. 19, 1949, it was raised to 248 shillings. For details regarding previous changes in the buying price of gold and for internal gold transfers during 1939, see BULLETIN for March 1950, p. 388, footnotes 1 and 4.

² Securities and silver coin held as cover for fiduciary issue, the amount of which is also shown by this figure.

³ Notes issued less amounts held in banking department.

⁴ Fiduciary issue decreased by 50 million pounds on Jan. 16, increased by 50 million on Apr. 1, June 25, and July 21, and decreased by 50 million on Aug. 27. For details on previous changes, see BULLETIN for February 1952, p. 212; February 1951, p. 238; February 1950, p. 254; April 1949, p. 450; and February 1948, p. 254.

NOTE.—For back figures, see *Banking and Monetary Statistics*, Table 164, pp. 638-640; for description of statistics, see pp. 560-561 in same publication.

¹ Securities maturing in two years or less.

² Includes notes held by the chartered banks, which constitute an important part of their reserves.

³ Beginning November 1944, includes a certain amount of sterling and United States dollars.

⁴ On May 1, 1940, gold transferred to Foreign Exchange Control Board in return for short-term Government securities (see BULLETIN for July 1940, pp. 677-678).

⁵ For details on devaluations and other changes in the gold holdings of the Bank of France, see BULLETIN for September 1951, p. 1211; September 1950, pp. 1132 and 1261; June 1949, p. 747; May 1948, p. 601; May 1940, pp. 406-407; January 1939, p. 29; September 1937, p. 853; and November 1936, pp. 878-880.

⁶ For explanation of these items, see BULLETIN for January 1950, p. 117, footnote 6.

⁷ Beginning January 1950, when the Bank of France modified the form of presentation of its statement, the figures under this heading are not strictly comparable with those shown for earlier dates.

⁸ Includes the following amounts (in millions of francs) for account of the Central Administration of the Reichskreditkassen: 1940, 41,400; 1941, 64,580; 1942, 16,857; 1943, 10,724.

⁹ Includes advance to Stabilization Fund, amounting to 37.8 billion francs on Oct. 30.

NOTE.—For back figures on Bank of Canada and Bank of France, see *Banking and Monetary Statistics*, Tables 166 and 165, pp. 644-645 and pp. 641-643, respectively; for description of statistics, see pp. 562-564 in same publication. For last available report from the Reichsbank (February 1945), see BULLETIN for December 1946, p. 1424.

* Latest month available.

¹ Revised.

² On Aug. 17, 1950, gold reserve revalued from .0202765 to .0177734 grams of fine gold per franc.

³ It is understood that, beginning June 1950, gold reserves have been revalued at a rate of 60 bolivianos per dollar.

⁴ Includes special loan under Bretton Woods Agreements Act.

⁵ This figure represents the amount of the bank's subscription to the Fund less the bank's local currency liability to the Fund. Until such time as the Fund engages in operations in this currency, the "net claim" will equal the country's gold contribution.

⁶ For last available report (March 1950), see BULLETIN for September 1950, p. 1262.

⁷ In December 1950, gold and foreign exchange holdings revalued from 13.50 to 15.00 sucres per dollar.

⁸ Beginning April 1951, gold previously held in Issue Department revalued from 7.4375 grams of fine gold to 2.55187 grams of fine gold per Egyptian pound.

NOTE.—For details relating to individual items in certain bank statements, see BULLETIN for January 1952, p. 102; January 1951, p. 112; and January 1950, p. 118.

¹ Revised.

² This figure represents the amount of the bank's subscription to the Fund less the bank's local currency liability to the Fund. Until such time as the Fund engages in operations in this currency, the “net claim” will equal the country's gold contribution.

³ For last available report (July 1950), see BULLETIN for December 1950, p. 1699.

⁴ For last available report (February 1950), see BULLETIN for September 1950, p. 1263.

⁵ Gold revalued on Jan. 18, 1950, from .334987 to .233861 grams of fine gold per rupiah.

⁶ Includes gold, silver, and foreign exchange forming required reserve (25 per cent) against notes and other demand liabilities.

⁷ Gold revalued on Sept. 19, 1949, from .334987 to .233861 grams of fine gold per guilder.

NOTE.—For details relating to individual items in certain bank statements, see BULLETIN for January 1952, p. 103; January 1951, p. 113.

* Latest month available.

¹The new Central Bank of Paraguay began operations on July 1, 1952. Central banking functions previously performed by the Monetary Department of the Bank of Paraguay were transferred to the new institution. The Bank of Paraguay has been reconstituted as a government-owned commercial bank.

²This figure represents the amount of the bank's subscription to the Fund less the bank's local currency liability to the Fund. Until such time as the Fund engages in operations in this currency, the "net claim" will equal the country's gold contribution.

³In November 1949, part of the gold and foreign exchange holdings of the bank were revalued.

⁴On Dec. 31, 1949, gold revalued from 172 to 248 shillings per fine ounce.

⁵Includes small amount of non-Government bonds.

NOTE.—For details relating to individual items in certain bank statements, see BULLETIN for January 1950, p. 120.

¹ This table represents aggregates of figures reported by individual banks. Data are compiled on the third Wednesday of each month, except in June and December when the statements give end-of-month data.

² Represent six-month loans to the Treasury with a yield of $\frac{3}{4}$ per cent after October 1945.

³ Less than \$500,000.

NOTE.—For details concerning data in earlier years, see BULLETIN for February 1952, p. 466; for back figures and figures on German commercial banks, see *Banking and Monetary Statistics*, Tables 168–171, pp. 648–655, and for description of statistics see pp. 566–571 in same publication.

¹ Beginning Aug. 27, 1951, quotations on Straits Settlements dollar were discontinued and quotations on Malayan dollar substituted. The two rates had been identical for a considerable period.

² Based on quotations through Sept. 19, 1951.

³ Based on quotations through Oct. 26, 1951.

⁴ Based on quotations beginning Oct. 29, 1951.

⁵ Based on quotations through May 8, 1952.

⁶ Based on quotations through Aug. 14, 1952.

NOTE.—For back figures, see *Banking and Monetary Statistics*, Table 173, pp. 662-682. For description of statistics, see pp. 572-573 in same publication, and for further information concerning rates and averages for previous years, see BULLETIN for December 1951, p. 1601; October 1950, p. 1419; January 1950, p. 123; October 1949, p. 1291; January 1949, p. 101; July 1947, p. 933; and February 1944, p. 209.

^p Preliminary.

¹ Adjusted series reflecting allowances for rents of new housing units and, beginning January 1950, interim revision of series and weights.

² A new index, which replaces the former cost-of-living index. It covers 225 items in the postwar expenditure patterns of 1,517 families living in 27 cities with a population of over 30,000. Its base year is 1949, and a system of variable weights has been applied. A detailed description of the methods of construction of the index is contained in a special report entitled "The Consumer Price Index" published by the Dominion Bureau of Statistics in October 1952.

Sources.—See BULLETIN for August 1952, p. 961; January 1952, p. 109; August 1951, p. 1047; October 1950, p. 1421; January 1950, p. 125; July 1947, p. 935; May 1942, p. 451; October 1939, p. 943; and April 1937, p. 373.
