NOVEMBER 1953

BOARD OF GOVERNORS
OF THE FEDERAL RESERVE SYSTEM
WASHINGTON

FEDERAL RESERVE BULLETIN

VOLUME 39

November 1953

NUMBER 11

EXPENDITURES IN 1953

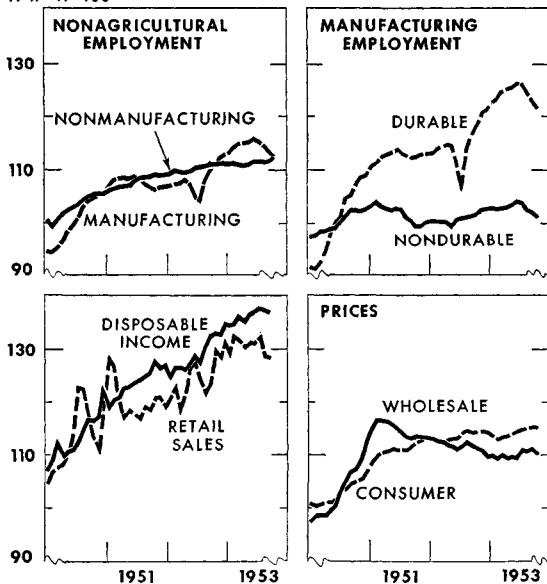

Gross national product this year will total about 368 billion dollars, 5 per cent larger than in 1952 and a record in both dollar amount and physical volume. The increase reflects an upsurge in activity which began in the fall of 1952 and reached a high in the late spring of this year. Expansion was based primarily on growth in private spending and was dominated by rising consumer expenditures. Business outlays for fixed investment also increased further to record levels, and outlays for inventory accumulation expanded considerably. Federal expenditures for national security rose only moderately, in contrast to sharp advances in the preceding two years when such outlays accounted directly for about half of the increase in national product.

Since midyear the pace of economic activity has slackened somewhat. With supplies of materials and finished goods generally ample and with manufacturers' and distributors' sales in many lines below earlier levels, new orders have been reduced and production of both durable and nondurable goods has been curtailed moderately. Factory employment has also declined, as may be seen from the chart. Reflecting these developments, the rate of buildup of business inventories has been considerably retarded. The small decline in national product in the third quarter reflected mainly this change in the rate of inventory accumulation. The rate of resource utilization has remained very

high, however, and unemployment has continued exceptionally low.

Average wholesale prices have been remarkably stable for a period which included a strong upsurge in demand and output, elimination of price and wage controls, truce in Korea, and more recently some general easing in demand together with intensified competitive pressures among producers and distributors. Industrial prices edged up until August but have since declined slightly.

SELECTED BUSINESS INDEXES 1947-49=100

NOTE.—Seasonally adjusted series, except for prices. Indexes based on Bureau of Labor Statistics data for employment and prices, with employment seasonally adjusted by Federal Reserve, and on Department of Commerce data for income and sales. Latest figures shown are for October 1953 for employment and prices, and for September 1953 for retail sales and disposable income. Consumer prices for October 1953 estimated by Federal Reserve.

EXPENDITURES IN 1953

Prices of farm products have declined somewhat further this year, following sharp reductions in the latter part of 1952, and are back to the pre-Korean level. Consumer prices have increased steadily since late winter, but in October they were only about 1 per cent higher than a year ago.

GOVERNMENT EXPENDITURES

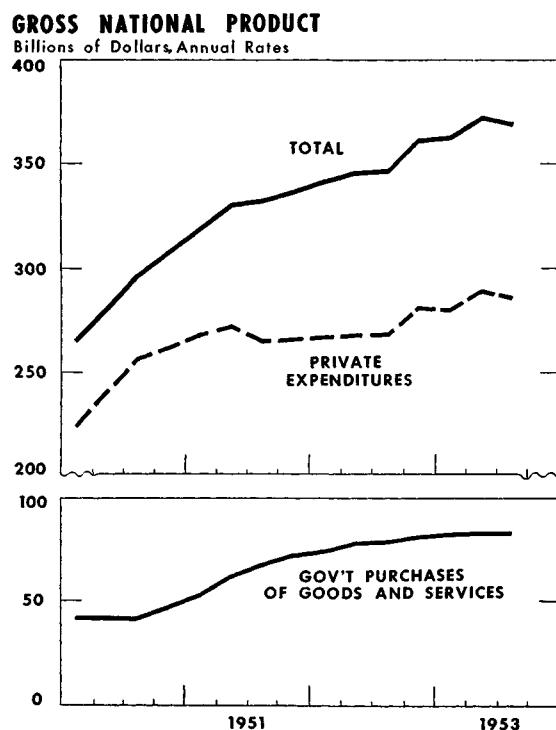

Government purchases of goods and services continued to rise slowly in the first half of this year but were unchanged in the third quarter, as may be seen from the chart. Federal expenditures for national security pro-

employment of civilians in the defense establishment has been reduced moderately. National security expenditures declined a little in the third quarter and will decline somewhat further by mid-1954 if the estimates in the Budget Review of August are realized.

Federal expenditures for goods and services for nondefense programs will be moderately larger this year than in 1952, with increases in outlays under the farm price support program more than offsetting reductions in other activities. State and local government purchases will be in record amount, about 7 per cent larger than in 1952.

BUSINESS FIXED INVESTMENT

Business outlays for fixed investment—construction of facilities and producers' durable equipment—rose moderately in the first half of 1953, and remained at the advanced level in the third quarter. For the full year, fixed investment outlays may be about 5 per cent above the record 1952 level. Farm investment, however, has been running well below

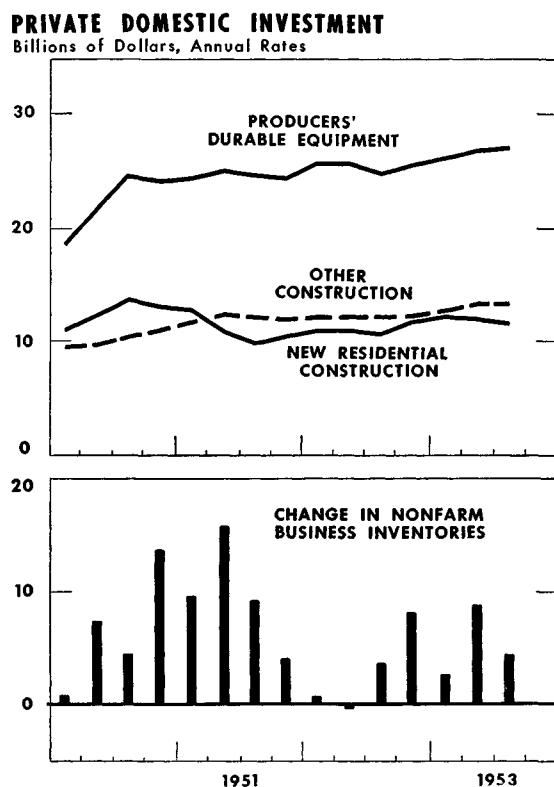

NOTE.—Department of Commerce quarterly estimates, adjusted for seasonal variation.

grams are estimated to be only moderately larger in dollar amount this year than in 1952, accounting for about one-seventh of total output in both years. The size of the armed forces has changed little this year, but

NOTE.—Department of Commerce estimates.

NOTE.—Department of Commerce quarterly estimates, adjusted for seasonal variation. Changes in farm inventories are not shown.

a year ago; outlays for both construction and equipment have declined substantially as a result of the lower level of farm incomes.

Among the major nonfarm industry groups, plant and equipment outlays of electric and gas utilities are expected to show a rise of 15 per cent and manufacturing industries a rise of 6 per cent for the year 1953. The commercial and miscellaneous group as a whole will apparently show only a small expansion, although construction of commercial facilities has increased considerably since late 1952. Outlays in transportation industries other than railroads and in mining are expected to be about unchanged, while railroads have programmed a 7 per cent reduction.

Manufacturing industries have shown diverse tendencies, with a rise of 8 per cent

expected for nondurable goods industries and 3 per cent for durable goods lines. Industries with large relative increases are beverages, chemicals and allied products, electrical and other machinery, paper and allied products, and petroleum and coal products. On the other hand, relatively large declines are reported by makers of textile mill products and transportation equipment other than motor vehicles.

The record volume of business outlays for expansion and modernization this year reflects a variety of influences, of which a major one has been further activity in connection with the defense program. Incentives provided by the program of accelerated amortization for tax purposes have continued to stimulate investment in defense and related industries. A large part of the work planned or started under this program has not yet been completed.

Other influences of importance in maintaining capital outlays this year have been the generally expanded volume of sales, further rapid growth in population, continued high rates of internal migration, and sustained industrial research. Currently, however, demands generally are placing less pressure on capacity than earlier, with the easier supply conditions reflecting in part the substantial increases in capacity that have taken place in recent years.

INCREASE IN BUSINESS INVENTORIES

Accumulation of nonfarm business inventories was resumed on a substantial scale in the fall of 1952 and has continued this year, as shown in the chart. For the full year the increase in the physical volume of nonfarm business inventories, measured at current prices, is likely to approximate 5 billion dollars, as compared with 3 billion in 1952.

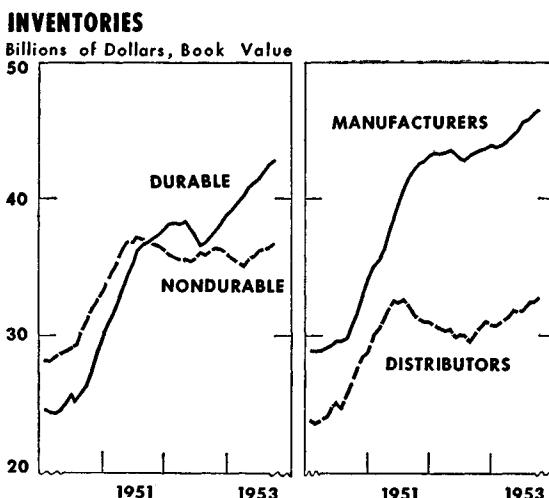

Privately held inventories of farm prod-

EXPENDITURES IN 1953

ucts will probably show little change in 1953 following accumulation valued at 600 million dollars in 1952. Cattle herds have been unchanged this year following a very rapid buildup from late 1950 until late 1952, when marketings began to expand sharply. The substantial additions this year to stocks of grains and cotton have been going mainly under price support loan or into Commodity Credit Corporation holdings, which are not included in the figures cited for privately held farm inventories.

Total nonfarm business stocks rose only moderately in the first quarter of this year, as reductions in some nondurable goods lines partly offset a continued rapid growth in durable goods lines. From early spring to about midyear, accumulation was substantial in both durable and nondurable goods lines and at both manufacturing and distributor levels, as may be seen from the chart. The desire to expand inventory holdings further, in line with growth in sales, continued to be an important consideration, but in some areas stocks became larger than desired.

Since midyear new orders have been curtailed and production has been cut back in

a number of lines to stabilize or reduce stocks. Expansion in the physical volume of inventories was considerably less in the third quarter than in the second. The increase in book value of stocks was somewhat smaller, and reflected price advances to a greater extent, than in the second quarter.

The book value of nonfarm business inventories at the end of September amounted to 79 billion dollars, 8 per cent larger than a year earlier. The increase was divided about equally between manufacturers and distributors and was concentrated in durable goods lines, in which total stocks expanded 15 per cent. In manufacturing, additions to stocks of 7 per cent were concentrated in metals and metal products industries. Wholesalers' inventories rose 7 per cent, with the largest increases in electrical goods, machinery and metals, and apparel. Retail stocks rose 10 per cent, with inventories of automotive outlets accounting for more than half of the rise. Expansion also was considerable at general merchandise and building materials outlets.

Ratios of stocks to sales were reduced in late 1952 and early 1953 by a substantial rise in sales. With continued growth in stocks, and some reductions in business sales during the summer, however, ratios of stocks to sales have risen generally since early spring.

RESIDENTIAL CONSTRUCTION

Expenditures for private nonfarm residential building, seasonally adjusted, have declined by more than one-tenth since early this year and are currently at about the year-ago level. The number of private housing units started from July to October was 8 per cent fewer than a year earlier. For the year as a whole, however, the number of housing units started, including those publicly financed, will be about 1.1 million, approxi-

EXPENDITURES IN 1953

mately the same as in each of the two preceding years.

In recent months markets for residential real estate have eased somewhat. Sales of both new and old houses have continued in large volume but transactions apparently have taken longer to close, with concessions frequently being given on prices and terms. Residential construction costs have been stable following slight increases earlier in the year. Construction of new dwelling units has continued to exceed net formation of new households, and vacancies, while still low, have been rising.

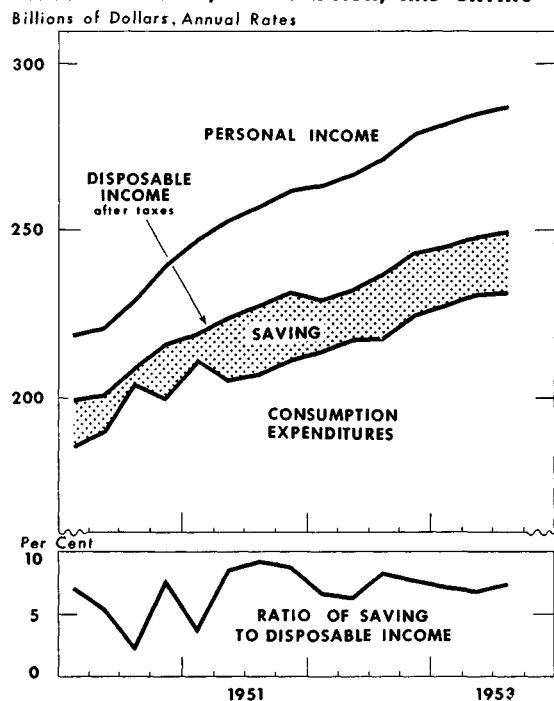

Reflecting the continued high level of market activity and the steady increase in the average size of loan, mortgage loans on new and existing properties have been extended in record volume this year and the volume of outstanding mortgage debt has increased substantially further. Funds for Federally underwritten mortgages, and particularly commitments for financing future construction, have been difficult to obtain in many areas. Recently, however, credit markets generally have eased, and mortgage funds and commitments have become more readily available.

PERSONAL INCOME

Personal income will total about 285 billion dollars this year, nearly 6 per cent above last year's record level. Such income, seasonally adjusted, was moderately larger in the third than in the second quarter, as may be seen from the chart. It reached a monthly peak in July, and then declined slightly in August and September.

Wages and salaries accounted for the moderate growth in total income in the first half of this year and the small declines in recent months. Increases in manufacturing payrolls slowed up after a sharp rise in the last

PERSONAL INCOME, CONSUMPTION, AND SAVING

NOTE.—Department of Commerce quarterly estimates, adjusted for seasonal variation.

half of 1952, and since July some declines have occurred. After rising gradually through June, seasonally adjusted manufacturing employment has declined. In mid-October, such employment was 3 per cent below its summer peak and only slightly higher than a year earlier. Average weekly hours of work have been reduced this year and at 40.3 in October were about one hour below last October. Hourly earnings have continued to advance, although much less rapidly than during the second half of last year. In nonmanufacturing activities, wages and salaries continued to rise until July but since then have shown little change.

Income of farm proprietors, reflecting further reductions in prices of farm commodities, has declined markedly and currently is about at the postwar low reached in late 1949. Business and professional income has

EXPENDITURES IN 1953

shown little change this year, while rental income, dividends, and interest have continued to increase steadily.

Disposable personal income (after taxes) in the third quarter was nearly 6 per cent larger than a year ago. After allowance for slightly higher consumer prices and further growth in population, real disposable income per capita was 2 per cent above the level of a year ago. Since the end of 1952 the change has been slight.

CONSUMER EXPENDITURES

For the year 1953, total consumer expenditures for goods and services will be at a new high, in both dollar amount and physical volume. Following a sharp expansion in late 1952, such expenditures rose moderately further in the first half of this year. In the third quarter they increased only slightly as declines in expenditures for apparel and automobiles and parts about offset a substantial rise in outlays for services. In real terms, total consumption outlays in the third quarter were well above a year earlier, about 3 per cent on a per capita basis, but the change since early spring has been small.

In dollar volume, personal saving in 1953 may slightly exceed the postwar record level of the previous two years, and the proportion of disposable income saved will be close to the relatively high ratios of 1951 and 1952. Saving by individuals in liquid forms will apparently be larger than last year.

Durable goods. Consumer expenditures for durable goods for the year 1953 will reach a dollar volume somewhat above the previous record of 1950; in physical terms, total takings will be exceeded only by those of 1950. Consumer durable goods outlays began to rise appreciably in the spring of 1952, following a year of restrained demands and, in some areas, limited supplies. After

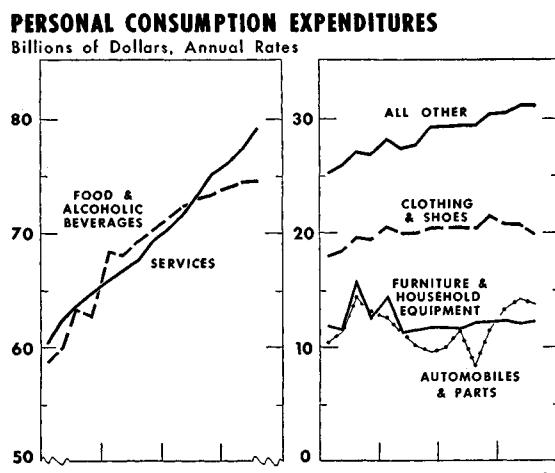

a brief interruption because of the steel strike in the summer, the rise continued through the first half of 1953. Outlays declined slightly in the third quarter, but were about one-fifth larger than in early 1952.

Purchases of new automobiles have accounted for the bulk of the rise since the spring of 1952 in consumer spending for durables. Registrations of new passenger cars increased from an annual rate of 4.3 million in the first half of 1952 to 5.8 million in the first half of 1953, reflecting both a resurgence of demand and an expansion in the supply of new cars permitted by greater availability of metals. Since June, sales of new automobiles, though exceptionally large, have been moderately lower than in the spring, as is indicated by the chart.

Increased availability of credit following suspension of instalment credit regulations in May 1952 contributed importantly to large-scale purchases of autos. Total outstanding consumer instalment credit expanded by 6.6 billion dollars from the end of April 1952 to the end of September 1953, with most of the increase accounted for by automobile credit. In recent months, however, the rate of growth in outstanding credit has diminished considerably.

Passenger car output in 1953 is estimated at about 6.1 million units, a total second only to the 6.7 million units of 1950. The number of passenger cars in use may rise by 2 million or more to a total of 44 million at the end of 1953. This will be two-thirds more than the 26 million in use at the end of World War II.

Sales of furniture and household equipment, which had increased after the spring of 1952, declined moderately this spring. Such purchases recovered briefly in early summer, however, and total outlays in the third quarter were somewhat above the level

NOTE.—Department of Commerce quarterly estimates, adjusted for seasonal variation.

of the second quarter. Television sales showed about the usual seasonal rise after late summer. In October, however, with output at advanced rates, television inventories expanded to unusually high levels and some production cutbacks occurred. Output of furniture and appliances was curtailed markedly during the summer and early autumn, reflecting the need to work off inventories. In early autumn, output of major appliances was about one-fourth and of furniture one-tenth below the highs in the first quarter.

Nondurable goods and services. Consumer expenditures for nondurable goods rose markedly in late 1952 and slightly further in the first half of this year. In the third quarter, however, outlays for such goods, seasonally adjusted, declined somewhat. Expenditures for clothing and shoes, which rose sharply in late 1952 to a new high, have declined appreciably this year and in the third quarter were at the lowest level since the summer of 1951.

Dollar outlays for food and beverages in 1953 rose at a much lower rate than in earlier postwar years, as may be seen from the chart, and in the third quarter were only 2 per cent larger than a year earlier. With con-

sumer prices of food in the third quarter somewhat lower than a year earlier, the rise in spending indicates a moderate growth over the past year in the amount of food consumed. A sharp reduction in retail beef prices in the past year has been accompanied by a marked increase in consumer takings. Total meat consumption in 1953 is estimated by the Department of Agriculture at a post-war record 151 pounds per person, 5 per cent more than in 1952.

Consumer spending for services has maintained its uninterrupted postwar growth and in the third quarter was 8 per cent greater than a year earlier, with probably half of the rise representing higher prices. Expenditures for housing services rose 9 per cent, in considerable part reflecting rent advances, which accelerated after the termination of rent controls at the end of July. Outlays for other types of services, including household operation, medical care, and transportation, have also continued to advance.

Economic activity and employment have advanced to new peaks in 1953, under the impetus mainly of expanding private demands. The year as a whole will be one of substantial achievement in terms of utilization of manpower and industrial resources, additions to productive capacity, higher consumer living standards, and over-all stability of prices. Since midyear, however, demands have eased and some declines have occurred in output and employment. If Federal expenditures for national security programs are moderately reduced as scheduled, the maintenance next year of current high levels of resource utilization and further growth in aggregate output will depend primarily on renewed expansion in consumer and business demands.

REVISED INDEXES OF DEPARTMENT STORE SALES AND STOCKS, BY MAJOR DEPARTMENTS

The Board's monthly indexes of department store sales and stocks, by departments, have been revised for 1940 to date, the entire period covered by the series.¹ The principal features of the revision are as follows:

- (1) The average of the years 1947-49 has been used as the base period for the indexes.
- (2) The sample of reporting stores in several of the Federal Reserve districts has been enlarged with a view to obtaining more nearly proportionate representation among the 12 districts, as indicated by Census of Business data on department store sales for the year 1948.
- (3) An expanded and standardized reporting schedule has been introduced by the System, beginning with the collection of data for January 1948. Where necessary and possible, figures for earlier years have been recompiled on a basis comparable to the departmental classifications provided by the standardized reporting schedule.

These features are discussed in the sections below. The revised series will appear regularly in the statistical section of the Federal Reserve BULLETIN and in the monthly press releases.

This completes the revisions of the vari-

ous department store series begun in 1951. Descriptions of the other major revisions may be found in the following issues of the Federal Reserve BULLETIN: (1) comprehensive monthly indexes of total sales and stocks, December 1951; (2) weekly index of sales, April 1952; and (3) monthly dollar series on sales, stocks, and orders, October 1952. Monthly department store credit statistics were also revised in conjunction with the general revision of the Board's consumer credit statistics, a description of which was published in the BULLETIN for April 1953.

New base period. The base period for the departmental sales and stocks indexes has been changed from 1941 to 1947-49, and all of the index numbers from 1940 on have been recalculated on this base. This was done in accordance with a general recommendation made in August 1951 to all Federal statistical agencies by the Division of Statistical Standards of the Bureau of the Budget.

The adoption of the new base period means that the indexes will reflect more clearly recent developments in department store trade. It also will facilitate comparisons of these indexes with other economic series, most of which have been, or are being, related to the new base. As indicated above, other department store indexes compiled by the System already have been placed on this base.

Users of the departmental indexes can readily convert them to another base period, if desired, by dividing the published indexes on the 1947-49 base by the average index for the year or years which they prefer as the base period.

¹This revision was made by Orville K. Thompson under the general supervision of Guy E. Noyes, Assistant Director of the Board's Division of Research and Statistics. Howard G. Smith, formerly of the Board's staff and now associated with the Research Department at the Federal Reserve Bank of Boston, contributed substantially to the work of the revision in its earlier stages.

Reporting sample. In several districts the reporting sample has been enlarged with the result that currently about 365 stores supply information on departmental sales and stocks. These are all so-called "independent" department stores; in other words, the reporting group does not include retail outlets of the large national department store chains. The universe measured by the departmental series differs, therefore, from that of the comprehensive monthly sales and stocks indexes and of the weekly sales index, the reporting samples for which include representative establishments of the national chains. In recent months the group reporting departmental data has accounted for about 50 per cent of the estimated sales and stocks of all department stores, including the national chains. The sample represents slightly more than 65 per cent of the dollar volume of the related universe, that is, the independent department stores.

It is believed that the sample is adequate from the standpoint of geographical distribution since sales of each district reporting group approximate the relative importance of that district in the national total, as indicated by Census of Business data on department store sales in 1948, and since reports are obtained from virtually every department store trading area of importance in the country. For the most part, larger department stores are included in the sample, as they are able to report departmental figures in greater detail than is usually possible for smaller firms. Every store does not report data for all of the departments listed on the reporting schedule; consequently, the sample for the individual departments is not so comprehensive as that for the major department groupings and for the total store.

Comparability of back data. A standardized schedule for reporting departmental

statistics was introduced by all Federal Reserve Banks beginning with the collection of data for January 1948. A *Manual of Departmental Classifications*, prepared for use with this new reporting form, contains detailed listings of the merchandise lines normally carried in each major department group or subdivision thereof. Both the reporting form and the *Manual* were developed by System research committees, following discussions with the department store respondents and other interested groups in the trade.

The standardized form provided additional departmental breakdowns and also provided for realignment of the departmental categories falling within several of the major groups. One important shift involved the department "Domestics, blankets, and linens," which was transferred from the "Homefurnishings" major group to the "Piece goods" major group and redesignated "Household textiles." Also, the "Barber and beauty shop" and "Restaurant, fountain, and bakery" departments, formerly in the "Miscellaneous merchandise departments" major grouping, were relocated in "Nonmerchandise," a newly established division representing the service functions performed by department stores.

In order to maintain continuity of the back series, it was necessary to reconstruct all data affected by this departmental realignment and place them on a basis comparable to the departmental listings shown on the standardized form. Also, back data were needed for a number of departmental classifications that were reported for the first time on the standardized schedule. Whenever possible, comparable figures for the earlier years are shown for the standardized classifications. For a number of classifications, however, figures are not available prior

REVISED INDEXES OF DEPARTMENT STORE SALES AND STOCKS

to January 1947. (The reporting of year-ago figures on the standardized schedule provided a continuous series on the new basis beginning January 1947.)

Departmental indexes. The indexes of sales, by departments, were computed in the following manner. Monthly sales totals, by departments, were assembled for an identical sample of 350 stores for the years 1947 and 1948, this sample replacing the one for 1943 and 1944 previously used.² The figures for this new sample were carried back to 1940 on the basis of the year-to-year percentage changes shown for each month by the old series after it had been reconstructed along the departmental lines of the new reporting schedule. The figures were carried forward to current months on the basis of the year-to-year percentage changes shown for each month by a group of stores which varied somewhat in number from month to month. Using actual figures for the identical sample for 1947 and 1948 and estimates for 1949, the 1947-49 average of monthly sales was calculated for each department and was used as the base in computing the sales index for that department.

The sample of stores reporting stocks over the years has also varied from month to month. Before the stocks indexes could be constructed, therefore, it was necessary to compile estimates of the dollar value of end-of-month stocks for each department in the 350-store identical sample. These estimates were obtained by applying to the departmental sales totals for the identical sample the corresponding stocks-sales ratios.³ The stocks index for each department was then

² See earlier description of departmental indexes contained in BULLETIN for August 1946.

³ These end-of-month ratios are obtained by dividing stocks at the end of the month by sales during the month. They have been regularly compiled since 1940 from reported figures on sales and stocks.

computed using average end-of-month stocks in the 1947-49 period as the base.⁴

For purposes of carrying the departmental indexes forward, estimates of sales and stocks for the identical sample for any one month will be obtained by applying the year-to-year percentage changes shown by the particular reporting group comprising the sample for that month. As noted above in the discussion of the reporting sample, about 365 stores are currently reporting in this series.

Monthly distribution of sales. These figures show the distribution of total sales in a calendar year among the departments and also the distribution of each department's sales among the months of the year. They are compiled regularly by the Board's Division of Research and Statistics each April for the previous calendar year. Since the report for 1948, the annual distribution data have been based on sales figures for the new 350-store identical sample. As a part of the current revision the reports for 1947 and earlier years have been recomputed, also using these new sample data.

The percentage distribution of total sales by departments indicates the relative importance of each department in total department store sales. In 1952, 84.2 per cent of total sales was accounted for by "Main Store" departments and 13.1 per cent by "Basement Store" groups, while sales in the "Nonmerchandise" division amounted to 2.7 per cent of total sales.

Sales of women's and misses' apparel and accessories have always represented the largest single departmental share of total sales. In 1952 these items (in the Main Store) accounted for 35.4 per cent of total store sales. This ratio has not varied greatly since 1941 except during World War II,

⁴ This differs from the old departmental stocks indexes which had as their base average monthly sales in 1941.

REVISED INDEXES OF DEPARTMENT STORE SALES AND STOCKS

when durable goods sales were at reduced levels and the ratio increased to almost 40 per cent.

Figures for each department showing the percentage of total sales made in each month of the year give some indication of seasonal movement of sales in the respective departments. As would be expected, the month with the largest business in the greater share of the departments is December, reflecting Christmas shopping. This is apparent in sales of handkerchiefs, men's and boys' furnishings, fine jewelry and watches, stationery, sporting goods and cameras, and negligees, robes, and lounging apparel. In each of these departments more than 25 per cent of total annual sales usually occurs in December. It is particularly apparent in the toys and games department, where more than 40 per cent of the year's sales is customarily made in that month.

Purpose of the departmental series. The departmental sales and stocks indexes, together with sales-distribution figures and

stocks-sales ratios, provide additional information on the fluctuations in department store sales and stocks of various types of merchandise. The data are not intended to measure the movements of total department store sales and stocks. For this purpose the System's comprehensive monthly indexes of total sales and stocks should be used. The latter indexes are adjusted for seasonal variation, for changes shown by Census of Business benchmark, and, in the case of the sales index, for differences in the number of trading days. Similar refinements have not been attempted for the departmental index series except in the case of the "Furniture and bedding," "Domestic floor coverings," "Major household appliances," and "Radios, phonographs, and television" departments. Indexes for each of these departments, adjusted for seasonal variation and trading day differences, appear regularly in the monthly publication *Federal Reserve Charts on Bank Credit, Money Rates, and Business*.

NOTE.—A brochure containing data for the revised departmental series for the period 1940-1952, inclusive, may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington 25, D. C. Sales indexes are shown monthly for the entire period, while stocks indexes and stocks-sales ratios are available for October 1940, January and April 1941, and each month beginning June 1941. Figures showing the distribution of total sales in a calendar year among the various departments and among the various months of the year begin with 1941.

The revised departmental indexes for the period January-June 1953 are shown above. Stocks-sales ratios for these six months and July may be found in the regular statistical section of the BULLETIN (April-October 1953 issues). Indexes for July and August and ratios for August are given on pp. 1208-1209 of this BULLETIN. Sales distribution data are compiled regularly in the spring for the preceding year; data for 1953 will be available in May 1954.

LAW DEPARTMENT

Administrative interpretations of banking laws, new regulations issued by the Board of Governors, and other similar material

Common Trust Funds

Limitation Upon Aggregate Investments by Single Trust

The Board has been requested to interpret the following sentence of section 17(c)(5) of its Regulation F:

"No funds of any trust shall be invested in a participation in a Common Trust Fund if such investment would result in such trust having invested in the aggregate in the Common Trust Fund an amount in excess of 10 per cent of the value of the assets of the Common Trust Fund at the time of investment, as determined by the trust investment committee, or the sum of \$100,000 whichever is less."

The specific question was whether (1) the actual amount previously invested in participations in the common trust fund or (2) the present market value of such participations, should determine the amount of additional investments, if any, which may be

made in such participations.

It is the Board's view that under this language of the regulation the additional amount which a trust may invest in a common trust fund is determined by the dollar amount which the trust actually invested in the participations which it now holds, rather than by the present market value of such participations. For example, if a total of \$75,000 was paid for units purchased for the trust on previous occasions, the amount which could now be invested would be \$25,000 (assuming that \$100,000 does not exceed 10 per cent of the present value of the assets of the common trust fund), regardless of the present market value of the units already held by the trust.

This interpretation supersedes the one published in the 1938 Federal Reserve BULLETIN at page 762 which was to the opposite effect, but was based on a provision of the regulation which was revised in 1945.

CURRENT EVENTS AND ANNOUNCEMENTS

Federal Reserve Meetings

The Federal Advisory Council held a meeting in Washington on November 15-17, 1953, and met with the Board of Governors of the Federal Reserve System on November 17.

Deaths of Directors

Dr. J. Hillis Miller, President, University of Florida, Gainesville, Florida, who had been serving as a director of the Jacksonville Branch of the Federal Reserve Bank of Atlanta since August 16, 1948, died on November 14, 1953.

Mr. L. C. Hutson, Director, Chickasha Cotton Oil Company, Chickasha, Oklahoma, who had been serving as a Class B director of the Federal Reserve Bank of Kansas City since June 27, 1944, died on November 16, 1953.

Revised Indexes of Department Store Sales and Stocks by Major Departments

The Board's monthly indexes of department store sales and stocks, by departments, have been revised for 1940 to date, the entire period covered by the series. A description of the revision, together

with indexes for recent months, appears on pages 1146-1151 of this BULLETIN. Back data for the period 1940-52 are included in a brochure that may be obtained upon request to the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington 25, D. C. In addition to the departmental indexes the available data include departmental stocks-sales ratios and also the distribution of total sales in a calendar year by the departments as well as the distribution of each department's sales by the months of the year.

NATIONAL SUMMARY OF BUSINESS CONDITIONS

[Compiled October 28 and released for publication October 30]

Industrial activity and retail sales in September and October were somewhat below earlier advanced levels. Wholesale commodity prices generally continued to show little change. Total loans and investments at banks contracted from mid-September to mid-October and yields on securities declined sharply.

INDUSTRIAL PRODUCTION

The Board's preliminary index of industrial production in September was 232 per cent of the 1935-39 average, down 1 per cent from August. The reduction in output of about 3 per cent from the unusually high level maintained during the first half of the year reflected partly efforts to limit inventories. The total index is expected to change little in October, with increases in output of steel and autos largely offsetting further reductions in petroleum and some other products.

Output of durable goods declined moderately in September, reflecting further decreases in autos, farm machinery, some items of industrial equipment, and reduced output of steel. Steel mill operations, however, turned up at the end of the month, and in October have been scheduled at an average rate of about 95 per cent of capacity. Auto output also expanded somewhat in October, while truck production was sharply curtailed late in the month owing partly to model changeovers. Over-all pro-

duction of major household goods decreased slightly in September with furniture and appliances declining somewhat further and television sets strengthening seasonally.

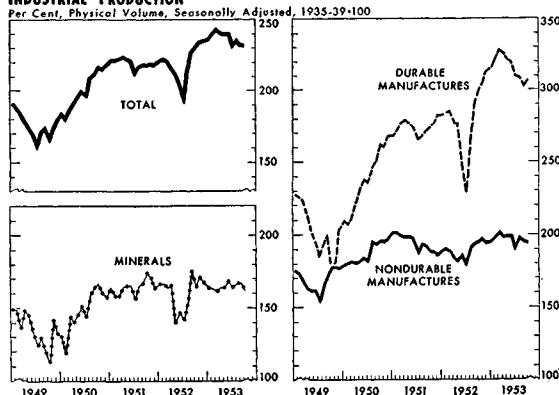

Nondurable goods production declined slightly in September as activity was reduced in the rayon and wool industries and operations were curtailed somewhat at petroleum refineries. Output of paperboard continued at capacity levels through mid-October. Activity in the cotton textile industry and in most other nondurable goods industries in September held steady at August levels.

Minerals production also was maintained in September. Fuel output changed little with a small cutback in crude petroleum offset by an increase in coal mining. In early October crude output was curtailed further to a level about 4 per cent below that of late August and early September and production of coal was also reduced somewhat.

CONSTRUCTION

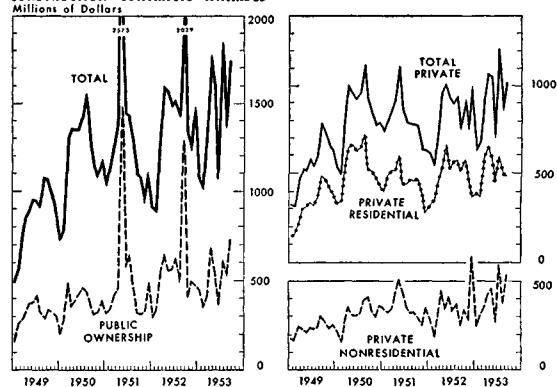

Value of construction awards increased substantially in September to about the July level, reflecting chiefly large awards in connection with a new atomic energy project. Outlays for new construction put in place continued high, with advances in private business construction and public construction offsetting a further slight decrease in residential building. The number of housing units started

INDUSTRIAL PRODUCTION

Federal Reserve indexes. Monthly figures, latest shown are for October.

CONSTRUCTION CONTRACTS AWARDED

F. W. Dodge Corporation data for 37 Eastern States. Monthly figures, latest shown are for September.

NATIONAL SUMMARY OF BUSINESS CONDITIONS

declined further in September to 92,000, as compared with 94,000 in August and 101,000 in September 1952.

EMPLOYMENT

Employment in nonagricultural establishments was maintained at near record levels in September, a time when a seasonal expansion usually occurs. In reports for mid-September, which included the Labor Day holiday for many establishments, the factory work-week was down almost one hour, to 39½. Unemployment in September continued at a low level.

DISTRIBUTION

Seasonally adjusted sales at department stores decreased further in September, partly reflecting unusually warm weather, but showed some rise in the first half of October. Sales of new and used cars remained very active for this season of the year. Preliminary indications are that the seasonally adjusted index of department store stocks declined slightly in September.

COMMODITY PRICES

The average level of wholesale commodity prices declined slightly from mid-September through Oc-

tober, reflecting partly seasonal reductions in prices of livestock and meat. Corn fell about 15 per cent during this period of crop harvest, but wheat advanced to the highest levels since early May. Average prices of industrial commodities changed little. Steel scrap declined further in early October but subsequently advanced, and nonferrous metals generally strengthened. Hides, rubber, and lumber declined. Tire prices were raised, while gasoline prices were reduced in some areas.

The consumer price index rose slightly further in September, reflecting increases in most groups of goods and services other than foods.

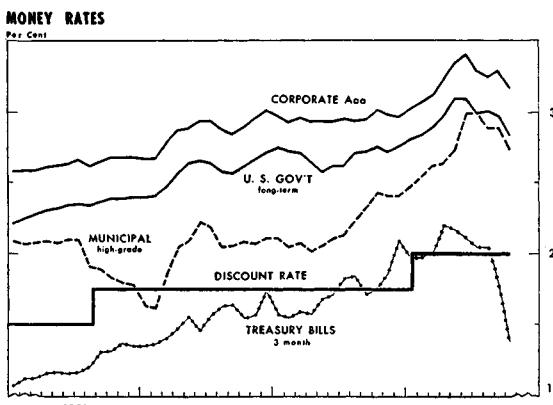

BANK CREDIT AND RESERVES

Total loans and investments at banks in leading cities declined from mid-September to mid-October, reflecting both a continued reduction in holdings of United States Government securities and a decline in loans. All major categories of loans and investments except real estate loans declined. There was a contraction in business loans of 95 million dollars compared with an increase of over 500 million in the corresponding four-week period last year. Interest rates on business loans made in the first fifteen days of September by banks in nineteen centers averaged 3¾ per cent, about the same as in early June.

Bank reserve positions continued easy during the first three weeks of October. Reserve funds were supplied through Federal Reserve purchases of Treasury bills in the first week of October, as well as an increase in float, and a decline in Treasury deposits at Federal Reserve Banks. Excess reserves of member banks averaged 800 million dollars, while borrowing from the Federal Reserve averaged under 400 million.

SECURITY MARKETS

Yields on Treasury and other high-grade bonds declined sharply in October. Short-term yields also declined, and the yield on new three-month Treasury bills was 1.22 per cent in late October as compared with 1.63 per cent at the end of September.

Figures except for Federal Reserve discount rate are monthly average market yields. Corporate Aaa bonds, Moody's Investors Service; U. S. Government long-term (excludes 3½ per cent bonds issued May 1, 1953), U. S. Treasury Department and Federal Reserve; municipal high-grade bonds, Standard and Poor's Corporation; treasury bills, Federal Reserve. Latest figures shown are for October.

Tables on the following pages include the principal statistics of current significance relating to financial and business developments in the United States. The data relating to Federal Reserve Banks, member banks of the Federal Reserve System, and department store trade, and the consumer credit estimates are derived from regular reports made to the Board; index numbers of production are compiled by the Board on the basis of material collected by other agencies; figures for gold stock, money in circulation, Treasury finance, and operations of Government credit agencies are obtained from statements of the Treasury; the remaining financial data and other series on business activity are obtained largely from other sources. Back figures through 1941 for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*; back figures for many other tables may be obtained from earlier BULLETINS.

¹Includes industrial loans and acceptances purchased, which are shown separately in subsequent tables.

²These figures are estimated.

Back figures.—See *Banking and Monetary Statistics*, Tables 101–103, pp. 369–394; for description, see pp. 360–366 in the same publication.

MAXIMUM RATES ON TIME DEPOSITS

[Per cent per annum]

	Nov. 1, 1933— Jan. 31, 1935	Feb. 1, 1935— Dec. 31, 1935	Effective Jan. 1, 1936
Savings deposits.....	3	2½	2½
Postal Savings deposits.....	3	2½	2½
Other deposits payable:			
In 6 months or more.....	3	2½	2½
In 90 days to 6 months.....	3	2½	2
In less than 90 days.....	3	2½	1

Note.—Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q. Under this Regulation the rate payable by a member bank may not in any event exceed the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Maximum rates that may be paid by insured nonmember banks as established by the F.D.I.C., effective Feb. 1, 1936, are the same as those in effect for member banks.

MARGIN REQUIREMENTS¹

[Per cent of market value]

Prescribed in accordance with Securities Exchange Act of 1934	Mar. 30, 1949— Jan. 16, 1951	Jan. 17, 1951— Feb. 19, 1953	Effective Feb. 20, 1953
Regulation T:			
For extensions of credit by brokers and dealers on listed securities.....	50	75	50
For short sales.....	50	75	50
Regulation U:			
For loans by banks on stocks.....	50	75	50

¹Regulations T and U limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of the extension; the "margin requirements" shown in this table are the difference between the market value (100%) and the maximum loan value.

Back figures.—See *Banking and Monetary Statistics*, Table 145, p. 504, and *BULLETIN* for March 1946, p. 295, February 1947, p. 162, and February 1953, p. 130.

FEDERAL RESERVE BANK DISCOUNT RATES

[Per cent per annum]

Federal Reserve Bank	Discounts for and advances to member banks						Advances to individuals, partnerships, or corporations other than member banks secured by direct obligations of the U. S. (last par. Sec. 13)

¹Rates shown also apply to advances secured by obligations of Federal intermediate credit banks maturing within 6 months.

NOTE.—*Maximum maturities.* Discounts for and advances to member banks: 90 days for discounts and advances under Sections 13 and 13a of the Federal Reserve Act except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not exceeding 6 months and 9 months, respectively, and advances secured by obligations of Federal intermediate credit banks maturing within 6 months are limited to maximum maturities of 15 days; 4 months for advances under Section 10(b). Advances to individuals, partnerships, or corporations under the last paragraph of Section 13: 90 days. *Back figures.*—See *Banking and Monetary Statistics*, Tables 115-116, pp. 439-443.

FEDERAL RESERVE BANK BUYING RATES ON ACCEPTANCES

[Per cent per annum]

Maturity	Rate on Oct. 31	In effect beginning—	Previous rate
1-90 days.....	2 1/2	Jan. 16, 1953	1 3/4
91-120 days.....	2 1/2	Jan. 16, 1953	2
121-180 days.....	2 1/2	Jan. 16, 1953	2 1/4

NOTE.—Effective minimum buying rates on prime bankers' acceptances payable in dollars. *Back figures.*—See *Banking and Monetary Statistics*, Table 117, pp. 443-445.

FEDERAL RESERVE BANK RATES ON INDUSTRIAL LOANS AND COMMITMENTS UNDER SECTION 13B OF THE FEDERAL RESERVE ACT

Maturities not exceeding five years

[In effect October 31. Per cent per annum]

Federal Reserve Bank	To industrial or commercial businesses		To financing institutions			
	On loans ¹	On commitments	On discounts or purchases		On commitments	
			Portion for which institution is obligated	Remaining portion		
Boston.....	3-5 1/2	1 1/2-1 3/4	(2)	(2)	1 1/2-1 3/4	
New York.....	3-5 1/2	1 1/2-1 3/4	(2)	(2)	1 1/2-1 3/4

July 9.....	22	19	13	25
In effect Nov. 1, 1953 ⁴	22	19	13	6

¹Demand deposits subject to reserve requirements, which beginning Aug. 23, 1935, have been total demand deposits minus cash items in process of collection and demand balances due from domestic banks (also minus war loan and series E bond accounts during the period Apr. 13, 1943-June 30, 1947).

²Requirement became effective at country banks.

³Requirement became effective at central reserve and reserve city banks.

⁴Present legal minimum and maximum requirements on net demand deposits—central reserve cities, 13 and 26 per cent; reserve cities, 10 and 20 per cent; country, 7 and 14 per cent, respectively; on time deposits at all member banks, 3 and 6 per cent, respectively.

^a Preliminary.

¹ Weekly figures of excess reserves of all member banks and of country banks are estimates. Weekly figures of borrowings of all member banks and of country banks may include small amounts of Federal Reserve Bank discounts and advances for nonmember banks, etc.

² Reserve requirements were reduced in July 1953; see table on preceding page.

Back figures.—See *Banking and Monetary Statistics*, pp. 396-399.

DEPOSITS, RESERVES, AND BORROWINGS OF MEMBER BANKS

¹Averages of daily *closing* figures for reserves and borrowings and of daily *opening* figures for other items, inasmuch as reserves required are based on deposits at opening of business.

²Demand deposits subject to reserve requirements, i. e., gross demand deposits minus cash items reported as in process of collection and demand balances due from domestic banks.

³Reserve requirements were reduced in July 1953; see table on preceding page.

¹Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.

²Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.

³Not covered by Federal Reserve Bank commitment to purchase or discount.

NOTE.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

¹Revised.

²National series, now discontinued, for which debit figures are available 1919-52.

²Boston, Philadelphia, Chicago, Detroit, San Francisco, and Los Angeles.

³In the new series there are 338 "other" reporting centers. (Old series included 193 centers, 1942-November 1947; 192, December 1947-1950; and 201 beginning January 1951.)

NOTE.—As described in the article on pp. 355-357 of the *BULLETIN* for April 1953 the monthly series of bank debits has been revised. Revised figures beginning January 1952 were published in the *BULLETIN* for May 1953, p. 486; data for 1943-51 are being compiled and will be published later.

¹Total of amounts of coin and paper currency shown by denominations less unassorted currency in Treasury and Federal Reserve Banks.

²Includes unassorted currency held in Treasury and Federal Reserve Banks and currency of unknown denominations reported by the Treasury as destroyed.

³Paper currency only; \$1 silver coins reported under coin.

Back figures.—See Banking and Monetary Statistics, Table 112, pp. 415-416.

¹Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States. Totals for other end-of-month dates are shown in table above, totals by weeks in table on p. 1157.

²Includes \$156,039,431 held as reserve against United States notes and Treasury notes of 1890.

³To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.

⁴Because some of the types of money shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See note for explanation of these duplications. ⁵Less than \$500,000.

NOTE.—There are maintained in the Treasury—(i) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (ii) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on receipt); (iii) for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (iv) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such gold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or of direct obligations of the United States. Each Federal Reserve Bank must maintain a reserve in gold certificates of at least 25 per cent against its Federal Reserve notes in actual circulation. Gold certificates deposited with Federal Reserve agents as collateral, and those deposited with the Treasurer of the United States as a redemption fund, are counted as reserve. "Gold certificates" as herein used includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve Bank notes and national bank notes are in process of retirement.

^p Preliminary.

¹Treasury funds included are the gold account, Treasury currency account, and Exchange Stabilization Fund.

²Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection.

³Excludes interbank time deposits; United States Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.

⁴Prior to June 30, 1947, includes a relatively small amount of demand deposits. ⁵Less than 50 million dollars.

NOTE.—For description of statement and back figures, see BULLETIN for January 1948, pp. 24-32. The composition of a few items differs slightly from the description in the BULLETIN article; stock of Federal Reserve Banks held by member banks is included in "Other securities" and in "Capital and miscellaneous accounts, net" and balances of the Postal Savings System and the Exchange Stabilization Fund with the U. S. Treasury are netted against the same item instead of against U. S. Government deposits and Treasury cash. Total deposits and currency shown in the monthly Chart Book excludes "Foreign bank deposits, net" and "Treasury cash." Except on call dates, figures are rounded to nearest 100 million dollars and may not add to the totals. See Banking and Monetary Statistics, Table 9, pp. 34-35, for back figures for deposits and currency.

^p Preliminary.

* "All banks" comprise "all commercial banks" and "all mutual savings banks." "All commercial banks" comprise "all nonmember commercial banks" and "all member banks" with exception of three mutual savings banks that became members in 1941. Stock savings banks and nondeposit trust companies are included with "commercial" banks. Number of banks includes a few noninsured banks for which asset and liability data are not available. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

¹ Beginning June 30, 1942, excludes reciprocal balances, which on Dec. 31, 1942, aggregated \$13 million dollars at all member banks and \$25 million at all insured commercial banks.

For other footnotes see following two pages.

²Beginning with December 31, 1947, the all bank series was revised as announced in November 1947 by the Federal bank supervisory agencies. At that time a net of 115 noninsured nonmember commercial banks with total loans and investments of approximately 110 million dollars was added, and 8 banks with total loans and investments of 34 million were transferred from noninsured mutual savings to nonmember commercial banks.

For other footnotes see preceding and opposite pages.

* These figures do not include data for banks in possessions of the United States. During 1941 three mutual savings banks became members of the Federal Reserve System; these banks are included in "member banks" but are not included in "all insured commercial banks" or "all commercial banks." Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

²Breakdown of loan, investment, and deposit classifications is not available prior to 1947; summary figures for earlier dates appear in the preceding table.

³Central reserve city banks.

⁴Beginning June 30, 1942, excludes reciprocal bank balances, which on Dec. 31, 1942, aggregated 513 million dollars at all member banks and \$25 million at all insured commercial banks.

⁵Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection.

For other footnotes see preceding page.

Back figures.—See Banking and Monetary Statistics, Tables 18–45, pp. 72–103 and 108–113.

¹ Sample includes about 220 weekly reporting member banks reporting changes in their larger loans; these banks hold over 90 per cent of total commercial and industrial loans of all weekly reporting member banks and nearly 70 per cent of those of all commercial banks.

² Figures for other than weekly periods are based on weekly changes during period.

³ Net change at all banks in weekly reporting series, according to the old series in 1951 and the revised series thereafter. For description of revisions in the weekly reporting series see BULLETIN for April 1953, p. 357.

n.a. Not available.

¹Includes United States and foreign.

²Central government only.

³Includes International Bank for Reconstruction and Development.

⁴These represent annual statement asset values, with bonds carried on an amortized basis and stocks at end-of-year market value.

⁵These represent book value of ledger assets. Adjustments for interest due and accrued and differences between market and book values are not made on each item separately, but are included in total in "Other assets."

¹ Loans by purpose and agency are shown on a gross basis; total loans and all other assets are shown on a net basis, i. e., after reserve for losses².

² Several changes in coverage have been made over the period for which data are shown. The more important are: exclusion of the following agencies following repayment of the U. S. Government interest—Federal land banks after 1946 and the Home Owners' Loan Corporation after June 1951; exclusion of the United States Maritime Commission (including War Shipping activities) after 1947, when this agency ceased to report to the U. S. Treasury; and inclusion of the Mutual Security Agency beginning June 1952.

³ This agency, successor to the Farm Security Administration, took over the continuing functions of the latter agency in 1946. Earlier figures have been adjusted to include the FSA. Figures for 1944 and 1945 also include Emergency Crop and Feed Loans of the Farm Credit Administration, transferred to the FSA in 1946. Figures through 1948 include the Regional Agricultural Credit Corporation, the assets and liabilities of which have been administered by the Farmers Home Administration since dissolution of the RACC in 1949. These activities are reported currently on the Treasury Statement as "Disaster Loans, etc., Revolving Fund."

⁴ Assets and liabilities transferred to the Reconstruction Finance Corporation on June 30, 1947.

⁵ Reconstruction Finance Corporation loans to aid home owners, which increased steadily through the first three quarters of 1947 and during 1948, appear to have been included with "other" loans in the statement for Dec. 31, 1947.

⁶ Figures have been adjusted to include certain affiliates of the Reconstruction Finance Corporation. Several of these—including the Defense Plant Corporation, Defense Supplies Corporation, Metals Reserve Company, and Rubber Reserve Company—were merged with the parent effective July 1, 1945. Most of their activities were reflected under "Commodities, supplies, and materials" and "Land, structures, and equipment."

⁷ Less than \$500,000.

⁸ Foreign loans, except for the Export-Import Bank, are included with "all other purposes" until 1945.

⁹ Treasury loan to the United Kingdom (total authorized amount of which was 3,750 million dollars) and, beginning with the balance sheet for June 30, 1952, outstanding loans of the Mutual Security Agency (totaling about 1,500 million on that date).

¹⁰ Reflects activities of the Federal Public Housing Authority under the U. S. Housing Act, as amended, until July 27, 1947, when these activities were transferred to the newly established Public Housing Administration. War housing and other operations of the Authority—shown on the Treasury Statement with "other agencies" through 1947—were not transferred to the PHA until 1948.

¹¹ Beginning 1951, includes figures for Panama Canal Company, a new corporation combining the Panama Railroad Company (included in earlier Treasury Statements) and the business activities of the Panama Canal (not reported prior to that time). See also footnote 10.

¹² Assets representing unrecovered costs to the Corporation in its national defense, war, and reconversion activities, which are held for the Treasury for liquidation purposes in accordance with provisions of Public Law 860, 80th Congress.

¹³ Includes figures for Smaller War Plants Corporation, which is being liquidated by the Reconstruction Finance Corporation.

NOTE.—Statement includes certain business-type activities of the United States Government. Figures for some agencies—usually small ones—may be for dates other than those indicated. Comparability of the figures with those for years prior to 1944 has been affected by (1) the adoption of a new reporting form beginning Sept. 30, 1944, and (2) changes in activities and agencies included (see footnote 2). For back figures see *Banking and Monetary Statistics*, Table 152, p. 517.

¹Monthly and weekly data for U. S. Government bond prices and volume of trading are averages of daily figures; for other series monthly and weekly data are based on figures for one day each week—Wednesday closing prices for municipal and corporate bonds, preferred stocks, and common stocks (Standard and Poor's Corporation) and weekly closing prices for common stocks (Securities and Exchange Commission).

²Fully taxable, marketable 2½ per cent bonds first callable after 12 years. Of these the 1967-72 bonds are the longest term issues. Prior to Apr. 1, 1952, only bonds due or first callable after 15 years were included.

³The 3⅓ per cent bonds of 1978-83, issued May 1, 1953.

⁴Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent 20-year bond.

⁵Standard and Poor's Corporation. Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend.

⁶Average daily volume of trading in stocks on the New York Stock Exchange.

Back figures.—See *Banking and Monetary Statistics*, Tables 130, 133, 134, and 136, pp. 475, 479, 482, and 486, respectively, and *BULLETIN* for May 1945, pp. 483-490, and October 1947, pp. 1251-1253.

September.....	31,624				31,070	3,674							

¹Excludes balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) firms' own partners.

²Includes money borrowed from banks and also from other lenders (not including member firms of national securities exchanges).

³As reported to the New York Stock Exchange. According to these reports, the part of total customers' debit balances represented by balances secured by U. S. Government securities was (in millions of dollars): July, 29; August, 27.

Note.—For explanation of these figures see "Statistics on Margin Accounts" in *BULLETIN* for September 1936. The article describes the method by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

Back figures.—See *Banking and Monetary Statistics*, Tables 143 and 144, pp. 501-503.

¹Preliminary.

²Monthly and weekly data are averages of daily figures, except for municipal bonds and for preferred stocks, which are based on figures for Wednesday. Figures for common stocks, except for annual averages, are as of the end of the period (quarterly in the case of earnings/price ratio).

³Fully taxable, marketable 2½ per cent bonds first callable after 12 years. Of these the 1967–72 bonds are the longest term issues. Prior to Apr. 1, 1952, only bonds due or first callable after 15 years were included.

⁴The 3¾ per cent bonds of 1978–83, issued May 1, 1953.

⁵Standard and Poor's Corporation. Because of a limited number of suitable issues, the industrial Aaa and Aa groups have been reduced from 10 to 6 issues, and the railroad Aaa and Aa groups from 10 to 5 and 4 issues, respectively.

⁶Standard and Poor's Corporation. Ratio is based on 9 median yields in a sample of noncallable issues, 12 industrial and 3 public utility.

⁷Moody's Investors Service. ⁸Computed by Federal Reserve from data published by Moody's Investors Service.

Back figures.—See *Banking and Monetary Statistics*, Tables 128–129, pp. 468–474, and BULLETIN for May 1945, pp. 483–490, and October 1947, pp. 1251–1253.

TREASURY RECEIPTS, EXPENDITURES, AND RELATED ITEMS

[On basis of daily statements of United States Treasury unless otherwise noted. In millions of dollars]

Period	Summary

¹Preliminary. ²n.a. Not available.

¹Beginning November 1950, investments of wholly owned Government corporations in public debt securities are excluded from Budget expenditures, and included with other such investments under "Trust and other accounts." Adjustments for July-October 1950 investments were made by the Treasury in the November 1950 and January 1951 figures.

²Includes the following not shown separately: Maritime activities, special defense production expansion programs, Economic Stabilization Agency, and Federal Civil Defense Administration.

³Consists of foreign economic and technical assistance under the Mutual Security Act, net transactions of the Export-Import Bank, and other nonmilitary foreign aid programs, as well as State Department expenditures.

⁴Excludes expenditures for forest development of roads and trails, which are included with public works.

¹Preliminary.

¹Excess of receipts, or expenditures (-).

²Consists of miscellaneous trust funds and accounts and deposit fund accounts. The latter reflect principally net transactions of partially owned Government corporations, European Payments Union deposit fund, and suspense accounts of Defense and other Government departments. Investments of wholly owned Government corporations are included as specified in footnote 3, but their operating transactions are included in Budget expenditures.

³Consists of net investments in public debt securities of partially owned Government corporations and agencies and other trust funds beginning with July 1950, which prior to that date are not separable from the next column; and, in addition, of net investments of wholly owned Government corporations and agencies beginning with November 1950, which prior to that date are included with Budget expenditures (for exceptions see footnote 1 on previous page).

TREASURY CASH INCOME, OUTGO, AND BORROWING
DERIVATION OF CASH RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

¹Represents principally interest paid to Treasury by Government agencies and repayment of capital stock and paid-in surplus by partially owned Government corporations.

²Represents principally interest on investments in U. S. Government securities, payroll deductions for Government employees' retirement accounts, and transfers shown as Budget expenditures.

³Represents principally excess of interest accruals over payments on savings bonds and Budgetary expenditures involving issuance of Federal securities; the latter include mostly armed forces leave bonds and notes issued to the International Bank and Monetary Fund, which are treated as noncash expenditures at the time of issuance and cash expenditures at the time of redemption.

⁴Represents principally noncash items shown under trust account receipts (described in footnote 2); also includes small adjustments for noncash interest reflected in noncash Budget receipts (see footnote 1) and in noncash trust account expenditures (see footnote 5).

⁵Represents principally repayments of capital stock and paid-in surplus by partially owned Government corporations, as well as interest receipts by such corporations on their investments in the public debt (negative entry).

⁶Cash transactions between International Monetary Fund and Exchange Stabilization Fund. (See footnote 3.)

¹Differs from "accruals to the public" shown in preceding table, principally because adjustments to Exchange Stabilization Fund are included.

²Includes redemptions of tax anticipation bills and savings notes used in payment of taxes.

³Most changes in convertible Series B investment bonds, 1975-80, reflect exchanges of, or conversions into, marketable issues and thus cancel out in this column. An exception was the sale for cash of about 300 million dollars in June 1952.

⁴Includes cash issuance in the market of obligations of Government corporations and agencies and some miscellaneous debt items.

⁵Excludes exchanges of savings bonds into marketable bonds. ⁶See footnote 2 at bottom of following page.

^aPreliminary.

¹Income taxes include current and back taxes; individual taxes also include estate and gift taxes and, prior to September 1953, adjustment to Treasury daily statement. Income taxes through June 1953 are from internal revenue collectors' reports, thereafter from Treasury daily statement.

²Includes taxes for old-age and unemployment insurance, carriers taxes, and veterans life insurance premiums.

³Represents mostly nontax receipts. ⁴Represents Budget expenditures adjusted for net redemptions of armed forces leave bonds and special International Bank and Monetary Fund notes.

⁵Represents Budget expenditures less the excess of interest accruals over payments on savings bonds and Treasury bills and less interest paid by the Treasury to (1) trust funds and accounts and (2) Government corporations not wholly owned.

⁶Represents Budget outlays plus payments to the public from veterans life insurance funds and redemptions of adjusted service bonds.

⁷Represents Budget outlays plus benefit payments and administrative expenses of trust funds for old-age and unemployment insurance, and Government employees and Railroad retirement funds.

^aPreliminary.

¹Figures for May include 390 million dollars and those for June include 18 million of reported exchanges of F and G bonds maturing in 1953, for marketable bonds of June 1978-83. An additional 8 million dollars of exchanges represented accrued discount of F bonds and is not included above.

²Due to a change in Treasury processing, a large amount of redemptions of E bonds in July was not broken down as to issue price and accrued discount. Hence, the redemptions figure shown includes some accrued discount. This situation is being reversed in subsequent months.

NOTE.—Sales, redemptions, and maturities of bonds are shown at issue price; amount outstanding at current redemption value. Maturities of notes and Series A-D bonds are included as of maturity date, and only interest-bearing debt is included in amount outstanding.

* Commercial banks, mutual savings banks, and insurance companies included in the survey account for over 90 per cent of total holdings by these institutions. Data are complete for Federal agencies and trust funds and Federal Reserve Banks. Figures in column headed "other" are residuals.

¹Includes stock savings banks.

²Includes Treasury bonds and minor amounts of Panama Canal and Postal Savings bonds.

³Beginning with the September 1953 issue of the BULLETIN, the basis for classifying bonds with optional call dates has been changed from a first call to a final maturity date.

⁷ Revised.

⁸ Estimates of new issues sold for cash in the United States.

² Gross proceeds are derived by multiplying principal amounts or number of units by offering price.

³ Includes issues guaranteed. ⁴ Issues not guaranteed.

⁵ Includes foreign government; International Bank; and domestic eleemosynary and other nonprofit.

⁶ Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i. e., compensation to underwriters, agents, etc., and expenses.

⁷ Includes proceeds for plant and equipment and working capital.

⁸ Includes proceeds for the retirement of mortgages and bank debt with original maturities of more than one year. Proceeds for retirement of short-term bank debt are included under the uses for which the bank debt was incurred.

⁹ Includes all issues other than those for retirement of securities.

¹⁰ Retirement of securities only.

Source.—Securities and Exchange Commission.

¹ Includes 26 companies in groups not shown separately, as follows: textile mill products (10); paper and allied products (15); miscellaneous (1).

² Includes 25 companies in groups not shown separately, as follows: building materials (12); transportation equipment other than automobile (6); and miscellaneous (7).

NOTE.—*Manufacturing corporations.* Data are from published company reports, except sales which are from reports of the Securities and Exchange Commission.

Railroads. Figures are for Class I line-haul railroads (which account for 95 per cent of all railroad operations) and are obtained from reports of the Interstate Commerce Commission.

Electric power. Figures are for Class A and B electric utilities (which account for about 95 per cent of all electric power operations) and are obtained from reports of the Federal Power Commission, except that quarterly figures on operating revenue and profits before taxes are partly estimated by the Federal Reserve, to include affiliated nonelectric operations.

Telephone. Revenues and profits are for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Lines and General departments of American Telephone and Telegraph Company) and for two affiliated telephone companies, which together represent about 85 per cent of all telephone operations. Dividends are for the 20 operating subsidiaries and the two affiliates. Data are obtained from the Federal Communications Commission.

All series. Profits before taxes refer to income after all charges and before Federal income taxes and dividends. For description of series and back figures, see pp. 662-666 of the BULLETIN for June 1949 (manufacturing); pp. 215-217 of the BULLETIN for March 1942 (public utilities); and p. 908 of the BULLETIN for September 1944 (electric power).

¹ Reflects cash transactions only. As compared with data shown on p. 1186, new issues exclude foreign and include investment company offerings, sales of securities held by affiliated companies or RFC, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose shown on p. 1186.

^p Preliminary.

¹ Derived figures, which include negligible amount of farm loans held by savings and loan associations. ² Derived figures, which include debt held by Federal land banks and Farmers Home Administration.

NOTE.—Figures for first three quarters of each year, and all figures for December 1952 except those on 1- to 4-family houses and total farm (preliminary estimates from HLBB and Dept. of Agriculture, respectively), are Federal Reserve estimates. Financial institutions include commercial banks (including nondeposit trust companies but not trust departments), mutual savings banks, life insurance companies, and savings and loan associations. Federal agencies include HOLC, FNMA, and VA (the bulk of the amounts through 1948 held by HOLC, since then by FNMA). Other Federal agencies (amounts small and separate data not readily available currently) are included with "Individuals and others."

Sources.—Federal Deposit Insurance Corporation, Home Loan Bank Board, Institute of Life Insurance, Departments of Agriculture and Commerce, Federal National Mortgage Association, Veterans Administration, Comptroller of the Currency, and Federal Reserve.

^p Preliminary.

¹ Includes all banks in the United States and possessions. ² Includes loans held by nondeposit trust companies but excludes holdings of trust departments of commercial banks. March and September figures are Federal Reserve estimates based on data from Member Bank Call Report and from weekly reporting member banks. For 1940, figures except for the grand total are Federal Reserve estimates based on data for insured commercial banks.

³ Data not available for all classifications prior to December 1951.

⁴ Through 1946, figures except for the grand total are estimates based on Federal Reserve preliminary tabulation of a revised series of banking statistics. March and September figures are Federal Reserve estimates based in part on data from National Association of Mutual Savings Banks.

Sources.—All bank series prepared by Federal Deposit Insurance Corporation from data supplied by Federal and State bank supervisory agencies; Comptroller of the Currency; and Federal Reserve.

^aRevised.

Note.—For loans acquired, monthly figures may not add to annual totals, and for loans outstanding, end-of-December figures may differ from end-of-year figures, because monthly figures represent book value of ledger assets whereas year-end figures represent annual statement asset values, and because year-end adjustments are based on more nearly complete data. Prior to 1947, complete data are not available for all classifications shown.

Sources.—Institute of Life Insurance—end-of-year figures, *Life Insurance Fact Book*; end-of-month figures, the *Tally of Life Insurance Statistics* and *Life Insurance News Data*.

¹Monthly figures do not reflect mortgage amendments included in annual totals.

²FHA-insured property improvement loans are not ordinarily secured by mortgages; VA-guaranteed alteration and repair loans of \$1,000 or less need not be secured, whereas those for more than that amount must be.

³Prior to 1949, data are not available for classifications shown.

NOTE.—FHA-insured loans represent gross amount of insurance written; VA-guaranteed loans, gross amount of loans closed. Figures do not take account of principal repayments on previously insured or guaranteed loans. For VA-guaranteed loans, amounts by type are derived from data on number and average amount of loans closed.

^r Revised. Figures beginning with January 1952 have been revised. Figures for all of 1952 together with a descriptive note on the revision are shown on p. 1214.

¹ Includes all consumer instalment credit extended for the purpose of purchasing automobiles and other consumer goods and secured by the items purchased, whether held by retail outlets or financial institutions. Includes credit on purchases by individuals of automobiles or other consumer goods that may be used in part for business.

² Includes only repair and modernization loans held by financial institutions; such loans held by retail outlets are included in "other consumer goods paper."

NOTE.—Monthly figures for the period December 1939 through 1951 and a general description of the series are shown on pp. 336-354 of the BULLETIN for April 1953; a detailed description of the methods used to derive the estimates may be obtained from Division of Research and Statistics.

* Estimated; all estimates are those of the Federal Reserve.

* Average per working day.

¹ For indexes by groups or industries, see pp. 1196-1199.

² Three-month moving average, based on F. W. Dodge Corporation data. A description of the index may be obtained from the Division of Research and Statistics. For monthly data (dollar value) by groups, see p. 1203.

³ The unadjusted indexes of employment and payrolls, wholesale commodity prices, and consumer prices are compiled by or based on data of the Bureau of Labor Statistics. Nonagricultural employment covers employees only and excludes personnel in the armed forces. The consumer prices index is the revised series, reflecting beginning January 1953 the inclusion of some new series and revised weights. Prior to January 1953 indexes are based on the "interim adjusted" and "old" indexes converted to the base 1947-49 = 100.

⁴ For indexes by Federal Reserve districts and for other department store data, see pp. 1205-1209.

Back figures in BULLETIN.—For industrial production, August 1940, pp. 825-882, September 1941, pp. 933-937, and October 1943, pp. 958-984; or department store sales, December 1951, pp. 1490-1515.

¹ Preliminary.

² Revised.

¹ Methods used in compiling the iron and steel group index have been revised beginning October 1949. A description of the new methods may be obtained from the Division of Research and Statistics.

² Series included in total and group indexes but not available for publication separately.

³ Because of a reclassification of the basic data used to measure changes in production, the sulphate pulp and sulphite pulp series are no longer available separately. Individual indexes through June 1951 are shown in preceding BULLETINS.

Ice cream ²

¹ Preliminary. ² Revised.

¹ Methods used in compiling the iron and steel group index have been revised beginning October 1949. A description of the new methods may be obtained from the Division of Research and Statistics.

² Series included in total and group indexes but not available for publication separately.

³ Because of a reclassification of the basic data used to measure changes in production, the sulphate pulp and sulphite pulp series are no longer available separately. Individual indexes through June 1951 are shown in preceding BULLETINS.

^r Revised.

NOTE.—Covers production and related workers only; data shown include all full- and part-time production and related workers who worked during, or received pay for, the pay period ending nearest the 15th of the month. Figures for September 1953 are preliminary. Back data and data for industries not shown, without seasonal adjustment, may be obtained from the Bureau of Labor Statistics. Seasonally adjusted data beginning January 1939, for groups and the total, may be obtained from the Division of Research and Statistics.

¹Revised.

NOTE.—Data include all full- and part-time employees who worked during, or received pay for, the pay period ending nearest the 15th of the month. Proprietors, self-employed persons, domestic servants, unpaid family workers, and members of the armed forces are excluded. September 1953 figures are preliminary. Back unadjusted data are available from the Bureau of Labor Statistics; seasonally adjusted figures beginning January 1939 may be obtained from the Division of Research and Statistics.

¹Includes self-employed, unpaid family, and domestic service workers.

²Current data available six months later than for other series when armed forces figures, withheld for reasons of security, are released.

NOTE.—Details do not necessarily add to group totals. Information on the labor force status of the population is obtained through interviews of households on a sample basis. Data relate to the calendar week that contains the eighth day of the month. Back data are available from the Bureau of the Census.

^p Preliminary. n.a. Not available.

¹ Less than 500 units.

NOTE.—Government underwritten units are those started under commitments of FHA or VA to insure or guarantee the mortgage. VA figures after June 1950 and all FHA figures are based on field office reports of first compliance inspections; VA figures prior to June 1950, estimates based on loans closed information. Other figures are estimated by Bureau of Labor Statistics on the basis of reports of building permits issued, reported starts of public units, and a sample of places not issuing permits.

^a Preliminary.

^b Revised.

¹ The first three ratios are of stocks and/or orders at the end of the month to sales during the month. The final ratio is based on totals of sales and receipts for the month.

² These figures are not estimates for all department stores in the United States. They are the actual dollar amounts reported by a group of department stores located in various cities throughout the country. In 1952, sales by these stores accounted for about 50 per cent of estimated total department store sales.

³ Receipts of goods are derived from the reported figures on sales and stocks. New orders are derived from receipts and reported figures on outstanding orders.

NOTE.—For description and monthly figures for back years, see BULLETIN for October 1952, pp. 1098–1102.

¹The ratio of stocks to sales is obtained by dividing stocks at the end of the month by sales during the month and hence indicates the number of months' supply on hand at the end of the month in terms of sales for that month.

²The 1947-49 average of monthly sales and of end-of-month stocks for each department is used as a base in computing the sales and stocks indexes, respectively, for that department. For description of indexes, see pp. 1146-1151 of this BULLETIN.

³For movements of total department store sales and stocks, see the indexes for the United States on p. 1205.

⁴Data not available.

NOTE.—Based on reports from a group of large department stores located in various cities throughout the country. In 1952, sales and stocks at these stores accounted for almost 50 per cent of estimated total department store sales and stocks. Not all stores report data for all of the departments shown; consequently, the sample for the individual departments is not so comprehensive as that for the total.

¹Preliminary.

²Includes construction expenditures for crude petroleum and natural gas drilling.

³Consists of sales abroad and domestic sales of surplus consumption goods and materials.

⁴Less than \$50 million dollars.

⁵Total wage and salary receipts, as included in "Personal income," is equal to total disbursements less employee contributions to social insurance. Such contributions are not available by industries.

⁶Includes compensation for injuries, employer contributions to private pension and welfare funds, and other payments.

⁷Includes business and professional income, farm income, and rental income of unincorporated enterprise; also a noncorporate inventory valuation adjustment.

⁸Includes government social insurance benefits, direct relief, mustering out pay, veterans' readjustment allowances and other payments, as well as consumer bad debts and other business transfers.

⁹Prior to 1952 includes employee contributions only; beginning January 1952, includes also contributions to the old-age and survivors' insurance program of the self-employed to whom coverage was extended under the Social Security Act Amendments of 1950. Personal contributions are not included in personal income.

¹⁰Includes personal income exclusive of net income of unincorporated farm enterprise, farm wages, agricultural net rents, agricultural net interest, and net dividends paid by agricultural corporations.

NOTE.—Details may not add to totals because of rounding.

NOTE.—Estimates of consumer credit outstanding for the period January 1952 to date have been revised to incorporate more comprehensive information that has become available since the preparation of the original estimates. The revision is based upon: data for commercial banks from the reports of condition for June and December 1952 and June 1953; data for the instalment receivables and charge accounts of retail outlets obtained by the Bureau of Census in its annual survey of retail trade for 1952; data for credit unions for the end of 1952 collected by the Bureau of Federal Credit Unions; and other data for the end of 1952 obtained from State supervisory authorities and other sources. The usual explanatory notes and the revised figures for 1953 are shown in the regular tables on pp. 1192-1194. No changes have been made in the sales finance company figures.

INTERNATIONAL FINANCIAL STATISTICS

International Monetary Fund and Bank.....	1224
Central Banks	1224-1228
Money rates in foreign countries.....	1229
Commercial banks	1230
Foreign exchange rates.....	1231
Price movements in principal countries:	
Wholesale prices	1232
Consumers' price indexes.....	1233
Security prices	1233

Tables on the following pages include the principal available statistics of current significance relating to gold, international capital transactions of the United States, and financial developments abroad. The data are compiled for the most part from regularly published sources such as central and commercial bank statements and official statistical bulletins, some data are reported to the Board directly. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Back figures for all except price tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*.

^aPreliminary.

¹Represents funds held with banks and bankers in the United States by foreign central banks and by foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.), and also funds held in accounts with the U. S. Treasury.

²Includes Bank for International Settlements, International Bank for Reconstruction and Development, International Monetary Fund, and United Nations and other international organizations.

³Figures include transactions of international institutions, which are shown separately in Tables 6 and 7. Securities of such institutions are included in foreign securities.

⁴"Short-term liabilities" reported in these statistics represent principally demand deposits and U. S. Government obligations maturing in not more than one year from their date of issue, held by banking institutions in the United States. The term "foreigner" is used to designate foreign governments, central banks, and other official institutions (see footnote 1 above) as well as other banks, organizations, and individuals domiciled outside the United States, including U. S. citizens domiciled abroad and the foreign subsidiaries and offices of U. S. banks and commercial firms.

⁵Beginning January 1950, excludes Bank for International Settlements, included in "International institutions" as of that date.

⁶Data for August 1950 include, for the first time, certain deposit balances and other items which have been held in specific trust accounts, but which have been excluded in the past from reported liabilities.

NOTE.—These statistics are based on reports by banks, bankers, brokers, and dealers. Beginning with the BULLETIN for September 1951, certain changes were made in the order and selection of the material published. An explanation of the changes appears on p. 1202 of that issue. For further explanation and information on back figures see BULLETIN for August 1951, p. 1030.

¹ Represents dollar assets belonging to foreign monetary authorities and the Bank for International Settlements. Excludes assets held for the International Bank for Reconstruction and Development and International Monetary Fund and earmarked gold. See footnote 4, p. 1223, for total gold under earmark at Federal Reserve Banks for foreign and international accounts.

² U. S. Treasury bills, certificates of indebtedness, notes and/or bonds.

³ Includes bankers' acceptances, commercial paper, foreign and international bonds.

NOTE.—For explanation of table and for back figures see BULLETIN for May 1953, p. 474.

Gold production in USSR: No regular government statistics on gold production in USSR are available, but data of percentage changes irregularly given out by officials of the gold mining industry, together with certain direct figures for past years, afford a basis for estimating annual production as follows: 1934, 135 million dollars; 1935, 158 million; 1936, 187 million; 1937, 185 million; and 1938, 180 million.

¹ Estimates of United States Bureau of Mines.

² Reported by American Bureau of Metal Statistics.

³ Yearly figures are estimates of United States Mint. Monthly figures are estimates of American Bureau of Metal Statistics.

⁴ Gold exports reported by the National Bank of Nicaragua, which states that they represent approximately 90 per cent of total production.

NOTE.—For explanation of table and sources, see BULLETIN for June 1948, p. 731, and *Banking and Monetary Statistics*, p. 524. For annual estimates compiled by the United States Mint for these and other countries in the period 1910–1941, see *Banking and Monetary Statistics*, pp. 542–543; for figures subsequent to 1941 see BULLETIN for April 1953, p. 427.

^a Preliminary.

¹ Includes reported gold holdings of central banks and governments and international institutions, unpublished holdings of various central banks and governments, estimated holdings of British Exchange Equalization Account based on figures shown below under United Kingdom, and estimated official holdings of countries from which no reports are received.

² Includes gold in Exchange Stabilization Fund. Gold in active portion of this Fund is not included in regular statistics on gold stock (Treasury gold) used in the Federal Reserve statement "Member Bank Reserves, Reserve Bank Credit, and Related Items" or in the Treasury statement "United States Money, Outstanding and in Circulation, by Kinds."

³ Represents gold holdings of Bank of France (holdings of French Exchange Stabilization Fund are not included).

⁴ Figure as of Mar. 31.

⁵ Exchange Equalization Account holdings of gold, U. S. and Canadian dollars, as reported by British Government. (Gold reserves of Bank of England have remained unchanged at 1 million dollars since 1939, when Bank's holdings were transferred to Exchange Equalization Account.)

NOTE.—For description of figures, including details regarding special internal gold transfers affecting the reported data, see *Banking and Monetary Statistics*, pp. 524-535; for back figures through 1941 see p. 526 and Table 160, pp. 544-555, in the same publication and for those subsequent to 1941 see BULLETIN for January 1953, p. 74; April 1951, p. 464; February 1950, p. 252; and November 1947, p. 1433. For revised back figures for Argentina and Canada, see BULLETIN for January 1949, p. 86, and February 1949, p. 196, respectively.

* Corrected.

¹ Includes 5 million dollars receivable from a member country for currency adjustment.

² As of Sept. 30, 1953, the Fund had sold 914.0 million U. S. dollars. In addition, other sales have included the following: to the Netherlands, 1.5 million pounds sterling (May 1947) and 300.0 million Belgian francs (May 1948); to Norway, 200.0 million Belgian francs (June and July 1948); to Brazil, 10.0 million pounds sterling (January 1951); to Turkey, 2.0 million pounds sterling and 18.5 million Deutsche marks (August 1953); to Japan, 5.0 million pounds sterling (September 1953). Repurchases amounted to 271.0 million dollars. Currencies the net transactions in which amount to less than one million are reported under "All other."

³ Excludes uncalled portions of capital subscriptions, amounting to 7,231 million dollars as of September 30, 1953, of which 2,540 million represents the subscription of the United States.

¹ On June 9, 1945, the official buying price of the Bank of England for gold was increased from 168 shillings to 172 shillings and threepence per fine ounce, and on Sept. 19, 1949, it was raised to 248 shillings. For details regarding previous changes in the buying price of gold and for internal gold transfers during 1939, see BULLETIN for March 1950, p. 388, footnotes 1 and 4.

² Securities and silver coin held as cover for fiduciary issue, the amount of which is also shown by this figure.

³ Notes issued less amounts held in banking department.

⁴ Fiduciary issue decreased by 50 million pounds on Jan. 7 and 25 million on Jan. 14; increased by 50 million on Mar. 25 and June 3 and by 25 million on July 29; and decreased by 50 million on Aug. 26. For details on previous changes, see BULLETIN for February 1953, p. 194.

Note.—For back figures, see *Banking and Monetary Statistics*, Table 164, pp. 638-640; for description of statistics, see pp. 560-561 in same publication.

¹Securities maturing in two years or less.

²Includes notes held by the chartered banks, which constitute an important part of their reserves.

³Beginning November 1944, includes a certain amount of sterling and United States dollars.

⁴On May 1, 1940, gold transferred to Foreign Exchange Control Board in return for short-term Government securities (see BULLETIN for July 1940, pp. 677-678).

⁵For details on devaluations and other changes in the gold holdings of the Bank of France, see BULLETIN for September 1951, p. 1211; September 1950, pp. 1132 and 1261; June 1949, p. 747; May 1948, p. 601; May 1940, pp. 406-407; January 1939, p. 29; September 1937, p. 653; and November 1936, pp. 878-880.

⁶For explanation of these items, see BULLETIN for January 1950, p. 117, footnote 6.

⁷Beginning January 1950, when the Bank of France modified the form of presentation of its statement, the figures under this heading are not strictly comparable with those shown for earlier dates.

⁸Includes the following amounts (in millions of francs) for account of the Central Administration of the Reichskreditkassen: 1940, 41,400; 1941, 64,580; 1942, 16,857; 1943, 10,724.

NOTE.—For back figures on Bank of Canada and Bank of France, see *Banking and Monetary Statistics*, Tables 166 and 165, pp. 644-645 and pp. 641-643, respectively; for description of statistics, see pp. 562-564 in same publication. For last available report from the Reichsbank (February 1945), see BULLETIN for December 1946, p. 1424.

*Latest month available.

¹Revised.

²On May 14, 1953 gold reserve revalued from 0.0148112 to 0.00467722 grams of fine gold per boliviano.

³Represents chiefly bills secured by stocks of mined tin not yet sold in world markets.

⁴This figure represents the amount of the country's subscription to the Fund less the bank's local currency liability to the Fund.

⁵For last available report (March 1950), see BULLETIN for September 1950, p. 1262.

¹ Revised.

² This figure represents the amount of the country's subscription to the Fund less the bank's local currency liability to the Fund.

³ Combined figures for the Bank of German States and the nine Land Central Banks.

⁴ The official exchange rate was adjusted from 15,000 to 30,000 drachmae per dollar, effective Apr. 9, 1953.

⁵ For last available report (February 1950), see BULLETIN for September 1950, p. 1263.

⁶ As of July 1, 1953, the Java Bank became the Bank Indonesia and established an Issue and a Banking Department. Figures shown represent Issue and Banking Departments combined.

⁷ Gold revalued in May 1953 from 4,265.35 rupiah to 12,796.05 rupiah per kilogram of fine gold.

⁸ Includes gold, silver, and foreign exchange forming required reserve (25 per cent) against notes and other demand liabilities.

* Latest month available.

¹ Revised.

¹ The new Central Bank of Paraguay began operations on July 1, 1952. Central banking functions previously performed by the Monetary Department of the Bank of Paraguay were transferred to the new institution.

² This figure represents the amount of the country's subscription to the Fund less the bank's local currency liability to the Fund.

³ Includes small amount of non-Government bonds.

^{*}Preliminary.

¹This table represents aggregates of figures reported by individual banks. Data are compiled on the third Wednesday of each month, except in June and December when the statements give end-of-month data.

²Represent six-month loans to the Treasury with a yield of $\frac{1}{2}$ per cent after October 1945.

³In January 1950, the Bank of Canada assumed responsibility for these notes.

NOTE.—For details concerning data in earlier years, see BULLETIN for April 1952, p. 466; for back figures and figures on German commercial banks, see Banking and Monetary Statistics, Tables 168-171, pp. 648-655, and for description of statistics see pp. 566-571 in same publication.

¹Based on quotations beginning Feb. 25, 1953.

²Based on quotations through Oct. 9, 1953. Effective Oct. 12, 1953, the Brazilian authorities introduced new exchange ratios for Brazilian exports. Under the new system premiums of 5 and 10 cruzeiros, depending upon type of merchandise, have been added to the former official rate of 18.36 cruzeiros per dollar, thus establishing two rates—23.36 and 28.36 cruzeiros per dollar, respectively. For the period Oct. 13-Oct. 30 these two rates averaged 4.2808 and 3.5261, respectively.

³Based on quotations through Oct. 9, 1953.

⁴Based on quotations through Aug. 14, 1952.

⁵Based on quotations through May 8, 1952.

⁶Rate applied (except free rate) depends upon type of merchandise. In addition to the rates shown, a fifth rate is being certified; the October average for this rate was 53.1914.

⁷Quotations not available Jan. 28 through Feb. 9, 1953.

⁸Free rate, based on quotations beginning Feb. 10, 1953.

NOTE.—For back figures, see *Banking and Monetary Statistics*, Table 173, pp. 662-682. For description of statistics, see pp. 572-573 in same publication, and for further information concerning rates and averages for previous years, see *BULLETIN* for December 1952, p. 1355.

FEDERAL RESERVE BOARD PUBLICATIONS¹

The material listed below may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington 25, D. C. Where a charge is indicated, remittance should be made payable to the order of the Board of Governors of the Federal Reserve System.

ANNUAL REPORT of the Board of Governors of the Federal Reserve System. Issued each year. Available without charge upon request.

FEDERAL RESERVE BULLETIN. Issued monthly. Subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is \$2.00 per annum or 20 cents per copy; elsewhere \$2.60 per annum or 25 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 15 cents per copy per month, or \$1.50 for 12 months.

FEDERAL RESERVE CHARTS ON BANK CREDIT, MONEY RATES, AND BUSINESS. Issued monthly. \$6.00 per annum including edition of historical supplement (listed below) available when subscription is entered or renewed. 60 cents per copy; in quantities of 10 or more copies of a particular issue for single shipment, 50 cents each. (Domestic rates)

HISTORICAL SUPPLEMENT TO FEDERAL RESERVE CHARTS ON BANK CREDIT, MONEY RATES, AND BUSINESS. Issued semiannually, usually April and September. Annual subscription to monthly chart book includes one issue of supplement. Single copies, 60 cents each; in quantities of 10 or more copies for single shipment, 50 cents each. (Domestic rates)

¹A more complete list, including periodic releases and reprints, appeared on pp. 684-687 of the June 1953 BULLETIN.

THE FEDERAL RESERVE SYSTEM—ITS PURPOSES AND FUNCTIONS. November 1947; reprinted October 1953. 125 pages. 75 cents per cloth-bound copy; in quantities of 10 or more copies for single shipment, 50 cents each. Paper-bound copies available without charge.

BANKING STUDIES. Comprising 17 papers on banking and monetary subjects by members of the Board's staff. August 1941; reprinted October 1952. 496 pages. Paper cover. \$1.00 per copy; in quantities of 10 or more copies for single shipment, 75 cents each.

BANKING AND MONETARY STATISTICS. Statistics of banking, monetary, and other financial developments. November 1943. 979 pages. \$1.50 per copy. No charge for individual sections (unbound).

A STATISTICAL STUDY OF REGULATION V LOANS. September 1950. 74 pages. 25 cents per copy; in quantities of 10 or more copies for single shipment, 15 cents each.

THE DEVELOPMENT OF BANK DEBITS AND CLEARINGS AND THEIR USE IN ECONOMIC ANALYSIS. January 1952. 175 pages. 25 cents per copy; in quantities of 10 or more copies for single shipment, 15 cents each.

THE FEDERAL RESERVE ACT, as amended to November 1, 1946, with an Appendix containing provisions of certain other statutes affecting the Federal Reserve System. 372 pages. 50 cents per paper-bound copy; \$1.00 per cloth-bound copy.

COMPILATION OF FEDERAL AND STATE LAWS RELATING TO BRANCH BANKING WITHIN THE UNITED STATES. (July 1, 1951.) December 1951. 33 pages.

RULES OF ORGANIZATION AND RULES OF PROCEDURE—Board of Governors of the Federal Reserve System (with Amendments). September 1946. 31 pages.

REGULATIONS OF THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM. Individual regulations with amendments.
