BOARD OF GOVERNORS
OF THE FEDERAL RESERVE SYSTEM
WASHINGTON

FEDERAL RESERVE BULLETIN

VOLUME 40

November 1954

NUMBER 11

EXPENDITURES IN 1954

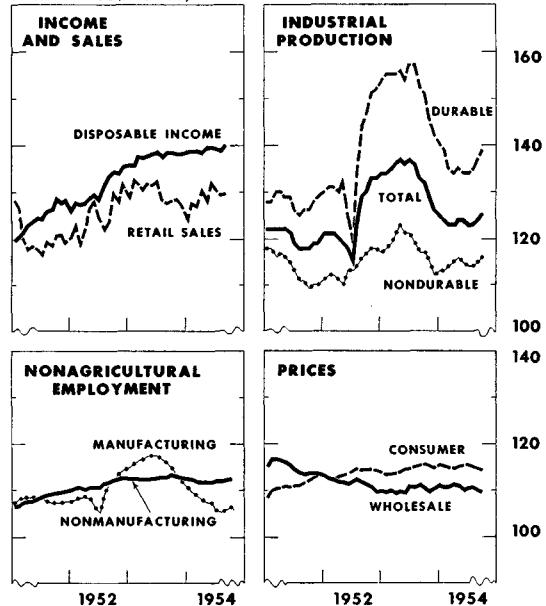

Gross national product changed little in the second and third quarters of this year, following a decline of 4 per cent from the peak rate reached in the spring of 1953. In the current quarter, however, some expansion appears to be developing. For the year 1954 gross national product is estimated at about 356 billion dollars, as compared with the record 365 billion of 1953. Average prices have continued unusually stable this year, and consequently the physical output of goods and services as well as the dollar value will be moderately smaller than last year.

The relative stability of gross product during most of this year reflects diverse and largely offsetting developments in broad sectors of the economy. State and local government expenditures have grown at about the same rate as in 1953. Residential construction activity, stimulated by ready availability of credit on favorable terms, has advanced sharply since early in the year. Consumer expenditures, which had dipped in late 1953, have risen to a new high. Outlays for nondurable goods and services have been larger than last year while spending for durable goods has been smaller. Contributing to the increase in aggregate consumer buying has been the record level of disposable personal income.

On the contractive side, defense outlays—a major factor contributing to the drop in gross national product in the last half of 1953—have been reduced substantially fur-

SELECTED BUSINESS INDEXES

NOTE.—Seasonally adjusted series, except for prices. Indexes based on Bureau of Labor Statistics data for employment and prices and on Department of Commerce data for income and sales. Latest figures shown are for October for employment, prices, and industrial production, and for September for retail sales and disposable income. Consumer prices for October estimated by Federal Reserve.

ther this year. Business expenditures for plant and equipment have declined moderately from the record levels of last year.

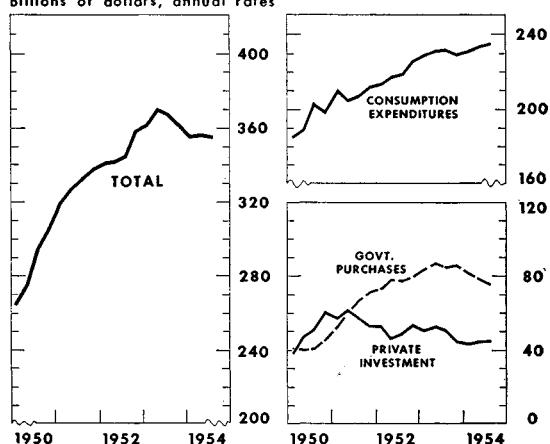

Business inventories through the third quarter continued to be liquidated at about the same rate as in late 1953. The change in inventories this year has thus not exerted significant downward pressure on production, in contrast to the effects of the marked shift in 1953 from rapid accumulation to

EXPENDITURES IN 1954

substantial liquidation. Inventory holdings, particularly in hard goods lines where reductions in output were concentrated, have been considerably reduced. A basis for some expansion in business ordering and for a reduction in the rate of over-all inventory liquidation may be developing. Recent increases in orders for and output of steel, for example, appear to reflect in part the fact that stocks held by steel consumers are now more closely in line with requirements.

Developments in expenditures and output this year have been reflected in the labor market. Manufacturing employment, seasonally adjusted, which had declined considerably after mid-1953, has stabilized in recent months. Employment in nonmanufacturing activities has risen somewhat since midyear, with State and local government employ-

GROSS NATIONAL PRODUCT

¹Third quarter 1954 figures and changes from earlier quarters are for seasonally adjusted totals at annual rates.

Note.—Based on Department of Commerce estimates. Details may not add to totals because of rounding.

CONSUMER EXPENDITURES

Consumer expenditures for goods and services, the largest component of gross national product, have increased this year after a slight decline in late 1953, as the above chart shows. In the third quarter of 1954 such outlays were in record volume, 1.5 per cent larger than a year earlier. The total for the year will also exceed 1953 slightly. The increase will probably occur in outlays for services; over-all outlays for goods are expected to show little change. With average consumer prices little changed this year, the physical volume of consumer takings of goods and services will also increase slightly.

Nondurable goods and services. The 1954 growth in consumer expenditures for services is likely to be about 4 per cent, a smaller increase than in other postwar years. Real consumption has probably not slowed up, however, since prices of many services, par-

EXPENDITURES IN 1954

ticularly rents, have risen much less rapidly than earlier. After allowance for price changes, consumer outlays for such services as housing, medical care, and household operation have continued to expand steadily.

Consumer outlays for nondurable goods increased moderately after the early months of this year and in the third quarter were 2 per cent larger than a year earlier. Expenditures for clothing and shoes have been fairly stable for more than a year at a level somewhat below that of the first half of 1953. Outlays for food and beverages, after a year of little change, have increased appreciably since early 1954, as is shown in the chart. Purchases of other nondurable goods have generally continued to expand slowly.

Durable goods. Consumer expenditures for durable goods have been larger since early spring than in late 1953 and early 1954, but in the third quarter were still about 5 per cent below the level of the first three quarters of 1953. For the full year 1954 such outlays are expected to show about the same percentage decline from the record total for 1953. The decline in real terms will be less

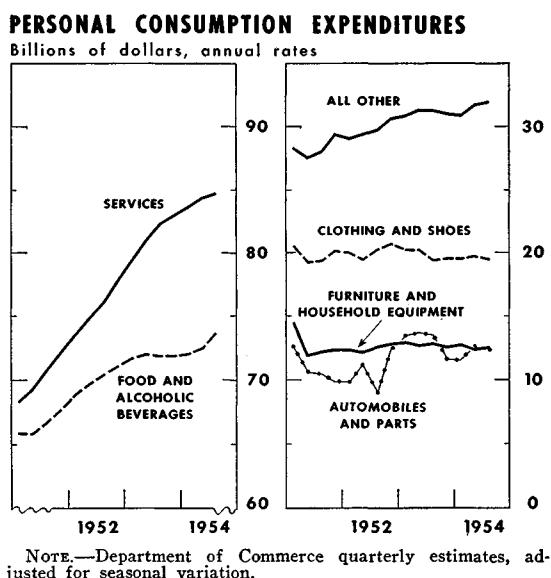

than in dollar amount since average prices of consumer durable goods have been lower than in 1953.

Changes in total spending for durable goods have reflected mainly fluctuations in purchases of new automobiles. Domestic registrations of new passenger cars—for business as well as consumer use—may total 5.3 million units this year, as compared with 5.7 million in 1953 and a record 6.3 million in 1950. Automobile purchases, which had been at reduced levels in late 1953 and early 1954, picked up in the spring. The expansion reflected in part widespread granting of price concessions, which made their appearance much earlier than in 1953. In addition, some lenders eased instalment credit terms and the proportion of cars sold on credit increased. In early autumn output was curtailed sharply for extensive model changeovers. Purchases of new autos were relatively well maintained while dealer stocks were reduced substantially.

Outlays for furniture and household equipment have fluctuated little during the past two years. Although expenditures in the third quarter were down slightly from a year earlier, the physical volume of purchases was apparently little changed since retail prices were also lower. With consumer takings fairly stable, wide swings in output of household durables have been associated mainly with sharp fluctuations in business inventories. Production of major household durable goods declined about one-fourth in the second half of 1953, recovered rapidly during the first half of this year, and in October was one-tenth below the May 1953 peak.

RESIDENTIAL CONSTRUCTION

Expenditures for private residential construction have increased sharply since early this year, as is shown in the chart on page 1148.

EXPENDITURES IN 1954

Seasonally adjusted outlays in October were at a record annual rate of 14.4 billion dollars, more than one-fifth larger than a year earlier. Building costs were relatively stable during the year, and the physical volume of construction increased by about the same proportion as the dollar value.

The number of housing units started in each month since May has been larger than a year earlier. All of the expansion has been in privately financed units; public starts have been only half the year-ago number. Present indications are that housing starts this year may reach 1.2 million units, the largest number since the record 1.4 million in 1950.

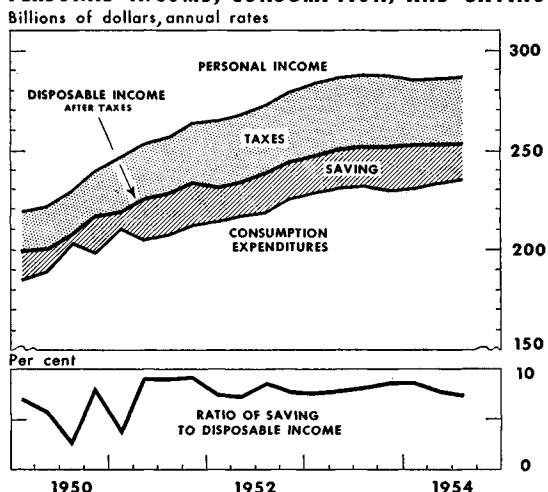

A major factor in the rapid rise in housing construction in 1954 has been the increased availability of mortgage funds on terms favorable to borrowers, as a result mainly of marked easing in capital markets. Since the beginning of this year, terms available on loans guaranteed by the Veterans Administration have become substantially easier and, effective October 1, those on loans insured by the Federal Housing Administration were liberalized as authorized in the Housing Act of 1954.

The substantial increase in private housing starts has been almost entirely under arrangements for VA-guaranteed mortgages. The number of units started under this type of financing doubled over the past year. Loans involving no down payment increased from 13 per cent of VA loans made in January to 34 per cent in September. The proportion bearing 30-year maturities also increased sharply. In recent months the number of units started under FHA commitments has also been larger than a year ago, but the number of conventionally financed units has been considerably smaller.

PERSONAL INCOME AND SAVING

A major factor contributing to strength in markets for consumer goods and services and for housing has been the maintenance of a high level of both personal and disposable income, shown in the chart. Personal income, currently close to the July 1953 peak, has fluctuated only 1 per cent this year, and for 1954 as a whole will about equal the 1953

PERSONAL INCOME, CONSUMPTION, AND SAVING

NOTE.—Department of Commerce quarterly estimates, adjusted for seasonal variation.

total of 286 billion dollars. The maintenance of personal income during a period when total output of goods and services contracted significantly reflects in part some expansion in dividend payments, despite a drop in corporate earnings, and in part a larger volume of Government transfer payments, which do not represent income earned from current production.

Wages and salaries declined more than total personal income from the mid-1953 peak to the spring of this year. Since then wages and salaries have risen somewhat, but in October they were still 2.5 per cent below the earlier high. The bulk of the contraction in total payrolls represents reductions in em-

EXPENDITURES IN 1954

ployment in commodity-producing industries, particularly durable goods manufacturing lines. A moderate decline in hours of work in manufacturing activities was also a factor. A partial offset to these adverse influences on incomes was a small increase in wage rates. Since midsummer seasonally adjusted nonfarm employment has edged up and the average workweek has lengthened a little.

Transfer payments have shown little change since early spring following considerable expansion during the fall and winter. The bulk of the increase in that period represented a rapid growth in unemployment compensation payments. Payments under the Old-Age and Survivors' Insurance Program have also risen, with October payments reflecting benefit increases provided by the 1954 amendments to the Social Security Act.

Income of farm proprietors in the first nine months of this year was close to the reduced level of the corresponding period last year. Dividend and interest income continued to rise and income of nonfarm proprietors showed only minor changes.

Disposable personal income (after taxes) in 1954 is likely to reach a record of about 253 billion dollars, 1 per cent larger than in 1953. The dollar increase will be about the same magnitude as the reduction in Federal individual income tax rates, effective January 1, 1954, which amounted to about 3 billion dollars on an annual basis. With average consumer prices little changed and population continuing to grow at about 1.7 per cent a year, real disposable income per capita will be close to the 1953 level.

Personal saving in 1954 will about equal the peacetime record amount of 1953. The ratio of personal saving to disposable income will probably approach 8 per cent—close to the level of the preceding three years.

Liquid saving by individuals was substantially larger in the first half of this year than in the same period of 1953, as consumers shifted from net expansion to net repayment of their instalment obligations. Since late spring the volume of instalment credit outstanding has shown little change, after adjustment for seasonal influences. Individuals this year have continued to add substantially to their holdings of liquid assets in the form of time deposits, savings and loan shares, corporate and State and local government securities, and equities in insurance policies as well as to their reserves in retirement funds.

BUSINESS FIXED INVESTMENT

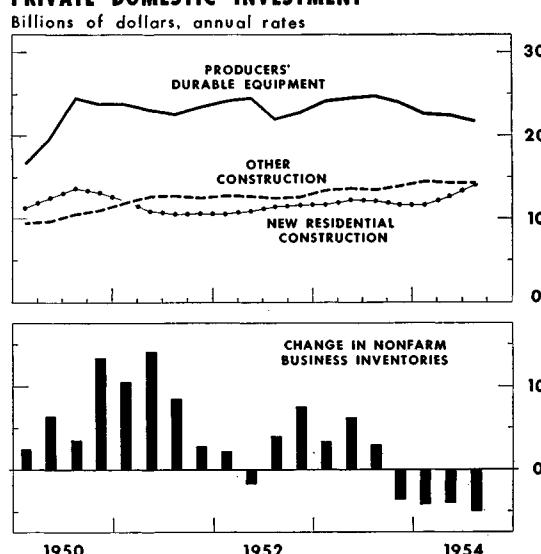

Business outlays for fixed investment—construction of facilities and producers' durable equipment—have declined steadily since last fall and in the third quarter of this year were 7 per cent smaller than a year earlier. Business investment plans, according to the most recent survey made by the Department of Commerce and Securities and Exchange Commission, indicate further reduction in nonfarm business spending for plant and equipment in the current quarter.

Expenditures for producers' durable equipment have declined, as the chart on the following page shows, and in the third quarter were 12 per cent below the level of a year earlier. Construction of business facilities, however, increased somewhat, with the expansion concentrated in stores, office buildings, and other commercial buildings. Fixed capital outlays by farmers were reduced in 1953, and continued to move down this year.

The only major nonfarm industry groups that did not report declines in fixed investment outlays over the past year were mining and commercial and miscellaneous. In both of these groups, expenditures were

EXPENDITURES IN 1954

PRIVATE DOMESTIC INVESTMENT

NOTE.—Department of Commerce quarterly estimates, adjusted for seasonal variation. Changes in farm inventories are not shown.

planned for the third quarter of 1954 in about the same amount as a year earlier, according to the Commerce-SEC survey. Manufacturing industries reduced their outlays 9 per cent over this period; railroads, nearly 40 per cent; and other transportation industries, 12 per cent. Outlays of electric utilities changed little, but those of gas companies declined appreciably.

The decline since last fall in total outlays of nonfarm business for fixed investment reflects in part the substantial increase in productive capacity in recent years in a number of industries and the completion of some large defense-related investment programs. Reductions have been largest among the smaller manufacturing firms, whose after-tax incomes have not held up so well as those of the large companies.

In general, large companies have tended increasingly to relate investment programs to prospects for longer term growth in demands. Aggregate corporate funds available this year from retained earnings plus depre-

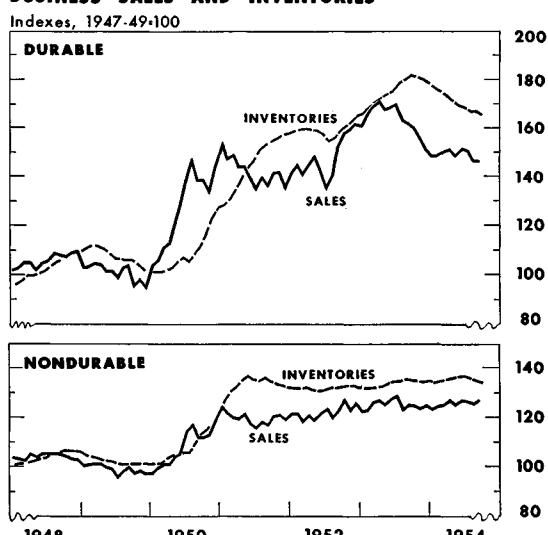

ciation allowances will apparently be as large as last year. While profits before taxes are down sharply, tax liabilities are also much smaller than in 1953. Funds from external sources have been readily available to business this year on terms generally more favorable than in 1953.

CHANGE IN BUSINESS INVENTORIES

Nonfarm business inventories were reduced at an annual rate of 4 to 5 billion dollars in the last quarter of 1953 and each of the first three quarters of this year. This fairly even rate of liquidation contrasts sharply with the change that occurred from the second to the fourth quarter of 1953 when the annual rate of inventory spending declined 10 billion dollars—a shift from accumulation of stocks at a 6 billion dollar rate to liquidation at a 4 billion rate.

The book value of stocks of manufacturers and distributors at the end of September was close to 78 billion dollars, or 5 per cent below the record level of a year earlier. Liquidation was concentrated in durable goods lines,

BUSINESS SALES AND INVENTORIES

NOTE.—Department of Commerce monthly data, seasonally adjusted. Latest sales figures shown are for September; latest inventories, for the end of September.

as may be seen in the chart, and was mostly at the manufacturing level. In early 1954 total durable goods stocks were higher relative to sales than at any time in the recent past, as the drop in sales had exceeded the decline in stocks. More recently, sales have been maintained and stocks have been reduced further, although in August and September inventory liquidation among manufacturers of durable goods was at a considerably reduced rate. Stocks at manufacturers and distributors in durable goods lines at the end of September were 9 per cent smaller than a year earlier. In nondurable goods lines both sales and stocks have been relatively steady for about two years.

Privately held inventories of farm products probably will show little change for the year as a whole, as compared with liquidation of 700 million dollars in 1953. Inventories of livestock on farms may rise slightly this year, with an increase in the number of hogs more than offsetting some decline in cattle herds. Privately held inventories of crops may be reduced somewhat further in 1954, following a substantial decline last year. Farm products held under the Federal price support program—as well as total inventories of such products—have risen less this year than in 1953. Domestic and export demands have been maintained while output of major crops has declined, primarily as a result of acreage restrictions.

GOVERNMENT EXPENDITURES

Federal Government purchases of goods and services declined at an annual rate of 7 billion dollars, about one-eighth, from the first to the third quarter of this year, as may be seen in the table on page 1144. While the bulk of this reduction was in expenditures for national security programs, outlays

for farm price support programs also declined considerably. For the calendar year 1954, total Federal Government purchases are likely to amount to about 50 billion dollars, compared with 60 billion in 1953 and 54 billion in 1952. These figures on purchases of goods and services differ from budget expenditures for a number of reasons, among which are the inclusion here of privately financed as well as Government loans under the farm price support program and the exclusion of other Government lending transactions, transfer payments, and interest on public debt.

Federal purchases for national security in the third quarter of this year were at an annual rate of 42 billion dollars. This was 12 billion, or more than one-fifth, below the peak rate of the second quarter of 1953. Such outlays continued to decline early in the fourth quarter. Since mid-1953 the proportion of gross national product represented by national security purchases has declined from about 14.5 to 12.0 per cent.

Reduction in defense spending has reflected not only declines in expenditures for weapons and military equipment and for construction, but also a cut in the size of the armed forces and diminished outlays for operation of facilities. The armed forces, at about 3.3 million persons, are about one-tenth below their post-Korean peak strength reached in mid-1952. Civilian employment in the Defense Department is about one-sixth below its mid-1952 peak.

Outlays by State and local governments have continued to expand this year at about the same rate as in 1953. Construction activities have increased at an accelerated rate and employment and payrolls have continued to grow.

CURRENT EVENTS AND ANNOUNCEMENTS

Federal Reserve Meetings

The Federal Advisory Council held a meeting in Washington on November 14-16, 1954, and met with the Board of Governors of the Federal Reserve System on November 16.

Death of Member of the Board

The Board of Governors announces with profound regret the death on October 21, 1954, of Mr. Paul E. Miller, who had been a Member of the Board since August 13, 1954. At the time of his appointment, Mr. Miller was the Director of the University of Minnesota Agricultural Extension Division at St. Paul and had been serving as a Class C director of the Federal Reserve Bank of Minneapolis since January 1, 1946. He served as Deputy Chairman at the Federal Reserve Bank of Minneapolis from December 27, 1951 through December 31, 1953, when he was designated Chairman and Federal Reserve Agent.

Death of Director

Mr. George H. Jackson, President, First National Bank in Spokane, Spokane, Washington, who had served as a director of the Seattle Branch of the Federal Reserve Bank of San Francisco since January 1, 1953, died on October 29, 1954.

Transfer of Federal Reserve Branch Territory

Effective December 1, 1954, the territory of the Los Angeles Branch of the Federal Reserve Bank of San Francisco will be extended to include Kern, Mono, and San Luis Obispo counties in California and Clark County in Nevada. The three California counties are now served by the Head Office at San Francisco, and Clark County, Nevada, is served by the Salt Lake City Branch of the Bank.

Changes in Bulletin Tables

The table "Commercial Paper and Bankers' Acceptances Outstanding," (page 1172) has been revised to incorporate data for finance paper placed directly. It gives data for total commercial and finance paper outstanding, with a breakdown by the method of placement.

The table "Open Market Money Rates in New York City" (page 1177) has been revised to include the rates on finance paper placed directly.

Admissions of State Banks to Membership in the Federal Reserve System

The following State banks were admitted to membership in the Federal Reserve System during the period September 16, 1954 to October 15, 1954:

Iowa

Britt—First State Bank.

New York

Mattituck—The North Fork Bank and Trust Company.

NATIONAL SUMMARY OF BUSINESS CONDITIONS

[Released for publication November 16]

Industrial production increased somewhat in October and in early November rose further. Unemployment declined more than seasonally in October and construction activity and retail sales were maintained at high levels. In early November, sales at department stores showed a greater than seasonal rise. Commodity prices generally continued stable while common stock prices rose further.

INDUSTRIAL PRODUCTION

In October industrial production was 125 per cent of the 1947-49 average, according to the Board's preliminary seasonally adjusted index, as compared with 124 in September and 123 in July and August. Activity in the auto and steel industries rose considerably further in the first half of November.

Auto assemblies recovered rapidly after mid-October, and in the second week of November reached the highest rate since May. Output of television sets and most other major household goods remained at an advanced level in October. Activity in producers' and military equipment industries generally continued steady at the curtailed level reached in late spring. Steel output in mid-November was at a rate of 79 per cent of capacity as compared with 73 per cent in October and 67 in Sep-

tember. Production of lumber and other building materials increased further in October.

Output of nondurable goods increased somewhat in October, reflecting mainly gains in textiles, apparel and leather products. Output of crude oil and petroleum refining continued to show little change at levels somewhat below earlier highs, while production of coal increased moderately. Paperboard production in early November was close to the year-ago record rate.

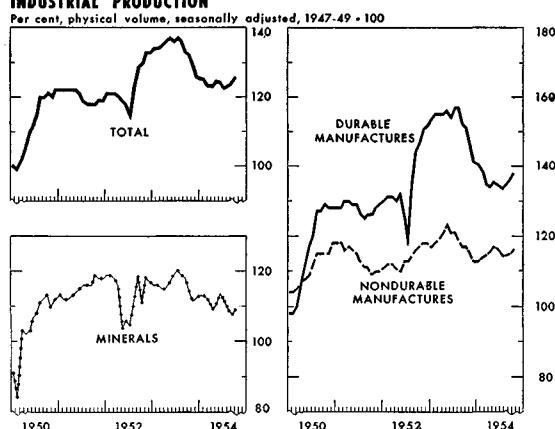

CONSTRUCTION

Expenditures for new construction in October, seasonally adjusted, declined slightly from the advanced September level, reflecting a small decrease in nonresidential building. Value of contract awards increased 8 per cent further to almost 2 billion dollars, the largest volume this year. The number of housing units started in October declined seasonally from the very high September level and at 106,000 were considerably above the 90,000 starts a year earlier.

EMPLOYMENT

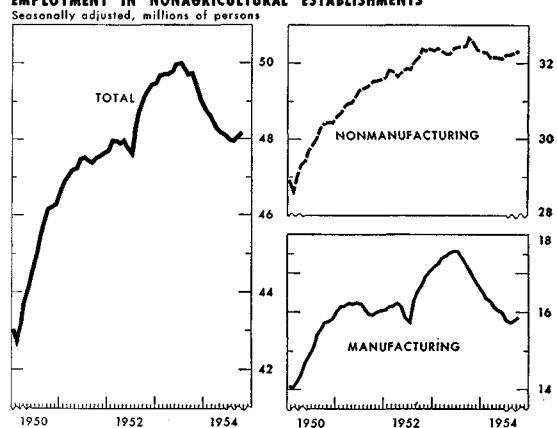

Employment in nonagricultural establishments increased a little more than seasonally in October.

INDUSTRIAL PRODUCTION

Federal Reserve indexes. Monthly figures, latest shown are for October.

EMPLOYMENT IN NONAGRICULTURAL ESTABLISHMENTS

Bureau of Labor Statistics data. Proprietors, self-employed persons and domestic servants are not included. Midmonth figures, latest shown are for October.

NATIONAL SUMMARY OF BUSINESS CONDITIONS

The average workweek at factories rose slightly to 39.9 hours. Hourly earnings showed no change but average weekly earnings, reflecting the rise in the workweek, increased 36 cents to \$72.22—the highest level reached this year. Unemployment declined by 360,000 to 2.7 million; this reduction was somewhat larger than the usual decline at this time of year.

DISTRIBUTION

Seasonally adjusted sales at department stores increased in October to about the summer level and were somewhat above a year ago; in early November they rose further. Total retail sales in October were reduced somewhat by the drop in auto sales accompanying model changeovers. Dealers' stocks of new autos at the end of October were about 50 per cent below last year's model-changeover low.

COMMODITY PRICES

The average level of wholesale commodity prices was stable from mid-October to mid-November as prices of some foodstuffs, which had declined earlier, strengthened and industrial materials generally changed little. Prices of hogs and products rose somewhat as marketings, contrary to expectations, increased little further. The November 1 forecast of the cotton crop was 6 per cent larger than the October 1 forecast, and cotton prices declined somewhat. Wool prices also decreased, but steel scrap, copper scrap, and rubber advanced.

Consumer prices are estimated to have declined slightly further by mid-October, reflecting mainly decreases in retail prices of meats. Since then little further change has occurred.

BANK CREDIT AND RESERVES

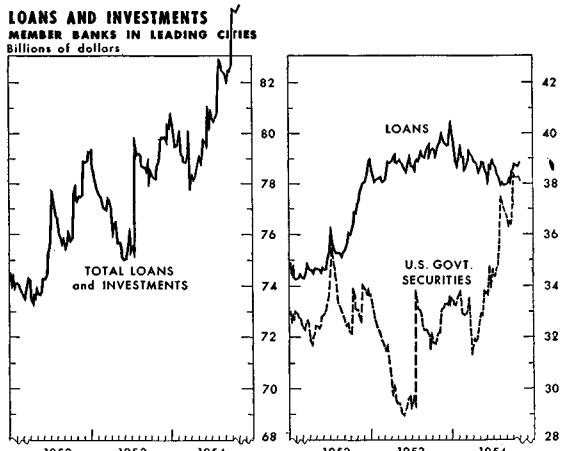

Total loans and investments at banks in leading cities changed little over most of October and early November, following a substantial increase in the first week of October due mainly to bank purchases of new intermediate-term Treasury notes. After these purchases, bank holdings of Government securities declined somewhat, while loans and holdings of corporate and municipal securities increased. Business loans showed little net change in October and early November as new borrowing by the seasonal industries and by petroleum and chemical

manufacturers about offset net repayments by sales finance companies, public utilities, and metal and textile manufacturers.

In October, as in September, excess reserves of member banks averaged about 700 million dollars larger than member bank borrowings at the Reserve Banks. In early November member bank reserve positions tightened due to a currency outflow and a decline in float. Reserve positions eased substantially thereafter, however, reflecting primarily a reduction in Treasury balances at the Reserve and an increase in float. During October and early November the Federal Reserve purchased approximately 700 million dollars of Government securities, about offsetting the effects on bank reserve positions of a seasonal outflow of currency and an increase in required reserves.

SECURITY MARKETS

Corporate and municipal bond yields were relatively stable during the last half of October and early November. After fluctuating within a narrow range during the last half of October, common stock prices rose sharply to new highs after November 2. From mid-October to early November yields on intermediate and long-term Government securities advanced steadily in a thin market, and then declined slightly. Rates on short-term Governments, after remaining generally steady until early November, declined sharply.

Federal Reserve data. Weekly figures, latest shown are for Nov. 3.

Tables on the following pages include the principal statistics of current significance relating to financial and business developments in the United States. The data relating to Federal Reserve Banks, member banks of the Federal Reserve System, and department store trade, and the consumer credit estimates are derived from regular reports made to the Board; index numbers of production are compiled by the Board on the basis of material collected by other agencies; figures for gold stock, money in circulation, Treasury finance, and operations of Government credit agencies are obtained from statements of the Treasury; the remaining financial data and other series on business activity are obtained largely from other sources. Back figures through 1941 for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*; back figures for many other tables may be obtained from earlier BULLETINS.

¹Preliminary.

²Includes industrial loans and acceptances purchased, which are shown separately in subsequent tables.

³These figures are estimated.

Back figures.—See *Banking and Monetary Statistics*, Tables 101–103, pp. 369–394; for description, see pp. 360–366 in the same publication.

MAXIMUM RATES ON TIME DEPOSITS
 [Per cent per annum]

	Nov. 1, 1933-Jan. 31, 1935	Feb. 1, 1935-Dec. 31, 1935	Effective Jan. 1, 1936
Savings deposits.....	3	2½	2½
Postal Savings deposits.....	3	2½	2½
Other deposits payable:			
In 6 months or more.....	3	2½	2½
In 90 days to 6 months.....	3	2½	2
In less than 90 days.....	3	2½	1

Note.—Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q. Under this Regulation the rate payable by a member bank may not in any event exceed the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Maximum rates that may be paid by insured nonmember banks as established by the F.D.I.C., effective Feb. 1, 1936, are the same as those in effect for member banks.

Prescribed in accordance with Securities Exchange Act of 1934	Mar. 30, 1949-Jan. 16, 1951	Jan. 17, 1951-Feb. 19, 1953	Effective Feb. 20, 1953
Regulation T:			
For extensions of credit by brokers and dealers on listed securities.....	50	75	50
For short sales.....	50	75	50
Regulation U:			
For loans by banks on stocks.....	50	75	50

¹Regulations T and U limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of extension; the "margin requirements" shown in this table are the difference between the market value (100%) and the maximum loan value.

Back figures.—See *Banking and Monetary Statistics*, Table 145, p. 504, and *BULLETIN* for March 1946, p. 295, February 1947, p. 162, and February 1953, p. 130.

FEDERAL RESERVE BANK DISCOUNT RATES
[Per cent per annum]

¹Rates shown also apply to advances secured by obligations of Federal intermediate credit banks maturing within 6 months.

NOTE.—Maximum maturities. Discounts for and advances to member banks: 90 days for discounts and advances under Sections 13 and 13a of the Federal Reserve Act except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not exceeding 6 months and 9 months, respectively, and advances secured by obligations of Federal intermediate credit banks maturing within 6 months are limited to maximum maturities of 15 days; 4 months for advances under Section 10(b). Advances to individuals, partnerships, or corporations under the last paragraph of Section 13: 90 days. Back figures.—See *Banking and Monetary Statistics*, Tables 115-116, pp. 439-443.

FEDERAL RESERVE BANK BUYING RATES ON ACCEPTANCES
[Per cent per annum]

Maturity	Rate on Oct. 31	In effect beginning—	Previous rate
1-90 days.....	1 1/4	Apr. 16, 1954	1 3/4
91-120 days.....	1 1/2	Apr. 16, 1954	1 3/8
121-180 days.....	1 1/4	Apr. 16, 1954	2

NOTE.—Effective minimum buying rates on prime bankers' acceptances payable in dollars. Back figures.—See *Banking and Monetary Statistics*, Table 117, pp. 443-445.

FEDERAL RESERVE BANK RATES ON INDUSTRIAL LOANS AND COMMITMENTS UNDER SECTION 13B OF THE FEDERAL RESERVE ACT

Maturities not exceeding five years

[In effect October 31. Per cent per annum]

Federal Reserve Bank	To industrial or commercial businesses		To financing institutions			On discounts or purchases	On commitments	Portion for which institution is obligated	Remaining portion				
	On loans ¹	On commitments											
Boston.....	3-5 1/2	1 1/2-1 1/4	(2)	(8)	1 1/2-1 1/4

July 29.....	20	18	18	25
Aug. 1.....	12	12	12	25
In effect Nov. 1, 1954 ⁴	20	18	12	5

¹Demand deposits subject to reserve requirements, which beginning Aug. 23, 1935, have been total demand deposits minus cash items in process of collection and demand balances due from domestic banks (also minus war loan and series E bond accounts during the period Apr. 13, 1943-June 30, 1947).

²Requirement became effective at country banks.

³Requirement became effective at central reserve and reserve city banks.

⁴Present legal minimum and maximum requirements on net demand deposits—central reserve cities, 13 and 26 per cent; reserve cities, 10 and 20 per cent; country, 7 and 14 per cent, respectively; on time deposits at all member banks, 3 and 6 per cent, respectively.

Borrowings at Federal Reserve Banks.....	67	2	9	28	28	468	32	51	275	110	

¹ Averages of daily closing figures for reserves and borrowings and of daily opening figures for other items, inasmuch as reserves required are based on deposits at opening of business.

² Demand deposits subject to reserve requirements, i. e., gross demand deposits minus cash items reported as in process of collection and demand balances due from domestic banks.

³ See table on preceding page for changes in reserve requirements.

¹Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.

²Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.

³Not covered by Federal Reserve Bank commitment to purchase or discount.

NOTE.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

¹Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States. Totals for other end-of-month dates are shown in table above, totals by weeks in table on p. 1155.

²Includes \$156,039,431 held as reserve against United States notes and Treasury notes of 1890.

³To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.

⁴Because some of the types of money shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See note for explanation of these duplications. ⁵Less than \$500,000.

NOTE.—There are maintained in the Treasury—(i) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (ii) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on receipt); (iii) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (iv) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such gold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or of direct obligations of the United States. Each Federal Reserve Bank must maintain a reserve in gold certificates of at least 25 per cent against its Federal Reserve notes in actual circulation. Gold certificates deposited with Federal Reserve agents as collateral, and those deposited with the Treasurer of the United States as a redemption fund, are counted as reserve. "Gold certificates" as herein used includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve Bank notes and national bank notes are in process of retirement.

^pPreliminary.

¹Treasury funds included are the gold account, Treasury currency account, and Exchange Stabilization Fund.

²Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection.

³Excludes interbank time deposits; United States Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.

⁴Prior to June 30, 1947, includes a relatively small amount of demand deposits.

NOTE.—For description of statement and back figures, see BULLETIN for January 1948, pp. 24-32. The composition of a few items differs slightly from the description in the BULLETIN article; stock of Federal Reserve Banks held by member banks is included in "Other securities" and in "Capital and miscellaneous accounts, net" and balances of the Postal Savings System and the Exchange Stabilization Fund with the U. S. Treasury are netted against "Capital and miscellaneous accounts, net" instead of against U. S. Government deposits and Treasury cash. Total deposits and currency shown in the monthly Chart Book excludes "Foreign bank deposits, net" and "Treasury cash." Except on call dates, figures are rounded to nearest 100 million dollars and may not add to the totals. See Banking and Monetary Statistics, Table 9, pp. 34-35, for back figures for deposits and currency.

*Preliminary.

*All banks" comprise "all commercial banks" and "all mutual savings banks." "All commercial banks" comprise "all nonmember commercial banks" and "all member banks" including one bank in Alaska (total deposits of approximately 3 million dollars) that became a member bank on Apr. 15, 1954, but excluding three mutual savings banks that became members in 1941. Stock savings banks and nondeposit trust companies are included with "commercial" banks. Number of banks includes a few noninsured banks for which asset and liability data are not available. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

^aBeginning June 30, 1942, excludes reciprocal balances, which on Dec. 31, 1942, aggregated 513 million dollars at all member banks and 525 million at all insured commercial banks.

^bIncludes "other" assets and liabilities, not shown separately.

For other footnotes see following two pages.

^aBeginning with Dec. 31, 1947, the all bank series was revised as announced in November 1947 by the Federal bank supervisory agencies. At that time a net of 115 noninsured nonmember commercial banks with total loans and investments of approximately 110 million dollars was added, and 8 banks with total loans and investments of 34 million were transferred from noninsured mutual savings to nonmember commercial banks.

For other footnotes see preceding and opposite pages.

²Breakdown of loan, investment, and deposit classifications is not available prior to 1947; summary figures for earlier dates appear in the preceding table.

³Central reserve city banks.

⁴Beginning June 30, 1942, excludes reciprocal bank balances, which on Dec. 31, 1942, aggregated 513 million dollars at all member banks and 525 million at all insured commercial banks.

⁵Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection.

For other footnotes see preceding page.

Back figures.—See *Banking and Monetary Statistics*, Tables 18-45, pp. 72-103 and 108-113.

¹Revised to include 26 weeks ended July 1 and 26 weeks ended December 30, 1953.

²Sample includes about 220 weekly reporting member banks reporting changes in their larger loans; these banks hold over 90 per cent of total commercial and industrial loans of all weekly reporting member banks and nearly 70 per cent of those of all commercial banks.

³Figures for other than weekly periods are based on weekly changes during period.

³Net change at all banks in weekly reporting series, according to the old series in 1951 and the revised series thereafter. For description of revisions in the weekly reporting series see BULLETIN for April 1953, p. 357.

¹New series; not comparable with earlier data.

²As reported by dealers; includes finance company paper as well as other commercial paper sold in the open market.

³As reported by finance companies that place their paper directly with investors.

Back figures.—For bankers' acceptances, see *Banking and Monetary Statistics*, Table 127, pp. 465-467; for description see p. 427.

^aCorrected.

^bIncludes United States and foreign.

^cCentral government only.

^dIncludes International Bank for Reconstruction and Development.

^eThese represent annual statement asset values, with bonds carried on an amortized basis and stocks at end-of-year market value.

^fThese represent book value of ledger assets. Adjustments for interest due and accrued and differences between market and book values are not made on each item separately, but are included in total in "Other assets."

¹Preliminary.

¹Loans by purpose and agency are shown on a gross basis; total loans and all other assets are shown on a net basis,

i.e., after reserve for losses.

²Several changes in coverage have been made over the period for which data are shown. The more important are: exclusion of the following agencies following repayment of the U. S. Government interest—Federal land banks after 1946 and the Home Owners' Loan Corporation after June 1951; exclusion of the United States Maritime Commission (including War Shipping activities) after 1947, when this agency ceased to report to the U. S. Treasury; and inclusion of the Mutual Security Agency (superseded by the Foreign Operations Administration) beginning June 1952 and of the Federal Maritime Board and Maritime Administration beginning June 1953.

³Figures for this agency for the early years shown have been adjusted to include activities of its predecessor, the Farm Security Administration, and of the Regional Agricultural Credit Corporation and also the Emergency Crop and Feed Loans of the Farm Credit Administration.

⁴Figures for RFC Mortgage Co., whose assets and liabilities were taken over by the Reconstruction Finance Corporation in 1947, are included with "Other agencies" in 1945 and 1946.

⁵RFC figures for the end of the third quarter 1953 were for Sept. 28; on Sept. 29, pursuant to the act approved July 30, 1953 (67 Stat. 230), the RFC started liquidation of its activities except those which existing law or this law permitted to be transferred elsewhere.

⁶Reconstruction Finance Corporation loans to aid home owners, which increased steadily through the first three quarters of 1947 and during 1948, appear to have been included with "other" loans in the statement for Dec. 31, 1947.

⁷Figures adjusted to include certain affiliates of the Reconstruction Finance Corporation. Several of these—including the Defense Plant Corporation, Defense Supplies Corporation, Metals Reserve Company, and Rubber Reserve Company—were merged with the parent effective July 1, 1945. Most of their activities were reflected under "Commodities, supplies, and materials" and "Land, structures, and equipment."

⁸Reflects transfer of RFC lending under Defense Production Act of 1950 from the RFC to the Treasury Dept. ⁹Less than \$500,000.

¹⁰Figures represent largely the Treasury loan to United Kingdom and through 1952 are based in part on information not shown in Treasury compilation.

¹¹Represents lending under Mutual Security Agency (predecessor of FOA) included in the Treasury compilation beginning with balance sheet for June 30, 1952; figure not published in Treasury compilation, but derived by Federal Reserve.

¹²Reflects activities of the Federal Public Housing Authority under the U. S. Housing Act, as amended, until July 27, 1947, when these activities were transferred to the newly established Public Housing Administration. War housing and other operations of the Authority—shown on the Treasury Statement with "other agencies" through 1947—were not transferred to the PHA until 1948.

¹³Beginning 1951, includes figures for Panama Canal Company, a new corporation combining the Panama Railroad Company (included in earlier Treasury Statements) and the business activities of the Panama Canal (not reported prior to that time). See also footnote 12.

¹⁴Assets representing unrecovered costs to the Corporation in its national defense, war, and reconversion activities, which are held for the Treasury for liquidation purposes in accordance with provisions of Public Law 860, 80th Congress.

NOTE.—Statement includes certain business-type activities of the United States Government. Figures for some agencies—usually small ones—may be for dates other than those indicated. Comparability of the figures with those for years prior to 1944 has been affected by (1) the adoption of a new reporting form beginning Sept. 30, 1944, and (2) changes in activities and agencies included (see footnote 2). For back figures see *Banking and Monetary Statistics*, Table 152, p. 517.

^aCorrected.

^bMonthly and weekly data for U. S. Government bond prices and volume of trading are averages of daily figures; for other series monthly and weekly data are based on figures for one day each week—Wednesday closing prices for municipal and corporate bonds, preferred stocks, and common stocks (Standard and Poor's Corporation) and weekly closing prices for common stocks (Securities and Exchange Commission).

^cFully taxable, marketable 2½ per cent bonds first callable after 12 years. Of these the 1967-72 bonds are the longest term issues. Prior to Apr. 1, 1952, only bonds due or first callable after 15 years were included.

^dThe 3 1/4 per cent bonds of 1978-83, issued May 1, 1953.

^ePrices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent 20-year bond.

^fStandard and Poor's Corporation. Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend.

^gAverage daily volume of trading in stocks on the New York Stock Exchange.

^hBack figures.—See *Banking and Monetary Statistics*, Tables 130, 133, 134, and 136, pp. 475, 479, 482, and 486, respectively, and *BULLETIN* for May 1945, pp. 483-490, and October 1947, pp. 1251-1253.

¹Excludes balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) firms' own partners.

²Includes money borrowed from banks and also from other lenders (not including member firms of national securities exchanges).

³As reported to the New York Stock Exchange. According to these reports, the part of total customers' debit balances represented by balances secured by U. S. Government securities was (in millions of dollars): July, 33; August, 31; September, 34.

Note.—For explanation of these figures see "Statistics on Margin Accounts" in *BULLETIN* for September 1936. The article describes the method by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

Back figures.—See *Banking and Monetary Statistics*, Tables 143 and 144, pp. 501-503.

¹ Monthly and weekly data are averages of daily figures, except for municipal bonds and for preferred stocks, which are based on figures for Wednesday. Figures for common stocks, except for annual averages, are as of the end of the period (quarterly in the case of earnings/price ratio).

² Fully taxable, marketable 2½ per cent bonds first callable after 12 years. Of these the 1967-72 bonds are the longest term issues. Prior to Apr. 1, 1952, only bonds due or first callable after 15 years were included.

³ The 3½ per cent bonds of 1978-83, issued May 1, 1953.

⁴ Standard and Poor's Corporation.

⁵ Moody's Investors Service, week ending Friday. Because of a limited number of suitable issues, there has been some variation in the number of bonds included in some of the groups.

⁶ Standard and Poor's Corporation. Ratio is based on 9 median yields in a sample of noncallable issues, 12 industrial and 3 public utility.

⁷ Moody's Investors Service.

⁸ Computed by Federal Reserve from data published by Moody's Investors Service.

Back figures.—See *Banking and Monetary Statistics*, Tables 128-129, pp. 468-474, and *BULLETIN* for May 1945, pp. 483-490, and October 1947, pp. 1251-1253.

TREASURY RECEIPTS, EXPENDITURES, AND RELATED ITEMS

¹Preliminary.

²n.a. Not available.

³Revised.

¹Beginning November 1950, investments of wholly owned Government corporations in public debt securities are excluded from Budget expenditures, and included with other such investments under "Trust and other accounts."

²Fiscal year totals on new reporting basis, described in *Treasury Bulletin* for April 1954, p. A2. Monthly breakdown on new basis not yet available prior to February 1954 for most items.

³Not adjusted for Treasury's revised treatment of carriers' taxes. ⁴Includes the following not shown separately: Maritime activities, special defense production expansion programs, Economic Stabilization Agency, and Federal Civil Defense Administration.

⁵Consists of foreign economic and technical assistance under the Mutual Security Act, net transactions of the Export-Import Bank, and other nonmilitary foreign aid programs, as well as State Department and United States Information Agency expenditures. ⁶Excludes transfers to trust accounts, which are shown separately. ⁷Includes Farm Credit Administration and Agriculture Department, except expenditures for forest development of roads and trails which are included with public works.

¹n.a. Not available. ²Beginning February 1954, on new reporting basis. See footnote 2 on preceding page. ³Not adjusted for Treasury's revised treatment of carriers' taxes. ⁴Carriers' taxes deducted. ⁵Beginning March, income and profits taxes announced in the Treasury's Monthly Statement. ⁶Reporting of some excises changed to quarterly basis. ⁷Excess of receipts, or expenditures (—).

⁸Consists of net investments in public debt securities of quasi Government corporations and agencies and other trust funds beginning with July 1950, which prior to that date are not separable from the next column; and, in addition, of net investments of wholly owned Government corporations, European Payments Union deposit fund, and suspense accounts of Defense and other Government departments. Investments of wholly owned Government corporations are included as specified in footnote 8, but their operating transactions are included in Budget expenditures.

⁹Consists of net investments in public debt securities of quasi Government corporations and agencies and other trust funds beginning with July 1950, which prior to that date are not separable from the next column; and, in addition, of net investments of wholly owned Government corporations and agencies beginning with November 1950, which prior to that date are included with Budget expenditures (for exceptions see footnote 1 on previous page). ¹⁰Beginning July, includes undistributed depository receipts. ¹¹Revised.

n.a. Not available. ¹Revised. ²Represents principally interest paid to Treasury by Government agencies and repayment of capital stock and paid-in surplus by quasi Government corporations. ³Represents principally interest on investments in U. S. Government securities, payroll deductions for Government employees' retirement accounts, and transfers shown as Budget expenditures.

³Represents principally excess of interest accruals over payments on savings bonds and Budgetary expenditures involving issuance of Federal securities; the latter include mostly armed forces leave bonds and notes issued to the International Bank and Monetary Fund, which are treated as noncash expenditures at the time of issuance and cash expenditures at the time of redemption.

⁴Represents principally noncash items shown under trust account receipts (described in footnote 2); also includes small adjustments for noncash interest reflected in noncash Budget receipts (see footnote 1) and in noncash trust account expenditures (see footnote 5).

⁵Represents principally repayments of capital stock and paid-in surplus by quasi Government corporations, as well as interest receipts by such corporations on their investments in the public debt (negative entry). ⁶Cash transactions between Intl. Monetary Fund and Exchange Stabilization Fund. (See footnote 3.) ⁷Beginning February 1954, on new reporting basis. See footnote 8 on following page.

⁸Not adjusted for Treasury's revised treatment of carriers' taxes.

n.a. Not available.

¹Differs from "accruals to the public" shown in preceding table, principally because adjustments to Exchange Stabilization Fund are included.

²Includes redemptions of tax anticipation securities and savings notes used in payment of taxes.

³Most changes in convertible Series B investment bonds, 1975-80, reflect exchanges of, or conversions into, marketable issues and thus cancel out in this column. An exception was the sale for cash of about 300 million dollars in June 1952.

⁴Includes cash issuance in the market of obligations of Government corporations and agencies and some miscellaneous debt items.

⁵Excludes exchanges of savings bonds into marketable bonds, in the amount of 417 million dollars, of which 409 million represents issue price.

⁶Beginning February 1954, on new reporting basis. See footnote 8 on following page. This table is based on Treasury daily statement, which differs from monthly budget statement.

^aPreliminary. ^bn.a. Not available.

¹Income taxes include current and back taxes; individual taxes also include estate and gift taxes and, prior to July 1953, adjustment to Treasury daily statement. Income taxes through June 1953 are from internal revenue service reports, thereafter from Treasury daily statement.

²Includes taxes for old-age and unemployment insurance, carriers taxes, and veterans life insurance premiums.

³Represents mostly nontax receipts. ⁴Represents Budget expenditures adjusted for net redemptions of armed forces leave bonds and special International Bank and Monetary Fund notes.

⁵Represents Budget expenditures less the excess of interest accruals over payments on savings bonds and Treasury bills and less interest paid by the Treasury to (1) trust funds and accounts and (2) Government corporations not wholly owned.

⁶Represents Budget outlays plus payments to the public from veterans life insurance funds and redemptions of adjusted service bonds.

⁷Represents Budget outlays plus benefit payments and administrative expenses of trust funds for old-age and unemployment insurance and Government employees and Railroad retirement funds. ⁸Fiscal year totals on new reporting basis, described in *Treasury Bulletin* for April 1954 p. A2. Monthly breakdown on new basis not yet available prior to February 1954 for most items.

^aPreliminary.

¹Figures include as maturities 126 million dollars of unredeemed Series 1953 F and G bonds. In accordance with Treasury practice all unredeemed bonds of this series were carried as outstanding interest-bearing debt until the entire series matured.

²Due to changes in Treasury processing, a large amount of redemptions of E bonds in June and July 1954 was not broken down as to issue price and accrued discount. Hence, the redemption figures include some accrued discount, which is being deducted in subsequent months.

³NOTE.—Sales, redemptions, and maturities of bonds are shown at issue price; amount outstanding at current redemption value. Maturities of notes and series A-D, and F and G bonds are included as of maturity date (end-of-calendar year) and only interest-bearing debt is included in amount outstanding.

¹Revised.

²Gross proceeds are derived by multiplying principal amounts or number of units by offering price.

³Includes issues guaranteed.

⁴Issues not guaranteed.

⁵Includes foreign government; International Bank; and domestic eleemosynary and other nonprofit.

⁶Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i.e., compensation to underwriters, agents, etc., and expenses.

⁷Includes proceeds for plant and equipment and working capital.

⁸Includes proceeds for the retirement of mortgages and bank debt with original maturities of more than one year. Proceeds for retirement of short-term bank debts are included under the uses for which the bank debt was incurred.

⁹Includes all issues other than those for retirement of securities.

¹⁰Retirement of securities only.

¹ Includes 26 companies in groups not shown separately, as follows: textile mill products (10); paper and allied products (15); miscellaneous (1).

² Includes 25 companies in groups not shown separately, as follows: building materials (12); transportation equipment other than automobile (6); and miscellaneous (7).

Note.—**Manufacturing corporations.** Data are from published company reports, except sales which are obtained from the Securities and Exchange Commission.

Railroads. Figures are for Class I line-haul railroads (which account for 95 per cent of all railroad operations) and are obtained from reports of the Interstate Commerce Commission.

Electric power. Figures are for Class A and B electric utilities (which account for about 95 per cent of all electric power operations) and are obtained from reports of the Federal Power Commission, except that quarterly figures on operating revenue and profits before taxes are partly estimated by the Federal Reserve, to include affiliated nonelectric operations.

Telephone. Revenues and profits are for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Lines and General departments of American Telephone and Telegraph Company) and for two affiliated telephone companies, which together represent about 85 per cent of all telephone operations. Dividends are for the 20 operating subsidiaries and the two affiliates. Data are obtained from the Federal Communications Commission.

All series. Profits before taxes refer to income after all charges and before Federal income taxes and dividends. For description of series and back figures, see pp. 662-666 of the BULLETIN for June 1949 (manufacturing); pp. 215-217 of the BULLETIN for March 1942 (public utilities); and p. 908 of the BULLETIN for September 1944 (electric power).

¹ Reflects cash transactions only. As compared with data shown on p. 1184, new issues exclude foreign and include investment company offerings, sales of securities held by affiliated companies or RFC, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose shown on p. 1184.

¹Derived figures, which include negligible amount of farm loans held by savings and loan associations. ²Derived figures, which include debt held by Federal land banks and Farmers Home Administration.

NOTE.—Figures for first three quarters of each year, and all figures for December 1953 except those on total farm (preliminary estimate from Dept. of Agriculture), are Federal Reserve estimates. Financial institutions include commercial banks (including nondeposit trust companies but not trust departments), mutual savings banks, life insurance companies and savings and loan associations. Federal agencies include HOLC, FNMA, and VA (the bulk of the amounts through 1948 held by HOLC, since then by FNMA). Other Federal agencies (amounts small and separate data not readily available currently) are included with "Individuals and others."

Sources.—Federal Deposit Insurance Corporation, Home Loan Bank Board, Institute of Life Insurance, Departments of Agriculture and Commerce, Federal National Mortgage Association, Veterans Administration, Comptroller of the Currency, and Federal Reserve.

^rRevised.

¹Includes all banks in the United States and possessions. ²Includes loans held by nondeposit trust companies but excludes holdings of trust departments of commercial banks. March and September figures are Federal Reserve estimates based on data from Member Bank Call Report and from weekly reporting member banks. For 1940, figures except for the grand total are Federal Reserve estimates based on data for insured commercial banks.

³Data not available for all classifications prior to December 1951.

⁴Through 1946, figures except for the grand total are estimates based on Federal Reserve preliminary tabulation of a revised series of banking statistics. March and September figures are Federal Reserve estimates based in part on data from National Association of Mutual Savings Banks.

Sources.—All bank series prepared by Federal Deposit Insurance Corporation from data supplied by Federal and State bank supervisory agencies; Comptroller of the Currency; and Federal Reserve.

^aRevised.

Note.—For loans acquired, monthly figures may not add to annual totals, and for loans outstanding, end-of-December figures may differ from end-of-year figures, because monthly figures represent book value of ledger assets whereas year-end figures represent annual statement asset values, and because year-end adjustments are based on more nearly complete data. Prior to 1947, complete data are not available for all classifications shown.

Sources.—Institute of Life Insurance—end-of-year figures, *Life Insurance Fact Book*; end-of-month figures, the *Tally of Life Insurance Statistics* and *Life Insurance News Data*.

^aMonthly figures do not reflect mortgage amendments included in annual totals.

^bFHA-insured property improvement loans are not ordinarily secured by mortgages; VA-guaranteed alteration and repair loans of \$1,000 or less need not be secured, whereas those for more than that amount must be.

^cPrior to 1949, data are not available for classifications shown.

NOTE.—FHA-insured loans represent gross amount of insurance written; VA-guaranteed loans, gross amount of loans closed. Figures do not take account of principal repayments on previously insured or guaranteed loans. For VA-guaranteed loans, amounts by type are derived from data on number and average amount of loans closed.

Sources.—Federal Housing Administration and Veterans Administration.

^pPreliminary. ^rRevised.

NOTE.—For total debt outstanding, figures for first three quarters are Federal Reserve estimates. For conventional, figures are derived.

Sources.—Home Loan Bank Board, Federal Housing Administration, Veterans Administration, and Federal Reserve.

^r Revised. Figures beginning January 1953 have been revised. Figures for all of 1953, together with a descriptive note on the revision, are shown on p. 1212.

¹ Includes all consumer instalment credit extended for the purpose of purchasing automobiles and other consumer goods and secured by the items purchased, whether held by retail outlets or financial institutions. Includes credit on purchases by individuals of automobiles or other consumer goods that may be used in part for business.

² Includes only repair and modernization loans held by financial institutions; such loans held by retail outlets are included in "other consumer goods paper."

NOTE.—Monthly figures for the period December 1939 through 1951 and a general description of the series are shown on pp. 336-354 of the BULLETIN for April 1953. Revised monthly figures for 1952 are shown on p. 1214 of the BULLETIN for November 1953. A detailed description of the methods used to derive the estimates may be obtained from Division of Research and Statistics.

* Revised. See footnote to table at top of p. 1190.

* Includes adjustment for differences in trading days.

NOTE.—Back figures by months for the period 1940–52, together with a discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates, are shown in the BULLETIN for January 1954, pp. 9–22. Estimates of instalment credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and include finance, insurance, and other charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

*Estimated. ^aPreliminary. ^bRevised. *Average per working day.

²Three-month moving average, based on F. W. Dodge Corporation data. A description of the index may be obtained from the Division of Research and Statistics. For monthly data (dollar value) by groups, see p. 1201.

³The indexes of employment and payrolls, wholesale commodity prices, and consumer prices are compiled by the Bureau of Labor Statistics. Nonagricultural employment covers employees only and excludes personnel in the armed forces. The consumer prices index is the revised series, reflecting beginning January 1953 the inclusion of some new series and revised weights; prior to January 1953 indexes are based on the "interim adjusted" and "old" indexes converted to the base 1947-49=100.

⁴For indexes by Federal Reserve districts and for other department store data, see pp. 1203-1207.

Back figures in BULLETIN.—Industrial production, December 1953, pp. 1324-1328; department store sales, December 1951, pp. 1490-1515.

* Preliminary. ^r Revised. ^c Corrected.

¹ Indexes for women's outerwear have been revised beginning January 1954 on the basis of a change from quarterly to monthly reporting by the Bureau of the Census.

NOTE.—A number of groups and subgroups include individual series not published separately, and metal fabricating contains the ordnance group in addition to the groups shown. Certain types of combat materiel are included in major group totals but not in individual indexes for autos, farm machinery, and some other products, as discussed in the BULLETIN for December 1953, pp. 1269-1271.

For description and back figures, see BULLETIN for December 1953, pp. 1247-1293 and pp. 1298-1328, respectively.

^a Preliminary. ^b Revised.

^c Corrected.

¹ Indexes have been revised beginning January 1954 on the basis of a change from quarterly to monthly reporting by the Bureau of the Census.

NOTE.—A number of groups and subgroups include individual series not published separately. For description and back figures, see BULLETIN for December 1953, pp. 1247-1293 and pp. 1298-1328, respectively.

¹Includes self-employed, unpaid family, and domestic service workers.

²Monthly estimates of the labor force beginning 1954 are based on an improved sample covering a larger number of areas and are, therefore, not strictly comparable with earlier data.

NOTE.—Details do not necessarily add to group totals. Information on the labor force status of the population is obtained through interviews of households on a sample basis. Data relate to the calendar week that contains the eighth day of the month. Back data may be obtained from the Bureau of the Census.

*Preliminary.

n.a. Not available.

¹Less than 500 units.

Note.—Government underwritten units are those started under commitments of FHA or VA to insure or guarantee the mortgage. VA figures after June 1950 and all FHA figures are based on field office reports of first compliance inspections; VA figures prior to June 1950, estimates based on loans closed information. Other figures are estimated by Bureau of Labor Statistics on the basis of reports of building permits issued, reported starts of public units, and a sample of places not issuing permits.

^aPreliminary.

^bRevised.

¹The first three ratios are of stocks and/or orders at the end of the month to sales during the month. The final ratio is based on totals of sales and receipts for the month.

²These figures are *not* estimates for all department stores in the United States. They are the actual dollar amounts reported by a group of department stores located in various cities throughout the country. In 1953, sales by these stores accounted for about 50 per cent of estimated total department store sales.

³Receipts of goods are derived from the reported figures on sales and stocks. New orders are derived from receipts and reported figures on outstanding orders.

NOTE.—For description and monthly figures for back years, see BULLETIN for October 1952, pp. 1098-1102.

¹The ratio of stocks to sales is obtained by dividing stocks at the end of the month by sales during the month and hence indicates the number of months' supply on hand at the end of the month in terms of sales for that month.

²The 1947-49 average of monthly sales and of end-of-month stocks for each department is used as a base in computing the sales and stocks indexes, respectively, for that department. For description of indexes, see BULLETIN for November 1953, pp. 1146-1149.

³For movements of total department store sales and stocks, see the indexes for the United States on p. 1203.

⁴Data not available.

NOTE.—Based on reports from a group of large department stores located in various cities throughout the country. In 1953, sales and stocks at these stores accounted for almost 50 per cent of estimated total department store sales and stocks. Not all stores report data for all of the departments shown; consequently, the sample for the individual departments is not so comprehensive as that for the total.

¹Preliminary.

²Includes construction expenditures for crude petroleum and natural gas drilling.

³Consists of sales abroad and domestic sales of surplus consumption goods and materials.

⁴Includes compensation for injuries, employer contributions to private pension and welfare funds, and other payments.

⁴Includes business and professional income, farm income, and rental income of unincorporated enterprise; also a noncorporate inventory valuation adjustment.

⁵Includes government social insurance benefits, direct relief, mustering out pay, veterans' readjustment allowances and other payments, as well as consumer bad debts and other business transfers.

⁶Prior to 1952 includes employee contributions only; beginning January 1952, includes also contributions to the old-age and survivors' insurance program of the self-employed to whom coverage was extended under the Social Security Act Amendments of 1950. Personal contributions are not included in personal income.

⁷Includes personal income exclusive of net income of unincorporated farm enterprise, farm wages, agricultural net interest, and net dividends paid by agricultural corporations.

⁸Note.—Details may not add to totals because of rounding.

NOTE.—Revisions for the period January 1953 to date incorporate more comprehensive information available recently from the following: commercial bank reports of condition for December 1953 and June 1954, Bureau of the Census annual survey of retail trade for 1953, and annual reports for 1953 from Bureau of Federal Credit Unions, State supervisory authorities, and other sources. Revisions for 1954 and explanatory notes appear in the regular tables (pp. 1190-1192). Sales finance company figures have not been changed.

INTERNATIONAL FINANCIAL STATISTICS

	PAGE
International capital transactions of the United States.....	1214-1218
Gold production	1218
Estimated foreign gold reserves and dollar holdings.....	1219
Reported gold reserves of central banks and governments.....	1220
Net gold purchases and gold stock of the United States.....	1221
International Monetary Fund and Bank.....	1222
Central banks	1222-1226
Money rates in foreign countries.....	1227
Commercial banks	1228
Foreign exchange rates.....	1229
Price movements in principal countries:	
Wholesale prices	1230
Consumers' price indexes.....	1231
Security prices	1231

Tables on the following pages include the principal available statistics of current significance relating to gold, international capital transactions of the United States, and financial developments abroad. The data are compiled for the most part from regularly published sources such as central and commercial bank statements and official statistical bulletins; some data are reported to the Board directly. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Back figures for all except price tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*.

*Preliminary. n.a. Not available.

^a"Short-term liabilities" reported in these statistics represent principally demand deposits and U. S. Government obligations maturing in not more than one year from their date of issue, held by banking institutions in the United States; small amounts of bankers' acceptances and commercial paper and of liabilities payable in foreign currencies are also included.

^bIncludes International Bank for Reconstruction and Development, International Monetary Fund, and United Nations and other international organizations. Excludes Bank for International Settlements, reported under "Other Europe."

^cRepresents funds held with banks and bankers in the United States (and in accounts with the U. S. Treasury) by foreign central banks and by foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.).

^dBeginning Mar. 31, 1954, banks whose total liabilities to foreigners are less than \$500,000 are excluded. Banks claiming this exemption reported a total of 15.9 million dollars of such liabilities on that date.

^eBeginning Apr. 30, 1954, includes liabilities to foreigners held by banks in the territories and possessions of the United States. These banks reported a total of 16 million dollars of such liabilities on that date.

^fThrough 1952, reported by banks in the Second (New York) Federal Reserve District only.

^gThese data are based on reports by banks in the Second (New York) Federal Reserve District only and represent a partial breakdown of the amounts shown in the "other" categories in Tables 1a-1c. For each date the Second District reported at least 90 per cent of the total amount in the "other" categories.

NOTE.—The statistics in this section are based on reports by banks, bankers, brokers, and dealers. Certain changes in the reporting forms and instructions were made as of Mar. 31, 1954, and there were also changes, beginning with the BULLETIN for June 1954, in the content, order, and selection of the material published, as explained on p. 591 of that issue. For discontinued tables and data reported under previous instructions, see BULLETIN for May 1954, pp. 540-545.

^aPreliminary.

^b"Short-term claims" reported in these statistics represent principally the following items payable on demand or with a contractual maturity of not more than one year: loans made to and acceptances made for foreigners; drafts drawn against foreigners that are being collected by banking institutions on behalf of their customers in the United States; and foreign currency balances held abroad by banking institutions and their customers in the United States. The term "foreigner" is used to designate foreign governments, central banks, and other official institutions, as well as banks, organizations, and individuals domiciled outside the United States, including U. S. citizens domiciled abroad and the foreign subsidiaries and offices of U. S. banks and commercial firms.

^cBeginning Mar. 31, 1954, banks whose total claims on foreigners are less than \$500,000 are excluded. Banks claiming this exemption reported a total of 9.6 million dollars of such claims on that date.

^dLess than \$50,000.

Gold production in U.S.S.R.: No regular government statistics on gold production in U.S.S.R. are available, but data of percentage changes irregularly given out by officials of the gold mining industry, together with certain direct figures for past years, afford a basis for estimating annual production as follows: 1934, 135 million dollars; 1935, 158 million; 1936, 187 million; 1937, 185 million; and 1938, 180 million.

¹ Estimates of United States Bureau of Mines.

² Reported by American Bureau of Metal Statistics.

³ Yearly figures are estimates of United States Mint. Monthly figures are estimates of American Bureau of Metal Statistics.

⁴ Gold exports reported by the National Bank of Nicaragua, which states that they represent approximately 90 per cent of total production.

NOTE.—For explanation of table and sources, see BULLETIN for June 1948, p. 731, and *Banking and Monetary Statistics*, p. 524. For annual estimates compiled by the United States Mint for these and other countries in the period 1910–1941, see *Banking and Monetary Statistics*, pp. 542–543; for figures subsequent to 1941 see BULLETIN for April 1953, p. 427.

¹Revised.

²Includes gold reserves of Bank of France and French dependencies only.

³Includes holdings of other Continental OEEC countries, Finland, Yugoslavia, Bank for International Settlements, (both for its own and European Payments Union account), gold to be distributed by the Tripartite Commission for Restitution of Monetary Gold, and unpublished gold reserves of certain Western European countries.

⁴Excludes gold reserves of the U. S. S. R.

⁴Includes holdings of International Bank for Reconstruction and Development, International Monetary Fund, and United Nations and other international organizations.

NOTE.—Includes reported and estimated gold reserves of central banks, governments, and international institutions, and official and private dollar holdings as shown in Tables 1 and 1a-1d of the preceding section, as well as certain longer term U. S. Government securities reported as purchased within 20 months of maturity. For back figures see BULLETIN for March 1954, p. 245.

^aPreliminary. ^bCorrected.

¹Includes reported gold holdings of central banks and governments and international institutions, unpublished holdings of various central banks and governments, estimated holdings of British Exchange Equalization Account based on figures shown below under United Kingdom, and estimated official holdings of countries from which no reports are received.

²Includes gold in Exchange Stabilization Fund. Gold in active portion of this Fund is not included in regular statistics on gold stock (Treasury gold) used in the Federal Reserve statement "Member Bank Reserves, Reserve Bank Credit, and Related Items" or in the Treasury statement "United States Money, Outstanding and in Circulation, by Kinds."

³Represents gold holdings of Bank of France (holdings of French Exchange Stabilization Fund are not included).

⁴Exchange Equalization Account holdings of gold, U. S. and Canadian dollars, as reported by British Government. (Gold reserves of Bank of England have remained unchanged at 1 million dollars since 1939, when Bank's holdings were transferred to Exchange Equalization Account.)

NOTE.—For description of figures, including details regarding special internal gold transfers affecting the reported data, see *Banking and Monetary Statistics*, pp. 524-535; for back figures through 1941 see p. 526 and Table 160, pp. 544-555, in the same publication and for those subsequent to 1941 see BULLETIN for January 1953, p. 74; April 1951, p. 464; February 1950, p. 252; and November 1947, p. 1433. For revised back figures for Argentina and Canada, see BULLETIN for January 1949, p. 86, and February 1949, p. 196, respectively.

¹Currencies include demand obligations held in lieu of deposits.
²Represents total principal of authorized loans, less loans not yet effective, repayments, the net amount outstanding on loans sold or agreed to be sold to others, and exchange adjustment.
³Excludes uncalled portions of capital subscriptions.
⁴Loans to dependencies of member countries are included with member.
⁵Includes also effective loans agreed to be sold but not yet disbursed.
⁶Includes 149 million dollars in loans not yet effective.
⁷Of this amount, 24 million dollars is guaranteed and 47 million is not guaranteed by the Bank.
⁸Includes countries having cumulative net drawings of 10 million dollars (+ or -) on the latest date.
⁹Represents for each country purchases of other currencies from Fund less purchases of own currency by it or other countries.

¹On June 9, 1945, the official buying price of the Bank of England for gold was increased from 168 shillings to 172 shillings and threepence per fine ounce, and on Sept. 19, 1949, it was raised to 248 shillings. For details regarding previous changes in the buying price of gold and for internal gold transfers during 1939, see BULLETIN for March 1950, p. 388, footnotes 1 and 4.

²Securities and silver coin held as cover for fiduciary issue, the amount of which is also shown by this figure.

³Notes issued less amounts held in banking department.

⁴Fiduciary issue decreased by 50 million pounds on Jan. 6, by 25 million on Jan. 13 and Jan. 27; increased by 50 million on Mar. 17, June 2 and July 13, by 25 million on July 28; decreased by 50 million on Aug. 18, by 25 million on Sept. 1. For details on previous changes, see BULLETIN for February 1954, p. 222.

NOTE.—For back figures, see *Banking and Monetary Statistics*, Table 164, pp. 638-640; for description of statistics, see pp. 560-561 in same publication.

On May 1, 1940, gold transferred to Foreign Exchange Control Board in return for short-term Government securities (see BULLETIN for July 1940, pp. 677-678).											
² Securities maturing in two years or less.											
³ Includes notes held by the chartered banks, which constitute an important part of their reserves.											
⁴ Beginning November 1944, includes a certain amount of sterling and United States dollars.											
⁵ For details on devaluations and other changes in the gold holdings of the Bank of France, see BULLETIN for September 1951, p. 1211; September 1950, pp. 1132 and 1261; June 1949, p. 747; May 1948, p. 601; May 1940, pp. 406-407; January 1939, p. 29; September 1937, p. 853; and November 1936, pp. 878-880.											
⁶ For explanation of these items, see BULLETIN for January 1950, p. 117, footnote 6.											
⁷ Beginning January 1950, when the Bank of France modified the form of presentation of its statement, the figures under this heading are not strictly comparable with those shown for earlier dates.											
⁸ Includes the following amounts (in millions of francs) for account of the Central Administration of the Reichskreditkassen: 1941, 64,580; 1942, 16,857; 1943, 10,724.											
⁹ Includes advance to Stabilization Fund, amounting to 61.4 billion francs on Sept. 30.											

NOTE.—For back figures on Bank of Canada and Bank of France, see *Banking and Monetary Statistics*, Tables 166 and 165, pp. 644-645 and pp. 641-643, respectively; for description of statistics, see pp. 562-564 in same publication. For last available report from the Reichsbank (February 1946), see BULLETIN for December 1946, p. 1424.

¹This table represents aggregates of figures reported by individual banks. Data are compiled on the third Wednesday of each month, except in June and December when the statements give end-of-month data.

²Represent six-month loans to the Treasury with a yield of $\frac{1}{2}$ per cent after October 1945.

³In accordance with the Bank Act of 1954, the form of presentation of the banks' statement was revised beginning July 1954, and figures shown may not be strictly comparable with those for earlier dates.

⁴In January 1950, the Bank of Canada assumed responsibility for these notes.

NOTE.—For details concerning data in earlier years, see BULLETIN for April 1952, p. 466; for back figures and figures on German commercial banks, see Banking and Monetary Statistics, Tables 168-171, pp. 648-655, and for description of statistics, see pp. 566-571 in same publication.

¹For figures on free rate for the period Feb. 25-Oct. 9, 1953, inclusive, see BULLETIN for November 1953, p. 1231. The average for this period was 2.3274.

²Based on quotations beginning Nov. 30, 1953.

³Official rate, based on quotations through Oct. 9, 1953. Effective Oct. 12, 1953, the Brazilian authorities introduced new exchange ratios for Brazilian exports. Under the new system premiums of 5 and 10 cruzeiros, depending upon type of merchandise, were added to the former rate of 5.4466 cents, thus establishing two rates—4.2808 and 3.5261 cents, respectively.

⁴Based on quotations through Aug. 13, 1954.

⁵Based on quotations beginning Apr. 1, 1954.

⁶The Mexican peso was devalued, effective Apr. 19, 1954, from a par value of 8.65 to 12.50 pesos per U. S. dollar.

⁷Rate applied (except free rate) depends upon type of merchandise. In addition to the rates shown, a fifth rate was certified May 8-Dec. 4, 1953, inclusive; the average for this period was 53.1914.

⁸Based on quotations through Dec. 4, 1953.

⁹Free rate, based on quotations Feb. 10-Dec. 4, 1953, inclusive.

NOTE.—For back figures, see *Banking and Monetary Statistics*, Table 173, pp. 662-682. For description of statistics, see pp. 572-573 in same publication, and for further information concerning rates and averages for previous years, see BULLETIN for December 1953, p. 1409.

* Preliminary.

¹ These series are the revised indexes, reflecting, beginning January 1953, the inclusion of some new series and revised weights. Prior to January 1953 indexes are based on the "interim adjusted" and "old" indexes, converted to the base 1947-49 = 100.

NOTE.—For sources and references concerning changes in the structure of price indexes for various countries (except the United States), see BULLETIN for December 1952, p. 1357.

¹ Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent 20-year bond.

² Represents the reciprocals of average yields. The average yield in the base period (January-March 1937) was 3.39 per cent.

³ Average of the ratios of current prices to nominal values, expressed as a percentage.

NOTE.—For sources and references concerning changes in the structure of price series for various countries, see BULLETIN for December 1952, p. 1357.
